SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter dated May 8, 2026, NS petitioned FRA for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 236 (Rules, Standards, and Instructions Governing the Installation, Inspection, Maintenance, and Repair of Signal and Train Control Systems, Devices, and Appliances). The relevant Docket Number is FRA-2010-0011.

Specifically, NS seeks an extension of relief from the 2-year periodic testing requirements in §§ 236.377, *Approach locking*; 236.378, *Time locking*; 236.379, *Route locking*; 236.380, *Indication locking*; and 236.381, *Traffic locking*, related to vital microprocessor-based systems. The existing relief extends the testing requirements in these sections from “at least once every 2 years” to every 4 years, after initial testing is completed. In its petition, NS stated that the waiver “supports efficient testing practices while maintaining the integrity and safety of vital signal system operations.”
