4877. Radio-wave propagation during World War II, K. A. Norton. *Proc. IRE* 50, No. 5, 698-704 (May 1962).
4878. Rate of spherulitic crystallization with chain folds in polychlorotrifluoroethylene, J. D. Hoffman and J. J. Weeks. *J. Chem. Phys.* 37, No. 8, 1723-1741 (Oct. 1962).
4879. Rates of thermal degradation of organic polymers, S. L. Madorsky. *SPE J.* 18, No. 12, 1482-1490 (Dec. 1962).
4880. Ray-tracing formulas for isotropic crystals, O. N. Stavroudis. *J. Opt. Soc. Am.* 52, No. 2, 187-191 (Feb. 1962).

4881. Reaction of methyl-d<sub>2</sub> radicals with isobutane, isobutane-2-d and propane, W. M. Jackson, J. R. McNesby, and B. deB. Darwent. *J. Chem. Phys.* 37, No. 8, 1610-1615 (Oct. 1962).
4882. Reaction of oxygen with unkilned bone char at low temperatures (<300°C), F. G. Carpenter and V. R. Deitz. *Proc. 7th Tech. Session on Bone Char 1961*, p. 237 (Bone Char Research Project Inc., Charlestown, Mass., 1962).
4883. Unassigned.
4884. Realistic estimates of error, W. J. Youden. *J. ISA* 8, No. 10, 57-58 (Oct. 1962).
4885. Recent experiments on liquid helium vapor pressure measurements from 2° to 4°K, G. H. Cataland, M. H. Edlow, and H. H. Plumb. *Book, Temperature, Its Measurement and Control in Science and Industry 3*, Pt. I, 413-417 (Reinhold Publ. Corp., New York, N. Y., 1962).
4886. Recent sporadic E experimental work in the United States, J. F. DeGregorio, J. W. Finney, K. Kildahl, and E. K. Smith. *Book, Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, p. 131-142 (Pergamon Press Inc., New York, N. Y., 1962).
4887. Reference tables for 40% iridium-60% rhodium versus iridium thermocouples, G. F. Blackburn and F. R. Caldwell. *Book, Temperature, Its Measurement and Control in Science and Industry 3*, Pt. 2, 161-175 (Reinhold Publ. Corp., New York, N. Y., 1962).
4888. Reference tables for the palladium vs platinum-15% iridium thermocouple, P. D. Freeze, F. R. Caldwell, and E. R. Davis. *Wright Patterson Air Force Base Tech. Doc. Rept. No. ASD-TDR-62-525*, p. 1-79 (Dec. 1962).
4889. Reflection mechanisms for sporadic E, K. Tao and J. R. Wait. *Book, Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, p. 13-27 (Pergamon Press Inc., New York, N. Y., 1962).
4890. Refraction and dispersion of synthetic sapphire, I. H. Malitson. *J. Opt. Soc. Am.* 52, No. 12, 1377-1379 (Dec. 1962).
4891. Relative power transmission characteristics of the ear and the skull from hearing threshold data, E. L. Smith. *Book, The Organization Committee of the Fourth International Congress on Acoustics*, Pt. I, Paper No. H48 (Copenhagen, Denmark, 1962).
4892. Relative signs of proton spin-spin coupling constants, E. Lustig. *J. Chem. Phys.* 37, No. 11, 2725-2726 (Dec. 1962).
4893. Relaxation of nonequilibrium distributions, K. E. Shuler. *Book, Temperature, Its Measurement and Control in Science and Industry 3*, Pt. 1, 27-34 (Reinhold Publ. Corp., New York, N. Y., 1962).
4894. Remote phase control of station WWV, R. L. Fey, J. B. Milton, and A. H. Morgan. *Nature* 193, No. 4820, 1063-1064 (Mar. 17, 1962).
4895. Report of the Geophysical Monograph Board, A. H. Shapley. *Trans. Am. Geophys. Union* 43, 61-62 (Mar. 1962).
4896. Unassigned.
4897. Reproducibility of the international standard of light, R. P. Teele. *J. Opt. Soc. Am.* 52, No. 7, 826-827 (July 1962).
4898. Research and the saving of teeth, G. C. Paffenbarger. *J. Prosthetic Dentistry* 12, No. 2, 369-383 (Mar.-Apr. 1962).
4899. Research in ASTM, B. L. Wilson. *Mater. Res. Std.* 2, No. 8, 694-695 (Aug. 1962).
4900. Resistance thermometry in the liquid helium temperature region, M. H. Edlow and H. H. Plumb. *Book, Temperature, Its Measurement and Control in Science and Industry 3*, Pt. 1, 407-411 (Reinhold Publ. Corp., New York, N. Y., 1962).
4901. Review of fundamental developments in analysis: emission spectrometry, B. F. Scribner. *Anal. Chem.* 34, No. 5, 200R-209R (1962).
- 4901A. Roger Joseph Bosovich and the combination of observations, C. Eisenhart. *Actes Symp. Intern. R. J. Boskovic* 1961, p. 19-25 (1962).
4902. Rotation-vibration spectrum of matrix-isolated hydrogen chloride, L. J. Schoen, D. E. Mann, C. Knobler, and D. White. *J. Chem. Phys.* 37, No. 5, 1146-1147 (Sept. 1962).
4903. Rotational perturbations in CN. I. Zero-field theory, optical Zeeman effect, and microwave transition probabilities, H. E. Radford and H. P. Broida. *Phys. Rev.* 128, No. 1, 231-242 (Oct. 1962).
4904. Safety levels in military inventory management, F. L. Alt. *Operations Res.* 10, No. 6, 786-794 (Dec. 1962).
4905. Scattered radiation from large Cs<sup>137</sup> sources, L. Costrell. *Health Phys.* 8, No. 5, 491-498 (Oct. 1962).
4906. Scattered radiation from large cobalt-60 calibrating sources, L. Costrell. *Health Phys.* 8, No. 3, 261-272 (June 1962).
4907. "Second breakdown" in transistors, H. A. Schafft and J. C. French. *IRE Trans. Electron Devices* ED-9, No. 2, 129-136 (July 1962).
4908. Second-order effects in the mechanics of materials, C. A. Truesdell. *Proc. Intern. Union Theoretical and Applied Mechanics Symp.* (Haifa, Israel, 1962).
4909. Sferic observations of the severe weather on May 19, 1960, C. A. Samson and R. F. Linfield. *J. Geophys. Res.* 67, No. 2, 627-635 (Feb. 1962).
4910. Signs of nuclear resonance coupling constants in saturated aliphatic systems, H. Finegold. *Proc. Chem. Soc. (London, England)*, 6, 213-214 (June 1962).
4911. Simple strain gauge-based load controller, L. Morfdin and R. L. Bloss. *Rev. Sci. Instr.* 33, No. 7, 772-773 (July 1962).
4912. Solar flare effects in the F-region of the ionosphere, R. W. Knecht and R. E. McDuffie. (*Proc. Intern. Conf. Cosmic Rays and the Earth Storm*), *J. Phys. Soc. Japan* 17, Suppl. A, Pt. I, 280-285 (1962).
4913. Solar particles in interplanetary space, C. S. Warwick. *Sky and Telescope* 27, No. 3, 133-136 (Sept. 1962).
4914. Solubility product phenomena in hydroxyapatite-water systems, H. M. Rootare, V. R. Deitz, and F. G. Carpenter. *J. Colloid Sci.* 17, No. 3, 179-206 (Mar. 1962).
4915. Some auroral zone disturbances at times of magnetic micropulsation storms, W. H. Campbell. (*Proc. Intern. Conf. Cosmic Rays and the Earth Storm*), *J. Phys. Soc. Japan* 17, Suppl. A, Pt. I, 112-116 (Jan. 1962).
4916. Some characteristics of dialysable polyvinylpyrrolidone components, S. A. Mancewicz, K. C. Hoernan, and A. F. Forziati. *Chem. Ind.* p. 98-99 (Jan. 13, 1962).
4917. Some electrical properties of the porous graphite contact on p-type silicon, G. G. Harman, T. Higier, and O. L. Meyer. *J. Appl. Phys.* 33, No. 7, 2206-2208 (July 1962).
4918. Some free products of cyclic groups, M. Newman. *Mich. Math. J.* 9, 369-373 (Dec. 1962).

4919. Some limits on the effect of coronal self-emission upon the excitation state of coronal ions, R. M. Thomas and C. Pecker. *Astrophys. J.* 137, No. 3, 967-980 (Apr. 1, 1962).
4920. Some observations of 2.89 Mc/s equivalent antenna temperatures at the auroral zone, C. G. Little, G. M. Lerfald, and R. Parthasarathy. *J. Atmospheric Terrest. Phys.* 53, 275-286 (Dec. 1961); AGARDograph Radio Wave Absorption in the Ionosphere No. 53 (Pergamon Press Inc., London, England, 1962).
4921. Some observations of metal distribution, F. Ogburn and M. A. Morris. *Plating* 49, No. 1, 72-75 (Jan. 1962).
4922. Some observations on growing crystals of argon, L. H. Bolz, H. P. Broida, and H. S. Peiser. *Acta Cryst.* 15, No. 8, 810-812 (Aug. 1962).
4923. Some problems in temperature measurements from line spectra, J. T. Jefferies, Book, *Temperature, Its Measurement and Control in Science and Industry* 3, Pt. 1, 703-711 (Reinhold Publ. Corp., New York, N. Y., 1962).
4924. Some problems of color identification, K. L. Kelly. *J. Am. Inst. Architects* 37, No. 3, 80-82 (Mar. 1962).
4925. Some problems of improving accuracy of measurement, A. V. Astin, *IRE Conv. Record*, Pt. 9, p. 9-17 (1962).
4926. Some properties of dirty contacts on semiconductors and resistivity measurements by a two-terminal method, G. G. Harman and T. Higier. *J. Appl. Phys.* 33, No. 7, 2198-2206 (July 1962).
4927. Some results and problems in calibrating the NBS photoelectric pyrometer of 1961, R. D. Lee. *Proc. Advisory Committee on Thermometry to the Intern. Comm. on Weights and Measures*, 6th Session, p. 79-90 (Sept. 26-27, 1962).
4928. Some tensile properties of amalgams, M. S. Rodriguez and G. Dickson. *J. Dental Res.* 41, No. 4, 840-852 (July-Aug. 1962).
4929. Some topics in quantum statistics. The Wigner function and transport theory, H. Mori, I. Oppenheim, and J. Ross. *Book, Studies in Statistical Mechanics*, Ed. DeBoer and Uhlenbeck, I, Pt. C, 218-298 (North Holland Publ. Co., Amsterdam, The Netherlands, 1962).
4930. Spectrophotofluorometric studies of degraded cotton cellulose, S. D. Toner and K. F. Plitt. *TAPPI* 45, No. 8, 681-688 (1962).
4931. Spectrophotometric determination of hydroperoxide in diethyl ether, W. C. Wolfe. *Anal. Chem.* 34, No. 10, 1328-1330 (Sept. 1962).
4932. Spin lattice relaxation in two rare earth double nitrates, R. P. Hudson and B. W. Mangum. *Il Nuovo Cimento* 23, Serie X, 1133-1135 (Mar. 1962).
4933. Sporadic-E propagation with 3 $\mu$  sec pulses, G. R. Ochs, R. J. Carpenter, and E. K. Smith. *Book, Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, p. 143-148 (Pergamon Press Inc., New York, N. Y., 1962).
4934. Stainless steel for standard weights, M. W. Jensen. *Metric Measures* 5, No. 3, 29 (May 1962).
4935. Standardization of thermal emittance measurements, W. N. Harrison, J. C. Richmond, and H. K. Skramstad. *Wright Air Develop. Ctr. Tech. Rept.* Pt. III, 1-33 (Mar. 1962).
4936. Standard electromotive force of the cell  $H_2; HBr(m), AgBr; Ag$  from 0 to 50°, H. B. Metzger, R. A. Robinson, and R. G. Bates. *J. Phys. Chem.* 66, No. 8, 1423-1426 (Aug. 1962).
4937. Standard tests for electrical properties, A. H. Scott. *Soc. Plastics Engrs. J.* 18, No. 11, 1375-1378 (Nov. 1962).
4938. Standards and the microwave profession, J. M. Richardson. *IRE Trans. Microwave Theory Tech.* MTT-10, No. 6, 413-415 (Nov. 1962).
4939. Standards for the future, R. D. Huntoon. *Proc. Annual Spring Conf. Standards Engineers Society, Boston Section and Company Member Conf. of American Standards Association*, May 24-25, 1962 (Boston, Mass., 1962).
4940. Standards for vinyl chloride plastics, F. W. Reinhart. (*Proc. SPE Regional Tech. Conf.* New York, N. Y., Nov. 15, 1961), *SPE J.* 18, 308-311 (Mar. 1962).
4941. Strange sounds in the atmosphere, Part I, R. K. Cook. *Sound--Its Use and Control* 1, No. 2, 12-16 (Mar.-Apr. 1962).
4942. Strange sounds in the atmosphere, Part II, R. K. Cook and J. M. Young. *Sound--Its Use and Control* 1, No. 3, 25-33 (May-June 1962).
4943. Strengthening of hot-work die steels, C. R. Irish and S. J. Rosenberg. *Trans. ASM* 55, No. 3, 613-623 (Sept. 1962).
4944. Stress corrosion of high strength cast aluminum alloys, F. M. Reinhart and W. F. Gerhold. *Corrosion* 18, No. 4, 158t (Apr. 1962).
4945. Stress-strain relationships in yarns subjected to rapid impact loading. 8. Shockwaves, limiting breaking velocities, and critical velocities, J. C. Smith, J. M. Blandford, and K. M. Towne. *Textile Res. J.* 32, No. 1, 67-76 (Jan. 1962).
4946. Stress-strain relationships in yarns subjected to rapid impact loading. 9. Effect of yarn structure, J. C. Smith, J. M. Blandford, P. J. Shouse, and K. M. Towne. *Textile Res. J.* 32, No. 6, 472-480 (June 1962).
4947. Structure and photodetachment spectrum of the atomic carbon negative ion, M. L. Seman and L. M. Branscomb. *Phys. Rev.* 125, No. 5, 1602-1608 (Mar. 1962).
4948. Structure and structure imperfections of solid  $\beta$ -oxygen, E. M. Horl. *Acta Cryst.* 15, Pt. 9, 845-850 (Sept. 1962).
4949. Unassigned.
4950. Studies in non-equilibrium rate processes. V. The relaxation of moments derived from a master equation, K. E. Shuler, K. Andersen, and G. H. Weiss. *J. Math. Phys.* 3, No. 3, 550-556 (May-June 1962).
4951. Studies of errors in economic statistics, D. Rosenblatt. 1962 *Proc. Business and Economic Statistics Section, Am. Stat. Assoc.*, p. 217 (1962).
4952. Study of Knudsen's method of pressure division as a means of calibrating vacuum gages, S. Schuhmann. *Trans. Ninth Natl. Vacuum Symp.*, 1962, American Vacuum Society, Pt. III, p. 463-467 (1962).
4953. Study of the effect of large aperture on the performance of an Ebert spectrometer, L. R. Megill and L. K. Droppelman. *J. Opt. Soc. Am.* 52, No. 3, 258-261 (Mar. 1962).

4954. Study of "valley problem" with a ray tracing program, K. Davies and A. K. Saha. *Electron Density Profiles in the Ionosphere and Exosphere*, p. 162-166 (Pergamon Press, Inc., New York, N. Y., 1962).
4955. Sudden cosmic noise absorption at the moment of geomagnetic storm sudden commencements, C. G. Little, J. Ortner, R. R. Brown, T. R. Hartz, O. Holt, B. Hultqvist, and H. Leinbach. (Proc. Intern. Conf. Cosmic Rays and the Earth Storm), *J. Phys. Soc. Japan* 17, Suppl. A, Pt. I, 103-105 (1962).
4956. Sum rules for vibrational-rotational energy levels including centrifugal distortion, H. C. Allen, Jr., and W. B. Olson. *J. Chem. Phys.* 37, No. 2, 212-214 (July 1962).
4957. Sums of elements of matrix powers, M. Newman. *Pacific J. Math.* 12, 627-635 (1962).
4958. Surface behavior of silver single crystals in fused sodium chloride, J. Kruger and K. H. Stern. *J. Electrochem. Soc.* 109, No. 10, 889-894 (Oct. 1962).
4959. Surface condition effect on bond strength of steel beams embedded in concrete, J. O. Bryson and R. G. Mathey. *J. Am. Concrete Inst.* 59, No. 3, 397-405 (Mar. 1962).
4960. Surface flammability measurements by the radiant panel methods, A. F. Robertson. *ASTM Proc.* 62, 33-46 (1962).
4961. Surface preparation of solid metallic samples for X-ray spectrochemical analysis, R. E. Michaelis and B. A. Kilday. *Book, Advances in X-ray Analysis* 5, 405-411 (Plenum Press, Inc., New York, N. Y., 1962).
4962. Susceptor elements for high temperature induction heating, S. Hasko and H. S. Parker. *Bull. Am. Ceram. Soc.* 41, No. 7, 467 (July 15, 1962).
4963. Switching properties in ferroelectrics of the family  $\text{Bi}_4\text{Ba}_{m-2}\text{Ti}_{n+1}\text{O}_{3(n+2)}$ , P. H. Fang and E. Fatuzzo. *J. Phys. Soc. Japan* 17, 238 (1962).
4964. Symmetry conditions for internal friction caused by jumping of point defects in crystals, J. B. Wachtman, Jr., and H. S. Peiser. *J. Appl. Phys. Letters* 1, No. 1, 20-22 (Sept. 1962).
4965. Symposium on teaching materials: Aspects of material behavior significant to engineers, J. M. Frankland. (Proc. American Society of Civil Engineers), *J. Eng. Mech. Div. Paper* 3246, p. 75-81 (Aug. 1962).
4966. Synthesis of an immittance function with two negative impedance converters, R. B. Geller. *IRE Trans. Circuit Theory* CT-9, No. 3, 291 (Sept. 1962).
4967. Synthesis of higher ketoses by aldol reactions. I. Three D-heptuloses, R. Schaffer and H. S. Isbell. *J. Organ. Chem.* 27, 3268-3270 (1962).
4968. Systematic errors in physical constants, W. J. Youden. *Phys. Today* 14, No. 9, 32-42 (Sept. 1961); *Technometrics* 4, 111-123 (Feb. 1962).
4969. Systematic procedures, G. M. Brauer and E. Horowitz. *Book, Analytical Chemistry of Polymers*, ed. G. M. Kline, Pt. III, Chapt. 1, 1-140 (Interscience Publ. Inc., New York, N. Y., 1962).
4970. Tchebycheff approximations by exponentials, J. R. Rice. *J. Soc. Ind. Appl. Math.* 10, No. 1, 149-161 (Mar. 1962).
4971. Technical training in the weights and measures program, M. W. Jensen. *Southern Weights and Measures New Letter* 14, No. 12, 2-5 (Dec. 1962).
4972. Technology of electrodeposition, F. Ogburn. *Plating* 49, No. 8, 850 (Aug. 1962).
4973. Temperature dependence of elastic constants of vitreous silica, S. Spinner. *J. Am. Ceram. Soc.* 45, No. 8, 394 (Aug. 1962).
4974. Temperature dependence of magnetic losses, J. J. Gnielwek and R. L. Powell. (Proc. 1961 Cryogenic Eng. Conf.), *Book, Advances in Cryogenic Engineering* 7, Paper H-1, 303-310 (Plenum Press, Inc., New York, N. Y., 1962).
4975. Tensile strength and modulus of elasticity of tooth structure and several restorative materials, R. L. Bowen and M. S. Rodriguez. *J. Am. Dental Assoc.* 64, No. 3, 379-387 (Mar. 1962).
4976. Tentative U. S. standard for colors of signal lights, F. C. Breckenridge. *Illum. Eng.* 57, No. 11, 718-721 (Nov. 1962).
4977. Testing of ball bearings with five different separator materials at 9200 RPM in liquid nitrogen, J. A. Brennan, W. A. Wilson, R. Radebaugh, and B. W. Birmingham. (Proc. 1961 Cryogenic Eng. Conf.), *Book, Advances in Cryogenic Engineering* 7, Paper G-2, 262-272 (Plenum Press, Inc., New York, N. Y., 1962).
4978. Tests for contingency tables and Markov chains, S. Kullback, M. Kupperman, and H. H. Ku. *Technometrics* 4, No. 4, 573-608 (Nov. 1962).
4979. The ammonia beam maser as a standard of frequency, J. A. Barnes, D. W. Allan, and A. E. Wainwright. *IRE Trans. Instrumentation* I-11, 26-30 (June 1962).
4980. The application and behavior of elastomers at cryogenic temperatures, R. F. Robbins, D. H. Weitzel, and R. N. Herring. (Proc. 1961 Cryogenic Eng. Conf.), *Book, Advances in Cryogenic Engineering* 7, Paper H-6, 343-352 (Plenum Press, Inc., New York, N. Y., 1962).
4981. The application of gas-lubricated bearings to a miniature helium expansion turbine, B. W. Birmingham, H. Sixsmith, and W. A. Wilson. (Proc. 1961 Cryogenic Eng. Conf.), *Book, Advances in Cryogenic Engineering* 7, Paper A-4, 30-42 (Plenum Press, Inc., New York, N. Y., 1962).
4982. The application of NMR in determination of the structure of cyclonols. I. The structure of cyclohexane-1,3-diols, H. Finegold and H. Kwart. *J. Org. Chem.* 27, 2361-2365 (July 1962).
4983. The atmospheric sciences, 1961-1971. C. G. Little. *Book, Goals and Plans for Aeronomy III*, Natl. Acad. Sci.-Natl. Res. Council Publ. 946 (1962).
- 4983A. The basis of the measurement system, A. V. Astin. *Proc. IRE* 50, No. 5, 614-615 (May 1962).
4984. The bound-free absorption coefficient of the hydrogen negative ion, S. Geltman. *Astrophys. J.* 136, No. 3, 935-945 (Nov. 1962).
4985. The calibration at the National Bureau of Standards of mass standards for ultramicroanalysis, L. B. Macurdy. *Book, Vacuum Microbalance Techniques*, ed. R. F. Walker, 2, 165-175 (Plenum Press, Inc., New York, N. Y., 1962).
4986. The calibration of inductive voltage dividers, T. L. Zapf. *ISA* 1962 Proc. 17, Pt. 1, 10.2.62-1 to 10.2.62-8 (1962).
4987. The calibration of temperature standards on the international practical temperature scale of 1948, J. P. Evans. *Proc. ISA 17th Annual Instrument-Automation Conf. and Exhibit* (Oct. 1962).
4988. The conductive-disk method of measuring the thermal conductivity of insulations, H. E. Robinson. *Suppl. Bull. Intern. Inst. Refrigeration Annexe* 1962-1, p. 43-50 (Aug. 1962).

4989. The detection and study of solar cosmic rays by radio techniques, D. K. Bailey. (Proc. Intern. Conf. Cosmic Rays and the Earth Storm), J. Phys. Soc. Japan 17, Suppl. A, Pt. 1, 93-97 (1962).
4990. The determination of absolute temperatures from sound velocity measurements, G. H. Cataland, M. H. Edlow, and H. H. Plumb. Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 1, 129-132 (Reinhold Publ. Corp., New York, N. Y., 1962).
- 4990A. The determination of beta-emitting radio-nuclides in aqueous formamide solutions, A. Schwebel. Proc. Bioassay and Analytical Chemistry Meeting, Argonne Natl. Lab., Argonne, Ill., Oct. 1962, ANL Publ. 6637, pp. 29 (1962).
4991. The effect of electrolytes on the sodium chromotropism of bix-(meso-2,3-diaminobutane)-nickel (II) ions, D. L. Leussing, J. Harris, and P. Wood. J. Phys. Chem. 66, 1544-1546 (Aug. 1962).
4992. The effect of experimental variables including the martensitic transformation on the low-temperature mechanical stainless steel, C. J. Guntner and R. P. Reed. Trans. ASM 55, No. 3, 399-410 (Sept. 1962).
4993. The effect of geomagnetic activity on the  $F_2$  region over Central Africa, R. G. Rastogi. J. Geophys. Res. 67, No. 4, 1367-1374 (Apr. 1962).
4994. The effect of moisture on heat transfer through insulated flat-roof constructions, F. J. Powell. Suppl. Bull. Intern. Inst. Refrigeration Annexe 1962-1, p. 61-70 (Aug. 1962).
4995. The effect of temperature and humidity on the oxidation of air-borne asphalts, P. G. Campbell, J. R. Wright, and P. B. Bowman. Mater. Res. Std. 2, No. 12, 988-995 (Dec. 1962).
4996. The efficiency of an ideal refrigerator, R. B. Jacobs. (Proc. 1961 Cryogenic Eng. Conf.), Book, Advances in Cryogenic Engineering 7, Paper I-11 567-571 (Plenum Press, Inc., New York, N. Y., 1962).
4997. The error rate in a multiple-frequency-shift system and the output signal/noise ratio in a frequency modulation and a pulse-code-modulation/frequency-shift system, H. Akima. Intern. Conf. Satellite Communication, London, England, Nov. 22-28, 1962, 305-310 (Dec. 1962).
4998. The evolution of a conference, J. M. Richardson. (Intern. Conf. Electromagnetic Measurements, Boulder, Colo., 1962), IRE Trans. Instr. I-11, Nos. 3 and 4, 82 (Dec. 1962).
4999. The evolution of concepts and languages of computing, R. D. Elbourn and W. H. Ware. Proc. IRE 50, No. 5, 1059-1066 (May 1962).
5000. The extrapolation of the orthorhombic N-paraffin melting properties to very long chain lengths, M. G. Broadhurst. J. Chem. Phys. 36, No. 10, 2578 (May 15, 1962).
5001. The giant resonance of the nuclear photo-effect, E. G. Fuller and E. Hayward. Book, Nuclear Reactions II, Chapt. III, 113-194 (North-Holland Publ. Co., Amsterdam, The Netherlands, 1962).
5002. The growth and roots of electronic computers, J. L. Little. Student Quart. and EE digest 1, No. 1, 64-70 (Joint Publ. Am. Inst. Elec. Engr. and IRE, Sept. 1962).
5003. The Hall effect, D. O. Webster. Student Quart. and EE Digest 1, No. 1, 82-86 (Joint Publ. Am. Inst. Elec. Engr. and IRE, Sept. 1962).
5004. The heat capacity of diamond at high temperatures, A. C. Victor. J. Chem. Phys. 36, No. 7, 1903-1911 (Apr. 1962).
5005. The history of Pt 27, E. Wichers. Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 1, 259-262 (Reinhold Publ. Co., New York, N. Y., 1962).
5006. The hyperfine structure of the rotational spectrum of HDO, Y. Beers and E. B. Treacy. J. Chem. Phys. 36, 1473 (Mar. 1962).
5007. The ideal luvibond color system, D. B. Judd, G. J. Chamberlin, and G. W. Haupt. J. Opt. Soc. Am. 52, No. 7, 813-819 (July 1962).
5008. The industrial significance of NBS research, G. M. Kline. (Lecture at Conf. Europeenne des Plastiques et du Caoutchouc, Paris, France, May 28, 1962), Mod. Plastics 40, No. 2, 149 (Oct. 1962).
5009. The influence of temperature and pressure on rheological properties of polymers, R. S. Marvin. J. Japan Soc. Testing Mater. Rheology Issue 11, No. 104, 303-307 (May 1962).
5010. The information problem in government, S. N. Alexander. Proc. Engineering Information Symp. (Sponsored by the Engineers Joint Council), p. 15-16 (Jan. 17, 1962).
5011. The intermediate state of some hard superconductors, V. D. Arp, R. Kropschot, and T. S. Craig. p. 135-141 (Interscience Publ., New York, N. Y., 1962).
5012. The invariance of symmetric functions of singular values, M. Marcus and H. Minc. Pacific J. Math. 12, No. 1, 327-332 (1962).
5013. The ionization constant of p-nitrophenol from 0 to 60°, G. F. Allen, R. A. Robinson, and V. E. Bower. J. Phys. Chem. 66, No. 1, 171-172 (Jan. 1962).
5014. The ionosphere over antarctica, W. R. Pig-gott and A. H. Shapley. Antarctic Res. Geophys. Mono. 7, 111-126 (1962).
5015. The kinetics of Cs<sup>+</sup> desorption from tungsten, M. D. Scheer and J. Fine. J. Chem. Phys. 37, No. 1, 107-113 (July 1962).
5016. The kinetics of the heat precipitation of collagen, J. M. Cassel, L. Mandelkern, and D. E. Roberts. J. Am. Leather Chemists Assoc. 57, No. 11, 556-575 (Nov. 1962).
5017. The maximum number of zeros in the powers of an undercomposable matrix, M. Marcus. Duke Math. J. 29, No. 4, 581-588 (Dec. 1962).
5018. The measurement of characteristics of terrestrial radio noise, W. Q. Crichlow, Editor. URSI Spec. Rept. No. 7 (Elsevier Publ. Amsterdam, The Netherlands, 1962).
5019. The measurement of ionospheric drifts by means of a Doppler technique, K. Davies. J. Geophys. Res. 67, No. 12, 4909-4913 (Nov. 1962).
5020. The measurement of voltage by the use of the Stark effect, Y. Beers and G. L. Strine. (Intern. Conf. Precision Electromagnetic Measurements, Boulder, Colo., 1962), IRE Trans. Instr. I-11, Nos. 3 and 4, 171-176 (Dec. 1962).

5021. The molecular structure of chloroform, M. Jen and D. R. Lide, Jr. *J. Chem. Phys.* 36, No. 9, 2525 (May 1962).
5022. The morphology of mid-latitude 6300 angstrom arcs, T. Tohmatsu and F. E. Roach, *J. Geophys. Res.* 67, No. 5, 1817-1821 (May 1962).
5023. The NASA fixed frequency topside sounder program, R. W. Knecht and T. E. VanZandt. (NATO Conf. Series) Book, *Electron Density Profiles in the Ionosphere and Exosphere*, Ed. B. Maehlum, 2, 246-260 (Pergamon Press Inc., New York, N. Y., 1962).
5024. The National Bureau of Standards photoelectric pyrometer of 1961, R. D. Lee. Book, *Temperature, Its Measurement and Control in Science and Industry 3*, Pt. 1, 507-515 (Reinhold Publ. Corp., New York, N. Y., 1962).
5025. The National Bureau of Standards reactor facility, C. O. Muehlhause. *Capital Chemist* 12, No. 1, 7-10 (Jan. 1962).
5026. The National Bureau of Standards: Where measurement is the central theme, C. S. McCamy. *Ind. Phot.* 11, No. 8, 28 (Aug. 1962).
5027. The night-E layer, G. A. M. King. Book, *Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, p. 219-231 (Pergamon Press Inc., New York, N. Y., 1962).
5028. The nuclear photoeffect in holmium and erbium, E. G. Fuller and E. Hayward. *Nucl. Phys.* 30, 613-635 (Mar. 1962).
5029. The occurrence of sporadic E, E. K. Smith. Book, *Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, p. 3-12 (Pergamon Press Inc., New York, N. Y., 1962).
5030. The occurrence of sporadic E during the IGY, H. I. Leighton, A. H. Shapley, and E. K. Smith. Book, *Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, 2, 166-177 (Pergamon Press Inc., New York, N. Y., 1962).
5031. The photodisintegration of bismuth and the lead isotopes, E. G. Fuller and E. Hayward. *Nuclear Phys.* 33, 431-448 (1962).
5032. The photolysis and radiolysis of  $\text{CH}_3\text{N}_2\text{CH}_3$  and  $\text{CH}_3\text{N}_2\text{CH}_3\text{-CD}_3\text{N}_2\text{CD}_3$  mixtures, R. E. Rebert and P. Ausloos. *J. Phys. Chem.* 66, No. 11, 2253-2258 (Nov. 1962).
5033. The present state of atomic spectra, C. Moore. *Japan Anal.* 11, No. 11, 1199-1202 (1962).
5034. The present status of radiometric calibrations in the ultraviolet spectrum, R. Stair. Report No. Las-TR-199-37 (University of Chicago, Chicago, Ill., Nov. 1962).
5035. The propagation of electromagnetic waves along the earth's surface, J. R. Wait. Book, *Electromagnetic Waves*, ed. R. E. Langer, p. 243-290 (The University of Wisconsin Press, Madison, Wisc., 1962).
5036. The Pythagorean theorem in certain symmetry classes of tensors, M. Marcus and H. Minc. *Trans. Am. Math. Soc.* 104, No. 3, 510-515 (Sept. 1962).
5037. The radiant energy from sources in the far infrared, E. K. Plyler, D. J. C. Yates, and H. A. Gebbie. *J. Opt. Soc. Am.* 52, No. 8, 859-861 (Aug. 1962).
5038. The radio refractive index of air, B. R. Bean. *Proc. IRE* 50, No. 3, 260-273 (Mar. 1962).
5039. The rapid selector and other NBS document retrieval studies, J. L. Pike and T. C. Bagg. Proc. 11th Annual Meeting and Conf. National Microfilm Assoc., Wash. D. C., Apr. 25-27, 1962, Microfilm Assoc., XI, No. 1, 213-227 (Annapolis, Md., Aug. 1962).
5040. The representation of diurnal and geographic variations of ionospheric data by numerical methods, W. B. Jones and R. M. Gallet. *Rev. Telecommun.*, Trans. 17, 35-55 (1962); *Telecommunication J.* 29, No. 5, 129-149 (May 1962).
5041. The resistive transition in  $\text{Nb}_3\text{Sn}$ , D. Cline, R. H. Kropschot, V. Arp, and J. H. Wilson. (Proc. Intern. Conf. High Magnetic Fields) Book, *High Magnetic Fields*, p. 580-583 (Mass. Inst. Technol. Press and John Wiley and Sons, Inc., New York, N. Y., 1962).
5042. The role of capacitance in the National Reference Standards for high frequency impedance, R. N. Jones and R. E. Nelson. *Proc. ISA* 17, Pt. 11, 18.1.62-1-18.1.62-6 (Oct. 1962).
5043. The role of temperature in our measuring system, A. G. McNish. Book, *Temperature, Its Measurement and Control in Science and Industry 3*, Pt. 1, 35-38 (1962).
5044. The scientific contribution of William Weber Coblentz, E. K. Plyler. *J. Appl. Spectry.* 16, No. 3, 73-77 (1962).
5045. The shape of the geomagnetic field boundary under uniform external pressure, R. J. Slutz. *J. Geophys. Res.* 67, No. 2, 505-513 (Feb. 1962).
5046. The specific heat at constant volume of parahydrogen at temperatures from 15 to 90°K and pressures to 340 atm, B. A. Younglove and D. E. Diller. *Cryogenics* 2, No. 6, 1-5 (Dec. 1962).
5047. The specific heat of saturated liquid parahydrogen from 15 to 32°K, B. A. Younglove and D. E. Diller. *Cryogenics* 2, No. 5, P. 1-5 (Sept. 1962).
5048. The speed of light, A. G. McNish. *IRE Trans. Instr.* 1-11, Nos. 3 and 4, 138-148 (Dec. 1962).
5049. The speed of processes involved in electroplating, movement of solute, attainment of steady state and formation of metal, A. Brenner. 49th Annual Tech. Proc. Am. Electroplaters Soc., p. 9-13 (1962).
5050. The spontaneous martensitic transformation in 18% Cr, 8% Ni steels, R. P. Reed. *Acta Met.* 10, 865-877 (Sept. 1962).
5051. The standards challenge, A. H. Scott. *Insulation* 8, No. 2, 48-50 (Feb. 1962).
5052. The structure of lithium dipotassium trimetaphosphate monohydrate, E. D. Eanes and H. M. Ondik. *Acta Cryst.* 15, Pt. 12, 1280-1285 (Dec. 1962).
5053. The structure of regions of coronal-line emission, J. T. Jefferies, C. W. Pecker, and R. N. Thomas. *Astrophys. J.* 135, No. 2 653-655 (Mar. 1962).
5054. The structure of some subgroups of the modular group, M. Newman. *Illinois J. Math.* 6, No. 3, 480-487 (Sept. 1962).
5055. The system  $\text{Bi}_2\text{O}_3\text{-B}_2\text{O}_3$ , E. M. Levin and C. L. McDaniel. *J. Am. Ceram. Soc.* 45, No. 8, 353-360 (Aug. 1962).
5056. The temperature dependence of flow and fracture characteristics of an age-hardenable alloy, W. D. Jenkins and W. A. Willard. *Trans. ASM* 55, No. 3, 580-598 (Sept. 1962).
5057. The text revision of the international temperature scale of 1948, H. F. Stimson. Book, *Temperatures, Its Measurement and Control in Science and Industry 3*, Pt. 1, 59-66 (Reinhold Publ. Corp., New York, N. Y., 1962).
5058. The thermal conductivity of solid nitrogen, H. M. Roder. *Cryogenics* 2, No. 5, 302-304 (Sept. 1962).

5059. The thermal properties of powder insulators in the temperature range  $300^{\circ}$ - $4^{\circ}$  K. D. Cline and R. H. Kropschot. (Proc. Conf. Radiative Transfer from Solid Materials, Boston, Mass., Dec. 12-13, 1960), Book, Radiative Transfer from Solid Materials, ed. H. H. Blau, Jr., and H. Fischer, Sec. I, p. 61-81 (Macmillan and Co., New York, N. Y., 1962).
5060. The thermodynamic scale of temperature below  $1^{\circ}$  K. R. P. Hudson. Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 1, 51-57 (Reinhold Publ. Corp., New York, N. Y., 1962).
5061. Unassigned.
5062. The thermodynamic temperature scale, its definition and realization, C. M. Herzfeld, Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 1, 41-50 (Reinhold Publ. Corp., New York, N. Y., 1962).
5063. The three dimensional nature of boundary-layer instability, P. S. Klebanoff, K. D. Tidstrom, and L. M. Sargent. J. Fluid Mech. 12, Pt. 1, 1-34 (Jan. 1962).
5064. The use of a Venturi tube as a quality meter, R. V. Smith, P. C. Wergin, J. F. Ferguson, and R. B. Jacobs. J. Basic Eng. 84, 411-412 (Sept. 1962).
5065. The vapor phase fluorescence and its relationship to the photolysis of propionaldehyde and the butyraldehydes, R. P. Borkowski and P. Ausloos. J. Am. Chem. Soc. 84, No. 21, 4044-4048 (Nov. 1962).
5066. The vapor phase radiolysis of propane- $d_8$  in the presence of other hydrocarbons, S. G. Lias and P. Ausloos. J. Chem. Phys. 37, No. 4, 877-883 (Aug. 15, 1962).
5067. The vapor pressure of  $20^{\circ}$  K equilibrium hydrogen, L. A. Weber, D. E. Diller, H. M. Roder, and R. D. Goodwin. Cryogenics 3, 236-238 (June 1962).
5068. The ventilating problem in fallout shelters, P. R. Achenbach. Am. Artisan 99, No. 5, 64-70 (May 1962).
5069. The "vicious cycle" in secondary batteries--a mathematical approach, W. G. Eicke, Jr. J. Electrochem. Soc. 109, No. 5, 364-368 (May 1962).
5070. The viscous heating correction for viscometer flows, E. A. Kearsley. Trans. Soc. Rheol. VI, 253-261 (1962).
5071. Theory and methods of optical pyrometry, H. J. Kostkowski and R. D. Lee. Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 1, 449-481 (Reinhold Publ. Corp., New York, N. Y., 1962).
5072. Theory of the deep penetration of electrons and charged particles, L. V. Spencer and J. Coyne. Phys. Rev. 128, No. 5, 2230-2237 (Dec. 1, 1962).
5073. Theory of thermal diffusion in dilute alloys, R. E. Howard and J. R. Manning. J. Chem. Phys. 36, No. 4, 910-916 (Feb. 1962).
5074. Thermal expansion of some engineering materials from  $20^{\circ}$  K to  $293^{\circ}$  K, V. Arp, J. H. Wilson, L. Winrich, and P. Sikora. Cryogenics 3, 230-236 (June 1962).
5075. Thermal radiation standards and measurements of the Radiometry Section at the National Bureau of Standards, A. G. Maki. (Proc. Conf. Radiative Transfer from Solid Materials, Boston, Mass., Dec. 12-13, 1960), Book, Radiative Transfer from Solid Materials, ed. H. H. Blau, Jr., and H. Fischer, Sec. III, p. 135-141 (The Macmillan and Co., New York, N. Y., 1962).
5076. Thermal reactions of isobutyl radicals, W. M. Jackson, J. R. McNesby, and B. deB. Darwent. J. Chem. Phys. 37, No. 10, 2256-2260 (Nov. 1962).
5077. Thermal explosions: adiabatic self-heating of explosives and propellants, D. Gross and A. B. Amster. Eighth Symp. (Intern.) on Combustion, p. 728-734 (The Williams and Wilkins Co., Baltimore, Md., 1962).
5078. Thermal isomerization of isopropyl-1,1,1-d $_3$  radicals, W. M. Jackson and J. R. McNesby. J. Chem. Phys. 36, No. 9, 2272-2275 (May 1, 1962).
5079. Thermocouple materials, F. R. Caldwell. Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 2, 81-134 (Reinhold Publ. Corp., New York, N. Y., 1962).
5080. Thermodynamic study of the thorium phosphide with a mass spectrometer, J. E. Efimenko and K. A. Gingerich. Proc. Symp. Thermodynamics of Nuclear materials, Vienna, May 21-25, 1962, p. 477-486 (International Atomic Energy Agency, Vienna, Austria, Sept. 1962).
5081. Thermoelectric and mechanical stability of platinum II thermocouples in oxidizing atmospheres, P. D. Freeze and L. O. Olsen. Wright Patterson Air Force Base Tech. Doc. Rept. No. ASD-TDR-62-835, p. 1-30 (Nov. 1962).
5082. Thermometric cells for calibration of liquid-in-glass thermometers, D. P. Enagonio, E. G. Pearson, and C. P. Saylor. Book, Temperature, Its Measurement and Control in Science and Industry 3, Pt. 1, 219-230 (Reinhold Publ. Corp., New York, N. Y., 1962).
5083. Thermometry, low temperature, R. P. Hudson. Encyclopaedic Dictionary of Physics 7, 323-325 (1962).
5084. Thermophysical properties of zirconium hydrides, R. L. Beck and T. B. Douglas. Am. Soc. Metals 55, 1075-1076 (1962).
5085. Third international conference on precision electromagnetic measurements, W. D. George. Nature 193, No. 4858, 921-939 (Dec. 1962).
5086. Time and its inverse, J. M. Richardson. Intern. Sci. and Tech. 1, No. 6, 54-61 (June 1962).
5087. Time ratio tables--A rapid simple method of estimating the order of chemical reactions, J. H. Flynn. Chem. Eng. 69, No. 17, 137-140 (Aug. 20, 1962).
5088. Time-resolved electron optical image of a pulsed atomic beam in flight, L. Marton and S. R. Mielczarek. J. Appl. Phys. 33, No. 4, 1613-1614 (Apr. 1962).
5089. Time variations of the energy spectrum of solar cosmic rays in relation to the radiation hazard in space, D. K. Bailey. J. Geophys. Research 67, No. 1, 391-396 (Jan. 1962).
- 5089A. Timing and space navigation with an existing ground based system, G. Hefley, R. F. Linfield, and R. H. Doherty. AGARD Navigation Systems for Aircraft and Space Vehicles, pp. 490-506 (Pergamon Press Inc., New York, N. Y., 1962).
5090. Topside soundings of the ionosphere, R. W. Knecht. (Proc.) Intern. Conf. Cosmic Rays and the Earth Storm, J. Phys. Soc. Japan 17, Suppl. A. Pt. 1, 302 (1962).
5091. Traces of products of angular momentum matrices. I. Cartesian basis, E. Ambler, J. F. Schooley, and J. Eisenstein. J. Math. Phys. 3, No. 1, 118-130 (Jan.-Feb. 1962).
5092. Traces of products of angular momentum matrices. II. Spherical basis, E. Ambler, J. Eisenstein, and J. F. Schooley. J. Math. Phys. 3, No. 4, 760-771 (July-Aug. 1962).

5093. Transactions Joint Commission for Spectroscopy, report on atomic spectra, C. E. Moore. *J. Opt. Soc. Am.* 52, No. 4, 477-478 (Apr. 1962).
5094. Transition probabilities for permitted and forbidden lines of Si X, Fe XIV and Fe X, R. H. Garstang. *Extrait des Astrophysique* 25, No. 2, 109-117 (Mar.-Apr. 1962).
5095. Translational energy accommodation in the nickel-chlorine surface reaction, J. D. McKinley. *J. Phys. Chem.* 66, No. 3, 554-555 (Mar. 1962).
5096. Trucks and trailers, C. W. Phillips. *ASHRAE Guide and Data Book*, Chapt. 55, pp. 569-584 (1962).
5097. Tungsten helical-spring microbalance, S. L. Madorsky. *Book, Vacuum Microbalance Techniques*, ed. R. F. Walker, 2, 47-57 (Plenum Press, Inc., New York, N. Y., 1962).
5098. Tunnelling between a normal metal and a superconductor, J. L. Harden and R. S. Collier. *Cryogenics* 2, No. 6, 369-370 (Dec. 1962).
5099. Ultra-high vacuum ultraviolet monochromator, L. Marton, J. A. Simpson, J. A. Suddeth, and L. B. Leder. (1961 *Trans. Eighth Natl. Vacuum Symp.*), *Book, The Second International Congress*, ed. L. E. Preuss, p. 633-639 (Pergamon Press, Inc., New York, N. Y., 1962).
5100. Ultrasounds induce flaking of ceramics from metals, J. W. Pitts. *Metal Progr.* 82, No. 2, 114-115 (Aug. 1962).
5101. Ultraviolet spectrophotometry, M. Tryon and E. Horowitz. *Book, Analytical Chemistry of Polymers*, ed. G. M. Kline, Pt. II, Chapt. 7, 269-289 (Interscience Publ. Inc., New York, N. Y., 1962).
5102. Uncertainties in calibration, W. J. Youden. *IRE Trans. Instr. I-11*, Nos. 3 and 4, 133-138 (Dec. 1962).
5103. Universal-time control of the Arctic and Antarctic F region, R. A. Duncan. *J. Geophys. Res.* 67, No. 5, 1823-1830 (May 1962).
5104. Use of a "peek-a-boo" information retrieval technique for a personal reference file, J. A. Bennett. *J. Wash. Acad. Sci.* 52, No. 9, 216-219 (Dec. 1962).
5105. Use of gas phase chromatography for rapid determination of carbonate at low levels, F. G. Carpenter. *Anal. Chem.* 34, 66 (Jan. 1962).
5106. Utilization of tritium and carbon-14 in studies of isotope effects, H. S. Isbell, H. L. Frush, and L. T. Sniegowski. *Book, Tritium in the Physical and Biological Sciences II*, 93-101 (International Atomic Energy Agency, Vienna, Austria, 1962).
5107. Vacuum microbalance techniques 2, R. F. Walker. *Editor, Book, 179 pages, Proc. Conf., National Bureau of Standards*, Apr. 20-21, 1961 (Plenum Press, Inc., New York, N. Y., 1962).
5108. Vacuum photolysis of solid ethane at 77°K, M. D. Scheer, J. McNesby, and R. Klein. *J. Chem. Phys.* 36, No. 12, 3504-3505 (June 15, 1962).
5109. Vacuum system for use with a microbalance, G. P. Rouse. *Book, Vacuum Microbalance Techniques*, ed. R. F. Walker, 2, 59-69 (Plenum Press, Inc., New York, N. Y., 1962).
5110. Vacuum ultraviolet photochemistry. II. Photolysis of ethylene, H. Okabe and J. R. McNesby. *J. Chem. Phys.* 36, No. 3, 601-604 (Feb. 1962).
5111. Vacuum ultraviolet photochemistry. V. Photolysis of isobutane, H. Okabe and D. A. Becker. *J. Am. Chem. Soc.* 84, No. 21, 4004-4007 (Nov. 1962).
5112. Vacuum ultraviolet photochemistry. III. Primary processes in the vacuum ultraviolet photolysis of water and ammonia, J. R. McNesby, I. Tanaka, and H. Okabe. *J. Chem. Phys.* 36, No. 3, 605-607 (Feb. 1962).
5113. Vapor phase growth kinetics of Hg and K whiskers by field emission, R. L. Parker and S. C. Hardy. *J. Chem. Phys.* 37, No. 8, 1606-1609 (Oct. 1962).
5114. Vapor-phase radiolysis of propane-d<sub>8</sub> in the presence of other hydrocarbons, S. G. Lias and P. Ausloos. *J. Chem. Phys.* 37, No. 4, 877-883 (Aug. 1962).
5115. Vapour pressure, G. T. Armstrong. *Encyclopaedic Dictionary of Physics* 7, 586-587 (Pergamon Press Inc., New York, N. Y., 1962).
5116. Variability of spectral tristimulus values, I. Nimeroff, J. R. Rosenblatt, and M. C. Danemiller. *J. Opt. Soc. Am.* 52, No. 6, 685-691 (June 1962).
5117. Variance of radio frequency caused by atmospheric turbulence in line-of-sight transmissions, K. A. Norton, E. C. Barrows, M. C. Thompson, Jr., and H. B. James. *IRE Trans. Instr. I-11*, Nos. 3 and 4, 153-155 (Dec. 1962).
5118. Variations in frequency of occurrence of sporadic E, 1949-1959, W. B. Chadwick. *Book, Ionospheric Sporadic E*, Ed. E. K. Smith and S. Matsushita, p. 182-193 (Pergamon Press, Inc., New York, N. Y., 1962).
5119. Very-low-frequency phase observations of the ionospheric effects of the solar flare of September 28, 1961, A. G. Jean and J. H. Cray. *J. Geophys. Res.* 67, No. 12, 4903-4905 (Nov. 1962).
5120. Very low frequency propagation in the earth-ionosphere waveguide of non-uniform width, J. R. Wait. *Proc. Intern. Conf. Ionosphere*, London, 1962, p. 446-451 (The Institute of Physics and The Physical Society, London, England, 1962).
5121. Very low frequency propagation-theory and experiment, J. R. Wait. *Monograph, Electromagnetic Waves in Stratified Media*, Chapt. IX, 264-288 (Pergamon Press Inc., Oxford, England, 1962).
5122. Vibration-rotation interactions in cyanamide; the question of planarity of amides, D. R. Lide, Jr. *J. Mol. Spectry.* 8, No. 2, 142-152 (Feb. 1962).
5123. Vibration-rotation spectra of BrCN, A. G. Maki and T. Gott. *J. Chem. Phys.* 35, No. 9, 2282-2285 (1962).
5124. Vibrational-rotational spectroscopy, H. C. Allen, Jr., and W. B. Olson. *Ann. Rev. Phys. Chem.* 13, No. 2, 221-240 (July 1962).
5125. Visual observations of high pressure transitions, A. Van Valkenburg. *Rev. Sci. Instr.* Letter 33, No. 12, 1462 (Dec. 1962).
5126. Wavelengths, energy levels and pressure shifts in mercury 198, V. Kaufman. *J. Opt. Soc. Am.* 52, No. 8, 866-870 (Aug. 1962).
- 5126A. Wave functions for anharmonic oscillators by perturbation methods, A. M. Shorb, R. Schroeder, and E. R. Lippincott. *J. Chem. Phys.* 37, 1043 (Sept. 1, 1962).
5127. Wave propagation around a curved boundary which contains an obstacle, J. R. Wait. *Can. J. Phys.* 40, 1010-1016 (Aug. 1962).
5128. X-ray diffraction, A. S. Posner. *Book, Analytical Chemistry of Polymers*, ed. G. M. Kline, Pt. II, Chapt. 2, 79-108 (Interscience Publ. Inc., New York, N. Y., 1962).

5129. A colorimetric method for measuring polyester degradation due to weathering, V. E. Gray and J. R. Wright. *J. Appl. Polymer Sci.* 7, 2161-2174 (Nov.-Dec. 1963).
5130. A comparison of the low temperature adsorption of nitrogen and methane from hydrogen gas on three different adsorbents, M. J. Hiza and A. J. Kidnay. *Advan. Cryog. Eng.* 8, Paper C-7, 174-182 (1963).
5131. A comparison of two independent atomic time scales, J. Newman, B. Atkinson, and L. Fey. *Proc. IEEE* 51, No. 3, 498-499 (Mar. 1963).
5132. A computer for the Abel inversion, C. R. Yokley and J. B. Shumaker. *Rev. Sci. Instr.* 34, No. 5, 551-557 (May 1963).
5133. A field emission study of carbon monoxide on tantalum, R. Klein and L. Leder. *J. Chem. Phys.* 38, No. 8, 1866-1872 (Apr. 1963).
5134. A  $\text{He}^3$  cryostat for performing experiments with oriented nuclei, E. Ambler, R. B. Dove, and R. S. Kaeser. (Proc. 1962 Cryogenic Engineering Conf.), Book, *Advances in Cryogenic Engineering* 8, Paper H-2, 443-445 (Plenum Press Inc., New York, N. Y., 1963).
5135. A high-latitude investigation of the natural very-low-frequency electromagnetic radiation known as chorus, J. H. Pope. *J. Geophys. Res.* 68, No. 1, 83-99 (Jan. 1963).
5136. A low pressure arc source for the emission spectrum of the  $\text{FeO}$  molecule, R. K. Dhumwad and A. M. Bass. *Appl. Opt.* 2, No. 12, 1335 (Dec. 1963).
5137. A magnetic amplifier for use with diode logic, E. W. Hogue. *IEEE Intern. Conf. Nonlinear Magnetics*, No. T-149, p. 8.6-1-8.6-6 (Apr. 1963).
5138. A mathematical analysis of self ignition, W. Squire. *Combust. Flame* 7, No. 1, 1-8 (Mar. 1963).
5139. A mechanism for the production of certain types of VLF emissions, S. F. Hansen. *J. Geophys. Res.* 68, No. 21, 5925-5935 (Nov. 1, 1963).
5140. A method for determining the height and geographical position of an auroral arc from one observing station, M. H. Rees. *J. Geophys. Res.* 68, No. 1, 175-183 (Jan. 1, 1963).
5141. A method for localized variation of the paths of two paraxial rays, L. E. Sutton. *Appl. Opt.* 2, No. 12, 1275-1280 (Dec. 1963).
5142. A method for measuring the instability of resistance strain gages at elevated temperatures, R. L. Bloss and J. T. Trumbo. *ISA Trans.* 2, No. 2, 112-116 (Apr. 1963).
5143. A miniature helium turbo-expander for cryogenic refrigeration systems, M. T. Norton. (Proc. XI Intern. Congress Refrigeration, Munich, Germany, Aug. 1963), *Prog. Refrig. Sci. Technol.* 1, 131-135 (1963).
5144. A model of the atmosphere and ionosphere in the E and F1 regions, R. B. Norton, T. E. VanZandt, and J. S. Denison. *Proc. Intern. Conf. Ionosphere July 1962*, p. 26-34 (Institute of Physics and the Physical Society, London, England, 1963).
5145. A modification of the Born-Mayer potential function as applied to the crystalline alkali halides, T. B. Douglas. *J. Chem. Phys.* 38, No. 10, 2461-2466 (May 15, 1963).
5146. A new absolute null method for the measurement of magnetic susceptibilities in weak low-frequency fields, C. T. Zahn. *Rev. Sci. Instr.* 34, No. 3, 285-291 (Mar. 1963).
5147. A new high voltage calibration facility at the National Bureau of Standards, W. W. Scott. *Boulder, ISA 1963 Proc. Paper No. 7.2.63* (1963).
5148. A new standard of spectral irradiance, R. Stair, W. E. Schneider, and J. K. Jackson. *Appl. Opt.* 2, No. 11, 1151-1154 (Nov. 1963).
5149. A nomograph for predicting the performance of tropospheric scatter communication circuits, H. T. Dougherty. *IEEE Trans. Commun. Systems CS-11*, No. 1, 138-142 (Mar. 1963).
5150. A note on contingency tables involving zero frequencies and the 21 test, H. H. Ku. *Technometrics* 5, No. 3, 398-400 (Aug. 1963).
5151. A note on diurnal phase changes of very-low-frequency waves for long paths, J. R. Wait. *J. Geophys. Res.* 68, No. 1, 338-340 (Jan. 1, 1963).
5152. A note on domain conversions of  $\text{BaTiO}_3$ , P. H. Fang and W. S. Brower, Jr. *J. Appl. Phys.* 34, No. 5, 1516 (May 1963).
5153. A note on E-field and H-field losses for ground-based antennas, J. R. Wait. *Proc. IEEE* 51, No. 2, 366 (Feb. 1963).
5154. A note on modular groups, M. Newman and J. R. Smart. *Proc. Am. Math. Soc.* 14, No. 1, 124-125 (Feb. 1963).
5155. A 100 megapulse per second binary counter with impedance steering, S. B. Geller and P. A. Mantek. *IEEE Trans. Electron. Computers EC-12*, No. 5, 568 (Oct. 1963).
5156. A plasma instability resulting in field-aligned irregularities in the ionosphere, D. T. Farley, Jr. *J. Geophys. Res.* 68, No. 22, 6083-6097 (Nov. 15, 1963).
5157. A portable impedance tube, R. D. Berendt and H. A. Schmidt, Jr. *J. Acoust. Soc. Am.* 35, No. 7, 1049-1052 (July 1963).
5158. A question regarding atmospheres with a temperature inversion, R. N. Thomas. *J. Quant. Spectry. Radiative Transfer* 3, 133-135 (Apr.-June 1963).
5159. A radio-meteorological study, B. R. Bean, E. J. Dutton, V. R. Frank, J. A. Lane, and W. B. Sweezy. *Program and Digest 1963 IEEE Prof. Group. Ant. and Prop. Symp. Space Telecommunications*, July 9-11, 1963, Boulder, Colo., p. 56-60 (1963).
5160. A redetermination of some optical properties of calcium fluoride, I. H. Malitson. *Appl. Opt.* 2, No. 11, 1103-1107 (Nov. 1963).
5161. A refrigeration system incorporating a low-capacity, high-speed, gas-bearing-supported expansion turbine, D. B. Mann, H. Sixsmith, W. A. Wilson, and B. W. Birmingham. *Book, Adv. Cryogenic Eng.* 8, Paper D-5, 221-227 (1963).
5162. A rocket experiment involving radio reflections from the topside of the ionosphere, R. W. Knecht, T. E. VanZandt, and J. M. Watts. *Proc. 3d Intern. Symp. Rockets and Astronautics*, Tokyo, Japan, 1961, No. 48, p. 377-380 (1963).
5163. A scheme for obtaining integral and fractional multiples of a given radiance, D. Erminy. *J. Opt. Soc. Am. Letter to Editor* 53, 1448-1449 (Dec. 1963).
5164. A simple environmental chamber for rotating beam fatigue testing machines, J. A. Bennett. *Mater. Res. Std.* 3, No. 6, 480-482 (June 1963).
5165. A study of anthracene fluorescence excited by the ruby giant pulse laser, J. L. Hall, D. A. Jennings, and R. M. McClintock. *Phys. Rev. Letters* 11, No. 8, 364-366 (Oct. 15, 1963).
5166. A study of embrittlement of high strength steels by hydrogen isotopes, I. Testing of steel rings as specimens, a comparison of hydrogen and deuterium embrittlement, and permeation studies.

- II. A comparison of gas contents and hydrogen or deuterium embrittlement resulting from electroplating processes, G. B. Wood. *J. Electrochem. Soc.* 110, No. 8, 867-885 (Aug. 1963).
5167. A study of stress relaxation with finite strain, E. A. Kearsley, B. Bernstein, and L. J. Zapas. *Trans. Soc. Rheology* VII, 391-410 (1963).
5168. A suggestion for improving forecasts of geomagnetic storms, Y. Hakura and J. V. Lincoln. *J. Geophys. Res.* 68, No. 5, 1563-1564 (Mar. 1, 1963).
5169. A survey of some mathematical models in the theory of reliability, G. H. Weiss. *Book, Statistical Theory of Reliability*, Ed. M. Zelen, p. 3-54 (University of Wisconsin Press, Madison, Wisc., 1963).
5170. A theoretical study of the Martian ionosphere, R. B. Norton. *Book, Advances in the Astronomical Sciences and the Exploration of Mars* 15, 533-542 (Western Periodicals, Calif., 1963).
5171. A theory of energy transfer in the photo-synthetic unit, Z. Bay and R. M. Pearlstein. *Proc. Natl. Acad. Sci.* 50, No. 6, 1071-1078 (Dec. 1963).
5172. A theory of incoherent scattering of radio-waves by a plasma. 3. Scattering in a partly ionized gas, J. P. Dougherty and D. T. Farley, Jr. *J. Geophys. Res.* 68, No. 19, 5473-5486 (Oct. 1, 1963).
5173. Absolute scale of oscillator strengths, C. W. Allen and C. H. Corliss. *Monthly Notices Roy. Astron. Soc.* 126, No. 1, 37-40 (1963).
5174. Absolute calibration of the National Bureau of Standards photoneutron source: III. Absorption in a heavy water solution of manganese sulfate, R. H. Noyce, E. R. Mosburgh, Jr., S. B. Garfinkel, and R. S. Caswell. *J. Nucl. Eng.* 17, No. 7, 313-319 (1963).
5175. Absolute scale of oscillator strengths, C. W. Allen and C. H. Corliss. *Mo. Notices Royal Astron. Soc.* 126, No. 1, 37-40 (1963).
5176. Accumulation of calibration errors and their optimum distribution, E. L. Crow. *Trans. Am. Soc. Quality Control* 18th Midwest Conf., Tulsa, Okla., p. 86-100 (Oct. 1963).
5177. Achievement of measurement agreement among electrical standards laboratories, F. D. Weaver. *Instr. Control Systems* 36, 128-131 (July 1963).
5178. Acoustic properties of liquids, M. Greenspan. *American Institute of Physics Handb.* 2d edition, Paper 3e, p. 3-71-3-82 (1963).
5179. Acoustics Section, R. K. Cook. *Editor, American Institute of Physics Handb.* 2d edition, Section 3, p. 3-1-3-157 (1963).
5180. Air dielectric coaxial cables as cryogenic transfer lines, D. B. Mann. *Cryogenics* 3, 108-109 (1963).
5181. Airglow research, F. E. Roach. *Trans. Am. Geophys. Union* 44, No. 2, 431-432 (June 1963).
5182. Aldonic acids. By electrolytic oxidation of aldoses: calcium D-glucuronate dihydrate, H. L. Frush and H. S. Isbell. *Book, Methods in Carbohydrate Chemistry* 2, 14 (Academic Press Inc., New York, N. Y., 1963).
5183. Aldonic acids. By oxidation of aldoses with bromine; lead D-xylo-nate, H. S. Isbell. *Book, Methods in Carbohydrate Chemistry* 2, 13 (Academic Press Inc., New York, N. Y., 1963).
5184. Aldonic acids. From aldoses by hypiodite oxidation: calcium 2,3-O-isopropylidene-D-xylo-nate dihydrate, R. Schaffer and H. S. Isbell. *Book, Methods in Carbohydrate Chemistry* 2, 11 (Academic Press Inc., New York, N. Y., 1963).
5185. Alteration of the Muscovite absorption spectrum by KBr pellet preparation, S. Ruthberg, M. W. Barnes, and R. H. Noyce. *Appl. Opt.* 2, No. 2, 177 (Feb. 1963).
5186. An air core primary radio frequency permeameter for reversible permeability measurements, C. A. Hoer and R. D. Harrington. *Proc. IEEE* 51, No. 12, 1795-1796 (Dec. 1963).
5187. An alignment interferometer, J. B. Saunders. *Appl. Opt.* 2, No. 5, 541 (May 1963).
5188. An all-integer programming algorithm with parabolic constraints, C. Witzgall. *J. Soc. Ind. Appl. Math.* 11, No. 4, 855-871 (1963).
5189. An analysis of pressure and stress distribution under rigid Bridgman-type anvils, J. W. Jackson and M. Waxman. *Book, High-Pressure Measurement*, ed. A. A. Giardini and E. C. Lloyd, p. 39-58 (Butterworth Inc., Wash. D. C., 1963).
5190. An apparatus to determine the solid-vapor equilibria of binary cryogenic systems, M. J. Hiza and R. N. Herring. *Advan. Cryog. Eng.* 8, Paper C-5, 158-161 (1963).
5191. An approach to the classification of electromagnetic surface waves, J. R. Wait. *Book, Radio Waves and Circuits* by S. Silver, Pt. 1, p. 86-95 (Elsevier Publ. Co., Princeton, N. J., 1963).
5192. An approach to thermal emittance standards, J. C. Richmond, W. N. Harrison, and F. J. Shorten. (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1963), *Natl. Aeron. and Space Admin. SP-31, Session IV*, Paper 41, p. 403-424 (Dec. 1963).
5193. An experimental method of estimating F-region collision frequencies, J. K. Hargreaves. *J. Atmospheric and Terrest. Phys. Research Note* 25, 300-304 (May 1963).
5194. An operational information retrieval system in the field of cryogenics, N. A. Olien. (Proc. 26th Annual American Documentation Institute Meeting, Oct. 1963), *Book, Automation and Scientific Communication*, p. 157-158 (Am. Documentation Inst., 1963).
5195. An unmodulated twin channel microwave attenuation measurement system, D. H. Russell. *ISA Preprint*, p. 37.3.63-1-37.3.63-17 (Sept. 1963).
5196. Analysis of rotation errors of a waveguide rotary-vane attenuator, W. Larson. *IEEE Trans. Instr. Meas.* IM-12, No. 2, 50-55 (Sept. 1963).
5197. Analysis of rubber and rubber products, W. P. Tyler and M. Tryon. *Book, Standard Methods of Chemical Analysis*, Vol. IIB, Industrial and Natural Products and Noninstrumental Methods, 6th edition, F. J. Welcher, Chapt. 43, p. 2146-2226 (D. Van Nostrand Co., New York, N. Y., 1963).
5198. Analysis of the third spectrum of praseodymium, J. Sugar. *J. Opt. Soc. Am.* 53, No. 7, 831-839 (July 1963).
5199. Analytical chemistry—a challenging profession, J. K. Taylor. *J. Assoc. Offic. Agric. Chem.* 46, 63-67 (Feb. 1963).
5200. Annual "Observatory Report" on research at JILA, L. M. Branscomb. *Astron. J.* 68, No. 9, 660-662 (Nov. 1963).
5201. Annual "Observatory Report" on research at the National Bureau of Standards (Spectroscopy), C. E. Moore and L. M. Branscomb. *Astron. J.* 68, No. 9, 657-659 (Nov. 1963).
5202. APPA TAPPI reference material program, II. Effectiveness of a reference material in reducing the between-laboratory variability of Tappi stand-

- ard T44 m-49, internal tearing resistance of paper, T. W. Lashof. *Tappi* 46, No. 3, 145-150 (Mar. 1963).
5203. Applications of a semiconductor surface-state charge-storage device, L. J. Swartzendruber. *Book, Solid State Electronics* 6, 59-61 (Pergamon Press Inc., New York, N. Y., 1963).
5204. Artificial heating of the electrons in the F region of the ionosphere, D. T. Farley, Jr. *J. Geophys. Res.* 68, No. 2, 401-413 (Jan. 1963).
5205. Aspects of radio meteorology, J. D. Horn. *Proc. Mountain States Navy Research and Development Clinic*, Raton, N. M., Sept. 28-29, 1961, p. C51-C56 (Raton, Communications and Electronics Foundation, 1963).
5206. Atomic flame reactions involving N atoms, H atoms and ozone, D. Garvin and H. P. Broida. 9th Symp. (Intern.) Combustion, p. 678-688 (1963).
5207. Atomic scattering factors for the lithium and beryllium isoelectronic sequences from accurate analytic Hartree-Fock wave functions, C. M. Womack, Jr., and J. N. Silverman. *Z. Kryst.* 118, No. 5-6, 422-433 (Sept. 1963).
5208. Audiofrequency dispersion effects in lanthanide salts at low temperatures, R. P. Hudson and B. W. Mangum. *Book, Magnetic and Electric Resonance and Relaxation*, Ed. J. Smidt, p. 135-146 (North-Holland Publ. Co., Amsterdam, The Netherlands, 1963).
5209. Auroral-zone observations of infrasonic pressure waves related to ionospheric disturbances and geomagnetic activity, W. H. Campbell and J. M. Young. *J. Geophys. Res.* 68, No. 21, 5909-5916 (Nov. 1963).
5210. Autoionization in helium using a synchrotron light source, R. P. Madden and K. Codling. *Proc. Vth Intern. Conf. Ionization Phenomena in Gases*, Paris, France, 1963, 1, 139-143 (1963).
5211. Beam loading and beam blowup in electron linacs, J. E. Leiss. *Proc. Conf. Proton Linear Accelerators*, Yale Univ., New Haven, Conn., p. 74-95 (Oct. 1963).
5212. Behavior of filamentous materials subjected to high speed tensile impact, J. C. Smith, C. A. Fenstermaker, and P. J. Shouse. *ASTM Spec. Tech. Publ.* No. 336, p. 47-69 (Oct. 1963).
5213. Binary mixtures of dilute Bose gases with repulsive interactions at low temperature, D. M. Larsen. *Ann. Phys.* 24, 89-101 (1963).
5214. Bolometric microwave power calibration techniques at the National Bureau of Standards, R. F. Desch and R. E. Larson. *IEEE Trans. Instr. Meas.* IM-12, No. 1, 29-33 (June 1963).
5215. Bounds for cofactors and arithmetic minima of quadratic forms, M. Newman. *J. London Math. Soc.* 38, 215-217 (Apr. 1963).
5216. Broadening of the  $\nu_2$  lines of HCN due to argon, carbon dioxide, and hydrogen chloride, R. J. Thibault, A. G. Maki, and E. K. Plyler. *J. Opt. Soc. Am.* 53, No. 11, 1255-1258 (Nov. 1963).
5217. Building a simple transistor tester, G. F. Montgomery. *Electronics* 36, No. 16, 56 (Apr. 19, 1963).
5218. Calculation of crystalline size distributions from X-ray line broadening, A. Bienenstock. *J. Appl. Phys.* 34, No. 5, 1391 (May 1963).
5219. Calculations of energy spectra of nuclei in the 2s, 1d shell, M. K. Banerjee, C. A. Levinson, and S. Meshkov. *Phys. Rev.* 130, No. 3, 1064-1068 (May 1, 1963).
5220. Calculations of the hyperfine splitting for the lithium atom, J. B. Martin and A. W. Weiss. *J. Chem. Phys. Letter* 39, No. 6, 1618-1620 (Sept. 15 1963).
5221. Calculations of the potential and effective diffusion constant in a polyelectrolyte solution, S. R. Coriell and J. L. Jackson. *J. Chem. Phys.* 39, 2418-(1963).
5222. Calendar record for the International Geophysical cooperation 1959, A. H. Shapley and J. V. Lincoln. *Ann. IGY XVI, Pt. III*, 192 (Pergamon Press Inc., New York, N. Y., 1963).
5223. Calibration of photogrammetric lenses and cameras at the National Bureau of Standards, F. E. Washer. *Photogrammetric Eng.* XXIX, No. 1, 113-119 (Jan. 1963).
5224. Calorimetric determination of half-cell entropy changes, J. M. Sherkey. *J. Electrochem. Soc.* 110, No. 3, 213-221 (Mar. 1963).
5225. Calorimetry of Portland cement. II. Application of various heat-of-solution procedures to determinations of the heat of hydration, E. S. Newman and H. A. Berman. *Am. Soc. Testing Mater. Proc.* 63, 852-860 (1963).
5226. Calorimetry of Portland cement: I. Effect of various procedures on the determination of heat of solution, H. A. Berman and E. S. Newman. *ASTM Proc.* 830-851 (1963).
5227. Cane sugar refining. II. Decolorization with adsorbents, V. R. Deitz and F. G. Carpenter. *Cane Sugar Handb.* ed. G. P. Meade, 9th edition, p. 342-385 (John Wiley and Sons Inc., New York, N. Y., Aug. 1963).
5228. Changes in occlusion of complete dentures caused by a pipe habit: a case report, J. B. Woelfel and G. C. Paffenbarger. *J. Am. Dental Assoc.* 66, No. 4, 478-485 (Apr. 1963).
5229. Characteristics of programs for KWIC and other computer-produced indexes, W. W. Youden. (Proc. 26th Annual American Documentation Institute Meeting, Oct. 1963), *Book, Automation and Scientific Communication*, p. 331-332 (Am. Documentation Inst., 1963).
5230. Characteristics of spread F at high geomagnetic latitude, W. K. Klemperer. *J. Geophys. Res.* 68, No. 10, 3191-3196 (May 15, 1963).
5231. Chemical and magnetic enhancement of perturbed lines in the violet spectrum of CN, H. E. Radford and H. P. Broida. *J. Chem. Phys.* 38, No. 3, 644-657 (Feb. 1963).
5232. Choking two-phase flow of hydrogen: some idealized solutions, R. V. Smith. *Proc. Nuclear Propulsion Conf., Atomic Energy Commission*, p. 115-125 (AEC, Oak Ridge, Tenn., July 1963).
5233. Classification and properties of inorganic compounds, H. P. R. Frederikse. *American Institute of Physics Handb.* 2d edition, Sect. 9b, p. 9-21-9-31 (1963).
5234. Classification of resonances in the electron scattering cross section of Ne and He, J. Simpson and U. Fano. *Phys. Rev. Letters* 11, No. 4, 158-159 (Aug. 1963).
5235. Classification of two-electron excitation levels of helium, J. W. Cooper, U. Fano, and F. Prats. *Phys. Rev. Letters* 10, No. 12, 518-521 (June 1963).
5236. Cluster formulation of the exact equation for the evaluation of a classical many-body system, J. Weinstein. *Phys. Rev.* 132, No. 1, 454-469 (Oct. 1, 1963).
5237. Coatings formed on steel by cathodic protection and their evaluation by polarization measurements, W. J. Schwerdtfeger and R. J. Manuele. *Corrosion* 19, No. 2, 59t-68t (Feb. 1963).

5238. Coefficient of thermal expansion and Young's modulus for a one-dimensional model of a solid, J. Mazur and R. J. Rubin. *Am. J. Phys.* 34, No. 11, 835-836 (Nov. 1963).
5239. Colorimetric method for measuring polyester degradation due to weathering, V. E. Gray and J. R. Wright. *J. Appl. Polymer Sci.* 7, 2161-2174 (1963).
5240. Comment on empirical inference of Doppler widths, R. N. Thomas. *Astrophys. J.* 137, No. 1, 38-40 (Jan. 1963).
5241. Comment on "parametric behavior of an ideal two-frequency varactor", G. F. Montgomery. *Proc. IEEE* 51, No. 3, 491 (Mar. 1963).
5242. Comment on "the mode theory of VLF radio propagation for a spherical earth and a concentric anisotropic ionosphere, J. R. Wait. *Can. J. Phys.* Note 41, 819 (May 1963).
5243. Comments on "Application of experimental design to the study of a test method", R. T. Thaxter, P. D. Hubbe, and J. Mandel. *Tappi* 46, No. 12, 193A-194A (Dec. 1963).
5244. Comments on the paper "Obstacle gain and shadow loss", by G. H. Crenier, J. R. Wait. To the Editor of *Microwave J.* 6, No. 7, 83 (July 1963).
5245. Comments on the Rosen interaction potential of two helium atoms, B. M. Axilrod. *J. Chem. Phys.* 38, No. 1, 275-277 (Jan. 1963).
5246. Comments on three papers on fire tests, J. V. Ryan. (*Am. Soc. Testing Materials Fire Test Symp.*, Oct. 1, 1962), *Am. Soc. Testing Mater. Spec. Tech. Publ.* 344, 52 (Oct. 1963).
5247. Comments on Zener diodes as voltage standards, W. G. Eicke, Jr. *Comite Consultatif d'Electricite 10<sup>e</sup> Session*, May 2-3, 1963, pp. 27-30 (Gauthier-Villars, Paris, France, 1963).
5248. Comparison calibration of inductive voltage dividers, R. V. Lisle and T. L. Zapf. *ISA* 1963 *Proc. Paper No.* 7.1.63 (1963).
5249. Comparison of the 3-out-of-7 ARQ with Bose-Chaudhuri-Hocquenghem coding systems, M. Nesenbergs. *IEEE Trans. Commun. Systems CS-11*, No. 2, 202-212 (June 1963).
5250. Comparison of observed atmospheric radio refraction effects with values predicted through the use of surface weather observations, B. R. Bean and G. D. Thayer. (AIAA Space Flight Testing Conf., Cocoa Beach, Fla.), *Am. Inst. Aeronautics and Astronautics* (Mar. 1963).
5251. Comparison of the 3-out-of-7 ARQ with Bose-Chaudhuri-Hocquenghem coding systems, M. Nesenbergs. *IEEE Trans. Commun. Systems CS-11*, No. 2, 202-212 (June 1963).
5252. Complex formation between manganese(II), nickel(II), and zinc(II) ions and some symmetrically substituted ethylenediamines: the use of  $E_1$  and  $\beta H$  values in assessing inductive and steric effects, D. L. Leussing. *Inorganic Chem.* 2, No. 77, 77-82 (1963).
5253. Complicating factors in the gas phase photolysis of azomethane, R. E. Rebbert and P. J. Ausloos. *J. Phys. Chem.* 67, No. 9, 1925-1928 (Sept. 1963).
5254. Computed transmission spectra for 2.7 micron  $H_2O$  band, D. M. Gates, R. F. Calfee, and D. W. Hansen. *Appl. Opt.* 2, No. 11, 1117-1122 (Nov. 1963).
5255. Computer transmission spectra for 2.7 $\mu$ ,  $H_2O$  bands, D. M. Gates, R. F. Calfee, and D. W. Hansen. *Appl. Opt.* 2, No. 11, 1117-1122 (Nov. 1963).
5256. Concentration-dependent diffusion coefficient of water in glass, W. Haller. *Phys. Chem. Glasses* 4, No. 6, 217-220 (Dec. 1963).
- 5256A. Condensate collection as a measuring technique for studying the cooling capacity of air-conditioning units, P. R. Achenbach and J. C. Davis. (*Proc. XI Intern. Congress of Refrigeration*, Munich, Germany, 1963), *Book, Progress in Refrigeration Science and Technology II*, 1281-1286 (Pergamon Press Inc., New York, N. Y., 1963).
5257. Confidence limits for the reliability of complex systems, J. R. Rosenblatt. *Book, Statistical Theory of Reliability*, p. 115-148 (University of Wisconsin Press, Madison, Wisc., 1963).
5258. Connection between shielding and stability in a collisionless plasma, F. Engelmann, M. Feix, and E. Minardi. *Il Nuovo Cimento, Serie X*, 30, 830-836 (Nov. 1963).
5259. Construction and behavior of a transportable ten picofarad capacitor, R. D. Cutkosky and L. H. Lee. *Comite Consultatif d'Electricite 10<sup>e</sup> Session*, May 2-3, 1963, pp. 44-48 (Gauthier-Villars, Paris, France, 1963).
5260. Contribution to chapter on Thermal Insulation in book, F. J. Powell. *ASHRA Guide and Data Book*, Chapt. 22, p. 367-371 (1963).
5261. Convection phenomena from plants in still air, D. M. Gates and C. M. Benedict. *Am. J. Botany* 50, 563-573 (July 1963).
- 5261A. Cool-down and warm-up of large powder-insulated dewars, F. Kreith, J. W. Dean, and L. Brooks. *Adv. Cryog. Eng.* 8, Paper J-7, 536-543 (1963).
5262. Copositive and completely positive quadratic forms, M. Hall, Jr., and M. Newman. *Proc. Cambridge Phil. Soc.* 59, 329-339 (Apr. 1963).
5263. Corrections to the National Bureau of Standards list of IGY flares, C. S. Warwick. *IGY Solar Activity Rept.* 17 (1963).
5264. Correlation effects in two- and three-electron systems, J. W. Cooper and J. B. Martin. *Phys. Rev.* 131, No. 3, 1183-1186 (Aug. 1, 1963).
5265. Correlation matrix for radio waves in the troposphere, E. C. Barrows. (*Proc. Symp. Electromagnetic Theory and Antennas*, Copenhagen, 1963), *Monograph, Electromagnetic Theory and Antennas 2*, Sec. C, 743-746 (Macmillan and Co., Ltd., London, England, 1963).
5266. Correlation of factors influencing the pressures generated in multianvil devices, J. C. Houck and U. O. Hutton. *Book, High-Pressure Measurement*, ed. A. A. Giardini and E. C. Lloyd, p. 221-245 (Butterworth Inc., Wash. D. C., 1963).
5267. Correlation of the phase of microwave signals on the same line-of-sight path at different frequencies, H. B. Janes. *IEEE Trans. Ant. Prop.* AP-11, No. 6, 716-717 (Nov. 1963).
5268. Corrosion rates of ferrous alloys (Fe, Cr, and Fe-Cr-Si) measured by polarization techniques, W. J. Schwerdtfeger. *Corrosion* 19, No. 1, 17t-25t (Jan. 1963).
5269. Corrosion resistance, G. A. Ellinger. *Welding Handb.* 5th Edition, Chapt. 6, 6.1-6.72 (American Welding Society, New York, N. Y., 1963).
5270. Coulomb scattering without atomic excitation for 50-, 100-, 200-, and 400-eV electrons, J. W. Motz, R. C. Placious, and C. E. Dick. *Phys. Rev.* 132, No. 6, 2258-2261 (Dec. 15, 1963).

5271. Crystallographic changes with the substitution of aluminum for iron in dicalcium ferrite, D. K. Smith, *Acta Cryst.* 15, 1146-1152 (Jan. 1963).
5272. Current development in an electronically scanned antenna, H. V. Cottony, *Proc. Symp. Electromagnetic Theory and Antennas*, Copenhagen, June 25-30, 1962, p. 1289-1294 (Pergamon Press, London, England, 1963).
5273. Curves for ground wave propagation over mixed land and sea paths, J. R. Wait and L. C. Walters, *IEEE Trans. Ant. Prop.* AP-11, No. 1, 38-45 (Jan. 1963).
5274. Cyclotron resonances in slightly ionized gases, F. Fehsenfeld, *J. Chem. Phys.* 39, No. 7, 1633-1661 (Oct. 1, 1963).
5275. Delay time of polar-cap blackout and its relation to delay time of geomagnetic disturbance, C. S. Warwick, *J. Geophys. Res.* 68, No. 5, 1561-1562 (Mar. 1963).
5276. Delocalized versus localized pictures in resonance energy transfer, Z. Bay, *Proc. Natl. Acad. Sci.* 50, No. 5, 962-967 (Nov. 1963).
5277. Dependence of power output of a gas laser on the length and rate of excitation of the discharge, J. A. White, *Appl. Phys. Letters* 3, No. 7, 107-109 (Oct. 1, 1963).
5278. Dependence of the electrical conductivity and thermoelectric power of pure and aluminum-doped rutile on equilibrium oxygen pressure and temperature, J. Yahia, *Phys. Rev.* 130, No. 5, 1711-1719 (June 1, 1963).
5279. Derivation of electron density profiles in the lower ionosphere using radio absorption measurements at multiple frequencies, R. Parthasarathy, G. M. Lerfeld, and C. G. Little, *J. Geophys. Res.* 68, No. 12, 3581-3586 (June 15, 1963).
5280. Design of low voltage electron guns, J. A. Simpson and C. E. Kyatt, *Rev. Sci. Instr.* 34, No. 3, 265-268 (Mar. 1963).
5281. Detection of high altitude nuclear detonations using the VLF phase shift technique, A. G. Jean and D. C. Crombie, *IEEE Trans. Nuclear Sci.* NS-10, 242-253 (Jan. 1963).
5282. Determination of bitumen content in expansion joint fillers, E. Horowitz and J. Mandel, *Mater. Res. Std.* 3, No. 9, 723-725 (Sept. 1963).
5283. Determination of differential X-ray photon flux and total beam energy, H. W. Koch and J. S. Pruitt, *Book, Nuclear physics*, ed. L. C. Yogan and C. Wu, 5, Chapt. 2.8.2, 508-553 (1963).
5284. Determination of electronic energy levels of molecules by low-energy electron-impact spectroscopy, J. A. Simpson and S. R. Mielczarek, *J. Chem. Phys.* 39, No. 6, 1606-1607 (Sept. 1963).
5285. Determination of optical thickness gradients from a far distance, J. R. Meyer-Arendt, R. B. Herrick, and C. B. Emmanuel, *J. Opt. Soc. Am.* 53, 1344 (1963).
5286. Determination of propylene in ethylene-propylene copolymers in infrared spectroscopy, J. E. Brown, M. Tryon, and J. Mandel, *Anal. Chem.* 35, No. 13, 2172-2176 (Dec. 1963).
5287. Determination of rhodium in rhodium-uranium alloys by precipitation with hydrogen sulfide, E. J. Maienthal, *Anal. Chem.* 35, 1094-1095 (July 1963).
5288. Determining fastest routes using fixed schedules, B. Levin and S. Hedetniemi, *Proc. Conf. American Federation for Information Processing Soc.* 23, 1-9 (1963).
5289. Deuterium isotope effect on glass transformation temperatures of aqueous inorganic solutions, L. C. Shepley and A. B. Bestul, *J. Chem. Phys.* 39, No. 3, 680-687 (Aug. 1, 1963).
5290. D-glucose-1-glycero-3-octulose, a crystalline ketose from D-erythrose, R. Schaffer and A. Cohen, *J. Organ. Chem.* 28, 1929-1930 (1963).
5291. Dielectric constants of  $\text{Cr}_2\text{O}_3$  crystals, W. S. Brower and P. H. Fang, *Phys. Rev.* 129, No. 4, 1561 (Feb. 1963).
5292. Dielectric friction on a moving ion, R. Zwanzig, *J. Chem. Phys.* 38, No. 7, 1603-1605 (Apr. 1963).
5293. Dielectric friction on a rotating dipole, R. Zwanzig, *J. Chem. Phys.* 38, No. 7, 1605-1606 (Apr. 1963).
5294. Dielectric relaxation in a high temperature dipole lattice, R. Zwanzig, *J. Chem. Phys.* 38, No. 11, 2766 (1963).
5295. Differential dielectric apparatus for determining water added to solvents, W. C. Wolfe, *Anal. Chem.* 35, 1884-1887 (Nov. 1963).
5296. Direct observation of charge storage in the surface states of silicon, G. G. Harman, R. L. Raybold, and O. L. Meyer, *J. Appl. Phys.* 34, No. 2, 380-383 (Feb. 1963).
5297. Discrepancy in conversion of early melting-point temperatures, S. J. Schneider, *J. Am. Ceram. Soc.* 46, No. 7, 354-355 (1963).
5298. Discussion of paper 63-39 I, "The measurement of short duration impulse voltages", by F. C. Creed, M. M. C. Collins, and H. N. Cones, *IEEE Trans. Commun. Electron.* EC-69, 629 (Nov. 1963).
5299. Dissociation constant of pyrrolidinone ion and related thermodynamic quantities from 0 to 50°, H. B. Hetzer, R. G. Bates, and R. A. Robinson, *J. Phys. Chem.* 67, No. 5, 1124-1127 (May 1963).
5300. Dissociative ionization of  $\text{H}_2$ : a study of angular distributions and energy distributions of resultant fast protons, G. H. Dunn and L. J. Kieffer, *Phys. Rev.* 132, No. 5, 2109-2117 (Dec. 1, 1963).
5301. Distillation, A. T. Leslie and E. C. Kuehner, *Analytical Chemistry*, 11th ed., Methods of Separation, Ed. L. Meites, 1st Edition, No. 1, Sect. 10, p. 10-23-10-42 (McGraw-Hill Book Co. Inc., New York N. Y., Apr. 1963).
5302. Distribution of latitude of red arcs, E. Marovich and F. E. Roach, *J. Geophys. Res.* 68, No. 7, 1885-1888 (Apr. 1963).
5303. Doppler studies of the ionospheric effects of solar flares, K. Davies, *Proc. Intern. Conf. Ionosphere*, July 1962, p. 76-83 (Institute of Physics and the Physical Society, London, England, 1963).
5304. Dose fields from plane sources using point source data, J. H. Hubbell, *Nucleonics* 21, No. 8, 144-148 (Aug. 1963).
5305. Double-photon photodetachment of negative ions, S. Geltman, *Phys. Rev. Letters*, 4, No. 3, 168-169 (Apr. 1, 1963).
5306. Editor's preface and foreword to Book, Measurement of Thermal Radiation Properties, J. C. Richmond, (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1962), *Natl. Aeron. and Space Admin.* SP-31, p. iii (Dec. 1963).
5307. Effect of additives on the ionic reaction mechanism in the radiolysis of methane, P. Ausloos, S. G. Lias, and R. Gorden, Jr., *J. Chem. Phys.* 39, No. 12, 3341-3348 (Dec. 15, 1963).

5308. Effect of hydrogen-hydrogen exchange collisions. P. L. Bender. *Phys. Rev.* 132, No. 5, 2154-2158 (Dec. 1, 1963).
5309. Effect of hydrostatic pressures on the crystallization kinetics of natural rubber. G. M. Martin and L. Mandelkern. *J. Appl. Phys.* 34, No. 8, 2312-2317 (Aug. 1963).
5310. Effect of insulation on the weathering of smooth-surfaced built-up roofs exposed to solar heating. W. C. Cullen and W. H. Appleton. *Am. Roofer and Bldg. Improvement Contractor Mag.* Pt. I, 53, No. 3, 19-22 (Mar. 1963); Pt. II, 53, No. 4, 14 (Apr. 1963); *Construction Specifier Mag.* 16, No. 5, 35-38 (Oct. 1963).
5311. Effect of outdoor exposure on some properties of chrome-retained leather. T. J. Carter. *J. Am. Leather Chemists Assoc.* 58, No. 3, 155-160 (Mar. 1963).
5312. Effect of rate of loading, time of trituration and test temperature on compressive strength of dental amalgam. H. J. Caul, R. Longton, W. T. Sweeney, and G. C. Paffenbarger. *J. Am. Dental Assoc.* 67, No. 5, 670-678 (Nov. 1963).
5313. Effective diffusion constant in a polyelectrolyte solution. J. L. Jackson and S. R. Coriell. *J. Chem. Phys.* 38, No. 4, 959-968 (Feb. 15, 1963).
5314. Effects of magnetic disturbance as noted on oblique incidence ionograms. V. Agy and K. Davies. *AGARDograph* 59, The Effect of Disturbances of Solar Origin on Communications, ed. G. J. Gassmann, p. 167-176 (Pergamon Press Inc., London, England, 1963).
5315. Effects of tensile stress on the domain structure in grain-oriented 3.25% silicon steel. J. J. Gnielwek. *J. Appl. Phys.* 34, No. 12, 3618-3622 (Dec. 1963).
5316. Effects of the nuclear explosion over (Johnston) Island observed in Peru on July 9, 1962. M. Casaverde, A. Giesecke, and R. Cohen. *J. Geophys. Res.* 68, No. 9, 2603-2611 (May 1, 1963).
5317. Electric fields in the ionosphere and the excitation of the red lines of atomic oxygen. L. Megill, M. H. Rees, and L. K. Droppleman. *Planetary and Space Sci.* 11, 45-56 (Jan. 1963).
5318. Electrical properties of elastomers and related polymers. A. T. McPherson. *Rubber Chem. Technol.* 36, No. 5, 1230-1302 (Dec. 1963).
5319. Electrical resistance-strain characteristics of thin evaporated metal films. R. L. Parker and A. Krinsky. *J. Appl. Phys.* 34, No. 9, 2700-2708 (Sept. 1963).
5320. Electrical standards. F. K. Harris. *American Institute of Physics Handb.* 2d edition, Sect. 5c, p. 5-96-5-106 (1963).
5321. Electrode potentials in fused systems. VI. Membrane potentials. K. H. Stern. *J. Phys. Chem.* 67, No. 7, 893-895 (Apr. 1963).
5322. Electrodeposition of alloys. Principles and practice. Vol. I. General survey, principles, and alloys of copper and of silver and Vol. II. Practical specific information. A. Brenner. Academic Press Inc., New York, N. Y., 1963.
5323. Electroless plating. A. Brenner. *Mod. Electroplating*, p. 698-713 (1963).
5324. Electrolytic conductance of ammonium dihydrogen phosphate solutions in the saturation region. J. L. Torgesen and A. T. Horton. *J. Phys. Chem.* 67, 376-381 (Feb. 1963).
5325. Electromagnetic scattering from a radially inhomogeneous sphere. J. R. Wait. *Appl. Sci. Res.* 10, Sec. B, 441-450 (Jan. 1, 1963).
5326. Electron attachment coefficients, of some hydrocarbon flame inhibitors. T. G. Lee. *J. Phys. Chem.* 67, 360-366 (1963).
5327. Electron energy levels and their relationship to lattice defects in reduced rutile. J. Becker and W. R. Hosler. (Proc. Intern. Conf. Crystal Lattice Defects), *J. Phys. Soc. Japan* 18, Suppl. II, 152-160 (1963).
5328. Electron impact ionization of atomic hydrogen. S. Geltman, M. R. Rudge, and J. J. Seaton. *Proc. Phys. Soc.* 81, Pt. 2, No. 520, 375-377 (Feb. 1, 1963).
5329. Electron microscopy studies of the surfaces of magnetic recording media. F. Nesh and D. B. Ballard. *IEEE Trans. Audio AU-11*, No. 1, 15-18 (Jan.-Feb. 1963).
5330. Electron monochromator utilizing the scattering resonance in helium. J. A. Simpson, C. E. Kuyatt, and S. R. Mielczarek. *Rev. Sci. Instr.* 34, No. 12, 1454-1455 (Dec. 1963).
5331. Electron spin resonance of gamma-irradiated cellulose. R. E. Florin and L. A. Wall. *J. Polymer Sci. A1*, No. 4, 1163-1173 (Apr. 1963).
5332. Electron spin resonance spectra of aged  $\gamma$ -irradiated polystyrenes. R. E. Florin, L. A. Wall, and D. W. Brown. *J. Polymer Sci. A1*, No. 5, 1521-1529 (May 1963).
5333. Electronic properties of solids: Definition and formulas. H. P. R. Frederikse. *American Institute of Physics Handb.* 2d edition, Sect. 9c, p. 9-31-9-36 (1963).
5334. Electronic scanning for large radiotelescopes. T. A. Clark. *Program and Digest 1963 IEEE Prof. Group Ant. and Prop. Symp. Space Telecommunications*, July 9-11, 1963, Boulder, Colo., p. 242-246 (July 1963).
5335. Energy dependence of proportional-counter fast-neutron dosimeters. R. S. Caswell, W. B. Beverly, and V. Spiegel, Jr. (Proc. Symp. Neutron Detection, Dosimetry and Standardization, Atomic Energy Agency, Atomic Energy Research Establishment, Harwell, England, Dec. 10-14, 1962), Book, *Neutron Dosimetry II*, 227-237 (International Atomic Energy Agency, Vienna, July 1963).
5336. Equatorial electron density profiles to 5000 KM, using the incoherent scatter technique. K. L. Bowles. *Third Intern. Space Sci. Symp. Proc.* Washington, D. C., May 2-8, 1962, p. 253-264 (John Wiley and Sons, Inc., New York, 1963).
5337. Equatorial ionospheric variations during geomagnetic storms. S. Matsushita. *J. Geophys. Res.* 68, 2595-2601 (May 1, 1963).
5338. Equatorial spread-F motions. W. Calvert, K. Davies, E. C. Stiltner, and J. T. Brown. *Proc. Intern. Conf. Ionosphere*, July 1962, p. 316-322 (Institute of Physics and the Physical Society, London, England, 1963).
5339. Equilibrium constants of proton-transfer reactions. V. E. Bower and R. G. Bates. *Handb. Analytical Chemistry*, Ed. L. Meites, Sec. 1, 20-27 (McGraw-Hill Book Co., Inc., New York, N. Y., 1963).
5340. Error bounds for first approximations in turning-point problems. F. W. J. Olver. *J. Soc. Ind. Appl. Math.* 11, No. 3, 748-772 (Sept. 1963).
5341. Errors in "drop" calorimetry due to sample container transitions. D. C. Ginnings. *J. Phys. Chem.* 67, 1917-1918 (1963).
5342. Evidence for field-aligned ionization irregularities between 400 and 1000 km above the earth's surface. T. E. VanZandt, W. Calvert, R. W. Knecht, and G. B. Goe. *Book, Space Research*,

- ed. W. Priester III, 271-273 (North Holland Publ. Co., Amsterdam, The Netherlands, 1963).
5343. Evidence regarding the mechanism of fatigue from studies of environmental effects, J. A. Bennett. *Acta Met.* 11, No. 7, 799-800 (July 1963).
5344. Exchange processes in the reaction of boron trichloride with triethylamine-boron trifluoride, T. D. Coyle. *Proc. Chem. Soc. London*, p. 172 (1963).
5345. Excitation of  $\pi$  electrons in polystyrene and similar polymers by 20-KeV electrons, N. Swanson and C. J. Powell. *J. Chem. Phys.* 39, No. 3, 630-634 (Aug. 1, 1963).
5346. Experimental determination of the bulk density of boiling liquid oxygen, R. W. Arnett, D. R. Millhiser, and W. H. Probert. *Advan. Cryog. Eng.* 8, Paper E-4, 256-262 (1963).
5347. Experimental evaluation of a thallium beam frequency standard, R. E. Beechler and D. J. Glaze. *Proc. 17th Annual Frequency Control Symp.* (1963).
5348. Experimental investigation of Fabry-Perot interferometers, R. W. Zimmerer. *Proc. IEEE* 51, No. 3, 475-476 (Mar. 1963).
5349. Experimental investigation of liquid hydrogen cooling by helium gas injection, A. F. Schmidt. *Advan. Cryog. Eng.* 8, Paper J-5, 521-528 (1963).
5350. Experimental observations and theoretical calculations leading to a model for the lower ionosphere, R. H. Doherty. *Proc. Intern. Conf. Ionosphere*, July 1962, p. 428-434 (The Institute of Physics and the Physical Society, London, England, 1963).
5351. Experimental predictions from unitary symmetry ( $SU_3$ ), C. A. Levinson, H. V. Lipkin, and S. Meshkov. (*Proc. 1963 Intern. Conf. Nucleon Structure*, Stanford Univ., Calif., June 24-27, 1963), Book, *Nucleon Structure*, p. 309 (University Press, Stanford, Calif., Aug. 11, 1963).
5352. Experimental statistics, M. G. Natrella. *Army Res. Office, Durham, North Carolina*, ORDP 20-110 through 20-114 (1963).
5353. Experiments on self-ionizing shock waves in a magnetic field, Y. Nakagawa and K. B. Earnshaw. *Book, Comptes Rendus de la VI<sup>e</sup> Conference Internationale sur les Phenomenes D'Ionisation dans les Gaz*, ed. P. Hubert and E. Cremieu-Alcan, IV, 303-309 (S.E.R.M.A., Publ. Co., Paris, France, 1963).
5354. Ferroelectric switching and the Sievert integral, P. H. Fang and I. R. Stegun. *J. Appl. Phys.* 34, No. 2, 284-286 (Feb. 1963).
5355. Ferromagnetic resonance and shape-dependent effects, L. A. Steinert. *J. Appl. Phys.* 34, No. 7, 2106-2107 (July 1963).
5356. Field aligned E-region irregularities identified with acoustic plasma waves, K. L. Bowles, B. B. Balsley, and R. Cohen. *J. Geophys. Res.* 68, No. 9, 2485-2501 (May 1963).
5357. Field emission observations of carbon on tantalum, R. Klein and L. Leder. *J. Chem. Phys.* 38, No. 8, 1863-1866 (Apr. 1963).
5358. Field-emission study of carbon monoxide on tantalum, R. Klein and L. B. Leder. *J. Chem. Phys.* 38, No. 8, 1866-1872 (Apr. 15, 1963).
5359. Field measurements of air infiltration in ten electrically-heated houses, C. W. Coblenz and P. R. Achenbach. *ASRAE J.* 5, No. 7, 69 (July 1963).
5360. First-order perturbation corrections to the Hartree-Fock approximation for helium, A. W. Weiss and J. B. Martin. *Phys. Rev.* 132, No. 5, 2118-2122 (Dec. 1, 1963).
5361. First order phase transition in a gas of long thin rods, R. Zwanzig. *J. Chem. Phys.* 39, No. 7, 1717-1721 (Oct. 1963).
5362. First results in NASA topside sounder satellite, R. W. Knecht, S. Russell, and J. E. Jackson. *Book, Advances in the Astronautical Sciences* 11, 61-85 (Western Periodicals Co., Calif., 1963).
5363. Force and seal evaluation of elastomeric o-rings, P. R. Ludtke and D. H. Weitzel. *Advan. Cryog. Eng.* 8, Paper 4-6, 467-477 (June 1963).
5364. Form and angular distribution of proton groups at about Q=0 Mev in the proton spectra of (d,p) reactions of heavy nuclei, J. Pfeiffer, U. Schmidt-Rohr, V. Speigel, P. Turek, and W. Zuckschwerdt. *Nuclear Phys.* 48, No. 1, 22-32 (Sept. 1963).
5365. Formation and oxidation of high area carbon films, V. Deitz and E. F. McFarlane. *Proc. Fifth Carbon Conf.* 2, 219-232 (Pergamon Press Inc., London, England, 1963).
5366. Foundations of the Callaway theory of thermal conductivity, R. E. Nettleton. *Phys. Rev.* 132, No. 5, 2032-2038 (Dec. 1, 1963).
5367. Fresnel zone diffraction effects at 50 Gc/sec. Determined from measured aperture field data, R. C. Baird. *Program and Digest 1963 IEEE Prof. Group Ant. and Prop. Symp. Space Telecommunications*, July 9-11, 1963, Boulder, Colo., p. 171-173 (1963).
5368. Fundamentals of measurement, A. G. McNish. *Electro-Technol.* 53, 113-128 (May 1963).
5369. Galvanic currents observed during outdoor exposure of an iron-nickel cell, F. Ogburn and R. L. Myklebust. *50th Annual Tech. Proc. American Electroplaters Society*, p. 24-28 (1963).
5370. Galvanostatalametry, a new technique based on the negative pressure of liquids, for investigating electrochemical phenomena at an electrode, J. Sligh and A. Brenner. *J. Electrochem. Soc.* 110, No. 11, 1136-1142 (Nov. 1963).
5371. Gamma irradiation of polytetrafluoroethylene in chlorine, R. E. Florin and L. A. Wall. *SPE Trans.* 3, No. 4, 290-299 (Oct. 1963).
5372. Gas evolution from metal surfaces during fatigue stressing, W. L. Holshouser and J. A. Bennett. *Proc. ASTM* 62, 683 (1963).
5373. Gas measurement and other services of the National Bureau of Standards, C. T. Collett. *Am. Gas Assoc. Preprint No. DMC-63*, p. 1-3 (1963).
5374. Gas-phase radiolysis of isobutane, R. P. Borkowski and P. Ausloos. *J. Chem. Phys.* 38, No. 1, 36-44 (Jan. 1, 1963).
5375. Gas-phase radiolysis of n-butane, R. P. Borkowski and P. J. Ausloos. *J. Chem. Phys.* 39, No. 3, 818-824 (Oct. 1963).
5376. Generalized variation principles for electromagnetic vibrations; application to the theory of waveguide junctions, D. M. Kerns. *Proc. Symp. Electromagnetic Theory and Antennas*, Copenhagen, Denmark, June 25-30, 1962, Ed. E. C. Jordan, p. 253-259 (Pergamon Press Inc., London, England, 1963).
5377. Geomagnetic and solar data, J. V. Lincoln. *J. Geophys. Res.* 67-68 (June 1962 to June 1963).
5378. Growth and evaporation kinetics and surface diffusion of K and Hg crystal whiskers, R. L. Parker, R. L. Anderson, and S. C. Hardy. *Appl. Phys. Letters* 3, No. 6, 93-95 (Sept. 15, 1963).
5379. Hartree-Fock approximation of  $CH_4$  and  $NH_4^+$ , M. Krauss. *J. Chem. Phys.* 38, No. 2, 564-565 (Jan. 15, 1963).
5380. Heat capacities, G. T. Furukawa and T. B. Douglas. *American Institute of Physics Handb.* 2d edition, Sect. 4e, p. 4-47-4-63 (1963).
5381. Heating rate as a test of adiabatic calorimeters and the heat capacity of  $\alpha$ -alumina, E. D. West. *Trans. Faraday Soc.* 59, Pt. 9, 489, 2200-2203 (Sept. 1963).

5382. Heats of formation of two isomers of difluorodiazine, G. T. Armstrong and S. Marantz. *J. Chem. Phys.* 38, No. 1, 169-172 (Jan. 1963).
5383. High-field liquid  $H_2$ -cooled aluminum-wound magnet, J. R. Purcell and E. G. Payne. *Rev. Sci. Instr.* 34, No. 8, 893-897 (Aug. 1963).
5384. High frequency microvolt measurements, F. X. Ries. *ISA Preprint*, p. 37.2.63-1-37.2.63-5 (Sept. 1963).
5385. HF propagation characteristics in equatorial latitudes, A. Barghausen, G. Jacobs, and D. Lillie, Program and Digest of 1963 IEEE Prof. Group. Ant. and Prop. Symp. Space Telecommunications, July 9-11, 1963, Boulder, Colo., p. 37-42 (1963).
5386. High pressure measurement, A. VanValkenberg. (Proc. High-Pressure Measurement Symp., New York, N. Y., Nov. 1962), Book, High-Pressure Measurement, ed. A. A. Giardini and E. C. Lloyd, p. 87-94 (Butterworth Inc., Washington, D. C., 1963).
5387. High-pressure measurement, A. A. Giardini and E. C. Lloyd. Editors, Book, (Proc. High-Pressure Measurement Symp., New York, N. Y., Nov. 1962), 409 pages (Butterworth Inc., Washington, D. C., 1963).
5388. High-pressure x-ray diffraction studies, G. J. Piermarini. Proc. 13th Chemical Engineering Conf., Montreal, Canada, Oct. 19-23, 1963, pp. 182-185 (Chemical Institute of Canada, 1963).
5389. Highly ionized atoms: the configurations  $s^2p^n(n=1,2,4,5)$ , F. Rohrich and C. Pecker. *Astrophys. J.* 138, No. 4, 1246-1261 (Nov. 15, 1963).
5390. Homogeneous anionic polymerization. I. Molecular weights of polystyrene initiated by sodium naphthalene, M. Morton, R. Milkovich, D. McIntyre, and J. L. Bradley. *J. Polymer Sci. 1*, Pt. A, 443-459 (Jan. 1963).
5391. Humidity (measurement of moisture in gas), A. Wexler. *ISA Transducer Compendium*, p. 502-508 (Sept. 1963).
5392. Hydrogen atom addition to solid four-carbon olefins, R. Klein and M. D. Scheer. *J. Phys. Chem.* 67, 1874-1877 (Sept. 1963).
5393. Hydrogen retention system for pressure calibration of microphones in small couplers, W. Koidan. *J. Acoust. Soc. Am.* 35, No. 4, 614 (Apr. 1963).
5394. Hyperfine structure and isotope shifts in the 2537-A line of mercury by a new interferometric method, W. G. Schweitzer, Jr. *J. Opt. Soc. Am.* 53, No. 9, 1055-1072 (Sept. 1963).
5395. Hyperfine structure in the spectrum of mercury hydride, T. L. Porter and S. P. Davis. *J. Opt. Soc. Am.* 53, No. 3, 338-343 (Mar. 1963).
5396. Hypervelocity cratering data, and a crater depth model for the regime of partial fluidity, O. G. Engel. Proc. 6th Hypervelocity Impact Symp., Cleveland, Ohio, Apr. 30-May 1, 1963, II, Pt. II, 337-366 (U. S. Army Ballistics Res. Lab., Aberdeen Proving Ground, Md., Aug. 1963).
5397. Ideal yield of a Simon liquefier, L. E. Scott. *Cryogenics* 3, 111-112 (June 1963).
5398. Impedance of Leclanche cells and batteries, R. J. Brodd and H. J. DeWane. *J. Electrochem. Soc.* 110, No. 11, 1091-1097 (Nov. 1963).
5399. Impressions of Japan, R. S. Marvin. Japanese J. Kobunshi (High Polymers), Soc. High Polymers 12, No. 130, 53 (1963).
5400. Improved sample holder for X-ray diffractometer furnace, E. M. Levin and F. A. Mauer. *J. Am. Ceram. Soc.* 46, No. 1, 59-60 (Jan. 1963).
5401. Improved transducer for external recording of arterial pulse waves, M. Davis, B. Gilmore, and E. Freis. *IEEE Trans. Bio-Med. Elec.* BME-10, No. 4, 173-175 (Oct. 1963).
5402. Impurity controlled properties of ionic solids, A. D. Franklin. (Proc. Symp. Physics and Chemistry of Ceramics, Pennsylvania State Univ., University Park, Pa., May 28-30, 1963), Book, Physics and Chemistry of Ceramics, pp. 77-109 (Gordon and Breach, New York, N.Y., 1963).
5403. Index to Journal of Association for Computing Machines, W. W. Youden. *ACM J.* 10, No. 4, 583-646 (Oct. 1963).
5404. Index to the communications of the ACM, W. J. Youden. 1958-1962, *Commun. ACM* 6, No. 3, 1-32 (Mar. 1963).
5405. Inductive voltage dividers with calculable relative corrections, T. L. Zapf, C. H. Chinnburg, and H. K. Wolf. *IEEE Trans. Instr. Meas.* IM-12, No. 2, 80-85 (Sept. 1963).
5406. Infrared absorption spectra of  $B_2O_3$ ,  $B_2O_3$  and  $BO_2$  in solid argon matrices, A. Sommer, D. White, M. J. Linevsky, and D. E. Mann. *J. Chem. Phys.* 38, No. 1, 89-98 (Jan. 1963).
5407. Infrared absorption spectra of carbon suboxide and malononitrile in solid argon matrices, L. L. Ames, D. White, and D. E. Mann. *J. Chem. Phys.* 38, No. 4, 910-917 (Feb. 1963).
5408. Infrared dispersion of some oxide glasses, I. H. Malitson, G. W. Cleek, O. N. Stavroudis, and L. E. Sutton. *Appl. Opt.* 2, No. 7, 741-747 (July 1963).
5409. Infrared spectrum of difluoramine, J. J. Comeford, D. E. Mann, L. J. Schoen, and D. R. Lide, Jr. *J. Chem. Phys.* 38, No. 2, 461-463 (Jan. 1963).
5410. Infrared transmission of the atmosphere to solar radiation, D. M. Gates and W. J. Harrop. *Appl. Opt.* 2, No. 9, 887-898 (Sept. 1963).
5411. Inhibition of opposed-jet methane-air diffusion flames, the effects of alkali metal vapors and organic halides, R. Friedman and J. B. Levy. *Combustion and Flame* 7, No. 2, 195 (June 1963).
5412. Instability of the equatorial F layer after sunset, W. Calvert. *J. Geophys. Res.* 68, No. 9, 2591-2594 (May 1, 1963).
5413. Instrument for the continuous measurement of the density of flowing fluids, C. E. Miller, R. B. Jacobs, and J. Macinko. *Rev. Sci. Instr.* 34, No. 1, 24-27 (Jan. 1963).
5414. Interaction energies and transport coefficients, of Li+H and O+H gas mixtures at high temperatures, P. H. Krupenie. *J. Chem. Phys.* 39, No. 10, 2399-2408 (Nov. 15, 1963).
5415. Interaction matrix element in a shell model, U. Fano, F. Prats, and Z. Goldsmith. *Phys. Rev.* 129, No. 9, 2643-2652 (Mar. 16, 1963).
5416. Intercomparison of national roentgen and gamma-ray exposure-dose standards, H. O. Wyckoff, A. Allisy, G. H. Aston, G. P. Barnerd, W. Hubner, T. Loftus, and G. Taupin. *Acta Radiol.* 1, No. 1, 57-78 (Feb. 1963).
5417. Intercomparisons of the standard thermal-neutron flux density of the National Bureau of Standards, W. M. Murphy and J. Chin. (Proc. Symp. Neutron Detection, Dosimetry and Standardization, International Atomic Energy Agency, Atomic Energy Research Establishment, Harwell, England, Dec. 10-14, 1962), Book, Neutron Dosimetry II, 513-521 (International Atomic Energy Agency, Vienna, 1963).

5418. Interference fringes with long path difference using He-Ne laser, T. Morokuma, K. F. Neffien, T. R. Lawrence, and T. M. Klucher. *J. Opt. Soc. Am.* 53, No. 3, 394-395 (Mar. 1963).
5419. Unassigned.
5420. International Geophysical calendar for 1963, A. H. Shapley and J. V. Lincoln. *URSI Info. Bull.* 135, 68-75 (Nov.-Dec. 1962); *J. Radio Res. Lab. Japan* 9, 45 (1962); *I. G. Bull.* 67, 9-12 (Jan. 1963); *COSPAR Info. Bull.* 13, 30-33 (Jan. 1963); *Nature* 197, 6-8 (Jan. 1963); *J. Atmospheric Terrest. Phys.* 25, 51-53 (Jan. 1963); *WMO Bull.* 12, No. 1, 26-27 (Jan. 1963); *J. Geophys. Res.* 68, No. 4, 1157-1159 (Feb. 1963); *IUGG Chronicle* 45, 81 (Feb. 1963); *Trans. AGU* 44, 225-228 (Mar. 1963); *IQSY Notes* 4, 34 (Sept. 1963).
5421. International standardization--A new responsibility of the engineer, A. T. McPherson. *Natl. Acad. Sci.-Natl. Res. Council Div. of Eng. and Ind. Res. Newsletter* 26, 2-4 (June 1, 1963).
5422. International geophysical calendar for the years of the quiet sun 1964-1965, A. H. Shapley and J. V. Lincoln. *J. Radio Res. Labs. Japan* 10, 185-192 (Mar. 1963); *IUGG Chronicle* 50, 171-174 (July 1963); *URSI Inform. Bull.* 139, 64-71 (July-Aug. 1963); *IG Bull.* 74, 15-18 (Aug. 1963); *Weatherwise* 16, 160-161 (Aug. 1963); *J. Geophys. Res.* 68, 5318-5323 (Sept. 15, 1963); *Trans. Am. Geophys. Union* 44, 821-824 (Sept. 1963).
5423. Interpretation of pH measurements in alcohol-water solvents, R. G. Bates, M. Paabo, and R. A. Robinson. *J. Phys. Chem.* 67, No. 9, 1833-1838 (Sept. 1963).
5424. Intramolecular rearrangements. V. Formation of ethylene in the photolysis of ethyl acetate from 4 to 500°K, P. Ausloos and R. E. Rebert. *J. Phys. Chem.* 67, No. 1, 163-167 (Jan. 1963).
5425. Intrinsic attenuation, R. W. Beatty. *IEEE Trans. Microwave Theory Tech.* 11, No. 3, 179-182 (May 1963).
5426. Introduction to the International Symposium on equatorial aeronomy, R. Cohen and K. L. Bowles. *J. Geophys. Res.* 68, No. 9, 2359-2361 (May 1963).
5427. Investigation of shallow reference cavities for high-temperature emittance measurements, D. G. Moore. (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton Ohio, Sept. 5-7, 1962), *Natl. Aeronaut. and Space Admin. SP-31, Session V, Paper* 52, p. 515 (1963).
5428. Ionization of High Temperature Gases, K. E. Shuler. Editor, Volume XII of Progress in Astronautics and Aeronautics, Academic Press Inc., New York, N. Y., 1963.
5429. Ionospheric variations during geomagnetic storms, S. Matsushita. *Proc. Intern. Conf. Ionosphere July 1962*, p. 120-127 (Institute of Physics and the Physical Society, London, England, 1963).
5430. IQSY Instruction Manual. No. 1. World days, A. H. Shapley. 32 pages IQSY Secretariat, London, England (July 1963).
5431. Iron, V. A. Lamb and C. T. Thomas. *Mod. Electroplating*, p. 228-241 (1963).
5432. Isopiestic vapor pressure measurements, of the ternary system: sorbitol-sodium chloride-water at 25°, V. E. Bower and R. A. Robinson. *J. Phys. Chem.* 67, No. 7, 1540-1541 (July 1963).
5433. Isotopic fractionation of uranium in sandstone, W. R. Shields, E. L. Garner, and J. N. Rosholt. *Science* 139, No. 3551, 224-226 (Jan. 1963).
5434. Kihara parameters and second virial coefficients for cryogenic fluids and their mixtures, J. M. Prausnitz and A. L. Myers. *A.I.Ch.E.* 9, No. 1, 5-11 (June 1963).
5435. Kinetics of desorption II: Cs<sup>+</sup> and Ba<sup>+</sup> from rhenium, M. D. Scheer and J. Fine. *J. Chem. Phys.* 38, No. 2, 307 (Jan. 1963).
5436. Kinetics of desorption. III. Rb<sup>+</sup>, K<sup>+</sup>, and Na<sup>+</sup> on rhenium, M. D. Scheer and J. Fine. *J. Chem. Phys.* 39, No. 7, 1752-1755 (Oct. 1963).
5437. Kinetics of the acid-catalyzed reaction of acetal in water-acetone solvents at 15, 25, and 35°, R. K. Wolford. *J. Phys. Chem.* 67, No. 3, 632-636 (Mar. 1963).
5438. Klystron protection circuit, W. E. Case and N. T. Larsen. *Rev. Sci. Instr.* 34, No. 7, 809-810 (July 1963).
5439. Knight-shifts and line widths of the nuclear magnetic resonance of Pb<sup>207</sup> in lead-indium alloys, R. J. Snodgrass and L. H. Bennett. *Phys. Rev.* 132, No. 4, 1465-1474 (Nov. 15, 1963).
- 5439A. Laboratory study of the effect of solar radiation on cooling load of stationary refrigerated vehicles, P. R. Achenbach and C. W. Phillips. (Proc. XI Intern. Congress of Refrigeration, Munich, Germany, 1963), Book, Progress in Refrigeration Science and Technology III, 1631-1635 (Pergamon Press Inc., New York, N. Y. 1963).
5440. Lactonization of aldonic acids. D-glucono-1, 5-lactone, and lactobiono-1, 5-lactone, H. S. Isbell and H. L. Frush. *Book, Methods in Carbohydrate Chemistry*, 2, 16 (Academic Press Inc., New York, N. Y., 1963).
5441. Large-angle inelastic scattering of 500-keV electrons, J. W. Motz and R. C. Placius. *Phys. Rev.* 132, No. 3, 1120-1122 (Nov. 1963).
5442. Large longitudinal retarded elastic deformation of rubberlike network polymers. II. Application of a general formulation of nonlinear response, H. Leaderman and F. L. McCrackin. *Trans. Soc. Rheology* VII, 111-123 (1963).
5443. Lasers, T. R. Lawrence. *J. Wash. Acad. Sci.* 53, 25-34 (Feb. 1963).
5444. Leaf temperature and energy exchange, D. M. Gates. *Arch. Meteorol. Geophys. Bioklimatol. Ser. B*, 12, No. 2, 321-336 (1963).
5445. Line shapes, saturation behavior, and temperature studies in the nuclear resonance of nickel, R. L. Streever and L. H. Bennett. *Phys. Rev.* 131, No. 5, 2000-2009 (Sept. 1963).
5446. Line transfer problems, J. T. Jeffries. *J. Quant. Spectry. Radiative Transfer* 3, No. 2, 217-220 (Apr.-June 1963).
5447. Linear thermal expansion of elastomers in the range 300° to 76°K, R. F. Robbins, Y. Ohori, and D. H. Weitzel. *Advan. Cryog. Eng.* 8, Paper E-8, 287-299 (1963).
5448. Linear velocity-gradient term in time-dependent pair distribution function, R. E. Nettleton. *J. Chem. Phys.* 38, No. 8, 1791-1802 (Apr. 15, 1963).
5449. Lines of constant correlated color temperature based on MacAdam's (u,v) uniform chromaticity transformation of the CIE diagram, K. L. Kelly. *J. Opt. Soc. Am.* 53, No. 8, 999-1002 (Aug. 1963).
5450. Liquid requirements for the cool-down of cryogenic equipment, R. B. Jacobs. *Advan. Cryog. Eng.* 8, Paper J-6, 529-535 (1963).

5451. Long-term characteristics for air-ground propagation in band nine, R. S. Kirby. Program and Digest 1963 IEEE Prof. Group Ant. and Prop. Symp. Space Telecommunications, July 9-11, 1963, Boulder, Colorado, p. 43-47 (1963).
5452. Low energy levels of neutral cerium (Ce I), W. C. Martin. J. Opt. Soc. Am. 53, No. 9, 1047-1050 (Sept. 1963).
5453. Lunar point-to-point communication, L. E. Volger. Book, Technology of Lunar Exploration, Progress in Astronautics and Aeronautics 9, 533-559 (Academic Press Inc., New York, N. Y., 1963).
5454. Macro-pores in leather as determined with a mercury porosimeter, J. R. Kanagy. J. Am. Leather Chemists' Assoc. LVIII, No. 9, 524-550 (Sept. 1963).
5455. Magnetic properties of some ilmenite-hematite solid solutions (abstract), C. F. Jefferson and R. G. West. Am. Ceramic Soc. Bull. Sixty-Fifth Annual Meeting 42, No. 4, 215 (Apr. 1963).
5456. Magnetic susceptibilities and dilution effects in low-spin  $d^4$  complexes: osmium (IV), R. B. Johannesen and G. A. Candela. Inorg. Chem. 2, 67-72 (Feb. 1963).
5457. Magnetically retained evaporation mask, F. E. Jones and A. B. Castle. Sr. Rev. Sci. Instr. 34, No. 9, 1055 (Sept. 1963).
5458. Maintenance of electrical units at the National Bureau of Standards, R. D. Cutkosky and R. L. Driscoll. Comité Consult. d'Elec. B.I.P.M., 9th Session, Oct. 1961, p. 33-35 (May 1963).
5459. Mass spectra and metastable transitions of  $H_2S$ ,  $HDS$ , and  $D_2S$ , V. H. Dibeler and H. M. Rosenstock. J. Phys. Phys. 39, No. 11, 3106-3111 (Dec. 1, 1963).
5460. Mass spectrometric study of the recombination of bromine and chlorine atoms on Pyrex, J. T. Herron. J. Phys. Chem. 67, No. 12, 2864-2865 (Dec. 1963).
5461. Mathematical programming models for selection of diets to minimize weighted radionuclide intake, H. J. Bracken. Environmental Health Series: Radiological Health, Public Health Serv. Publ. 999-R-4 (Dept. Health, Education, and Welfare, Washington, D. C., Aug. 1963).
5462. Mathematics and experimental science, W. J. Youden. Sci. Teacher 30, No. 5, 23-26 (Sept. 1963).
5463. Maximum efficiency of a two-arm waveguide junction, R. W. Beatty. IEEE Trans. Microwave Theory Tech. 11, No. 1, 94 (Jan. 1963).
5464. Mean first passage times and the dissociation of diatomic molecules, K. E. Shuler and G. Weiss. J. Chem. Phys. 38, No. 2, 505-509 (Jan. 1963).
5465. Measurement of a maximum in the isothermal crystallization rate-temperature curve for polypentene-1, F. A. Quinn, Jr., and J. Powers. J. Polymer Sci. B1, No. 7, 341-344 (July 1963).
5466. Measurement of moisture boundary layers and leaf transpiration with a microwave refractometer, D. M. Gates, J. Vetter, and M. C. Thompson. Nature 197, 1070-1072 (Mar. 1963).
5467. Measurement of the cross section for elastic scattering of slow electrons by hydrogen atoms, W. L. Wiese. Proc. Vth Intern. Conf. Ionization Phenomena in Gases, Paris, France, 1963, I, 5-8 (July 1963).
5468. Measurement of the lattice constants of neon isotopes in the temperature range 4-24°K, L. H. Bolz and F. A. Mauer. (Proc. 11th Annual Conf. Applications of X-ray Analysis, Denver Res. Inst., Denver, Colo.), Book, Advances in X-ray Analysis 6, 242-249 (Plenum Press Inc., New York, N. Y., 1963).
5469. Unassigned.
5470. Measuring plasma density of the magnetosphere, K. L. Bowles. Science 139, No. 3553, 389-391 (Feb. 1, 1963).
5471. Mechanical and electrical relaxation in  $ThO_2$  containing  $CaO$ , J. B. Wachtman, Jr. Phys. Rev. 131, No. 2, 517-527 (July-Sept. 1963).
5472. Mechanical properties of glass at elevated temperatures, M. J. Kerper and T. G. Scuderi. Bull. Am. Ceram. Soc. 42, No. 12, 735-740 (Dec. 1963).
5473. Metallurgical microanalysis with the electron probe, Cuthill, Jr., L. L. Wyman, and H. Yakowitz. J. Metals 15, No. 10, 736-768 (Oct. 1963).
5474. Metastable levels in the continuum and the independent particle model, F. Prat and U. Fano. Proc. III Intern. Conf. Physics of Electronics and Atomic Collisions, London, England, pp. 600-605 (July 22-26, 1963).
5475. Metastable transitions in mass spectra of methane and the deuteromethanes, V. H. Dibeler and H. M. Rosenstock. J. Chem. Phys. 39, 1326 (1963).
5476. Method for comparing two nearly equal potentials directly in parts per million, C. J. Saunders. Rev. Sci. Instr. 34, No. 12, 1452-1453 (Dec. 1963).
5477. Method for finding the density expansion of transport coefficients of gases, R. Zwanig. Phys. Rev. 129, No. 1, 486-494 (Jan. 1963).
5478. Methods for the analysis of cement, B. L. Bean. Handb. Analytical Chemistry, Sect. 13, p. 73-75 (McGraw-Hill Book Co. Inc., New York, N. Y., Mar. 1963).
5479. Methods for the analysis of rubber and related products, M. Tryon and E. Horowitz. Analytical Chemistry Handb. Sec. 13, p. 233-256 (McGraw-Hill Book Co., Inc., New York, N. Y., 1963).
5480. Methods of calibration of airglow photometers at Fritz Peak Observatory, L. L. Smith and R. B. Alexander. IQSY Instruction Manual. No. 5: Airglow, Pt. II, p. 25-36 (IQSY Secretariat, London, England, 1963).
5481. Methods of testing, F. Ogburn. Book, Modern Electroplating, p. 661-697 (John Wiley and Sons, Inc., New York, N. Y., 1963).
5482. Metrology as related to microminiaturization processes, T. R. Young. Proc. Microminiaturization Congress, New York, N. Y., Mar. 10-13, 1962 (American Watchmakers Inst., New York, N. Y., Mar. 1963).
5483. Microbalance techniques for high temperature application. Further developments, N. J. Carrera and R. F. Walker. Book, Vacuum Microbalance Techniques 3, 153-177 (Plenum Press, Inc., New York, N. Y., 1963).
5484. Microscopy of color phenomena in polymer fracture, S. B. Newman and I. Wolock. Proc. Symp. Adhesion and Cohesion, p. 218-239 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1963).
5485. Microwave spectrum and structure of difluoramine, D. R. Lide. Jr. J. Chem. Phys. 38, No. 2, 456-460 (Jan. 1963).
5486. Microwave spectrum of aluminum monofluoride, D. R. Lide, Jr. J. Chem. Phys. 38, No. 8, 2027 (Apr. 1963).
5487. Microwave spectrum of tertiary butyl chloride; a comparison of tertiary butyl structures,

- D. R. Lide, Jr., and M. Jen, J. Chem. Phys. 38, No. 7, 1504-1507 (Apr. 1963).
5488. Microwave standards and measurements, a progress review 1960-1963, R. W. Beatty, IEEE Trans. Instr. Meas. 10-12, No. 3, 134-138 (Dec. 1963).
5489. Millimeter wave research at the National Bureau of Standards, R. W. Zimmerman, Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29, 1961, p. A109-A112 (Raton, Communications and Electronics Foundation, 1963).
5490. Millimeter wavelength resonant structures, R. W. Zimmerman, M. V. Anderson, Y. Beers, and G. L. Strine, IEEE Trans. Microwave Theory and Tech. MTT-11, No. 2, 142-149 (Mar. 1963).
5491. Minutes of the meeting at Tokyo, Japan, of the triple commission for spectroscopy, C. E. Moore, Sept. 9, 1962, J. Opt. Soc. Am. 53, No. 7, 883-893 (July 1963).
5492. Modular groups of  $t \times t$  matrices, M. Newman and J. R. Smart, Duke Math. J. 30, 253-257 (1963).
5493. Molecular vib-rotors. The theory and interpretation of high resolution infrared spectra, H. C. Allen, Jr., and P. C. Cross, Book, (John Wiley and Sons, Inc., New York, N.Y., 1963).
5494. Momentum autocorrelation functions and energy transport in harmonic crystals containing isotopic defects, R. J. Rubin, Phys. Rev. 131, No. 3, 964-989 (Aug. 1, 1963).
5495. Monte Carlo calculations of the penetration and diffusion of fast charged particles, M. J. Berger, Book, Methods in Computational Physics, Ed. B. Alder, S. Fernbach, and M. Rotenberg, I, 135-215 (Academic Press Inc., New York, N. Y., 1963).
5496. Multipliers of difference sets, M. Newman, Can. J. Math. 15, 121-124 (Nov. 1963).
5497. NBS activities for the American Rubber Industry, G. M. Kline, L'Industria della Gomma VII, No. 6, 29-33 (June 1963).
5498. NBS microcopy resolution test chart, B. H. Fouquet, Proc. National Microfilm Association Meeting, San Francisco, Calif., Apr. 30-May 1, 1963, p. 67-74 (1963).
5499. Natural and synthetic rubbers, E. J. Parks and F. J. Linnig, Anal. Chem. 35, No. 5, 160R-178R (Apr. 1963).
5500. Natural electromagnetic field fluctuations in the 3.0 to 0.02 cps range, W. H. Campbell, Proc. IEEE 51, No. 10, 1337-1342 (Oct. 1963).
5501. New absolute null method for the measurement of magnetic susceptibilities in weak low-frequency fields, C. T. Zahn, Rev. Sci. Instr. 34, No. 3, 285-291 (Mar. 1963).
5502. New autoionizing atomic energy levels in He, Ne and Ar, R. P. Madden and K. Codling, Phys. Rev. Letters 10, No. 12, 516-518 (June 15, 1963).
5503. Nickel and alloys, M. R. Meyerson, Encyclopedia of Engineering Materials and Processes, p. 439-442 (Reinhold Publ. Corp., New York, N. Y., 1963).
5504. Nightglow, F. E. Roach, Adv. Electron. Electron Phys. 18, 1-44 (1963).
5505. 1963 time and frequency constant, W. D. George, Frequency Letter 1, 3 (Jan.-Feb. 1963).
5506. Nitrogen NMR chemical shifts, in the azide ion, R. A. Forman, J. Chem. Phys. 39, No. 9, 2393 (Nov. 1, 1963).
5507. Noise in VLF to HF bands and prediction of communication reliability, W. Q. Crichlow, Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29, 1961, p. A67-A70 (Raton, Communications and Electronics Foundation, 1963).
5508. Non-linear effects in spectra of the iron group, R. Treas, Phys. Rev. 129, No. 3, 1220-1224 (Feb. 1, 1963).
5509. Nonreciprocity of propagation of VLF radio waves along the magnetic equator, D. D. Crombie, Proc. IEEE 51, No. 4, 617-618 (Apr. 1963).
5510. Normal congruence subgroups of the modular group, M. Newman, Am. J. Math. 85, No. 3, 419-427 (1963).
5511. Normal congruence subgroups of the  $t \times t$  modular group, M. Newman, Bull. Am. Math. Soc. 69, No. 5, 719-720 (Sept. 1963).
5512. Normal functions, the Montel property, and interpolation in  $H^{\infty}$ , G. T. Cargo, Michigan Math. J. 10, 141-146 (1963).
5513. Note on a subgroup of the modular group, M. Newman and J. R. Smart, Proc. Am. Math. Soc. 14, No. 1, 102-104 (Feb. 1963).
5514. Note on observations on reference electrodes for fused salt systems, M. A. Reid and J. A. Lloyd, Rev. Sci. Instr. 34, No. 8, 940-941 (Aug. 1963).
5515. Note on the 4-body system, T. Stovall and M. Danos, Physics Letters 7, No. 4, 278-281 (Oct. 23, 1963).
5516.  $\nu_3$  vibration of methane in condensed oxygen, nitrogen, S. Abramowitz and H. P. Broida, J. Chem. Phys. 39, No. 9, 2383-2384 (Nov. 1, 1963).
5517. Nuclear magnetic resonance in metal powders at low temperatures, R. J. Snodgrass and L. H. Bennett, J. Appl. Spectry. 17, No. 2, 53-54 (1963).
5518. Nuclear moment of  $Ni^{41}$  from nuclear resonance studies in steady external magnetic fields, R. L. Streever, Phys. Rev. Letters 10, No. 6, 232-234 (Mar. 1963).
5519. Nuclear orientation, E. Ambler, Book, Methods of Experimental Physics 5, Sec. 2.4-2.3. 162-214 (Academic Press Inc., New York, N. Y., 1963).
5520. Nuclear Physics Section, L. F. Curtiss, Editor, 8, p. 8-1-8-327, American Institute of Physics Handb. 2d edition (1963).
5521. Nuclear resonance and the hyperfine field in dilute alloys of nickel in iron, R. L. Streever, L. H. Bennett, R. C. LaForce, and G. F. Day, J. Appl. Phys. Suppl. Magnetism 34, No. 4, Pt. 2, 1050-1051 (Apr. 1963).
5522. Numerical computation of time-dependent properties of isotopically disordered one-dimensional harmonic crystal lattices, R. J. Rubin, J. Phys. Soc. Japan 18, Suppl. II, 63-69 (1963).
5523. Numerical solutions of the convolution-hypernetted chain integral equation for the pair correlation function of a fluid. II. The hard sphere potential, M. Klein, J. Chem. Phys. 39, No. 6, 1388-1397 (Sept. 15, 1963).
5524. Numerical solutions of the convolution-hypernetted chain integral equation for the pair correlation function of a fluid. I. The Lennard-Jones (12-6) potential, M. Klein and M. S. Green, J. Chem. Phys. 39, No. 6, 1367-1387 (Sept. 15, 1963).
5525. Oblique incidence pulse measurement at 100 kc, R. H. Dougherty, AGARDograph 74, Propagation of Radio Waves at Frequencies Below 300 Kilocycles, p. 133-148 (Pergamon Press Inc., New York, N. Y., 1963).
5526. Observation on reference electrodes for fused-salt systems, M. A. Reid and J. A. Lloyd, Rev. Sci. Instr. 34, No. 8, 940-941 (Aug. 1963).
5527. Observations on dislocation loops in deformed copper, A. W. Ruff, Jr., and L. M. Kushner.

- Proc. Conf. Relations Between the Structure and Mechanical Properties of Metals, National Physical Lab., Teddington, Middlesex, England, 1, 146-156 (1963).
5528. Observations of synchrotron radio noise at the magnetic equator following the high altitude nuclear explosion of July 9, 1962, G. R. Ochs, D. T. Farley, Jr., K. L. Bowles, and P. Bandyopadhyay, *J. Geophys. Res.* 68, No. 3, 701-711 (Feb. 1963).
5529. On an extreme rank sum test for outliers, W. A. Thompson and T. A. Willke, *Biometrika* 50, No. 3 and 4, 375-383 (Dec. 1963).
5530. On the connection between the theories of collisions and of atomic spectra, U. Fano and F. Prats, *Proc. Natl. Acad. Sci., India XXXIII*, Pt. IV, 553-562 (1963).
5531. On the dependence of absorption coefficients upon the area of the absorbent material, E. D. Daniel, *J. Acoust. Soc. Am.* 35, No. 4, 571-573 (Apr. 1963).
5532. On the effect of solar disturbances on the low-radiofrequency ionosphere reflection process, J. R. Johler and J. D. Harper, Jr. (North Atlantic Treaty Organization. Advisory Group for Aeronautical Research and Development. Avionics Panel. 6th Symp. Ionospheric Research Committee, AGARD, Naples, Italy, 1961). Book, *The Effect of Disturbances of Solar Origin on Communications*, Ed. G. J. Gassman, pp. 303-304 (Pergamon Press, Inc., New York, N. Y., 1963).
5533. On the growth of helical dislocations, R. DeWit, *Trans. AIME* 227, 1443-1452 (Dec. 1963).
5534. On the isomerization of isobutyl radicals, J. R. McNesby and W. M. Jackson, *J. Chem. Phys.* 38, No. 3, 692-693 (Feb. 1963).
5535. On the interpretation of prominence spectra. VI. Temperature determination and a model for quiescent prominences, J. T. Jefferies and F. Q. Orrall, *Astrophys. J.* 137, No. 4, 1232-1241 (May 15, 1963).
5536. On the nature of the crystal field approximation. II. Numerical results, R. T. Berger and C. M. Herzfeld, *J. Chem. Phys.* 39, No. 4, 1122-1126 (Aug. 15, 1963).
5537. On the production of the  $Z^-$  ( $\bar{H}$ ) baryon, H. J. Lipkin, C. A. Levinson, and S. Meshkov, *Physics Letters* 7, No. 2, 159-161 (Nov. 1, 1963).
5538. On the propagation of long wave-length terrestrial radio waves--two theoretical techniques, J. R. Johler and L. A. Berry, AGARDograph 74, *Propagation of Radio Waves Below 300 Kilocycles*, p. 101-129 (Pergamon Press Inc., New York, N. Y., 1963).
5539. On the redefinition of the second and the velocity of light, G. E. Hudson and W. Atkinson, *IEEE Trans. Instr. Meas.* IM-12, No. 1, 44-46 (June 1963).
5540. Unassigned.
5541. On the three-particle scattering operator in classical gases, J. Weinstock, *Physics Letter* 3, No. 6, 260-262 (Amsterdam, The Netherlands, Feb. 1, 1963).
5542. On the vacuum ultraviolet reflectance of evaporated aluminum before and during oxidation, R. P. Madden, L. R. Canfield, and G. Haas, *J. Opt. Soc. Am.* 53, No. 5, 620-625 (May 1963).
5543. One man's opinion--a common language (nomenclature for rubbers), R. D. Stiehler, *Rubber World* 148, No. 3, 119 (June 1963).
5544. 1,2,2-trifluorovinyl phenyl ether and 2,3,4,5,6-pentafluorophenyl 1,2,2-trifluorovinyl ether and their polymers, W. J. Pummer and L. A. Wall, *SPE Trans.* 3, No. 3, 220-224 (July 1963).
5545. One year trial for new voltmeter standards, C. Stansburg, *Mag. Std.* 34, No. 8, 240-241 (Aug. 1963).
5546. Opening angles of electron-positron pairs, H. Olsen, *Phys. Rev.* 131, No. 1, 406-415 (July 1, 1963).
5547. Optical observations of pressures induced in polymers, A. VanValkenberg and J. Powers, *J. Appl. Phys.* 34, No. 8, 2433-2434 (Aug. 1963).
5548. Optical studies of the formation and breakdown of passive films formed on iron single crystal surfaces in inorganic inhibitor solutions, J. Kruger, *J. Electrochem. Soc.* 110, No. 6, 654-663 (June 1963).
5549. Optical T-bench method for measurement of optical path difference, F. E. Washer and W. R. Darling, *SPE J.* 1, No. 6, 211-217 (Aug.-Sept. 1963).
5550. Optimum estimators, of the parameters of negative exponential distributions from one or two order statistics, M. M. Siddiqui, *Ann. Math. Stat.* 34, No. 1, 117-121 (Mar. 1963).
5551. Osmotic and activity coefficients, of tetra-ethylammonium iodide in aqueous solution at 25°, R. W. Bower and R. A. Robinson, *Trans. Faraday Soc.* 59, No. 488, 1717-1719 (Aug. 1963).
5552. Ozone and sunspots, M. W. Haurwitz and J. London, *J. Geophys. Res.* 68, No. 3, 795-801 (1963).
5553. Packing inequalities for circles, P. J. Davis, *Michigan Math. J.* 10, 25-31 (1963).
5554. Parable of the fisherman, W. J. Youden, Editorial, *Phys. Teacher* 1, No. 3, 120-121 (Sept. 1963).
5555. Path antenna gain and comments on "properties of 400 mcs long-distance tropospheric circuits", W. J. Hartman, *Proc. IEEE Correspondence Section* 51, No. 5 847-848 (May 1963).
5556. Penetration of protons, alpha particles, and mesons, U. Fano, *Ann. Rev. Nuclear Sci.* 13, 1-66 (Dec. 1963).
5557. Performance of the barium fluoride film hygrometer element on radiosonde flights, F. E. Jones, *J. Geophys. Res.* 68, No. 9, 2735-2751 (May 1, 1963).
5558. Periodic heat flow in a hollow cylinder rotating in a furnace with a viewing port, B. A. Peavy and A. G. Eubanks, (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1963), *Natl. Aeron. and Space Admin. SP-31, Session V, Paper 56*, p. 553-564 (Dec. 1963).
5559. Perlite for cryogenic insulation, R. H. Kropschot and R. W. Burgess, *Advan. Cryog. Eng.* 8, Paper G-7, 425-436 (1963).
5560. Phase instability in a tropospheric relay link, E. C. Barrows, *Program and Digest 1963 IEEE Prof. Group. Ant. and Prop. Symp. Space Telecommunications*, July 9-11, 1963, Boulder, Colo., p. 52-55 (1963).
5561. Photodisintegration of light nuclei, E. Hayward, *Mod. Phys.* 35, No. 2, 324-331 (Apr. 1963).
5562. Photographic dosimetry, megareöntgen range, W. L. McLaughlin, *Encyclopedia of X-rays and Gamma Rays*, ed. G. L. Clark, p. 307-309 (Rheinhold Publ. Corp., New York, N. Y., 1963).
5563. Photographic, megareöntgen range, W. L. McLaughlin, *Encyclopedia of X-rays and Gamma Rays*, Ed. G. L. Clark, p. 307-309 (Rheinhold Publ., New York, N. Y., 1963).

5564. Photometric observations of the airglow during the IQSY, P. E. Roach. IQSY Instruction Manual. No. 5 Airglow, Pt. 1, 1-24 (IQSY Secretariat, London, England, 1963).
5565. Physical measurements and experiment design, W. J. Youden. (Colloq. Intern. Centre Natl. Recherche Sci., Aug.-Sept. 1961), Book, Le Plan d'Experiences, No. 100, p. 115 (Centre National de la Recherche Scientifique, Paris, France, 1963).
5566. Pitfalls in thermal emission studies, W. N. Harrison. (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1962). Natl. Aeron. and Space Admin. SP-31, Session 1, Paper 1, p. 3-10 (1963).
5567. Planar twin boundary in aluminum, T. H. Orem. Trans. Met. Soc. AIME 227, 786-788 (June 1963).
5568. Plasma oscillations with collective correlations, C. M. Tchen. Proc. 6th Intern. Conf. Ionization Phenomena in Gases, Paris, France, July 8-13, 1963, I, 195-199 (P. Hubert Assoc. EURATOM-CEA Centra-d-Etudes Nucleaires de Fontenay-aux-Roses, Paris, France, 1963).
5569. Plasma resonances in the upper ionosphere, W. Calvert and G. B. Goe. J. Geophys. Res. 68, No. 22, 6113-6120 (Nov. 15, 1963).
5570. Plastics, G. M. Kline. Americana Annual, p. 535 (Americana Corp., Chicago, Ill., 1963).
5571. Plating specifications, F. Ogburn. Electroplaters Process Control Handb. Ed. D. G. Foulke and F. E. Crane, Jr., Chapt. 17, p. 406-407 (Reinhold Publ. Co., New York, N. Y., 1963).
5572. Pointwise in the first biharmonic boundary value problem, J. H. Bramble and L. E. Payne. J. Math. Phys. 42, No. 4, 278-286 (Dec. 1963).
5573. Polymer research at the U.S. National Bureau of Standards, G. M. Kline. Part I. Polymery VII, No. 12, 444-452 (Dec. 1962), SPE J. 19, No. 3, 278-283 (Mar. 1963).
5574. Polymer research at the U.S. National Bureau of Standards, G. M. Kline. Part 2, SPE J. 19, No. 4, 403-408 (Apr. 1963).
5575. Polymers and telomers of 4-chloroperfluoroheptadiene-1,6, J. E. Fearn and L. A. Wall. SPE Trans. 3, No. 3, 231-234 (July 1963).
5576. Polymorphism of silver iodide, G. Burley. Am. Mineralogist 48, 1266-1276 (Nov.-Dec. 1963).
5577. Polymorphism in isopropyl alcohol, G. S. Ross, H. L. Dixon, L. Frolen, and D. J. Termini. Science 141, No. 3585, 1043-1044 (Sept. 1963).
5578. Polymorphism of silver iodide, G. Burley. Am. Mineralogist 48, 1266-1276 (Nov.-Dec. 1963).
5579. Polysulfide sealants, Part I, Formulation and application properties, D. A. George, L. A. Dunlap, and P. Stone. Adhesives Age 6, No. 2, 32-36 (Feb. 1963).
5580. Polysulfide sealants, Part II, Service properties of 28 formulations, D. A. George, F. Roth, and P. Stone. Adhesives Age 6, No. 3, 35-39 (Mar. 1963).
5581. Portable 2 flow counter for the detection of  $\alpha$  and  $\beta$  particles in smear samples, L. Costrell, A. Schwebel, and G. W. Zimmer. Health Phys. 9, No. 6, 643 (June 1963).
5582. Prebunching in electron linacs, J. E. Leiss. Proc. Conf. Proton Linear Accelerators, Yale Univ., New Haven, Conn., p. 267-273 (Oct. 1963).
5583. Precision of methods for measuring tensile strength, stretch, and tensile energy absorption of paper, T. W. Lashof. Tappi 46, No. 1, 52-59 (Jan. 1963).
5584. Precision of simultaneous measurement procedures, W. A. Thompson, Jr. J. Am. Stat. Assoc. 58, No. 302, 474-479 (June 1963).
5585. Predicting the performance of tropospheric communication links singly and in tandem, A. D. Barsis, K. A. Norton, and P. L. Rice. Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29 1961, p. A71-A104 (Raton, Communications and Electronics Foundation, 1963).
5586. Preface to special issue on Electromagnetic Waves in the Earth, J. R. Wait. IEEE Trans. Ant. Prop. AP-11, 206 (May 1963).
5587. Preparation of latent slides, L. S. Taylor. Health Phys. J. 9, No. 10, 1009-1011 (Oct. 1963).
5588. Present status of our knowledge of atomic transition probabilities, W. L. Wiese. Book, Proc. Xth Colloquium Spectroscopicum Internationale, Ed. E. R. Lippincott and M. Margoshes, p. 37-56 (Spartan Books, Wash. D. C., 1963).
5589. Pressure broadening as a prototype of relaxation, U. Fano. Phys. Rev. 131, No. 1, 259-268 (July 1, 1963).
5590. Pressure-density-temperature relations of freezing liquid parahydrogen to 350 atmospheres, R. D. Goodwin and H. M. Roder. Cryogenics 3, No. 1, 12-15 (Mar. 1, 1963).
5591. Pressure induced shifts of infrared lines due to polar molecules, E. K. Plyler, M. A. Hirschfeld, and J. H. Jaffe. J. Chem. Phys. 38, No. 1, 257-258 (Jan. 1963).
5592. Pressure measurements in cryogenic systems, P. Smelser. Advan. Cryog. Eng. 8, Paper P-7, 378-386 (1963).
5593. Primary processes in the photolysis of ethyl nitrate, R. E. Rebertus. J. Phys. Chem. 67, No. 9, 1923-1925 (Sept. 1963).
5594. Problems and prospects in electrical properties of materials, J. L. Dalke. Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29, 1961, p. D7-D14 (Raton Communications and Electronics Foundation, 1963).
5595. Problems in the application of norms of external radiation, L. S. Taylor. Symp. Personnel Dosimetry Techniques for External Radiation, Madrid, Spain, Apr. 1-5, 1963, p. 35-47 (1963).
5596. Proceedings of the Xth colloquium spectroscopicum internationale, E. R. Lippincott and M. Margoshes, Editors. Spartan Books, Wash. D. C. (1963).
5597. Profiles of Stark broadened Balmer lines in a hydrogen, W. L. Wiese, D. Paquette, and J. E. Solarski. Phys. Rev. 129, No. 3, 1225-1232 (Feb. 1963).
5598. Programmed maneuver-spectrum fatigue test of aircraft beam specimens, L. Mordfin and N. Halsey. Am. Soc. Testing Mater. Spec. Tech. Publ. 338, 251-272 (1963).
5599. Projection X-ray microscopy of roofing materials, S. B. Newman and S. H. Greenfield. Mater. Res. Std. 3, No. 11, 893-898 (Nov. 1963).
5600. Properties of a silica-reinforced polymer for dental restorations, R. L. Bowen. J. Am. Dental Assoc. 66, No. 1, 57-64 (Jan. 1963).
5601. Properties of semiconductors, H. P. R. Frederikse. American Institute of Physics Handb. 2d edition, Sect. 9e, p. 9-45-9-63 (1963).
5602. Proposed experiment to measure effects of roughness on the dose rate from fallout radiation, C. Eisenhauer. Heal 9, 503-506 (1963).

5603.  $P$ - $T$  values for néon from  $27^\circ$  to  $300^\circ\text{K}$  for pressures to 200 atmospheres using corresponding states theory, R. D. McCarty, R. B. Stewart, and K. D. Timmerhaus. *Advan. Cryog. Eng.* 8, Paper C-3, 135-145 (1963).
5604. Q meter measurements up to 260 MHz, M. G. Broadhurst. (Proc. Conf. Electric Insulation), 1963 Annual Report Natl. Acad. Sci.-Natl. Res. Council Publ. 1141, p. 77-80 (1963).
5605. Quadrupole coupling constants from the microwave spectrum of hydrazoic acid, R. A. Forman and D. R. Lide, Jr. *J. Chem. Phys.* 39, No. 4, 1133-1134 (Aug. 15, 1963).
5606. Quantitative metallographic evaluations of graphitic microstructures, L. L. Wyman and G. A. Moore. *Modern Castings* AFS 43, No. 1, 7-16 (Jan. 1963).
5607. Quantities and units for dosimetry in diagnostic radiology, H. O. Wyckoff. *Symp. under the auspices of the Division of Radiological Health, U. S. Public Health Service, Wash., D. C., Reduction of Patient Dosage from Diagnostic Radiology*, Ed. M. L. Janover, p. 5-9 (Charles C. Thomas Publ., Springfield, Ill., 1963).
5608. Quasi-equilibrium theory of mass spectra, H. M. Rosenstock and M. Krauss. *Book, Mass Spectrometry of Organic Ions*, p. 1-64 (Academic Press Inc., New York, N. Y., 1963).
5609. Radial distribution study of vitreous borium borosilicate, G. J. Piermarini and S. Block. *Book, Advances in Glass Technology*, Pt. 2, p. 44-46 (Plenum Press Inc., New York, N. Y., 1963).
5610. Radiation and the world we live in, L. S. Taylor. *Radiology* 80, No. 3, 358-368 (Mar. 1963).
5611. Radiation detectors, L. Costrell. *Science* 139, No. 3558, 899 (Mar. 8, 1963).
5612. Radiation effects on man, L. S. Taylor. *Nucleonics* 21, No. 3, 58-60 (Mar. 1963).
5613. Radiation impedance of a source near reflectors, R. V. Waterhouse, J. Acoust. Soc. Am. 35, No. 8, 1144-1151 (Aug. 1963).
5614. Radiation-induced polymerization at high pressures, L. A. Wall and D. W. Brown. *J. Polymer Sci. C2*, No. 4, 1151-1160 (1963).
5615. Radiation-induced polymerization of high pressure of *n*-tetradecafluoroheptene-1: 1,1,2-trifluorovinyl phenyl ether; and 1,2,3,4,5-pentafluorophenyl 1,1,2-trifluorovinyl ether, D. W. Brown and L. A. Wall. *SPE Trans.* 3, No. 4, 300-308 (Oct. 1963).
5616. Radiation-induced polymerization of propylene at high pressure, D. W. Brown and L. A. Wall. *J. Phys. Chem.* 67, No. 5, 1016-1019 (May 1963).
5617. Radiation transfer problems in the rocket ultra-violet lines, C. Pecker and R. N. Thomas. *J. Quant. Spectry. Radiative Transfer* 3, No. 2, 163-165 (June 1963).
5618. Radio astronomy, L. M. Branscomb. *American Institute of Physics Handb.* 2d edition, p. 6-229--2-231 (1963).
5619. Radio noise anomalies in August 1958, C. A. Samson. *J. Geophys. Res.* 68, 2719-2726 (May 1, 1963).
5620. Radio propagation quality in, the North Atlantic Area 1953-1960, M. E. Nason. *AGARDograph* 59, *The Effect of Disturbances of Solar Origin on Communications*, ed. G. J. Gassmann, p. 287-291 (Pergamon Press Inc., London, England, 1963).
5621. Radio spectrum of SiH<sub>4</sub>, H. E. Radford and M. Linzer. *Phys. Rev. Letters* 10, No. 10, 443-444 (May 1963).
5622. Radio star scintillations and spread-F echoes, H. J. A. Chivers. *J. Atmospheric and Terrest. Phys.* 25, No. 8, 468-473 (Aug. 1963).
5623. Radio wave reflections at a continuously stratified plasma with collisions proportional to energy and arbitrary magnetic induction, J. R. Johler. *Proc. Intern. Conf. Ionosphere*, London, 1962, p. 436-445 (Institute of Physics and the Physical Society, London, England, 1963).
5624. Radiolysis of methane, P. J. Ausloos and S. G. Lias. *J. Chem. Phys.* 38, No. 9, 2207-2214 (May 1, 1963).
5625. Radiolysis of propane- $d_4$  in the presence of organic compounds other than hydrocarbons, I. B. Sandoval and P. J. Ausloos, *J. Chem. Phys.* 38, No. 10, 2454-2460 (May 15, 1963).
5626. Radiometry, M. M. Reynolds, R. J. Corruccini, M. M. Fuik and R. M. Burley. *American Institute of Physics Handb.* 2d edition, Sect. 6K, p. 6-153-6-172 (1963).
5627. Radiowave scattering in the ionosphere, K. L. Bowles. *Advan. Electron. Electron Phys.* 19, 55-176 (1963).
5628. Ranking laboratories by round-robin tests, W. J. Youden. *Mater. Res. Std.* 3, No. 1, 9-13 (Jan. 1963).
5629. Reaction rates for the formation of  $\text{He}_2^+$  and  $\text{Ne}_2^+$ , E. C. Beatty and P. L. Patterson. *Book, Comptes Rendus de la VI<sup>e</sup> Conference Internationale sur les Phenomenes D'Ionisation dans les Gaz*, ed. P. Hubert and E. Cremieu-Alcan III, 289-293 (S.E.R.M.A., Publ. Co., Paris, France, 1963).
5630. Recent advances in cryogenic engineering, *Cryogenic Engineering Laboratory*, NBS, Boulder, Chemistry 36, 8-15 (Oct. 1963).
5631. Recent developments in neutron source standardization, R. S. Caswell, R. H. Noyce, S. B. Garfinkel, and E. R. Mosburg, Jr. (Proc. *Symp. Neutron Detection, Dosimetry and Standardization International Atomic Energy Agency, Atomic Energy Research Establishment*, Harwell, England, Dec. 10-14, 1962), *Book, Neutron Dosimetry II* 547-555 (International Atomic Energy Agency, Vienna, 1963).
5632. Recent progress in cryogenic engineering, R. B. Scott. *Proc. Mountain States Navy Research and Development Clinic*, Raton, N. M., Sept. 28-29, 1961, p. D1-D4 (Raton, Communications and Electronics Foundation, 1963).
5633. Regulation of ionization gauge emission current to better than 0.05%, K. W. Yee and R. J. Carpenter. *Rev. Sci. Instr.* 34, No. 10, 1101-1103 (Oct. 1963).
5634. Relation of partial (110) pole figures, to thickness and microstructure of electrodeposited copper, F. Ogburn and C. J. Newton. *J. Electrochem. Soc.* 110, No. 11, 1148-1150 (Nov. 1963).
5635. Relation of solar active regions at central meridian passage to ionospheric disturbance, C. S. Warwick and J. V. Lincoln. *AGARDograph* 59, *The Effect of Disturbances of Solar Origin on Communications*, ed. G. J. Gassmann, p. 229-233 (Pergamon Press Inc., London, England, 1963).
5636. Remarks on coincidence experiments with visible light, Z. Bay and P. S. Farago. *Proc. Royal Soc. Edinburgh, Sec. A (Math. and Phys. Sci.)* LXVI, Pt. 11, No. 10, 111-115 (Royal Society of Edinburgh, Edinburgh, Scotland, 1963).

5637. Remarks presented at panel discussion on modulation, J. L. Auterman. Proc. Mountain States Navy Research and Development Clinic, Raton, N. M. Sept. 28-29, 1961, p. A131-A132 (Raton, Communications and Electronics Foundation, 1963).
5638. Report of Committee E-2 on Emission Spectroscopy, R. E. Michaelis. Am. Soc. Testing Mater. Proc. 63, 456 (1963).
5639. Report on standard samples, reference samples, reference samples, and high-purity materials for spectrochemical analysis, R. E. Michaelis. ASTM Spec. Tech. Publ. 58-E (1963).
5640. Report on sugars and sugar products, E. J. McDonald. J. Assoc. Official Agri. Chem. 46, 35 (1963).
5641. Required signal-to-noise ratios, carrier power, and bandwidth to achieve a given performance for multichannel radio communication systems, E. F. Florman and J. J. Tary. Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29, 1961, p. A135-A140 (Raton, Communications and Electronics Foundation, 1963).
5642. Requirement for a Solar Observatory within the National Bureau of Standards, Radio and Radar Astronomy Report of the Committee on Science and Astronautics, C. G. Little. U.S. House of Representatives, Eighty-Seventh Congress, 2d Session, December 12, 1962, p. 12-19 (Wash. D. C., 1963).
5643. Residual range and range rate errors due to the troposphere, E. C. Barrows. Proc. Conf. Tropospheric Refraction (Dec. 1963).
5644. Resonography with 8-A X-rays, S. B. Newman. (Symp. Resonographic Methods), Am. Soc. Testing Mater. Spec. Tech. Publ. No. 348 (1963).
5645. Resurgence of solar and geomagnetic activity in September and October 1963, A. H. Shapley. IQSY Notes 5, 10 (Dec. 1963).
5646. Review of mode theory of radio propagation in terrestrial waveguides, J. R. Wait. Revs. Geophys. 1, No. 4, 481-505 (Nov. 1963).
5647. Review of recent developments of high temperature thermocouples, P. D. Freeze. Am. Soc. Mech. Engrs. Paper No. 63-WA-212 (Nov. 1963).
5648. Review of reviews of atomic spectroscopy, W. F. Meggers. Appl. Opt. 2, No. 7, 657-663 (July 1963).
5649. Rotation-vibration constants of acetylene, E. K. Plyler, E. D. Tidwell, and T. A. Wiggins. J. Opt. Soc. Am. 53, No. 5, 589-593 (May 1963).
5650. Rotational, vibrational, and electronic energy transfer in the fluorescence of nitric oxide, H. P. Broida and T. Carrington. J. Chem. Phys. 38, No. 1, 136-147 (Jan. 1963).
5651. Rubber and rubber products, W. P. Tyler and M. Tryon. Book, Industrial and Natural Products and Noninstrumental Methods, 6th Ed., Standard Methods of Chemical Analysis IIB Chapt. 43, p. 2146-2226 (D. Van Nostrand Co., Inc., New York, N.Y., 1963).
5652. Scheme for obtaining integral and fractional multiples of a given radiance, D. E. Erminy. J. Opt. Soc. Am. 53, 1448-1449 (Dec. 1963).
5653. Scientific information activities at the National Bureau of Standards, W. R. Tilley. (53d Special Libraries Assoc. Conv., Metals Division, May 29, 1962, Wash., D. C.), Spec. Lib. p. 29-34 (Jan. 1963).
5654. Shear strength of beams without web reinforcement containing deformed bars of different yield strengths, R. G. Mathey and D. Watstein. J. Am. Concrete Inst. 60 (Title No. 60-13), No. 2 183-207 (Feb. 1963).
5655. Search for a slow component in alpha ionization, Z. Bay and R. M. Pearlstein. Phys. Rev. 130, No. 1, 223-227 (Apr. 1963).
5656. Shifts and widths of some stark broadened oxygen lines in an arc plasma, W. L. Wiese and P. W. Murphy. Phys. Rev. 131, No. 5, 2108-2115 (Sept. 1963).
5657. Short-duration visible afterglow in helium, A. L. Schmeltekopf and H. P. Broida. J. Chem. Phys. 39, 1261-1268 (Sept. 1963).
5658. Signal-to-noise characteristics of some typical systems and their comparisons, H. Akima. Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29, 1961, p. A125-A130 (Raton, Communication and Electronics Foundation, 1963).
5659. Size-dependent spin lattice relaxation time, P. H. Fang. Phys. Rev. 129, No. 4, 1548-1549 (Feb. 1963).
5660. Solar activity, J. V. Lincoln. IQSY Instruction Manual. No. 2. Report of Sudden Ionospheric Disturbances, Suppl., p. 1-11 (IQSY Secretariat, London, England, 1963).
5661. Solar particles and interplanetary fields, C. S. Warwick. Book, Advances in the Astronautical Sciences 13, 666-681 (Western Periodicals, Calif., 1963).
5662. Solid formation in flowing cryogenic fluids, D. B. Chelton, B. W. Birmingham, and J. W. Dean. Advan. Cryog. Eng. 8, Paper E-11, 311-314 (1963).
5663. Solid state detectors for beta-ray spectroscopy below 4.2°K, J. Chin, A. T. Hirschfeld, and D. D. Hoppes. Rev. Sci. Instr. 34, No. 12, 1258-1259 (Nov. 1963).
5664. Solid-State Physics Section 9, H. R. R. Frederikse, Editor. p. 9-1-9-160 American Institute of Physics Handb. 2d edition (1963).
5665. Some applications of vacuum distillation of metals to radiochemical separations, J. R. DeVoe and W. W. Meinke. Anal. Chem. 35, No. 1, 2-5 (Jan. 1963).
5666. Some aspects of the mechanical properties of high polymers, H. Leaderman. (Proc. Conf. Mechanical Properties of Wood, Univ. of Calif., Berkeley, Calif., Aug. 27-Sept. 1, 1962), Book, The Mechanical Behavior of Wood, p. 43-83 (1963).
5667. Some causes of resonant frequency shifts in atomic beam machines. I. Shifts due to other frequencies of excitation, J. H. Shirley. J. Appl. Phys. 34, Pt. I, No. 4, 783-788 (Apr. 1963).
5668. Some causes of resonant frequency shifts in atomic beam machines. II. The effect of slow frequency modulation on the Ramsey line shape, J. H. Shirley. J. Appl. Phys. 34, Pt. I, No. 4, 789-791 (Apr. 1963).
5669. Some characteristics of a simple cryopump, L. O. Mullen and R. B. Jacobs. (Trans. Natl. Symp. Vacuum Technologists 1962), Am. Vacuum Soc. 9, 220-226 (1963).
5670. Some derivatives of 2,2' (phenylimino) diethanol, A. Cohen and R. S. Tipson. J. Med. Chem. 6, 822-824 (Nov. 1963).
5671. Some early results from the ionospheric top-side sounder satellite, R. W. Knecht and T. E. VanZandt. Nature 197, No. 4868, 641-644 (Feb. 1963).

5672. Some factors affecting the creep behavior of an age-hardenable alloy, W. D. Jenkins and W. A. Willard. *Am. Soc. Metals Trans. Quart.* 56, No. 3, 427-441 (Sept. 1963).
5673. Some idealized solutions for choking, two-phase flow of hydrogen, nitrogen and oxygen, R. V. Smith. *Advan. Cryog. Eng.* 8, 563-573 (1963).
5674. Some impulse sparkover voltages for a 200 cm sphere gap, H. N. Cones. *IEEE Component Parts Conf.*, Paper No. CP63-929 (June 1963).
5675. Some low temperature properties of materials, R. H. Kropschot. *Proc. Mountain States Navy Research and Development Clinic*, Raton, N. M., Sept. 28-29, 1961, p. D5-D6 Foundation, 1963).
5676. Some physical properties of organic denture base materials, J. B. Woelfel, G. C. Paffenbarger, and W. T. Sweeney. *J. Am. Dental Assoc.* 67, No. 4, 489-504 (Oct. 1963).
5677. Some recent developments in noble metal thermocouples, L. O. Olsen. *Am. Soc. Auto. Engrs. Paper No. 750A*, p. 10 (Sept. 1963).
5678. Some results of a new method for obtaining ionospheric N(h) profiles and their bearing on the structure of the lower F region, A. K. Paul and J. W. Wright. *J. Geophys. Res.* 68, No. 19, 5413-5420 (Oct. 1, 1963); (*Proc. NATO Advanced Study Institute*, Skeikampen, April 17-26, 1963), *Book, Electron Density Distribution in the Ionosphere and Exosphere*, p. 105-115 (North Holland Publ. Co., Amsterdam, The Netherlands, 1963).
5679. Some stochastic processes in polymer systems, J. Mazur. *J. Chem. Phys.* 38 No. 1, 193-201 (Jan. 1, 1963).
5680. Special techniques for use in sugar analysis, V. R. Dietz and P. G. Carpenter. *Cane Sugar Handbook*, Ed. G. P. Meade, 9th ed., p. 605-619 (John Wiley and Sons Inc., New York, N. Y., Aug. 1963).
5681. Spectroradiometry by means of modified spectrophotometers, H. K. Hammond. *Appl. Opt.* 2, No. 11, 1207-1208 (Nov. 1963).
5682. Spectroscopic absorption of NO in crystalline and liquid krypton, G. L. Pollack and H. P. Broida. *J. Chem. Phys.* 38, No. 8, 2012-2015 (Apr. 15, 1963).
5683. Spectrum analysis of extremely low frequency variations of quartz oscillators, W. R. Atkinson, L. Fey, and J. Newman. *Proc. IEEE* 51, No. 2, 379, (Feb. 1963).
5684. Spectrum of  $Er^{3+}$  in  $LaCl_3$ , J. C. Eisenstein. *J. Chem. Phys.* 39, No. 9, 2128-2133 (Nov. 1, 1963).
5685. Spectrum of  $Nd^{3+}$  in  $LaCl_3$ , J. C. Eisenstein. *J. Chem. Phys.* 39, No. 9, 2134-2140 (Nov. 1, 1963).
5686. Spherical mirror Fabry-Perot resonators, R. W. Zimmerman. *Proc. IEEE* 51, No. 5, 371-379 (Sept. 1963).
5687. Stable 6300 Å auroral arcs in mid-latitudes, F. E. Roach and J. R. Roach. *Planetary Space Sci.* 11, 523-545 (May 1963).
5688. Stability relations of dravite, a tourmaline, C. R. Robbins and H. S. Yoder, Jr. *Annual Report of the Director of the Geophys. Lab.*, 1961-1962 (Carnegie Inst. of Washington, Wash. D. C., Feb. 1963).
5689. Standard potential of the silver-silver chloride electrode and activity coefficients of hydrochloric acid in aqueous methanol (33.4 Wt. %) with and without added sodium chloride at 25°, R. G. Bates and D. Rosenthal. *J. Phys. Chem.* 67, No. 5, 1088-1090 (May 1963).
5690. Standardization from the national viewpoint, A. T. McPherson. *SES Proc. 12th Annual Meeting*, Sept. 1963, Wash. D. C., p. 68-72 (1963).
5691. Standards and contact lenses, A. G. McNish. *CONTACTO* 7, No. 9 4-5 (Nov.-Dec. 1963).
5692. Standards for dental radiographic film, G. C. Paffenbarger. *Mag. Std.* 34, No. 5, 148 (May 1963).
5693. Standards for the 70s, W. A. Wildhack. *Ind. Res.* 5, No. 3, 15-20 (Mar. 1963).
5694. Stark energy levels of symmetric-top molecules, J. H. Shirley. *J. Chem. Phys.* 38, 2896-2913 (June 1963).
5695. Statistical computation of configuration and free volume of a polymer molecule with solvent interaction, J. Mazur and L. Joseph. *J. Chem. Phys.* 38, No. 6, 1292-1300 (Mar. 15, 1963).
5696. Statistical interpretations, W. J. Youden. *Book, Standard Methods for Chemical Analysis* 6th edition, IIA, Chapt. 16, p. 318-325 (D. Van. Nostrand Co., Princeton, N. J., 1963).
5697. Statistics in chemical analysis, W. J. Youden. *Analytical Chemistry Handb. Sec. 14*, p. 14-14-9 (McGraw-Hill Book Co., Inc., New York N. Y., 1963).
5698. Statistics of irreversible termination in homogeneous anionic polymerization, B. D. Coleman, F. Gornick, and G. H. Weiss. *J. Chem. Phys.* 39, No. 12, 3233-3239 (Dec. 15, 1963).
5699. Status of frequency and time control, W. D. George. *Frequency* 1, No. 7, 27-29 (Nov.-Dec. 1963).
5700. Status of sugar color and turbidity measurements, F. G. Carpenter and V. R. Dietz. *J. Am. Soc. Sugar Beet Technologist* 12, 326-347 (1963).
5701. Stellar and galactic magnetism, L. M. Branscomb. *American Institute of Physics Handb.* 2d edition, p. 5-289--5-291 (1963).
5702. Strain gauge research at the National Bureau of Standards, R. L. Bloss. (ISA 18th Annual Conference and Exhibit, Chicago, Ill., Sept. 9-12, 1963), *ISA Preprint* 48.4.63 (1963).
5703. Strain release in complete dentures, J. B. Woelfel, G. C. Paffenbarger, and W. T. Sweeney. *J. Am. Dental Assoc.* 67, No. 2, 321 (Aug. 1963).
5704. Stratospheric moisture measurements using infrared spectroscopy, D. M. Gates. *Proc. Symp. Humidity and Moisture* (1963).
5705. Stress-corrosion cracking of type 304 stainless steel at 455 to 615 F, H. L. Logan, M. J. McBee, and M. Romanoff. *Mater. Res. Std.* 3, No. 8, 635-639 (Aug. 1963).
5706. Stress-strain relationships in yarns subjected to rapid impact loading. 10. Stress-strain curves obtained by impact with rifle bullets, J. C. Smith, C. A. Fenstermaker, and P. J. Shouse. *Textile Res. J.* 33, No. 11, 919-934 (Nov. 1963).
5707. Structure beyond the ionization limit in inelastic electron scattering in the rare gases, C. E. Kuyatt and J. A. Simpson. *Proc. 6th Intern. Symp. Ionization Phenomena in Gases* IAL, 33-35 (Paris, 1963).
5708. Studies at NBS of the platinum-6% rhodium vs. platinum-30% rhodium thermocouple—a preliminary report, G. W. Burns. (Proc. SAE Meeting, Los Angeles, Calif., Sept. 23-27, 1963), *SAE Preprint No. 750B* (1963).
5709. Studies in scientific and engineering manpower, Part I. Patterns of utilization of scientific and engineering manpower in the United States and certain foreign countries. Part II. Trends in salaries of scientists and engineers, M. S. Green. 1948-1962, U. S. Department of

- Commerce, Office of the Assistant Secretary of Commerce for Science and Technology Staff Report: 63-1 (Oct. 1963).
5710. Studies in the geomagnetic micropulsation frequency range, W. H. Campbell. IEEE Intern. Conv. Record 11, Pt. 9, 25-28 (Mar. 25-28, 1963).
5711. Studies of within-the-horizon propagation at 9300 Mc, A. P. Barsis, A. F. Barghausen, and R. S. Kirby. IEEE Trans. Ant. Prop. AP-11, No. 1, 24-38 (Jan. 1963).
5712. Studies on the tungsten-rhenium thermocouple to 2000° C, D. B. Thomas. Proc. 18th Annual ISA Conf. and Exhibit, Sept. 9-12, 1963, Chicago, Ill., Preprint 57.3.63, pp. 67.3.63-1-57.3.63-9 (1963).
5713. Studying the lunar tidal variations in the D region of the ionosphere by means of a very-low-frequency phase observations, A. H. Brady and D. D. Crombie. J. Geophys. Res. 68, No. 19, 5437-5442 (Oct. 1, 1963).
5714. Sum rules relating coherent X-ray scattering data to the diamagnetic nuclear shielding constant and to the self-energy of the charge distribution of the scatterer, J. N. Silverman and Y. Obata. J. Chem. Phys. 38, No. 5, 1254-1255 (1963).
5715. Summary of Sessions I and II of the Symposium on X-ray and Electron Probe Analysis, R. E. Michaelis. ASTM Spec. Tech. Publ. 349 (1963).
5716. Summary report on activities of spacewarn network, A. H. Shapley. COSPAR Info. Bull. No. 13, p. 17-21 (Jan. 1963).
5717. Summer school for theoretical physics, R. M. Gallet. (In Grenoble, Université. Les Houches), Geophys. Exterior, p. 551-590 (Gordon and Breach, New York, N. Y., 1963).
5718. Survey of  $Rb^{85}/Rb^{87}$  ratios in minerals, W. R. Shields, E. L. Garner, C. E. Hedge, and S. S. Goldich. J. Geophys. Res. 68, No. 8, 2331-2334 (Apr. 1963).
5719. Synchronization of two remote atomic time scales, J. A. Barnes and R. L. Fey. Proc. IEEE 51, No. 11, 1965 (Nov. 1963).
5720. Synoptic variations and vertical profiles of large-scale ionospheric irregularities, R. G. Merrill, R. S. Lawrence, and N. J. Roper. J. Geophys. Res. 68, No. 19, 5453-5459 (Oct. 1, 1963).
5721. Syntactic integration carried out mechanically, I. Rhodes. Inform. Storage and Retrieval 1, 215-219 (1963).
5722. Synthesis and stability of bismutotantalite, stibiotantalite and chemically similar  $ABO_4$  compounds, R. S. Roth and J. L. Waring. Am. Mineralogist 48, Nos. 11 and 12, 1348-1356 (Nov.-Dec. 1963).
5723. Synthesis of perfluorostyrene and (2, 2-difluorovinyl) perfluorobenzene ( $\alpha$ -hydroheptafluorostyrene) A general method for synthesis of highly fluorinated styrenes, F. M. Antonucci and A. Wall. SPE Trans. 3, No. 3, 225-230 (July 1963).
5724. Technical training in the weights and measures program, M. W. Jensen. Southern Weights and Measures News Letter 14, No. 12, 2-5 (Dec. 1962); Scale J. 49, No. 4, 4-5 (Jan. 1963).
5725. Temperature control of the structure and variations of the quiet ionosphere, J. W. Wright. Proc. Intern. Conf. Ionosphere, July 1962, p. 19-25 (Institute of Physics and the Physical Society, London, England, 1963).
5726. Temperature measurements below 1000°K, J. L. Riddle. (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1963), Natl. Aeron. and Space Admin. SP-31, Session I, Paper 2, p. 11-12 (Dec. 1963).
5727. Temperature measurements in cryogenic engineering, R. J. Corruccini. Advan. Cryog. Eng. 8, Paper F-1, 315-333 (1963).
5728. Temperature, pressure, heat, and entropy change of transition, fusion, and vaporization, D. D. Wagman, W. H. Evans, I. Halow, and R. M. Dudley. American Institute of Physics Handb. 2d edition, Sect. 4j, p. 4-170-4-216 (1963).
5729. Temperature scales, thermocouples, and resistance thermometers, H. F. Stimson, J. E. Swindells, and R. E. Wilson. American Institute of Physics Handb. 2d edition, Sect. 4a, p. 4-2-4-21 (1963).
5730. Ten kilocycle pound-type klystron stabilizer, H. E. Radford. Rev. Sci. Instr. 34, No. 3, 304-305 (Mar. 1963).
5731. Ten years weathering data on aluminum alloys, W. H. Ailor, Jr., and F. M. Reinhart. Materials Protect. 2, No. 6, 30-36 (June 1963).
5732. The adsorption of methane and nitrogen on silica gel, synthetic zeolite, and charcoal, A. J. Kidnay and M. J. Hiza. J. Phys. Chem. 67, 1725-1727 (Aug. 1963).
5733. The association of plane-wave electron-density irregularities with the equatorial electrojet, K. L. Bowles. J. Geophys. Res. 68, No. 9, 2503-2525 (May 1, 1963).
5734. The atomic spectra of the rare earths: their presence in the sun, C. E. Moore. Appl. Opt. 2, No. 7, 665-674 (July 1963).
5735. The aurora and trapped electrons, F. E. Roach. J. Geophys. Res. 68, No. 4, 1015-1021 (Feb. 1963).
5736. The basis of the functional assumption in the theory of the Boltzmann equation, M. S. Green and R. A. Piccirilli. Phys. Rev. 132, No. 3, 1388 (Nov. 1963).
5737. The calibration of inductive voltage dividers and analysis of their operational characteristics, T. L. Zapf. ISA Trans. 2, No. 3, 195-200 (July 1963).
5738. The characterization of large single crystals by high-voltage X-ray Laue photographs, H. S. Peiser and E. P. Levine. (Proc. 11th Annual Conf. Application of X-ray Analysis, Aug. 1962), Book, Advances in X-ray Analysis 6, 158-163 (Plenum Press Inc., New York, N. Y., 1963).
5739. The collaborative test, W. J. Youden. J. Assoc. Offic. Agric. Chem. 46, 55-62 (Feb. 1963).
5740. The conjugacy of magnetic disturbance variations, G. M. Boyd. J. Geophys. Res. 68, No. 4, 1011-1013 (Feb. 13, 1963).
5741. The contact properties of thin films on semiconductors, T. Higier and G. G. Harman. Contact Symp. Proc. Univ. of Maine (Mar. 20, 1963).
5742. The correlation of experimental pressure-density temperature and specific heat data for parahydrogen, H. M. Roder, L. A. Weber, and R. D. Goodwin. (Proc. XI Intern. Congress Refrigeration, Munich, Germany, Aug. 1963), Prog. Refrig. Sci. Technol. 1, 187-191 (1963).
5743. The day-to-night ratio of cosmic noise absorption during polar cap absorption events, C. S. Gillmore, Jr. J. Atmospheric Terrest. Phys. 25, 263-266 (May 1963).

5744. The decoration of dislocations in aluminum oxide, H. E. Bond and K. B. Harvey. *J. Appl. Phys.* 34, No. 2, 440-441 (Feb. 1963).
5745. The direct determination of the crystal structure of  $\text{NaB}(\text{OH})_4 \cdot 2\text{H}_2\text{O}$ , S. Block and A. Perloff. *Acta Cryst.* 16, No. 12, 1233-1238 (Dec. 1963).
5746. The effect of geomagnetic crochot on cosmic-ray intensity, C. S. Warwick. *J. Geophys. Res.* 68, No. 10, 3303-3304 (May 1963).
5747. The effect of hydrostatic pressure on the crystallization kinetics of natural rubber, G. M. Martin and L. Mandelkern. *J. Appl. Phys.* 34, No. 8, 2312-2317 (Aug. 1963).
5748. The effective area of a guarded electrode, J. I. Lauritzen, Jr. (Proc. Conf. Electric Insulation), 1963 Annual Report, Natl. Acad. Res. Council Publ. 1141, p. 67-70 (1963).
5749. The electrophoretic mobility of asphaltenes in nitromethane, J. R. Wright and R. R. Minesinger. *J. Colloid Sci.* 18, 223-236 (Mar. 1963).
5750. The energy environment in which we live, D. M. Gates. *Am. Scientist* 51, No. 3, 327-348 (Sept. 1963).
5751. The error rate in a multiple-frequency shift system and the output signal/noise ratio in a frequency modulation and a pulse-code-modulation/frequency-shift system, H. Akima. Intern. Conf. Satellite Communication, London, Nov. 22-28, 1963 p. 305-309, (Programme and Conference Digest, London, England 1963).
5752. The establishment and maintenance of the unit of voltage at the NBS Boulder Laboratories, B. A. Wickoff. *ISA 1963 Proc. Paper No. 28.2.63* (1963).
5753. The Fisheriana revolution in the technique of experimentation, W. J. Youden. *Estadistica* (Inter American Statistical Institute), 21, No. 80, 524-527 (Sept. 1963).
5754. The formation and oxidation of high-area carbon films, V. R. Deltz and McFarlane. Proc. Fifth Carbon Conference, II, 219-232 (Pergamon Press, Inc., London England, 1963).
5755. The formulation of F. D. I. specifications, G. C. Paiffenbarger. Intern. Dental J. 13, No. 1, 133-134 (Mar. 1963).
5756. The F-region seasonal anomaly, J. W. Wright. *J. Geophys. Res.* 68, No. 14, 4379-4381 (July 15, 1963).
5757. The gamma-ray distribution from oriented cerium-141 and its application to thermal contact at low temperature, J. F. Schooley and D. D. Hoppes. (Proc. 8th Intern. Conf. Low Temperature Physics, Queen Mary College, London, England, Sept. 1963), Book, Low Temperature Physics, Ed. R. O. Davies, pp. 435-436 (Butterworth Inc., Washington, D. C., 1963).
5758. The gas phase radiolysis of propane. Effect of pressure and added inert gases, S. G. Lias, P. Ausloss, and I. B. Sandoval. *Discussions Faraday Soc.* No. 36, p. 66-74 (1963).
5759. The heat capacity of linear and branched polyethylene, E. Passaglia and H. K. Kevorkian. *J. Appl. Polymer Sci.* 7, No. 1, 119-132 (Jan. 1963).
5760. The heats of solution and oxidation of sulfur dioxide, W. H. Johnson and S. Sunner. *Acta Chem. Scand.* 17, 1917-1924 (1963).
5761. The importance of environment in fatigue failure of metals, J. A. Bennett, W. L. Holshouser, and H. P. Utech. Book, Fatigue of Aircraft Structures, p. 1-18 (Pergamon Press, Inc., London, England, 1963).
5762. The ionosphere, A. H. Shapley. U. S. Information Agency Voice of America Forum Series on Space Science, Lecture No. 7, 6 pages (1963).
5763. The infrared spectra, structures and thermodynamics of gaseous  $\text{LiO}$ ,  $\text{Li}_2\text{O}$  and  $\text{Li}_2\text{O}_2$ , D. E. Mann, D. White, K. S. Seshadri, D. F. Dever, and M. J. Linevsky. *J. Chem. Phys.* 39, No. 10, 2463-2473 (Nov. 1963).
5764. The intensity and spectral, distribution of scattered radiation from  $\text{Co}^{60}$  sources, B. Petree and J. C. Humphreys. *Radiology* 80, No. 1, 120 (Jan. 1963).
5765. The ionization constant of m-nitrophenol from 5 to 50°, R. A. Robinson and A. Peiperl. *J. Phys. Chem.* 67, No. 12, 2860-2861 (Dec. 1963).
5766. The ionization constants of o-nitrophenol and 4-nitro-m-cresol from 5 to 60°, R. A. Robinson and A. Peiperl. *J. Phys. Chem.* 67, No. 8, 1723-1724 (Aug. 1963).
5767. The kinetics of positive ion desorption from polycrystalline tungsten and rhenium, M. D. Scheer and J. Fine. (Proc. Intern. Symp. Condensation and evaporation of solids, Dayton, Ohio, Sept. 12-14, 1962), Book, Condensation and Evaporation of solids, Ed. E. Rutner, P. Goldfinger, and J. P. Huth, Paper 20, pp. 327 (Gordon and Breach, New York, N. Y. 1963).
5768. The large 50 Mc/s dipole array at Jicamarca radio observatory, G. R. Ochs. Program and Digest 1963 IEEE Prof. Group Ant. and Prop. Symp. Space Telecommunications, July 9-11, 1963, Boulder Colo., p. 237-241 (July 1963).
5769. The lifetime and movement of artificially produced electron-clouds observed with spaced ionosondes, J. W. Wright. *J. Geophys. Res.* 68, No. 10, 3011-3020 (May 15, 1963).
5770. The location of the irregularities responsible for ionospheric scintillation of a radio source, H. J. A. Chivers. Proc. Physics Ionosphere, London, 1962, p. 258-266 (The Institute of Physics and the Physical Society, London, England, 1963).
5771. The lower critical field in the Ginzburg-Landau theory of superconductivity, J. L. Harden and V. Arp. *Cryogenics* 3, 105-108 (June 1963).
5772. The measurement of pH, R. G. Bates and E. E. Bower. *Handb. Analytical Chemistry*, Ed. L. Meites, Sect. 11, p. 1-14 (McGraw-Hill Book Co. Inc., New York, N. Y., 1963).
5773. The melting (contraction) and recrystallization of fibrous proteins in nonaqueous media, L. Mandelkern, G. Canty, and A. F. Diorio. *J. Phys. Chem.* 67, No. 12, 2882-2884 (Dec. 1963).
5774. The method for mechanical translation used by the National Bureau of Standards group and the structure of its machine glossary, I. Rhodes. (Proc. 26th Annual American Documentation Institute Meeting, Oct. 1963), Book, Automation and Scientific Communication, p. 23-24 (Am. Documentation Inst., 1963).
5775. The microwave spectrum of normal propyl chloride, T. N. Sarachman. *J. Chem. Phys.* 39, No. 2, 469-473 (July 1963).
5776. The nature of the compound obtained from aqueous cesium chloride solution and hydrogen chloride, A. G. Maki and R. West. *Inorg. Chem.* 2, 657 (1963).
5777. The nightglow, F. E. Roach. Book: Advances in Electronics and Electron Physics 1-44 (Academic Press Inc., New York, N. Y., 1963).

5778. The occurrence of short-duration cosmic noise absorption events inside the southern auroral zone, C. S. Gillmor, Jr., and J. K. Hargreaves. *J. Atmospheric and Terrest. Phys.* 25, 311-317 (June 1963).
5779. The orthobaric densities of parahydrogen, derived heats of vaporization and critical constants, H. M. Roder, D. E. Diller, L. A. Weber, and R. D. Goodwin. *Cryogenics* 3, 16-22 (Mar. 1963).
5780. The personal side of a research project, A. T. McPherson. *J. Wash. Acad. Sci.* 53, No. 3, 63-66 (Mar. 1963).
5781. The possible uses of the sugar grove radio telescope facility in the technical programs of NBS, J. W. Herbstreit, C. G. Little, and D. W. Patterson. *Radio and Radar Astronomy Report of the Committee on Science and Astronautics, U. S. House of Representatives, Eighty-Seventh Congress, 2d Session, December 12, 1962, p. 23-31 (Wash. D. C., 1963).*
5782. The possibility of guided electromagnetic waves in the earth's crust, J. R. Wait. *IEEE Trans. Ant. Prop. Spec. Issue on Electromagnetic Waves in the Earth AP-11*, No. 3, 330-335 (May 1963).
5783. The precise evaluation of lens distortion, F. E. Washer. *Photogrammetric Eng.* XXXI, No. 3, 327-332 (Mar. 1963).
5784. The propagation time of a radio pulse, J. R. Johler. *IEEE Trans. Ant. Prop. AP-11*, No. 6, 661-668 (Nov. 1963).
5785. The radio thermal noise properties of the lower atmosphere, B. R. Bean. *Program and Digest 1963 IEEE Prof. Group. Ant. and Prop. Symp. Space Telecommunications, July 9-11, 1963, Boulder, Colo., p. 30-31 (1963).*
5786. The rapid selector, as currently used for information search and replica copy retrieval, T. C. Bagg. (Proc. 26th Annual Meeting American Documentation Institute, Chicago, Ill., Oct. 1963), *Automation and Scientific Commun.* Pt. 2, 227-228 (Oct. 1963).
5787. The reactions of methyl radicals, in the solid-, liquid-, and gas-phase photolysis of dimethylmercury, R. E. Rebbert and P. Ausloos. *J. Am. Chem. Soc.* 85, No. 20, 3086-3089 (Dec. 1963).
5788. The reactions of methyl radicals with aromatic compounds. I. Toluene, ethylbenzene, and cumene, I. B. Burkley and R. E. Rebbert. *J. Phys. Chem.* 67, No. 1, 168-169 (Jan. 1963).
5789. The reactions of methyl radicals with aromatic compounds. II. The xylenes, W. A. Sanders and R. E. Rebbert. *J. Phys. Chem.* 67, No. 1, 170-171 (Jan. 1963).
5790. The redefinition of the second and the velocity of light, G. E. Hudson and W. Atkinson. *Phys. Today* 16, No. 5 30-36 (May 1963).
5791. The role of carbon dioxide in the bone char process, F. G. Carpenter, V. R. Deitz, and D. Larry. *Proc. 1963 Sugar Industry Technologist* 22, No. 2, 27-45 (Chemistry Institute, New York, N. Y. 1963).
5792. The role of the International Union of Pure and Applied Chemistry, E. Wichers. *J. Chem. Doc.* 3, No. 7, 7-11 (1963).
5793. The scope of electrochemistry, W. J. Hamer. *J. Electrochem. Soc.* 110, No. 6, 115C (June 1963).
5794. The second industrial revolution, A. T. McPherson. (Spanish translation of), *Linea Recta* 132, No. 669, 348-354 (1963).
5795. The segmental variation of Blaschke products, G. T. Cargo. *Duke Math. J.* 30, No. 1, 143-150 (Mar. 1963).
5796. The sequence selection problem in the crystallization of polymers. I. Homopolymers, F. Gornick and J. L. Jackson. *J. Chem. Phys.* 38, No. 5, 1150-1154 (Mar. 1963).
5797. The spheroidal method for satellite orbits, J. P. Vinti. *Proc. Intern. Symp. Use of Artificial Satellites for Geodesy*, p. 12-16 (North Holland Publ. Co., Amsterdam, The Netherlands, 1963).
5798. The spin lattice relaxation time of some paramagnetic dispersions, P. H. Fang. (Proc. XI Colloque Ampere, Eindhoven, The Netherlands, June 1962), *Book, Magnetic and Electric Resonance and Relaxation*, pp. 123-128 (1963).
5799. The standard potential of the silver-silver chloride electrode in 10 and 15% mannitol at 25°, M. Paabo and R. A. Robinson. *J. Phys. Chem.* 67, No. 12, 2861-2862 (Dec. 1963).
5800. The structure of gaseous copper (II) nitrate as determined by electron diffraction, R. E. Lavilla and S. H. Bauer. *J. Am. Chem. Soc.* 85, No. 20, 3597-3600 (Nov. 1963).
5801. The structure of gaseous copper (II) nitrate as determined by electron diffraction, R. E. Lavilla and S. H. Bauer. *J. Am. Chem. Soc.* 85, 3597-3600 (Nov. 1963).
5802. The structure of hexagonal silver iodide, G. Burley. *J. Chem. Phys.* 38, No. 12, 2807-2812 (June 1963).
5803. The sudden ionospheric disturbance, C. S. Warwick. (Proc. Corfu Summer School, June 1962), *Book, Radio Astronomical Studies of the Atmosphere*, p. 457-475 (North-Holland Publ. Co., Amsterdam, The Netherlands, 1963).
5804. The theory of an antenna over an inhomogeneous ground plane, J. R. Wait. *Book, Electromagnetic Theory and Antennas*, ed. E. C. Jordan, Pt. 2, p. 1079-1098 (Pergamon Press Inc., Oxford, England, 1963).
5805. The thermodynamics of the ternary system: urea-sodium chloride-water at 25°, V. E. Bower and R. A. Robinson. *J. Phys. Chem.* 67, No. 7, 1524-1527 (July 1963).
5806. The total electron content of the ionosphere content at middle latitudes near the peak of the solar cycle, R. S. Lawrence, D. J. Poskany, O. K. Garriott, and S. C. Hall. *J. Geophys. Res.* 68, No. 7, 1889-1898 (Apr. 1963).
5807. The turbulent characteristics of the radio refractive index near the ground, B. R. Bean and R. E. McGavin. *Program and Digest 1963 IEEE Prof. Group. Ant. and Prop. Symp. Space Telecommunications, July 9-11, 1963, Boulder, Colo., p. 60-64 (1963).*
5808. The use of dual-polarized broad beam antennas to determine the extraterrestrial intensity of the cosmic radio noise at high frequencies, C. G. Little, G. M. Lerfeld, and R. Parthasarathy. *Program and Digest 1963 IEEE Prof. Group. Ant. and Prop. Symp. Space Telecommunications, July 9-11, 1963, Boulder, Colo., p. 9-15 (1963).*
5809. The validity of crystal field theory as applied to rare earth ions; an analysis of the spectrum of praseodymium trichloride, J. C. Eisenstein. *Proc. 1st Intern. Conf. Paramagnetic Resonance, Israel, I, Pt. II, 253-259 (Academic Press Inc., New York, N. Y., 1963).*

5810. The wear of magnetic recording tape and solubility of the binder, F. Nesh. IEEE Trans. Audio AU-11, No. 3, 97 (May-June 1963).
5811. The zeros of infrapolynomials with prescribed values at given points, J. L. Walsh and O. Shisha. Proc. Am. Math. Soc. 14, No. 5 839-844 (Oct. 1963).
5812. Theoretical studies on signal-to-noise characteristics of an FM system, H. Akima. IEE Trans. Space Electron. Telemetry SET-9, No. 4, 101-108 (Dec. 1963).
5813. Theory of operation of the rotary positive displacement meter, C. T. Collett. (Proc. 23d Annual Gas Measurement Short Course, Aug. 20, 1963). West Virginia Univ. Tech. Bull. 70, p. 48-53 (1963).
5814. Theory of the electronic polarizabilities of ions in crystals: Application to the alkali halide crystals, A. R. Ruffa. Phys. Rev. 130, No. 4, 1412-1423 (May 15, 1963).
5815. Thermal conductivity, R. L. Powell. American Institute of Physics Handb. 2d edition, Sect. 4g, p. 4-76-4-101 (1963).
5816. Thermocouple and radiation thermometry above 900°K, H. J. Koskowski and G. W. Burnes. (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1963), Natl. Aeron. and Space Admin. SP-31, Session I, Paper 3, p. 13-30 (Dec. 1963).
5817. Thermodynamic properties of gases, J. Hilsenrath. American Institute of Physics Handb. 2d edition, Sect. 4h, p. 4-101-4-157 (1963).
5818. Thermodynamic representation of high-pressure vapour-liquid equilibria, J. M. Prausnitz. Chem. Eng. Sci. 18, 613-630 (1963).
5819. Thermal conductivity of solid  $H_2O$  and  $D_2O$  at low temperatures, J. W. Dean and K. D. Timmerhaus. Advan. Cryog. Eng. 8, Paper E-5, 263-267 (1963).
5820. Thermal expansion, R. K. Kirby. American Institute of Physics Handb. 2d edition, Sect. 4f, p. 4-64-4-76 (1963).
5821. Thermal expansion of silver iodide, A. Bienenstock and G. Burley. J. Phys. Chem. Solids 24, 1271-1278 (Apr. 1963).
5822. Thermal radiation properties of solids at low temperatures, R. J. Corruccini. (Symp. Measurement of Thermal Radiation Properties of Solids, Dayton, Ohio, Sept. 5-7, 1963), Natl. Aeron. and Space Admin. SP-31, Session II, Paper 4, p. 33 (Dec. 1963).
5823. Thickness determination, V. A. Lamb. Electroplaters Process Control Handb., Ed. D. G. Foulke and F. E. Crane, Jr., Chapt. 12, 327-346 (Reinhold Publ. Corp., New York, N. Y., 1963).
5824. Three-body-bound state in  $He^+$ , J. M. Blatt, J. N. Lunniss, and S. Y. Larsen. Phys. Rev. 131, No. 5, 2131-2132 (Sept. 1, 1963).
5825. Time and frequency broadcasting, A. H. Morgan. ISA J. 10, No. 6, 49-54 (June 1963).
5826. Tooth fluorometer, A. F. Forziati, J. Kumpula, and J. R. Barone. J. Am. Dental Assoc. 67, No. 5, 663-669 (Nov. 1963).
- 5826A. Topsis sounding as a tool for global ionosphere studies, R. W. Knecht. IEEE Trans. Ant. Prop. Programs Digest, pp. 21-23 (1963).
5827. Transference numbers in pure molten sodium nitrate, R. J. Labrie and V. A. Lamb. J. Electrochem. Soc. 110, No. 7, 810-814 (July 1963).
5828. Transition array for  $d^3-d^2p$ : vanadium, H. Mendlowitz. Astrophys. J. 138, No. 4, 1277-1296 (Nov. 15, 1963).
5829. Translational dispersion in gases, M. Greenspan. Estratto da Rendiconti della Scuola Internazionale di Fisica 'E. Fermi', Corso XXVII, 73-100 (1963).
5830. Transparent rigid mount for vacuum stop-cocks, M. M. Anderson. Rev. Sci. Instr. 34, No. 2 187 (Feb. 1963).
5831. Transverse magnetoresistance of high purity aluminum from 4 to 30° K, J. R. Purcell and R. B. Jacobs. Cryogenics 3, 109-110 (June 1963).
5832. Two assumptions in the theory of attractive forces between long saturated chains, R. Zwanzig. J. Chem. Phys. 39, No. 9, 2251-2258 (Nov. 1963).
5833. Two-stream plasma instability as a source of irregularities in the ionosphere, D. T. Farley, Jr. Phys. Rev. Letters 10, 279-282 (Apr. 1, 1963).
5834. Unitary symmetry in photoproduction and other electromagnetic interactions, C. A. Levinson, H. J. Lipkin, and S. Meshkov. Physics Letters 7, No. 1, 81-84 (Oct. 15, 1963).
5835. United States participation in international standardization, A. T. McPherson. Mater. Res. Std. 3, No. 4, 310-311 (Apr. 1963).
5836. Unstable detonation near a hypervelocity missile, F. W. Ruegg and W. W. Dorsey. Ninth Symp. Combustion, p. 476-477 (1963).
5837. Use of photographic film for personnel dosimetry; basic physical considerations, M. Ehrlich. Symp. Personnel Dosimetry Techniques for External Radiation, Apr. 1-5, 1963, Madrid, Spain, p. 49-74 (Apr.-Dec. 1963).
5838. Use of transistors in Van de Graaff source leak controls, A. C. B. Richardson and L. Costrell. Nucl. Instr. Methods 24, No. 1, 129-130 (July 1963).
5839. Vacuum-tight cylinder joints and ball-and-socket joints, L. A. Guildner and H. F. Stimson. Rev. Sci. Instr. 34, No. 6, 658-659 (June 1963).
5840. Vacuum ultraviolet photochemistry, VI. Photolysis of cyclopropane with the Xenon resonance lines, C. L. Currie, H. Okabe, and J. R. McNesby. J. Phys. Chem. 67, No. 7, 1494-1497 (July 1963).
5841. Vacuum ultraviolet photochemistry, VIII. Photolysis of n-butane, H. Okabe and D. A. Becker. J. Chem. Phys. 39, No. 10, 2549-2555 (Nov. 15, 1963).
5842. Vapor snakes in solid argon, G. L. Pollack and H. P. Broida. J. Chem. Phys. 38, No. 4, 968-969 (Feb. 15, 1963).
5843. Vaporization of uranium monophosphide, K. A. Gingerich, P. K. Lee, and J. E. Efimenko. Nature 200, No. 4908, 774-776 (1963).
5844. Variations in phase path of man-made one-hop whistler mode signals at 18.6 kilocycles per second, D. D. Crombie, F. A. McNeill, and G. M. Allcock. J. Geophys. Res. 68, No. 23, 6229-6235 (Dec. 1, 1963).
5845. Velocity-depth relationship in microelectrophoresis cell for asphaltene in nitromethane, J. R. Wright and R. R. Minesinger. J. Colloid Sci. Letter 18, 802-804 (Oct. 1963).
5846. Verification of the tenfold assignment of the Baryon resonances, S. Meshkov, C. A. Levinson, and H. J. Lipkin. Phys. Rev. Letters 10, No. 8, 361-364 (Apr. 15, 1963).

5847. VLF measurements, A. G. Jean. Debris Motion and Ionospheric Effects Symp., Proc. DASA Spec. Rept. 12, p. 681-736 (May 1963).
5848. VLF phase disturbances following U.S.S.R. high-altitude nuclear tests, A. G. Jean. Beta Beta and Delta Gamma Symp. Proc., DASA Spec. Rept. 13, p. 232-258 (May 1963).
5849. Very-low-frequency phase observations of solar flare ionization in the D region of the ionosphere, C. J. Chilton, F. K. Steele, and R. B. Norton. J. Geophys. Res. 68, No. 19, 5421-5435 (Oct. 1, 1963).
5850. VLF propagation, W. L. Taylor and A. G. Jean. Proc. Mountain States Navy Research and Development Clinic, Raton, N. M., Sept. 28-29, 1961, p. A45-A66 (Raton, Communications and Electronics Foundation, 1963).
5851. Very low frequency propagation in the earth-ionosphere waveguide of nonuniform width, J. R. Wait. Proc. Intern. Conf. Ionosphere, July 1962, p. 446-451 (Institute of Physics and the Physical Society, London, England, 1963).
5852. Very-low-frequency radio waves and the ionosphere, D. D. Crombie. Science 142, No. 3591, 508-510 (Oct. 25, 1963).
5853. Very low temperature data. Properties of paramagnetic salts, R. P. Hudson. American Institute of Physics Handb. 2d edition, Sec. 5g, p. 5222-5233 (1963).
5854. Vibration-rotation spectra of BrCN, Addendum, A. Maki. J. Chem. Phys. 38, No. 5, 1261-1262 (May 1963).
5855. Water vapor boundary layers in biological systems, D. M. Gates. Proc. Symp. Humidity and Moisture (1963).
5856. Wave functions and oscillator strengths for the lithium iso-electronic sequence, A. W. Weiss. Astrophys. J. 138, No. 4, 1262-1276 (Nov. 15, 1963).
5857. Wavelength of Hg<sup>198</sup> Zeeman filter relative to that of the 2537-A absorption line of an atomic beam, W. G. Schweitzer, Jr., and K. G. Kessler. J. Opt. Soc. Am. 53, No. 12, 1382-1388 (Dec. 1963).
5858. Wavelength passed by Hg<sup>198</sup> Zeeman-split absorption filter, W. G. Schweitzer. J. Opt. Soc. Am. 53, No. 11, 1250-1252 (Nov. 1963).
- 5858A. Whats new in control standards? H. L. Mason. Control Eng. 10, 99-101 (May 1963).
5859. Whistlers, R. M. Gallet. Grenoble Univ. Ecole Phys. Theorique, Les Houches, Geophysique Exterieur, p. 551-590 (Gordon and Breach, New York, N. Y., 1963).
5860. Pioneer in dental research, G. C. Paffenbarger and Wilmer Souder. N. Y. J. Dentistry 33, No. 5, 191-192 (May 1963).
5861. Work function and secondary emission, G. F. Rouse. American Institute of Physics Handb. 2d edition, Sect. 9j. p. 9-146-9-160 (1963).
5862. X-ray microscopy of polymers by point projection, S. B. Newman. Mod. Plastics 40, No. 7, 165-179 (Mar. 1963).
5863. X-ray study of a cadmium borate glass, S. Block, J. Molin, and G. J. Piermarini. J. Am. Ceram. Soc. 46, 557 (1963).
5864. Zeros of polynomials and fractional order differences of their coefficients, G. T. Cargo and O. Shisha. J. Math. Anal. Appl. 7, No. 2, 176-182 (Oct. 1963).

5865. A classical model for the study of isotope effects in energy exchange and particle exchange reactions, R. J. Rubin. *J. Chem. Phys.* 40, No. 4, 1069-1077 (Feb. 15, 1964).
5866. A coaxial adjustable sliding termination, W. E. Little and J. P. Wakefield. *IEEE Trans. Microwave Theory Tech.* MTT-12, No. 2, 247-248 (Mar. 1964).
5867. A combinatorial problem and a single decoding method for cyclic codes, M. Neesenbergs. *IEEE Trans. Inform. Theory*, IT-10, 250-252 (July 1964).
5868. A comparison of the  $TA_1$  and the NBS-A atomic time scales, J. Bonanomi, P. Kartaschoff, L. J. Newman, and W. R. Atkinson. *Proc. IEEE* 52, No. 4, 439 (Apr. 1964).
5869. A complete description of the normal subgroups of genus one of the modular group, M. Newman. *Am. J. Math.* 86, 17-24 (1964).
5870. A condensation model producing crystalline or amorphous tetrahedral networks, F. Ordway. *Science* 143, No. 3608, 800-801 (Feb. 1964).
5871. A DC-RF substitution error in dual element bolometer mounts, G. F. Engen. *IEEE Trans. Instr. Meas.* IM-13, No. 2 and 3, 58-64 (June-Sept. 1964).
5872. A differential microwave phase shifter, R. W. Beatty. *IEEE Trans. Microwave Theory Tech.* MTT-12, No. 2, 250-251 (Mar. 1964).
5873. A diffusive model for the initial phase of a solar proton event, G. C. Reid. *J. Geophys. Res.* 69, 2659-2667 (June 1964).
5874. A liquid-medium step-function pressure calibrator, R. O. Smith. *J. Basic Eng.* 86, No. 4, 723-727 (Dec. 1964).
5875. A low input VSWR coaxial diode switch for the UHF band, W. L. Ecklund. *IEEE Trans. Microwave Theory Tech. Corres. Sec.* MTT-12, No. 3, 359 (May 1964).
5876. A magnetic amplifier for use with diode logic, E. W. Hogue. *IEEE Trans. Commun. Electron.* 83, No. 75, 803-808 (Nov. 1964).
5877. A magnetic fixed point for thermometry below 1°K, J. C. Eisenstein, R. P. Hudson, and B. W. Mangum. *Appl. Phys. Letters* 5, No. 11, 231 (Dec. 1, 1964).
5878. A mechanistic model for the limits of auditory perception, E. L. R. Corliss. *Proc. Symp. Models for the Perception of Speech and Visual Form*, Boston, Mass., Nov. 11-14, 1964 (Air Force Research Center, Cambridge, Mass., 1964).
5879. A multistub coaxial line tune, W. E. Little and E. Niesen. *IEEE Trans. Microwave Theory Tech.* MTT-12, No. 5, 570-571 (Sept. 1964).
5880. A new steady-state calorimeter for measuring heat transfer through cryogenic insulation, D. R. Beck, F. Kreith, and R. H. Kroppschot. (Proc. 1963 Cryogenic Eng. Conf. Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), Book, *Advances in Cryogenic Engineering* 9, Paper B-4, 64-70 (Plenum Press Inc., New York, N. Y., 1964).
5881. A note on some quadratic formulas for the interval  $(-\infty, \alpha)$ , S. Haber. *Math. Computation* 18, No. 86, 313-314 (1964).
5882. A note on the attenuation function for propagation over a flat layered ground, L. E. Vogler. *IEEE Trans. Ant. Prop.* AP-12, No. 2, 240-242 (Mar. 1964).
- 5882A. A precision noise-comparator, M. G. Arthur, C. M. Allred, and M. K. Cannon. *IEEE Trans. Instr. Meas.* IM-13, No. 4, 301-305 (Dec. 1964).
5883. A preliminary study of the orifice flow characteristics of liquid nitrogen and liquid hydrogen discharging into a vacuum, J. A. Brennan. (Proc. 1963 Cryogenic Eng. Conf. Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), Book, *Advances in Cryogenic Engineering* 9, Paper E-6, 292-303 (Plenum Press Inc., New York, N. Y., 1964).
5884. A recalibration of the National Bureau of Standards tritiated water standard, W. B. Mann, R. W. Medlock, and O. Yura. *Intern. J. Appl. Radiation Isotopes* 15, No. 6, 351-361 (June 1964).
5885. A review of photodetachment and related negative ion processes relevant to aeronomy, L. M. Branscomb. *Ann. Geophys.* 20, No. 1, 88-105 (Jan.-Mar. 1964).
5886. A simple derivation of the FAXEN SOLUTION TO THE LAMM equation, G. H. Weiss. *J. Math. Phys.* 5, 675-676 (1964).
5887. A simplified freezing point apparatus, G. S. Ross and A. R. Glasgow, Jr. *Anal. Chem.* 36, No. 3, 700 (Mar. 1964).
5888. A study of geomagnetic effects associated with auroral zone electron precipitation observed by balloons, W. H. Campbell. *J. Geomagn. Geoelec.* 11, No. 1, 37-57 (June 1964).
5889. A study of auroral absorption events at the South Pole I. Characteristics of the events, J. K. Hargreaves, H. J. A. Chivers, and J. D. Petlock. *J. Geophys. Res.* 69, No. 23, 5001-5007 (Dec. 1964).
5890. A survey of ionospheric effects upon earth-space radio propagation, R. S. Lawrence, C. G. Little, and H. J. A. Chivers. *Proc. IEEE* 52, No. 1, 4-27 (1964).
5891. A survey of research on frozen food transport refrigeration, P. R. Achenbach. *ASHRAE J.* 6, No. 11, 29-36 (Nov. 1964).
5892. Containing both the Lorentz Group and SU<sub>3</sub>, A. O. Braut. *Il Nuovo Cimento* 32, 234-236 (Apr. 1964).
5893. A theoretical study of the MARTIAN AND CYTHERIAN ionospheres, R. B. Norton. *Natl. Aero. Space Admin. Tech. Note D-2333* (July 1964).
5894. A time-varying model for the ionospheric F2 layer, H. Rishbeth. *J. Atmospheric Terrest. Phys.* 26, No. 6, 657-685 (June 1964).
5895. A two-parameter family of hyper-POISSON distributions, G. E. Bardwell and E. L. Crow. *J. Am. Stat. Assoc.* 59, No. 305, 133-141 (Mar. 1964).
5896. A unitary symmetry selection rule and its application to new resonances, C. A. Levinson, H. J. Lipkin, and S. Meshkov. *Il Nuovo Cimento* 32, Ser. X, 1376-1379 (1964).
5897. A waveguide noise-tube mount for use as an interlaboratory noise standard, C. K. S. Miller, W. C. Dayvitt, and E. Campbell. (Proc. Intern. Measurements Conf.), Acta Ineko 3, 371-382 (1964).
5898. Absence of pronounced quadrupole effects in the nuclear resonance of  $\text{In}^{115}$  in a non-cubic environment, L. H. Bennett and R. J. Snodgrass. *Phys. Rev.* 134, No. 5A, A1290 (June 1, 1964).
5899. Abbreviated calendar record, January-February 1964, A. H. Shapley. *IQSY Notes* 7, 19-25 (May 1964).

5900. Absolute oscillator strengths for Fe I, C. H. Corliss and B. Warner. *Astrophys. J.* Suppl. Series No. 83, VIII, 395-438 (Feb. 1964).
5901. Absorption spectra of diatomic molecules in liquid and crystalline rare gases, G. L. Pollack and A. A. Pollack. *Book, Developments in Applied Spectroscopy*, ed. J. E. Forrester and E. Lanterman, 3, 376-382 (Plenum Press Inc., New York, N. Y., 1964).
- 5901A. Accuracy and precision of standards and measurements, W. A. Wildhack. *Acta Imeko* 4, 63-81 (1964).
5902. Accurate length measurement of meter bar with helium-neon laser, K. D. Mielenz, H. D. Cook, K. E. Gilliland, and R. B. Stephens. *Science* Letter 146, No. 3652, 1672-1673 (Dec. 25, 1964).
5903. Address encoding—a study of the double-binary keyboard as a link in the machine-sorting of mail, J. R. Cornog, J. F. Hockman, and J. C. Craig. (Proc. Winter Annual Meeting, American Society of Mechanical Engineers, Philadelphia, Pa., Nov. 17-22, 1963), *ASME Publ.* 63-WA-338 (1964).
- 5903A. ADI auxiliary publications program, R. W. Zimmerer. *IEEE Trans. Microwave Theory Tech.* MTT-13, No. 6, 883-884 (Nov. 1965).
5904. Advances in Cryogenic Engineering, Book, K. D. Timmerhaus, Editor. *Proceedings of the 1963 Cryogenic Engineering Conference*, Plenum Press Inc., New York, N. Y., 1964.
5905. Alkaline earth cation distribution in vitreous borates, S. Block and G. J. Piermarini. *Phys. Chem. Glasses* 5, No. 5, 138-144 (Oct. 1964).
5906. All-glass-sorption vacuum trap, F. B. Haller. *Rev. Sci. Instr.* 35, No. 10, 1356-1357 (Oct. 1964).
5907. Allotropy in some rare-earth metals at high-pressure, G. J. Piermarini and C. E. Weir. *Science* 144, No. 3614, 69-71 (Apr. 3, 1964).
5908. Alouette ionic magnetic-field and plasma studies, W. Calvert, H. Rishbeth, and T. E. VanZandt. *IG Bull.* No. 83, p. 16-19 (May 1964); *Trans. AGU* 45, No. 2, 398-401 (June 1964).
5909. An application of the inverse Z-transform theory to the synthesis of linear antenna arrays, M. T. Ma. *IEEE Trans. Ant. Prop.* AP-12, No. 6, 798-799 (Nov. 1964).
5910. An experimental 350-kv, 1-picofarad air capacitor, A. E. Peterson. *IEEE Trans. Paper* No. 63-926, No. 71, p. 129-131 (Mar. 1964).
5911. An explanation for the apparent polarization of some geomagnetic micropulsations, J. H. Pope. (Pearls), *J. Geophys. Res.* 69, No. 3, 399-405 (Feb. 1, 1964).
5912. An implication for lasers of an aspect of interference at high field strengths, J. A. White. *Nature Letter* 201, No. 4922, 911-912 (Feb. 29, 1964).
5913. An international comparison of voltage transformer calibrations to 350 KV, W. C. Sze, F. K. Harris, N. L. Kusters, O. Petersens, and W. J. M. Moore. *IEEE Trans. Commun. and Electron. Paper* No. 63-992, No. 70, 13-18 (Jan. 1964).
5914. An X-ray determination of the Debye temperature of silver iodide, G. Burley. *J. Phys. Chem. Solids* 25, 629 (1964).
5915. Analog simulation of zone melting, H. L. Mason. *Instr. Control Systems* 37, No. 1, 121-123 (Jan. 1964).
5916. Analysis of a differential phase shifter, D. A. Ellerbruch. *IEEE Trans. Microwave Theory Tech.* MTT-12, No. 4, 453-459 (July 1964).
5917. Analysis of the frost phenomena on a cryosurface, R. V. Smith, D. K. Edmonds, E. G. Brentari, and R. J. Richards. (Proc. 1963 Cryogenic Eng. Conf. Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), *Book, Advances in Cryogenic Engineering* 9, Paper B-7, 88-97 (Plenum Press Inc., New York, N. Y., 1964).
5918. Angular momentum distribution and emission spectrum of OH ( $2_{\Sigma^+}$ ) in the photodissociation of H<sub>2</sub>O, T. Carrington. *J. Chem. Phys.* 41, No. 7, 2012-2018 (Oct. 1, 1964).
5919. Annual observatory report from the National Bureau of Standards (spectroscopy), C. E. Moore. *Astron. J.* 69, No. 9, 696-698 (Nov. 1964).
5920. Anomalous transmission of rare gases for electrons of sub-excitation energies, J. A. Simpson. (Proc. 3d Intern. Conf. Physics of Electronic and Atomic Collisions, London, England, 1963), *Book, Atomic Collision Processes*, ed. M. R. C. McDowell, p. 128-134 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
5921. Anomaly in response of semi-conductor detector at low temperature, W. R. Dodge, S. R. Domen, A. T. Hirshfeld, and D. D. Hoppes. *IEEE Trans. Nucl. Sci.* NS-11, 1-14 (June 1964).
5922. Antireciprocality and memory in the statistical approach to irreversible thermodynamics, R. E. Nettleton. *J. Chem. Phys.* 40, No. 1, 112-116 (Jan. 1964).
5923. APPA-TAPPI reference material program. III. A discussion of lambda variance and its application to TAPPI standard T 414 m-49 for internal tearing resistance of paper, T. W. Lashof. *Tappi* 47, No. 8, 445 (Aug. 1964).
5924. Application of Bernstein polynomials and interpolation theory to linear array synthesis, M. T. Ma. *IEEE Trans. Ant. Prop.* AP-12, 668-677 (Nov. 1964).
5925. Application of the theory of absorbing Markov chains to the statistical thermodynamics of polymer chains in a lattice, J. Mazur. *J. Chem. Phys.* 41, No. 8, 2256-2266 (Oct. 1964).
5926. Approximating symmetric relations by equivalence relations, C. T. Zahn, Jr. *J. Soc. Ind. Appl. Math.* 12, No. 4, 840-847 (Dec. 1964).
5927. Approximations to the pair correlation function for a hard sphere fluid, M. Klein. *Phys. Fluids* 7, No. 3, 391-401 (Mar. 1964).
5928. APS division of electron physics—the first 20 years, L. L. Marton. *Phys. Today* pp. 44-50 (Oct. 1964).
5929. Aspects of the National Bureau of Standards instrumentation literature reference file, J. F. Mayo-Wellis. 19th Annual Instrument Society of America Conference and Exhibit, Preprint 20.6-5-64 (Oct. 12-15, 1964).
5930. Attenuation of radio waves in the troposphere, B. R. Bean. *Book, Advances in Radio Research* 1, 121-155 (Academic Press, Inc., New York, N. Y., 1964).
5931. Audiofrequency compliances of prestressed quartz, fused silica, and aluminum, M. Greenspan and C. E. Tschiegg. *J. Acoust. Soc. Am.* 36, No. 3, 450-457 (Mar. 1964).

5932. Automatic optical design, O. N. Stavroudis. Book, *Advances in Computers*, Ed. F. L. Alt and M. Rubinoff, IV, 227-255 (Academic Press Inc., New York, N. Y., 1964).
5933. Behavior of coaxial cable connectors for pulses with nanosecond risetimes, R. B. Schwartz and A. C. B. Richardson. *Nuclear Instr. Methods.* 29, 83-88 (North-Holland Publ. Co., Amsterdam, The Netherlands, 1964).
5934. Binary error probability due to an adaptable fading model, M. Nesenbergs. *IEEE Trans. Commun. Systems CS-12*, No. 1, 64-73 (Mar. 1964).
5935. Brightness temperature of the atmosphere using a bi-exponential model in the 6-45 GHz frequency range, E. J. Dutton, B. R. Bean, and E. R. Westwater. *Proc. 1964 World Conf. Radio Meteorology and 11th Weather Radar Conf.* pp. 212-215 (Sept. 1964).
5936. Bound states in a Debye-Huckel potential, C. R. Smith. *Phys. Rev.* 134, No. 5A, A1235-A1237 (June 1964).
5937. Calculation of the radiative tail in the inelastic scattering electrons, L. C. Maximon and D. B. Isabelle. *Proc. Intern. Conf. Nuclear Physics*, Paris, France, July 2-8, 1964, 2, 1031-1033 (1964).
5938. Calibration of potentiometers by resistance bridge methods, D. Ramaley. *Instr. Control Systems* 37, No. 1, 106-108 (Jan. 1964).
5939. Unassigned.
5940. Calorimetry (report on Calorimetry Conf.), G. T. Armstrong. *Science* 143, No. 3602, 158-163 (Jan. 10, 1963); *Phys. Today* 17, No. 2, 50-54 (Feb. 1964).
5941. Carbon monoxide on niobium, R. Klein and J. W. Little. *Surface Sci.* 2, 167-176 (North-Holland Publ. Co., Amsterdam, The Netherlands, 1964).
5942. Cation-exchange between molten salts and a special porcelain of high sodium content, R. J. Labrie. *J. Electrochem. Soc.* 111, No. 4, 473-476 (Apr. 1964).
5943. Change in the heat capacity of boron trioxide during the glass transformation, S. S. Chang and A. B. Bestul. *J. Phys. Chem.* 68, No. 10, 3082 (Oct. 1964).
5944. Changes in living, J. P. Eberhard. *Proc. Conf. Environment of Change*, Sterling Forest, Tuxedo, N. Y., June 14, 17, 1964, pp. 62-67 (1964).
5945. Changes in relation between refractive index and Young's modulus as the result of successive heat treatment, E. H. Hamilton. *J. Am. Ceram. Soc.* 47, No. 4, 167-170 (Apr. 1964).
5946. Characteristics energy losses of electrons in solids, L. Marton and C. Marton. Book, *Actions Chimiques et Biologiques des Radiations*, Chapt. IV, p. 260-281 (Mason et C<sup>10</sup> Editeurs, Paris, France, 1964).
5947. Characteristics of insoluble protein of tooth and bone—I. Fluorescence of some acidic hydrolytic fragments, S. A. Mancewicz and K. C. Hoerman. *Arch. Oral Biol.* 9, 535-544 (Oct. 1964).
5948. Charge-transfer absorption spectra of NO in Kr and CH<sub>3</sub>OH solutions, E. E. Ferguson and H. P. Broida. *J. Chem. Phys.* 40, No. 12, 3715-3716 (June 15, 1964).
5949. Climatology of elevated super-refractive layers arising from atmospheric subsidence, B. A. Cahoon and L. P. Riggs. *Proc. 1964 World Conf. Radio Meteorology and 11th Weather Radar Conf.*, pp. 52-55 (Sept. 1964).
5950. Coherence theories of tropospheric radio propagation, J. R. Wait. *IEEE Trans. Ant. Prop.* AP-12, No. 5, 649-651 (Sept. 1964).
5951. Coherent Raman effect in the off-axis Raman resonator, H. Takuma and D. A. Jennings. *Appl. Phys. Letters* 4, No. 11, 185-186 (June 1964).
5952. Collision induced microwave absorption in compressed gases. III. CO<sub>2</sub>-foreign-gas mixtures, A. A. Maryott and S. J. Kryder. *J. Chem. Phys.* 41, No. 6, 1580-1582 (Sept. 15, 1964).
5953. Colorimetry in paraformal fields. II. Additivity failure, I. Nimeroff. *J. Opt. Soc. Am.* 54, No. 6, 833-838 (June 1964).
5954. Colorimetry in paraformal fields. I. Color-matching functions, I. Nimeroff. *J. Opt. Soc. Am.* 54, No. 6, 824-832 (June 1964).
5955. Comment on obscurities of oscillator noise, L. Fey, W. R. Atkinson, and J. Newman. *Proc. IEEE Letter* 52, 104-105 (Jan. 1964).
5956. Comments on the paper "A liquid-medium step-function pressure calibrator," by R. O. Smith, J. R. Cross. *Am. Soc. Mech. Eng. Series D*, No. 86, pp. 729 (1964).
5957. Comments on the paper "An experimental investigation of backscattering of radio waves from the equatorial electrojet," by R. L. Closs, R. Cohen and D. T. Farley, Jr. *Proc. Phys. Soc.* 84, Pt. 4, No. 540, 619-620 (J. W. Arrow-smith Ltd., London, England, June 1964).
5958. Comparative rate measurements with a single-pulse shock tube, W. Tsang. *J. Chem. Phys.* 40, No. 4, 1171-1172 (Feb. 1964).
5959. Comparison calibration of inductive voltage dividers, R. V. Lisle and T. L. Zapf. *ISA Trans.* 3, No. 3, 238-242 (July 1964).
5960. Comparison of a new SU<sub>2</sub> prediction with experiment, S. Meshkov, G. A. Snow, and G. B. Yodh. *Phys. Rev. Letters* 12, No. 3, 87-92 (Jan. 20, 1964).
5961. Comparison of experimental reaction cross sections with various relations obtained from SU<sub>2</sub>, S. Meshkov. *Proc. Conf. Symmetry Principles at High Energy*, Coral Gables, Fla., Jan. 30, 1964, p. 104-126 (1964).
5962. Comparison of single-point and two-point loading for determining the strength of flat glass, J. J. Kerper and T. G. Scuderi. *Proc. Am. Soc. Testing Materials* 64, 1037-1043 (1964).
5963. Complex Lorentz group with a real metric. I. Group structure, A. O. Barut. *J. Math. Phys.* 5, 1652-1656 (Nov. 1964).
5964. Composites in construction, A. A. Bates. *Stanton Walker Lecture Series on the Materials Sciences*, Nov. 20, 1963, Lecture No. 1, pp. 15 (University of Maryland, College Park, Md., 1964).
5965. Computer interpretation of English text and picture patterns, R. A. Kirsch. *IEEE Trans. Electron. Computers*, EC-13, No. 4, 363-376 (Aug. 1964).
5966. Conductance of copper m-benzenedisulfonate hexahydrate in N-methylpropionamide from 20° to 40°, T. B. Hoover. *J. Phys. Chem.* 68, No. 10, 3003-3008 (Oct. 1964).
5967. Conductance of potassium chloride in highly purified N-methylpropionamide from 20° to 40°, T. B. Hoover. *J. Phys. Chem.* 68, No. 4, 876-879 (Apr. 1964).
5968. Conduction-cooled, concentric sphere, glass trap, S. Ruthberg. *Vacuum* 14, No. 1, 11 (Jan. 1964).

6147. Interlaboratory evaluation of procedures for tongue-tearing strength of woven fabrics, E. B. Randall. J. Mater. Res. Std. 4, No. 2, 53-61 (Feb. 1964).
6148. Internal friction in rutile containing point defects, J. B. Wachtman, Jr., and L. R. Doyle. Phys. Rev. 135A, 276 (1964).
6149. International comparison of dielectric measurements, H. E. Bussey, J. E. Gray, E. C. Bamberger, E. Rushton, G. Russell, B. W. Petley, and D. Morris. IEEE Trans. Instr. Meas. IM-13, No. 4, 305-311 (Dec. 1964).

6150. International intercomparison of standards and microwave power measurements, G. F. Engen. (Proc. 3d Intern. Measurements Conf., Stockholm, Sweden, 1964) Acta Imeko 1, 337-346 (1964).
6151. International geophysical calendar for the years of the quiet sun 1964-1965, A. H. Shapley and J. V. Lincoln. J. Atmospheric Terrest. Phys. 26, No. 1, 151-157 (Jan. 1964); Nature 201, 11-13 (Jan. 4, 1964).
6152. International symposium on the Solar Spectrum, C. E. Moore. Utrecht, Aug. 26-31, 1963, Appl. Opt. 3, No. 1, 12 (Jan. 1964).
6153. Interpretation of frequency shifts due to electron exchange collisions, P. L. Bender. Phys. Rev. 134, No. 5A, A1174-A1180 (June 1, 1964).
6154. Interpretation of maxima in the absorption of soft X-ray, J. W. Cooper. Phys. Rev. Letters 13, No. 25, 762-764 (Dec. 21, 1964).
6155. Interpretation of potentiometric titrations of weak acids in methanol-water solvents, K. C. Ong, R. A. Robinson, and R. G. Bates. Anal. Chem. 36, No. 10, 1971-1972 (Sept. 1964).
6156. Introduction, V. J. Johnson. Am. Soc. Refrigerating and Air Conditioning Engineers Symp., The Role Cryogenics in Playing in Expanding Mechanical Engineering at the semi-annual meeting of the Am. Soc. of Heating, Refrigerating and Air Conditioning Engineers, New York, N. Y., Feb. 11-14, 1963, p. 111-iv (1964).
6157. Introduction, R. B. Scott. Book, Technology and Uses of Liquid Hydrogen, Chapt. 1, pp. 1-8 (Pergamon Press Ltd., London, England, 1964).
6158. Investigation of plasma boundaries with electromagnetic surface waves, H. W. Wassink and A. J. Estlin. J. Appl. Phys. 35, No. 10, 2795-2800 (Oct. 1964).
6159. Ionizing radiation and constitution of the atmosphere, T. E. VanZandt. Proc. URSI XIVth General Assembly, Tokyo, Japan, Sept. 1963, XIII, 158-164 (1964).
6160. Ionosonde studies of some chemical releases in the ionosphere, J. W. Wright. (Proc. NATA Advanced Study Institute, Sheikampen, Norway, Apr. 17-26, 1963), Book, Electron Density Distribution in the Ionosphere and Exosphere, p. 116-137 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6161. Ionosphere explorer I satellite: first observations from the fixed-frequency topside sounder satellite, W. Calvert, R. W. Knecht, and T. E. VanZandt. Science 146, No. 3642, 391-395 (Oct. 16, 1964).
6162. Ionospheric absorption in conjugate regions and possible oscillation of the ionosphere, H. J. A. Chivers and J. K. Hargreaves. Nature, 202, 891-893 (May 30, 1964).
6163. Ionospheric storms, S. Matsushita. Proc. URSI XIVth General Assembly, Tokyo, Japan, Sept. 1963, XIII, 169-180 (1964).
6164. Ionospheric winds: motions into night and sporadic E correlations, N. W. Rosenberg, H. D. Edwards, and J. W. Wright. (Proc. 4th Intern. Space Science Symp., Warsaw, June 4-10, 1963), Book, Space Research, ed. P. Muller. IV, 171-181 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6165. Is life possible on other planets? W. R. Bozman. Sci. Children 2, No. 4, 7 (Dec. 1964).
6166. Isotopic fractionation of uranium related to roll features in sandstone, Shirley Basin, Wyoming, J. N. Rosholt, E. N. Harshman, W. R. Shields, and E. L. Garner. Econ. Geology 59, 570 (1964).
6167. Ixiolite and other polymorphic types of  $\text{FeNbO}_4$ , R. S. Roth and J. L. Waring. Am. Mineralogist 49, Nos. 3 and 4, 242-246 (Mar.-Apr. 1964).
6168. Jet thinning devices for preparation of  $\text{Al}_2\text{O}_3$  electron microscope specimens, N. J. Tighe. Rev. Sci. Instr. 35, No. 4, 520-521 (Apr. 1964).
6169. Kinetics and mechanism of the low-cubic to hexagonal phase transformation of silver iodide, G. Burley. J. Phys. Chem. 68, No. 5, 1111-1113 (1964).
6170. Kinetics of the acid-catalyzed hydrolysis of acetal in dimethyl sulfoxide-water solvents at 15, 25, and 35°, R. K. Wolford. J. Phys. Chem. 68, No. 11, 3392-3398 (1964).
6171. Kikuchi pattern from a silicon wedge, F. A. Fowler. Acta Cryst. 17, No. 7, 869-871 (July 1964).
6172. K-ionization cross sections for relativistic electrons, J. W. Motz, and R. C. Placidos. Phys. Rev. 136, No. 3A, A662-A665 (Nov. 2, 1964).
6173. Laboratory studies of helium ion loss processes of interest in the ionosphere, E. E. Ferguson, F. C. Fehsenfeld, D. B. Dunkin, A. L. Schmeltekopf, and H. I. Schiff. Planetary Space Sci. 12, 1169-1171 (Dec. 1964).
6174. Lasers for length measurement, A. G. McNish. Science 146, No. 3641, 177-182 (Oct. 1964).
6175. Leaf temperature and energy exchange, D. M. Gates. Arch. Meteorol. Geophys. Bioklimatol. 12, No. 2, 321-336 (1964).
6176. LF-VLF frequency and time services of the National Bureau of Standards, D. H. Andrews. (Proc. 19th Annual ISA Conf. and Exhibit, New York, N. Y., Oct. 12-15, 1964), ISA Preprint 21.3-2-64 (1964).
6177. Light Scattering from Dilute Polymers Solutions, Book, D. McIntyre and F. Gornick, Editors. International Science Review Series 3 (Gordon and Breach, New York, N. Y., July 1964).
6178. Linewidths in the 2-0 band of carbon monoxide broadened by nitrogen and hydrogen, T. C. James and E. K. Plyler. J. Chem. Phys. 40, No. 1, 221-223 (Jan. 1, 1964).
6179. Liouville representation of quantum mechanics with application to relaxation, U. Fano. (Proc. Lectures on the Many-Body Problems 5th Intern. School of Physics, Revello, Italy, Apr. 17-May 4, 1963), Book, Lectures of the Many-Body Problems 2, 1-294 (Academic Press Inc., New York, N. Y., 1964).
6180. Liquid hydrogen bubble chambers, H. P. Hernandez and B. W. Birmingham. Book, Technology and Use of Liquid Hydrogen, Chapt. 8, pp. 228-284 (Pergamon Press Inc., New York, N. Y., 1964).
6181. Local curvature of wavefronts in an optical system, J. A. Kneisly, II. J. Opt. Soc. Am. 54, No. 2, 229-235 (Feb. 1964).
6182. Long lived effects in the D region after the high-altitude nuclear explosion of July 9, 1962, A. H. Brady, D. D. Crombie, A. G. Jean, A. C. Murphy, and F. K. Steele. J. Geophys. Res. 69, No. 9, 1921-1924 (May 1, 1964).
6183. Low temperature infrared studies of the chemistry of free radicals, M. E. Jacox and D. E. Milligan. Appl. Opt. 3, No. 7, 873-876 (July 1964).

6184. Low temperature infrared study of intermediates in the photolysis of HNCO and DNCO, M. E. Jacox and D. E. Milligan. *J. Chem. Phys.* 40, No. 9, 2457-2460 (May 1964).
6185. Low temperature magnetic transitions in lanthanon trichlorides, J. C. Eisenstein, R. P. Hudson, and B. W. Mangum. *Physics Letters* 12, No. 1, 5 (Sept. 1, 1964).
6186. Magnetic properties of ilmenite-hematite solid solutions, C. F. Jefferson and R. G. West. *J. Am. Ceramic Soc.* 47, No. 11, 544-548 (Nov. 1964).
6187. Magnetic tape recording and reproducing of atmospheric noise with a wide dynamic range, E. C. Bolton. *Rev. Sci. Instr.* 35, No. 3, 377-380 (Mar. 1964).
6188. Making precision voltage measurements on Zener diodes, W. G. Eicke, Jr. *IEEE Trans. Commun. Electron.* 83, No. 74, 433-438 (Sept. 1964).
6189. Mass spectrometric investigation of the high temperature reaction between nickel and chlorine, J. D. McKinley. *J. Chem. Phys.* 40, No. 1, 120-125 (Jan. 1, 1964).
6190. Mass spectrometric investigation of the nickel-bromine surface reaction, J. D. McKinley. *J. Chem. Phys.* 40, No. 2, 576-581 (Jan. 1964).
6191. Mass spectrometric investigation of the yttrium-chloride surface reaction, J. D. McKinley. *J. Chem. Phys.* 41, No. 9, 2814-2817 (Nov. 1, 1964).
6192. Mass spectrometric study of the isotopic exchange rate of oxygen atoms with  $O_2$ , NO and  $NO_2$ , J. T. Herron and F. S. Klein. *J. Chem. Phys.* 40, No. 9, 2731 (May 1964).
6193. Mass spectrometric study of the photoionization of acetylene and acetylene- $d_2$ , V. H. Dibeler and R. M. Reese. *J. Chem. Phys.* 40, No. 7, 2034-2035 (Apr. 1, 1964).
6194. Mass spectrometric study of the production of methylamine from azomethane, M. E. Wacks. *J. Phys. Chem.* 68, No. 9, 2725-2726 (Sept. 1964).
6195. Mass spectrometric study of the reactions of O atoms with NO and  $NO_2$ , F. S. Klein and J. T. Herron. *J. Chem. Phys.* 41, No. 5, 1285-1290 (Sept. 1, 1964).
6196. Mass spectrometry, R. M. Reese and F. N. Harlike. *Anal. Chem.* 36, No. 5, 278R-293R (Apr. 1964).
6197. Matter transport in solids, R. E. Howard and A. B. Lidiard. *Rept. Progr. Phys.* XXVII, 161-240 (1964).
6198. Measurement of effective temperatures of microwave noise sources, J. S. Wells, W. C. Daywitt, and C. K. S. Miller. *IEEE Trans. Instr. Meas.* IM-13, No. 1, 17-28 (Mar. 1964).
6199. Measurement of photochemical degradation in certain plastics by color reactions with phenylenediamines, V. E. Gray and J. R. Wright. *J. Appl. Polymer Sci.* 8, No. 4, 1505-1519 (1964).
6200. Measurement of very-high pressures, E. C. Lloyd and A. Giardini. *Acta Imeko* 2, 305 (1964).
6201. Measuring the directivity of a directional coupler using a sliding short-circuit and an adjustable sliding termination, R. W. Beatty. *IEEE Trans. Microwave Theory Tech.* MTT-12, No. 3, 283 (May 1964).
6202. Mechanical and dielectric relaxation of crystalline polymers in relation to degree of crystallinity and morphology, E. Passaglia. *SPE Trans.* 4, No. 3, 169-177 (July 1964).
6203. Mechanism of inactivation of bacteriophages by metals, N. Yamamoto, C. W. Hiatt, and W. Haller. *Biochim. Biophys. Acta* 91, 257-261 (1964).
6204. Mechanism of the photolysis of ethane at 1470 Å, R. F. Hampson, Jr., J. R. McNesby, H. Akinoto, and I. Tanaka. *J. Chem. Phys.* 40, No. 4, 1099-1105 (Apr. 1964).
6205. Medical applications, E. F. Brentari and R. V. Smith. *ASHRAE Guide and Data Book*, Chapt. 68, p. 773-778 (Am. Soc. Heating, Refriger. Air Conditioning Engrs. Inc., New York, N. Y., 1964).
6206. Metastable levels in the continuum and the independent particle model, F. Prats and U. Fano. (Proc. 3d Intern. Conf. Physics of Electronic and Atomic Collisions, London, England, 1963), Book, Atomic Collision Processes, ed. M. R. C. McDowell, p. 600-605 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6207. Microscopic-astrophysics and the development of astrophysical laboratories, R. N. Thomas. *Bull. Centre Intern. d'Astrophysique de l'Observatoire de Nice*, No. 1, p. 7-16 (Nice, France, 1964).
6208. Microwave and high frequency calibration services of the National Bureau of Standards (Parts I-IV), R. E. Larson. *IEEE Trans. Microwave Theory Tech.* Part I, MTT-12, No. 4, 480-482 (July 1964); Part II, MTT-12, No. 5, 572-576 (Sept. 1964); Part III, MTT-12, No. 6, 623-624 (Nov. 1964).
6209. Microwave calibration techniques at the National Bureau of Standards, R. E. Larson. (Proc. 3d Intern. Measurements Conf.), *Acta Imeko* 3, 383-393 (1964).
6210. Microwave propagation in an overdense bounded magnetoplasma, B. Wieder. *Phys. Fluids* 7, No. 7, 964-972 (July 1964).
6211. Microwave spectroscopy, D. R. Lide. *Ann. Rev. Phys. Chem.* 15, 225-250 (1964).
6212. Microwave spectrum of lithium chloride, D. R. Lide, Jr., P. Cahill, and L. P. Gold. *J. Chem. Phys.* 40, No. 1, 156-159 (Jan. 1964).
6213. Microwave spectrum of the SO radical, F. X. Powell and D. R. Lide. *J. Chem. Phys.* 41, No. 5, 1413-1419 (Sept. 1964).
6214. Microwave studies of butadiene derivatives. II. Isoprene, D. R. Lide, Jr., and M. Jen. *J. Chem. Phys.* 40, No. 1, 252-253 (Jan. 1964).
6215. Minutes of the Meeting at the Ohio State University, Columbus, Ohio, of the Triple Commission for Spectroscopy, June 12, 1963, C. E. Moore. *J. Opt. Soc. Am.* 54, No. 3, 425-432 (Mar. 1964).
6216. Modern methods of analysis for design of cryogenic equipment and processes, T. R. Strobridge and D. B. Mann. *Am. Soc. Refrigerating and Air Conditioning Engineers Symp., The Role Cryogenics is Playing in Expanding Mechanical Engineering*, Am. Soc. Refrigerating and Air Conditioning Engineers, New York, N. Y., Feb. 11-14 1964, p. 25-37 (1964).
6217. Modulus of rupture of glass in relation to fracture pattern, J. J. Kerper and T. G. Scuderi. *Am. Ceram. Soc. Bull.* 43, No. 9, 622-625 (Sept. 7, 1964).
6218. Morphology of thermally evaporated zinc cleavage surfaces, A. W. Ruff, Jr. *J. Chem. Phys.* 41, No. 5, 1204-1213 (Sept. 1, 1964).

- 6218A. Multiple scattering corrections for proton range measurements, M. J. Berger and S. M. Seltzer. *Natl. Acad. Sci.-Natl. Res. Council Publ.* 1133, No. 5, Studies in Penetration of Charged Particles in Matter. Nuclear Science Series Report 39, pp. 69-98 (1964).
6219. National Bureau of Standards Central Radio Propagation Laboratory, C. G. Little. *Boulder, Astron. J.* 69, No. 9, 698-700 (Nov. 1964).
6220. National standard reference data program, E. L. Brady and S. A. Rossmasser. *D. C. Libraries* 35, No. 4, 57-61 (Oct. 1964).
6221. Natural electromagnetic phenomena below 30 ke/s, R. M. Gallet. *NATA Advance Study Institute*, Bad Hamburg, 1963, pp. 167-204 (Plenum Press Inc., New York, N. Y., 1964).
6222. Nighttime variations of F-region electron density profiles at Puerto Rico, T. Shimazaki. *J. Geophys. Res.* 69, No. 13, 2781-2797 (July 1, 1964).
6223. NMR studies of asymmetric ethanolic rotators: 1,2-disubstituted propanes, H. R. Finegold. *J. Chem. Phys.* 41, No. 6, 1808-1818 (Sept. 1964).
6224. Nonequilibrium thermodynamics of canonically invariant relaxation processes, H. C. Andersen, K. E. Shuler, I. Oppenheim, and G. H. Weiss. *J. Chem. Phys.* 41, No. 10, 3012-3019 (Nov. 1964).
6225. Non-equilibrium thermodynamics of creep in polycrystals, R. E. Nettleton. *Physica* 20, 1989-2002 (1964).
6226. Nonlinear ambipolar diffusions of an isothermal plasma across magnetic field, E. R. Mosburg, Jr., and K. B. Persson. *Phys. Fluids* 7, No. 11, 1829-1833 (Nov. 1964).
6227. Nonresonant absorption and collision diameters in the foreign-gas broadening of symmetric top molecules, G. Birnbaum, and A. A. Maryott. *J. Chem. Phys.* 41, No. 1, 154-157 (July 1, 1964).
6228. Nonspattering solder flux, W. R. Bjorklund. *Rev. Sci. Instr.* 35, No. 10, 1369-1370 (Oct. 1964).
6229. Note on "interferometric measurement of vibration amplitudes" K. D. Mielenz. *Appl. Opt.* 3, 542 (Apr. 1964).
6230. Note on the partition function, M. Newman. *Am. Math. No.* 71, 1022 (1964), M. Newman, J. R. Smart, Symplectic modular groups, *Acta Arithmetica* 9, 83-89 (1964).
6231.  $N_2$  oscillator strength from arc spectroscopic measurements using an analog computer, J. B. Shumaker. *Proc. 6th Intern. Symp. Ionization Phenomena in Gases VII*, No. 15, 311-313 (June 1964).
6232. Nuclear magnetic relaxation of the impurity nucleus in dilute ferromagnetic alloys, R. L. Streever. *Phys. Rev.* 134, No. 6A, A1612-A1617 (June 1964).
6233. Nuclear magnetic resonance in lead alloys, R. J. Snodgrass and L. H. Bennett. *Phys. Rev.* 134, No. 5A, A1294 (June 1, 1964).
6234. Nuclear magnetic resonances of  $^{69}\text{Ga}$  and  $^{71}\text{Ga}$  in gallium-substituted yttrium iron garnet, R. L. Streever and G. A. Urano. *Phys. Rev. Letters* 12, No. 22, J516-1-3 (June 1, 1964).
6235. Nucleation characteristics of static liquid nitrogen and liquid hydrogen, J. Hord, R. B. Jacobs, C. C. Robinson, and L. L. Sparks. *J. Eng. Power* 86, 485-494 (Oct. 1964).
6236. Numerical analysis of the thermal environment of occupied underground spaces with finite cover using a digital computer, T. Kusuda and P. R. Achenbach. *ASHRAE Trans.* and J. 6, No. 6, 99-105 (June 1964).
6237. Obscurities of oscillator noise, L. Fey, W. R. Atkinson, and J. Newman. *Proc. IEEE Letter to Editor* 52, 104-105 (Jan. 1964).
6238. Observation of FeO in absorption by flash heating and kinetic spectroscopy, A. M. Bass, N. A. Keubler, and L. S. Nelson. *J. Chem. Phys.* Note 40, No. 10, 3121 (May 15, 1964).
6239. Observation of optically forbidden transitions in the continuum of the rare gases by electron energy loss measurements, J. A. Simpson, S. R. Mielczarek, and J. Cooper. *J. Opt. Soc. Am.* 54, No. 2, 269-270 (Feb. 1964).
6240. Observations of carbon monoxide and oxygen on tantalum with the field emission microscope, R. Klein. *J. Chem. Phys.* 41, No. 2, 571 (July 1964).
6241. Observatory report--Joint Institute for Laboratory Astrophysics of the National Bureau of Standards and University of Colorado, Boulder, Colorado, L. M. Branscomb. *Astron. J.* 69, No. 9, 700-703 (Nov. 1964).
6242. Observed line shapes of collective excitations in Al, Be, and Ge, N. Swanson. *J. Opt. Soc. Am.* 54, No. 9, 1130-1133 (Sept. 1964).
6243. On a problem of G. Sansone, M. Newman. *Ann. Mat.* LXV, 27-34 (1964).
6244. On associated ions in polyelectrolytes and trapped Brownian trajectories, J. L. Jackson and S. R. Coriell. *J. Chem. Phys.* Note 40, No. 5, 1460-1461 (Mar. 1, 1964).
6245. On-line data handling system for the National Bureau of Standards LINAC, J. E. Leiss, J. Broberg, R. A. Schrack, and J. M. Wyckoff. *IEEE Trans. Nuclear Sci.* NS-11, No. 3, 331-337 (Oct. 1964).
6246. On matching problems, J. Edmonds, A. J. Goldman, C. Witzgall, and C. T. Zahn, Jr. *Proc. ARO Working Group on Computers, ARO-D Report 65-1*, pp. 46-50 (Office, Chief Res. & Develop., Feb. 1964).
6247. On phase changes in very-low-frequency propagation induced by an ionospheric depression of finite extent, J. R. Wait. *J. Geophys. Res.* 69, No. 3, 441-445 (Feb. 1, 1964).
6248. On the anomalous NMR linewidth in lithium and sodium, D. Zamir, R. C. Wayne, and R. M. Cotts. *Phys. Rev. Letters* 12, No. 12, 327 (Mar. 23, 1964).
6249. On the concentrations of vibrationally excited  $O_2$  formed in the flash photolysis of  $NO_2$ , A. M. Bass and D. Garvin. *J. Chem. Phys.* Letter 40, No. 6, 1772-1773 (Mar. 15, 1964).
6250. On the constitution of the topside ionosphere, R. W. Knecht, H. Rishbeth, and T. E. VanZandt. (Proc. NATO Advanced Study Inst., Skeikampen, Norway, Apr. 17-26, 1963), Book, Electron Density Distribution in the Ionosphere and Exosphere, p. 348-350 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6251. On the effect of heterogeneity in molecular weight on the sedimentation equilibrium second virial coefficient of polymers in good solvents, I. H. Billick. *J. Phys. Chem.* 68, No. 7, 1798-1800 (July 1964).

6252. On the geomagnetic effect of the starfish high-altitude nuclear explosion, H. Maeda, S. Matsushita, M. Shiragaoka, and M. Yashuhara. *J. Geophys. Res.* 69, No. 5, 917-945 (Mar. 1, 1964).
6253. On the height distribution of the ratio of negative ion and electron densities in the lowest ionosphere, G. C. Reid, D. K. Bailey, and H. Leinbach. *J. Atmospheric Terrest. Phys.* 26, No. 1, 145-147 (Jan. 1964).
6254. On the identity of three generalized master equations, R. Zwanzig. *Physica* 30, 1109-1123 (1964).
6255. On the implication of diurnal, seasonal and geographical variations in composition of high atmosphere from F-region measurements, J. W. Wright. (Proc. NATO Advanced Study Institute, Sheikampen, Norway, Apr. 17-26, 1963), Book, Electron Density Distribution in the Ionosphere and Exosphere, p. 186-198 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6256. On the location of the zeros of some intrapolymerials with prescribed coefficients, O. Shisha and J. L. Walsh. *Pacific J. Math.* 14, No. 3, 1103-1109 (1964).
6257. On the measurement of random chain scission by stress relaxation, H. Yu. *Polymer Letters* 2, 631-635 (June 1964).
6258. On the possibility of the measurement of the nuclear  $2^+$ -pole deformation, M. Danos, W. Greiner, and C. B. Kohr. *Physics Letters* 2, No. 4, 344 (1964).
6259. On the relaxation of the hard sphere Rayleigh and Lorentz gas, K. Andersen and K. E. Shuler. *J. Chem. Phys.* 40, 633 (Feb. 1, 1964).
6260. On the structure of intrapolymerials with prescribed coefficients, O. Shisha. *Pacific J. Math.* 14, No. 3, 1039-1051 (1964).
6261. On the theory of Schumann resonances in the earth-ionosphere cavity, J. R. Wait. *Can. J. Phys.* 42, 575-582 (Apr. 1964).
6262. On the twilight sodium emission-1: Observations from a southern hemisphere station, M. Gadsden. *Ann. Geophys.* 20, No. 3, 261-272 (1964).
6263. On the twilight sodium emission-2: A theoretical model of sodium abundance, M. Gadsden. *Ann. Geophys.* 20, No. 4, 383-396 (Oct.-Dec. 1964).
6264. On the validity of the Einstein-Smoluchowski theory of light scattering, R. Zwanzig. *J. Am. Chem. Soc.* 86, 3489-3493 (Mar. 30, 1964).
6265. On trapped trajectories in Brownian motion, J. L. Jackson and S. R. Coriell. *J. Math. Phys.* 5, No. 8, 1075-1078 (Aug. 1964).
6266. Open-probe thermocouple control of radio-frequency heating, A. W. Ruff, Jr. *Rev. Sci. Instr.* 35, No. 6, 760-761 (June 1964).
6267. Optical constants in the vacuum ultraviolet and electron energy losses, L. L. Marton. *J. Quant. Spectry. Radiative Transfer* 2, 671-678 (May 1964).
6268. Optical constants of thin films from the characteristic electron energy losses, R. E. Lavilla and H. Mendlowitz. *J. Phys.* 25, Nos. 1 & 2, 114-118 (Jan.-Feb. 1964).
6269. Optical depolarization and scintillation measurements over a terrestrial path, J. R. Meyer-Arendt. *Proc. 3d Tropospheric Refraction Effects Meeting* 1, 115-123 (Nov. 1964).
6270. Optical detection of microwave transitions between excited electronic states of CN and the identification of the transitions involved, K. M. Evenson, J. L. Dunn, and H. P. Broida. *Phys. Rev.* 136, No. 6A, A1566-A1571 (Dec. 14, 1964).
6271. Optical heterodyne detection of the forward-stimulated Brillouin scattering, D. A. Jennings and H. Takuma. *Appl. Phys. Letters* 5, 241-242 (Dec. 1964).
6272. Optical investigations of film formation and removal on gold anodes in acidic oxalate solutions, W. E. Reid and J. Kruger. *Nature* 203, No. 4943, 402-403 (July 25, 1964).
6273. Optical studies at high pressures, L. S. Whatley, E. R. Lippincott, A. VanValkenburg, and C. E. Weir. *Science* 144, No. 3621, 968-976 (May 22, 1964).
6274. Optically observed inner shell electron excitation in neutral Kr and Xe, K. Codling and R. P. Madden. *Phys. Rev. Letters* 12, No. 4, 106-107 (Jan. 1964).
6275. Optically pumped magnetometers and related experiments in high magnetic fields, P. L. Bender. *Book, Quantum Electronics III*, ed. P. Grivet and N. Bloembergen I, 263-273 (Columbia University Press, New York, N. Y., 1964).
6276. Optimization of the Czerny-Turner spectrometer, A. B. Shafer, L. R. Megill, and L. A. Dippleman. *J. Opt. Soc. Am.* 54, No. 7, 879-887 (July 1964).
6277. Oxidation of asphalt in the presence of ozone, J. R. Wright and P. G. Campbell. *Am. Chem. Soc. Div. Petroleum Chem. Preprint* 9, No. 2, B99 (Apr. 1964).
6278. Unassigned.
6279. Oxygen atom reactions with condensed olefins, M. D. Scheer and R. Klein. *Science* 144, No. 3623, 1214 (June 1964).
6280. Ozonation of asphalt flux, P. G. Campbell and J. R. Wright. *Am. Chem. Soc. Div. Petroleum Chem. Preprint* 9, No. 3, 147-160 (Aug. 1964); *Ind. Eng. Chem. Product Res. Develop.* 3, No. 3, 186-194 (Sept. 1964).
6281. Pair correlations in closed-shell systems, M. Krauss and A. W. Weiss. *J. Chem. Phys.* 40, No. 1, 80-85 (Jan. 1964).
6282. Phase diagrams for ceramists, E. M. Levin, C. R. Robbins, and H. F. McMurdie. *Book, Am. Ceramic Society Inc., Columbus, Ohio, 1964.*
6283. Phase equilibria studies in mixed systems of rare earth and other oxides, R. S. Roth. *Book, Progress in Science and Technology of the Rare Earths*, Ed. L. Ewing, 1, 167-202 (Pergamon Press Inc., New York, N. Y., 1964).
6284. Phase variations in V.L.F. propagation, C. J. Chilton, D. D. Crombie, and A. G. Jean. *AGARDograph* 74, Propagation of Radio Waves at Frequencies Below 300 Kilocycles, Chapt. 19, p. 257-290 (Pergamon Press Inc., New York, N.Y., 1964).
6285. Photochemical changes in thin-layer chromatograms of polycyclic, aromatic hydrocarbons, M. N. Inscoe. *Anal. Chem.* 36, No. 13, 2505-2506 (Dec. 1964).
6286. Photoelimination of ethylene from 2-pentanone, P. Ausloos and R. E. Rebert. *J. Am. Chem. Soc.* 86, No. 20, 4512 (Oct. 20, 1964).

6287. Photolysis of cellulose in a vacuum with 2537A light, J. H. Flynn and W. L. Morrow. *J. Polymer Sci. A2*, No. 1, 81-89 (Jan. 1964).
6288. Photooxidation of asphalts in the presence of ozone, J. R. Wright and P. G. Campbell. *Am. Chem. Soc. Div. Petroleum Chem. Preprint* 9, No. 3, 161-174 (Aug. 1964).
6289. Physical processes in the D-region of the ionosphere, G. C. Reid. *Rev. Geophys.* 2, No. 2, 311-333 (May 1964).
6290. Physical properties of cements, based on zinc oxide hydrogenated rosin, *o*-ethoxybenzoic acid and eugenol, S. Civjan and G. M. Brauer. *J. Dental Res.* 43, No. 2, 281-299 (Mar.-Apr. 1964).
6291. Plastics, G. M. Kline. *Americana Annual*, p. 532 (Americana Corp., Chicago, Ill., 1964).
6292. Plastics and the dental market, G. M. Brauer. *Plastics World* 22, No. 10, 12 (Oct. 1964).
6293. Polar-cap absorption, D. K. Bailey. *Planetary Space Sci.* 12, No. 495-511 (May 1964).
6294. Polar modes of lattice vibration and polaron coupling constants in rutile (TiO<sub>2</sub>), D. M. Eagles. *J. Phys. Chem.* 25, No. 11, 1243-1251 (Nov. 1964).
6295. Polarized electrons and positrons by tagging technique, H. Olsen and L. C. Maximon. *Phys. Rev. Letters* 13, No. 3, 112-114 (July 1964).
6296. Polarography as an analytical tool, J. K. Taylor. *J. Assoc. Offic. Agri. Chem.* 47, No. 1, 21-27 (Jan. 1964).
6297. Polarons in an electric field, D. M. Larsen. *Phys. Rev.* 133, No. 3A, A860-A866 (Feb. 3, 1964).
6298. Polymer compression: visual observations on stressed biaxially oriented nylon 66, J. Powers and A. VanValkenberg. *J. Polymer Sci. B2*, No. 5, 533-536 (May 1964).
6299. Polymer property-structure studies at the National Bureau of Standards; thermal stability, G. M. Kline. *Proc. European Plastics Congress*, Milano, Italy, Sept. 20-23, 1964.
6300. Polymorphism of ABO<sub>3</sub> - type rare earth borate solid solutions, R. S. Roth, J. L. Waring, and E. M. Levin. (Proc. Third Rare Earth Research Conf., Apr. 2-24, 1963), Book, Rare Earth Research, Chapter on Structure of Rare Earth Compounds, p. 1030-1055 (Gordon and Breach Science Publ. Inc., New York, N. Y., 1964).
6301. Potential distribution in a rectangular semiconductor bar for use with four-point probe measurements, M. J. Reber. *Solid State Electron.* 7, No. 7, 525-529 (July 1964).
6302. Potential distribution method in equilibrium statistical mechanics, J. L. Jackson and L. S. Klein. *Phys. Fluids* 7, No. 2, 228-231 (Feb. 1964).
6303. Precession equation of a spinning particle in nonuniform fields, U. Fano. *Phys. Rev.* 133, No. 3B, B828-B830 (Feb. 10, 1964).
6304. Precise determination of the area of guarded electrodes for accurate dielectric measurements on solid-disk specimens, W. P. Harris. (Proc. Conf. Electric Insulation), 1963 Annual Report, Natl. Acad. Sci.-Natl. Res. Council Publ. 1141, p. 71 (1964).
6305. Precision detector for complex insertion ratio measuring systems, C. M. Allred and R. A. Lawton. *IEEE Trans. Instr. Meas.* IM-13, No. 2 & 3, 76-81 (June-Sept. 1964).
6306. Prediction of ionospheric characteristics at CRPL for sky-wave radio propagation at high frequencies, K. Davies. *Telecommunications J.* 31, No. 12, 339-350 (Dec. 1964).
6307. Preliminary thermodynamic properties of neon, R. D. McCarty and R. B. Stewart. (Proc. 1963 Cryogenic Eng. Conf. Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), Book, *Advances in Cryogenic Engineering* 9, Paper B-4, 161-167 (Plenum Press Inc., New York, N. Y., 1964).
6308. Preparation and properties of difluoroborane, T. D. Coyle, J. J. Ritter, and T. C. Farrar. *Proc. Chem. Soc.* p. 25 (Jan. 1964).
6309. Present status of project HAYSTAG, E. C. Marden and H. R. Koller. (Proc. 3d Annual Meeting Comm. Intern. Cooperation and Information Retrieval Among Examining Patent Offices, Vienna, Austria, Sept. 17-26, 1963), Book, *Information Retrieval Among Examining Patent Offices*, Ed. H. Pfeffer, pp. 163 (Spartan Books Inc., Baltimore, Md., 1964).
6310. Presidential address before the Electrochemical Society Meeting, Toronto, Canada, May 5, 1964, W. J. Hamer. *J. Electrochem. Soc.* 111, No. 7, 145C-147C (July 1964).
6311. Pressure broadening of DCl by HCl and HCl by DCl. A comparison of experimental results with Anderson's theory, T. C. James and R. J. Thibault. *J. Chem. Phys.* 40, No. 2, 534-540 (Jan. 15, 1964).
6312. Pressure-induced trapping phenomenon in silver iodide, H. C. Duerck and E. R. Lippincott. *Science* 146, 1295-1297 (1964).
6313. Progress report on aerosol packaged products, H. F. Wollin and S. Hasko. *Aerosol Age* Mag. 9, No. 9, 20 (Sept. 1964).
6314. Project FIST: fault isolation by semi-automatic techniques, G. Shapiro, G. J. Rogers, O. B. Laug, and P. M. Fulcomer, Jr. *IEEE Spectrum* pp. 98-111 (Aug. 1964); pp. 130-144 (Sept. 1964).
6315. Propagation and technical factors in radio spectrum utilization, RADIO SPECTRUM UTILIZATION, J. W. Herbstreit, Editor. A report of the Joint Technical Advisory Committee of the Institute of Electrical and Electronics Engineers, Inc. and the Electronic Industries Association, Chapt. III, pp. 30-208 (1964).
6316. Propagation of a reflected shock wave in a transverse magnetic field, Y. Boublil and K. B. Earnshaw. *Phys. Fluids* 7, No. 6, 876-881 (June 1964).
6317. Properties of normal and parahydrogen, R. B. Stewart and H. M. Roder. Book, *Technology and Uses of Liquid Hydrogen*, pp. 379-404 (Pergamon Press, Inc., New York, N. Y., 1964).
6318. Proton and fluorine NMR spectra of HBF<sub>4</sub>, T. C. Farrar and T. D. Coyle. *J. Chem. Phys.* 41, No. 9, 2612-2613 (Nov. 1, 1964).
6319. Proton-transfer reactions between H<sub>2</sub><sup>+</sup> and saturated hydrocarbons, P. Ausloos and S. G. Lias. *J. Chem. Phys.* 40, No. 12, 3599-3605 (June 15, 1964).
6320. Proton transfer reactions occurring in the gas-phase radiolysis, P. Ausloos and S. G. Lias. *Discussions Faraday Soc.* 39, 36-44 (1964).
6321. Pseudopentagonal twins in electrodeposited copper dendrites, F. Ogburn, B. Paretzkin, and H. S. Peiser. *Acta Cryst.* 17, 774-775 (1964).
6322. Pulsed and CW sinusoidal voltage and current measurements, M. C. Selby. *Proc. URSI XIVth General Assembly*, Tokyo, Japan, Sept. 1963, XIII, 92-100 (1964).

6323. Pyrolysis of new fluoropolymers, S. Straus and L. A. Wall. *SPE Trans.* 4, No. 1, 56-60 (Jan. 1964).
6324. Pyrolysis of polytrifluoroethylene: influence of gamma radiation and alkali treatment, S. Straus and L. A. Wall. *SPE Trans.* 4, No. 1, 61-65 (Jan. 1964).
6325. Radar echoes from Venus at 50 Mc/s, W. K. Klemperer, G. R. Ochs, and K. L. Bowles. *Astron. J.* 69, No. 1, 22-28 (Feb. 1964).
6326. Radiation from sources immersed in compressible plasma media, J. R. Wait. *Can. J. Phys.* 42, 1760-1780 (Sept. 1964).
6327. Radiative tail in elastic electron scattering, L. C. Maximon and D. B. Isabelle. *Phys. Rev. Letters* 133, No. 5B, 1344-1350 (Mar. 9, 1964).
6328. Radiative tail for inelastic electron scattering, L. C. Maximon and D. B. Isabelle. *Phys. Rev.* 136, No. 3B, B674-683 (Nov. 1964).
6329. Radio propagation by reflection from meteor trails, G. R. Sugar. *Proc. IEEE* 52, No. 2, 116-136 (Feb. 1964).
6330. Radio, the ionosphere, and IQSY, R. W. Knecht. *Proc. URSI XIVth General Assembly, Tokyo, Japan, Sept. 1963, XIII*, 181-194 (1964).
6331. Radiochemical determination of uranium of low activity, L. A. Currie, G. M. France, III, and P. A. Mullen. *Health Phys.* 10, 751-755 (1964).
6332. Ranking laboratories and evaluating methods of measurement in round-robin tests, T. W. Lashof. *Mater. Res. Std.* 4, No. 8, 397-407 (Aug. 1964).
6333. Rate dependence in a solarizing commercial x-ray emulsion: sensitometric properties, number, and structure of developed grains, M. Ehrlich, Wm. L. McLaughlin, and E. Zeitler. *J. Opt. Soc. Am.* 54, No. 2, 176-183 (Feb. 1964).
6334. Reaction  $^{59}\text{Co}(\text{p}, \text{n})^{58}\text{Fe}$ , M. Barloutaud, R. S. Caswell, J. Gastebois, A. G. de Pinho, and J. Quidort. (*Proc. Intern. Congress Nuclear Physics, Paris, France, July 2-8, 1964*), *Compt. Rend. Cong. Intern. Phys. Nucleaire II*, 717-719 (Centre National de la Recherche Scientifique, Paris, France, 1964).
6335. Reaction of deuterated polystyrenes with hydrogen and deuterium atoms, L. A. Wall and R. B. Ingalls. *J. Chem. Phys.* 41, No. 4, 1112-1120 (Aug. 1964).
6336. Reaction of ground state oxygen atoms with condensed olefins, M. D. Scheer and R. Klein. *Science* 144, No. 3623, 1214 (Apr. 1964).
6337. Recalibration of the NBS glass standards of spectral transmittance, H. J. Keegan, J. C. Schleter, and M. A. Belknap. *J. Opt. Soc. Am.* 54, No. 1, 69-74 (Jan. 1964).
6338. Recent developments in using elastomers for static cryogenic seals, P. R. Ludtke. *Proc. Seventh National Society of Aerospace Materials Process Engineering Symp.*, pp. 25-1-25-14 (Western Periodicals, Los Angeles, Calif., 1964).
6339. Recently discovered autoionizing states of krypton and xenon in the  $\lambda 380$ -600Å, R. P. Madden and K. Codling. *J. Opt. Soc. Am.* 54, No. 2, 268-269 (Feb. 1964).
6340. Refractive properties of barium fluoride, I. H. Malitson. *J. Opt. Soc. Am.* 54, No. 5, 628-632 (May 1964).
6341. Refractivities of the rare earth oxides, E. M. Levin. (*Proc. Third Rare Earth Research Conf.*, Apr. 2-24, 1963), Book, Rare Earth Research, Chapter on Magnetic and Optical Studies, p. 339-350 (Gordon and Breach Science Publ. Inc., New York, N. Y., May 1964).
6342. Relation between normal trichromatic vision and dichromatic vision representing a reduced form of normal vision, D. B. Judd. *Acta Chromatica* 1, No. 3, 89-92 (Oct. 1964).
6343. Relationships between different kinds of network parameters, not assuming reciprocity or equality of the waveguide or transmission line characteristic impedances, R. W. Beatty and D. M. Kerns. *Proc. IEEE* 52, No. 1, 84 (Jan. 1964).
6344. Relative oscillator strengths of some O II and O III lines from measurements on shock-heated plasmas, H. F. Berg, K. L. Eckler, R. W. Burris, and W. L. Wiese. *Astrophys. J.* 139, No. 2, 751-757 (Feb. 15, 1964).
6345. Relaxation of a Lorentz gas with a repulsive  $r^{-8}$  force law, H. Oser, K. E. Shuler, and G. Weiss. *J. Chem. Phys.* 41, No. 9, 2661-2663 (Nov. 1964).
6346. Resonance effects of electrostatic oscillations in the ionosphere, J. A. Fejer and W. Calvert. *J. Geophys. Res.* 69, 5049-5062 (Dec. 1964).
6347. Resonances of a spherical void in a compressible isotropic plasma, J. R. Wait. *J. Geophys. Res.* 69, No. 19, 4189-4191 (Oct. 1, 1964).
6348. Response characteristics of a  $4\pi$  neutron detector, H. Gerstenberg. *Bull. Am. Phys. Soc.* 9, Pt. 2, 421 (Apr. 28, 1964).
6349. Reversal of the diurnal phase variations of GBR (16 kilocycles per second) observed over a path of 720 kilometers, D. D. Crombie and H. L. Rath. *J. Geophys. Res.* 69, No. 23, 5023-5027 (Dec. 1, 1964).
6350. Review of static seals for cryogenic systems, R. F. Robbins and P. R. Ludtke. *J. Spacecraft Rockets* 1, No. 3, 253-259 (May-June 1964).
6351. RF and microwave power measurements, G. F. Engen. *Proc. URSI XIVth General Assembly, Tokyo, Japan, Sept. 1963, XIII*, 77-80 (1964).
6352. Room temperature oxidation of iron at low pressures, J. Kruger and H. T. Yolken. *Corrosion* 20, No. 1, 29t-33t (Jan. 1964).
6353. Rotation-vibration interaction and other corrections to the spin doublet separation in  $^{20}\text{N}_2$  diatomic molecules, T. C. James. *J. Chem. Phys.* 41, No. 3, 631-641 (Aug. 1964).
6354. Rotational constants of excited vibrational states of  $^{14}\text{N}_2$ ,  $^{16}\text{O}$ , W. J. Lafferty and D. R. Lide. *J. Mol. Spectry.* 14, No. 4, 407-408 (Dec. 1964).
6355. Safety in the use of liquid hydrogen, D. B. Chelton. *Book, Technology and Uses of Liquid Hydrogen*, Ed. R. B. Scott, W. H. Denton, and C. M. Nicholls, Chapt. 10, 359-378 (Pergamon Press Inc., New York, N. Y., 1964).
6356. Salt effects and medium effects on indicator acid-base equilibria in a methanol-water solvent, D. Rosenthal, H. B. Hetzer, and R. G. Bates. *J. Am. Chem. Soc.* 86, No. 4, 549-554 (Feb. 20, 1964).
6357. Sampling and statistical design, W. J. Youden. *Proc. Symp. Environmental Measurements, U. S. Public Health Service*, pp. 35-39 (July 1964).
6358. Satellite scintillation observations at Boulder, Colorado, J. L. Jespersen and G. Kamas. *J. Atmospheric Terrest. Phys.* 26, 457-473 (1964).

6359. Second acid dissociation of N,N-Di-(2-hydroxyethyl)-glycine and related thermodynamic quantities from 0 to 55°, S. P. Datta, A. K. Grzybowski, and R. G. Bates. *J. Phys. Chem.* 68, No. 2, 275-280 (Feb. 1964).
6360. Second dissociation constant of deuterio-phosphoric acid in deuterium oxide from 5 to 50°. Standardization of a pH scale, R. Gary, R. G. Bates, and R. A. Robinson. *J. Phys. Chem.* 68, No. 12, 3806-3809 (Dec. 1964).
6361. Sensitivity indices for Hall generators, S. Rubin. *Solid State Design Mag.* 5, No. 12, 38-39 (Dec. 1964).
6362. Separation and determination of zirconium in zirconia yttria mixtures by precipitation with cupferron, E. J. Maienthal and J. K. Taylor. *Anal. Chem.* 36, No. 7, 1286-1287 (June 1964).
6363. Screening effects in elastic electron scattering, E. Zeidler and H. Olsen. *Phys. Rev.* 136, No. 6A, A1546-A1552 (Dec. 1964).
6364. Shape of the magnetosphere boundary shape under solar wind pressure, R. J. Slutz and J. R. Winkelman. *J. Geophys. Res.* 69, No. 23, 4933-4948 (Dec. 1964).
6365. Should the conventional definition of mismatch loss be abandoned? K. A. Norton. *Proc. IEEE* 52, 710 (June 1964).
6366. Sieve techniques for obtaining small amounts of narrowly classified particles, C. M. Hunt and A. R. Woolf. *Mater. Res. Std.* 4, No. 7, 364-365 (July 1964).
6367. Soft X-ray microscopy of paper, S. B. Newman and D. Fletcher. *TAPPI* 47, No. 4, 177-180 (Apr. 1964).
6368. Solar flares with associated active dark filaments and their relation to 2800-Mc/s radio bursts, M. W. Haurwitz. *Astrophys. J.* 140, No. 3, 1236-1246 (Oct. 1, 1964).
6369. Solubility of helium in liquid hydrogen, R. J. Corruccini. *J. Chem. Phys.* 40, 2039-2040 (Apr. 1964).
6370. Solvent participation in the anionic polymerization of styrene, L. J. Fetters. *Polymer Letters* 2, 425-428 (Apr. 1964).
6371. Some aspects of the coordination chemistry of boron, T. D. Coyle and F. G. A. Stone. *Progr. Boron Chem.* 1, 83-166 (1964).
6372. Unassigned.
6373. Some activities of the cooperative dental research between the Federal Government and the American Dental Association at the National Bureau of Standards, G. C. Paffenbarger. *Ann. Dentistry*, 23, No. 4, 111-126 (Dec. 1964).
6374. Some considerations relative to an atomic definition for the unit of time, R. C. Mockler and J. M. Richardson. *Proc. Consultative Committee for the Definition of the Second of the Intern. Comm. of Weights and Measures*, Paris, France, Apr. 1961, pp. 58-65 (Dec. 1964).
6375. Some observations of short-duration cosmic noise absorption events in conjugate regions at high magnetic latitude, K. W. Eriksen, C. S. Gillmor, and J. K. Hargreaves. *J. Atmospheric Terrest. Phys.* 26, 77-90 (1964).
6376. Some properties of polystyrene networks formed from oriented chains, J. C. Halpin and L. Mandelkern. *J. Polymer Sci. Pt. B*, 2, 139-142 (1964).
6377. Some remarks concerning nonreciprocity in radio propagation, J. R. Wait. *IEEE Trans. Ant. Prop.* AP-12, No. 3, 372-373 (May 1964).
6378. Some remarks on certain generalized Dedekind sums, H. Rademacher. *Acta Arithmetica* 9, Sec. 1, 97-105 (1964).
6379. Some remarks on microgrammers, W. C. Watt. *Proc. Washington Linguistics Club* 2, No. 1, 13-17 (Oct. 26, 1964).
6380. Some results of a new method for obtaining ionospheric N(h) profiles with a bearing on the structure of the lower F region, J. W. Wright and A. K. Paul. (*Proc. NATO Advanced Study Institute*, Sheikampen, Norway, Apr. 17-26, 1963), Book, Electron Density Distribution in the Ionosphere and Exosphere, p. 105-115 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6381. Some results on the energy-dependent Milne problem for light gases, C. Eisenhauer. *Nucl. Sci. Eng.* 19, 95-101 (May 1964).
6382. Spacetime coordinate systems, G. E. Hudson. *Proc. Intern. Conf. Chronometry*, pp. 197-221 (Lausanne, Switzerland, June 1964).
- 6382A. Specification and designation of color, D. B. Judd and I. Nimeroff. *Treatise Anal. Chem.* 36, 2873-2942 (1964).
6383. Spectral distribution of typical daylight as a function of correlated color temperature, D. B. Judd, D. L. MacAdam, and G. Wyszecki. *J. Opt. Soc. Am.* 54, No. 8, 1031-1040 (Aug. 1964).
6384. Spectral study of active nitrogen flames exhibiting CN "tail" bands, R. L. Brown and H. P. Broida. *J. Chem. Phys.* 41, No. 7, 2053-2060 (Oct. 1, 1964).
6385. Spectral tristimulus values for the CIE (u,v,w) uniform spacing system, I. Nimeroff. *J. Opt. Soc. Am.* 54, No. 11, 1365-1367 (Nov. 1964).
6386. Spectroscopic investigations of fluorescence and chemiluminescence in gases, T. Carrington. (Collection of papers), Aero-Space Research Laboratory Report No. 64-51 (Mar. 1964).
6387. Spin-orbit coupling constant of nitric oxide. Determination from fundamental and satellite band origins, T. C. James and R. J. Thibault. *J. Chem. Phys.* 41, No. 9, 2806-2813 (Nov. 1964).
6388. Spread-F observations by the alouette topside sounder satellite, W. Calvert and C. W. Schmid. *J. Geophys. Res.* 69, No. 9, 1839-1852 (May 1, 1964).
6389. Sr<sup>87</sup>/Sr<sup>86</sup> ratios in Hawaiian lavas, P. Lessing and E. J. Catanzaro. *J. Geophys. Res.* 69, No. 8, 1599-1601 (Apr. 15, 1964).
6390. Standard electromotive force of the hydrogen-silver chloride cell and the thermodynamics of solutions of hydrochloric acid in 50 wt. percent methanol from 10 to 40° C, M. Paabo, R. A. Robinson, and R. G. Bates. *J. Chem. Eng. Data* 9, No. 3, 374-376 (July 1964).
6391. Standard nuclear instrument modules, L. Costrell. U. S. Atomic Energy Commission TID Report 20893, 12 pages (July 1964).
6392. Standard potential of the Ag-AgCl electrode in 5 percent aqueous mannitol, R. Gary and R. A. Robinson. *J. Chem. Eng. Data* 9, No. 3, 376-378 (July 1964).
6393. Standard test for determining alkali resistance of porcelain enamels, M. D. Burdick. *Proc. Porcelain Enamel Inst. Forum* 26, 227-236 (Oct. 14-16, 1964).

6394. Standardization of definitions for Hall effect devices, S. Rubin, Proc. Rotating and Static Precision Components Symp., Apr. 1964, pp. 344-360 (Bureau Naval Weapons, Washington, D. C., 1964).
6395. Standardization of dimensions of packages for self-service selling, A. T. McPherson and A. S. Best, The PACKETT, Packaging Professional 2, No. 3, 4-5 (Packaging Inst., 1964).
6396. Standards and measurement of attenuation, impedance and phase shift, R. W. Beatty, Proc. URSI XIVth General Assembly, Tokyo, Japan, Sept. 1963, XIII, 80-92 (1964).
6397. Standards of electromotive force, W. J. Hamer, J. Wash. Acad. Sci. 54, No. 7, 297-315 (Oct. 1964).
6398. Standards, sources, and detectors in radiation measurements, R. Stair and W. E. Schneider, Symp. Thermal Radiation of Solids, Session III, Measurement Techniques, San Francisco, Calif., Mar. 4-6, 1964, Paper 3 (1964).
6399. Standards--the foundation of industrial growth, R. D. Stiehler, Ind. Times, VI, No. 22 (Bombay, India, Nov. 15, 1964).
6400. Statistical model for the beta zirconium hydrides, T. B. Douglas, J. Chem. Phys. 40, No. 8, 2248-2257 (Apr. 15, 1964).
6401. Statistical surface thermodynamics of simple liquid mixtures, C. A. Eckert and J. M. Prausnitz, A.I.Ch.E. J. 10, No. 5, 677-683 (Sept. 1964).
6402. Statistical thermodynamics of the lattice model of a polymer molecule, J. Mazur, J. Chem. Phys. 40, No. 4, 1001-1007 (Feb. 1964).
6403. Statistics in its proper place, W. J. Youden, J. Wash. Acad. Sci. 54, 53-57 (Mar. 1964).
6404. Stimulated Brillouin scattering in the off-axis resonator, H. Takuma and D. A. Jennings, Appl. Phys. Letters 5, No. 12, 239-241 (Dec. 1964).
6405. Stochastic theory of diffusion in a plasma across a magnetic field, C. M. Tchen, Proc. Intern. Symp. Plasma Diffusion, Feldafing, Germany, June 29-July 3, 1964, pp. 118-123 (1964).
6406. Stress-induced martensitic transformations in 18Cr-8Ni steel, R. P. Reed and C. J. Gunther, Trans. Met. Soc. AIME 230, 1713-1720 (Dec. 1964).
- 6406A. Studies of Alouette observations at the CRPL, W. Calvert, H. Rishbeth, and T. Van Zandt, Trans. American Geophysical Union, IG Bull. 45, No. 2, 398-401 (June 1964).
6407. Studies of photodissociation of molecular ions, G. H. Dunn, (Proc. 3d Intern. Conf. Physics of Electronic and Atomic Collisions, London, England, 1963), Book, Atomic Collision Processes, ed. M. R. C. McDowell, p. 997-1005 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6408. Studies of the thicknesses of adsorbed glass finishes by ellipsometry, D. J. Tutas, R. R. Stromberg, and E. Passaglia, SPE Trans. 4, No. 4, 1-7 (Oct. 1964).
6409. Suggested practices for establishing sampling and sample preparation techniques in spectrochemical analysis, R. E. Michaelis, Book, Methods for Emission Spectrochemical Analysis, 4th edition, p. 256-259 (American Society for Testing Materials, Phila., Pa., Feb. 1964).
6410. Summary of symposium on recent research on bituminous materials, S. H. Greenfield, ASTM Spec. Tech. Publ. No. 347, p. 108-111 (May 1964).
6411. Superconductivity in semiconducting  $\text{SrTiO}_3$ , J. F. Schooley, W. R. Hosler, and M. L. Cohen, Phys. Rev. Letters 12, No. 17, 474-475 (Apr. 1964).
6412. Surface currents in type II superconductors, S. Gygax and R. H. Kropschot, Physics Letters 9, No. 2, 91 (Apr. 1, 1964).
6413. Surface integral form for three-body collision in the Boltzmann equation, M. S. Green, Phys. Rev. 136, No. 4A, A905-A910 (Nov. 16, 1964).
6414. Survey of current NBS work on properties of parahydrogen, R. D. Goodwin, D. E. Diller, W. J. Hall, H. M. Roder, L. A. Weber, and B. A. Younglove, (Proc. 1963 Cryogenic Eng. Conf. Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), Book, Advances in Cryogenic Engineering 9, Paper D-9, 234-242 (Plenum Press Inc., New York, N. Y., 1964).
6415. S-wave hyperon-nucleon interactions and  $\text{SU}_3$  symmetry, P. D. DeSouza, G. A. Snow, and S. Meshkov, Phys. Rev. 135, 565 (1964).
6416. Synthesis of diatomic radicals, H. E. Radford, J. Chem. Phys. Commun. 40, No. 9, 2732-2733 (May 1, 1964).
6417. Synthesis of higher ketoses by aldol reactions. II. Unsubstituted heptuloses, R. Schaffer, J. Org. Chem. 29, 1471-1473 (June 1964).
6418. Systematic atmospheric refraction errors of baseline-type radio tracking systems and methods of their correction, G. D. Thayer and B. R. Bean, Proc. 1st Space Congress, Cocoa Beach, Fla., Apr. 1964.
6419. Tables of dielectric constants, dipole moments and dielectric relaxation times, F. I. Mopsik, 1963 Digest Lit. Dielectrics Publ. 1230, 27, 23-55 (1964).
6420. Tables of energy losses and ranges of electrons and positrons, M. J. Berger and S. M. Seltzer, Natl. Aeronaut. Space Admin. NASA SP-3012, 1-127 (1964).
6421. Tables of energy losses and ranges of heavy charged particles, W. H. Barkas and M. J. Berger, Natl. Aeronaut. Space Admin. NASA SP-3113, 1-131 (1964).
6422. Tapered inlet structures for pipe culverts, J. L. French, J. Hydraulics Div. ASCE 90, No. HY2 256-299 (Mar. 1964).
6423. Techniques for using the air-gap method for the precise determination of the dielectric constant and loss angle of solid-disk specimens, A. H. Scott, (Proc. Conf. Electric Insulation), 1963 Annual Report, Natl. Acad. Sci.-Natl. Res. Council Publ. 1141, p. 74-76 (1964).
6424. Technology and Uses of Liquid hydrogen, Book, R. B. Scott, Editor, Pergamon Press Ltd., London, England, 1964.
6425. Temperature and mean free path dependence of the Ginzburg-Landau parameter, S. Gygax and R. H. Kropschot, Physics Letters 12, No. 1, 7-9 (Sept. 1964).
6426. Tetragonal phases of the general type  $10\text{M}_2\text{O}_5 \cdot 90\text{Nb}_2\text{O}_5$  apparently isostructural with  $\text{Ta}_2\text{O}_5 \cdot 2\text{Nb}_2\text{O}_5$ , J. L. Waring and R. S. Roth, Acta Cryst. 17, 455-456 (1964).
6427. The accurate measurement of voltage ratios of inductive voltage dividers, T. L. Zapf, Acta IMEKO 3, 317-331 (1964).
6428. The absorption spectrum of the "pink" afterglow of nitrogen in the vacuum ultraviolet, A. M. Bass, J. Chem. Phys. 40, No. 3, 695-700 (Feb. 1, 1964).
6429. The application of Archimedes' principle to determination of the apparent volume of leather,

- J. R. Kanagy. *J. Am. Leather Chem. Assoc.* LIX, No. 11, 636-649 (Nov. 1964).
6430. The calculation of electron energy distribution functions in the ionosphere, L. R. Megill and J. H. Cahn. *J. Geophys. Res.* 69, No. 23, 5041-5048 (Dec. 1, 1964).
6431. The calculations of autoionization probabilities, J. W. Cooper. (Proc. 3d Intern. Conf. Physics of Electronic and Atomic Collisions, London, England, 1963), Book, Atomic Collision Processes, ed. M. R. C. McDowell, p. 595-599 (North Holland Publ. Co., Amsterdam, The Netherlands, 1964).
6432. The calorimeter and its influence in the development of chemistry, G. T. Armstrong. *J. Chem. Ed.* 41, No. 6, 297-307 (June 1964).
6433. The cement and concrete reference laboratory inspection service for concrete testing laboratories, J. R. Dize. *Concrete Construct.* 9, No. 8, 234 (Aug. 1964).
- 6433A. The concentration dependence of the sedimentation coefficient of polystyrene in dilute solution, I. H. Billick. Preprint American Chem. Soc. 5, No. 2, 855-860 (1964).
6434. The contribution of nonthermal electrons to auroral absorption of radio waves, G. C. Reid. *J. Geophys. Res.* 69, No. 15, 3296-3298 (Aug. 1964).
6435. The correlation of thermodynamic properties of cryogenic fluids, R. B. Stewart and K. D. Timmerhaus. (Proc. 1963 Cryogenic Eng. Conf., Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), Book, Advances in Cryogenic Engineering 9, Paper A-3, 20-27 (Plenum Press Inc., New York, N. Y., 1964).
6436. The crystal structure of 1-ethyl decaborane, A. Perloff. *Acta Cryst.* 17, 332 (1964).
6437. The crystallography of some  $M^{2+}$  borates, S. Block, A. Perloff, and C. E. Weir. *Acta Cryst.* 17, 314-315 (Mar. 1964).
6438. The current status of graphic storage techniques: their potential application to library mechanization, S. N. Alexander. (Proc. Conf. Library Automation, Airlie Foundation, Warrington, Va., May 26-30, 1963), Book, Libraries and Automation, Ed. B. E. Markuson, pp. 111-140 (Library of Congress, Washington, D. C., 1964).
6439. The daytime equatorial F-layer, R. B. Norton and T. E. VanZandt. *J. Atmospheric and Terrest. Phys.* 26, No. 11, 1047-1054 (Nov. 1964).
6440. The effect of carbon-arc intensity on asphalt oxidation, J. R. Wright, P. G. Campbell, and T. L. Fridinger. *J. Appl. Chem. (London)* 14, 30-35 (Jan. 1964).
6441. The effect of coulomb collisions on incoherent scattering of radio waves by a plasma, D. T. Farley, Jr. *J. Geophys. Res.* 69, No. 1, 197-200 (Jan. 1, 1964).
6442. The effect of particle shape and size distribution in a reinforced polymer, R. Bowen. *J. Am. Dental Assoc.* 69, No. 4, 481-495 (Oct. 1964).
6443. The electron paramagnetic resonance spectrum of some tris-complexes of copper (II), H. C. Allen, Jr., G. F. Kokoszka, and R. G. Inskeep. *J. Am. Chem. Soc.* 86, 1023-1025 (1964).
6444. The electrolysis of formamides, acetamides and propionamides, D. E. Couch. *Electrochim. Acta* 9, No. 4, 327-336 (Apr. 1964).
6445. The energy loss of electrons in solids, A. M. Rauth and J. A. Simpson. *Radiation Res.* 22, No. 4, 643-661 (1964).
6446. The error rate in a multiple frequency shift system and the output signal noise ratio in a frequency modulation and pulse code modulation frequency shift system, H. Akima. *Proc. IEEE (London)* 111, No. 3, 547-555 (Mar. 1964).
6447. The excitation of the 2P state of hydrogen by electrons of near-threshold energy, G. E. Chamberlain, S. J. Smith, and D. W. O. Heddle. *Phys. Rev. Letters* 12, No. 23, 647-649 (June 8, 1964).
6448. The gas phase radiolysis propane. The effect of pressure and added inert gases, P. Ausloos, S. G. Lias, and T. B. Sandoval. *Discussion Faraday Soc.* No. 36, 66-74 (Mar. 1964).
6449. The guided propagation of ELF and VLF radio waves between the earth and the ionosphere, D. D. Crombie and A. G. Jean. *Proc. URSI XIVth General Assembly, Tokyo, Japan, Sept. 1963, XIII*, 195-206 (1964).
6450. The half-life of carbon-14: comments on the mass-spectrometric method, E. E. Hughes and W. B. Mann. *Intern. J. Appl. Radiation Isotopes* 15, No. 1, 97-100 (Jan. 1964).
6451. The influence of metastable oxygen molecules on ozone and airglow, H. I. Schiff and L. R. Megill. *J. Geophys. Res.* 69, No. 23, 5120-5121 (Dec. 1, 1964).
6452. The Institute for Applied Technology, D. A. Schon. *Engineer* V, No. 2, 3 (1964).
6453. The interaction of 350 keV polarized neutrons with oriented  $^{109}\text{Ag}$  nuclei, H. Marshak, R. Wagner, P. P. Miller, and T. Tamura. *Physics Letters* 10, No. 3, 316 (June 15, 1964).
6454. The ionosphere and radio propagation in the lower frequencies, T. N. Gautier. *Science* 143, No. 3611, 1197-1199 (Mar. 13, 1964).
6455. The isomerization of D-manno-3-heptulose by alkali, R. Schaffer. *J. Org. Chem.* 29, 1473-1475 (June 1964).
6456. The  $\lambda$ -absorption cross section of holmium in the dynamic collective theory, M. Danos and W. Greiner. *Physics Letters* 8, No. 2, 113-115 (Jan. 15, 1964).
6457. The light of the night sky: astronomical interplanetary and geophysical, F. E. Roach. *Space Sci. Rev.* 3, 512-540 (Nov. 1964).
6458. The liquefaction of hydrogen. 3A. Basic principles, P. C. Vander Arend and D. B. Chelton. Book, Technology and Uses of Liquid Hydrogen, Chapt. 3, pp. 38-55 (Pergamon Press, Inc., New York, N. Y., 1964).
6459. The liquefaction of hydrogen. 3B-2. Large-scale hydrogen liquefaction facilities, P. C. Vander Arend and D. B. Chelton. Book, Technology and Uses of Liquid Hydrogen, Chapt. 3, pp. 79-105 (Pergamon Press Inc., New York, N. Y., 1964).
6460. The listing of sudden ionosphere disturbances, J. V. Lincoln. *Planetary Space Sci.* 12, No. 5, 419-434 (May 1964).
6461. The meaning of "least" in least squares, C. Eisenhart. *J. Wash. Acad. Sci.* 54, No. 2, 24-33 (Feb. 1964).
6462. The molecular symmetry of iodopentaborane, L. H. Hall. *J. Am. Chem. Soc. Commun. to Editor* 86, No. 21, 4729 (Nov. 5, 1964).
6463. The National Bureau of Standards, E. L. Graminski. *Capital Chem.* 14, No. 9, 278-281 (Dec. 1964).
6464. The National Bureau of Standards tritiated water standards, W. B. Mann. *J. Appl. Radiation Isotopes* 15, 628 (1964).
6465. The needs of the statistical engineering

- program of the National Bureau of Standards, C. Eisenhart. Proc. 9th Conf. Design of Experiments in Army Research Development and Testing, Directorate of Research and Development, U. S. Army Missile Command, Redstone Arsenal, Ala., Oct. 23-25, 1963, ARO-D Report 64-2, pp. 550-556 (U.S. Army Res. Office, Durham, N. C., Dec. 1964).
6466. The 1963 symposium on humidity and moisture, A. Wexler, May 20-23, 1963, Washington D. C., Intern. J. Heat Mass Transfer 7, 275-277 (1964).
6467. The operating characteristics of Zener reference diodes and their measurements, W. G. Eicke, Jr. ISA Trans. 3, No. 2, 93-99 (Apr. 1964).
6468. The oxide films formed on copper single crystal surfaces in water. III. Effect of light, J. Kruger and J. P. Calvert, J. Electro. Chem. Soc. 111, No. 9, 1038-1041 (Sept. 1964).
6469. The performance of point level sensors in liquid hydrogen, D. A. Burgeson, W. G. Pestalozzi, and R. J. Richards. (Proc. 1963 Eng. Conf. Univ. Colorado and National Bureau of Standards, Boulder, Colo., Aug. 19-21, 1963), Book, Advances in Cryogenic Engineering 9, Paper G-5, 416-422 (Plenum Press Inc., New York, N. Y., 1964).
6470. The present and future of astrophysics and its effects on industry in Colorado, L. M. Branscomb. (Proc. University-Industry Liaison Conf., 1963), Book, Colorado and the New Technological Revolution, ed. W. H. Miernyk, p. 55-64 (Bureau of Economic Research, University of Colorado, Boulder, Colo., 1964).
6471. The quest for design data, R. B. Stewart. Symp. The Role Cryogenics is Playing in Expanding Mechanical Engineering, Am. Soc. Refrigerating and Air Conditioning Engineers, New York, N. Y., Feb. 11-14, 1964, p. 13-24 (1964).
6472. The reaction of methyl radicals with dimethylmercury, R. E. Rebbert and P. Ausloos. J. Am. Chem. Soc. 86, No. 10, 2068-2069 (May 20, 1964).
6473. The relation between VLF propagation and D-layer characteristics, J. R. Wait. IEEE Trans. Ant. Prop. 12, No. 2, 239-240 (Mar. 1964).
6474. The relationship between intensity of carbon arc and asphalt oxidation, J. R. Wright, P. G. Campbell, and T. L. Fridinger. ASTM Spec. Tech. Publ. No. 347, p. 3-20 (May 1964).
6475. The response of microwave refractometer cavities to atmospheric variations, R. O. Gilmer, R. E. McGavin, and B. R. Bean. Proc. 1964 World Conf. Radio Meteorology and 11th Weather Radar Conf., pp. 244-247 (Sept. 1964).
6476. The role of cryogenics in the production of high and ultra-high vacuum, L. O. Mullen and M. J. Hiza. Cryogenics 4, No. 6, 387-394 (Dec. 1964).
6477. The solid state of rare gases, G. L. Pollack. Rev. Mod. Phys. 36, No. 3, 748-792 (July 1964).
6478. The solubility of water vapor in molten alumina, J. J. Diamond. (Proc. Conf. Arthur D. Little, Inc., Cambridge, Mass., Oct. 4-5, 1962), Book, Thermal Imaging Techniques, Ed. P. E. Glaser and R. F. Walker, Chapt. 17, pp. 225-228 (Plenum Press Inc., New York, N. Y., 1964).
6479. The standardization of programming languages, F. L. Alt. Proc. 19th Natl. Conf. Association for Computing Machinery, Philadelphia, Pa., Aug. 1964, pp. B2-1 (1964).
6480. The statistical analysis of experimental data, J. Mandel, 410 pages (Interscience Publ. Inc., New York, N. Y., 1964).
6481. The statistical construction of a single standard from several available standards, E. L. Crown. IEEE Trans. Instr. Meas. IM-13, No. 4, 180-185 (Dec. 1964).
6482. The structure and physics of the upper atmosphere, T. E. VanZandt and R. W. Knecht. Book, Space Physics, p. 166-225 (John Wiley and Sons, Inc., New York, N. Y., 1964).
6483. The structure of carbon suboxide, W. J. Lafferty and A. G. Maki. Chemistry 37, No. 7, 19 (July 1964).
6484. The structure of the triclinic form of sodium tetrametaphosphate tetrahydrate, H. M. Ondik. Acta Cryst. 17, No. 9, 1139-1145 (Sept. 1964).
6485. The surface composition of hydroxylapatite derived from solutions behavior of aqueous suspensions, V. R. Deitz, H. M. Rootare, and F. G. Carpenter. J. Colloid Sci. 19, No. 1, 87-101 (Jan. 1964).
6486. The ultraviolet realm of spectroscopy, C. E. Moore, J. Wash. Acad. Sci. 64, 58-62 (Mar. 1964).
6487. The U. S. basis of electromagnetic measurements, J. M. Richardson and J. F. Brockman. IEEE Spectrum 1, No. 1, 129-138 (Jan. 1964).
6488. The use of an analog computer in side-on arc spectroscopy, J. B. Shumaker and C. R. Yokley. Appl. Opt. 3, No. 1, 83-87 (Jan. 1964).
6489. The use of terahertz photobeats for precise velocity-of-light measurements, Z. Bay and H. S. Boyne. Proc. Enrico Fermi International School of physics: Course No. XXXI, Quantum Electronics and Coherent Light 1963, pp. 352-371 (1964).
6490. The uses of oblique ionograms in frequency utilization, K. Davis. Telecommunications J. 31, No. 10, 281-287 (Oct. 1964).
6491. The value of the Faraday, W. J. Hamer and D. N. Craig. J. Electrochem. Soc. 111, No. 12, 1434 (Dec. 1964).
6492. The world of NOMAD-1, W. Hakkariinen. Proc. Buoy Technology Symp., Washington, D. C., Mar. 24-25, 1964, pp. 443 (Marine Technology Society, 1964).
6493. Theoretical aspects of polymer crystallization with chain folds: bulk polymers, J. D. Hoffman. SPE Trans. 4, No. 4, 315-362 (Oct. 1964).
6494. Theory of boil-off calorimetry, R. B. Jacobs. Rev. Sci. Instr. 35, No. 7, 828-832 (July 1964).
6495. Theory of irreversible processes in plasmas--derivation of a convergent kinetic equation from the generalized master equation, J. Weinstock. Phys. Rev. 133, No. 3A, A673-A680 (Feb. 3, 1964).
6496. Theory of the electronic susceptibilities of Stoichiometric rutile ( $\text{TiO}_2$ ), A. R. Ruffa. Phys. Rev. 133, No. 5A, 1418-1426 (Mar. 2, 1964).
6497. Theory of whisker growth and evaporation, J. A. Simmons, R. L. Parker, and R. E. Howard. J. Appl. Phys. 35, No. 7, 2271-2272 (July 1964).
6498. Thermal conductivity and viscosity of simple fluids, J. V. Sengers. Am. Chem. Soc. Div. Petroleum Chemistry, Symp. Molecular Transport Properties of Liquids 9, No. 4, C-57 to C-70 (Sept. 1964).
6499. Thermal decomposition of some alkyl halides by a shock-tube, W. Tsang. J. Chem. Phys. 41, No. 8, 2487-2494 (Oct. 15, 1964).
6500. Thermal decomposition of some tert-butyl compounds at elevated temperatures, W. Tsang. J. Chem. Phys. 40, No. 6, 1198-1505 (Mar. 1964).
6501. Thermal Degradation of Organic Polymers, S. L. Madorsky, Book, 315 pages (Interscience Publ., Inc., New York, N. Y., 1964).
6502. Thermal stability of bis (8-hydroxy-3-quinolyl) methane coordination polymers, E. Morowitz and T. P. Perros. J. Inorg. Nucl. Chem. 26, No. 1, 139-159 (Jan. 1964).
6503. Thermodynamic data compilation and review

- at the National Bureau of Standards, G. T. Armstrong, *Svensk Kem. Tidskr.* 76, No. 8, 419-427 (1964).
6504. Thermodynamics of aqueous solutions of hydriodic acid from electromotive force measurements of hydrogen-silver iodide cells, H. B. Hetzer, R. A. Robinson, and R. G. Bates, *J. Phys. Chem.* 68, No. 7, 1929-1933 (1964).
6505. Thermodynamics of hydrogen solubility in cryogenic solvents at high pressures, M. Orentlicher and J. M. Prausnitz, *Chem. Eng. Sci.* 19, 775-782 (Oct. 1964).
6506. Thermodynamics of solutions of deuterium chloride in heavy water from 5 to 50°, R. Gary, R. G. Bates, and R. A. Robinson, *J. Phys. Chem.* 68, No. 5, 1186-1190 (May 1964).
6507. "Thumbtack" accelerometer for the 1,5-150 KC range, P. Hertelendy and P. Reynard, *Rev. Sci. Instr.* 35, No. 10, 1305-1306 (Oct. 1964).
6508. Tomorrow's facilities for standards and measurements, H. F. Wollin, *Scale J.* 50, No. 9, 2 (June 1964).
6509. Training a computer to assign descriptors to documents: experiments in automatic indexing and experiments in information correlation, M. E. Stevens and G. H. Urban, *Proc. Spring Joint Computer Conf.*, Wash. D. C., April 1964, 25, 563-577 (Spartan Books, Balt., Md., 1964).
6510. Transequatorial reception of a very-low-frequency transmission, C. J. Chilton, A. Diede, and S. Radicella, *J. Geophys. Res.* 69, No. 7, 1319-1328 (Apr. 1, 1964).
6511. Transverse propagation of electromagnetic waves in a cylindrically stratified plasma, J. R. Wait, *Proc. Radio Physics Symp.*, Univ. Calif., Los Angeles, Aug. 7-9, 1963, ed. J. Brandstatter (Holden-Day Inc., San Francisco, Calif., 1964).
6512. Triggered fuse for load protection, J. H. Rogers, *Rev. Sci. Instr.* 35, No. 12, 1715 (Dec. 1964).
6513. Triplet-state energy transfer from acetone to aliphatic aldehydes in the gas phase, R. E. Rebert and P. Ausloos, *J. Am. Chem. Soc.* 86, No. 22, 4803-4807 (Nov. 1964).
6514. Tropospheric propagation, P. L. Rice and J. W. Herbstreit, *Advan. Electron. Electron Phys.* 20, 199-259 (1964).
6515. Tropospheric refraction and attenuation of radio waves, B. R. Bean, *Book, Advances of Radio Research*, p. 53-155 (Academic Press Inc., New York, N. Y., June 1964).
6516. Two-crystal scintillation pair-spectrometer, B. Ziegler, J. M. Wyckoff, and H. W. Koch, *Nuclear Instr. Methods* 24, 301-315 (Feb. 13, 1964).
6517. Ultrasonically induced nuclear spin transitions in antiferromagnetic  $KMnF_3$ , A. B. Denison, L. W. James, J. D. Currin, W. H. Tantilla, and R. J. Mahler, *Phys. Rev. Letters* 12, No. 10, 244-245 (1964).
6518. Units and standards of electrical measure, F. K. Harris, *Electron. World* 72, No. 2, 29-32 (Aug. 1964).
6519. "U-spin equalities" and octet symmetry breaking, S. Meshkov, G. A. Snow, and G. B. Yodh, *Phys. Rev. Letters* 13, No. 6, 212-217 (Aug. 1964).
6520. Use of high-strength ceramics in vibration transducers, E. Jones, *J. Acoust. Soc. Am.* 36, No. 6, 1215-1216 (June 1964).
6521. Use of the index of refraction as a means for study of plasma configurations, E. G. Johnson, *Phys. Fluids* 7, No. 9, 1551-1552 (Sept. 1964).
6522. Utility of the Tait equation relating volume and pressure in the study of transitions in polymers, L. A. Wood, *J. Polymer Sci.* B2, No. 7, 703-707 (July 1964).
6523. Vacuum ultraviolet absorption spectra of oxygen in liquid and crystalline argon and nitrogen, A. M. Bass and H. P. Broida, *J. Mol. Spectry.* 12, No. 3, 221-230 (Mar. 1964).
6524. Vacuum ultraviolet photochemistry, J. R. McNesby and H. Okabe, *Book, Advances in Photochemistry*, Ed. W. A. Noyes, Jr., G. S. Hammond, and J. N. Pitts, Jr., 3, 157-240 (Interscience Publ. Inc., New York, N. Y., 1964).
6525. Vacuum ultraviolet photochemistry, H. Okabe and D. A. Becker, *J. Chem. Phys.* 39, No. 10, 2549-2555 (Jan. 1964).
6526. Vapor-phase growth kinetics of potassium and mercury crystals, R. L. Parker and S. C. Hardy, *(Proc. Intern. Symp. Condensation and Evaporation of Solids, Dayton, Ohio, Sept. 12-14, 1962)*, *Book, Condensation and the Evaporation of Solids, Section II. Condensation of Solids*, pp. 649-664 (Gordon and Breach, New York, N. Y., 1964).
6527. Versatile stark waveguide for microwave spectroscopy, D. R. Lide, *Rev. Sci. Instr.* 35, No. 9, 1226 (Sept. 1964).
6528.  $\nu_3$  vibration in condensed oxygen, nitrogen, and argon, S. Abramowitz and H. P. Broida, *J. Chem. Phys.* 39, No. 9, 2383-2384 (Nov. 1, 1964).
6529. Vibration-rotation bands of deuterium cyanide and hydrogen cyanide, A. G. Maki, E. K. Pyler, and R. J. Thibault, *J. Opt. Soc. Am.* 54, No. 7, 869-876 (July 1964).
6530. Waveguide noise-tube mount for use in an interlaboratory noise standard, C. K. S. Miller, W. C. Daywitz, and E. Campbell, *Acta. Imeko* 3, 371-382 (1964).
6531. Weather resistance of porcelain enamels exposed for 7 years at various sites, M. A. Rushmer and M. D. Burdick, *Proc. Porcelain Enamel Inst. Forum* 26, 214-226 (Oct. 14-16, 1964).
6532. Weierstrass points of  $\Gamma_0(n)$ , J. Lehner and M. Newman, *Ann. Math.* 79, No. 1, 360-368 (1964).
6533. Weights and measures—a challenge to industry, M. W. Jensen, *Proc. 50th Mid-Year Meeting Chemical Specialties Manufacturers Assoc.*, Chicago, Ill., May 18-20, 1964, pp. 24-26 (Chem. Specialties Mfg. Assoc. Inc., New York, N. Y., 1964).
6534. Weights and measures and aerosols, M. W. Jensen, *Proc. 50th Annual Meeting Chemical Specialties Manufacturers Association*, p. 33-35 (Dec. 1963); *Scale J.* 50, No. 6, 2 (Mar. 1964).
6535. What is needed next in the simulation of the arterial street? M. C. Stark, *Proc. Highway Conf. Progress Related to the Future of Research and Development in Traffic Surveillance, Simulation and Control*, Washington, D. C., Sept. 14-15, 1964, pp. 144 (Bureau of Public Roads, Washington, D. C., 1964).
6536. What's new in control standards, H. L. Mason, *Control Eng.* 11, No. 6, 85-87 (June 1964).
6537. Which measure of precision? F. J. Linnig and J. Mandel, *The evaluation of the precision of analytical methods involving linear calibration curves*, *Anal. Chem.* 36, No. 13, 25A-32A (Dec. 1964).
6538. Weather resistance of porcelain enamels exposed for seven years at various sites, M. A. Rushmer and M. D. Burdick, *Proc. Porcelain Enamel Inst. Forum* 26, 214-226 (Oct. 14-16, 1964).
6539. World days program, A. H. Shapley, *IQSY Notes* 5, 27-30 (Dec. 1963); 6, 27-32 (Mar. 1964); 7, 13-15 (May 1964).

6540. A bounded automorphic form of dimension zero is constant, M. I. Knopp, J. Lehner, and M. Newman. *Duke Math. J.* 32, No. 3, 457-460 (Sept. 1965).
6541. A calorimetric determination of the enthalpy of graphite from 1200 to 2600°K, E. D. West and S. Ishihara. (Proc. 3d Symp. Thermal Physical Properties, Purdue Univ., Lafayette, Ind., Mar. 22-26, 1965), Book, *Advances in Thermophysical Properties at Extreme Temperatures and Pressures*, pp. 146-151 (American Society of Mechanical Engineers, New York, N. Y., 1965).
6542. A comparison between the National Bureau of Standards two-pressure humidity generator and the National Bureau of Standards standard hygrometer, S. Hasegawa, R. W. Hyland, and S. W. Rhodes. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, *Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 3, Fundamentals and Standards, Sec. II*, Paper 22, pp. 455-459 (Reinhold Publ. Corp., New York, N. Y., 1965).
6543. A comparison of atomic frequency standards, R. E. Bechler and R. C. Mockler. Book, *Progress in Radio Science, 1960-1963, Vol. I. Radio Standards and Measurements*, pp. 20-26 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
6544. A comparison of mountain slope and radiosonde observations, C. A. Samson. *Mo. Weather Rev.* 93, No. 5, 327-330 (May 1965).
6545. A dumbbell model for dielectric dispersion in paraffin-like solids, M. G. Broadhurst. (Proc. Electrical Insulation Conf., Cleveland, Ohio, Oct. 1964), *Natl. Acad. Sci.-Natl. Res. Council Publ.* 1238, pp. 129-132 (1965).
6546. A high-speed (milliseconds) method for the simultaneous measurement of enthalpy, specific heat, and resistivity of electrical conductors at high temperatures, A. Cezairliyan. (Proc. 3d Symp. Thermophysical Properties, Purdue Univ., Lafayette, Ind., Mar. 22-25, 1965), Book, *Advances in Thermophysical Properties at Extreme Temperatures and Pressures*, pp. 253-263 (American Society of Mechanical Engineers, New York, N. Y., Mar. 1965).
6547. A latitude survey of the night airglow, T. N. Davis and L. L. Smith. *J. Geophys. Res.* 70, No. 5, 1127-1138 (Mar. 1965).
6548. A line-formula notation system for coordination compounds, P. M. McDonnell and R. F. Pasternack. *J. Chem. Doc.* 5, No. 1, 56-60 (Feb. 1965).
6549. A method for determination of the tropospheric temperature structure from ground-based measurement of oxygen emission, E. R. Westwater. *Proc. 3d Symp. Remote Sensing of Environment, Infrared Phys. Lab., Inst. Sci. Tech., University of Michigan, Ann Arbor, Mich., Feb. 1965*, pp. 245-256 (Mar. 1965).
6550. A method for measuring polarization in the vacuum ultraviolet, K. Rabinovitch, L. R. Canfield, and R. P. Madden. *Appl. Opt.* 4, No. 8, 1005-1010 (Aug. 1965).
6551. A method for the computation of the error function of a complex variable, O. N. Strand. *Math. Comp.* XIX, No. 89, 127-129 (Jan. 1965).
6552. A new differential operator of the pure wave type, J. E. Lagnese. *J. Differential Equations* 1, No. 2, 171-187 (Apr. 1965).
6553. A new speculation of terrestrial helium loss, E. E. Ferguson, F. C. Fehsenfeld, and A. L. Schmeltekopf. *Planet. Space Sci.* 13, 925-928 (1965).
6554. A one-dimensional model of polymer adsorption, E. A. DiMarzio and F. L. McCrackin. *J. Chem. Phys.* 43, No. 2, 539-547 (July 1965).
6555. A pneumatic bridge hygrometer for use as a working humidity standard, L. Greenspan. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, *Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 3, Fundamentals and Standards, Sec. II*, Paper 20, pp. 433-443 (Reinhold Publ. Corp., New York, N. Y., 1965).
6556. A possible mechanism for light absorption by interstellar grains, E. E. Ferguson and H. P. Broida. *Astrophys. J.* 141, No. 2, 807-809 (Feb. 1965).
6557. A proper accounting of conformation of a polymer near a surface, E. A. DiMarzio. *J. Chem. Phys.* 42, No. 6, 2101-2106 (Mar. 1965).
6558. A pulsed refrigeration system for cryogenic magnet application, T. R. Strobbridge and D. B. Mann. (Proc. 1964 Cryogenic Engineering Conf., Univ. Pennsylvania, Phila., Pa., Aug. 18-24, 1964), Book, *Advances in Cryogenic Engineering* 10, Paper N-3, 54-61 (Plenum Press Inc., New York, N. Y., 1965).
6559. A review of zinc oxide-eugenol type filling materials and cements, G. M. Brauer. *Rev. Belg. Med. Dent.-Belg. Tijds. Tandheelk* 20, No. 3, 323-364 (1965).
- 6559A. A semi-automatic technique for tuning a reflectometer, M. H. Zanboor. *IEEE Trans. Microwave Theor. Tech. MTT-13*, No. 5, 709-710 (Sept. 1965).
6560. A simple device for adjusting dental interferometers, H. J. Caul and J. W. Kumpula. *J. Dental Res.* 44, No. 6, 1412 (Nov.-Dec. 1965).
6561. A simple method for making stereoscopic drawings, F. Ordway. *Am. Mineralogist* 50, 1496-1498 (1965).
6562. A simple method for measuring the amount of granular materials in sulfur mortars. C. L. Thompson. *Mater. Res. Std.* 5, No. 5, 242-243 (May 1965).
6563. A stable arc source of high ultraviolet radiance, C. R. Yokley. *Proc. Symp. Solar Radiation Simulation, Los Angeles, Calif., Jan. 18-20, 1965*, pp. 107-110 (1965).
6564. A standard for extremely low values of spectral irradiance, R. Stair, W. B. Fussell, and W. E. Schneider. *Appl. Opt.* 5, No. 1, 85-89 (Jan. 1965).
6565. A study of auroral absorption events at the south pole: 2. Conjugate properties, J. K. Hargreaves and H. J. A. Chivers. *J. Geophys. Res.* 70, No. 5, 1093-1102 (Mar. 1965).
6566. A study of errors in the measurement of microscopic spheres, C. P. Saylor. *Appl. Opt.* 4, No. 4, 477-486 (Apr. 1965).
6567. A study of the variation of the surface electrical resistance of lead iodide films with RH at room temperature, F. E. Jones. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, *Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 1. Principles and Methods of Measuring Humidity in Gases*, Ed. R. E. Ruskin, Sec. III, Paper 37, pp. 361-365 (Reinhold Publ. Corp., New York, N. Y., 1965).

6568. A system for accurate D-C and A-C voltage measurements, F. L. Hermach, J. E. Griffin, and E. S. Williams. IEEE Intern. Conv. Record 13, Pt. 11, 172-182 (Mar. 1965).
6569. A system for accurate direct and alternating voltage measurements, F. L. Hermach, J. E. Griffin, and E. S. Williams. IEEE Trans. Instr. Meas. IM-14, No. 4, 215-224 (Dec. 1965).
6570. A test of analytical expressions for the thermal emittance of shallow cylindrical cavities, F. J. Kelly and D. G. Moore. (Symp. Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-5, 1964), NASA Spec. Publ. SP-55, Session 1, Paper 10, pp. 117-131 (1965); Appl. Opt. 4, No. 1, 31-40 (Jan. 1965).
6571. A theorem on the automorphisms of a skew-symmetric matrix, M. Newman. Mich. Math. J. 12, 61-63 (1965).
6572. A theoretical model for predicting thermal stratification and self pressurization of a fluid container, R. W. Arnett and D. R. Millhiser. Proc. Conf. Propellant Tank Pressurization and Stratification, Jan. 20-21, 1965, II, 1-16 (NASA, George C. Marshall Space Flight Center, Huntsville, Alabama, 1965).
6573. A two-channel nulling method for measuring attenuation constants of short sections of waveguide and the losses in waveguide joints, R. W. Beatty. Proc. IEEE 53, No. 6, 642-643 (June 1965).
6574. A uniqueness theorem for entire functions, R. F. DeMar. Proc. Am. Math. Soc. 16, No. 1, 6971 (Feb. 1965).
6575. A universal color language, K. L. Kelly. Color Eng. 3, No. 2, 16-21 (Mar.-Apr. 1965).
6576. A variable characteristic impedance coaxial line, J. E. Cruz and R. L. Brooke. IEEE Trans. Micro. Theory Tech. MTT-13, No. 4, 477-478 (July 1965).
- 6576a. Absolute determination of refractive indices of gases at 47.7 gigahertz, A. C. Newell and R. C. Baird. J. Appl. Phys. 36, No. 12, 2751-2759 (Dec. 1965).
6577. Absolute measurement of W for polonium-210 alpha particles in nitrogen, argon, and an argon-methane mixture, Z. Bay and F. D. McLernon. Radiation Res. 24, No. 1, 1-8 (Jan. 1965).
6578. Acid bases in analytical chemistry, I. M. Kolthoff, S. Bruckenstein, and R. G. Bates. Reprint from Kolthoff-Elving "Treatise on Analytical Chemistry," Pt. 1, Sec. B, Chapt. 10, pp. 361-542 (Interscience Publ., New York, N. Y., 1965).
6579. Acids and bases in alcohol-water solvents, R. G. Bates. Chem. Chem. Ind. (Japan) 18, 680-685 (May 1965).
6580. Acoustical thermometer. An ultrasonic interferometer provides a new method for the precise measurement of low temperatures, H. H. Plumb and G. Cataland. Science 150, No. 3693, 155-161 (Oct. 8, 1965).
- 6580A. Action of zinc dust and sodium iodide in N,N-dimethylformamide on contiguous, secondary sulfonyloxy groups: a simple method for introducing non-thermal unsaturation, R. S. Tipson and A. Cohen. Carbohydrate Res. 1, No. 4, 338-340 (1965).
6581. Adhesive bonding of various materials to hard tooth tissues. IV. Bonding to dentin, enamel, and fluorapatite improved by the use of a surface-active comonomer, R. L. Bowen. J. Dental Res. 44, No. 5, 906-911 (Sept.-Oct. 1965).
6582. Adhesive bonding of various materials to hard tooth tissues. III. Bonding to dentin improved by pretreatment and the use of surface-active comonomer, R. L. Bowen. J. Dental Res. 44, No. 5, 903-905 (Sept.-Oct. 1965).
6583. Adhesive bonding of various materials to hard tooth tissues. II. Bonding to dentin promoted by a surface-active comonomer, R. L. Bowen. J. Dental Res. 44, No. 5, 895-902 (Sept.-Oct. 1965).
6584. Adhesive bonding of various materials to hard tooth tissues. I. Method of determining bond strength, R. L. Bowen. J. Dental Res. 44, No. 4, 690-695 (July-Aug. 1965).
6585. Adhesive bonding of various materials to hard tooth tissues. V. The effect of a surface-active comonomer on adhesion to diverse substrates, R. L. Bowen. J. Dental Res. 44, No. 6, 1369-1373 (Nov.-Dec. 1965).
6586. Adsorption of polymer molecules at low surface coverage, C. A. J. Hoeve, E. A. DiMarzio, and P. Peyser. J. Chem. Phys. 42, No. 7, 2558-2563 (Apr. 1965).
6587. Advances in electrical instrumentation, F. L. Hermach. Ind. Res. pp. 60-66 (June 1965).
6588. Aggregation in matrix models of resource flows, D. Rosenblatt. Am. Stat. 19, No. 3, 36-39 (June 1965).
6589. An analysis of the effects of ground reflection in line-of-sight phase systems, M. C. Thompson, Jr. IEEE Trans. Ant. Prop. AP-13, No. 4, 564-567 (July 1965).
6590. An anomalous decrease of the elastic moduli at very low temperatures in some 300 series stainless steels, R. P. Reed and R. P. Miskell. (Proc. 1964 Cryogenic Engineering Conf., Univ. Pennsylvania, Phil., Pa., Aug. 18-24, 1964), Book Advances in Cryogenic Engineering 10, Paper A-5, 46-49 (Plenum Press Inc., New York, N. Y., 1965).
6591. An automatic method for obtaining data in the Weissfloch-Feenberg node-shift technique, R. W. Beatty. Proc. IEEE 53, No. 1, 79-80 (Jan. 1965).
6592. An experimental study of the backscattering of 5.3 meV alpha particles from platinum and monel metal, D. Walker. Intern. J. Appl. Radiation Isotopes 16, 183-189 (1965).
6593. An image source technique for calculating reflection of gamma rays or neutrons, C. Eisenhauer. Health Phys. 11, 1145-1154 (1965).
6594. An international comparison of current-ratio standards at audio frequencies, B. L. Dunfee and W. J. M. Moore. IEEE Trans. Instr. Meas. IM-14, No. 4, 172-177 (Dec. 1965).
6595. An international comparison of inductive voltage divider calibrations at 400 and 1000 Hertz, W. C. Sze, A. F. Dunn, and T. L. Zapf. IEEE Intern. Conv. Record 13, Pt. 11, 126-135 (Mar. 1965); IEEE Trans. Instr. Meas. IM-14, No. 3, 124-131 (Sept. 1965).
6596. An investigation of concentric ring antennas with low sidelobes, C. O. Stearns and A. C. Stewart. IEEE Trans. Ant. Prop. AP-13, No. 6, 856-863 (Nov. 1965).
6597. An investigation of psychrometric measurement techniques in air conditioning calorimetry, J. C. Davis and P. R. Achenbach. (Proc. 1963 Intern. Symp. Humidity and Moisture, Wash. D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 2, Applications, Sec. IV, Paper 37, pp. 303-313 (Reinhold Publ. Corp., New York, N. Y., 1965).

6598. An unmodulated twin channel microwave attenuation measurement system, D. H. Russell. *ISA Trans.* 4, 162-169 (Apr. 1965).
6599. Analogies between theories of antenna arrays and passive networks, M. T. Ma. *IEEE Intern. Conv. Record* 13, Pt. 5, 150-154 (Mar. 1965).
6600. Analysis of the spectrum of triply ionized praseodymium (Pr IV), J. Sugar. *J. Opt. Soc. Am.* 55, No. 9, 1058-1061 (Sept. 1965).
6601. Angular scattering law for the moon at 6-meter wavelength, W. K. Klemperer. *J. Geophys. Res. Letters* 70, No. 15, 3798-3800 (Aug. 1, 1965).
6602. Annual report of the National Bureau of Standards, spectroscopy, C. E. Moore. *Astron. J.* 70, No. 9, 637-639 (Nov. 1965).
6603. Another method of synthesizing nonuniformly spaced arrays, M. T. Ma. *IEEE Trans. Ant. Prop.* AP-13, No. 5, 833-834 (Sept. 1965).
6604. Application of a high-intensity, multi-slit Raleigh interferometer to sedimentation studies, I. H. Billick and R. J. Bowen. *J. Phys. Chem.* 69, 4024-4030 (1965).
6605. Application of cooled IR detector in an optical system, S. Abramowitz, A. M. Bass, and A. E. Ledford, Jr. *Appl. Opt.* 4, No. 2, 255 (Feb. 1965).
6606. Approach to simple exponential decay in vibrational relaxation, T. Carrington. *J. Chem. Phys.* 43, No. 2, 473-479 (July 15, 1965).
6607. Approximations to the distribution of quadratic forms, M. M. Siddiqui. *Ann. Math. Stat.* 36, No. 2, 677-682 (Apr. 1965).
6608. Are our neighbors from abroad aware of standards and what standards can do for them? A. T. McPherson. *Proc. 13th Annual Meeting Standard Engineering Society*, New York, N. Y., Sept. 3, 1964, pp. 11A1-11A2 (1965).
6609. Atomic lifetimes in neon 1, J. Z. Klose. *Astrophys. J.* 141, No. 2, 814-818 (Feb. 1965).
6610. Avoiding errors from stray radiation in measuring the spectral emittance of diffusely reflecting specimens, H. E. Clark. *Appl. Opt. Letter to Editor* 4, No. 10, 1356-1357 (Oct. 1965).
6611. AXLE: An axiomatic language for string transformations, K. Cohen and J. H. Wegstein. *Commun. Assoc. Comput. Mach.* 8, No. 11, 657-661 (Nov. 1965).
6612. Beam loading in linear accelerators, J. E. Leiss. *IEEE Trans. Nuclear Sci.* NS-12, No. 3, 566-579 (June 1965).
6613. Blood: bone equilibrium in calcium homeostasis, J. MacGregor and W. E. Brown. *Nature* 205, No. 4969, 359-361 (Jan. 1965).
6614. Bounds for class numbers, M. Newman. *Proc. Am. Math. Soc. Symp. Number Theory*, pp. 70-77 (1965).
6615. Breadth of decay quanta in gas lasers, J. A. White. *J. Opt. Soc. Am.* 55, No. 11, 1436-1442 (Nov. 1965).
6616. Breakdown characteristics of semi-conductor materials, H. A. Schafft. *Electro-Technol.* 75, No. 6, 77-82 (June 1965).
6617. Buffer solutions of tris (hydroxymethyl) aminomethane for pH control in 50 weight percent methanol from 10° to 40°, C. M. Woodhead, M. Paabo, R. A. Robinson, and R. G. Bates. *Anal. Chem.* 37, 1291 (1965).
6618. Calculation of electronic energies in  $\text{HCO}_2^+$ ,  $\text{HCO}_2$ , and  $\text{HCO}_2^-$ , W. H. Kirchhoff, J. Farren, and J. W. Linnett. *J. Chem. Phys.* 42, No. 4, 1410-1422 (Feb. 15, 1965).
6619. Calculation of the temperature of a flat-plate wet surface under adiabatic conditions with respect to the Lewis relation, T. Kusuda. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 1. Principles and Methods of Measuring Humidity in Gases, Ed. R. E. Ruskin, Sec. 1, Paper 2, pp. 16-32 (Reinhold Publ. Corp., New York, N. Y., 1965).
6620. Calibration of Bell-type provers by bottling and strapping, C. T. Collett. (Proc. 24th Annual Appalachian Gas Measurement Short Course, 1964), West Virginia Univ. Tech. Bull. 73, 59-65 (1965).
6621. Calibration of microphones, vibration pickups, and earphones, R. K. Cook, S. Edelman, and W. Koidan. *J. Audio Engr. Soc.* 13, No. 4, 290-296 (Oct. 1965).
6622. Unassigned.
6623. Calibration of peak A-C to D-C comparators, D. Flach and L. A. Marzetta. (ISA 20th Annual Conference and Exhibit, Los Angeles, Calif., Oct. 4-7, 1965), ISA Preprint 14. 2-3-65 (1965).
6624. Calibration of Schlieren systems, J. R. Meyer-Arendt and E. P. Shettle. *J. Appl. Opt. Letter to Editor* 4, No. 6, 757 (June 1965).
6625. Cavity resonances for a spherical earth and a concentric shell, J. R. Wait. *J. Atmospheric Terrest. Phys.* 27, 81-89 (1965).
6626. Cesium beam atomic time and frequency standards, R. E. Beehler, R. C. Mockler, and J. M. Richardson. *Metrologia* 1, No. 3, 114-131 (July 1965).
6627. Characteristic variations in the antarctic ionosphere, V. L. Peterson, G. H. Stonehacker, and J. W. Wright. *Antarctic Research Series*, Am. Geophys. Union, Geomagnetism and Aeronomy 4, 47-75 (1965).
6628. Characteristics of a Raman laser excited by an ordinary ruby laser, H. Takuma and D. A. Jennings. *Proc. IEEE* 53, No. 2, 146-149 (Feb. 1965).
6629. Characteristics of dosimeter films processed in phenidone-thiosulfate monobaths, M. Ehrlich. *J. Phot. Sci. Eng.* 9, No. 1, 1-9 (Jan.-Feb. 1965).
6630. Characteristics of soil and vegetated surfaces to reflected and emitted radiation, D. M. Gates. *Proc. 3d Symp. Remote Sensing of Environment, Infrared Phys. Lab., Inst. Sci. Tech., University of Michigan, Ann Arbor, Mich., Feb. 1965*, pp. 573-600 (Mar. 1965).
6631. Characteristics of the "synchrotron light" from the NBS 180 MeV machine, K. Codling and R. P. Madden. *J. Appl. Phys.* 36, No. 2, 380-387 (Feb. 1965).
6632. Chemical analysis, G. M. Brauer and G. M. Kline. *Encyclopedia of Polymer and Technology* 3, 633-665 (John Wiley & Sons, Inc., New York, N. Y., 1965).
6633. Chemical structures as information-representations, transformation, and calculations, S. J. Tauber, G. F. Fraction, and H. W. Hayward. *Book, Colloquium on Technical Preconditions for Retrieval Center Operations*, Philadelphia, Pa., Apr. 24-25, 1964, Ed. B. F. Cheydleur, pp. 73-101 (Spartan Books, Inc., Washington, D. C., 1965).
6634. Chromatography on glass of controlled pore size, W. Haller. *Nature* 206, 693-696 (1965).
6635. Classical diagram technique for calculating thermodynamic properties of solids; application to dielectric susceptibility of paraelectrics, R. M. Wilcox. *Phys. Rev.* 139, No. 4A, A1281-A1291 (Aug. 16, 1965).

6636. Clinical behavior of o-ethoxybenzoic acid-eugenol-zinc oxide cements, S. Civan and G. M. Brauer. *J. Dental Res.* 44, No. 1, 80-83 (Jan.-Feb. 1965).
6637. Clinical evaluation of complete dentures made of eleven different types of denture base materials, J. B. Woelfel, G. C. Paffenbarger, and W. T. Sweeney. *J. Am. Dental Assoc.* 70, No. 7, 1170-1188 (May 1965).
6638. Code for electricity metering, F. K. Harris. revised, Mag. Std. 36, No. 5, 143-145 (May 1965).
6639. Color filter monograph, C. S. McCamy. *Am. Cinematographer* 46, No. 5, 314-315 (May 1965).
6640. Combustion and reaction calorimetry of several compounds of interest in a light element program, G. T. Armstrong. (Proc. 3rd Meeting of the ICRPG Working Group on Thermochemistry, El Segundo, Calif., Mar. 17-18, 1965), Chemical Propulsion Information Agency 1, No. 82 (U), 81-88 (July 1965).
6641. Comment on the "difference between a non-LTE and a pure absorption, model for the line-blanking effect," R. N. Thomas. *Astrophys. J.* 141, No. 1, 333-335 (Jan. 1, 1965).
6642. Comments on the surface characterization of real metals, D. P. DeWitt. (Symp. Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-5, 1964), NASA Spec. Publ. SP-55, Session II, Paper 12, pp. 141-144 (1965).
6643. Comments on "The use of transforms to sum array factors," M. T. Ma. *IEEE Trans. Ant. Prop.* AP-13, No. 1, 174 (Jan. 1965).
6644. Commercial carbon composition resistors as pressure transducers, C. E. Miller, J. W. Dean, and T. M. Flynn. *Rev. Sci. Instr.* 36, No. 2, 231-232 (Feb. 1965).
6645. Comparison of xenon and carbon arcs as radiation sources for laboratory weathering of asphalts, K. G. Martin, P. G. Campbell, and J. R. Wright. *Am. Soc. Testing Mater. Proc.* 65, 809-830 (1965).
6646. Comparisons of tearing-strength for leather, T. J. Carter. *J. Am. Leather Chem. Assoc.* LX, No. 1, 4-14 (Jan. 1965).
6647. Composition, work and interrelation of international and national organization engaged in the standardization of dental materials and therapeutic agents, G. C. Paffenbarger and M. Kumpula. *Intern. Dent. J.* 15, No. 4, 571-587 (Dec. 1965).
6648. Compound-atom states for two-electron systems, T. O'Malley and S. Geltman. *Phys. Rev.* 137, No. 5A, A1344-A1352 (Mar. 1, 1965).
6649. Computer control of precision instrument inventory, S. N. Alexander and P. E. Doyle. *Research/Develop.* pp. 38-43 (May 1965).
6650. Condensation of tungsten on tungsten in atomic detail: Monte Carlo and statistical calculations vs experiment, R. D. Young and D. C. Schubert. *J. Chem. Phys.* 42, No. 11, 3943-3950 (June 1965).
6651. Condensation of tungsten on tungsten in atomic detail: observation with the field ion microscope, P. Gurney, Jr., F. Hutchinson, and R. D. Young. *J. Chem. Phys.* 42, No. 11, 3939-3943 (June 1965).
6652. Conductance of glass immersed in molten salts, K. H. Stern. *J. Electrochem. Soc.* 112, No. 2, 208-211 (Feb. 1965).
6653. Configuration interaction in  $H_2$  and  $H_2^+$ , C. Edmiston and M. Krauss. *J. Chem. Phys.* 42, No. 4, 1119 (Feb. 1965).
6654. Conformation of polystyrene absorbed at the  $\beta$ -temperature, R. R. Stromberg, D. J. Tutas, and E. Passaglia. *J. Phys. Chem.* 69, No. 11, 3955-3963 (Nov. 1965).
6655. Conjugate observations of solar proton events: delayed ionospheric changes during twilight, H. J. A. Chivers and J. K. Hargreaves. *Planet. Space Sci.* 13, 583-592 (1965).
6656. Considerations when using turbine-type flowmeters in cryogenic service, W. J. Alsopach and T. M. Flynn. (Proc. 1964 Cryogenic Engineering Conf., Univ. Pennsylvania, Phila., Pa., Aug. 18-24, 1964), Book, *Advances in Cryogenic Engineering* 10, Paper F-3, 246-252 (Plenum Press Inc., New York, N. Y., 1965).
6657. Continuous-absorption hygrometry with a pneumatic bridge utilizing critical flow, W. A. Wildhack, T. A. Perls, C. W. Kissinger, and J. W. Hayes. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, *Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 1. Principles and Methods of Measuring Humidity in Gases*, Sec. VI, Paper 33, pp. 552-570 (Jan. 1965).
6658. Continuum states of  $H^-$  and the free-free absorption coefficient, S. Geltman. *Astrophys. J.* 141, No. 2, 376-394 (Feb. 15, 1965).
6659. Control of relative humidity and temperature in rubber laboratory of National Bureau of Standards, F. L. Roth and R. D. Stiehler. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, *Humidity and Moisture. Measurement and Control in Science and Industry, Vol. 2. Applications*, Sec. III, Paper 35, pp. 287-292 (Reinhold Publ. Corp., New York, N. Y., 1965).
- 6659A. Correction in the laboratory measurement of rate constant for  $N_2 + O_2 \rightarrow N_2 + O_3$  at 300°K, F. C. Fehsenfeld, A. L. Schmeltekopf, and E. E. Ferguson. *Planetary Space Sci.* 13, 919-920 (Sept. 1965).
6660. Correction of optical distance measurements for the fluctuating atmospheric index of refraction, J. C. Owens and P. L. Bender. *J. Geophys. Res.* 70, No. 10, 2461-2462 (May 15, 1965).
6661. Correlated walk and diffusion equations in a driving force, J. R. Manning. *Phys. Rev.* 139, No. 1A, A126-A135 (July 5, 1965).
6662. Correlation and prediction of thermal conductivity of metals through the application of the principle of corresponding states, A. Cezairliyan and Y. S. Touloukian. (Proc. 3d Symp. Thermophysical Properties, Purdue Univ., Lafayette, Ind., Mar. 22-25, 1965), Book, *Advances in Thermophysical Properties at Extreme Temperatures and Pressures*, pp. 301-313 (American Society of Mechanical Engineers, New York, N. Y., Mar. 1965).
6663. Cosmic noise absorption events at geomagnetically conjugate stations, C. G. Little, E. R. Schiffmacher, H. J. A. Chivers, and K. W. Sullivan. *J. Geophys. Res.* 70, No. 3, 639-648 (Feb. 1, 1965).
6664. Cosmic-noise survey at 65 degrees (N) declination in the 5-50 Mc/s band, R. Parthasarathy and G. M. Lerfeld. *Monthly Notices Roy. Astron. Soc.* 129, No. 6, 395-409 (1965).
6665. Critical examination of vibrational energy transfer theory, F. H. Mies. *J. Chem. Phys.* 42, No. 8, 2709-2720 (Apr. 15, 1965).
6666. Critical-point phenomena, M. S. Green. *Science* 150, No. 3693, 229-236 (Oct. 8, 1965).

6667. Cryogenic coil for megajoule energy storage, V. Arp. Proc. Intern. Symp. Magnet Technology, Ed. H. Brechna and H. S. Gordon, pp. 625-629 (U.S. Atomic Energy Commission, 1965).
6668. Cryogenics and space technology, R. B. Scott. Proc. Xth Intern. Congress of Refrigeration, Munich, Germany, 1963, pp. 105-114, (Pergamon Press Inc., New York, N. Y., 1965).
6669. Crystal and molecular structure of  $C_{40}H_{22}$ , bis (o-dodecacarborane), L. H. Hall, A. Perloff, F. A. Mauer, and S. Block. J. Chem. Phys. 43, No. 11, 3911-3917 (Dec. 1965).
6670. Crystal growth and thermal etching of argon, G. L. Pollack and E. N. Farabaugh. J. Appl. Phys. 36, 513 (1965).
6671. Crystal growth as chemical research, H. S. Peiser and J. L. Torgesen. Chemistry 38, 15-20 (1965).
6672. Crystal imperfections in magnesium fluoride, D. J. Barber. J. Appl. Phys. 36, No. 10, 3342-3349 (Oct. 1965).
6673. Crystal structure of gamma-dicalcium silicate, D. K. Smith, A. Majumdar, and F. Ordway. Acta Cryst. 18, 787 (Apr. 1965).
6674. Current programs in the U. S. Department of Commerce for advancing state science and technology, W. C. Bandy. Mid-Continent Research and Development Council, Report Proc. 11th Annual Meeting, Denver, Colo., Oct. 19-20, 1964, pp. 70-76 (1965).
6675. Damping of the giant resonance in heavy nuclei, M. Danos and W. Greiner. Phys. Rev. 138, No. 4B, B876-891 (May 1965).
6676. Decyclization of cyclohexene, 4-methylcyclohexene, and 4-vinyl-cyclohexene in a single-pulse shock tube, W. Tsang. J. Chem. Phys. 42, No. 5, 1805-1809 (Mar. 1, 1965).
6677. Definition of "ampere" and "magnetic constant," C. H. Page. Proc. IEEE Letter to Editor 53, No. 1, 100-101 (Jan. 1965).
6678. Density distribution of polymer segments in the vicinity of an absorbing interface, C. A. J. Hoeve. J. Chem. Phys. 43, No. 9, 3007-3008 (Nov. 1, 1965).
6679. Density expansion of the viscosity of a moderately dense gas, J. V. Sengers. Phys. Rev. Letters 15, No. 12, 515-517 (Sept. 20, 1965).
6680. Dependence of the critical frequency of the ionospheric E-layer on solar zenith angle and the annual variation in E-layer ionization, T. Shimazaki. Nature 205, No. 4974, 889-891 (Feb. 27, 1965).
6681. Degree of metamorphism, I. Nimeroff and J. A. Yurov. J. Opt. Soc. Am. 55, No. 2, 185-190 (Feb. 1965).
6682. Dependence of the superconducting transition temperature on carrier concentration in semiconducting  $SrTiO_3$ , J. F. Schooley, W. R. Hosler, E. Ambler, J. H. Becker, M. L. Cohen, and C. S. Koone. Phys. Rev. Letters 14, No. 9, 305-307 (Mar. 1, 1965).
6683. Description and analysis of the third spectrum of cerium (Ce III), J. Sugar. J. Opt. Soc. Am. 55, No. 1, 33-58 (Jan. 1965).
6684. Designation of Ligand positions in inorganic complexes, R. F. Pasternack and P. M. McDonnell. Inorg. Chem. 4, No. 4, 600-602 (Apr. 1965).
6685. Determination of hide substance in leather by the Kjeldahl method, S. Dahl. Book, The Chemistry and Technology of Leather IV, Ch. 52, 45-70 (Reinhold Publ. Corp., New York, N. Y., 1965).
6686. Determination of reducing end-groups by reaction with  $C^{14}$ -labeled cyanide, H. S. Isbell. Book, Methods in Carbohydrate Chemistry, Ed. R. L. Whistler, 5, 249-250 (Academic Press Inc., New York, N. Y., 1965).
6687. Determination of tellurium by cathode-ray polarography, E. J. Maienthal and J. K. Taylor. Anal. Chem. 37, No. 12, 1516-1519 (Nov. 1965).
6688. Determination of the composition of complexes and their instability constant by calorimetry. I. The cuprocyanide complexes, A. Brenner. J. Electrochem. Soc. 112, No. 6, 611-621 (June 1965).
6689. Determination of the probability distribution of the number of secondary electrons, Z. Bay and G. Papp. Elec. Commun. 40, No. 1, 134 (1965).
6690. Determining moisture in solid materials by reaction with calcium carbide, S. Dahl. Mater. Res. Std. 5, No. 9, 446-453 (Sept. 1965).
6691. Deuterium isotope effect in vacuum-ultraviolet absorption coefficients of water and methane, A. H. Laufer and J. R. McNesby. Can. J. Chem. 43, No. 12, 3487-3490 (Dec. 1965).
6692. Differences in the characteristic electron energy-loss spectra of solid and liquid bismuth, C. J. Powell. Phys. Rev. Letters 15, No. 22, 852-854 (Nov. 29, 1965).
6693. Digital handling of chemical structures and associated information, S. J. Tauber. Proc. 20th Natl. Conf. Association for Computing Machinery, pp. 206-216 (1965).
6694. Dimensional changes of dental amalgam associated with strain release in the silver alloy particles, G. Dickson and R. M. Waterstrat. J. Dental Res. (Res. Annotation), 44, No. 3, 620 (May-June 1965).
6695. Dipole moment of  $PCl_4$  F from the nonresonant microwave absorption of the vapor, A. Maryott and S. J. Kryder. J. Chem. Phys. 43, No. 7, 2556-2557 (Oct. 1, 1965).
6696. Direct and inert-gas-sensitized radiolysis and photolysis of methane in the solid phase, P. Ausloos, R. E. Rebbert, and S. G. Lias. J. Chem. Phys. 42, No. 2, 540-548 (Jan. 15, 1965).
6697. DC dielectric conductance (reciprocal resistance) and conductivity (reciprocal resistivity) measurements, A. H. Scott. Book, Testing of Polymers I, Ch. 6, 213-236 (Interscience Publ. Inc., New York, N. Y., 1965).
6698. Direct observation of the decomposition multiply charged ions into singly charged fragments, K. E. McCulloh, T. E. Sharp, and H. M. Rosenstock. J. Chem. Phys. 42, No. 10, 3501-3509 (May 15, 1965).
6699. Direct observation of the optical anisotropy of the holmium nucleus, E. Ambler, E. G. Fuller, and H. Marshak. Phys. Rev. 138, No. 1B, B117-B126 (Apr. 12, 1965).
6700. Discussion on the Mossbauer effect, J. R. DeVoe. (Proc. Intern. Atomic Energy Agency Symp. Radiochemical Methods of Analysis, Salzburg, Austria, Oct. 19-23, 1964), Book, Radiochemical Methods of Analysis I, 19-20 (Intern. Atomic Energy Agency, Vienna, Austria, 1965).
6701. Dislocations and stacking faults in rutile crystals grown by flame-fusion methods, D. J.

- Barber and E. N. Farabaugh. *J. Appl. Phys.* 36, No. 9, 2803-2806 (Sept. 1965).
6702. Dispersion characteristics of the  $1.15\mu$  He-Ne laser line, H. S. Boyne, M. M. Birky, and W. G. Schweitzer, Jr. *Appl. Phys. Letters* 7, No. 3, 62-65 (Aug. 1, 1965).
6703. Displacement of dislocation images formed in transmission electron microscopy. R. DeWit. *J. Appl. Phys.* 36, No. 1, 329-330 (Jan. 1965).
6704. Dissociation constant of acetic acid in deuterium oxide from 5 to  $50^\circ$ . Reference points for a pD scale, R. Gary, R. G. Bates, and R. A. Robinson. *J. Phys. Chem.* 69, No. 8, 2750-2753 (1965).
6705. Dissociation of acetic acid- $d_3$  in aqueous solution and related isotope effects from 0 to  $50^\circ$ , M. Paabo, R. G. Bates, and R. A. Robinson. *J. Phys. Chem.* 70, 540-543 (1966).
6706. Dissociation of  $H_2^+$  by electron impact, G. H. Dunn, B. Van Zyl, and R. H. Zare. *Phys. Rev. Letters* 15, No. 15, 610 (Oct. 11, 1965).
6707. Dissociative recombination in helium afterglows, E. E. Ferguson, F. C. Fehsenfeld, and A. L. Schmeltekopf. *Phys. Rev.* 138, A381-A385 (Apr. 1965).
6708. Drift-free Mossbauer spectrometer, F. C. Ruegg, J. J. Spijkerman, and J. R. DeVoe. *Rev. Sci. Instr.* 36, No. 3, 356-359 (Mar. 1965).
6709. Drift mobility and diffusion for impurities in ionic crystals, J. R. Manning. *Phys. Rev.* 139, No. 6A, A2027-A2034 (Sept. 13, 1965).
6710. Dynamic collective theory of odd-A nuclei, M. Danos, W. Greiner, and C. B. Kohr. *Phys. Rev.* 138, No. 5B, B1055-B1066 (June 1965).
6711. Dynamic spectral characteristics of micro-pulsation pearls, J. H. Pope, J. Geophys. Res. 70, No. 15, 3595-3603 (Aug. 1, 1965).
6712. Educating metrologists, T. R. Young. *Ordinance XLIX*, No. 268, 432-435 (Jan.-Feb. 1965).
6713. Effect of electrical fields and density in the radiolysis of ethane, H. H. Carmichael, R. Gordon, Jr., and P. Ausloos. *J. Chem. Phys.* 42, No. 1, 343-351 (Jan. 1, 1965).
6714. Effect of moisture on surface flammability of coated and uncoated cellulose materials, T. G. Lee, J. L. Loftus, and D. Gross. *Am. Soc. Testing Materials Spec. Tech. Publ.* 385, 112-123 (May 1965).
6715. Effect of surface texture on diffuse spectral reflectance, Part A. Diffuse spectral reflectance of metal surfaces, H. J. Keegan, J. C. Schleter, and V. R. Weidner. (Symp. Measurement of Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-6, 1964), NASA Spec. Publ. SP-55, Session II, Paper 17, pp. 165-169 (1965).
6716. Effect of surface texture on diffuse spectral reflectance. Part B. Surface texture measurement on metal surfaces, D. B. Spangenberg, A. G. Strang, and J. L. Chamberlin. (Symp. Measurement of Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-6, 1964), NASA Spec. Publ. SP-55, Session II, Paper 17, pp. 169-177 (1965).
6717. Effect of temperature on the vacuum ultraviolet transmittance of lithium fluoride, calcium fluoride, barium fluoride, and sapphire, A. H. Laufer, J. A. Pirog, and J. R. McNesby. *J. Opt. Soc. Am.* 55, No. 1, 64-66 (Jan. 1965).
6718. Effects of finite lattice heat capacity on spin-lattice relaxation, R. L. Peterson. *Phys. Rev.* 137, No. 5A, A1444-A1448 (Mar. 1965).
6719. Effects of tropospheric refraction in earth-space links, K. A. Norton. Book, Progress in Radio Science 1960-1963—Radio and Troposphere, Ed. F. du Castel, II, 186-210 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
6720. Elastic constants of cubic lead fluoride at room temperature, J. H. Wasilik and M. L. Wheat. *J. Appl. Phys.* 36, No. 3, Pt. 1, 791-793 (Mar. 1965).
6721. Elastic resonances in electron scattering from He, Ne, Ar, Kr, Xe, and Hg, C. E. Kuyatt, J. A. Simpson, and S. R. Mielczarek. *Phys. Rev.* 138, No. 2A, A385-A399 (Apr. 19, 1965).
6722. Elastic stress-strain relations in perfect elastic fluids, B. Bernstein, E. Kearsley, and L. Zapas. *Trans. Soc. Rheol.* 9, Pt. 1, 27-39 (1965).
6723. Electrochemical methods, J. K. Taylor, E. J. Maienthal and G. Marinenko. Book, Trace Analysis: Physical Methods, Ed. G. H. Morrison, Chapt. 10, pp. 377-433 (Interscience Publ. Inc., New York, N. Y., 1965).
6724. Electrode potentials in fused systems. IX. Liquid junction potentials in the AgCl-AgBr system, K. H. Stern. *J. Electrochem. Soc.* 112, No. 10, 1049-1050 (Oct. 1965).
6725. Electrodeposition of alloys, past, present, and future, A. Brenner. *Plating* 52, No. 12, 1249-1257 (Dec. 1965).
6726. Electromagnetic properties of a quantized relativistic electron-positron gas, L. A. Steinert. *Il Nuovo Cimento, Serie X*, 36, 935-953 (Apr. 1965).
6727. Electromagnetic wave propagation and relativistic damping effects in a uniformly magnetized electron-positron gas, L. A. Steinert. *Il Nuovo Cimento* 40, No. 10, 345-374 (Dec. 1965).
- 6727A. Electron accelerators for food processing, H. W. Koch and E. H. Eisenhower. (Proc. Intern. Conf. Radiation Preservation of Foods, Boston, Mass., Sept. 27-30, 1964), Natl. Acad. Sci.-Natl. Res. Council Publ. 1273, pp. 149-180 (1965).
6728. Electron density measurements in the magnetically confined arc, C. K. McLane, S. Takeda, R. C. Thompson, and W. E. Thomas, Jr. *J. Appl. Phys.* 36, No. 2, 337-341 (Feb. 1965).
6729. Electron microscopy and diffraction of aluminum oxide whiskers, D. J. Barber. *Phil. Mag.* 10, No. 103, 75-94 (May 1965).
6730. Electron microscopy and diffraction of synthetic corundum crystals. I. Pure aluminum oxide grown by the Verneuil process, D. J. Barber and N. J. Tighe. *Phil. Mag.* 11, No. 111, 495-512 (May 1965).
6731. Electron paramagnetic resonance and the primarily 3d wavefunctions of the tetrachlorocuprate ion, M. Sharnoff. *J. Chem. Phys.* 42, No. 10, 3383-3395 (1965).
6732. Electron paramagnetic resonance spectrum of bis-8-hydroxyquinolate-copper (II) dihydrate, G. F. Kokoszka, H. C. Allen, Jr., and G. Gordon. *J. Chem. Phys.* 42, No. 10, 3730-3731 (May 15, 1965).
6733. Electron paramagnetic resonance spectra of zinc-doped copper acetate monohydrate, G. F. Kokoszka, H. C. Allen, Jr., and G. Gordon. *J. Chem. Phys.* 42, No. 10, 3693-3697 (May 15, 1965).

- 6733A. Electron precipitation and ionospheric radio absorption in the auroral zones, K. L. Hargreaves and R. D. Sharp. *Planetary Space Sci.* 13, 1171-1183 (Dec. 1965).
6734. Emission spectroscopy, B. F. Scribner and M. Marposhes. *Treatise on Analytical Chemistry*, Ed. I. M. Kolthoff and P. J. Elving, 6, Pt. 1, Chapt. 64, 3347-3461 (Interscience Publ. Inc., New York, N. Y., 1965).
6735. Emission spectrum of CF, T. L. Porter, D. E. Mann, and N. Acquista. *J. Mol. Spectry*, 16, 228 (June 1965).
6736. Empirical relations for energy levels of atoms and ions, A. E. Goertz. *J. Opt. Soc. Am.* 55, 742-743 (June 1965).
6737. Energy levels of  $\text{Pr}^{3+}$  in the vapor state, J. Sugar. *Phys. Rev. Letters* 14, No. 18, 731-732 (May 3, 1965).
6738. Energy of the formation of the anion Frenkel pair in calcium fluoride, A. D. Franklin. *J. Phys. Chem. Solids* 26, 933-934 (1965).
6739. Equilibrium pressures of oxygen over  $\text{MnO}_2$ - $\text{Mn}_2\text{O}_3$  at various temperatures, E. M. Otto. *J. Electrochem. Soc.* 112, No. 4, 367-370 (Apr. 1965).
6740. Error bounds for asymptotic expansions of special functions in the complex plane, F. W. J. Olver. *Proc. Symp. on Error in Digital Computation*, U.S. Army Research Center, Madison, Wisconsin, April 26-28, 1965, Vol. 2, pp. 55-75 (John Wiley and Sons, Inc., New York, N. Y., 1965).
6741. Error bounds for asymptotic solutions of second-order differential equations having an irregular singularity of arbitrary rank, F. W. J. Olver and F. Stenger. *J. SIAM, Ser. B*, 2, No. 2, 244-249 (1965).
6742. ESR measurement of metastable atomic nitrogen in helium-nitrogen afterglows, K. M. Evenson and H. E. Radford. *Phys. Rev. Letters* 15, No. 24, 916-917 (Dec. 1965).
6743. Estimation for a one-parameter exponential model, J. A. Speckman and R. G. Cornell. *J. Am. Stat. Assoc.* 60, 560-572 (1965).
6744. Estimation of the parameters of the Hyper-Poisson distributions, E. L. Crow and G. E. Bardwell. (Proc. Symp. Classical and Contagious Discrete Distribution, Montreal, Canada, Aug. 15-20, 1963), Chapt. V, pp. 127-140 (Statistical Publ. Soc., Calcutta, India, 1965).
6745. Etch pits in chromic oxide, W. S. Brower, Jr. and E. N. Farabaugh. *J. Appl. Phys.* 36, No. 4, 1489-1490 (Apr. 1965).
6746. Evidence for an electrochemical-mechanical stress corrosion fracture in a stainless steel, H. L. Logan, M. J. McBea, and D. J. Kahan. *Corrosion Sci.* 5, 729-730 (1965).
6747. Excitation of molecular rotation by slow electrons, K. Takayanagi and S. Geltman. *Phys. Rev.* 138, No. 4A, A1003-A1010 (May 17, 1965).
6748. Excitation of optically forbidden states in the ionization continuum by electron impact, J. A. Simpson, G. E. Chamberlain, and S. R. Mielczarek. *Phys. Rev.* 139, No. 4A, A1039-A1041 (Aug. 1965).
6749. Experimental atomic scattering factors for magnesium oxide, G. Burley. *J. Phys. Chem. Solids* 26, 1605-1613 (Apr. 8, 1965).
6750. Experimental fires in enclosures, A. F. Robertson. *Tenth Symp. (Intern.) on Combustion*, Cambridge, England, Aug. 1964, pp. 931-942 (1965).
6751. Experimental verification of the WLF superposition technique, A. J. Bur. (Proc. Electrical Insulation Conf., Cleveland, Ohio, Oct. 1964), Natl. Acad. Sci.-Natl. Res. Council Publ. 1238, pp. 70-71 (1965).
6752. Experiments in electron scattering, L. L. Marton. *Lab. Invest.* 14, Pt. II, No. 6, 754 (1965).
6753. Extinction coefficients of triplet-triplet transitions in aromatic compounds, R. A. Keller and S. G. Hadley. *J. Chem. Phys.* 42, No. 7, 2382 (Apr. 1965).
6754. Fermi resonance in condensed  $\text{CF}_4$  and  $\text{CCl}_4$ , S. Abramowitz and J. J. Comeford. *Spectrochim. Acta* 21, 1479-1486 (1965).
6755. Field desorption of thorium from a field-evaporated tungsten surface, R. D. Young. *J. Appl. Phys.* 36, No. 9, 2656-2657 (Sept. 1965).
6756. Field strength calibration techniques at the NBS, H. E. Taggart. *IEEE Trans. Electromag. Compatibility EC-7*, No. 2, 163-169 (June 1965).
6757. Fire endurance of small gypsum slabs, J. V. Ryan. (Proc. Am. Soc. Testing Materials Annual Meeting on Moisture Influence on Material Behavior During Fire Test, Chicago, Ill., June 1964), Am. Soc. Testing Mater. Spec. Tech. Publ. 385, 96-111 (May 1965).
6758. Flexural behavior of prestressed split-beam composite concrete sections, J. O. Bryson, L. F. Skoda, and D. Watstein. *J. Prestressed Concrete Inst.* 10, No. 3, 77-91 (June 1965).
6759. Focused-beam electron bombardment evaporator, D. H. Blackburn and W. Haller. *Rev. Sci. Instr.* 36, No. 7, 901-903 (July 1965).
6760. Force fields for the boron trihalides, I. W. Levin and S. Abramowitz. *J. Chem. Phys.* 43, No. 12, 4213-4222 (Dec. 15, 1965).
6761. Formation of  $\text{NF}$  and  $\text{NF}_2$  by photolysis, D. E. Mann and J. J. Comeford. *Spectrochim. Acta* 21, 197-198 (1965).
6762. 4f<sub>nl</sub> configurations of doubly ionized cerium (Ce III), N. Spector. *J. Opt. Soc. Am.* 55, No. 5, 492-501 (May 1965).
6763. Four methods of determining temperature sensitivity of strain gages at elevated temperatures, C. H. Melton and R. L. Bloss. *ISA J.* 12, No. 10, 69-74 (Oct. 1965).
6764. Fracture processes in polymeric solids, I. Wolock and S. B. Newman. *Book, Fracture Processes in Polymeric Solids. Phenomena and Theory*, Ed. B. Rosen, Chapt. IIC, pp. 235-290 (Interscience Publ. Inc., New York, N. Y., Jan. 1965).
6765. Fracture topography of brittle polymers, S. B. Newman. *Polymer Engr. Sci.* 5, No. 3, 159-165 (July 1965).
6766. Frequency-dependent transport coefficients in fluid mechanics, R. Zwanig. *J. Chem. Phys.* 43, No. 2, 714-720 (July 15, 1965).
6767.  $\bar{J}_0$  selection rules in  $\text{SU}(12)_{pp}$  annihilation, H. Harari, H. J. Lipkin, and S. Meshkov. *Phys. Rev. Letters* 20, No. 14, 845-847 (May 1965).
6768. Gas chromatographic determination of the moisture content of grain, E. L. Weise, R. W. Burke, and J. K. Taylor. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, Humidity and Moisture. Vol. 4. Principles and Methods of Measuring Moisture in Liquids and

- Solids, Sec. I, Paper 1, pp. 3-6 (Reinhold Publ. Corp., New York, N. Y., 1965).
6769. Gas mixtures and pressures for optimum output power of RF excited helium-neon gas lasers at 632.8 nm, K. D. Mielenz and K. F. Nefflen. Appl. Opt. Letter 4, 565 (May 1965).
6770. Gas-phase photolysis of cyclohexane in the far ultraviolet: modes of decomposition of the neutral excited cyclohexane molecular and reactions of the parent cyclohexane ion, R. D. Doecker and P. Ausloos. J. Chem. Phys. 42, No. 11, 3746 (June 1, 1965).
6771. Gearing errors as related to alignment techniques of the rotary-vane attenuator, W. Larson. 19th Annual IEEE Conference and Exhibit on Instrumentation and Measurements, New York, N. Y., Oct. 12-15, 1964, Preprint No. 12-5-2-64 (Sept. 1965); IEEE Instr. Meas. IM-14, No. 3, 117-123 (Sept. 1965).
6772. General report on fundamental spectroscopic data, C. E. Moore. (Proc. Intern. Astronomical Union Commission 14 Meeting, Hamburg, Germany, Aug. 1964), Trans. Intern. Astron. Union XIIA, 156 (July 1965).
6773. Generalized functions of symmetric matrices, M. Marcus and M. Newman. Proc. Am. Math. Soc. 16, No. 4, 826-830 (Aug. 1965).
6774. Generalized master equation for arbitrary initial states, J. Weinstock. Phys. Rev. 140, No. 1A, A98-A99 (Oct. 4, 1965).
6775. Growth layers on ammonium dihydrogen phosphate, J. L. Torgesen and R. W. Jackson. Science 148, No. 3672, 952-954 (May 14, 1965).
6776. H<sub>2</sub>-transfer reactions in the gas-phase radiolysis of hydrocarbons, P. Ausloos and S. G. Lias. J. Chem. Phys. 43, No. 1, 127-135 (July 1, 1965).
6777. High-frequency elastic moduli of simple fluids, R. Zwanzig and R. D. Mountain. J. Chem. Phys. 43, No. 12, 4464-4471 (Dec. 15, 1965).
6778. High-precision coulometric titrations with special reference to the determination of uranium, J. K. Taylor and G. Marinenko. (Proc. Conf. High-Precision Analysis of Substances of Interest to Nuclear Energy, Jan. 18-22, 1965), Euratom, Bureau Central de Mesures Nucléaires, pp. 147-161 (Brussels, Belgium, 1965).
6779. High pressure single crystal studies of ice VI, S. Block, C. E. Weir, and G. J. Piermarini. Science 148, 947 (1965).
6780. High silica glass, quartz, and vitreous silica, J. S. Laufer. J. Opt. Soc. Am. 55, No. 4, 458-460 (Apr. 1965).
6781. High temperature microwave spectroscopy: AlF and AlCl, D. R. Lide. J. Chem. Phys. 42, No. 3, 1013-1018 (Feb. 1965).
6782. High temperature seal of sapphire windows to ceramics, G. A. Hornbeck. Rev. Sci. Instr. 36, No. 6, 845 (June 1965).
6783. Higher-order skewness in a turbulent field, F. N. Frenkiel and P. S. Klebanoff. Compt. Rend. 260, 6026-6029 (1965).
6784. Historical background of image formation, L. L. Marton. Lab. Invest. 14, Pt. 1, No. 6, 739 (1965).
6785. Hydrogen atom addition to olefins: relative rates at the two carbon positions and derived heats of formation of several alkyl radicals, R. D. Kelley, R. Klein, and M. D. Scheer. J. Phys. Chem. 69, No. 3, 905-908 (Mar. 1965).
6786. Hyperfine structure of Hg<sup>193\*</sup>, Hg<sup>195</sup> and Hg<sup>199\*</sup> by Zeeman level crossings, W. W. Smith. Phys. Rev. 137, No. 2A, A330-A339 (Jan. 18, 1965).
6787. Identification of energy levels of negative ions, U. Fano and J. W. Cooper. Phys. Rev. 138, No. 2A, A400-402 (Apr. 19, 1965).
6788. Impact of new technology on the forest industries, R. W. Smith, Jr. Proc. 2nd Annual Forest Industries Marketing Conference, June 16-17, 1965, pp. 119-130 (University of Oregon Press, Eugene, Oregon, June 16, 1965).
6789. Impedance of sealed nickel-cadmium dry cells, R. J. Brodd and H. J. DeWane. J. Electrochem. Technol. 3, No. 1-2, 12-17 (Jan.-Feb. 1965).
6790. Importance of surface films, J. C. Richmond. (Symp. Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-5, 1964), NASA Spec. Publ. SP-55, Session II, Paper 15, pp. 157-158 (1965).
6791. Improved measurement of the electric dipole moment of the hydroxyl radical, F. X. Powell and D. R. Lide. J. Chem. Phys. 42, No. 12, 4201-4202 (June 1965).
6792. Impurity controlled properties of ionic solids, A. D. Franklin. (Proc. Symp. Physics and Chemistry of Ceramics, Pennsylvania State Univ., University Park, Pa., May 28-30, 1963), Book, Physics and Chemistry of Ceramics, pp. 77-109 (Gordon and Breach, New York, N. Y., 1963).
6793. Inelastic scattering of electrons by helium, G. E. Chamberlain and H. G. M. Heideman. Phys. Rev. Letters 15, No. 8, 337-338 (Aug. 1965).
6794. Inequalities for permanents and permanental minors, R. A. Brualdi and M. Newman. Proc. Cambridge Phil. Soc. 61, Pt. 3, 741-746 (Jan. 26, 1965).
6795. Influence or irregular terrain on propagation, J. W. Herbstreit. (Proc. XIV General Assembly of URSI, Tokyo, Japan, 1963), Book, Progress in Radio Science 1960-1963. Vol. II, Radio and Troposphere, Ed. F. du Castel, pp. 141-156 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
6796. Influence of paramagnetic resonance on the static susceptibility, G. A. Candela. Spin-lattice relaxation time of cupric sulfate pentahydrate, J. Chem. Phys. 42, No. 1, 113-117 (Jan. 1, 1965).
6797. Influence of spin paramagnetism on superconductivity, R. A. Kamper, R. S. Collier, and Y. Ohori. Phys. Rev. 137, No. 1A, A75-A77 (Jan. 1965).
6798. Influence or irregular terrain on propagation, J. W. Herbstreit. (Proc. XIV General Assembly of URSI, Tokyo, Japan, 1963), Book, Progress in Radio Science 1960-1963. Vol. II, Radio and Troposphere, Ed. F. du Castel, pp. 141-156 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
6799. Infrared and microwave spectra of ClCN, W. J. Lafferty, D. R. Lide, and R. A. Toth. J. Chem. Phys. 43, No. 6, 2063-2070 (Sept. 15, 1965).
6800. Infrared emission spectrum of HBr excited in an electric discharge. Determination of molecular constants, T. C. James and R. J. Thibault. J. Chem. Phys. 42, No. 4, 1456-1457 (Feb. 1965).

6801. Infrared measurements on allene and allene-d<sub>4</sub>, A. G. Maki and R. A. Toth. *J. Mol. Spectr.* 17, No. 1, 136-155 (July 1, 1965).
6802. Infrared spectrum of the free radical NCN, D. E. Milligan, M. E. Jacox, J. J. Comeford, and D. E. Mann. *J. Chem. Phys.* 43, No. 2, 756-757 (July 15, 1965).
6803. Infrasonic observations of the May 16, 1964, volcanic explosion on the island of Bali, V. H. Goerke, J. M. Young, and R. K. Cook. *J. Geophys. Res.* 70, No. 24, 6017-6022 (Dec. 15, 1965).
6804. Initiation of spherulite growth: The case of con-current homogeneous and heterogeneous nucleation, F. Gornick. *J. Appl. Phys.* 36, No. 10, 3012-3014 (Oct. 1965).
6805. Interaction between configurations with several open shells, U. Fano. *Phys. Rev.* 140, No. 1A, A67-A75 (Oct. 4, 1965).
6806. Interaction of oxygen with platinum, A. J. Melmed. *J. Appl. Phys.* 36, No. 11, 3691-3692 (Nov. 1965).
6807. Interaction of 350-keV polarized neutrons with oriented <sup>18</sup>Ho nuclei, R. Wagner, P. D. Miller, T. Tamura, and H. Marshak. *Phys. Rev.* 139, No. 1B, B29-B46 (July 12, 1965).
6808. Interaction potential between He and H<sub>2</sub>, M. Krauss and F. H. Mies. *J. Chem. Phys.* 42, No. 8, 2703-2708 (Apr. 15, 1965).
6809. Interference patterns in reverberant sound fields, II, R. V. Waterhouse and R. K. Cook. *J. Acoust. Soc. Am.* 37 No. 3, 424-428 (Mar. 1965).
6810. International comparison of atomic frequency standards via VLF radio signals, A. H. Morgan, B. E. Blair, and E. L. Crow. *Book, Progress in Radio Science 1960-1963. Vol. 1. Radio Standards and Measurements*, pp. 40 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
6811. International weights and measures, C. H. Page. (ISA 20th Annual Conference and Exhibit, Los Angeles, Calif., Oct. 4-7, 1965), ISA Preprint 33.3-1-65 (1965).
6812. Interpretation of Ar<sup>+</sup>-Ar collisions at 50 keV, U. Fano and W. Lichten. *Phys. Rev. Letters* 14, No. 16, 627-629 (Apr. 1965).
6813. Investigation of the anomaly in the response of silicon semiconductor radiation detectors at low temperatures, W. R. Dodge, S. R. Domen, A. T. Hirschfeld, and D. D. Hoppes. *IEEE Trans. Nuclear Sci.* NS-12, No. 1, 295-303 (Feb. 1965).
6814. Ionization energies of the singly ionized rare earths, J. Sugar and J. Reader. *J. Opt. Soc. Am.* 55, No. 10, 1286-1290 (Oct. 1965).
6815. Ionospheric effects observed around the time of the Alaskan earthquake of March 28, 1964, K. Davies and D. M. Baker. *J. Geophys. Res.* 70, No. 9, 2251-2253 (May 1, 1965).
6816. Ionospheric propagation at high frequencies, K. Davies. *4UITU Calling* 2, 112-113 (1965).
6817. Isotopic determination of the vibrational numbering for the B<sup>2</sup> O-u, R. L. Brown and T. C. James. *J. Chem. Phys.* 42, No. 1, 33-38 (Jan. 1965).
6818. Isotopic effects in the ν<sub>3</sub> fundamental of matrix-isolated BCl<sub>3</sub>, J. J. Comeford, S. Abramowitz, and I. W. Levin. *J. Chem. Phys.* 43, No. 12, 4536-4537 (Dec. 15, 1965).
6819. Isotopic fractionation of uranium related to roll features in Sandstone, Power River Basin, Wyoming and Colorado Plateau, J. N. Rosholt, A. P. Butler, E. L. Garner, and W. R. Shields. *Econ. Geology* 60, No. 2, 199-213 (Mar.-Apr. 1965).
6820. Isotopic mixing in CO chemisorbed on tungsten, T. E. Madey, J. T. Yates, Jr., and R. C. Stern. *J. Chem. Phys.* 42, No. 4, 1372-1378 (Feb. 1965).
6821. Isotopic mixing in nitrogen chemisorbed on W, J. T. Yates, Jr. and T. E. Madey. *J. Chem. Phys.* 43, No. 3, 1055-1059 (Aug. 1, 1965).
6822. Justification for neglecting the compressibility of the ionosphere in VLF radio propagation, J. R. Wait. *IEEE Trans. Ant. Prop.* AP-13, 480-481 (May 1965).
6823. Laboratory measurement of the rate of the reaction N<sub>2</sub>+O NO+N at thermal energy, E. E. Ferguson, F. C. Fehsenfeld, P. D. Goldan, A. L. Schmeltekopf, and H. I. Schiff. *Planet. Space Sci.* 13, 823-827 (1965).
6824. Laboratory measurement of the rate of the reaction O+O<sub>2</sub>-O<sub>3</sub>+O at thermal energy, F. C. Fehsenfeld, P. D. Goldan, A. L. Schmeltekopf, and E. E. Ferguson. *Planet. Space Sci.* 13, 579-582 (Mar. 1965).
6825. Laser double-quantum photodetachment of I<sup>-</sup>, J. L. Hall, E. J. Robinson, and L. M. Branscomb. *Phys. Rev. Letters* 14, No. 25, 1013-1016 (June 21, 1965).
6826. Latensification in radiographic emulsions, W. L. McLaughlin. *J. Phot. Sci.* 13, 1-11 (1965).
6827. Letter to the Editor, C. H. Page. *Metrologia* 1, No. 2, 73-74 (Apr. 1965).
6828. Letter to the Editor "Physical significance of the Fulcher equation," A. B. Bestul. *Phys. Chem. Glasses* 6, No. 3, 108-110 (June 1965).
6829. Lightning characteristics as derived from sferics, W. L. Taylor. (Proc. 3rd Intern. Conf. Atmospheric and Space Electricity, Montreux, Switzerland, May 1963), *Book, Problems of Atmospheric and Space Electricity*, Ed. S. C. Coroniti, pp. 388-404 (Elsevier Publ. Corp., Amsterdam, The Netherlands, 1965).
6830. Limits on calorimetric residual entropies of glasses, A. B. Bestul and S. S. Chang. *J. Chem. Phys.* 43, No. 12, 4532-4533 (Dec. 15, 1965).
6831. Line profiles in the far ultraviolet absorption spectra of the rare gases, U. Fano and J. W. Cooper. *Phys. Rev.* 137, No. 5A, A1364-A1379 (Mar. 1965).
- 6831A. Linear tuning of a microwave cavity, M. J. Vetter. *IEEE Trans. Microwave Theor. Tech.* MTT-13, No. 6, 880 (Nov. 1965).
6832. Localized-induction concept on a curved vortex and motion of an elliptic vortex ring, R. J. Arms and F. R. Hama. *Phys. Fluids* 8, No. 4, 553-559 (Apr. 1965).
6833. Long-period very low frequency emission pulsations, W. B. Carson, J. A. Koch, J. H. Pope and R. M. Gallet. *J. Geophys. Res.* 70, No. 17, 4293-4303 (Sept. 1, 1965).
6834. Longitude distribution of proton flares, C. S. Warwick. *J. Astrophys.* 141, No. 2, 500-504 (Feb. 15, 1965).
- 6834A. Longitudinal magnetoresistance of copper, R. L. Powell. *Low Temp. Phys.* LT-9, Pt. B., 732-735 (1965).
6835. Loop prominences and coronal condensations. I. Non-thermal velocities within loop prominences, J. T. Jefferies and F. Q. Orrall. *Astrophys. J.* 141, No. 2, 505-518 (Feb. 15, 1965).

6836. Loop prominences and coronal condensations. II. The source of mass and energy and a model of the loop prominence mechanism, J. T. Jeffries and F. Q. Orrall. *Astrophys. J.* 141, No. 2, 519-525 (Feb. 15, 1965).
6837. Low atomic number dye systems for ionizing radiation measurement, W. L. McLaughlin and L. Chalkley. *J. Photo. Sci. Eng.* 9, No. 3, 159-166 (May-June 1965).
- 6837A. LF-VLF frequency and time services of NBS, D. H. Andrews. *IEEE Trans. Instr. Meas.* IM-14, No. 4, 233-237 (Dec. 1965).
6838. Low temperature magnetic transitions in some rare-earth trichlorides, J. C. Eisenstein, R. P. Hudson, and B. W. Mangum. *Phys. Rev.* 137, No. 6A, A1886-A1895 (Mar. 1965).
6839. Low-Z dye stems for ionizing radiation measurement, W. L. McLaughlin and L. Chalkley. *J. Photo. Sci. Eng.* 9, No. 3, 159-166 (May-June 1965).
6840. MAGIC--A machine for automatic graphics interface to a computer, D. E. Rippe and D. C. Humphries. *Proc. Fall Joint Computer Conf.*, Nov. 20-Dec. 2, 1965, Las Vegas, Nevada, pp. 819-830 (Spartan Books, Inc., Wash., D. C. 1965).
6841. Maintenance of marine electronics equipment by personnel not trained in electronic maintenance, G. Shapiro and G. J. Rogers. *Proc. Annual Tankers Conf. Am. Petroleum Inst.*, pp. A1-A48 (June 1965).
6842. Major revisions made in new dry cell standard, W. J. Hamer. *Mag. Std.* 36, No. 10, 306-308 (Oct. 1965).
6843. Mass spectrometric study of photoionization. III. Methane and methane- $d_4$ , V. H. Dibeler, J. M. Krauss, R. M. Reese, and F. N. Harlike. *J. Chem. Phys.* 42, No. 11, 3791-3796 (June 1965).
6844. Mass spectrometric study of the reaction of nitrogen atoms with ethylene, J. T. Herron. *J. Phys. Chem.* 69, No. 8, 2736-2740 (Aug. 1965).
6845. Mass spectrophotometric study of photoionization. II.  $H_2$ , HD, and  $D_2$ , V. H. Dibeler, R. M. Reese and M. Krauss. *J. Chem. Phys.* 42, No. 6, 2045-2048 (Mar. 15, 1965).
6846. Mass spectrum of yttrium chloride vapor, J. D. McKinley. *J. Chem. Phys.* 42, No. 6, 2245-2246 (Mar. 15, 1965).
6847. Master equations and Markov processes, I. Oppenheim and K. E. Shuler. *Phys. Rev.* 138, No. 4B, B1007-B1011 (May 1965).
6848. Matrix-isolation infrared spectrum of the free radical CCO, M. E. Jacox, D. E. Milligan, N. G. Moll, and W. E. Thompson. *J. Chem. Phys.* 43, No. 10, 3734-3746 (Nov. 1965).
6849. Matrix-isolation infrared spectrum of the free radical  $NH_2$ , D. E. Milligan and M. E. Jacox. *J. Chem. Phys.* 43, No. 12, 4487-4493 (Dec. 15, 1965).
6850. Matrix isolation study of the photolysis of cyanogen azide. The infrared and ultraviolet spectra of the free radical NCN, D. E. Milligan, M. E. Jacox, and A. Bass. *J. Chem. Phys.* 43, No. 9, 3149-3160 (Nov. 1, 1965).
6851. Matrix isolation study of the reaction of Cl atoms with CO. The infrared spectrum of the free radical ClCO, M. E. Jacox and D. E. Milligan. *J. Chem. Phys.* 43, No. 3, 866-870 (Aug. 1, 1965).
6852. Matrix-isolation study of the reaction of F atoms with CO. Infrared and ultraviolet spectrum of the free radical FCO, D. E. Milligan, M. E. Jacox, A. M. Bass, J. J. Comeford, and D. E. Mann. *J. Chem. Phys.* 42, No. 9, 3187-3195 (May 1965).
6853. Measurement and standardization of LF to UHF electrical quantities. Sketch of recent worldwide developments, M. C. Selby. *Book, Progress in Radio Science 1960-1963*, Vol. 1, Radio Standards and Measurements, pp. 45-55 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
6854. Measurement of radiation dose distributions with photochromic materials, W. L. McLaughlin and L. Chalkley. *Radiology* 84, No. 1, 124-125 (Jan. 1965).
6855. Measurement--R & D looks to future, W. A. Wildhack. *Control Eng.* 12, No. 1, 75-76 (Jan. 1965).
6856. Measurement standards, A. G. McNish. *Intern. Sci. Tech.* 58-66 (Conover-Mast. Publ., New York, N. Y., Nov. 1965).
6857. Measurements of the viscosity of parahydrogen, D. E. Diller. *J. Chem. Phys.* 42, No. 6, 2089-2100 (Mar. 1965).
6858. Measuring impedance through an adapter without introducing additional error, R. W. Beatty. *Proc. IEEE* 53, No. 6, 656-657 (June 1965).
6859. Measuring the cooling load of refrigerated vehicles by free evaporation of liquid nitrogen, P. R. Achenbach, C. W. Phillips, and R. W. Penney. *Suppl. Bull. Intern. Inst. Refrigeration, Commission VII*, 3, 115-124 (1965).
6860. Mechanical translation: U.S.--Japan Joint Conference, F. L. Alt. *Science* 147, No. 3665, 1599-1600 (Mar. 1965).
6861. Meson and baryon resonances in relativistic SU(6), H. Harari, D. Horn, M. Kugler, H. J. Lipkin, and S. Meshkov. *Phys. Rev.* 140, No. 2B, B431-B433 (Oct. 25, 1965).
6862. Metallized polymer film guard rings, A. H. Scott. *Mater. Res. Std.* 5, No. 2, 76-78 (Feb. 1965).
6863. Method and equipment for measuring thermal emittance of ceramic oxides from 1200° to 1800°, H. E. Clark and D. G. Moore. (Symp. Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-5, 1964), NASA Spec. Publ. SP-55, Session III, Paper 26, pp. 241-257 (1965).
6864. Method of adjusting force constants and its application to  $H_2O$ ,  $H_2CO$ ,  $CH_3Cl$ , and their deuterated molecules, T. Shimanouchi and I. Suzuki. *J. Chem. Phys.* 42, No. 1, 296-308 (Jan. 1, 1965).
6865. Method of obtaining a range of current densities with a resistive cathode, M. Brenner and A. Brenner. *Plating* 56, No. 6, 527-530 (June 1965).
6866. Microscopic fluctuations and diffusion coefficients of a non-equilibrium plasma in a magnetic field, J. Weinstock. *Phys. Fluids* 8, No. 3, 479-481 (Mar. 1965).
6867. Microwave and high frequency calibration services of the National Bureau of Standards (Part IV), R. E. Larson. *IEEE Trans. Microwave Theory Tech.* MTT-13, No. 1, 138-139 (Jan. 1965).
6868. Microwave discharge cavities operating at 2450 MHz, F. C. Fehsenfeld, K. M. Evenson, and H. P. Broida. *Rev. Sci. Instr.* 36, 295-298 (Mar. 1965).
6869. Microwave spectrum and barrier to internal rotation in methylsilylacetylene, W. H. Kirch-

- hoff and D. R. Lide, Jr. J. Chem. Phys. 43, No. 7, 2203-2213 (Oct. 1, 1965).
6870. Mobilities and reaction rates of ions in helium, E. C. Beatty and P. L. Patterson. Phys. Rev. 137, No. 2A, A346-357 (Jan. 4, 1965).
6871. Moderation in instrumentation, J. K. Taylor. Sci. Teacher 32, No. 3, 18-19 (Mar. 1965).
6872. Modes of propagation in a bounded compressible plasma, J. R. Wait. Electronics Letters 1, 193-194 (Sept. 1965).
6873. Morphological classification in the National Bureau of Standards mechanical translation system, L. F. Meyer. J. Assoc. Cryogenics 5, No. 3, 121-128 (June 1965).
6874. Mortality patterns in eight strains of flour beetles, D. B. Mertz, T. Park, and W. J. Youden. Biometrics 21, No. 1, 99-144 (Mar. 1965).
6875. Multichannel resonances in the forward scattering of electrons by helium, G. E. Chamberlain. Phys. Rev. Letters 14, No. 15, 581-582 (Apr. 12, 1965).
6876. Multiple-band conduction in n-type rutile ( $\text{TiO}_2$ ), J. H. Becker and W. R. Mosler. Phys. Rev. 137, No. 6A, A1872-A1877 (Mar. 15, 1965).
6877. Multipole matrix elements of the translation operator, M. Danos and L. C. Maximon. J. Math. Phys. 6, 766 (1965).
6878. Multivibrator provides bidirectional output pulses, F. C. Ruegg. Electronics 38, No. 17, 87 (Aug. 8, 1965).
6879. National Bureau of Standards gas thermometer. III. Constant volume valve, R. L. Anderson and L. A. Guldner. Rev. Sci. Instr. 36, No. 5, 615-616 (May 1965).
6880. Natural variation of copper isotopes and the atomic weight of copper, W. R. Shields, S. S. Goldich, E. L. Garner, and T. J. Murphy. J. Geophys. Res. 70, No. 2, 479-491 (Jan. 1965).
6881. Nature of the electromagnetic field reflected from a coastline, J. R. Wait. Electronics Letters 1, 65 (May 1965).
6882. Negative surface ionization of complex molecules, J. T. Herron, H. M. Rosenstock, and W. R. Shields. Nature, 206, No. 4984, 611 (May 1965).
6883. New approach to the theory of fluctuations in a plasma, J. Weinstock. Phys. Rev. 139, No. 2A, A388-A393 (July 19, 1965).
6884. New developments in dental materials a worldwide survey, G. C. Paifenberger. Intern. Dental J. 15, No. 3, 311-422 (Sept. 1965).
6885. New mode of operation of a phase sensitive detector, Y. Beers. Rev. Sci. Instr. 36, No. 5, 696-700 (May 1965).
6886. New odd low levels of neutral erbium ( $\text{Er I}$ ), N. Spector. J. Opt. Soc. Am. 55, No. 5, 576-577 (May 1965).
6887. New Rydberg series in molecular oxygen near 500Å, K. Codling and R. P. Madden. J. Chem. Phys. 42, No. 11, 3935-3938 (June 1965).
6888. Noise tests of an airborne microwave refractometer system, M. C. Thompson, Jr. and W. B. Grant. Rev. Sci. Instr. 36, No. 6, 758-759 (June 1965).
6889. Nomographs for computing real, imaginary and absolute values of vector ratios, H. S. Bowman. J. Acoust. Soc. Am. 37, No. 4, 751 (Apr. 1965).
6890. Nonanalyticity of transport coefficients and the complete density expansion of momentum correlation functions, J. Weinstock. Phys. Rev. 140, No. 2A, A460-A465 (Oct. 18, 1965).
6891. Nonequilibrium chemical excitation and chemical pumping of lasers, K. E. Shuler, T. Carrington, and J. Light. Appl. Opt. Suppl. 2, Chemical Lasers, pp. 81-104 (1965).
6892. Normal subgroups of the modular group which are not congruence subgroups, M. Newman. Proc. Am. Math. Soc. 16, No. 4, 831-832 (Aug. 1965).
6893. Note on the theory of cavity ionization chambers, L. V. Spencer. Radiation Res. 25, No. 2, 352-358 (June 1965).
6894. Nuclear magnetic moment of  $\text{Pr}^{141}$  from the hyperfine structure of doubly ionized praseodymium, J. Reader and J. Sugar. Phys. Rev. 137, No. 4B, B784-B789 (Feb. 1965).
6895. Nuclear magnetic moment of  $\text{Pr}^{141}$  from the hyperfine structure of doubly ionized praseodymium, Erratum, J. Reader and J. Sugar. Phys. Rev. 140, No. 7AB, A83 (Dec. 27, 1965).
6896. Nuclear magnetic resonance in bulk nickel samples, L. H. Bennett. Phil. Mag. 12, No. 115, 213-215 (July 1965).
6897. Nuclear magnetic resonance in  $\text{RbMnF}_3$ , R. D. Payne, R. A. Forman and A. H. Kahn. J. Chem. Phys. 42, No. 11, 3806-3808 (June 1965).
6898. Nuclear resonance spin-echo study of  $\text{Eu}^{153}$  in  $\text{EuO}$ , G. A. Urano and R. L. Streever. Physics Letters 17, No. 3, 205-206 (July 15, 1965).
6899. Nuclear resonance study of gallium-substituted yttrium iron garnet, R. L. Streever and G. A. Urano. Phys. Rev. 139, No. 1A, A305-A313 (July 5, 1965).
- 6900 to 8899. Unassigned.
8900. Nuclear resonance study of hyperfine fields in nickel-rich nickel-cobalt alloys, R. L. Streever and G. A. Urano. Phys. Rev. 139, No. 1A, A135-A141 (July 5, 1965).
8901. Nuclear size determination by neutral-pion photoproduction, R. A. Schrack. Phys. Rev. 140, No. 4B, B897-B904 (Nov. 22, 1965).
8902. Nucleate and film pool boiling design correlations for  $\text{O}_2$ ,  $\text{N}_2$  and He, E. G. Brentari and R. V. Smith. (Proc. 1964 Cryogenic Engineering Conf., Univ. Pennsylvania, Phila., Pa., Aug. 18-24, 1964), Book, Advances in Cryogenic Engineering 10, Paper T-1, 325-341 (Plenum Press Inc., New York, N. Y., 1965).
8903. Nucleate boiling of hydrogen, D. E. Drayer. Ind. Eng. Chem. Fundamentals 4, No. 2, 167-171 (May 1965).
8904. Observations of dislocation sources in stainless steel, A. W. Ruff, Jr. and H. G. F. Wilsdorf. Acta Met. 13, No. 6, 694-695 (1965).
8905. Observation of the products of ionic collision processes and ion decomposition in a linear, pulsed time-of-flight mass spectrometer, R. E. Ferguson, K. E. McCulloh, and H. M. Rosenstock. J. Chem. Phys. 42, No. 1, 100-106 (Jan. 1, 1965).
8906. Of time and the atom, G. E. Hudson. Phys. Today 18, No. 8, 34-38 (Aug. 1965).
8907. On a theorem concerning existence of interpolating functions, R. F. DeMar. Trans. Am. Math. Soc. 114, No. 1, 23-29 (Jan. 1965).
8908. On radiation of electromagnetic and electroacoustic waves in a plasma, J. R. Wait. Appl. Sci. Res. 11, Sec. B, 423-432 (June 11, 1965).
8909. On radiation of electromagnetic and electroacoustic waves in plasma, Part II, J. R. Wait. Appl. Sci. Res. 12, Sect. B, 130-138 (1965).

8910. On the asymptotic solutions of second-order differential equations having an irregular singularity of rank one, with an application to Whittaker functions, F. W. J. Oliver. *J. SIAM*, Ser. B, 2, No. 2, 225-243 (1965).
8911. On the behavior of the compressibility along the critical isotherm, S. Y. Larsen and J. M. H. Levelt-Sengers. Book, *Advances in Thermophysical Properties at Extreme Temperatures and Pressures*, pp. 74-75 (American Society of Mechanical Engineers, New York, N. Y., Mar. 1965).
8912. On the continuity equation for electron density in the ionosphere, T. Shimazaki. *J. Atmospheric Terrest. Phys.* 27, 593-604 (1965).
8913. On the determination of the electron density within discrete auroral forms in the E region, R. D. Hunsucker. *J. Geophys. Res.* 70, No. 15, 3791-3792 (Aug. 1, 1965).
8914. On the identification of energy levels of negative ions, U. Fano and J. W. Cooper. *Phys. Rev.* 138, No. 2A, A400-A402 (Apr. 1965).
8915. On the information in a microphotograph, C. S. McCamy. *Appl. Opt.* 4, No. 4, 405-411 (Apr. 1965).
8916. On the limiting shape of the distribution function of lengths of a single polymer molecule with excluded-volume effects, J. Mazur. *J. Chem. Phys.* 43, No. 12, 4354-4356 (Dec. 15, 1965).
8917. On the nature of plasma resonance, W. M. Leavens. *Physics Letters* 15, No. 4, 310-311 (Apr. 1965).
8918. On the optimum frequency deviation in an FM system over a scatter-propagation path, H. Akima. *Proc. IEEE* 53, No. 2, 182-183 (Feb. 1965).
8919. On the relation between auroral radio absorption and very low frequency emissions, W. L. Ecklund, J. K. Hargreaves, and J. H. Pope. *J. Geophys. Res.* 70, No. 17, 4285-4292 (Sept. 1, 1965).
8920. On the relative roles of free volume and activation energy in the viscosity liquids, P. B. Macedo and T. A. Litovitz. *J. Chem. Phys.* 42, No. 1, 245-256 (Jan. 1, 1965).
8921. On the use of thermopiles for absolute radiometry in the far ultraviolet, R. G. Johnston and R. P. Madden. *Appl. Opt.* 4, No. 12, 1574-1580 (Dec. 1965).
- 8921A. On the use of VLF measurements for obtaining information on the lower ionosphere (especially during solar flares), D. D. Crombie. *Proc. IEEE* 53, 2027-2034 (Dec. 1965).
8922. On the validity of the Lorentz-Lorenz equation near the critical point, S. Y. Larsen, R. D. Mountain, and R. Zwanzig. *J. Chem. Phys.* 42, No. 6, 2187-2190 (Mar. 15, 1965).
8923. Optical constants of iron in the visible region, H. T. Yolken and J. Kruger. *J. Opt. Soc. Am.* 55, No. 7, 843-844 (June 1965).
8924. Optical instrumentation for the biologist: microscopy, J. R. Meyer-Arendt. *Appl. Opt.* 4, No. 1, 1-9 (Jan. 1965).
8925. Optical properties of beryllium in the ultraviolet from electron energy absorption, R. E. LaVilla and H. Mendlowitz. *Appl. Opt.* 4, No. 8, 955-960 (Aug. 1965).
8926. Optical quenching of photoconductivity near the band edge in CdS, L. Grabner. *Phys. Rev. Letters* 14, No. 14, 551-554 (Apr. 5, 1965).
8927. Optical radar using a corner reflector on the moon, C. O. Alley, P. L. Bender, R. H. Dicke, J. E. Faller, H. H. Plotkin, and D. T. Wilkinson. *J. Geophys. Res.* 70, No. 9, 2267-2269 (May 1, 1965).
8928. Oscillator strengths for lines of Fe I between 2500 and 3200 Å, R. B. King, C. H. Corliss, and K. H. Olsen. *Astrophys. J.* 141, No. 2, 354-363 (Feb. 1965).
8929. Osmotic and activity coefficients of tris (hydroxymethyl) aminomethane and its hydrochloride in aqueous solution at 25°C, R. A. Robinson and V. E. Bower. *J. Chem. Engr. Data* 10, No. 3, 246-247 (1965).
8930. Our measurement system and its future, R. D. Huntoon. *Research/Develop.* 16, No. 1, 16-21 (Jan. 1965).
8931. Oxidation of asphalt flux with oxides of nitrogen, P. G. Campbell and J. R. Wright. *Am. Chem. Soc. Div. Petroleum Chem. Preprint* 10, No. 1, 79-89 (Mar. 1965); *Ind. Eng. Chem. Product Res. Develop.* 4, No. 2, 121-128 (June 1965).
8932. Oxygen metastable atom production through photodetachment, L. M. Branscomb, S. J. Smith, and G. C. Tison. *J. Chem. Phys.* 43, No. 8, 2906-2907 (Oct. 15, 1965).
8933. Paths, trees, and flowers, J. Edmonds. *Can. J. Math.* 17, 449-467 (May 1965).
8934. Patterns of thinking in searching patent applications by manual and machine-assisted methods, J. R. Cornog and P. P. Ellis. *J. Chem. Doc.* 5, 215-225 (Nov. 1965).
8935. Phase equilibria in the system aluminum oxide-tungsten oxide, J. L. Waring. *J. Am. Ceram. Soc.* 48, No. 9, 493-494 (Sept. 1965).
8936. Philosophical influences on radiation protection standards, L. S. Taylor. *Health Phys.* 11, 859-864 (1965).
8937. Unassigned.
8938. Unassigned.
8939. Phonon induced nuclear dipole transitions, R. J. Mahler. (Proc. XIIIth Colloque and Relaxation in Solids), Book, *Nuclear Magnetic Resonance and Relaxation in Solids*, Ed. L. V. Gervin, pp. 202-209 (North Holland Publ. Co., Amsterdam, The Netherlands, 1965).
8940. Photolysis of cyclobutane at photon energies below and above the ionization energy, R. D. Doepker and P. Ausloos. *J. Chem. Phys.* 43, No. 11, 3814-3819 (Dec. 1, 1965).
- 8940A. Photolysis of ethane at the argon resonance lines 1067 and 1048 Å, A. H. Laufer and J. R. McNesby. *J. Chem. Phys.* 42, No. 9, 3329-3330 (May 1, 1965).
8941. Photocatalytic reactions, E. Hayward. Book, *Nuclear Structure and Electromagnetic Transitions*, Ed. N. MacDonald, pp. 141 (Oliver and Boyd, Edinburgh and London, England, 1965).
8942. Physical and mechanical properties of electrodeposited copper. 1. Literature survey, V. A. Lamb and D. R. Valentine. *Plating* 52, No. 12, 1289-1311 (Dec. 1965).
8943. Planning for better measurement accuracy, R. D. Huntoon and W. A. Wildhack. *ISA J.* 12, No. 1, 57-60 (Jan. 1965).
8944. Plans for proposed new tables of the thermodynamic properties of moist air, J. C. Davis, T. K. Faison, and P. R. Achenbach. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, *Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 3. Fundamentals and Standards*, Chapt. 11, pp.

- 315-320 (Reinhold Publ. Corp., New York, N. Y., 1965).
8945. Polarization coupling constants in  $\text{SrTiO}_3$ , D. M. Eagles. *J. Phys. Chem. Solids* 26, No. 3, 672 (Mar. 1965).
8946. Polymorphism in hydrogen iodide, F. A. Mauer, C. J. Keffer, R. B. Reeves, and D. W. Robinson. *J. Chem. Phys.* 42, No. 4, 1465-1466 (Feb. 15, 1965).
8947. Positive ion-neutral reactions in the ionosphere, E. E. Ferguson, F. C. Dehnenfeld, P. D. Goldan, and A. L. Schmeltekopf. *J. Geophys. Res.* 70, No. 17, 4324-4329 (Sept. 1, 1965).
8948. Possible implications of the observed profile of  $(\lambda 6374) \text{Fe X}$ , C. Pecker-Wimel and R. N. Thomas. *Astrophys. J.* 141, No. 2, 834-836 (Feb. 15, 1965).
8949. Potential-energy curves for CO and  $\text{CO}^+$ , P. H. Krupenie and S. Weissman. *J. Chem. Phys.* 43, No. 5, 1529-1534 (Sept. 1, 1965).
8950. Potential use of passive probing of atmospheric structure by thermal emissions at radio frequencies, B. R. Bean, E. R. Westwater, and R. L. Abbott. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 2, Applications, Sec. VII, Paper 71, pp. 595-608 (Reinhold Publ. Corp., New York, N. Y., 1965).
8951. Precise assay of copper using small samples, T. J. Murphy and J. K. Taylor. *Anal. Chem.* 37, No. 7, 929-931 (June 1965).
8952. Precise voltage-ratio measurement, T. L. Zapf. *Electro-Technol.* 76, No. 4, 95-102 (Oct. 1965).
8953. Precision refractometry of small lens-shaped objects, J. R. Meyer-Arendt. *Lab. Invest.* 13, No. 5, 529-532 (1965).
8954. Preliminary studies directed toward determination of spectral absorption coefficients of homogeneous materials in the infrared at elevated temperatures, W. B. Fussell and R. Stair. (Symp. Measurement of Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-6, 1964), NASA Spec. Publ. SP-55, Session III, Paper 29, pp. 287-292 (1965).
8955. Preliminary studies on the characterization of solution-grown ADP crystals, R. D. Deslattes, J. L. Torgensen, B. Paretkin, and A. T. Horton. *Advan. X-ray Anal.* 8, 315-324 (1965).
8956. Preparation of copper crystals with low electrical resistivity, J. J. Gniewek and A. F. Clark. *J. Appl. Phys.* 36, No. 10, 3358-3359 (Oct. 1965).
8957. Pressure dependence of the internal field at the  $^{59}\text{Co}$  nucleus in a 99.5 percent Ni-0.5 percent Co alloy, L. H. Bennett. *J. Appl. Phys.* 36, No. 3, Pt. 2, 942-943 (Mar. 1965).
8958. Pressure-indicator-paste patterns in duplicate dentures made by different processing techniques for the same patient, J. B. Woolfel and G. C. Paffenbarger. *J. Am. Dental Assoc.* 70, No. 2, 339-343 (Feb. 1965).
8959. Production of alumina windows, H. Johnson and R. D. Deslattes. *Rev. Sci. Instr.* 36, No. 9, 1381-1382 (Sept. 1965).
8960. Project FIST: fault isolation by semi-automatic techniques, G. J. Rogers. Design Disclosure Workbook (Packaging), U.S. Naval Applied Science Lab., Brooklyn, N. Y., Draft No. 5 (June 1965).
8961. Propagation of electromagnetic pulses in terrestrial waveguides, J. R. Wait. *IEEE Trans. Ant. Prop.* AP-13, No. 6, 904-918 (Nov. 1965).
8962. Propagation of the ground wave electromagnetic signal, with particular reference to a pulse of nuclear origin, J. R. Jöhler and J. C. Morgenstern. *Proc. IEEE* 53, No. 12, 2043-2053 (Dec. 1965).
8963. Proper accounting of conformations of a polymer near a surface, E. A. DiMarzio. *J. Chem. Phys.* 42, No. 6, 2101-2106 (Mar. 1965).
8964. Proposed standard for measuring and reporting physical properties of optical materials, G. W. Cleek, F. J. P. Consitt, and W. D. Lawson. *Infrared Phys.* 5, 141-160 (Dec. 1965).
8965. Pyrolytic techniques, G. M. Brauer. *J. Polymer Sci.* 8, Pt. C, 3-26 (1965).
8966. Quantum statistics of fully ionized gases, W. T. Grandy and F. Mohling. *Ann. Phys.* 34, No. 3, 424-464 (Oct. 1965).
8967. Quenching of the triplet state of acetone and biacetyl by azoalkanes, R. E. Rebert and P. Ausloos. *J. Am. Chem. Soc.* 87, 1847-1852 (May 5, 1965).
8968. Quenching of the triplet state of acetone and biacetyl by various unsaturated hydrocarbons, R. E. Rebert and P. Ausloos. *J. Am. Chem. Soc.* 87, No. 24, 5569-5572 (Dec. 20, 1965).
8969. Radiation efficiency of half-wave dipole antennas, R. G. FitzGerrell. *IEEE Trans. Ant. Prop.* AP-13, No. 2, 326-327 (Mar. 1965).
8970. Radiation-induced polymerization and other reactions of n-perfluorooctadiene-1,4 at high temperature and pressure, D. W. Brown, J. E. Fearn, and R. E. Lowry. *J. Polymer Sci.* 3, Pt. 2, No. 4, 1641-1660 (Apr. 1965).
8971. Radiative corrections. I. High-energy bremsstrahlung and pair production, K. Mork and H. Olsen. *Phys. Rev.* 140, No. 6B, B1661-B1674 (Dec. 20, 1965).
8972. Radio astronomy observations with 8.4 x  $10^4 \text{ m}^2$  50 Mc/s antenna of the Jicamarca radar in Peru, W. K. Klemperer and G. R. Ochs. *Astron. J.* 70, No. 1327, 141-142 (Mar. 1965).
8973. Radio refractometry and its potential for humidity studies, R. E. McGavin and M. J. Vetter. (Proc. 1963 Intern. Symp. Humidity and Moisture, Washington, D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 2, Applications, Sec. VII, Paper 66, pp. 553-560 (Reinhold Publ. Corp., New York, N. Y., 1965).
8974. Radio meteorology. J. W. Herbstreit. *Science* 147, No. 3653, 76-78 (Jan. 1, 1965).
8975. Radio standards and measurements, microwaves, a progress review from 1960, R. W. Beatty. Book, Progress in Radio Science, 1960-1963. Vol. I. Radio Standards and Measurements, pp. 71-81 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
8976. Radiochemical methods of analysis (report on Salzburg conference), W. W. Meinke. *Science* 147, No. 3654, 182-183 (Jan. 1965).
8977. Radioisotope dilution and its application to the radioassay of  $\text{Ce}^{144}$ , L. A. Currie, G. M. France, III, and H. L. Steinberg. *Intern. J. Appl. Radiation Isotopes* 16, No. 1, 1-8 (Jan. 1965).
8978. Radiolytic stress relaxation of an ethylene-propylene copolymer, H. Yu and L. A. Wall. *J. Phys. Chem.* 69, 2072-2078 (June 1965).

8979. Random-walk calculations of diffusion coefficients, R. E. Howard. Proc. 5th Intern. Symp. Reactivity of Solids, Munich, Germany, 1964, pp. 250-255 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
8980. Random-walk model of chain-polymer adsorption at a surface, R. J. Rubin. J. Chem. Phys. 43, No. 7, 2392-2407 (Oct. 1, 1965).
8981. Real two-dimensional representations of the modular group and related groups, J. Lehner and M. Newman. Am. J. Math. 87, No. 4, 945-954 (Oct. 1965).
8982. Realization of semi-multipliers as multipliers, H. Fell and A. J. Goldman. Am. Math. Mo. 72, No. 6, 639-641 (June-July 1965).
8983. Rearrangement kinetics of the liquid-liquid immiscible microphases in alkali borosilicate melts, W. Haller. J. Chem. Phys. 42, 686-693 (1965).
8984. Receiver noise factor, E. Hildner. Proc. Intern. Telemetry Conf., Washington, D. C., May 16-20, 1964, 1, 326-333 (May 1965).
8985. Recommended materials and practices for use with cryogenic propellants, A. F. Schmidt. AIR 839, 29 pages (SAE, Inc., New York, N. Y., Jan. 1965).
8986. Recrystallization of anodic alumina films, D. J. Barber. J. Electrochem. Soc. 112, No. 11, 1143-1145 (Nov. 1965).
8987. Reference buffer solutions for pH measurements in 50 percent methanol. Dissociation constants of acetic acid and dihydrogen phosphate ion from 10 to 40°, M. Paabo, R. A. Robinson, and R. G. Bates. J. Am. Chem. Soc. 87, No. 3, 415-418 (Feb. 1965).
8988. Relation of the stacking fault energy to segregation at stacking faults and to the occurrence of phase boundaries in F. C. C. binary alloys, R. deWit and R. E. Howard. Acta Met. 13, 655-661 (June 1965).
- 8988A. Relative signs of nuclear spin couplings in  $^1\text{H}^1\text{B}^9\text{F}_2$ , E. B. Whipple, T. H. Brown, T. C. Farrar, and T. D. Coyle. J. Chem. Phys. 43, No. 5, 1841-1842 (Sept. 1, 1965).
8989. Relativistic electron precipitation into the mesosphere at subauroral latitudes, D. K. Bailey and M. A. Pomerantz. J. Geophys. Res. 70, No. 23, 5823-5830 (Dec. 1, 1965).
8990. Remarks on a paper by T. Makino "On the cosmic-ray cut-off rigidities and the earth's magnetic field," H. H. Sauer. Report of Ionosphere and Space Research in Japan, 19, No. 1, 54-55 (1965).
8991. Report of subcommittee D-atomic spectra, C. E. Moore. J. Opt. Soc. Am. Tech. Notes 55, No. 6, 745 (1965).
8992. Report of the acoustics research survey committee, R. K. Cook and G. W. Wood. J. Acoust. Soc. Am. 37, No. 2, 392-395 (Feb. 1965).
8993. Representation of diurnal and geographic variations of ionospheric data by numerical methods. II. Control of stability, W. B. Jones and R. M. Gallet. Telecommunications J. pp. 1-12 (Place des Nations, Geneva, Switzerland, Jan. 1965).
8994. Research for architecture, J. P. Eberhard. Res. News II, No. 1, 10-19 (Jan. 1965).
8995. Resins and techniques used in constructing dentures, G. C. Paffenbarger, J. B. Woelfel, and W. T. Sweeney. Book, Dental Clinics of North America, pp. 251-262 (W. B. Saunders, Philadelphia, Pa., Mar. 1965).
8996. Resonance in the light scattered from a plasma, J. Weinstock. Physics Letters 18, No. 1, 21-22 (Aug. 1, 1965).
8997. Restoration of complete dentures inadvertently warped by the patient: Report of case, J. B. Woelfel and G. C. Paffenbarger. J. Am. Dental Assoc. 71, 866-870 (Oct. 1965).
8998. Results of an absolute determination of the acceleration of gravity, J. E. Faller. J. Geophys. Res. 70, No. 16, 4035-4038 (Aug. 15, 1965).
8999. Results of National Bureau of Standards corrosion investigation in disturbed and undisturbed soils, M. Romanoff. Proc. Appalachian Underground Short Course, Tech. Bull. 72, p. 566-589 (West Virginia Univ., Morgantown, W. Va., 1965).
9000. Results of some recent transport calculations for electrons and bremsstrahlung, M. J. Berger and S. M. Seltzer. (Proc. 2nd Symp. Protection Against Radiations in Space, Gatlinburg, Tenn., Oct. 12-14, 1964, Ed. A. Reetz, Jr), Natl. Aeronaut. Space Admin. Spec. Publ. 71, pp. 437-448 (1965).
9001. Rotating shutter for time-resolved spectroscopy in the microsecond range, I. R. Bartky and A. M. Bass. Appl. Opt. 4, No. 10, 1354-1356 (Oct. 1965).
9002. Sampling of leather for physical and chemical examination, J. Mandel and J. R. Kanagy. Book, The Chemistry and Technology of Leather 4, Chapt. 59, 223-242 (Reinhold Publ. Corp., New York, N. Y., 1965).
9003. Second order effects in the phosphorescence of benzophenone crystals at 77°K, R. A. Keller. J. Chem. Phys. 42, No. 11 4050-4051 (June 1965).
9004. Separation of pyrenediones by column chromatography, A. J. Fatiadi. J. Chromatog. 20, 319-324 (1965).
9005. Shell model treatment of nuclear reactions, M. Danos and W. Greiner. Phys. Rev. 138, No. 1B, B93-B103 (Apr. 1965).
9006. Shift of the R(0) and P(1) infrared lines of HCl perturbed by noble gases, A. Ben-Reuven. J. Chem. Phys. 42, No. 6, 2037-2042 (Mar. 15, 1965).
9007. Simple arc device for spectral excitation in controlled atmospheres, M. Margoshes and B. F. Scribner. Appl. Spectry. 18, No. 5, 154-155 (1964). H. L. Mason, Standards--still a continuing project, Control Eng. 12, No. 1, 74, (Jan. 1965).
9008. Simultaneous dielectric constant and volume measurements on liquids at high pressures, N. L. Brown. (Proc. Electrical Insulation Conf. Cleveland, Ohio, Oct. 1964), Natl. Acad. Sci.-Natl. Res. Council Publ. 1238, pp. 36-40 (1965).
9009. Soil corrosion, W. J. Schwerdtfeger. Encyclopedia of Electrochemistry, p. 1068-1071 (Reinhold Publ. Corp., New York, N. Y., Mar. 1965).
9010. Solar-flare frequency and observing-time patterns, C. S. Warwick. Astrophys. J. 142, No. 2, 767-772 (Aug. 15, 1965).
9011. Solid-vapor equilibrium in the system hydrogen-methane, M. J. Hiza and R. N. Herring. (Proc. 1964 Cryogenic Engineering Conf., Univ. Pennsylvania, Phila., Pa., Aug. 18-24, 1964), Book, Advances in Cryogenic Engineering 10, Paper Q-5,

- 182-191 (Plenum Press Inc., New York, N. Y., 1965).
9012. Solute nuclear magnetic resonances in primary lead alloys, L. H. Bennett, R. M. Cotts, and R. J. Shodgrass (Proc. XIIIth Colloque and Relaxation in Solids), Book, Nuclear Magnetic Resonance and Relaxation in Solids, E. L. V. Gerven, pp. 171-180 (North-Holland Publ. Co., Amsterdam, The Netherlands, 1965).
9013. Solution polishing of oriented single crystals, R. D. Deslattes, B. G. Simson, and A. T. Horton. Rev. Sci. Instr. 36, No. 7, 943-944 (July 1965).
9014. Some additional features of radar returns from the equatorial electrojet, B. B. Balsley. J. Geophys. Res. 70, No. 13, 3175-3182 (July 1, 1965).
9015. Some aspects of non-equilibrium thermodynamics in the presence of a radiation field, R. N. Thomas. Book, (University of Colorado Press, Boulder, Colo., 1965).
9016. Some electrochemical aspects of germanium dissolution. Simultaneous chemical and electrochemical oxidation, W. E. Reid, Jr. J. Phys. Chem. 69, No. 7, 2269-2277 (July 1965).
9017. Some electrochemical aspects of germanium dissolution. Valence states and electrode potential, W. E. Reid, Jr. Phys. Chem. 69, No. 9, 3168-3171 (Sept. 1965).
- 9017A. Some evidence of the influence of long-term magnetic activity on medium frequency sky wave propagation, A. F. Barghausen and D. A. Lillie. Proc. IEEE Letter 53, 2115-2116 (Dec. 1965).
9018. Some experience with the Hayward linear notation system, H. W. Hayward, H. M. S. Sneed, J. H. Turnipsed, and S. J. Tauber. J. Chem. Doc. 5, No. 3, 183-189 (Aug. 1965).
9019. Some factors affecting the sensitivity and spectral response of thermoelectric (radiometric) detectors, R. Stair, W. E. Schneider, W. R. Waters, and J. K. Jackson. Appl. Opt. 4, No. 6, 703-710 (June 1965).
9020. Some measured rates for oxygen and nitrogen ion-molecule reactions of atmospheric importance, including  $O^+ + N_2 \rightarrow NO^+ + N$ , F. C. Fehsenfeld, A. L. Schmeltekopf, and E. E. Ferguson. Planetary Space Sci. 13, 219-223 (1965).
9021. Some new co-ordination compounds of copper (II) chloride, C. W. Reimann and G. Gordon. Nature 205, No. 4974, 902-903 (Feb. 27, 1965).
9022. Some physical characteristics of agar impression materials, M. Ohashi, G. C. Paffenbarger, and J. W. Stanford. J. Nihon Univ. Sch. Dent. 7, No. 1, 1-11 (Mar. 1965).
9023. Some unorthodox predictions, F. L. Alt. Computers and Automation XIV, No. 1, 11 (Jan. 1965).
9024. Spectra of  $C_2$  in solidified gases at  $4^\circ$  and  $20^\circ K$ , R. L. Barger and H. P. Broida. J. Chem. Phys. 43, No. 7, 2364-2370 (Oct. 1, 1965).
9025. Spectra of  $C_2$  in solidified gases at  $4^\circ$  and  $20^\circ K$ , R. L. Barger and H. P. Broida. J. Chem. Phys. 43, No. 7, 2371-2376 (Oct. 1, 1965).
9026. Spectra of matrix isolated  $NiF_2$  and  $NiCl_2$ , D. E. Milligan, M. E. Jacox, and J. D. McKinley. J. Chem. Phys. 42, No. 3, 902-905 (Feb. 1965).
9027. Spectral distribution of typical daylight as a function of correlated color temperature (condensed version), D. B. Judd. Illum. Eng. 60, No. 4, 272-278 (Aug. 1965).
9028. Spectral properties of plants, D. M. Gates, H. J. Keegan, J. C. Schleter, and V. R. Weidner. Appl. Opt. 4, No. 1, 11-20 (Jan. 1965).
9029. Spectrophotometric determination of bromine and hydrogen bromide, E. C. Creitz. Anal. Chem. 37, 1690-1692 (Dec. 1965).
9030. Spectrophotometric determination of the rate of dissociation of tetrafluorohydrazine behind a shock wave, L. M. Brown and B. Darwent. J. Chem. Phys. 42, No. 6, 2158-2165 (Mar. 15, 1965).
9031. Spectrum of doubly ionized lanthanum (La III), J. Sugar and V. Kaufman. J. Opt. Soc. Am. 55, No. 10, 1283-1285 (Oct. 1965).
9032. Spectrum of stationary homogenous and magneto-hydrodynamic turbulence, C. M. Tchen. Phys. Fluids 8, No. 9, 1659-1667 (Sept. 1965).
9033. Speed of sound in liquid parahydrogen, B. A. Younglove. J. Acoust. Soc. Am. 38, No. 3, 433-438 (Sept. 1965).
9034. Stability of the shape of a solid cylinder growing in a diffusion field, R. L. Parker and S. R. Coriell. J. Appl. Phys. 36, No. 2, 632-637 (Feb. 1965).
9035. Stability of traveling waves in lasers, J. A. White. Phys. Rev. 137, No. 6A, A1651-A1654 (Mar. 1965).
9036. Standardization of analytical data obtained with the silver-silver chloride electrode in methanol water solvents, M. Paabo, R. G. Bates, and R. A. Robinson. Anal. Chem. 37, No. 4, 462-464 (Apr. 1965).
9037. Standardization of plastics in the U. S., G. M. Kline. Courrier de la Normalisation No. 182, pp. 280-282 (Mar.-Apr. 1965); Mod. Plastics 42, No. 9, 176 (May 1965).
9038. Standards, sources, and detectors in radiation measurements, R. Stair and W. E. Schneider. (Symp. Measurement of Thermal Radiation of Solids, San Francisco, Calif., Mar. 4-6, 1964), NASA Spec. Publ. SP-55, Session III, Paper 24, pp. 217-231 (1965).
9039. Standards--still a continuing project, H. L. Mason. Control Eng. 12, No. 1, 74 (Jan. 1965).
9040. Statistical design of experiments, W. J. Youden. Handbook on Metals Engineering--Design, American Society of Mechanical Engineers, Chapt. 3, Pt. 5, pp. 583-585 (McGraw-Hill Book Co., Inc., New York, N. Y., 1965).
9041. Status of linear relations among heats of transport, R. E. Howard and A. B. Lidiard. J. Chem. Phys. 43, No. 11, 4158-4160 (Dec. 1, 1965).
9042. Stratospheric moisture measurements using infrared spectroscopy, D. M. Gates. (Proc. 1963 Intern. Symp. Humidity and Moisture, Wash. D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 2. Applications, Sec. VI, Paper 1, pp. 446-449 (Reinhold Publ. Corp., New York, N. Y., 1965).
9043. Strength of fingernails, R. W. Young, S. B. Newman, and R. J. Capott. J. Invest. Dermatol. 44, No. 5, 358-360 (May 1965).
9044. Stress corrosion cracking of metals, H. L. Logan. Metals Eng. Quart. 5, No. 2, 32-38 (May 1965).
9045. Stress relaxation of  $\gamma$ -irradiated fluoro-carbon elastomers, T. Yoshida, R. E. Florin,

- and L. A. Wall. *J. Polymer Sci. A3*, No. 5, 1685-1712 (May 1965).
9046. Stress-strain properties of textile yarns subjected to rifle bullet impact, C. A. Fenstermaker and J. C. Smith. *J. Appl. Polymer Sci.* 1, 125-146 (1965).
9047. Stress-strain relationships in yarns subjected to rapid impact loading. Part XI: Strain distributions resulting from rifle bullet impact, J. C. Smith, C. A. Fenstermaker, and P. J. Shouse. *Textile Res. J.* 35, No. 8, 743-757 (Oct. 21, 1965).
9048. Structure of electrodeposited lead dendrites, F. Ogburn, C. J. Bechtold, J. B. Morris, and A. DeKoranyi. *J. Electrochem. Soc.* 112, No. 6, 574-577 (June 1965).
9049. Study of methods for estimating loudness, E. L. R. Corliss and G. E. Winzer. *J. Acoust. Soc. Am.* 38, No. 3, 424-428 (Sept. 1965).
9050. Substoichiometric radiometric analysis: determination of trace amounts of cobalt, A. R. Landgrebe, L. T. McClendon, and J. R. DeVoe. (Proc. Intern. Atomic Energy Agency Symp. Radiochemical Methods of Analysis, Salzburg, Austria, Oct. 19-23, 1964), Book, Radio Chemical Methods of Analysis II, 321-333 (Intern. Atomic Energy Agency, Vienna, Austria, 1965).
9051. Suppression at high temperature of effects due to statistics in the second virial coefficient of a real gas, S. Y. Larsen, J. E. Kilpatrick, E. H. Keb, and H. F. Jordan. *Phys. Rev.* 140, No. 1A, A129-A130 (Oct. 1965).
9052. SU(6) Clebsch-Gordan coefficients for the product  $35 \times 56$ , J. C. Carter, J. J. Coyne, and S. Meshkov. *Phys. Rev. Letters* 14, No. 13, 523-526 (Mar. 1965).
9053. SU(6)<sub>1</sub> photoproduction and meson-baryon scattering amplitudes, J. C. Carter, J. J. Coyne, S. Meshkov, D. Horn, M. Kugler, and H. J. Lipkin. *Phys. Rev. Letters* 15, No. 8, 373-377 (Aug. 23, 1965).
9054. Surface ionization of niobium, M. D. Scheer and J. Fine. *J. Chem. Phys.* 42, 3645 (1965).
9055. Tables of thermodynamic properties of air in chemical equilibrium including second virial corrections from 1500°K to 15,000°K, J. Hilsenrath and M. Klein. Air Force Systems Command, AEDC-TR-65-53 (Arnold Engr. Develop. Center, Arnold Air Force Station, Tenn., Mar. 1965).
9056. Technique for spin-lattice relaxation times, G. A. Candela and R. E. Mundy. *Rev. Sci. Instr.* 36, No. 3, 338-342 (Mar. 1965).
9057. Techniques for detection of high-altitude nuclear explosions, A. G. Jean, C. E. Hornback, R. H. Doherty, J. R. Winkelman, and R. T. Moore. *Proc. IEEE* 53, No. 12, 2088-2098 (Dec. 1965).
9058. The absolute photometry of the zodiacal light, L. L. Smith, F. E. Roach, and R. W. Owen. *Planet. Space Sci.* 13, 207-217 (Mar. 1965).
9059. The annealing of vacancies in dilute alloys, R. E. Howard and A. B. Lidiard. *Phil. Mag.* 11, No. 114, 1179-1187 (June 1965).
9060. The brush cathode plasma—a well behaved plasma, K. B. Persson. *J. Appl. Phys.* 36, No. 10, 3086 (Oct. 1965).
9061. The calibration of the NBS tritiated-toluene standard of radioactivity, S. B. Garinkel, W. B. Mann, R. W. Medlock, and O. Yura. *Intern. J. Appl. Radiation Isotopes* 16, 27-33 (1965).
9062. The constitution of  $\text{CuFe}_2\text{O}_4$ , C. F. Jefferson. *J. Appl. Phys.* 36, No. 3, 1165-1166 (Mar. 1965).
9063. The correction factor for fast neutron reactions on sulfur and oxygen in the manganese-sulfate-bath calibration of neutron sources, W. M. Murphy. *Nucl. Instr. Methods* 37, No. 1, 13-21 (1965).
9064. The crystal and molecular structure of iodo-pentaborane-9, L. H. Hall, S. Block, and A. Perloff. *Acta Cryst.* 19, Pt. 4, 658-661 (Oct. 1965).
9065. The crystal structure of barium tetraborate,  $\text{BaO} \cdot 2\text{B}_2\text{O}_3$ , S. Block and A. Perloff. *Acta Cryst.* 19, Pt. 3, 297-300 (Sept. 1965).
9066. The current revision of the solar spectrum table  $\lambda 2935\text{\AA}$  to  $8770\text{\AA}$ , C. E. Moore. *Proc. Utrecht Symp. Solar Spectrum*, Utrecht, The Netherlands, Aug. 26-31, 1963, Ed. C. DeJager, pp. 89-101 (D. Reidel Publ. Co., Dordrecht, The Netherlands, 1965).
9067. The definition of alginate impression materials by a specification, M. Ohashi, G. C. Pavlenbarger, and J. W. Stanford. *J. Nihon Univ. School of Dentistry* 7, No. 1, 12-28 (Mar. 1965).
9068. The design and performance of multirange current transformer standards for audio frequencies, B. L. Dunfee. *IEEE Trans. Instr. Meas.* IM-14, No. 4, 190-204 (Dec. 1965).
9069. The determination of work function from the ratio of positive to negative surface ionization of an alkali halide, J. Fine, T. E. Madey, and M. D. Sheer. *Surface Sci.* 3, 277 (1965).
9070. The direction of the force on a dislocation and the sign of the Burgers vector, R. DeWit. *Acta Met.* 13, No. 11, 1210-1211 (1965).
9071. The distribution of electrons in the lower and middle ionosphere, R. W. Knecht. *Book, Progress in Radio Science 1960-1963. Vol. III. The Ionosphere*, pp. 14-45 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
9072. The dynamic collective theory of odd A nuclei, M. Danos, W. Greiner, and C. B. Kohn. *Phys. Rev.* 138, No. 5B, B1055-B1066 (June 1965).
9073. The effect of a fatigue crack on the fatigue strength of an aluminum alloy, J. A. Bennett. *Mater. Res. Std.* 5, No. 5, 235-239 (May 1965).
- 9073A. The effect of atmospheric noise on the probability of error for an NCFSK system, A. M. Conda. *IEEE Trans. Commun. Technol.* CT-13, No. 3, 280-284 (Sept. 1965).
9074. The effect of environment on the fatigue strengths of four selected alloys, T. R. Shives and J. A. Bennett. *NASA Contractor Report CR-267*, 2-22 (Aug. 1965).
9075. The effect of ion-drag on the neutral air in the ionospheric F-region, H. Rishbeth and L. R. Megill. *Ann. Geophys.* 21, No. 2, 235-244 (Apr.-June 1965).
9076. The effect of moisture on surface flammability of coated and uncoated cellulosic materials, T. G. Lee, J. L. Loftus, and D. Gross. *Am. Soc. Testing Materials Spec. Tech. Publ.* 385, 112-123 (May 1965).
9077. The evolution of control system standards, H. L. Mason. *1965 Joint Automatic Control Conf.*, June 22-25, 1965, Session VII, Paper 1, pp. 76-78 (Rensselaer Polytechnic Inst., Troy, N. Y., 1965).
9078. The evolution of designed experiments, W. J. Youden. *Proc. IBM Scientific Computing Symp. Statistics*, Thomas J. Watson Research Center,

- Yorktown Heights, N. Y., Oct. 21-23, 1963, pp. 59-67 (IBM, White Plains, N. Y., 1965).
9079. The fundamental solution and Huygens' principle for decomposable differential operators, J. E. Lagnese. *Archive Rat. Mech. Anal.* 19, No. 4, 299-307 (Jan. 22, 1965).
9080. The gas-phase photolysis of cyclohexane in far ultra-violet: Modes of decomposition of the neutral excited cyclohexane molecule and reactions of the parent cyclohexane ion, R. D. Doeppker and P. Ausloos. *J. Chem. Phys.* 42, No. 11, 3746 (June 1, 1965).
9081. The IBS role in plans for better measurement accuracy, R. D. Hutton and W. A. Wildhack. *ISA J.* 12, No. 1, 57-60 (Jan. 1965).
9082. The intensity and spectral distribution of scattered radiation from  $Ce^{60}$  sources, B. Petree and J. C. Humphreys. *Radiology* 84, No. 1, 129-130 (Jan. 1965).
9083. The international system of units, A. G. McNish. *Am. Soc. Quality Control Annual Tech. Conf. Trans.* pp. 431-438 (1965); *Mater. Res. Std.* 5, No. 10, 528-532 (Oct. 1965).
9084. The ionosphere: new guide, how to listen to the world. A. H. Shapley. *World Publ.* 11, 15-18 (Hellerup, Denmark, Mar. 1965).
9085. The mass spectrum of yttrium chloride vapor, J. D. McKinley. *J. Chem. Phys.* 42, No. 6, 2245-2246 (Mar. 15, 1965).
9086. The measurement of water vapor boundary layers in biological systems, D. M. Gates. (*Proc. 1963 Intern. Symp. Humidity and Moisture*, Washington, D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 2. Applications, Sec. I, Paper 5, pp. 33-38 (Reinhold Publ. Corp., New York, N. Y., 1965).
9087. The NBS standard hygrometer, A. Wexler and R. W. Hyland. (*Proc. 1963 Intern. Symp., Humidity and Moisture*, Washington, D. C.), Book, Humidity and Moisture. Vol. 3, Fundamentals and Standards, Sec. II, Paper 19, pp. 389-432 (Reinhold Publ. Corp., New York, N. Y., 1965).
- 9087A. The NBS-A time scale--its generation and dissemination, J. A. Barnes, D. H. Andrews, and D. W. Allan. *IEEE Trans. Instr. Meas.* IM-14, No. 4, 228-232 (Dec. 1965).
9088. The NBS time scale and its relation to other time scales, J. A. Barnes and R. C. Mockler. (*Proc. XIV General Assembly of URSI*, Tokyo, Japan, 1963), Book, Progress in Radio Science 1960-1963. Vol. I. Radio Standards and Measurements, Ed. R. W. Beatty, pp. 41 (Elsevier Publ. Co., Amsterdam, The Netherlands, 1965).
9089. The performance of lenses made from inhomogeneous glasses, F. W. Rosberry. *Appl. Opt.* 4, No. 1, 21-24 (Jan. 1965).
9090. The place of radiochemical methods of analysis: today and tomorrow, W. W. Meinke. (*Proc. Intern. Atomic Energy Agency Symp. Radiochemical Methods of Analysis*, Salzburg, Austria, Oct. 19-23, 1964), Book, Radiochemical Methods of Analysis I, 13-19 (Intern. Atomic Energy Agency, Vienna, Austria, 1965).
9091. The polarographic analysis of titanium (IV)--EDTA complexes, H. W. Berger and B. C. Cadoff. *J. Paint Technol. Eng. Official Digest* 37, No. 480, 28-34 (Jan. 1965).
9092. The polarographic analysis of white lead and zinc oxide in white paint pigments, H. W. Berger and B. C. Cadoff. *J. Paint Technol. Eng. Official Digest* 37, No. 480, 35-42 (Jan. 1965).
9093. The relationship of a.c. resonant probes to resonant scattering, W. M. Leavens. *Physics Letters* 19, No. 2, 118-120 (Oct. 1, 1965).
9094. The realization and use of the international practical temperature scale of 1948, J. P. Evans. *ISA 20th Annual Conference and Exhibit*, Los Angeles, Calif., Oct. 4-7, 1965, *ISA Preprint* 14.3-1-65 (1965).
9095. The structures of anhydrous sodium trimetaphosphate,  $Na_3P_3O_9$ , and the monohydrate,  $Na_3P_3O_9 \cdot H_2O$ , H. M. Ondik. *Acta Cryst.* 18, Pt. 2, 226-232 (Feb. 1965).
9096. The surface ionization of niobium, M. D. Scheer and J. Fine. *J. Chem. Phys.* 42, 3645 (1965).
9097. The system  $WO_3-B_2O_3$ , E. M. Levin. *J. Am. Ceram. Soc.* 48, No. 9, 491-492 (Sept. 1965).
9098. The temporal dimensional stability of surface-hardened steels, M. R. Meyerson. *Metal Treating* 15, No. 6, 5 (Dec. 1964-Jan. 1965).
9099. The use of electromagnetic signals emitted from nuclear explosions to study of long-range VLF propagation, A. G. Jean and J. R. Wait. *J. Geophys. Res.* 70, No. 5, 1258-1261 (Mar. 1, 1965).
9100. The use of visible and ultraviolet spectroscopy to identify carbonyl compounds in photo-degraded plastics, V. E. Gray and J. R. Wright. *Polymer Engr. Sci.* 5, No. 4, 284-290 (Oct. 1965).
9101. The use of the radio refractometer to measure water vapor turbulence, B. R. Bean and R. E. McGavin. (*Proc. 1963 Intern. Symp. Humidity and Moisture*, Washington, D. C.), Book, Humidity and Moisture. Measurement and Control in Science and Industry. Vol. 2. Applications, Sec. VII, Paper 67, pp. 561-568 (Reinhold Publ. Corp., New York, N. Y., 1965).
9102. The vibrational assignment of sulfonyl fluoride, D. R. Lide, D. E. Mann, and J. J. Comeford. *Spectrochim. Acta* 21, 497-501 (1965).
9103. The W-spin and B-spin subgroups of  $SU(12)$ , H. J. Lipkin and S. Meshkov. *Phys. Rev. Letters* 14, No. 16, 670-672 (Apr. 1965).
9104. The use of topside sounders in ionospheric research, K. Davies. *ITU Telecommunications J.* pp. 1-8 (Mar. 1965).
9105. The world of cryogenics. III. Cryogenics at the National Bureau of Standards Boulder Laboratories, B. W. Birmingham. *Cryogenics* 5, No. 3, 121-128 (June 1965).
9106. Thermal conductivity and thermoelectric power of rutile ( $TiO_2$ ), W. R. Thurber and A. J. H. Mante. *Phys. Rev.* 139, No. 5A, A1655-A1665 (Aug. 30, 1965).
9107. Thermal conductivity and viscosity of simple fluids, J. V. Sengers. *Intern. J. Heat Mass Transfer* 8, 1103-1116 (1965).
9108. Thermal decomposition of 2,3-dimethylbutane in a single-pulse shock tube, W. Tsang. *J. Chem. Phys.* 43, No. 2, 352-359 (July 15, 1965).
9109. Thermal diffusion of substitutional impurities in metals, R. E. Howard and A. B. Lidiard. *Acta Met.* 13, No. 4, 433-444 (1965).
9110. Theoretical electromotive forces for cells containing a single solid or molten fluoride, bromide, or iodide, W. J. Hamer, M. S. Malmberg, and B. Rubin. *J. Electro. Chem. Soc.* 112, No. 7, 750-755 (July 1965).

9111. Theoretical electromotive forces for cells containing a single solid or molten oxide, W. J. Hamer. *J. Electroanal. Chem.* 10, 140-150 (1965).
9112. Theory of relaxation in a group of weakly coupled systems, R. L. Peterson. *Phys. Rev.* 139, No. 4A, A1151-A1155 (Aug. 1965).
9113. Thermodynamic properties of neon from 25 to 300°K between 0.1 and 200 atmospheres, R. D. McCarty and R. B. Stewart. *Book, Advances in Thermophysical Properties at Extreme Temperatures and Pressures*, pp. 84-97 (Am. Soc. Mech. Eng., New York, N. Y., 1965).
9114. Thermodynamics of solid carbon dioxide solubility in liquid solvents at low temperatures, A. L. Myers and J. M. Prausnitz. *Ind. Eng. Chem.* 4, No. 2, 209-212 (May 1965).
9115. Thermogravimetric study of some new transition metal-Schiff base coordination polymers, E. Horowitz, M. Tryon, and R. G. Christensen. *J. Appl. Polymer Sci.* 9, 2321-2336 (1965).
9116. Time-correlation functions and transport coefficients in statistical mechanics, R. Zwanzig. *Ann. Rev. Phys. Chem.* 16, 67-102 (1965).
9117. Total photonuclear cross sections for low atomic number elements, J. M. Wyckoff, H. W. Koch, B. Ziegler, and R. Uhlig. *Phys. Rev.* 137, No. 3B, B576-B594 (Feb. 1965).
9118. Transfer line surge, W. G. Steward. (Proc. 1964 Cryogenic Engineering Conf., Univ. Pennsylvania, Phila., Pa., Aug. 18-24, 1964), *Book, Advances in Cryogenic Engineering* 10, Paper I-3, 313-322 (Plenum Press Inc., New York, N. Y., 1965).
9119. Transition from resonant to non-resonant line shape in microwave absorption, A. Ben-Reuven. *Phys. Rev. Letters* 14, No. 10, 349-351 (Mar. 8, 1965).
9120. 22 ISCC-NBS centroid colors of maximum contrast, K. L. Kelly. *Color Engr.* 3, No. 6, 26-27 (Nov.-Dec. 1965).
9121. Two cases of stress corrosion cracking in copper tubing, H. L. Logan and G. M. Ugiansky. *Mater. Protect.* 4, No. 5, 79-80 (May 1965).
9122. Two-dimensional probability distribution in a turbulent field, F. N. Frenkiel and P. S. Klebanoff. *Phys. Fluids* 8, No. 12, 2291-2293 (Dec. 1965).
9123. Two-electron excitation states in helium, R. P. Madden and K. Coding. *Astrophys. J.* 141, No. 2, 364-375 (Feb. 1965).
9124. Ultrasonic determination of crystalline resonances and sound velocities using NMR techniques, R. J. Mahler and W. H. Tanttila. *J. Acoust. Soc. Am.* 38, No. 3, 429-432 (Sept. 1965).
9125. Uncertainties associated with proving ring calibration error, T. E. Hockersmith and H. H. Ku. *ISA J.* 12, No. 6, 73-77 (June 1965).
9126. Use of general purpose coding systems for statistical calculations, J. M. Cameron and J. Hilsenrath. *Proc. IBM Scientific Computing Symp. Statistics*, Thomas J. Watson Research Center, Yorktown Heights, N. Y., Oct. 21-23 1963, pp. 281-299 (IBM, White Plains, N. Y., 1965).
9127. Vacuum ultraviolet photochemistry. VIII. Propylene, D. A. Becker, H. Okabe, and McLesby, Jr. *J. Phys. Chem.* 69, No. 2, 538-542 (Feb. 1965).
9128. Vacuum-ultraviolet photolysis of ethane at high temperature, R. F. Hampson, Jr. and J. R. McNesby. *J. Chem. Phys.* 42, No. 6, 2200-2208 (Mar. 15, 1965).
9129. Vacuum-ultraviolet photolysis of ethane at high temperature. II. Collisional deactivation of excited ethylene, R. F. Hampson, Jr. and J. R. McNesby. *J. Chem. Phys.* 43, No. 10, 3592-3596 (Nov. 15, 1965).
9130. Vacuum-ultraviolet photolysis of ethane in liquid-nitrogen solution, J. A. Pirog and J. R. McNesby. *J. Chem. Phys.* 42, No. 7, 2490-2494 (Apr. 1, 1965).
9131. Vibrational fundamentals of  $\text{CF}_2\text{N}_2$  from the ultraviolet absorption spectrum, J. D. Simmons, I. R. Bartky, and A. M. Bass. *J. Mol. Spectr.* 17, No. 1, 48-49 (July 1965).
9132. Viscosity and density of boron trioxide, A. Napolitano, P. B. Macedo, and E. T. Hawkins. *J. Am. Ceramic Soc.* 48, No. 12, 613-616 (1965).
9133. Volume relaxation of  $\text{As}_2\text{O}_3$  in the glass transformation, A. B. Bestul. *Proc. Intern. Conf. on Physics of Non-Crystalline Solids*, Delft, The Netherlands, July 1964, pp. 426-435 (North-Holland Publ., Amsterdam, The Netherlands, 1965).
9134. Volume relaxations in amorphous polymers, R. S. Marvin and J. E. McKinney. *Book, Physical Acoustics*, Ed. W. P. Mason, IIB, Chapt. 9, 165-229 (Academic Press Inc., New York, N. Y., 1965).
9135. Watermarks for papermaking by electroforming, J. P. Young. *Metal Finishing* 63, No. 4, 79-82 (Apr. 1965).
9136. Wave mode modification in liquid helium with clamped normal fluid, G. L. Pollack and J. R. Pelham. *Proc. 9th Intern. Conf. Low Temperature Physics*, Columbus, Ohio, Sept. 1964, p. 166 (Plenum Press Inc., New York, N. Y., 1965); *Phys. Rev.* 137, A1676-A1684 (Mar. 1965).
9137. Weathering: theoretical and practical aspects of asphalts, J. R. Wright. *Book, Bituminous Materials: Asphalts, Tars, and Pitches*, Ed. A. J. Holberg, Vol. 2, Asphalts, Pt. 1, Chapt. 8, pp. 249-306 (John Wiley and Sons, New York, N. Y., 1965).
9138. Weight checking of aerosols, S. Hasko. *Mod. Packaging* 38, No. 11, 141 (July 1965).
9139. Width of the microwave lines of oxygen and their relationship to the thermal noise emission spectrum of the atmosphere, R. L. Abbott. *Proc. 3d Symp. Remote Sensing of the Environment*, Infrared Phys. Lab., Inst. Sci. Tech. Univ. Michigan, Ann Arbor, Mich., Feb. 1965, pp. 257-269 (Mar. 1965).
9140. Widths of transmission Kikuchi lines in silicon and diamond, F. A. Fowler and L. Marton. *J. Appl. Phys.* 36, No. 6, 1986-1995 (June 1965).
9141. Work function measurements on field emitters with prescribed orientation, J. W. Little, T. E. Madey, and R. Klein. *J. Appl. Phys.* 36, No. 4, 1491-1492 (Apr. 1965).
9142. W-spin analysis of weak decays in  $\text{U}(12)$ , D. Horn, M. Kugler, H. J. Lipkin, S. Mechkov, J. C. Carter, and J. J. Coyne. *Phys. Rev. Letters* 14, No. 17, 717-719 (Apr. 1965).
9143. W-spin and B-spin subgroups of  $\text{SU}(12)$ , H. J. Lipkin and S. Mechkov. *Phys. Rev. Letters* 16, No. 14, 670-672 (Apr. 19, 1965).

9144. Xenon photosensitized formation of metastable nitrogen, M. D. Scheer and W. M. Jackson. *Science* 148, 3678 (1965).
9145. X-ray spectrochemical analysis of materials: cement and dental alloys, B. L. Bean and B. W. Mulligan. *Am. Soc. Testing Mater. Spec. Tech. Publ.* 373, Application of Advanced and Nuclear Physics to Testing Materials, pp. 25-45 (June 17, 1965).
9146. X-ray study of isothermal thickening of lamellae in bulk polyethylene at the crystallization temperature, J. D. Hoffman and J. J. Weeks. *J. Chem Phys. Note* 42, No. 2, 4301-4302 (June 15, 1965).
9147. You can always tell a computer but you can't tell it much, J. H. Wegstein. *Proc. ARO Working Group on Computers*, Harry Diamond Laboratories, Washington, D. C., Feb. 4-5, 1964, pp. 129-151 (Feb. 1965).
9148. Zeeman filter, K. G. Kessler and W. G. Schweitzer. *J. Opt. Soc. Am.* 55, No. 3, 284-288 (Mar. 1965).
9149. Zone refiner with temperature control, F. Ordway. *Anal. Chem.* 37, 1178-1180 (Aug. 1965).

# 5. AVAILABILITY OF NBS PUBLICATIONS

## 5.1. PRICE LISTS

The following lists give the numbers and prices of all NBS publications issued from 1901 through June 30, 1966 which may be purchased from Federal Government sources. Order publications from the Superintendent of Documents, U.S. Government Printing Office or from the U.S. Department of Commerce Field Office nearest you (see Purchase Procedures, page V).

Nonperiodicals (but not periodicals) may also be ordered through the Clearinghouse for Federal Scientific and Technical Information (see page II).

Following the price list are Sections 5.2. Reprints of Articles by NBS Authors, and 5.3. Out-of-Print Material.

CIRCULARS					
No.	Price	No.	Price	No.	Price
3 see C547, Sec. 1, in part-----	OP	239 see C363-----	OP	461-----	\$3.75

INDIVIDUAL ISSUES OF THE JOURNAL OF RESEARCH

Section A. Physics and Chemistry  
(Issued Bimonthly)

1964: 68A-1 to 68A-6, 70 cents each.  
1965: 69A-1 to 69A-6, 70 cents each.  
1966: 70A-1 to 70A-3, \$1.00 each.

Section B. Mathematics and Mathematical  
Physics (Issued Quarterly)

1964: 68B-1 to 68B-4, 75 cents each.  
1965: 69B-3 to 69B-4, 75 cents each.  
1966: 70B-1 to 70B-2, 75 cents each.

Section C. Engineering and Instrumentation  
(Issued Quarterly)

1964: 68C-1 to 68C-4, 75 cents each.  
1965: 69C-1 to 69C-4, 75 cents each.  
1966: 70C-1 to 70C-2, 75 cents each.

Section D. Radio Science  
(Issued Monthly)

1964: 68D-1 to 68D-12, \$1.00 each.  
1965: 69D-1; 69D-3; 69D-5 to 69D-12,  
\$1.00 each.

BOUND VOLUMES OF THE JOURNAL OF RESEARCH

Vol.	Price
66A (Jan.-Dec. 1962)-----	\$5.50
67A (Jan.-Dec. 1963)-----	6.00
68A (Jan.-Dec. 1964)-----	6.25
69A (Jan.-Dec. 1965)-----	5.50
66B (Jan.-Dec. 1962)-----	3.00
67B (Jan.-Dec. 1963)-----	3.25
68B (Jan.-Dec. 1964)-----	2.50
69B (Jan.-Dec. 1965)-----	3.75

Vol.	Price
66C (Jan.-Dec. 1962)-----	\$4.00
67C (Jan.-Dec. 1963)-----	3.75
68C (Jan.-Dec. 1964)-----	3.50
69C (Jan.-Dec. 1965)-----	3.75
66D (Jan.-Dec. 1962)-----	7.00
67D (Jan.-Dec. 1963)-----	7.00
68D (Jan.-Dec. 1964)-----	9.50
69D (Jan.-Dec. 1965)-----	10.00

## 5.2. REPRINTS OF ARTICLES BY NBS AUTHORS

TYPE OF PAPER	HOW REPRINTS OR COPIES CAN BE OBTAINED					
	Superintendent of Documents, Government Printing Office	Clearinghouse <sup>2</sup>	Author	Federal Depository Libraries <sup>4</sup>	Library of Congress-- Photodu- plication Service	Original Journals
Research Papers <sup>1</sup> (J. Research, Prior to July 1959)		\$2.00 hard copy. Micro- fische copies also available at \$.65.		X	X	
Papers by NBS Authors in Journal of Research (July 1959 to Present)	See footnote 3		X	X	X	
Papers by NBS Authors published in Outside Journals			X		X	X

<sup>1</sup>RESEARCH PAPERS were reprints of individual articles that appeared in Volumes 1-62 of the monthly Journal of Research. These papers were published, numbered, and made available separately. In 1959 NBS began publishing the Journal of Research in separate sections, and RESEARCH PAPERS were discontinued.

<sup>2</sup>Address: Clearinghouse for Federal Scientific and Technical Information, National Bureau of Standards, U.S. Department of Commerce, Springfield, Virginia, 22151.

<sup>3</sup>Bound volumes or (when available) the individual Journals may be purchased. See price list, page 403.

<sup>4</sup>Primarily for reference; some libraries are equipped to reproduce copies for a fee.

### 5.3. OUT-OF-PRINT MATERIAL

Those NBS publications not listed in the Price Lists, are out-of-print and are not available from the Superintendent of Documents. Many can be consulted at Libraries. Also, in many cases, photoduplicated copies can be purchased from the Library of Congress. For full information concerning this service, write to the Photoduplication Service, Library of Congress, Washington, D. C. 20540.

Certain NBS publications are out of print because they have been replaced, or partially replaced, by material issued by other organizations. In this connection, NBS is able to offer the following information.

Circular 410, National Standard Petroleum Oil Tables. Information in this Circular has been incorporated in the ASTM-IP Petroleum Measurement Tables issued by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa., 19103. Available at \$8.75 (\$6.50 to ASTM members). Tables 5 and 7 of the ASTM-IP Tables may also be purchased from the ASTM in separate reprint form at \$1.50 a copy for the two tables.

Circular 438, Static Electricity. The National Fire Protection Association, 60 Battery-march Street, Boston, Mass., 02110, has issued a publication by the same title, available from them as NFPA Publication 77M, at \$1.00.

Circular 464, Gas Calorimeter Tables. The American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa., 19103, has issued a publication on this subject. Listed as ASTM D900-55, it can be ordered at 75 cents per copy.

Circular 499, Nuclear Data. The publication of nuclear data is being continued in a new journal entitled Nuclear Data, published by Academic Press, 111 Fifth Avenue, New York, N. Y., 10003.

Circular 564, Tables of Thermal Properties of Gases. A reprinted edition is available from Pergamon Press of London and New York, at \$20.00. The chapter on Nitrogen by Woolley was reissued as NACA Technical Note 3271 (March 1956) and the chapter on Steam by Fano, Hubbell, and Beckett was reissued as NACA Technical Note 3273 (August 1956). Information on these two Technical Notes may be obtained from the Office of Technical Information, National Aeronautics and Space Agency, 1520 H Street, N. W., Washington, D. C., 20546.

Circular 576, Automotive Antifreezes. For information on this subject consult United States of America Standards Institute, 10 East 40th Street, New York, N. Y., 10016.

Circular 577, Energy Loss and Range of Electrons and Positrons and Supplement. These have been superseded by NASA Special Publication 3012, available from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Va., 22151, at \$4.00 a copy.

Circular 579, Underground Corrosion. Now available as PB168350 from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Va., 22151, at \$6.00 hard copy and \$1.25, microfiche.

Miscellaneous Publication 179, American Standard Building Code Requirements for Minimum Design Loads in Buildings and Other Structures. United States of America Standards Institute, 10 East 40th Street, New York, N. Y., 10016, has issued a publication on this subject. Available from them as A58.1-1955, at \$2.50.

Miscellaneous Publication 187, Directory of Commercial and College Laboratories. A new Directory of College and Commercial Testing Laboratories is published by the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa., 19103, at \$1.50.

Handbook 46, Code for Protection Against Lightning. A United States of America Standards Institute Code for Protection Against Lightning (NFPA No. 78-1963) is available from United States of America Standards Institute, 10 East 40th Street, New York, N. Y., 10016, at 75 cents.

Handbook 49, Recommendations for Waste Disposal of Phosphorus-32 and Iodine-131 for Medical Users. Reprints of this Handbook can be purchased at \$.40 per copy from NCRP Publications, Post Office Box 4867, Washington, D. C., 20008.

Handbook 71, Specifications for Dry Cells and Batteries. For more information on this Handbook, write to United States of America Standards Institute, 10 East 40th Street, New York, N. Y., 10016.

Handbook 76, Medical X-ray Protection Up to Three Million Volts. Reprints of this Handbook can be purchased at \$.50 per copy from NCRP Publications, Post Office Box 4867, Washington, D. C., 20008.

## 6. INDEXES

## 6.1. HOW TO USE THE INDEXES

The index symbols used in the author and subject indexes are explained in the following three tables. These tables also give the pages on which the abstracts of the publications, or the listing of titles of papers begin.

Table A

NBS Nonperiodical Series	Index Symbol	Page Number
Circulars	C	199
Monographs	Mono.	199
Handbooks	H	213
Miscellaneous Publications	M	218
Applied Mathematics Series	AMS	227
National Standard Reference Data Series	NSRDS	227
Building Science Series	BSS	228
Commercial Standards	CS	230
Simplified Practice Recommendations	SPR	233
Technical Notes	TN	234

Table B

### 6.3. SUBJECT INDEX

A

- AA<sup>T</sup>=aA, incidence equation, 3837.
- Abandoned, conventional definition of mismatch loss, 6365.
- Abbreviated calendar record, 5899.
- Abc's for finding real, imaginary, and absolute values of vector ratios, TN250.
- Abel inversion, computer, 5132.
- Aberration, longitudinal spherical, in extra-axial region of lenses, measurement, J 66C3-95, 185 (1962).
- ABO-type rare earth borate solid solutions, polymorphism, 6300.
- ABO, compounds, chemically similar, synthesis and stability of bismutotantalite, stibiotantalite, 5722.
- Abrasion hardness of bone char, development of a new test, 3179.
- measuring, resistance of coatings, 3574.
- Abrasive grain for grinding wheels, grading, CS271-65.
- jet, NBS, method for measuring abrasion resistance of coatings, 3574.
- Abridged, color-project systems, demonstration of color perception, 3380.
- color reproduction, 4460.
- Abscissas and weights of Gauss type, 4297.
- Absence, isotope effect in the fractional recrystallization of alpha-D-glucose-1-t, 3956.
- pronounced quadrupole effects in the nuclear resonance of In<sup>115</sup> in a noncubic environment, 5898.
- Absolute calibration, NBS photoneutron source, 5174.
- calibration, National Bureau of Standards thermal neutron flux, J 67A3-206, 215 (1963).
- configuration and chemical topology, J 67A6-245, 591 (1963).
- determination, acceleration of gravity, results, 8998.
- determination, refractive indices of gases at 47.7 gigahertz, 6576A.
- Absolute, intensity of incoherent scatter echoes from the ionosphere, J 66D4-203, 395 (1962).
- isotopic abundance of terrestrial silver, J 66A1-135, 1 (1962).
- isotopic abundance ratio and the atomic weight of a reference sample of copper, J 68A6-305, 589 (1964).
- isotopic abundance ratio and the atomic weight of bromine, J 68A6-306, 593 (1964).
- isotopic abundance ratio and the atomic weight of chlorine, 4461.
- isotopic abundance ratio and the atomic weight of silver, 3412.
- isotopic abundance ratios and the atomic weight of a reference sample of chromium, J 70A2-395, 193 (1966).
- light scattering photometer: II. Direct determination of scattered light from solutions, J 68A1-256, 87 (1964).
- magnetic susceptibilities by the Gouy and the Thorpe-Senftle methods, 4462.
- magnetic susceptibilities by Thorpe-Senftle method, 3957.
- mass spectrometric determination, atomic weight of silver, 3413.
- measurement, magnetic susceptibilities in weak low-frequency fields, new null method, 5501.
- measurement, temperature of microwave noise sources, 3414.
- measurement, temperatures of microwave noise sources, 4463.
- measurement, tungsten for polonium<sup>210</sup> alpha particles in air, nitrogen, and carbon dioxide, 3958.
- measurement, tungsten for polonium-210 alpha particles in nitrogen, argon, and an argon-methane mixture, 6577.
- measurements (electrical), J 66C2-94, 137 (1962).
- microwave refractometer, 4464.
- oscillator strengths for Fe I, 5900.
- photometry, aurora. I. The ionized molecular nitrogen emission and the oxygen green line in the dark atmosphere, 3126.
- photometry, aurora. II. Molecular nitrogen emission in the sunlit atmosphere, 3127.
- photometry, light of the night sky, TN214.
- photometry, zodiacal light, 9058.
- radiometry, far ultraviolet, use of thermopiles, 8921.
- real, and imaginary value, vector ratios, nomographs for computing, 6889.
- scale, oscillator strengths, 5173; 5175.
- simplest form in digital circuit design, 3810A.
- temperature scale, 4 °K to 20 °K, determined from measurements with an acoustical thermometer, J 69A4-358, 375 (1965).
- temperatures determined from measurements of the velocity of sound in helium gas, 4465.
- value of G at the National Bureau of Standards, J 70C2-225, 149 (1966).
- zenith intensity, [OI] 5577 at College, Alaska, 3811.
- zenith intensities, [OI] 5577, comparative study, 3374.
- Absorbed dose, measurement, construction of calorimeters, TN163.
- Absorbent material, dependence of absorption coefficients upon area, 5531.
- Absorber, strong, cylindrical sample, absorption of radiation, 3128.
- Absorbing film, determination of optical constants, M256, p. 25.
- interface density distribution of polymer segments in vicinity, 6678.
- Markov chains to the statistical thermodynamics of polymer chains in a lattice, application of theory, 5925.
- Absorption, auroral, radio waves, contribution of non-thermal electrons, 6434.
- bands, carbon dioxide from 5.3 to 4.6 microns, J 67A3-207, 219 (1963).
- bands, carbon dioxide from 2.8 to 4.2μ, 4467.
- bound-free, coefficient, hydrogen negative ion, 4984.
- by areas of finite size, 4302.

- by flash heating and kinetic spectroscopy, observation of FeO, 6238.
- carbon dioxide, by solutions of 2-amino-2-(hydroxymethyl)-1,3-propanediol, 3959.
- coefficients, dependent upon the area of the absorbent material, 5531.
- coefficients, homogeneous materials in the infrared at elevated temperatures, preliminary studies directed toward determination of spectral, 8954.
- coefficients, vacuum-ultraviolet, of water and methane, deuterium isotope effect, 6691.
- compressed gases, collision-induced, 4525; 4526; 5952.
- corrections by Albrecht's method, 3118.
- dispersion of centimeter waves by gases, index of refraction of air, J 67D6-297, 631 (1963).
- during polar cap absorption events, day-to-night ratio of cosmic noise, 5743.
- emission by cavities, Kirchhoff's Law and its generalized application, J 69B3-148, 165 (1965).
- events, auroral, at South Pole, study, 5889; 6565.
- events, cosmic noise, at geomagnetically conjugate stations, 6663.
- events, ionospheric fluctuations, at conjugate stations, 6075.
- events, short-duration cosmic noise, in conjugate regions at high magnetic latitude, some observations, 6375.
- filter, wavelength passed by Hg<sup>108</sup> Zeeman-split, 5858.
- interpretation of maximum in soft X-ray, 6154.
- ionospheric, and possible oscillation of the ionosphere in the conjugate regions, 6162.
- ionospheric radio, and electron precipitation in the auroral zones, 6733A.
- light, by interstellar grains, possible mechanism, 6556.
- line, 2537-A, atomic beam wavelength of Hg<sup>108</sup> Zeeman filter, relative, 5857.
- microwave, in compressed oxygen, 3644.
- microwave, in the trimethylamine-trimethylboron addition complex, 3255.
- nondeviative, high-frequency radio waves in auroral latitudes, 2374A.
- nonresonant, and collision diameters in foreign-gas broadening of symmetric top molecules, 6227.
- Absorption, nonresonant microwave, and electric dipole moment of NO in the gaseous state, 3266.
- nonresonant microwave, dipole moment of PCl<sub>2</sub>F vapor, 6695.
- occurrence of short-duration cosmic events inside the southern auroral zone, 5778.
- optical properties of beryllium in the ultraviolet from electron energy, 8925.
- polar-cap, 6293.
- pure, model for the line-blanking effect, difference between a non-LTE, comment, 6641.
- radiation by a cylindrical sample of a strong absorber, 3128.
- radio wave, of several gases in the 100 to 117 kMc/s frequency range, J 65D1-98, 15 (1961).
- scattering, photons by deformed nuclei, 4466.
- scattering, photons by holmium and erbium, 3415.
- sound, coefficients, precision of reverberation chamber measurements, 4240.
- spectroscopic, NO in crystalline and liquid krypton, 5682.
- spectroscopy, some atomic reactions, 3769.
- transition from resonant to nonresonant line shape in microwave, 9119.
- very low frequency emissions, relation between auroral radio, 8919.
- Absorption spectra, ammonia in solid argon at 4.2 °K, 4397.
- charge-transfer, NO in Kr and CH<sub>3</sub>OH solutions, 5948.
- chemical constitution of dyes, relation, 3346.
- diametric molecules in liquid and crystalline rare gases, 5901.
- far ultraviolet, of the rare gases, line profiles, 6831.
- infrared, B<sub>2</sub>O<sub>3</sub>, B<sub>2</sub>O<sub>5</sub> and BO<sub>2</sub> in solid argon matrices, 5406.
- infrared, carbon suboxide and malononitrile in solid argon matrices, 5407.
- infrared, mutarotational equilibria of monosaccharides, J 66A1-139, 31 (1962).
- magnesium and manganese atoms in solid rare gas matrices, 3811A; 4343.
- solid methane, ammonia, and ice in the vacuum ultraviolet, 3416.
- solid xenon, krypton, and argon in the vacuum ultraviolet, 3416A.
- vacuum ultraviolet, oxygen in liquid and crystalline argon and nitrogen, 6523.
- Absorption spectrum, carbon vapor in solid argon at 4 °K and 20 °K, 4469.
- CF<sub>4</sub>, trapped in an argon matrix, 4468.
- CF<sub>3</sub>N<sub>3</sub>, vibrational fundamentals from the ultraviolet, 9131.
- CF<sub>4</sub> and its vibrational analysis, 3678.
- infrared, nitrous oxide (N<sub>2</sub>O) from 1830 cm<sup>-1</sup> to 2270 cm<sup>-1</sup>, J 68A1-255, 79 (1964).
- magnetic properties of osmium hexafluoride, 3960.
- muscovite, alteration by KBr pellet preparation, 5185.
- muscovite sheet mica, on basis of color, and optic angle, J 67A4-220, 309 (1963).
- "pink" afterglow of nitrogen in the vacuum ultraviolet, 6248.
- solid oxygen, 3329.
- YbCl<sub>6</sub>H<sub>2</sub>O, 3975.
- Abstract numerical integrations, J 70B2-173, 137 (1966).
- shape recognition by machine, 3961.
- unit, 6677.
- Abstracting, M276.
- Abundance, sodium, on the twilight sodium emission—2; theoretical model, 6263.
- A.C. resonant probes, resonant scattering, relationship, 9093.
- A-C to D-C comparators, calibration, 6623.
- AC-DC transfer instruments, practical aspects of use, TN257.
- voltage comparator for use in a standards laboratory, TN280.
- Acceleration, gravity, results of absolute determination, 8998.
- Accelerations, sinusoidal, at peak levels near that of gravity by "chatter" methods, 1310A.
- Accelerators, electron, for food processing, 6727A.
- linear, beam loading, 6612.
- Accelerometer, TN269.
- "Thumbtack," 1.5-150 Kc range, 6507.
- Accelerometers, linear strain gage, used in telemetry, general characteristics, TN150.
- Accounting, proper conformations of a polymer near a surface, 6557; 8963.
- Accumulation, calibration errors and their optimum distribution, 5176.
- Accuracy, analytical procedures, 4470; 4684.
- electrical and radio measurements and calibrations, 1965, TN262-A.
- Institute for Basic Standards role in plans for better measurement, 9081.
- measurement, 4925.

- measurements and calibrations, 1965, TN262.  
 Monte Carlo methods in computing finite Markov chains, J 64B4-36, 211 (1960).  
 planning for better measurement, 8943.  
 precision, electromagnetic measurements, 4850.  
 precision: evaluation and interpretation of analytical data, 3129.  
 precision — experiment design aspects, 4239.

curves, evaluation of precision of analytical methods involving linear; which measure of precision, 6537.

designs for comparing pairs of objects, J 69B4-162, 323 (1965).

dynamic, of pressure transducers, methods, Mono.67.

electrical energy measurement in an exploding wire experiment, 4513.

electrical instruments, 3968.

encapsulated radium sources, correction factors, J 66A2-145, 103 (1962).

equipment, audiovisual application, M248, p. 195.

error, uncertainties associated with proving ring, 9125.

errors, accumulation, optimum distribution, 5176.

facility, high voltage, at NBS, 5147.

five gamma-emitting nuclides for emission rate, TN71 (PB161572).

frequency and time, services at the Boulder Laboratories of the NBS, M248, p. 37.

germanium resistors at low temperatures (2-20 °Kelvin), J 70A3-400, 243 (1966).

high frequency, microwave services of NBS, 6208; 6867.

high-frequency, services, current developments, M248, p. 45.

inductance standards in the Maxwell-Wien bridge circuit, J 65C3-69, 183 (1961).

inductive voltage dividers, 4986.

inductive voltage dividers and analysis of their operational characteristics, 5737.

instrument, systems, realistic evaluation of the precision and accuracy of, M248, p. 63.

laboratory, operating, M248, p. 213.

length and mass, at the NBS, M248, p. 9.

line scales, an automatic fringe counting interferometer, J 65C2-64, 129 (1961).

liquid-in-glass thermometers, Mono.90; 5082.

loop antennas at VLF, J 65C3-70, 189 (1961).

maintenance, data processing for control of instrument, M248, p. 233.

mass, TN288.

measurement, precision: Electricity and electronics, H77, Vol. I. Heat and mechanics, H77, Vol. II. Optics, metrology, and radiation, H77, Vol. III.

methods, airglow photometers at Fritz Peak Observatory, 5480.

microphones, vibration pickups, and earphones, 6621.

monitor for use in bremsstrahlung beams, J 65A5-119, 401 (1961).

National Bureau of Standards mass standards for ultramicroanalysis, 4985.

National Bureau of Standards tritiated-toluene standard of radioactivity, 9061.

neutron sources, the correction factor for fast neutron reactions on sulfur and oxygen in the manganous-sulfate-bath, 9063.

optical, of vibration pickups at small amplitudes, 4209.

peak A-C to D-C comparators, 6623.

photogrammetric lenses and cameras at the National Bureau of Standards, 5223.

potentiometers by resistance bridge methods, 5938.

potentiometers, practical methods, TN172.

precision, of RF vacuum tube voltmeters, TN121 (PB161622).

pressure and force, at NBS, M248, p. 13.

pressure, microphones, in small couplers, hydrogen retention system for, 5393.

procedures for direct-current resistance apparatus, Mono.39.

pulsation detector coils, 4002.

Schlieren systems, 6624.

small grating spectrometers from 166 to 600  $\text{cm}^{-1}$ , J 66A3-155, 223 (1962).

strain gauge, device for extreme temperatures, 3316.

system measurement error, mathematical approach to the determination of, M248, p. 91.

system, precision RF attenuation, 3390.

systems, instrument, realistic evaluation of the precision and accuracy, J 67C2-128, 161 (1963).

systems, microwave, M248, p. 49.

systems, accurate microwave wavemeters, 3417.

techniques, field strength, at NBS, 6756.

techniques, microwave, at NBS, 6209.

techniques, power, microwave, bolometric, at NBS, 5214.

temperature measuring instruments at NBS, M248, p. 25.

temperature, of an X-ray diffractometer furnace, 4859.

temperature standards on the international practical temperature scale of 1948, 4987.

test services of the National Bureau of Standards, M250.

training program, for the Navy, M248, p. 187.

uncertainties, 5102.

universal ratio sets, some modifications methods, TN220.

vibration pickups at large amplitudes, 3991; 4512.

volt-ampere converters, TN188.

weight series using two knife-edge direct-reading balances, J 68C4-173, 261 (1964).

Calibrations at 400 and 1000 Hertz, international comparison of inductive voltage divider, 6595.

hierarchy of, analysis of the accumulated error, 3422.

low-frequency electrical, at the NBS, M248, p. 31.

measurements, electrical and radio, 1965 accuracy, TN262-A.

measurements, 1965, accuracy in, TN262.

radiometric, ultraviolet spectrum, 5034.

350 kV, an international comparison of voltage transformer, 5913.

Calibrator, TN269.

liquid-medium step-function pressure, 5874; 5956.

phase-modulated, testing phase meters, 4831.

Callaway theory, of thermal conductivity, foundations, 5366.

Calomel electrode, 3454.

Calorimeter, adiabatic, for the range 10 to 360 °K, J 69C1-181, 19 (1965).

guarded flat plate, 4481.

influence in chemistry development, 6432.

measuring heat transfer through cryogenic insulation, new steady-state, 5880.

Calorimeters, adiabatic, heat exchange, J 67A4-222, 331 (1963).

heat capacity, adiabatic, alpha-alumina, heating rate, 5381.

measurement of absorbed dose, construction, TN163.

Calorimetric calibration of an ionization chamber for determination of X-ray total beam energy, J 66A5-172, 371 (1962).

calibration of the electrical energy measurement in an exploding wire experiment, 4513.

determination of enthalpy of graphite from 1200 to 2600 deg K, 6541.

determination of half-cell entropy changes, 5224.

properties of some alkali pentaborate hydrates from 15 to 370 °K, J 68A4-286, 381 (1964).

residual entropies of glasses, limits, 6830.

Calorimetry, air conditioning, investigation of psychrometric measurement techniques, 6597.

determination of composition of complexes and their instability constant, 6688.

electrical resistance of wires of low temperature-coefficient of resistance, 6018.

electrochemical, 6019; 6020.

errors in drop, due to sample container transitions, 5341.

configurations, use of index of refraction as a means for study, 6521.

continuously stratified with arbitrary magnetic induction, reflection and transmission of radio waves, J 66D1-176, 81 (1962).

continuum description of a high temperature, 5973.

continuum theory, 5974.

copper arc, ionization, J 66A2-148, 169 (1962).

coulomb collisions on incoherent scattering of radio waves, 6441.

covered antenna, electromagnetic properties, J 69D7-530, 965 (1965).

cylindrical, scattering resonances, J 69D10-566, 1321 (1965).

cylindrically stratified, transverse propagation of electromagnetic waves, 6511.

dense, electric field distribution, 3516.

dense laboratory, microwave whistler mode propagation, 3649.

density of the magnetosphere, measuring, 5470.

diagnostics, microwave reflection techniques, TN256.

environment, theory of radiation from a slotted conducting plane, TN223.

equilibrium, electromagnetic fluctuations, J 69D3-474, 381 (1965).

expanding, in a conducting half-space, generation of an electromagnetic pulse, J 68D2-327, 147 (1964).

hot, transmission and reflection of electromagnetic waves, J 69D5-509, 735 (1965).

inhomogeneous loss, concerning the mechanism of reflection of electromagnetic waves, J 69D6-518, 865 (1965).

instability resulting in field-aligned irregularities in the ionosphere, 5156.

instability, two-stream, source of irregularities in the ionosphere, 5833.

intensities, observed, their radial distribution, data processing system for the automatic transformation, 5982.

ionospheric, experimental studies of perturbations, J 69D2-456, 219 (1965).

ionospheric, on some nonlinear phenomena, J 69D1-441, 33 (1965).

isothermal, across magnetic field, nonlinear ambipolar diffusions, 6226.

kinetic equation, collective and collisional correlations, 4140.

layer, admittance of annular slot antennas radiating into, J 68D3-348, 317 (1964).

layers, self and mutual admittances of waveguides radiating, J 69D2-453, 179 (1965).

linearly graded, on the point of emergence of a microwave beam entering, J 69D2-452, 177 (1965).

media, boundary value problems, J 65B2-53, 137 (1961).

media, compressible, radiation from sources, 6326.

net charge, 4841.

non-equilibrium, magnetic field, diffusion coefficients and microscopic fluctuations, 6866.

oscillations, collective correlations, 5568.

physics and astrophysical research at the NBS. Highlights for 1961, TN116 (PB161617).

physics and astrophysics, measurements and standards, TN59 (PB161560).

plane-stratified, *E*-mode propagation, J 69D4-488, 521 (1965).

radiation of electromagnetic and electroacoustic waves, 8908; 8909.

radiation patterns from, enclosed cylindrical hyper-sonic vehicles, J 69D10-567, 1335 (1965).

radiowaves, 5172.

resonance in the light scattered, 8996.

resonance, nature, 8917.

resonances, upper ionosphere, 5569.

sheath effects on antennas, an experimental study, J 69D6-516, 839 (1965).

sheath, strongly ionized, radiation and admittance of an insulated slotted-sphere antenna, J 64D5-91, 525 (1960).

sheaths, cylindrical, radiation through, J 67D6-301, 717 (1963).

sheaths, electromagnetic wave penetration of re-entry, J 69D2-449, 147 (1965).

sheet, thin, electromagnetic fields of a dipole, 3828; 4351.

sheet, thin, propagation of electromagnetic waves, 3728.

slab, warm, a study of the waves supported, J 69D5-508, 729 (1965).

stratified, continuously proportional to energy and arbitrary magnetic induction, radio wave reflections, 5623.

theory of fluctuations, 6883.

theory of incoherent scattering of radiowaves, 5172.

unsteady correlations, kinetic equation, 3239.

warm, two component, wave propagation, J 69D4-493, 579 (1965).

Plasma, compressible, impedance of a short dipole, J 69D4-491, 559 (1965).

isotropic, resonances of a spherical void, 6347.

scattering of electromagnetic and electroacoustic waves by a cylindrical object, J 69D2-461, 247 (1965).

theory of a slotted-sphere antenna immersed, J 68D10-412, 1127 (1964); J 68D10-413, 1137 (1964).

waves circulating around a rigid cylindrical obstacle, J 69D4-492, 567 (1965).

Plasma waves, acoustic, field aligned *E*-region irregularities identified, 5356.

index of refraction surfaces, J 69D4-490, 539 (1964).

propagation in "spoke-wheel" magnetic field, J 69D9-556, 1227 (1965).

propagation of, in a "spoke-wheel" magnetic field, J 68D3-349, 325 (1964).

Plasmas and electromagnetic fields, interaction, J 64D6-96, 766 (1960).

compressive and incompressive, discussion on basic equations with source terms, J 69D2-460, 243 (1965).

cylindrical, electron density profiles in, from microwave refraction data, J 69D5-507, 721 (1965).

dense, application of line broadening theory, 4751.

derivation of a convergent kinetic equation from the generalized master equation, theory of irreversible processes, 6495.

disturbances produced in, long waves associated with, J 68D1-316, 47 (1964).

excitation of acoustic waves, J 69D4-495, 609 (1965).

semi-conductors, complex conductivity, 3479.

shock-heated, relative oscillator strengths of some *O* II and *O* III lines from measurements, 6344.

studies, alouette ionic magnetic-field, 5908.

warm, cyclotron harmonic, J 69D6-512, 789 (1965).

Plasters, gyclost, exposed to fire, J 66C4-113, 373 (1962).

Plastic drain, waste, and vent pipe and fittings, CS270-65; CS272-65.

flow and fracture of crystalline solids, Mono.59, p. 1.

impression trays, stability, 4306.

pipe (SDR-PR and class T), acrylonitrile-butadiene-styrene (ABS), CS254-63.

pipe and fittings, standards, 4309.

pipe (SDR-PR), polyethylene (PE), CS255-63.

pipe (SDR-PR and class T), polyvinyl chloride (PVC), CS256-63.

iron, aluminum, and titanium, method for the separation of from one another and for their subsequent determination, J 64A6-79, 535 (1960).  
separation from hafnium and their determination: separation by anion-exchange, J 66A6-187, 517 (1962).  
separation of hafnium from, by anion exchange, J 65A1-87, 75 (1961).  
sulfate and oxide, method for freezing zirconium of common impurities, 482A.
- Zirconium hydrides, 5084.  
beta, statistical model, 6400.  
correlation of thermodynamic properties, J 67A5-230, 403 (1963).  
thermophysical properties, 4596.  
unsaturated, high-temperature thermodynamic functions, J 67A5-230, 403 (1963).
- Zirconium in zirconia yttria mixtures by precipitation with cupferron, separation and determination, 6362.
- Zodiacal light, absolute photometry, 9058.
- Zonal harmonic perturbations of an accurate reference orbit of an artificial satellite, J 67B4-103, 191 (1963).
- Zonal harmonics, with improved summation techniques, theory, J 66D6-234, 737 (1962).  
low frequency terrestrial radio wave propagation, TN335.
- Zone, auroral, distribution at times of magnetic micropulsation storms, 4915.  
auroral, electron, 4480.  
electron, auroral, precipitation observed by balloons, a study of geomagnetic effects, 5888.  
fresnel, diffraction effects, at 50 Gc/sec., determined from measured aperture field data, 5367.  
melting, analog simulation, J 65C2-60, 97 (1961); 5915.  
refiner with temperature control, 9049.  
southern auroral, occurrence of short-duration cosmic noise absorption events, 5778.
- Zones, auroral, electron precipitation and ionospheric radio absorption, 6733A.

ANNOUNCEMENT OF NEW CATALOG OF PUBLICATIONS

Publications Section,  
A617, Administration Building,  
National Bureau of Standards,  
Washington, D. C. 20234.

Dear Sir:

Please add my name to the list to receive  
announcements of the new NBS catalogs of publications  
as they are issued.
