SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through March 31, 2027. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

This document allows 60 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at <https://www.regulations.gov> or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those

who are to respond, including through the use of appropriate forms of information technology. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** document to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The authority for the emergency planning and emergency release notification requirements is sections 302, 303, and 304 of the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986 [42 U.S.C. 11002, 11003, and 11004]. EPCRA established broad emergency planning and facility reporting requirements. Section 302 requires facilities to notify their State Emergency Response Commission (SERC) to include Tribal Emergency Response Commission (TERC), Local Emergency Planning Committee (LEPC) to include Tribal Emergency Planning Committee (TEPC) with jurisdiction over their facility, of the presence of a threshold planning quantity of a listed extremely hazardous substance (EHS) at the facility. This activity was completed by existing facilities soon after the law was passed. Only new facilities that may become subject to these requirements must notify the SERC and the LEPC. Currently covered facilities are required to notify the LEPC of any changes that occur at the facility which would be relevant to emergency planning. Section 303 requires the LEPC to prepare local emergency response plans for their planning district using the information provided by facilities under section 302. An LEPC may request any information from facilities necessary to develop emergency response plans. Initial emergency response plans were developed within a few months after the law was passed. LEPCs are required to review and update the plan at least annually or more frequently as changes occur in the community. Section 304 requires facilities to report to SERCs and LEPCs releases in excess of the reportable quantities listed for each EHS. This ICR also covers the notification and the written follow-up required under section 304. The implementing regulations are codified in 40 CFR part 355.

Form numbers: None.

Respondents/affected entities: Entities potentially affected by this action are those which have a threshold planning quantity of an EHS listed in 40 CFR part 355, appendix A and those which have a release of any of the EHSs above a

reportable quantity. Entities more likely to be affected by this action may include chemical manufacturers, retailers, petroleum refineries, utilities, etc.

Respondent's obligation to respond: Mandatory (sections 302, 303, and 304 of EPCRA).

Estimated number of respondents: 108,556 (total). This figure includes 3,556 LEPCs and SERCs and will be updated, as needed, during the 60-day OMB review period.

Frequency of response: EPCRA section 302 reporting is a one-time notification unless there are changes to the reported information; EPCRA section 304 notification happens only when a release occurs from a facility.

Total estimated burden: 222,856 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$11.67 million (per year), which includes \$8,470 annualized operation & maintenance costs. There are no capital costs associated with this ICR.

Changes in the estimates: The burden hours are likely to stay substantially the same. Any change in burden or cost resulting from the 60-day OMB review period will be described and explained in this section when the updated ICR Supporting Statement is completed.

Director, Office of Resource Conservation and Recovery.
