[For the Environmental Protection Agency statement of organization, see the *Code of Federal Regulations*, Title 40, Part 1]

The Environmental Protection Agency protects and enhances our environment today and for future generations to the fullest extent possible under the laws enacted by Congress. The Agency's mission is to control and abate pollution in the areas of air,

ENVIRONMENTAL PROTECTION AGENCY

water, solid waste, pesticides, radiation, and toxic substances. Its mandate is to mount an integrated, coordinated attack on environmental pollution in cooperation with State and local governments.

The Environmental Protection Agency was established in the executive branch as an independent agency pursuant to Reorganization Plan No. 3 of 1970 (5 U.S.C. app.), effective December 2, 1970. It was created to permit coordinated and effective governmental action on behalf of the environment. The Agency is designed to serve as the public's advocate for a livable environment.

Activities

Air and Radiation The air activities of the Agency include:

- development of national programs, technical policies, and regulations for air pollution control;
- enforcement of standards;
- development of national standards for air quality, emission standards for new stationary and mobile sources, and emission standards for hazardous pollutants;
- technical direction, support, and evaluation of regional air activities; and
- provision of training in the field of air pollution control.

Related activities include technical assistance to States and agencies having radiation protection programs, including radon mitigation programs and a national surveillance and inspection program for measuring radiation levels in the environment.

For further information, call 202-260-7400.

Water The Agency's water quality activities represent a coordinated effort to restore the Nation's waters. The functions of this program include:

- development of national programs, technical policies, and regulations for water pollution control and water supply;
- ground water protection;
- marine and estuarine protection;
- enforcement of standards;
- water quality standards and effluent guidelines development;
- technical direction, support, and evaluation of regional water activities;

—development of programs for technical assistance and technology transfer; and

—provision of training in the field of water quality.

For further information, call 202-260-5700.

Solid Waste and Emergency Response The Office of Solid Waste and Emergency Response provides policy, guidance, and direction for the Agency's hazardous waste and emergency response programs. The functions of these programs include:

- development of policies, standards, and regulations for hazardous waste treatment, storage, and disposal;
- national management of the Superfund toxic waste cleanup program;
- development of guidelines for the emergency preparedness and "Community Right To Know" programs;
- development of guidelines and standards for underground storage tanks;
- enforcement of applicable laws and regulations;
- analysis of technologies and methods for the recovery of useful energy from solid waste; and
- provision of technical assistance in the development, management, and operation of waste management activities.

For further information, call 202-260-4610.

Prevention, Pesticides and Toxic Substances The Office of Pesticides and Toxic Substances is responsible for:

- developing national strategies for the control of toxic substances;
- directing the pesticides and toxic substances enforcement activities;
- developing criteria for assessing chemical substances, standards for test protocols for chemicals, rules and procedures for industry reporting and regulations for the control of substances deemed to be hazardous to man or the environment; and
- evaluating and assessing the impact of existing chemicals, new chemicals,

and chemicals with new uses to determine the hazard and, if needed, develop appropriate restrictions.

Additional activities include:

—controlling and regulating pesticides and reducing their use to ensure human safety and protection of environmental quality;

—establishing tolerance levels for pesticides that occur in or on food;

—monitoring pesticide residue levels in food, humans, and nontarget fish and wildlife and their environments; and

—investigating pesticide accidents.

It also coordinates activities under its statutory responsibilities with other agencies for the assessment and control of toxic substances and pesticides.

For further information, call 202-260-2902.

Research and Development The Office of Research and Development is responsible for a national research program in pursuit of technological controls of all forms of pollution. It directly supervises the research activities of the Agency's national laboratories and gives technical policy direction to those laboratories that support the program responsibilities of the regional offices. Close coordination of the various research programs is designed to yield a synthesis of knowledge from the biological, physical, and social sciences that can be interpreted in terms of total human and environmental needs.

General functions include management of selected demonstration programs, planning for Agency environmental quality monitoring programs, coordination of Agency monitoring efforts with those of other Federal agencies, the States, and other public bodies, and dissemination of Agency research, development, and demonstration results.

For further information, call 202-260-7676.

Regional Offices

The Agency's 10 regional offices represent its commitment to the development of strong local programs for pollution abatement. The Regional Administrators are responsible for accomplishing, within their regions, the

national program objectives established by the Agency. They develop, propose, and implement an approved regional program for comprehensive and integrated environmental protection activities.

Regional Offices—Environmental Protection Agency

(Areas included within each region are indicated on the map in Appendix A.)

Region/Address	Administrator
1. Boston, MA (John F. Kennedy Federal Bldg., 02203).	John P. DeVillars
2. New York, NY (26 Federal Plz., 10278).	Jeanne M. Fox
3. Philadelphia, PA (841 Chestnut St., 19107).	Peter H. Kostmayer
4. Atlanta, GA (345 Courtland St. NE., 30365).	John H. Hankinson, Jr.
5. Chicago, IL (230 S. Dearborn St., 60604).	Valdas V. Adamkus
6. Dallas, TX (1445 Ross Ave., 75202).	Jane N. Saginaw
7. Kansas City, KS (726 Minnesota Ave., 66101).	Dennis D. Grams
8. Denver, CO (999 18th St., 80202).	William P. Yellowtail
9. San Francisco, CA (215 Fremont St., 94105).	Felicia Markus
10. Seattle, WA (1200 6th Ave., 98101).	Charles C. Clarke

The Equal Employment Opportunity Commission eliminates discrimination based on race, color, religion, sex, national origin, disability, or age in hiring, promoting, firing, setting wages, testing, training, apprenticeship, and all other terms and conditions of employment. The Commission conducts investigations of alleged discrimination; makes determinations based on gathered evidence; attempts conciliation when discrimination has taken place; files lawsuits; and conducts voluntary assistance programs for employers, unions, and community organizations. The Commission also has oversight responsibility for all compliance and enforcement activities relating to equal employment opportunity among Federal employees and applicants, including discrimination against individuals with disabilities.

The Equal Employment Opportunity Commission (EEOC) was created by Title VII of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4), and became
