NOTICES REGARDING MEAT INSPECTION

TRANSPARENT WRAPPINGS ON MEAT

Glassine, cellophane, or similar transparent wrapping containing meat or meat food product need not bear the name of the product, the inspection legend, or establishment number when such wrapping does not bear any printed feature or labeling of any description and therefore serves only the purpose of sanitation in the course of handling and transportation.

When such wrapping is tied or otherwise sealed, or bears any name, monogram, or other feature, or contains a label on which any such feature is exposed to view beneath the wrapping, the latter must be regarded as an immediate or true container. The name of the product, inspection legend, and establishment number must be printed on the transparent wrapping or applied by means of an approved label securely affixed to or inserted beneath the wrapping, provided that when the label is so inserted the wrapping is designed to remain on the product and to retain the label until removed by the consumer. Should it develop that the inserted label becomes separated from the product in the course of distribution, such circumstance will necessitate the discontinuance of the insertion of the label or the adoption of methods which will preclude its ready removal.

Permission to insert the label as authorized above applies only to such products as sliced bacon, dried beef, sliced ham, sausage, hams, picnics, butts, and similar articles which are immediately inclosed in cellophane or other transparent wrapping, and does not contemplate the insertion of loose labels beneath transparent wrapping applied to containers, such as cartons.

Transparent sheets which are merely inserted between layers of sliced bacon or similar products or are so applied as to leave the ends of the product exposed are not classified as immediate or true containers and such sheets, and also labels which may be inserted beneath such sheets, are regarded as detachable devices to which the inspection legend should not be applied.

Transparent wrappings which have been approved and are not in harmony with the ruling above, may be permitted to be used pending the prompt submission to the Washington office of information outlining the approval number and a description of each of such containers, together with a statement indicating the number on hand and the length of time estimated to exhaust the supply.

ANIMAL CASINGS OF FOREIGN ORIGIN

Certificates required by B. A. I. Order 305 and instructions issued thereunder, which bear the official titles of the high officials of the respective foreign countries as specified below, will be acceptable with animal casings offered for importation into the United States.

The certificates must also bear the signature of the high official of the national government having jurisdiction over the health of animals in the foreign country in which the casings originated, but owing to the fact that the high officials are changed from time to time it is impracticable to publish their names.

<i>Official title</i>	<i>Foreign country</i>
Director of Agriculture.....	Fiji.
Minister of Agriculture.....	Lithuania.

Additional officials titles will be published when received from other foreign countries.
