Department sponsoring the collection: Form 1–786; CJIS Division, FBI, DOJ.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public: Individuals. The obligation to respond is required to obtain/retain a benefit.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The total number of respondents for 1–768 Credit Card Form is 36,385 per year. The time per response is 2 minutes to complete the 1–768 Credit Card Form.

6. *An estimate of the total annual burden (in hours) associated with the collection:* The total annual burden hours for this collection is 1,213 hours.

1. An estimate of the total annual cost burden associated with the collection, if applicable: $27.72 avg hourly wage × 1,213 hours = $33,624.36 cost burden.

7.

Activity	Number of respondents	Frequency (annually)	Total annual responses	Time per response (min)	Total annual burden (hours)
1–786 Credit Card Form	36,385	1	36,385	2	1,213
Unduplicated Totals	36,385	1	36,385	2	1,213

8.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Enterprise Portfolio Management, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: June 29, 2026.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–02–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Loans to Plan Participants and Beneficiaries Who Are Parties in Interest With Respect to the Plan Regulation

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employee Benefits Security Administration (EBSA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before July 31, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: Section 406(a)(1)(B) of ERISA prohibits the lending of money or other extensions of credit between a plan and a party in interest. A statutory exemption is provided in ERISA section 408(b)(1), which exempts plan loans made to participants and beneficiaries from the prohibited transaction provisions of sections 406(a), (b)(1), and (b)(2) of ERISA if the loans: (A) are made available to all participants and beneficiaries on a reasonably equivalent basis; (B) are not made available to highly compensated employees, officers, or shareholders in an amount greater than the amount made available to other employees; (C) are made in accordance with specific provisions regarding such loans set forth in the plan; (D) bear a reasonable rate of interest; and (E) are adequately secured.

For purposes of this information collection, section 408(b)(1)(C) of ERISA requires plan loans to be made in accordance with specific provisions set forth in the plan document. The Department's regulation at 29 CFR 2550.408b–1(d) prescribes eight specific provisions that must be included in the plan documents, including: (1) an explicit authorization for the plan fiduciary responsible for investing plan assets to establish such a loan program; (2) the identity of the person or position authorized to administer the program; (3) a procedure for applying for loans; (4) the basis on which loans will be approved or denied; (5) limitations (if any) on the types and amounts of loans offered; (6) the procedure for determining a reasonable rate of interest; (7) types of collateral that may secure a participant loan; and (8) the events constituting default and the steps that will be taken to preserve plan assets in the event of such default. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on February 18, 2026 (91 FR 7528).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–EBSA.

Title of Collection: Loans to Plan Participants and Beneficiaries Who Are

Parties in Interest with Respect to the Plan Regulation.

OMB Control Number: 1210–0076.

Affected Public: Private sector.

Total Estimated Number of Respondents: 2,702.

Total Estimated Number of Responses: 2,702.

Total Estimated Annual Time Burden: 8,106 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Michael Howell,

Senior Paperwork Reduction Act Analyst.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Allegheny Metallurgical, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before July 31, 2026.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2026–0628 by any of the following methods:

1. *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for MSHA–2026–0628.
2. *Fax:* 202–693–9441.
3. *Email: petitioncomments@dol.gov*.
4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, Room C3522, 200 Constitution Ave. NW, Washington, DC 20210.

Attention: Corliss A. Josephs-Conway, Acting Director, Office of Standards, Regulations, and Variances. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9440 to make an appointment.

FOR FURTHER INFORMATION CONTACT: Corliss A. Josephs-Conway, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), *Petitionsformodification@dol.gov* (email), or 202–693–9441 (fax). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2026–014–C.

Petitioner: Allegheny Metallurgical, LLC, 7004 Buckhannon Road, Volga, WV 26238.

Mine: Longview Mine, MSHA ID No. 46–09447, located in Barbour County, West Virginia.

Regulation Affected: 30 CFR 75.503 (Schedule 2G, § 18.35), Permissible electric face equipment; maintenance.

Modification Request: The petitioner requests modification of 30 CFR 75.503 (Schedule 2G, § 18.35) to permit the use of trailing cables exceeding the length specified in § 18.35.

The petitioner states that:

(a) Longview Mine is requesting a modification of the existing standard as it applies to the length of portable (trailing) cables supplying power to 995 VAC mining equipment including continuous miners, roof bolters, shuttle cars and auxiliary fans. Longview proposes a maximum cable length of 1,000 feet for section equipment during development of mains, sub-mains, three-entry development sections, bleeder, and recovery entries.

(b) Longview Mine is requesting this modification for multiple reasons. First, the mine design has required larger pillars to be left for roof control and longer distances to be traveled for the equipment than originally planned. Second, extended cable would reduce exposures by allowing the mine to eliminate the use of distribution boxes and would allow the power center to be placed in a crosscut instead of leaving the power center in the escapeway entry of three entry sections. Third, 1,000′ cable lengths would reduce the amount of ''backlash'' of the cables, reducing the potential for cable damage and employee exposure to damaged cables.

(c) The Short-Circuit Calculation Program, developed by MSHA's Approval and Certification Center, was used to evaluate the mine's electrical system and predict the fault current available for the 1,000 feet cables. The short circuit analysis indicated that adequate fault current was available to trip the protective circuit breakers for all listed equipment under a short circuit condition.

(d) Longview Mine is located at 620 Peel Tree Road, Volga, West Virginia. Longview will operate and extract coal from the Lower Kittanning and Upper Mercer coal seams. The average mining height will be 8.5 feet. At the Longview Portal, the Lower Kittanning coal seam is approximately 880 feet below the surface. The mine will be ventilated by a 16-foot diameter intake air shaft and fan which is located at the portal site. A 24-foot combination return and hoist divided shaft will be used for exhaust air and personnel access via a 5-ton rated hoist and cage. The return and personnel combination shaft are located at the portal site. Longview will utilize the room and pillar and longwall mining methods to extract coal and employ approximately 450 coal miners. Additional access for people and supplies will be by a 125-ton mine hoist system which will travel down a 3,500 foot, 15-degree slope. The slope floor will have rail installed for a brake car which personnel can use. The slope entry will also contain a 72-inch mine conveyor in the top portion of the slope, which will transport coal from the seam to the surface. The primary equipment to be utilized on the rail will be diesel equipment, including the use of motors to transport equipment and supplies.

(e) The alternative method will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

The petitioner proposes the following alternative method:

(a) The maximum lengths of the 995-volt trailing cables shall be 1,000 feet.

(b) The section equipment's trailing cables shall not be smaller than No. 6 American Wire Gauge (AWG). At no time shall a trailing cable be smaller than specified in the approval documentation for the machine.

(c) All circuit breakers used to protect trailing cables exceeding the maximum length specified in 30 CFR 18.35(a)(5)(i) shall have instantaneous trip units
