

percent. This is lower than the effective fee percentage for the 2025/2026 crab fishing year of 1.2 percent (90 FR 35508, July 28, 2025). The fishery value increased by approximately 37.5 percent from the prior year. Overall direct program costs decreased by approximately 10 percent, resulting in a reduced fee percentage. A more detailed explanation will be provided in the annual Cost Recovery Report, which will be published in April of 2027. Similar to previous years, the largest direct Program costs were incurred by the State of Alaska Department of Fish and Game and the NOAA Office of Law Enforcement.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Alaska Department of Transportation and Public Facilities' Ward Creek Bridge Replacement Project in Ketchikan, Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorizations.

SUMMARY: In accordance with regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued two incidental harassment authorizations (IHAs) to Alaska Department of Transportation and Public Facilities (ADOT&PF) for authorization to take marine mammals incidental to the Ward Creek Bridge Replacement Project in Ketchikan, Alaska (AK).

DATES: These authorizations are effective from May 1, 2028, through April 30, 2029 for Year 1 and May 1, 2029, through April 30, 2030 for Year 2.

SUPPLEMENTARY INFORMATION:

MMPA Background and Determinations

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Among the exceptions is section 101(a)(5)(D) of the MMPA (16 U.S.C. 1361 *et seq.*) which directs the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking by harassment of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and the public has an opportunity to comment on the proposed IHA.

Specifically, NMFS shall issue an IHA if it finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least [practicable] adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to here as “mitigation”). NMFS must also prescribe requirements pertaining to the monitoring and reporting of such takings. The definitions of key terms, such as “take,” “harassment,” and “negligible impact,” can be found in the MMPA and the NMFS’ implementing regulations (see 16 U.S.C. 1362; 50 CFR 216.103).

On May 11, 2026, a notice of NMFS’ proposal to issue two IHAs to ADOT&PF for take of marine mammals incidental to the Ward Creek Bridge Replacement Project in Ketchikan, AK was published in the **Federal Register** (91 FR 25528). In that notice, NMFS indicated the estimated numbers, type, and methods of incidental take proposed for each species or stock, as well as the mitigation, monitoring, and reporting measures that would be required should

the IHA be issued. The **Federal Register** notice also included analysis to support NMFS’ preliminary conclusions and determinations that the IHA, if issued, would satisfy the requirements of section 101(a)(5)(D) of the MMPA for issuance of the IHA. The **Federal Register** notice included web links to a draft IHA for review, as well as other supporting documents.

No substantive comments were received during the public comment period. With the exception of the minor change described below, there are no changes to the specified activity, the species taken, the proposed numbers, type, or methods of take, or the mitigation, monitoring, or reporting measures in the proposed IHA notice. No new information that would change any of the preliminary analyses, conclusions, or determinations in the proposed IHA notice has become available since that notice was published, and therefore, the preliminary analyses, conclusions, and determinations included in the proposed IHA are considered final.

Changes From the Proposed IHA to the Final IHA

As a result of our consultation under Section 7 of the Endangered Species Act (ESA), for Year 2 of the project, NMFS has increased the Level B harassment takes for the Hawai’i stock of humpback whale from 62 to 63 and has decreased the Level B harassment takes for the Mexico-North Pacific stock of humpback whale from 2 to 1.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action (*i.e.*, the issuance of an IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NAO 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHAs qualifies to be categorically excluded from further NEPA review.

Endangered Species Act

Section 7(a)(2) of the ESA of 1973 (16 U.S.C. 1531 *et seq.*) requires that each

Federal agency ensures that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

NMFS Office of Protected Resources is authorizing take of the Mexico Distinct Population Segment (DPS) of humpback whale, which are listed as threatened under the ESA. NMFS requested consultation under section 7 of the ESA on May 11, 2026. The NMFS Alaska Regional Office issued a Biological Opinion under section 7 of the ESA, on the issuance of the IHAs to ADOT&PF under section 101(a)(5)(D) of the MMPA by the NMFS Office of Protected Resources. The Biological Opinion concluded that the action is not likely to jeopardize the continued existence of the humpback whale (Mexico DPS) and is not likely to destroy or adversely modify critical habitat for this species.

Authorization

Accordingly, consistent with the requirements of section 101(a)(5)(D) of the MMPA, NMFS has issued two IHAs to ADOT&PF for authorization to take marine mammals incidental to the Ward Creek Bridge Replacement project in Ketchikan, AK.
