

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

De Havilland Aircraft of Canada Limited (Type Certificate Previously Held by Bombardier, Inc.): Docket No. FAA–2026–8810; Project Identifier MCAI–2025–01847–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by November 2, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to De Havilland Aircraft of Canada Limited (Type Certificate previously held by Bombardier, Inc.) Model DHC–8–401 and DHC–8–402 airplanes, certificated in any category, as identified in Transport Canada AD CF–2025–69, dated December 22, 2025 (Transport Canada AD CF–2025–69).

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Unsafe Condition

This AD was prompted by a report that instructions for fay, fillet, and rivet dome sealing were omitted for a bracket installed on the inboard surface of the tank rib at wing station 42, which could allow fuel to leak from the wing fuel tank into the wing dry bay. The FAA is issuing this AD to address this fuel leakage. The unsafe condition, if not addressed, could result in exposure of the dry bay to an unacceptable concentration of fuel vapor, which could lead to a fuel tank explosion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada AD CF–2025–69.

(h) Exception to Transport Canada AD CF–2025–69

(1) Where Transport Canada AD CF–2025–69 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where Transport Canada AD CF–2025–69 refers to hours air time, this AD requires using flight hours.

(3) Where the Corrective Actions paragraph of Transport Canada AD CF–2025–69

specifies “if required, apply”, for this AD, replace that text with “if required, before further flight, apply”.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or De Havilland Aircraft of Canada Limited’s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.
