

to-911 service with an initial deadline of December 31, 2014 for all covered text providers to be capable of supporting text-to-911 service. The Second Report and Order also provided that covered text providers would then have a six-month implementation period. They must begin routing all 911 text messages to a Public Safety Answering Point (PSAP) by June 30, 2015 or within six months of a valid PSAP request for text-to-911 service, whichever is later. To implement these requirements, the Commission seeks to collect information primarily for a database in which PSAPs voluntarily register that they are technically ready to receive text messages to 911. As PSAPs become text-ready, they may either register in the PSAP database (or submit a notification to PS Docket Nos. 10–255 and 11–153), or provide other written notification reasonably acceptable to a covered text messaging provider. Either measure taken by the PSAP constitutes sufficient notification pursuant to the rules in the Second Report and Order. PSAPs and covered text providers may also agree to an alternative implementation timeframe (other than six months). Covered text providers must notify the FCC of the dates and terms of any such alternate timeframe within 30 days of the parties' agreement. Additionally, the rules adopted by the Second Report and Order include other information collections for third party notifications necessary for the implementation of text-to-911, including notifications to consumers, covered text providers, and the Commission. These notifications are essential to ensure that all affected parties are aware of the limitations, capabilities, and status of text-to-911 services. These information collections enable the Commission to meet the objectives for implementation of text-to-911 service and for compliance by covered text providers with the six-month implementation period in furtherance of the Commission's core mission to ensure the public's safety. These rules are codified at 47 CFR 9.10(q).

Real Time Text. In a Report and Order and Further Notice of Proposed Rulemaking, released on December 16, 2016, in CG Docket No. 16–145 and GN Docket No. 15–178, the Commission amended its rules to facilitate a transition from text telephone (TTY) technology to RTT as a reliable and interoperable universal text solution over wireless internet protocol (IP) enabled networks for people who are deaf, hard of hearing, deaf-blind, or have a speech disability. Section 9.10(c) of the rules requires Commercial Mobile

Radio Service (CMRS) providers to be “capable of transmitting 911 calls from individuals with speech or hearing disabilities through means other than mobile radio handsets, *e.g.*, through the use of [TTY devices].” Additionally, “CMRS providers that provide voice communications over IP facilities are not required to support 911 access via TTYs if they provide 911 access via [RTT] communications, in accordance with 47 CFR part 67, except that RTT support is not required to the extent that it is not achievable for a particular manufacturer to support RTT on the provider's network.” See 47 CFR 9.10(c). The Commission's Report and Order provides that once a PSAP is so capable, the requested service provider must begin delivering RTT communications in an RTT format within six months after a valid request is made—to the extent the provider has selected RTT as its accessible text communication method.

Federal Communications Commission.
