The Department of Health and Human Services is the Cabinet-level department of the Federal executive branch most concerned with people and most involved with the Nation's human concerns. In one way or another, it touches the lives of more Americans than any other Federal agency. It is literally a department of people serving people, from newborn infants to persons requiring health services to our most elderly citizens.

The Department of Health and Human Services (HHS) was created as the Department of Health, Education, and Welfare on April 11, 1953 (5 U.S.C. app.), and redesignated, effective May 4, 1980, by the Department of Education Organization Act (20 U.S.C. 3508).

Office of the Secretary

The Secretary of Health and Human Services advises the President on health, welfare, and income security plans, policies, and programs of the Federal Government. The Secretary directs Department staff in carrying out the approved programs and activities of the Department and promotes general public understanding of the Department's goals, programs, and objectives. The Secretary administers these functions through the Office of the Secretary and the Department's 12 operating divisions.

The Office of the Secretary includes the offices of Deputy Secretary, the

Assistant Secretaries, Inspector General, and General Counsel. Some offices whose public purposes are broadly applied are detailed further.

Civil Rights The Office is responsible for the administration and enforcement of the following laws that prohibit discrimination in federally assisted health and human services programs:

—title VI of the Civil Rights Act of

—section 504 of the Rehabilitation Act of 1973, as amended:

—the Age Discrimination Act of 1975;

—title IX of the Education Amendments of 1972:

—section 407 of the Drug Abuse Offense and Treatment Act of 1972;

—section 321 of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970:

—the Equal Employment Opportunity provisions of the Communications Finance Act of 1934, as amended;

—titles VI and XVI of the Public Health Service Act;

—the nondiscrimination provisions of the Omnibus Budget Reconciliation Act of 1981:

—section 307(a) of the Family
 Violence Prevention and Services Act;
 —titles VII and VIII of the Public
 Health Service Act; and

—subtitle A, title II, of the Americans with Disabilities Act of 1990.

Public Health and Science The Office provides leadership and serves as the focal point for coordination across the Department in public health and science by:

—ensuring that the Department conducts broad-based public health assessments designed to anticipate future public health issues and problems and that it devises and implements appropriate interventions and evaluations to maintain, sustain, and improve the health of the Nation;

—providing assistance in managing the implementation and coordination of Secretarial decisions for Public Health Service (PHS) operating divisions and coordination of population-based health, clinical preventive services, and science initiatives that cut across operating divisions;

—providing management of the following offices: Office of Women's Health, Office of Minority Health, Office of Emergency Preparedness, Office of Population Affairs, Office of International and Refugee Health, Office of Disease Prevention and Health Promotion, President's Council on Physical Fitness and Sports, Office of Research Integrity, Office of HIV/AIDS, and the Office of the Surgeon General;

—providing presentations to foreign governments and multilateral agencies on international health issues; and

—providing direction and policy oversight through the Surgeon General for the Public Health Service Commissioned Corps.

Regional Offices The 10 HHS Regional Directors are the Secretary's representatives in direct, official dealings with State and local government organizations. They provide a central focus in each region for departmental relations with Congress and promote general understanding of Department programs, policies, and objectives. They also advise the Secretary on the potential effects of decisions.

Administration on Aging

The Administration on Aging (AOA) is the principal agency designated to carry out the provisions of the Older Americans Act of 1965, as amended (42 U.S.C. 3001 *et seq.*). It serves as the lead agency within HHS on all issues involving the elderly population. The Administration:

- —advises the Secretary, Department components, and other Federal departments and agencies on the characteristics, circumstances, and needs of older persons;
- —develops policies, plans, and programs designed to promote their welfare and advocates for their needs in HHS program planning and policy development;
- —administers a program of formula grants to States to establish State and community programs for older persons under the title III of the Act (45 CFR 1321);

- —administers a program of grants to American Indians, Alaskan Natives, and Native Hawaiians to establish programs for older Native Americans under title VI of the Act (45 CFR 1328);
- —provides policy, procedural direction, and technical assistance to States and Native American grantees to promote the development of community-based systems of comprehensive social, nutrition, and support services for older persons;
- —administers programs of training, research, and demonstration under title IV of the Act; and
- —administers ombudsman, legal services oversight, and protective services for older people under title VII of the Act.

For further information, contact the Assistant Secretary for Aging. Phone, 202–401–4634.

Administration for Children and Families

The Administration for Children and Families (ACF) was created on April 15, 1991, under authority of section 6 of Reorganization Plan No. 1 of 1953 and pursuant to the authority vested in the Secretary of Health and Human Services.

The Administration, led by the Assistant Secretary for Children and Families, reports to the Secretary. The Assistant Secretary also serves as the Director of Child Support Enforcement. The Administration advises the Secretary on issues pertaining to children and families, including Native Americans, people with developmental disabilities, refugees, and legalized aliens.

The Administration for Children and Families provides national leadership and direction to plan, manage, and coordinate the nationwide administration of comprehensive and supportive programs for vulnerable children and families. The Administration oversees and finances a broad range of programs for children and families including Native Americans, persons with developmental disabilities, refugees, and legalized aliens to help them develop and grow toward a more independent, self-reliant life. These programs, carried out by State, county, city, and tribal governments and public and private local agencies, are designed to promote

stability, economic security, responsibility, and self-sufficiency. The Administration coordinates development and implementation of family-centered strategies, policies, and linkages among its programs and with other Federal and State programs serving children and families.

Administration on Children, Youth, and Families (ACYF) The Administration, through the Assistant Secretary for Children and Families, advises the Secretary on matters relating to the sound development of children, youth, and families.

ACYF administers State grant programs under titles IV-B and IV-E of the Social Security Act to assist States in providing child welfare services, foster care, adoption assistance, and independent living; child care programs authorized under title IV-A of the Social Security Act and the Child Care and Development Block Grant which provide support to working families and families moving from welfare to work; the State grant programs to improve and increase child abuse prevention and treatment activities and develop family preservation and family support services; the Head Start Program; programs which provide services for runaway and homeless youth and their families; child welfare training programs; and child abuse and neglect research and demonstration programs. ACYF also supports and encourages initiatives to involve the private and voluntary sectors in the areas of children, youth, and families.

In concert with other components of ACF, ACYF develops and implements research, demonstration, and evaluation strategies for the discretionary funding of activities designed to improve and enrich the lives of children and youth and to strengthen families.

For further information, contact the Commissioner, Administration on Children, Youth, and Families, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–205–8347 or 202–401–2337.

Administration on Developmental Disabilities (ADD) The Administration, through the Assistant Secretary for

Children and Families, advises the Secretary on matters relating to persons with developmental disabilities and their families. ADD serves as the focal point in the Department for supporting and encouraging the provision of quality services to persons with developmental disabilities; assists States, through the design and implementation of a comprehensive and continuing State plan, in increasing independence, productivity, and community inclusion of persons with developmental disabilities; administers the State Developmental Disabilities Councils, the Protection and Advocacy Grant Program, and the discretionary grant programs; and serves as a resource in developing policies and programs to reduce or eliminate barriers experienced by persons with developmental disabilities.

In concert with other components of ACF, ADD develops and implements research, demonstration, and evaluation strategies for discretionary funding of activities to improve lives of persons with developmental disabilities.

For further information, contact the Commissioner, Administration on Developmental Disabilities, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–690–6590.

Administration for Native Americans (ANA) The Administration promotes the goal of social and economic selfsufficiency of American Indians, Alaskan Natives, Native Hawaiians, and other Native American Pacific Islanders, including natives of Samoa, Guam, Palau, and the Northern Marianas. Selfsufficiency is that level of development at which a Native American community can control and internally generate resources to provide for the needs of its members and meet its own economic and social goals. Social and economic underdevelopment is the paramount obstacle to the self-sufficiency of Native American communities and families.

ANA promotes lasting self-sufficiency and seeks to enhance self-government and strengthen community social and economic infrastructures through competitive financial assistance grants in support of locally determined and designed projects addressing community needs and goals. Competitive grants are offered in the areas of social and economic development, Native American languages preservation and enhancement, environmental regulatory enhancement, and mitigation of environmental damage on Indian lands.

ANA represents the concerns of all Native Americans and serves as the focal point in the Department on the full range of developmental, social, and economic strategies that support Native American self-determination and self-sufficiency.

The Commissioner of ANA is the Chair of the Intra-Departmental Council on Native American Affairs (IDCNAA), composed of 25 heads of the Department's major agencies, and advises the Secretary on all matters affecting Native Americans that involve the Department.

For further information, contact the Commissioner, Administration for Native Americans, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–690–7776.

Child Support Enforcement (CSE) The Office of Child Support Enforcement advises the Secretary on matters relating to child support enforcement. It provides direction, guidance, and oversight to State CSE program offices and on activities authorized and directed by section D, part IV of the Social Security Act, and other pertinent legislation requiring States to develop programs locating absent parents, establishing paternity when necessary, obtaining child support orders, and enforcing those orders.

The Office assists States in establishing adequate reporting procedures and in maintaining records. It operates the Federal Parent Locator Service, including the National New Hire Directory; certifies to the Secretary of the Treasury amounts of overdue child support that require collection in specific instances; works with States to automate their child support enforcement programs; and

reviews State applications for use of U.S. courts to enforce child support orders.

For further information, contact the Public Inquiries and Information Branch, Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–401–9373.

Community Services The Office, through the Assistant Secretary for Children and Families, advises the Secretary on matters relating to community programs that promote economic self-sufficiency. It is responsible for administering programs that serve low-income and needy individuals and addresses the overall goal of personal responsibility in achieving and maintaining self-sufficiency.

The Office administers the Community Services Block Grant, Social Services Block Grant, and the Low-Income Home Energy Assistance programs, as well as a variety of discretionary grant programs that foster family stability, economic security, responsibility, and self-support. It also promotes and provides services to homeless and low-income individuals and develops new and innovative approaches to reduce welfare dependency.

For further information, contact the Director, Office of Community Services, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–401–9333.

Refugee Resettlement The Office of Refugee Resettlement (ORR) advises the Secretary, through the Assistant Secretary for Children and Families, on policies and programs regarding refugee resettlement, immigration, and repatriation matters. It plans, develops, and directs implementation of a comprehensive program for domestic refugee and entrant resettlement assistance.

The Office provides direction and technical guidance to the nationwide administration of programs including

Refugee and Entrant Resettlement, and the U.S. Repatriate Program.

For further information, contact the Director, Office of Refugee Resettlement, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–401–9246.

Family Assistance The Office of Family Assistance (OFA), through the Assistant Secretary for Children and Families, advises the Secretary on matters relating to public assistance and economic self-sufficiency programs. It provides leadership, direction, and technical guidance in administering the Temporary Assistance for Needy Families Program and the Aid to the Aged, Blind, and Disabled Program in Guam, Puerto Rico, and the Virgin Islands.

The Office provides technical assistance to States and territories, and assesses their performance in administering these programs; reviews State plans and amendments for

completeness; and shares information and suggests actions to improve effectiveness. It directs reviews, provides consultation, and conducts necessary negotiations to achieve effective public assistance programs.

For further information, contact the Director, Office of Family Assistance, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202-401-9275.

Office of Regional Operations The Office makes recommendations to and advises the Assistant Secretary for Children and Families on all strategic and operations activities related to implementation of the agency's programs at the regional level.

For further information, contact the Director, Office of Regional Operations, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202-401-4802.

Agency for Health Care Policy and Research

A reorganization order, signed by the Secretary on October 31, 1995, established the Agency for Health Care Policy and Research (AHCPR) as an operating division within Public Health Service of the U.S. Department of Health and Human Services.

As the health services research arm of the Public Health Service, AHCPR's goals are to work with the private sector and other public organizations to help consumers make better informed choices; determine what works best in clinical practice; measure and improve quality of care; monitor and evaluate health care delivery; improve the cost-effective use of health care resources; assist health care policymakers; and build and sustain the health services research infrastructure.

AHCPR supports and conducts research which creates the science base to guide improvements in both clinical care and the organization and financing of health care; promotes the incorporation of science into practice through the development of tools for public and private decisionmakers at all levels of the health care system; and develops the data and information infrastructure to study and track the performance of the health care system and the needs of stakeholders.

Currently, AHCPR supports and conducts research and evaluation projects in the areas of consumer choice; clinical improvement; health care cost, financing, and access; health information technology; outcomes and effectiveness of health care; health care organization and delivery; quality measurement and improvement; and technology assessment.

For further information, contact the Agency for Health Care Policy and Research. Phone, 301–594–1364. Internet, http://www.ahcpr.gov/. E-mail, info@ahcpr.gov.

Agency for Toxic Substances and Disease Registry

A reorganization order, signed by the Secretary on October 31, 1995, established the Agency for Toxic Substances and Disease Registry (ATSDR) as an operating division within the Public Health Service of the U.S. Department of Health and Human Services. Statutory authority for the Agency is derived from the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.), as amended by the Superfund Amendments and Reauthorization Act of 1986, the Resource Conservation and Recovery Act (42 U.S.C. 6901 et seq.), and provisions of the Solid Waste Disposal Act relating to sites and substances found at those sites and other forms of uncontrolled releases of toxic substances into the environment.

The Agency's mission is to prevent exposure and adverse human health effects and diminished quality of life associated with exposure to hazardous substances from waste sites, unplanned releases, and other sources of pollution present in the environment. To carry out this mission, ATSDR, in cooperation with States and other Federal and local agencies:

—evaluates information on the release of hazardous substances into the environment to assess any current or future impact on public health;

- —through epidemiologic, surveillance, and other studies of toxic substances and their effects, increases understanding of the relationship between exposure to hazardous substances and adverse human health effects;
- —establishes and maintains registries of persons exposed to specific substances for long-term followup of scientific studies;
- —establishes and maintains a complete listing of areas closed to the public or otherwise restricted in use because of toxic substance contamination;
- —summarizes and makes available to the public, researchers, and physicians and other health care providers data on the health effects of hazardous substances;
- —conducts or sponsors research to increase scientific knowledge about the effects on human health of hazardous substances released from waste sites or during transportation accidents; and
- —provides health-related support, including health consultations and training for first responders to ensure adequate response to public health emergencies.

For further information, contact the Office of Policy and External Affairs, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road NE., MS E-60, Atlanta, GA 30333. Phone, 404-639-0501. Internet, http://www.atsdr1.atsdr.cdc.gov:8080/.

Centers for Disease Control and Prevention

A reorganization order, signed by the Secretary on October 31, 1995, established the Centers for Disease Control and Prevention (CDC) as an operating division within the Public Health Service of the U.S. Department of Health and Human Services.

CDC is the Federal agency charged with protecting the public health of the Nation by providing leadership and direction in the prevention and control of diseases and other preventable conditions and responding to public health emergencies. It is composed of 11 major operating components: Epidemiology Program Office, International Health Program Office, National Immunization Program Office, Public Health Practice Program Office, National Center for HIV, STD, and TB Prevention, National Center for Environmental Health, National Center for Injury Prevention and Control, National Institute for Occupational Safety and Health, National Center for Chronic Disease Prevention and Health Promotion, National Center for Infectious Diseases, and National Center for Health Statistics.

CDC administers national programs for the prevention and control of communicable and vector-borne diseases, injury, and other preventable conditions. It develops and implements programs in chronic disease prevention and control, including consultation with State and local health departments. It develops and implements programs to deal with environmental health problems, including responding to environmental, chemical, and radiation emergencies.

CDC directs and enforces foreign quarantine activities and regulations; provides consultation and assistance in upgrading the performance of public health and clinical laboratories; and organizes and implements a National Health Promotion Program, including a nationwide program of research, information, and education in the field of smoking and health. It also collects, maintains, analyzes, and disseminates national data on health status and health services.

Through the National Institute for Occupational Safety and Health, CDC develops occupational safety and health standards and carries out research and other activities to ensure safe and healthful working conditions for all working people.

CDC also provides consultation to other nations in the control of preventable diseases and participates with national and international agencies in the eradication or control of communicable diseases and other preventable conditions.

For further information, contact the Centers for Disease Control and Prevention, 1600 Clifton Road NE., Atlanta, GA, 30333. Phone, 404–639–3286. Internet, http://www.cdc.gov/.

Food and Drug Administration

A reorganization order, signed by the Secretary on October 31, 1995, established the Food and Drug Administration (FDA) as an operating division of the Public Health Service within the U.S. Department of Health and Human Services. The name Food and Drug Administration was first provided by the Agriculture Appropriation Act of 1931 (46 Stat. 392), although similar law enforcement

functions had been in existence under different organizational titles when the Food and Drug Act of 1906 (21 U.S.C. 1–15) became effective January 1, 1907.

Food and Drug Administration programs are designed to achieve the single, overall objective of consumer protection. FDA's mission is to ensure that food is safe, pure, and wholesome; human and animal drugs, biological products, and medical devices are safe

and effective; and electronic products that emit radiation are safe.

FDA is headed by a Commissioner. The Office of Policy directs and coordinates agency rulemaking and regulations development activities. The Office of Operations develops and administers agency programs and field operations, through the Office of Regulatory Affairs, the regional field offices, the Center for Drug Evaluation and Research, the Center for Biologics Evaluation and Research, the Center for Food Safety and Applied Nutrition, the Center for Veterinary Medicine, the Center for Devices and Radiological Health, the National Center for Toxicological Research, and the Office of Orphan Products Development. Selected FDA activities are detailed below.

For further information, call 301-443-1544.

Center for Drug Evaluation and Research The Center develops administration policy with regard to the safety, effectiveness, and labeling of all drug products for human use; reviews and evaluates new drug applications and investigational new drug applications; develops and implements standards for the safety and effectiveness of all overthe-counter drugs; and monitors the quality of marketed drug products through product testing, surveillance, and compliance programs.

The Center coordinates with the Center for Biologics Evaluation and Research regarding activities for biological drug products, including research, compliance, and product review and approval, and develops and promulgates guidelines on current good manufacturing practices for use by the drug industry. It develops and disseminates information and educational material dealing with drug products to the medical community and the public in coordination with the Office of the Commissioner.

The Center conducts research and develops scientific standards on the composition, quality, safety, and effectiveness of human drugs; collects and evaluates information on the effects and use trends of marketed drug

products; monitors prescription drug advertising and promotional labeling to ensure their accuracy and integrity; and analyzes data on accidental poisonings and disseminates toxicity and treatment information on household products and medicines. In carrying out these functions, the Center cooperates with other FDA and Department components, governmental and international agencies, volunteer health organizations, universities, individual scientists, nongovernmental laboratories, and manufacturers of drug products.

For further information, call 301-827-4573.

Center for Biologics Evaluation and **Research** The Center administers regulation of biological products under the biological product control provisions of the Public Health Service Act and applicable provisions of the Federal Food, Drug, and Cosmetic Act. It provides dominant focus in the Administration for coordination of the AIDS program, works to develop an AIDS vaccine and AIDS diagnostic tests, and conducts other AIDS-related activities. It inspects manufacturers' facilities for compliance with standards, tests products submitted for release, establishes written and physical standards, and approves licensing of manufacturers to produce biological

The Center plans and conducts research related to the development, manufacture, testing, and use of both new and old biological products to develop a scientific base for establishing standards designed to ensure the continued safety, purity, potency, and efficacy of biological products and coordinates with the Center for Drug Evaluation and Research regarding activities for biological drug products, including research, compliance, and product review and approval.

The Center plans and conducts research on the preparation, preservation, and safety of blood and blood products, the methods of testing safety, purity, potency, and efficacy of such products for therapeutic use, and the immunological problems concerned with products, testing, and use of

diagnostic reagents employed in grouping and typing blood.

In carrying out these functions, the Center cooperates with other FDA and Department components, governmental and international agencies, volunteer health organizations, universities, individual scientists, nongovernmental laboratories, and manufacturers of biological products.

For further information, call 301-827-2000.

Center for Food Safety and Applied Nutrition The Center conducts research and develops standards on the composition, quality, nutrition, and safety of food, food additives, colors, and cosmetics. It conducts research designed to improve the detection, prevention, and control of contamination that may be responsible for illness or injury conveyed by foods, colors, and cosmetics. It also coordinates and evaluates the FDA's surveillance and compliance programs relating to foods, colors, and cosmetics.

The Center reviews industry petitions and develops regulations for food standards to permit the safe use of color additives and food additives; collects and interprets data on nutrition, food additives, and environmental factors affecting the total chemical result posed by food additives; and maintains a nutritional data bank.

For further information, call 800-332-4010.

Center for Veterinary Medicine The Center develops and conducts programs with respect to the safety and efficacy of veterinary preparations and devices, evaluates proposed use of veterinary preparations for animal safety and efficacy, and evaluates the FDA's surveillance and compliance programs relating to veterinary drugs and other veterinary medical matters.

For further information, call 301-594-1755.

Center for Devices and Radiological Health The Center develops and carries out a national program designed to control unnecessary exposure of humans to, and ensure the safe and efficacious use of, potentially hazardous ionizing and non-ionizing radiation. It develops policy and priorities regarding FDA programs relating to the safety, effectiveness, and labeling of medical devices for human use, and conducts an electronic product radiation control program, including the development and administration of performance standards.

The Center plans, conducts, and supports research and testing relating to medical devices and to the health effects of radiation exposure, and reviews and evaluates medical devices premarket approval applications, product development protocols, and exemption requests for investigational devices. It develops, promulgates, and enforces performance standards for appropriate categories of medical devices and good manufacturing practice regulations for manufacturers, and provides technical and other non-financial assistance to small manufacturers of medical devices.

The Center develops regulations, standards, and criteria and recommends changes in FDA legislative authority necessary to protect the public health; provides scientific and technical support to other components within FDA and other agencies on matters relating to radiological health and medical devices; and maintains appropriate liaison with other Federal, State, and international agencies, industry, and consumer and professional organizations.

For further information, call 800-638-2041.

National Center for Toxicological

Research The Center conducts research programs to study the biological effects of potentially toxic chemical substances found in the environment, emphasizing the determination of the health effects resulting from long-term, low-level exposure to chemical toxicants and the basic biological processes for chemical toxicants in animal organisms; develops improved methodologies and test protocols for evaluating the safety of chemical toxicants and the data that will facilitate the extrapolation of toxicological data from laboratory

animals to man; and develops Center

programs as a natural resource under the National Toxicology Program.

For further information, call 501-543-7000.

Regional Offices Regional operations for the enforcement of the laws under the jurisdiction of the FDA are carried

out by 6 Regional Field Offices located in the cities of the Department's regional offices, through 21 district offices and 135 resident inspection posts located throughout the United States and Puerto Rico.

For further information, call 301-827-3101.

Health Care Financing Administration

[For the Health Care Financing Administration statement of organization, see the *Federal Register* of May 2, 1997, 62 FR 24120]

The Health Care Financing Administration (HCFA) was created as a principal operating component of HHS by the Secretary on March 8, 1977, to combine under one administration the oversight of the Medicare program, the Federal portion of the Medicaid program, and related quality assurance activities. Today, HCFA serves millions of elderly, disabled, and poor Americans through Medicare and Medicaid—approximately one-quarter of the United States population.

Medicare The program provides health insurance coverage for people age 65 and over, younger people who are receiving social security disability benefits, and persons who need dialysis or kidney transplants for treatment of end-stage renal disease. As a Medicare beneficiary, one can choose how to receive hospital, doctor, and other health care services covered by Medicare. Beneficiaries can receive care either through the traditional fee-for-service delivery system or through coordinated care plans, such as health maintenance organizations and competitive medical plans, which have contracts with Medicare.

Medicaid Medicaid is a medical assistance program jointly financed by State and Federal governments for eligible low-income individuals. Medicaid covers health care expenses for all recipients of Aid to Families with Dependent Children, and most States also cover the needy elderly, blind, and disabled who receive cash assistance under the Supplemental Security Income Program. Coverage also is extended to certain infants and low-income pregnant women and, at the option of the State, other low-income individuals with medical bills that qualify them as categorically or medically needy. Quality Assurance The Medicare/ Medicaid programs include a quality assurance focal point to carry out the quality assurance provisions of the Medicare and Medicaid programs; the development and implementation of health and safety standards of care providers in Federal health programs;

For further information, contact the Administrator, Health Care Financing Administration, Department of Health and Human Services, 200 Independence Avenue SW., Washington, DC 20201. Phone, 410– 786–3151.

and the implementation of the end-stage

renal disease and the peer review

provisions.

Health Resources and Services Administration

A reorganization order, signed by the Secretary on October 31, 1995, established the Health Resources and Services Administration (HRSA) as an operating division within the Public Health Service of the U.S. Department of Health and Human Services. The Administration is the principal primary health care service agency of the Federal Government. Its mission is to make essential primary care services accessible to the poor, uninsured, and geographically isolated—populations severely underserved by the private health care system. Although the HRSA portfolio of programs is unusually diverse, most can be categorized as pertaining to the primary care workforce, direct service to the underserved, or primary care for special populations.

HRSA works integrally with State and local governments to improve and expand primary health care services through a broad array of categorical and block grants. Among them are HRSA programs to bolster training for primary care physicians, physician assistants, and advanced practice nurses; place qualified primary care providers in communities certified to be health professional shortage areas through the National Health Service Corps; assist health providers that serve the underserved in keeping pace with changes in health care, including managed care; track the adequacy of the supply and preparation of primary care providers and record the malpractice and disciplinary actions taken against physicians and dentists through the National Practitioner Databank; provide primary care services to the working poor and uninsured through community and migrant health centers; reinforce the health care system serving pregnant women and their infants through the Maternal and Child Health Block Grant; reduce infant mortality with formula grants to communities with extraordinarily high numbers of infant deaths; address the multiple health care needs of people and communities affected by HIV/AIDS through the Ryan White Comprehensive AIDS Resources Emergency Act; encourage the donation of organs and tissue for transplantation and ensure their equitable distribution; compensate the families of children harmed by the administration of routine immunizations through the Vaccine Injury Compensation Program; provide health care to people with Hansen's disease; and attend to the special health care needs of people with chronic health needs, minorities, and those living along the U.S. border with Mexico.

For further information, contact the Office of Communications. Phone, 301–443–2086.

Bureau of Primary Health Care BPHC serves as a national focus for efforts to ensure the availability and delivery of health care services in health professional shortage areas, to medically underserved populations, and to those with special needs. Its mission is to increase access to comprehensive primary and preventive health care and to improve the health status of underserved and vulnerable populations. This mission is achieved through the development and support of systems and providers of high quality, community-based, culturally competent services.

To accomplish this goal, the Bureau provides funds to meet the health needs of populations in medically underserved areas by supporting the development of primary health care delivery capacity where the community can benefit from high quality health care and improved health status outcomes through project grants to community-based organizations; provides funds to help them meet the health needs of special populations such as migrants, Alzheimer's disease patients, the homeless, AIDS victims, Pacific Basin inhabitants, Native Hawaiians, residents of public housing projects, and victims of black lung disease through project grants to State, local, voluntary, public, and private entities; administers the National Health Service Corps Program, which recruits and places highly trained primary care clinicians to serve in health professional shortage areas; designates health professional shortage and medically underserved areas and populations; administers the National Health Service Corps Scholarship and Loan Repayment programs; provides leadership and direction for the Bureau of Prisons Medical Program and the National Hansen's Disease Program; provides comprehensive occupational health consultation and assistance to Federal agencies to enhance productivity and limit employment-related liability through the Federal Employee

Occupational Health Program on a reimbursable basis; and administers the Veterans Health Care Act of 1992 (38 U.S.C. 101 note), which provides that participating manufacturers sell Medicaid-covered outpatient drugs to eligible entities at discount prices. Division of Immigration Health Services The Division serves as the primary focal point for planning, management, policy formulation, program coordination, direction, and liaison for all health matters pertaining to aliens detained by the Immigration and Naturalization Service

For further information, contact the Public Affairs Officer. Phone, 301–594–4148.

Bureau of Health Professions (BHP)

The Bureau provides national leadership in coordinating, evaluating, and supporting the development and utilization of the Nation's health personnel. To accomplish this goal, the Bureau provides for financial aid to health professions students and support for health professions data analysis and research; supports multidisciplinary training networks and certain disciplinespecific educational activities to improve health workforce distribution and quality; supports increasing representation in the health professions of underserved minorities and other disadvantaged groups; trains primary care medical providers and public health workers in short medical supply in the United States; focuses on specific aspects of nursing workforce development; and conducts AIDS programs designed to increase the number of health care providers who are effectively educated and motivated to counsel, diagnose, treat, and manage persons with HIV infections.

BHP also serves as a focus for health care quality assurance activities, issues related to malpractice, and operation of the National Practitioner Data Bank and the Vaccine Injury Compensation Program; supports health professions and nurse training institutions, targeting resources to areas of high national priority such as disease prevention, health promotion, bedside nursing, care of the elderly, and HIV/AIDS through

grants; funds regional centers that provide educational services and multidisciplinary training for health professions faculty and practitioners in geriatric health care; administers several loan programs supporting students training for careers in the health professions and nursing; supports programs to increase the supply of primary care practitioners and to improve the distribution of health professionals; collects and analyzes data and disseminates information on the characteristics and capacities of U.S. health training systems; assesses the Nation's health personnel force and forecasts supply and requirements; develops, tests, and demonstrates new and improved approaches to the development and utilization of health personnel within various patterns of health care delivery and financing systems; provides leadership for promoting equity in access to health services and health careers for the disadvantaged; funds regional centers to train faculty and practicing health professionals in the counseling, diagnosis, and management of HIV/ AIDS-infected individuals; and serves as a focus for technical assistance activities in the international projects relevant to domestic health personnel problems in coordination with the Office of the Administrator, HRSA.

For further information, contact the Information Officer. Phone, 301–443–1590.

HIV/AIDS Bureau The Bureau funds, develops, coordinates, administers, and monitors programs supporting increased access to health care and support services for people living with HIV/AIDS. The Bureau also houses a national network of activities associated with organ and bone marrow donation, procurement, and transplants. It evaluates and monitors insured loans for hospital construction and oversight activities of historically awarded Hill Burton hospital construction projects, under an interdepartmental agreement.

The Bureau provides national leadership in the administration of the Ryan White Comprehensive AIDS Resources Emergency Act grant program

to improve the quality and the availability of care for low-income, uninsured, and underinsured people living with HIV/AIDS; manages contracts to provide Federal oversight of the Organ Procurement and Transplantation Network, the Scientific Registry of Transplant Recipients, and the National Marrow Donor Program and works to increase the availability of donor organs and unrelated bone marrow donors by working with Organ Procurement Organizations (OPO's) and donor centers; provides technical assistance to States, cities, nonprofit organizations, OPO's, and health care delivery systems and facilities in a wide variety of specific technical and technological systems; administers the HUD-242 hospital mortgage insurance program which insures private sector loans to hospitals for construction, renovations, or the purchase of major movable equipment; develops long- and short-range program goals and objectives for health facilities and specific health promotions, organ transplantation, and AIDS activities; advises and coordinates activities with private and public organizations, other Federal organizations inside and outside the Department, State and local governments, and professional and scientific organizations; develops, promotes, and directs efforts to improve the management, operational effectiveness, and efficiency of health care systems, organizations, and facilities: collects and analyzes data and disseminates information on the scope and impact of program operations; maintains liaison and coordinates with non-Federal public and private entities to accomplish the Bureau's mission and objectives; and designs and implements special epidemiological and evaluation studies regarding the impact of Bureau programs and initiatives.

For further information, contact the Communications Office, Phone, 301–443–6652. Fax, 301–443–0791.

Maternal and Child Health Bureau The Bureau develops, administers, directs, coordinates, monitors, and supports Federal policy and programs pertaining to health and related-care systems for the

Nation's mothers and children. Programs administered by the Bureau address the full spectrum of primary, secondary, and tertiary care services and related activities conducted in the public and private sector which impact upon maternal and child health.

To accomplish this goal, the Bureau: provides national leadership in supporting, identifying, and interpreting national trends and issues relating to the health needs of mothers, infants, and children (both normal and with special health care needs), and administers State block and discretionary grants, contracts, and funding arrangements designed to address these issues; administers grants, contracts, and other funding arrangements and programs under title V of the Social Security Act, as amended, relating to the implementation of State maternal and child health (MCH) service programs; research, training, and education programs located in institutions of higher learning; and State and local health agencies and organizations involved in the care of mothers and children; administers grants, contracts, and other funding arrangements under section 2671 of the Public Health Service Act for research and services pertaining to the health status of and services for pediatric AIDS patients; administers grants, contracts, and other funding arrangements under title V of the Social Security Act, as amended, relating to the care of persons affected by hemophilia (regardless of age); administers grants and contracts under title XIX of the Public Health Service Act relating to pediatric emergency medical systems development and care improvement; develops, promotes, and directs efforts to improve the management, financing, and operational effectiveness and efficiency of health care systems, the Healthy Start Initiative to reduce infant mortality, organizations, and providers of maternal and child health and related care; serves as the principal adviser to and coordinates activities with other Administration organizational elements, other Federal organizations within and outside the Department, and with State and local agencies and professional and

scientific organizations; provides technical assistance and consultation to the full spectrum of primary, secondary, and tertiary MCH agencies and organizations in both the public and private sector; and maintains liaison and coordinates with non-Federal public and private entities to accomplish the Bureau's mission and objectives.

For further information, contact the Communications Office. Phone, 301–443–0205.

Indian Health Service

A reorganization order, signed by the Secretary on October 31, 1995, established the Indian Health Service (IHS) as an operating division within the Public Health Service of the U.S. Department of Health and Human Services. The goal of the Indian Health Service is to raise the health status of American Indians and Alaska Natives to the highest possible level.

The Service provides a comprehensive health services delivery system for American Indians and Alaska Natives, with opportunity for maximum tribal involvement in developing and managing programs to meet their health needs. To carry out its mission and attain its goal, the Service assists Indian tribes in developing their health programs through activities such as health management training, technical

assistance, and human resource development; facilitates and assists Indian tribes in coordinating health planning, in obtaining and utilizing health resources available through Federal, State, and local programs, in operating comprehensive health programs, and in health program evaluation; provides comprehensive health care services, including hospital and ambulatory medical care, preventive and rehabilitative services, and development of community sanitation facilities; and serves as the principal Federal advocate in the health care field for Indians to ensure comprehensive health services for American Indian and Alaska Native people.

For further information, contact the Indian Health Service Communications Office. Phone, 301–443–3593

National Institutes of Health

A reorganization order, signed by the Secretary on October 31, 1995, established the National Institutes of Health (NIH) as an operating division within the Public Health Service of the U.S. Department of Health and Human Services. The NIH is the principal biomedical research agency of the Federal Government. Its mission is to employ science in the pursuit of knowledge to improve human health conditions.

NIH seeks to expand fundamental knowledge about the nature and behavior of living systems, to apply that knowledge to extend the health of human lives, and to reduce the burdens resulting from disease and disability. It supports biomedical and behavioral research domestically and abroad, conducts research in its own laboratories and clinics, trains promising young researchers, and promotes acquiring and distributing medical knowledge.

Focal points have been established to assist in developing NIH-wide goals for health research and research training programs related to women and minorities, coordinating program direction, and ensuring that research pertaining to women's and minority health is identified and addressed through research activities conducted and supported by NIH. Research activities conducted by or supported by NIH will determine the scope and

direction of medical treatment and disease prevention in the future.

National Cancer Institute Research on cancer is a high priority program as a result of the National Cancer Act, which made the conquest of cancer a national goal. The Institute developed a National Cancer Program to expand existing scientific knowledge on cancer cause and prevention as well as on the diagnosis, treatment, and rehabilitation of cancer patients.

Research activities conducted in the Institute's laboratories or supported through grants or contracts include many investigative approaches to cancer, including chemistry, biochemistry, biology, molecular biology, immunology, radiation physics, experimental chemotherapy, epidemiology, biometry, radiotherapy, and pharmacology. Cancer research facilities are constructed with Institute support, and training is provided under university-based programs. The Institute, through its cancer control element, applies research findings in preventing and controlling human cancer as rapidly as possible.

The Institute sponsors extensive programs to disseminate cancer information and supports the Cancer Information Service, which responds to 600,000 callers a year. Phone, 800–422–6237.

For further information, call 301–496–5585. Internet, http://www.nci.nih.gov/.

National Heart, Lung, and Blood Institute The Institute provides leadership for a national program in diseases of the heart, blood vessels, lung, and blood; sleep disorders; and blood resources. It plans, conducts, fosters, and supports an integrated and coordinated program of basic research, clinical investigations and trials, and observational studies. It conducts research on clinical use of blood and all aspects of the management of blood resources.

The Institute plans and directs research in the development, trials, and evaluation of interventions (including emergency medical treatment) and devices related to prevention, treatment,

and rehabilitation of patients suffering from such diseases and disorders. It conducts research in its own laboratories and supports scientific institutions and individuals by research grants and contracts.

The Institute also supports and conducts research training and coordinates with other research institutes and all Federal health programs relevant to activities in the areas of heart, blood vessel, lung, and blood, sleep disorders, and blood resources. It maintains continuing relationships with institutions and professional associations, and with international, national, State, and local officials, as well as voluntary organizations working in the above areas.

For further information, call 301–496–2411. Internet, http://www.nhlbi.nih.gov/nhlbi/nhlbi.htm/.

National Library of Medicine The Library serves as the Nation's chief medical information source and is authorized to provide medical library services and on-line bibliographic searching capabilities, such as MEDLINE, TOXLINE, and others, to public and private agencies and organizations, institutions, and individuals. It sponsors and conducts research and development in biomedical communications, in such areas as telemedicine, expert systems, and advanced medical imaging projects.

The Library operates a computer-based toxicology information system for the scientific community, industry, and Federal agencies. Through its National Center for Biotechnology Information, the Library has a leadership role in developing new information technologies to aid in the understanding of the molecular processes that control health and disease.

Through grants and contracts, the Library administers programs of assistance to the Nation's medical libraries that include support of a National Network of Libraries of Medicine, research in the field of medical library science, establishment and improvement of the basic library resources, and supporting biomedical

scientific publications of a nonprofit nature.

For further information, call 301–496–6308. Internet, http://www.nlm.nih.gov/.

National Institute of Diabetes, Digestive, and Kidney Diseases The Institute conducts, fosters, and supports basic and clinical research into the causes, prevention, diagnosis, and treatment of diabetes, endocrine, and metabolic diseases; digestive diseases and nutrition; kidney and urologic diseases; and blood diseases. The Institute fulfills its mission through research performed in its own laboratories and clinics, research grants, individual and institutional research training awards, epidemiologic and clinical studies on selected populations in the United States, and collection and dissemination of information on Institute programs.

For further information, call 301–496–3583. Internet, http://www.niddk.nih.gov/.

National Institute of Allergy and Infectious Diseases The Institute conducts and supports broadly based research, research training, and clinical evaluations on the cause, treatment, and prevention of a wide variety of infectious, allergic, and immunologic diseases. The goal of this research is to develop new or improved diagnostics, drugs, and vaccines. Areas of special emphasis include AIDS; asthma and allergic diseases: immunologic diseases: transplantation; sexually transmitted diseases; enteric diseases such as hepatitis; influenza and other viral respiratory infections; tropical diseases; tuberculosis; and vaccine development.

For further information, call 301–496–5717. Internet, http://www.niaid.nih.gov/.

National Institute of Child Health and Human Development The Institute conducts and supports biomedical and behavioral research on child and maternal health; on problems of human development; on family structure, the dynamics of human population, and the reproductive process; and on medical rehabilitation.

Specific areas of research include mental retardation; pediatric and maternal AIDS; birth defects and genetic diseases; endocrine and growth disorders; nutrition; infertility; women's health; learning disabilities such as dyslexia; behavioral development; rehabilitation of people with physical disabilities; and the causes of infant morbidity and mortality, including low birth weight, premature birth, and sudden infant death syndrome. Researchrelated findings are disseminated to other researchers, medical practitioners, and the general public to improve the health of children and families.

For further information, call 301–496–5133. Internet, http://www.nih.gov/nichd/.

National Institute on Deafness and Other Communication Disorders The Institute conducts and supports biomedical and behavioral research and research training on normal mechanisms as well as diseases and disorders of hearing, balance, smell, taste, voice, speech, and language through a diversity of research performed in its own laboratories, and a program of research grants, individual and institutional research training awards, career development awards, center grants, and contracts to public and private research institutions and organizations.

For further information, call 301–496–7243. Internet, http://www.nih.gov/nidcd/.

National Institute of Dental Research

The Institute conducts and supports research and research training into the causes, prevention, diagnosis, and treatment of craniofacial, oral, and dental diseases and disorders. Areas of special emphasis include inherited diseases and disorders; infectious diseases and immunity; oral, pharyngeal, and esophageal cancers; chronic and disabling diseases, including pain research; biomaterials, biomimetics, and tissue engineering; and behavior, health promotion, and environment.

For further information, call 301–496–6621. Internet, http://www.nidr.nih.gov/.

National Institute of Environmental Health Sciences The Institute, located

in Research Triangle Park, NC, conducts and supports basic and applied research on how the environment interacts with genetic factors to cause disease and dysfunction. The primary emphasis is on disease prevention through identification and assessment of risks.

For further information, call 919–541–3211. Internet, http://www.niehs.nih.gov/.

National Institute of General Medical Sciences The Institute's programs for support of research and research training emphasize basic biomedical science, with activities ranging from cell biology, chemistry, and biophysics to genetics, pharmacology, and systemic response to trauma.

For further information, call 301–496–7301. Internet, http://www.nih.gov/nigms/.

National Institute of Neurological Disorders and Stroke The Institute conducts and supports fundamental and applied research on human neurological disorders such as Parkinson's disease, epilepsy, multiple sclerosis, muscular dystrophy, head and spinal cord injuries, and stroke. The Institute also conducts and supports research on the development and function of the normal brain and nervous system in order to better understand normal processes relating to disease states.

For further information, call 301–496–5751. Internet, http://www.ninds.nih.gov/.

National Eye Institute The Institute conducts, fosters, and supports research on the causes, natural history, prevention, diagnosis, and treatment of disorders of the eye and visual system and in related fields.

For further information, call 301–496–4583. Internet, http://www.nei.nih.gov/.

National Institute on Aging The Institute conducts and supports biomedical and behavioral research to increase knowledge of the aging process and the physical, psychological, and social factors associated with aging. Alzheimer's disease, health and

retirement, menopause, and frailty are among the areas of special concern.

For further information, call 301–496–1752. Internet, http://www.nih.gov/nia/.

National Institute of Alcohol Abuse and Alcoholism The Institute conducts and supports biomedical and behavioral research, health services research, research training, and health information dissemination with respect to the prevention and treatment of alcohol abuse and alcoholism. It provides a national focus for the Federal effort to increase knowledge and promote effective strategies to deal with health problems and issues associated with alcohol abuse and alcoholism.

For further information, call 301–443–3885. Internet, http://www.niaaa.nih.gov/.

National Institute of Arthritis and Musculoskeletal and Skin Diseases The Institute conducts and supports fundamental research in the major disease categories of arthritis and musculoskeletal and skin diseases through research performed in its own laboratories and clinics, epidemiologic studies, research contracts and grants, and cooperative agreements to scientific institutions and to individuals. It supports training of personnel in fundamental sciences and clinical disciplines, conducts educational activities, including the collection and dissemination of health educational materials on these diseases, and coordinates with the other research institutes and all Federal health programs relevant activities in the categorical diseases.

For further information, call 301–496–4353. Internet, http://www.nih.gov/niams/.

National Institute on Drug Abuse The Institute's mission is to lead the Nation in bringing the power of science to bear on drug abuse and addiction, through the strategic support and conduct of research across a broad range of disciplines, and the rapid and effective dissemination and use of the results of that research to significantly improve

drug abuse and addiction prevention, treatment, and policy.

For further information, call 301–443–6480. Internet, http://www.nida.nih.gov/.

National Institute of Mental Health (NIMH) The Institute supports and conducts fundamental research in neuroscience, genetics, molecular biology, and behavior as the foundation of an extensive clinical research portfolio which seeks to expand and refine treatments available for illnesses such as schizophrenia, depressive disorders, severe anxiety, childhood mental disorders including autism and attentiondeficit/hyperactivity disorder, and other mental disorders which occur across the life span. In addition, NIMH supports research on treatment outcomes in actual practice settings, including primary care settings; seeks to establish a sound scientific basis for the prevention of mental illness; and distributes educational and informational materials about mental disorders and related science to public and scientific audiences.

For further information, call 301–443–3673. Internet, http://www.nimh.nih.gov/.

Clinical Center The Center is designed to bring scientists working in the Center's laboratories into proximity with clinicians caring for patients, so that they may collaborate on problems of mutual concern. The research institutes select patients, referred to NIH by physicians throughout the United States and overseas, for clinical studies of specific diseases and disorders. A certain percentage of the patients are normal volunteers, healthy persons who provide an index of normal body functions against which to measure the abnormal. Normal volunteers come under varied sponsorship, such as colleges, civic groups, and religious organizations.

For further information, call 301–496–3227. Internet, http://www.cc.nih.gov/.

Fogarty International Center The Center is dedicated to advancing the health of the people of the United States and other nations through international scientific cooperation. In pursuit of its

mission, the Center fosters biomedical research partnership between U.S. scientists and foreign counterparts through grants, fellowships, and international agreements, and provides leadership in international science policy and research strategies.

For further information, call 301–496–2075. Internet, http://www.nih.gov/fic/.

National Human Genome Research **Institute** The Institute provides leadership for and formulates research goals and long-range plans to accomplish the mission of the Human Genome Project, including the study of ethical, legal, and social implications of human genome research. Through grants, contracts, cooperative agreements, and individual and institutional research training awards, the Institute supports and administers research and research training programs in human genome research including chromosome mapping, DNA sequencing, database development, and technology development for genome research. It provides coordination of genome research, both nationally and internationally, serves as a focal point within NIH and the Department for Federal interagency coordination and collaboration with industry and academia, and sponsors scientific meetings and symposia to promote progress through information sharing.

For further information, call 301–496–0844. Internet, http://www.nhgri.nih.gov/.

National Institute of Nursing Research

The Institute provides leadership for nursing research, supports and conducts research and training, and disseminates information to build a scientific base for nursing practice and patient care and to promote health and ameliorate the effects of illness on the American people.

For further information, call 301–496–0207. Internet, http://www.nih.gov.ninr/.

Division of Computer Research and Technology The Division conducts an integrated research, development, and service program in computer-related physical and life sciences in support of Institute biomedical research programs.

For further information, call 301-496-5206.

National Center for Research Resources The National Center for Research Resources (NCRR) creates, develops, and provides a comprehensive range of human, animal, technological, and other cost-effective, shared resources. NCRR also funds a variety of investigator-initiated research projects and training and career enhancement programs. NCRR's intramural component provides NIH scientists with state-of-the-art bioengineering and instrumentation, veterinary resources, and services such as the NIH Library and the Medical Arts and Photography Branch.

For further information, call 301–435–0888. Internet, http://www.ncrr.nih.gov/.

Division of Research Grants The Division's mission is to provide

excellence in the scientific and technical merit review of Public Health Service (PHS) grant applications for research and research training support and to provide state-of-the-art automated information systems for the NIH intramural and extramural grant programs. The Division supports this mission by serving as the central receipt point for all PHS competing grant applications, assigning all PHS applications to an appropriate initial review group for scientific and technical merit review and to the awarding component for potential funding, providing the initial review of grant applications to the NIH through its study sections consisting of experts in scientific disciplines or current research areas, and providing staff support to the Office of the Director, NIH, in the formulation of grant and award policies and procedures.

For further information, call 301-435-1111.

Program Support Center

[For the Program Support Center statement of organization, see the *Federal Register* of November 15, 1995, 60 FR 57452]

The Program Support Center is a self-supported operating division within the Department with a unique mission to provide administrative support services to HHS components and other Federal agencies. The Center was created as a business enterprise to provide services on a competitive fee-for-service basis to customers who wish to purchase the services.

The Center is comprised of the Administrative Operations Service, Financial Management Service, Human Resources Service, and Information Technology Service. Information may be obtained from the following offices:

Administrative Operations Service. Phone, 301–443–2516.

Financial Management Service. Phone, 301–443–1478.

Human Resources Service. Phone, 301–443–1200. Information Technology Service. Phone, 301–443–9343.

For further information, contact the Director of Marketing, Program Support Center, Department of Health and Human Services, 5600 Fishers Lane, Rockville, MD 20857. Phone, 301–443–1494.

Substance Abuse and Mental Health Services Administration

A reorganization order, signed by the Secretary on October 31, 1995, established the Substance Abuse and Mental Health Services Administration (SAMHSA) as an operating division

within the Public Health Service of the Department.

The Administration provides national leadership to ensure that knowledge, based on science and state-of-the-art practice, is effectively used for the prevention and treatment of addictive and mental disorders. It strives to improve access and reduce barriers to high-quality, effective programs and services for individuals who suffer from or are at risk for these disorders, as well as for their families and communities.

For further information, call 301-443-4795.

Center for Substance Abuse Prevention The Center provides a national focus for the Federal effort to prevent alcohol and other drug abuse. In carrying out its responsibility, the Center provides a national focus for the Federal effort to demonstrate and promote effective strategies to prevent the abuse of alcohol and other drugs; develops, implements, and reviews prevention and health promotion policy related to alcohol and other drug abuse, analyzing the impact of Federal activities on State and local governments and private program activities; administers grants, contracts, and cooperative agreements which support the development and application of new knowledge in the substance abuse prevention field; participates in the application and dissemination of research demonstration findings on the prevention of substance abuse; fosters interagency and State prevention networks; develops and implements workplace prevention programs with business and industry; and supports training for substance abuse practitioners and other health professionals involved in alcohol and drug abuse education, prevention, and early intervention.

The Center also provides technical assistance to States and local authorities and other national organizations and groups in the planning, establishment, and maintenance of substance abuse prevention efforts; reviews and approves and/or disapproves the State prevention plans developed under the Substance Abuse Prevention and Treatment Block Grant Program authority; implements the tobacco regulations and other

regulations as appropriate, and as they relate to Center programs; collects and compiles substance abuse prevention literature and other materials, and supports a clearinghouse to disseminate such materials among States, political subdivisions, educations agencies and institutions, health and drug treatment/rehabilitation networks, and the general public; and serves as a national authority and resource for the development and analysis of information relating to the prevention of substance abuse.

In addition, the Center collaborates with, and encourages other Federal agencies, national foreign, international, State, and local organizations to promote substance abuse prevention activities; provides and promotes the evaluation of individual projects as well as overall programs; collaborates with the alcohol, drug abuse, mental health, and child development institutes of NIH on services research issues as well as on other programmatic issues; conducts managed care activities and coordinates these activities within SAMHSA and other HHS components; and provides a focus for addressing the substance abuse prevention needs of individuals with multiple, co-occurring drug, alcohol, mental, and physical problems.

For further information, call 301-443-0365.

Center for Substance Abuse Treatment The principal function of the Center is to provide national leadership for the Federal effort to enhance approaches and provide resources to ensure provision of services programs focusing on the treatment of substance abuse and co-occurring physical and/or psychiatric conditions. In carrying out this responsibility, the Center collaborates with States, communities, health care providers, and national organizations to upgrade the quality of addiction treatment, to improve the effectiveness of substance treatment programs, and to provide resources to ensure provision of services; provides a focus for addressing the treatment of needs of individuals with multiple, co-occurring drug, alcohol, mental, and physical and comorbidity problems; administers grants, contracts, and cooperative agreements

which support the development and application of new knowledge in the substance abuse treatment field; coordinates the evaluation of Center programs; collaborates with the National Institute on Drug Abuse and the States to promote development, dissemination, and application of treatment outcome standards; collaborates with the office of the Administrator and other SAMHSA components in treatment data collection: administers programs for training of health and allied health care providers; administers the Substance Abuse Prevention and Treatment Block Grant Program including compliance reviews, technical assistance to States, Territories, and Indian Tribes, and application and reporting requirements related to the block grants programs; conducts managed care activities and coordinates these activities within SAMHSA and other HHS components; and collaborates with the alcohol, drug abuse and mental health institutes of NIH on services research issues as well as on other programmatic issues.

For further information, call 301-443-5700.

Center for Mental Health Services The Center provides national leadership to ensure the application of scientifically established findings and practice-based knowledge in the prevention and treatment of mental disorders; to improve access, reduce barriers, and promote high-quality effective programs and services for people with or at risk for these disorders, as well as for their families and communities; and to promote an improved state of mental health within the Nation and the rehabilitation of people with mental disorders.

To accomplish this, the Center supports service and demonstration programs designed to improve access to care and improve the quality of treatment, rehabilitation, prevention, and related services, especially for those traditionally unserved, underserved, or inappropriately serviced; identifies national mental goals and develops strategies to meet them; administers grants, contracts, and cooperative

agreements which support the development and application of new knowledge in the mental health field: supports activities to improve the administration, availability, organization, and financing of mental health care, including managed care activities; supports technical assistance activities to educate professionals, consumers, family members, and communities and promotes training efforts to enhance the human resource necessary to support mental health services; and collects data on the various forms of mental illness, including data on treatment programs, types of care provided, characteristics of those treated, national incidence and prevalence, and such other data as may be appropriate.

The Center administers the Block Grants for Community Mental Health Services and other programs providing direct assistance to States; collects, synthesizes, and disseminates mental health information and research findings to the States, other governmental and mental health-related organizations, and the general public; coordinates and plans administrative and budget functions within the Center; collaborates with other Federal agencies, State and local government, and the private sector to improve the system of treatment and social welfare supports for seriously mentally ill adults and severely emotionally disturbed children and adolescents; conducts activities to promote advocacy, self-help, and mutual support and to ensure the legal rights of mentally ill persons, including those in jails and prisons; cooperates with other Federal components to coordinate disaster assistance, community response, and other mental health emergency services as a consequence of national disasters; collaborates with the alcohol, drug abuse, and mental heath institutes of NIH on services research issues as well as other programmatic issues; promotes the development, dissemination, and application of standards and best practices; and provides a focus for addressing the mental health needs of individuals with

multiple, co-occurring drug, alcohol, mental, and physical problems.

For further information, call 301-443-0001.

Sources of Information

Office of the Secretary

Unless otherwise indicated, inquiries on the following subjects may be directed to the specified office, Department of Health and Human Services, Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

Civil Rights For information on enforcement of civil rights laws, contact the Office for Civil Rights, Room 502E. Phone, 202–619–0671.

Contracts and Small Business Activities For information concerning programs, contact the Director, Office of Small and Disadvantaged Business Utilization. Phone, 202–690–7300.

Electronic Access Information concerning the Department is available electronically through the Internet, at http://www.dhhs.gov/.

Employment Inquiries regarding applications for employment and the college recruitment program should be directed to: Director, Human Resources Service, Program Support Center, 5600 Fishers Lane, Rockville, MD 20857. Phone, 301–443–1200.

Inspector General General inquiries may be directed to the Office of Inspector General, Wilbur J. Cohen Building, 330 Independence Avenue SW., Washington, DC 20201. Single copies of most Office of Inspector General publications are available free of charge by calling the Office. Phone, 202–619–1142. Internet, http://www.dhhs.gov/progorg/oig/.

Inspector General Hotline Individuals wishing to report fraud, waste, or abuse against Department programs should write to: Office of Inspector General, HHS-TIPS Hotline, P.O. Box 23489, L'Enfant Plaza Station, Washington, DC 20026–3489. Phone (toll-free), 800–HHS-TIPS (800–447–8477). TTY, 800–

377–4950. Fax, 800–223–8164. E-mail, htips@os.dhhs.gov.

Locator Inquiries about the location and telephone numbers of HHS offices should be directed to: Information Technology Service, HHS Locator, Room G–644, Wilbur J. Cohen Building, 330 Independence Avenue SW., Washington, DC 20201. Phone, 202–619–0257.

Public Health and Science Inquiries should be directed to the Assistant Secretary for Health, Room 716G.

Phone, 202–690–7694.

Administration on Aging

Inquiries on the following subjects may be directed to the specified office, Department of Health and Human Services, Wilbur J. Cohen Building, 330 Independence Avenue SW., Washington, DC 20201.

Elder Care Locator For information concerning services available to elderly persons in any given community in the Nation, contact the Elder Care Locator. Phone, 800–677–1116.

Employment Applications for employment and college recruitment programs should be directed to the Director, Office of Management, Room 4644. Phone, 202–619–1557.

Locator For information about the location and telephone numbers of Administration offices and programs, call 202–619–4541.

National Aging Information Center Individuals seeking biographic data; practical material for planners/ practitioners; reports on demographic; health, social, and economic status of older Americans; specialized technical reports on current aging issues; and analytical reports on aging statistics should contact the National Aging Information Center, Room 4656. Phone, 202–619–7501. Fax, 202–401–7620.

TDD, 202–401–7575. E-mail, naic@ageinfo.org.

Public Inquiries/Publications Copies of publications are available free of charge by contacting the Office of the Executive Secretariat. Phone, 202–619–0724. Fax, 202–260–1012. TDD, 202–401–7575. Email, aoa_esec@ban-gate.aoa.dhhs.gov. Internet, http://www.aoa.dhhs.gov/.

Administration for Children and Families

General inquiries may be directed to the Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–401–9200. Inquiries on the following subjects may be directed to the specified office.

Contracts Contact the Division of Acquisition Management, Office of Program Support. Phone, 202–401–5149.

Employment Contact the Office of Human Resource Management, Fourth Floor West, 370 L'Enfant Promenade SW., Washington, DC 20447. Phone, 202–401–9260.

Information Center Contact the Office of Public Affairs, Seventh Floor, 370 L'Enfant Promenade SW., Washington, DC 20744. Phone, 202–401–9215.

Mental Retardation For information on mental retardation programs, contact the President's Committee on Mental Retardation, Administration for Children and Families. Phone, 202–619–0634.

Agency for Health Care Policy and Research

Inquiries on the following subjects may be directed to the appropriate office at the Agency for Health Care Policy and Research, Department of Health and Human Services, 2101 East Jefferson Street, Rockville, MD 20852.

Contracts Contact the Chief, Contracts Management Branch. Phone, 301–594–1445.

Employment Inquiries should be addressed to the Chief, Human Resources Management Staff. Phone, 301–594–2408.

Grants Contact the Chief, Grants Management Branch. Phone, 301–594–1447.

Publications Single copies of most publications produced by the Agency are available free of charge from the AHCPR Publications Clearinghouse, P.O. Box 8547, Silver Spring, MD 20907. Phone, 800–358–9295 (toll-free).

Agency for Toxic Substances and Disease Registry

Information regarding programs and activities is available electronically through the Internet, at http://atsdr.atsdr.cdc.gov:8080/.

Centers for Disease Control and Prevention

Inquiries on the following subjects may be directed to the office indicated at the Centers for Disease Control and Prevention, Department of Health and Human Services, 1600 Clifton Road NE., Atlanta. GA 30333.

Electronic Access Information regarding programs and activities is available electronically through the Internet, at http://www.cdc.gov/.

Employment The majority of scientific and technical positions are filled through the Commissioned Corps of the U.S. Government. Inquiries may be addressed to the Human Resources Management Office (phone, 770–488–1725), or the Division of Commissioned Personnel, Room 4A–15, 5600 Fishers Lane, Rockville, MD 20857.

Films Information concerning availability of audiovisual materials related to program activities may be obtained from the Office of Communications. Phone, 404–639–7290.

Publications Single copies of most publications are available free of charge from the Management Analysis and Services Office. Phone, 404–639–3534. Bulk quantities of publications may be purchased from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Food and Drug Administration

Inquiries on the following subjects may be directed to the specified office, Food

and Drug Administration, Department of Health and Human Services, 5600 Fishers Lane, Rockville, MD 20857. Consumer Activities Public Affairs Offices are located in a number of cities across the country, as listed in the table which follows. Consumer phones in these same cities provide recorded messages of interest to the consumer. The general FDA consumer phone number is 301–443–5006.

Contracts Contact the Director, Office of Facilities, Acquisition, and Central Services (HFA–500). Phone, 301–443–6890.

Electronic Access Information on FDA is available electronically through the Internet, at http://www.fda.gov/.
Employment FDA uses various civil service examinations and registers in its recruitment for positions such as consumer safety officers, pharmacologists, microbiologists, physiologists, chemists, mathematical statisticians, physicians, dentists, animal caretakers, etc. Inquiries for positions in the Washington, DC, metropolitan area

should be directed to the Personnel Officer (HFA–400) (phone, 301–827–4120); inquiries for positions outside the Washington, DC, area should be directed to the appropriate local FDA office. Schools interested in the college recruitment program should contact the Personnel Officer (HFA–400) (phone, 301–827–4120).

Publications *FDA Consumer*, FDA's official magazine, is available from the Superintendent of Documents, Government Printing Office, Washington, DC 20402. Phone, 202–512–1800.

Reading Rooms Freedom of Information, Room 12A–30 (phone, 301–443–1813); Hearing Clerk, Room 123, 12420 Parklawn Drive, Rockville, MD 20852 (phone, 301–443–1751); Press Office, Room 15A–07 or Room 3807, FB–8, 200 C Street SW.., Washington, DC 20204 (phone, 301–443–3285).

Speakers Speakers are available for presentations to private organizations and community groups. Requests should be directed to the local FDA office.
