

invalid for any purpose, including entering imported merchandise into the United States. CBP may also take other enforcement actions, as appropriate.

To ensure compliance with legal requirements and avoid potential voiding of IOR numbers, the IOR, or customs broker providing information on the IOR's behalf, must provide accurate and complete information when submitting entity details via CBP Form 5106, and ensure that the information on file remains accurate and up-to-date. Customs brokers must exercise due diligence to ensure this information is accurate.⁴ Customs brokers should not transmit information to CBP that they know or should know is false or misleading, including unverified information.⁵ This includes, but is not limited to:

- **Physical Address:** The physical address provided for the IOR must be the actual physical location of the business or individual.⁶ It cannot be a registered agent, customs broker, freight forwarder, P.O. box, a business service center, or an address of another person or entity.

- **Email Address:** The email address submitted must be valid and belong to the IOR. Customs brokers or third parties may not supply their own email address, or the email address of another person or entity, in place of the IOR's email address.

- **Phone Number:** The phone number provided must be valid and belong to the IOR. Numbers not associated with the IOR should not be submitted. Customs brokers or third parties may not supply their own phone number, or the phone number of another person or entity, in place of the IOR's phone number.

When updating this and all other information on CBP Form 5106, the party certifying the CBP Form 5106 must take appropriate steps to verify the information prior to submission. The certifying party may be subject to fines or imprisonment under 18 U.S.C. 1001 or other legal consequences for making an intentional false statement or committing deception or fraud on the CBP Form 5106. Additionally, because IOR data is an important identifier for liability for payment of duties, the provision of inaccurate or misleading information on CBP Form 5106 is material to an obligation to pay money to CBP and could subject the IOR or

associated individuals to liability under the False Claims Act or other laws. *See, e.g.,* 31 U.S.C. 3729 *et seq.* Refer to CBP Form 5106 instructions for detailed requirements and ensure all updates and corrections are made promptly to avoid compliance issues and other consequences. Customs brokers submitting inaccurate or invalid information on a CBP Form 5106 may also be subject to broker penalties or other consequences pursuant to 19 U.S.C. 1641.

Furthermore, customs brokers must have a valid POA with the IOR that authorizes the customs broker to submit information to CBP on the IOR's behalf. Customs brokers must execute the POA directly with the IOR, not via a freight forwarder or other third party.⁷

III. Procedure for Voiding IOR Numbers and Requesting That Voided IOR Numbers Be Reestablished

As noted above, consistent with E.O. 14411, customs enforcement is essential to the national security, foreign policy, and economy of the United States. Enhanced customs enforcement will protect Americans from unlawful and dangerous goods. Accurate information regarding IORs is essential for ensuring compliance with customs and trade laws of the United States in order to safeguard national security, enforce product safety requirements, and protect the revenue. As such, if CBP determines that the information provided on a CBP Form 5106 is inaccurate or incomplete, CBP will, as of September 18, 2026, immediately void the associated IOR number. CBP will issue a written notice of this action to an IOR to the email address the IOR most recently submitted to CBP, that notifies the IOR of the basis for voiding the IOR number. If applicable, CBP will copy the customs broker that last filed entry on behalf of the IOR when issuing the notice. The notice will include information on how to request reestablishment of the IOR number, including what information must be submitted to CBP to corroborate the identity of the requesting IOR. The IOR or a customs broker with a valid POA may contact CBP at IORProgram@cbp.dhs.gov with questions regarding a voided IOR number.

Susan S. Thomas,

Executive Assistant Commissioner, Office of Trade.

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2026–0166]

Agency Information Collection Activities: The Department of Homeland Security, Emergency Communications Division, Communications Assets Survey and Mapping (CASM) Tool Registration Tool

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: 60-Day notice and request for comments; This is an extension of an existing information collection that was previously approved on 10/17/2023 with an expiration date of 10/31/2026. The control number for this collection is 1670–0043.

SUMMARY: The Emergency Communications Division (ECD) within the Cybersecurity and Infrastructure Security Agency (CISA) submits the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance.

DATES: Comments are encouraged and will be accepted until October 19, 2026.

Submissions received after the deadline for receiving comments may not be considered.

ADDRESSES: You may submit comments, identified by docket number Docket # CISA–2026–0166, by following the instructions below for submitting comment via the Federal eRulemaking Portal at <http://www.regulations.gov>.

Instructions: All comments received must include the agency name and docket number Docket # CISA–2026–0166. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Anais Azoulay, 202–704–5829, anais.azoulay@cisa.dhs.gov.

SUPPLEMENTARY INFORMATION: The Department of Homeland Security (DHS) Cybersecurity and Infrastructure Security Agency (CISA) Emergency Communications Division (ECD), formed under Title XVIII of the Homeland Security Act of 2002, 6 U.S.C. 571 *et seq.*, as amended, is required, pursuant to 6 U.S.C. 571(c)(5) to conduct extensive, nationwide outreach and foster the

⁴ 19 CFR 111.29(a).

⁵ 19 CFR 111.32.

⁶ As explained in the instructions to CBP Form 5106, the physical address must be the address that is associated with the business or the individual. The address associated with the business can be the principal's home address.

development of interoperable emergency communications capabilities by state, regional, local, and tribal governments and public safety agencies, and by regional consortia thereof. To achieve this, ECD provides the communications assets and survey mapping (CASM) tool. The CASM tool is the primary resource nationwide for the emergency communications community to inventory and share asset and training information for the purpose of planning public safety communications operability and interoperability. ECD provides the communications assets survey and mapping (CASM) tool as a secure and free nationwide database to contain communications capabilities for use by federal, state, local, territorial, and tribal (SLTT) emergency personnel. CASM allows federal employees and SLTT statewide interoperability coordinators (SWIC) to inventory emergency communication equipment and resources. The information entered is voluntary and used by SWIC to support tactical planning and coordination during emergencies. ECD does not utilize the information entered into CASM. ECD only provides, maintains, and stores the information entered in the CASM database and only has administrative access to the information entered.

CASM Registration

To get access to the CASM tool, users click on the “request new access” link on the CASM login page (<https://login.CASM.cisa.dhs.gov/>). The registration requires that users enter their name, contact information, reason for their access request, type of data to access, and access level. Once entered, the access request is routed to their organization’s approving authority. Once the organization’s approving authority vets and authorizes the access request, the user account is automatically created, and users are notified via an auto-generated email.

CASM Modules

The CASM consists of voluntary modules related to the different types of capabilities. There is a module for assets, which contains information about emergency equipment, the equipment capabilities and location. There is a personnel module, which contains personnel name, contact information and information about their communications unit (COMU) training. The personnel module allows SWICs to track their personnel’s COMU training.

All information is collected via electronic means. The CASM registration and database tool is

available online via <https://login.CASM.cisa.dhs.gov/>. Users can also access and enter information via the CASM resource finder mobile app.

This information collection does not impact small businesses or other small entities. This database allows ECD to execute its statutory authority under 6 U.S.C. 571 to conduct extensive, nationwide outreach to support and promote the ability of emergency response providers and relevant government officials to continue to communicate in the event of natural disasters, acts of terrorism, and other man-made disasters. Without CASM and the federal government’s ability to empower the states, ECD would not have an organic way for states to create a centralized and secure emergency assets and equipment database. Information is protected by the Privacy Act of 1974 and is kept private or anonymous to the extent allowable by law.

The DHS Privacy Office review finds that this is a privacy sensitive collection requiring a privacy impact assessment (PIA) and system of records notice (SORN). The collection is covered by PIA—DHS/ALL/PIA—006 DHS general contacts list and SORN—DHS/ALL—002 DHS mailing and other lists system, 73 FR 71659 (Nov. 25, 2008) and SORN—DHS/ALL—004 general information technology access account records system (GITAARS), 77 FR 70792 (Nov. 27, 2012).

This is an *extension* of a currently approved collection without change.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Analysis

Agency: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

Title: Communications Assets Survey and Mapping (CASM) Tool Registration Form.

OMB Number: 1670–0043.

Frequency: As needed.

Affected Public: Emergency Communication Personnel.

Number of Respondents: 56 annually.

Estimated Time per Respondent: .5 hours (30 minutes).

Total Burden Hours: 341 hours.

Total Annual Burden Cost: \$19,981.

Total Annual Government Burden Cost: \$3,000,000.

Winfield P. Werntz,

Acting Chief Information Officer, Department of Homeland Security, Cybersecurity and Infrastructure Security Agency.
