# NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards was established by an act of Congress March 3, 1901. The Bureau's overall goal is to strengthen and advance the Nation's science and technology and facilitate their effective application for public benefit. To this end, the Bureau conducts research and provides: (1) a basis for the Nation's physical measurement system, (2) scientific and technological services for industry and government, (3) a technical basis for equity in trade, and (4) technical services to promote public safety. The Bureau consists of the Institute for Basic Standards, the Institute for Materials Research, the Institute for Applied Technology, the Institute for Computer Sciences and Technology, and the Office for Information Programs.

THE INSTITUTE FOR BASIC STANDARDS provides the central basis within the United States of a complete and consistent system of physical measurement; coordinates that system with measurement systems of other nations; and furnishes essential services leading to accurate and uniform physical measurements throughout the Nation's scientific community, industry, and commerce. The Institute consists of the Office of Measurement Services, the Office of Radiation Measurement and the following Center and divisions:

Applied Mathematics — Electricity — Mechanics — Heat — Optical Physics — Center for Radiation Research: Nuclear Sciences; Applied Radiation — Laboratory Astrophysics <sup>2</sup> — Cryogenics <sup>2</sup> — Electromagnetics <sup>2</sup> — Time and Frequency <sup>2</sup>.

THE INSTITUTE FOR MATERIALS RESEARCH conducts materials research leading to improved methods of measurement, standards, and data on the properties of well-characterized materials needed by industry, commerce, educational institutions, and Government; provides advisory and research services to other Government agencies; and develops, produces, and distributes standard reference materials. The Institute consists of the Office of Standard Reference Materials, the Office of Air and Water Measurement, and the following divisions:

Analytical Chemistry — Polymers — Metallurgy — Inorganic Materials — Reactor Radiation — Physical Chemistry.

THE INSTITUTE FOR APPLIED TECHNOLOGY provides technical services to promote the use of available technology and to facilitate technological innovation in industry and Government; cooperates with public and private organizations leading to the development of technological standards (including mandatory safety standards), codes and methods of test; and provides technical advice and services to Government agencies upon request. The Institute consists of the following divisions and Centers:

Standards Application and Analysis — Electronic Technology — Center for Consumer Product Technology: Product Systems Analysis; Product Engineering — Center for Building Technology: Structures, Materials, and Life Safety; Building Environment; Technical Evaluation and Application — Center for Fire Research: Fire Science; Fire Safety Engineering.

THE INSTITUTE FOR COMPUTER SCIENCES AND TECHNOLOGY conducts research and provides technical services designed to aid Government agencies in improving cost effectiveness in the conduct of their programs through the selection, acquisition, and effective utilization of automatic data processing equipment; and serves as the principal focus within the executive branch for the development of Federal standards for automatic data processing equipment, techniques, and computer languages. The Institute consists of the following divisions:

Computer Services — Systems and Software — Computer Systems Engineering — Information Technology.

THE OFFICE FOR INFORMATION PROGRAMS promotes optimum dissemination and accessibility of scientific information generated within NBS and other agencies of the Federal Government; promotes the development of the National Standard Reference Data System and a system of information analysis centers dealing with the broader aspects of the National Measurement System; provides appropriate services to ensure that the NBS staff has optimum accessibility to the scientific information of the world. The Office consists of the following organizational units:

Office of Standard Reference Data — Office of Information Activities — Office of Technical Publications — Library — Office of International Relations — Office of International Standards.

# ABSTRACT

This bibliography consists of over 1,000 references with critical annotations to the literature on computer networks. A classification scheme has been developed to make each citation more accessible by general topic. Five indexes to the bibliography are included: author index, corporate author index, network index, title word index, and report number index.

Key Words: Bibliography; computer
network; data communications; resource
sharing.

# INTRODUCTION

A fully annotated bibliography on resource sharing computer networks has been prepared by the Computer Networking Section of the NBS Institute for Computer Sciences and Technology. This work is an extension of the annotated bibliography published in 1973 by Blanc, Cotton, Pyke and Watkins.\*\* The current bibliography contains nearly two times the number of references contained in the previous work. Its purpose is to serve as a working tool for those involved in computer networking research as well as those who are concerned with the design, evaluation, selection, and use of computer networks. The volume of requests for the first bibliography indicated the widespread and

continuing need for such a work and, consequently, the indexes have been brought up to date through December 1975 and produced once again in this readily available form as an NBS Special Publication. Several documents published in 1976 are also included.

The bibliography covers computer networks consisting of independent computer systems which communicate with one another and share resources such as hardware, programs, or data and excludes, for example, articles on time-sharing and multi-processing which deal specifically and exclusively with those topics. Ancillary topics are covered if they are sufficiently relevant. Errors of exclusion have been considered by the authors to be more serious than errors of inclusion. All articles which are clearly topical are included without regard to quality; one purpose of the annotations is to identify particularly worthwhile articles.

A systematic search of relevant literature was undertaken in order to identify candidate documents for inclusion in the bibliography. All available related bibliographies, including those in Computing Reviews and those available through the ARPA Network Information Center were utilized in this search. Complete coverage of the personal collections of individuals at NBS who have been working in the computer networking area for some time is also included. As papers and reports were made a part of this collection, citations made within them were checked for potential additional documents for the collection. In addition, recent literature that may contain appropriate papers has been searched. No documents of a classified nature are included; however, some reports that may be rather difficult to obtain but are formal reports of recognized organizations are included.

No document is referenced in this bibliography unless it has actually been obtained for the collection at NBS. These documents are not, however, available from NBS except for internal use.

As each document was cataloged, the bibliographic data and annotations were placed in machine-readable form through the use of a key-to-tape terminal. The magnetic tapes resulting from this operation were then converted to industry compatible tapes and used as input to a special set of COBOL programs on the NBS Univac 1108 service computer. These programs were developed by the Computer Information Section of the NBS Institute for Computer Sciences and Technology.

The method of developing the bibliography has been to obtain potential documents through all possible sources and to evaluate their appropriateness for the collection according to the criteria stated above. All documents are annotated in a reasonably critical manner relative to this general subject area and placing particular attention on the currency of the information contained. All documents are categorized according to a classification scheme that has been developed for this specialized collection. This scheme permits each document to be placed in one primary category and one or more secondary categories as appropriate.

# HOW TO USE THE INDEXES

The computer-produced output for this collection includes an annotated master bibliographic listing, an author index, a corporate author index, a network index, a title word index and a report number index.

# Bibliographic Index

The Bibliography Section contains complete bibliographic citations ordered by subject category and, within category, by author. If there was no personal author for the paper, then the citation is ordered by title, within subject category. The annotation for each document is included only in the primary category and is cross-referenced when an entry appears in secondary categories.

# Author Index

All authors of each article are listed in the Author Index with their names followed by as much of the title as will fit on one line. No indication is given here as to whether an individual is the sole author or one of several coauthors. Reference should be made to the Bibliographic Index for this information.

Authors will be found under the prefix when their last name is preceded by prefixes such as: DE, DI, LA, VAN, VER and VON. Authors may be listed with their given names in full or with one or more of their given names shortened to initials. This, plus the fact that authors whose names are followed by suffixes such as JR, SR, II and III sometimes publish with the suffix dropped, means that occasionally references by the same author may become slightly separated. Each entry identifies the document's subject category number and first author for cross-referencing.

# Corporate Author Index

For each article listed in this index, the organization at which each author was employed at the time of publication of the article is given, followed by as much of the title as will fit on one line. As with the Author Index, organizations employing all authors of each article are listed.

Each entry identifies the document's subject category number and first author for cross-referencing.

# Title Word Index

The Title Word Index is a keyword out of context (KWOC) index. Each title can be found under all of the significant words that it contains.

Over 70 words which are of limited use as search tools such as ALMOST, AND, BIG, FOR, HAVING, NO, OF, THE and WITHIN have been excluded from the keyword index in order to reduce the length of this list. In addition words such as COMPUTER, COMPUTERS, NETWORK, and NETWORKING have been excluded as keywords since they appear so often in titles in the specific area covered by this report that they lose their value as keywords.

Each title cross-references the main citation entry in the Bibliography Section by category number and the first ten characters from the primary author's last name.

# Network Index

The network Index contains entries concerned with specific networks, such as ARPA or WWMCCS. As with the Title Word Index, each entry cross-references the bibliography by category number and author's last name.

# Report Number Index

Each document's associated report numbers, when known, are listed in the Report Number Index, followed by as much of the title as will fit on one line. Report numbers include grant numbers, contract number, Defense Documentation Center "AD" numbers, Library of Congress "LC" numbers, and so forth. Each entry is cross-referenced to the main citation by category number and author's last name.

# CLASSIFICATION SCHEME

The classification scheme developed for the previously published bibliography of resource-sharing computer networks was designed to satisfy both a reflection of the field as it seems to be structured as well as pragmatic considerations of covering the "collection" evenly. This was accomplished by a hierarchical classification scheme, which first permitted the field to be structured, and then permitted discrimination between groups of articles to as great a detail as seemed warranted. Since articles may be multiply classified, there was minimal concern that all classes be mutually exclusive.

An article is assigned to as many classes as seem useful for researchers interested in that particular class. A distinction is made between primary classification and secondary classification only for reasons of efficiency in the production of the bibliography; a full reference appears in all cases, but the annotation appears only at the primary reference. Secondary references point to the primary reference so that the annotation may be located.

This taxonomy is not considered to be definitive, but has been adapted to the content of the bibliography and the needs of researchers. New categories are added as required and/or existing categories further subdivided.

The following notes describe the authors' intent for each entry in the classification scheme:

- INTRODUCTORY all articles of a general, introductory survey or tutorial nature. Note, however, that general descriptions of specific networks are assigned to section 3. All articles in this section are assigned to one of the following classes:
  - 1.0 General self-explanatory
  - 1.1 Objectives articles dealing with goals, purposes, objectives of resource-sharing computer networks. Why are such networks being built; what are the expected benefits?
  - 1.2 Survey comparison articles describing two or more networks
  - 1.3 Tutorial tutorial articles dealing with computer

networks and tutorial articles dealing with ancilliary subjects (e.g., data communications)

- 1.4 Bibliographies
- 1.5 Social Issues such issues as are raised by computer networks
- 1.6 Forecasts prognostications regarding the growth or future development of computer networks
- 1.9 Other anything else which properly falls in the introductory section
- 2. THEORY all analyses, simulations, algorithms, theoretical formulations and results of any sort dealing with computer networks. The main distinction to be made is from the next section on architecture.

This section is broken down into the following classes:

- 2.0 General self-explanatory
- 2.1 Analysis divided further as follows:
  - 2.1.0 General
  - 2.1.1 Simulation descriptions of actual simulations of networking systems
  - 2.1.2 Analysis all analytic work which is not based on simulations
  - 2.1.3 Routing all articles dealing with routing algorithms, computations or simulation. (This class was pragmatically established).
  - 2.1.4 Modelling descriptions of models of networking systems, especially those which have not led to analytic results and which have not been implemented by simulations.

    (Naturally, there will be some overlap with the sections on simulation and analysis)
  - 2.1.9 Other
- 2.2 Measurement any results of observing the operation of existing networks, or techniques of measurement which could be applied

- 2.3 User Considerations human factors, response time considerations, system friendliness discussions
- 2.9 Other anything else
- 3. ARCHITECTURE all articles dealing with the actual design of networks, components, implementation issues
  - 3.0 General
  - 3.1 Specific networks descriptions of specific networks, further categorized as follows:
    - 3.1.0 General descriptions distinguished from the next class by judgment only
    - 3.1.1 Technical descriptions including interim reports
    - 3.1.2 Evaluation performance analyses, reported results of operating, introspective articles
  - 3.2 Telecommunications all articles dealing with data communications
    - 3.2.0 General
    - 3.2.1 Transmission Facilities lines, circuits, common carrier and specialized facilities (but not modems, multiplexers, etc.)
    - 3.2.2 System design of data communications systems
    - 3.2.3 Hardware components components of a data communication system: modems, multiplexers, etc.
    - 3.2.9 Other anything else dealing with telecommunications (telecommunications software, however, is assigned to 3.4)
  - 3.3 Hardware components for computer networks, excluding specific communications hardware covered in the previous class
    - 3.3.0 General
    - 3.3.1 Interfaces between processors or between a processor and the data communications

# system

- 3.3.2 Processors including front-ends and switching computers
- 3.3.9 Other
- 3.4 Software of any type. Application programs will be classed under applications.
  - 3.4.0 General
  - 3.4.1 Communications communications control (but line disciplines are reserved for 3.5)
  - 3.4.2 Operating Systems including network control programs
  - 3.4.3 Data Management
  - 3.4.4 User-oriented
  - 3.4.5 Software Testing
  - 3.4.9 Other
- 3.5 Protocols including line discipline and communications control procedures
  - 3.5.0 General
  - 3.5.1 Low Level
  - 3.5.2 High Level
  - 3.5.9 Other
- 3.9 Other
- APPLICATIONS all articles dealing with uses of computer networks
  - 4.0 General
  - 4.1 Functional packages, services or capabilities likely to have widespread use (e.g., text editing or teleconferencing systems)
    - 4.1.0 General

- 4.1.1 Teleconferencing Systems
- 4.1.2 File Management (including file transfer and data sharing)
- 4.1.9 Other
- 4.2 Discipline-oriented applications common to a specific field (e.g., an engineering package, a chemical analysis service)
  - 4.2.0 General
  - 4.2.1 Health and Medical Sciences
  - 4.2.2 Library Science
  - 4.2.3 Education
  - 4.2.9 Other
- 4.3 Computer Utility this category is usually claimed by the article itself
- 4.9 Other
- 5. MANAGEMENT all articles dealing in any way with the operation or business of computer networks
  - 5.0 General
  - 5.1 Operations day to day management
  - 5.2 Market Analysis who are the users?
  - 5.3 Financial capitalization, billing, finance
  - 5.4 Regulatory public policy, tariffs, etc.
  - 5.5 Standards
  - 5.6 Security systems, requirements
  - 5.7 User Services
  - 5.8 Procurement
  - 5.9 Other

THE PROBLEMS THAT ARISE WHEN IMPLEMENTING A DISTRIBUTED DATA BASE SYSTEM IN AN INTERCOMPUTER NETWORK ARE ADDRESSED IN THIS PAPER. THREE PROBLEM AREAS ARE DISCUSSED: THE DETERMINATION OF THE NODE AT WHICH DESIRED INFORMATION RESIDES THE USER AND SYSTEM CAPABILITIES NECESSARY TO ACCESS AND MAINTAIN THESE (DISTRIBUTED) DATA BASES, AND THE IMPACT OF SUSCHEMES ON THE HARDWARE AND SOFTWARE CONFIGURATIONS OF THE HOST SITES. THE DISCUSSION DEALS SPECIFICALLY WITH THE WWMCCS (WORLD WIDE MILITARY COMMAND AND CONTROL SYSTEM) NETWORK OF HONEYWELL 6000 COMPUTERS, BUT THE CONCEPTS ARE DEVELOPED IN A REASONABLY GENERAL MANNER.

THIS THESIS IS A SURVEY OF THE FIELO OF GENERAL PURPOSE COMPUTER NETWORKS AND A DISCUSSION OF SOME OF THE RELEVANT CONCEPTS. A VARIETY OF NETWORKS ARE DISCUSSED AND AN ATTEMPT IS MADE TO CATEGORIZE THEM. MODELING TECHNIQUES IN COMPUTER NETWORKS ARE SURVEYED AND APPLIED TO DATA SHARING AND LOAD SHARING. SOME OF THE PRESENT DAY IDEAS ON INTERPROCESS COMMUNICATION ARE REVIEWED, FINALLY THE HOST-HOST PROTOCOL OF THE APPARET IS DESCRIBED AND A SPECIFIC SITE IMPLEMENTATION IS ANALYZEO. COMPUTER NETWORKS ARE CLASSIFIED ACCORDING TO THE OEGREE OF TRANSPARENCY PRESENTED BY THE NETWORK TO THE USER. THE
PRIMARY DISTINCTION BETWEEN THE TWO CLASSES SUGGESTED IS IN RESPONSIBILITY FOR MANAGING COMPUTER RESOURCES. IN THE FIRS
CLASS, THE RESPONSIBILITY FOR RESOURCE MANAGEMENT FALLS ON THE USER; IN THE SECOND CLASS THE USER IS ALOEO IN THE
ACQUISITION AND HANDLING OF NEEDED RESOURCES BY A NETWORK OPERATING SYSTEM.
THESE CONCEPTS ARE OISCUSSED WITH REFERENCE TO EXAMPLES FROM TYMENT, APPANET, OCS (UNIVERSITY OF CALIFORNIA - IRVINE) IN THE FIRST

A SET OF ANALYTICAL METHODS FOR ESTIMATING THE PERFORMANCE OF A NETWORK IS DESCRIBED. WITH A GIVEN TOPOLOGY, ROUTING PROCEDURE, AND TRAFFIC MATRIX, THE LENGTH OF TIME IT TAKES A MESSAGE TO TRANSIT THE NETWORK IS ANALYZED. OPTIMIZATION TECHNIQUES RELATING CHANNEL CAPACITIES, MESSAGE DELAYS, AND COSTS TO A GIVEN TOPOLOGY AND ROUTING PROCEDURE ARE ALSO DISCUSSED.

PRESSURES THAT LEAD TO MORE WIDESPREAD USE OF COMPUTERS IN THE OPERATION OF SOCIETY ARE ILLUSTRATED. IT IS POINTED
DUT THAT COMPUTER NETWORKS ARE NECESSARY TO HANDLE THE MASSIVE BOOKKEEPING PROBLEMS OF SOCIETY AND THE STORAGE OF
KNOWLEDGE. A GOOD ANALOGY IS RAISED COMPARING THE IMPORTANCE OF ECONOMIC COMPUTER NETWORKS TO THE MASS PRODUCTION OF
SERVICES WITH THE IMPORTANCE OF ECONOMIC TRANSPORTATION NETWORKS TO THE MASS PRODUCTION OF GOODS. THE DANGEP IS ALSO
DISCUSSED OF PROVIDING COMPUTER ACCESS AND THE ASSOCIATED INFORMATION TO A RESTRICTED SEGMENT OF SOCIETY WHICH CAN BE
TRANSFORMED INTO POWER DVEP THE PEST OF SOCIETY. THE CONCLUSION IS THAT COMPUTERS MUST BE MADE TRULY ACCESSIBLE TO THE PUBLIC AT LARGE.

THE 10-YEAR COST SENSITIVITY. AS A FUNCTION OF CHANNEL BIT RATE, FOR A WIDE GEOGRAPHICALLY DISPERSED MIX OF VARIABLE SIZE DATA CUSTOMERS IS DEVELOPED BASED ON CURRENT AND PROJECTED COSTS FOR LEASED TRANSMISSION SERVICE AND PURCHASED PACKET SWITCHING PROCESSORS. TO ACHIEVE THIS OBJECTIVE, A MODEL FOR THE PROJECTION OF LEASED TRANSMISSION COSTS INTO THE FUTURE IS PROPOSED. RESULTS OF THE STUDY INDICATE THAT IN AN EFFICIENTLY DESIGNED DATA NETWORK, THE SENSITIVITY OF COST WITH CHANNEL BIT RATE IS VERY MINIMAL OVER A SIGNIFICANTLY BROAD RANGE OF INTEREST, AND FURTHER INDICATES THAT THIS RESULT IS NOT EXPECTED TO CHANNE WITH TIME. HENCE, ONCE CAN PROCEED WITH CONFIDENCE TOWARDS A SYSTEM DESIGN THAT IS EXPECTED TO REMAIN COST-EPFECTIVE FOR A LONG TIME SPAN.

THIS IS AN INTERESTING APPLICATION OF TECHNOLOGICAL FORECASTING TO DATA COMMUNICATIONS. THE RESULTS CAN BE NO BETTER THAN THE BASIC ASSUMPTIONS, BUT SUCH AN APPROACH IS CLEARLY PREFERABLE TO PURE GUESSWORK.

THE DISCUSSION IS CHIEFLY CONCERNED WITH DISTRIBUTED NETMORK ANALYSIS AND THE SURVIVABILITY OF NODES AND LINKS IN THE EVENT OF AN ENEMY THERMO-NUCLEAR ATTACK. A RUDIMENTARY COST ANALYSIS IS PERFORMED ON A VARIETY OF COMMUNICATION TECHNIQUES INCLUDING PULSE REGENERATIVE REPEATERS AND WINI-COST MICROWAVE, A DISCUSSION DN STORE AND FORWARD TECHNIQUES FOLLOWS AND A HEURISTIC ROUTING SCHEME IS DESCRIBED.

  - A THOROUGH TREATMENT OF ANALYTIC DESIGN PROCEDURES FOR CENTRALIZED COMPUTER COMMUNICATION NETWORKS IS PRESENTED. FULLDWING ANUMBER OF CLEAR AND COMPLETE DEFINITIONS OF RELEVANT TERMS, THE FACTORS INFLUENCING SELECTION OF A CENTRALIZED OR DISTRIBUTED NETWORK ARE DISCUSSED, LEADING TO A CONCLUSION THAT A COMPREMENSIVE STUDY OF THE DESIGN OF CENTRALIZED NETWORKS IS STILL NEEDED. SEVERAL ASSUMPTIONS ARE MADE AND JUSTIFIED IN THE REPORT, INCLUDING POISSON INTER-ARRIVAL DISTRIBUTIONS FOR DATA FLOW INTO SUCH NETWORKS. FUTURE MORK IS SUGGESTED IN WHICH SOME OF THESE ASSUMPTIONS ARE MODIFIED TO REPRESENT DIFFERENT AND. PERHAPS. STILL MORE REALISTIC CONFIGURATIONS, INCLUDING SUPERIMPOSED CENTRALIZED NETBORKS.

ADAPTIVE ROUTING TECHNIQUES APPLICABLE TO MESSAGE SWITCHING COMPUTER-COMMUNICATION NETWORKS, SUCH AS THE ARPA NETWORK, ARE CONSIDERED IN THIS REPORT. EMPHASIS IS ON THE PREDICTION OF AVERAGE MESSAGE DELAY AND THE SPECIFICATION, IMPLEMENTATION AND EVALUATION OF VARIOUS CLASSES OF MESSAGE ROUTING PROCEDURES. A MODEL OF A MESSAGE SWITCHING NETWORK IS UTILIZED AS THE BASIS FOR A SIMULATION PROGRAM TO OBTAIN THE PERFORMANCE OF SPECIFIC ROUTING ALGORITHMS. A METHCOCLOGY FOR INVESTIGATING MESSAGE ROUTING STRATEGIES (S DEVELOPED AND ROUTING TECHNIQUES ARE CLASSIFIED.

EFFICIENT ROUTING POLICIES ARE REQUIRED FOR BOTH THE DESIGN AND OPERATION OF DISTRIBUTED, PACKET-SWITCHED COMPUTER RETWORKS. THE AUTHOR DESCRIBES TWO MAIN CLASSES DE ROUTING POLICIES. IN THE DESIGN PROCESS. DETERMINISTIC POLICIES ARE GENERALLY USED; FOR THE ROUTING OP PACKETS IA REAL NETWORK ADAPTIVE POLICIES ARE IMPLEMENTED. THE TWO POLICIES ARE COMPARED USING ANALYTICAL AND SIMULATION METHODS. A NEW CENTRALIZED ADAPTIVE POLICY IS PROPOSED WHICH COMBINES THE POSITIVE FEATURES DE BOTH DETERMINISTIC AND ADAPTIVE ROUTING.

FLOW CONTROL STRATEGIES ARE THE ENSEMBLE OF CONTROL PROCEDURES IN A NETWORK THAT REGULATE INPUT RATES AND THUS PREVENT NETWORK CONGESTION. THIS PAPER REPRESENTS A PRELIMINARY EFFORT IN THE DEVELOPMENT OF GENERAL MODELS FOR THE CLASSIFICATION AND EVALUATION OF DIFFERENT FLOW CONTROL STRATEGIES. IN PARTICULAR, EXISTING AND PROPOSED FLOW CONTROL TECHNIQUES ARE REVIEWED, AND DIFFERENT TYPES OF FLOW CONTROL ARE 015TINGVISHED: REASSEMBLY CONTROL AND STORE AND FORWARD (S/F) CONTROL. CLEAR EXPLANATIONS SHOW THE DIFFERENT PROBLEMS EACH TECHNIQUE AND PERFORMANCE IN A NETWORK IS ALSO CLEARLY ILLUSTRATED WITH AN ARPANET EXAMPLE. A "DATA STREAM MODEL" IS DEVELOPED TO INVESTIGATE HOLDING TIMES ACROSS DIFFERENT TYPES OF SYSTEMS IN RELATION TO USER/COMPUTER DIAL TIMES, USER/COMPUTER DELAY TIMES AND COMMUNICATION BURST CHARACTERISTICS, INTERESTING CONCLUSIONS ARE DRAWN FOR THE SYSTEMS STUDIED AND THE MODEL IS APPLICABLE IN GENERAL TO USER-COMPUTER INTERACTIONS. THE MODEL IS SOMEWHAT LIMITED. THERE IS NO TREATMENT OF FULL OUPLEX, FOR EXAMPLE, BUT THE MODEL STILL DESERVES CAREFUL ATTENTION. ALL DESIGNERS OF INTERACTIVE REMOTE ACCESS SYSTEMS AND OF COMMUNICATIONS FACILITIES TO SUPPORT THEM SHOULD BE FAMILIAR WITH THIS MATERIAL.

THIS PAPER PRESENTS AN ANALYTIC COMPUTER MODEL FOR ANALYZING AND ESTIMATING RESPONSE CHARACTERISTICS OF AN INTERCOMPUTER NETWORK UTILIZING STORE—AND-FORWARD COMMUNICATIONS. THE MODEL ANALYZES THE NETWORK ON A LINK—BY-LINK BASIS, COMPUTING EXPECTED DELAY FROM SUCH FACTORS AS BANDWIDTH, AVERAGE MESSAGE LENGTH AND MESSAGE DEMAND DISTRIBUTION (LINE LODGING). SUCH VARIABLES AS THOSE INTRODUCED BY ADAPTIVE ROUTING ALGORITHMS ARE NOT CONSIDERED. THE MODEL IS APPLIED TO ONE POSSIBLE DESIGN OF AN INTERCOMPUTER NETWORK TO DERIVE APPROXIMATE ANTICIPATED MESSAGE RESPONSE CHARACTERISTICS. PARAMETRIC SENSITIVITY ANALYSIS IS PERFORMED, AND A GENERALIZED COMPUTER MODEL (INCLUDING A FORTRAM PROGRAM LISTING) FOR STOCHASTIC NETWORK ANALYSIS IS DESCRIBED.

OATA THROUGHPUT OF HIGH SPEED DATA TERMINALS USING THE DIAL TELEPHONE NETWORK IS CALCULATED FOR SIGNALING RATES OF 1200 TO 4800 BITS PER SECOND USING THE ANSI X3:28-1971 CONTROL PROCEDURES. THE THROUGHPUT IS MEASURED IN TERMS OF THE PROPOSED ANSI CRITERIA TRANSFER RATE FOR INFORMATION BITS (TRIB) DESCRIBED IN X3535/80. THE THROUGHPUT CALCULATIONS ARE SHOWN GRAPHICALLY WITH TRIB AS A FUNCTION OF BLOCK LENGTH, ERROR RATES OF THE TELEPHONE CONNECTION, SIGNALING RATE AND TELEPHONE LINE DELAYS, ERROR RATES ARE BASED ON A PUBLISHED SURVEY INVOLVING SEVERAL HUNDRED TELEPHONE CONNECTIONS TO GEOGRAPHICALLY DISTRIBUTED PARTS OF THE UNITED STATES.

INTERACTIVE MAN/COMPUTER SYSTEMS HAVE GENERALLY BEEN DESIGNED WITH ONLY INTUITIVELY DERIVED SPECIFICATIONS FOR RESPONSE CRITERIA. IN THIS PAPER, THE AUTHOR, A BEHAVIDRAL SCIENTIST, ATTEMPTS TO LIST AND DEFINE THE DIFFERENT CLASSES OF OPERATOR ACTION AND DURPOSES AT INTERACTIVE TERMINALS. THE IMPLICATION IS THAT DIFFERENT ACTIONS AND PURPOSES HAVE DIFFERENT ACCEPTABLE RESPONSE CRITERIA.

THE 16 CATEGORIES OF ACTIVITIES WHICH THE AUTHOR IDENTIFIES CAN ACTUALLY BE CHARACTERIZED BY MORE GENERAL CLASSES OF ACTIVITY. ONE SUCH CLASS IS THE INPUT OF DATA TO THE SYSTEM, AS BY XEYBOARD OR LIGHT-PEN. AN IMMEDIATE RESPONSE OF NO LCNGER THAN 0.1 TO 0.2 SECONDS IS DEMANDED FOR THIS CLASS. A SECOND CLASS IS CHARACTERIZED BY A USER ENGAGED IN INTENSE INTERACTION REDUIRING THE READY ACCESS OF OATA FROM HIS OWN 'SHORTTEN MEMORY'. SUCH ACTIVITY REDUIREDS NO LONGER THAN A TWO-SECOND RESPONSE IN ORDER THAT THE CHAIN OF THOUGHT NOT BE BROXEN, A FINAL CLASS INCLUDES THOSE ACTIVITIES WHICH COMPLETE A SUBJECTIVE (SUB)TASK OR (SUB)PURPOSE. A NETWORK IS DESCRIBED CONNECTING A VARIETY OF COMPUTERS, RERIPHERALS, AND TERMINALS TO A CENTRAL ROUTING COMPUTER.
THIS CENTRAL ROUTING COMPUTER IS A MESSAGE-SWITCHING COMPUTER ACTING AS A NODE IN A NATIONAL DISTRIBUTED COMPUTER
NETWORK, OTHER THAN NOTING ITS EXISTENCE, THE CONCERN IS NOT WITH THE NATIONAL NET. BUT DNLY WITH LOCAL NETS THAT
CONNECT TO 1T. THE MESSAGE-SWITCHING COMPUTER IS DESIGNED TO HANGLE HIGH SPEED SUBSCRIBERS, LOWER SREED DEVICES ARE
FIELDED THROUGH A HERARCHY OF MULTIPLEXORS, EACH PERFORMING TRANSMISSION, CONTROL AND ERROR CORRECTION, LARGELY THROUGH
HARDWARE. THE HAROWARE DEVICES DESCRIBED APPEAR SUITABLE FOR HALF OUPLEX TRANSMISSION.

# 3.0 GENERAL

TWE TYPES OF NETWORKS ARE DESCRIBED. THE FIRST IS A DISTRIBUTED NETWORK OF HONOGENEOUS COMPUTERS—IBM 360/67\*S. A TERRINAL FROM DNE HOST IS ABLE TO INTERACT WITH ANOTHER HOST THROUGH A SWITCHED CONNECTION ESTABLISHED ON DEMAND BETWEEN THE POSTS. THE SECOND NETWORK IS NETWORK/440, WHICH IS CLASSIFIED BY THE AUTHOR AS ONE OF NON-HOMOGENEOUS HARDWARE AND OPERATING SYSTEMS. THE GOJECT BEING TO VIEW THE NETWORK AS ONE WOLLIPROCESSOR. THE NETWORK IS CENTRAL SWITCHED, CONNECTING FOUR DIFFERENT MODED 1360'S AT THE IBM RESEARCH CENTER, EACH OPERATING UNDER DSJ360 AND ACCESSING EACH OTHER THROUGH THE BASIC TELECOMMUNICATIONS ACCESS METHOD. A NETWORK CONTROL LANGUAGE CALLED FACL'S DEFINED AND APPEARS CONVENIENT TO USE. EACH PROCESSOR WUST BE ABLE TO COMPILE AND INTERPRET ACL. THE NETWORK IS DESIGNED FOR CONVENIENT RENOTE PROGRAMMING AND FOR LARGE OR SWALL FILE TRANSMISSION. PROGRAM EXECUTION CAN OCCUP EITHER LOCALLY OR REMOTELY WITH APPARENT EASE. THE STORE AND FORWARD TECHNIQUES USED BY THE NETWORK CONTROL ARE TOLERANT OF HOST CRASHES AND CAN SAVE TRANSMISSIONS ON DISK UNTIL A HOST HAS RECOVERED. INTERACTIVE USERS, IF THEY DESIRE, CAN OBTAIN A DISTINAL OF THE NETWORK IS THAT ALL COMMUNICATIONS PROCESSING AND ERROR RECOVERY INVOLVES THE HOST COMPUTERS. FRONT END PROCESSORS ARE UNDER CONSIDERATION TO IMPROVE EFFICIENCY.

THE HISTORY AND CURRENT STATUS OF THE COMPUTING NETWORK AT PENNSYLVANIA STATE UNIVERSITY IS DESCRIBED. TWO
DISTINCTIVE ASPECTS OF THE TYPE OF NETWORK IMPLEMENTED ARE (I) RETAINING THE BATCH MODE OF OPERATION AS THE PRIMARY
ORIENTATION OF THE SYSTEM AND (2) ESTABLISHING COMPUTATIONAL LABORATORIES FOR THE EXCLUSIVE USE OF STUDENTS AND
MAKING THESE LABS OPERATE ON A SELF-SERVICE BASIS. THE SUCCESS OF THE BATCH NETWORK APPROACH IS EVICENT FROM THE
FACT THAT SYSTEM THROUGHOUT INCREASED FROM 300,000 JOBS OURING 1967-6B ACAGEMIC YEAR TO OVER A MILLION IN 1969 WITH
PEAKS OF MEARLY 10.000 JOBS PER 0AV.

IN THIS PAPER A BRITISH NATIONAL COMPUTER NETWORK IS PROPOSED AND SUPERFICIALLY DESCRIBED. IT IS BASED ON THE INTERCCNNECTION OF AREA COMPUTER SYSTEMS THAT EACH MAY HAVE DIFFERENT FUNCTIONS. TWO POINTS BROUGHT OUT ARE THE POTENTIAL USE OF SUCH A NETWORK TO PROVIDE BEFORE-THE-FACT CONVERSION TO A NEW MACHINE AT ONE SITE THROUGH THE USE OF A REMOTE COMPUTER AND THE CENTINUAL ESTIMATION AND PROPAGATION OF 'SURPLUS CAPACITY' REPORTS BY PARTICIPATING COMPUTER SYSTEMS.

HISTORICAL EVOLUTION OF NERCOMP, ORGANIZATIONAL AND MANAGERIAL OSSCRIPTIONS OF THE NETWORK, AND NETWORKING PROBLEMS ARE
AMONG THE TOPICS OISCUSSEO, THE CONCEPT OF RESOURCE-CHAINING WAS DEVELOPED IN A NERCOMP COMMITTEE. RESOURCE-CHAINING
REFERS TO THE CHAIN OF INSTITUTIONS THROUGH WHICH COMPUTING RESOURCES PASS FROM SUPPLIER TO DISTRIBUTOR TO END USER;
ASSIGNING MANAGERIAL RESPONSIBILITIES TO APPROPRIATE UNITS. NERCOMP IS PRESENTLY MODIFYING ITS LINE-SWITCHED NETWORK TO
A MESSAGE-SWITCHED NETWORK, RATIONALE FOR THIS CHANGE AND THEIR USE OF NIMPHS (NETWORK INTERFACE MESSAGE PROCESSING HOSTS) EXPLAINED.

CERTAINLY NERCOMP'S GEOICATION TO THE ISSUES OF NETWORK MANAGEMENT AND ORGANIZATION HAS CONTRIBUTED TO THE SUCCESS OF

FILE CONTROL IS CENTRAL AND IS PERFORMED BY THE POP-6. THE NETWORK CONTAINS A NUMBER OF STORAGE DEVICES, BUT THE MOST INTERESTING IS THE IBM PHOTOSTORE, ONE TRILLION BY THIS PROPER ALOW SPOON, NON ERASABLE, THE FILE STRUCTURE IS SIMILAR TO THAT DF MALTICS, WITH POOTS AND DIRECTORIES WITHIN DIRECTORIES. THE TYMNET COMMERCIAL COMPUTER NETWORK IS INTRODUCED. THE NETWORK IS SPECIFICALLY DESIGNED FOR TERMINAL TO COMPUTER COMMUNICATIONS, IT INCORPORATES SPEED RECOGNITION, FULL-OUPLEX SUPPORT, HALF-OUPLEX SUPPORT AND SOME SPECIAL DEVICE FEATURES INCLUDING A "CHARACTER GOEBLER" TO FLUSH THE PIPE-LINE OF OUTPUT ON A USER GENERATED BREAK. THE SAME MACKINE (VARIAN 620 MINICOMPUTER) IS USED AS A FRONT END TO THE HOSTS (XOS 940\*S) IN THIS DISTRIBUTED NETWORK AND AS A REMOTE TERMINAL CONCENTRATOR TO ACCOMMODATE OLAL-UP USERS. THE NETWORK CONTROLLER RESIDES IN ONE OF THE HOSTS BUT IS AUTOMATICALLY TRANSFERRABLE TO AN ALTERNATE HOST IN THE EVENT OF FAILURE. THIS NETWORK IS NOT DESIGNED TO ACCOMMODATE ALL FORMS OF COMPUTER INPUT-NO BATCH OR GRAPHICS SUPPORT FOR EXAMPLE—BUT IS GEARED TOWARD THE INTERACTIVE TERMINAL USER.

FEW ARTICLES THESE DAYS ACTUALLY EXPLAIN WHAT COMPUTERS DO IN BOTH CIRCUIT SWITCHING AND MESSAGE SWITCHING APPLICATIONS. THIS ARTICLE IS AN EXCEPTION, FOR IT DOES EXPLAIN IN A TUTORIAL FASHION THE VARIOUS FUNCTIONS PERFORMED IN EACH CASE. AFTER COMPARING CIRCUIT SWITCHING WITH A TYPICAL MESSAGE SWITCHING SYSTEM (AUTODIN), PACKET SWITCHING IS INTRODUCED (IN THE FORM OF ARPANET) AND COMPARED TO MESSAGE SWITCHING,

THE ARTICLE ENDS WITH A DESCRIPTION OF AN "ASSOCIATIVE COMMUNICATIONS MULTIPLEXER" ON WHICH THE AUTHORS HAVE APPARENTLY BEEN WORKING AND WHICH IS CLAIMED TO BE APPLICABLE FOR A VABELETY OF SWITCHING FUNCTIONS, UNFORTUNATELY,

THE USE OF ASSOCIATIVE PROCESSING TECHNIQUES IN COMMUNICATIONS IS NOT WELL EXPLAINED.

THIS PAPER REPORTS RESULTS OF A STUDY ON THE SUBSCRIBER SIGNALING SYSTEM IN A DATA SWITCHING NETWORK. THE AUTHORS DISCUSS REQUIREMENTS FOR THE SUBSCRIBER LINE SIGNALING AND THE AUDVANTAGES IN REALIZING THE REQUIREMENTS WITH A THREE LEVEL SIGNALING SYSTEM. THE SYSTEM IS APPLICABLE TO BOTH START-STOP AND SYNCHRONDUS TERMINALS.

A CONCEPTUAL SPECIFICATION FOR A PACKET SWITCHING NET#ORK DESIGNED TO DPERATE UNDER A SATURATED CONDITION IS PRESENTED. IT COMPRISES FIXED ROUTING, I.E., A VIRTUAL CIRCUIT IS ESTABLISHED BETWEEN TWO CORRESPONDENTS, PRIVATE BUFFERING ALLOCATING A BUFFER FOR EACH CIRCUIT, PACKET HANDSHAKING INDICATING THE FREEING DF A BUFFER FOR THE NEXT TRANSMISSION, AND VARIABLE PACKET LENGTH. PRIVATE BUFFERING HAS ADVANTAGES, BUT IT REQUIRES CONSIDERABLE STORAGE SPACE. PACKET HANDSHAKING REQUIRES ADDITIONAL STORAGE TO GUARANTE ACCEPTANCE OF THE ACKNOWLEDGMENT AND TO AVOID A LOCKDUT. VARIABLE PACKET LENGTH REDUIRES OVERHEAD IN BUFFER ALLOCATION AND COLLECTION. THESE FACTORS SHOULD BE CONSIDERED IN EVALUATING THIS PROPOSAL.

THE MILITARY AIRLIFT COMMAND (MAC) INFORMATION MANAGEMENT SYSTEM (MACIMS) IS A FUNCTIONALLY INTEGRATED COMMAND.
CONTROL AND MANAGEMENT INFORMATION SYSTEM WHICH WILL ALD MAC IN ACHIEVING A MAJOR IMPROVEMENT IN CONTROL AND
MANAGEMENT OF THE MAC FLEET. THE MACIMS SYSTEM INCLUGES THREE DATA PROCESSING CENTERS TO GETHER WITH FIFTEEN REMOTE BASES
WHICH HAVE ACCESS TO THE PROCESSING CENTERS ON AN INTERACTIVE BASIS. MACIMS RELIES EXTENSIVELY ON A COMMUNICATION
NETWORK FOR DATA EXCHANGE BETWEEN PROCESSING CENTERS AND TO PROVIDE REMOTE USERS WITH INTERACTIVE ACCESS TO THE
OATA PROCESSING COUPMENT. A DATA COMMUNICATIONS SUBSYSTEM FOR MACIMS IS DESCRIBED IN THIS REPORT WHICH WILL MEET
CURRENTLY DEFINED REQUIREMENTS. THE TECHNICAL DESCRIPTION IS BASED ON INDIVIDUAL CONSIDERATIONS AT EACH REMOTE
SITE. THE PROPOSEO TERMINAL CONFIGURATIONS FOR THE REMOTE BASES INCLUDE A MIXTURE OF MULTIPLEXERS, MINICOMPUTERS AND
CCNTROLLERS FOR MULTI-ORDP LINES. A DESCRIPTION OF THE TERMINALS IS ALSO INCLUDED.

A NEW MINICOMPUTER/MULTIPROCESSOR IS DESCRIBED. UNIQUE FEATURES OF THE HAROWARE DESIGN AND SOFTWARE ORGANIZATION INCLUDE: AN EXPANDABLE NUMBER OF IDENTICAL PROCESSORS EACH WITH "PRIVATE" MEMORY; SHARED MEMORY AND I/O EQUIPMENT CONTROLLABLE BY ANY PROCESSOR; A MODULAR SCHEME FOR INTERCONNECTING PROCESSORS; AND THE ABSENCE OF AN EXECUTIVE SYSTEM, WITH EACH PROCESSOR DETERMINING ITS OWN TASK ALLOCATION. THE AUTHORS BELIEVE THAT THIS SYSTEM MAY DEFER SIGNIFICANT ADVANTAGES IN MODULARITY, RELIABILITY AND COST/PERFORMANCE.

A SOFTWARE COMMUNICATION FACILITY FOR AN OPERATING SYSTEM WHICH IS PART OF A NETWORK IS DESCRIBED. OATA PORTS ARE INTRODUCED AS A WAY OF CONTROLLING INFORMATION FLOW BETWEEN TWO PROCESSES IN AN ORDERLY FASHION. THE PURPOSE OF THIS SYSTEM IS TO ALLOW A USER PROCESS IN THE NETWORK ENVIRONMENT TO CONTROL THE FLOW OF INFORMATION BETWEEN IT AND OTHER OBJECTS IN THE SYSTEM (FILES OR OTHER PROCESSES).

THIS OCCUMENT CONTAINS THE CESIGN SPECIFICATIONS FOR THE NETWORK CONTROL SOFTWARE TO BE IMPLEMENTED ON THE HONEWHELL 6000 SERIES COMPUTERS FOR THE INITIAL PHASE OF THE PROTOTYPE WWMCCS (WORLO WIDE MILITARY COMMAND AND CONTROL SYSTEM) INTERCOMPUTER NETWORK. THIS NETWORK IS MODELEO ON THE APPA NETWORK, AND THIS OCCUMENT DESCRIBES IN OETAIL THE DESIGN OF THE NETWORK CONTROL PROGRAM. OF POSSIBLE INTEREST IS THE DESIGN DECISION TO LOCATE THE IMPLINITERACE SOFTWARE IN A FRONT-FON COMPUTER (OATAMET SS) WHILE THE SOFTWARE TO IMPLEMENT THE PROTOCOLS AND PROVICE INTER-PROCESS COMMUNICATIONS IS LOCATED IN THE MAINFRAME.

IN THIS SHORT BUT INFORMATIVE PAPER THREE STRATEGIES FCR CONSIDERATION IN THE FUTURE DEVELOPMENT OF OPERATING SYSTEMS WHICH WILL MAKE I THEM MORE AMENABLE TO NETWORKING ARE DEVELOPED. FIRST, SYSTEMS SHOWLD BE MORE CAPABLE DF OFFICE AND RECOVERING FROM TO CAPABLED THAT IN THE ARRANGE AT THE HOST LEVEL REQUESTS FROM THE IMP FOR HOST RETRANSMISSION SOMETIMES RESULT IN CRASHES. SECOND. SINCE CONTROL PROGRAMS IN THE HOSTS RUN AS DARERON (BACKGROUND PROCESSES RESPONDISTLE FOR RECURRING EVENTS IN SYSTEMS SERVICES). OPERATING SYSTEMS SHOULD ALLOW OREMONS TO FUNCTION EFFICIENTLY. THIRD. INTERPROCESS COMMUNICATION IN AN OPERATING SYSTEM SHOULD BE THROUGH 'THIN WIRE' COMMUNICATIONS INTERPROCESS, THAT IS, EXPLICIT DATA EXCHANGES OVER A CONTROLLABLE COMMUNICATIONS PATH LISING WELL-DEFINED PROTOCOLS.

AN INTEDDUCTION TO THE PROBLEMS OF DATA COMPATIBILITY IN A NETWORK OF DISSIMILAR COMPUTERS LEADS TO A DESCRIPTION OF DATA RECONFIGURATION SERVICE (ORS) BEING I MPLEMENTED ON THE ARPANET. THE ORS ALLOWS A PROGRAMMER TO DEFINE \*FORMS\* THAT DESCRIBE DATA TRANSFORMATIONS AND STORES THE FORMS BY NAME. A USER CAN THEN EMPLOY THE SERVICE BY CALLING THE FORM TO ACCOMPLISH A PARTICULAR TRANSFORMATION OF A NETWORK DATA STREAM PASSING BETWEEN A USING PROCESS AND A SERVING PROCESS.

THIS RELATIVELY EARLY DESCRIPTION OF THE ARPA NETWORK HOST-HOST PROTOCOL DOES NOT INCLUDE HOST-HOST FLOW CONTROL.
WHICH WAS OVERLOOKED AT THAT TIME. IN THIS PAPER IT WAS ASSUMED THAT ALL HOSTS ARE INTERACTIVE TIME-SHARING SYSTEMS.
THIS SHOWS THE LACK OF ATTENTION GIVEN TO REMOTE JOB ENTRY AND DATA TRANSFER AT THAT TIME. ALTHOUGH A PRINCIPAL EARLY

THIS PAPER DESCRIBES SOME OF THE USER LEVEL PROTOCOLS ON THE ARPANET, INCLUDING THE EXISTING TELNET AND THE PROPOSED FILE TRANSFER AND REMOTE JOB ENTRY (RJE) PROTOCOLS. TELNET FEATURES DISCUSSED ARE THE CHARACTER SET. CHARACTER ECHOING, ESTABLISHING CONNECTIONS, AND SOME INTRIGUING THOUGHTS ON ATTENTION HANDLING. THE FILE TRANSFER PROTOCOL WAS UNSPECIFIED WHEN THIS WAS WRITTEN, BUT A METHOD OF TRANSFERRING FILES THROUGH THE USE OF TELNET IS DESCRIBED. IMPLEMENTATION PLANS ARE DESCRIBED THAT WOULD GIVE A USER THE ABILITY TO LIST A REMOTE DIRECTORY, SEND A LOCAL FILE, RETRIEVE A REMOTE FILE, ARDAMME A REMOTE FILE, AND DELETE A REMOTE FILE. REMOTE JOB ENTRY, WHICH USES THE FILE TRANSFER PROTOCOL, IS ALSO DESCRIBED.

THIS BRIEF ARTICLE, REPORTING ON THE PRELIMINARY FINDINGS OF AN AIR FORCE STUDY GROUP, PRESENTS AN EXCELLENT SUMM.
OF THE PROBLEMS INVOLVED IN SOFTWARE TRANSFERABILLITY AND SOME POSSIBLE SOLUTIONS. THE MAIN OBSTACLES TO SOFTWARE
TRANSFERABILITY ARE SUGGESTED TO BE LODSE SPECIFICATION OF OATA STRUCTURES, LACK OF PROGRAMMING STANDARDIZATION, AND
EXCESSIVE PROGRAMMER FREEDOM WHEN HIGHER LEVEL LANGUAGES ARE USED. POSSIBLE SOLUTIONS TO THESE PROBLEMS ARE;
(1) ADMINISTRATIVE CONTROL OF PROGRAMMING AND ODCUMENTATION; (2) EXTENSIONS TO CURRENT LANGUAGES; (3) USE OF A NEW
PROGRAMMING ENVIRONMENT WHICH WOULD ELIMINATE THE CONSTRAINTS OF THE CLOER SYSTEM. PRESENTS AN EXCELLENT SUMMARY (ALSO UNGER 5.5)

THE EVOLUTION AND OPERATION OF ORACLE, A COMPUTER PROGRAM FOR COMPUTERIZED CONFERENCING AND RESEARCH, IS DESCRIBED. ORACLE EXISTS AS AN ESSENTIAL PART OF THE COMPUTER-ASSISTED INSTRUCTION SYSTEM AT NORTHWESTERN UNIVERSITY. THE PAPER DESCRIBES THE OPERATION OF OF ORACLE AS A COMMUNICATIONS FACILITY FOR TEACHERS AND SYSTEMS DESIGNERS, AS A RESEARCH TOOL, AS A RECORD-REPER. AND AS AN INSTRUMENT FOR CURRICULAR FEEDBACK, THUS, DRACLE EXTENDS BEYOND THE TRADITIONAL REALM OF COMPUTER-ASSISTED INSTRUMENT FOR SYSTEMS, AND SUGGESTS ALTERNATIVE USES FOR COMPUTERS IN EDUCATION. BOTH THE SYSTEM REQUIREMENTS FOR THE PROGRAM AND ITS SOCIOLOGICAL OIMENSIONS ARE DISCUSSED.

THIS REPORT IS THE RESULT OF AN EXTENSIVE STUDY OF THE CONCEPT OF A NATIONAL CENTER OR NETWORK FOR COMPUTATIONAL RESEARCH ON LANGUAGE (CE-NCOREL) THAT INCLUDED DISCUSSIONS WITH SCIENTISTS, SCHOLARS, AND ADMINISTRATORS AT A VARIETY OF INSTITUTIONS AND ADMINISTRATORS AT A VARIETY OF INSTITUTIONS ONE DISCUSSES AVAILABILITY AND RELIABILITY (IN ORDER OF IMPORTANCE) OF SOFTWARE SUITABLE FOR LANGUAGE RESEARCH AND OF VALIDATION AND STANDARDIZATION PROBLEMS IN MAKING IT NATIONALLY AVAILABLE. ANOTHER CONSIDERS HARDWARE COMPATIBLE WITH THE NEEDS OF LANGUAGE AND RELATED RESEARCH. INCLUDING TERMINAL DEVICES, INTERMEDIATE STORAGE DEVICES, AND CORE REQUIREMENTS. THE THIRD DISCUSSES ORGANIZATIONAL MATTERS OF A NATIONAL LANGUAGE RESEARCH EVENDER OR CENTER, CONCLUDING THAT A MAJOR CENTER FOR RESEARCH CONNECTED TO SATELLITE CENTERS THROUGH A NETWORK IS THE MOST ADVANTAGEOUS ARRANGEMENT. SINCE SUCH AN EXTENSIVE SURVEY WAS CONQUETED OIT WOULD HAVE BEEN INTERMESTING TO INCLUDE A SECTION ON EXISTING CENTERS OF EXCELLENCE IN PARTICULAR AREAS OF LANGUAGE RESEARCH AND TO CONSIDER THE POSSIBILITY OF ORGANIZING FEM INTO A NETWORK. A VARIETY OF MATERIAL IS PRESENTED IN THIS BODK, MUCH DE IT DUTDATED DUE TO THE FAST MOVING NATURE DE THE FIELD (EXAGGERATED BY THE TIME SCALE FOR BOOK PRODUCTION). AS AN INTRODUCTION TO EARLY COMPUTING, IT IS INTERESTING BUT NOT TOTALLY RELEVANT. BY "COMPUTE UTILITY," PARKHILL APPARENTLY MEANS ANY COMBINATION OF REMOTE BATCH OR INTERACTIVE COMPUTING SERVICE. PERHAPS THE TERM "UTILITY" SEEMS ESPECIALLY OUT OF VOGUE NOW SINCE IT NEVER DID REALLY CATCH ON AND HAS FREQUENTLY BEEN LODGELY USED. THE DESCRIPTION OF "PUBLIC UTILITY" IS INTERESTING. SOME OF THE PRACTICAL CONSIDERATIONS THAT HAVE LEG TO THE STABLE, SUCCESSFUL OPERATION OF THE TRIANGLE UNIVERSITIES COMPUTATION CENTER ARE DISCUSSED IN THIS ARTICLE. SOME OF THE INTERESTING DECISIONS INCLUDE THE SELECTION OF A NEUTRAL LOCATION, OESPITE THE ADDITIONAL SETUP COSTS INVOLVED, AND THE METHOD OF JOINT MANAGEMENT OF THE CENTER. ALSO, COSTS ARE SPLIT THREE WAYS AMONG THE PRINCIPAL PARTICIPANTS INDEPENDENT OF USE. ECONOMY OF SCALE IS EXHIBITED OVER THE USE OF SMALLER, SEPARATE CAMPUS FACILITIES ALGONG WITH OTHER BENEFITS SUCH AS THE ABILITY TO OFFER RESEARCHERS MORE POWERFUL CEMPUTING SUPPORT THAN WOULD OTHERWISE BE POSSIBLE.

THE AUTHOR PRESENTS A CONCEPTUAL FRAMEWORK FOR DATA COMMUNICATIONS MANAGEMENT PLANNING. DVERALL PLANNING IS SUBDIVIDED INTO THREE CATEGORIES. THE OATA COMMUNICATIONS PROCESS DEALS WITH THE RELATIONSHIP BETWEEN TODLS. THE USER AND OTHER SYSTEM PROCESSES, THE PLANNING PROCESS DEALS WITH GOALS, CONSTRAINTS, TECHNOLOGY AND UNCERTAINTY IN TERMS OF SHORT, MEDIUM AND LONG RAWGE TIME SPANS. ORGANIZATIONAL CONSIDERATIONS ENCOMRASS THE INTEROEPENDENT RELATIONSHIP OF TECHNOLOGY AND THE ORGANIZATION. IN HIS SUMMARY HOPEWELL ADVISES THAT THE PLANNING PROCESS INCLUDE THE ORREATING MANAGERS RATHER THAN STRICTLY AN AUTCROMOUS SPECIAL STAFF.

THE NETWORK CONTROL CENTER (NCC) CONTAINS A HOST COMPUTER ON THE ARPA NETWORK TO WHICH THE IMP'S PERIODICALLY REPORT AND WHICH SERVES AS A DIAGNOSTIC AND MAINTENANCE-COORDINATING CENTER FOR THE NETWORK, THIS PAPER BRIEFLY DESCRIBES THE NCC HARDWARE AND DISCUSSES SUCH SOFTWARE ISSUES AS NCC-RELATED ROUTINES IN THE IMP'S, DATA COLLECTION AND INTERPRETATION MECHANISMS, LINE STATUS CETERNINATION, IMP STATUS NO PROGRAM RELOADING, AND HOST AND LINE THROUGHPUT. DETAILS OF NCC OPERATIONS (STAFFING, PROBLEM-HANDLING PROCEDURES, TRACK RECORD) AND A SUMMARY OF DVERALL NCC EXPERIENCE AND FUTURE PLANS IS INCLUDED. THE PAPER IS AN EXCELLENT GUIDE TO SOME OF THE TYPES OF CONTROL SERVICES WHICH MUST BE PROVIDED FOR AN OPERATIONAL NETWORK OF THIS TYPE.

A SHORT BUT EXCELLENT DESCRIPTION IS GIVEN OF ECONOMIES OF SCALE AND ECONOMIES OF SCELEAULAININ AND HOW THEY OPERATE IN A NETWORK ENVIRONMENT. THE KINDS OF ECONOMIES ARE RELATED TO NETWORK TOPOLOGY IN THAT STAR NETWORKS ARE LIKELY TO EXHIBIT ONLY ECONOMIES OF SCALE WHILE DISTRIBUTED NETWORKS MAY EXHIBIT BOTH ECONOMIES OF SCALE AND OF SPECIALIZATION.

TELEPHONE-ACCESS INFORMATION SYSTEMS ARE ANALYZED, PARTICULARLY WITH RECARD TO RECORDED MESSAGES ON SUBJECTS OF INTEREST TO PHYSICIANS, BUT WITH GENERAL APPLICABILITY. QUEUING THEORY IS USED TO ARRIVE AT THE NUMBER OF LINES REDUIRED FOR ACCOMMODATING PEAK TRAFFIC. RATE STRUCTURES ARE ANALYZED IN RELATION TO VOLUME OF CALLS. ALSO EXAMINED ARE THE SENSITIVITIES OF COMMUNICATIONS COSTS TO ERRORS IN USAGE ESTIMATES, VARIATIONS IN SERVICE TIME. AND CHANGES IN PEAK HOUR CONDITIONS.

THE ECCNOMIC CONSEQUENCES OF THE GROWTH OF COMPUTER NETWORKS ACROSS NATIONAL BORDERS ARE EXPLORED IN TERMS OF THE BENEFITS TO BE REALIZED AND FACTORS LIKELY TO LIMIT OR DELAY SUCH GROWTH. TWO TYPES OF BENEFITS ARE IDENTIFIED: ECONOMIES OF SCALE ARISING FROM SERVING LARGER USER GROUPS, AND EXTERNAL BENEFITS WHICH ARISE FROM THE ADDED OPPORTUNITY TO COMMUNICATE WITH MORE SYSTEMS. SIGNIFICANT AREAS OF CONCERN FOR INTERNATIONAL NETWORKING ARE IDENTIFIED AS SECURITY, PRIVACY OF THE INDIVIDUAL. COPYRIGHT. BALANCE OF PAYMENTS AND OF TRADE, AND DIVISION OF BENEFITS. NO SPECIFIC CONCLUSIONS ARE REACHED BY THE DISCUSSION.

THE THESIS OF THIS ARTICLE IS THAT LACK OF ATTENTION TO THE BUSINESS RELATIONSHIPS BETWEEN USERS AND SUPPLIERS IN TODAY'S TIME-SHARING SYSTEMS HAVE PRODUCED A MECHANISM WHICH IS FAR FROM OPTIMAL FOR PROMOTING NETWORK USAGE, COMPARISONS ARE MADE TO THE PUBLIC SWITCHEON NETWORK WHERE A SINGLE BILL IS RENDERED FOR SERVICES WHICH MAY BE PROVIDED BY A NUMBER OF SUPPLIERS, AND TO THE OPERATION OF THE COPYRIGHT LAWS IN THE MUSIC BUSINESS, WITH PERFORMANCE RIGHT FEES BEING PAID WHENEVER A SELECTION IS PLAYED, THE AUTHOR ARGUES THAT CURRENT NETWORK FAIL TO PROVIDE A DEQUATE MECHANISMS NEEDOED TO REMARD AUTHORS AND STIMULATE FURTHER OFFERINGS, THE ROLE OF SUCH AUTHORS AND OF TIME-SHARING AS A SERVICE INDUSTRY IS ALSO DISCUSSED.

THE NATURAL MONDOPLY OF THE CARRIERS IS BEING CHALLENGED, AND, AS THEY THEMSELVES TITEMPT TO DIVERSIFY HORIZONTALLY BY OFFERING DATA PROCESSING SERVICES, THE VERTICAL INTEGRATION APPROACH WHICH THEY HAVE FOSTERED IS BEING CHALLENGED BY OTHERS. THIS REPORT WAS PREPARED TO SUPPORT FLANNING FOR SUCH A NETWORK. TOPICS COVERED INCLUDE A MODEL AND FUNCTIONAL ANALYSIS OF A WWMCCS COMPUTER NETWORK. ANALYSIS OF COMMUNICATIONS DISCIPLINES, AND DISCUSSIONS OF THE FEASIBILITY OF COMMON SOFTWARE AND USER-ORIENTED NETWORK PROTOCOLS.

SOME OF THE DISCUSSION IS DUITE SPECIFIC TO THE WWMCCS SYSTEMS; HOWEVER, MUCH OF THE DISCUSSION IS READILY GENERALIZED TO CTHER NETWORKS.

THIS REPORT DESCRIBES A NUMBER OF TECHNIQUES THAT CAN ASSURE SECURITY DF DATA TRANSMISSION IN A DISTRIBUTED MESSAGE SWITCHEO NETWORK. ALTHOUGH INTENDED AS AN OPEN DISCUSSION OF MATERIAL PARTICULARLY RELEVANT FOR MILITARY SECURITY APPLICATIONS. THE METHODS FOR ASSURING ADEQUACY AND EFFECTIVESS OF CONTROLS ON GATA ACCESSIBILITY ARE ALSO DF POTENTIAL INTEREST IN MANY APPLICATIONS OF NON-MILITARY RESDURCE SHAPING COMPUTER NETWORKS. TECHNIQUES PROPOSED IN THIS REPORT INCLUDE CONVENTIONAL CPYPTOGRAPH TE TECHNIQUES THAT CAN BE IMPLEMENTED IN THE MESSAGE SWITCHED NETWORK ITSELF. IN ADDITION TO PROPOSING THE INTENDUCTION OF FRAUDULENT TRAFFIC, THE REPORT ALSO MENTIONS A FEW TECHNIQUES SUCH AS TRANSMISSION OF SUCCESSIONS BLOCKS BY EVER CHANGING OR CONTINUOUSLY CHANGING PATHS AS AN EXAMPLE OF THOSE TECHNIQUES PARTICULARLY APPLICABLE TO THIS TYPE OF NETWORK,

THERE ARE MANY TYPES OF SERVICES REQUIRED AND DESIRED BY USERS OF A COMPUTER NETWORK. IN THIS PAPER THE AUTHOR DISCUSSES A "GENERIC SET OF USER COMMUNICATIONS SUPPORT SERVICE THAT ARE COMMON ACROSS CLASSES OF USERS AND CLASSES OF HOST COMPUTER SERVICES.\* VARIOUS TYPES OF USER DEMANDS ARE CONSIDERED AND SOME ALTERNATIVES ARE GIVEN FOR PROVIDING THE CAPABILITY TO SUPPORT THESE USER SERVICES. COST-BENEFIT ANALYSIS IS DISTINGUISHED FROM ANALYSES OF SYSTEM PERFORMANCE IN THAT THE LATTER ARE DIRECTED AT OPTIMIZING SYSTEM PERFORMANCE AT A GIVEN LEVEL OF INVESTMENT, WHILE THE FORMER IS DIRECTED AT JUSTIFYING THE INVESTMENT ITSELF. THIS PAPER ASSESSES THE STATE-OF-THE-ART IN COST-BENEFIT ANALYSIS OF INTERACTIVE SYSTEMS AND SUGGESTS AN APPROACH FCR DEVELOPING IMPROVED METHODOLOGY.

METHODOS OF ANALYZING THE PERFORMANCE AND COSTS OF COMPUTER SYSTEMS IN GENERAL AND INTERACTIVE SYSTEMS IN PARTICULAR ARE DISCUSSED. WITH THIS INFORMATION IT IS SHOWN HOW COST-EFFECTIVENESS ANALYSIS MAY BE PERFORMED. THE NEXT CRUCIAL STEP IS TO CONDUCT BENEFIT ANALYSIS, AND ILL-DEFINED ART. THE RESULTS OF BENEFIT ANALYSIS MUST BE COMBINED WITH COST-EFFECTIVENESS ANALYSIS IN GRORE TO PERFORM THE DESIRED COST-BENEFIT ANALYSIS.

AN EXPERIMENTAL METHODOLOGY IS SUGGESTED FOR BETTER PERFORMING BENEFIT ANALYSES OF INTERACTIVE SYSTEMS. A MORE RIGOROUS FORMULATION OF THE COST-BENEFIT PROCEDURE IS THEN DUTLINED. NO ATTEMPT IS MADE IN THE PAPER TO ACTUALLY PERFORM SUCH AN ANALYSIS.

AN EXTREMELY FORMAL MATHEMATICAL MODEL AND ANALYSIS PROCEDURE IS PRESENTED FOR SELECTING THE MOST COST-BENEFICIAL ALTERNATIVE FROM AMONG A NUMBER OF POSSIBILITIES IN A NETWORKING ENVIRONMENT WHERE DECISIONS HAVE TO BE MADE ON WHERE TO PERFORM WERKS OF VARYING TYPES, THE MODEL CONSIDERS THE NUMBER OF SYSTEMS AVAILABLE AND THEIR USAGE COSTS (BOTH VARIABLE AND FIXED), RESQUARCE LIMITATIONS, TRANSITION COSTS IN CHANGING THE MODE OF USAGE, WEIGHTING FACTORS FOR ARBITRARY PREFERENCES, AND THE COST OF CAPITAL. NETWORKING BENEFITS ARE REFLECTED IN THE MODEL AS A REDUCTION IN EXTERNAL COSTS OF USAGE. IF ALL THE VARIOUS COSTS AND FACTORS CAN BE DETERMINED, AND OPTIMAL SOLUTION CAN BE OBTAINED FOR THE USER. ## NBS TECHNICAL PUBLICATIONS

### **PERIODICALS**

JOURNAL OF RESEARCH reports National Bureau of Standards research and development in physics, mathematics, and chemistry. It is published in two sections, available separately:

### Physics and Chemistry (Section A)

Papers of interest primarily to scientists working in these fields. This section covers a broad range of physical and chemical research, with major emphasis on standards of physical measurement, fundamental constants, and properties of matter. Issued six times a year. Annual subscription: Domestic, \$17.00; Foreign, \$21.25.

### • Mathematical Sciences (Section B)

Studies and compilations designed mainly for the mathematician and theoretical physicist. Topics in mathematical statistics, theory of experiment design, numerical analysis, theoretical physics and chemistry, logical design and programming of computers and computer systems. Short numerical tables. Issued quarterly. Annual subscription: Domestic, \$9.00; Foreign, \$11.25.

DIMENSIONS/NBS (formerly Technical News Bulletin)—This monthly magazine is published to inform scientists, engineers, businessmen, industry, teachers, students, and consumers of the latest advances in science and technology, with primary emphasis on the work at NBS. The magazine highlights and reviews such issues as energy research, fire protection, building technology, metric conversion, pollution abatement, health and safety, and consumer product performance. In addition, it reports the results of Bureau programs in measurement standards and techniques, properties of matter and materials, engineering standards and services, instrumentation, and automatic data processing.

Annual subscription: Domestic, \$9.45; Foreign, \$11.85.

### **NONPERIODICALS**

Monographs-Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks-Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications-Include proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series-Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series-Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a world-wide program coordinated by NBS. Program under authority of National Standard Data Act (Public Law 90-396).

NOTE: At present the principal publication outlet for these data is the Journal of Physical and Chemical Reference Data (JPCRD) published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements available from ACS, 1155 Sixteenth St. N. W., Wash. D. C. 20056.

Building Science Series-Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes-Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other' government agencies.

Voluntary Product Standards-Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The purpose of the standards is to establish nationally recognized requirements for products, and to provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

Federal Information Processing Standards Publications (FIPS PUBS)-Publications in this series collectively constitute the Federal Information Processing Standards Register. Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

Consumer Information Series-Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service (Springfield, Va. 22161) in paper copy or microfiche form.

Order NBS publications (except NBSIR's and Bibliographic Subscription Services) from: Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

### **BIBLIOGRAPHIC SUBSCRIPTION SERVICES**

The following current-awareness and literature-survey bibliographies are issued periodically by the Bureau: Cryogenic Data Center Current Awareness Service

A literature survey issued biweekly. Annual subscription: Domestic, \$20.00; foreign, \$25.00.

Liquefied Natural Gas. A literature survey issued quar-

terly. Annual subscription: \$20.00.

survey issued quarterly. Annual subscription: \$20.00. Send subscription orders and remittances for the preceding bibliographic services to National Bureau of Standards, Cryogenic Data Center (275.02) Boulder, Colorado 80302.
