

Principal Deputy Director (Principal Deputy
General Counsel)

F. WHITTEN PETERS

The Defense Legal Services Agency was established by Department of Defense Directive 5145.4, dated August 12, 1981. The Agency is under the authority, direction, and control of the General Counsel of the Department of Defense, who also serves as its Director.

The Agency provides legal advice and services for the Office of the Secretary of Defense, its field activities, and the Defense agencies. It provides technical support and assistance for development

of the Department's Legislative program; coordinates positions on legislation and Presidential Executive orders; provides a centralized legislative and congressional document reference and distribution point for the Department; and maintains the Department's historical legislative files. The Agency administers the Defense Office of Hearings and Appeals program and the Standards of Conduct program.

For further information, contact the Administrative Officer, Defense Legal Services Agency, The Pentagon, Washington, DC 20301-1600. Phone, 703-697-8343.

Director
Principal Deputy Director

VICE ADM. E.M. STRAW, SC, USN
MAJ. GEN. R.E. MCCOY, USA

The Defense Logistics Agency (DLA) was established by the Secretary of Defense and operates under Department of Defense Directive 5105.22. It provides supplies to the military services and supports their acquisition of weapons and other materiel. Support begins with joint planning with the services for parts for new weapon systems, extends through production, and concludes with the disposal of material which is obsolete, worn out, or no longer needed. The Agency provides supply support, contract administration services, and technical and logistics services to all branches of the military and to a number of Federal agencies.

Supply Management The Agency buys and manages a vast number and variety of items used by all of the military services and some civilian agencies. The military services determine their requirements for supplies and materiel

and establish their priorities. Agency supply centers consolidate the services' requirements and procure the supplies in sufficient quantities to meet the services' projected needs, critical to maintaining the readiness of our forces. The Agency manages supplies in eight commodity areas: fuel, food, clothing, construction material, electronic supplies, general supplies, industrial supplies, and medical supplies.

Distribution The two defense distribution regions—East and West—operate the supply distribution system, which encompasses materiel distribution and related functions. Distribution is defined as all actions involving the receipt of new procurement, redistributions, and field returns; storage of materiel, including care of materiel and supplies in storage; the issue of materiel; consolidation and containerization of materiel;

preservation, packaging, packing, and marking; physical inventory; quality control; traffic management; other transportation services; unit materiel fielding and set assembly/disassembly; and transshipment and minor repair.

Contract Administration The Agency manages contracts awarded by the military services, DLA, the National Aeronautics and Space Administration, other Federal agencies, and foreign governments. Its Defense Contract Management Command (DCMC) is responsible for ensuring that procured materiel is of satisfactory quality and is delivered when and where needed. Services of the Defense Contract Management Command—highlighting pricing and negotiations, property, overhead management, quality assurance, manufacturing, engineering, law, safety, small business assistance, and contractor employment compliance—are performed at or near contractor plants through a complex of offices which vary in size, depending on workload and the concentration of Government contractors in the area.

Other Logistics Support Services The Defense Logistics Services Center manages the Federal Supply Catalog System, which lists a National Stock

Number and description of over 6 million items. This catalog system is used throughout the Federal Government. The Center also maintains a data bank of information used to design, purchase, transport, store, transfer, and dispose of Government supplies.

The Defense National Stockpile of strategic and critical materials is maintained to reduce the Nation's dependence upon foreign sources of supply for such materials in times of national emergency. The Defense National Stockpile Center is authorized to procure and dispose of materials as needed.

The Defense Reutilization and Marketing Service provides for the redistribution and disposal of DOD equipment and supplies no longer needed by the original user. Assets are matched against requirements of the military services and Federal agencies and transferred as needed. When equipment becomes surplus, it is offered to the General Services Administration and State agencies, after which it is sold to the public. The Service is a worldwide organization with offices on most military installations.

Primary Level Field Activities—Defense Logistics Agency

Activity	Commander
DEFENSE SUPPLY CENTERS:	
Defense Supply Center, Columbus	Rear Adm. E.A. Elliott, SC, USN
Defense Supply Center, Richmond	Capt. M.E. Finley, SC, USN

Deputy Director
Chief of Staff

MAJ. GEN. PHILIP W. NUBER, USAF
W. DOUGLAS SMITH
CAPT. LAWRENCE W. URBK, USN

The Defense Mapping Agency (DMA) was established in 1972, when mapping, charting, and geodesy functions of the Defense Community were combined into this joint Department of Defense agency. The Agency operates as a combat support agency of DOD.

The mission of the Agency is to provide global geospatial information and services to support and advance national security objectives. The Agency is under the direction and control of the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence. The Agency's Director is also responsible to the Chairman, Joint Chiefs of Staff in operational matters.

The Agency reinvented its operations in 1995 to get closer to its customers, improve its readiness and responsiveness, and organize around core business. It has approximately 7,200 employees in more than 50 locations around the world.

Structure

The Agency's headquarters, located in Fairfax, VA, provides overall direction to Agency operations. Three business units are located outside the headquarters.

The Acquisition and Technology Group oversees development and engineering for the Agency and provides technical services and system sustainment for DMA activities and external customers.

The Operations Group manages all production, printing, and distribution activities, with major operations in Reston, VA; Bethesda, MD; and St. Louis, MO. In addition, the Defense Mapping School at Fort Belvoir, VA, trains members of all U.S. and allied military services in global geospatial information and services, and related military skills.

The Installation Management Group provides management and base support for security, administration, logistics, visual information, health, and safety services at all DMA sites.
