

Bureau of Export Administration

[For the Bureau of Export Administration statement of organization, see the *Federal Register* of June 7, 1988, 53 FR 20881]

The Bureau of Export Administration was established as a separate agency within the Department of Commerce on October 1, 1987, to separate the functions of export promotion and export control as mandated by the Export Administration Act, as amended (50 U.S.C. app. 2401 *et seq.*).

The Bureau directs the Nation's export control policy. Major functions include processing license applications, conducting foreign availability studies to determine when products should be decontrolled, and enforcing U.S. export control laws.

Export Administration This office oversees export licensing, technology and policy analysis, economic security and nonproliferation issues, and foreign availability determinations. These activities are instrumental in reducing processing time for granting export licenses and in keeping the list of controlled technology consistent with current risks. This office also works with

our allies in seeking stronger, more uniform ways of controlling strategic exports.

Export Enforcement This office investigates breaches of U.S. export control laws and analyzes export intelligence to assess diversion risks. In addition, this office administers and enforces the antiboycott provisions of the Export Administration Act.

Economic Development Administration

The Economic Development Administration (EDA) was created in 1965 under the Public Works and Economic Development Act (42 U.S.C. 3121) as part of an effort to target Federal resources to economically distressed areas and to help develop local economies in the United States. It was mandated to assist rural and urban communities that were outside the mainstream economy and that, as a result, lagged in economic development, industrial growth, and personal income.

The Administration's economic development assistance programs (EDAP's) are carried out through a

network of headquarters and regional personnel. It provides grants for public works and development facilities, planning and coordination, defense conversion, and other financial assistance that help to reduce substantial and persistent unemployment in economically distressed areas.

Public works and development facilities grants support infrastructure projects that foster the establishment or expansion of industrial and commercial businesses, supporting the retention and creation of jobs.

Planning grants support the design and implementation of effective economic

development policies and programs, by local development organizations, in States and communities.

Technical assistance grants provide for local feasibility and industry studies, management and operational assistance, natural resource development, and export promotion. In addition, EDA funds a network of university centers that provides technical assistance.

Research, evaluation, and demonstration funds are used to support studies about the causes of economic distress and to seek solutions to counteract and prevent such problems.

Economic readjustment grants help communities adjust to a gradual erosion

or sudden dislocation of their local economic structure.

Defense conversion grants assist communities adversely affected by Department of Defense base closures and defense contract cutbacks, as well as Department of Energy realignments, by providing development tools that can be effectively and easily implemented.

The Trade Adjustment Assistance Program provides technical assistance to certified firms and industries which have been economically injured by the impact of decreased imports. Comprehensive technical assistance is provided through the Department's wide-ranging network of assistance centers.

International Trade Administration

[For the International Trade Administration statement of organization, see the *Federal Register* of Jan. 25, 1980, 45 FR 6148]

The International Trade Administration was established on January 2, 1980, by the Secretary of Commerce to promote world trade and to strengthen the international trade and investment position of the United States.

The Administration is headed by the Under Secretary for International Trade, who coordinates all issues concerning import administration, international economic policy and programs, and trade development. It is responsible for nonagricultural trade operations of the U.S. Government and supports the trade policy negotiation efforts of the U.S. Trade Representative.

International Economic Policy The Assistant Secretary for International Economic Policy advises on the analysis, formulation, and implementation of international economic policies of a bilateral, multilateral, or regional nature. Reporting to the Assistant Secretary are five Deputy Assistant Secretaries (for Europe; the Western Hemisphere; Asia and the Pacific; Africa and the Near East; and Japan) who have responsibility for trade and investment issues with particular countries and regions of the world. In addition, there is a Deputy Assistant Secretary for International Economic Policy who has responsibility for multilateral affairs and for overall policy coordination.

Import Administration The Assistant Secretary for Import Administration defends American industry against

injurious and unfair trade practices by administering efficiently, fairly, and in a manner consistent with U.S.

international trade obligations the antidumping and countervailing duty laws of the United States; the machine tool arrangements with Japan and Taiwan under the President's Machine Tool Program; and the U.S.-Japan Semiconductor Agreement. The Assistant Secretary ensures the proper administration of foreign trade zones and advises the Secretary on establishment of new zones; and administers programs governing watch assemblies, and other statutory import programs.

Trade Development The Assistant Secretary for Trade Development provides advice on international trade and investment policies pertaining to U.S. industrial sectors, carries out programs to strengthen domestic export competitiveness, and promotes U.S. industry increased participation in international markets. The Assistant Secretary manages an integrated Trade Development Program that includes industry analysis and trade promotion organized by industry sectors. Deputy Assistant Secretaries for Technology and Aerospace Industries; Basic Industries; Service Industries and Finance; Textiles, Apparel and Consumer Goods Industries; and Environmental Technologies Exports report to the Assistant Secretary.

U.S. and Foreign Commercial Service The Assistant Secretary and Director General of the U.S. and Foreign Commercial Service develops, produces, markets, and manages an effective line
