

of the Bank's decision resolution denying its membership application and a statement of the basis for the appeal containing sufficient facts, information, and analysis to support the applicant's position.⁶ Third, the regulation provides that, in order to initiate a voluntary withdrawal from Bank membership, a member must submit to its Bank a written notice of intent to withdraw.⁷ Fourth, under certain circumstances, the regulation permits a member of one Bank to transfer its membership to a second Bank "automatically" without either initiating a voluntary withdrawal from the first Bank or submitting a membership application to the second Bank. Despite the regulatory reference to such a transfer as being "automatic," a member meeting the criteria for an automatic transfer must initiate the transfer process by filing a request with its current Bank, which will then arrange the details of the transfer with the second Bank.⁸

The Banks use most of the information collected under part 1263 to determine whether an applicant satisfies the statutory and regulatory requirements for Bank membership and should be approved as a Bank member. The Banks may use some of the information collected under part 1263 as a means of learning that a member wishes to withdraw or to transfer its membership to a different Bank so that the Bank can begin to process those requests. FHFA may also use the collected information to determine whether an institution that has been denied membership by a Bank should be permitted to become a member of that Bank.

D. Burden Estimate

FHFA has analyzed the time burden imposed on respondents by the four collections under this control number and estimates that the average total annual hour burden imposed on all respondents by those collections over the next three years will be 1,637 hours. This estimate is derived from the following calculations:

1. Membership Applications

FHFA estimates that the average number of applications for Bank membership submitted annually will be 105 and that the average time to prepare and submit an application and supporting materials will be 15 hours. Accordingly, the estimate for the annual hour burden associated with preparation and submission of

applications for Bank membership is (105 applications × 15 hours per application) = 1,575 hours.

2. Appeals of Membership Denials

FHFA estimates that the average number of applicants that have been denied membership by a Bank that will appeal such a denial to FHFA will be 1 and that the average time to prepare and submit an application for appeal will be 50 hours. Accordingly, the estimate for the annual hour burden associated with the preparation and submission of membership appeals is (1 appellants × 50 hours per application) = 50 hours.

3. Notices of Intent To Withdraw From Membership

FHFA estimates that the average number of Bank members submitting a notice of intent to withdraw from membership annually will be 4 and that the average time to prepare and submit a notice will be 1.5 hours. Accordingly, the estimate for the annual hour burden associated with preparation and submission of notices of intent to withdraw is (4 withdrawing members × 1.5 hours per application) = 6 hours.

4. Requests for Transfer of Membership to Another Bank District

FHFA estimates that the average number of Bank members submitting a request for transfer to another Bank will be 3 and that the average time to prepare and submit a request will be 2 hours. Accordingly, the estimate for the annual hour burden associated with preparation and submission of requests for automatic transfer is (3 transferring members × 2 hours per request) = 6 hours.

E. Comment Request

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
