

1990 (OPA; 33 U.S.C. 2701 *et seq.*), designated Federal and State trustees, acting on behalf of the public, assessed the injuries to natural resources and prepared the *Deepwater Horizon Oil Spill Final Programmatic Damage Assessment and Restoration Plan and Final Programmatic Environmental Impact Statement* (Final PDARP/PEIS), and subsequent record of decision (ROD), which sets forth the governance structure and process for Deepwater Horizon (DWH) restoration planning under the OPA's natural resource damage assessment (NRDA) regulations. On April 4, 2016, the United States District Court for the Eastern District of Louisiana entered a Consent Decree resolving civil claims by the Trustees against BP.

The Mississippi Trustee Implementation Group (MS TIG) is composed of the Mississippi Department of Environmental Quality, the U.S. Environmental Protection Agency (EPA), the U.S. Department of the Interior (DOI), the National Oceanic and Atmospheric Administration (NOAA), and the U.S. Department of Agriculture (USDA). The MS TIG selects and implements restoration projects under its management authority in accordance with the Consent Decree. The Final PDARP/PEIS, ROD, Consent Decree, and information on the DWH Trustees can be found at <https://www.gulfspillrestoration.noaa.gov/restoration-planning/gulf-plan>.

Background

On May 8, 2024, the MS TIG posted a call for restoration project ideas on the DWH Trustee Council website. On June 2, 2025, following the completion of project screening, the MS TIG posted a public notice on the DWH Trustees' website indicating that the MS TIG was initiating restoration planning for this RP5/EA, for two restoration types: Nutrient Reduction and Birds. The Draft RP5/EA includes a reasonable range of five action alternatives and identifies three preferred alternatives for implementation.

Overview of the MS TIG's Draft RP5/EA

The Draft RP5/EA is being released in accordance with OPA, its implementing NRDA regulations found in the Code of Federal Regulations (CFR) at 15 CFR part 990, the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*), the Final PDARP/PEIS, and the Consent Decree. The Draft RP5/EA provides OPA and NEPA analyses for a reasonable range of five action alternatives. Two of the action alternatives are nutrient reduction alternatives. The preferred nutrient reduction alternative would

include hydrologic and stormwater system enhancements to address nutrient loading in Moss Point, MS, through the construction of a nature-based stormwater park and urban reforestation in the watershed.

The non-preferred nutrient reduction alternative would implement a suite of USDA conservation practices aimed at reducing nutrient loads in the Big Cedar Creek—West Pascagoula River watershed. The plan also analyzes implementation of three bird restoration alternatives. There are two preferred Birds restoration alternatives. One would benefit multiple species of migratory birds affected by the oil spill, by maximizing and enhancing shallow-water habitat in wetland management units in the Lower Mississippi River Valley. The other involves creation of beach/dune habitat to provide nesting and foraging opportunities for Mississippi's shorebird population on Cat Island.

The non-preferred Birds restoration alternative would protect nesting bird habitat on the mainland beaches through the use of predator management techniques.

The total estimated cost to implement the three preferred alternatives is approximately \$19,500,000, which is proposed to be funded from the following DWH NRDA restoration type allocations:

- *MS TIG Nutrient Reduction*: \$6,000,000
- *MS TIG Birds*: \$13,500,000

Administrative Record

The documents comprising the administrative record for the Draft RP5/EA can be viewed electronically at <https://www.doi.gov/deepwaterhorizon/adminrecord> under folder 6.5.6.2.5.
