Proposed Project

The National Center for Health Statistics (NCHS) Data Detectives

Camp—New—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

NCHS is authorized to collect data under Section 306 of the Public Health Service Act (42 U.S.C. 242k). NCHS has a history of reaching out to young people to encourage their interest in Science, Technology, Engineering and Math (STEM). Examples of past involvement include adopting local schools, speaking at local colleges, conducting a Statistics Day for high school students, and conducting the NCHS Data Detectives Camp for middle school students.

In prior years, these activities have been approved under a Generic Information Collection entitled “Youth Outreach Generic Clearance for the National Center for Health Statistics” (OMB No. 0920-0164, Exp. Date 03/31/2026). This year, NCHS is requesting a New Information Collection Request (ICR) to consolidate the activities conducted under the Data Detectives Camp. This ICR is designed for outreach to middle school aged children and those who support them, such as parents, teachers, and counselors.

Information will be collected through application and registration forms, teacher recommendation forms, and evaluation forms. OMB approval is requested for three years. Participation is voluntary. The burden table below represents each type of respondent for one annual cycle of data collection (which includes a maximum of four camps). CDC requests approval for an estimated 1,100 annualized burden hours. There is no cost to respondents other than their time.
