

United States Department of Agriculture,
BUREAU OF ANIMAL INDUSTRY.**JOHN R. MOHLER, CHIEF OF BUREAU.****SERVICE AND REGULATORY ANNOUNCEMENTS.****JANUARY, 1921.**

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICES REGARDING MEAT INSPECTION.**M. I. FORMS 116 AND 121.**

Inspectors in charge of meat inspection are requested to render reports on M. I. Forms 116 and 121 to the Washington office weekly in future instead of daily as heretofore. Care should be taken to show the dates on which all certificates are issued, but if space permits, the issuance of certificates on several dates may be entered on the same sheet. These reports should not be rendered for any week during which no certificate was issued.

REMOVAL OF HOOFS AND CLAWS FROM HOG CARCASSES.

All hoofs and claws shall be removed from all hog carcasses during the process of cleaning. This procedure is necessary for proper cleaning and to prevent subsequent soiling of meat and products. The practice at many establishments has fully demonstrated that removal of hoofs and claws can readily be accomplished, and it is desired that this practice become effective at all establishments at an early date. Such time as may reasonably be required will be allowed establishments to procure suitable appliances and train employees to do the work.

* Conducts slaughtering.

FUMIGATION WITH HYDROCYANIC ACID.

Fumigation with hydrocyanic acid is recognized as a practical and efficient means of ridding buildings of rats, insects, and other vermin. Experiments conducted by the bureau have shown that meats may be fumigated with this gas without injury and without absorption of the gas. Such fumigation, therefore, will be recognized by the bureau as a practical means of eliminating rats, mice, and other vermin from official establishments. Such fumigation will be permitted without requiring the removal of the meats and other edible products from the premises.

On account of the extremely poisonous character of hydrocyanic acid gas, however, it is required that official establishments desiring to fumigate shall obtain permission from the Washington office before undertaking the fumigation; that the fumigation shall be conducted under direct charge of a person familiar with the gas and with methods of fumigation; that all operations shall be discontinued in the building during the time of fumigation; and that all requirements of the local authorities shall be complied with. Inspectors in charge shall convince themselves that the persons whom the establishments intend to place in charge of the fumigation are competent to conduct the work. Inspectors in charge will not assume responsibility for any part of the work or for the results obtained. Inspectors in charge will make full report to the bureau of all fumigations conducted in official establishments under their jurisdiction.

PERMITTED DIP FOR CATTLE FOR TICKS.

The bureau has granted permission for the use of "Key Dip," manufactured by Interstate Chemical Co., 12 Bayview Avenue, Jersey City, N. J., in the official dipping of cattle for ticks. The dilution for dipping cattle for interstate movement is 1 gallon of dip to not more than 127 gallons of water. This will yield a solution containing not less than 0.22 per cent actual arsenious oxid.

BUREAU OF ANIMAL INDUSTRY DIRECTORIES.

Officers in charge are informed that bureau directories furnished them are intended for the use of employees on their forces. Officers are therefore requested to conserve their supplies and to refer other persons requesting directories to the Superintendent of Documents, Government Printing Office, Washington, D. C., from whom they may be purchased at 25 cents each.

BUREAU REGULATIONS IN FORCE.

A list of B. A. I. orders and amendments and other orders and notices in effect at the beginning of the year 1921 is given below. Each station or office should keep a file of all such regulations *that relate to its work*. The bureau will endeavor to furnish, on request, copies of any that may be necessary to complete such a file. As the supply of some of these orders, especially the earlier ones, is almost exhausted, station officers are requested to use discrimination in making requests and to refrain from asking for copies of regulations which have no bearing on the work of their stations.

B. A. I. Order 92. Special order prohibiting the landing of animals from the Philippine Islands at any of the ports of the United States or of the dependencies thereof. (Dec. 13, 1901.) Amendment 1 (July 7, 1916).

SAVINGS CAMPAIGN TO BE CONTINUED.

Presidents of women's organizations have emphasized the need of the continuation of the savings work among their membership in 1921.

The work of the Savings Division of the Treasury Department has been splendidly successful in the schools, with the children, and as well with the leaders of educational thought in America.

In responding to those demands from great national organizations, the Savings Division will intensify during 1921 its campaign to spread broadcast the essential facts relative to wise saving and spending and investment and the continued development of new capital.
