C O R R I G E N D A .

Prof. T. D. A. Cockerell has called to the attention of the authors an oversight in Part II, which we desire speedily to correct. *Asterochiton* Maskell was used for a series of species represented by *vaporariorum*, since the first species described under this genus by Maskell proved to be this insect under the name of *papillifer*. We had overlooked the fact that Prof. Cockerell had designated *aureus* as the type of *Asterochiton* (Proceedings of the Academy of Sciences of Philadelphia, 1902, page 282) and had proposed a subgeneric name, *Trialeurodes*, with *pergandei* as type, a species of the *vaporariorum* series. *Asterochiton* of our paper must, therefore, replace *Dialeurodoides*, and *Trialeurodes* Cockerell, *Asterochiton*.

Aleyrodes olivinus Silvestri should be added to the list of species of *Aleurolobus*.

Tetraleurodes mori var. *arizonensis*, while described in Science Gossip as cited, was named in Bulletin 67 of the Florida Agricultural Experiment Station, page 666 (1903).
