Measurements performed on the NIST Gaseous Electronics Conference (GEC) Reference Cell are described. The purpose of the discharge cell is to provide an affordable experimental platform for researchers that is physically identical from laboratory to laboratory, so that reference data can be generated and various experimental techniques and models can be cross correlated. Four laboratories agreed to conduct identical initial measurements on four cells manufactured at the same time. This would ensure the greatest possible uniformity and allow direct comparison of results. The experimental conditions for the present measurements are those specified for intercomparison and include 1 inch interelectrode spacing, grounded lower electrode, capacitively coupled RF power, cooled electrodes (20 C), electrode ground shields and 99.999% argon. The specific measurements to be made were: (1) the waveforms of the fundamental through the fifth harmonic of the RF voltage and current, including their magnitude and phase; (2) the gas flow rate and pressure; and (3) the DC self-bias voltage.

How High is the Level of Electromagnetic Fields Radiated by an ESD (Electrostatic Discharge).

Final rept.

M. T. Ma. 1989, 5p

Pub. in Proceedings of International Zurich Symposium and Technical Exhibition on Electromagnetic Compatibility (8th), Zurich, Switzerland, March 7-9, 1989, 5p.

Keywords: *Electrostatic charge, *Electromagnetic fields, Electric charge, Electric fields, Electromagnetic radiation, Field strength, Computers.

Quantitative estimation of the electromagnetic fields radiated by electrostatic discharges (ESD) is of importance to the users and computer industry. Analytical and experimental results, based on a new theoretical model and specific measurement system, are presented to achieve the objective. The ESD spark is modeled as an electrically short, time dependent, linear dipole situated above an infinite ground plane. The specific measurement system consists of a newly designed broadband, time-domain TEM horn antenna, a wide-band digitizing oscilloscope, and a desktop computer.

Standard Field Generation for Microwaves and Millimeter Waves.

Final rept.

J. Randa, and M. Kanda. 1989, 4p

Pub. in Navy Metrology Research and Development Program Conference Report, Corona, CA., April 3-6, 1989, p97-100.

Keywords: *Metrology, *Electromagnetic fields, *Microwave frequencies, *Millimeter waves, Calibrating, Accuracy, Anechoic chambers, Electrostatic probes, Reprints, National Institute of Standards and Technology(NIST).

The requirements for electromagnetic field measurements at microwave and millimeter wave frequencies in both the laboratory and the field are discussed. Current National Institute of Standards and Technology (NIST) capabilities and intended extensions are presented. The NIST anechoic chamber facility can generate calibrated fields up to 18 GHz and will soon be extended to 40 GHz. Future extensions will be 2 GHz bands centered at 60 GHz and 95 GHz. Transfer standard probes developed by NIST are available up to 18 GHz, and work is in progress to develop probes which would operate to 110 GHz. It is not clear whether these probes (if successfully developed) would be suitable for field use, as hazard meters, for example. For measurement in the field, electric-field probes which are claimed to operate to 40 GHz are available commercially. Small, transportable facilities for calibration of probes in the field are not readily available. The paper discusses the present situation in these areas,

presents current NIST work to extend the relevant capabilities, and notes present and probable future deficiencies.

Keywords: *Aluminium, *Aluminium Alloys, *Aluminium Arsenides, *Aluminium Oxides, *Lithium Alloys, *Magnesium Alloys, *Manganese Alloys, *Nickel Alloys, *Chemical Bonds, Comparative Evaluations, Electronic Structure, Emission Spectra, Intermetallic Compounds, Photon Emission, Soft X Radiation, Spectral Density, Symmetry, X-Ray Spectra, ERDA/360104, ERDA/400201, *Aluminum gallium arsenides.

The L/sub 2,3/ soft x-ray emission (SXE) spectra of Al in metallic Al, Al-Mn alloys, dilute Al-Mg alloys, the intermetallic compounds LiAl and Ni sub 3 Al, the semi-conducting alloy (Al-Ga)As and insulating Al sub 2 O sub 3 are presented. The spectra provide a measure of the s-like partial density of states (PDOS) localized at the Al atoms and show prominent qualitative features that may be identified with each of the major types of bonding in solids, i.e., metallic, covalent and ionic. The spectra of metallic Al and of the Al-Mn alloys have parabolic densities of states characteristic of nearly free electron PDOS's. Al in Mg alloys have metallic PDOS's with a strong enhancement of the low energy region of the spectrum which is associated with screening of the extra charge on the Al ion core. In LiAl, the Al has tetragonal local symmetry, the spectrum is similar to that of silicon, and the bonding is a combination of covalent and metallic. In Al/sub x/Ga/sub 1-x/As alloys, the Al has tetragonal local symmetry, but the spectrum is strongly modified from the characteristic covalent form by the presence of a strong ionic component in the bonding. Finally, the spectrum of Al sub 2 O sub 3 shows features characteristic of localized electronic orbitals and ionic bonding. 15 refs., 6 figs. (ERA citation 13:003687)

Keywords: Barium Oxides, Copper Oxides, Yttrium Oxides, Electronic Structure, Emission Spectra, Energy-Level Density, Energy-Level Transitions, Quantum Efficiency, Soft X Radiation, Superconductivity, Valence, ERDA/360204, ERDA/656100, *Barium copper yttrium oxides, *Superconductors.

We present e-beam excited soft x-ray emission spectra and total photoelectron yield spectra in the 20 to 600 eV photon energy range for the Ba sub 2 YCu sub 3 O/sub 7-x/ superconductor. We confirm the 2+ valency of Cu in the compound by total yield measurements. In soft x-ray emission, the N/sub 2,5/ spectrum of Ba, the M/sub 4,5/ spectrum of Y, and the K spectrum of O provide measures of the p-type partial density of states (p-PDOS) localized on the respective atomic sites. In each case the p-PDOS is very small at the Fermi energy with the first peak in the p-PDOS lying 3.5 to 4 eV below the Fermi energy. The K spectra of O confirm the interpretation that the structure observed in the photoemission measurements are as-

sociated with the O 2p orbitals. Finally no changes are observed between spectra taken above and below T_c / sub c/. 20 refs., 4 figs. (ERA citation 13:009099)

Pinning, Flow and Plastic Deformation of Flux Vortices in High T(Sub c) Superconductors. (Abstract Only).

A. Roytburd. Apr 90, 1p
In NASA, Goddard Space Flight Center, Amsahts 1990: Advances in Materials Science and Applications of High Temperature Superconductors p 4.

Keywords: Crystal structure, *High temperature superconductors, Pinning, Plastic deformation, Plastic flow, *Superconductors, Defects, Grain boundaries, Magnetic flux.

In high temperature superconductor (HTSC) materials the vortices are highly mobile and flexible. This is reflected in different models of melt of a vortex lattice. Another aspect of the problem is stressed: an easy nucleation and high mobility of dislocations in the vortex lattice. Some models of plastic deformation of vortex lattice are considered as a result of its interaction with a real crystal structure. Depinning is interpreted as yield of plastic flow is vortex medium. Effect of macroscopic defects in crystal structures (pores, inclusions, grain and domain boundaries) is being considered in detail. Available experimental facts on magnetization and a critical current in HTSC and conventional superconductors are discussed from the points of view of depinning to vortices vs. plastic flow of vortices vs. plastic flow of vortices medium.

Flux Flow and Flux Dynamics in High-T(Sub c) Superconductors.(Abstract Only).

L. H. Bennett, M. Turchinskaya, A. Roytburd, and L. S. Swartzendruber. Apr 90, 1p
In NASA, Goddard Space Flight Center, Amsahts 1990: Advances in Materials Science and Applications of High Temperature Superconductors p 5.

Keywords: *High temperature superconductors, Hysteresis, *Magnetic flux, Magnetization, Defects, Electric current, Impurities, Time dependence, *Superconductors.

Because high temperature superconductors, including YBCO and BSCCO, are type 2 superconductors with relatively low $H(\text{sub } c \text{ 1})$ values and high $H(\text{sub } c \text{ 2})$ values, they will be in a critical state for many of their applications. In the critical state, with the applied field between $H(\text{sub } c \text{ 1})$ and $H(\text{sub } c \text{ 2})$, flux lines have penetrated the material and can form a flux lattice and can be pinned by structural defects, chemical inhomogeneities, and impurities. A detailed knowledge of how flux penetrates the material and its behavior under the influence of applied fields and current flow, and the effect of material processing on these properties, is required in order to apply, and to improve the properties of, these superconductors. When the applied field is changed rapidly, the time dependence of flux change can be divided into three regions, an initial region which occurs very rapidly, a second region in which the magnetization has a $1/n(t)$ behavior, and a saturation region at very long times. A critical field is defined for depinning, $H(\text{sub } c, p)$ as that field at which the hysteresis loop changes from irreversible to reversible. As a function of temperature it is found that $H(\text{sub } c, p)$ is well described by a power law with an exponent between 1.5 and 2.5. The behavior of $H(\text{sub } c, p)$ for various materials and its relationship to flux flow and flux dynamics are discussed.

Processing Bi-Pb-Sr-Ca-Cu-O Superconductors From Amorphous State.(Abstract Only).

C. K. Chiang, S. W. Freiman, W. Wong-Ng, N. M. Hwang, and A. J. Shapiro. Apr 90, 1p
In NASA, Goddard Space Flight Center, Amsahts 1990: Advances in Materials Science and Applications of High Temperature Superconductors p 110.

Keywords: *Superconductors, Amorphous materials, Ceramics, Glass, Superconductivity, Alternating current, Aluminum, Bismuth, Calcium, Copper oxides, Heat, *High temperature superconductors, *Bismuth strontium, Calcium cuprates.

Researchers produced superconducting ceramics of the Bi-Pb-Sr-Ca-Cu-O system started from a glass. To form the glass, the mixed oxide powder was melted at 1200 C in air. The liquid was quenched rapidly by pouring it onto an aluminum plate and rapidly pressing with another plate. The quenched compound was in the form of black amorphous solid, whose x-ray powder pattern has no crystalline peaks. After heat treatment at high temperatures, the glass crystallized into a superconductor. The crystalline phases in the superconductor identified using x-ray diffraction patterns. These phases were that associated with the superconducting phases of $T(\text{sub } c) = 80$ K ($\text{Bi}_2\text{Ca}_1\text{Sr}_2\text{Cu}_2\text{O}_x$) and of $T(\text{sub } c) = 110$ K ($\text{Bi}_2\text{Ca}_2\text{Sr}_2\text{Cu}_3\text{O}_x$). The dc resistivity and the ac susceptibility of these superconductors were studied.

Measurement of H(Sub c1) in a Single Crystal of YBa2Cu3O7 with Low Pinning.(Abstract Only).

D. L. Kaiser, F. W. Gayle, L. J. Swartzendruber, and L. H. Bennett. Apr 90, 1p
In NASA, Goddard Space Flight Center, Amsahts 1990: Advances in Materials Science and Applications of High Temperature Superconductors p 116.

Keywords: Abrikosov theory, Crystal structure, Demagnetization, Magnetization, Pinning, Single crystals, *High temperature superconductors, *Yttrium barium cuprates, *Superconductors, Flux pinning.

The measurement of $H(\text{sub } c \text{ 1})$ in barium yttrium copper oxide (YBCO) is often ambiguous because the presence of large pinning forces makes it difficult to discern exactly where the first deviation from linearity occurs. In addition there are complications because demagnetizing factors are often not well known. By utilizing a single crystal of YBCO with a nearly cubic shape, the uncertainty in the demagnetizing factor was minimized. In addition, the crystal used exhibited a very small amount of pinning with H applied perpendicular to the c axis, and a sharp break in the initial magnetization vs. field curve could be observed over a wider range of temperature. This allowed a precise determination of $H(\text{sub } c \text{ 1})$. The measured values of $H(\text{sub } c \text{ 1})$ could be well described by the Abrikosov relation with a Ginzburg-Landau parameter which varied linearly with temperature.

Studies of Iron Impurities in Y(x)Pr(1-x)Ba2Cu3O(7-delta).(Abstract Only).

L. J. Swartzendruber, L. H. Bennett, J. Ritter, M. Rubinstein, and M. Z. Harford. Apr 90, 1p
In NASA, Goddard Space Flight Center, Amsahts 1990: Advances in Materials Science and Applications of High Temperature Superconductors p 117.

Keywords: Antiferromagnetism, Crystal structure, Impurities, Iron, *Superconductivity, Neel temperatures, Hypotheses, Oxides, Oxygens, *High temperature superconductors, Yttrium barium cuprates.

Pr is the only rare earth which, when substituted for Y in $\text{YBa}_2\text{Cu}_3\text{O}_7$, significantly alters the superconducting transition temperature $T(\text{sub } c)$ without changing the crystal structure. For $\text{Y}_x\text{Pr}_{1-x}\text{Ba}_2\text{Cu}_3\text{O}_{7-\delta}$ with delta approx. equal to 0, $T(\text{sub } c)$ is reduced rapidly as x is increased, reaching zero for x about 0.5. For x above 0.5 the compound is antiferromagnetic with a Neel temperature that increases with increasing x, rising to above room temperature for x near 1. A similar behavior is observed when the oxygen deficit delta is increased from zero to 1 with $x=0$. For the case of Pr substitution, the drop in $T(\text{sub } c)$ is believed due to magnetic interactions. For the case of varying delta with $x=0$, the drop can be attributed to a combination of magnetic interactions, band filling, and changes in crystal structure. To study these effects, the Mossbauer effect of 57 Fe atoms substituted for the Cu atoms has been observed as a function of delta, x, and temperature. The observed spectra are well described

by a two quadrupole-split pairs, a central singlet, and a six-line magnetic hyperfine field pattern. For several Pr compositions both delta and temperature were varied, and the results support the hypothesis that a magnetic interaction exists between the Fe in the Cu lattice and the substitutional Pr atoms.

Influence of Equilibrium Shape on Heterogeneous Nucleation Textures.

Final rept.
J. W. Cahn, and J. Taylor. 1988, 5p
Pub. in Phase Transformations 1987, p545-549 1988.

Keywords: *Crystal growth, *Nucleation, Surfactants, Substrates, Texture, Anisotropy, Reprints, *Crystal orientation.

The authors explore a factor that affects the orientation of crystals nucleated onto a substrate, and discover that it leads to predictions of abrupt orientation changes (bifurcations) under certain conditions that are amenable to experimental control. They also find conditions of continuous orientation changes as well as a locking into orientation of high symmetry. A two-dimensional example is worked out in detail.

Sponsored by Department of Energy, Washington, DC.
Pub. in Jnl. of Applied Physics 66, n6 p2489-2500, 15 Sep 89.

Keywords: *Superconductors, Magnetic hysteresis, Magnetization, Reprints, Critical current, Kim model, Bean model, One-dimensional calculations.

The authors have calculated the initial magnetization curves and complete hysteresis loops for hard type-II superconductors. The critical-current density J_c is assumed to be a function of the internal magnetic field $H(i)$ according to Kim's model, as is the case for other critical-state models, additional assumptions are that bulk supercurrent densities are equal to J_c and that the lower critical field is zero. The authors' analytic solution is for an infinite orthorhombic specimen with finite rectangular cross section, $2a \times 2b$ (a less than b), in which a uniform field H is applied parallel to the infinite axis. Assuming equal flux penetration from the sides, the authors reduced the two-dimensional problem to a one-dimensional calculation.

Orientation Distribution of Fiber-Axes and Neutron Powder Diffraction Profiles.

Final rept.
C. S. Choi, and H. J. Prask. 1988, 7p
Pub. in Proceedings of ICOTOM: International Conference on Textures of Materials (8th), Santa Fe, NM., September 20-25, 1987, p215-221 1988.

Keywords: *Crystallites, *Orientation, *Neutron diffraction, *Fiber metallurgy, Extruding, Tungsten, Texture, Metals, Uranium alloys, Metal swaging, Rods, Distribution functions, Depleted uranium, Rietveld method.

Crystallite orientation distributions of extruded tungsten rod and cold-worked depleted uranium alloys were studied by neutron diffraction. The orientation distribution profile of the fiber-axis of an extended W-rod was obtained directly from the rocking-curve measurement of the fiber-axis reflection, (110). The distribution of the fiber-axes could be described quite satisfactorily by either of two distribution functions and the crystallite orientation distribution functions of the depleted uranium alloys were determined by an iterative profile-fitting of model structures to the four pole figures, (200) (111) (112) and (131). The textures were found to be (252)/(041) duplex fiber texture for the 60% swaged samples and (252)/(051) for the 75% swaged samples. The Rietveld profile refinement program was modified to correct for the fiber-texture type orientation distributions, and used for the final adjustment of the texture parameters and the structural parameters.

Effect of Electron-Hole Plasmas on the Density of States of Silicon and GaAs.
Final rept.
J. R. Lowney. 1989, 5p
Pub. in Jnl. of Applied Physics 66, n9 p4279-4283, 1 Nov 89.

Keywords: *Gallium arsenides, *Silicon, *Energy gap, Conduction bands, Valence bands, Photoluminescence, Reprints, Narrow gap semiconductors, Density of states.

The densities of states of the conduction and valence bands of silicon and GaAs have been calculated at 300 K for the case of an electron-hole plasma, which can occur at high-injection levels in bipolar devices or in bulk material under intense optical excitation. The results show considerable narrowing of the band gap, which needs to be included in the analysis of device measurements or the interpretation of photoluminescence data. Furthermore, the band-gap narrowing that results from dopant ions is reduced by excess carriers because of the reduced free-carrier screening radius.

Break Junction Measurement of the Tunneling Gap of a Thallium-Based High-Temperature Superconductor Crystal.
Final rept.
J. Moreland, D. S. Ginley, E. L. Venturini, and B. Morosin. 1989, 3p
Pub. in Applied Physics Letters 55, n14 p1463-1465, 2 Oct 89.

Keywords: *Superconductors, *Electron tunneling, *Energy gap, Single crystals, Reprints, *High temperature superconductors, *Thallium calcium barium cuprates, Barium calcium thallium cuprates.

The authors have used the break junction method to measure the tunneling gap of a thallium-based high-temperature superconductor crystal in liquid helium at 4 K. The crystal was predominantly $Tl_2CaBa_2Cu_2O_7$ and had a superconducting onset temperature of 105 K. Tunneling data showed a symmetric gap about zero bias between two well-defined conductance peaks in the conductance versus voltage curve. The gap is consistent with a Bardeen-Cooper-Schrieffer energy gap (Δ) of 30 meV assuming a superconductor-insulator-superconductor electrode configuration. In addition, a supercurrent could be detected when the break junction was operated in a point-contact mode at temperatures as high as 95 K.

Metallicity and Gap States in Tunneling to Fe Clusters on GaAs(110).
Final rept.
P. N. First, J. A. Stroschio, R. A. Dragoset, D. T. Pierce, and R. Celotta. 1989, 4p
Sponsored by Office of Naval Research, Arlington, VA. Pub. in Physical Review Letters 63, n13 p1416-1419, 25 Sep 89.

Keywords: *Gallium arsenides, *Iron, Energy gap, Interfaces, Substrates, Clumps, Reprints, *Metallicity, *Tunnel effect, Band theory, Clusters.

The authors report the characteristics of tunneling to a GaAs(110) substrate with distinct, nanometer-size Fe clusters, as a function of distance from, and size of, the clusters. It is shown that Fe clusters of volumes about 150 \AA^3 cubed, corresponding to about 13 atoms, are observed to be nonmetallic with a gap at the Fermi level. Larger clusters with > 35 atoms begin to show metallic characteristics. A continuum of cluster-induced gap states is observed in tunneling to the GaAs substrate surrounding the metallic Fe clusters. The decay length of these states has a minimum decay of 3.4 \AA at midgap and diverges at the valence- and conduction-band edges.

Oxygen Vacancies and Defect Electronic States on the SnO(sub 2)(110)-1x1 Surface.
Final rept.
D. F. Cox, T. B. Fryberger, and S. Semancik. 1988, 12p
Pub. in Physical Review B-Condensed Matter 38, n3 p2072-2083 1988.

Keywords: *Tin oxides, Vacancies(Crystal defects), Ultraviolet radiation, Electrical properties, Surfaces, Oxygen, Reprints, Electronic structure, Ion scattering, Photoemission, Photoelectron spectroscopy.

Ultraviolet photoemission (UPS) and ion scattering (ISS) have been used to study surface oxygen vacancies produced by heating a well-oxidized, nearly perfect (110) tin oxide surface. Observed defects states have been associated with the loss of bridging oxygen atoms below 800K, and the loss of in-plane oxygen above 800K. Although both defects lead to band gap emission, the electronic states connected to the in-plane vacancies extend to the Fermi level, and cause changes in the surface electrical properties of SnO₂.

Finite Element Model of Stress Wave Topology in Unidirectional Graphite/Epoxy: Wave Velocities and Flux Deviations.
Final rept.
R. D. Kriz, and P. R. Heyliger. 1989, 8p
Pub. in Review of Progress in Quantitative Nondestructive Evaluation, v8A p141-148 1989.

Keywords: *Stress waves, *Topology, *Oriented fiber composites, *Velocity, Mathematical models, Wave

propagation, Plane waves, Nondestructive tests, Arrays, Laminates, Reprints, *Finite element method, *Graphite-epoxy composites.

The topological propagation of stress waves in off-axis unidirectional fiber-reinforced composites was modeled with finite elements. Solutions for the large required finite element grids are obtained in a reasonable computation time by using the large memory and vectorizable features of the Cyber 205. Waves are observed to propagate off of the fiber axis in a unidirectional graphite/epoxy plate. Wave speeds and Pointing vectors are predicted and compared with exact solutions to Christoffel's equations. The comparison is excellent for the cases of plane stress and plane strain. Most significant is observing the actual wave topologies for quasitransverse and quasilongitudinal waves. Hence, the geometric distribution of waves can be observed in composites. Potential applications are numerous: the study of wave interaction with damage in laminated composites and the design of NDE arrays which match with the predicted wave topologies are some topics that are now being studied.

Pub. in SPIE (Society of Photo-Optical Instrumentation Engineers)-Test and Evaluation of Infrared Detectors and Arrays 1108, p51-55 1989.

Keywords: *Arsenic, *Silicon, *Absorption cross sections, Epitaxy, Cryogenics, Reprints, Ionization cross sections, Photoionization, Infrared absorption.

Infrared absorption cross sections of As in Si near zero Kelvin have recently been measured in two different investigations. The average of the integrals of the cross section over photon wavenumber was 8.64×10 to the -13 th power/cm. This is nearly equal to the value predicted by the oscillator-strength sum rule. Between 500 and 1000/cm, the absorption cross sections reported here agree very well with 0.7 times the

currently accepted formula for the photoionization cross section of As in Si. Calibration errors in spreading resistance measurements on epitaxial layers seem to be the cause of the 0.7 multiplicative error in the photoionization formula. Above 1000/cm, 0.7 times the value from the formula predicts a larger photoionization cross section than the absorption cross sections reported here. This is apparently caused by the impact ionization of donor electrons from impurity atoms by energetic photoionized electrons.

Photons, Rotons and Fractionally-Charged Vortices in the Quantum Hall Effect.

Final rept.

S. M. Girvin. 1988, 13p

Pub. in *Interfaces, Quantum Wells, and Superlattices*, p319-331 1988.

Keywords: *Hall effect, Electron gas, Superfluidity, Helium 4, Vortices, Reprints, *Fractional quantum Hall effect, *Quantum Hall effect, Bose condensation, Two dimensional, Rotons.

The fractional quantum Hall effect (FQHE) is a remarkable many-body phenomenon occurring in the two-dimensional electron gas (2DEG) at low temperatures in a high magnetic field. The experimental manifestations of the effect follow from the existence of an excitation gap and are quite similar to those of the integer case, but the gap arises for rather different reasons: The FQHE is intrinsically a many-body phenomenon associated with Coulomb correlations, while the integer effect is primarily a one-body effect associated with localization. The paper explores further the FQHE with emphasis on the nature of the collective excitation modes and the origin of the gap. It turns out that a remarkable amount of progress can be made by drawing on analogies with superfluidity in (⁴He) films.

Thermal Contraction of Fiberglass-Epoxy Sample Mandrels and Its Effect on Critical-Current Measurements.

Final rept.

L. F. Goodrich, S. L. Bray, and T. C. Stauffer. 1989, 3p

Sponsored by Department of Energy, Washington, DC. Pub. in *Proceedings of Japan-U.S. Workshop on High-Field Superconducting Materials and Standard Procedures for High-Field Superconducting Materials Testing* (6th), Boulder, CO., February 22-24, 1989, p91-93.

Keywords: *Superconductors, Standards, Strains, *Critical current, *Niobium stannides, *Mounting, Interlaboratory comparisons, Fiberglass reinforced composites, Temperature effects, VAMAS.

A systematic study of the effect of sample mounting techniques on the superconducting critical-current measurement was made in conjunction with the VAMAS (Versailles Agreement on Advanced Materials and Standards) interlaboratory comparison (round robin) measurements. A seemingly small change in mandrel geometry can result in a 40% change in the measured critical current of a Nb₃Sn sample at 12 T. This is a result of a change in the conductor pre-strain at 4 K caused by variation in thermal contraction between thick- and thin-walled fiberglass-epoxy composite (G-10) tubes. An approximate measure of the variations in thermal contraction (from room to liquid nitrogen temperature) indicates a 0.2% greater contraction for the thick-walled tube. This difference, combined with strain sensitivity measurements, is consistent with the observed decrease in critical current.

Suppression of Superconductivity by Antiferromagnetism in Tm(sub 2)Fe(sub 3)Si(sub 5).

Final rept.

J. A. Gotaas, H. F. Braun, P. Klavins, J. W. Lynn, and R. N. Shelton. 1987, 4p

Pub. in *Physical Review B-Condensed Matter* 36, n13

p7277-7280 1987.

Keywords: *Superconductors, *Antiferromagnetism, Thulium compounds, Iron inorganic compounds, Sili-

cides, Neutron diffraction, Phase diagrams, Reprints, High pressure.

Powder neutron diffraction experiments at pressures up to 8.2 kbar and temperatures down to 0.3 K have been performed on the antiferromagnetic ternary compound Tm₂Fe₃Si₅. For pressures between 2 and 21 kbar, this system becomes superconducting at (T_{sub c1})(T_{sub N}), with a subsequent reentrance to the normal conducting state at (T_{sub c2})(T_{sub N}). Measurements demonstrate that the antiferromagnetic structure is unchanged under pressure, with no evidence for a ferromagnetic component at any pressure that would compete with the superconducting phase. This is the first experimental observation of the quenching of superconductivity by a purely antiferromagnetic state.

Off-Diagonal Long-Range Order in the Quantum Hall Effect.

Final rept.

S. M. Girvin. 1988, 14p

Pub. in *Interfaces, Quantum Wells, and Superlattices*, p333-346 1988.

Keywords: *Hall effect, Electron gas, Superfluidity, Phonons, Reprints, *Fractional Quantum Hall effect, *Quantum Hall effect, Order parameters, Symmetry breaking, Bose condensation, Collective excitations, Rotons.

It was shown in the author's previous lecture on collective excitations that it was quite useful to study analogies between the fractional quantum Hall effect (FQHE) and superfluidity and superconductivity in films. Superfluids and superconductors are characterized by a spontaneously broken gauge symmetry and an associated order parameter. The lecture investigated the question of whether or not there exists an order parameter which describes the FQHE state, possibly associated with some type of symmetry breaking.

Micro-Raman Spectroscopy of High-T(sub c) Superconductors in the Y-Ba-Cu-O System.

Final rept.

E. S. Etz, W. Wong-Ng, J. E. Blendell, and C. K.

Chiang. 1988, 6p

Pub. in *Microbeam Analysis*, p187-192 1988.

Keywords: *Raman spectroscopy, *Superconductors, Vibrational spectra, Microanalysis, Microstructure, Single crystals, Polycrystalline, Reprints, *High temperature superconductors, *Yttrium barium cuprates, *Barium yttrium cuprates, Microprobes.

Described is the application of micro-Raman spectroscopy to the microstructural characterization of superconducting materials in the Y-Ba-Cu-O system. Experimental detail is given of the measurement parameters employed in the Raman microprobe study of these materials. Three types of samples are investigated relative to microstructural homogeneity, composition, and crystal structure. These samples are polycrystalline ceramic powders, sintered ceramic pellets, and a specimen of single-crystal material. Of interest is the characterization of these samples relative to their fabrication and processing history and the resultant phase relationships. The micro-Raman spectra are examined on the basis of the reported vibrational data (Raman and infrared) for materials in this system of both tetragonal and orthorhombic symmetry. Conclusions are drawn relative to the heterogeneity of these polyphase materials.

Bonding Structure of Silicon Oxide Films.

Final rept.

A. Feldman, Y. N. Sun, and E. N. Farabaugh. 1988,

3p

Pub. in *Jnl. of Applied Physics* 63, n6 p2149-2151, 15

Mar 88.

Keywords: *Silicon oxides, Silicon dioxide, Dielectric films, Oxygen, Reprints, *X ray photoelectron spectroscopy, Random mixture model, Random bond model, Clusters.

X-ray photoelectron spectroscopy measurements of the O 1s and Si 2p lines in films of the SiO_x system have been interpreted on the basis of the random network model. Fitting of the spectra to five lines corresponding to five silicon centered tetrahedral configurations yield the relative proportion of each tetrahedron in the film. The distributions agree neither with the random mixture model nor with the random bond model (RBM). The total oxygen in the films exceeds the amount of oxygen in the tetrahedral structures indicating the presence of molecular oxygen, water, peroxy bonding or other forms of oxygen not bonded to silicon. The general features of the distributions can be explained on the basis of silicon clusters, unincorporated oxygen, and the RBM.

Long Wavelength Spin-Wave Energies and Linewidths of the Amorphous Invar Alloy Fe(sub 100-x)B(sub x).

Final rept.

J. A. Fernandez-Baca, J. W. Lynn, J. J. Rhyne, and

G. E. Fish. 1987, 15p

Pub. in *Physical Review B* 36, n16 p8497-8511, 1 Dec

87.

Keywords: *Iron alloys, Boron containing alloys, Neutron scattering, Line width, Magnons, Invar, Reprints, *Spin waves, Heisenberg ferromagnets, Amorphous materials.

Neutron inelastic scattering experiments have been performed to investigate the long wavelength spin dynamics of the amorphous rapidly-quenched isotropic ferromagnet Fe(100-x)B(x) (for x = 14, 18). At both iron concentrations this system exhibits Invar behavior, where the thermal expansion is almost completely cancelled by a large positive magnetostriction. The spin-wave energies are found to be well described by a quadratic dispersion relation. The stiffness parameter D renormalizes with temperature as predicted by the two-magnon interaction theory of the Heisenberg ferromagnet, although the renormalization is more dramatic than expected for short-range interactions.

Transverse Stress Effect on the Critical Current of Internal Tin and Bronze Process Nb(sub 3)Sn Superconductors.

Final rept.

J. W. Ekin, S. L. Bray, P. Danielson, D. Smathers, R. L. Sabatini, and M. Suenaga. 1989, 3p

Pub. in *Proceedings of Japan-U.S. Workshop on High-Field Superconducting Materials and Standard Procedures for High-Field Superconducting Materials Testing* (6th), Boulder, CO., February 22-24, 1989, p50-52.

Keywords: *Superconductors, Reprints, *Niobium stannides, *Critical current, Transverse stress.

The effect of transverse stress on the critical current density $J(c)$ has been shown to be significant in bronze process Nb₃Sn, with the onset of significant degradation occurring at about 50 MPa. In an applied field of 10 T, the magnitude of the effect is about seven times larger for transverse stress than for axial tensile stress. The authors have also measured the effect in an internal tin conductor with excess tin, which yields a more equiaxed Nb₃Sn grain morphology than for bronze process Nb₃Sn, where the grains tend to be more columnar. The effect of transverse stress on $J(c)$ was nearly identical for the two conductors, indicating that the transverse stress effect is probably not dependent on grain morphology.

Dependence of the Critical Current on Angle between Magnetic Field and Current in Y-, Bi-, and Tl-Based High-T(sub c) Superconductors.
Final rept.

J. W. Ekin, and T. M. Larson. 1989, 3p
Contract DE-AI01-84ER52113
Sponsored by Department of Energy, Washington, DC. Pub. in Proceedings of Japan-U.S. Workshop on High-Field Superconducting Materials and Standard Procedures for High-Field Superconducting Materials Testing (6th), Boulder, CO., February 22-24, 1989, p61-63.

Keywords: *Superconductors, Magnetic fields, Polycrystalline, Bismuth oxides, Reprints, *High temperature superconductors, *Critical current, Yttrium barium cuprates, Thallium oxides.

The change in $J(c)$ with angle between applied field and current depends on the magnetic field regime. There is essentially no change at low fields, where $J(c)$ is not determined by pinning but rather by self field effects. At intermediate fields in the plateau regime, the effect typically amounts to a 50 to 300% enhancement in $J(c)$ for the force-free case, comparable in magnitude to conventional superconductors, indicating a nearly isotropic well-connected network of percolation paths. At high fields, the field angle effect becomes negligible, indicating that the percolation paths in the high-field regime become more disconnected and highly convoluted with some section of each percolation path perpendicular to the applied field independent of the angle.

Keywords: Dysprosium alloys, Yttrium alloys, Metal films, Magnetostriction, Neutron diffraction, Reprints, *Superlattices, Molecular beam epitaxy, Magnetic ordering, Spin waves.

Superlattices of (Dy₁₅ Y₁₄)₆₄ and (Dy₉(Dy_{0.5}Y_{0.5})₈)₉₀ produced by molecular beam

epitaxy techniques are shown by neutron diffraction to order magnetically in a helix which is incommensurate with the bilayer thickness. The phase coherence of this ordering extends over several bilayers, and is especially striking in the sample where the layers of localized Dy spins are separated by 14 atomic planes of non-magnetic Y. The fact that the helix chirality propagates across several bilayers rules out a simple scalar RKKY coupling between the Dy planes on either side of a Y layer, but suggests instead that a helical spin density wave is induced in the Y conduction electrons. A simple model for the superlattice structure factor demonstrates that observed asymmetries in the magnetic diffraction peak intensities can be ascribed to the existence of different magnetic modulation wave-vectors in each layer type (Dy and Y).

Tunneling through a Spin-Polarizing Barrier: Boltzmann Equation Study.
Final rept.

M. J. DeWeert, and S. M. Girvin. 1988, 6p
Pub. in Physical Review B 37, n7 p3428-3433 1988.

Keywords: *Electron tunneling, Boltzmann equation, Distribution functions, Superconductors, Reprints, *Electron spin polarization, Magnetic insulators.

The authors investigated the nonequilibrium distribution functions for electrons in the electrodes of an M-I-M junction where the insulator is a ferromagnet with its domains aligned parallel to the interfaces. In this geometry, the tunneling barrier for spin-up electrons differs from that for spin-down electrons, so that the two spins tunnel at different rates. If the junction is biased so that the fermi levels on the right and left are shifted to $(\mu - 1/2eV)$ and $(\mu + 1/2eV)$, respectively, it is found that the electrons are spin polarized in the steady state. Electrons in the right electrode are polarized in the direction opposite those on the left. The spin polarization increases with voltage and tunneling conductance and decreases as the spin relaxation time falls. The authors also consider the possibility of the presence of the spin polarization in the quasiparticle branch of the current when the metals are superconducting, and suggest experiments to observe the effect.

Structure of Asymmetric Small-Angle Grain Boundaries.
Final rept.

D. P. DiVincenzo, and C. Rottman. 1988, 10p
Pub. in Physical Review B 37, n10 p5242-5251, 1 Apr 88.

Keywords: *Dislocations(Materials), *Grain boundaries, Reprints, *Crystal dislocations, Ising model, Devils staircase.

The authors studied the energetics and the structure of small-angle tilt grain boundaries (i.e., dislocation walls). By considering the elastic properties of groups of dislocations, it is shown that the structure of the Wulff plot is much richer than previously expected. Previous calculations found that the insertion of a single step costs a logarithmically divergent energy; it is shown that this step energy can be made finite if elastic screening is taken into account. Stepped structures lead to a whole series (i.e., a devil's staircase) of commensurate boundary orientations. Also, a first-order phase boundary is found. The authors speculate on the relation between these features and those of other models (e.g., the Ising model with long-range antiferromagnetic interactions) which exhibit a devil's staircase phase diagram.

Role of Multiple Scattering in XPS and Auger Electron Diffraction in Crystals.
Final rept.

W. F. Egelhoff. 1987, 4p
Pub. in Physical Review Letters 59, n5 p559-562, 3 Aug 87.

Keywords: *Electron diffraction, Auger electrons, X rays, Anisotropy, Nickel, Copper, Epitaxy, Reprints,

*Photoelectron spectroscopy, *Multiple scattering, Multilayers.

The angular anisotropies of x-ray photoelectron (XPS) and Auger peak intensities from Cu in epitaxial Ni-Cu-Ni(100) sandwich structures allow, for the first time, the breakdown of the observed diffraction from a crystal into the contribution from each layer of atoms. This data shows that the primary role of multiple scattering of the outgoing electron wave is to break up the coherence of the strong forward scattered beams which form upon the initial scattering events, i.e., scattering by nearest neighbor and next-nearest neighbor lattice atoms.

Keywords: *Cobalt, *Magnetic domains, Hexagonal close packed lattices, Microstructure, Surfaces, Reprints, Scanning electron microscopy, Electron spin polarization, Imaging techniques.

The magnetic domain structure of the (0001) surface of a hcp cobalt crystal was investigated using scanning electron microscopy with polarization analysis (SEMPA). This is the first observation by SEMPA of both out-of-plane and in-plane magnetization compo-

nents. The perpendicular magnetization imaged with SEMP showed a branched structure very similar to that previously observed by magneto-optic Kerr microscopy. In addition, a previously unobserved in-plane magnetic substructure was measured. The in-plane magnetization is divided into well-defined submicron domains that appear to reflect the sixfold symmetry of the crystal surface.

Surface Forces and Fracture in Brittle Materials.

Final rept.

B. R. Lawn, and S. Lathabai. 1988, 10p

Sponsored by Office of Naval Research, Arlington, VA. Pub. in Materials Forum 11, p313-322 1988.

Keywords: *Surface energy, *Force, *Fracture properties, *Ceramics, *Brittle fracturing, Mica, Crack propagation, Kinetics, Interfaces, Diffusion, Chemical resistance, Hysteresis, Reprints.

The role of surface forces in the fracture of intrinsically brittle materials (ceramics) in chemical environments is examined. It is asserted that fundamental intersurface potential functions of the type directly measurable in the 'crossed cylinder' surface force apparatus of Israelachvili uniquely predetermine the crack mechanics, including healing and regrowth behavior. A critical element in the thesis is the presence of atomic-scale oscillations in the surface force function at small separations, corresponding to a short-range ordering influ-

ence of the confining solid structure on the intervening molecular species. It is contended that the oscillations should be manifest as metastable equilibrium states in fracture systems. Experimental data from cyclic crack growth tests on mica in moist atmospheres are used to support the contention. The data exhibit a certain hysteresis, in that the load to repropagate the cracks through a healed interface is lower than that initially required to propagate the cracks through the virgin material. For nonequilibrium configurations the data show strong kinetic characteristics, as represented in familiar crack velocity diagrams. A consideration of the near-tip crack profile indicates that the kinetics are controlled by activated motion (forward and backward) of the intrusive molecular species between interstitial sites at a severely constricted interface.

2D and 3D Magnetic Behavior of Er in ErBa(sub 2)Cu(sub 3)O(sub 7).

Final rept.

J. W. Lynn, T. W. Clinton, W. H. Li, R. W. Erwin, J. Z. Liu, K. Vandervoort, and R. N. Shelton. 1989, 4p

Pub. in Physical Review Letters 63, n23 p2606-2609, 4 Dec 89.

Keywords: *Superconductors, Neutron scattering, Reprints, *Erbium barium cuprates, *Barium erbium cuprates, Antiferromagnetic materials, Magnetic superconductors, Magnetic ordering, Order parameters, Ising model.

Neutron scattering has been used to study the magnetic order of the Er ions in superconducting ErBa₂Cu₃O₇. Above the 3D Neel temperature (T(N) = 0.618 K) a rod of scattering characteristic of 2D behavior is unambiguously observed, showing that the magnetic interactions of the rare-earth ions are highly anisotropic; below T(N) the order parameter follows the exact Onsager solution for a 2D Ising antiferromagnet. At low T, two separate types of simple 3D antiferromagnetic structures are found, one characterized by a wave vector of (1/2, 0, 0), and the other by (1/2, 0, 1/2).

X-ray Line Broadening Study on Shock-Modified Zirconia.

Final rept.

B. Morosin, R. A. Graham, Y. Zhang, J. M. Stewart,

and C. R. Hubbard. 1988, 9p

Pub. in Australian Jnl. of Physics 41, n2 p251-259 1988.

Keywords: *Zirconium oxides, X ray diffraction, Mechanical shock, Strains, Reprints, Line broadening, High pressure.

Zirconia (ZrO₂) powder compacts have been subjected to controlled, quantitative high pressure shock loading at peak pressures from 5-27 GPa and preserved for post-shock analysis. The overlapping, broadening x-ray diffraction peak profiles have been separated by least-squares fitting procedures. The separate lines have been analyzed in the usual manner to determine the residual lattice strain and the coherent crystallite size. Maximum modification effects are observed near 20 GPa with strain values near 0.003 and size values near 200 Å.

PHYSICS

Solid State Physics

The report summarizes all those programs which use the NIST reactor. It covers the period for July 1988 through June 1989. The programs range from the use of neutron beams to study the structure and dynamics of materials through nuclear physics and neutron standards to sample irradiations for activation analysis, isotope production, neutron radiography, and non-destructive evaluation.

Theoretical Models for High-Temperature Superconductivity.

Final rept.

R. C. Casella. 1988, 10p

Pub. in Nuovo Cimento 10 D, n12 p1439-1448 Dec 88.

Keywords: *Superconductors, Energy gap, Phonons, Reprints, *High temperature superconductors, *Band theory, Yttrium barium cuprates, Barium yttrium cuprates, Intermediate bosons.

A semi-phenomenological analysis is given of the effects of certain band structure features on the gap ratios $2\Delta/k_B T(e)$ for high- $T(e)$ superconductors, including multigap systems. In addition to phonons other intermediate bosons (IB) mediating the superconducting interaction are considered. Interesting results emerge when the IB energy exceeds the widths of possible narrow peaks in the density of states associated with sub-bands presumably belonging to substructures such as stacked Cu-O planes. Comparison with experiment is made. In particular, data obtained by Warren et al. via nuclear-spin relaxation on $Ba_2YCu_3O(7-\delta)$ can be interpreted within the present framework in terms of a model having an IB of energy approx = or > 1eV, which exceeds the predicted width (approx = or < 0.3eV) of a peak in the density of states containing the normal-state Fermi level. This suggests that the IB is not a phonon.

and D. G. Seiler. 1989, 4p

Grant NSF-DMR86-17823

Sponsored by National Science Foundation, Washington, DC.

Pub. in Physical Review Letters 63, n26 p2845-2848, 25 Dec 89.

Keywords: *Indium antimonides, *Magneto-optics, Phonons, Impurities, Reprints.

The authors have observed and described new optical transitions between magnetodonor states in InSb, assisted by optic-phonon emission. The phonon-assisted transitions provide a unique opportunity to investigate high excited states of the magnetodonor system (up to principal quantum number $n=13$), which simulates the hydrogen atom in gigantic magnetic fields. High-resolution data reveal the presence of additional excited magnetodonor states related to lower Landau subbands unobserved until the present.

Nucleation and Growth of Cr on Stepped Surfaces with Facets: An FEEM (Field Electron Emission Microscopy) Study.

Final rept.

A. J. Melmed, and N. D. Shinn. 1987, 6p

Pub. in Jnl. of Physics Colloquium 48, nC-6 p33-38 Nov 87.

Keywords: *Chromium, *Crystal growth, Vapor deposited coatings, Electron microscopy, Thin films, Nucleation, Substrates, Tungsten, Rhenium, Reprints, Epitaxial growth.

The nucleation and epitaxial growth of Cr crystals resulting from vapor-deposition of Cr onto thermally annealed W and Re surfaces has been studied using field electron emission microscopy. The substrate surfaces consisted of low-index facets and terraces separated by atomic steps. Multiple nucleation, leading to polycrystal growth, could not be avoided on the Re sur-

faces. The Cr/W system was studied more extensively and was found to yield some surprising results. In the temperature range of about 500-1050 K, nucleation and growth of Cr crystals occurred only after 1-2 monolayers of Cr atoms had formed (the Stranski-Krastinov mode). However, at about 300 K on (011)W planes, two different growth modes were observed consistently, depending upon the vapor-deposition geometry; the Stranski-Krastinov or the Volmer-Weber mode.

McWhan, Y. Yafet, J. W. Cable, J. Bohr, H. Grimm,

and C. L. Chien. 1988, 6p

Pub. in Jnl. of Applied Physics 63, n8 p3447-3452 1988.

Keywords: *Rare earth elements, Neutron diffraction, Single crystals, Gadolinium, Dysprosium, Holmium, Yttrium, *Magnetic ordering, Superlattices, Molecular beam epitaxy.

The magnetic structures of several single-crystal, magnetic rare earth superlattice systems grown by molecular beam epitaxy are reviewed. In particular, the results of recent neutron diffraction investigations of long-range magnetic order in Gd-Y, Dy-Y, Gd-Dy, and Ho-Y periodic superlattices are presented. In the Gd-Y system, an antiphase domain structure develops for certain Y layer spacings, whereas modified helical moment configurations are found to occur in the other systems, some of which are commensurate with the chemical superlattice wavelength. References are made to theoretical interaction mechanisms recently proposed to account for the magnetic states of these novel materials.

Development of Magnetic Anisotropies in Ultrathin Epitaxial Films of Fe(001) and Ni(001).

Final rept.

B. Heinrich, J. F. Cochran, A. S. Arrott, S. T. Purcell,

K. B. Urquhart, J. R. Dutcher, and W. F. Egelhoff.

1989, 18p

Pub. in Applied Physics A 49, p473-490 1989.

Keywords: *Magnetic anisotropy, Ferromagnetic resonance, Metal films, Thin films, Iron, Nickel, Copper, Silver, Substrates, Reprints, *Magnetic films, Molecular beam epitaxy, Brillouin effect, BCC lattices, FCC lattices.

Ultrathin films, bcc Fe(001) on Ag(001), fcc Fe(001) on Cu(001) and Fe/Ni(001) bilayers on Ag, were grown by molecular beam epitaxy. A wide range of surface science tools were employed to establish the quality of

epitaxial growth. Ferromagnetic resonance and Brillouin light scattering were used to extract the magnetic properties. Emphasis was placed on the study of magnetic anisotropies. Large uniaxial anisotropies with easy axis perpendicular to the film surface were observed in all ultrathin structures studied. These anisotropies were particularly strong in fcc Fe and bcc Fe films. In sufficiently thin samples the saturation magnetization was oriented perpendicularly to the film surface in the absence of an applied field. It has been demonstrated that in bcc Fe films the uniaxial perpendicular anisotropy originates at the film interfaces.

Specimen Biasing at Low Accelerating Voltages.

Final rept.

M. T. Postek. 1989, 5p

Pub. in Hitachi Instrument News 17, p12-16 Dec 89.

Keywords: *Electron microscopes, Field emission, Gallium arsenides, Backscattering, Secondary emission, Polymethyl methacrylate, Polyethylene, Bias, Reprints, *Scanning electron microscopy, Photoresists.

In a field emission scanning electron microscope such as the Hitachi S-800, biasing of the specimen may produce improved images at low beam energies (0.8 to 2.5 keV) especially when charging effects induced by the primary electron beam are present. Imaging in this mode is fundamentally backscattered electron derived. Examples of such improvement are given for uncoated photoresist on gallium arsenide, fractured polymethyl methacrylate, and polyethylene wrapper material. It can be concluded that specimen biasing may be a simpler and more convenient way to achieve some of the advantages afforded by the converted backscattered secondary electron (CBSE) technique for imaging, but without some of its fundamental disadvantages.

Semiclassical Scattering Corrections to the Quantum Hall Effect Conductivity and Resistivity Tensors.

Final rept.

M. E. Cage. 1989, 4p

Sponsored by Department of Defense, Washington, DC., Strategic Systems Programs Office (Navy), Ar-

lington, VA., and Sandia National Labs., Albuquerque, NM.
Pub. in Jnl. Phys.: Condens. Matter 1, p5531-5534 1989.

Keywords: *Hall effect, Electrical resistivity, Scattering, Tensors, Correction, Reprints, *Quantum Hall effect, Electrical conductivity, Relaxation.

Ando, Matsumoto and Uemura published an important paper in 1975 that greatly influenced the early experimental work on the quantum Hall effect. Their paper showed that, in both a semiclassical scattering model and in a self-consistent Born approximation, there is a correction to the quantum Hall conductivity component σ_{xy} of the conductivity tensor that is directly proportional to the diagonal conductivity component σ_{xx} . The present authors provide a detailed derivation of their results using the semiclassical scattering (relaxation-time approximation) model. They then present the surprising result that, in the semiclassical scattering model, there is no correction to the quantum Hall resistivity tensor component ρ_{xy} due to a finite value of ρ_{xx} .

Pub. in Quantum Hall Effect, Chapter 2, p37-68 1987.

Keywords: *Hall effect, *Metrology, Electric current, Electrical resistance, Bibliographies, Reprints, *Quantum Hall effect, Resistance standards, Two dimensional.

The quantum Hall effect provides an unparalleled opportunity to study and use the physical properties of macroscopic, two-dimensional electron or hole systems in the presence of strong magnetic fields. These studies are revealing surprising results that are of particular interest to the disciplines of condensed matter physics and electrical metrology. This chapter discusses some experimental observations and metrological applications of the integer Hall effect, and includes an extensive bibliography of representative literature in this field.

Keywords: *Superconductors, Magnetic fields, Polycrystalline, Bismuth oxides, Reprints, *High temperature superconductors, *Critical current, Yttrium barium cuprates, Barium yttrium cuprates, Thallium oxides.

A double step characteristic is observed at 76 K in the transport critical current as a function of magnetic field (0 to the -4 power T to 10 T) in bulk sintered Y-, Bi- and Tl-based high-T(c) superconducting materials. The low-field, step-like drop in the critical current density $J(c)$ commences at magnetic fields B between about 0.3 and 2 mT. This is followed by a plateau region of relatively constant critical current extending from about 30 to 300 mT, and then a second drop at fields between about 0.3 and 10 T. These features occur for all three superconductor materials and are interpreted respectively as a self-field/weak-link regime, a remnant percolation path regime and a flux-flow/upper-critical-field regime. The sharpness of the transition of the voltage-current (V-I) characteristic, represented by the transition parameter n, has a similar double-step shape as a function of magnetic field directly corresponding to the features of the $J(c)$ (B) characteristic.

Low-Temperature Elastic Constants of Polycrystalline La(sub 2)CuO(sub 4) and La(sub 1.85)Sr(sub 0.15)CuO(sub 4).
Final rept.
H. Ledbetter, S. A. Kim, C. E. Violet, and J. D. Thompson. 1989, 2p
Pub. in Physica C 162-164, p460-461 1989.

Keywords: Superconductors, Elastic properties, Ultrasonic tests, Cryogenics, Reprints, *Lanthanum strontium cuprates, *Lanthanum cuprates.

Using ultrasonic methods, the authors measured the 295-4-K elastic constants of superconductive La(1.85)Sr(0.15)CuO4 and nonsuperconductive La2CuO4. These materials show two elastic-constant similarities: nearly the same ambient-temperature elastic constants and an elastic-stiffness minimum in the 20-40-K region. Their principal difference is that La2CuO4 softens 3% during cooling, while La(1.85)Sr(0.15)CuO4 softens 30%. This reversible wide-temperature-range softening resembles a magnetic phase transition. Perhaps it relates to the large drop in spin-excitation intensity found by Shirane and coworkers using inelastic neutron scattering.

Neutron Scattering in Intermetallics.
Final rept.
J. J. Rhyne. 1987, 9p
Pub. in Jnl. of Magnetism and Magnetic Materials 70, n1-3 p88-96 1987.

Keywords: *Neutron scattering, *Intermetallics, Magnetic properties, Rare earth alloys, Crystal structure,

Iron containing alloys, Yttrium, Manganese, Cobalt, Aluminum, Magnons, Order-disorder transformations, Reprints, Amorphous state.

Inelastic and elastic neutron scattering as a probe of long range and disordered magnetism is discussed for example cases in rare earth intermetallic crystalline compounds and amorphous analogues. The determination of the sublattice site magnetizations is illustrated for RFe2 and Y6(MnxFe(1-x))23 compounds. The latter are shown to exhibit strong exchange disorder effects for intermediate compositions, as manifested by the development of short range antiferromagnetic clusters. The effect of randomization of the crystal field interaction in destroying long range order is illustrated in amorphous rare earth compounds and in rare earth compound hydrides. Results of inelastic scattering measurements which yield exchange and crystal field parameters are summarized for Laves phase Fe, Co, and Al compounds.

Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics.
Final rept.
R. F. Sekerka, P. W. Voorhees, S. R. Coriell, and G. B. McFadden. 1988, 6p
Pub. in Jnl. of Crystal Growth 87, n4 p415-420 1988.

Keywords: *Solidification, *Crystal growth, *Capillarity, *Interfaces, *Kinetic theory, Nucleation, Reprints, Temperature dependence, Liquid-solid interfaces.

The initial conditions implied by square root of t growth of a spherical crystal solidifying from a pure, undercooled melt, including the effects of both capillarity and interface kinetics were explored. Findings are related to initial conditions that would be expected on the basis of classical nucleation theory. For crystal sizes near the nucleation radius, the temperature profiles show a cold region ahead of the advancing interface that is even more undercooled than the undercooled bath. The cold region acts as a local heat sink which compensates for the reduced growth speed that would otherwise result from capillarity and kinetics, leading to precisely the same square root t growth law that would have been obtained had both capillarity and kinetics

PHYSICS

Solid State Physics

been neglected. The reconciliation of the initial condition with nucleation theory remains unresolved.

Dispersion of Evanescent Band Gap States in Fe Clusters on GaAs(110).

Final rept.

J. A. Stroscio, P. N. First, R. A. Dragoset, L. J. Whitman, D. T. Pierce, and R. J. Celotta. 1990, 5p
Sponsored by Office of Naval Research, Arlington, VA. Pub. in Jnl. of Vacuum Science and Technology A 8, n1 p284-288 Jan/Feb 90.

Keywords: *Energy gap, Electron tunneling, Gallium arsenides, Substrates, Surfaces, Reprints, *Iron clusters, Scanning tunneling microscopy.

The authors report scanning tunneling microscopy results on the band gap states observed in tunneling to nanometer size metallic Fe clusters on GaAs(110) surfaces. In the vicinity of the Fe clusters, a continuum of gap states is found in tunneling spectra from regions of the bare semiconductor. The state density in the gap, emanating from the clusters, is found to decay exponentially with a decay length that is dependent on the energy in the band gap. The gap state decay length varies continuously from 3.4 Å at midgap to a divergence at the valence and conduction band edges, reflecting the characteristics of the generalized Bloch states in the semiconductor gap having complex wave vector.

Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study II.

Final rept.

P. P. Camus, H. B. Elswijk, and A. J. Melmed. 1989, 4p
Pub. in Colloque de Physique C8, p477-480 Nov 89.

Keywords: *Superconductors, Concentration(Composition), Reprints, *High temperature superconductors, *Europium barium cuprates, *Barium europium cuprates, *Oxygen depletion, Atom probes.

Atom probe mass analysis using a wide acceptance angle instrument was used to measure the oxygen content and metallic stoichiometry of the near-surface region of the superconducting ceramic oxide $\text{Eu}_1\text{Ba}_2\text{Cu}_3\text{O}(7-x)$ (x approximately = 0.1) after exposure at 85K and room temperature in vacuum. An oxygen depleted layer formed by H₂ imaging must be removed before bulk concentrations are obtained. Room temperature holding in vacuum overnight (approximately 18h) then depletes the surface of oxygen to a depth of greater than 4 layers (1.2nm). However, after holding the specimen at 85K for up to 3h either with or without an applied field, no detectable loss of oxygen occurred. Therefore, for short time vacuum exposures at liquid nitrogen temperatures and below, no oxygen loss is expected; however, significant oxygen loss occurs for 18h vacuum exposures at room temperature.

Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study.

Final rept.

H. B. Elswijk, A. J. Melmed, and P. P. Camus. 1989, 3p
Pub. in Applied Physics Letters 55, n25 p2667-2669, 18 Dec 89.

Keywords: *Superconductors, Concentration(Composition), Reprints, *High temperature superconductors, *Europium barium cuprates, *Barium europium cuprates, *Oxygen depletion, Atom probes.

Atom probe mass analysis, at 85 K, using a wide-angle instrument, was used to measure the oxygen content and metallic stoichiometry of the near-surface region of the superconducting ceramic oxide $\text{Eu}_1\text{Ba}_2\text{Cu}_3\text{O}(7-x)$ (x approximately = 0.1) after vacuum exposure at

room temperature. Routine specimen preparation, handling, and field-ion imaging produced a specimen which had already lost oxygen such that its measured surface oxygen content corresponded to $x = 0.73$ and the metallic stoichiometry of the surface was not the expected 1:2:3 but was enhanced in Ba and Eu. The specimen was subsequently exposed to vacuum for up to 80 h at room temperature and no additional loss of oxygen was detected. It was concluded that either a stoichiometric low-oxygen surface also would not have lost oxygen or the nonstoichiometric layer forms a barrier for subsequent oxygen loss.

NBS (National Bureau of Standards) Crystal Data. NBS (National Bureau of Standards)*Search: A Program to Search the Database.

Final rept.

V. L. Himes, and A. D. Mighell. 1987, 11p
Pub. in Crystallographic Databases, p144-155 1987.

Keywords: *Crystallography, *Chemical compounds, *Chemical elements, Search structuring, Organic compounds, Organometallic compounds, Metals, Minerals, Intermetallics, Inorganic compounds, Reprints, *Data base management, Software tools.

The NBS Crystal Data Center maintains a database that contains evaluated crystallographic and chemical data on approximately 120,000 materials. The data fall into the following categories: organics, organometallics, metals, intermetallics, inorganics and minerals. NBS*Search (copyright 1987 by the U.S. Secretary of Commerce on behalf of the United States) has been written to provide search software that can be used with NBS CRYSTAL DATA (1987). The program is written in standard FORTRAN and is designed to be used in any analytical laboratory. The NBS*SEARCH software is multifunctional in design, and it is planned to incorporate additional search functions in forthcoming version of the program.

Spin Dynamics of Amorphous Magnets.

Final rept.

J. W. Lynn, and J. J. Rhyne. 1988, 41p
Pub. in Spin Waves and Magnetic Excitations, Chapter 4, p177-217 1988.

Keywords: Rare earth alloys, Neutron scattering, Magnons, Reprints, *Spin waves, Amorphous materials, Small angle scattering, Spin glass state, Magnetism.

The chapter reviews the subject of magnetic excitations in amorphous metallic alloys with principal emphasis on neutron scattering results. The effects of the amorphous topology on the magnetic excitations and how this is probed in the neutron experiments is explained with reference to current experimental results. The concepts of spin wave linewidth are reviewed and related to the physics of the reentrant spin glass and multicritical point systems in general. The effect of random anisotropy fields on the spin ordering and phase transition in rare earth amorphous alloys is reviewed and illustrated with results from small angle scattering studies.

Magnetic Ordering of Nd in (Nd, Ce)(sub 2)CuO(sub 4).

Final rept.

J. W. Lynn, I. W. Sumarlin, S. Skanthakumar, W. H. Li, R. N. Shelton, J. L. Peng, Z. Fisk, and S. W. Cheong. 1990, 4p
Pub. in Physical Review B 41, n4 p2569-2572, 1 Feb 90.

Keywords: Antiferromagnetism, Copper oxides, Reprints, *Neodymium cuprates, *Neodymium cerium cuprates, *Magnetic ordering, Neodymium ions, Magnetic superconductors, Semiconductors.

Neutron-diffraction techniques have been used to study the magnetic ordering of the Nd ions in semiconducting Nd_2CuO_4 and superconducting $\text{Nd}_{1.85}\text{Ce}_{0.15}\text{CuO}_4$. For the Ce-doped system a sharp transition to long-range antiferromagnetic order

occurs at $T(N)$ approximately = 1.2 K, with a simple magnetic unit cell which is double the chemical unit cell along the a and b directions. The same magnetic structure is observed in the parent system Nd_2CuO_4 , in which the Cu spins are also ordered magnetically, but strong coupling between the Nd and Cu sublattices is indicated.

Instability of a Taylor-Couette Flow Interacting with a Crystal-Melt Interface.

Final rept.

G. B. McFadden, S. R. Coriell, M. E. Glicksman, and M. Selleck. 1989, 23p

Sponsored by National Aeronautics and Space Administration, Washington, DC.

Pub. in PCH PhysicoChemical Hydrodynamics 11, n4 p387-409 1989.

Keywords: *Crystal growth, *Solidification, Couette flow, Flow stability, Hydrodynamics, Reprints, *Taylor-Couette instability, Vortex flow, Taylor instability, Crystal-melt interface.

A linear stability analysis is presented for the axisymmetric Taylor Couette instability of the flow between infinite concentric rotating cylinders for the case that one of the bounding cylinders is a crystal-melt interface. Results are presented for various rotation ratios $\mu = \Omega(2)/\Omega(1)$ of the outer and inner cylinders in the narrow gap approximation. For the case of solid-body rotation of the liquid ($\mu = 1$), the linear stability of the system is unaffected by the crystal-melt interface. For rotation ratios $0 =$ or $< \mu < 1$ the Taylor-vortex mode is destabilized for large Prandtl numbers, and the critical Taylor number varies inversely with the Prandtl number. For large negative rotation ratios the instability is insensitive to the Prandtl number for the case of a crystalline outer cylinder. In the limiting case of small Prandtl number the results tend to the classical values for a rigid-walled system. The effect of varying the crystal width is also considered. An approximate solution valid for large Prandtl numbers is obtained analytically.

Quest for Universal Curves to Describe the Surface Sensitivity of Electron Spectroscopies.

Final rept.

C. J. Powell. 1988, 18p
Pub. in Jnl. of Electron Spectroscopy and Related Phenomena 47, p197-214 Jul 88.

Keywords: Mean free path, Sensitivity, Reprints, *Surface analysis, *Electron spectroscopy, Attenuation length, Universal curves.

An overview is given of data for electron attenuation lengths (ALs) and inelastic mean free paths (IMFPs) in the energy range of interest for electron spectroscopy of surfaces with emphasis on the search for so-called universal curves. Reliable knowledge of ALs and IMFPs is important for determining the surface sensitivity of electron spectroscopies and for quantitative surface analysis by AES and XPS. Suitable formulas for ALs and IMFPs are needed as user guides but existing formulas are of limited accuracy due to problems in AL measurements and approximations in IMFP calculations. AL measurements and the various AL and IMFP formulas are critiqued. A new formula due to Tanuma et al. shows promise of being a useful guide to the energy- and material-dependences of IMFPs and may be a reasonable though less accurate guide for ALs.

Magnetic Correlations in Amorphous Fe-Zr Alloys.

Final rept.

J. J. Rhyne, R. W. Erwin, J. A. Fernandez-Baca, and G. E. Fish. 1988, 3p
Pub. in Jnl. of Applied Physics 63, n8 p4080-4082 1988.

Keywords: *Iron alloys, *Zirconium containing alloys, Neutron scattering, Transition temperature, Correla-

tion, Reprints, Amorphous state, Exchange interactions, Magnetic ordering, Small angle scattering, Magnetism.

Results of high resolution small angle neutron scattering (SANS) studies on amorphous alloys of composition $\text{Fe}_x\text{Zr}(100-x)$ ($x = 90, 91, 92$) show that ferromagnetic correlations exist below $T(c)$, but that conventional long range order is destroyed by competing exchange interactions. The transition temperatures drop with increasing iron concentration ($T(c)$ approximately equal to 226 K for $\text{Fe}_{90}\text{Zr}_{10}$) down to $T(c)$ approximately equal to 175 K for $\text{Fe}_{92}\text{Zr}_8$). Data taken at very low Q ($0.008 < Q < 0.02/\text{\AA}$) provide evidence of relatively large (approximately 200 - approximately 400 \AA) static spin clusters which do not disorder at $T(c)$. Superposed is an ordering with a second shorter length scale which shows a cusp (not divergent) at the bulk $T(c)$. The data were fitted to a combination of a Lorentzian and a power of a Lorentzian, the latter of which represents scattering from clusters with a Maxwellian distribution of sizes.

Field-Ion Energy Spectroscopy of Gold Overlayers on Silicon.

Final rept.
W. A. Schmidt, A. J. Melmed, M. F. Lovisa, M. Naschitzki, and J. H. Block. 1988, 9p
Pub. in Surface Science 194, n1-2 p127-135 Feb 88.

Keywords: *Gold coatings, *Silicon, Interfaces, Energy levels, Thin films, Valence bands, Reprints, *Electronic states, Field ion microscopy, Schottky barrier diodes.

Unoccupied localized states of the Au/Si(111) contact have been observed by means of field-ion energy spectroscopy. Gold overlayers of 3-5 ml thickness and greater were prepared and an intermixed Si-Au structure was formed at the interface. The spectroscopic result in the form of integral field-ion energy distributions confirmed the existence of empty electronic states beginning at the Fermi level. A pronounced hump in the distribution was evaluated and resulted in a high density of states at $(0.95 \pm 0.2)\text{eV}$ above the top of the valence band. For technical reasons, the spectroscopy was carried out with p-type Si. Using gold-covered n-type Si, Schottky barrier heights of the Au-n-Si(111) contact can be determined.

Effects of Crystal Anisotropy on Magnetization and Magnetic Order in Superconducting $\text{RBA}(\text{sub } 2)\text{Cu}(\text{sub } 3)\text{O}(\text{sub } 7-x)$.

Final rept.
R. N. Shelton, R. W. McCallum, M. A. Damento, K. A. Schneider, H. C. Ku, H. D. Yang, J. W. Lynn, W. H. Li, and Q. Li. 1987, 4p
Pub. in Physica B and C 148, n1-3 p285-288 1987.

Keywords: *Superconductors, Superconductivity, Anisotropy, Magnetization, Neutron diffraction, Single crystals, Reprints, *High temperature superconductors, *Yttrium barium cuprates, *Erbium barium cuprates, *Barium yttrium cuprates, *Barium erbium cuprates, Magnetic ordering, Critical current.

Two distinct experiments are used to study the influence of crystal anisotropy and superconductivity in $\text{YBa}_2\text{Cu}_3\text{O}_7$ and magnetic order in the superconducting state of $\text{ErBa}_2\text{Cu}_3\text{O}_7$. Magnetization data on a single crystal of $\text{YBa}_2\text{Cu}_3\text{O}_7$ reveal pronounced anisotropy. Analysis of the magnetization versus applied field hysteresis loops implies strong anisotropy of the critical current density. For $\text{ErBa}_2\text{Cu}_3\text{O}_7$, neutron diffraction measurements indicate that the Er moments order two dimensionally at low temperatures (about 0.5K), with chains of spins coupled ferromagnetically, while adjacent chains align antiparallel.

Observation of Intensity Oscillations in RHEED during the Epitaxial Growth of Cu and fcc Fe on Cu(100).

Final rept.
D. A. Steigerwald, and W. F. Egelhoff. 1987, 6p
Pub. in Surface Science 192, n2-3, pL887-L892 1987.

Keywords: *Copper, *Iron, Face centered cubic lattices, Surface properties, Metal films, Crystal growth, Substrates, Reprints, *Epitaxial growth, Reflection high energy electron diffraction, Molecular beam epitaxy.

Oscillations in the intensity of the specular beam in Reflection High Energy Electron Diffraction (RHEED) have been observed during the epitaxial growth of Cu on Cu(100) and face-centered cubic (fcc) Fe on fcc Fe. The oscillations are not observed for the growth of fcc Fe on Cu(100). Thus it is inferred that the homo-epitaxial growth of both metals is by a Frank-van der Merwe (layer-by-layer) mechanism, but that the hetero-epitaxial growth of fcc Fe on Cu(100) is accompanied by strong intermixing of the first Fe monolayer followed by gradual burying of the Cu. The burying is complete after approximately 5 ML at 255 K. In addition to facilitating the determination of the active growth mechanism, the experimental results allow for a simple, effective means for calibrating the incident metal flux from the MBE vapor sources.

X-ray Photoelectron Spectroscopy of O 1s and Si 2p Lines in Films of $\text{SiO}(\text{sub } x)$ Formed by e-beam Evaporation.

Final rept.
Y. N. Sun, A. Feldman, and E. N. Farabaugh. 1988, 10p
Pub. in Thin Solid Films 157, n2 p351-360, 29 Feb 88.

Keywords: *Silicon oxides, *Silicon dioxide, Dielectric films, Thin films, Electron beams, Reprints, X ray photoelectron spectroscopy, Binding energy.

X-ray photoelectron spectroscopy (XPS) measurements were made of the line shapes and binding energies of the O 1s and Si 2p lines in films of the SiO_x system prepared by electron-beam (e-beam) evaporation. Stoichiometries were in the range $0 < x < 2$. Corrections for charging effects were obtained by measuring all line positions relative to the position of the Au 4f peak. The films contain principally two Si 2p peaks which change in amplitude and move to higher energies in a continuous manner as a function of x. The O 1s peak is a single line which shifts in a sublinear manner as a function of x. The results are consistent with the presence of silicon clusters, silicon-centered tetrahedra conforming to the random bond model (RBM) and forms of oxygen other than bridging oxygen such as peroxy bonding, molecular oxygen or OH.

Lattice Statics Green's Function Method for Calculation of Atomistic Structure of Grain Boundary Interfaces in Solids. 2. Anharmonic Theory.

Final rept.
V. K. Tewary, and E. R. Fuller. 1989, 7p
Pub. in Jnl. of Materials Research 4, n2 p320-326 1989.

Keywords: *Crystal lattices, *Greens function, *Grain boundaries, Interfaces, Solids, Copper, Reprints, Anharmonic theory, Fcc lattices.

The lattice statics Green's function method for calculation of the atomistic structure of grain boundary interfaces in solids as described in Paper 1 is extended to

include anharmonic effects. It is shown that the 'anharmonic' response of a solid to 'anharmonic' forces can be represented in terms of the 'harmonic' response of the solid to an effective anharmonic force. The Green's function method then requires solving a finite order nonlinear matrix equation which is done by using standard numerical methods. For the purpose of illustration, the method is applied to calculate the atomistic structure of a Sigma 5 tilt boundary in fcc copper.

Lattice Statics Green's Function Method for Calculation of Atomistic Structure of Grain Boundary Interfaces in Solids. 1. Harmonic Theory.

Final rept.
V. K. Tewary, E. R. Fuller, and R. M. Thomson. 1989, 11p
Pub. in Jnl. of Materials Research 4, n2 p309-319 1989.

Keywords: *Crystal lattices, *Greens function, *Grain boundaries, Interfaces, Solids, Harmonic analysis, Thermodynamic equilibrium, Reprints, Fcc lattices.

A lattice statics Green's function method is described for calculating the atomistic structure of a solid near a grain boundary interface. First, a reference state is defined which is 'near' the equilibrium state. The Green's function for the reference state is obtained in terms of the perfect lattice Green's function by mapping the lattice sites of the reference state to the perfect lattice sites and solving the Dyson's equation. This Green's function gives the response of the reference state which determines the atomic relaxations under the net forces which would be present in the reference state. The specific case of a Sigma 5 tilt boundary in a fcc lattice has been considered assuming the validity of the harmonic approximation.

Temperature and Composition Dependence of the Energy Gap of Hg(sub 1-x)Cd(sub x)Te by Two-Photon Magneto Absorption Techniques.

Final rept.

D. G. Seiler, J. R. Lowney, C. L. Littler, and M. R.

Loloe. 1990, 8p

Pub. in Jnl. of Vacuum Science and Technology A, 8, n2 p1237-1244 Mar/Apr 90.

Keywords: *Energy gap, Infrared detectors, Magneto-optics, Reprints, *Mercury cadmium tellurides, Two photon absorption, Temperature dependence, Magnetoabsorption.

Accurate determinations of the energy gap $E(8)$ at liquid helium temperatures in alloys of $0.24 = \text{or} < x = \text{or} < 0.30$ have been made by two-photon magnetoabsorption techniques. They are shown to help verify the use of the Hansen-Schmit-Casselman (HSC) relation over the range $0 < x < 0.30$ at these temperatures. In contrast, the observed temperature dependence of $E(8)$ below 77 K is nonlinear and thus cannot be described accurately by the HSC relation. Analysis of $E(8)(T)$ data for three samples with $0.24 = \text{or} < x = \text{or} < 0.26$ has allowed the deduction of a new relationship for $E(8)(x,T)$ that more properly accounts for the nonlinear temperature dependence below 77 K and the linear behavior above 77 K, while still accurately describing the x dependence $E(8)(x,T)$ for $E(8)$ in eV and T in K. This relation should apply to alloys with $0.2 < x < 0.3$. The maximum change from the HSC relation in this range is 0.004eV for $x = 0.2$ at about 10 K.

Airy Pattern, Weak-Link Modelling of Critical Currents in High-T(sub c) Superconductors.

Final rept.

R. L. Peterson, and J. W. Ekin. 1989, 9p

Pub. in Physica C 157, p325-333 1989.

Keywords: *Superconductors, Josephson junctions, Magnetic fields, Granular materials, Reprints, *High temperature superconductors, *Yttrium barium cuprates, *Holmium barium cuprates, *Critical current.

The authors have measured the transport critical current density at very low magnetic fields in samples of superconducting bulk sintered Y1Ba2Cu3O(x), Y1Ba2Cu4O(x), and HoBa2Cu3O(x) obtained from several sources. The results are analyzed at low fields ($= \text{or} < 10$ mT) with a statistical model which assumes that the current is limited by Josephson weak links (SNS or SIS Josephson junctions or microbridges) whose locations are to be determined. Each weak link is assumed to be described by an Airy current-field pattern rather than a Fraunhofer pattern. The former has

a better theoretical foundation and is in better agreement with the data, varying as H to the (-3/2) power upon averaging. The fitting procedure yields the average cross sectional area of the weak links. By assuming the link thickness to be twice the London penetration depth at 77 K, it was found that the average linear dimensions of the links are in all cases comparable to the grain dimensions. The quantitative analysis also confirms the percolation concept, in which a subset of weakest links controls the transport current.

Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals.

L. N. Brush, R. F. Sekerka, and G. B. McFadden. Oct 89, 43p NISTIR-89/4193

Prepared in cooperation with Carnegie-Mellon Univ., Pittsburgh, PA.

Keywords: *Single crystals, *Crystal growth, *Mathematical models, Integral equations, Stability, Bifurcation(Mathematics), Nonlinear analysis, Numerical solution, Two dimensional.

The nonlinear stability of a two-dimensional single crystal of pure material in an under-cooled melt is studied both analytically and numerically. The quasi-steady state approximation is used for the thermal fields and the effects of different solid and liquid thermal conductivities, isotropic interfacial growth kinetics and isotropic surface tension are included. The bifurcation analysis is performed by calculating the instantaneous value of the fundamental component of the local normal growth speed for an interface perturbed by a single Fourier shape component. Numerically, the fundamental component of the interfacial growth speed is found by Fourier analysis of the solution to an integro-differential equation obeyed at the interface. Analytically, an expansion technique is used to derive a solvability condition defining each of these bifurcation points. The analytical and numerical results are in very close agreement. Almost all of the bifurcations are subcritical and the authors present their results by giving values of the Landau coefficient as a function of the different dimensionless parameters used in the model.

Semiconductor Measurement Technology: A Software Program for Aiding the Analysis of Ellipsometric Measurements, Simple Spectroscopic Models.

Special pub. (Final).

J. F. Marchiando. Apr 90, 364p NIST/SP-400/84

Also available from Supt. of Docs. See also PB89-235923.

Keywords: *Computer programs, *Spectroscopic analysis, *Polarimetry, *Dielectrics, Mathematical models, Computerized simulation, Differential equations, Sensitivity, Fortran, *Computer aided analysis, *Ellipsometry, User manuals(Computer programs), Iterative solutions.

MAIN2 is a software program for analyzing spectroscopic ellipsometric measurements. MAIN2 consists mainly of subroutines written in FORTRAN that are used to invert the standard reflection ellipsometry equations for simple systems. Here, a system is said to be simple if the solid material sample is characterized by models which assume at least the following: (1) materials are nonmagnetic; (2) samples exhibit depth-dependent optical properties, such as one with layered or laminar structure atop a substrate that behaves like a semi-infinite half-space; (3) layers are flat and of uniform thickness; and (4) the optical medium within each ambient/layer/substrate is isotropic, homogeneous, local, and linear. The ambient region refers to that region of space which lies external to the layer/substrate structure of the sample. Each layer is characterized by a thickness and a dielectric function. The dielectric function of a region, i.e., ambient, layer, or substrate, is represented by the Bruggeman effective medium approximation (EMA). Within the EMA, the effective medium of a region is characterized by an aggregate mixture of constituent media, and the dielectric function of each constituent medium is known a priori. The ellipsometric equations are formulated as a standard damped nonlinear least-squares problem

and then solved by an iterative method when possible. The program is sufficiently modular to allow one to modify some of the models used in the calculations.

Clark. 1987, 6p

Pub. in Proceedings of Drexel International Conference on High Temperature Superconductivity, Philadelphia, PA., July 29-30, 1987, p225-230.

Keywords: *Superconductors, *X ray spectroscopy, Absorption spectra, Emission spectra, Reprints, *High temperature superconductors, *Yttrium barium cuprates, *Photoelectron spectroscopy, Soft x rays, Density of states.

The authors present total photoelectron yield spectra and electron-beam excited soft x-ray emission spectra for the YBa₂Cu₃O(7-x) superconductor. The 2+ valencies of Cu and Ba in the compound are confirmed by total photoelectron yield measurements. Emission spectra determine the p-type partial density of states (p-PDOS) localized on the Ba, Y, and O atomic sites. The p-PDOS are very small at the Fermi energy (epsilon-sub F) and exhibit peaks at 3.5 to 4 eV below (epsilon-sub F). K emission spectra of O confirm the interpretation that the structure observed in previous photoemission measurements is associated with the O 2p orbitals.

Progress Toward a Semiconductor Depth Profiling Standard.

Final rept.

D. S. Simons, P. Chi, R. G. Downing, J. R. Ehrstein,

and J. F. Knudsen. 1988, 4p

Pub. in Proceedings of International Conference on Secondary Ion Mass Spectrometry (6th), p433-436 1988.

Keywords: Monte Carlo method, Neutrons, Simulation, Standards, Reprints, *Secondary ion mass spectroscopy, *Depth profiles, Boron 10, Amorphous silicon, Ion implantation, Semiconductors.

An ion-implant of boron-10 in silicon to be used as a depth-profiling standard for secondary ion mass spectroscopy is described. Neutron depth profiling measurements can be used to measure the total implanted dose. Pre-amorphization by implantation of silicon is used to eliminate channeling artifacts that are present in single crystal material. The measured SIMS profile of (10)B implanted at 50 keV into amorphous silicon agrees well with the results of a Monte Carlo simulation based on 100,000 ion trajectories. Neutron depth profiling has inadequate depth resolution to follow the profile shape accurately in this case.

Photoemission Study of High T(sub c) Oxides.

Final rept.

D. Mueller, A. Shih, L. E. Toth, M. Osofsky, S. A.

Wolf, R. L. Kurtz, and R. L. Stockbauer. 1987, 9p

Pub. in Novel Superconductivity, p829-837 1987.

Keywords: *Superconductors, Synchrotron radiation, Ultraviolet radiation, Reprints, *High temperature superconductors, *Yttrium barium cuprates, *Photoelectron spectroscopy, Electronic structure, Density of states, Photoemission.

A number of ceramic compounds including YBa₂Cu₃O₇ have been reported to superconduct at temperatures in excess of 35K. A critical feature in the processing of these compounds required to obtain good superconductive properties appears to be a final annealing stage in an oxygen containing atmosphere to increase the oxygen content of the materials. Without the oxygen anneal step, the superconducting transition temperature drops and the drop in the temperature versus resistance curve becomes less defined. To

aid in the development of a better understanding of the electronic structure in this class of materials, the authors have examined changes in the electronic density of states for $\text{YBa}_2\text{Cu}_3\text{O}(x)$ with oxygen content via ultraviolet photoelectron spectroscopy. Samples with $x = 6.95, 6.5,$ and 6.05 were examined.

Modeling of Critical Currents in Granular High-T(sub c) Superconductors.

Final rept.

R. L. Peterson, and J. W. Ekin. 1989, 6p

Pub. in Proceedings of Workshop on Materials Science of High (T sub c) Superconductors, Gaithersburg, MD., October 11-13, 1988, p190-195 1989.

Keywords: *Superconductors, Josephson junctions, Magnetic fields, Granular materials, Mathematical models, Reprints, *High temperature superconductors, *Critical current, Yttrium barium cuprates.

The transport critical current density of several samples of bulk sintered high-T(c) superconductors was measured at very low magnetic fields and fitted to a model which assumes that the impediments to current at such fields are Josephson weak links. A sample of particular interest was $\text{YBa}_2\text{Cu}_3\text{O}(x)$ made from hydroxycarbonate precursors; the final bulk sintered sample was very fine-grained, having an average grain size of about 1.8 micrometers as determined by a linear intercept analysis. The fit to the model is excellent if the average linear dimension of the weak links is chosen to be 2.0 micrometers. The authors conclude that this sample as well as the others has Josephson weak links at its grain boundaries, and that any intragrain defects which may be responsible for flux pinning are not the primary weak links limiting the transport J(c) of bulk samples at very low magnetic fields.

Magneto-Optical Investigation of Impurity and Defect Levels in HgCdTe Alloys.

Final rept.

C. L. Littler, D. G. Seiler, and M. R. Loloee. 1990, 6p
Pub. in Jnl. of Vacuum Science and Technology A 8, n2 p1133-1138 Mar/Apr 90.

Keywords: *Mercury tellurides, *Cadmium tellurides, *Magneto-optics, Semiconductors, Spectra, Activation energy, Point defects, Impurities, Electron transitions, Reprints.

It has been observed and described magneto-optical transitions between impurity/defect levels and conduction band Landau levels for a variety of n-type HgCdTe samples with $0.2 < x < 0.3$. The activation energies of the levels fall into two categories: (1) 10-12 meV above the valence band edge, independent of Eg and (2) two close spaced levels at approximately 0.5 Eg. In addition, the spectra of several narrow gap (Eg less than or equal to 100 meV) samples exhibit shallower and deeper acceptor-like levels.

Semiconductor Measurement Technology. EPROP: An Interactive FORTRAN Program for Computing Selected Electronic Properties of Gallium Arsenide and Silicon.

Special pub. (Final).

A. C. Seabaugh, J. J. Mathias, and M. I. Bell. May 90, 125p NIST/SP-400/85

Prepared in cooperation with Texas Instruments, Inc., Dallas.

Keywords: *Electrical properties, *Silicon, *Gallium arsenides, Semiconductors(Materials), Fermi surfaces, Computer programs, Tables(Data), *Computer applications, EPROP computer program.

A new computer program, EPROP (an acronym for Electronic PROPERTIES) is presented for use in interpreting measurements and experiments on gallium arsenide and silicon. EPROP computes a solution of the charge balance equation in thermodynamic equilibrium for up to six different impurities. The user supplies the density, energy level, and degeneracy for each impurity, and in response the program returns as many as 28 output parameters, such as the Fermi level, carrier density, and ionized impurity densities. These can be computed as functions of the temperature (or reciprocal temperature) or the density, energy, or degeneracy of any of the six possible impurities. Listings can also be obtained of various temperature-dependent parameters, such as the bandgap, densities of states, and effective masses. The interactive features of the program allow the user to send the output data to any combination of destinations: a terminal, a listing file, and/or up to four graphic output files, all at the user's direction. The user is also given freedom and ability to customize the data output to these destinations through menu-driven controls.

Analysis of SAS Data Dominated by Multiple Scattering.

Final rept.

N. F. Berk, and K. A. Hardman-Rhyme. 1988, 7p

Pub. in Jnl. of Applied Crystallography 21, p645-651 Dec 88.

Keywords: *Neutron scattering, *Neutron diffraction, Phase shift, Refraction, Reprints, *Small angle scattering, *Multiple scattering, Beam broadening.

Small angle scattering from powders, early-stage ceramics and other materials of technological interest often is dominated by multiple scattering. Such 'beam broadening' depends strongly on the wavelength of the incident radiation and in past has usually been associated with multiple refraction. Actually, wavelength-dependent intensities indicate incoherent multiple scattering in which the underlying single particle scattering may be in the diffractive, refractive or cross-over regime, depending on the value of the single particle scattering phase shift. In practice, the diffractive limit-identified theoretically with very small phase shifts--may be applicable even when the phase shift is not small. On one hand, the diffractive limit of single-particle scattering is a good approximation for phase shifts of order unity, while on the other, explicit effects of incoherent scattering render the beam broadening insensitive to the cross-over between diffractive and refractive scattering at larger phase shifts.

Automated Extraction of Regular Spot Arrays from Electron Diffraction Images.

Final rept.

D. E. Bright, and E. B. Steel. 1988, 14p

Pub. in Jnl. of Microscopy 150, p167-180 Jun 88.

Keywords: *Electron diffraction, Polycrystalline, Automation, Reprints, *Image analysis, Computer applications, Particulates.

Electron diffraction patterns of polycrystalline substances are routinely obtained for small sample areas by using the transmission electron microscope in the selected area diffraction mode. The paper emphasizes one aspect of analyzing electron diffraction patterns - automatically selecting spots in the pattern and determining the corresponding basis vectors. A computer method is described that isolates the zone axis diffraction pattern in diffraction images by selecting the spots that belong to one or more regular arrays. The method gives the basis vectors for the arrays which can then be used to identify the particles by comparison with standard diffraction data. This method has been applied to both simple zone axis diffraction patterns and complex patterns displaying combinations of overlapping zone axis patterns and patterns from randomly oriented grains commonly observed in agglomerates of fine particulate. The method works over a wide variety of typical diffraction problems and appears to be a rugged method for identifying basis vectors for orientation or phase identification.

Similarity and Bifurcation in Unstable Viscoplastic Shear.

Final rept.

T. J. Burns. 1989, 16p

Pub. in SIAM Jnl. on Applied Mathematics 49, n1 p314-329 1989.

Keywords: *Shear properties, Perturbation, Reprints, *Viscoplasticity, Instability, Bifurcation(Mathematics).

The linear stability of perturbed simple shear in a strain-softening viscoplastic material is analyzed on a finite time interval. An asymptotic study is made of the influence of two small parameters, which give the orders of magnitude of inertial and viscous effects. It is shown that these two coefficients are connected by a similarity parameter. Also, a criterion is derived for the minimum strain rate where the instability behavior changes from being independent to being dependent on the wavenumber of the Fourier component of a small initial perturbation.

Quantized Dissipative States at Breakdown of the Quantum Hall Effect.

Final rept.

M. E. Cage, G. M. Reedtz, D. Y. Yu, and C. T. Van Degrift. 1990, 4p

Sponsored by Department of Defense, Washington, DC., and Sandia National Labs., Albuquerque, NM. Pub. in Semicond. Sci. Technol. 5, p351-354 1990.

Keywords: *Hall effect, Electron gas, Dissipation, Reprints, *Quantum Hall effect, Aluminum gallium arsenides, Two dimensional.

The authors report the breakdown of the nearly dissipationless quantum Hall effect into a set of distinct, quantized dissipative states in a wide, high-quality GaAs/AlGaAs sample. They found 35 dissipative states on one plateau and 9 on another plateau which have longitudinal voltage drops accurately quantized in units of $(h \text{ bar})/(\omega \text{ sub } c)/e$ to within their $\pm 0.6\%$ measurement uncertainty. This voltage quantization implies that the energy dissipation per carrier is quantized in units of the Landau level spacing $(h \text{ bar})/(\omega \text{ sub } c)$.

Modification of Hydrogen-Passivated Silicon by a Scanning Tunneling Microscope Operating in Air.

Final rept.

J. A. Dagata, J. Schneir, H. H. Harary, C. J. Evans, M. T. Postek, and J. Bennett. 1990, 3p

Pub. in Applied Physics Letters 56, n20 p2001-2003, 14 May 90.

Keywords: *Silicon, Reprints, *Scanning tunneling microscopy, *Surface reactions, Modification.

The chemical modification of hydrogen-passivated n-Si (111) surfaces by a scanning tunneling microscope (STM) operating in air is reported. The modified surface regions have been characterized by STM spectroscopy, scanning electron microscopy (SEM), time-of-flight secondary-ion mass spectrometry (TOF SIMS), and chemical etch/Nomarski microscopy. Comparison of STM images with SEM, TOF SIMS, and optical information indicates that the STM contrast mechanism of these features arises entirely from electronic structure effects rather than from topographical differences between the modified and unmodified substrate. No surface modification was observed in a nitrogen ambient. Direct writing of features with 100 nm resolution was demonstrated. The permanence of these features was verified by SEM imaging after three months storage in air. The results suggest that field-enhanced oxidation/diffusion occurs at the tip-substrate interface in the presence of oxygen.

Critical Currents of High (T sub c) Superconductors: Pinning, Weak Links, Conduction, Anisotropy, and Contact Resistivities.

Final rept.

J. W. Ekin, R. L. Peterson, and S. L. Bray. 1989, 10p. Pub. in Proceedings of MRS (Materials Research Society) International Meeting on Advanced Materials 1988, Tokyo, Japan, v6 p135-144 1989.

Keywords: *Superconductors, Thallium inorganic compounds, Yttrium compounds, Transport properties, Electric contacts, Anisotropy, Reprints, *High temperature superconductors, *Critical current, Flux pinning, Weak links, Electrical conductivity.

The coherence length of high T(c) superconductors in the c-direction is much smaller than for conventional superconductors and the c-axis lattice spacing is several times larger. This intrinsic difference has significant consequences for transport properties. Crystallographic conduction anisotropy is a secondary limitation on critical current density J(c), but emerges as a prime determinant of transport J(c) in the absence of weak-link effects. The effect of conduction anisotropy on transport J(c) is described in terms of a current-transfer model. A summary is given of a method to achieve very low resistivity contacts with oxide superconductors. Low resistivity contacts have been fabricated with both yttrium and thallium based compounds.

Effect of a Crystal-Melt Interface on Taylor-Vortex Flow with Buoyancy.

G. B. McFadden, B. T. Murray, S. R. Coriell, M. E. Glicksman, and M. E. Selleck. Jul 90, 19p NISTIR-4364

See also PB90-130261. Prepared in cooperation with Rensselaer Polytechnic Inst., Troy, NY. Dept. of Materials Engineering.

Keywords: *Crystal growth, Solidification, Buoyancy, *Crystal-melt interface, *Taylor-Couette flow, Flow stability.

During crystal growth from the liquid, a fundamental problem is to understand the interaction of the crystal-melt interface with fluid flow in the liquid. This problem combines the complexities of the Navier-Stokes equations for fluid flow in the liquid with the nonlinear behavior of the free boundary representing the crystal-melt interface. Some progress has been made by studying explicit flows that allow a base state corresponding to a one-dimensional crystal-melt interface with solute and/or temperature fields that depend only on the distance from the interface. This allows the strength of the interaction between the flow and the interface to be assessed by a linear stability analysis of the simple base state. The case of a Taylor-Couette flow interacting with a cylindrical crystalline interface is currently being investigated both experimentally and theoretically. The authors consider the changes in the linear stability of this system produced by density-driven convection generated by the interaction of the density gradients with the gravitational and centripetal acceleration.

Proposed Study on the Effect of Sampling Bonding Techniques on the Measured Critical Current of Nb3Sn Superconductors.

Final rept.

L. F. Goodrich, and S. L. Bray. 1989, 11p. Pub. in Proceedings of Japan-U.S. Workshop on High-Field Superconducting Materials and Standard Procedures for High-Field Superconducting Materials Testing (6th), Boulder, CO., February 22-24, 1989, p99-108.

Keywords: Electrical measurement, Bonding, Reprints, *Niobium stannides, *Critical current, Interlaboratory comparisons.

The results of the recent VAMAS Nb3Sn critical-current round robin indicate that increased consistency in interlaboratory measurements might be achieved by a more detailed specification of the critical-current measurement technique. However, a competition exists between the benefit of a rigidly specified measurement technique, which insures measurement repro-

ducibility, and a less restrictive technique that would be practical for a greater number of laboratories. Ideally, the measurement technique should have the least number of restrictions that is consistent with measurement reproducibility. The proposal addresses only one aspect of the critical-current measurement technique, the sample-to-measurement-holder bonding method.

Magnetic Order and Spin Fluctuations in Oxide Superconductors.

Final rept.

J. W. Lynn. 1990, 6p

Pub. in Physica B 163, p69-74 1990.

Keywords: *Superconductors, Rare earth compounds, Barium oxides, Reprints, *High temperature superconductors, *Magnetic ordering, Lanthanum strontium cuprates, Neodymium cerium cuprates, Antiferromagnetic materials, Exchange interactions, Two dimensional.

A brief review is given of both the rare earth (R) and Cu magnetism in the RBa2Cu3O(6+x), RBa2Cu4O8, (La-Sr)2CuO4 and (Nd-Ce)2CuO4 systems. The Cu magnetism is dominated by the strong in-plane exchange interactions, which give rise to two-dimensional magnetic behavior in both the antiferromagnetically ordered insulating phase as well as in the superconducting state. The rare earth ions, on the other hand, order at low temperatures irrespective of the presence or absence of superconductivity. In the 1-2-3 and 2-4-8 materials, 2-d behavior is observed, while in the (Nd-Ce)2CuO4 system there is a substantial magnetic interaction between the Nd and Cu sublattices.

Two-Dimensional Magnetic Order of Er in ErBa2Cu3O7.

Final rept.

J. W. Lynn, T. W. Clinton, W. H. Li, R. W. Erwin, J. Z. Liu, R. N. Shelton, and P. Klavins. 1990, 3p

Pub. in Jnl. of Applied Physics 67, n9 p4533-4535, 1 May 90.

Keywords: *Superconductors, Neutron diffraction, Reprints, *Erbium barium cuprates, *Magnetic ordering, *High temperature superconductors, Antiferromagnetic materials, Onsager relations, Ising model, Order parameters, Two dimensional.

Neutron diffraction has been used to study the magnetic order of the Er ions in superconducting ErBa2Cu3O7. Above the three-dimensional (3D) Neel temperature $T(N) = 0.618 \text{ K}$ a rod of scattering characteristic of two-dimensional (2D) behavior is unambiguously observed, showing that the magnetic interactions of the rare earth ions are highly anisotropic, while there are no significant correlations observed between the sheets of Er spins. The system orders two dimensionally, and as a necessary consequence 3D order also sets in at the same temperature. The order parameter is found to obey the exact Onsager solution for a $S = 1/2$, 2D Ising antiferromagnet. At low T, two separate types of simple 3D antiferromagnetic structures are found, one characterized by a wave vector of $(1/2, 0, 0)$, and the other by $(1/2, 0, 1/2)$.

Final rept.

M. Rubinstein, L. J. Swartzendruber, L. H. Bennett, J. J. Ritter, and U. Atzmony. 1990, 3p

Pub. in Jnl. of Applied Physics 67, n9 p5029-5031, 1 May 90.

Keywords: *Superconductors, Mossbauer effect, Hyperfine structure, Reprints, *Yttrium praseodymium barium ferrate cuprates, *High temperature superconductors, Magnetic susceptibility, Magnetic ordering, Iron 57.

(57)Fe Mossbauer effect and magnetic-susceptibility measurements were performed on $Y(0.2)Pr(0.8)Ba_2(Cu(0.98)Fe(0.02))_3O(7-\delta)$ and $Y(0.8)Pr(0.2)Ba_2(Cu(0.98)Fe(0.02))_3O(7-\delta)$, where

delta approx = 0. The insulating 80% Pr compound showed susceptibility anomalies and a large hyperfine field distribution at low temperatures in addition to a hyperfine field spectrum for Fe on the Cu(2) sites. The superconducting 20% Pr compound displayed none of these effects at any temperature. After examining the alternatives, it is postulated that magnetic ordering of the Pr ions and an enhanced rare-earth transition-metal interaction due to f-electron admixture is responsible for these observations.

**Magnetic Properties of Pr in Non-Superconducting
PrBa2Cu3O7.**
Final rept.

S. Skanthakumar, W. H. Li, J. W. Lynn, A. Kebede, J. E. Crow, and T. Mihalisin. 1990, 3p
Pub. in *Physica B* 163, p239-241 1990.

Keywords: Neutron scattering, Inelastic scattering, Specific heat, Reprints, *Praseodymium barium cuprates, *Magnetic ordering, Antiferromagnetic materials.

The magnetic order and spin fluctuations of Pr in non-superconducting PrBa2Cu3O7 have been studied by specific heat, susceptibility and neutron scattering measurements. The neutron data show that the basic ordering consists of a simple antiferromagnetic arrangement, with an ordering temperature of about 17 K, while the specific heat data reveal a large value of the electronic specific heat coefficient gamma, comparable to heavy fermion like materials. The observed magnetic inelastic scattering shows a broad quasi-elastic response as a function of energy, similar to mixed valent-like systems. These results suggest that there is substantial f-electron character at the Fermi level in this material.

S. Skanthakumar, H. Zhang, T. W. Clinton, I. W. Sumarlin, W. H. Li, J. W. Lynn, Z. Fisk, and S. W. Cheong. 1990, 3p
Pub. in *Jnl. of Applied Physics* 67, n9 p4530-4532, 1 May 90.

Keywords: Neutron scattering, X ray diffraction, Single crystals, Tetragonal lattices, Phase transformations, Reprints, *Neodymium cuprates, *Magnetic ordering, Polarized beams, Antiferromagnetic materials.

Polarized and unpolarized neutron scattering techniques along with x-ray diffraction have been used to study the magnetic and structural properties of a single crystal of Nd2CuO4. Long-range magnetic order of the Cu moments develops at T(N) = 245 K, with a simple antiferromagnetic configuration of spins as found in La2NiO4, while the spin directions may be either collinear or noncollinear. Additional abrupt transitions are observed at 75 and 30 K, in which spin reorientations take place. Bragg peaks associated with the crystal structure are found at the same positions as the magnetic Bragg peaks, and indicate that a small distortion of the basic tetragonal structure has occurred above 300 K. At low temperatures the Nd moments also order antiferromagnetically (T(N) = 1.5 K), while an additional transition of a continuous nature is observed at 150 mK.

Two- and Three-Dimensional Magnetic Order of the Rare-Earth Ions in RBa2Cu4O8.
Final rept.
H. Zhang, J. W. Lynn, W. H. Li, T. W. Clinton, and D. E. Morris. 1990, 8p
Pub. in *Physical Review B* 41, n16, p11 229-11 236, 1 Jun 90.

Keywords: Neutron scattering, Magnetic anisotropy, Reprints, *Erbium barium cuprates, *Dysprosium barium cuprates, *Magnetic ordering, Antiferromagnetic materials, Two dimensional, Three dimensional.

Neutron scattering has been used to investigate the magnetic ordering of the rare-earth ions in the

ErBa2Cu4O8 and DyBa2Cu4O8 materials. For the Er system a simple three-dimensional (3D) antiferromagnetic structure is observed, in which the magnetic unit cell is twice the chemical unit cell along the a axis, with a Neel temperature T(N) about = 0.49 K. In the vicinity of the Neel temperature, however, scattering characteristic of two-dimensional behavior, indicative of the strong anisotropy of the magnetic interactions, is observed. The magnetic anisotropy arises naturally from the crystal structure, as the c-axis spacing of the magnetic ions is about 3 times the a-b spacing. 2D behavior is also observed in the Dy material near its Neel temperature of about 0.9 K. However, the scattering in the Dy system does not cross over to the expected 3D Bragg peaks at low temperatures, but rather the 2D line shape persists to the lowest temperatures measured.

New data are presented on the phase equilibria and crystal chemistry of the binary systems SrO-Bi2O3 and SrO-CuO and the ternary system SrO-Bi2O3-CuO. Symmetry data and unit cell dimensions based on single crystal and powder x-ray diffraction measurement are reported for all the binary SrO-Bi2O3 phases, including a new phase identified as Sr6Bi2O9. The ternary system contains at least four ternary phases which can be formed in air at about 900 C. These are identified as Sr2Bi2CuO6, Sr8Bi4Cu5O(19 + x) Sr3Bi2Cu2O8 and a solid solution (the Raveau phase) which, for equilibrium conditions at about 900 C, corresponds approximately to the formula Sr(1.8-x)Bi(22+x)Cu(1 + or - x/2)Oz(0.0 = or < about 0.15). Superconductivity in the phase apparently occurs only in compositions that correspond to negative values of x. Compositions that lie outside the equilibrium Raveau-phase field often form nearly homogeneous Raveau-phase products. Typically this occurs after relatively brief heat treatments, or in crystallization of a quenched melt.

Low-Profile High-Efficiency Microchannel-Plate Detector System for Scanning Electron Microscopy Applications.
Final rept.
M. T. Postek, W. J. Keery, and N. V. Frederick. 1990, 11p
Pub. in *Review of Scientific Instruments* 61, n6 p1648-1657 Jun 90.

Keywords: Backscattering, Efficiency, Line width, Reprints, *Scanning electron microscopes, *Microchannel electron multipliers, Secondary electrons.

A new design high-efficiency microchannel-plate detector and amplification system is described for use in the scanning electron microscope. This complete detector system consists of four basic units: the microchannel-plate detector; the video amplifier; the high-voltage power supply; and the control unit. The microchannel-plate detector system is efficient at both high and low accelerating voltages, and is capable of both secondary electron and backscattered electron detection modes. The size of the actual detector is approximately 3.5 mm in thickness and 25.4 mm in diameter. Thus, use of the detector system permits using almost all the sample chamber to accommodate large specimens with only the loss of the 3.5 mm of working distance. Another feature is that the system also employs a unique video amplifier where there are no active elements at high voltage. The microchannel-plate detector system enables the investigation of secondary electron induced contrast mechanisms and backscat-

tered electron detection at extremely low accelerating voltages even those below 1.0 keV.

Antiferromagnetic Ordering in Superconducting and Oxygen-Deficient Nonsuperconducting RBa2Cu3O(7-delta) Compounds (R = Nd and Sm).
Final rept.
K. N. Yang, J. M. Ferreira, B. W. Lee, M. B. Maple, W. H. Li, J. Lynn, and R. W. Erwin. 1989, 11p
Pub. in *Physical Review B* 40, n16 p10 963-10 972, 1 Dec 89.

Keywords: *Superconductors, Specific heat, Comparison, Reprints, *High temperature superconductors, *Neodymium barium cuprates, *Samarium barium cuprates, *Antiferromagnetic materials, *Magnetic ordering.

Low-temperature (0.5-4 K) specific-heat measurements have been made on oxygen-deficient (delta approx = 0.5) nonsuperconducting RBa2Cu3O(7-delta) (R = Nd and Sm) compounds and compared to measurements previously performed on their high-critical-temperature T(c) approx = 92 K superconducting counterparts (delta approx = 0.1). It is shown that the specific-heat anomaly due to magnetic ordering of the Nd(3+) and Sm(3+) ions in the T(c) approx = 92 K superconducting RBa2Cu3O(7-delta) (R = Nd and Sm) compounds can be well described by a two-dimensional anisotropic antiferromagnetic Ising model with exchange-interaction parameters E(1) and E(2) in the a-b plane; the respective values of the Neel temperature T(N) and the ratio E(1)/E(2) are 0.5 K and 50 for Nd and 0.61 K and 11 for Sm.

Effect of Gravity Modulation on Solutal Convection During Directional Solidification.
B. T. Murray, S. R. Coriell, and G. B. McFadden. Aug 90, 31p NISTIR-90/4389

Keywords: *Convection, Reduced gravity, Modulation, *Directional solidification, Binary alloys, Gravitational effects, Space processing, Floquet theory, Flow stability, Semiconductors.

During directional solidification of a binary alloy at constant velocity, thermosolutal convection may occur due to the temperature and solute gradients associated with the solidification process. For vertical growth in an ideal furnace (lacking horizontal gradients), a quiescent state is possible. For a range of processing conditions, the thermal Rayleigh number is sufficiently small that the stabilizing role of the thermal field during growth vertically upwards may be neglected, and only solutal convection need be considered. The effect of a time-periodic vertical gravitational acceleration (or equivalently vibration) on the onset of solutal convection is calculated based on linear stability using Floquet theory. It was found that a stable base state can be destabilized due to modulation, while an unstable state can be stabilized. The flow and solute disturbance fields show both synchronous and subharmonic temporal response to the driving sinusoidal modulation.

Solid State Physics

perconductors, *Yttrium barium cuprates, Electrical conductivity, Magnetic susceptibility, Elasticity.

A number of properties of superconducting ceramics have been measured and related to their microstructure and processing sequence. The $\text{YBa}_2\text{Cu}_3\text{O}_{7-\delta}$ ceramics were prepared by powder processing techniques, followed by dry pressing and sintering in both air and flowing oxygen at various temperatures. The sintered bodies were annealed at various temperatures and environments. Superconducting properties, such as the transition temperature and the width of the transition, were measured by both electrical conductivity and AC magnetic susceptibility; both of these properties show a strong sensitivity to annealing temperature and atmosphere. The microstructure and density were also strongly dependent on processing conditions. Mechanical properties, such as elastic modulus, hardness, and fracture toughness, which will be important for the reliable use of these materials in large scale structures, were also determined.

Directional Solidification of a Planar Interface in the Presence of a Time-Dependent Electric Current.

Final rept.
L. N. Brush, S. R. Coriell, and G. B. McFadden.
1990, 18p
Pub. in Jnl. of Crystal Growth 102, p725-742 1990.

Keywords: *Crystal growth, Indium antimonides, Bismuth, Gallium alloys, Bismuth alloys, Tin alloys, Peltier effect, Thermoelectricity, Reprints, *Crystal-melt interface, *Directional solidification, Germanium alloys, Binary alloys, Electromigration, Joule heating, Time dependence.

The authors develop a numerical method to study the motion of a planar crystal-melt interface during the directional solidification of a binary alloy in the presence of a time-dependent electric current. The model includes the Thomson effect, the Peltier effect, Joule heating and electromigration of solute in the coupled set of equations governing heat flow in the crystal and melt, and solute diffusion in the melt. For a variety of time-dependent currents, the temperature fields and the interface velocity are calculated as functions of time for indium antimonide and bismuth, and for the binary alloys, germanium-gallium and tin-bismuth. For the alloys, the authors also calculate the solid composition as a function of position, and thus make quantitative predictions of the effect of an electrical pulse on the solute distribution in the solidified material. In addition, for a sinusoidal current of small amplitude, the authors have compared the numerical solutions with approximate analytical solutions valid to first order in the current amplitude. By using this numerical approach, the specific mechanisms which play dominant roles in interface demarcation by current pulsing can be identified.

Synchrotron Radiation Studies of the Electronic Structures of High-T(sub c) Superconductors.
Final rept.
R. L. Kurtz. 1988, 14p
Pub. in AIP (American Institute of Physics) Conference Proceedings, n165 p222-234 1988.

Keywords: *Superconductors, Synchrotron radiation, Valence bands, Reprints, *High temperature superconductors, *Electronic structure, Lanthanum barium strontium cuprates, Yttrium barium cuprates, Photoemission.

Experimental measurements of the electronic structure of the high-T(c) superconductors $\text{La}_{2-x}(\text{Sr},\text{Ba})_x\text{CuO}_4$ and $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ are reviewed and discussed in the context of determining the strengths of the interactions within the valence bands. It is concluded that the Cu 3d - O 2p valence bands are highly hybridized and there are strong electron-electron correlations. It is shown that the $\text{Cu}(3+)$ configuration (3d⁸) is energetically unfavorable and the systems are best thought of as having an approximate valence of $\text{Cu}(2+)$. The influence of surface stoichiometry on the electronic structure is discussed, and preliminary molecular adsorption studies are reported.

Contract AFOSR84-0272
Sponsored by Air Force Weapons Lab., Kirtland AFB, NM.

Pub. in Proceedings of SPIE (Society of Photo-Optical Instrumentation Engineers) Laser Photoionization and Desorption Surface Analysis Techniques, v1208 p11-17 1990.

Keywords: *Crystal growth, Semiconductor devices, Gallium arsenides, Monitoring, Substrates, Silicon, Arsenic, Phosphorus, Reprints, *Molecular beam epitaxy, Laser induced fluorescence.

Investigations of III-V semiconductor growth by laser probing of the gas phase constituents represents a potential new technique for monitoring and improving molecular beam epitaxy. Laser-induced fluorescence (LIF) detection methods have now been devised to measure directly the number density of Ga and In atoms and As₂ dimer species during the deposition and growth. The studies are applied to the early stages of growth of III-V materials on Si(100). Additional techniques may be employed in the future to detect species such as As₄, P₄, and other minor dopants in various molecular forms. Laser detection is used here to make measurements on scattering and sticking coefficients, the rates and energetics of desorbing species, and state-resolved accommodation. Important islanding behavior is detected by measurements of the kinetics for certain constituents in the presence of others. These techniques will be of value in devising practical in situ optical diagnostics for molecular beam epitaxy of III-V semiconductor devices.

Sponsored by National Aeronautics and Space Administration, Washington, DC.
Pub. in Applied Mechanics Reviews 43, n5 pt2 pS70-S75 May 90.

Keywords: Crystal growth, Dendritic crystals, Solidification, Reprints, *Liquid-solid interfaces, *Silicon films, Laser heating, Instability, Boundary integral method.

Thin silicon films on a cooled substrate are often found to develop two-phase lamellar structures upon radiative heating. Jackson and Kurtz developed a two-dimensional model for the process in which the heated film consists of alternating parallel bands of liquid and solid phases separated by straight solid-liquid interfaces. To understand the cellular or dendritic structures that sometimes are observed in these interfaces, they also performed a linearized morphological stability analysis and obtained the conditions for the growth or decay of infinitesimal perturbations to the interface. In the work the authors extend that analysis to finite amplitudes by developing a boundary integral representation of the thermal field, and obtain numerical solutions for nonplanar solid-liquid interfaces.

Mathematical models, Reprints, *Bifurcation(Mathematics), Morphology, Liquid-solid interfaces, Landau factor.

The nonlinear instability of a two-dimensional single crystal of pure material growing from an undercooled melt is studied both analytically and numerically. The quasi-steady state approximation is used for the thermal fields and the effects of different solid and liquid thermal conductivities and isotropic surface tension are included. A bifurcation analysis is performed by calculating the instantaneous value of the fundamental component of the local normal growth speed for an interface perturbed by a single Fourier shape component. The base state is time dependent, and two bifurcation criteria are studied, the relative stability criterion according to which the time derivative of the ratio of the perturbation amplitude to the radius of the underlying circle vanishes, and the absolute stability criterion according to which the time derivative of the perturbation amplitude vanishes. Numerically, the fundamental component of the interfacial growth speed is found by Fourier analysis of the solution to an integro-differential equation (obeyed at the interface) which gives the instantaneous value of the local normal growth speed. Analytically, a weakly nonlinear expansion technique is used to derive a solvability condition at each bifurcation. Analytical and numerical results are in very close agreement, and therefore mutually corroborative. Landau coefficients are presented as a function of the various dimensionless parameters used in the model. Almost all of the bifurcations are subcritical.

Fundamental information about the structure of the valence band and the chemical valence states of the various constituents of the La-Sr-Cu, Y-Ba-Cu, Bi-Sr-Cu and Ti-Ca-Ba-Cu oxides have been obtained using photoelectron spectroscopy. These results show that the one-electron theories do not adequately describe the electronic structure of these superconductors. The atomic origins of the features observed in the valence bands have been investigated by studying photoemission resonances and changes in excitation cross-sections with photon energy. Results to date suggest that these materials have varying densities of states at the Fermi level, valence bands composed of O 2p and Cu 3d states, and display no significant changes in the band structure associated with the superconducting behavior when the temperature is lowered below T(c). In addition, the complex surface chemistry of these oxides makes it essential to study the surface stoichiometry and the interaction of simple molecules. O₂ and CO are found to interact only weakly with the sur-

faces of the materials studied to date, while the H₂O and CO₂ react strongly, forming hydroxides and carbonates.

Pub. in *Jnl. of Vacuum Science and Technology A* 8, n4 p3118-3122 Jul/Aug 90.

Keywords: *Atomic beams, *Etching, Thin films, Cryogenics, Reprints, *Fluorine atoms, Xenon fluorides, Laser radiation, Semiconductors, Vaporization, EV range 01-10.

Using laser vaporization of cryogenic films of XeF₂, a beam of F atoms is produced with most probable kinetic energy variable from 0.3 to 1.1eV. Fluorine atoms are observed with energies up to 4.3eV. Also present in the beam are F₂, Xe, XeF, XeF₂, and impurity H and HF. The beams are produced by vaporizing thin films of XeF₂ with 266 nm photons of a quadrupled Nd:YAG laser. The kinetic energy of the F atoms can be increased monotonically by decreasing the repetition rate of the vaporization laser from 1 to 0.1 Hz while the deposition rate of XeF₂ is constant. The relative velocities of the heavier species are always less than that of the F atoms, but their most probable energies are greater than the energy of the F beam. This result suggests that a hydrodynamic flow of the lighter species propels the heavier F₂, Xe, XeF, and XeF₂ particles to higher velocities. Evidence is presented that complete desorption of the XeF₂ film occurs within the vaporization area during each laser pulse, from which a desorption yield can be estimated. Such a source may be suitable for novel studies of anisotropic etching of semiconductor substrates with energetic reactive species.

Hydrodynamic and Free Boundary Instabilities during Crystal Growth: The Effect of a Plane Stagnation Flow.

Final rept.

G. B. McFadden, S. R. Coriell, and J. I. D. Alexander. 1988, 25p

Sponsored by National Aeronautics and Space Administration, Washington, DC.

Pub. in *Communications on Pure and Applied Mathematics*, vXLI p683-706 1988.

Keywords: *Crystal growth, Reprints, Crystal-melt interface, Flow stability, Stagnation flow, Free boundaries, Thermosolutal convection.

During freezing of a liquid containing solute, buoyancy-driven convection can occur due to thermal and concentration gradients. The crystal-melt interface is a free boundary and is subject to interfacial instabilities. During vertical directional solidification of a binary alloy, a quiescent flow state with a planar crystal-melt interface is possible, but may be unstable to convective and interfacial perturbations. The authors consider the effect of an imposed plane stagnation flow that impinges normal to the interface on the conditions for the onset of instability. For perturbations with wave vector perpendicular to the plane of the stagnation flow, the equations reduce to ordinary differential equations with variable coefficients which are solved numerically. For this class of perturbations and for fixed solute concentration in the crystal, the imposed stagnation flow stabilizes the system.

Keywords: *Superconductors, X ray absorption, Single crystals, Polarization, Reprints, *High temperature superconductors, *Praseodymium cerium cuprates, Doped materials, Band theory.

A polarization Cu K-edge x-ray absorption near-edge structure study has been carried out on Pr(2-x)Ce(x)CuO₄ single crystals. The spectra for x-ray polarization vector E nearly parallel to the crystal c axis suggest that electrons contributed by Ce doping are initially localized at the Cu site. The spectra for E perpendicular to the c axis exhibit an almost rigid edge shift to lower energies upon Ce doping. This suggests that the unoccupied in-plane Cu 4p states shift to lower energies. Therefore, the Ce doping donates electrons to the Cu site and also shifts the unoccupied 4p band. The authors propose that the upper unoccupied band consisting of predominantly Cu 3d states shifts downward and eventually joins the initially localized states near the Fermi level and thus, forms the conduction band in the n-type superconductor.

P. H. Chi, and D. S. Simons. 1990, 4p

Pub. in *Proceedings of Secondary Ion Mass Spectrometry Conference (SIMS VII)*, Monterey, CA., September 3-8, 1989, p127-130 1990.

Keywords: *Semiconductor doping, Concentration(Composition), Reproducibility, Impurities, Precision, Reprints, *Relative sensitivity factor, Doped materials.

The relative sensitivity factor (RSF), a parameter used to determine the concentration of dopants and impurities in semiconductors, can change significantly for repeated measurements of a single reference sample, although the instrument operating conditions are apparently kept unchanged. This spread in RSF values can result in a rather large imprecision for concentration determinations in unknown samples. The authors have made a systematic investigation of several factors that may affect the reproducibility of RSF measurements: sample holder factors (flatness of mask, type of window, crater position), spectrometer factors (energy band pass, peak shape), and element analyzed.

X-ray Photoelectron and Auger Electron Forward Scattering: A New Tool for Surface Crystallography.

Final rept.

W. F. Egelhoff. 1990, 23p

Pub. in *Critical Reviews in Solid State and Materials Sciences* 16, p213-235 1990.

Keywords: *Surfaces, Scattering, Crystal structure, Auger electrons, Photoelectrons, Adsorption, Epitaxy, Interfaces, Reviews, Reprints.

A critical review is given of a new technique, developed during the past several years, for surface crystallography. The technique is based on the observation that X-ray photoelectrons and Auger electrons with kinetic energies of a few hundred electron volts and above exhibit enhanced intensities along internuclear axes, or bond directions, connecting the emitting atom with its nearest and next-nearest neighbor atoms. This effect is an excellent diagnostic of whether or not an atom is in the top layer, and if not, it is an excellent diagnostic of the local structural environment around the emitting atom. As a new probe of short-range order, this technique finds important applications in areas such as the orientation of adsorbed molecules, epitaxial growth morphology, surface segregation, interdiffusion at interfaces, core-level binding-energy shifts, and electron escape depths.

X-ray Photoelectron and Auger Electron Forward-Scattering Studies of Lattice Expansions and Contractions in Epitaxial Films.

Final rept.

W. F. Egelhoff, I. Jacob, J. M. Rudd, J. F. Cochran, and B. Heinrich. 1990, 6p
Pub. in *Jnl. of Vacuum Science and Technology A* 8, n3 p1582-1586 May/June 90.

Keywords: *Lattice parameters, Auger electrons, Photoelectrons, Metal films, Manganese, Copper, Epitaxy, Expansion, Contraction, Reprints.

X-ray photoelectrons and Auger electrons emitted by atoms in a lattice undergo forward scattering by neighboring atoms during their propagation through the lattice. This forward scattering produces enhancements in the emission intensity along nearest-neighbor directions. In the present work, the directions of these enhancements are used to infer lattice expansions and contractions in epitaxial films. Epitaxial films of Mn grown on Cu(100) expand outwards and on Ag(100) contract inwards, as compared to a simple extension of the face-centered-cubic substrate lattice. Thus, in both cases, the Mn lattice is body-centered-tetragonal.

Pub. in *Jnl. of Materials Research* 5, n6 p1299-1340 June 90.

Keywords: Thin films, Interfaces, Reviews, Reprints, *Magnetism, Electron spin polarization, Surface magnetism, Epitaxial growth, Magnetic films, State of the art.

A comprehensive review and state of the art in the field of surface, interface, and thin-film magnetism is presented. New growth techniques which produce atomically engineered novel materials, special characterization techniques to measure magnetic properties of low-dimensional systems, and computational advances which allow large complex calculations have together stimulated the current activity in this field and opened new opportunities for research. The current status and issues in the area of material growth techniques and physical properties, characterization methods, and theoretical methods and ideas are reviewed. A fundamental understanding of surface, interface, and thin-film magnetism is of importance to many applications in magnetics technology, which is also surveyed. Questions of fundamental and technological interest that offer opportunities for exciting future research are identified.

Large Surface Anisotropies in Ultrathin Films of bcc and fcc Fe(001).

Final rept.

B. Heinrich, D. A. Steigerwald, K. B. Urquhart, S. T. Purcell, and W. F. Egelhoff. 1988, 6p
Pub. in *Jnl. of Applied Physics* 63, n8 p3863-3868 1988.

Keywords: *Iron, Magnetic anisotropy, Thin films, Metal films, Epitaxy, Whiskers(Single crystals), Reprints, *Magnetism, Superlattices, Multilayers, BCC lattices, FCC lattices.

Large uniaxial anisotropies associated with interfaces are observed for ultrathin films (3-28 ML) of bcc Fe(001) grown epitaxially on Ag(001) single crystal substrates and for epitaxial sandwiches of fcc Fe(001) grown with 3 layers of Fe using Cu as substrate and coverlayers. Adequate treatment of spin-orbit coupling in magnetic theories remains a challenge. Comparisons of ultrathin films of bcc Fe(001) on Ag(001) with differing coverlayers of Ag or Au show subtle differences in magnetic behavior as studied by ferromagnetic resonance (FMR) and Brillouin light scattering (BLS). Comparison of the properties of films grown on perfect iron whisker surfaces with results for mosaic

single crystal substrates show that, while the former are much to be preferred for growth studies, the latter are really adequate for magnetic studies.

Crystal Structure, Atomic Ordering and Charge Localization in Pb₂Sr₂Y(sub 1-x)Ca_xCu₃O₈(sub 8 + delta) (x=0, delta=1.47).

Final rept.

M. Marezio, A. Santoro, J. J. Capponi, E. A. Hewat, and R. J. Cava. 1990, 12p
Pub. in *Physica C* 169, p401-412 1990.

Keywords: *Crystal structure, *Superconductors, Electron diffraction, Neutron diffraction, X ray diffraction, Reprints, *Lead strontium yttrium cuprates, *High temperature superconductors.

Neutron, X-ray and electron diffraction measurements have been carried out on Pb₂Sr₂Y(1-x)Ca_xCu₃O₈(8 + delta) samples. The oxygen incorporated in the structure during the oxidation is located on the (Cu) planes sandwiched between the two (PbO) layers. Pb₂Sr₂YCu₃O₈ becomes superconducting at about 80 K when some of the trivalent Y cations are replaced by divalent Ca. In this case the extra positive charges oxidize the Cu(2+) cations in the CuO₂ planes instead of Pb(2+) to 4+ and Cu(1+) to 2+, as does the incorporation of oxygen. This different behavior can be explained as a concentration effect which changes the oxidation/reduction potentials.

Pub. in *Proceedings MRS Spring Meeting High Temperature Superconductors*, Anaheim, CA., April 23-24, 1987, p173-175.

Keywords: *Superconductors, Research projects, Reprints, *High temperature superconductors, Yttrium barium cuprates, Naval Research Laboratory.

Since the middle of December 1986, the Naval Research Laboratory (and its collaborators) has had a program to study the new class of very high superconducting transition temperature copper oxides based on the perovskite structure. They have studied both the 40K superconductors based on the K₂NiF₄ structure consisting of La₂-zMxCuO₄ where M=Ba, Sr, and Ca, and the 95K superconductor based on the YBa₂Cu₃O₇ structure. The bulk samples were prepared using conventional powder ceramic processing technique from powders of the metallic oxides or carbonates and calcined in air at temperatures ranging from 950-1000 C. The samples were cold pressed into pellets and sintered in air and annealed in oxygen. Film samples are being prepared by sputtering, electron beam evaporation and chemical vapor deposition.

Low-Profile Microchannel-Plate Electron Detector System for SEM.

Final rept.

M. T. Postek, W. J. Keery, and N. V. Frederick. 1990, 2p
Pub. in *Proceedings of International Congress for Electron Microscopy* (12th), Seattle, WA., August 12-18, 1990, p378-379.

Keywords: *Electron microscopy, Electron scattering, Backscattering, Line width, Reprints, *Scanning electron microscopy, *Microchannel electron multipliers, Secondary electrons.

The microchannel-plate system described here provides an alternative to the E/T detection system and it is adaptable to any SEM. Based on the initial concept, complete MCP systems are now commercially available for most any instrument. The MCP system provides an ability to study signal and contrast forming mechanisms that have been unable to be viewed ear-

er, due to detector limitations, and opens up new research opportunities for the scanning electron microscope. The paper presents the results of work done with the system at both high and low accelerating voltage.

Anomalous Vibrations of Hydrogen Isotopes in beta-Phase Vanadium Hydride.

Final rept.

J. J. Rush, N. F. Berk, A. Magerl, J. M. Rowe, and J. L. Provo. 1988, 3p
Pub. in *Physical Review B* 37, n13 p7901-7903, 1 May 88.

Keywords: *Vibrational spectra, Deuterium compounds, Tritium compounds, Neutron scattering, Intensity, Abnormalities, Reprints, *Vanadium hydrides.

Hydrogen-isotope vibration spectra have been measured between 34 and 240 meV for beta-phase V₂H, V₂D, and V₂T by inelastic neutron scattering. The observed low-energy vibrational transitions reveal a strongly anharmonic potential in the ab plane which is both isotope and temperature dependent. The results cannot be explained by models recently proposed for the potential in V₂H. The unusual overlap of the low-energy isotope vibrations with the band modes suggests that any theoretical representation must take into account the complex interactions between these modes and the acoustic lattice vibrations.

180 deg Surface Domain Wall Magnetization Profiles: Comparisons between Scanning Electron Microscopy with Polarization Analysis Measurements, Magneto-Optic Kerr Microscopy Measurements and Micromagnetic Models.

Final rept.

M. R. Scheinfein, P. J. Ryan, J. Unguris, D. T. Pierce, and R. J. Celotta. 1990, 3p
Sponsored by Office of Naval Research, Arlington, VA. Pub. in *Applied Physics Letters* 57, n17 p1817-1819, 22 Oct 90.

Keywords: Kerr magneto-optical effect, Nickel rich permalloy, Magnetic anisotropy, Magnetostatics, Surfaces, Reprints, *Domain walls, Scanning electron microscopy, Electron spin polarization.

The authors compare measurements of magnetization profiles across a 180 deg surface domain wall in a 0.24-micrometer-thick Permalloy (Ni₈₁Fe₁₉), obtained with scanning electron microscopy with polarization analysis (SEMPA) and longitudinal magneto-optic (MO) Kerr microscopy with the predictions of a bulk micromagnetic theory. Both measurement techniques yield wall profiles in accordance with the predictions of micromagnetic theory. The authors conclude that for micromagnetic structure with relevant length scales on the order of tens of nanometers, SEMPA and MO Kerr microscopy yield equivalent quantitative micromagnetic information within the transverse spatial resolution limits of each technique. Near-surface effects such as enhanced surface moments, weakened surface exchange, and surface anisotropy are not important in determining the surface domain wall profiles that were observed.

Pub. in *Review of Scientific Instruments* 61, n10 p2501-2526 Oct 90.

Keywords: Magnetic recording, Magnetization, Polarization, Reviews, Reprints, *Surface magnetism, Scanning electron microscopy, Domain walls, Electron spin polarization, Sherman functions, SEMPA system.

The high spatial resolution imaging of magnetic microstructure has important ramifications for both fundamental studies of magnetism and the technology surrounding the magnetic recording industry. One technique for imaging surface magnetic microstructure on the 10-nm-length scale is scanning electron microscopy with polarization analysis (SEMPA). In the review article the authors review the important instrumental components characterizing the SEMPA system. Characteristics of the electron probe forming optics, electron spin-polarization analyzers with associated transport optics, and signal processing electronics are described. Emphasis on the fundamental design requirements are stressed. Data acquisition, storage, and processing, as it applies specifically to SEMPA, are reviewed. Instrumental artifacts specific to SEMPA are outlined, and techniques for their correction are given. Examples of magnetic images at high spatial resolution are shown.

Short Range Order in Submonolayer Ni on GaAs(110) by XPS Forward Scattering.
Final rept.
W. F. Egelhoff, D. A. Steigerwald, J. E. Rowe, and T. D. Bussing. 1988, 4p
Pub. in *Jnl. of Vacuum Science and Technology* 6, n3 p1495-1498 1988.

Keywords: *Monomolecular films, Gallium arsenides, Substrates, Nickel, Reprints, X ray photoelectron spectroscopy.

Angle-resolved x-ray photoelectron spectroscopy (XPS) has been used to examine the structural arrangement of atoms in submonolayer coverages of Ni on GaAs(110). Insights into the short-range order around a lattice atom are possible because the outgoing photoelectron diffracts off overlying lattice atoms. This diffraction contains a strong component of forward scattering that yields enhanced intensities along axes connecting the emitting atom to its overlying nearest and next-nearest neighbors. The authors have found that these enhanced intensities are observed in the Ni 2p core level for 0.1ML Ni on GaAs(110) after annealing to 300 C but are much weaker before annealing. The angles at which these enhanced intensities appear suggest that upon annealing the Ni atoms replace Ga and As atoms in the third layer from the surface and perhaps in the second layer. Replacement may also occur in the top layer but this would produce no forward scattering signature. Thus the authors' structural results are consistent with this being a reactive interface.

X-ray Photoelectron Spectroscopy/Ar(1+) Ion Profile Study of Thin Oxide Layers on InP.
Final rept.
S. Thurgate, and N. E. Erickson. 1990, 7p
Pub. in *Jnl. of Vacuum Science and Technology* A 8, n5 p3669-3675 Sep/Oct 90.

Keywords: *Indium phosphides, Reprints, *Oxide layers, X ray photoelectron spectroscopy, Ion bombardment, Argon ions, Surface reactions, KeV range 01-10.

The effect of incremental ion bombardment on the surface layers of an aqua regia etched InP sample was studied by monitoring the components of the In 3d (5/2) and O 1s x-ray photoelectron spectroscopy (XPS) lines as the sample was bombarded with low energy (1 keV) Ar (1+) ions. The analysis of the XPS lines showed that the InP substrate was damaged at very low ion doses, and finally decomposed by the ion beam. When the ion 'cleaned' sample was exposed to oxygen, a different oxide system was produced which consisted largely of In₂O₃ and InPO₄ (or In(PO₃)_x). This model of the oxidized surface of InP is consistent with other measurements and the authors conclude that ion milling together with XPS and careful curve fitting can be used to find the nature of the thin oxides on InP.

Magnetic-Field-Modulated Written Bits in TbFeCo Thin Films: Transmission Electron Microscopy Lorentz and Scanning Electron Microscopy with Polarization Analysis Studies.

Final rept.
M. Aeschlimann, M. Scheinfein, J. Unguris, F. J. A. M. Greidanus, and S. Klahn. 1990, 9p
Sponsored by Office of Naval Research, Arlington, VA.
Pub. in *Jnl. of Applied Physics* 68, n9 p4710-4718, 1 Nov 90.

Keywords: *Thermomagnetic effects, Polarization(Spin alignment), Magnetic recording, Cobalt alloys, Iron alloys, Terbium alloys, Magnetic domains, Metal films, Thin films, Reprints, Transmission electron microscopy, Scanning electron microscopy, Surface magnetism, Magnetic films.

Domains written thermomagnetically in TbFeCo thin films are studied with Lorentz transmission electron microscopy (TEM) and scanning electron microscopy with polarization analysis (SEMPA). Four different rare-earth/transition-metal compositions Tb(x)Fe(y)Co(1-x-y) are examined. It was found that the magnetic contrast in the SEMPA measurements is proportional to the magnetization of the transition-metal (TM) subnetwork which is antiferromagnetically coupled to the rare-earth (RE) subnetwork. This allows high-contrast SEMPA images to be acquired even when the system is magnetically compensated. The surface magnetization can be explained by assuming that the surface of the TbFeCo alloy consists of an outermost thin oxide layer followed by an Fe-rich subsurface layer. The importance of the demagnetizing field on the switching and domain nucleation process for thermomagnetically written bits is examined.

Magnetic Properties of Sandwiches and Superlattices of fcc Fe(001) Grown on Cu(001) Substrates.
Final rept.
J. R. Dutcher, W. F. Egelhoff, J. F. Cochran, D. A. Steigerwald, and B. Heinrich. 1988, 3p
Pub. in *Jnl. of Applied Physics* 63, n8 p3464-3466 1988.

Keywords: *Iron, Magnetic anisotropy, Ferromagnetic resonance, Light scattering, Substrates, Copper, Reprints, Brillouin effect, Superlattices, Magnetism.

The magnetic properties of Cu/Fe epitaxial sandwiches and superlattices have been measured using Brillouin light scattering and ferromagnetic resonance. All of the samples are perpendicularly magnetized at room temperature, due to the presence of large uniaxial anisotropies with an easy axis perpendicular to the sample surface. Inclusion of a second order uniaxial anisotropy term is particularly important for one of the superlattice samples.

See also PB90-149113. Sponsored by Department of Energy, Washington, DC. Office of Fusion Energy.
Pub. in *Advances in Cryogenic Engineering* Materials, v36 p117-124 1990.

Keywords: *Superconductors, *Holders, Electrical measurement, Contraction, Reprints, *Niobium stannides, *Critical current, Fiberglass reinforced composites, Temperature dependence.

It is typical for Nb₃Sn-Cu superconductor specimens to be wound into coils on tubular specimen holders is different that that of the specimen, axial strain may be applied to the specimen upon cooling from room to liquid-helium temperature. This strain can affect the measured critical current. The thermal contraction was measured for three different Nb₃Sn-Cu superconductors. Also, the thermal contraction was measured for several different specimen holders, all of which were made from fiberglass-epoxy composites. The results of these measurements show that the thermal contraction of tube stock is strongly dependent on the ratio of its wall thickness to its radius, while the con-

traction of tubes machined from plate stock is relatively independent of these dimensions. Critical-current measurements of Nb₃Sn-Cu specimens mounted on these various holders show that the presence of differential thermal contraction between the specimen and its holder can significantly affect the measured critical current.

Keywords: *Crystals, *Elastic properties, *Ultrasonic tests, Polycrystals, Single crystals, Mathematical models, Bulk modulus, Shear modulus, Stiffness, Simple cubic lattices, Copper, Reprints.

Considering only cubic symmetry (three independent monocrystal elastic-stiffness coefficients, C_{ij}), various models for converting the C_{ij} to the effective macroscopic quasiisotropic and homogeneous elastic constants, the bulk modulus, and the shear modulus. To test the models, a typical metal copper, was considered which possesses a moderate Zener elastic-anisotropy ratio, 3.19, and which was measured by pulse-echo dynamic (MHz) methods. The Hershey-Kroner-Eshelby and equivalent models work best. Using the H-K-E model, the effective polycrystalline elastic constants of twenty-five cubic elements were calculated.

L. J. Whitman, J. A. Stroscio, R. A. Dragoset, and R. J. Celotta. 1990, 4p
Sponsored by Office of Naval Research, Arlington, VA.
Pub. in *Physical Review B* 42, n11 p7288-7291, 15 Oct 90.

Keywords: *Indium antimonides, Surface properties, Reprints, *Scanning tunneling microscopy, Band theory, Semiconductors.

The (110) cleavage surface of InSb has been studied with scanning tunneling microscopy. A variety of surface defects has been observed, including those that appear to be simple vacancies and Schottky defects. Atomic-resolution images have been obtained of both the occupied- and unoccupied-state densities concentrated on the Sb anion and In cation, respectively. By simultaneously imaging both the occupied- and unoccupied-state densities, the relative positions of the In and Sb dangling bonds within the unit cell have been determined. As expected, the In state density is shifted with respect to the Sb state density by approximately one-half of a unit cell along the (bracket) (1,-1,0) (bracket) direction. Along the (bracket) (001) (bracket) direction, the In state density is displaced by approximately one-third of a unit cell, in good agreement with surface electronic structure and surface-buckling calculations. Measurements of the tunnel current versus voltage reveal conductance within the band gap associated with dopant-induced occupation of the conduction band.

The report describes the 1989 fiscal year programs of the Materials Reliability Division of the Institute for Materials Science and Engineering. It summarizes the principal accomplishments in three general research areas: materials performance, properties, and processing. The Fracture Mechanics, Fracture Physics, Nondestructive Evaluation, and Composite Materials groups work together to detect damage in metals and composite materials and to assess the significance of the damage with respect to service performance. The Cryogenic Materials and Physical Properties groups investigate the behavior of materials at low temperature and measure and model the physical properties of advanced materials, including composites, ceramics and the new high-critical-temperature superconductors. The Welding and Thermomechanical Processing groups investigate the nonequilibrium metallurgical changes that occur during processing and affect the quality, microstructure, properties and performance of metals. The report lists the division's professional staff, their research areas, publications, leadership in professional societies, and collaboration in research programs with industries and universities.

Finite Element Procedures for Large Strain Elastic-Plastic Theories.

Final rept.

J. D. Lee. 1988, 12p

Pub. in *Computers and Structures* 28, n3 p395-406
1988.

Keywords: *Finite element analysis, Lagrangian functions, Strains, Reprints, Virtual work, Elasticity, Plasticity.

In a unified approach, the virtual work equations in rate form and in incremental forms are derived rigorously for elastic-plastic continuum subjected to large strains. The finite element procedures for the analyses of elastic-plastic solid based on Lee's theory and Green-Naghdi's theory are presented. Also, it is shown that transformations can be performed among the Eulerian, the Total-Lagrangian, and the Updated-Lagrangian formulations, and among different forms of constitutive relations without any approximation.

See also PB87-132049.

Pub. in *Jnl. of the Acoustical Society of America* 81, n4
p952-960 Apr 87.

Keywords: *Rayleigh waves, Stress measurement, Elastic properties, Perturbation theory, Ultrasonic radiation, Phase velocity, Orthotropism, Surfaces, Plates, Reprints, Inverse problems.

A perturbation method is described for the investigation of the propagation of Rayleigh waves on the surface of a homogeneous anisotropic initially deformed material plate. The authors' perturbation formalism is quite general and can also be applied when other small effects, like slight temperature changes or external magnetic fields, affect the Rayleigh wave propagation velocity. The special cases of slight orthotropy and initial deformations are analyzed in detail. For these cases the authors derive the Rayleigh wave phase velocity as a function of the propagation direction, the elastic constants, and the initial stresses. The linearity of the authors' formulas suggests that Rayleigh waves can be conveniently used as an experimental technique for the solution of the inverse problem of determining the elastic constants and/or the initial stresses in a material.

Mechanics) Fall Conference on Experimental Mechan-
ics: Transducer Technology for Physical Measure-
ments, Grenelefe, FL., November 17-20, 1985*, p69-
75.

Keywords: *Crack propagation, *Tension tests, *Metal plates, Cracking(Fracturing), Test facilities, Dynamic tests, Stresses, Tensile properties, Strain gages, Tensile stress, Reprints.

Since September 1984, four wide plate crack arrest tests have been carried out on the 26 MN tensile capacity testing machine at the National Bureau of Standards near Washington, D.C. Each test has been different with respect to conditions of testing, specimen configuration, and instrumentation used to monitor the dynamic response of the specimen during the crack run and arrest event. The progressive changes in test procedure to be discussed represent attempts to obtain the desired crack run and arrest behavior and to improve the quality of the data collected. In particular, efforts to cause the initiation of crack propagation at lower stress intensity factors will be discussed. Also, the optimization of strain gage location and the final choice of recording instrumentation will be reported in detail. Two techniques for measuring crack velocity will be compared.

matics) News* 22, n2 p18-20 Mar 89.

Keywords: *Stress analysis, *Structural analysis, Thermal stresses, Heat transfer, Performance evaluation, Reprints, ANSYS 4.3 computer program, Personal computers, Computer software, Workstations, *Finite element method.

The paper is an experience report on a PC version of a general-purpose finite-element-analysis (FEA) code named ANSYS 4.3. The report is intended for three types of potential users: A Novice User who has a general idea of FEA but has never applied it to a problem on PC or otherwise; A Professional User who has applied a general-purpose FEA code on a non-PC computer, but has never tried a down-sized version of the code on a PC; and An Ultimate User who has written FEA codes for small-to-medium size problems in academic research or industrial consulting and is now thinking of tackling larger problems with more complicated geometry and material property inhomogeneities. It focuses on four technical criteria: The Start Up Effort; The PC Performance; The PC to Workstation Connection; and The Documentation.

83, 21p Rept no. NRL-MR-5241

Keywords: *Electron probes, *Monitors, *Electron beams, Current density, Mapping, Intensity, High energy, Mechanical properties, Electrical properties, Response, Temperature, Experimental data.

The authors describe a new type of electric probe for mapping the radial current density profile of high-energy, high current electron beams. The idea of developing an electrically sensitive probe for these conditions was originally suggested to one of the authors during a year's visit to the Lawrence Livermore Nation-

al Laboratory. The resulting probe is intended for use on the Experimental Test Accelerator (ETA) and the Advanced Test Accelerator at that laboratory. This report discusses in detail: the mechanical design, the electrical response, and temperature effects, as they pertain to the electric probe, and describe the first experimental results obtained using this probe on ETA.

A sup 3 He/Xe gas scintillation counter has been developed for measuring the neutron energy range from thermal to 3 MeV. Great effort was concentrated on improving the detector design to optimize light production and collection to improve the energy resolution which is primarily controlled by photon statistics. The detectors were tested using a sup 238 Pu alpha-particle source, a thermal neutron beam from the NBS reactor, and the white-neutron spectrum from the NBS linac. The detector measures an energy resolution of 17% (FWHM) for the sup 3 He(n,p)T reaction at 2.0 MeV which is sufficient for cross section measurement. 12 refs., 8 figs. (ERA citation 14:009024)

Keywords: *Uranium 235 Target, Cross Sections, Energy Dependence, Fission, Neutron Reactions, Nuclear Data Collections, US NBS, ERDA/652020, *Fission cross sections, *Standards.

The primary mission of the Neutron Interactions and Dosimetry Group at the National Bureau of Standards (NBS) is the measurement of the standard neutron cross sections. The group has had a long-term program for the measurement of one of the most important of these cross sections—the neutron-induced fission cross section of sup 235 U. Since the ENDF/B-VI evaluation has been recently released, it is appropriate

to review the measurements of the sup 235 U(n,f) cross section which have been made at the NBS using accelerator-based neutron sources. In the 0.1--20 MeV region where this cross section is a standard, six separate measurements of the differential cross section, using a variety of techniques have been made. Both the NBS 150-MeV Electron Linac and the 3-MV Positive Ion Accelerator have been used as neutron sources. Two of the measurements are relative to the H(n,p) cross section while the remainder are absolute. These measurements will be reviewed and compared to ENDF/B-VI. The current status of this program and possible future improvements will be discussed. 11 refs., 3 figs., 1 tab. (ERA citation 14:009990)

Measurement of the Sup 235 U(N,F) Reaction from Thermal to 1 KeV.

R. A. Schrack. 1988, 4p CONF-880546-41
Contract AI01-86ER40275
International conference on nuclear data for science and technology, Mito, Japan, 30 May 1988.
Paper copy only, copy does not permit microfiche production.

Keywords: *Uranium 235 Target, Boron 10, Comparative Evaluations, Cross Sections, Electronic Circuits, Fission, Ionization Chambers, Neutron Reactions, Time-of-Flight Method, ERDA/652020, *Fission cross sections.

The neutron induced fission cross section for sup 235 U has been measured from .02 to 1000 electron volts at the NBS electron LINAC facility. This cross section, especially the integrals from 7.8 to 11 eV and from 100 to 1000 eV, is incorporating both the sup 235 U foils and the sup 10 B foils used to monitor the neutron beam was built. The geometry of the chamber and the data taking system are designed to give the effect of a common environment and flight path so as to reduce or eliminate background and energy assignment problems. The shape measurements were normalized at thermal. Results are compared to other recent measurements and ENDF/B-V. 5 refs., 9 figs., 3 tabs. (ERA citation 14:009989)

Keywords: *RF Systems, *Racetrack Microtrons, Calibration, Control Systems, Electron Beams, Performance, ERDA/430303.

The high power RF system of the NIST-LANL RTM has been tested at nominal full power levels and has accelerated electron beams successfully. RF stability and calibration measurements have been made using the accelerated electron beam. These measurements have been used to calculate the effective shunt impedance of the side-coupled accelerator structure. RF stability measurements were also performed using power meters and phase detectors. 7 refs., 4 figs.

Keywords: *Racetrack Microtrons, Beam Emittance, Beam Transport, Design, Electron Beams, Klystrons, Performance, RF Systems, ERDA/430200, ERDA/430100.

The NIST-Los Alamos Racetrack Microtron (RTM) is designed to deliver a low-emittance electron beam of up to 0.5 mA cw over an energy range of 17 MeV to 185 MeV. Fed by a 5 MeV injector, the RTM contains two 180 degree end magnets that recirculate the beam up to 15 times through a 12 MeV RF linac. The linac, which operates in a standing-wave mode at 2380 MHz, has been tested to nearly full RF power. At present, the injector has undergone beam tests, and the beam transport system is complete through the 12 MeV linac. A temporary beam line has been installed at the exit of one end magnet to measure the beam energy, energy spread, and emittance after one pass through the accelerator. Preliminary results indicate that the accelerated beam energy spread and emittance are within design goals. 4 refs., 7 figs.

New determination of the fine-structure constant. Final report.
1989, 4p DOE/ER/40282-T1
Contract AI01-86ER40282
Sponsored by Department of Energy, Washington, DC. Portions of this document are illegible in microfiche products.

Keywords: *Quantum Electrodynamics, Accuracy, Calibration, Comparative Evaluations, Current Density, Impurities, Josephson Effect, Lasers, Magnetic Fields, Measuring Methods, Real Time Systems, Sampling, Stability, Structural Models, Technology Assessment, Variations, EDB/657002, *Fine structure constant, *Fundamental constants.

This report, submitted by the Electricity Division of NIST, is to summarize the work performed under contract DE-AI01-86ER40282 and represents a new experimental determination of the fine-structure constant (alpha), to the accuracy of 3.7 parts in 10(sup 8) (0.037 parts per million or ppm). The success of this experiment enabled the unequivocal testing of quantum electrodynamic theory (QED) to the same level of accuracy through the comparison of experimental and theoretical values of QED dependent quantities. These are the anomalous magnetic moment of the electron, a(sub e), the hyperfine splittings in muonium and positronium, and various Lamb shifts in hydrogen and helium. In view of the importance of quantum electrodynamics to our understanding of atomic, molecular, and particle physics, such critical comparisons have immense potential for confirming QED.

Quadratic Zeeman Effect in Moderately Strong Magnetic Fields.
Final rept.
S. L. Coffey, A. Deprit, B. Miller, and C. A. Williams.
1987, 15p
Pub. in Annals of the New York Academy of Sciences 497, p22-36 May 87.

Keywords: *Zeeman effect, Molecular spectroscopy, Celestial mechanics, Orbits, Reprints, Bifurcation(Mathematics), Chaos.

A compound reduction, first by the Delaunay group and then by the group of rotations about the direction of the magnetic field, establishes that the phase space consists of a two-parameter bundle of two-dimensional spheres. On each sphere, the north pole which represents a class of circular orbits is an equilibrium in the phase flow; it is stable as long as the projection H of the angular momentum along the magnetic field is greater than L/5, L being the second integral resulting from the elimination of the mean anomaly. At the critical value H = L/5, there occurs a Hopf bifurcation: the circular orbits become unstable while there appear two families of stable equilibria representing elliptic orbits whose semi-major axis is perpendicular to the line of nodes. Chaos is likely to set off along the homoclinic orbits asymptotic to the unstable equilibria.

Systematics of X-ray Transition Energies for High-Z Atoms.
Final rept.
R. D. Deslattes, E. G. Kessler, Y. K. Kim, and P. Indelicato. 1987, 5p
Pub. in Jnl. of Physics Colloquium 1, nC9 p591-595 1987.

Keywords: *Electron transitions, *X-rays, Atomic energy levels, Reprints, Forbidden transitions.

Experimental and theoretical x-ray transition energies are precisely estimated and compared for 40 < Z < 100. All allowed and forbidden intervals for the n=1 to n=2, 3 levels are determined. The experimental values are derived from absolute wavelength measurements of K (alpha) and K (beta) transitions and from L series x-ray measurements. The theoretical values are obtained using a multiconfiguration Dirac-Fock code with some modifications in the Lamb shift calculations. Comparison between experiment and theory for Z < 85 now provides a more coherent qualitative picture.

The beamline at the NSLS (Brookhaven) was designed for a class of doubly differential experiments in

PHYSICS

General

which spectra produced in response to tunable monochromatic photon excitation could be analyzed with high spectroscopic resolution. An important motivation is associated with satellite diagnostics, the contribution of double (and multiple) vacancy excitation to absorption profiles and the production of satellite-free spectra. While these phenomena are primarily associated with thresholds for double vacancy production, other interesting processes occur in the single vacancy threshold region. Included are new results on resonant elastic and inelastic (RAMAN) processes. At high resolution and with one, two or more sub-threshold resonances, Raman spectra display a particularly rich phenomenology.

Atomic Transition-Probability Measurements for Prominent Spectral Lines of Neutral Nitrogen.
Final rept.
Q. Zhu, J. M. Bridges, T. Hahn, and W. L. Wiese.
1989, 6p
Pub. in Physical Review A 40, n7 p3721-3726, 1 Oct 89.

Keywords: *Spectral lines, Transition probabilities, Electric areas, Reprints, *Nitrogen atoms.
Relative transition probabilities of 29 lines belonging to the 3s-3p, 3s-4p, 3p-3s(double prime), and 2s2p(4) - 2s(2)sp(2)4p transition arrays of N I have been measured in emission with a wall-stabilized arc and were normalized to an absolute scale utilizing two recent lifetime results. The experiment was undertaken to help resolve some long-standing discrepancies in the nitrogen data. The results are usually slightly larger than two earlier emission measurements but are in closer agreement with recent calculations. The total uncertainties of individual transition-probability values are estimated not to exceed a range from plus or minus 12% to plus or minus 15%, the larger uncertainties occurring for the very weak lines.

Interim Thermodynamic Property Formulation for Air.
Final rept.
R. T. Jacobsen, R. B. Stewart, S. G. Penoncello, and
R. D. McCarty. 1987, 16p
Pub. in Fluid Phase Equilibria 37, p169-184 Oct 87.

Keywords: *Air, *Thermodynamic properties, Density, Equations of state, Thermodynamics, Pressure, Temperature, Dew point, Liquid saturation, Boiling points, Bubbles, Reprints.
A new interim formulation for the thermodynamic properties of air which includes estimated properties for the liquid is reported. Separate equations for the calculation of bubble point and dew point properties are included. The need for further measurements of liquid air properties and of properties on and near the dew point curve and bubble point curve to provide the basis for a new accurate correlation is summarized. Vapor properties are believed to be sufficiently accurate for design and analysis work, except near the dew point curve, but no substantiated claim for the accuracy of the calculated liquid properties can be made.

Also available from Supt. of Docs. See also PB87-165585. Sponsored by Department of Energy, Washington, DC. Div. of High Energy Physics.

Keywords: *Superconducting magnets, Electromechanics, Tensile stress, Bending stress, Steels, Magnetization, *Superconducting cables, *High energy physics, Superconducting super collider, Niobium titanium, Critical current.

The report presents data on superconductor performance under mechanical load. The data are needed for setting mechanical design constraints and measuring the electromechanical performance of NbTi superconductors for DOE high-energy physics magnet applications. Highlights of the report include the following: The first measurements of the effect of axial tensile stress, applied at room temperature, on the critical current of NbTi superconductor strands have been measured. A study of the critical-current variations along NbTi strands extracted from a Rutherford cable has been made. A systematic study of the effects of bending strain on the critical current of NbTi conductors has been performed. Many high-energy-physics accelerators use high-permeability steel for the return flux path of the superconducting magnets. Measurements of the permeability, saturation magnetization, and intrinsic coercivity of several high-permeability steel alloys were made.

Measuring the Root-Mean-Square Value of a Finite Record Length Periodic Waveform.

E. C. Teague. 1989, 5p
Included in *Jnl. of Research of the National Institute of Standards and Technology*, v94 n6 p367-371 1989.

Keywords: *Waveforms, *Surface roughness, Measurement, Profiles, Random error, Root mean square value, Uncertainty.

The paper presents a discussion of the uncertainty in measuring the root-mean-square, rms, value of a periodic waveform which results from the use of a finite record length. The analysis was motivated by seeking to understand the source of a random uncertainty component which was present in some measurements of the absolute arithmetic average, R_{sub} a deviation from a mean line of profiles of precision roughness specimens. The profiles of these specimens had an approximately triangular waveform with two wavelengths and amplitudes. For the longer wavelength specimens the random phasing of the waveform with respect to the recording interval proved to be a major source of uncertainty in the measurements.

Prompt Gamma as a Fluence Rate Monitor in Neutron Beam Experiments.

Final rept.
G. P. Lamaze, D. M. Gilliam, and A. P. Williams. 1988, 9p
Sponsored by Department of Energy, Washington, DC., and Institut Max von Laue - Paul Langevin, Grenoble (France).
Pub. in *Jnl. of Radioanalytical and Nuclear Chemistry* 123, n2 p551-559 1988.

Keywords: *Neutron beams, Neutron reactions, Neutrons, Reprints, *Neutron fluence, Boron 10 target, Gamma detection, Lithium 7, Lifetime.

The $(10)\text{B}(\alpha,n)$ reaction is a commonly used reaction for measuring neutron fluence rates and is considered a 'standard' reaction below 100 keV neutron energy. This reaction has a large, well-known thermal cross section and its departure from $1/v$ behavior is about 3 parts in 10000. The principal alpha branch is to the first excited state of $(7)\text{Li}$ which then decays by emission of a 478 keV gamma ray. The alpha particles can be measured with surface barrier detectors or both recoil particles can be measured with a gas proportional counter. Energy loss of the emitted alpha particles restricts the former to thin samples and wall- and end-effects reduce the accuracy of the latter. However, the measurement of the gamma branch can be made with boron samples that totally absorb thermal neutrons. This allows greater sensitivity and eliminates the uncertainty of target thickness. The absolute efficiency of the gamma(γ) detector can be measured by an alpha-gamma coincidence technique or with a calibrated $(7)\text{Be}$ source. Preliminary investigations of this method are presented with a discussion of the problems that must be overcome. Application of this method to a new measurement of the neutron lifetime are discussed.

Stability of a Current-Carrying Hollow Liquid-Metal Cylinder.

Final rept.
R. A. MacDonald. 1989, 7p
Pub. in *Jnl. of Applied Physics* 66, n11 p5302-5308, 1 Dec 89.

Keywords: Electric current, Reduced gravity, Dispersion relations, Liquid metals, Stability, *Liquid metal cylinders, High temperature.

An investigation of the factors that influence the stability of a conducting hollow liquid-metal cylinder in a microgravity environment is carried out for the particular configuration in which a fraction of the current in the cylinder is returned down a central conducting rod. The analysis assumes that axial symmetry is maintained, that at any instant the cylinder is at a uniform temperature, and that the liquid metal is incompressible and inviscid. Vibrations in which the inner and outer boundaries of the cylinder move in phase are found to be always stable. The out-of-phase modes are unstable for long wavelengths, but these unstable modes can be excluded by a suitable choice of the length and thickness of the cylinder. The relationship of this analysis to the recent results of Chow and Harvanek on electromagnetic capillary instabilities in a hollow liquid-metal cylinder is discussed.

Multiple-Scattering Angular Deflections and Energy-Loss Straggling.

Final rept.
M. J. Berger, and R. Wang. 1988, 36p
Sponsored by Department of Energy, Washington, DC. Pub. in *Monte Carlo Transport of Electrons and Photons*, Chapter 2, p21-56 1988.

Keywords: *Electron scattering, Scattering cross sections, Inelastic scattering, Elastic scattering, Monte Carlo method, Water, Reprints, *Electron transport, Energy losses.

The paper deals with Monte Carlo models of electron transport in which, for the sake of economy, the simulation of all successive Coulomb collisions is replaced by the sampling of multiple-scattering angular deflections and energy losses in successive short track segments. The authors review some of the required input cross sections, as well as the applicable multiple-scattering theories. Among the topics discussed are: the calculation of elastic scattering cross sections with screened Coulomb potentials (Thomas-Fermi, Hartree-Fock and solid-state); comparisons of the multiple-scattering distribution of Moliere with that of Goudsmit and Saunderson; contribution of inelastic scattering to multiple-scattering deflections; development of an energy-loss cross-section database for water; use of this database in a Monte Carlo calculation of energy-loss straggling, and comparisons with straggling distributions from the Landau theory.

NBS (National Bureau of Standards) Ionizing-Radiation Measurement Services.
 Final rept.
 D. D. Hoppes. 1987, 11p
 Pub. in 'Innovation: Key to the Future,' NCSL Workshop and Symposium Technical Presentations, Denver, CO., July 12-16, 1987, p70-1-70-11.

Keywords: *Dosimetry, Ionizing radiation, Alpha particles, Neutrons, Radioactivity, Reprints, *Calibration, Electron dosimetry, Gamma dosimetry, X-ray dosimetry, Radioisotopes, National Institute of Standards and Technology.

Calibrations offered within the Ionizing Radiation Division of the NBS Center for Radiation Research involve dosimetry of x rays, gamma rays, and electrons; dosimetry for high dose applications; measurement of neutron sources and dosimeters; and activity measurements of radionuclides. Each of these services has evolved from the establishment and maintenance of national standards, usually with a strong and continuing link to measurements made in other nations. Reports now being published describe in detail the bases, techniques, and uncertainties of each type of calibrations service. Even when demand does not warrant a calibration service, or while such a service is being developed, special tests are a way of propagating the national standards. Where formal measurement-assurance programs or accreditations do not exist, special cooperations or Research Associate arrangements offer a way of confirming the measuring ability of commercial firms or other government agencies. Existing examples from the Radioactivity Group will be discussed.

 Pub. in Microbeam Analysis, p20-21 1987.

Keywords: *X ray spectrometers, *Bremsstrahlung, Mathematical models, Reprints, Si semiconductor detectors.

Recently the authors published an empirical model describing the generation of bremsstrahlung x-radiation as a function of the atomic number of the target, z, x-ray energy, E_v , and electron energy, E_o . This model was developed for pure-element targets excited by 10-40 keV electrons. It was based on the fitting of a high quality data set where great care was taken to insure that the detector was operating properly and that the spectra were free from obvious artifacts. The objective of this paper is to determine the applicability of the model to other detector systems. The results of the comparison to a second detector system indicate that the model can be used to accurately predict brems-

strahlung intensities from a second experimental setup.

 Pub. in Physical Review A 39, n6 p2888-2898, 15 Mar 89.

Keywords: *Fundamental constants, *Dimensional measurement, Atomic physics, Hydrogen, Spectra, Length, Standards, Reprints, *Rydberg constant, Meter.

A detailed report on the current status of measurements of the Rydberg constant is given. The authors' recently reported value of $R(\text{sub infinity}) = 109737.31573(3)/\text{cm}$ has been confirmed by three other laboratories within experimental error. An additional check on the iodine cell, the heart of the authors' wavelength and frequency reference, confirms a negligible pressure shift. The possible role of the Tydberg constant in fundamental atomic physics lies in tests of quantum electrodynamics and in improvement of the realization of the meter. The authors propose that the hydrogen spectrum be used to realize the meter in the optical domain, as an alternative to the current frequency chains. For the realization to be useful, improvement of the current precision of the Rydberg constant by a factor of 2 or more is required.

 Pub. in Physical Review C-Nuclear Physics 35, n4 p1382-1387 1987.

Keywords: Differential cross sections, Reprints, *Holmium 165, Pion plus reactions, Charge exchange reactions, Isobaric nuclei, Deformed nuclei.

Forward-angle differential cross sections for the $(165)\text{Ho}(\pi^+, \pi^0)(165)\text{Er}(\text{IAS})$ reaction have been measured at $T(\pi) = 98.0, 163.2$ and 228.3 MeV in the angular range $2 \text{ degree} \leq \theta < \theta_0 < 14 \text{ degree}$. The shapes of the angular distributions at 98.0 and 163.2 MeV are compared to predictions arising from the strong absorption model of pion single-charge exchange scattering. Extrapolated 0 degree cross sections are compared with trends previously established with mostly spherical and near-spherical nuclei. The measurement demonstrates the possibility of using the (π^+, π^0) reaction for studying neutron density deformations in oriented $(165)\text{Ho}$.

Bremsstrahlung Radiation Emitted in Fast-Electron-H Atom Collisions.
 Final rept.
 A. Dubois, and A. Maquet. 1989, 10p
 Pub. in Physical Review A 40, n8 p4288-4297, 15 Oct 89.

Keywords: *Bremsstrahlung, Cross sections, Reprints, *Electron-atom collisions, *Hydrogen atoms, Born approximation.

A previous calculation for free-free transitions is generalized so as to treat one-photon (spontaneous) bremsstrahlung emitted in the course of collisions of relatively fast electrons with atomic hydrogen. While the electron-atom collision is described within the first Born approximation, the role of the atomic spectrum is taken into account exactly via the use of a compact representation of the Coulomb Green's function. The authors discuss the main features of the cross sections and address some physically relevant issues such as the importance of the screening by the atomic electron, the role of the atomic structure, and limiting cases such as the soft-photon and the small-momentum transfer limits. They also discuss the differences observed between the cross sections for spontaneous bremsstrahlung and stimulated free-free transitions.

**Two-Phase Heat Transfer in the Vicinity of a Lower
Consolute Point.**

Final rept.
M. C. Jones. 1989, 18p
Pub. in *Supercritical Fluid Science and Technology*,
ACS (American Chemical Society) Symposium Series
406, Chapter 25, p396-413 1989.

Keywords: *Heat transfer, *Two phase flow, *Condensing, Heat transfer coefficient, Mixtures, Supercritical flow, Carbon dioxide, Experimental data, Thermodynamic equilibrium, Reprints, Binary mixtures, Supercritical state, Vapor condensation.

Experimental measurements of heat transfer coefficients are reported for three binary mixtures near their lower consolute points. Two of these, respectively n -pentane and n -decane in solution with supercritical CO_2 , involve vapor-liquid equilibrium whereas the third, triethylamine-water, involves liquid-liquid equilibrium. Anomalously high heat transfer coefficients were found for the supercritical mixtures at compositions which condense on heating (retrograde condensation). These are attributed to thermocapillarity, and criteria are proposed for the values of dimensionless parameters which would indicate its presence. For cases considered, numerical values support this explanation. Additional support is provided by photographic evidence.

p2257-2269 Nov 89.

Keywords: Metastable state, Helium, Ionization, Reprints, *Atomic collisions, Atom traps, Laser cooling, Ultracold atoms, Penning effect.

Collisions of ultracold atoms can now be investigated in the laboratory at temperatures below 0.001 K. Such collisions are qualitatively different in many ways from collisions at normal energies, where $T \gg 1$ K, because of the long time and distance scales associated with such collisions. Spontaneous emission can strongly modify collision dynamics of excited-state species produced by near-resonant optical excitation if the temperature is less than the characteristic temperature $T(S)$, where the collision time is comparable with the spontaneous-emission lifetime. The authors also estimate the temperature $T(Q)$ that is characteristic of the onset of quantum threshold behavior, where the WKB approximation fails to apply as the de Broglie wavelength becomes large. It was found that $T(Q)$ is generally larger than $T(D)$, the Doppler cooling limit, except for collisions controlled by long-range potentials varying as $1/R$ cubed. $T(Q)$ may be larger or smaller than $T(S)$. Expressions for estimating the magnitude of rate coefficients in the $T \rightarrow 0$ limit are given.

Capture of Inner-Shell Electrons in the Strong-Potential Born (SPB) Approximation.

Final rept.
H. Marxer, and J. S. Briggs. 1989, 2p
Pub. in *Z. Phys. D - Atoms, Molecules and Clusters* 13,
p75-76 1989.

Keywords: *Electron capture, Reprints, Strong potential Born approximation, Electron-proton interactions, K shell.

For the first time the capture of inner-shell electrons by protons is calculated by the SPB method without further approximation and using Hartree-Slater wavefunctions. The resulting cross-section has roughly the correct shape, but is much too large. The problem is traced to a loss of normalization caused by the SPB approximation. A suitably renormalized SPB gives close agreement with experiment.

Velocity Distributions from the Fourier Transforms of Ramsey Line Shapes.

Final rept.
J. H. Shirley. 1989, 6p
Pub. in *Proceedings of Annual Symposium on Frequency Control* (43rd), Denver, CO., May 31-June 2, 1989, p162-167.

Keywords: Frequency standards, Atomic beams, Fourier transformation, Accuracy, Reprints, *Ramsey line shapes, Velocity distribution.

A computerized method for finding velocity distributions from the Fourier transforms of Ramsey line shapes has been developed. Since atoms in certain velocity groups (those returning to their initial state) do not contribute to the lineshape, a single lineshape transform gives an incomplete picture of the velocity distribution. To bypass this problem, the author uses Ramsey lineshape data taken at different excitation powers so that these velocity groups will contribute. A weighted average of data from three powers gives satisfactory results.

Pub. in *Proceedings of Annual Symposium on Frequency Control* (43rd), Denver, CO., May 31-June 2, 1989, p143-150.

Keywords: *Atomic clocks, *Frequency standards, *Standards, Accuracy, Reprints, *Ion storage, Ion traps, Penning traps, Laser cooling, US NIST, Beryllium 9, Mercury 199.

Experiments at NIST, whose goal is to realize frequency standards of high accuracy using stored ions, are briefly summarized. In one experiment, an rf oscillator is locked to a nuclear spin-flip hyperfine transition (frequency approx = 3.03×10 to the 8 power Hz) in $(9)\text{Be}(1+)$ ions which are stored in a Penning trap and sympathetically laser-cooled. In a second experiment, a stable laser is used to probe an electric quadrupole transition (frequency approx = 1.07×10 to the 15 power Hz) in a single laser-cooled $(199)\text{Hg}(1+)$ ion stored in a Paul trap. The measured Q value of this

transition is approximately 10 to the 13 power. Future possible experiments are also discussed.

Analytical Method to Characterize the Performance of Multiple Section Straight-Sided Neutron Guide Systems.

Final rept.
J. R. D. Copley. 1990, 11p

Pub. in *Nuclear Instruments and Methods in Physics Research A* 287, p363-373 1990.

Keywords: Particle trajectories, Reflection, Performance, Reprints, *Neutron guides, Acceptance diagrams.

A method is presented to determine the trajectories of neutrons in multiple section straight-sided neutron guide systems. Nonreflecting sections can be handled, as well as reflecting sections with less than 100% reflectivity. It is also possible to trace the paths of neutrons which pass through a nonabsorbing guide surface, having been incident at an angle greater than the critical angle for reflection from the surface. Transverse displacements and angular misalignments between sections are readily included. The behavior of systems with nonuniform illumination can be determined. The approach, as presently formulated, is limited to one lateral dimension. A number of practical examples of the use of the method are described.

Hydrogen Treatment of Stark Effects in Rydberg Atoms.

Final rept.
D. A. Harmin. 1985, 30p
Pub. in *Atomic Excitation and Recombination in External Fields*, p39-68 1985.

Keywords: *Hydrogen, *Stark effect, Atomic spectra, Electric fields, Reprints, Rydberg series.

In an overview of the effects of constant electric fields on atomic spectra, particular emphasis is placed on hydrogen. Nonhydrogenic core interactions modify the spectra through the mixing of quasi-discrete and continuous channels. Interference effects stemming from the geometrical configurations of H Stark wave functions determine the extent of level shifts, anticrossings, intensity and width variations, and autoionization. A generalized analogy to Rydberg series helps to unify the connection to H.

PHYSICS

General

Laser-Induced Photoassociation of Ultracold Sodium Atoms.

Final rept.

H. R. Thorsheim, J. Weiner, and P. S. Julienne.

1987, 4p

Pub. in Physical Review Letters 58, n23 p2420-2423 1987.

Keywords: Molecular spectroscopy, Reprints, *Sodium atoms, *Atom collisions, Ultracold atoms, Photoassociation, High resolution, Laser applications.

The authors present the theory of laser-induced radiative association in terms of a scattering resonance formalism and apply this theory to the specific case of Na atom collisions at a temperature of 10 mK. The basic two-step process proceeds by: (1) a free-bound photon absorption by the colliding atoms to an excited molecular state followed by (2) radiative decay of the molecular complex to the Na2 singlet ground state or lowest lying triplet state. The authors calculate the absorption coefficient for step (1) as well as the spectrum and emission rate for step (2). Use of ultracold atoms permits a new kind of high resolution free-bound spectroscopy of energy levels which are difficult to study by conventional bound state spectroscopy.

Superconductivity and the Quantization of Energy.

Final rept.

D. G. McDonald. 1990, 6p

Pub. in Science 247, p177-182, 12 Jan 90.

Keywords: *Superconductivity, *Energy levels, Fundamental constants, Josephson junctions, Precision, Arrays, Reprints, *Josephson effect, Quantization.

Ideas about quantized energy levels originated in atomic physics, but research in superconductivity has led to unparalleled precision in the measurement of energy levels. A comparison of levels produced by two Josephson junctions shows that they differ by no more than 3 parts in 10 to the 19 power at an energy of 0.0003 electron volt. The fact that the myriad of interactions of a trillion particles in a macroscopic body, a Josephson junction, can produce sharply defined energy levels suggests a dynamical state of effectively divorced from the complexities of its environment. The existence of this state, the macroscopic quantum state of superconductors, is well established, but its isolation from intrinsic perturbations has recently been shown to be extraordinary. These new results, with an improved precision of about ten orders of magnitude, are discussed in the context of highly accurate results from quantum electrodynamics, atomic spectroscopy, and the standards of metrology.

Keywords: *Sodium, *Potassium, Differential cross sections, Energy transfer, Reprints, *Atom-atom collisions.

The electronic energy-transfer process $\text{Na}^*(3P(3/2)) + \text{M} \rightarrow \text{Na}^*(3P(1/2)) + \text{M}$, where M is an Na or K atom, has been measured differentially with respect to scattering angle. This has been done with crossed beams and by establishing the final $3P(1/2)$ state velocity distribution from the Doppler spectrum of $3P(1/2) \rightarrow 4D(3/2)$ absorption. The differential cross section for Na perturbers is highly forward peaked (within a few degrees) with a small but extended high-angle tail. Forward angles are also dominant for K perturbers, but these cover a larger angular range with a very substantial large-angle contribution.

A hyperfine transition in the ground state of $(^9\text{Be}(1+))$ was used to test a nonlinear generalization of quantum mechanics recently formulated by Weinberg. The authors searched for a dependence of the frequency of a coherent superposition of two hyperfine states on the populations of the states. The authors are able to set a limit of 4×10 to the -27 power on the fraction of binding energy per nucleon of the $(^9\text{Be}(1+))$ nucleus that could be due to nonlinear corrections to quantum mechanics.

Gauge Invariance and Approximate Multiphoton Calculations in Hydrogen.

Final rept.
Y. Justum, A. Maquet, and Y. Heno. 1990, 5p
Pub. in Physical Review A 41, n5 p2791-2795, 1 Mar 90.

Keywords: *Hydrogen, Stark effect, Reprints, Gauge invariance, Multi-photon processes.

It has been observed that fairly accurate estimates for two-photon bound-bound amplitudes in hydrogen can be obtained from a simple partial summation restricted to the discrete spectrum contribution, provided one uses the $E(\dot{r})$ form of the interaction Hamiltonian. It is shown that this conclusion does not hold when considering higher-order multiphoton processes. In fact, the corresponding multiple sums can be shown to be divergent and, consequently, no reliable estimates can be obtained from such an approximation. Using the $(1/c)A(\dot{r})^p$ form of the interaction does not lead to reliable estimates either. Those conclusions are based on a comparison with exact results for the second- and fourth-order contributions to the ac Stark shift of the ground state, computed with the help of a Sturmian basis.

Keywords: *Fundamental constants, Reprints, *Electron charge, *Electron counting, Quantum Hall effect, Storage rings, SQUID devices.

Electron storage rings offer the possibility of realizing a current by counting the electrons per second passing through a detector. If several difficult technical problems can be solved, this technique offers the possibility of accurately measuring the quantity h/e squared and providing a stringent test of the quantum Hall effect. A SQUID current comparator design to do the 'counting' is presented with estimates of its performance on a specific storage ring. Characteristics of an ideal storage ring are suggested.

Si-like spectra of Cu to Mo have been observed in tokamak-generated plasmas, and Cu to As in laser-produced plasmas. Wavelengths in the range of 86 to 300 Å were recorded photographically with a 2.2-m grazing-incidence spectrograph on the tokamak, and a 10.7-m grazing-incidence spectrograph for the laser plasmas. Wavelength accuracy is estimated to be ± 0.005 Å. The transition arrays $3s(2)3p(2)-3s3p(3)$ and $3s(2)3p(2)-3s(2)3p3d$ were identified. Classifications were established by comparison with Hartree-Fock calculations of wavelengths and relative intensities along isoelectronic sequences. Spectra of Rb and Sr were not observed, but interpolated values of wavelengths for these ions are derived from the rest of the data. Ground configuration intervals known from magnetic dipole transitions are compared with Dirac-Fock calculations to predict unknown values and to correct misidentifications.

Pub. in Physical Review B Condensed Matter 41, n6 p3303-3315, 15 Feb 90.

Keywords: Metastable state, Nickel, Reprints, *Helium atoms, *Deexcitation, Atomic collisions, Surface reactions, Electron spin polarization, Excited states.

Metastable spin-polarized He* atoms incident on a Ni surface undergo deexcitation in a process which yields electrons from the Ni. The number produced is observed to depend on the relative spin of the Ni and the He* atoms. The normalized difference in the ejected-electron intensity produced by He* atoms with opposite spin polarizations increases dramatically with increasing kinetic energy of the electrons. A theory of this asymmetry is presented. It is found that the experimental results can be reproduced only by the use of a realistic potential for the Ni electrons in the vacuum region. With such a potential it is found that He(1+) ions which result from the He*-surface interaction are neutralized at about 4.5 Å from the Ni surface, a much larger distance than given by previous estimates. The experiment is shown to reflect the polarization of Ni electrons at the He ion, and it is estimated that the Ni magnetization at the Fermi energy and far from the Ni surface is approximately 20%.

Pub. in Proceedings of International Collaboration on Advanced Neutron Sources Conference (10th), Los Alamos, NM., October 3-7, 1988, p821-828.

Keywords: Collimators, Performance, Reprints, *Neutron guides, Neutron reflection, Acceptance diagrams.

The authors describe a method to calculate the performance of multiple section systems of straight-sided guides and collimators. The approach is based on the concept of acceptance diagrams, which display the transverse spatial and angular coordinates of the neutrons in the system. For a given section of guide the construction of the exit diagram, from the entrance diagram, is shown to be accomplished using a shear transformation followed by translational and rotational operations applied to polygons representing respectively even and odd numbers of reflections within the section. The reflected neutron polygons are then truncated leaving only the neutrons that never strike a surface at an angle greater than the critical angle for total reflection.

Threshold Cerenkov Radiation and Beam Diagnostics.

Final rept.

J. R. Neighbours, F. R. Buskirk, and X. K. Maruyama. 1987, 3p

Pub. in Proceedings of IEEE (Institute of Electrical and Electronics Engineers) Particle Accelerator Conference: Accelerator Engineering and Technology, Washington, DC., March 16-19, 1987, p655-657.

Keywords: *Cerenkov radiation, Coherent radiation, Reprints, *Beam diagnostics, Form factors.

Cerenkov and transition radiation occur for single particles or for beam bunches; for the latter, the intensity may be strong at long wave lengths as a result of the coherence of emission. Also, if the medium has finite length, the Cerenkov radiation is diffracted. Not only is the angle of emission broadened but the emission threshold is not sharp. At measurement angles in the vicinity of 90 deg, the Fourier transforms of the charge distribution within a bunch may be determined for both the Cerenkov and sub-Cerenkov cases.

Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems.

Final rept.

J. R. D. Copley. 1988, 13p

Pub. in Proceedings of International Collaboration on Advanced Neutron Sources Conference (10th), Los Alamos, NM., October 3-7, 1988, p327-339.

Keywords: *Neutron spectroscopy, *Vibration, *Intensity, Monte Carlo method, Slots, Boolean functions, Reprints, *Electric choppers, Temporal resolution.

The paper presents Monte Carlo calculations of the time dependence of the intensity transmitted by single- and multiple-slot multiple disk chopper assemblies, taking into account the effects of chopper jitter. In the case of multiple-slot systems, where each of at least two choppers and a mask is fitted with two or more slots, a switching function is employed to suppress contaminated pulses, i.e., pulses in which neutrons can pass through slots that would never line up in the absence of jitter. Such pulses, if accepted, would degrade the time resolution of the system. The results for the time-integrated intensity are in good agreement with previously reported semi-analytic calculations. The need to reject contaminated pulses in multiple-slot systems is emphasized.

S. Meshkov, W. F. Palmer, and S. S. Pinsky. 1987,

7p

Pub. in Proceedings of Rencontre Moriond, Hadrons, Quarks Gluons 22, n2 p683-689 1987.

Keywords: *Mesons, Reprints, Pseudoscalar mesons, Quantum chromodynamics, Lota spectroscopy, Glueballs.

The Iota/E system is examined to elucidate the quark/gluon nature of this particle or particles. The authors view the system as comprised of at least two states: a high mass Iota around 1460-1500 MeV with J sup (PC) = 0 sup (-+) and a low mass E around 1420 MeV with J sup (PC) = 0 sup (-+) and/or 1 sup (++) . The Iota has a considerable admixture of glue in its wave function, and its quark content is near the electromagnetically 'inert' mixture $u(\bar{u}) + d(\bar{d}) - 5s(\bar{s})$. The authors propose a number of experimental tests which should enhance the understanding of this complex and interesting system.

Sponsored by Department of Energy, Washington, DC. Pub. in Proceedings of Workshop on Radiation Survey Instruments and Calibrations, Gaithersburg, MD., July 10-12, 1984, p4-12 Nov 85.

Keywords: *Radiation measuring instruments, Ionizing radiation, Standards, Performance tests, Reprints, *Secondary laboratories, US NBS, Calibration.

The author presents an introductory paper for a workshop on radiation survey instruments and calibrations. It describes the primary function of the National Bureau of Standards (NBS) and the national support system for measurements of ionizing radiation. The mechanisms used to achieve consistency between field measurements and the national physical measurement standards are considered, with emphasis on the role of secondary standards laboratories. These laboratories serve as an important link between NBS and radiation measurers at the field (user) level. The use of performance tests to determine consistency with NBS is encouraged, and methods of conducting such tests are described. The importance of documentation is emphasized, particularly with regard to quality control and procedures used by secondary laboratories for routine services. One function of secondary laboratories, namely instrument testing, is considered in detail.

GCR-90/575

Grant 70NANB8H0890

Sponsored by National Inst. of Standards and Technology (NEL), Gaithersburg, MD. Center for Fire Research.

Keywords: *Droplets, *Evaporation, *Cooling, *Surfaces, Heat transfer, Experimental data, Water, Thermal conductivity, Vaporizing, Temperature measurement, Test facilities.

An infrared thermographic technique is developed to obtain the transient solid surface temperatures surrounding the droplet during vaporization. The technique is appealing because it is non-intrusive, detailing the surface response to the droplet without affecting the evaporation process. Surface recovery can also be monitored using the thermographic method. The transient temperature distribution of a Macor solid is detailed. It is found that contact temperature is held in the vicinity of the droplet during the majority of the droplet's evaporation until the droplet thickness diminishes greatly, where upon the temperature of the solid surrounding the droplet begins to rise. The non-dimensional radius of influence of droplet cooling is also detailed. The data obtained on the cooling effect induced on aluminum and on Macor from previous studies is used in concert with new data obtained on a quartz surface to characterize the induced cooling of a hot surface by an evaporating droplet. The role of the droplet size and shape is investigated for various high and low thermal conductivity surfaces. Droplet evaporation time, surface heat transfer coefficient and droplet shape parameter are also examined.

Properties of a Soft-Sphere Liquid from Non-Newtonian Molecular Dynamics.

Final rept.
L. M. Hood, D. J. Evans, and H. J. M. Hanley. 1989,
16p
Sponsored by Department of Energy, Washington, DC.
Office of Basic Energy Sciences.
Pub. in Jnl. of Statistical Physics 57, n3/4 p729-743
Nov 89.

Keywords: *Liquids, Non-Newtonian fluids, Equations of state, Transport properties, Rheology, Simulation, Spheres, Reprints, Molecular dynamics.

A soft-sphere, inverse-12 liquid is simulated in both the isokinetic-isochoric and the isokinetic-isobaric ensemble using nonequilibrium molecular dynamics. The simulation for the isobaric ensemble is discussed in detail. The non-Newtonian characteristics of the liquid are clearly demonstrated; namely, the shear-rate-dependent pressure and density (shear dilatancy), the shear-rate-dependent shear viscosity (shear thinning), and evidence of normal pressure differences. For the first time, it is clearly shown that a significant component of isobaric shear thinning is due to shear dilatancy. The isochoric and isobaric results are checked for consistency. Simple empirical relations for the equation of state and transport properties of the fluid are presented.

Quantum Zeno Effect.

Final rept.
W. M. Itano, D. J. Heinzen, J. J. Bollinger, and D. J. Wineland. 1990, 7p
Sponsored by Air Force Office of Scientific Research,
Bolling AFB, DC., and Office of Naval Research,
Arlington, VA.
Pub. in Physical Review A 41, n5 p2295-2300, 1 Mar
90.

Keywords: Reprints, *Quantum Zeno effect, Beryllium ions, Beryllium 9, Penning traps, Laser cooling, Ion storage.

The quantum Zeno effect is the inhibition of transitions between quantum states by frequent measurements of the state. The inhibition arises because the measurement causes a collapse (reduction) of the wave function. If the time between measurements is short enough, the wave function usually collapses back to the initial state. The authors have observed this effect in an rf transition between two (9)Be(1+) ground-state hyperfine levels. The ions were confined in a Penning trap and laser cooled. Short pulses of light, applied at the same time as the rf field, made the measurements. If an ion was in one state, it scattered a few photons; if it was in the other, it scattered no photons. In the latter case the wave-function collapse was due to a null measurement. Good agreement was found with calculations.

Ergodic Convergence in Liquids and Glasses.

Final rept.
R. D. Mountain, and D. Thirumalai. 1990, 13p
Sponsored by National Science Foundation, Washington, DC.
Pub. in International Jnl. of Modern Physics C 1, n1
p77-89 1990.

Keywords: *Liquids, *Glass, Simulation, Spheres, Reprints, Molecular dynamics, Ergodic convergence, Time intervals.

A quantitative method for estimating the time interval needed for the convergence of time averages to ensemble average values in a molecular dynamics simulation is described. The essential feature of the way of estimating the time interval is the statistical equivalence of particles in a fluid in thermodynamic equilibrium. This method is quite general and should find application in many types of simulations. The soft-sphere system is used to illustrate the method and to show that it is capable of distinguishing between effectively ergodic states and nonergodic, glassy states. Finally, some observations on possibilities for future investigations are mentioned.

NBS/NIST Gas Thermometry from 0 to 660C.

J. F. Schooley. 1990, 36p
Included in Jnl. of Research of the National Institute of Standards and Technology, v95 n3 p255-290 May-Jun 90.

Keywords: *Temperature measurement, *Gas thermometry, Gas thermometers, US NBS, US NIST, IPTS-68.

In the NBS/NIST Gas Thermometry program, constant-volume gas thermometers, a unique mercury manometer, and a highly accurate thermal expansion apparatus have been employed to evaluate temperatures on the Kelvin Thermodynamic Temperature Scale (KTTS) that correspond to particular temperatures on the 1968 International Practical Temperature Scale (IPTS-68). In the paper, the authors present a summary of the NBS/NIST Gas Thermometry project, which originated with planning activities in the late 1920s and was completed by measurements of the differences t(KTTS)-t(IPTS-68) in the range 0 to 669 C. Early results of the project were the first to demonstrate the surprisingly large inaccuracy of the IPTS-68 with respect to the KTTS above 0 C. Advances in several different measurement techniques, development of new, specialized instruments, and two distinct sets of gas thermometry observations have resulted from the project.

Arlington, VA.
Pub. in Frequency Standards and Metrology, p287-291
1989.

Keywords: Reprints, *Single ion microscopy, *Mercury ions, Laser cooling, High resolution.

A single Hg(1+) ion that is confined in an rf (Paul) trap can be laser cooled so that the amplitude of its motion is much less than a wavelength (the Dicke limit) for optical transitions. Recently, the authors have used the technique of optical sideband cooling to reach the zero point of motion. This realizes for the first time the fundamental limit of laser cooling for a bound atom and the ideal of an isolated atomic particle at rest in space to within the quantum mechanical limits imposed by the surrounding apparatus. In both limits, Doppler effects become negligible to all orders, the interrogation time is long, and the fundamental shot noise detection limit of a single atom is readily attained.

Optimized Design of the Chopper Disks and the Neutron Guide in a Disk Chopper Neutron Time-of-Flight Spectrometer.

Final rept.
J. R. D. Copley. 1990, 15p
Pub. in Nuclear Instruments and Methods in Physics Research A291, p519-532 1990.

Keywords: *Neutron spectrometers, Neutron scattering, Optimization, Intensity, Design, Reprints, *Time-of-flight spectrometers, Neutron choppers, Neutron guides.

Important aspects are considered of the performance of a disk chopper neutron time-of-flight spectrometer. The intensity at the sample position, and the contributions of the choppers to the resolution of the instrument, are evaluated as a function of the widths of the slots in the chopper disks and the width of the neutron guide between the disks. It was found that there is an optimum choice of the ratios of these widths and that this choice depends on a single parameter which, for elastic scattering, is a simple ratio of distances. When pairs of counter-rotating disks are employed, the widths of the slots can be modified by grossly changing the phase relationship between the members of a chopper pair. If the slot widths are changed, the width of the guide should also be altered in order to maintain the spectrometer in an optimized state. This change in

PHYSICS

General

the guide width may be effectively achieved using an arrangement of nested guides. Resolution and intensity calculations demonstrate the important gains which may be realized using this approach.

Experiments on collections of strongly coupled laser cooled atomic ions performed at the National Bureau of Standards are summarized. The authors first discuss strong coupling of small numbers ($=$ or $<$ 20) of atomic ions confined in a Paul electrodynamic (rf) trap, in which crystalline structures are observed. The authors then discuss experiments in which shell structure is observed for up to 15,000 ions confined by static electric and magnetic fields. These clouds display liquid and solid-like behavior similar to that of a smectic liquid crystal. Future experiments are suggested, including some where infinite volume behavior may be observable.

Pub. in Institute of Physics, Conference Series Capture Gamma-Ray Spectroscopy 88, pS167-S174 1988.

Keywords: *Gamma spectrometers, Deuterium, Accuracy, Reprints, *Binding energy, Light nuclei, Carbon 13, Nitrogen 15.

A substantially improved double flat crystal gamma ray spectrometer (GAMS4) has been put into operation as a joint NBS/ILL facility at the HFR, Grenoble. This facility has the capability of determining gamma ray wavelengths, in absolute units, with uncertainties on the order of 0.1 ppm in the energy range from 0.1 to about 5 MeV. This new facility incorporates a number of major improvements over the earlier double flat crystal spectrometer used to determine the n-p 2.2 MeV line with an error of 1 ppm (2 eV). The operation of the instrument and the nature of the improvements will be discussed. Recent experimental results related to the direct determination of the binding energy of several light nuclei (for example D, ^{13}C , ^{15}N) will be given. The implications of this work for the atomic mass scale and for the determination of fundamental constants will be reviewed.

Pub. in Hydrogen Atom, p123-133 1989.

Keywords: *Frequency standards, Atomic spectroscopy, Frequency stability, Reprints, Laser spectroscopy, Ion storage.

The report discusses two aspects of frequency measurement in the optical region of the spectrum. First, the problem of frequency standards is considered. (An analogue in the microwave region of the spectrum is the cesium beam frequency standard). If one or a few reference frequencies can be accurately calibrated (perhaps by a frequency synthesis chain) then it may be possible to compare optical measurements to these standards. As an example of the precision that might be achieved, only optical standards based on stored ions are discussed. Second, the problem of fre-

quency comparison of unknown frequencies to the standards is discussed. Here discussion is restricted primarily to generation of wideband frequency 'combs'.

165p NIST/SP-789
Also available from Supt. of Docs. as SN003-003-03023-6. Held at Stevens Institute of Technology in Hoboken, New Jersey on August 2-4, 1989. Prepared in cooperation with Nevada Univ., Las Vegas. Dept. of Physics, and City York. Dept. of Physics.

Keywords: *Meetings, Electron scattering, Polarization, Excitation, Ionization, Sodium, *Atomic collisions, *Electron collisions, Electron-atom collisions.

The International Symposium was held at the Stevens Institute of Technology, Hoboken, New Jersey on August 2-4, 1989. The previous meeting, held in Belfast, UK (1987), extended the scope of the Symposium to include ion-atom and atom-atom collisions. This was reflected in the Symposium title which was modified to replace the term 'electron-atom collisions' with 'electronic and atomic collisions.' The Hoboken meeting maintained this expanded area and included several talks in more loosely related areas. The attendance of 66 scientists represented 16 countries, and the talks described the work of 23 research groups from 9 countries.

The measured rate coefficient alpha for $\text{Xe2}(1+) + \text{Cl}(1-) \rightarrow \text{XeCl}^* + 2\text{Xe}$ (and similar processes) is far higher than had been expected. The exciting experimental results are reminiscent of assisted mutual neutralization, but this cannot occur. A Monte Carlo simulation that allows for the $\text{Cl}(1-)\text{-Xe}(+)$, $\text{Cl}(1-)\text{-Xe}$, and $\text{Xe}(1+)\text{-Xe}$ forces shows that the rotational and vibrational modes of $\text{Xe2}(1+)$ tend to be excited by the passage of $\text{Cl}(1-)$ through perihelion. Because of the electrostatic tidal action the orbit contracts and the internal energy of $\text{Xe2}(1+)$ increases, leading to dissociation. The measured values of alpha are reproduced satisfactorily.

Keywords: *Gravitational fields, *Relativity, Mercury(Planet), Librations, Spin stabilization, Tests, Reprints.

The accuracy of solar system tests of gravitational theory could be very much improved by range and Doppler measurements in a Small Mercury Relativity Orbiter. A nearly circular orbit at roughly 2400 km altitude is assumed in order to minimize problems with orbit determination and thermal radiation from the surface. The spacecraft is spin-stabilized and has a 30 cm diameter despun antenna. With K-band and X-band

ranging systems using a 50 MHz offset sidetone at K-band, a range accuracy of 3 cm appears to be realistically achievable. The estimated spacecraft mass is 50 kg.

Ion Quadrupole Moments from Term Energy Separations of High Angular Momentum States: Halogenlike Ions.
Final rept.
D. E. Kelleher. 1990, 5p
Pub. in Physical Review A 42, n3 p1151-1154, 1 Aug 90.

Keywords: Ground state, Ions, Reprints, *Quadrupole moments, Multicharged ions, Rydberg states.

A simple method is described to determine ion quadrupole moments from spectroscopic data. Quadrupole moments of the $np(5)$ doublet P (sup 0, sub 3/2) ground states of 12 halogenlike ions are determined. The ions include five fluorinelike, three chlorinelike, two brominelike, and two iodinelike ions. The values of r squared for the np electrons are determined from experimental energy separations within high angular momentum Rydberg configurations in the corresponding rare-gas-like ions. jI coupling is used in conjunction with an expression by Racah (Phys. Rev. 61, 537 (1942)) for the angular part of the quadrupole interaction between the ion core and the Rydberg electron. Hartree-Fock results for $\langle r^2 \rangle$ compare favorably with the authors' values obtained from experimental data, although small systematic differences do exist, which increase with increasing ion mass. Limitations of the technique are also discussed. Such methods constitute a useful supplement to single-channel quantum-defect parametrization of energy levels for Rydberg

states of atoms having cores with angular momentum (j_c) greater than $1/2$.

Pub. in Physical Review Letters 64, n26 p3183-3186,
25 Jun 90.

Keywords: Electron tunneling, Transmission lines, Quantum theory, Reprints, *Tunneling(Electronics), *Coulomb field.

The authors investigate the effect of quantum fluctuations on the Coulomb blockade in a single tunnel junction coupled to its environment by a transmission line of arbitrary impedance $Z(\omega)$. The quantized oscillating modes of the transmission line are suddenly displaced when an electron tunnels through the junction. For small Z (relative to the quantum of resistance), a weak power-law zero-bias anomaly occurs associated with the infrared-divergent shakeup of low-frequency transmission-line modes. For large Z , the full blockade is recovered. Comparison with recent experiments is made.

Pub. in Physical Review Letters 64, n5 p515-518, 29
Jan 90.

Keywords: Reprints, *Hydrogen ions two plus, *Photodissociation, Multiphoton absorption, Laser radiation, Predissociation.

The authors present nonperturbative, time-independent calculations of the photodissociation rate of H₂(1+) in intense laser fields. The energy distribution of the protons consists of a sequence of peaks evenly spaced by half the photon energy, all of equal width but of varying heights. They result from multiphoton absorption above the dissociation threshold, with equal sharing of the excess photon energy between H and H(1+). Surprisingly, the distribution of higher-energy peaks decreases with increasing intensity, due to stimulated free-free emission of the dissociating fragments. The authors also predict a sharp angular distribution of the protons along the electric field vector of a linear polarized laser.

P. Indelicato, F. Parente, and R. Marrus. 1989, 10p
Pub. in Physical Review A 40, n7 p3505-3514, 1 Oct
89.

Keywords: *Atomic energy levels, Hyperfine structure, Reprints, Multicharged ions, Forbidden transitions, Lifetime.

The magnetic interaction has been shown to produce inversion of 1s2p triplet P(1) and 1s2p triplet P(0) for $Z =$ or < 3 and $Z =$ or > 46 . In the paper the authors

have used the multiconfiguration Dirac-Fock method to compute with high precision the 2 triplet P(1)-2 triplet P(0) separation energy, including relativistic contributions to electron-electron correlations and radiative corrections. This energy happens to be very small around the crossing, so that the hyperfine interaction can mix both levels significantly. The authors have then computed the effect of this mixing on both the energy and lifetime of those levels.

Pub. in Nuclear Instruments and Methods in Physics
Research A290, p189-196 1990.

Keywords: Reprints, *Neutron guides, Neutron reflections, Acceptance diagrams.

The method of acceptance diagrams is used to obtain analytic expressions for the intensity and spatial and angular distributions of the neutrons transmitted along a one-dimensional curved guide, provided that the length of the guide is greater than the minimum length necessary to eliminate direct radiation. The acceptance area for curved guides is parabolic in shape, and shows the asymmetry in the spatial distribution of the transmitted neutrons. From these formulations, the average number of reflections can be determined as a function of wavelength.

Comments on 'Design Optimization of a Small-Angle Neutron Scattering Spectrometer.'

Final rept.
D. F. R. Mildner. 1990, 4p
Pub. in Nuclear Instruments and Methods in Physics
Research A290, p259-262 1990.

Keywords: *Neutron spectrometers, Optimization, Resolution, Intensity, Design, Reprints, Small angle scattering.

Margaca, Falcao, Salgado and Carvahlo (Nucl. Instr. and Meth. A274 (1989) 606, and Proc. Int. Conf. on Neutron Scattering. Grenoble, Physica B156/157 (1989) 608) have recently discussed the design parameters of a small-angle scattering spectrometer. They claim to have shown that the instrument can be optimized for constant angular resolution and a fixed neutron source area, such that the detector count rate is higher than that obtained with a spectrometer optimized for a fixed total length and having the same angular resolution. They also claim that the relative gain in intensity depends upon the size of the neutron emitting surface available to the spectrometer. The initial assumptions made by the authors are too constrained to be generally applicable, and therefore misleading conclusions could be drawn, and, in fact, the equal path length arrangement is optimum.

Multiple Reflections within Neutron Optical Devices.

Final rept.
D. F. R. Mildner. 1990, 7p
Pub. in Nuclear Instruments and Methods in Physics
Research A292, p693-699 1990.

Keywords: Thermal neutrons, Reprints, *Neutron guides, *Beam optics, Neutron reflections, Cold neutrons, Acceptance diagrams.

Various types of totally reflecting neutron guides are used as neutron optical elements in which thermal or cold neutrons are conducted by multiple reflections. Losses in transmission caused by imperfect reflection from the surfaces of these guides compound geometrically with the number of reflections. The acceptance technique used for determining analytic expressions for the transmission of these devices can also give the average number of reflections as a function of critical angle or wavelength. This has been performed for the straight conducting guide viewing a finite source, the converging guide and the curved guide.

Piece-Wise Analytic Evaluation of the Radiative Tail from Elastic and Inelastic Electron Scattering. Final rept.

L. C. Maximon, and S. E. Williamson. 1987, 16p Grant NSF-PHY80-23603 See also PB84-155290. Sponsored by National Science Foundation, Washington, DC. Pub. in Nuclear Instruments and Methods in Physics Research A258, p95-110 1987.

Keywords: *Electron scattering, Elastic scattering, Inelastic scattering, Scattering cross sections, Reprints, *Electron-nucleon interactions.

The authors consider the calculation of the radiative tail from the elastic peak in medium and high energy scattering as well as from a discrete inelastic level of the recoiling nucleus. They examine the method generally used for this calculation, viz., a numerical integration of the differential cross section over the angles of the unobserved photon, and discuss the difficulties inherent in this numerical integration due to the sharp peaking of the integrand. They present an alternative method for calculating the radiative tail, in which the region of integration is divided into an arbitrary number of subintervals, the structure functions are fitted by cubic spline functions in each subinterval, and the integrations are then performed analytically in closed form. This method has the advantages of greatly increased accuracy and a reduction of the computation time by a factor which can vary between 10 and 1000, depending on the kinematics.

Proposed Test of the Symmetrization Postulate and Exclusion Principle.

Final rept. J. D. Gillaspay, K. Deilamian, and D. E. Kelleher. 1990, 2p

Pub. in Proceedings of the International Conference on Atomic Physics (12th), Ann Arbor, MI., July 29-August 3, 1990, I-14p.

Keywords: Tests, Reprints, *Pauli principle, *Symmetrization postulate, Photon burst spectroscopy.

The Pauli exclusion principle (PEP) dictates the stability of matter and the shell structure of atoms and nuclei. Yet, despite this pervasive influence, PEP stems from the symmetrization postulate (SP) which cannot be derived from more fundamental principles without unproven assumptions. In his 1945 Noble address, Pauli stated: 'Already in my original paper I stressed the circumstances that I was unable to give a logical reason for the exclusion principle or to deduce it from more general assumptions.' In his book General Principles of Quantum Mechanics, Pauli noted that 'The fact that quantum mechanics yields more states than actually occur in nature (and all of the equally possible) is still a puzzle.' These statements were made years after the spin-statistics theorem was established. The symmetrization postulate states that the wavefunction of a system of identical fermions is antisymmetric under exchange of any two of the particles (and symmetric for bosons). The two-electron helium atom provides the simplest atomic example of an antisymmetric system.

Average L-Shell Fluorescence Yields for Elements 56 < Z < 92.

Final rept. S. Singh, D. Mehta, R. R. Garg, S. Kumar, M. L. Garg, N. Singh, P. C. Mangal, J. H. Hubbell, and P. N. Trehan. 1990, 6p Pub. in Nuclear Instruments and Methods in Physics Research B51, p5-10 1990.

Keywords: *Fluorescence, Cross sections, X rays, Reprints, *L shell, Photoionization.

The average L-shell fluorescence yields have been evaluated for the elements with 56 = or < Z = or < 92 using the authors' measured values of photon induced total L X-ray production cross-sections and Scofield's (1973) theoretical total L shell photo-ionization cross-sections. These values are compared with the values tabulated by earlier workers and with theoretical values based on relativistic Hartree-Dirac-Slater (RHDS) calculations (Chen et al. Phys. Rev. A24 (1981) 177). A good agreement is found with the values based on RHDS calculations for the elements 56 = or < Z = or < 92.

Electron Inelastic Mean Free Paths in Solids at Low Energies.

Final rept. S. Tanuma, C. J. Powell, and D. R. Penn. 1990, 7p Pub. in Jnl. of Electron Spectroscopy and Related Phenomena 52, p285-291 1990.

Keywords: Mean free path, Magnesium, Aluminum, Silicon, Nickel, Copper, Gold, Reprints, *Electron trajectories, EV range 10-100, EV range 100-1000.

The authors have calculated electron inelastic mean free paths (IMFPs) for 50-200 eV electrons in 31 materials (27 elements and 4 compounds). These calculations extend those previously reported for 200-2000 eV electrons in the same materials but avoid an approximation valid for electron energies above 200 eV. IMFP results are presented in the paper for magnesium, aluminum, silicon, nickel, copper, and gold. The IMFP dependence on electron energy in the range 50-200 eV varies considerably from material to material; these variations are associated with substantial differences in the electron energy-loss functions amongst the materials. The authors have also extended the general IMFP formula derived earlier to describe the calculated IMFPs over the 50-2000 eV energy range.

Guidelines for Realizing the International Temperature Scale of 1990 (ITS-90). Technical note (Final). B. W. Mangum, and G. T. Furukawa. Aug 90, 193p NIST/TN-1265 Also available from Supt. of Docs.

Keywords: *Temperature measurement, Guidelines, *International Temperature Scale of 1990, *ITS-90, Thermometers, Calibration, Fixed points.

The Technical Note describes the International Temperature Scale of 1990 (ITS-90) that became the official international temperature scale on 1 January 1990, superseding the previous scales, and provides information on how the scale may be realized at different levels of accuracy. The ITS-90 extends upward from 0.65 K, is in close agreement with the Kelvin Thermodynamic Temperature Scale, has much improved continuity, precision and reproducibility throughout its ranges over that of previous scales, and has subranges and alternative definitions in certain ranges that greatly facilitate its use. In addition to a description of the ITS-90 and how it can be realized, there are included in the document reproductions of some articles or excerpts from articles concerned with the ITS-90. The composition of the Comité Consultatif de Thermométrie (CCT) of the Comité International des Poids et Mesures (CIPM) at the time of the adoption of the ITS-90 is given. The differences between the temperatures on the ITS-90 and those on the International Practical Temperature Scale of 1968, Amended Edition of 1975, (IPTS-68(75)) and those on the 1976 Provisional 0.5 K to 30 K Temperature Scale (EPT-76) are tabulated. Measurement procedures for realizing the ITS-90 throughout the various ranges of the scale are given.

Nomenclature for Lambda Doublet Levels in Rotating Linear Molecules.

Final rept. M. Alexander, R. Bacis, P. Dagdigian, G. Flynn, and R. Field. 1988, 5p Pub. in Jnl. of Chemical Physics 89, n4 p1749-1753 1988.

Keywords: *Molecular energy levels, Linear systems, Diatomic molecules, Nomenclature, Rotation, Reprints.

It is proposed that the two Lambda-doublet levels of linear molecules with non-zero electronic orbital angular momentum be labelled Lambda(A prime) and Lambda(A double prime), e.g., Pi(A prime) and Pi(A double prime) for Pi states, etc., depending on whether in the high-J limit the electronic wavefunction is symmetric or antisymmetric with respect to reflection of the spatial coordinates of all the electrons in the plane of rotation of the molecule. This notation supplements the accepted spectroscopic e/f labelling, can be directly correlated with observed spectroscopic intensities, and is of most relevance in the mechanistic interpretation of reactive or photodissociative processes involving open-shell molecules.

Anisotropic Neutron Emission from a Californium-252 Source.

Final rept.
C. M. Eisenhauer, and J. B. Hunt. 1988, 6p
Pub. in Radiation Protection Dosimetry 22, n4 p253-258 1988.

Keywords: Nuclear fission, Neutron sources, Radiation protection, Monte Carlo method, Anisotropy, Reprints, *Californium 252, *Neutron emission, Calibration.

Neutron-sensitive devices used for radiation protection purposes are usually calibrated by determining their response to radionuclide neutron sources of known neutron output. The neutron emission from the source material is intrinsically isotropic, with negligible scattering. However, the material must be encapsulated, and there will be a finite amount of scattering, both elastic and inelastic, from the encapsulation. In the present work, the experimental determination of the anisotropic neutron emission from a californium spontaneous fission source is compared with Monte Carlo calculations of the neutron emission.

Generational Mass Generation and Symmetry Breaking.

Final rept.
P. Kaus, and S. Meshkov. 1990, 5p
Contract DE-AC0381-ER40050
Sponsored by Department of Energy, Washington, DC.
Pub. in Physical Review D 42, n5 p1863-1867, 1 Sep 90.

Keywords: Lagrangian functions, BCS theory, Quarks, Leptons, Mass, Reprints, *Symmetry breaking, Kobayashi-Maskawa matrix.

A BCS theory of quark and lepton mass generation leads to a nonlinear self-interaction term in the Lagrangian whose natural representation is the 'democratic' basis. It is shown, within the BCS framework, how the original $U(3)_{\text{sub } L} \times U(3)_{\text{sub } R}$ symmetry of the massless u quarks and ν leptons is systematically broken so as to lead to the observed quark and lepton spectra, consistent with their mass hierarchies, and the additional hierarchy of weak mixing angles manifested in the Kobayashi-Maskawa matrix. Experiment cannot currently distinguish between such symmetry breaking as proposed by Fritzsch and Plankl, by the authors, or by others.

Molecular Dynamics Simulation of Collisional Excitation in Sputtering from Al.

Final rept.
M. H. Shapiro, and J. Fine. 1989, 11p
Pub. in Nuclear Instruments and Methods in Physics Research B44, p43-53 1989.

Keywords: *Aluminum, Computerized simulation, Sputtering, Single crystals, Excitation, Reprints, *Ion-atom collisions, Ion bombardment, Argon ions, Molecular dynamics, KeV range 01-10.

The molecular dynamics sputtering code SPUT2 was modified to permit investigation of core excitation in Al

following bombardment with 5 keV $\text{Ar}(1+)$ ions. This code was used to investigate sputtering mechanisms responsible for the ejection of core-excited atoms from solid surfaces. Simulations were carried out with the ion incident along both low- and high-index directions. In contrast to most previous studies, essentially all ejection of core-excited atoms resulted from asymmetric collisions (i.e. collisions between the incident ion and a target atom). When the ion is incident along a low-index direction, core-excited atoms arise almost exclusively from the first layer of the target. When the ion is incident along a high-index direction, core-excited atoms are found to eject from deeper layers as well.

Very Low Frequency Isolation Systems for Ground-Based Gravitational Wave Detectors.

Final rept.
R. T. Stebbins, M. Ashby, M. H. Anderson, P. L. Bender, and J. E. Faller. 1989, 6p
Pub. in Proceedings of Marcel Grossman Meeting on General Relativity (5th), Perth, Australia, August 8-13, 1988, p1769-1774 1989.

Keywords: *Vibration isolators, Very low frequencies, Servomechanisms, Reprints, *Gravitational wave detectors, Ground motion.

The performance of existing and contemplated ground-based gravitational wave detectors could be extended through augmented seismic isolation. For example, the ground noise spectrum, which increases toward lower frequency, establishes the low frequency limit in present interferometer designs. Extending the operating band from 10 Hz down to 1 Hz through better vibration isolation would afford access to a band which may contain signals indicative of massive black hole formation or collisions in galactic or pre-galactic times. An isolation factor of 10 to the -5 power to 10 to the -6 power appears to be needed in order to bring the vibrational noise at the support points of the test mass pendulums in interferometric detectors such as LIGO down to the desired level at 1 Hz. A new method has been developed which decreases the effective damping by using a servo system to sense the bending and then rotate the support point to reduce the bending. A simple pendulum was constructed to test this scheme. The servo system increased the damping time by a factor of 5.

Laser Interferometer for Gravitational Wave Astronomy in Space.

Final rept.
R. T. Stebbins, P. L. Bender, J. E. Faller, J. L. Hall, D. Hils, and M. A. Vincent. 1989, 9p
Contract NAGW-822
Sponsored by National Aeronautics and Space Administration, Washington, DC.
Pub. in Proceedings of Marcel Grossman Meeting on General Relativity (5th), Perth, Australia, August 8-13, 1988, p1759-1767 1989.

Keywords: Relativity, Sensitivity, Noise, Reprints, *Gravitational wave detectors, *Laser interferometers, Gravitational wave antennas, Spaceborne, Michelson interferometers.

A space-based, laser interferometer for detecting gravitational waves could probe low frequency bands expected to be rich in gravitational signals. An interferometer of roughly one million km path length could detect both the continuous periodic radiation from very many binary star systems and pulses which may have been emitted during galaxy formation. Such an instrument has been proposed, and a preliminary design concept has been developed. In principle, it consists of a Michelson interferometer with the beamsplitter and the two end mirrors mounted on carefully shielded test masses inside three separate spacecraft. The cluster of spacecraft would follow 30 deg to 60 deg behind the earth in its orbit about the sun. The progress during the last two years reported here centers on refinements of the basic design parameters to increase the sensitivity of the antenna and on better estimates of various noise sources.

Stochastic Properties of Trichel-Pulse Corona: A Non-Markovian Random Point Process.

Final rept.
R. J. Van Brunt, and S. V. Kulkarni. 1990, 25p
Sponsored by Department of Energy, Washington, DC. Div. of Electric Energy Systems.
Pub. in Physical Review A 42, n8 p4908-4932, 15 Oct 90.

Keywords: *Electric corona, Random processes, Neon, Nitrogen, Oxygen, Space charge, Stochastic presses, Reprints, *Corona discharges.

The stochastic properties of negative, point-to-plane, Trichel-pulse corona discharges are completely characterized in terms of a set of measured conditional and unconditional discharge pulse-amplitude and pulse-time-separation distributions. The Trichel-pulse phenomenon is shown to be a clear example of a non-Markovian, marked random point process in which memory effects play an important role. Strong correlations are shown to exist among the amplitudes and time separations of successive discharge pulses that indicate how initiation and growth of a discharge pulse are affected by the presence of residual ion space charge and metastable species from previous pulses. The analysis required to assess consistency among the various measured probability distributions is discussed and used to interpret observed variations in distribution profiles. Because of the observed dependence of discharge pulse amplitude on both the amplitude of and time separation from the previous pulse, memory can propagate indefinitely back in time. The experimental limitations to verify the extent of memory propagation are analyzed.

Peak Reflectivity Measurements of W/C, Mo/Si, and Mo/B4C Multilayer Mirrors in the 8-190-Angstrom Range Using Both Kalpha Line and Synchrotron Radiation.

Final rept.
A. P. Zwickler, S. Regan, M. Finkenthal, H. W. Moos, E. B. Saloman, R. Watts, and J. R. Roberts. 1990, 5p
Contract DE-FG02-85ER53214
Sponsored by Department of Energy, Washington, DC.
Pub. in Applied Optics 29, n25 p3694-3698, 1 Sep 90.

Keywords: *Mirrors, Synchrotron radiation, Reflectivity, Molybdenum, Tungsten, Silicon, Boron carbides, Reprints, *X ray mirrors, Soft x rays, Multilayers.

Peak reflectivity measurements of W/C, Mo/Si, and Mo/B4C multilayer mirrors have been performed using line and synchrotron radiation in the 8-190 A wavelength range. Short wavelength measurements using a line source were corrected for nonmonochromatic and divergent incident radiation. Reflectivities of Mo/Si mirrors, measured with a synchrotron radiation, ranged from 25 to 44% but decreased significantly around the Si absorption edge. Mo/B4C multilayer mirrors were measured that had peak reflectivities from 10 to 25% between 90 and 200 A and bandpasses as small as 3A.

Synchronization of Clocks.

Final rept.
D. W. Allan. 1989, 18p
Pub. in Proceedings of Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting (21st), Redondo Beach, CA., November 28-30, 1989, p1-18.

Keywords: *Atomic clocks, Frequency stability, Synchronization, Time measurement, Metrology, Comparison, Accuracy, Reprints, Global positioning system.

Time metrology has moved from milliseconds to picoseconds in the last four decades, and frequency metrology from nine significant digits to sixteen. The ability to synchronize remote clocks has improved dramatically as well. With implementation of GPS(Global Positioning System), the full long-term frequency stability as well as the frequency accuracy of the best atomic clocks can now be transferred to remote sites. GPS's selective availability, an intentional degradation of

system performance, will adversely affect the accuracy and stability of GPS time and frequency for the average civilian user. In the paper the author defines terms of reference, discuss various alternatives for clock synchronization and syntonization, and make some comparisons between various techniques used in synchronizing and syntonizing clocks. In the process the authors review the concepts of time stability and accuracy, frequency stability and accuracy.

State Equation of Liquid Helium - 4 from 0.8 to 2.5 K.

Final rept.

V. D. Arp, 1990, 21p

Sponsored by National Aeronautics and Space Administration, Moffett Field, CA. Ames Research Center.
Pub. in *Jnl. of Low Temperature Physics* 79, n1-2 p93-113 1990.

Keywords: *Liquid helium, *Helium 4, *Equations of state, Reprints, Cryogenic fluids.

A state equation for liquid helium is constructed in the range from 0.8 K to about 2.5 K, based on density and temperature as independent parameters. The equation has been fitted to experimental PVT, specific heat, (partial derivative of P with respect to T)_{sub v}, sound velocity, and lambda line properties from 14 different authors to an accuracy comparable with reasonable experimental errors in the measured quantities. Inclusion of logarithmic terms leads to agreement with experimental data as close as 100 (mu)K from the lambda line. It is found that the logarithmic amplitude ratio is not constant as a function of distance along the lambda line. A new determination of lambda line density is also presented. The equation is available in computer form.

Observation of Shell Structures with Ions Stored in Traps.

Final rept.

J. J. Bollinger, S. L. Gilbert, and D. J. Wineland.

1989, 10p

Sponsored by Office of Naval Research, Arlington, VA., and Air Force Office of Scientific Research, Bolling AFB, DC.

Pub. in *Proceedings of Workshop on Crystalline Ion Beams*, Wertheim, FRG, October 4-7, 1988, p231-240 1989.

Keywords: Shells(Structural forms), Reprints, *Ion storage, Laser induced fluorescence, Laser cooling, Penning traps, Ion traps, Beryllium ions.

The authors briefly discuss the possibility of using ions stored in traps to experimentally test the predictions of the one-component plasma (OCP) theory. They then report the observation of shell structures, a predicted feature of the finite OCP, with Be(1+) ions stored in a Penning trap. Clouds containing up to 15,000 ions (density approx 100 million/cc) were laser-cooled to temperatures of about 10mK. Under these conditions, the ions are strongly coupled and exhibit liquidlike and solidlike behavior through the formation of concentric shells. The shells were observed by direct imaging of the laser-induced ion fluorescence for values of the Coulomb coupling constant ranging from about 20 to 200.

Heat Induced Instability in a Model Liquid.

Final rept.

D. J. Evans, and H. J. M. Hanley, 1989, 9p

Sponsored by Department of Energy, Washington, DC. Office of Basic Energy Sciences.
Pub. in *Molecular Physics* 68, n1 p97-105 1989.

Keywords: *Liquids, Thermal conductivity, Conductance, Reprints, *Thermal instability, Molecular dynamics, Evans algorithm.

The stability of the homogeneous nonequilibrium molecular dynamics (NEMD) heat flow algorithm due to Evans is discussed with respect to a two dimensional soft disc inverse-twelve N-particle liquid. The thermal

conductivity coefficient is evaluated as a function of an induced heat field, related to $\Delta \ln T$, for $N = 56, 224, 896$ and 3584 . It is shown that homogeneous heat conduction becomes unstable for large systems ($N =$ or > 896) at sufficiently large values of the field; the conductivity increases and the system conducts heat by generating a solitary shock wave. The results are strongly dependent on N and differ in this respect from parallel NEMD studies on a liquid subjected to a shear.

Transient Heat-Transfer Studies in Low-Gravity Using Optical Measurement Techniques.

Final rept.

P. J. Giarratano, A. Kumakawa, V. D. Arp, and R. B. Owen, 1990, 6p

Pub. in *Jnl. of Thermophysics and Heat Transfer* 4, n1 p53-58 Jan 90.

Keywords: *Heat measurement, *Heat transfer, Reduced gravity, Electrical measurement, Optical measurement, Holography, Reprints, Transients.

The paper summarizes heat-transfer measurements where a transient heat pulse in a metal surface induces a fluid velocity perpendicular to that surface. Surface temperatures are measured electrically and temperature profiles in the heated fluid are determined optically. A low-gravity environment is used to suppress gravitational convection. Diffuse-light holographic observations are shown to produce better fringe resolution than collimated-light interferometry within the heated boundary layer. Theoretical analysis is in excellent agreement with the electrical measurements, and satisfactory agreement with the optical measurements.

Magnetic Characteristics and Measurements of Filamentary Nb-Ti Wire for the Superconducting Super Collider.

Final rept.

R. B. Goldfarb, and R. L. Spomer, 1990, 8p

Pub. in *Advances in Cryogenic Engineering Materials*, v36 p215-222 1990.

Keywords: *Superconducting magnets, Magnetic measurement, Magnetic hysteresis, Magnetization, Prototypes, Reprints, *Superconducting super collider, *Superconducting wires, *Superconducting cables, Niobium titanium, Magnetic susceptibility, Instability.

In synchrotron accelerator applications, such as the Superconducting Super Collider (SSC), superconducting magnets are cycled in a magnetic field. Desirable properties of the magnets include field uniformity, field stability with time, small residual field, and fairly small energy losses upon cycling. The paper discusses potential sources of problems in achieving these goals, describes important magnetic characteristics to be considered, and reviews measurement techniques for magnetic evaluation of candidate SSC wires. Instrumentation that might be practical for use in a wire-fabrication environment is described. The authors report on magnetic measurements of prototype SSC wires and cables and speculate on causes for instability in multipole fields of dipole magnets constructed with such cables.

Coulomb Clusters of Ions in a Paul Trap.

Final rept.

W. M. Itano, J. C. Bergquist, and D. J. Wineland.

1989, 14p

Sponsored by Air Force Office of Scientific Research, Bolling AFB, DC., and Office of Naval Research, Arlington, VA.

Pub. in *Proceedings of Workshop on Crystalline Ion Beams*, Wertheim, FRG, October 4-7, 1988, p241-254 1989.

Keywords: Electron transitions, Clustering, Clumps, Reprints, *Ion storage, Mercury ions, Laser cooling, Paul traps.

Ordered structures of as many as 16 laser-cooled Hg(1+) ions, confined in a Paul trap, have been observed. These structures, called Coulomb clusters, match those calculated by minimizing the effective potential energy of the system. The 5d(10)6s doublet S(1/2) to 5d(9)6s(2) doublet D(5/2) transition in Hg(1+) has been observed by optical-optical double resonance. The resolution was high enough that Doppler-induced sidebands, due to the harmonic motion of a single ion in the trap, were clearly resolved. Additional sidebands, due to the relative vibration of two ions forming a pseudomolecule, have also been observed.

Pub. in *Proceedings of Symposium on Frequency Standards and Metrology (4th)*, Ancona, Italy, September 5-9, 1988, p447-448 1989.

Keywords: Temperature measurement, Frequency standards, Reprints, *Ion temperature, Ion storage, Penning traps, Laser cooling, Beryllium ions.

The temperature of an ion plasma in a Penning trap, cooled by a laser beam perpendicular to the trap axis, has been calculated and measured. The measurements are in agreement with the calculations. Strong oscillations have been observed in the total fluorescence, with periods ranging from less than 1 second to a minute. The changes in fluorescence are accompanied by changes in the radius of the plasma.

Causal Green Function in Relativistic Quantum Mechanics.

Final rept.

E. Marx, 1987, 16p

Pub. in *International Jnl. of Theoretical Physics* 26, n8 p725-740 1987.

Keywords: Perturbation theory, Greens function, Charged particles, Convergence, Relativity, Reprints, *Quantum mechanics, Klein-Gordon equation.

The causal Green function or Feynman propagator for the Klein-Gordon equation is defined within the framework of the theory of distributions. Solutions of the equation with causal time-boundary conditions are related to the probabilistic interpretation of the wave function in relativistic quantum mechanics. The problem of a scalar charged particle in an external electromagnetic field is solved by perturbation expansion, and the convergence of the series is shown for potentials that are well behaved.

Recommended Values of the Fundamental Physical Constants: A Status Report.

B. N. Taylor, and E. R. Cohen. 1990, 27p
Prepared in cooperation with Rockwell International, Thousand Oaks, CA. Science Center.
Included in *Jnl. of Research of the National Institute of Standards and Technology*, v95 n5 p497-523 Sep/Oct 90.

Keywords: *Fundamental constants, Units of measurement, Josephson effect, Least squares method, Plancks constant, Sommerfeld constant, Recommendations, Quantum Hall effect, Fine structure constant, CODATA.

The authors summarize the principal advances made in the fundamental physical constants field since the completion of the 1986 CODATA least-squares adjustment of the constants and discuss their implications for both the 1986 set of recommended values and the next least-squares adjustment. Although much new data has become available since 1986, three new results dominate the analysis: a value of the Planck constant obtained from a realization of the watt; a value of the fine-structure constant obtained from the magnetic moment anomaly of the electron; and a value of the molar gas constant obtained from the speed of sound in argon. Because of their dominant role in determining the values and uncertainties of many of the constants, it is highly desirable that additional results of comparable uncertainty that corroborate these three data items be obtained before the next adjustment is carried out. Until then, the 1986 CODATA set of recommended values will remain the set of choice.

1990 NIST Scales of Thermal Radiometry.

K. D. Mielenz, R. D. Saunders, A. C. Parr, and J. J. Hsia. 1990, 9p
Included in *Jnl. of Research of the National Institute of Standards and Technology*, v95 n6 p421-429, Nov/Dec 90.

Keywords: *Temperature measurement, *Temperature scales, *Radiometry, Blackbody radiation, Photometry, Calibration, Gold, US NIST.

Following an absolute NIST measurement of the freezing temperature of gold and the adoption of the International Temperature Scale of 1990 (ITS-90), NIST has adopted new measurement scales for the calibration services based on thermal radiometry. In this paper, the new scales are defined and compared to

the ITS-90, and the effects of the scale changes on NIST measurement services in optical pyrometry, radiometry, and photometry are assessed quantitatively. The changes in reported calibration values are within quoted uncertainties, and have resulted in small improvements in accuracy and better consistency with other radiometric scales.

Analysis of the Spectrum of Doubly Ionized Molybdenum (Mo III).

I. Iglesias, M. I. Cabeza, and V. Kaufman. 1990, 42p
Included in *Jnl. of Research of the National Institute of Standards and Technology*, v95 n6 p647-688, Nov/Dec 90.

Keywords: *Molybdenum ions, *Ultraviolet spectra, *Atomic energy levels, Multicharged ions, Tables(Data).

The spectrum of doubly ionized molybdenum (Mo III) was produced in a sliding spark discharge and recorded photographically on the NIST 10.7-m normal incidence spectrograph in the 800-3250 Å spectral region. The analysis has led to the establishment of 76 levels of the interacting 4d(4), 4d(3)5s and 4d(2)5s(2) even configurations, 73 levels of the interacting 4d(3)5d and 4d(3)6s even configurations, and 181 levels of the interacting 4d(3)5p and 4d(2)5s5p odd configurations. Approximately 3100 lines have been classified as transitions between these experimentally determined levels. Comparison between the observed levels and those calculated from matrix diagonalization with least-squares fitted parameters shows standard deviations of 44, 33, and 183/cm, respectively, for the levels of the three sets of configurations.

NASA ORDER C-32000-M

Keywords: *Aerospace safety, *Expert systems, *Fire prevention, Fires, Knowledge bases (Artificial intelligence), *Space stations, Autonomy, Decision making, Fire extinguishers, Flammability, Reduced gravity, Ventilation.

Expert systems are problem-solving programs that combine a knowledge base and a reasoning mechanism to simulate a human expert. The development of an expert system to manage fire safety in spacecraft, in particular the NASA Space Station Freedom, is difficult but clearly advantageous in the long-term. Some needs in low-gravity flammability characteristics, ventilating-flow effects, fire detection, fire extinguishment, and decision models, all necessary to establish the knowledge base for an expert system, are discussed.

Hierarchical Control of Intelligent Machines Applied to Space Station Telerobots.
J. S. Albus, R. Lumia, and H. McCain. 1 Jul 87, 11p
In Jet Propulsion Lab., California Inst. Of Tech., Proceedings of the Workshop on Space Telerobotics, Volume 1 p 155-165.

Keywords: *Architecture (Computers), *Artificial intelligence, *Control systems design, *Control theory, *Hierarchies, *Robots, *Space stations, *Teleoperators, Actuators, Computer vision, Man machine systems, Mathematical models, Operators (Personnel), Pattern recognition, Planning, Robotics, Tasks, Trajectories, Reprints.

A hierarchical architecture is described which supports space station telerobots in a variety of modes. The system is divided into three hierarchies: task decomposition, world model, and sensory processing. Goals at each level of the task decomposition hierarchy are divided both spatially and temporally into simpler commands for the next lower level. This decomposition is repeated until, at the lowest level, the drive signals to the robot actuators are generated. To accomplish its goals, task decomposition modules must often use information stored in the world model. The purpose of the sensory system is to update the world model as rapidly as possible to keep the model in registration with the physical world. The architecture of the entire control system hierarchy and how it can be applied to space telerobot applications are discussed.

NASREM: A Functional Architecture for Control of the Flight Telerobotic Servicer.
R. Lumia. cDec 89, 5p
In Esa, Second European in-Orbit Operations Technology Symposium p 361-365.

Keywords: Architecture(Computers), *Control systems design, *Orbital servicing, *Robots, Teleoperators, Interfaces, Nasa space programs, Robotics.

The NASA/NBS (National Bureau of Standards) Standard Reference Model for Telerobot Control System Architecture (NASREM), adopted by NASA for use in the Flight Telerobotic Servicer (FTS), a two armed telerobotic manipulator which will build and maintain the Space Station is addressed. NASREM is technology independent; the same functions must be performed by all controllers. NASREM provides the paradigm which allows the FTS to evolve with technology because standard interfaces can be defined so that functionally equivalent software and hardware modules may be interchanged. After a brief tutorial on the NASREM functional architecture, the approach to its implementation is shown. Interfaces must be defined which are capable of supporting the known algorithms. This is illustrated by considering the interfaces required for the servolevel of the NASREM functional architecture. After interface definition, the specific computer architecture for the implementation must be determined. This choice is obviously technology dependent. An example illustrating one possible mapping of the NASREM functional architecture to a particular set of computers which implements it is shown. The result of choosing the NASREM functional architecture is that it provides a technology independent paradigm which can be mapped into a technology dependent implementation capable of evolving with technology in the laboratory as well as in space.

Accuracy Analysis of the Space Shuttle Solid Rocket Motor Profile Measuring Device.
W. T. Estler. Nov 89, 79p NISTIR-89/417
Also available from Supt. of Docs. Sponsored by National Aeronautics and Space Administration, George C. Marshall Space Flight Center, Huntsville, AL.

Keywords: *Accuracy, *Measuring instruments, Tolerances(Mechanics), Metrology, Joints(Junctions), Rocket engines, *Space shuttle solid rocket engine.

The Profile Measuring Device (PMD) was developed at the George C. Marshall Space Flight Center following the loss of the Space Shuttle Challenger. It is a rotating gauge used to measure the absolute diameters of mating features of redesigned Solid Rocket Motor field joints. Diameter tolerances of these features are typically plus or minus 0.005 inches and it is required that the PMD absolute measurement uncertainty be within this tolerance. In this analysis we find the absolute accuracy of these measurements to be plus or minus 0.00375 inches, worst case, with a potential accuracy of plus or minus 0.0021 inches achievable by improved temperature control.

Autonomous Propulsion System Requirements for Placement of an STS (Space Transportation System) External Tank in Low Earth Orbit.
W. C. Stone, and G. S. Cheok. Nov 89, 17p NISTIR-89/4208

Keywords: Computerized simulation, Equations of motion, Aerodynamic drag, *Propulsion systems, *Space transportation system, *External tanks, Space shuttle orbiters, Orbital mechanics.

The paper discusses the findings of an extensive series of computer simulations carried out at the National Institute of Standards and Technology to investigate the requirements for powered flight of the external tank through the thermosphere following separation from the Shuttle orbiter at main engine cutoff. The object of the investigation was to determine the minimum thrust and fuel requirements for an autonomous exterior propulsion package attached to the external tank in order to avoid re-entry on the critical first orbit, and to place the tank in a short term stable orbit from which customary orbit maintenance procedures may be carried out. Descriptions are given for the differential equations of motion, and the atmospheric drag and propulsion models used in the equations.

Nontoxic Heat Transport Fluids for Spacecraft Two-Phase Thermal Control Systems.
Rept. for Sep 88-89.
P. J. Giarratano, and J. F. Welch. Jan 90, 87p
NISTIR-89/3932
Contract NASA-T-4528P
Sponsored by National Aeronautics and Space Administration, Houston, TX. Lyndon B. Johnson Space Center.

Keywords: *Manned spacecraft, *Temperature control, *Refrigerants, Thermodynamic properties, Computer programs, Tables(Data), *Heat transfer fluids, *Spacecraft temperature, Binary systems(Materials).

The report summarizes an investigation to determine the availability of a nontoxic, nonflammable, noncorrosive and thermally stable heat transport fluid suitable for two-phase thermal control systems in manned spacecraft. Approximately 860 chemical substances were sorted and ranked according to parameters that were defined and calculated to quantitatively evaluate fluids for the proposed application. A methodology was developed for the evaluation and ranking. A survey of world suppliers of heat transport fluids was also conducted to determine whether a suitable fluid is available. The investigation did not identify a fluid that can meet all the environmental and thermal property requirements required for safe and efficient performance in the spacecraft application.

Architecture to Support Teleoperation and Autonomy.
Final rept.
R. Lumia, and J. S. Albus. 1987, 6p
Pub. in Proceedings of International Conference on Systems, Man, and Cybernetics, Alexandria, VA., October 20-23, 1987, v3 p1160-1164.

Keywords: *Space stations, Reprints, *Teleoperators, *Spacecraft maintenance, Robotics, Autonomy, Computer architecture.

The Flight Telerobotic Servicer (FTS) will support assembly and maintenance activities for the Space Station. In order for the FTS to evolve with technology, careful attention must be paid to the system's functional architecture. The paper describes an approach to the functional architecture so that teleoperation, slated for beginning of the program, and autonomy, scheduled later in the program, can both be supported. The system is hierarchically organized where task decomposition, world modeling, and sensory processing are explicitly represented. Goals at each level of the hierarchy are decomposed spatially and temporally into

simpler tasks which become goals for lower levels. The spatial decomposition facilitates control and coordination of multiarm robots.

Simplifications in the Theory of Artificial Satellites. Final rept.
A. Deprit, and S. Ferrer. 1989, 13p
Pub. in *Jnl. of the Astronautical Sciences* 37, n4 p451-463 Oct-Dec 89.

Keywords: Artificial satellites, Hamiltonian functions, Average, Reprints, *Satellite theory, Lie transformations, Symbolic algebra.

The concept of simplification in the study of Hamiltonian systems is given a precise algebraic definition as that of a Lie transformation mapping a Poisson algebra A of perturbation functions into a proper submodule of A. A case in point is the elimination of the parallax in the theory of artificial satellites; so is Cid's first order treatment of the main problem which, it is shown here, may be extended to any order without producing mixed secular-periodic terms in the transformation. The procedure, in that case, leads to a radial intermediary with the remarkable property that, although inclusive of all second order effects, the approximate system is still integrable—in elliptic functions—away from the critical inclinations. The concept of simplification presented here reveals that the elimination of the perigee proposed by Alfriend and Coffey amounts to a normalization in the sense of Meyer and Marsden-Weinstein by which the zonal problem of artificial satellite theory is rendered symmetric with respect to the group of rotations about the normal to the instantaneous orbital plane.

Dynamic Thermophysical Measurements in Space. A. Cezairliyan, and A. P. Miller. Oct 88, 9p
In *NASA, Washington, Microgravity Science and Applications Flight Programs, January - March 1987, Selected Papers, Volume 2* p 763-771.

Keywords: *Liquids, *Mathematical models, *Reduced gravity, *Refractory metals, *Thermophysical properties, C-135 aircraft, Equipment specifications, Geometry, Heating, Pyrometers, Space shuttle payloads.

The objective is to develop an accurate dynamic technique which, in a microgravity environment, would enable performance of thermophysical measurements on high-melting-point electrically conducting substances in their liquid state. In spite of the critical need in high temperature technologies related to spacecraft, nuclear reactors, effects of power laser radiation, and in validating theoretical models in related areas, no accurate data on thermophysical properties exist. This is primarily due to the limitation of the reliable steady-state techniques to temperatures below about 2000 K, and the accurate millisecond-resolution pulse heating techniques to the solid state of the specimen. The limitation of the millisecond-resolution techniques to temperatures below the melting point stems from the fact that the specimen collapses due to the gravitational force once it starts to melt. The rationale for the use of the microgravity is that by performing the dynamic experiments in a microgravity environment the specimen will retain its geometry, and thus it will be possible to extend the accurate thermophysical measurements to temperatures above the melting point of high-melting-point substances.

Next-Generation Tension Strap Supports for Spaceborne Dewars.

Final rept.
R. A. Hopkins, D. A. Payne, R. D. Kriz, and E. E. Morris. 1987, 9p
Pub. in *Proceedings of AIAA (American Institute of Aeronautics and Astronautics) Thermophysics Conference (22nd)*, Honolulu, HI., June 8-10, 1987, 9p.

Keywords: *Supports, *Fiber composites, Thermal conductivity, Aluminum oxide, Fatigue strength at N cycles, Modulus of elasticity, Reprints, *Dewars, *Epoxy matrix composites, Spaceborne.

In the design of long-life, spaceborne dewars the supports must be considered not only as a structural member, but also as part of the thermal isolation of the cold assembly. Filament-wound composite tension straps provide the strength needed for the launch environment while minimizing heat conduction into the dewar. The optimum material for this application has a large ratio of fatigue strength-to-thermal conductivity to minimize heat input and a high modulus of elasticity to maximize the system resonant frequency. The material that exhibits the best combination of these properties and has been used in numerous spaceborne dewars is fiberglass/epoxy. The paper presents measurements of mechanical and thermal properties of straps made of a newly-developed alumina fiber with epoxy resin. This composite has significantly higher fatigue strength and modulus of elasticity than fiberglass/epoxy and similar thermal conductivity. This material therefore appears to be the best available choice in the future for a dewar tension strap support.

Dynamic Technique for Thermophysical Measurements at High Temperatures in a Microgravity Environment. Final rept.
A. Cezairliyan, and A. P. Miller. 1990, 10p
Pub. in *International Jnl. of Thermophysics* 11, n4 p653-662 Jul 90.

Keywords: *Thermophysical properties, *Dynamic tests, *Liquid metals, *Refractory materials, *Reduced gravity, Measurement, High temperature tests, Solid phases, Melting points, Electric conductors, Pulse heating, Metals, Reprints.

Millisecond-resolution dynamic techniques for thermophysical measurements, when utilized in the laboratory, are limited to the study of materials in the solid phase because the specimen becomes geometrically unstable during melting and collapses, due (at least in part) to the influence of gravity. Therefore, a millisecond-resolution dynamic technique is being developed for use in a microgravity environment in order to extend accurate measurements of selected thermophysical properties of electrically conducting refractory materials to temperatures above the melting point. The basic method involves heating the specimen resistively from ambient temperature to temperatures above its melting point in about 1 s by passing an electrical current pulse through it, while simultaneously recording the pertinent experimental quantities. A compact pulse-heating system, suitable for microgravity simulations with NASA's KC-135 aircraft, has been constructed and initial experiments have been performed to study the geometrical stability of rapidly melting specimens. Preliminary results show that rod-shaped specimens can be successfully pulse-heated into the liquid phase.

Dynamic Technique for Measuring Surface Tension at High Temperatures in a Microgravity Environment. Final rept.
A. P. Miller, and A. Cezairliyan. Jul 90, 13p
Pub. in *International Jnl. of Thermophysics* 11, n4 p663-674 Jul 90.

Keywords: *Copper, *Reduced gravity, *Interfacial tension, *Liquid metals, Dynamic tests, High temperature tests, Feasibility, Pulse heating, Liquid metals, Melting points, Reprints.

The feasibility of a dynamic technique for measuring surface tension of liquid metals at high temperatures in a microgravity environment is considered. The basic method involves heating a tubular specimen resistively from ambient temperature through its melting point in about 1 s by passing an electrical current pulse through it, while simultaneously recording the pertinent experimental quantities. Static equilibrium for the molten specimen may be achieved (at least for a short time) in a microgravity environment by splitting the current after it passes through the specimen tube and returning a fraction along the tube axis and the remaining fraction outside the specimen. Adjustments to the current split enable a balance between the magnetic and surface tension forces acting on the specimen. Values for surface tension are determined from measurements of the equilibrium dimensions of the molten specimen tube, and the magnitudes of the currents. Preliminary rapid melting experiments, performed during microgravity simulations with NASA's KC-135 aircraft, yield a value for the surface tension of copper at its melting point which is in reasonable agreement with literature data.

Keywords: *Reduced gravity, *Culture media, Cells(Biology), Extraction, Gels, Reprints, *Cell separation, Agar gel electrophoresis.

Microgravity research includes investigations designed to gain insight on methods of separating living cells. During a typical separation certain real-time measurements can be made by optical methods, but some materials must also be subjected to subsequent analyses, sometimes including cultivation of the separated cells. In the absence of on-orbit analytical or fraction collecting procedures, some means is required to capture cells after separation. The use of solutions that form gels was therefore investigated as a means of maintaining cells and/or macromolecules in the separated state after two types of simple ground-based experiments. Microgravity electrophoresis experiments were simulated by separating model cell types (rat, chicken, human and rabbit erythrocytes) in a vertical density gradient containing low-conductivity buffer, 1.7%-6.5% Ficoll, 6.8-5.0% sucrose, and 1% SeaPrep low-melting temperature agarose and demonstrating that, upon cooling, a gel formed in the column, and cells could be captured in the positions to which they had migrated. Two-phase extraction experiments were simulated by choosing two-polymer solutions in which phase separation occurs in normal saline at temperatures compatible with cell viability and in which one or both phases form a gel upon cooling.

Keywords: *Roofing, *Creep rupture strength, *Joints(Junctions), *Adhesives, Bonding strength, Failure, Test facilities, Peel strength, Stresses, Creep properties.

The most frequently reported defect in ethylene-propylene-diene terpolymer (EPDM) single-ply roofing systems is in field-formed joints. The causes of these joint defects are largely unknown, but they tend to occur a short time after a roof is installed. The objectives of the research were (1) to determine the importance of the following material and fabrication variables in causing joint failures: adhesive thickness, cure time, mechanical load, adhesive type and surface cleanliness; (2) to rank these variables as they affect the creep-rupture life and strength of butyl-adhered EPDM joints; and (3) to determine the maximum peel stress which EPDM joints can sustain over their design life. From the results, cure time and level of cleanliness of the EPDM membrane have the greatest effect on joint strength; while the thickness of the adhesive and the magnitude of the mechanical load have the greatest effect on a joint's creep-rupture time-to-failure. Thus, the rankings of variables in creep-rupture and short-time strength experiments were different and this difference should have important implications in standards writing and in establishing performance requirements for EPDM roofing joints.

Assessment of the Performance and Reliability of Older ERW (Electric Resistance Welding) Pipelines.

R. J. Fields, E. N. Pugh, D. T. Read, and J. H. Smith. Jul 89, 60p NISTIR-89/4136

Keywords: *Petroleum pipelines, Reliability, Performance, Failure, Welded joints, Electric welding, Inspection, *Oil spills, *Maries County(Missouri).

On December 24, 1988, a failure occurred in the Ozark Pipeline System in Maries County, Missouri, and resulted in a spill of over 800,000 gallons of crude oil, causing serious contamination of the Gasconade and Missouri Rivers. The pipeline had been in operation since 1949 and the failure occurred in a section of steel pipe produced by electric resistance welding (ERW). A metallurgical investigation by Battelle-Columbus Laboratories concluded that the fracture originated at a defect in the ERW seam weld. At the request of Senators Bond (R-MO) and Danforth (R-MO), NIST assessed the Battelle findings and found them to be sound. NIST also addressed the issue of whether special standards should apply to the operation and inspection of older ERW pipelines. Based on a review of failure incidence data and related documents, it is concluded that, while ERW pipe manufactured prior to about 1970 is inherently susceptible to seam failures, the relatively small number of such failures does not warrant special standards except for critical risk locations. For the latter cases, measures are recommended for failure prevention and, of equal importance, for damage control in the event of isolated failure. Some of these measures are shown to have application to all pipelines.

EMAT (Electromagnetic-Acoustic Transducers) Examination for Cracks in Railroad Wheel Treads.

Final rept.
R. E. Schramm, P. J. Shull, A. V. Clark, and D. V. Mitakovic. 1990, 8p
See also PB90-123894. Sponsored by Federal Railroad Administration, Washington, DC.
Pub. in Proceedings of Nondestructive Testing and Evaluation for Manufacturing and Construction Conference, Urbana, IL., August 9-12, 1988, p373-380 1990.

Keywords: *Railroad cars, *Wheels, *Cracks, *Nondestructive tests, Stresses, Electromagnetic testing, Ultrasonic tests, Inspection, Braking, Rayleigh waves, Treads, Reprints.

The authors examined the use of Rayleigh-wave electromagnetic-acoustic transducers (EMATs) in pitch-catch as a possible non-contact inspection tool for cast steel wheels with an American-style profile used on the freight cars of the U.S. railway system. The transmitter and receiver coils were a meanderline design on a flexible substrate which conformed to the tread shape for maximum electromagnetic coupling. The transducer package was the two coils stacked and backed by a large Nd-Fe-B permanent magnet. A newly designed MOSFET pulser generated a high-current, gated rf pulse at 500 kHz. The Rayleigh wave generated traveled around an unflawed wheel circumference at least 14 times (about 36 m). This technique should allow detection of critical-depth cracks in the tread of every wheel on a train as it rolls by an inspection point in a railyard.

Crack Inspection of Railroad Wheel Treads by EMATs.

Final rept.
R. E. Schramm, P. J. Shull, A. V. Clark, and D. V. Mitakovic. 1989, 8p
Sponsored by Federal Railroad Administration, Washington, DC.

Pub. in Proceedings of International Symposium on Nondestructive Characterization of Materials (3rd), Saarbrücken, FRG, October 3-6, 1988, p421-428 1989.

Keywords: *Rolling stock, *Wheels, *Ultrasonic tests, *Cracks, Rail transportation, Nondestructive tests, Inspection, Treads, Rayleigh waves, Safety, Reprints.

Railroad safety depends on many factors. The integrity of the wheels on rolling stock is one that is subject to nondestructive evaluation. For some years, ultrasonic testing has been applied to the detection of cracks in wheel treads, with particular attention to automatic, in-rail, roll-by methods. We have begun constructing a system aimed at using relatively low frequency Rayleigh waves generated by electromagnetic acoustic transducers (EMATs). The current design uses a permanent magnet to maintain a compact structure and minimize the size of the pocket machined into the rail. Measurements thus far indicate a responsiveness even to small flaws. With the development of a signal processing and analysis system, field tests should soon be possible.

Color Appearance of Traffic Control Devices under Different Illuminants.

Final rept.
B. L. Collins. 1989, 10p
Sponsored by Federal Highway Administration, Washington, DC.
Pub. in Transportation Research Record 1247, p23-31 1989.

Keywords: *Traffic safety, *Vehicular traffic control, *Color codes, *Illuminating, Safety devices, Human factors engineering, Color conditioning, Brightness, Safety engineering, Traffic engineering, Reprints, *Highway signs.

Color has traditionally been used to code safety information because of its ability to attract attention and evoke a rapid response. Research on color coding, highway safety color codes, conspicuity, illuminant color shifts, and retroreflective materials has been reviewed to evaluate the effectiveness of the current chromaticity specifications for highway signs and markings. These current specifications require colors of medium lightness and saturation (except yellow), and sometimes can appear quite dark. Data from a previous study were analyzed to compare color appearance data (color name, lightness, and saturation) under seven different illuminants for a set of American National Standards Institute (ANSI) and highway colors. This analysis demonstrated that the ANSI colors, particularly safety yellow, were identified more accurately in terms of color name, lightness, saturation, and primary hue than was the corresponding highway color. A shift toward ANSI safety yellow from highway yellow is suggested.

Assessment of the Fire Performance of School Bus Interior Components.

Final rept.
E. Braun, S. Davis, J. H. Klote, B. C. Levin, and M. Paabo. Jul 90, 178p NISTIR-4347
Sponsored by National Highway Traffic Safety Administration, Washington, DC. Office of Vehicle Safety Standards.

Keywords: *Flammability testing, *Buses(Vehicles), *Seats, Burning rate, Fire tests, Toxicity, Combustion products, Smoke, Flame propagation, Furniture, Upholstery, *School buses, *Fire resistant materials, School bus safety.

Since seat assemblies represent the single largest type of combustible fuel in a school bus interior, the study is limited to currently used and state-of-the-art material assemblies. Six different seat assemblies having a range of fire performance were examined. Small-scale tests (Cone Calorimeter, LIFT, and NBS Toxicity Protocol) were performed on these materials. Large-scale tests (Furniture Calorimeter) were conducted on single seat assemblies. Full-scale tests were performed using a simulated bus enclosure measuring 2.44 m wide by 2.13 m high by 8.23 m long and three seat assemblies. The impact of ignition source size was determined by computer simulation. It was found that a 500 kW ignition source could produce untenable conditions in the simulated bus enclosure. Seat assemblies were exposed to 50 kW and 100 kW ignition sources in the large-scale tests and 100 kW ignition source in the full-scale tests. It was found that the small-scale tests were unable to provide a simple method for material selection that was consistent with the full-scale test results. At the present time, small-scale tests of materials cannot be depended upon to predict the fire behavior in the real world.

ware engineering, *Software tools, *Compartment
fires, Computer software.

The paper discusses the use of software tools to air in
the development of models produced by the Center for
Fire Research (CFR). There are two types of tools de-
scribed in the paper. The first type consists of execut-
able programs that characterize the subroutine and
data structures of FORTRAN programs. A second
class of software tools are subroutines that support
various utility functions required by CFR models. The
authors will discuss how each of these tools are used
and why their development was necessary. In addition,
the authors will indicate how these tools might be im-
proved.

Exposure: An Expert System Fire Code.
R. L. Smith. Jul 90, 42p NISTIR-4373
Sponsored by Air Force Engineering and Services
Center, Tyndall AFB, FL.

Keywords: *Fire safety, Building codes, Walls, Com-
puter programs, Cost effectiveness, *Fire codes,
*Expert systems, *Building fires, Combustibles,
Spread.

The report addresses the issue of developing an
expert or knowledge-based system that deals with the
problem of preventing the spread of fire between build-
ings. A knowledge-based program, EXPOSURE, has
been developed that facilitates using more appropriate
technology, expanding the problem domain, and pro-
viding cost-effective solutions. EXPOSURE can solve
the problem of the prevention of the spread of fire be-
tween buildings for the case when the exposed build-
ing has combustible walls. The use of the expert
system EXPOSURE and NFPA 80A produce signifi-
cantly different recommended minimum separation be-
tween buildings. In some cases EXPOSURE calls for
significantly greater separation and in others signifi-
cantly less. In one case the separation required by
NFPA 80A was more than five times greater than what
EXPOSURE recommended. The program demon-
strates that significant cost savings in achieving the
desired level of fire safety and in assuring the levels of
safety can be obtained by use of expert system fire
codes.

ware.

With the release of HAZARD I, a prototype hazard as-
sessment method and software, the National Institute
of Standards and Technology (NIST) has brought to
the fire protection engineering community a new gen-
eration of hazard analysis capabilities. In order to help
HAZARD I users benefit from the software, Worcester
Polytechnic Institute (WPI) has developed a five day
short course. The short course emphasizes correct
use of the software, and how to recognize misuse. The
course has been offered three times to a broad range
of students. In general, only those students with an en-
gineering background were able to learn enough about
the HAZARD I software to feel that they could continue
to learn how to use the software on their own and
eventually use it in practice. Nonetheless, virtually all
of the students benefitted from the course and found it
a worthwhile experience.

Pub. in Fire Technology 26, n3 p202-222 Aug 90.

Keywords: *Fire tests, *Clothing, *Fire fighting, Fire
protection, Apparel fabrics, Heat resistant materials,
Safety engineering, Fire safety, Heat flux, Experimen-
tal data, Reprints.

Seven experimental fires varying in fire load were con-
ducted in a simulated townhouse. Specimens of vari-
ous current fire fighters turnout coat materials were ex-
posed in the room of fire origin. The time at which con-
ditions would become untenable for the fire fighter due
to pain, as well as the time to second degree burn,
were calculated. These times ranked the coat speci-
mens in roughly the same order as the 'Thermal Pro-
tection Performance' measured according to NFPA
1971-1986, especially if the heat in the room devel-
oped rapidly.

AD-A223 764/2 000,710
- ADAPTERS**
Measuring Adapter Efficiency Using a Sliding Short Circuit.
PB90-271289 000,852
- ADDITIVES**
Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane.
PB90-187832 001,368
- ADENOSINE CYCLIC MONOPHOSPHATE**
Structure of a Complex of Catabolite Gene Activator Protein and Cyclic AMP Refined at 2.5 Å Resolution.
PB90-193525 001,327
- ADHESION**
Quality Assurance Tests for Adhesion of Paint on Tactical Rigid Wall Shelters.
PB90-219825 001,177
Micromechanics of Fracture in Structural Adhesive Bonds.
PB90-261116 001,122
Micromechanics of Fracture in Structural Adhesive Bonds.
PB90-261124 001,123
- ADHESIVES**
Clinical Biocompatibility of an Experimental Dentine-Enamel Adhesive for Composites.
PB90-171018 000,060
Strength and Creep-Rupture Properties of Adhesive-Bonded EPDM Joints Stressed in Peel.
PB90-257676 001,827
- ADSORBATES**
Substrate Surface Relaxation for Cl and S on Cu(001).
PB90-152463 000,328
Ultrafast Infrared Response of Adsorbates on Metal Surfaces: Vibrational Lifetime of CO/Pt(111).
PB91-117978 000,499
- ADSORBENTS**
Investigations of Selectivity in Reversed-Phase Liquid Chromatography on Chemically Bonded C18 Phases.
PB91-135012 000,518
- ADSORPTION**
Review of Model Sensor Studies on Pd/SnO₂(110) Surfaces.
N90-24604/2 000,315
Adsorption of Phenoxyacetic Acid and Trans-Cinnamic Acid on Hydroxyapatite.
PB90-192394 000,063
Adsorption of Zinc 3,3-Dimethylacrylate and 3,3-Dimethylacrylic Acid on Hydroxyapatite from Solution: Reversibility and Variability of Isotherms.
PB90-207044 000,066
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973
Pumping and Probing: Vibrational Relaxation in Time Domain Spectroscopy.
PB91-112227 000,495
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB91-113654 000,977
- ADSORPTIVITY**
Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments.
PB90-153487 001,208
- AEROSOLS**
Tracking Chemical Transformations of Particles in the Raman Microprobe.
PB90-149469 000,268
- AEROSPACE SAFETY**
Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813
- AGING TESTS (MATERIALS)**
Aging Effects and the Dependence of Modulus on Concentration in Isotactic Polystyrene/Cis-Decalin Gels.
PB90-170283 000,529
Time Domain Spectroscopy to Monitor the Condition of Cable Insulation.
PB91-112466 001,431
- AGREEMENTS**
Stable Implementation Agreements for Open Systems Interconnection Protocols. Version 3, Edition 1. December 1989.
PB90-212192 000,616
- AIR**
Interim Thermodynamic Property Formulation for Air.
PB90-152778 001,689
Thermodynamic Property Formulation for Air, 2. Pressure and Density Estimation Functions for the Dew and Bubble Lines.
PB90-254723 000,055
Thermodynamic Property Formulation for Air. 1. Single-Phase Equation of State from 60 to 873 K at Pressures to 70 MPa.
PB91-101337 000,487
- AIR CIRCULATION**
Ventilation and Air Quality Investigation of the Madison Building, Phase 1 Report.
PB90-155417 000,081
Model of a Simple Fan-Resistance Ventilation System and Its Application to Fire Modeling.
PB90-183336 000,088
- AIR CONDITIONING**
Initial Laboratory Evaluation of a Single Solution Circuit Cycle for Use with Nonazeotropic Refrigerants.
PB91-112862 000,960
- AIR FLOW**
Fire Propagation in Concurrent Flows, Final Progress Report.
PB90-151754 000,580
Numerical Method for Calculating Indoor Airflows Using a Turbulence Model.
PB90-162009 000,083
Estimating Air Leakage through Doors for Smoke Control.
PB90-218298 000,095
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973
Plaza Hotel Fire Experiments.
PB91-112334 000,158
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB91-113654 000,977
Simultaneous Measurements of Infiltration and Intake in an Office Building.
PB91-118430 000,105
Algorithm and Associated Computer Subroutine for Calculating Flow through a Horizontal Ceiling/Floor Vent in a Zone-Type Compartment Fire Model.
PB91-120170 000,166
- AIR INFILTRATION**
Simultaneous Measurements of Infiltration and Intake in an Office Building.
PB91-118430 000,105
- AIR POLLUTION**
Free Radical Chemistry of Aqueous-Phase SO₂(sub 2).
PB90-218207 000,289
Measurement of Large Scale Oil Spill Burns.
PB90-261033 000,975
Mechanisms of Deterioration in Cement-Based Materials and in Lime Mortar.
PB90-271198 001,199
Monitoring the Fate of Chlorine from MSW Sampling through Combustion. Part 2. Combustion Studies.
PB91-107383 000,597
Construction of an Exploratory List of Chemicals to Initiate the Search for Halon Alternatives.
PB91-107508 000,598
- AIR POLLUTION DETECTION**
Comparison of the Chromotropic Acid and Pararosaniline Methods for Measuring Formaldehyde Concentrations of Pressed-Wood Product Emissions.
PB90-188475 000,969
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 000,970
Exhaust Gas Analysis for Harmful Species: 19F1A Fire Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
- AIR POLLUTION SAMPLING**
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 000,970
Preliminary Radon Progeny Measurements in Three Federal Office Buildings.
PB90-192667 000,983
Exhaust Gas Analysis for Harmful Species: 19F1A Fire Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
Polycyclic Aromatic Hydrocarbon Emissions from the Combustion of Crude Oil on Water.
PB91-101055 000,976
- AIR QUALITY**
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 000,970
Preliminary Radon Progeny Measurements in Three Federal Office Buildings.
PB90-192667 000,983
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973
Development of Models for the Prediction of Indoor Air Quality in Buildings.
PB91-118281 000,978
- AIR SOURCE HEAT PUMPS**
Rating Procedure for Mixed Air-Source Unitary Heat Pumps Operating in the Heating Mode.
PB90-221854 000,098
- AIRCRAFT**
Recent Improvements in Time-Domain EMC (Electromagnetic Compatibility) Measurement System.
PB90-155821 000,018
- ALGAE**
High Temperature Lubricants from Biodeuterated Materials Produced by Algae.
PB90-169921 001,222
- ALGOL DISKS**
Theoretical Modelling of Algal Disks.
PB90-271370 000,045
- ALGORITHMS**
Flight Teletopic Services: From Functional Architecture to Computer Architecture.
N90-29823/3 001,816
Optimal 3-Dimensional Methods for Linear Programming.
PB90-155391 001,296
Algorithm and Computer Program for the Calculation of Envelope Curves.
PB90-155409 001,299
Iterative Seismic Inversion.
PB90-170382 000,800
Unrestricted Algorithms for Mathematical Functions.
PB90-171059 000,715
Radiation Energy-Angle Algorithm for Use in Personnel Dosimetry.
PB90-203126 001,358
HVAC Emulation and On-Line Testing of EMC Systems.
PB90-218173 001,378
Algorithms for Calculating Radiation View Factors between Plane Convex Polygons with Obstructions.
PB90-218470 001,744
Expected Linear 3-Dimensional Voronoi Diagram Algorithm.
PB90-227984 001,289
Algorithm for the Mass-Loss Rate of a Burning Wall.
PB91-112458 000,159
Residual Hermite Normal Form Computations.
PB91-118141 000,733
- ALIPHATIC HYDROCARBONS**
Flash Photolysis Resonance Fluorescence Investigation of the Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ketones Over the Temperature Range 240-440 K.
PB90-193475 000,274
Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ethers Over the Temperature Range 240-440 K.
PB90-193491 000,276
- ALKALI AGGREGATE REACTIONS**
Selection of Siliceous Aggregate for Concrete.
PB90-235029 000,563
Durability of Cement Pastes, Mortars, and Concretes.
PB90-242199 000,143
- ALKALI METALS**
Effective Core Potentials and Accurate Energy Curves for Cs₂ and Other Alkali Diatomics.
PB91-134205 000,514

KEYWORD INDEX

- ALKANES**
 Search for Tricriticality in Binary Mixtures of Near-Critical Propane and Normal Paraffins. PB90-170820 000,372
 Relationship between the Carbon-Number of N-Paraffins and Their Solubility in Supercritical Solvents. PB90-188202 000,387
- ALKYL RADICALS**
 Ion Chemistry of Cyanides and Isocyanides. 1. The Carbon Lone Pair as Proton Acceptor: Proton Affinities of Isocyanides. Alkyl Cation Affinities of N, O, and C Lone-Pair Donors. AD-A181 189/2 000,264
- ALKYLAMMONIUM IONS**
 Neutron Scattering Study of Layered Silicates Pillared with Alkylammonium Ions. PB91-112516 000,496
- ALKYNE HYDROCARBONS**
 Structures and Heats of Formation of C(sub 4)H(sub 7)(1+) Ions in the Gas Phase. PB90-169343 000,351
- ALKYNES**
 Vibrational Mode Mixing in Terminal Acetylenes: High-Resolution Infrared Laser Study of Isolated J States. PB90-207028 000,430
- ALLAN VARIANCE**
 New 'Filtered Allan Variance' and Its Application to the Identification of Phase and Frequency Noise Sources. PB90-187675 000,642
 Variances Based on Data with Dead Time between the Measurements. PB90-221821 001,303
- ALLIUM**
 Onion Skin as a Radiation Monitor. PB90-190737 001,356
- ALLOYS**
 Institute for Materials Science and Engineering: Metallurgy Division, Technical Activities 1989. PB90-161159 001,276
 Corrosion and Degradation of a Polyurethane/Co-Ni-Cr-Mo (MP35N) Pacemaker Lead. PB90-193236 000,064
 X-ray Diffraction Studies of Ni-Cr-Based Amorphous Alloys. PB91-101683 001,263

Calibration and Meaning of Antenna Factor and Gain for EMI Antennas. PB90-218439 000,811

KEYWORD INDEX

- ANTENNA RADIATION PATTERNS**
 Antenna Far-Field Pattern Accuracies at Millimeter Wave Frequencies Using the Planar Near-Field Technique. PB90-187626 000,803
 Iterative Technique to Correct Probe Position Errors in Planar Near-Field to Far-Field Transformations. PB90-187915 000,805
- ANTENNA SCANNERS**
 Automated Multi-Axis Motor Controller and Data Acquisition System for Near-Field Scanners. PB90-187683 000,804
- ANTENNAS**
 Positioning of GPS (Global Positioning System) Antennas in Time-Keeping Laboratories of North America. PB90-152703 001,394
 Planar Near-Field Codes for Personal Computers. PB90-155839 000,801
 Improvements in Polarization Measurements of Circularly Polarized Antennas. PB90-187923 000,806
 Comparison of Antenna Boresight Measurements between Near-Field and Far-Field Ranges. PB90-187931 000,807
 Mobile Antennas. PB90-218108 000,810
 Calibration and Meaning of Antenna Factor and Gain for EMI Antennas. PB90-218439 000,811
 Standard Linear Antennas, 30 to 1000 MHz. PB91-107391 000,812
- ANTHRACENE**
 Hydrogen Transfer from 9,10-Dihydrophenanthrene to Anthracene. PB90-241282 000,449
- ANTHRACENE COMPOUNDS**
 Identification of Mutagenic Methylbenz(a)anthracene and Methylchrysene Isomers in Natural Samples by Liquid Chromatography and Shpol'skii Spectroscopy. PB90-149212 000,209
- ANTIFERROMAGNETIC MATERIALS**
 Antiferromagnetic Ordering in Superconducting and Oxygen-Deficient Non-superconducting $R\text{Ba}_2\text{Cu}_3\text{O}(7-\delta)$ Compounds ($R = \text{Nd}$ and Sm). PB90-261413 001,629
- ANTIFERROMAGNETISM**
 Suppression of Superconductivity by Antiferromagnetism in $\text{Tm}(\text{sub } 2)\text{Fe}(\text{sub } 3)\text{Si}(\text{sub } 5)$. PB90-149121 001,535
- ANTIFOULING COATINGS**
 Di- and Tributyltin Species in Marine and Estuarine Waters. Inter-laboratory Comparison of Two Ultratrace Analytical Methods Employing Hydride Generation and Atomic Absorption or Flame Photometric Detection. PB90-170713 000,982
- ANTIMISSILE DEFENSE**
 Metrology for Space Power: Metrology Development and Survey of Space-Based Measurements. PB91-107607 001,374
- ANTIMONY OXIDES**
 Ternary Reactions among Polymer Substrate-Organohalogen-Antimony Oxides under Pyrolytic, Oxidative and Flaming Condition. PB90-154766 000,527
- ANTINEOPLASTIC AGENTS**
 Theoretical Studies of cis-Pt(II)-Diammine Binding to Duplex DNA. PB90-254798 001,348
- APATITE/HYDROXY**
 Adsorption of Zinc 3,3-Dimethylacrylate and 3,3-Dimethylacrylic Acid on Hydroxyapatite from Solution: Reversibility and Variability of Isotherms. PB90-207044 000,066
- APPLICATION PROGRAMS (COMPUTERS)**
 User Interface Component of the Applications Portability Profile. Category: Software Standard. Subcategory: Application Program Interface. FIPS PUB 158 000,742
- APPLICATIONS OF MATHEMATICS**
 Guide to Available Mathematical Software, March 1990. PB90-216508 001,308
- AQUASPIRILLUM MAGNETOTACTICUM**
 Small Angle Neutron and X-Ray Scattering from Magnetite Crystals in Magnetotactic Bacteria. PB90-169848 001,342
- AQUEOUS SOLUTIONS**
 Interfacial Electron Transfer Reactions between Platinum Colloids and Reducing Radicals in Aqueous Solution. PB90-153453 000,283
 Generalized Corresponding States and High-Temperature Aqueous Solutions. PB91-118513 000,507
- ARC WELDING**
 Development of a Weld Procedure to Repair Joints in a Railroad-Type Track. PB90-136920 001,829
- ARCHAEOLOGY**
 Laboratory Studies of Some European Artifacts Excavated on San Salvador Island. PB91-101071 000,057
- ARCHITECTURE (COMPUTERS)**
 Hierarchical Control of Intelligent Machines Applied to Space Station Telerobots. N89-26471/7 001,814
 Flight Telerobotic Services: From Functional Architecture to Computer Architecture. N90-29823/3 001,816
 Note on NASREM Implementation. PB90-203134 001,097
 Approach to Telerobot Computing Architecture. PB90-244419 001,103
- ARGININE**
 Argine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein. PB90-153446 001,324
- ARGON**
 Calibration of a Monochromator/Spectrometer System for the Measurement of Photoelectron Angular Distributions and Branching Ratios. DE86000789 000,307
 Infrared and Microwave Study of Angular-Radial Coupling Effects in Ar-HCN. PB90-170085 000,361
- ARGON COMPLEXES**
 Optothermal-Infrared and Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Rare Gas-CO₂ Complexes. PB91-118216 000,502
- ARGON IONS**
 Absolute Cross-Section Measurements in XQQ Instruments: $\text{Ar}(1+)(\text{N}(\text{sub } 2),\text{Ar})\text{N}(\text{sub } 2)(1+)$. PB90-170333 000,367
- AROMATIC HYDROCARBONS**
 Mechanisms of Condensation of Biaryl Hydrocarbons. PB90-192618 000,406
- AROMATIC POLYCYCLIC HYDROCARBONS**
 Gas Phase Reactions of Phenyl Radicals with Aromatic Molecules. PB90-149295 000,266
 Determination of Nitro-PAH (Polycyclic Aromatic Hydrocarbons) in Air and Diesel Particulate Matter Using Liquid Chromatography with Electrochemical and Fluorescence Detection. PB90-170200 000,231
 Determination of Column Selectivity Toward Polycyclic Aromatic Hydrocarbons. PB90-188343 000,395
 Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography. PB90-188350 000,237
 Comparison of Liquid Chromatography with Fluorescence Detection and Gas Chromatography/Mass Spectrometry for the Determination of Polycyclic Aromatic Hydrocarbons in Environmental Samples. PB90-206749 000,971
 Evaluation of Shape Selectivity in Liquid Chromatography. PB90-241688 000,457
 Polycyclic Aromatic Hydrocarbon Emissions from the Combustion of Crude Oil on Water. PB91-101055 000,976
 Anomalous Behavior of Selected Methyl-Substituted Polycyclic Aromatic Hydrocarbons in Reversed-Phase Liquid Chromatography. PB91-112730 000,256

KEYWORD INDEX

BEAM DIAGNOSTICS

Threshold Cerenkov Radiation and Beam Diagnostics.
PB90-217761 001,739

BEAM OPTICS

Multilayer-Coated Mirrors as Power Filters in Synchrotron Radiation Beamlines.
PB90-169335 001,696

Multiple Reflections within Neutron Optical Devices.
PB91-101477 001,775

BEAMS (SUPPORTS)

Seismic Performance of 1/3 Scale Post-Tensioned Precast Beam-Column Connections.
PB90-254434 000,178

Performance of 1/3-Scale Model Precast Concrete Beam-Column Connections Subjected to Cyclic Inelastic Loads.
PB91-107623 000,182

Flexural Behavior of Strain-Softening Solids.
PB91-112052 001,164

BELL PROVERS

Dynamics of the Bell Prover, II.
PB90-235276 001,460

BENCH MARKS

Benchmarking.
PB91-118166 000,656

BENDING

Creep Deformation of Ceramics in Four Point Bending.
PB90-152794 001,059

BENEFIT COST ANALYSIS

Risk Exposure and Risk Attitude of Homeowners in Fire Protection Investment Decisions.
PB90-141383 000,107

BENZENE

Kinetics of the Gas Phase Reaction of Hydroxyl Radicals with Ethane, Benzene, and a Series of Halogenated Benzenes Over the Temperature Range 234-438 K.
PB90-193483 000,275

BENZENES

Gas Phase Reactions of Phenyl Radicals with Aromatic Molecules.
PB90-149295 000,266

BESSEL FUNCTIONS

Evaluation of the Integral $I(\text{sub } l, l')(k, k') = \int_0^\infty \int_0^\infty I(\text{sub } l)(kr) \int_0^\infty I(\text{sub } l')(k'r) \text{ squared dr.}$
PB90-235011 001,290

BIBLIOGRAPHIC DATA BASES

Data Bases Available in the Research Information Center of the National Institute of Standards and Technology.
PB91-107284 001,035

BIBLIOGRAPHIES

Metrology for Electromagnetic Technology: A Bibliography of NIST (National Institute of Standards and Technology) Publications.
PB90-161670 001,473

Standard Reference Data Publications, 1987-1989.
PB90-161704 001,277

Bibliography of the NIST (National Institute of Standards and Technology) Electromagnetic Fields Division Publications.
PB90-163635 000,896

NIST (National Institute of Standards and Technology) Serial Holdings 1990.
PB90-183245 001,040

Fire Research Publications, 1989.
PB90-219809 000,096

NIST (National Institute of Standards and Technology) Structural Research Publications, 1984-1989.
PB90-227992 000,177

Publications of the National Institute of Standards and Technology, 1989 Catalog.
PB90-271818 000,014

BIFURCATION (MATHEMATICS)

Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals.
PB91-101089 001,636

BILE PIGMENTS

Certification of Bilirubin SRM 916a.
PB91-118117 000,258

BINARY ALLOYS

Effect of an Electric Field on the Morphological Stability of the Crystal-Melt Interface on a Binary Alloy.
PB90-193541 001,256

Effect of Anisotropic Thermal Conductivity on the Morphological Stability of a Binary Alloy.
PB90-271271 001,260

Effect of Surface Tension Anisotropy on Cellular Morphologies.
PB91-101444 001,262

BINARY-FLUID SYSTEMS

Modified Leung-Griffiths Model for Vapor-Liquid Equilibria: Application to Polar Fluid Mixtures.
PB90-206996 000,429

BINARY MIXTURES

Modified Leung-Griffiths Model for Vapor-Liquid Equilibria: Application to Polar Fluid Mixtures.

PB90-206996 000,429

Hydrogen-Component Fugacity Coefficients in Binary Mixtures with Isobutane: Temperature Dependence.
PB90-254400 000,460

Hydrogen Component Fugacity in Binary Mixtures with Carbon Monoxide: Temperature Dependence.
PB90-254418 000,461

Fugacity Coefficients of Hydrogen in (Hydrogen + 2-Methylpropane): Pressure Dependence.
PB91-133835 000,509

Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator.
PB91-135053 001,450

BINARY STARS

Survey of the Radio Continuum Emission of RS Canum Venaticorum and Related Active Binary Systems.
PB90-169731 000,035

IUE Observations of the M Dwarfs CM Draconis and Rossiter 137B: Magnetic Activity at Saturated Levels.
PB90-169764 000,037

Gravitational Radiation from the Galaxy.
PB91-118307 000,050

Spectroscopic Orbic and Evolution of HD 128220, a System Containing an O Subdwarf.
PB91-118315 000,051

BINDING ENERGY

High Accuracy, Absolute Wavelength Determination of Capture Gamma Ray Energies for E less than or equal to 5 MeV and the Direct Determination of Binding Energies in Light Nuclei.
PB90-261157 001,758

BINDING SITES

Engineering of Binding Affinity at Metal Ion Binding Sites for the Stabilization of Proteins: Subtilisin as a Test Case.
PB90-152455 001,309

BIOCHEMISTRY

Separation and Characterization of Fibronectin Domains by Two-Dimensional Electrophoresis.
PB90-241415 001,312

BIOCOMPATIBLE MATERIALS

Clinical Biocompatibility of an Experimental Dentine-Enamel Adhesive for Composites.
PB90-171018 000,060

BIODETERIORATION

Microbial Metal Leaching and Resource Recovery Processes.
PB90-192410 000,952

Corrosion and Degradation of a Polyurethane/Co-Ni-Cr-Mo (MP35N) Pacemaker Lead.
PB90-193236 000,064

BIOGRAPHIES

Precision Engineering and Experimental Physics: William A. Rogers, the First Academic Mechanician in the U.S.
PB90-217977 001,017

BIOLOGICAL LABORATORIES

Laboratory Robotics for Trace Analysis.
PB90-152844 001,319

BIOLOGICAL PRESERVATION

Preparation and Certification of Standard Reference Material 1507: 11-Nor-Delta(sup9)-Tetrahydrocannabinol-9-Carboxylic Acid in Freeze-Dried Urine.
PB90-136524 000,208

BIOLOGICAL PRODUCTS

High Temperature Lubricants from Biodeuterated Materials Produced by Algae.
PB90-169921 001,222

BIOMEDICAL RADIOGRAPHY

X-ray Attenuation Properties of Radiographic Contrast Media.
PB90-169822 001,321

BIOPROCESS ENGINEERING

Survey of Selected Topics Relevant to Bioprocess Engineering.
PB90-257668 000,954

BIOTECHNOLOGY

Quantitative Measurement of Radiation-Induced Base Products in DNA Using Gas Chromatography-Mass Spectrometry.
AD-A214 233/9 001,351

Physical Phenomena and the Microgravity Response.
N90-13945/2 001,317

Arginine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein.
PB90-153446 001,324

Histogram Specification as a Method of Density Modification.
PB90-153479 001,553

High Temperature Lubricants from Biodeuterated Materials Produced by Algae.
PB90-169921 001,222

Deletion Analysis of the DNA Sequence Required for the In vitro Initiation of Replication of Bacteriophage.
PB90-169939 001,325

Microbial Metal Leaching and Resource Recovery Processes.
PB90-192410 000,952

Mechanistic and Physiological Consequences of HPr(ser) Phosphorylation on the Activities of the Phosphoenolpyruvate: Sugar Phosphotransferase System in Gram-Positive Bacteria. Studies with Site-Specific Mutants of HPr.
PB90-192477 001,344

Corrosion and Degradation of a Polyurethane/Co-Ni-Cr-Mo (MP35N) Pacemaker Lead.
PB90-193236 000,064

Vector Averaging Method for Locating Small Differences between Nearly Identical Protein Structures.
PB90-193517 001,326

Structure of a Complex of Catabolite Gene Activator Protein and Cyclic AMP Refined at 2.5 A Resolution.
PB90-193525 001,327

NBS Biological Macromolecule Crystallization Database.
PB90-206012 001,328

Neutron and Light-Scattering Studies of DNA Gyrase and Its Complex with DNA.
PB90-206053 001,330

Autoregulation of the Yeast Copper Metallothionein Gene Depends on Metal Binding.
PB90-206103 001,331

Structure of Phosphate-Free Ribonuclease A Refined at 1.26 A.
PB90-206715 001,332

Structure of Insulin: Results of Joint Neutron and X-ray Refinement.
PB90-206723 001,311

Structure of Form III Crystals of Bovine Pancreatic Trypsin Inhibitor.
PB90-206731 001,333

Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein.
PB90-218322 001,334

Binding of Substituted cis-Pt(II)-Diammines to Duplex DNA.
PB90-218447 001,335

Theoretical Studies of cis-Pt(II)-Diammine Binding to Duplex DNA.
PB90-254798 001,348

Survey of Selected Topics Relevant to Bioprocess Engineering.
PB90-257668 000,954

Crystal Structures of Bacterial Glutaminase-Asparaginases.
PB90-271354 001,336

Methacrylate Oligomers with Pendant Isocyanate Groups as Tissue Adhesives.
PB91-111971 000,074

Correlation of Molecular Total Surface Area with Organotin Toxicity for Biological and Physicochemical Applications.
PB91-118190 001,372

Structure of Hydroxyl Radical-Induced DNA-Protein Crosslinks in Calf Thymus Nucleohistone In vitro.
PB91-118257 001,337

Significance of Cell Fluorescence Color of Acridine Orange-Stained 'Thiobacillus ferrooxidans' Under Epifluorescence Microscopy.
PB91-135046 001,346

BIPOLAR TRANSISTORS

Semiconductor Measurement Technology: Thermal Resistance Measurements.
PB90-269564 000,876

Performance Trade-Off for the Insulated Gate Bipolar Transistor: Buffer Layer versus Base Lifetime Reduction.
PB91-107409 000,883

Investigation of the Drive Circuit Requirements for the Power Insulated Gate Bipolar Transistor (IGBT).
PB91-112276 000,887

BIREFRINGENCE

New Compensation Method for Bulk Optical Sensors with Multiple Birefringences.
PB90-152687 001,471

BISMUTH ADDITIONS

Effect of Anisotropic Thermal Conductivity on the Morphological Stability of a Binary Alloy.
PB90-271271 001,260

BISMUTH OXIDES

Phase Equilibria and Crystal Chemistry in Portions of the System SrO-CaO-Bi2O3-CuO, Part 2 - The System SrO-Bi2O3-CuO.
PB90-256835 001,627

BISMUTH STRONTIUM

Processing Bi-Pb-Sr-Ca-Cu-O Superconductors from Amorphous State (Abstract Only).
N90-27860/7 001,517

BISMUTH STRONTIUM CALCIUM CUPRATES

Magnetic-Field-Modulated Microwave-Absorption Detection in a Bi-Sr-Ca-Cu-O Superconductor.
PB90-241308 001,613

BLACKBODY RADIATION

Measurement of the Radiance Temperature (at 655 nm) of Melting Graphite Near Its Triple Point by a Pulse-Heating Technique.
PB90-271263 001,124

KEYWORD INDEX

BUILDING TECHNOLOGY

- BLOOD**
Inactivation of Human Immunodeficiency Virus (HIV) by Ionizing Radiation in Body Fluids and Serological Evidence.
PB90-170069 001,343
- BLOOD CHEMICAL ANALYSIS**
National Reference System for Cholesterol.
PB90-150244 001,318
Analysis of Carboxyhemoglobin and Cyanide in Blood from Victims of the Dupont Plaza Hotel Fire in Puerto Rico.
PB90-205782 001,320
- BLOOD PROTEINS**
Chromatographic Separations of Serum Proteins on Immobilized Metal Ion Stationary Phases.
PB90-152547 000,217
- BODIES OF REVOLUTION**
Stabilization of Taylor-Couette Flow Due to Time-Periodic Outer Cylinder Oscillation.
PB90-219130 001,458
- BODY ARMOR**
Selection and Application Guide to Police Body Armor.
PB90-149170 000,077
- BODY FLUIDS**
Inactivation of Human Immunodeficiency Virus (HIV) by Ionizing Radiation in Body Fluids and Serological Evidence.
PB90-170069 001,343
- BOILERS**
Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating.
PB90-185117 000,089
- BOILING POINTS**
Thermodynamic Properties of CFC Alternatives: A Survey of the Available Data.
PB91-134460 000,515
- BOLOMETERS**
Systematic Errors in Power Measurements Made with a Dual Six-Port ANA.
PB90-145160 000,814
Superconducting Inductance Bolometer with Potential Photon-Counting Sensitivity: A Progress Report.
PB91-118489 000,941
- BOLTZMANN EQUATION**
ELENDIF: A Time-Dependent Boltzmann Solver for Partially Ionized Plasmas.
PB90-241605 001,508
- BONDING STRENGTH**
Thermal Technique for Determining Interface and/or Interply Strength in Composites.
PATENT-4 972 720 001,182
Preliminary Performance Criteria for the Bond of Portland-Cement and Latex-Modified Concrete Overlays.
PB90-204520 000,571
- BONES**
Post-Irradiation Dosimetry of Meat by Electron Spin Resonance Spectroscopy of Bones.
PB90-149493 001,354
Use of Bone Mineral Ratio for Early Diagnosis of Osteoporosis.
PB90-271669 001,323
- BOOKS**
Book Review: The Current Comparator by W. J. M. Moore and P. N. Miljanic.
PB90-170929 000,857
- BOREHOLES**
Tilt Observations Using Borehole Tiltmeters 2. Analysis of Data from Yellowstone National Park.
PB90-136326 001,383
- BORING**
Energy Transfer Mechanism in SPT (Standard Penetration Test).
PB90-170184 000,574
- BORON**
Effects of Boron Implantation on Silicon Dioxide Passivated HgCdTe.
PB90-271172 000,291
- BORON ALLOYS**
Quasicrystalline Structures of Transition Metal/Metalloid Glasses.
DE86002932 001,242
- BORON NITRIDES**
Laser-Induced Vaporization Mass Spectrometry of Refractory Materials: Apparatus and the BN System.
PB90-152836 001,133
- BOROSILICATE GLASS**
Determination of Fiber/Matrix Interfacial Properties of Ceramic and Glass Matrix Composites.
PB90-163254 001,136
Comparison of Methods for Determining Fiber/Matrix Interface Frictional Stresses in Ceramic Matrix Composites.
PB90-260985 001,185
- BOUNDARY LAYER**
Guided Interface Waves.
PB91-118158 001,189
- BOUNDARY LAYER DIFFUSION CONTROLLED ABSORPTION MODELS**
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973
- BOUNDARY LAYER FLOW**
Negatively Buoyant Wall Flows Generated in Enclosure Fires.
PB90-152802 000,185
Investigation of the Effects of a Stratified Two Layer Environment on Fire Plume Temperatures.
PB90-218165 000,136
- BOUNDARY LAYER TRANSITION**
Interaction of a Three-Dimensional Roughness Element with a Laminar Boundary Layer.
AD-A178 668/0 001,451
- BREAKING**
Experimental Investigation of Glass Breakage in Compartment Fires.
PB90-244443 000,144
- BREMSSTRAHLUNG**
ETRAN: Experimental Benchmarks.
PB90-150103 001,687
Test of a Bremsstrahlung Equation for Energy-Dispersive X-ray Spectrometers.
PB90-170721 001,702
Bremsstrahlung Radiation Emitted in Fast-Electron-Atom Collisions.
PB90-171109 001,708
- BRIDGE DECKS**
Preliminary Performance Criteria for the Bond of Portland-Cement and Latex-Modified Concrete Overlays.
PB90-204520 000,571
- BRITTLE FRACTURING**
Surface Forces and Fracture in Brittle Materials.
PB90-169426 001,557
Brittle Fracture Behavior of Ceramics.
PB91-118224 001,061
- BRITTLE MATERIALS**
Crack Velocity Functions Thresholds in Brittle Solids.
PB91-134890 001,168
- BRITTLENESS**
Molecular Wedge in Brittle Cracks.
PB90-193616 001,258
Brittle Fracture Behavior of Ceramics.
PB91-118224 001,061
- BROADBAND AMPLIFIERS**
High-Current Very Wide-Band Transconductance Amplifier.
PB90-187808 000,818
- BUBBLES**
Bubble Formation from a Sparger in Polymer Solutions-II. Moving Liquid.
PB90-149246 000,525
- BUCKLING**
Periodic and Chaotic Motions of a Modified Stoker Column: Experimental and Numerical Results.
PB90-215849 000,176
- BUFFERS (CHEMISTRY)**
Separation of Hydrophilic Thiols Using Reversed-Phase Chromatography with Trihaloacetate Buffers.
PB90-188434 000,399
- BUILDING**
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973
- BUILDING CODES**
Wind and Seismic Effects. Proceedings of the Joint Meeting of the U.S.-Japan Cooperative Program in Natural Resources Panel on Wind and Seismic Effects (21st).
PB90-186826 000,172
Probability-Based Criteria for Serviceability Limit States.
PB90-187584 000,173
International Harmonization of Standards.
PB90-254632 000,118
EXPOSURE80A: A Computer Program Version of NFPA 80A.
PB90-257726 000,119
Development and Enforcement of U.S. Building Regulations.
PB91-101261 000,121
Developing a Response to EC '92.
PB91-134072 000,123
- BUILDING FIRES**
Evaluation of Quarter-Scale Compartment Fire Modeling for Constant and Stepped Heat Inputs.
PB90-149527 000,184
Negatively Buoyant Wall Flows Generated in Enclosure Fires.
PB90-152802 000,185
Measurement of Flame Lengths under Ceilings.
PB90-170531 000,186
Model of a Simple Fan-Resistance Ventilation System and Its Application to Fire Modeling.
PB90-183336 000,088
Experimental Fire Tower Studies of Elevator Pressurization Systems for Smoke Control.
PB90-193251 000,188
EXITT: A Simulation Model of Occupant Decisions and Actions in Residential Fires.
PB90-218256 000,191
Exposure: An Expert System Fire Code.
PB90-257601 001,836
- BUILDING MATERIALS**
Effect of Wall Mass on the Annual Heating and Cooling Loads of Single-Family Residences for Five Selected Climates.
PB91-118018 000,104
- BUILDING STONE**
Evaluation of a Surface Treatment to Improve the Erosion Resistance of Coquina Stone at Castillo de San Marcos.
PB90-198938 000,175
- BUILDING SYSTEMS**
Simulation of a Multizone Air Handler.
PB90-169913 000,087
- BUILDING TECHNOLOGY**
Second-Level Post-Occupancy Evaluation (POE) Analysis.
DE89014520 000,078
Experimental evaluation of two nonazeotropic refrigerant mixtures in a water-to-water breadboard heat pump.
DE90009016 000,955
Method for Characterizing the Dynamic Performance of Wall Specimens Using a Calibrated Hot Box.
PB90-135773 000,125
Color and Lighting.
PB90-136482 000,079
Guide Specifications and Reference Specification System.
PB90-139635 000,114
Influence of Horizontal Reinforcement on Shear Resistance of Concrete Block Masonry Walls.
PB90-145624 000,168
Thermodynamics of Calcium Silicate Hydrates and Their Solutions.
PB90-149220 000,559
Load Duration and Probability Based Design of Wood Structural Members.
PB90-149410 000,169
Pore Structure of Concrete and Freezing Vulnerability.
PB90-149683 000,570
Roles of the National Bureau of Standards in Quality Assurance in Buildings and Other Construction.
PB90-150079 000,116
Integrating Knowledge for the Identification of Cracks in Concrete Using an Expert System Shell and Extensions.
PB90-151234 000,560
Reactions between Silicon and Nitrogen. Part 2. Microstructure.
PB90-152638 000,269
Design of High Strength Cement-Based Materials. Part 3. State of the Art.
PB90-152646 001,129
Design of High Strength Cement-Based Materials. Part 1. Fracture Mechanics.
PB90-152653 001,130
Reply to Comment on 'Aqueous Solubility Relationships for Two Types of Calcium Silicate Hydrate.'
PB90-152828 000,333
Ventilation and Air Quality Investigation of the Madison Building. Phase 1 Report.
PB90-155417 000,081
Suprathreshold Visibility Meter to Directly Assess the Conspicuity of Office Tasks.
PB90-161829 000,082
Evaluation of Thermal Probe Method for Estimating the Heat Loss from Underground Heat Distribution Systems.
PB90-161993 000,957
Numerical Method for Calculating Indoor Airflows Using a Turbulence Model.
PB90-162009 000,083
Screening Procedures for Detecting Lead in Existing Paint Films: A Literature Review.
PB90-162082 001,173
Automated Maintenance Management Program Part 2: The Integration of Databases and Image Processing Results for the Quantitative Assessment of the Exterior Condition of Metal Buildings.
PB90-162090 000,106
Frost-Resistance of Concrete.
PB90-162116 000,561
Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results.
PB90-164484 000,084
Engineering Analysis of Major Plant Components.
PB90-169897 000,085
Engineering Data Collected during the Operation of a Total Energy Plant.
PB90-169905 000,086
Simulation of a Multizone Air Handler.
PB90-169913 000,087
Energy Transfer Mechanism in SPT (Standard Penetration Test).
PB90-170184 000,574

Assessment of the Fire Performance of School Bus Interior Components. PB90-265307	001,833		
BUTADIENES			
Structures and Heats of Formation of C(sub 4)H(sub 7)(1+) Ions in the Gas Phase. PB90-169343	000,351		
BUTANES			
Vapor + Liquid Equilibria and Coexisting Densities of (Carbon Dioxide + n-butane) at 311 to 395 K. PB90-254848	000,469		
Vapor-Liquid Equilibrium in Binary Systems of Chlorotrifluoromethane with n-Butane and Isobutane. PB91-101642	000,491		
Fugacity Coefficients of Hydrogen in (Hydrogen + 2-Methylpropane): Pressure Dependence. PB91-133835	000,509		
Vapor-Liquid Equilibrium of Carbon Dioxide with Isobutane and n-Butane. Modified Leung-Griffiths Correlation and Data Evaluation. PB91-167460	000,520		
BUTANOLS			
Gas-Phase Reactions of Hydroxyl Radicals with the Fuel Additives Methyl Tert-Butyl Ether and Tert-Butyl Alcohol Over the Temperature Range 240-440 K. PB90-193467	000,414		
BUTENES			
Stopped-Flow Studies of the Mechanisms of Ozon-Alkene Reactions in the Gas Phase: Trans-2-butene. PB90-169681	000,355		
CABLE INSULATION			
Review of Candidate Methods for Detecting Incipient Defects Due to Aging of Installed Cables in Nuclear Power Plants. PB90-261314	001,430		
CADMIUM			
Iron and Cadmium Capture Gamma Ray Photofission Measurement. PB91-134981	001,425		
CADMIUM TELLURIDES			
Magneto-Optical Investigation of Impurity and Defect Levels in HgCdTe Alloys. PB90-218090	001,607		
CALCIUM			
Energy Transfer Processes of Aligned Excited States of Ca Atoms. AD-A177 536/0	000,297		
Distinct Alignment Effects for Y(sub 2.0) versus Y(sub 2, + or - 1) Angular Wave Functions Observed in Collisions of an Atomic Ca D State. PB90-206947	001,734		
Individual Cross Sections for (1)D2 Sublevels (M sub L) = 0, + or - 1, + or - 2) in the Alignment-Dependent Process: Ca(4p(2) (1)D2) + Rg -> Ca (3d4p (1)F3) + Rg as a Function of Rare Gas. PB90-241670	000,456		
Alignment Effects in Ca-He (5(1)P1 - 5(3)PJ) Energy Transfer Half-Collisions. PB90-271487	001,767		
CALCIUM-BINDING PROTEINS			
Engineering of Binding Affinity at Metal Ion Binding Sites for the Stabilization of Proteins: Subtilisin as a Test Case. PB90-152455	001,309		
CALCIUM FLUORIDES			
Assessment of Loosely-Bound and Firmly-Bound Fluoride Uptake by Tooth Enamel from Topically Applied Fluoride Treatments. PB90-254905	001,349		
CALCIUM PHOSPHATES			
Calcium Phosphate Root Canal Sealer-Filler. PB90-188533	000,061		
CALCIUM SILICATES			
Thermodynamics of Calcium Silicate Hydrates and Their Solutions. PB90-149220	000,559		
Reply to Comment on 'Aqueous Solubility Relationships for Two Types of Calcium Silicate Hydrate.' PB90-152828	000,333		
Effects of Particle Size Distribution on the Kinetics of Hydration of Tricalcium Silicate. PB90-241340	000,450		
CALEBRATION			
Standardization of Rn-222 at the Australian Radiation Laboratory. PB90-255365	001,421		
CALIBRATION			
ICARE Radon Calibration Device. PB90-255332	001,418		
CALIBRATING			
Radiation Thermometry at NIST: An Update of Services and Research Activities. N90-17903/7	000,995		
Coaxial Intrinsic Impedance Standards. PB90-155797	000,816		
Optical Calibration of Accurate Particle Sizing Standards at the U.S. National Bureau of Standards. PB90-169368	000,614		
New Gas-Phase Nitric Acid Calibration System. PB90-170366	000,232		
Calibration of Road Roughness Measuring Equipment. Volume 1. Experimental Investigation. PB90-208273	000,572		
Calibration of Road Roughness Measuring Equipment. Volume 2. Calibration Procedures. PB90-208281	000,573		
Quick and Easy Multiple Use Calibration Curve Procedure. PB91-101121	001,020		
International Comparison of Low Audio Frequency Power Meter Calibrations Conducted in 1989. PB91-101204	000,924		
Qualifying Watthour Meters for Use as MAP Transport Standards. PB91-101527	000,930		
CALIBRATION			
Calibration of a Monochromator/Spectrometer System for the Measurement of Photoelectron Angular Distributions and Branching Ratios. DE86000789	000,307		
Reference Standard Block for Use in Nondestructive Test Probe Calibration and Method of Manufacture Thereof. PATENT-4 963 826	001,070		
Measurement Quality Assurance through a National System of Secondary Laboratories. PB90-169780	001,402		
NBS (National Bureau of Standards) Ionizing-Radiation Measurement Services. PB90-170499	001,701		
Current Status of Frequency Calibration Tables (0 to 3000 cm(-1)) for Tunable Diode Lasers from Heterodyne Frequency Measurements. PB90-188590	001,479		
Review of Scattering Corrections for Calibration of Neutron Instruments. PB90-190752	001,403		
Calorimetry of Electron Beams and the Calibration of Dosimeters at High Doses. PB90-190828	001,405		
Calibration of a Neutron-Driven Gamma-Ray Source. PB90-193582	001,721		
Journal of Reasearch of the National Institute of Standards and Technology. March-April 1990. Volume 95, Number 2. Special Issue: Radon Measurement Standards and Calibration. PB90-255266	001,411		
Calibration of Radon-222 Reference Instrument in Sweden. PB90-255274	001,412		
Bureau of Mines Method of Calibrating a Primary Radon Measuring Apparatus. PB90-255282	001,413		
Calibration and Quality Assurance Program for Environmental Radon Measurements. PB90-255290	001,414		
U.K. National Radiological Protection Board Radon Calibration Procedures. PB90-255308	001,415		
Calibration of dc Voltage Standards at NIST. PB90-256819	000,917		
NIST (National Institute of Standards and Technology) Digitally Synthesized Power Calibration Source. PB91-107474	000,831		
Calibration of High-Frequency Accelerometers by Conventional Methods. PB91-118521	001,448		
Calibration of Vibration Pickups at Low Ultrasonic Frequencies. PB91-118539	001,449		
Calibration Procedures for Inductance Standards Using a Commercial Impedance Meter as a Comparator. PB91-120147	000,862		
Wafer-Level ANA Calibrations at NIST (National Institute of Standards and Technology). PB91-134353	000,892		
CALIBRATION STANDARDS			
Standard Flaws for Eddy Current Probe Characterizations. PB90-135815	001,244		
Radiation Standards and Calibrations: Documentation Available from NBS (National Bureau of Standards). PB90-169806	001,025		
Dynamics of the Bell Prover, II. PB90-235276	001,460		
Spectroradiometric Determination of the Freezing Temperature of Gold. PB90-235292	000,446		
NIST Primary Radon-222 Measurement System. PB90-255340	001,419		
CALIFORNIUM 252			
Anisotropic Neutron Emission from a Californium-252 Source. PB91-118182	001,786		
CALMODULIN			
Phase Improvement in the Structure Interpretation of Fragment TR2C from Bull Testis Calmodulin Using Combined Entropy Maximization and Solvent Flattening. PB91-101576	001,641		
CALORIMETER			
Calibration Technique for Heat Flux Sensors Used in Fire Experiments and Standard Fire Tests. AD-A225 222/9	000,799		
CALORIMETERS			
NBS (National Bureau of Standards) Boil-Off Calorimeter for Measuring Thermal Conductivity of Insulating Materials. PB90-149543	001,000		
Smoke Measurement Results from the Cone Calorimeter. PB90-271032	000,150		
Smoke and Soot Data Determinations in the Cone Calorimeter. PB90-271040	000,151		
CALORIMETRY			
Calorimetry of Electron Beams and the Calibration of Dosimeters at High Doses. PB90-190828	001,405		
CALS			
Framework for Developing a CALS Data Dictionary. PB90-257585	000,754		
CALS (COMPUTER AIDED ACQUISITION AND LOGISTIC SUPPORT)			
Graphics Standards in the Computer-Aided Acquisition and Logistic Support (CALS) Program, Fiscal Year 1989. Volume 1. Test Requirements Document, Extended CGM (CGEM). PB90-257759	000,756		
CAMERA FIXATION			
Towards an Understanding of Camera Fixation, 1990. PB90-254863	001,441		
CAMERAS			
Towards an Understanding of Camera Fixation. PB90-160342	001,439		
Quantitative Approach to Camera Fixation. PB90-228008	001,102		
CANNABIS			
Preparation and Certification of Standard Reference Material 1507: 11-Nor-Delta(sup9)-Tetrahydrocannabinol-9-Carboxylic Acid in Freeze-Dried Urine. PB90-136524	000,208		
CAPACITANCE			
Applications of Capacitive Array Sensors to Nondestructive Evaluation. PB90-192642	001,075		
CAPACITORS			
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method. PB90-136581	000,624		
Electrical Characterization of Beta Silicon Carbide MIS (Metal-Insulator-Semiconductor) Capacitors with Thermally Grown or Chemical-Vapor Deposited Oxides. PB90-136615	000,866		
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method. PB90-152893	000,856		
Small Signal Modeling of the MOSOS Capacitor. PB90-187642	000,870		
CAPILLARITY			
Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics. PB90-188426	001,579		
CAPILLARY TUBES			
Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques. PB90-170432	000,233		

KEYWORD INDEX

- CAPTURE**
Iron and Cadmium Capture Gamma Ray Photofission Measurement. PB91-134981 001,425
- CARBOHYDRATES**
Two-Dimensional POMME J (CH)-Resolved ¹³C NMR Spectrum Editing Application to Peptide and Carbohydrate Derivatives. PB90-136516 000,207
- CARBON**
Correction to 'Calorimetric Measurement of the Carbon Kerma Factor for 14.6-MeV Neutrons' by J. C. McDonald. PB90-149105 001,685
Relationship between the Carbon-Number of N-Paraffins and Their Solubility in Supercritical Solvents. PB90-188202 000,387
- CARBON CLUSTERS**
Pattern Differences in Laser Microprobe Mass Spectra of Negative Ion Carbon Clusters. PB90-149360 000,579
- CARBON DIOXIDE**
Experimental Measurement and Prediction of Thermophysical Property Data of Carbon Dioxide Rich Mixtures. PB90-187592 000,384
Study of Vibronic Coupling in the tild C State of CO(+)(sub 2). PB90-188293 000,392
Diode Laser Measurement of the (nu sub 3) Band of (14)CO(sub 2). PB90-189319 000,393
Vapor + Liquid Equilibria and Coexisting Densities of (Carbon Dioxide + n-butane) at 311 to 395 K. PB90-254848 000,469
Rotational and Tunneling Spectrum of the H2S.CO2 van der Waals Complex. PB90-261348 000,472
Critical Exponent for the Viscosity of Carbon Dioxide and Xenon. PB90-271115 000,477
Isochoric (p,Vm,T) Measurements on CO2 and on (0.982 CO2 + 0.018 N2) from 250 to 330 K at Pressures to 35 MPa. PB90-271313 000,479
Toxicological Interactions between Carbon Monoxide and Carbon Dioxide. PB91-107433 001,370
Gas Isotope Dilution Mass Spectrometry: Use of Multiple Fractional Abundance Ratios. PB91-134833 000,263
Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator. PB91-135053 001,450
Vapor-Liquid Equilibrium of Carbon Dioxide with Isobutane and n-Butane: Modified Leung-Griffiths Correlation and Data Evaluation. PB91-167460 000,520
- CARBON DISULFIDE**
Current Status of Frequency Calibration Tables (0 to 3000 cm(-1)) for Tunable Diode Lasers from Heterodyne Frequency Measurements. PB90-186590 001,479
- CARBON FLUORIDES**
Two Photon Resonance Enhanced Multiphoton Ionization Spectroscopy of the 3p(pi) D (2)l(sub r) (v' = 0,1,2)-X (2)l(sub r) (v' = 0) Bands of the Fluoromethyldyne Radical between 355 and 385 nm. PB90-192287 000,401
- CARBON MONOXIDE**
High Resolution Inverse Raman Spectroscopy of the CO Q Branch. AD-A205 450/0 000,298
Measurement and Prediction of Raman Q-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8 000,302
Fundamental Molecular Data to Support CARS (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration. AD-A212 411/3 000,304
Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm(-1). PB90-206897 000,425
Long-Range Plan for a Research Project on Carbon Monoxide Production and Prediction. PB90-209602 000,587
Toxicological Effects of Different Time Exposures to the Fire Gases: Carbon Monoxide or Hydrogen Cyanide or to Carbon Monoxide Combined with Hydrogen Cyanide or Carbon Dioxide. PB90-217746 001,369
Stimulated Desorption from CO Chemisorbed on Cr(110): Sensitivity to Bonding Changes. PB90-217811 000,432
Water Hydrogen Bonding: The Structure of the Water-Carbon Monoxide Complex. PB90-261421 000,475
Toxicological Interactions between Carbon Monoxide and Carbon Dioxide. PB91-107433 001,370
Ultrafast Infrared Response of Adsorbates on Metal Surfaces: Vibrational Lifetime of CO/Pt(111). PB91-117978 000,499
- CARBON OXYSULFIDE**
Heterodyne Frequency Measurements on OCS Near 61.76 THz (2060 cm(-1)). PB90-206806 000,423
- CARBONYL SULFIDE**
Current Status of Frequency Calibration Tables (0 to 3000 cm(-1)) for Tunable Diode Lasers from Heterodyne Frequency Measurements. PB90-188590 001,479
- CARBOXYHEMOGLOBINS**
Analysis of Carboxyhemoglobin and Cyanide in Blood from Victims of the Dupont Plaza Hotel Fire in Puerto Rico. PB90-205782 001,320
- CARBOXYLIC ACIDS**
Preparation and Certification of Standard Reference Material 1507: 11-Nor-Delta(sup9)-Tetrahydrocannabinol-9-Carboxylic Acid in Freeze-Dried Urine. PB90-136524 000,208
- CARPETS**
Examination of the Variability of the ASTM (American Society for Testing and Materials) E 648 Standard with Respect to Carpets. PB90-154626 000,127
Fire Risk Assessment Method: Case Study 2, Carpet in Offices. PB90-235037 000,140
- CARS (COHERENT ANTI STOKES RESONANCE RAMAN SPECTROMETRY)**
Fundamental Molecular Data to Support CARS (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration. AD-A212 411/3 000,304
- CASTING**
Mesh Monitor Casting of Ni-Cr Alloys: Element Effects. PB90-170853 001,251
- CATABOLISM**
Structure of a Complex of Catabolite Gene Activator Protein and Cyclic AMP Refined at 2.5 A Resolution. PB90-193525 001,327

- CHLORINE**
Substrate Surface Relaxation for Cl and S on Cu(001).
PB90-152463 000,328
- Chlorine Mass Balance in the Combustion of Refuse-Derived Fuel.
PB90-254442 000,986
- Chemisorption of Chlorosilanes and Chlorine on Si(111) 7x7.
PB91-101659 000,492
- Summary Abstract: The Chemisorption of SiCl₄, Si₂Cl₆, and Chlorine on Si(111) 7x7.
PB91-134924 000,517
- CHLORINE IONS**
New Recombination Mechanism: Tidal Termolecular Ionic Recombination.
PB90-271065 001,761
- CHLOROPRENE**
Update: ASTM (American Society for Testing and Materials) Standards for Single-Ply Membranes.
PB90-170739 000,130
- CHLOROTRIFLUOROMETHANE**
Vapor-Liquid Equilibrium in Binary Systems of Chlorotrifluoromethane with n-Butane and Isobutane.
PB91-101642 000,491
- CHOLESTEROL**
National Reference System for Cholesterol.
PB90-150244 001,318
- CHOSUN REFRACTORIES CO LTD**
Chosun Refractories Co. Ltd.
PB90-188418 001,142
- CHROMATES**
Sensitive Dichromate Dosimeter for the Dose Range, 0.2-3 kGy.
PB90-192378 001,399
- CHROMATOGRAPHIC ANALYSIS**
Microcomputer Programs for Size Exclusion Chromatography.
PB90-136425 000,318
- Chromatographic Separations of Serum Proteins on Immobilized Metal Ion Stationary Phases.
PB90-152547 000,217
- CHROMATOGRAPHY**
Separation of Hydrophilic Thiols Using Reversed-Phase Chromatography with Trihaloacetate Buffers.
PB90-188434 000,399
- System of PC Computer Programs for Size Exclusion Chromatography.
PB90-217787 000,431
- Physicochemical Applications of Supercritical Fluid Chromatography.
PB90-271206 000,251
- CHROMIUM**
Elastic Constants of Three Ni-Cr Dental Alloys at Room Temperature and Elevated Temperatures.
PB90-169632 000,059
- Nucleation and Growth of Cr on Stepped Surfaces with Facets: An FEEM (Field Electron Emission Microscopy) Study.
PB90-170275 001,563
- CHROMIUM ALLOYS**
Quasicrystalline Structures of Transition Metal/Metalloid Glasses.
DE86002932 001,242
- X-ray Diffraction Studies of Ni-Cr-Based Amorphous Alloys.
PB91-101683 001,263
- CHROMIUM-NICKEL STEELS**
Low-Temperature Magnetic-Elastic Anomalies in FCC (Face-Centered-Cubic) Fe-Cr-Ni Alloys.
PB90-187816 001,213
- CIGARETTES**
Cigarettes with Low Propensity to Ignite Soft Furnishings.
PB90-169327 000,128
- Cigarette Ignition of Soft Furnishings.
PB90-241480 000,109
- Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales.
PB91-112367 000,992
- CIRCULAR POLARIZATION**
Improvements in Polarization Measurements of Circularly Polarized Antennas.
PB90-187923 000,806
- CISPLATIN**
Binding of Substituted cis-Pt(II)-Diammines to Duplex DNA.
PB90-218447 001,335
- Theoretical Studies of cis-Pt(II)-Diammine Binding to Duplex DNA.
PB90-254798 001,348
- CITATION SEARCHES**
Computer-Generated Graphical Analysis of Citation Searches.
PB90-241621 001,033
- CLASSIFYING**
Test Structure Data Classification Using a Directed Graph Approach.
PB90-241399 000,874
- CLATHRATES**
Thermal measurements on structure 1 and structure 2 pure clathrate hydrates and on natural gas samples. Final report.
DE90005343 000,949
- Neutron Scattering Studies of Potassium-Ammonia Layers in Graphite.
PB90-206129 000,420
- CLAYS**
Neutron Scattering Study of Layered Silicates Pillared with Alkylammonium Ions.
PB91-112516 000,496
- CLEAN ROOMS**
NIST's (National Institute of Standards and Technology) Ultra-Clean Ceramic Processing Laboratory.
PB90-136896 001,127
- CLEANING**
Recommended Technical Specifications for Procurement of Systems for a Cleaning and Deburring Workstation.
PB90-183252 001,046
- CLINICAL CHEMISTRY**
Micro-Analysis of Plaque Fluid from Single-Site Fasted Plaque.
PB90-254954 001,341
- CLINICAL LABORATORIES**
Standard Reference Materials: Description and Use of a Precision Thermometer for the Clinical Laboratory, SRM 934.
PB90-257643 000,069
- CLINICAL MEDICINE**
National Reference System for Cholesterol.
PB90-150244 001,318
- CLOCKS**
Characterization of Clocks and Oscillators.
PB91-100909 000,637
- CLOTHING**
Protecting Fire Fighters Exposed in Room Fires. Part 2. Performance of Turnout Coat Materials under Actual Fire Conditions.
PB91-101519 001,838
- CLOTHING INDUSTRY**
Extending the Standard for the Exchange of Product Data to Represent Two-Dimensional Apparel Pattern Pieces.
PB90-247438 001,050
- CLUSTER IONS**
Inorganic Cluster Ion Formation in the Laser Microprobe.
PB90-152729 000,225
- CM DRACONIS STAR**
IUE Observations of the M Dwarfs CM Draconis and Rossiter 137B: Magnetic Activity at Saturated Levels.
PB90-169764 000,037
- COAL**
Experimental and Model Determinations of Coal Mineral and Slag Phase Equilibria.
PB90-153495 000,951
- COAL EXTRACTS**
Identification and Comparison of Low-Molecular-Weight Neutral Constituents in Two Different Coal Extracts.
PB90-135856 000,950
- COAL MINING**
Hierarchical Real-Time Control Task Decomposition for a Coal Mining Automation Project.
PB90-198433 001,391
- Application of Measurement Error Propagation Theory to Two Measurement Systems Used to Calculate the Position and Heading of a Vehicle on a Flat Surface.
PB91-112797 001,392
- COATING PROCESSES**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition.
PB90-187659 000,288
- COATINGS (MATERIALS)**
Simulation of Diffusion in Pigmented Coatings on Metals Using Monte-Carlo Methods.
PB90-205881 001,176
- Electrodeposition of Wear Resistant Coatings.
PB90-221839 001,178
- Using the Computer to Analyze Coating Defects.
PB90-241266 001,179
- COBALT**
Magnetic Microstructure of the (0001) Surface of hcp Cobalt.
PB90-150228 001,550
- COBALT ALLOYS**
Quasicrystalline Structures of Transition Metal/Metalloid Glasses.
DE86002932 001,242
- COBALT IONS**
3P₁-3P₂ Magnetic-Dipole Transition in the Ground Configuration of Co XX.
PB91-112094 001,778
- COBOL PROGRAMMING LANGUAGE**
COBOL Category: Software Standard. Subcategory: Programming Language.
FIPS PUB 21-3 000,743
- CODING AND MODULATION**
Coding and Modulation Requirements for 2,400 Bit/Second Modems.
FIPS PUB 133 000,602
- Coding and Modulation Requirements for Duplex 9600 Bit/Second Modems.
FIPS PUB 135 000,603
- Telecommunications: Coding and Modulation Requirements for Duplex 600 and 1200 Bit/Second Modems.
FIPS PUB 136 000,604
- COHERENCE**
Growth of a Coherent Precipitate from Supersaturated Solution.
PB90-169434 000,352
- COHERENT PRODUCTION**
Growth of a Coherent Precipitate from Supersaturated Solution.
PB90-169434 000,352
- COLD WEATHER CONSTRUCTION**
Specifications for Cold Weather Concreting.
PB91-133876 000,167
- COLLECTIVE EXCITATIONS**
Collective Excitations.
PB90-170556 001,568
- COLLISION BROADENING**
Broadening and Shifting of the Raman Q Branch of HD.
AD-A209 360/7 000,299
- Fundamental Molecular Data to Support CARS (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration.
AD-A212 411/3 000,304
- COLLISIONAL PLASMAS**
Diffusion of Charged Particles in Collisional Plasmas: Free and Ambipolar Diffusion at Low and Moderate Pressures.
PB91-107672 001,509

KEYWORD INDEX

COMPILERS

COLLISIONS			
Measurement and Prediction of Raman Q-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8	000,302		
COLLOIDS			
Pulse radiolytic studies of inter- and intramolecular electron transfer processes. Progress report. DE90008697	000,312		
Interfacial Electron Transfer Reactions between Platinum Colloids and Reducing Radicals in Aqueous Solution. PB90-153453	000,283		
Redox Reactions with Colloidal Metal Oxides: Comparison of Radiation-Generated and Chemically Generated Ruthenium Dioxide Dihydrate and Colloids. PB90-153461	000,338		
COLOR			
Color and Lighting. PB90-136482	000,079		
Calculation of Metameric Reflectances. PB90-206087	001,482		
Categorical Color Rendering of Four Common Light Sources. PB90-271180	001,499		
COLOR CODES			
Color Appearance of Traffic Control Devices under Different Illuminants. PB90-260969	001,832		
COLOR VISION			
Lighting for Color Vision. PB90-206095	000,076		
COLUMN PACKINGS			
Determination of Column Selectivity Toward Polycyclic Aromatic Hydrocarbons. PB90-188343	000,395		
Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography. PB90-188350	000,237		
COLUMNS (SUPPORTS)			
Periodic and Chaotic Motions of a Modified Stoker Column: Experimental and Numerical Results. PB90-215849	000,176		
Seismic Performance of 1/3 Scale Post-Tensioned Precast Beam-Column Connections. PB90-254434	000,178		
COMBAT UNIFORMS			
Selection and Application Guide to Police Body Armor. PB90-149170	000,077		
COMBUSTION			
Measurement and Prediction of Raman Q-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8	000,302		
Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, November 1986. DE89015147	000,575		
Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, March 1988. DE89015148	000,576		
Particulate and Droplet Diagnostics in Spray Combustion: Annual Report, April 1989. DE89015149	000,577		
Kinetics Data Base for Combustion Modeling: Status Report, February 1, 1988-January 31, 1989. DE90003095	000,578		
Fire-Related Standards and Testing. N88-12522/4	001,812		
Burning, Smoke Production, and Smoke Dispersion from Oil Spill Combustion. PB90-146374	000,987		
Enthalpies of Combustion of Triphenylphosphine and Triphenylphosphine Oxide. PB90-169608	000,581		
Use of FTIR Spectroscopy for Multi-Component Quantitation in Combustion Toxicology. PB90-217720	000,243		
New Approach to Fire Toxicity Data for Hazard Evaluation. PB91-107359	000,596		
COMBUSTION CONTROL			
Evaluation of Industrial Combustion Control Systems. Final Report. DE85016803	000,968		
COMBUSTION PRODUCTS			
Experimental and Model Determinations of Coal Mineral and Slag Phase Equilibria. PB90-153495	000,951		
Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane. PB90-187832	001,368		
Effect of Fuel Structure on Pathways to Soot. PB90-190778	000,584		
Silica Particle Synthesis in a Counterflow Diffusion Flame Reactor. PB90-193608	000,585		
Long-Range Plan for a Research Project on Carbon Monoxide Production and Prediction.			
PB90-209602	000,587		
Toxicological Effects of Different Time Exposures to the Fire Gases: Carbon Monoxide or Hydrogen Cyanide or to Carbon Monoxide Combined with Hydrogen Cyanide or Carbon Dioxide. PB90-217746	001,369		
Smoke Measurement Results from the Cone Calorimeter. PB90-271032	000,150		
Smoke and Soot Data Determinations in the Cone Calorimeter. PB90-271040	000,151		
Effects of Melt Viscosity and Thermal Stability on Polymer Gasification. PB90-271412	000,550		
Combustion Product Toxic Potency Measurements: Comparison of a Small Scale Test and 'Real-World' Fires. PB91-101063	000,199		
Model for Predicting the Generation Rate and Distribution of Products of Combustion in Two-Layer Fire Environments. PB91-107151	000,154		
Monitoring the Fate of Chlorine from MSW Sampling through Combustion. Part 2. Combustion Studies. PB91-107383	000,597		
Reporting Combustion Product Toxicity Test Results. PB91-112300	001,371		
COMBUSTION STABILITY			
Role of Large Scale Turbulent Structures in the Lift-Off and Blow Out Behaviors of Turbulent Jet Diffusion Flames. PB90-217878	000,588		
COMMODITIES			
Checking the Net Contents of Packaged Goods. Third Edition, Supplement. PB91-107144	000,200		
COMMUNICATION			
GRAMPS (General Real-Time Asynchronous Multi-Processor System) Multiprocessor Operating System. PB90-171257	000,786		
COMMUNICATION NETWORKS			
Management of Networks Based on Open Systems Interconnection (OSI) Standards: Functional Requirements and Analysis. PB90-161753	001,029		
COMMUNICATION SATELLITES			
Two-Way Satellite Time Transfers between and Within North America and Europe. PB90-188558	000,629		
COMPACTING			
Porosity in Spinel Compacts Using Small-Angle Neutron Scattering. PB90-170093	001,138		
COMPARATOR CIRCUITS			
Book Review: The Current Comparator by W. J. M. Moore and P. N. Miljanic. PB90-170929	000,857		
COMPARTMENT FIRES			
Software Development Tools. PB90-250051	001,835

Crack Inspection of Railroad Wheel Treads by EMATs. PB91-101550 001,831
- CRANES (HOISTS)**
Stiffness Study of a Parallel Link Robot Crane for Shipbuilding Applications. PB90-254475 001,437
- CREEP PROPERTIES**
Creep Deformation of Ceramics in Four Point Bending. PB90-152794 001,059
Damage Enhanced Creep in a Siliconized Carbide: Phenomenology. PB90-193566 001,147
- CREEP RUPTURE STRENGTH**
Strength and Creep-Rupture Properties of Adhesive-Bonded EPDM Joints Stressed in Peel. PB90-257676 001,827
- CREEP STRENGTH**
Development of Metastable Processing Paths for High Temperature Alloys. AD-A210 550/0 001,240
- CREEP TESTS**
Damage-Enhanced Creep in a Siliconized Silicon Carbide: Mechanics of Deformation. PB90-135930 001,058
- CRITICAL CURRENT**
Thermal Contraction of Fiberglass-Epoxy Sample Mandrels and Its Effect on Critical-Current Measurements. PB90-149113 001,534
VAMAS (Versailles Project on Advanced Materials and Standards) Interlaboratory Comparisons of Critical Current versus Strain in Nb(sub 3)Sn. PB90-149386 001,540
Transverse Stress Effect on the Critical Current of Internal Tin and Bronze Process Nb(sub 3)Sn Superconductors. PB90-149394 001,541
Dependence of the Critical Current on Angle between Magnetic Field and Current in Y-, Bi-, and Tl-Based High-T(sub c) Superconductors. PB90-149402 001,542
Double-Step Behavior of Critical Current versus Magnetic Field in Y-, Bi- and Tl-Based Bulk High-T(sub c) Superconductors. PB90-187576 001,572
Airy Pattern, Weak-Link Modelling of Critical Currents in High-T(sub c) Superconductors. PB90-207051 001,600
Modeling of Critical Currents in Granular High-T(sub c) Superconductors. PB90-218041 001,606
Critical Currents of High (T sub c) Superconductors: Pinning, Weak Links, Conduction, Anisotropy, and Contact Resistivities. PB90-241456 001,618
Proposed Study on the Effect of Sampling Bonding Techniques on the Measured Critical Current of Nb₃Sn Superconductors. PB90-254608 001,620
Thermal Contraction of Fiberglass-Epoxy Sample Holders Used for Nb₃Sn Critical-Current Measurements. PB91-134064 001,660
- CRITICAL EXPONENT**
Critical Exponent for the Viscosity of Carbon Dioxide and Xenon. PB90-271115 000,477
- CRITICAL POINT**
Search for Tricriticality in Binary Mixtures of Near-Critical Propane and Normal Paraffins. PB90-170820 000,372
Modified Leung-Griffiths Model for Vapor-Liquid Equilibria: Application to Polar Fluid Mixtures. PB90-206996 000,429
Critical Behavior of a Conducting Ionic Solution Near Its Consolute Point. PB90-254731 000,466
Thermodynamic Properties of CFC Alternatives: A Survey of the Available Data. PB91-134460 000,515

KEYWORD INDEX

- CROSS-LINKING REAGENTS**
Structure of Hydroxyl Radical-Induced DNA-Protein Crosslinks in Calf Thymus Nucleohistone In vitro. PB91-118257 001,337
- CROSS SECTIONS**
Defining a Faceted Generalized Cylinder by Projections of Cross Sections. PB90-152505 001,283
- CRUDE OIL**
Burning, Smoke Production, and Smoke Dispersion from Oil Spill Combustion. PB90-146374 000,987
Measurement of Large Scale Oil Spill Burns. PB90-261033 000,975
- CRYOGENIC FLUIDS**
Transport Properties of Fluids of Cryogenic Interest. PB90-152851 001,691
- CRYOGENICS**
Metrology for Electromagnetic Technology: A Bibliography of NIST (National Institute of Standards and Technology) Publications. PB90-161670 001,473
Reactions of H(sub 2) with He(1+) at Temperatures Below 40 K. PB90-171042 000,377
Pulse Tube Refrigeration: A New Type of Cryocooler. PB90-192469 001,119
Predictive, Exact Shape Factor Extended Corresponding States Model for Mixtures. PB90-254509 000,463
Onset of Nucleate and Film Boiling Resulting from Transient Heat Transfer to Liquid Hydrogen. PB90-254764 000,467
Low-Temperature Properties of High-Manganese Austenitic Steels. PB91-112607 001,220
- CRYSTAL CHEMISTRY**
Phase Equilibria and Crystal Chemistry in Portions of the System SrO-CaO-Bi2O3-CuO, Part 2 - The System SrO-Bi2O3-CuO. PB90-256835 001,627
- CRYSTAL DEFECTS**
Elastic Effects during Late Stage Phase Transformations. PB91-134841 000,516
- CRYSTAL DISLOCATIONS**
Structure of Asymmetric Small-Angle Grain Boundaries. PB90-149535 001,546
- CRYSTAL GROWTH**
Influence of Equilibrium Shape on Heterogeneous Nucleation Textures. PB90-135807 001,520
Nonplanar Interface Morphologies during Unidirectional Solidification of a Binary Alloy. 2. Three-Dimensional Computations. PB90-169830 001,250
Nucleation and Growth of Cr on Stepped Surfaces with Facets: An FEEM (Field Electron Emission Microscopy) Study. PB90-170275 001,563
Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics. PB90-188426 001,579
Instability of a Taylor-Couette Flow Interacting with a Crystal-Melt Interface. PB90-192352 001,586
Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals. PB90-209594 001,601
Effect of a Crystal-Melt Interface on Taylor-Vortex Flow with Buoyancy. PB90-244401 001,619
Molecular Dynamics Investigation of Deeply Quenched Liquids. PB90-261405 000,474
Directional Solidification of a Planar Interface in the Presence of a Time-Dependent Electric Current. PB90-271214 001,632
Effect of Anisotropic Thermal Conductivity on the Morphological Stability of a Binary Alloy. PB90-271271 001,260
Laser Probing of III-V Semiconductor Growth on Si(100). PB90-271453 001,634
Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals. PB91-101089 001,636
Hydrodynamic and Free Boundary Instabilities during Crystal Growth: The Effect of a Plane Stagnation Flow. PB91-101436 001,640
Effect of Surface Tension Anisotropy on Cellular Morphologies. PB91-101444 001,262
Morphological Stability during Alloy Solidification. PB91-112060 001,264
- CRYSTAL LATTICES**
Lattice Statics Green's Function Method for Calculation of Atomistic Structure of Grain Boundary Interfaces in Solids. 2. Anharmonic Theory. PB90-193269 001,594
Lattice Statics Green's Function Method for Calculation of Atomistic Structure of Grain Boundary Interfaces in Solids. I. Harmonic Theory. PB90-193277 001,595
- CRYSTAL-MELT INTERFACE**
Effect of an Electric Field on the Morphological Stability of the Crystal-Melt Interface on a Binary Alloy. PB90-193541 001,256
Effect of a Crystal-Melt Interface on Taylor-Vortex Flow with Buoyancy. PB90-244401 001,619
Directional Solidification of a Planar Interface in the Presence of a Time-Dependent Electric Current. PB90-271214 001,632
- CRYSTAL ORIENTATION**
Influence of Equilibrium Shape on Heterogeneous Nucleation Textures. PB90-135807 001,520
- CRYSTAL OSCILLATORS**
Stability of High Quality Quartz Crystal Oscillators: An Update. PB90-187535 000,858
- CRYSTAL RESONATORS**
Influence of Pressure and Humidity on the Medium and Long-Term Frequency Stability of Quartz Oscillators. PB90-136953 000,855
- CRYSTAL STRUCTURE**
Six-Dimensional Fourier Analysis of Icosahedral Al(sub 73)Mn(sub 21)Si(sub 6) Alloy. PB90-149147 001,248
Crystal Structure of Ba3V4O13. PB90-149238 000,320
Neutron Powder Diffraction Study of Orthorhombic Ba(sub 2)YCu(sub 3)O(sub 6.5). PB90-170267 001,140
Crystallographic Texture in Rolled Aluminum Plates: Neutron Pole Figure Measurements. PB90-192485 001,253
Phase Equilibria and Crystal Chemistry in the System Ba-Y-Cu-O. PB90-192543 001,143
Neutron Diffraction Study of the 'Brown Phase' BaNd2CuO5. PB90-271651 001,161
Phase Improvement in the Structure Interpretation of Fragment TR2C from Bull Testis Calmodulin Using Combined Entropy Maximization and Solvent Flattening. PB91-101576 001,641
Crystal Structure, Atomic Ordering and Charge Localization in Pb2Sr2Y(sub 1-x)CaxCu3O(sub 8+ delta) (x = 0, delta = 1.47). PB91-112375 001,650
- CRYSTALLITES**
Orientation Distribution of Fiber-Axes and Neutron Powder Diffraction Profiles. PB90-135914 001,523
- CRYSTALLIZATION**
Preparation of Polymer Crystal Nuclei. PB90-149519 000,526
NBS Biological Macromolecule Crystallization Database. PB90-206012 001,328
Aspects of the Crystallization and Morphology of Poly(Phenylene Sulfide). PB90-261165 000,547
- CRYSTALLOGRAPHY**
NBS (National Bureau of Standards) Crystal Data: Database Description and Applications. PB90-187899 000,386
NBS (National Bureau of Standards) Crystal Data. NBS (National Bureau of Standards)*Search: A Program to Search the Database. PB90-190810 001,583
Computerization of the ICDD Powder Diffraction Database Critical Review of Sets 1 to 32(1). PB90-206673 000,422
- CRYSTALS**
New Compensation Method for Bulk Optical Sensors with Multiple Birefringences. PB90-152687 001,471
Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein. PB90-218322 001,334
Crystal Structures of Bacterial Glutaminase-Asparaginases. PB90-271354 001,336
Monocrystal-Polycrystal Elastic-Constant Models. PB91-134247 001,661
- CULTURE MEDIA**
Investigations on Gel Forming Media for Use in Low Gravity Bioseparations Research. PB91-134783 001,826
- CUPRATES**
Is Y(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7) Stiff or Soft. PB90-205774 001,148
Ohmic Contacts to High-T(sub c) Superconductors. PB90-205964 001,597
- X-ray Powder Characterization of Ba(sub 2)YCu(sub 3)O(sub 7-x). PB90-206061 001,149
X-ray Powder Study of 2BaO:CuO. PB90-206079 001,150
X-ray Study of the Barium Oxide-Yttrium Sesquioxide-Copper Oxide (CuOx) System. PB90-206152 001,151
X-ray Studies of Helium Quenched Ba(sub 2)YCu(sub 3)O(sub 7-x). PB90-206699 001,155
- CURING**
Correlation of Cure Monitoring Techniques. PB90-135864 000,521
Heat of Reaction and Curing of Epoxy Resin. PB90-135872 000,522
Dosimetry for Low-Energy Electron Machine Performance and Process Control. PB91-112425 001,084
- CURVE FITTING**
Algorithm and Computer Program for the Calculation of Envelope Curves. PB90-155409 001,299
- CYANIDES**
Ion Chemistry of Cyanides and Isocyanides. 1. The Carbon Lone Pair as Proton Acceptor: Proton Affinities of Isocyanides, Alkyl Cation Affinities of N, O., and C Lone-Pair Donors. AD-A181 189/2 000,264
Analysis of Carboxyhemoglobin and Cyanide in Blood from Victims of the Dupont Plaza Hotel Fire in Puerto Rico. PB90-205782 001,320
- CYANOGEN CHLORIDE**
Rotational State Distributions Following the Photodissociation of Cl-CN: Comparison of Classical and Quantum Mechanical Calculations. PB90-241696 000,458
- CYCLIC AMP**
Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein. PB90-218322 001,334
- CYCLIC AMP RECEPTORS**
Arginine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein. PB90-153446 001,324
- CYCLIC LOADS**
Cyclic Fatigue Behavior of an Alumina Ceramic with Crack-Resistance Characteristics. PB90-152679 001,131
Seismic Performance of 1/3 Scale Post-Tensioned Precast Beam-Column Connections. PB90-254434 000,178
Performance of 1/3-Scale Model Precast Concrete Beam-Column Connections Subjected to Cyclic Inelastic Loads. PB91-107623 000,182
- CYCLODEXTRINS**
Determination of Cyclodextrin Formation Constants Using Dynamic Coupled-Column Liquid Chromatography. PB90-170036 000,228
- CYLINDERS**
Defining a Faceted Generalized Cylinder by Projections of Cross Sections. PB90-152505 001,283
- CYROGENICS**
Materials Studies for Magnetic Fusion Energy Applications at Low Temperatures-XIII. PB91-107086 001,396
- CYTIDINE MONOPHOSPHATE**
Interaction of Cytidine 3'-Monophosphate and Uridine 3'-Monophosphate with Ribonuclease a at the Denaturation Temperature. PB90-136367 000,265
- DAMAGE**
Damage-Enhanced Creep in a Siliconized Silicon Carbide: Mechanics of Deformation. PB90-135930 001,058
- DATA**
NIST (National Institute of Standards and Technology) Helps Navy Define Data Needed to Produce Hybrid Microcircuit Assemblies. PB90-169376 000,897

KEYWORD INDEX

DYNAMIC STRUCTURAL ANALYSIS

DIMENSIONAL MEASUREMENT

National Institute of Standards and Technology Molecular Measuring Machine: A Long-Range Scanning Tunneling Microscope for Dimensional Metrology. PB90-136938 001,684

Laser Length Metrology. PB90-169418 001,697

Rydberg Constant and Fundamental Atomic Physics. PB90-170747 001,703

Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope). PB90-170960 000,868

Metrological Electron Microscope for the Certification of Magnification and Linewidth Artifacts for the Semiconductor Industry. PB90-192444 001,009

Eddy Current Measurement of Density during Hot Isostatic Pressing. PB90-193400 001,255

Space Balls: Or Estimating the Diameter Distribution of Monosize Polystyrene Microspheres. PB91-118497 001,022

DIMERS

Rare Gas Interaction Energy Curves. PB90-192295 000,402

DIODES

Diode Laser Measurement of the (nu sub 3) Band of (14)CO(sub 2). PB90-186319 000,393

DIOXYMETHYLENES

Chemistry of Dioxymethylenes and Dioxiranes. PB91-112326 000,280

DIPOLE MOMENTS

Microwave Spectrum and Electric Dipole Moment of NeHF. PB90-206004 000,419

DIRECTION SIGNS

Evaluation of Exit Signs in Clear and Smoke Conditions. PB90-269523 000,113

DIRECTIONAL SOLIDIFICATION

Effect of Gravity Modulation on Solutal Convection during Directional Solidification. PB90-265281 001,630

Directional Solidification of a Planar Interface in the Presence of a Time-Dependent Electric Current. PB90-271214 001,632

DIRECTIONAL SOLIDIFICATION (CRYSTALS)

Nonplanar Interface Morphologies during Unidirectional Solidification of a Binary Alloy. 2. Three-Dimensional Computations. PB90-169830 001,250

DIRECTORIES

Directory of U.S. Private Sector Product Certification Programs. PB90-161712 001,002

Directory of NVLAP (National Voluntary Laboratory Accreditation Program) Accredited Laboratories, 1990. PB90-198920 001,012

State Weights and Measures Laboratories: State Standards Program Description and Directory. PB90-257650 001,079

Directory of European Regional Standards-Related Organizations. PB91-107599 001,026

DISASTERS

Domestic Disaster Recovery Plan for PCs, OIS, and Small VS Systems. PB90-265240 000,794

DISCHARGE CELLS

Measurements on the NIST GEC Reference Cell. PB91-118455 001,510

DISCOUNT FACTORS

Discount Factor Tables for Life-Cycle Cost Analyses. PB90-147968 000,205

DISLOCATIONS (MATERIALS)

Relativistic BCS-OHR Model. PB90-136664 001,531

Structure of Asymmetric Small-Angle Grain Boundaries. PB90-149535 001,546

Microscopic Origins of Acoustic Emission. PB90-193418 001,445

DISSIMILAR MATERIALS BONDING

Internal Strain (Stress) in an SiC-Al Particle-Reinforced Composite: An X-ray Diffraction Study. PB91-107425 001,188

DISSOCIATION ENERGY

Effective Core Potentials and Accurate Energy Curves for Cs2 and Other Alkali Diatomics. PB91-134205 000,514

Models for Strong Interactions in Proteins and Enzymes. 2. Interactions of Ions with the Peptide Link and with Imidazole. PB91-134437 001,316

DISTRIBUTED DATA BASES

NIST (National Institute of Standards and Technology) Network Common Memory User Manual.

PB90-183260 000,716

Distributed Data Bases on the Factory Floor. PB91-118232 001,054

DISTRIBUTED PROCESSING

State Occupancy Information for Performance Comparisons. PB91-112870 000,771

DISTRIBUTION SYSTEMS

Evaluation of Thermal Probe Method for Estimating the Heat Loss from Underground Heat Distribution Systems. PB90-161993 000,957

Thermal Analysis of Directly Buried Conduit Heat Distribution Systems. PB90-269481 000,959

DISTRICT HEATING

Evaluation of Thermal Probe Method for Estimating the Heat Loss from Underground Heat Distribution Systems. PB90-161993 000,957

Quantification of Heat Losses through Structural Supports for Shallow Trench Heat Distribution Systems. PB90-219585 000,958

Thermal Analysis of Directly Buried Conduit Heat Distribution Systems. PB90-269481 000,959

DNA-BINDING PROTEINS

Structure of Hydroxyl Radical-Induced DNA-Protein Crosslinks in Calf Thymus Nucleohistone In vitro. PB91-118257 001,337

DNA DAMAGE

Quantitative Measurement of Radiation-Induced Base Products in DNA Using Gas Chromatography-Mass Spectrometry. AD-A214 233/9 001,351

Overview of Techniques of Analysis of Cell Damage. PB91-134775 001,338

DNA GYRASE

Neutron and Light-Scattering Studies of DNA Gyrase and Its Complex with DNA. PB90-206053 001,330

DOCUMENT PROCESSING

Guideline for Quality Control of Image Scanners; Category: Hardware Standard; Subcategory: Calibration, Validation, and Testing. Recommended Practice for Quality Control of Image Scanners: Standard. FIPS PUB 157 000,741

DOCUMENTS

NIST (National Institute of Standards and Technology) STEP (Standard for the Exchange of Product Model Data) Documents Configuration Management System User's Guide. PB90-207788 000,748

Dynamic Characteristics of Hypertext. PB91-107276 001,034

DOMAIN WALLS

Micromagnetic Calculations of 180 deg Surface Domain Wall Magnetization Profiles with Comparison to Measurements. PB91-107557 001,644

180 deg Surface Domain Wall Magnetization Profiles: Comparisons between Scanning Electron Microscopy with Polarization Analysis Measurements, Magneto-Optic Kerr Microscopy Measurements and Micromagnetic Models. PB91-112664 001,654

DOORS

Estimating Air Leakage through Doors for Smoke Control. PB90-218298 000,095

DOSIMETERS

Onion Skin as a Radiation Monitor. PB90-190737 001,356

Neutron Sensitivity of LiF Chip Gamma Dosimeters at Megagray Doses. PB90-190786 001,404

Calorimetry of Electron Beams and the Calibration of Dosimeters at High Doses. PB90-190828 001,405

New Dosimetry Systems. PB90-192360 001,406

Sensitive Dichromate Dosimeter for the Dose Range, 0.2-3 kGy. PB90-192378 001,399

DOSIMETRY

Radiochromic Solutions for Reference Dosimetry. PB90-149303 001,353

Post-Irradiation Dosimetry of Meat by Electron Spin Resonance Spectroscopy of Bones. PB90-149493 001,354

ASTM (American Society for Testing and Materials) Dosimetry Activities: A Progress Report. PB90-170473 001,700

NBS (National Bureau of Standards) Ionizing-Radiation Measurement Services. PB90-170499 001,701

Concept of Secondary Laboratories. PB90-241423 001,361

Interagency Committee on Occupational Radiation Protection Measurements.

PB90-241431 001,362

Secondary Standards Laboratories: An Overview. PB90-241449 001,363

NVLAP (National Voluntary Laboratory Accreditation Program) Program Handbook: Personnel Radiation Dosimetry Requirements for Accreditation. PB90-242298 001,364

Reference Dosimetry and Measurement Quality Assurance. PB90-254806 001,365

Dosimetry for Low-Energy Electron Machine Performance and Process Control. PB91-112425 001,084

Optimal Experimental Design for In Vitro Studies with ELF Magnetic Fields. PB91-118414 001,367

DOSIMETRY CALIBRATION LABORATORIES

AAPM (American Association of Physicists) Accredited Dosimetry Calibration Laboratories. PB90-261272 001,322

DRILL CORE ANALYSIS

Fluorescence Technique for Determining the Porosity of Geologic Core Samples on a Macro- and Microscale. PB90-170705 001,385

DROPLETS

Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, November 1986. DE89015147 000,575

Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, March 1988. DE89015148 000,576

Particulate and Droplet Diagnostics in Spray Combustion: Annual Report, April 1989. DE89015149 000,577

Transient Cooling of a Hot Surface by Droplets Evaporation. PB90-227968 001,746

DROPS (LIQUIDS)

Raman Spectroscopy of Single Optically Levitated Droplets. PB90-152695 000,331

DUCTILE BRITTLE TRANSITION

Plate-Like Rigid Inclusions and the Ductile-Brittle Transition. PB90-136656 001,247

DUCTILITY

Tensile Strength and Ductility of Indium. PB90-152497 001,249

DUPLEX 600 AND 1200 BIT/SECOND MODEMS

Telecommunications: Coding and Modulation Requirements for Duplex 600 and 1200 Bit/Second Modems. FIPS PUB 136 000,604

DUPLEX 9600 BIT/SECOND MODEMS

Coding and Modulation Requirements for Duplex 9600 Bit/Second Modems. FIPS PUB 135 000,603

DWARF STARS

Using Nonradial Pulsations to Determine the Envelope Composition of Very Evolved Stars. DE87001982 000,027

Measurements of Stellar Magnetic Fields: Empirical Constraints on Dynamo and Rotational Evolution Theories. Abstract Only. N88-13185/9 000,028

IUE Observations of the M Dwarfs CM Draconis and Rossiter 137B: Magnetic Activity at Saturated Levels. PB90-169764 000,037

4 Meter FTS Observations of Photospheric Magnetic Fields on M Dwarfs. PB90-206913 000,039

DYES

Initial Color Development in Radiochromic Dye Films After a Short Intense Pulse of Accelerated Electrons. PB90-193335 001,407

DYNAMIC HARDNESS TESTS

Interface Trap Effects on the Hot-Carrier Induced Degradation of MOSFETs (Metal Oxide Semiconductor Field Effect Transistors) during Dynamic Stress. PB90-188525 000,871

DYNAMIC MODULUS OF ELASTICITY

Pulsed Ultrasonic Velocity Method for Determining Material Dynamic Elastic Moduli. PB90-241290 001,235

DYNAMIC RESPONSE

Method for Characterizing the Dynamic Performance of Wall Specimens Using a Calibrated Hot Box. PB90-135773 000,125

DYNAMIC STRUCTURAL ANALYSIS

Wind and Seismic Effects. Proceedings of the Joint Meeting of the U.S.-Japan Cooperative Program in Natural Resources Panel on Wind and Seismic Effects (21st). PB90-186826 000,172

Experimental Study of Post-Installed Anchors Under Combined Shear and Tension Loading. PB90-198425 000,174

Report on an Interlaboratory Electromigration Experiment.
AD-A169 652/5 000,864
- ELECTRON-ATOM COLLISIONS**
Bremsstrahlung Radiation Emitted in Fast-Electron-H-Atom Collisions.
PB90-171109 001,708
- Low-Frequency Approximation for Simultaneous Electron-Photon Excitation of Atoms.
PB90-205832 001,724
- Differential, Partial Cross Sections for Electron Excitation of the Sodium 3P State.
PB91-101287 001,771
- ELECTRON BEAMS**
Beam Current Density Monitor for Intense Electron Beams.
AD-A137 146/7 001,668
- Acoustic Emission Studies of Electron Beam Surface Modification of Aluminum.
PB90-135955 001,246
- Calorimetry of Electron Beams and the Calibration of Dosimeters at High Doses.
PB90-190828 001,405
- ELECTRON CAPTURE**
Capture of Inner-Shell Electrons in the Strong-Potential Born (SPB) Approximation.
PB90-187873 001,712
- ELECTRON CHANNELING**
Selected-Area Channeling Pattern and Defect Etch Study of Silicon Implanted with Oxygen.
PB90-152513 000,867
- ELECTRON CHARGE**
Measure $h/e(2)$ by Counting Electrons or Ions in a Storage Ring.
PB90-206798 001,732
- ELECTRON COLLISIONS**
Proceedings of the International Symposium on Correlation and Polarization in Electronic and Atomic Collisions.
PB90-261819 001,760
- ELECTRON COUNTING**
Measure $h/e(2)$ by Counting Electrons or Ions in a Storage Ring.
PB90-206798 001,732
- ELECTRON DETACHMENT**
Collisional Electron Detachment and Decomposition Cross Sections for SF(sub 6)(1-), SF(sub 5)(1-), and F(1-) on SF(sub 6) and Rare Gas Targets.
PB90-150251 000,327
- ELECTRON DIFFRACTION**
Role of Multiple Scattering in XPS and Auger Electron Diffraction in Crystals.
PB90-150046 001,547
- Usefulness of Various Computer Algorithms for Locating Spots and Arrays in Electron Diffraction Patterns.
PB90-150145 000,325
- Automated Extraction of Regular Spot Arrays from Electron Diffraction Images.
PB90-241324 001,614
- ELECTRON DOSIMETRY**
ASTM (American Society for Testing and Materials) Dosimetry Activities: A Progress Report.
PB90-170473 001,700
- Calorimetry of Electron Beams and the Calibration of Dosimeters at High Doses.
PB90-190828 001,405
- ELECTRON IRRADIATION**
Initial Color Development in Radiochromic Dye Films After a Short Intense Pulse of Accelerated Electrons.
PB90-193335 001,407
- ELECTRON MICROPROBE ANALYSIS**
Background Correction in Electron Microprobe Compositional Mapping with Wavelength-Dispersive X-Ray Spectrometry.
PB90-152604 000,221
- Calculation of Depth Distributions of X-ray Generation by the Monte Carlo Technique.
PB90-152877 000,226
- ELECTRON MICROSCOPES**
Specimen Biasing at Low Accelerating Voltages.
PB91-170804 001,569
- Metrological Electron Microscope for the Certification of Magnification and Linewidth Artifacts for the Semiconductor Industry.
PB90-192444 001,009
- ELECTRON MICROSCOPY**
Metrology in Microlithography.
PB90-188194 001,072
- Low-Profile Microchannel-Plate Electron Detector System for SEM.
PB91-112573 001,652
- ELECTRON-MOLECULE COLLISIONS**
Near-Threshold Vibrational Excitation of HF by Electron Impact.
PB91-101584 000,489
- ELECTRON-NUCLEON INTERACTIONS**
Piece-Wise Analytic Evaluation of the Radiative Tail from Elastic and Inelastic Electron Scattering.
PB91-107441 001,776
- ELECTRON PARAMAGNETIC RESONANCE**
Examination of Gamma-Irradiated Fruits and Vegetables by Electron Spin Resonance Spectroscopy.
PB90-169814 000,020

Potential Methods for Measuring and Detecting Lead in Existing Paint Films: A Literature Review.
PB90-162124 001,174
Biological Thermodynamic Data for the Calibration of Differential Scanning Calorimeters: Heat Capacity Data on the Unfolding Transition of Ribonuclease A in Solution.
PB90-192600 000,405
Polycyclic Aromatic Hydrocarbon Emissions from the Combustion of Crude Oil on Water.
PB91-101055 000,976
Determination of Dibutyltin and Tributyltin in Sediment and Microbial Biofilms Using Acidified Methanol Extraction, Sodium-Borohydride Derivatization and Gas Chromatography with Flame Photometric Detection.
PB91-134395 000,262
- ENVIRONMENTAL SURVEYS**
Comparison of Liquid Chromatography with Fluorescence Detection and Gas Chromatography/Mass Spectrometry for the Determination of Polycyclic Aromatic Hydrocarbons in Environmental Samples.
PB90-206749 000,971
Liquid Chromatography Element-Specific Detection Systems for Analysis of Molecular Species.
PB90-241555 000,248
- ENVIRONMENTAL TESTS**
Environmentally Induced Cracking.
PB90-149485 001,192
Mechanism of Stress Corrosion Crack Growth Resistance of Al-Li-Cu Alloys: Role of Grain Boundary Precipitates.
PB91-134817 001,205
Crack Velocity Functions Thresholds in Brittle Solids.
PB91-134890 001,168
- ENZYMES**
Liposome-Based Flow Injection Enzyme Immunoassay for Theophylline.
PB91-101675 001,313
Models for Strong Interactions in Proteins and Enzymes. 1. Enhanced Acidities of Principal Biological Hydrogen Donors.
PB91-134429 001,315
Models for Strong Interactions in Proteins and Enzymes. 2. Interactions of Ions with the Peptide Link and with Imidazole.
PB91-134437 001,316
- EPITAXIAL GROWTH**
Growth of Ultrathin Fe Films on Cu(100): Mechanisms, Morphology and Stability.
PB90-192717 001,591
Observation of Intensity Oscillations in RHEED during the Epitaxial Growth of Cu and fcc Fe on Cu(100).
PB90-192725 001,592
- EPITAXY**
Characterization of Epitaxial Fe on GaAs(110) By Scanning Tunneling Microscopy.
PB90-136433 001,170
- EPOXY COMPOUNDS**
Chemistry of Dioxymethylenes and Dioxiranes.
PB91-112326 000,280
- EPOXY MATRIX COMPOSITES**
Next-Generation Tension Strap Supports for Spaceborne Dewars.
PB90-218033 001,823
- EPOXY RESINS**
Correlation of Cure Monitoring Techniques.
PB90-135864 000,521
Heat of Reaction and Curing of Epoxy Resin.
PB90-135872 000,522
- Fracture of Epoxy and Elastomer-Modified Epoxy Polymers.
PB90-150087 001,269
Micromechanics of Fracture in Structural Adhesive Bonds.
PB90-261116 001,122
Micromechanics of Fracture in Structural Adhesive Bonds.
PB90-261124 001,123
- EQUATIONS OF STATE**
Predictive, Exact Shape Factor Extended Corresponding States Model for Mixtures.
PB90-254509 000,463
Field-Space Conformal Solution Method.
PB90-254566 000,465
State Equation of Liquid Helium - 4 from 0.8 to 2.5 K.
PB91-133801 001,794
- EQUILIBRIUM ADSORPTION MODELS**
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973
- ERBIUM BARIUM CUPRATES**
2D and 3D Magnetic Behavior of Er in ErBa(sub 2)Cu(sub 3)O(sub 7).
PB90-169855 001,558
Effects of Crystal Anisotropy on Magnetization and Magnetic Order in Superconducting RbA(sub 2)Cu(sub 3)O(sub 7-x).
PB90-192626 001,590
Two-Dimensional Magnetic Order of Er in ErBa₂Cu₃O₇.
PB90-254780 001,622
Two- and Three-Dimensional Magnetic Order of the Rare-Earth Ions in RbBa₂Cu₄O₈.
PB90-254970 001,626
- ERBIUM LASERS**
Mode-Locked, Long Cavity, Erbium Fiber Lasers with Subsequent Soliton-Like Compression.
PB90-152521 001,470
Soliton-Like Compression of Pulses from Erbium-Fiber Lasers.
PB90-188384 001,478
- ERIP (ENERGY RELATED INVENTIONS PROGRAM)**
Fostering General Awareness of the Importance of Inventiveness.
PB91-134288 000,015
- EROSION**
Evaluation of a Surface Treatment to Improve the Erosion Resistance of Coquina Stone at Castillo de San Marcos.
PB90-198938 000,175
- ERROR ANALYSIS**
Systematic Errors in Power Measurements Made with a Dual Six-Port ANA.
PB90-145160 000,814
Orthogonal Distance Regression.
PB90-151747 001,298
Effects of Systematic Error, Estimates and Uncertainties in Chemical Mass Balance Apportionments: Qual Roost II Revisited.
PB91-134312 000,980
- ERROR CORRECTION CODES**
Implementing Fast Part Probing and Error Compensation on Machine Tools.
PB91-112771 001,111
- ERRORS**
Calibrated Optical Fiber Power Meters: Errors Due to Variations in Connectors.
PB90-169350 000,851
- ESCHERICHIA COLI**
Argine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein.
PB90-153446 001,324
- ETCHING**
Hyperthermal (0.1-4 eV) F Atom Beam Source Suitable for Surface Etching Investigations.
PB91-101394 001,639
- ETHANE**
Kinetics of the Gas Phase Reaction of Hydroxyl Radicals with Ethane, Benzene, and a Series of Halogenated Benzenes Over the Temperature Range 234-438 K.
PB90-193483 000,275
Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator.
PB91-135053 001,450
- ETHANE/DICHLORO-TRIFLUORO**
Vapor Pressures and Gas-Phase PVT Data for 1,1-Dichloro-2,2,2-trifluoroethane.
PB90-271685 000,485
- ETHER/METHY-BUTYL**
Gas-Phase Reactions of Hydroxyl Radicals with the Fuel Additives Methyl Tert-Butyl Ether and Tert-Butyl Alcohol Over the Temperature Range 240-440 K.
PB90-193467 000,414
- ETHERS**
Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ethers Over the Temperature Range 240-440 K.
PB90-193491 000,276
- ETRAN COMPUTER CODE**
ETRAN-Experimental Benchmarks.
PB90-136888 001,682
- EUROPE**
Comparison of the NIST (National Institute of Standards and Technology) and European Gold Coating Standards.
PB90-164278 001,175
- EUROPEAN COMMUNITY**
Directory of European Regional Standards-Related Organizations.
PB91-107599 001,026
Developing a Response to EC '92.
PB91-134072 000,123
- EUROPEAN ECONOMIC COMMUNITY**
Harmonization of Standards and Regulations: Problems and Opportunities for the United States.
PB90-218181 000,117
- EUROPIUM**
Cd I Isoelectronic Sequence: Wavelengths and Energy Levels for Xe VII through Eu XVI.
PB90-169624 000,354
- EUROPIUM BARIUM CUPRATES**
Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study II.
PB90-190687 001,581
Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study.
PB90-190760 001,582
- EVAUATION**
EXITT: A Simulation Model of Occupant Decisions and Actions in Residential Fires.
PB90-218256 000,191
- EVALUATION**
Book Review: The Current Comparator by W. J. M. Moore and P. N. Miljanic.
PB90-170929 000,857
Post Occupancy Evaluation of Federal Buildings - The Portland Federal Building and Others.
PB90-219833 000,097
Evaluation of Solar Energy Inventions.
PB91-133918 000,965
- EVAPORATION**
Transient Cooling of a Hot Surface by Droplets Evaporation.
PB90-227968 001,746
- EXCAVATING EQUIPMENT**
Hierarchical Real-Time Control Task Decomposition for a Coal Mining Automation Project.
PB90-198433 001,391
- EXCITATION**
Energy Transfer Processes of Aligned Excited States of Ca Atoms.
AD-A177 536/0 000,297
- EXCITED STATES**
Effective Core Potentials and Accurate Energy Curves for Cs₂ and Other Alkali Diatomics.
PB91-134205 000,514
- EXHAUST EMISSIONS**
Determination of Nitro-PAH (Polycyclic Aromatic Hydrocarbons) in Air and Diesel Particulate Matter Using Liquid Chromatography with Electrochemical and Fluorescence Detection.
PB90-170200 000,231
- EXIT SIGNS**
Evaluation of Exit Signs in Clear and Smoke Conditions.
PB90-269523 000,113
- EXPERIMENTAL DATA**
Comparison of Experimental and Calculated Performance of Integral Collector-Storage Solar Water Heaters.
PB91-112185 000,964
- EXPERT SYSTEMS**
Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813
Integrating Knowledge for the Identification of Cracks in Concrete Using an Expert System Shell and Extensions.
PB90-151234 000,560
Test Structure Data Classification Using a Directed Graph Approach.
PB90-241399 000,874
Exposure: An Expert System Fire Code.
PB90-257601 001,836
Building a PC-Based Knowledge Base for Improving NDE (Nondestructive Evaluation) Reliability.
PB91-101220 001,080
- EXPRESS PROGRAMMING LANGUAGE**
Translating Express to SQL: A User's Guide. National PDES Testbed Report Series.
PB90-265273 000,725
- EXTERNAL TANKS**
Autonomous Propulsion System Requirements for Placement of an STS (Space Transportation System) External Tank in Low Earth Orbit.
PB90-183302 001,818

KEYWORD INDEX

- EXTINCTION**
Effects of Extinction on X-ray Powder Diffraction Intensities.
PB91-118109 000,501
- EXTREME ULTRAVIOLET RADIATION**
Laser Produced Plasma X-ray Ultraviolet (XUV) Radiation Source.
PB90-254392 001,485
- EXTREMELY LOW RADIO FREQUENCIES**
Optimal Experimental Design for In vitro Studies with ELF Magnetic Fields.
PB91-118414 001,367
- EYE MOVEMENTS**
Motion, Depth, and Image Flow.
PB90-254350 001,350
- FABRICS**
Small-Scale Vertical Flammability Testing for Fabrics.
PB91-118638 000,164
- FAILURE**
Failure of Fused Silica Fibers with Subthreshold Flaws.
PB90-152786 001,132
K(sub R)-Curve with Dugdale Model.
PB90-169665 000,170
- FAILURE ANALYSIS**
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method.
PB90-152893 000,856
Theory of Chemically Induced Kink Formation on Cracks in Silica. 2. Force Law Calculations.
PB90-170317 001,141
Effect of Temperature and Stress on the Time-to-Failure of EPDM T-Peel Joints.
PB90-187865 000,133
Theory of Chemically Induced Kink Formation on Cracks in Silica. 1. 3-D Crack Green's Functions.
PB90-193285 001,145
Weld Cracking in Massive Steel Forgings.
PB90-206871 001,215
EMAT (Electromagnetic-Acoustic Transducers) Examination for Cracks in Railroad Wheel Treads.
PB90-271636 001,830
- FAR INFRARED RADIATION**
Tunable Far Infrared Laser Spectroscopy.
PB90-136458 001,469
- FARADAY EFFECT**
Recent Advances in Faraday Effect Sensors.
PB91-133934 000,848
- FASTENERS**
Thermal Bridging in Mechanical Fastened Low-Slope Roofs.
PB91-111997 000,157
- FATIGUE LIFE**
Cyclic Fatigue Behavior of an Alumina Ceramic with Crack-Resistance Characteristics.
PB90-152679 001,131
- FEATURE EXTRACTION**
Object Finder Based on Multiple Thresholds, Connectivity, and Internal Structure.
PB90-136912 001,683
- FEDERAL AGENCIES**
Computer Security and Privacy Plans (CSPP) Review Project: A First-Year Federal Response to the Computer Security Act of 1987 (Final Report), 1989.
PB91-107540 000,796
- FEDERAL BUILDINGS**
Life-Cycle Costing for Energy Conservation in Buildings: Instructor's Guide.
PB90-198441 000,090
Life-Cycle Costing for Energy Conservation in Buildings: Student's Manual.
PB90-199068 000,092
Report to Congress on the Structural Assessment of the New U.S. Embassy Office Building in Moscow.
PB90-256751 000,179
Structural Assessment of the New U.S. Embassy Office Building in Moscow.
PB90-256769 000,180
Development of Thermal Envelope Design Guidelines for Federal Office Buildings.
PB91-112839 000,122
- FEDERAL INFORMATION PROCESSING STANDARDS**
Counties and Equivalent Entities of the United States, Its Possessions, and Associated Areas. Category: Federal General Data Standard, Representations and Codes.
FIPS PUB 6-4 000,744
COBOL. Category: Software Standard. Subcategory: Programming Language.
FIPS PUB 21-3 000,743
Database Language SQL. Category: Software Standard. Subcategory: Database.
FIPS PUB 127-1 000,739
POSIX: Portable Operating System Interface for Computer Environments. Category: Software Standard; Subcategory: Operating Systems.
FIPS PUB 151-1 000,740
User Interface Component of the Applications Portability Profile. Category: Software Standard. Subcategory: Application Program Interface.
- FIPS PUB 158 000,742
Naming Forum: Proceedings of the IRDS Workshop on Data Entity Naming Conventions.
PB90-250119 000,752
NIST-PCTS: National Institute of Standards and Technology-POSIX Conformance Test Suite.
PB90-500919 000,728
NIST-PCTS: National Institute of Standards and Technology-POSIX Conformance Test Suite. NIST-PCTS:151-1 (Version 1.1). Installation Guide.
PB91-119701 000,768
- FEDEX SQL COMPUTER PROGRAM**
Translating Express to SQL: A User's Guide. National PDES Testbed Report Series.
PB90-265273 000,725
- FIBER COMPOSITES**
Next-Generation Tension Strap Supports for Spaceborne Dewars.
PB90-218033 001,823
Measurement of Fiber Fracture and Fiber-Matrix Interface Shear Strengths in Metal Matrix Composites.
PB91-133884 001,190
Fiber-Reinforced Composites: Models for Macroscopic Elastic Constants.
PB91-133926 001,191
- FIBER LASERS**
Mode-Locked, Long Cavity, Erbium Fiber Lasers with Subsequent Soliton-Like Compression.
PB90-152521 001,470
Soliton-Like Compression of Pulses from Erbium-Fiber Lasers.
PB90-188384 001,478
- FIBER METALLURGY**
Orientation Distribution of Fiber-Axes and Neutron Powder Diffraction Profiles.
PB90-135914 001,523
- FIBER OPTICS**
Calibrated Optical Fiber Power Meters: Errors Due to Variations in Connectors.
PB90-169350 000,851
Optical Fiber Measurements: Results of Interlaboratory Evaluations.
PB90-187634 001,477
Fiber Optic Sensing of Pulsed Currents.
PB90-193376 000,838
Architectures for Future Multigigabit Lightwave Networks.
PB90-198953 000,615
U.S. Investment Strategies for Quality Assurance.
PB90-231150 001,483
Conformance Test for FDDI Medium Access Control (MAC).
PB90-265323 000,651
Progress in the Design of Optical Fiber Sensors for the Measurement of Pulsed Electric Currents.
PB91-112102 000,846
Recent Advances in Faraday Effect Sensors.
PB91-133934 000,848
- FIBER REINFORCED COMPOSITES**
Determination of Fiber/Matrix Interfacial Properties of Ceramic and Glass Matrix Composites.
PB90-163254 001,136
- FIBRONECTIN**
Separation and Characterization of Fibronectin Domains by Two-Dimensional Electrophoresis.
PB90-241415 001,312
- FIELD EFFECT TRANSISTORS**
Semiconductor Measurement Technology: Thermal Resistance Measurements.
PB90-269564 000,876
Turn-Off Failure of Power MOSFET's.
PB91-107367 000,882
Investigation of the Threshold Voltage of MOSFETs with Position- and Potential-Dependent Interface Trap Distributions Using a Fixed-Point Method.
PB91-112235 000,885
- FIELD ION MICROSCOPY**
Atom Probe Field-Ion Microscopy Applications.
PB91-118059 000,257
- FILE MANAGEMENT SYSTEMS**
Automatically Running Command Files at Any Future Time.
PB90-218454 000,721
FTAM Interoperability Tests.
PB91-107565 001,036
- FILE SYSTEM SECURITY**
SRI International: Improving the Security of Your UNIX System.
PB91-120121 000,797
- FILM DOSIMETRY**
Initial Color Development in Radiochromic Dye Films After a Short Intense Pulse of Accelerated Electrons.
PB90-193335 001,407
- FINE STRUCTURE CONSTANT**
New determination of the fine-structure constant. Final report.
DE90008800 001,675
- High Accuracy Determination of the Fine Structure Constant via Measurement of the Proton Gyromagnetic Ratio.
PB90-242256 001,748
- FINGERPRINT IDENTIFICATION SYSTEMS**
Automated Fingerprint Identification Systems Bench Mark Tests of Relative Performance.
PB90-170457 001,834
- FINISHES**
Fire Risk Assessment Method: Case Study 4, Interior Finish in Restaurants.
PB90-244450 000,145
- FINITE ELEMENT ANALYSIS**
Finite Element Procedures for Large Strain Elastic-Plastic Theories.
PB90-169400 001,664
- FINITE ELEMENT METHOD**
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method.
PB90-136581 000,624
Finite Element Model of Stress Wave Topology in Unidirectional Graphite/Epoxy: Wave Velocities and Flux Deviations.
PB90-136623 001,529
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method.
PB90-152893 000,856
Finite Element Code Downized for Personal Computers.
PB91-101212 001,667
- FIRE CODES**
Exposure: An Expert System Fire Code.
PB90-257601 001,836
- FIRE DETECTION SYSTEMS**
Risk Exposure and Risk Attitude of Homeowners in Fire Protection Investment Decisions.
PB90-141383 000,107
- FIRE FIGHTING**
Exhaust Gas Analysis for Harmful Species: 19F1A Fire Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
Protecting Fire Fighters Exposed in Room Fires. Part 2. Performance of Turnout Coat Materials under Actual Fire Conditions.
PB91-101519 001,838
- FIRE GASES**
New Approach to Fire Toxicity Data for Hazard Evaluation.
PB91-107359 000,596
Toxicological Interactions between Carbon Monoxide and Carbon Dioxide.
PB91-107433 001,370
- FIRE GROWTH**
Software Development Tools.
PB90-250051 001,835
- FIRE HAZARDS**
Fire Hazard Protection Hazard 1 and Its Role in Fire Codes and Standards.
PB90-187543 000,187
Prototype Methodology for Fire Hazard Analysis.
PB90-217936 000,190
EXITT: A Simulation Model of Occupant Decisions and Actions in Residential Fires.
PB90-218256 000,191
Fire Risk Assessment Method: Case Study 1, Upholstered Furniture in Residences.
PB90-234998 000,139
Fire Risk Assessment Method: Case Study 2, Carpet in Offices.
PB90-235037 000,140
Fire Risk Assessment Method: Case Study 3, Concealed Combustibles in Hotels.
PB90-235045 000,141
Fire Risk Assessment Method: Description of Methodology.
PB90-235052 000,142
Fire Risk Assessment Method: Case Study 4, Interior Finish in Restaurants.
PB90-244450 000,145
Furniture Flammability: An Investigation of the California Technical Bulletin 133 Test. Part 1. Measuring the Hazards of Furniture Fires.
PB90-256850 000,110
Quantitative Assessment of Smoke Toxicity Hazards in Large Structures.
PB90-271222 000,152
- FIRE PREVENTION**
Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813
- FIRE PROTECTION**
Fire Experiments of Zoned Smoke Control at the Plaza Hotel in Washington DC.
PB90-207259 000,093
EXPOSURE80A: A Computer Program Version of NFPA 80A.
PB90-257726 000,119

KEYWORD INDEX

FIRE RESEARCH

- Algorithm and Associated Computer Subroutine for Calculating Flow through a Horizontal Ceiling/Floor Vent in a Zone-Type Compartment Fire Model. PB91-120170 000,166
- FIRE RESEARCH**
- Fundamental Molecular Data to Support CARS (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration. AD-A212 411/3 000,304
- Report on Sediment Transport Events on Shelf and Slope (STRESS) Field Season 1: Winter 1988-1989 Benthic Acoustic Stress Sensor (BASS) Component. AD-A222 068/9 001,434
- Calibration Technique for Heat Flux Sensors Used in Fire Experiments and Standard Fire Tests. AD-A225 222/9 000,799
- Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, November 1986. DE89015147 000,575
- Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, March 1988. DE89015148 000,576
- Particulate and Droplet Diagnostics in Spray Combustion: Annual Report, April 1989. DE89015149 000,577
- Fire-Related Standards and Testing. N88-12522/4 001,812
- Expert Systems Applied to Spacecraft Fire Safety. N89-23501/4 001,813
- Behavior of Primary Radicals during Thermal Degradation of Poly(Methyl Methacrylate). PB90-136607 000,523
- Burning, Smoke Production, and Smoke Dispersion from Oil Spill Combustion. PB90-146374 000,987
- Daylighting and Thermal Performance of Roof Glazing in Atrium Spaces. PB90-149253 000,080
- Evaluation of Quarter-Scale Compartment Fire Modeling for Constant and Stepped Heat Inputs. PB90-149527 000,184
- Quick Response Sprinklers in Chemical Laboratories: Fire Test Results. PB90-151721 000,126
- Fire Propagation in Concurrent Flows, Final Progress Report. PB90-151754 000,580
- Negatively Buoyant Wall Flows Generated in Enclosure Fires. PB90-152802 000,185
- Examination of the Variability of the ASTM (American Society for Testing and Materials) E 648 Standard with Respect to Carpets. PB90-154626 000,127
- Ternary Reactions among Polymer Substrate-Organohalogen-Antimony Oxides under Pyrolytic, Oxidative and Flaming Condition. PB90-154766 000,527
- Cigarettes with Low Propensity to Ignite Soft Furnishings. PB90-169327 000,128
- Experiments of Piston Effect on Elevator Smoke Control. PB90-169582 000,129
- Measurement of Flame Lengths under Ceilings. PB90-170531 000,186
- How Due Process in the Development of Voluntary Standards Can Reduce the Risk of Anti-Trust Liability. PB90-183328 000,582
- Model of a Simple Fan-Resistance Ventilation System and Its Application to Fire Modeling. PB90-183336 000,088
- Rational Development of Bench-Scale Fire Tests for Full-Scale Fire Prediction. PB90-187493 000,132
- Fire Hazard Protection Hazard I and Its Role in Fire Codes and Standards. PB90-187543 000,187
- Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane. PB90-187832 001,368
- Soot Particle Formation in Laminar Diffusion Flames. PB90-188368 000,583
- Effect of Fuel Structure on Pathways to Soot. PB90-190778 000,584
- Experimental Fire Tower Studies of Elevator Pressurization Systems for Smoke Control. PB90-193251 000,188
- Ignition and Lateral Flame Spread Characteristics of Certain Composite Materials. PB90-205188 000,586
- Analysis of Carboxyhemoglobin and Cyanide in Blood from Victims of the Dupont Plaza Hotel Fire in Puerto Rico. PB90-205782 001,320
- Fire Experiments of Zoned Smoke Control at the Plaza Hotel in Washington DC. PB90-207259 000,093
- Long-Range Plan for a Research Project on Carbon Monoxide Production and Prediction. PB90-209602 000,587
- FIREDOC Vocabulary List, 3rd Edition. PB90-215823 000,189
- Use of FTIR Spectroscopy for Multi-Component Quantitation in Combustion Toxicology. PB90-217720 000,243
- Toxicological Effects of Different Time Exposures to the Fire Gases: Carbon Monoxide or Hydrogen Cyanide or to Carbon Monoxide Combined with Hydrogen Cyanide or Carbon Dioxide. PB90-217746 001,369
- Role of Large Scale Turbulent Structures in the Lift-Off and Blow Out Behaviors of Turbulent Jet Diffusion Flames. PB90-217878 000,588

KEYWORD INDEX

FRACTURE MECHANICS

FLEXIBLE MATERIALS

Exploration of Advanced Characterization Techniques for Molecular Composites.
AD-A168 102/2 000,296

FLEXURAL STRENGTH

Flexural Behavior of Strain-Softening Solids.
PB91-112052 001,164

FLOW DISTRIBUTION

Fire Induced Flow Field - Theory and Experiment.
PB90-241241 001,381

FLOW MEASUREMENT

Measurements of Ventilation Rates and Ventilation Effectiveness.
PB90-218058 000,094

FLOWMETERS

Vortex Shedding Flowmeters for High Velocity Liquids.
PB90-192659 000,601

Summary Report of NIST's (National Institute of Standards and Technology's) Industry-Government Consortium Research Program on Flowmeter Installation Effects with Emphasis on the Research Period November 1988-May 1989.
PB90-221847 001,459

Influence of Swirling Flow on Orifice and Turbine Flowmeter Performance.
PB91-111989 001,110

FLUIDS

Thermophysical Property Measurements in Fluid Mixtures: Final Report, Prepared for the Period Ending October 31, 1987.
DE89003281 001,452

Measurement of Thermal Conductivity and Thermal Diffusivity of Fluids Over a Wide Range of Densities.
PB90-192535 001,011

Global Thermodynamic Behavior of Fluids in the Critical Region.
PB91-118091 000,500

FLUIDS: LIQUIDS/GASES/PLASMAS

Interaction of a Three-Dimensional Roughness Element with a Laminar Boundary Layer.
AD-A178 668/0 001,451

Thermophysical Property Measurements in Fluid Mixtures: Final Report, Prepared for the Period Ending October 31, 1987.
DE89003281 001,452

Aerodynamic Effects on Fuel Spray Characteristics: Air-Assist Atomizer.
DE89015819 000,600

Residence Time Distribution Approach to the Study of Free Convection in Porous Media.
DE90003848 001,455

Method and Apparatus for Supercritical Fluid Extraction Solution Separation.
PATENT-4 962 275 000,316

Glycine Permeation through Na(1+), Ag(1+) and Cs(1+) - Forms of Perfluorosulfonated Ion Exchange Membranes.
PB90-170465 000,369

Instability of a Taylor-Couette Flow Interacting with a Crystal-Melt Interface.
PB90-192352 001,586

Vortex Shedding Flowmeters for High Velocity Liquids.
PB90-192659 000,601

Crossover from Singular Critical to Regular Classical Thermodynamic Behavior of Fluids.
PB90-205915 000,418

Measurements of Coefficients of Discharge for Concentric Flange-Tapped Square-Edged Orifice Meters in Natural Gas Over the Reynolds Number Range 25,000 to 16,000,000.
PB90-219601 000,953

Summary Report of NIST's (National Institute of Standards and Technology's) Industry-Government Consortium Research Program on Flowmeter Installation Effects with Emphasis on the Research Period November 1988-May 1989.
PB90-221847 001,459

Dynamics of the Bell Prover, II.
PB90-235276 001,460

Microplasmas.
PB90-254384 001,749

Field-Space Conformal Solution Method.
PB90-254566 000,465

Properties of a Soft-Sphere Liquid from Non-Newtonian Molecular Dynamics.
PB90-254707 001,750

Onset of Nucleate and Film Boiling Resulting from Transient Heat Transfer to Liquid Hydrogen.
PB90-254764 000,467

Ergodic Convergence in Liquids and Glasses.
PB90-254814 001,752

Liquid and Solid Phases of Laser Cooled Ions.
PB90-261074 001,757

Heat Induced Instability in a Model Liquid.
PB91-133991 001,796

FLUORESCENCE

Flash Photolysis Resonance Fluorescence Investigation of the Gas Phase Reactions of Hydroxyl Radicals with a

Series of Aliphatic Ketones Over the Temperature Range 240-440 K.
PB90-193475 000,274

Average L-Shell Fluorescence Yields for Elements 56 <math>Z < 92</math>
PB91-112680 001,781

Fluorescence Properties of a Rod-Like Polymer and Its Model Compound.
PB91-134908 000,557

Significance of Cell Fluorescence Color of Acridine Orange-Stained 'Thiobacillus ferrooxidans' Under Epifluorescence Microscopy.
PB91-135046 001,346

FLUORESCENCE SPECTROSCOPY

Fluorescence Technique for Determining the Porosity of Geologic Core Samples on a Macro- and Microscale.
PB90-170705 001,385

Fluorescence Spectrometry in Analytical Chemistry and Color Science.
PB90-218231 000,245

Behavior of Liposomes in Flow Injection Systems.
PB90-241332 000,247

Fluorescence Properties of a Rod-Like Polymer and Its Model Compound.
PB91-134908 000,557

FLUORIDE

Enhanced Root Fluoride Uptake by Monocalcium Phosphate Monohydrate Gels.
PB90-171000 001,347

FLUORIDE GLASS

Photoelastic Characteristics of Fluorozirconate and Transition-Metal Fluoride Glasses.
PB90-170119 001,139

FLUORIDES

Tooth-Bound Fluoride and Dental Caries.
PB90-217753 001,339

Fluoride Analysis in Nanoliter- and Microliter-size Fluid Samples.
PB90-242223 001,340

FLUORINE

Multiphoton Ionization Spectra of Radical Products in the F((sup 2)P) + Ketene System: Spectral Assignments and Reaction Dynamics for CH(sub 2)F, Observation of CF and CH.
PB90-153404 000,335

Photon Stimulated Desorption of Fluorine from Silicon Etched by XeF2.
PB91-135038 000,519

FLUORINE ATOMS

Hyperthermal (0.1-4 eV) F Atom Beam Source Suitable for Surface Etching Investigations.
PB91-101394 001,639

FLUORINE ORGANIC COMPOUNDS

Inception and Structure of Prebreakdown Streamers in Perfluorinated Polyethers.
PB91-112193 001,237

FLUOROMETHYL RADICALS

Multiphoton Ionization Spectra of Radical Products in the F((sup 2)P) + Ketene System: Spectral Assignments and Reaction Dynamics for CH(sub 2)F, Observation of CF and CH.
PB90-153404 000,335

FLUOROZIRCONATE GLASS

Photoelastic Characteristics of Fluorozirconate and Transition-Metal Fluoride Glasses.
PB90-170119 001,139

FOAM RUBBER

Risk of Blistering of Built-Up Roofing Membranes Applied to Polyurethane Foam Insulation.
PB91-112631 000,160

FOOD ANALYSIS

NBS Standard Reference Materials for Validating Determinations of Micronutrients and Toxic Substances in Foods.
PB90-254368 000,021

Dietary Intake Studies of Nutrients and Selected Toxic Elements in Human Subjects: Analytical Approaches.
PB91-134171 001,373

FOOD CONTAMINATION

NBS Standard Reference Materials for Validating Determinations of Micronutrients and Toxic Substances in Foods.
PB90-254368 000,021

FOOD IRRADIATION

Optical Waveguide Dosimetry for Gamma-Radiation in the Dose Range 10(-1)-10(4) Gy.
PB90-207002 001,409

FOOD PROCESSING

Assessing Radiation Dose to Food.
PB91-101162 001,366

FORCE

Surface Forces and Viscosity of Water Measured between Silica Sheets.
PB90-152901 000,334

Surface Forces and Fracture in Brittle Materials.
PB90-169426 001,557

FOREIGN TECHNOLOGY

Journal of Research of the National Institute of Standards and Technology. March-April 1990. Volume 95,

Number 2. Special Issue: Radon Measurement Standards and Calibration.
PB90-255266 001,411

Residual Hermite Normal Form Computations.
PB91-118141 000,735

FOREST FIRES

Estimation of the Rate of Heat Release and Induced Wind Field in a Large Scale Fire.
PB91-120154 001,395

FORGING

Development of a Computer-Controlled Hot-Deformation Apparatus at NIST (National Institute of Standards and Technology).
PB90-149964 001,045

FORGINGS

Weld Cracking in Massive Steel Forgings.
PB90-206871 001,215

FORMALDEHYDE

Torsional-Rotational Spectrum and Structure of the Formaldehyde Dimer.
PB90-187840 000,385

Comparison of the Chromotropic Acid and Pararosaniline Methods for Measuring Formaldehyde Concentrations of Pressed-Wood Product Emissions.
PB90-188475 000,969

FORMAT

NIST (National Institute of Standards and Technology) Helps Navy Define Data Needed to Produce Hybrid Microcircuit Assemblies.
PB90-169376 000,897

FOURIER ANALYSIS

Patterson Fourier Analysis of the Icosahedral (Al,Si)-Mn Alloy.
PB90-135799 001,243

Six-Dimensional Fourier Analysis of Icosahedral Al(sub 73)Mn(sub 21)Si(sub 6) Alloy.
PB90-149147 001,248

Evaluation of Instrumental Correction Factors for Infrared Absorption Concentration Measurements.
PB90-170044 000,229

Fourier Transform Infrared (FTIR) Determination of Interstitial Oxygen Concentration of Single-Side-Polished Silicon Wafers.
PB90-170762 000,234

FOURIER MAPS

Histogram Specification as a Method of Density Modification.
PB90-153479 001,553

FOURIER SERIES

Program Generator for Efficient Evaluation of Fourier Series.
PB91-112433 000,731

FOURIER TRANSFORM SPECTROMETERS

FTS Infrared Measurements of Alkali Halides in the Gas Phase: Rubidium Fluoride and Cesium Fluoride.
PB90-205790 000,415

Microwave Spectrum and Electric Dipole Moment of NeHF.
PB90-206004 000,419

Heterodyne Frequency Measurements on OCS Near 61.76 THz (2060 cm(-1)).
PB90-206806 000,423

Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm(-1).
PB90-206897 000,425

FOURIER TRANSFORM SPECTROSCOPY

ADC Errors in Quantitative FT-IR Spectroscopy.
PB91-111955 001,502

FRACTIONAL QUANTUM HALL EFFECT

Photons, Rotons and Fractionally-Charged Vortices in the Quantum Hall Effect.
PB90-149071 001,533

Off-Diagonal Long-Range Order in the Quantum Hall Effect.
PB90-149261 001,536

Summary, Omissions and Unanswered Questions.
PB90-170549 001,567

Collective Excitations.
PB90-170556 001,568

Resource Letter QHE-1: The Integral and Fractional Quantum Hall Effects.
PB90-193350 001,596

FRACTURE MECHANICS

Institute for Materials Science and Engineering, Fracture and Deformation Division: Technical Activities 1989.
PB90-155359 001,663

K(sub R)-Curve with Dugdale Model.
PB90-169665 000,170

Theory of Chemically Induced Kink Formation on Cracks in Silica. 2. Force Law Calculations.
PB90-170317 001,141

Wide-Plate Crack-Arrest Tests Utilizing a Prototypical Pressure Vessel Steel.
PB90-170770 001,429

Molecular Wedge in Brittle Cracks.
PB90-193616 001,258

KEYWORD INDEX

- Applications of the Double-Crystal Diffractometry to the Understanding of Ceramic Fracture. PB90-242272 001,060

- Calibration of a Neutron-Driven Gamma-Ray Source. PB90-193582 001,721
- GAMMA SPECTROMETERS**
- High Accuracy, Absolute Wavelength Determination of Capture Gamma Ray Energies for E less than or equal to

KEYWORD INDEX

GENERAL INTEREST

- 5 MeV and the Direct Determination of Binding Energies in Light Nuclei.
PB90-261157 001,758
- GAS ANALYSIS**
New Gas-Phase Nitric Acid Calibration System.
PB90-170366 000,232
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 000,970
Exhaust Gas Analysis for Harmful Species: 19F1A Fire Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
- GAS APPLIANCES**
Experimental Study on the Performance of a Combination Appliance for Domestic Hot Water and Space Heating.
PB90-269515 000,102
- GAS CHROMATOGRAPHY**
Quantitative Measurement of Radiation-Induced Base Products in DNA Using Gas Chromatography-Mass Spectrometry.
AD-A214 233/9 001,351
Determination of Tributyltin in Estuarine Water Using Bonded C-18 Silica Solid Phase Extraction, Hydride Derivatization and GC-FPD.
PB91-134387 000,261
Determination of Dibutyltin and Tributyltin in Sediment and Microbial Biofilms Using Acidified Methanol Extraction, Sodium-Borohydride Derivatization and Gas Chromatography with Flame Photometric Detection.
PB91-134395 000,262
- GAS DISCHARGES**
Diffusion of Charged Particles in Collisional Plasmas: Free and Ambipolar Diffusion at Low and Moderate Pressures.
PB91-107672 001,509
- GAS FLOW**
Dynamics of the Bell Prover, II.
PB90-235276 001,460
- GAS GENERATORS**
Development of a Stable Tritium (HT) Generation System for Testing Atmospheric HT Monitors.
PB90-192386 001,400
- GAS METAL ARC WELDING**
Metal Transfer in Gas Metal Arc Welding: Droplet Rate.
PB90-152539 001,064
- GAS MIXTURES**
Comparison of the Optoacoustic and Hg Tracer Methods for the Study of Energy Transfer Processes in Gas Mixtures.
PB90-193442 000,412
- GAS PHASE**
Flash Photolysis Resonance Fluorescence Investigation of the Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ketones Over the Temperature Range 240-440 K.
PB90-193475 000,274
Kinetics of the Gas Phase Reaction of Hydroxyl Radicals with Ethane, Benzene, and a Series of Halogenated Benzenes Over the Temperature Range 234-438 K.
PB90-193483 000,275
Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ethers Over the Temperature Range 240-440 K.
PB90-193491 000,276
- GAS SCRUBBING**
Catalytic Oxygen-Scrubber for Liquid Chromatography.
PB90-170192 000,230
- GAS THERMOMETRY**
NBS/NIST Gas Thermometry from 0 to 660C.
PB90-256827 001,754
- GASEOUS DIELECTRICS**
Research for Electric Energy Systems - An Annual Report (1989).
PB90-228032 000,945
- GASES**
Gas Phase Reactions of Phenyl Radicals with Aromatic Molecules.
PB90-149295 000,266
Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase.
PB90-169269 000,285
Structures and Heats of Formation of C(sub 4)H(sub 7)(1+) Ions in the Gas Phase.
PB90-169343 000,351
Experimental Measurement and Prediction of Thermophysical Property Data of Carbon Dioxide Rich Mixtures.
PB90-187592 000,384
Use of FTIR Spectroscopy for Multi-Component Quantitation in Combustion Toxicology.
PB90-217720 000,243
- GASIFICATION**
Effects of Melt Viscosity and Thermal Stability on Polymer Gasification.
PB90-271412 000,550
- GATEWAYS**
Gateway between MHS (X.400) and SMTP.
PB90-218199 000,618
- GEARS**
Technique for the Detection of Robot Joint Gear Tightness.
PB91-112086 001,105
- GELATION**
Thermoreversible Gelation of Isotactic Polystyrene: Thermodynamics and Phase Diagrams.
PB90-149162 000,524
- GELS**
Aging Effects and the Dependence of Modulus on Concentration in Isotactic Polystyrene/Cis-Decalin Gels.
PB90-170283 000,529
Formation and Melting of Solvent Crystals in Thermoreversible Polymer Gels.
PB90-271396 000,549
- GENE DELETION**
Deletion Analysis of the DNA Sequence Required for the In vitro Initiation of Replication of Bacteriophage.
PB90-169939 001,325
- GENE EXPRESSION**
Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein.
PB90-218322 001,334
- GENE EXPRESSION REGULATION**
Autoregulation of the Yeast Copper Metallothionein Gene Depends on Metal Binding.
PB90-206103 001,331
- GENERAL AGREEMENT ON TARIFFS AND TRADE**
Trade Implications of Processes and Production Methods (PPMs).
PB90-205485 000,203
GATT (General Agreement on Tariffs and Trade) Standards Code Activities of the National Institute of Standards and Technology 1989.
PB90-219817 000,204
- GENERAL INTEREST**
Nova Outburst Modeling and Its Application to the Recurrent Nova Phenomenon.
DE86008715 000,025
Theoretical and Observational Review of Results on Nova Explosions Occurring on ONeMg White Dwarfs.
DE87001962 000,026
Using Nonradial Pulsations to Determine the Envelope Composition of Very Evolved Stars.
DE87001982 000,027
Measurements of Stellar Magnetic Fields: Empirical Constraints on Dynamo and Rotational Evolution Theories. Abstract Only.
N88-13185/9 000,028
IUE's Legacy for the Future: The Final Archive and Goals for Its Implementation.
N89-16614/4 000,030
Spectral Diagnostics from X-ray to Radio Wavelengths.
PB90-136276 000,031
Tilt Observations Using Borehole Tiltmeters 2. Analysis of Data from Yellowstone National Park.
PB90-136326 001,383
Samuel Stanley Wilks' Princeton Appointment, and Statistics at Princeton Before Wilks.
PB90-136441 001,307
Tunneling through a Spin-Polarizing Barrier: Boltzman Equation Study.
PB90-149501 001,545
Index to the Reports of the National Conference on Weights and Measure from the First to the Seventy-Third (1905 to 1998).
PB90-155334 001,001
Institute for Materials Science and Engineering, Fracture and Deformation Division: Technical Activities 1989.
PB90-155359 001,663
Coronal Temperatures of Selected Active Cool Stars as Derived from Low Resolution 'Einstein' Observations.
PB90-169566 000,032
Ultraviolet Variability of HD 45166 (qWR+ B8 V): Evidence for Stellar Wind Radiative Instabilities.
PB90-169574 000,033
Stability of Kuzmin/Toomre Discs.
PB90-169723 000,034
Survey of the Radio Continuum Emission of RS Canum Venaticorum and Related Active Binary Systems.
PB90-169731 000,035
Radio Continuum Emission from the Ionized Stellar Winds of Warm Supergiants.
PB90-169749 000,036
Adoption of Standard Time.
PB90-169756 000,625
IUE Observations of the M Dwarfs CM Draconis and Rossiter 137B: Magnetic Activity at Saturated Levels.
PB90-169764 000,037
Cooperative Research Opportunities at NIST (National Institute of Standards and Technology).
PB90-172453 000,006
NIST (National Institute of Standards and Technology) Research Reports, January 1990.
PB90-182213 001,039
NIST (National Institute of Standards and Technology) Serial Holdings 1990.
- PB90-183245 001,040
Report on Interactions between the National Institute of Standards and Technology and the American Society of Mechanical Engineers.
PB90-183286 001,116
Report on Interactions between the National Institute of Standards and Technology and the Institute of Electrical and Electronic Engineers.
PB90-183344 000,900
Chosun Refractories Co. Ltd.
PB90-188418 001,142
Conduct and Administration of U.S. Participation and Leadership in International Standardization, Testing, and Certification in the Decade of the 1990s.
PB90-194994 001,076
Unstable Periodic Orbits, Recurrences, and Diffuse Vibrational Structures in the Photodissociation of Water Near 128 nm.
PB90-206830 000,424
4 Meter FTS Observations of Photospheric Magnetic Fields on M Dwarfs.
PB90-206913 000,039
Distinct Alignment Effects for Y(sub 2.0) versus Y(sub 2, + or - 1) Angular Wave Functions Observed in Collisions of an Atomic Ca D State.
PB90-206947 001,734
Technical Activities 1989, Electron and Optical Physics Division.
PB90-207267 001,737
Physics, Chemistry and Engineering in the 1990's.
PB90-207283 000,010
Precision Engineering and Experimental Physics: William A. Rogers, the First Academic Mechanician in the U.S.
PB90-217977 001,017
Measurement Research and the National Institute of Standards and Technology's Research Information Center.
PB90-218074 001,037
Malcolm Baldrige National Quality Improvement Award.
PB90-218082 000,005
U.S. Investment Strategies for Quality Assurance.
PB90-231150 001,483
Technical Activities 1986, Center for Analytical Chemistry.
PB90-233891 000,246
Orbital Variability in the Wind of the Massive X-ray Binary HD 153919/4U 1700-37.
PB90-241498 000,041
Improved Kennedy-Thorndike Experiment to Test Special Relativity.
PB90-241522 001,747
Computer-Generated Graphical Analysis of Citation Searches.
PB90-241621 001,033
Spin-Orbit State Specific Laser Probing of the desorption Kinetics and Island Behavior of In on Si(100).
PB90-241639 000,455
NIST (National Institute of Standards and Technology) Research Reports, May 1990.
PB90-244435 001,041
Color Appearance of Traffic Control Devices under Different Illuminants.
PB90-260969 001,832
Computers Viewing Artists at Work.
PB90-261173 000,056
Solar and Stellar Observations from the South Pole.
PB90-261264 000,042
Optical Interferometer in Space.
PB90-271081 000,043
Small Mercury Relativity Orbiter.
PB90-271099 001,762
Grid of Low Metallicity Line-Blanketed LTE Model Stellar Atmospheres.
PB90-271362 000,044
Theoretical Modelling of Algol Disks.
PB90-271370 000,045
Near-Stellar Environment of Cool, Evolved Stars.
PB90-271404 000,046
Goals for the Application of High-Resolution X-ray Spectroscopy to the Diagnosis of Stellar Coronal Plasmas.
PB90-271495 000,047
Einstein and Stellar Sources.
PB90-271503 000,048
Publications of the National Institute of Standards and Technology, 1989 Catalog.
PB90-271818 000,014
Materials Research Laboratories: Reviewing the First Twenty-Five Years.
PB91-101568 001,236
Data Bases Available in the Research Information Center of the National Institute of Standards and Technology.
PB91-107284 001,035
Transition from Red Giant to Planetary Nebula.
PB91-112359 000,049
NIST Research Reports, October 1990.

- Ternary Reactions among Polymer Substrate-Organohalogen-Antimony Oxides under Pyrolytic, Oxidative and Flaming Condition.

KEYWORD INDEX

HELIUM

- PB90-154766 *000,527*
Separation of Hydrophilic Thiols Using Reversed-Phase Chromatography with Trihaloacetate Buffers.
PB90-188434 *000,399*
- HALOGENATED AROMATIC HYDROCARBONS**
Kinetics of the Gas Phase Reaction of Hydroxyl Radicals with Ethane, Benzene, and a Series of Halogenated Benzenes Over the Temperature Range 234-436 K.
PB90-193483 *000,275*
- HALOHYDROCARBONS**
Vapor-Liquid Equilibrium in Binary Systems of Chlorotrifluoromethane with n-Butane and Isobutane.
PB91-101642 *000,491*
Preliminary Screening Procedures and Criteria for Replacements for Halons 1211 and 1301.
PB91-107110 *000,595*
Construction of an Exploratory List of Chemicals to Initiate the Search for Halon Alternatives.
PB91-107508 *000,598*
Thermodynamic Properties of CFC Alternatives: A Survey of the Available Data.
PB91-134460 *000,515*
- HALONS**
Preliminary Screening Procedures and Criteria for Replacements for Halons 1211 and 1301.
PB91-107110 *000,595*
Construction of an Exploratory List of Chemicals to Initiate the Search for Halon Alternatives.
PB91-107508 *000,598*
- HANDBOOKS**
Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices as Adopted by the 74th National Conference on Weights and Measures 1989 (1990 Edition).
PB90-184961 *001,071*
Uniform Laws and Regulations as Adopted by the National Conference on Weights and Measures (75th), 1990 (1991 Edition).
PB91-107102 *001,082*
Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices as Adopted by the 75th National Conference on Weights and Measures 1990 (1991 Edition).
PB91-107136 *001,083*
Checking the Net Contents of Packaged Goods. Third Edition, Supplement.
PB91-107144 *000,200*
- HANDS FREE COMMUNICATION SYSTEMS**
Evaluation of Hands-Free Communication Systems.
PB90-264110 *000,620*
- HARMONIC GENERATION**
Harmonic Generation by a Classical Hydrogen Atom in the Presence of an Intense Radiation Field.
PB90-205873 *001,726*
- HAZARDOUS MATERIALS**
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 *000,970*
Development of Test Methods to Determine the Compatibility of Liquid Hazardous Materials with Polyethylene Packagings.
PB90-235417 *000,985*
Detection: Overview of Historical, Societal, and Technical Issues.
PB90-254459 *000,250*
- HAZARDS**
Toxic Potency of Fire Smoke: Measurement and Use.
PB90-261231 *000,981*
- HD 128220 STARS**
Spectroscopic Orbic and Evolution of HD 128220, a System Containing an O Subdwarf.
PB91-118315 *000,051*
- HD 45166 STAR**
Ultraviolet Variability of HD 45166 (qWR+ B8 V): Evidence for Stellar Wind Radiative Instabilities.
PB90-169574 *000,033*
- HD 56126 STAR**
Unusual Infrared Line Profiles in the Post-Asymptotic Giant Branch Star HD 56126.
PB91-118398 *000,053*
- HEALTH CARE COSTS**
Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales.
PB91-112367 *000,992*
- HEALTH ECONOMICS**
Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales.
PB91-112367 *000,992*
- HEALTH HAZARDS**
New Approach to Fire Toxicity Data for Hazard Evaluation.
PB91-107359 *000,596*
- HEALTH & SAFETY**
Elastic Constants of Three Ni-Cr Dental Alloys at Room Temperature and Elevated Temperatures.
PB90-169632 *000,059*
Inactivation of Human Immunodeficiency Virus (HIV) by Ionizing Radiation in Body Fluids and Serological Evidence.
PB90-170069 *001,343*
Mesh Monitor Casting of Ni-Cr Alloys: Element Effects.
PB90-170853 *001,251*
Enhanced Root Fluoride Uptake by Monocalcium Phosphate Monohydrate Gels.
PB90-171000 *001,347*
Clinical Biocompatibility of an Experimental Dentine-Enamel Adhesive for Composites.
PB90-171018 *000,060*
Calcium Phosphate Root Canal Sealer-Filler.
PB90-188533 *000,061*
Mechanically-Induced Generation of Radicals in Tooth Enamel.
PB90-190745 *000,062*
Workforce of U.S. Manufacturing in the Post-Industrial Era.
PB90-193244 *000,004*
Adsorption of Zinc 3,3-Dimethylacrylate and 3,3-Dimethylacrylic Acid on Hydroxyapatite from Solution: Reversibility and Variability of Isotherms.
PB90-207044 *000,066*
Evaluation of NVLAP (National Voluntary Laboratory Accreditation Program) Personnel Dosimetry Testing Laboratory: X-rays.
PB90-207762 *001,360*
Tooth-Bound Fluoride and Dental Caries.
PB90-217753 *001,339*
Guidelines for Pressure Vessel Safety Assessment.
PB90-219619 *001,219*
Review of Current Research and Activities Involving Characterization, Abatement and Disposal of Lead-Containing Paint Films.
PB90-225954 *000,984*
Development of Test Methods to Determine the Compatibility of Liquid Hazardous Materials with Polyethylene Packagings.
PB90-235417 *000,985*
Hospital Energy Analysis Toolkit (HEAT): User Manual.
PB90-237355 *000,990*
Cyclopolymerizable Monomers for Use in Dental Resin Composites.
PB90-242181 *000,068*
Fluoride Analysis in Nanoliter- and Microliter-size Fluid Samples.
PB90-242223 *001,340*
Assessment of Loosely-Bound and Firmly-Bound Fluoride Uptake by Tooth Enamel from Topically Applied Fluoride Treatments.
PB90-254905 *001,349*
Micro-Analysis of Plaque Fluid from Single-Site Fasted Plaque.
PB90-254954 *001,341*
In vitro Evaluation of the Sealing Ability of a Calcium Phosphate Cement When Used as a Root Canal Sealer-Filler.
PB90-261363 *000,072*
Brushing Up on the History of Intermetallics in Dentistry.
PB90-261389 *000,073*
Use of Bone Mineral Ratio for Early Diagnosis of Osteoporosis.
PB90-271669 *001,323*
Hospital Energy Analysis Toolkit (HEAT), Version 1.0 (for Microcomputers).
PB90-504036 *000,991*
Toxicological Interactions between Carbon Monoxide and Carbon Dioxide.
PB91-107433 *001,370*
Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales.
PB91-112367 *000,992*
Evaluation of Spiro Orthocarbonaate Monomers Capable of Polymerization with Expansion as Ingredients in Dental Composite Materials.
PB91-112698 *000,075*
- HEAT EXCHANGERS**
Ceramic Heat Exchangers.
PB90-136383 *001,126*
Apparatus for Measuring High-Flux Heat Transfer in Radiatively Heated Compact Exchangers.
PB90-155870 *001,692*
Heat Transfer in a Compact Tubular Heat Exchanger with Helium Gas at 3.5 MPa.
PB91-107573 *001,120*
- HEAT FLUX**
Apparatus for Measuring High-Flux Heat Transfer in Radiatively Heated Compact Exchangers.
PB90-155870 *001,692*
Estimation of the Rate of Heat Release and Induced Wind Field in a Large Scale Fire.
PB91-120154 *001,393*
- HEAT LOSS**
Evaluation of Thermal Probe Method for Estimating the Heat Loss from Underground Heat Distribution Systems.
PB90-161993 *000,957*
Evaluation of Thermal Bridges Using a Mobile Test Facility.
PB90-198912 *000,091*
- Quantification of Heat Losses through Structural Supports for Shallow Trench Heat Distribution Systems.
PB90-219585 *000,956*
- HEAT MEASUREMENT**
Ultrasonic Method for Measuring Internal Temperature Distributions in Steel or Aluminum.
PB90-170671 *001,211*
Transient Heat-Transfer Studies in Low-Gravity Using Optical Measurement Techniques.
PB91-134023 *001,797*
- HEAT OF FORMATION**
Structures and Heats of Formation of C(sub 4)H(sub 7)(1+) Ions in the Gas Phase.
PB90-169343 *000,351*
Chemistry of Dioxymethylenes and Dioxiranes.
PB91-112326 *000,280*
- HEAT OF FUSION**
Measurement of the Heat of Fusion of Molybdenum by a Microsecond-Resolution Transient Technique.
PB90-271537 *000,480*
- HEAT OF REACTION**
Heat of Reaction and Curing of Epoxy Resin.
PB90-135872 *000,522*
- HEAT PUMPS**
Experimental evaluation of two nonazeotropic refrigerant mixtures in a water-to-water breadboard heat pump.
DE90009016 *000,955*
Energy Analysis of Heat Pumps.
PB90-150210 *000,956*
Rating Procedure for Mixed Air-Source Unitary Heat Pumps Operating in the Heating Mode.
PB90-221854 *000,096*
Experimental Evaluation of Two Nonazeotropic Refrigerant Mixtures in a Water-to-Water, Breadboard Heat Pump.
PB90-235003 *001,234*
- HEAT RESISTANT ALLOYS**
Development of Metastable Processing Paths for High Temperature Alloys.
AD-A210 550/0 *001,240*
Aluminum Oxide Barriers in Metal CrAlY Superalloy Systems.
N89-13657/6 *001,169*
- HEAT TRANSFER**
Method for Characterizing the Dynamic Performance of Wall Specimens Using a Calibrated Hot Box.
PB90-135773 *000,125*
Apparatus for Measuring High-Flux Heat Transfer in Radiatively Heated Compact Exchangers.
PB90-155870 *001,692*
Two-Phase Heat Transfer in the Vicinity of a Lower Console Point.
PB90-187758 *001,710*
Heat Transfer in a Compact Tubular Heat Exchanger with Helium Gas at 3.5 MPa.
PB91-107573 *001,120*
Thermal Bridging in Mechanical Fastened Low-Slope Roofs.
PB91-111997 *000,157*
Transient Heat-Transfer Studies in Low-Gravity Using Optical Measurement Techniques.
PB91-134023 *001,797*
- HEAT TRANSFER FLUIDS**
Nontoxic Heat Transport Fluids for Spacecraft Two-Phase Thermal Control Systems.
PB90-196510 *001,819*
- HEATING**
Engineering Analysis of Major Plant Components.
PB90-169897 *000,085*
Rating Procedure for Mixed Air-Source Unitary Heat Pumps Operating in the Heating Mode.
PB90-221854 *000,098*
- HEATING LOAD**
Engineering Data Collected during the Operation of a Total Energy Plant.
PB90-169905 *000,086*
Effect of Wall Mass on the Annual Heating and Cooling Loads of Single-Family Residences for Five Selected Climates.
PB91-118018 *000,104*
- HEAVY ION ACCELERATORS**
Accurate X-ray Spectroscopy.
PB90-218488 *001,745*
- HEAVY WATER**
Melting Curve of Tetrahydrofuran Hydrate in D2O.
PB91-134080 *000,513*
- HELIUM**
Coupled Channel Quantum Scattering Study of Alignment Effects in Na(doublet P(3/2)) + He -> Na(doublet P(1/2)) + He Collisions.
PB90-170937 *000,373*
Reactions of H(sub 2) with He(1+) at Temperatures Below 40 K.
PB90-171042 *000,377*
Thermophysical Properties of Helium-4 from 0.8 to 1500 K with Pressures to 2000 MPa.

KEYWORD INDEX

- PB90-183351 *000,381*
Alignment Effects in Ca-He (5(1)P1 - 5(3)Pj) Energy Transfer Half-Collisions.
PB90-271487 *001,767*
- HELIUM 3 TARGET**
Development of a sup 3 He/Xe Gas Scintillation Counter to Measure the sup 3 He(n,p)T Cross Section in the Intermediate Energy Range.
DE89004815 *001,670*
- HELIUM 4**
State Equation of Liquid Helium - 4 from 0.8 to 2.5 K.
PB91-133801 *001,794*
- HELIUM ATOMS**
Theory of Spin-Polarized Metastable-Atom-Deexcitation Spectroscopy; Ni-He.
PB90-207077 *001,736*
- HEMATITE**
X-ray Line Broadening Study on Shock-Modified Hematite.
PB90-206145 *000,421*
- HERMETIC SEALS**
Modular Magnetically Coupled High Speed Stirrer for Hermetically Sealed Chemical Reactors.
PB90-188244 *000,272*
- HERMITIAN POLYNOMIAL**
Residual Hermite Normal Form Computations.
PB91-118141 *000,733*
- HETERODYNING**
Heterodyne Frequency Measurements on N(sub 2)O Near 930 cm⁻¹.
PB90-136318 *000,317*
Heterodyne Frequency Measurements on OCS Near 61.76 THz (2060 cm⁻¹).
PB90-206806 *000,423*
Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm⁻¹.
PB90-206897 *000,425*
- HETEROGENEOUS COMPUTING ENVIRONMENTS**
Introduction to Heterogeneous Computing Environments.
PB90-154774 *000,646*
- HEXA (HYDROXYETHYL)PARAROSANILINE NITRILE**
Radiochromic Solutions for Reference Dosimetry.
PB90-149303 *001,353*
- HEXANE**
Pressure Effects on Partial Discharges in Hexane under DC Voltage.
PB90-217951 *000,910*
- HIERARCHIES**
Hierarchical Control of Intelligent Machines Applied to Space Station Telerobots.
N89-264717 *001,814*
- HIGH CURRENT**
High Current, Very Wide Band Transconductance Amplifier.
PATENT-4 965 529 *000,834*
- HIGH ENERGY PHYSICS**
Electromechanical Properties of Superconductors for High-Energy Physics Applications. Part 2.
PB90-163627 *001,693*
- HIGH LEVEL LANGUAGES**
Ada Compiler Validation Summary Report: Digital Equipment Corporation, VAX Ada Version 2.0, VAX 8800 (Host) to MicroVAX (Target), 89127S1.10034.
AD-A208 453/1 *000,673*
- HIGH-LEVEL RADIOACTIVE WASTES**
Evaluation and Compilation of DOE (Department of Energy) Waste Package Test Data. Biannual Report: February 1988-July 1988.
NUREG/CR-4735-V5 *001,426*
- HIGH PERFORMANCE LIQUID CHROMATOGRAPHY**
Total Molecular Surface Areas as a Predictor for Reversed-Phase High Performance Liquid Chromatography in Various Organotin Systems.
PB90-193301 *000,410*
- HIGH STRENGTH CONCRETES**
Pore Structure of Concrete and Freezing Vulnerability.
PB90-149683 *000,570*
Design of High Strength Cement-Based Materials. Part 3. State of the Art.
PB90-152646 *001,129*
Design of High Strength Cement-Based Materials. Part 1. Fracture Mechanics.
PB90-152653 *001,130*
- HIGH TEMPERATURE LUBRICANTS**
High Temperature Lubricants from Biodeuterated Materials Produced by Algae.
PB90-169921 *001,222*
- HIGH TEMPERATURE SUPERCONDUCTORS**
Pinning, Flow and Plastic Deformation of Flux Vortices in High T(Sub c) Superconductors. (Abstract Only).
N90-27796/3 *001,515*
Flux Flow and Flux Dynamics in High-T(Sub c) Superconductors.(Abstract Only).
N90-27797/1 *001,516*
Processing Bi-Pb-Sr-Ca-Cu-O Superconductors from Amorphous State.(Abstract Only).
N90-27860/7 *001,517*
- Measurement of H(Sub c1) in a Single Crystal of YBa2Cu3O7 with Low Pinning.(Abstract Only).
N90-27864/9 *001,518*
Studies of Iron Impurities in Y(x)Pr(1-x)Ba2Cu3O(7-delta).(Abstract Only).
N90-27865/6 *001,519*
High-Tc Superconducting Unit Having Low Contact Surface Resistivity and Method of Making.
PATENT-4 963 523 *000,894*
Break Junction Measurement of the Tunneling Gap of a Thallium-Based High-Temperature Superconductor Crystal.
PB90-136334 *001,525*
Micro-Raman Spectroscopy of High-T(sub c) Superconductors in the Y-Ba-Cu-O System.
PB90-149279 *001,537*
Dependence of the Critical Current on Angle between Magnetic Field and Current in Y-, Bi-, and Tl-Based High-T(sub c) Superconductors.
PB90-149402 *001,542*
Magnetization of Imperfect Superconducting Grains.
PB90-152471 *001,552*
Resonant Photoemission Study of Superconducting Y-Ba-Cu-O.
PB90-169285 *001,555*
Theoretical Models for High-Temperature Superconductivity.
PB90-170168 *001,561*
Superconductivity in Bulk and Thin Films of La(sub 1.85)Sr(sub 0.15)CuO(sub 4-x) and Ba2YCu3O(sub 7-y).
PB90-170440 *001,565*
Double-Step Behavior of Critical Current versus Magnetic Field in Y-, Bi- and Tl-Based Bulk High-T(sub c) Superconductors.
PB90-187576 *001,572*
Specific Heat of the High-T(sub c) Superconductor (Bi(sub 1.66)Pb(sub 0.34)Ca(sub 2)Sr(sub 2)Cu(sub 3)O(sub 10)).
PB90-187600 *001,573*
S-N-S Behavior of Grain Boundaries in Polycrystalline La(sub 1.85)Sr(sub 0.15)CuO(sub 4-y).
PB90-188269 *001,577*
Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study II.
PB90-190687 *001,581*
Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study.
PB90-190760 *001,582*
Effects of Crystal Anisotropy on Magnetization and Magnetic Order in Superconducting RbBa(sub 2)Cu(sub 3)O(sub 7-x).
PB90-192626 *001,590*
Low Temperature Chemical Approaches to Superconductive Materials: A Challenge in Chemical Synthesis.
PB90-206962 *001,156*
Airy Pattern, Weak-Link Modelling of Critical Currents in High-T(sub c) Superconductors.
PB90-207051 *001,600*
Soft X-ray Absorption and Emission Spectra of the YBa(sub 2)Cu(sub 3)O(sub 7-x) Superconductor.
PB90-217852 *001,603*
Photoemission Study of High T(sub c) Oxides.
PB90-217993 *001,605*
Modeling of Critical Currents in Granular High-T(sub c) Superconductors.
PB90-218041 *001,606*
Magnetic-Field-Modulated Microwave-Absorption Detection in a Bi-Sr-Ca-Cu-O Superconductor.
PB90-241308 *001,613*
Critical Currents of High (T sub c) Superconductors: Pinning, Weak Links, Conduction, Anisotropy, and Contact Resistivities.
PB90-241456 *001,618*
Magnetic Order and Spin Fluctuations in Oxide Superconductors.
PB90-254772 *001,621*
Two-Dimensional Magnetic Order of Er in ErBa2Cu3O7.
PB90-254780 *001,622*
Fe Mossbauer Effect in Y(sub x)Pr(sub 1-x)Ba2(Cu,0.98Fe0.02)3O7.
PB90-254889 *001,623*
Antiferromagnetic Ordering in Superconducting and Oxygen-Deficient Nonsuperconducting RbBa2Cu3O(7-delta) Compounds (R = Nd and Sm).
PB90-261413 *001,629*
Relationship of Electrical, Magnetic, and Mechanical Properties to Processing in High-Temperature Superconductors.
PB90-271131 *001,631*
Synchrotron Radiation Studies of the Electronic Structures of High-T(sub c) Superconductors.
PB90-271438 *001,633*
Electronic Structure of High-(T 'sub c) Superconductors Studied Using Photoelectron Spectroscopy.
PB91-101386 *001,638*
Polarization X-ray Absorption Near-Edge Structure Study of Pr2-xCexCuO4 Single Crystals: The Nature of Ce Doping.
- PB91-101618 *001,642*
Crystal Structure, Atomic Ordering and Charge Localization in Pb2Sr2Y(sub 1-x)CaxCu3O(sub 8+ delta) (x= 0, delta= 1.47).
PB91-112375 *001,650*
Experimental Program on High (T sub c) Oxide Superconductors at the Naval Research Laboratory.
PB91-112565 *001,651*
- HIGH TEMPERATURE TESTS**
High Temperature Ultrasonic Testing of Materials for Internal Flaws.
PATENT-4 898 034 *001,274*
Advances in Research on Dynamic Measurements of Thermophysical Properties at High Temperatures.
PB90-135649 *000,997*
Noncontact Ultrasonic Sensors for High Temperature Process Control.
PB90-136789 *001,209*
- HIGHWAY BRIDGES**
Performance of Structures during the Loma Prieta Earthquake of October 17, 1989.
PB90-184599 *000,171*
- HIGHWAY SIGNS**
Color Appearance of Traffic Control Devices under Different Illuminants.
PB90-260969 *001,832*
- HISTOGRAMS**
Concentration-Concentration Histograms: Scatter Diagrams Applied to Quantitative Compositional Maps.
PB90-150152 *000,212*
- HISTONES**
Structure of Hydroxyl Radical-Induced DNA-Protein Crosslinks in Calf Thymus Nucleohistone In vitro.
PB91-118257 *001,337*
- HOLDERS**
Thermal Contraction of Fiberglass-Epoxy Sample Holders Used for Nb3Sn Critical-Current Measurements.
PB91-134064 *001,660*
- HOLMIUM 165**
Excitation of the Isobaric Analog State of (165)Ho by Pion Single Charge Exchange.
PB90-171083 *001,706*
- HOLMIUM BARIUM CUPRATES**
Airy Pattern, Weak-Link Modelling of Critical Currents in High-T(sub c) Superconductors.
PB90-207051 *001,600*
- HOLOGRAPHY**
Holographic Stereogram Displays from Computer-Generated Polygonal Models.
PB90-261223 *000,845*
- HORN ANTENNAS**
Near-Field Gain of Pyramidal Horns from 18 to 40 GHz.
PB90-155854 *000,802*
- HOSPITAL ADMINISTRATION**
Hospital Energy Analysis Toolkit (HEAT): User Manual.
PB90-237355 *000,990*
Hospital Energy Analysis Toolkit (HEAT), Version 1.0 (for Microcomputers).
PB90-504036 *000,991*
- HOT PRESSING**
Eddy Current Measurement of Density during Hot Isostatic Pressing.
PB90-193400 *001,255*
- HOT STARS**
Quantitative Spectroscopy of Hot Stars.
PB91-118380 *000,052*
- HOT WATER HEATERS**
Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating.
PB90-185117 *000,089*
- HOT WORKING**
Development of a Computer-Controlled Hot-Deformation Apparatus at NIST (National Institute of Standards and Technology).
PB90-149964 *001,045*
- HOTELS**
Fire Experiments of Zoned Smoke Control at the Plaza Hotel in Washington DC.
PB90-207259 *000,093*
Fire Risk Assessment Method: Case Study 3, Concealed Combustibles in Hotels.
PB90-235045 *000,141*
Plaza Hotel Fire Experiments.
PB91-112334 *000,158*
- HUMAN FACTORS ENGINEERING**
Evaluation of the Role of Luminance Distributions in Occupant Response to Lighting.
PB90-241381 *000,100*
High Technology Office Evaluation Survey: A Pilot Study.
PB90-244427 *000,101*
- HUMAN IMMUNODEFICIENCY VIRUS (HIV)**
Inactivation of Human Immunodeficiency Virus (HIV) by Ionizing Radiation in Body Fluids and Serological Evidence.
PB90-170069 *001,343*

KEYWORD INDEX

IMPEDANCE

- HUMIDITY**
Influence of Pressure and Humidity on the Medium and Long-Term Frequency Stability of Quartz Oscillators. PB90-136953 000,855
Effect of Humidity on Commercial Cesium Beam Atomic Clocks. PB90-261082 000,634
- HVAC SYSTEMS**
HVAC Emulation and On-Line Testing of EMC Systems. PB90-218173 001,378
- HYDRATES**
Thermal measurements on structure 1 and structure 2 pure clathrate hydrates and on natural gas samples. Final report. DE90005343 000,949
Melting Curve of Tetrahydrofuran Hydrate in D₂O. AD-A210 001/4 000,513
- HYDRAZOIC ACID**
Unimolecular Dynamics Following Vibrational Overtone Excitation of HN₃ v₁= 5 and v₁= 6: HN₃(X,v,J,K) Yields HN(X(3)Sigma-v,J,Omega) + N₂(X(1)Sigma+ g). AD-A210 001/4 000,300
Energetics and Spin- and Lambda-Doublet Selectivity in the Infrared Multiphoton Dissociation DN₃ yields DN(X 3 Sigma-), a 1 Delta) + N₂(X 1 Sigma g (+)): Experiment. AD-A210 250/7 000,301
- HYDROCARBONS**
Integrated Theoretical and Experimental Study of the Thermophysical Properties of Fluid Mixtures: Summary Report, 1987-1988. DE90001197 001,453
Integrated Theoretical and Experimental Study of the Thermophysical Properties of Fluid Mixtures: Annual Report. DE90001505 001,454
Kinetics Data Base for Combustion Modeling: Status Report, February 1, 1988-January 31, 1989. DE90003095 000,578
- HYDROGEN**
Broadening and Shifting of the Raman O Branch of HD. AD-A209 360/7 000,299
Fundamental Molecular Data to Support CARS (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration. AD-A212 411/3 000,304
Reactions of H(sub 2) with He(1+) at Temperatures Below 40 K. PB90-171042 000,377
Survey of Instrumentation for Slush Hydrogen Systems. PB90-187857 000,599
Broadening and Shifting of the Raman O-Branch of HD. PB90-188251 000,390
Hydrogen Treatment of Stark Effects in Rydberg Atoms. PB90-190802 001,718
Gauge Invariance and Approximate Multiphoton Calculations in Hydrogen. PB90-206020 001,729
Hydrogen-Component Fugacity Coefficients in Binary Mixtures with Isobutane: Temperature Dependence. PB90-254400 000,460
Hydrogen Component Fugacity in Binary Mixtures with Carbon Monoxide: Temperature Dependence. PB90-254418 000,461
Fugacity Coefficients of Hydrogen in (Hydrogen + 2-Methylpropane): Pressure Dependence. PB91-133835 000,509
- HYDROGEN ATOMS**
Bremsstrahlung Radiation Emitted in Fast-Electron-H-Atom Collisions. PB90-171109 001,708
Harmonic Generation by a Classical Hydrogen Atom in the Presence of an Intense Radiation Field. PB90-205873 001,726
Radical Concentration Measurements in Hydrocarbon Diffusion Flames. PB90-254939 000,470
- HYDROGEN BONDS**
Water Hydrogen Bonding: The Structure of the Water-Carbon Monoxide Complex. PB90-261421 000,475
Models for Strong Interactions in Proteins and Enzymes. 1. Enhanced Acidities of Principal Biological Hydrogen Donors. PB91-134429 001,315
- HYDROGEN CHLORIDE**
Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents. PB91-112201 000,254
- HYDROGEN CHLORIDE DIMERS**
Symmetry Breaking in HCl and DCl Dimers: A Direct Near-Infrared Measurement of Interconversion Tunneling Rates. PB90-169889 000,358
- HYDROGEN CYANIDE**
Infrared and Microwave Study of Angular-Radial Coupling Effects in Ar-HCN. PB90-170085 000,361
Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane. PB90-187832 001,368
Toxicological Effects of Different Time Exposures to the Fire Gases: Carbon Monoxide or Hydrogen Cyanide or to Carbon Monoxide Combined with Hydrogen Cyanide or Carbon Dioxide. PB90-217746 001,369
- HYDROGEN EMBRITTLEMENT**
Hydrogen Embrittlement of Ductile Nickel Aluminum during Corrosion in Aqueous Solutions. PB91-118448 001,231
- HYDROGEN FLUORIDE**
Microwave Spectrum and Electric Dipole Moment of Ne-HF. PB90-206004 000,419
Near-Threshold Vibrational Excitation of HF by Electron Impact. PB91-101584 000,489
- HYDROGEN IODIDE**
Rotational Distributions in the Photodetachment of IHI(1-) and in the I + HI Reaction: The Influence of IHI Transition State Resonances. PB90-206905 000,426
- HYDROGEN IONS 1 PLUS**
Photon Stimulated Desorption Induced by Core Exciton States in MgO. PB90-169293 000,349
- HYDROGEN IONS TWO PLUS**
Above-Threshold Dissociation of (H sub 2, sup +) in Intense Laser Fields. PB91-101253 001,770
- HYDROGEN PEROXIDE**
Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase. PB90-169269 000,285
- HYDROGEN PRODUCTION**
Hydrogen Evolution Cathodes with AB(sub 5)-Catalyzed Coatings. PB90-153420 000,337
- HYDROGEN SULFIDE**
Rotational and Tunneling Spectrum of the H₂S.CO₂ van der Waals Complex. PB90-261348 000,472
- HYDROGEN TRANSFER**
Hydrogen Transfer from 9,10-Dihydrophenanthrene to Anthracene. PB90-241282 000,449
- HYDROGEN TRITIDE**
Development of a Stable Tritium (HT) Generation System for Testing Atmospheric HT Monitors. PB90-192386 001,400
- HYDROPEROXY RADICALS**
Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase. PB90-169269 000,285
- HYDROXYAPATITE**
Adsorption of Phenoxyacetic Acid and Trans-Cinnamic Acid on Hydroxyapatite. PB90-192394 000,063
- HYDROXYL RADICAL**
Kinetics of the Gas Phase Reaction of Hydroxyl Radicals with Ethane, Benzene, and a Series of Halogenated Benzenes Over the Temperature Range 234-438 K. PB90-193483 000,275
Structure of Hydroxyl Radical-Induced DNA-Protein Crosslinks in Calf Thymus Nucleohistone In vitro. PB91-118257 001,337
- HYDROXYL RADICALS**
Correlation between Gas Phase and Solution Phase Reactivities of Hydroxyl Radicals Towards Saturated Organic Compounds. PB90-193459 000,413
Gas-Phase Reactions of Hydroxyl Radicals with the Fuel Additives Methyl Tert-Butyl Ether and Tert-Butyl Alcohol Over the Temperature Range 240-440 K. PB90-193467 000,414
Concentration Measurements of OH- and Equilibrium Analysis in a Laminar Methane-Air Diffusion Flame. PB90-242173 000,590
Radical Concentration Measurements in Hydrocarbon Diffusion Flames. PB90-254939 000,470
- HYPERCUBES**
State Occupancy Information for Performance Comparisons. PB91-112870 000,771
- HYPERTEXT**
Proceedings of the Hypertext Standardization Workshop, January 16-18, 1990 National Institute of Standards and Technology. PB90-215864 001,030
- HYPERTEXT SYSTEMS**
Dynamic Characteristics of Hypertext. PB91-107276 001,034
- ICARE DEVICE**
ICARE Radon Calibration Device. PB90-255332 001,41E
- ICOSAHEDRONS**
Patterson Fourier Analysis of the Icosahedral (Al,Si)-Mn Alloy. PB90-135799 001,245
- IDENTIFICATION SYSTEMS**
Automated Fingerprint Identification Systems Bench Mark Tests of Relative Performance. PB90-170457 001,834
- IGNITION**
Cigarettes with Low Propensity to Ignite Soft Furnishings. PB90-169327 000,126
Forward Smolder Propagation Over Solid Wood. PB90-218223 001,273
Cigarette Ignition of Soft Furnishings. PB90-241480 000,109
Furniture Flammability: An Investigation of the California Bulletin 133 Test, Part 2. Characterization of the Ignition Source and a Comparable Gas Burner. PB90-257692 000,111
Furniture Flammability: An Investigation of the California Technical Bulletin 133 Test, Part 3. Full Scale Chair Burns. PB90-257700 000,112
- ILLUMINATING**
Suprathreshold Visibility Meter to Directly Assess the Conspicuity of Office Tasks. PB90-161829 000,082
Calculation of Metameric Reflectances. PB90-206087 001,482
Lighting for Color Vision. PB90-206095 000,076
Color Appearance of Traffic Control Devices under Different Illuminants. PB90-260969 001,832
- IMAGE ANALYSIS**
Quantitative Isotope and Elemental Ratio Measurements with a Camera-Based Imaging System on an Ion Microscope. PB90-217902 000,244
Automated Extraction of Regular Spot Arrays from Electron Diffraction Images. PB90-241324 001,614
- IMAGE PROCESSING**
Object Finder Based on Multiple Thresholds, Connectivity, and Internal Structure. PB90-136912 001,683
Decoding Bar Codes from Image Data. PB90-136995 000,772
Usefulness of Various Computer Algorithms for Locating Spots and Arrays in Electron Diffraction Patterns. PB90-150145 000,325
Automated Maintenance Management Program Part 2: The Integration of Databases and Image Processing Results for the Quantitative Assessment of the Exterior Condition of Metal Buildings. PB90-162090 000,108
Iterative Seismic Inversion. PB90-170382 000,800
Processing of 2-D Digital Images by Integral Holography. PB90-271479 000,776
Closed-Form Massively-Parallel Range-from-Image-Flow Algorithm. PB91-112805 000,778
- IMAGE SCANNERS**
Guideline for Quality Control of Image Scanners; Category: Hardware Standard; Subcategory: Calibration, Validation, and Testing. Recommended Practice for Quality Control of Image Scanners: Standard. FIPS PUB 157 000,741
- IMAGES**
Motion, Depth, and Image Flow. PB90-254350 001,350
- IMIDAZOLES**
Models for Strong Interactions in Proteins an Enzymes. 2. Interactions of Ions with the Peptide Link and with Imidazole. PB91-134437 001,316
- IMMUNOASSAY**
Liposome-Based Flow Injection Enzyme Immunoassay for Theophylline. PB91-101675 001,313
- IMPACT-ECHO METHOD**
Detecting Delaminations in Concrete Slabs with and without Overlays Using the Impact-Echo Method. PB91-112656 000,568
- IMPACT TESTS**
Setting Time and Strength to Concrete Using the Impact-Echo Method. PB90-170838 000,131
- IMPEDANCE**
Coaxial Intrinsic Impedance Standards. PB90-155797 000,816

KEYWORD INDEX

IMPEDANCE BRIDGES

Digital Source for a New Impedance Bridge.
PB91-101196 000,828

IMPLANTATION

Artifacts Observed in Oxygen Profiles of SIMOX Samples by Secondary Ion Mass Spectrometry.
PB90-149477 000,211

IMPULSE RESPONSE

Impulse Response Acquisition as an Inverse Heat Conduction Problem.
PB90-190695 001,286

IN-PROCESS QUALITY CONTROL

Progress Report of the Quality in Automation Project for FY89.
PB90-244476 001,078

IN SITU COMBUSTION

Polycyclic Aromatic Hydrocarbon Emissions from the Combustion of Crude Oil on Water.
PB91-101055 000,976

INCINERATION

Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 000,970

INCLUSIONS

Plate-Like Rigid Inclusions and the Ductile-Brittle Transition.
PB90-136656 001,247

INCONEL 600

Magnetic Susceptibility of Inconel Alloys 718, 625, and 600 at Cryogenic Temperatures.
PB91-134031 001,268

INCONEL 625

Magnetic Susceptibility of Inconel Alloys 718, 625, and 600 at Cryogenic Temperatures.
PB91-134031 001,268

INCONEL 718

Magnetic Susceptibility of Inconel Alloys 718, 625, and 600 at Cryogenic Temperatures.
PB91-134031 001,268

INDEXES (DOCUMENTATION)

Index to the Reports of the National Conference on Weights and Measure from the First to the Seventy-Third (1905 to 1988).
PB90-155334 001,001

INDIUM

Tensile Strength and Ductility of Indium.
PB90-152497 001,249

Determination of the Indium Freezing-Point and Triple-Point Temperatures.
PB90-169707 000,356

Spin-Orbit State Specific Laser Probing of the desorption Kinetics and Island Behavior of In on Si(100).
PB90-241639 000,455

INDIUM ANTIMONIDES

Donor-Shifted Phonon-Assisted Magneto-Optical Resonances in n-InSb.
PB90-170242 001,562

Scanning-Tunneling-Microscopy Study of InSb(110).
PB91-134932 001,662

INDIUM OXIDES

pH Sensors Based on Iridium Oxide.
NUREG/CR-5484 000,994

INDIUM PHOSPHIDES

X-ray Photoelectron Spectroscopy/Ar(1+) Ion Profile Study of Thin Oxide Layers on InP.
PB91-118604 001,657

INDOOR AIR POLLUTION

Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results.
PB90-164484 000,084

Comparison of the Chromotropic Acid and Pararosaniline Methods for Measuring Formaldehyde Concentrations of Pressed-Wood Product Emissions.
PB90-188475 000,969

Preliminary Radon Progeny Measurements in Three Federal Office Buildings.
PB90-192667 000,983

Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973

Ventilation Characterization of the Consumer Product Safety Commission Combustion Test Chamber Facility.
PB91-107490 000,103

Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB91-113654 000,977

Development of Models for the Prediction of Indoor Air Quality in Buildings.
PB91-118281 000,978

INDOOR AIR QUALITY

Ventilation and Air Quality Investigation of the Madison Building, Phase 1 Report.
PB90-155417 000,081

Measurements of Ventilation Rates and Ventilation Effectiveness.
PB90-218058 000,094

Post Occupancy Evaluation of Federal Buildings - The Portland Federal Building and Others.
PB90-219833 000,097

INDUCED CURRENT

Magnetic Dipole Excitation of an Insulated Conductor of Finite Length.
PB90-254681 000,913

INDUCTANCE STANDARDS

Calibration Procedures for Inductance Standards Using a Commercial Impedance Meter as a Comparator.
PB91-120147 000,862

INDUSTRIAL DEVELOPMENT

Technology-Based Economic Development: A Study of State and Federal Technical Extension Services.
PB90-257635 000,013

INDUSTRIAL ENGINEERING

Report on Interactions between the National Institute of Standards and Technology and the American Society of Mechanical Engineers.
PB90-183286 001,118

INDUSTRY

NBS (National Bureau of Standards)/Industry Collaboration on Instrumentation Development.
PB90-170515 001,006

INFORMATION CENTERS

Measurement Research and the National Institute of Standards and Technology's Research Information Center.
PB90-218074 001,037

Data Bases Available in the Research Information Center of the National Institute of Standards and Technology.
PB91-107284 001,035

INFORMATION DISSEMINATION

FIREDOC Users Manual (Revised).
PB90-271800 000,594

INFORMATION MODELING

Planning Model for Unifying Information Modeling Languages for Product Data Exchange Specification (PDES).
PB90-160375 001,028

INFORMATION RETRIEVAL

FIREDOC Users Manual (Revised).
PB90-271800 000,594

INFORMATION RETRIEVAL EFFECTIVENESS

Computer-Generated Graphical Analysis of Citation Searches.
PB90-241621 001,033

INFORMATION SERVICES

Standard Reference Data Publications, 1987-1989.
PB90-161704 001,277

Measurement Research and the National Institute of Standards and Technology's Research Information Center.
PB90-218074 001,037

INFORMATION SOURCES

Computer User's Guide to the Protection of Information Resources.
PB90-147489 000,781

INFORMATION SYSTEMS

Management Guide to the Protection of Information Resources.
PB90-145095 000,780

Guide to Data Administration.
PB90-147919 001,027

Management of Networks Based on Open Systems Interconnection (OSI) Standards: Functional Requirements and Analysis.
PB90-161753 001,029

Computerization of the ICDD Powder Diffraction Database Critical Review of Sets 1 to 32(1).
PB90-206673 000,422

Computerized Tribology Information System ACTIS.
PB90-218405 001,115

Information Management Directions: The Integration Challenge.
PB90-219866 001,032

U.S. Department of Energy Risk Assessment Methodology, Volume 1. DOE Risk Assessment Guideline Instructions, Resource Table, and Completed Sample. Volume 2. DOE Risk Assessment Worksheets.
PB90-244484 000,789

Automated Information System Security Accreditation Guidelines.
PB90-264102 000,792

Domestic Disaster Recovery Plan for PCs, OIS, and Small VS Systems.
PB90-265240 000,794

Data Bases Available in the Research Information Center of the National Institute of Standards and Technology.
PB91-107284 001,035

Socioeconomic Barriers in Computerizing Materials Data.
PB91-118463 001,063

Methodology for Certifying Sensitive Computer Applications.
PB91-120162 000,001

INFRARED DETECTORS

Electronics Design of the Infrared/Ultrasonic Sensing for a Robot Gripper.
PB90-160383 001,108

PB90-160383 001,108

INFRARED EQUIPMENT

Investigation into the Factors Affecting Infrared Temperature Measurements for Building Applications.
PB91-118075 000,161

INFRARED IMAGERY

Low-Contrast Thermal Resolution Test Targets: A New Approach.
PB91-167437 000,849

INFRARED PHOTOMETRY

Low-Contrast Thermal Resolution Test Targets: A New Approach.
PB91-167437 000,849

INFRARED SPECTRA

Analysis of the Microwave and Far Infrared Spectrum of the Water Dimer.
PB90-170150 000,362

High Resolution Infrared Spectrum of (28)SiH(sub 3)D from 1450 to 1710 cm(-1).
PB90-188376 000,396

Density Dependence of the 5 micrometers Infrared Spectrum of NH3.
PB90-241373 000,451

Spectroscopic Library for Alternative Refrigerant Analysis.
PB91-107128 000,252

INFRARED SPECTROSCOPY

Microspectroscopy Applications in Tribology.
PB90-152869 001,113

Evaluation of Instrumental Correction Factors for Infrared Absorption Concentration Measurements.
PB90-170044 000,229

Infrared and Microwave Study of Angular-Radial Coupling Effects in Ar-HCN.
PB90-170085 000,361

Fourier Transform Infrared (FTIR) Determination of Interstitial Oxygen Concentration of Single-Side-Polished Silicon Wafers.
PB90-170762 000,234

Diode Laser Measurement of the (nu sub 3) Band of (14)CO(sub 2).
PB90-188319 000,393

FTS Infrared Measurements of Alkali Halides in the Gas Phase: Rubidium Fluoride and Cesium Fluoride.
PB90-205790 000,415

Heterodyne Frequency Measurements on OCS Near 61.76 THz (2060 cm(-1)).
PB90-206806 000,423

Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm(-1).
PB90-206897 000,425

Use of FTIR Spectroscopy for Multi-Component Quantitation in Combustion Toxicology.
PB90-217720 000,243

ADC Errors in Quantitative FT-IR Spectroscopy.
PB91-111955 001,502

Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents.
PB91-112201 000,254

INJECTION

Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques.
PB90-170432 000,233

INNER-SHELL IONIZATION

Pd-Na/F Double Exploding Foil Photoionization Experiment.
PB91-112474 001,780

INORGANIC POLYMERS

Thermal Analysis of Ba2YCu3O (sub 7-x) at 700-1000C in Air.
PB91-118125 000,259

INPUT OUTPUT PROCESSING

Knowledge-Based Front-End Input Generating Program for Building System Simulation.
PB90-170234 000,714

INPUT OUTPUT ROUTINES

NIST Step Class Library (Step into the Future).
PB91-107235 000,764

SNMPLIB: A Simple Network Management Protocol Function Library for IBM PC Compatible Computers.
PB91-120188 000,735

INSERTION LOSS

Standard Linear Antennas, 30 to 1000 MHz.
PB91-107391 000,812

INSTITUTE OF ELECTRICAL AND ELECTRONIC ENGINEERS

Report on Interactions between the National Institute of Standards and Technology and the Institute of Electrical and Electronic Engineers.
PB90-183344 000,900

INSTRUMENTATION & EXPERIMENTAL METHODS

Optical Heterodyne Densitometer.
N89-13323/5 001,466

Fundamental Tests of the Isotropy of Space Using Fast-Beam Laser Spectroscopy.

KEYWORD INDEX

PB90-136359 001,678
 Accuracy Analysis of the Space Shuttle Solid Rocket Motor Profile Measuring Device. PB90-148362 001,817
 Thermal Contraction of Fiberglass-Epoxy Sample Mandrels and Its Effect on Critical-Current Measurements. PB90-149113 001,534
 Phosphor Film Characterization Measurements in the Vacuum U.V. Using a Multichannel Detector. PB90-149287 000,798
 Tracking Chemical Transformations of Particles in the Raman Microprobe. PB90-149469 000,268
 Development of a Computer-Controlled Hot-Deformation Apparatus at NIST (National Institute of Standards and Technology). PB90-149964 001,045
 Metal Transfer in Gas Metal Arc Welding: Droplet Rate. PB90-152539 001,064
 Apparatus for Measuring High-Flux Heat Transfer in Radiatively Heated Compact Exchangers. PB90-155870 001,692
 Laser Length Metrology. PB90-169418 001,697
 Residual Currents in Several Commercial UHV Bayard-Alpert Gauges. PB90-170101 001,005
 NBS (National Bureau of Standards)/Industry Collaboration on Instrumentation Development. PB90-170515 001,006
 Specimen Biasing at Low Accelerating Voltages. PB90-170804 001,569
 NBS (National Bureau of Standards) Triple Quadrupole Tandem Mass Spectrometer. PB90-171026 000,376
 Survey of Instrumentation for Slush Hydrogen Systems. PB90-187857 000,599
 Heat Capacity, Cp, of Fluids from Transient Hot Wire Measurements. PB90-192527 001,010
 Measurement of Thermal Conductivity and Thermal Diffusivity of Fluids Over a Wide Range of Densities. PB90-192535 001,011
 Viscosity and Molecular Weight Distribution of Ultra-High Molecular Weight Polyethylene Using a High Temperature Low Shear Rate Rotational Viscometer. PB90-193426 000,536
 Systems and Instruments in Site Surveys. PB90-205808 000,944
 Versatile Scan Generator and Data Collector for Scanning Tunneling Microscopes. PB90-205931 001,013
 Workloads, Observables, Benchmarks and Instrumentation. PB90-207770 000,649
 Polarimetric Magnetic Field Sensors Based on Yttrium Iron Garnet. PB90-218009 000,839
 Mobile Antennas. PB90-218108 000,810
 Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems. PB90-218314 001,740
 Digital Video Data Acquisition/Analysis for Existing ESDIAD Apparatus. PB90-218363 001,741
 Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions. PB90-235268 000,542
 Pinhole Camera Imaging Without Lenses or Mirrors. PB90-254962 001,442
 Optimized Design of the Chopper Disks and the Neutron Guide in a Disk Chopper Neutron Time-of-Flight Spectrometer. PB90-260977 001,756
 Measurements of Tilt Using a Borehole Tiltmeter. PB90-261249 001,387
 Low-Profile High-Efficiency Microchannel-Plate Detector System for Scanning Electron Microscopy Applications. PB90-261330 001,628
 Evaluation of Hands-Free Communication Systems. PB90-264110 000,620
 Absolute Specular Reflectometer with an Autocollimator Telescope and Auxiliary Mirrors. PB90-269572 001,498
 Physicochemical Applications of Supercritical Fluid Chromatography. PB90-271206 000,251
 Dynamic Technique for Thermophysical Measurements at High Temperatures in a Microgravity Environment. PB90-271255 001,824
 Microsecond-Resolution Electrical Measurements in High-Current Discharges. PB90-271545 000,922

Crack Inspection of Railroad Wheel Treads by EMATs. PB91-101550 001,831
 Characterization of a Sampling Voltage Tracker for Measuring Fast, Repetitive Signals. PB91-107458 000,935
 Heat Transfer in a Compact Tubular Heat Exchanger with Helium Gas at 3.5 MPa. PB91-107573 001,120
 ADC Errors in Quantitative FT-IR Spectroscopy. PB91-111955 001,502
 Precision and Accuracy of Mass Flow Measurement in the NIST-Boulder Nitrogen Flow Facility. PB91-112417 000,255
 Low-Profile Microchannel-Plate Electron Detector System for SEM. PB91-112573 001,652
 Hybrid Performance Measurement Instrumentation for Loosely-Coupled MIMD Architectures. PB91-112615 000,654
 Scanning Electron Microscopy with Polarization Analysis (SEMPA). PB91-112672 001,655
 Transient Sources for Acoustic Emission Work. PB91-118000 001,086
 Calibration of High-Frequency Accelerometers by Conventional Methods. PB91-118521 001,448
 Separation of Amino Acids Using Composite Ion Exchange Membranes. PB91-133975 001,314
 Transient Heat-Transfer Studies in Low-Gravity Using Optical Measurement Techniques. PB91-134023 001,797
 Overview of Techniques of Analysis of Cell Damage. PB91-134775 001,338

INSTRUMENTS
 Instrumentation Everywhere (Editorial). PB90-242215 001,019

INSULATING BOARDS
 Risk of Blistering of Built-Up Roofing Membranes Applied to Polyurethane Foam Insulation. PB91-112631 000,160

INSULIN
 Structure of Insulin: Results of Joint Neutron and X-ray Refinement. PB90-206723 001,311

INTEGRAL EQUATIONS
 Evaluation of the Integral $I(\text{sub } l, l')(k, k') = \int_0 \text{to } \infty (j \text{ sub } l)(kr)(j \text{ sub } l')(k'r) \text{ squared dr.}$ PB90-235011 001,290

INTEGRAL QUANTUM HALL EFFECT
 Resource Letter QHE-1: The Integral and Fractional Quantum Hall Effects. PB90-193350 001,596

INTEGRATED CIRCUITS
 Report on an Interlaboratory Electromigration Experiment. AD-A169 652/5 000,864
 Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope). PB90-170960 000,868
 Semiconductor Measurement Technology: Thermal Resistance Measurements. PB90-269564 000,876
 Materials Problems Affecting Reliability and Yield of Wire Bonding in VLSI (Very Large Scale Integration) Devices. PB91-112268 000,886
 Comments on 'Improved Calibration and Measurement of the Scattering Parameters of Microwave Integrated Circuits'. PB91-134346 000,891
 Wafer-Level ANA Calibrations at NIST (National Institute of Standards and Technology). PB91-134353 000,892
 On-Wafer Microwave Standards at NIST. PB91-134965 000,893

INTELSAT SATELLITES
 Two-Way Satellite Time Transfers between and Within North America and Europe. PB90-188558 000,629

INTENSITY
 Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems. PB90-218314 001,740

INTERCALATION
 Quasielastic Neutron Scattering Study of Rotations and Diffusion in KC(sub 24)(NH(sub 3))(sub 4.3). PB90-170416 000,368

INTERFACE STABILITY
 Determination of Fiber/Matrix Interfacial Properties of Ceramic and Glass Matrix Composites. PB90-163254 001,136

INTERFACES
 Laser studies of chemical dynamics at the gas-solid interface. Progress report, January 1987-Jun 1989.

INTERSTITIALS
 DE90008698 000,313
 Thermal Technique for Determining Interface and/or Interlayer Strength in Composites. PATENT-4 972 720 001,182
 Interfacial Electron Transfer Reactions between Platinum Colloids and Reducing Radicals in Aqueous Solution. PB90-153453 000,283
 Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics. PB90-188426 001,579
 Ultrasonic Methods for Characterizing the Interface in Composites. PB90-188483 001,184
 Interfaces: The Next NDE Challenge. PB90-193392 001,254

INTERFACIAL TENSION
 Dynamic Technique for Measuring Surface Tension at High Temperatures in a Microgravity Environment. PB90-271578 001,825
 Effect of Surface Tension Anisotropy on Cellular Morphologies. PB91-101444 001,262
 Interfacial Free Energy and Interfacial Stress: The Case of an Internal Interface in a Solid. PB91-118034 001,266

INTERLABORATORY COMPARISONS
 Proceedings of the Workshop on Evaluation of Cement and Concrete Laboratory Performance. PB90-261801 000,564

INTERMETALLIC COMPOUNDS
 Development of Metastable Processing Paths for High Temperature Alloys. AD-A210 550/0 001,240
 Hydrogen Embrittlement of Ductile Nickel Aluminide during Corrosion in Aqueous Solutions. PB91-118448 001,231

INTERMETALLICS
 Development of Metastable Processing Paths for High Temperature Alloys. AD-A223 144/7 001,241
 Neutron Scattering in Intermetallics. PB90-188236 001,576
 Effect of Aqueous Environments on the Fracture Behavior of Ductile Nickel Aluminide. PB90-206970 001,194
 Brushing Up on the History of Intermetallics in Dentistry. PB90-261389 000,073

INTERNATIONAL COOPERATION
 Conduct and Administration of U.S. Participation and Leadership in International Standardization, Testing, and Certification in the Decade of the 1990s. PB90-194994 001,076
 International Harmonization of Standards. PB90-254632 000,118
 Wind and Seismic Effects. Proceedings of the Joint Meeting of the U.S.-Japan Cooperative Program in Natural Resources Panel on Wind and Seismic Effects (22nd). Held in Gaithersburg, MD, on May 15-18, 1989. PB91-107094 000,181

INTERNATIONAL RELATIONS
 International Harmonization of Standards: Done with or without Us. PB90-149154 000,115

INTERNATIONAL TEMPERATURE SCALE OF 1990
 Guidelines for Realizing the International Temperature Scale of 1990 (ITS-90). PB91-112854 001,783

INTERNATIONAL TRADE
 Trade Implications of Processes and Production Methods (PPMs). PB90-205485 000,203
 GATT (General Agreement on Tariffs and Trade) Standards Code Activities of the National Institute of Standards and Technology 1989. PB90-219817 000,204

INTEROPERABILITY AND SECURITY REQUIREMENTS
 Interoperability and Security Requirements for Use of the Data Encryption Standard in the Physical Layer of Data Communications. FIPS PUB 139 000,607
 Interoperability and Security Requirements for Use of the Data Encryption Standard with CCITT Group 3 Facsimile Equipment. FIPS PUB 141 000,609

INTERPRETERS
 AMPLE Core Interpreter: User's Guide (Version 1.0). PB91-107250 001,057

INTERSTELLAR MATTER
 Search for Methylen in the Orion Nebula. PB90-170507 000,038

INTERSTITIALS
 Effect of Interstitial Elements on Phase Relationships in the Titanium-Aluminum System. PB90-196528 001,259

KEYWORD INDEX

INVENTIONS

- Energy Related Inventions Program: A Joint Program of the Department of Energy and the National Institute of Standards and Technology Status Report for Recommendations 251 through 486. PB90-221813 000,966
- Energy Related Inventions Program: A Joint Program of the Department of Energy and the National Institute of Standards and Technology Status Report for Recommendations 1 through 250. PB90-225988 000,967
- Evaluation of Solar Energy Inventions. PB91-133918 000,965

INVERSE LAPLACE TRANSFORMS

- Tables of the Inverse Laplace Transform of the Function $e^{\sup} (-s (\sup \beta))$. PB91-107680 001,293

INVESTMENT CASTING

- Multidimensional Internal Setting Expansion of a Phosphate-Bonded Casting Investment Measured with Strain Gauges. PB90-241464 000,067

INVESTMENTS

- U.S. Investment Strategies for Quality Assurance. PB90-231150 001,483
- Review of Economic Methods and Risk Analysis Techniques for Evaluating Building Investments (Part 1). PB90-241589 000,124

IODINE

- Determination of Iodine in Oyster Tissue by Isotope Dilution Laser Resonance Ionization Mass Spectroscopy. PB90-254533 001,433
- Grazing-Angle X-ray Standing Waves. PB91-118349 000,505

ION-ATOM COLLISIONS

- Molecular Dynamics Simulation of Collisional Excitation in Sputtering from Al. PB91-118547 001,788

ION EXCHANGE CHROMATOGRAPHY

- Isotopic Fractionation of Gallium on an Ion Exchange Column. PB90-169459 000,227

ION EXCHANGE MEMBRANE ELECTROLYTES

- Overview of Membrane Research at NIST/CCT. PB90-271594 000,482

ION EXCHANGE RESINS

- Glycine Permeation through Na(1+), Ag(1+) and Cs(1+) - Forms of Perfluorosulfonated Ion Exchange Membranes. PB90-170465 000,369

ION EXCHANGING

- Separation of Amino Acids Using Composite Ion Exchange Membranes. PB91-133975 001,314

ION IMPLANTATION

- Ion Implantation Artifacts Detected by Secondary Ion Mass Spectrometry. PB90-150178 000,213
- Selected-Area Channeling Pattern and Defect Etch Study of Silicon Implanted with Oxygen. PB90-152513 000,867
- Effect of Annealing Conditions on Precipitate and Defect Evolution in Oxygen Implanted SOI Material. PB90-187774 001,574

ION-ION COLLISIONS

- Laser Probing of Ion Collisions in Drift Fields: State Excitation, Velocity Distributions, and Alignment Effects. PB90-271461 001,766

ION MICROPROBE ANALYSIS

- Observations Derived from the Application of Principal Component Analysis to Laser Microprobe Mass Spectrometry. PB90-149352 000,210
- Quantitative Isotope and Elemental Ratio Measurements with a Camera-Based Imaging System on an Ion Microscope. PB90-217902 000,244

ION MICROSCOPES

- Compositional Mapping with a TV Camera-Based Imaging System on an Ion Microscope. PB90-152430 001,382

ION MICROSCOPY

- Atom Probe Field-Ion Microscopy Applications. PB91-118059 000,257

ION MOBILITY

- Chromatographic Separations of Serum Proteins on Immobilized Metal Ion Stationary Phases. PB90-152547 000,217

ION-MOLECULE COLLISIONS

- Collisional Electron Detachment and Decomposition Cross Sections for SF(sub 6)(1-), SF(sub 5)(1-), and F(1-) on SF(sub 6) and Rare Gas Targets. PB90-150251 000,327
- Reaction-Induced Mass Discrimination in XQQ Instruments: Absolute Cross Sections for N2(1+) (SF6,N2)SFx(1+) (x = 1-5). PB90-170325 000,366
- Absolute Cross-Section Measurements in XQQ Instruments: Ar(1+)(N(sub 2),Ar)(N(sub 2))(1+).

- PB90-170333 000,367

- Measurements on Very Low-Energy Ion/Atom-Molecule Collisions. PB90-271305 001,764

ION MOLECULE INTERACTIONS

- Entropy-Driven Ion-Molecule Reactions. PB90-218264 000,437
- Comments on Entropy-Driven Ion-Molecule Reactions by M. Mautner. PB91-101410 000,488

ION PLASMAS

- Liquid and Solid Ion Plasmas. PB90-188608 001,507

ION RECOMBINATION

- Critical Behavior of a Conducting Ionic Solution Near Its Consolute Point. PB90-254731 000,466
- New Recombination Mechanism: Tidal Termolecular Ionic Recombination. PB90-271065 001,761

ION STORAGE

- Progress at NIST (National Institute of Standards and Technology) Towards Absolute Frequency Standards Using Stored Ions. PB90-188616 001,715
- High Accuracy Spectroscopy of Stored Ions. PB90-188624 001,716
- Observation of Shell Structures with Ions Stored in Traps. PB91-133819 001,795
- Coulomb Clusters of Ions in a Paul Trap. PB91-134155 001,800
- Ion Traps for Large Storage Capacity. PB91-134999 001,805

ION TEMPERATURE

- Quantitative Study of Laser Cooling in a Penning Trap. PB91-134163 001,801

ION TRAPS

- Liquid and Solid Ion Plasmas. AD-A212 415/4 001,669
- Laser Cooling. PB90-206764 001,731
- Liquid and Solid Phases of Laser Cooled Ions. PB90-261074 001,757

ION TRAPS (INSTRUMENTATION)

- Ion Traps for Large Storage Capacity. PB91-134999 001,805

IONIZATION

- Cluster Ion Formation under Laser Bombardment - Studies of Recombination Using Isotope Labeling. PB90-170424 000,287
- Laser-Enhanced Ionization Spectroscopy in Flames and Plasmas. PB90-193327 000,411

IONIZATION CHAMBERS

- Calibration and Quality Assurance Program for Environmental Radon Measurements. PB90-255290 001,414

IONIZATION GAGES

- Surface Phenomena and Their Influence on Ultrahigh Vacuum Gauges. PB90-169442 001,003

IONIZING RADIATION

- Report on the 1989 Meeting of the Radioisotope Measurements Section of the Consultative Committee on Standards for the Measurement of Ionizing Radiations: Special Report on Standards for Radioactivity. PB90-163916 000,346
- Measurement Quality Assurance through a National System of Secondary Laboratories. PB90-169780 001,402
- Inactivation of Human Immunodeficiency Virus (HIV) by Ionizing Radiation in Body Fluids and Serological Evidence. PB90-170069 001,343
- Measurement Quality Assurance through a National System of Secondary Laboratories. PB90-187568 001,398
- Assessing Radiation Dose to Food. PB91-101162 001,366

IONS

- Competitive ion kinetics in direct mass spectrometric organic speciation. Progress report. DE90007426 000,311
- Competitive ion kinetics in direct mass spectrometric organic speciation. Final report. DE90012888 000,314
- Structures and Heats of Formation of C(sub 4)H(sub 7)(1+) Ions in the Gas Phase. PB90-169343 000,351
- Reactions of H(sub 2) with He(1+) at Temperatures Below 40 K. PB90-171042 000,377
- Hg(1+) Single Ion Spectroscopy. PB90-187519 000,383

IRON

- Characterization of Epitaxial Fe on GaAs(110) By Scanning Tunneling Microscopy.

- PB90-136433 001,170

- Metallicity and Gap States in Tunneling to Fe Clusters on GaAs(110). PB90-136466 001,526

KEYWORD INDEX

LASERS & THEIR APPLICATIONS

JACOBI MATRIX METHOD

Implementation of a Jacobian-Transpose Algorithm.
PB90-219593 001,101

JET MIXING FLOW

Role of Large Scale Turbulent Structures in the Lift-Off and Blow Out Behaviors of Turbulent Jet Diffusion Flames.
PB90-217878 000,588

JETS

Transient Characteristics of Unconfined Fire-Plume-Driven Ceiling Jets.
PB90-227976 000,138

JOINTS (JUNCTIONS)

Strength and Creep-Rupture Properties of Adhesive-Bonded EPDM Joints Stressed in Peel.
PB90-257676 001,827

Performance of 1/3-Scale Model Precast Concrete Beam-Column Connections Subjected to Cyclic Inelastic Loads.
PB91-107623 000,182

Technique for the Detection of Robot Joint Gear Tightness.
PB91-112086 001,105

JOSEPHSON ARRAYS

Josephson-Voltage Array Development at the NBS (National Bureau of Standards) in Boulder.
PB90-169947 000,899

Improvements for Automating Voltage Calibrations Using a 10-V Josephson Array.
PB91-101592 000,932

JOSEPHSON EFFECT

Superconductivity and the Quantization of Energy.
PB90-205766 001,723

JOSEPHSON JUNCTIONS

10-V Josephson Voltage Standard.
PB90-187691 000,901

Classical Phase Diffusion in Small Hysteretic Josephson Junctions.
PB90-205816 000,859

Fabrication of Ultrasmall Nb-AlO_x-Nb Josephson Tunnel Junctions.
PB91-134361 000,863

KENNEDY-THORNDIKE EXPERIMENT

Improved Kennedy-Thorndike Experiment to Test Special Relativity.
PB90-241522 001,747

KERMA

Correction to 'Calorimetric Measurement of the Carbon Kerma Factor for 14.6-MeV Neutrons' by J. C. McDonald.
PB90-149105 001,685

KEROSENE

Particulate and Droplet Diagnostics in Spray Combustion: Annual Report, April 1989.
DE89015149 000,577

Aerodynamic Effects on Fuel Spray Characteristics: Air-Assist Atomizer.
DE89015819 000,600

KETENES

Multiphoton Ionization Spectra of Radical Products in the F((sup 2)P) + Ketene System: Spectral Assignments and Reaction Dynamics for CH(sub 2)F, Observation of CF and CH.
PB90-153404 000,335

KETONES

Flash Photolysis Resonance Fluorescence Investigation of the Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ketones Over the Temperature Range 240-440 K.
PB90-193475 000,274

KINETIC THEORY

Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics.
PB90-188426 001,579

KINETICS

Ceramic Thermochemistry and Kinetics from Laser-Induced Vaporization Mass Spectrometry.
PB90-153503 001,135

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)

Knowledge-Based Front-End Input Generating Program for Building System Simulation.
PB90-170234 000,714

Framework for Representing and Reasoning about Three-Dimensional Objects for Vision.
PB90-218215 000,774

KRYPTON

Calibration of a Monochromator/Spectrometer System for the Measurement of Photoelectron Angular Distributions and Branching Ratios.
DE86000789 000,307

KRYPTON COMPLEXES

Optothermal-Infrared and Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Rare Gas-CO₂ Complexes.
PB91-118216 000,502

L SHELL

Average L-Shell Fluorescence Yields for Elements 56 < Z < 92.
PB91-112680 001,781

LABELS

Checking the Net Contents of Packaged Goods. Third Edition, Supplement.
PB91-107144 000,200

LABOR FORCE

Workforce of U.S. Manufacturing in the Post-Industrial Era.
PB90-193244 000,004

LABORATORIES

NIST's (National Institute of Standards and Technology) Ultra-Clean Ceramic Processing Laboratory.
PB90-136896 001,127

Measurement Quality Assurance through a National System of Secondary Laboratories.
PB90-187568 001,398

Directory of NVLAP (National Voluntary Laboratory Accreditation Program) Accredited Laboratories, 1990.
PB90-198920 001,012

State Weights and Measures Laboratories: State Standards Program Description and Directory.
PB90-257650 001,079

Materials Research Laboratories: Reviewing the First Twenty-Five Years.
PB91-101568 001,236

NVLAP Program Handbook. Acoustical Testing Services.
PB91-107524 001,024

LABORATORY EQUIPMENT

Laboratory Robotics for Trace Analysis.
PB90-152844 001,319

Basics of Chemical Instrumentation. Volume 1. Separation Methods.
PB90-198458 000,242

Scanning Electron Microscope-Based Metrological Electron Microscope System and New Prototype Scanning Electron Microscope Magnification Standard.
PB90-207069 001,016

LAMBDA METERS

Wavelength Measurement System for Optical Fiber Communications.
PB90-221805 000,619

LANTHANUM CUPRATES

Low-Temperature Elastic Constants of Polycrystalline La(sub 2)CuO(sub 4) and La(sub 1.85)Sr(sub 0.15)CuO(sub 4).
PB90-187824 001,575

LANTHANUM OXIDES

Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Laser-Vaporized Metal Oxides: Rotational Spectra and Electric Dipole Moments of YO, LaO, ZrO, and HfO.
PB91-101600 000,490

LANTHANUM STRONTIUM CUPRATES

Superconductivity in Bulk and Thin Films of La(sub 1.85)Sr(sub 0.15)CuO(sub 4-x) and Ba₂YCu₃O(sub 7-y).
PB90-170440 001,565

Low-Temperature Elastic Constants of Polycrystalline La(sub 2)CuO(sub 4) and La(sub 1.85)Sr(sub 0.15)CuO(sub 4).
PB90-187824 001,575

S-N-S Behavior of Grain Boundaries in Polycrystalline La(sub 1.85)Sr(sub 0.15)CuO(sub 4-y).
PB90-188269 001,577

LAPLACE TRANSFORMATION

Tables of the Inverse Laplace Transform of the Function e^{sup (-s (sup beta))}.
PB91-107680 001,293

LASER BEAMS

Ceramic Thermochemistry and Kinetics from Laser-Induced Vaporization Mass Spectrometry.
PB90-153503 001,135

Cluster Ion Formation under Laser Bombardment - Studies of Recombination Using Isotope Labeling.
PB90-170424 000,287

Scanning System for Measuring Uniformity of Laser Detector Response and Laser Beam Dimensions.
PB90-257619 001,491

LASER COOLING

Laser Cooling.
PB90-206764 001,731

LASER DAMAGE

Laser Induced Damage in Optical Materials: 1988.
PB90-185570 001,225

LASER FREQUENCIES

Far Infrared Lasing Frequencies of CH₂DOD.
PB91-134809 001,505

LASER HEATING

Laser-Induced Vaporization Mass Spectrometry of Refractory Materials: Apparatus and the BN System.
PB90-152836 001,133

LASER INDUCED DESORPTION

Laser-Induced Desorption: State-Resolved Evidence for Carrier Driven Processes.
PB91-112037 000,494

Laser-Excited Hot-Electron Induced Desorption: A Theoretical Model Applied to NO/Pt(111).
PB91-118240 000,503

New Theoretical Aspects in DIET.
PB91-134015 000,512

LASER INTERFEROMETERS

Optical Interferometer in Space.
PB90-271081 000,043

Laser Interferometer for Gravitational Wave Astronomy in Space.
PB91-118596 001,790

LASER MICROPROBE MASS SPECTROSCOPY

Pattern Differences in Laser Microprobe Mass Spectra of Negative Ion Carbon Clusters.
PB90-149360 000,579

Fingerprinting of Chemical Species in Microparticles: Correlative Laser and Electron Microprobe Studies.
PB90-152570 000,218

Effects of Sample Geometry on Inter-element Quantitation in Laser Microprobe Mass Spectrometry.
PB90-152588 000,219

Inorganic Cluster Ion Formation in the Laser Microprobe.
PB90-152729 000,225

LASER RADIATION

Experimental Investigations of the Role of Laser Field Fluctuations in Non-Linear Optical Absorption Processes.
DE86006919 001,465

LASER SPECTROMETERS

Microphone Triggering Circuit for Elimination of Mechanically Induced Frequency-Jitter in Diode Laser Spectrometers: Implications for Quantitative Analysis.
PB90-188327 000,236

LASER SPECTROSCOPY

Cooled Ion Frequency Standard (FY 89).
AD-A212 335/4 001,464

Observations Derived from the Application of Principal Component Analysis to Laser Microprobe Mass Spectrometry.
PB90-149352 000,210

Tunable Dye Laser Spectrometry.
PB90-192576 001,480

Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm⁻¹.
PB90-206897 000,425

LASER STABILITY

Ultra Stable Cavity-Stabilized Lasers with SubHertz Linewidth.
PB90-261108 001,494

LASERS

Search for Optical Molasses in a Vapor Cell: General Analysis and Experimental Attempt.
PB90-163932 001,474

Diode Laser Measurement of the (nu sub 3) Band of (14)CO(sub 2).
PB90-188319 000,393

Laser-Enhanced Ionization Spectroscopy in Flames and Plasmas.
PB90-193327 000,411

LASERS & THEIR APPLICATIONS

Free-Electron Laser Driven by the NBS (National Bureau of Standards) CW Microtron.
AD-A201 170/8 001,462

Reflection Matrix for Optical Resonators in FEL (Free Electron Lasers) Oscillators.
AD-A201 778/8 001,463

High Resolution Inverse Raman Spectroscopy of the CO O Branch.
AD-A205 450/0 000,298

Experimental Investigations of the Role of Laser Field Fluctuations in Non-Linear Optical Absorption Processes.
DE86006919 001,465

Optical Feedback Locking of Semiconductor Lasers.
PATENT-4 907 237 001,467

Method and Apparatus for Producing a Photopumped VUV Laser in MO₆⁺ Ion-Containing Plasma.
PATENT-4 939 744 001,468

Tunable Far Infrared Laser Spectroscopy.
PB90-136458 001,469

Distance Measurements in Space: Gravitational Physics Tests and a Proposed Laser Gravitational Wave Antenna.
PB90-136870 001,681

NIST/NRL (National Institute of Standards and Technology/Naval Research Laboratory) Free-Electron Laser Facility.
PB90-170135 001,475

Laser Induced Damage in Optical Materials: 1988.
PB90-185570 001,225

Tunable Dye Laser Spectrometry.
PB90-192576 001,480

Apollo Retroreflector Arrays Revisited: A Lunar Beacons Array.
PB90-254525 001,811

Ultra Stable Cavity-Stabilized Lasers with SubHertz Linewidth.
PB90-261108 001,494

Laser-Induced Desorption: State-Resolved Evidence for Carrier Driven Processes.
PB91-112037 000,494

Optical Stabilization of Semiconductor Lasers.
PB91-134098 001,504

KEYWORD INDEX

LATTICE PARAMETERS

X-ray Photoelectron and Auger Electron Forward-Scattering Studies of Lattice Expansions and Contractions in Epitaxial Films. PB91-112144 001,647

LAVAS

Pyroxene-Melt Equilibria: An Updated Model. PB90-170408 001,384

LAW ENFORCEMENT

Automated Fingerprint Identification Systems Bench Mark Tests of Relative Performance. PB90-170457 001,834

Mobile Antennas. PB90-218108 000,810

Measurement of Electric Field Strength Near Higher Powered Personal Transceivers. PB91-107268 000,639

LEAD (METAL)

Methods for Measuring Lead Concentrations in Paint Films. PB90-156985 001,172

Screening Procedures for Detecting Lead in Existing Paint Films: A Literature Review. PB90-162082 001,173

Potential Methods for Measuring and Detecting Lead in Existing Paint Films: A Literature Review. PB90-162124 001,174

LEAD PAINT POISONING

Review of Current Research and Activities Involving Characterization, Abatement and Disposal of Lead-Containing Paint Films. PB90-225954 000,984

LEAD STRONTIUM YTTRIUM CUPRATES

Crystal Structure, Atomic Ordering and Charge Localization in $Pb_2Sr_2Y(sub 1-x)Ca_xCu_3O(sub 8 + \delta)$ ($x = 0, \delta = 1, 47$). PB91-112375 001,650

LEADERSHIP

Malcolm Baldrige National Quality Improvement Award. PB90-218082 000,005

LEAKAGE

Estimating Air Leakage through Doors for Smoke Control. PB90-218298 000,095

LENGTH

Laser Length Metrology. PB90-169418 001,697

Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography. PB90-188350 000,237

LETHAL DOSAGE

Reporting Combustion Product Toxicity Test Results. PB91-112300 001,371

LEUCINE

Arginine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein. PB90-153446 001,324

LEUNG-GRIFFITHS MODEL

Modified Leung-Griffiths Model for Vapor-Liquid Equilibria: Application to Polar Fluid Mixtures. PB90-206996 000,429

LEVITATION

Raman Spectroscopy of Single Optically Levitated Droplets. PB90-152695 000,331

LIBRARY OF CONGRESS

Ventilation and Air Quality Investigation of the Madison Building, Phase 1 Report. PB90-155417 000,081

LIFE CYCLE COSTS

Discount Factor Tables for Life-Cycle Cost Analyses. PB90-147968 000,205

Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1990. PB90-219858 000,201

Federal Building Life-Cycle Cost (FBLCC) Program (for Microcomputers). PB90-501198 000,202

NBS (National Bureau of Standards) Life-Cycle Cost (NBSLCC) Program (for Microcomputers). PB90-501206 000,961

Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1991. Annual Supplement to NIST Handbook 135 and NBS Special Publication 709. PB91-113613 000,962

LIFE EXPECTANCY

Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales. PB91-112367 000,992

LIGHT AMPLIFIERS

Recirculating Pulse Erbium-Fiber Ring Amplifier. PB91-118505 001,503

LIGHT SCATTERING

Measurement and Prediction of Raman Q-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8 000,302

Optical Heterodyne Densitometer. N89-13323/5 001,466

Scanning Scattering Microscope with Hemispherical Mirror and Microfocused Beam. PATENT-4 954 722 000,996

Neutron and Light-Scattering Studies of DNA Gyrase and Its Complex with DNA. PB90-206053 001,330

Redistributed Spectrum of Scattered Light. PB91-101402 001,501

LIGHT SOURCES

Color and Lighting. PB90-136482 000,079

Laser Produced Plasma X-ray Ultraviolet (XUV) Radiation Source. PB90-254392 001,485

LIGHTING SYSTEMS

Second-Level Post-Occupancy Evaluation (POE) Analysis. DE89014520 000,078

LIME CEMENTS

Mechanisms of Deterioration in Cement-Based Materials and in Lime Mortar. PB90-271198 001,199

LIMIT DESIGN METHOD

Load Duration and Probability Based Design of Wood Structural Members. PB90-149410 000,169

LINE SPECTRA

Broadening and Shifting of the Raman Q Branch of HD. AD-A209 360/7 000,299

Fundamental Molecular Data to Support CARS (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration. AD-A212 411/3 000,304

LINE WIDTH

Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope). PB90-170960 000,868

X-ray Line Broadening Study on Shock-Modified Hematite. PB90-206145 000,421

LINEAR POLARIZATION

Polarization Effects in Molecular X-Ray Fluorescence. PB90-170259 000,365

LINEAR PROGRAMMING

Optimal 3-Dimensional Methods for Linear Programming. PB90-155391 001,296

LINEAR REGRESSION

Some Thoughts on Variable-Selection in Multiple Regression. PB90-169772 001,300

LINES OF FORCE

Theory of Chemically Induced Kink Formation on Cracks in Silica. 2. Force Law Calculations. PB90-170317 001,141

LIPOSOMES

Behavior of Liposomes in Flow Injection Systems. PB90-241332 000,247

Liposome-Based Flow Injection Enzyme Immunoassay for Theophylline. PB91-101675 001,313

LIQUEFIED GASES

Method and Apparatus for Supercritical Fluid Extraction Solution Separation. PATENT-4 962 275 000,316

LIQUID CHROMATOGRAPHY

Determination of Cyclodextrin Formation Constants Using Dynamic Coupled-Column Liquid Chromatography. PB90-170036 000,228

Catalytic Oxygen-Scrubber for Liquid Chromatography. PB90-170192 000,230

Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques. PB90-170432 000,233

Determination of Column Selectivity Toward Polycyclic Aromatic Hydrocarbons. PB90-188343 000,395

Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography. PB90-188350 000,237

Liquid Chromatography Element-Specific Detection Systems for Analysis of Molecular Species. PB90-241555 000,248

Anomalous Behavior of Selected Methyl-Substituted Polycyclic Aromatic Hydrocarbons in Reversed-Phase Liquid Chromatography. PB91-112730 000,256

Investigations of Selectivity in Reversed-Phase Liquid Chromatography on Chemically Bonded C18 Phases. PB91-135012 000,518

LIQUID COLUMN CHROMATOGRAPHY

Evaluation of Shape Selectivity in Liquid Chromatography. PB90-241688 000,457

PB90-241688 000,457

LIQUID CRYSTALS

Phase Behavior and Gelation of a Rod-Like Polymer in Solution and Implications for Microcellular Foam Morphology. PB90-261132 000,546

X-ray Analysis of a Liquid Crystal Phase Diacetylene Polymerization. PB91-101543 000,552

LIQUID DIELECTRICS

Research for Electric Energy Systems - An Annual Report (1989). PB90-228032 000,945

LIQUID FUELS

Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, November 1986. DE89015147 000,575

Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, March 1988. DE89015148 000,576

LIQUID HELIUM

State Equation of Liquid Helium - 4 from 0.8 to 2.5 K. PB91-133801 001,794

LIQUID HYDROGEN

Onset of Nucleate and Film Boiling Resulting from Transient Heat Transfer to Liquid Hydrogen. PB90-254764 000,467

LIQUID INJECTION

Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques. PB90-170432 000,233

LIQUID-LIQUID INTERFACES

Elastic Effects during Late Stage Phase Transformations. PB91-134841 000,516

LIQUID METAL CYLINDERS

Stability of a Current-Carrying Hollow Liquid-Metal Cylinder. PB90-169467 001,698

LIQUID METALS

Dynamic Technique for Thermophysical Measurements at High Temperatures in a Microgravity Environment. PB90-271255 001,824

Dynamic Technique for Measuring Surface Tension at High Temperatures in a Microgravity Environment. PB90-271578 001,825

Effect of Surface Tension Anisotropy on Cellular Morphologies. PB91-101444 001,262

LIQUID OXYGEN

Vortex Shedding Flowmeters for High Velocity Liquids. PB90-192659 000,601

LIQUID PHASES

Transpiration Mass Spectrometry of Liquid LiF: Vaporization Thermochemistry and Electron Impact Fragmentation. PB90-150137 000,324

Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography. PB90-188350 000,237

Correlation between Gas Phase and Solution Phase Reactivities of Hydroxyl Radicals Towards Saturated Organic Compounds. PB90-193459 000,413

LIQUID-SOLID INTERFACES

Effect of an Electric Field on the Morphological Stability of the Crystal-Melt Interface on a Binary Alloy. PB90-193541 001,256

Interface Instabilities during Laser Melting of Thin Films. PB90-271552 001,635

Elastic Effects during Late Stage Phase Transformations. PB91-134841 000,516

LIQUID-VAPOR EQUILIBRIUM

Modified Leung-Griffiths Model for Vapor-Liquid Equilibria: Application to Polar Fluid Mixtures. PB90-206996 000,429

Vapor-Liquid Equilibrium in Binary Systems of Chlorotrifluoromethane with n-Butane and Isobutane. PB91-101642 000,491

Vapor-Liquid Equilibrium of Carbon Dioxide with Isobutane and n-Butane: Modified Leung-Griffiths Correlation and Data Evaluation. PB91-167460 000,520

LIQUID-VAPOR INTERFACES

Systematics of Wetting at the Vapor-Liquid Interface. PB90-188392 000,397

LIQUID WASTE DISPOSAL

Development of Test Methods to Determine the Compatibility of Liquid Hazardous Materials with Polyethylene Packagings. PB90-235417 000,985

LIQUIDS

Dynamic Thermophysical Measurements in Space. N89-20317/8 001,822

Soft-Tissue-Substitute Liquid.

3P1-3P2 Magnetic-Dipole Transition in the Ground Configuration of Co XX. PB91-112094 001,778
- MACHINE TOOLS**
Implementing Fast Part Probing and Error Compensation on Machine Tools. PB91-112771 001,111
- MACHINING**
RCS Application Example: Tool Changing on a Horizontal Machining Center. PB90-217910 001,047
Development Plan: Step Production Cell. National PDES Testbed Report Series. PB91-107243 000,765
- MAGIC ANGLE SPINNING (FREE INDEX)**
Proton MAS NMR Method for Determining Intimate Mixing in Polymer Blends. PB90-193368 000,535
- MAGNESIUM ALLOYS**
Soft X-Ray Emission Spectra and the Bonding of Aluminum. DE88000591 001,513
- MAGNESIUM OXIDES**
Photon Stimulated Desorption Induced by Core Exciton States in MgO. PB90-169293 000,349
Ion Desorption Induced by Core Exciton States in MgO. PB90-218157 000,436
- MAGNETIC ANISOTROPY**
Development of Magnetic Anisotropies in Ultrathin Epitaxial Films of Fe(001) and Ni(001). PB90-170523 001,566
- MAGNETIC DOMAINS**
Magnetic Microstructure of the (0001) Surface of hcp Cobalt. PB90-150228 001,550
Magnetic Microstructure of Thin Films and Surfaces: Exploiting Spin-Polarized Electrons in the SEM and STM. PB90-188210 000,388
- MAGNETIC FIELDS**
AC Electric and Magnetic Field Measurement Fundamentals. PB91-112441 000,947
Optimal Experimental Design for In vitro Studies with ELF Magnetic Fields. PB91-118414 001,367
Recent Advances in Faraday Effect Sensors. PB91-133934 000,848
- MAGNETIC FILMS**
Development of Magnetic Anisotropies in Ultrathin Epitaxial Films of Fe(001) and Ni(001). PB90-170523 001,566
- MAGNETIC FLUX**
Flux Flow and Flux Dynamics in High-T(Sub c) Superconductors. (Abstract Only). N90-27797/1 001,516
- MAGNETIC MEASUREMENT**
Magnetic Microstructure Imaging Using Scanning Electron Microscopy with Polarization Analysis. PB90-206848 001,015
Polarimetric Magnetic Field Sensors Based on Yttrium Iron Garnet. PB90-218009 000,839
- MAGNETIC ORDERING**
Magnetic Rare Earth Superlattices. PB90-170341 001,564
Magnetic Ordering of Nd in (Nd, Ce)(sub 2)CuO(sub 4). PB90-192311 001,585
Magnetic Order and Spin Fluctuations in Oxide Superconductors. PB90-254772 001,621
Two-Dimensional Magnetic Order of Er in ErBa2Cu3O7. PB90-254780 001,622
Magnetic Properties of Pr in Non-Superconducting PrBa2Cu3O7. PB90-254913 001,624
Magnetic Phase Transitions in Nd2CuO4. PB90-254921 001,625
Two- and Three-Dimensional Magnetic Order of the Rare-Earth Ions in RbBa2Cu4O8. PB90-254970 001,626
Antiferromagnetic Ordering in Superconducting and Oxygen-Deficient Nonsuperconducting RbBa2Cu3O(7-delta) Compounds (R = Nd and Sm). PB90-261413 001,629
- MAGNETIC PERMEABILITY**
Facilities for Improving Evaluations of Electromagnetic Susceptibilities of Weapon Systems and Electronic Equipment. PB90-155862 001,376
- MAGNETIC STORAGE**
Magnetic Microstructure of Thin Films and Surfaces: Exploiting Spin-Polarized Electrons in the SEM and STM. PB90-188210 000,388
- MAGNETIC SUSCEPTIBILITY**
Magnetic Susceptibility of Inconel Alloys 718, 625, and 600 at Cryogenic Temperatures. PB91-134031 001,268
- MAGNETISM**
Surface, Interface, and Thin-Film Magnetism. PB91-112177 001,648
Large Surface Anisotropies in Ultrathin Films of bcc and fcc Fe(001). PB91-112284 001,649
- MAGNETITE**
Small Angle Neutron and X-Ray Scattering from Magnetite Crystals in Magnetotactic Bacteria. PB90-169848 001,342
Small-Angle Neutron Scattering from Bacterial Magnetite. PB90-241571 001,345
- MAGNETIZATION**
Magnetization of Imperfect Superconducting Grains. PB90-152471 001,552
- MAGNETO-OPTICS**
Magneto-Optical Investigation of Impurity and Defect Levels in HgCdTe Alloys. PB90-218090 001,607
- MAGNETOOPTICS**
Donor-Shifted Phonon-Assisted Magneto-Optical Resonances in n-InSb. PB90-170242 001,562
- MAGNETOSOMES**
Small Angle Neutron and X-Ray Scattering from Magnetite Crystals in Magnetotactic Bacteria. PB90-169848 001,342
Small-Angle Neutron Scattering from Bacterial Magnetite. PB90-241571 001,345
- MAGNETOTACTIC BACTERIA**
Small Angle Neutron and X-Ray Scattering from Magnetite Crystals in Magnetotactic Bacteria. PB90-169848 001,342
Small-Angle Neutron Scattering from Bacterial Magnetite. PB90-241571 001,345
- MAINTENANCE MANAGEMENT**
Automated Maintenance Management Program Part 2: The Integration of Databases and Image Processing Results for the Quantitative Assessment of the Exterior Condition of Metal Buildings. PB90-162090 000,108
System Requirements Analysis for the U.S. Army Rock Island Arsenal Tool Management System. PB90-269465 001,380
Measuring Economic Performance. PB90-271511 000,198
- MALCOLM BALDRIGE NATIONAL QUALITY IMPROVEMENT ACT OF 1987**
Malcolm Baldrige National Quality Improvement Award. PB90-218082 000,005
- MAN COMPUTER INTERFACE**
User Interface Component of the Applications Portability Profile. Category: Software Standard. Subcategory: Application Program Interface. FIPS PUB 158 000,742
AMPLE Core Interpreter: User's Guide (Version 1.0).

KEYWORD INDEX

MEASUREMENT SCIENCE & TECHNOLOGY: PHYSICAL STANDARDS

- Some Performance Comparisons for a Fluid Dynamics Code.
PB90-170218 001,456
- Unrestricted Algorithms for Mathematical Functions.
PB90-171059 000,715
- Autonomous Propulsion System Requirements for Placement of an STS (Space Transportation System) External Tank in Low Earth Orbit.
PB90-183302 001,818
- Three Dimensional Modeling of Optical Microlithography for Positive Photoresists.
PB90-187501 000,869
- New 'Filtered Allan Variance' and Its Application to the Identification of Phase and Frequency Noise Sources.
PB90-187675 000,642
- Guidelines for the Infrastructure of Statistical Software.
PB90-187733 001,302
- ODRPACK: Software for Weighted Orthogonal Distance Regression.
PB90-190661 001,285
- Impulse Response Acquisition as an Inverse Heat Conduction Problem.
PB90-190695 001,286
- Fast Fourier Transforms for Direct Solution of Poisson's Equation with Staggered Boundary Conditions.
PB90-192592 001,287
- Precision, Accuracy, and Uncertainty in Quantitative Surface Analyses by Auger-Electron Spectroscopy and X-ray Photoelectron Spectroscopy.
PB90-205840 000,417
- Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals.
PB90-209594 001,601
- Guide to Available Mathematical Software, March 1990.
PB90-216508 001,308
- Modeling of Critical Currents in Granular High-T(sub c) Superconductors.
PB90-218041 001,606
- Stabilization of Taylor-Couette Flow Due to Time-Periodic Outer Cylinder Oscillation.
PB90-219130 001,458
- Expected Complexity of the 3-Dimensional Voronoi Diagram.
PB90-221862 001,288
- Expected Linear 3-Dimensional Voronoi Diagram Algorithm.
PB90-227984 001,289
- Evaluation of the Integral $I(\text{sub } l, l')(k, k') = \text{Integral from } 0 \text{ to infinity } (j \text{ sub } l)(k'r)(j \text{ sub } l')(k'r) \text{ squared dr.}$
PB90-235011 001,290
- Three Dimensional Modeling of Optical Microlithography for Positive Photoresists.
PB90-241233 001,068
- Lower Bound of Confidence Coefficients for a Confidence Interval on Variance Components.
PB90-242231 001,304
- Mean Lifetime Calculations of Quantum Well Structures: A Rigorous Analysis.
PB90-254590 000,841
- History of the Section on Statistics and the Environment.
PB90-254756 000,989
- Mathematical Treatment of the Spherical Stereology.
PB90-257593 001,291
- Applications of the Weibull Method to Statistical Analysis of Strength Parameters of Dental Materials.
PB90-260993 000,071
- Adaptive Integration Over a Triangulated Region.
PB90-269499 001,292
- Estimating Combined Errors Due to Propagation and Ephemeris and Their Effect on Time and Frequency Transfer.
PB90-271016 000,636
- CHAOS: A SUN-Based Program for Analyzing Chaotic Systems.
PB90-271024 000,727
- Exact Moments of the Symmetric Cubic Assignment Test.
PB90-271388 001,305
- Measuring Economic Performance.
PB90-271511 000,198
- Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals.
PB91-101089 001,636
- Quick and Easy Multiple Use Calibration Curve Procedure.
PB91-101121 001,020
- Computing Factors for Exact Two-Sided Tolerance Limits for a Normal Distribution.
PB91-101188 000,729
- Building a PC-Based Knowledge Base for Improving NDE (Nondestructive Evaluation) Reliability.
PB91-101220 001,080
- Minimum Cost Inspection Intervals for a Two-State Process.
PB91-101311 001,081
- Use of Rootfinding ODE (Ordinary Differential Equations) Software for the Solution of a Common Problem in Non-linear Dynamical Systems.
PB91-101345 000,730
- Exact Distribution-Free Tests for Equality of Several Linear Models.
PB91-101626 001,306
- Tables of the Inverse Laplace Transform of the Function $e \text{ sup } (-s \text{ (sup beta)}).$
PB91-107680 001,293
- Statistical Characteristics of New Pin Penetration Test.
PB91-112003 000,567
- Asymptotic Approximation of Integral Manifolds.
PB91-112250 001,294
- Program Generator for Efficient Evaluation of Fourier Series.
PB91-112433 000,731
- Residual Hermite Normal Form Computations.
PB91-118141 000,733
- Space Balls: Or Estimating the Diameter Distribution of Monosize Polystyrene Microspheres.
PB91-118497 001,022
- Causal Green Function in Relativistic Quantum Mechanics.
PB91-134379 001,802
- Software Techniques to Improve Data Reliability in Superconductor and Low-Resistance Measurements.
PB91-144527 000,943
- MATRIX ISOLATION TECHNIQUE**
The Vibrational Spectra of Molecular Ions Isolated in Solid Neon. I. CO₂(+) and CO₂(-).
AD-A212 195/2 000,303
- MATRIX MATERIALS**
Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.
PATENT-4 830 917 001,223
- Determination of Fiber/Matrix Interfacial Properties of Ceramic and Glass Matrix Composites.
PB90-163254 001,136
- Self-Diffusion Measurements of a Probe in Various Bulk Polymers: A Temperature Dependence.
PB90-271677 000,551
- MAXIMUM LIKELIHOOD ESTIMATES**
Orthogonal Distance Regression.
PB90-151747 001,298
- MEASUREMENT**
pH Sensors Based on Iridium Oxide.
NUREG/CR-5484 000,994
- Performance Measurement Instrumentation at NBS (National Bureau of Standards).
PB90-135831 000,645
- Advances in Research on Dynamic Measurements of Thermophysical Properties at High Temperatures.
PB90-135849 000,997
- Report of the National Conference on Weights and Measures (74th).
PB90-146465 000,998
- Measurement of Flame Lengths under Ceilings.
PB90-170531 000,186
- Measurement Quality Assurance through a National System of Secondary Laboratories.
PB90-187568 001,398
- Emerging Technologies in Electronics and Their Measurement Needs. Second Edition.
PB90-188087 000,904
- Characterizing Transient Measurements by Use of the Step Response and the Convolution Integral.
PB90-207010 000,822
- Precision Engineering and Experimental Physics: William A. Rogers, the First Academic Mechanician in the U.S.
PB90-217977 001,017
- Measurement of Large Scale Oil Spill Burns.
PB90-261033 000,975
- MEASUREMENT SCIENCE & TECHNOLOGY CALIBRATION**
Radiation Thermometry at NIST: An Update of Services and Research Activities.
N90-17903/7 000,995
- Reference Standard Block for Use in Nondestructive Test Probe Calibration and Method of Manufacture Thereof.
PATENT-4 963 826 001,070
- National Scales of Spectrometry in the U.S.
PB90-153396 001,472
- NBS (National Bureau of Standards) Ionizing-Radiation Measurement Services.
PB90-170499 001,701
- Ultraviolet and Soft X-ray Measurement Services at NBS (National Bureau of Standards).
PB90-170846 001,476
- International Intercomparison of Regular Transmittance Scales.
PB90-205956 001,481
- Calibration of Road Roughness Measuring Equipment. Volume 1. Experimental Investigation.
PB90-208273 000,572
- Calibration of Road Roughness Measuring Equipment. Volume 2. Calibration Procedures.
PB90-208281 000,573
- Reference Dosimetry and Measurement Quality Assurance.
PB90-254806 001,365
- Calibration of Radon-222 Reference Instrument in Sweden.
PB90-255274 001,412
- Bureau of Mines Method of Calibrating a Primary Radon Measuring Apparatus.
PB90-255282 001,413
- Calibration and Quality Assurance Program for Environmental Radon Measurements.
PB90-255290 001,414
- U.K. National Radiological Protection Board Radon Calibration Procedures.
PB90-255308 001,415
- ENEA Reference Atmosphere Facility for Testing Radon and Daughters Measuring Equipment.
PB90-255316 001,416
- Calibration of Scintillation Cells for Radon-222 Measurements at the U.S. Environmental Protection Agency.
PB90-255324 001,417
- ICARE Radon Calibration Device.
PB90-255332 001,418

Wide-Plate Crack-Arrest Tests Utilizing a Prototypical Pressure Vessel Steel. PB90-170770 001,429
Crystallographic Texture in Rolled Aluminum Plates: Neutron Pole Figure Measurements. PB90-192485 001,253
Wide Plate Crack Arrest Testing: Evolution of Experimental Procedures. PB91-101170 001,666
- METAL SHEETS**
Ultrasonic Methods of Texture Monitoring for Characterization of Formability of Rolled Aluminum Sheet. PB90-135948 001,245
- METALLIC GLASSES**
Quasicrystalline Structures of Transition Metal/Metalloid Glasses. DE86002932 001,242
Photoelastic Characteristics of Fluorozirconate and Transition-Metal Fluoride Glasses. PB90-170119 001,139
- METALLICITY**
Metallicity and Gap States in Tunneling to Fe Clusters on GaAs(110). PB90-136466 001,526
- METALLIFEROUS MINERALS**
Developments in Atomic-Absorption, X-ray Fluorescence, and Plasma-Emission Spectrometry for the Analysis of Metals and Ores. PB90-136961 001,390
- METALLIZED FIBERS**
Mathematical Modeling of the Deposition of Alloys Onto Moving Fibers. PB90-254376 001,180
- METALLIZING**
Report on an Interlaboratory Electromigration Experiment. AD-A169 652/5 000,864
- METALLOTHIONEIN**
Autoregulation of the Yeast Copper Metallothionein Gene Depends on Metal Binding. PB90-206103 001,331
- METALLURGY**
Institute for Materials Science and Engineering: Metallurgy Division, Technical Activities 1989. PB90-161159 001,276
- METALS**
Plate-Like Rigid Inclusions and the Ductile-Brittle Transition. PB90-136656 001,247
Developments in Atomic-Absorption, X-ray Fluorescence, and Plasma-Emission Spectrometry for the Analysis of Metals and Ores. PB90-136961 001,390
Environmentally Induced Cracking. PB90-149485 001,192
Mechanism, Measurement, and Influence of Properties on the Galling of Metals. PB90-160334 001,275
Institute for Materials Science and Engineering: Metallurgy Division, Technical Activities 1989. PB90-161159 001,276
Journal of Research of the National Institute of Standards and Technology. November-December 1989. Volume 94, Number 6. PB90-163874 000,343
Electrodeposition of an Aluminum-Manganese Metallic Glass from Molten Salts. PB90-188509 001,252
Energy Transfers in the Quasielastic Scattering of 70-1250-eV Electrons by Surfaces. PB90-254517 000,464
- X-ray Diffraction Studies of Ni-Cr-Based Amorphous Alloys. PB91-101683 001,263
Morphological Stability during Alloy Solidification. PB91-112060 001,264
Significance of Cell Fluorescence Color of Acridine Orange-Stained 'Thiobacillus ferrooxidans' Under Epifluorescence Microscopy. PB91-135046 001,346
- METAMERISM**
Calculation of Metameric Reflectances. PB90-206087 001,482
- METASTABLE STATE**
Development of Metastable Processing Paths for High Temperature Alloys. AD-A210 550/0 001,240
- METHACRYLATES**
Synthesis and Properties of a Polyfluorinated Prepolymer Multifunctional Urethane Methacrylate. PB90-260910 000,070
- METHANE**
Concentration Measurements of OH- and Equilibrium Analysis in a Laminar Methane-Air Diffusion Flame. PB90-242173 000,590
Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator. PB91-135053 001,450
- METHANOL LASERS**
Far Infrared Lasing Frequencies of CH₂DOD. PB91-134809 001,505
- METHYL SULFOXIDE**
Radiochromic Solutions for Reference Dosimetry. PB90-149303 001,353
- METHYLAMINE**
Group-Theoretical Formalism for the Large-Amplitude Vibration-Rotation Problem in Methylamine-d₁. PB90-271586 000,481
- METHYLBENZ (A)ANTHRACENE**
Identification of Mutagenic Methylbenz(a)anthracene and Methylchrycene Isomers in Natural Samples by Liquid Chromatography and Shpol'skii Spectroscopy. PB90-149212 000,209
- METHYLCHRYSENE**
Identification of Mutagenic Methylbenz(a)anthracene and Methylchrycene Isomers in Natural Samples by Liquid Chromatography and Shpol'skii Spectroscopy. PB90-149212 000,209
- METHYLCYCLOHEXANE**
Universal Adsorption at the Vapor-Liquid Interface Near the Consolute Point. PB90-188400 000,398
- METHYLENE RADICALS**
Search for Methylene in the Orion Nebula. PB90-170507 000,038
Analysis of CH(sub 2) a tilde (sup 1)A(sub 1) (1,0,0) and (0,0,1) Coriolis-Coupled States, a tilde (sup 1)A(sub 1) - X tilde (sup 3)B(sub 1) Spin-Orbit Coupling, and the Equilibrium Structure of CH(sub 2) a tilde (sup 1)A(sub 1) State. PB90-170952 000,375
- METHYLDYNE RADICALS**
Rotational Spectrum of the CH Radical in Its a(4)Sigma- State, Studied by Far-Infrared Laser Magnetic Resonance. PB90-254830 000,468
- METHYLPEROXY RADICALS**
Temperature Dependence of the Rate Constant for the Gas Phase Disproportionation Reaction of CH(sub 3)O(sub 2) Radicals. PB90-169251 000,347
Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase. PB90-169269 000,285
Kinetic Measurements of the Gas Phase HO(sub 2) + CH(sub 3)O(sub 2) Cross-Disproportionation Reaction at 298K. PB90-169277 000,348
- METROLOGICAL ELECTRON MICROSCOPE**
Scanning Electron Microscope-Based Metrological Electron Microscope System and New Prototype Scanning Electron Microscope Magnification Standard. PB90-207069 001,016
- METROLOGY**
National Institute of Standards and Technology Molecular Measuring Machine: A Long-Range Scanning Tunneling Microscope for Dimensional Metrology. PB90-136938 001,684
Thermal Effects of Handling Ball Bars. PB90-147406 000,999
Index to the Reports of the National Conference on Weights and Measure from the First to the Seventy-Third (1905 to 1988). PB90-155334 001,001

- MINIATURIZATION**
Special Test and Evaluation Methods Used for a Nine-Axis Accelerometer. PB90-209578 000,861
- MINING EQUIPMENT**
Hierarchical Real-Time Control Task Decomposition for a Coal Mining Automation Project. PB90-198433 001,391
- MIRRORS**
Multilayer-Coated Mirrors as Power Filters in Synchrotron Radiation Beamlines. PB90-169335 001,696
Peak Reflectivity Measurements of W/C, Mo/Si, and Mo/B₄C Multilayer Mirrors in the 8-190-Angstrom Range Using Both K α Line and Synchrotron Radiation. PB91-118653 001,792
- MIS CAPACITORS**
MIS Capacitor Studies on Silicon Carbide Single Crystals: Final Report for May 8, 1989 to November 8, 1989. PB90-257718 000,875
- MIS (SEMICONDUCTORS)**
Electrical Characterization of Beta Silicon Carbide MIS (Metal-Insulator-Semiconductor) Capacitors with Thermally Grown or Chemical-Vapor Deposited Oxides. PB90-136615 000,866
- MIXERS (ELECTRONICS)**
Accurate Experimental and Theoretical Comparisons between SIS Mixers Showing Weak and Strong Quantum Effects. PB90-170911 000,817
100 GHz SIS Quasiparticle Mixer with 10 dB Coupled Gain. PB91-112599 000,833
- MIXTURES**
Thermophysical Property Measurements in Fluid Mixtures: Final Report, Prepared for the Period Ending October 31, 1987. DE89003281 001,452
Integrated Theoretical and Experimental Study of the Thermophysical Properties of Fluid Mixtures: Summary Report, 1987-1988. DE90001197 001,453
Integrated Theoretical and Experimental Study of the Thermophysical Properties of Fluid Mixtures: Annual Report. DE90001505 001,454
Search for Tricriticality in Binary Mixtures of Near-Critical Propane and Normal Paraffins. PB90-170820 000,372
Experimental Measurement and Prediction of Thermophysical Property Data of Carbon Dioxide Rich Mixtures. PB90-187592 000,384
Proton MAS NMR Method for Determining Intimate Mixing in Polymer Blends. PB90-193368 000,535
Experimental Evaluation of Two Nonazeotropic Refrigerant Mixtures in a Water-to-Water, Breadboard Heat Pump. PB90-235003 001,234
- MOBILE EQUIPMENT**
Mobile Antennas. PB90-218108 000,810
- MODE LOCKED LASERS**
Soliton-Like Compression of Pulses from Erbium-Fiber Lasers. PB90-188384 001,478
- MODELS**
Workloads, Observables, Benchmarks and Instrumentation. PB90-207770 000,649
World Modeling for Sensory Interactive Trajectory Generation. PB90-217712 000,019
Report of the CIB W14 Workshop on Fire Modeling (4th); Conseil International du Batiment (CIB) Commission W14 on Fire. PB90-247420 000,147
Fundamentals of Enclosure Fire 'Zone' Models, 1989. PB90-254855 000,148
- MODELS-SIMULATION**
Overview of the Structural Ceramics Database (Release No. 1)(for Microcomputers). PB90-504218 001,162
- MODEMS**
Station-to-Station. PB90-206855 000,746
- MODULUS OF ELASTICITY**
Aging Effects and the Dependence of Modulus on Concentration in Isotactic Polystyrene/Cis-Decalin Gels. PB90-170283 000,529

- MOISTURE**
 Interfacial Energy States of Moisture-Exposed Cracks in Mica. PB90-188582 001,386
- MOISTURE CONTENT**
 Pore Structure of Concrete and Freezing Vulnerability. PB90-149683 000,570
 Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments. PB90-153487 001,208
- MOLDING TECHNIQUES**
 Opportunities for Innovation: Polymer Composites. PB91-107078 001,187
- MOLECULAR BEAM EPITAXY**
 Laser Probing of III-V Semiconductor Growth on Si(100). PB90-271453 001,634
 State-Resolved Laser Probing of As₂ in a Molecular-Beam Epitaxy Reactor. PB90-271644 000,484
- MOLECULAR COLLISIONS**
 Intramolecular Dynamics in Molecule-Surface Collisions: Excitation, Dissociation, and Selectivity of Reactivity. PB90-149196 000,319
 New Recombination Mechanism: Tidal Termolecular Ionic Recombination. PB90-271065 001,761
- MOLECULAR ENERGY LEVELS**
 Rotational Distributions in the Photodetachment of IHI(1-) and in the I + HI Reaction: The Influence of IHI Transition State Resonances. PB90-206905 000,426
 Nomenclature for Lambda Doublet Levels in Rotating Linear Molecules. PB91-117960 001,784
- MOLECULAR FLOW**
 Non-Newtonian Molecular Dynamics and Thermophysical Properties. PB90-254657 001,461
- MOLECULAR IONS**
 The Vibrational Spectra of Molecular Ions Isolated in Solid Neon. 1. CO₂(+) and CO₂(-). AD-A212 195/2 000,303
 Vibrational Spectra of Molecular Ions Isolated in Solid Neon. 2. O₄(+) and O₄(-). AD-A214 512/6 000,306
 Vibrational Spectra of Molecular Ions Isolated in Solid Neon. III. N₄(+). PB91-112714 000,498
- MOLECULAR MODELS**
 Total Molecular Surface Areas as a Predictor for Reversed-Phase High Performance Liquid Chromatography in Various Organotin Systems. PB90-193301 000,410
- MOLECULAR PHYSICS**
 Technical Activities 1989, Molecular Physics Division. PB90-264086 000,476
- MOLECULAR RELAXATION**
 Substrate Surface Relaxation for Cl and S on Cu(001). PB90-152463 000,328
 Direct Time-Resolved Observations of Vibrational Energy Flow in Weakly Bound Complexes. PB91-101139 000,486
- MOLECULAR ROTATION**
 Measurement and Prediction of Raman O-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8 000,302
 Rotational Distributions in the Photodetachment of IHI(1-) and in the I + HI Reaction: The Influence of IHI Transition State Resonances. PB90-206905 000,426
- MOLECULAR SPECTRA**
 Water Hydrogen Bonding: The Structure of the Water-Carbon Monoxide Complex. PB90-261421 000,475
- MOLECULAR SPECTROSCOPY**
 Heterodyne Frequency Measurements on N(sub 2)O Near 930 cm⁻¹. PB90-136318 000,317
- MOLECULAR STRUCTURE**
 Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, December 1, 1984-November 30, 1985. DE89014113 000,309
 Structures and Heats of Formation of C(sub 4)H(sub 7)(1+) Ions in the Gas Phase. PB90-169343 000,351
 Solid-State (13)C NMR Investigation of Methyltin(IV) Compounds. Correlation of NMR Parameters with Molecular Structure. PB90-170226 000,364
 Torsional-Rotational Spectrum and Structure of the Form-aldehyde Dimer. PB90-187840 000,385
 Neutron and Light-Scattering Studies of DNA Gyrase and Its Complex with DNA. PB90-206053 001,330
- Neutron Scattering Studies of Potassium-Ammonia Layers in Graphite. PB90-206129 000,420
 Structure of Phosphate-Free Ribonuclease A Refined at 1.26 Å. PB90-206715 001,332
 Structure of Insulin: Results of Joint Neutron and X-ray Refinement. PB90-206723 001,311
 Structure of Form III Crystals of Bovine Pancreatic Trypsin Inhibitor. PB90-206731 001,333
 Water Hydrogen Bonding: The Structure of the Water-Carbon Monoxide Complex. PB90-261421 000,475
- MOLECULAR VIBRATION**
 Unimolecular Dynamics Following Vibrational Overtone Excitation of HN₃ v₁ = 5 and v₁ = 6. HN₃(X,v,J,K) Yields HN(X(3)Sigma-v,J,Omega) + N₂(X(1)Sigma + g). AD-A210 001/4 000,300
- MOLECULAR WEIGHT**
 Microcomputer Programs for Size Exclusion Chromatography. PB90-136425 000,318
 Effects of Initial Molecular Weight on Thermal Degradation of Poly(Methyl Methacrylate) 1 - Model 1. PB90-152760 001,270
 Molecular Weight and Concentration Dependences of the Terminal Relaxation Time and Viscosity of Entangled Polymer Solutions. PB90-170796 000,532
 Viscosity and Molecular Weight Distribution of Ultra-High Molecular Weight Polyethylene Using a High Temperature Low Shear Rate Rotational Viscometer. PB90-193426 000,536
- MOLYBDENUM**
 Measurement of the Heat of Fusion of Molybdenum by a Microsecond-Resolution Transient Technique. PB90-271537 000,480
- MOLYBDENUM IONS**
 Fundamental Configurations of Doubly-Ionized Molybdenum (Mo III). PB90-152752 000,332
 Spectrum and Energy Levels of Six-Times-Ionized Molybdenum (Mo VII). PB90-206988 000,428
 Analysis of the Spectrum of Doubly Ionized Molybdenum (Mo III). PB91-167445 001,810
- MONITORS**
 Beam Current Density Monitor for Intense Electron Beams. AD-A137 146/7 001,668
 Survey of Instrumentation for Slush Hydrogen Systems. PB90-187857 000,599
 Monitoring Power Quality. PB90-192329 000,820
- MONOCALCIUM PHOSPHATE MONOHYDRATE**
 Enhanced Root Fluoride Uptake by Monocalcium Phosphate Monohydrate Gels. PB90-171000 001,347
- MONOCHROMATORS**
 Calibration of a Monochromator/Spectrometer System for the Measurement of Photoelectron Angular Distributions and Branching Ratios. DE86000789 000,307
- MONOFILAMENTS**
 Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments. PB90-153487 001,208
- MONOMOLECULAR FILMS**
 Short Range Order in Submonolayer Ni on GaAs(110) by XPS Forward Scattering. PB91-118174 001,656
- MONTMORILLONITE**
 Neutron Scattering Study of Layered Silicates Pillared with Alkylammonium Ions. PB91-112516 000,496
- MORTARS (MATERIAL)**
 Durability of Cement Pastes, Mortars, and Concretes. PB90-242199 000,143
 Mechanisms of Deterioration in Cement-Based Materials and in Lime Mortar. PB90-271198 001,199
- MOSCOW (USSR)**
 Structural Assessment of the New U.S. Embassy Office Building in Moscow. PB90-256769 000,180
- MOSFET**
 Interface Trap Effects on the Hot-Carrier Induced Degradation of MOSFETs (Metal Oxide Semiconductor Field Effect Transistors) during Dynamic Stress. PB90-188525 000,871
 Temperature Induced Rebound in Power MOSFETs. PB90-192675 000,872
 Semiconductor Measurement Technology: Thermal Resistance Measurements. PB90-269564 000,876
- New Method of Extracting the Channel Length from the Gate Current of p-Channel MOSFETs. PB91-101352 000,879
 Turn-Off Failure of Power MOSFET's. PB91-107367 000,882
 Investigation of the Threshold Voltage of MOSFETs with Position- and Potential-Dependent Interface Trap Distributions Using a Fixed-Point Method. PB91-112235 000,885
- MOTION**
 NASREM Implementation of Position Determination from Motion. PB90-219569 001,100
 Motion, Depth, and Image Flow. PB90-254350 001,350
- MOUNTING**
 Thermal Contraction of Fiberglass-Epoxy Sample Mandrels and Its Effect on Critical-Current Measurements. PB90-149113 001,534
- MULTI-PHOTON PROCESSES**
 Experimental Investigations of the Role of Laser Field Fluctuations in Non-Linear Optical Absorption Processes. DE86006919 001,465
 New Electronic Spectrum of the SiH(sub 3) Radical Observed Using Multiphoton Ionization Spectroscopy. PB90-170010 000,359
 Resonance Enhanced Multiphoton Ionization Spectra of the SiCl Radical between 430 and 520 nm. PB90-170028 000,360
 Two Photon Resonance Enhanced Multiphoton Ionization Spectroscopy of Gas Phase O(sub 2) a(sub 1)Delta(sub g) between 305-350 nm. PB90-192279 000,400
 Two Photon Resonance Enhanced Multiphoton Ionization Spectroscopy of the 3p(pi) D (2)II(sub r) (v' = 0,1,2)-X (2)II(sub r) (v' = 0) Bands of the Fluoromethylidyne Radical between 355 and 385 nm. PB90-192287 000,401
- MULTICHARGED IONS**
 Spectra and Energy Levels of Sodiumlike Ions from Y(28+) to Sn(39+). PB90-271610 001,768
- MULTIMETERS**
 Investigating the Use of Multimeters to Measure Quantized Hall Resistance Standards. PB91-101097 000,923
- MULTIPHOTON DISSOCIATION**
 Energetics and Spin- and Lambda-Doublet Selectivity in the Infrared Multiphoton Dissociation DN(X 3 Sigma(-), a 1 Delta) + N₂(X 1 Sigma g (+)): Experiment. AD-A210 250/7 000,301
- MULTIPHOTON IONIZATION**
 Multiphoton Ionization Spectra of Radical Products in the F((sup 2)P) + Ketene System: Spectral Assignments and Reaction Dynamics for CH(sub 2)F. Observation of CF and CH. PB90-153404 000,335
 New Electronic Spectrum of the SiH(sub 3) Radical Observed Using Multiphoton Ionization Spectroscopy. PB90-170010 000,359
 Resonance Enhanced Multiphoton Ionization Spectra of the SiCl Radical between 430 and 520 nm. PB90-170028 000,360
 Progress in Resonance Enhanced Multiphoton Ionization Spectroscopy of Transient Free Radicals. PB90-170481 000,370
- MULTIPLE SCATTERING**
 Role of Multiple Scattering in XPS and Auger Electron Diffraction in Crystals. PB90-150046 001,547
 Analysis of SAS Data Dominated by Multiple Scattering. PB90-241274 001,612
- MULTIPROCESSING**
 State Occupancy Information for Performance Comparisons. PB91-112870 000,771
- MULTIPROCESSORS**
 Performance Measurement Instrumentation at NBS (National Bureau of Standards). PB90-135831 000,645
 GRAMPS (General Real-Time Asynchronous Multi-Processor System) Multiprocessor Operating System. PB90-171257 000,786
 Emulation Through Time Dilation. PB90-228024 000,650
 System Factors in Real-Time Hierarchical Control. PB90-269473 000,738
 Multiprocessor Performance-Measurement Instrumentation. PB91-101485 000,653
 Hybrid Performance Measurement Instrumentation for Loosely-Coupled MIMD Architectures. PB91-112615 000,654

KEYWORD INDEX

MUON-CATALYZED FUSION			
Active Target Production of Muons for Muon Catalyzed Fusion.			
PB90-152810	001,690		
MUONS			
Active Target Production of Muons for Muon Catalyzed Fusion.			
PB90-152810	001,690		
MUTAGENS			
Identification of Mutagenic Methylbenz(a)anthracene and Methylchrysenes Isomers in Natural Samples by Liquid Chromatography and Shpol'skii Spectroscopy.			
PB90-149212	000,209		
MUTATION			
Argine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein.			
PB90-153446	001,324		
MUTATIONS			
Mechanistic and Physiological Consequences of HPr(ser) Phosphorylation on the Activities of the Phosphoenolpyruvate: Sugar Phosphotransferase System in Gram-Positive Bacteria. Studies with Site-Specific Mutants of HPr.			
PB90-192477	001,344		
Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein.			
PB90-183222	001,334		
Overview of Techniques of Analysis of Cell Damage.			
PB91-134775	001,338		
NATIONAL CENTER FOR STANDARDS AND CERTIFICATION INFORMATION			
Information Center Assists Users in Identifying Standards and Provides Technical Assistance.			
PB90-241647	001,038		
NATIONAL GOVERNMENT			
More Effective Federal Computer Systems: The Role of NIST (National Institute of Standards and Technology) and Standards.			
PB90-241654	000,750		
NATIONAL INSTITUTE FOR STANDARDS AND TECHNOLOGY			
Optical Calibration of Accurate Particle Sizing Standards at the U.S. National Bureau of Standards.			
PB90-169368	000,614		
Josephson-Voltage Array Development at the NBS (National Bureau of Standards) in Boulder.			
PB90-169947	000,899		
NIST (National Institute of Standards and Technology) Reactor: Summary of Activities July 1988 through June 1989.

NEUTRON IRRADIATION			
Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.			
PATENT-4 830 917	001,223		
Materials Characterization Using Neutrons.			
PB90-187618	001,226		
Neutron Sensitivity of LiF Chip Gamma Dosimeters at Megarad Doses.			
PB90-190786	001,404		

KEYWORD INDEX

NONDESTRUCTIVE TESTS

NEUTRON SCATTERING

- Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments. PB90-153487 001,208
- Porosity in Spinel Compacts Using Small-Angle Neutron Scattering. PB90-170093 001,138
- Neutron Scattering in Intermetallics. PB90-188236 001,576
- Review of Scattering Corrections for Calibration of Neutron Instruments. PB90-190752 001,403
- Small Angle Neutron Scattering Method for In Situ Studies of the Dense Cores of Biological Cells and Vesicles: Application to Isolated Neurosecretory Vesicles. PB90-206046 001,329
- Neutron and Light-Scattering Studies of DNA Gyrase and Its Complex with DNA. PB90-206053 001,330
- Neutron Scattering Studies of Potassium-Ammonia Layers in Graphite. PB90-206129 000,420
- Analysis of SAS Data Dominated by Multiple Scattering. PB90-241274 001,612

NEUTRON SOURCES

- 2.5 MeV Neutron Source for Fission Cross Section Measurement. DE89004816 001,397

NEUTRON SPECTROMETERS

- Optimized Design of the Chopper Disks and the Neutron Guide in a Disk Chopper Neutron Time-of-Flight Spectrometer. PB90-260977 001,756
- Comments on 'Design Optimization of a Small-Angle Neutron Scattering Spectrometer.' PB91-101469 001,774

NEUTRON SPECTROSCOPY

- Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems. PB90-218314 001,740

NEUTRONS

- Correction to 'Calorimetric Measurement of the Carbon Kerma Factor for 14.6-MeV Neutrons' by J. C. McDonald. PB90-149105 001,685
- Measurement of the Neutron Lifetime by Counting Trapped Protons. PB91-118026 001,785

NICKEL

- Application of a Nd:YAG Laser-Pumped Dye Laser to the Determination of Nickel in River Sediment Using Nonresonance Flame Atomic Fluorescence Spectrometry. PB90-149428 000,988
- Elastic Constants of Three Ni-Cr Dental Alloys at Room Temperature and Elevated Temperatures. PB90-169632 000,059

NICKEL ALLOYS

- Quasicrystalline Structures of Transition Metal/Metalloid Glasses. DE86002932 001,242
- Soft X-Ray Emission Spectra and the Bonding of Aluminum. DE88000591 001,513
- Lubricated Wear Behavior of Composition Modulated Nickel-Copper Coatings. PB90-188301 001,114
- Effect of Aqueous Environments on the Fracture Behavior of Ductile Nickel Aluminide. PB90-206970 001,194
- Passivity and Passivity Breakdown in Nickel Aluminide. PB90-260936 001,198
- X-ray Diffraction Studies of Ni-Cr-Based Amorphous Alloys. PB91-101683 001,263

NICKEL CHROMIUM ALLOYS

- Mesh Monitor Casting of Ni-Cr Alloys: Element Effects. PB90-170853 001,251

NICKEL COATINGS

- Duplex Nickel Step Test Standards. PB91-118406 001,181

NICKEL ISOTOPES

- Absolute Isotopic Abundance Ratios and Atomic Weight of a Reference Sample of Nickel. PB90-163890 000,344
- Absolute Isotopic Composition and Atomic Weight of Terrestrial Nickel. PB90-163908 000,345

NICKEL STEELS

- X-ray Diffraction Studies of Amorphous (Fe(sub 1-x)Ni(sub x))(sub 77)Si(sub 10)B(sub 13) Alloys. PB90-206111 001,214

NICKEL SULFIDES

- Cluster Ion Formation under Laser Bombardment - Studies of Recombination Using Isotope Labeling. PB90-170424 000,287

NIOBIUM 93

- Measurement of the (93)NB(n,n') Fission Spectrum Cross Section. PB90-193590 001,722

- Niobium as a Neutron Dosimeter. PB90-206780 001,408

NIOBIUM STANNIDES

- Thermal Contraction of Fiberglass-Epoxy Sample Mandrels and Its Effect on Critical-Current Measurements. PB90-149113 001,534

- VAMAS (Versailles Project on Advanced Materials and Standards) Interlaboratory Comparisons of Critical Current versus Strain in Nb(sub 3)Sn. PB90-149386 001,540

- Transverse Stress Effect on the Critical Current of Internal Tin and Bronze Process Nb(sub 3)Sn Superconductors. PB90-149394 001,541

- Proposed Study on the Effect of Sampling Bonding Techniques on the Measured Critical Current of Nb3Sn Superconductors. PB90-254608 001,620

NIOBIUM STANNIDES

- Thermal Contraction of Fiberglass-Epoxy Sample Holders Used for Nb3Sn Critical-Current Measurements. PB91-134064 001,660

NIST DIGITAL TIME SERVICE

- NIST (National Institute of Standards and Technology) Digital Time Service. PB90-261256 000,791

NITRIC ACID

- New Gas-Phase Nitric Acid Calibration System. PB90-170366 000,232

- Steady State Coupled Transport of Nitric Acid through a Hollow Fiber Supported Liquid Membrane. PB90-217837 000,281

NITRIC OXIDE

- Vibrational Predissociation Dynamics of the Nitric Oxide Dimer. PB90-170176 000,363

NITRO COMPOUNDS

- Determination of Nitro-PAH (Polycyclic Aromatic Hydrocarbons) in Air and Diesel Particulate Matter Using Liquid Chromatography with Electrochemical and Fluorescence Detection. PB90-170200 000,231

- Mass Spectral Identification of 2-Amino-4-(5-Nitro-2-Furyl)thiazole Metabolites. PB90-170309 001,310

NITROGEN

- Reactions between Silicon and Nitrogen. Part 2. Microstructure. PB90-152638 000,269

- Influence of Iron on the Reaction between Silicon and Nitrogen. PB90-152661 000,330

- Reduction of Uncertainties for Absolute Piston Gage Pressure Measurements in the Atmospheric Pressure Range. PB90-163882 000,054

- Absolute Cross-Section Measurements in XQQ Instruments: Ar(1+)(N(sub 2),Ar)N(sub 2)(1+). PB90-170333 000,367

- Isochoric (p,Vm,T) Measurements on CO2 and on (0.982 CO2 + 0.018 N2) from 250 to 330 K at Pressures to 35 MPa. PB90-271313 000,479

- Precision and Accuracy of Mass Flow Measurement in the NIST-Boulder Nitrogen Flow Facility. PB91-112417 000,255

- Nitrogen Valence Electronic Structure in the Strong Chemisorption Limit: Molecular Adsorption on Cr(110) and O/Cr(110). PB91-118554 000,508

- Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator. PB91-135053 001,450

NITROGEN ATOMS

- Atomic Transition-Probability Measurements for Prominent Spectral Lines of Neutral Nitrogen. PB90-150269 001,688

NITROGEN DIOXIDE

- Spin Splittings in the (nu sub 3) Band of NO(sub 2). PB90-188335 000,394

- Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents. PB91-112201 000,254

NITROGEN FLUORIDES

- Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, 1 December 1987-30 November 1988. DE89003342 000,308

- Observation of the NF(2+) Dication in the Electron Impact Ionization Mass Spectrum of NF(sub 3). PB90-206939 000,427

NITROGEN IONS

- Reaction-Induced Mass Discrimination in XQQ Instruments: Absolute Cross Sections for N2(1+) (SF6,N2)SFx(1+) (x=1-5). PB90-170325 000,366

- Vibrational Spectra of Molecular Ions Isolated in Solid Neon. III. N4(+). PB91-112714 000,498

NITROGEN OXIDE (N2O)

- Heterodyne Frequency Measurements on N(sub 2)O Near 930 cm(-1). PB90-136318 000,317

NITROGEN OXIDE (NO)

- State-Resolved Evidence for Hot Carrier Driven Surface Reactions: Laser Induced Desorption of NO from Pt(111). PB90-150160 000,326

- Translational and Internal State Distributions of NO Produced in the 193 nm Explosive Vaporization of Cryogenic NO Films: Rotationally Cold, Translationally Fast NO Molecules. PB90-171117 000,380

- Resonance Structure in the Vibrationally Resolved Photoelectron Branching Ratios and Angular Distributions of the zpi(-1) Channel of NO. PB90-192709 000,408

- Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents. PB91-112201 000,254

- Laser-Excited Hot-Electron Induced Desorption: A Theoretical Model Applied to NO/Pt(111). PB91-118240 000,503

NITROUS OXIDES

- Current Status of Frequency Calibration Tables (0 to 3000 cm(-1)) for Tunable Diode Lasers from Heterodyne Frequency Measurements. PB90-188590 001,479

NOISE (ELECTRICAL AND ELECTROMAGNETIC)

- New 'Filtered Allan Variance' and Its Application to the Identification of Phase and Frequency Noise Sources. PB90-187675 000,642

- Biases and Variances of Several FFT (Fast Fourier Transform) Spectral Estimators as a Function of Noise Type and Number of Samples. PB90-188566 000,643

NOISE MEASUREMENT

- Method and Apparatus for Wide Band Phase Modulation. PATENT-4 968 908 000,813

NON-NEWTONIAN FLUIDS

- Non-Newtonian Molecular Dynamics and Thermophysical Properties. PB90-254657 001,461

NONDESTRUCTIVE TESTS

- High Temperature Ultrasonic Testing of Materials for Internal Flaws. PATENT-4 898 034 001,274

- Reference Standard Block for Use in Nondestructive Test Probe Calibration and Method of Manufacture Thereof. PATENT-4 963 826 001,070

- Screening Procedures for Detecting Lead in Existing Paint Films: A Literature Review. PB90-162082 001,173

- Potential Methods for Measuring and Detecting Lead in Existing Paint Films: A Literature Review. PB90-162124 001,174

- Ultrasonic Method for Measuring Internal Temperature Distributions in Steel or Aluminum. PB90-170671 001,211

- Characterization of Eddy Current Probes: Results of an Interlaboratory Intercomparison. PB90-187550 001,377

- Applications of Capacitive Array Sensors to Nondestructive Evaluation. PB90-192642 001,075

- Interfaces: The Next NDE Challenge. PB90-193392 001,254

- Microscopic Origins of Acoustic Emission. PB90-193418 001,445

- Research on Inverse Problems in Materials Science and Engineering. PB90-217886 001,023

- Using the Computer to Analyze Coating Defects. PB90-241266 001,179

- Pulsed Ultrasonic Velocity Method for Determining Material Dynamic Elastic Moduli. PB90-241290 001,235

- Standard Reference Materials for Eddy Current Nondestructive Evaluation: Research Material 8458. PB90-241472 001,077

- EMAT (Electromagnetic-Acoustic Transducers) Examination for Cracks in Railroad Wheel Treads. PB90-271636 001,830

- Flaw Detection in Concrete by Frequency Spectrum Analysis of Impact-Echo Waveforms. PB91-101113 000,566

- Building a PC-Based Knowledge Base for Improving NDE (Nondestructive Evaluation) Reliability. PB91-101220 001,080

- NVLAP Program Handbook. Acoustical Testing Services. PB91-107524 001,024

KEYWORD INDEX

- Detecting Delaminations in Concrete Slabs with and without Overlays Using the Impact-Echo Method.
PB91-112656 *000,568*
- NONLINEAR DIFFERENTIAL EQUATIONS**
Asymptotic Approximation of Integral Manifolds.
PB91-112250 *001,294*
- NOVAE**
Nova Outburst Modeling and Its Application to the Recurrent Nova Phenomenon.
DE86008715 *000,025*
- NOVAL**
Theoretical and Observational Review of Results on Nova Explosions Occurring on ONeMg White Dwarfs.
DE87001962 *000,026*
- NLSL**
Multilayer-Coated Mirrors as Power Filters in Synchrotron Radiation Beamlines.
PB90-169335 *001,696*
- NUCLEAR CROSS SECTIONS**
Iron and Cadmium Capture Gamma Ray Photofission Measurements.
PB90-206772 *001,432*
- NUCLEAR EXPLOSION EFFECTS**
Fire Induced Flow Field - Theory and Experiment.
PB90-241241 *001,381*
- NUCLEAR FUEL CLADDINGS**
Corrosion of Zircaloy Spent Fuel Cladding in a Repository.
PB90-207291 *001,427*
- NUCLEAR ISOMERS**
Identification of Mutagenic Methylbenz(a)anthracene and Methylchrysene Isomers in Natural Samples by Liquid Chromatography and Shpol'skii Spectroscopy.
PB90-149212 *000,209*
- NUCLEAR MAGNETIC RESONANCE**
Two-Dimensional POMME J (CH)-Resolved ¹³C NMR Spectrum Editing Application to Peptide and Carbohydrate Derivatives.
PB90-136516 *000,207*
Solid-State ¹³C NMR Investigation of Methyltin(IV) Compounds. Correlation of NMR Parameters with Molecular Structure.
PB90-170226 *000,364*
Proton MAS NMR Method for Determining Intimate Mixing in Polymer Blends.
PB90-193368 *000,535*
Nuclear Magnetic Resonance.
PB90-241258 *001,611*
- NUCLEAR PHYSICS & RADIATION TECHNOLOGY**
Soft X-Ray Emission Spectra and the Bonding of Aluminum.
DE88000591 *001,513*
Soft X-Ray Absorption and Emission Spectra and the Electronic Structure of the Ba sub 2 YCu sub 3 O/sub 7-x/ Superconductor.
DE88002609 *001,514*
Monte Carlo Calculated Response of the Dual Thin Scintillation Detector in the Sum Coincidence Mode.
DE89004814 *001,401*
Development of a sup 3 He/Xe Gas Scintillation Counter to Measure the sup 3 He(n,p)T Cross Section in the Intermediate Energy Range.
DE89004815 *001,670*
2.5 MeV Neutron Source for Fission Cross Section Measurement.
DE89004816 *001,397*
Measurements of the sup 235 U(n,f) Standard Cross Section at the National Bureau of Standards.
DE89004817 *001,671*
Measurement of the Sup 235 U(n,f) Reaction from Thermal to 1 KeV.
DE89004819 *001,672*
Performance of the High Power RF System for the NIST (National Institute of Standards and Technology) - Los Alamos Racetrack Microtron.
DE89016082 *001,673*
NIST (National Institute of Standards and Technology) - Los Alamos Racetrack Microtron Status.
DE89016083 *001,674*
Analytical Use and Applications of the Nuclear Track Technique.
PB90-135823 *000,206*
ETRAN-Experimental Benchmarks.
PB90-136888 *001,682*
Soft-Tissue-Substitute Liquid.
PB90-149097 *001,352*
Correction to 'Calorimetric Measurement of the Carbon Kerma Factor for 14.6-MeV Neutrons' by J. C. McDonald.
PB90-149105 *001,685*
Radiochromic Solutions for Reference Dosimetry.
PB90-149303 *001,353*
Post-Irradiation Dosimetry of Meat by Electron Spin Resonance Spectroscopy of Bones.
PB90-149493 *001,354*
ETRAN: Experimental Benchmarks.
PB90-150103 *001,687*
Performance of a 'Conventional' Monte Carlo Program at Low-Beam Energy.
- PB90-152448 *000,216*
Fundamental Configurations of Doubly-Ionized Molybdenum (Mo III).
PB90-152752 *000,332*
Active Target Production of Muons for Muon Catalyzed Fusion.
PB90-152810 *001,690*
Calculation of Depth Distributions of X-ray Generation by the Monte Carlo Technique.
PB90-152877 *000,226*
Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments.
PB90-153487 *001,208*
Report on the 1989 Meeting of the Radionuclide Measurements Section of the Consultative Committee on Standards for the Measurement of Ionizing Radiations: Special Report on Standards for Radioactivity.
PB90-163916 *000,346*
Prompt Gamma as a Fluence Rate Monitor in Neutron Beam Experiments.
PB90-169244 *001,695*
Multilayer-Coated Mirrors as Power Filters in Synchrotron Radiation Beamlines.
PB90-169335 *001,696*
Radiation Standards and Calibrations: Documentation Available from NBS (National Bureau of Standards).
PB90-169806 *001,025*
Examination of Gamma-Irradiated Fruits and Vegetables by Electron Spin Resonance Spectroscopy.
PB90-169814 *000,020*
X-ray Attenuation Properties of Radiographic Contrast Media.

KEYWORD INDEX

- ORDINARY DIFFERENTIAL EQUATIONS**
Use of Rootfinding ODE (Ordinary Differential Equations) Software for the Solution of a Common Problem in Non-linear Dynamical Systems.
PB91-101345 000,730
- ORGANIC COMPOUNDS**
Competitive ion kinetics in direct mass spectrometric organic speciation. Progress report.
DE90007426 000,311
Correlation between Gas Phase and Solution Phase Reactivities of Hydroxyl Radicals Towards Saturated Organic Compounds.
PB90-193459 000,413
NBS/EPA Data Base of Evaluated Electron Ionization Mass Spectra.
PB90-254426 000,249
- ORGANOMETALLIC COMPOUNDS**
New Applications of Tetracyanoethylene in Organometallic Chemistry.
PB90-149311 000,267
- ORGANOTIN COMPOUNDS**
Solid-State (¹³C NMR Investigation of Methyltin(IV) Compounds. Correlation of NMR Parameters with Molecular Structure.
PB90-170226 000,364
Correlation of Molecular Total Surface Area with Organotin Toxicity for Biological and Physicochemical Applications.
PB91-118190 001,372
Determination of Tributyltin in Estuarine Water Using Bonded C-18 Silica Solid Phase Extraction, Hydride Derivatization and GC-FPD.
PB91-134387 000,261
Determination of Dibutyltin and Tributyltin in Sediment and Microbial Biofilms Using Acidified Methanol Extraction, Sodium-Borohydride Derivatization and Gas Chromatography with Flame Photometric Detection.
PB91-134395 000,262
- ORIENTATION**
Orientation Distribution of Fiber-Axes and Neutron Powder Diffraction Profiles.
PB90-135914 001,523
- ORIENTED FIBER COMPOSITES**
Finite Element Model of Stress Wave Topology in Unidirectional Graphite/Epoxy. Wave Velocities and Flux Deviations.
PB90-136623 001,529
- ORIFICE FLOW**
Measurements of Coefficients of Discharge for Concentric Flange-Tapped Square-Edged Orifice Meters in Natural Gas Over the Reynolds Number Range 25,000 to 16,000,000.
PB90-219601 000,953
- ORIFICE METERS**
Measurements of Coefficients of Discharge for Concentric Flange-Tapped Square-Edged Orifice Meters in Natural Gas Over the Reynolds Number Range 25,000 to 16,000,000.
PB90-219601 000,953
- ORION NEBULA**
Search for Methylene in the Orion Nebula.
PB91-170507 000,038
- ORTHORHOMBIC LATTICES**
Neutron Powder Diffraction Study of Orthorhombic Ba(sub 2)YCu(sub 3)O(sub 6.5).
PB90-170267 001,140
- OSCILLATORS**
Characterization of Clocks and Oscillators.
PB91-100909 000,637
- OSCILLOSCOPES**
Electrical Performance Tests for Storage Oscilloscopes.
PB90-155367 000,815
- OSI**
Coming to OSI: Network Resource Management and Global Reachability.
PB90-193434 000,648
- OSI (OPEN SYSTEMS INTERCONNECTION)**
Working Implementation Agreements for Open Systems Interconnection Protocols, March 1990.
PB91-120113 000,769
- OSTEOPOROSIS**
Use of Bone Mineral Ratio for Early Diagnosis of Osteoporosis.
PB90-271669 001,323
- OVERVOLTAGE**
Glimpse at Long-Term Effects of Momentary Overvoltages on Zinc Oxide Varistors.
PB90-192337 000,821
- OXIDANTS**
Reduction Potentials of One-Electron Couples Involving Free Radicals in Aqueous Solution.
PB90-161274 000,342
- OXIDATION**
Interfacial Electron Transfer Reactions between Platinum Colloids and Reducing Radicals in Aqueous Solution.
PB90-153453 000,283
Redox Reactions with Colloidal Metal Oxides: Comparison of Radiation-Generated and Chemically Generated Ruthenium Dioxide Dihydrate and Colloids.
PB90-153461 000,338
- TERNARY REACTIONS AMONG POLYMER SUBSTRATE-ORGANOHALOGEN-ANTIMONY OXIDES UNDER PYROLYTIC, OXIDATIVE AND FLAMING CONDITION.**
PB90-154766 000,527
- ENTHALPIES OF COMBUSTION OF TRIPHENYLPHOSPHINE AND TRIPHENYLPHOSPHINE OXIDE.**
PB90-169608 000,581
- CHEMILUMINESCENCE INSTRUMENTATION FOR FUEL AND LUBRICANT OXIDATION STUDIES.**
PB90-192428 000,403
- FUNDAMENTAL PROCESSES OF SF(sub 6) DECOMPOSITION AND OXIDATION IN GLOW AND CORONA DISCHARGES.**
PB90-193343 000,906
- PROCESSES LEADING TO SF6 DECOMPOSITION IN GLOW-TYPE CORONA DISCHARGES.**
PB90-261371 000,473
- OXIDATION TESTS**
Rate Constants for One-Electron Oxidation by the CF(sub 3)O(sub 2)·, CCl(sub 3)O(sub 2)·, and CBr(sub 3)O(sub 2)· Radicals in Aqueous Solutions.
PB90-152737 000,270
- OXIDE LAYERS**
X-ray Photoelectron Spectroscopy/Ar(1+) Ion Profile Study of Thin Oxide Layers on InP.
PB91-118604 001,657
- OXIDE MINERALS**
Experimental and Model Determinations of Coal Mineral and Slag Phase Equilibria.
PB90-153495 000,951
- OXYGEN**
Vibrational Spectra of Molecular Ions Isolated in Solid Neon. 2. O4(+) and O4(-).
AD-A214 512/6 000,306
Surface Conductivity Changes in SnO(sub 2)(110): Effects of Oxygen.
PB90-149436 000,322
Artifacts Observed in Oxygen Profiles of SIMOX Samples by Secondary Ion Mass Spectrometry.
PB90-149477 000,211
Selected-Area Channeling Pattern and Defect Etch Study of Silicon Implanted with Oxygen.
PB90-152513 000,867
Evaluation of Instrumental Correction Factors for Infrared Absorption Concentration Measurements.
PB90-170044 000,229
Effect of Annealing Conditions on Precipitate and Defect Evolution in Oxygen Implanted SOI Material.
PB90-187774 001,574
Two Photon Resonance Enhanced Multiphoton Ionization Spectroscopy of Gas Phase O(sub 2) a(sub 1)Delta(sub g) between 305-350 nm.
PB90-192279 000,400
Measurement of Vanadium Impurity in Oxygen-Implanted Silicon by Isotope Dilution and Resonance Ionization Mass Spectrometry.
PB90-192345 000,240
Stimulated Raman Scattering and Coherent Anti-Stokes Raman Spectroscopy in High-Pressure Oxygen.
PB90-254749 001,488
- OXYGEN ATOMS**
Radical Concentration Measurements in Hydrocarbon Diffusion Flames.
PB90-254939 000,470
- OXYGEN DEPLETION**
Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study II.
PB90-190687 001,581
Oxygen Concentration of Eu(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7-x) in Vacuum: An Atom Probe Study.
PB90-190760 001,582
- OXYGEN IONS**
Photon Stimulated Desorption Induced by Core Exciton States in MgO.
PB90-169293 000,349
Dynamics of O(1+) Desorption from TiO(sub 2).
PB90-218330 000,441
- OYSTERS**
Determination of Iodine in Oyster Tissue by Isotope Dilution Laser Resonance Ionization Mass Spectroscopy.
PB90-254533 001,433
- OZONE**
Stopped-Flow Studies of the Mechanisms of Ozone-Alkene Reactions in the Gas Phase: Trans-2-butene.
PB90-169681 000,355
Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents.
PB91-112201 000,254
- PACKAGING**
Evaluation and Compilation of DOE (Department of Energy) Waste Package Test Data. Biannual Report: February 1988-July 1988.
NUREG/CR-4735-V5 001,426
Checking the Net Contents of Packaged Goods. Third Edition, Supplement.
PB91-107144 000,200
Effect of Oxygen Transport and Resistivity of the Environment on the Corrosion of Steel.
PB91-107292 001,200
- PACKAGING MATERIALS**
Development of Test Methods to Determine the Compatibility of Liquid Hazardous Materials with Polyethylene Packagings.
PB90-235417 000,985
- PAINTS**
Methods for Measuring Lead Concentrations in Paint Films.
PB90-156985 001,172
Screening Procedures for Detecting Lead in Existing Paint Films: A Literature Review.
PB90-162082 001,173
Potential Methods for Measuring and Detecting Lead in Existing Paint Films: A Literature Review.
PB90-162124 001,174
Quality Assurance Tests for Adhesion of Paint on Tactical Rigid Wall Shelters.
PB90-219825 001,177
Review of Current Research and Activities Involving Characterization, Abatement and Disposal of Lead-Containing Paint Films.
PB90-225954 000,984
- PALLADIUM**
Review of Model Sensor Studies on Pd/SnO2(110) Surfaces.
N90-24604/2 000,315
- PANCREAS**
Structure of Form III Crystals of Bovine Pancreatic Trypsin Inhibitor.
PB90-206731 001,333
- PANCREATIC RIBONUCLEASE**
Biological Thermodynamic Data for the Calibration of Differential Scanning Calorimeters: Heat Capacity Data on the Unfolding Transition of Ribonuclease A in Solution.
PB90-192600 000,405
- PARAMETER IDENTIFICATION**
Computational Examination of Orthogonal Distance Regression.
PB90-150129 001,297
Time-Domain Testing Strategies and Fault Diagnosis for Analog Systems.
PB90-190729 000,819
- PARTICLE SIZE**
SEM (Scanning Electron Microscope) Imaging and Analysis of Submicrometer Particles in Air and Water Samples.
PB90-150194 000,215
Optical Calibration of Accurate Particle Sizing Standards at the U.S. National Bureau of Standards.
PB90-169368 000,614
- PARTICLE SIZE DISTRIBUTION**
Silica Particle Synthesis in a Counterflow Diffusion Flame Reactor.
PB90-193608 000,585
- PASSIVE OPTICAL NETWORKS**
Architectures for Future Multigigabit Lightwave Networks.
PB90-198953 000,615
- PAT-CL-585/834**
Method and Apparatus for Supercritical Fluid Extraction Solution Separation.
PATENT-4 962 275 000,316
- PATTERN RECOGNITION DEVICES**
Spatial Light Modulator for Texture Classification.
PB91-101279 000,777
- PATTERSON METHOD**
Patterson Fourier Analysis of the Icosahedral (Al,Si)-Mn Alloy.
PB90-135799 001,243
- PAULI PRINCIPLE**
Proposed Test of the Symmetrization Postulate and Exclusion Principle.
PB91-112243 001,779
- PAVEMENT SURFACE TEXTURE**
Calibration of Road Roughness Measuring Equipment. Volume 1. Experimental Investigation.
PB90-208273 000,572
Calibration of Road Roughness Measuring Equipment. Volume 2. Calibration Procedures.
PB90-208281 000,573
- PDES (PRODUCT DATA EXCHANGE SPECIFICATION)**
NIST Working Form for STEP: National PDES Testbed.
PB90-250044 001,051
QDES User's Guide. National PDES Testbed Report Series.
PB90-250085 000,751
NIST PDES Toolkit: Technical Fundamentals. National PDES Testbed Report Series.
PB90-250093 001,052
Status of PDES-Related Activities (Standards and Testing). National PDES Testbed Report Series.
PB91-112888 000,767
- PENETRATION RESISTANCE**
Energy Transfer Mechanism in SPT (Standard Penetration Test).
PB90-170184 000,574

KEYWORD INDEX

PHOTOELECTRON SPECTROSCOPY

- PENNING TRAPS**
Cooled Ion Frequency Standard (FY 89). AD-A212 335/4 001,464
- PEPTIDES**
Two-Dimensional POMMIE J (CH)-Resolved ¹³C NMR Spectrum Editing Application to Peptide and Carbohydrate Derivatives. PB90-136516 000,207
Models for Strong Interactions in Proteins and Enzymes. 1. Enhanced Acidities of Principal Biological Hydrogen Donors. PB91-134429 001,315
- PERFLUOROMETHYLCYCLOHEXANE**
Universal Adsorption at the Vapor-Liquid Interface Near the Consolute Point. PB90-188400 000,398
- PERFORMANCE EVALUATION**
Performance Measurement Instrumentation at NBS (National Bureau of Standards). PB90-135831 000,645
Testing. PB90-187790 001,094
- PERFORMANCE TESTS**
Electrical Performance Tests for Storage Oscilloscopes. PB90-155367 000,815
Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating. PB90-185117 000,089
Performance Testing for the Corrosivity of Smoke. PB90-261355 000,592
- PERIODICALS**
NIST (National Institute of Standards and Technology) Serial Holdings 1990. PB90-183245 001,040
- PERMEABILITY**
Glycine Permeation through Na(1+), Ag(1+) and Cs(1+) - Forms of Perfluorosulfonated Ion Exchange Membranes. PB90-170465 000,369
Permeability, Diffusivity, and Microstructural Parameters: A Critical Review. PB90-271339 000,565
- PEROXY ORGANIC COMPOUNDS**
Rate Constants for One-Electron Oxidation by the CF(sub 3)O(sub 2)-, CCl(sub 3)O(sub 2)-, and CBr(sub 3)O(sub 2)- Radicals in Aqueous Solutions. PB90-152737 000,270
- PERSONNEL**
Workforce of U.S. Manufacturing in the Post-Industrial Era. PB90-193244 000,004
- PERSONNEL DOSIMETRY**
Difficulties Encountered with Some Intermediate-Atomic Number Radiation Protection Dosimeters Irradiated on-Phantom in Low-Energy Photon Beams. PB90-192691 001,357
Radiation Energy-Angle Algorithm for Use in Personnel Dosimetry. PB90-203126 001,358
Evaluation of NVLAP (National Voluntary Laboratory Accreditation Program) Personnel Dosimetry Testing Laboratory: X-rays. PB90-207762 001,360
- PESTICIDE RESIDUES**
Di- and Tributyltin Species in Marine and Estuarine Waters. Inter-laboratory Comparison of Two Ultratrace Analytical Methods Employing Hydride Generation and Atomic Absorption or Flame Photometric Detection. PB90-170713 000,982
- PETROLEUM PIPELINES**
Assessment of the Performance and Reliability of Older ERW (Electric Resistance Welding) Pipelines. PB90-148776 001,828
- PH**
pH Sensors Based on Iridium Oxide. NUREG/CR-5484 000,994
- PH METERS**
pH Theory and Measurement. PB90-150038 000,323
- PHAGE LAMBDA**
Deletion Analysis of the DNA Sequence Required for the In vitro Initiation of Replication of Bacteriophage. PB90-169939 001,325
- PHARMACOKINETICS**
Enhanced Root Fluoride Uptake by Monocalcium Phosphate Monohydrate Gels. PB90-171000 001,347
Assessment of Loosely-Bound and Firmly-Bound Fluoride Uptake by Tooth Enamel from Topically Applied Fluoride Treatments. PB90-254905 001,349
- PHASE DIAGRAMS**
Thermoreversible Gelation of Isotactic Polystyrene: Thermodynamics and Phase Diagrams. PB90-149162 000,524
Phase Diagrams for Ceramists Volume 6. PB90-192550 001,144
- Effect of Interstitial Elements on Phase Relationships in the Titanium-Aluminum System. PB90-196528 001,259
Pressure Synthesis of p-Nitroaniline Condensation Products. PB90-271149 000,478
Vapor-Liquid Equilibrium in Binary Systems of Chlorotrifluoromethane with n-Butane and Isobutane. PB91-101642 000,491
Creating a Materials Data Base Builder and Producing Publications for Ceramic Phase Diagrams. PB91-112557 001,165
Coherent Phase Diagrams. PB91-118356 001,267
- PHASE MODULATION**
Method and Apparatus for Wide Band Phase Modulation. PATENT-4 968 908 000,813
- PHASE NOISE**
Method and Apparatus for Wide Band Phase Modulation. PATENT-4 968 908 000,813
- PHASE SEPARATION KINETICS**
Phase-Separation Kinetics of Mixtures of Linear and Star-Shaped Polymers. PB91-118208 000,556
- PHASE TRANSFORMATIONS**
Theory of Phase Transitions at Internal Interfaces. PB90-188277 001,578
Phase Improvement in the Structure Interpretation of Fragment TR2C from Bull Testis Calmodulin Using Combined Entropy Maximization and Solvent Flattening. PB91-101576 001,641
Shear Induced Phase Behavior of Polymer Blends by Small Angle Neutron Scattering. PB91-112490 000,554
- PHASE VELOCITY**
Phase Velocity and Attenuation of Plane Elastic Waves in a Particle-Reinforced Composite Medium. PB90-170143 001,183
Point Source/Point Receiver Ultrasonic Wave Speed Measurement. PB90-217985 001,446
- PHENANTHRENE COMPOUNDS**
Hydrogen Transfer from 9,10-Dihydrophenanthrene to Anthracene. PB90-241282 000,449
- PHENOXYACETIC ACID**
Adsorption of Phenoxyacetic Acid and Trans-Cinnamic Acid on Hydroxyapatite. PB90-192394 000,063
- PHENYL RADICALS**
Gas Phase Reactions of Phenyl Radicals with Aromatic Molecules. PB90-149295 000,266
- PHENYLBUTENE**
Single Pulse Shock Tube Studies on the Stability of 1-Phenylbutene-2. PB90-217860 000,433
- PHIGS STANDARD**
Design Issues for Conformance Testing of the PHIGS Standard. PB90-264094 000,758
- PHIGS SYSTEM**
User's Guide for the PHIGS Validation Tests (Version 1.0). PB90-265216 000,759
- PHOSPHATE COATINGS**
Multidimensional Internal Setting Expansion of a Phosphate-Bonded Casting Investment Measured with Strain Gauges. PB90-241464 000,067
- PHOSPHATES**
Comparison of Direct and through Water Binding of Platinum Amines to the Phosphate Anion. PB90-169319 000,350
Structure of Phosphate-Free Ribonuclease A Refined at 1.26 Å. PB90-206715 001,332
- PHOSPHINES**
Enthalpies of Combustion of Triphenylphosphine and Triphenylphosphine Oxide. PB90-169608 000,581
- PHOSPHOENOLPYRUVATE**
Mechanistic and Physiological Consequences of HPr(ser) Phosphorylation on the Activities of the Phosphoenolpyruvate: Sugar Phosphotransferase System in Gram-Positive Bacteria. Studies with Site-Specific Mutants of HPr. PB90-192477 001,344
- PHOSPHORS**
Phosphor Film Characterization Measurements in the Vacuum U.V. Using a Multichannel Detector. PB90-149287 000,798
- PHOSPHORUS ADDITIONS**
Quasicrystalline Structures of Transition Metal/Metalloid Glasses. DE86002932 001,242
- PHOSPHORUS FLUORIDES**
Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, 1 December 1987-30 November 1988.
- DE89003342 000,308
Influence of Adsorbed Potassium on Electron Stimulated Desorption of PF3 on Ru(0001). PB91-118364 000,506
- PHOSPHORYLATION**
Mechanistic and Physiological Consequences of HPr(ser) Phosphorylation on the Activities of the Phosphoenolpyruvate: Sugar Phosphotransferase System in Gram-Positive Bacteria. Studies with Site-Specific Mutants of HPr. PB90-192477 001,344
- PHOSPHOTRANSFERASE**
Mechanistic and Physiological Consequences of HPr(ser) Phosphorylation on the Activities of the Phosphoenolpyruvate: Sugar Phosphotransferase System in Gram-Positive Bacteria. Studies with Site-Specific Mutants of HPr. PB90-192477 001,344
- PHOTOCHEMICAL REACTIONS**
Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase. PB90-169269 000,285
Cluster Ion Formation under Laser Bombardment - Studies of Recombination Using Isotope Labeling. PB90-170424 000,287
Self-Diffusion Measurements of a Probe in Various Bulk Polymers: A Temperature Dependence. PB90-271677 000,551
- PHOTOCHEMISTRY**
Photochemistry of Diacetylene. PB90-149089 000,282
- PHOTOCONDUCTIVITY**
Persistent Photoconductivity in SIMOX Film Structures. PB91-112409 000,888
- PHOTOCONDUCTORS**
Gallium Arsenide (GaAs)-Based Photoconductive Switches for Pulse Generation and Sampling Applications in the Nanosecond Regime. PB90-170978 000,836
- PHOTODETACHMENT**
Rotational Distributions in the Photodetachment of IHI(-) and in the I + HI Reaction: The Influence of IHI Transition State Resonances. PB90-206905 000,426
- PHOTODETECTORS**
Planar Silicon Photosensors: An Overview. PB90-254582 000,840
- PHOTODIODES**
Application of PN and Avalanche Silicon Photodiodes to Low-Level Optical Radiation Measurements. N89-133177 000,022
Quantum Efficiency Stability of Photodiodes. PB90-169590 000,835
Current Status of, and Future Directions in, Silicon Photodiode Self-Calibration. PB90-187667 000,837
Surface-Field-Induced Feature in the Quantum Yield of Silicon Near 3.5 eV. PB90-261058 000,843
Reflectometer for Measurements of Scattering from Photodiodes and Other Low Scattering Surfaces. PB90-261207 000,844
- PHOTODISSOCIATION**
Unimolecular Dynamics Following Vibrational Overtone Excitation of HN3 v1= 5 and v1= 6: HN3(X,v,J,K) Yields HN(X(3)Sigma-v,J,Omega) + N2(X(1)Sigma+ g). AD-A210 001/4 000,300
Energetics and Spin- and Lambda-Doublet Selectivity in the Infrared Multiphoton Dissociation DN3 yields DN(X 3 Sigma+), a 1 Delta) + N2(X 1 Sigma g (+)); Experiment. AD-A210 250/7 000,301
Unstable Periodic Orbits, Recurrences, and Diffuse Vibrational Structures in the Photodissociation of Water Near 128 nm. PB90-206830 000,424
Rotational State Distributions Following the Photodissociation of Cl-CN: Comparison of Classical and Quantum Mechanical Calculations. PB90-241696 000,458
Photodissociation of Vibrationally Excited Water in the First Absorption Band. PB90-242249 000,459
Above-Threshold Dissociation of (H sub 2, sup +) in Intense Laser Fields. PB91-101253 001,770
- PHOTOELASTICITY**
Photoelastic Characteristics of Fluorozeonate and Transition-Metal Fluoride Glasses. PB90-170119 001,139
- PHOTOELECTRIC EMISSION**
Photoemission Cross Sections for Atomic Transitions in the Extreme Ultraviolet Due to Electron Collisions with Atoms and Molecules. PB90-161282 000,284
- PHOTOELECTRON SPECTROSCOPY**
Role of Multiple Scattering in XPS and Auger Electron Diffraction in Crystals.

KEYWORD INDEX

- PB90-150046 001,547
Precision, Accuracy, and Uncertainty in Quantitative Surface Analyses by Auger-Electron Spectroscopy and X-ray Photoelectron Spectroscopy.
PB90-205840 000,417
Soft X-ray Absorption and Emission Spectra of the YBa(sub 2)Cu(sub 3)O(sub 7-x) Superconductor.
PB90-217852 001,603
Photoemission Study of High T(sub c) Oxides.
PB90-217993 001,605
- PHOTOEMISSION**
Photon Stimulated Desorption of Fluorine from Silicon Etched by XeF₂.
PB91-135038 000,519
- PHOTOFISSION**
Iron and Cadmium Capture Gamma Ray Photofission Measurements.
PB90-206772 001,432
Iron and Cadmium Capture Gamma Ray Photofission Measurement.
PB91-134981 001,425
- PHOTOIONIZATION**
Pd-Na/F Double Exploding Foil Photoionization Experiment.
PB91-112474 001,780
- PHOTOLYSIS**
Flash Photolysis Resonance Fluorescence Investigation of the Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ketones Over the Temperature Range 240-440 K.
PB90-193475 000,274
- PHOTON-ATOM COLLISIONS**
Low-Frequency Approximation for Simultaneous Electron-Photon Excitation of Atoms.
PB90-205832 001,724
Harmonic Generation by a Classical Hydrogen Atom in the Presence of an Intense Radiation Field.
PB90-205873 001,726
- PHOTON STIMULATED DESORPTION**
Photon Stimulated Desorption Induced by Core Exciton States in MgO.
PB90-169293 000,349
Influence of Surface Structure on Mechanisms of Stimulated Desorption.
PB90-218132 000,435
Ion Desorption Induced by Core Exciton States in MgO.
PB90-218157 000,436
Ellipsoidal Mirror Analyzer for the Study of Photon Stimulated Desorption.
PB90-218272 000,438
Dynamics of O(1+) Desorption from TiO(sub 2).
PB90-218330 000,441
Magnitude of Secondary Electron Contributions in Photon Stimulated Desorption.
PB90-218496 000,443
Photon Stimulated Desorption of Fluorine from Silicon Etched by XeF₂.
PB91-135038 000,519
- PHOTONICS**
Measurement Standards to Support Photonics Technology.
PB90-261041 000,842
- PHOTONS**
Difficulties Encountered with Some Intermediate-Atomic Number Radiation Protection Dosimeters Irradiated on-Phantom in Low-Energy Photon Beams.
PB90-192691 001,357
- PHOTOREFRACTION**
Photorefractive Instabilities in Proton-Exchanged Waveguides: Two-Wave Coupling and Chaos.
PB91-118471 000,847
- PHOTORESISTS**
Three Dimensional Modeling of Optical Microlithography for Positive Photoresists.
PB90-187501 000,869
Three Dimensional Modeling of Optical Microlithography for Positive Photoresists.
PB90-241233 001,068
- PHYSICAL CHEMISTRY**
Journal of Physical and Chemical Reference Data, Volume 18, Number 4, 1989.
PB90-161241 000,339
- PHYSICAL PROPERTIES**
Thermophysical Property Measurements in Fluid Mixtures: Final Report, Prepared for the Period Ending October 31, 1987.
DE89003281 001,452
- PHYSICAL RADIATION EFFECTS**
Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.
PATENT-4 830 917 001,223
- PHYSICS**
Physics, Chemistry and Engineering in the 1990's.
PB90-207283 000,010
- PINHOLE CAMERAS**
Pinhole Camera Imaging Without Lenses or Mirrors.
- PB90-254962 001,442
- PIPE FLOW**
Summary Report of NIST's (National Institute of Standards and Technology's) Industry-Government Consortium Research Program on Flowmeter Installation Effects with Emphasis on the Research Period November 1988-May 1989.
PB90-221847 001,459
- PIPES (TUBES)**
Quantification of Heat Losses through Structural Supports for Shallow Trench Heat Distribution Systems.
PB90-219585 000,958
Thermal Analysis of Directly Buried Conduit Heat Distribution Systems.
PB90-269481 000,959
- PIPING SYSTEMS**
3D Piping IGES Application Protocol, Version 1.0.
PB91-120196 000,106
- PLANAR NEAR-FIELD CODES**
Planar Near-Field Codes for Personal Computers.
PB90-155839 000,801
- PLANETARY NEBULAE**
Transition from Red Giant to Planetary Nebula.
PB91-112359 000,049
- PLASMA CHEMISTRY**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition.
PB90-187659 000,288
- PLASMA DIAGNOSTICS**
Goals for the Application of High-Resolution X-ray Spectroscopy to the Diagnosis of Stellar Coronal Plasmas.
PB90-271495 000,047
- PLASMA JETS**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition.
PB90-187659 000,288
- PLASMA RADIATION**
Developments in Atomic-Absorption, X-ray Fluorescence, and Plasma-Emission Spectrometry for the Analysis of Metals and Ores.
PB90-136961 001,390
- PLASMA SPRAYING**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition.
PB90-187659 000,288
- PLASMAS (PHYSICS)**
Laser-Enhanced Ionization Spectroscopy in Flames and Plasmas.
PB90-193327 000,411
ELENDF: A Time-Dependent Boltzmann Solver for Partially Ionized Plasmas.
PB90-241605 001,508
- PLASTICS**
Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions.
PB90-235268 000,542
- PLATINUM**
Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, 1 December 1987-30 November 1988.
DE89003342 000,308
State-Resolved Evidence for Hot Carrier Driven Surface Reactions: Laser Induced Desorption of NO from Pt(111).
PB90-150160 000,326
Interfacial Electron Transfer Reactions between Platinum Colloids and Reducing Radicals in Aqueous Solution.
PB90-153453 000,283
Comparison of Direct and through Water Binding of Platinum Aminines to the Phosphate Anion.
PB90-169319 000,350
Characterization of Ultrathin Pt Overlayers Deposited on a W(110) Surface.
PB90-192634 000,407
Wavelengths and Intensities of a Platinum/Neon Hollow Cathode Lamp in the Region 1100-4000 Å.
PB90-241662 001,484
- PLUMES**
Investigation of the Effects of a Stratified Two Layer Environment on Fire Plume Temperatures.
PB90-218165 000,136
- POISSON EQUATION**
Fast Fourier Transforms for Direct Solution of Poisson's Equation with Staggered Boundary Conditions.
PB90-192525 001,287
- POLARIMETRY**
Semiconductor Measurement Technology: A Software Program for Aiding the Analysis of Ellipsometric Measurements, Simple Spectroscopic Models.
PB90-216847 001,602
SPARCOL: A Front End for the MAIN2 Program.
PB91-107185 001,643
- POLARIZATION (SPIN ALIGNMENT)**
Magnetic Microstructure of Thin Films and Surfaces: Exploiting Spin-Polarized Electrons in the SEM and STM.
PB90-188210 000,388
- POLY (PHENYLENE SULFIDE)**
Aspects of the Crystallization and Morphology of Poly(Phenylene Sulfide).
- PB90-261165 000,547
- POLYBUTADIENE**
Microstructure and Isotopic Labeling Effects on the Miscibility of Polybutadiene Blends Studied by the Small-Angle Neutron Scattering Technique.
PB90-192568 000,534
Monitoring the Quality of Mix of Polymer Melts with Particulate Fillers Using Fluorescence Spectroscopy.
PB90-205907 000,537
Chain Dimension Determination of Deuterated Polybutadiene by Small-Angle Neutron Scattering on the Basis of Random Phase Approximation.
PB90-218421 000,541
Phase Behavior of Polymer Blends.
PB90-241506 000,543
Microstructure and Isotopic Labeling Effects on the Miscibility of Polybutadiene Blends Studied by the Small-Angle Neutron Scattering Technique, 1990.
PB90-254640 001,207
Shear Stabilization of Critical Fluctuations in Bulk Polymer Blends Studied by Small Angle Neutron Scattering.
PB90-254822 000,544
- POLYBUTYLENE**
Analysis of the Corrections to the Normal Force Response for the Cone and Plate Geometry in Single Step Stress Relaxation Experiments.
PB90-206137 000,538
- POLYCARBONATE RESINS**
Effect of X-rays on the Polycarbonate Substrate of X-ray Calibration Standards.
PB90-169673 000,286
- POLYETHERS**
Inception and Structure of Prebreakdown Streamers in Perfluorinated Polyethers.
PB91-112193 001,237
- POLYETHYLENE**
Morphological Partitioning of Chain Ends and Methyl Branches in Melt Crystallized Polyethylene by ¹³C NMR.
PB90-192436 000,533
Viscosity and Molecular Weight Distribution of Ultra-High Molecular Weight Polyethylene Using a High Temperature Low Shear Rate Rotational Viscometer.
PB90-193426 000,536
Development of Test Methods to Determine the Compatibility of Liquid Hazardous Materials with Polyethylene Packagings.
PB90-235417 000,985
- POLYETHYLENE RESINS**
Studies on the Melt Flow Rate of the SRM 1474, a Polyethylene Resin.
PB90-207275 001,271
- POLYETHYLENE TEREPHTHALATE**
Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments.
PB90-153487 001,208
- POLYMER BLENDS**
Microstructure and Isotopic Labeling Effects on the Miscibility of Polybutadiene Blends Studied by the Small-Angle Neutron Scattering Technique, 1990.
PB90-254640 001,207
Shear Stabilization of Critical Fluctuations in Bulk Polymer Blends Studied by Small Angle Neutron Scattering.
PB90-254822 000,544
Small Angle Neutron Scattering Studies of Blends of Protonated Linear Polystyrene with Crosslinked Deuterated Polystyrene.
PB90-260944 000,545
Shear Induced Phase Behavior of Polymer Blends by Small Angle Neutron Scattering.
PB91-112490 000,554
- POLYMER MATRIX COMPOSITES**
Thermal Technique for Determining Interface and/or Interply Strength in Composites.
PATENT-4 972 720 001,182
Opportunities for Innovation: Polymer Composites.
PB91-107078 001,187
- POLYMERIZATION**
X-ray Analysis of a Liquid Crystal Phase Diacetylene Polymerization.
PB91-101543 000,552
- POLYMERS**
Bubble Formation from a Sparger in Polymer Solutions-II. Moving Liquid.
PB90-149246 000,525
Preparation of Polymer Crystal Nuclei.
PB90-149519 000,526
Ternary Reactions among Polymer Substrate-Organohalogen-Antimony Oxides under Pyrolytic, Oxidative and Flaming Condition.
PB90-154766 000,527
Institute for Materials Science and Engineering, Polymers: Technical Activities 1989.
PB90-163510 000,528
Glass Formation and Glassy Behavior.
PB90-170291 000,530

KEYWORD INDEX

PRECOMPILERS

- Standard Polymers.
PB90-170697 000,531
- Molecular Weight and Concentration Dependences of the Terminal Relaxation Time and Viscosity of Entangled Polymer Solutions.
PB90-170796 000,532
- Proton MAS NMR Method for Determining Intimate Mixing in Polymer Blends.
PB90-193368 000,535
- Structure of the Polymer-Solvent Interface.
PB90-217803 000,540
- Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions.
PB90-235268 000,542
- Phase Behavior of Polymer Blends.
PB90-241506 000,543
- Cyclopolymerizable Monomers for Use in Dental Resin Composites.
PB90-242181 000,068
- Synthesis and Properties of a Polyfluorinated Prepolymer Multifunctional Urethane Methacrylate.
PB90-260910 000,070
- Phase Behavior and Gelation of a Rod-Like Polymer in Solution and Implications for Microcellular Foam Morphology.
PB90-261132 000,546
- Aspects of the Crystallization and Morphology of Poly(Phenylene Sulfide).
PB90-261165 000,547
- Small-Angle X-ray Characterization of Polymers.
PB90-271057 000,548
- Formation and Melting of Solvent Crystals in Thermoreversible Polymer Gels.
PB90-271396 000,549
- Effects of Melt Viscosity and Thermal Stability on Polymer Gasification.
PB90-271412 000,550
- Self-Diffusion Measurements of a Probe in Various Bulk Polymers: A Temperature Dependence.
PB90-271677 000,551
- Methacrylate Oligomers with Pendant Isocyanate Groups as Tissue Adhesives.
PB91-111971 000,074
- Characterization of Branching Architecture Through 'Universal' Ratios of Polymer Solution Properties.
PB91-112128 000,553
- Evaluation of Spiro Orthocarbonaate Monomers Capable of Polymerization with Expansion as Ingredients in Dental Composite Materials.
PB91-112698 000,075
- Fluorescence Properties of a Rod-Like Polymer and Its Model Compound.
PB91-134908 000,557
- POLYMETHYL METHACRYLATE**
Behavior of Primary Radicals during Thermal Degradation of Poly(Methyl Methacrylate).
PB90-136607 000,523
- Effects of Initial Molecular Weight on Thermal Degradation of Poly(Methyl Methacrylate) 1 - Model 1.
PB90-152760 001,270
- Initial Frictional Behavior during the Wear of Steel, Aluminum, and Poly(Methyl Methacrylate) on Abrasive Papers.
PB90-170077 001,224
- Effects of Melt Viscosity and Thermal Stability on Polymer Gasification.
PB90-271412 000,550
- POLYNOMIALS**
Error Bounds for Polynomial Evaluation and Complex Arithmetic.
AD-A178 823/1 001,281
- POLYSTYRENE**
Thermoreversible Gelation of Isotactic Polystyrene: Thermodynamics and Phase Diagrams.
PB90-149162 000,524
- Aging Effects and the Dependence of Modulus on Concentration in Isotactic Polystyrene/Cis-Decalin Gels.
PB90-170283 000,529
- Concentration Fluctuations in Mixtures of Linear and Star-Shaped Polymers.
PB90-206921 000,539
- Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions.
PB90-235268 000,542
- Phase Behavior of Polymer Blends.
PB90-241506 000,543
- Shear Stabilization of Critical Fluctuations in Bulk Polymer Blends Studied by Small Angle Neutron Scattering.
PB90-254822 000,544
- Small Angle Neutron Scattering Studies of Blends of Protonated Linear Polystyrene with Crosslinked Deuterated Polystyrene.
PB90-260944 000,545
- Formation and Melting of Solvent Crystals in Thermoreversible Polymer Gels.
PB90-271396 000,549
- Effects of Melt Viscosity and Thermal Stability on Polymer Gasification.
PB90-271412 000,550
- Phase-Separation Kinetics of Mixtures of Linear and Star-Shaped Polymers.
PB91-118208 000,556
- POLYURETHANE**
Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane.
PB90-187832 001,368
- Corrosion and Degradation of a Polyurethane/Co-Ni-Cr-Mo (MP35N) Pacemaker Lead.
PB90-193236 000,064
- POLYURETHANE RESINS**
Combustion Product Toxic Potency Measurements: Comparison of a Small Scale Test and 'Real-World' Fires.
PB91-101063 000,199
- Risk of Blistering of Built-Up Roofing Membranes Applied to Polyurethane Foam Insulation.
PB91-112631 000,160
- POLYVINYL CHLORIDE**
Update: ASTM (American Society for Testing and Materials) Standards for Single-Ply Membranes.
PB90-170739 000,130
- Monitoring the Fate of Chlorine from MSW Sampling through Combustion. Part 2. Combustion Studies.
PB91-107383 000,597
- Reporting Combustion Product Toxicity Test Results.
PB91-112300 001,371
- POROSITY**
Residence Time Distribution Approach to the Study of Free Convection in Porous Media.
DE90003848 001,455
- Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.
PATENT-4 830 917 001,223
- Pore Structure of Concrete and Freezing Vulnerability.
PB90-149683 000,570
- Porosity in Spinel Compacts Using Small-Angle Neutron Scattering.
PB90-170093 001,138
- Fluorescence Technique for Determining the Porosity of Geologic Core Samples on a Macro- and Microscale.
PB90-170705 001,385
- POROUS MATERIALS**
Permeability, Diffusivity, and Microstructural Parameters: A Critical Review.
PB90-271339 000,565
- PORPHYRINS**
Pulse radiolytic studies of inter- and intramolecular electron transfer processes. Progress report.
DE90008697 000,312
- Formation and Decay of Zinc Tetrakis(N-methyl-4-pyridinio)porphyrin pi-Radical Cation in Aqueous Solutions Containing Azide Ions and Polyelectrolyte.
PB90-169715 000,271
- Reactions of Iron Porphyrins with CF₃, CF₃O₂, and CBr₃O₂ Radicals.
PB90-241316 000,290
- PORTLAND CEMENT**
Preliminary Performance Criteria for the Bond of Portland-Cement and Latex-Modified Concrete Overlays.
PB90-204520 000,571
- PORTLAND CEMENTS**
Manual for the Cement Hydration Simulation Model.
PB90-219783 000,137
- Mechanisms of Deterioration in Cement-Based Materials and in Lime Mortar.
PB90-271198 001,199
- POSITION FINDING**
NASREM Implementation of Position Determination from Motion.
PB90-219569 001,100
- Application of Measurement Error Propagation Theory to Two Measurement Systems Used to Calculate the Position and Heading of a Vehicle on a Flat Surface.
PB91-112797 001,392
- POSIX**
NIST-PCTS: National Institute of Standards and Technology-POSIX Conformance Test Suite.
PB90-500919 000,728
- POST TENSIONING**
Seismic Performance of 1/3 Scale Post-Tensioned Precast Beam-Column Connections.
PB90-254434 000,178
- POTASSIUM**
Differential Cross Section for Na Fine-Structure Transfer Induced by Na and K Collisions.
PB90-205857 001,725
- Neutron Scattering Studies of Potassium-Ammonia Layers in Graphite.
PB90-206129 000,420
- Influence of Adsorbed Potassium on Electron Stimulated Desorption of PF₃ on Ru(0001).
PB91-118364 000,506
- POWDER (PARTICLES)**
Neutron Powder Diffraction Study of Orthorhombic Ba(sub 2)YCu(sub 3)O(sub 6.5).
PB90-170267 001,140
- Effects of Extinction on X-ray Powder Diffraction Intensities.
PB91-118109 000,501
- POWER AMPLIFIERS**
Precision Power Amplifier for Power/Energy Calibration Applications.
PB91-107417 000,830
- POWER EQUIPMENT**
Systems and Instruments in Site Surveys.
PB90-205808 000,944
- POWER LINES**
Coupling, Propagation, and Side Effects of Surges in an Industrial Building.
PB90-241597 000,946
- Electrical Fast-Transient Tests: Applications and Limitations.

- AC Electric and Magnetic Field Measurement Fundamentals.
PB91-112441 000,947
- POWER MEASUREMENT**
Watt Transfer Standard.
PB91-101535 000,931
- POWER METERS**
Calibrated Optical Fiber Power Meters: Errors Due to Variations in Connectors.
PB90-169350 000,851
- International Comparison of Low Audio Frequency Power Meter Calibrations Conducted in 1989.
PB91-101204 000,924
- Qualifying Watthour Meters for Use as MAP Transport Standards.
PB91-101527 000,930
- POWER SUPPLY CIRCUITS**
Monitoring Power Quality.
PB90-192329 000,820
- Protecting Computer Systems against Power Transients.
PB90-261280 000,825
- Power Quality Site Surveys: Facts, Fiction, and Fallacies.
PB90-261298 000,826
- Power Quality Site Surveys: Facts, Fiction, and Fallacies.
PB90-261306 000,827
- NIST (National Institute of Standards and Technology) Digitally Synthesized Power Calibration Source.
PB91-107474 000,831
- POWER TRANSMISSION LINES**
Research for Electric Energy Systems - An Annual Report (1989).
PB90-228032 000,945
- PRASEODYMIUM BARIUM CUPRATES**
Magnetic Properties of Pr in Non-Superconducting PrBa₂Cu₃O₇.
PB90-254913 001,624
- PRASEODYMIUM CERIUM CUPRATES**
Polarization X-ray Absorption Near-Edge Structure Study of Pr_{2-x}Ce_xCuO₄ Single Crystals: The Nature of Ce Doping.
PB91-101618 001,642
- PRECAST CONCRETE**
Seismic Performance of 1/3 Scale Post-Tensioned Precast Beam-Column Connections.
PB90-254434 000,178
- Performance of 1/3-Scale Model Precast Concrete Beam-Column Connections Subjected to Cyclic Inelastic Loads.
PB91-107623 000,182
- PRECIPITATES**
Effect of Annealing Conditions on Precipitate and Defect Evolution in Oxygen Implanted SOI Material.
PB90-187774 001,574
- Gibbs-Thomson Equation for a Spherical Coherent Precipitate with Applications to Nucleation.
PB90-188285 000,391
- PRECIPITATION (CHEMISTRY)**
Growth of a Coherent Precipitate from Supersaturated Solution.
PB90-169434 000,352
- Elastic Effects during Late Stage Phase Transformations.
PB91-134841 000,516
- PRECISION**
Precision Engineering and Experimental Physics: William A. Rogers, the First Academic Mechanician in the U.S.
PB90-219777 001,017
- Precision and Accuracy of Mass Flow Measurement in the NIST-Boulder Nitrogen Flow Facility.
PB91-112417 000,255
- PRECOMPILERS**
Optimizing Precompiler for Finite-Difference Computations on a Vector Computer.
PB91-118265 000,734

KEYWORD INDEX

- PREDISSOCIATION**
Vibrational Predissociation Dynamics of the Nitric Oxide Dimer.
PB90-170176 000,363
- PREPOLYMERS**
Synthesis and Properties of a Polyfluorinated Pprepolymer Multifunctional Urethane Methacrylate.
PB90-260910 000,070
- PREPROCESSORS**
Knowledge-Based Front-End Input Generating Program for Building System Simulation.
PB90-170234 000,714
- PRESERVATIVES**
Determination of Thimerosal in Biological Products by Liquid Chromatography with Inductively Coupled Plasma Mass Spectrometric Detection.
PB90-190679 000,239
- PRESSURE**
Influence of Pressure and Humidity on the Medium and Long-Term Frequency Stability of Quartz Oscillators.
PB90-136953 000,855
- PRESSURE EFFECTS**
Pressure Effects on Partial Discharges in Hexane under DC Voltage.
PB90-217951 000,910
- PRESSURE SENSORS**
Proposed Dynamic Pressure and Temperature Primary Standard.
PB90-235284 000,445
- PRESSURE VESSELS**
Wide-Plate Crack-Arrest Tests Utilizing a Prototypical Pressure Vessel Steel.
PB90-170770 001,429
Niobium as a Neutron Dosimeter.
PB90-206780 001,408
Guidelines for Pressure Vessel Safety Assessment.
PB90-219619 001,219
- PRICES**
Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1990.
PB90-219858 000,201
Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1991. Annual Supplement to NIST Handbook 135 and NBS Special Publication 709.
PB91-113613 000,962
- PRIMARY STANDARDS**
Proposed Dynamic Pressure and Temperature Primary Standard.
PB90-235284 000,445
New Assignment of Mass Values and Uncertainties to NIST Working Standards.
PB90-235318 000,448
- PRINCETON UNIVERSITY**
Samuel Stanley Wilks' Princeton Appointment, and Statistics at Princeton Before Wilks.
PB90-136441 001,307
- PRIVATE ORGANIZATIONS**
Directory of U.S. Private Sector Product Certification Programs.
PB90-161712 001,002
- PROBES (ELECTROMAGNETIC)**
Reference Standard Block for Use in Nondestructive Test Probe Calibration and Method of Manufacture Thereof.
PATENT-4 963 826 001,070
- PROCESS CONTROL**
Noncontact Ultrasonic Sensors for High Temperature Process Control.
PB90-136789 001,209
NIST's (National Institute of Standards and Technology) Ultra-Clean Ceramic Processing Laboratory.
PB90-136896 001,127
Process Control Sensors: Status of AISI (American Iron and Steel Institute) Collaborative Programs.
PB90-170689 001,212
Cell as Part of a Manufacturing System.
PB90-225947 000,737
Minimum Cost Inspection Intervals for a Two-State Process.
PB91-101311 001,081
Survey of Industrial, Agricultural, and Medical Applications of Radiometric Gauging and Process Control.
PB91-167452 001,088
- PROCESS MONITORING**
NBS (National Bureau of Standards) NDE (Nondestructive Evaluation) Program.
PB90-187527 001,279
- PROCESS VARIABLES**
Processing: Property Relations for Ba(sub 2)YCu(sub 3)O(sub 7-x) High (T sub c) Superconductors.
PB90-150111 001,548
- PROCESSING & PERFORMANCE OF MATERIALS**
Development of Metastable Processing Paths for High Temperature Alloys.
AD-A210 550/0 001,240
Development of Metastable Processing Paths for High Temperature Alloys.
AD-A223 144/7 001,241
- Processing Bi-Pb-Sr-Ca-Cu-O Superconductors from Amorphous State.(Abstract Only).
N90-27860/7 001,517
- Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.
PATENT-4 830 917 001,223
- Aluminum Hydroxides as Solid Lubricants.
PATENT-4 919 829 001,221
- High-Tc Superconducting Unit Having Low Contact Surface Resistivity and Method of Making.
PATENT-4 963 523 000,894
- Correlation of Cure Monitoring Techniques.
PB90-135864 000,521
- Low Temperature Thermal Processing of Ba(sub 2)YCu(sub 3)O(sub 7-x) Superconducting Ceramics.
PB90-135906 001,522
- Acoustic Emission Studies of Electron Beam Surface Modification of Aluminum.
PB90-135955 001,246
- Wear Surface Analysis of Silicon Nitride.
PB90-136532 001,112
- Noncontact Ultrasonic Sensors for High Temperature Process Control.
PB90-136789 001,209
- NIST's (National Institute of Standards and Technology) Ultra-Clean Ceramic Processing Laboratory.
PB90-136896 001,127
- Development of a Weld Procedure to Repair Joints in a Railroad-Type Track.
PB90-136920 001,829
- Environmentally Induced Cracking.
PB90-149485 001,192
- Influence of Iron on the Reaction between Silicon and Nitrogen.
PB90-152661 000,330
- Experimental and Model Determinations of Coal Mineral and Slag Phase Equilibria.
PB90-153495 000,951
- Institute for Materials Science and Engineering: Metallurgy Division, Technical Activities 1989.
PB90-161159 001,276
- Nonplanar Interface Morphologies during Unidirectional Solidification of a Binary Alloy. 2. Three-Dimensional Computations.
PB90-169830 001,250
- Porosity in Spinel Compacts Using Small-Angle Neutron Scattering.
PB90-170093 001,138
- Process Control Sensors: Status of AISI (American Iron and Steel Institute) Collaborative Programs.
PB90-170689 001,212
- NBS (National Bureau of Standards) NDE (Nondestructive Evaluation) Program.
PB90-187527 001,279
- Lubricated Wear Behavior of Composition Modulated Nickel-Copper Coatings.
PB90-188301 001,114
- Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics.
PB90-188426 001,579
- Ultrasonic Methods for Characterizing the Interface in Composites.
PB90-188483 001,184
- Electrodeposition of an Aluminum-Manganese Metallic Glass from Molten Salts.
PB90-188509 001,252
- Chemiluminescence Instrumentation for Fuel and Lubricant Oxidation Studies.
PB90-192428 000,403
- Effect of an Electric Field on the Morphological Stability of the Crystal-Melt Interface on a Binary Alloy.
PB90-193541 001,256
- Silica Particle Synthesis in a Counterflow Diffusion Flame Reactor.
PB90-193608 000,585
- Transient and Residual Stress in a Porcelain-Metal Strip.
PB90-205865 000,065
- Monitoring the Quality of Mix of Polymer Melts with Particulate Fillers Using Fluorescence Spectroscopy.
PB90-205907 000,537
- Corrosion of Zircaloy Spent Fuel Cladding in a Repository.
PB90-207291 001,427
- Computerization of Welding Data: Proceedings of the Conference and Workshop.
PB90-219551 001,065
- Corrosion Data for Materials Performance Characterization.
PB90-241225 001,197
- Mathematical Modeling of the Deposition of Alloys Onto Moving Fibers.
PB90-254376 001,180
- Effect of Gravity Modulation on Solutal Convection during Directional Solidification.
PB90-265281 001,630
- Directional Solidification of a Planar Interface in the Presence of a Time-Dependent Electric Current.
PB90-271214 001,632
- Effect of Anisotropic Thermal Conductivity on the Morphological Stability of a Binary Alloy.
PB90-271271 001,260
- Hydrodynamic and Free Boundary Instabilities during Crystal Growth: The Effect of a Plane Stagnation Flow.
PB91-101436 001,640
- Effect of Surface Tension Anisotropy on Cellular Morphologies.
PB91-101444 001,262
- Morphological Stability during Alloy Solidification.
PB91-112060 001,264
- Application of Thermal-Wave Electron Microscopy to Imaging and Assessment of Corrosion on Rough Steel Surface.
PB91-112524 001,204
- Oxidative Degradation Mechanisms of Lubricants.
PB91-118323 001,117
- Use of a Statistical Software for Monitoring Material Quality.
PB91-133777 001,280
- Investigations on Gel Forming Media for Use in Low Gravity Bioprocesses Research.
PB91-134783 001,826
- PRODUCT DATA EXCHANGE**
NIST SQL Database Loader. STEP Working Form to SQL. National PDES Testbed Report Series.
PB90-256868 000,753
National PDES Testbed Strategic Plan 1990. National PDES Testbed Report Series.
PB91-107177 000,762
Development Plan: Product Data Exchange Network. National PDES Testbed Report Series.
PB91-107227 000,763
NIST Step Class Library (Step into the Future).
PB91-107235 000,764
Development Plan: Step Production Cell. National PDES Testbed Report Series.
PB91-107243 000,765
Development Plan Configuration Management Systems and Services.
PB91-107615 000,003
- PRODUCT DATA EXCHANGE SPECIFICATION**
Planning Model for Unifying Information Modeling Languages for Product Data Exchange Specification (PDES).
PB90-160375 001,028
Data Model Development and Validation for Product Data Exchange.
PB90-162108 000,002
PDES (Production Data Exchange Specification) Physical File Exchange Testing in the PDES Validation System.
PB90-183294 001,043
Fed-X: The NIST Express Translator.
PB90-269507 000,760

- REDUCTION (CHEMISTRY)**
 Interfacial Electron Transfer Reactions between Platinum Colloids and Reducing Radicals in Aqueous Solution. PB90-153453 000,283
 Redox Reactions with Colloidal Metal Oxides: Comparison of Radiation-Generated and Chemically Generated Ruthenium Dioxide Dihydrate and Colloids. PB90-153461 000,338
- REDUCTION POTENTIAL**
 Reduction Potentials of One-Electron Couples Involving Free Radicals in Aqueous Solution. PB90-161274 000,342
- REFERENCE ATMOSPHERES**
 ENEA Reference Atmosphere Facility for Testing Radon and Daughters Measuring Equipment. PB90-255316 001,416
- REFERENCE LABORATORIES**
 Evaluation of NVLAP (National Voluntary Laboratory Accreditation Program) Personnel Dosimetry Testing Laboratory: X-rays. PB90-207762 001,360
- REFERENCE MATERIALS**
 Dielectric Characterization and Reference Materials.

KEYWORD INDEX

- PB90-257742 *000,918*
Electrodynamics of Materials for Dielectric Measurement Standardization.
PB90-261066 *000,919*
- REFERENCE STANDARD BLOCKS**
Reference Standard Block for Use in Nondestructive Test Probe Calibration and Method of Manufacture Thereof.
PATENT-4 963 826 *001,070*
- REFERENCE STANDARDS**
Effect of X-rays on the Polycarbonate Substrate of X-ray Calibration Standards.
PB90-169673 *000,286*
- REFERENCE VALUES**
National Reference System for Cholesterol.
PB90-150244 *001,318*
- REFLECTION ELECTRON MICROSCOPY**
Observation of Gold Thin Film Growth with Reflection Electron Microscopy.
PB91-101329 *001,021*
- REFLECTOMETERS**
Reflectometer for Measurements of Scattering from Photodiodes and Other Low Scattering Surfaces.
PB90-261207 *000,844*
Absolute Specular Reflectometer with an Autocollimator Telescope and Auxiliary Mirrors.
PB90-269572 *001,498*
High-Precision Optical Reflectometer for the Study of Semiconductor Materials and Structures.
PB91-111963 *000,884*
- REFRACTORIES**
Chosun Refractories Co. Ltd.
PB90-188418 *001,142*
- REFRACTORY MATERIALS**
Laser-Induced Vaporization Mass Spectrometry of Refractory Materials: Apparatus and the BN System.
PB90-152836 *001,133*
Dynamic Technique for Thermophysical Measurements at High Temperatures in a Microgravity Environment.
PB90-271255 *001,824*
Measurement of the Radiance Temperature (at 655 nm) of Melting Graphite Near Its Triple Point by a Pulse-Heating Technique.
PB90-271263 *001,124*
- REFRACTORY METALS**
Dynamic Thermophysical Measurements in Space.
N89-20317/8 *001,822*
Chosun Refractories Co. Ltd.
PB90-188418 *001,142*
Measurement of the Heat of Fusion of Molybdenum by a Microsecond-Resolution Transient Technique.
PB90-271537 *000,480*
- REFRIGERANTS**
Experimental evaluation of two nonazeotropic refrigerant mixtures in a water-to-water breadboard heat pump.
DE90009016 *000,955*
Measurement and Formulation of the Thermodynamic Properties of Refrigerants 134a (1,1,1,2-Tetrafluoroethane) and 123 (1,1-Dichloro-2,2,2-Trifluoroethane).
PB90-152562 *001,232*
Nontoxic Heat Transport Fluids for Spacecraft Two-Phase Thermal Control Systems.
PB90-196510 *001,819*
Surface Tension of Refrigerants R123 and R134a.
PB90-217795 *001,233*
Experimental Evaluation of Two Nonazeotropic Refrigerant Mixtures in a Water-to-Water, Breadboard Heat Pump.
PB90-235003 *001,234*
Spectroscopic Library for Alternative Refrigerant Analysis.
PB91-107128 *000,252*
Optimum Refrigerants for Non-Ideal Cycles: An Analysis Employing Corresponding States.
PB91-134452 *001,239*
- REFRIGERATORS**
Energy Rating of Refrigerators with Variable Defrost Controls.
PB90-170358 *000,948*
Pulse Tube Refrigeration: A New Type of Cryocooler.
PB90-192469 *001,119*
- REFUSE DERIVED FUELS**
Chlorine Mass Balance in the Combustion of Refuse-Derived Fuel.
PB90-254442 *000,986*
- REGRESSION ANALYSIS**
Some Thoughts on Variable-Selection in Multiple Regression.
PB90-169772 *001,300*
ODRPACK: Software for Weighted Orthogonal Distance Regression.
PB90-190661 *001,285*
- REGULATIONS**
Uniforms Laws and Regulations as Adopted by the (74th) National Conference on Weights and Measures 1989 (1990 Edition).
PB90-191404 *001,073*
Uniform Laws and Regulations as Adopted by the National Conference on Weights and Measures (75th), 1990 (1991 Edition).
PB91-107102 *001,082*
Report of the National Conference on Weights and Measures (75th).
PB91-112763 *001,085*
Developing a Response to EC '92.
PB91-134072 *000,123*
- REINFORCED CONCRETE**
Detecting Delaminations in Concrete Slabs with and without Overlays Using the Impact-Echo Method.
PB91-112656 *000,568*
- REINFORCING MATERIALS**
Influence of Horizontal Reinforcement on Shear Resistance of Concrete Block Masonry Walls.
PB90-145624 *000,168*
Phase Velocity and Attenuation of Plane Elastic Waves in a Particle-Reinforced Composite Medium.
PB90-170143 *001,183*
- RELATIVE SENSITIVITY FACTOR**
Factors That Affect Reproducibility in SIMS Analysis of Semiconductors.
PB91-112045 *001,645*
- RELATIVITY**
Small Mercury Relativity Orbiter.
PB90-271099 *001,762*
- RELAXATION TIME**
Molecular Weight and Concentration Dependences of the Terminal Relaxation Time and Viscosity of Entangled Polymer Solutions.
PB90-170796 *000,532*
- RELIABILITY**
Institute for Materials Science and Engineering, Fracture and Deformation Division: Technical Activities 1989.
PB90-155359 *001,663*
- RELIABILITY (ELECTRONICS)**
Materials Problems Affecting Reliability and Yield of Wire Bonding in VLSI (Very Large Scale Integration) Devices.
PB91-112268 *000,886*
- REQUIREMENTS**
Coding and Modulation Requirements for 2,400 Bit/Second Modems.
FIPS PUB 133 *000,602*
Coding and Modulation Requirements for Duplex 9600 Bit/Second Modems.
FIPS PUB 135 *000,603*
Telecommunications: Coding and Modulation Requirements for Duplex 600 and 1200 Bit/Second Modems.
FIPS PUB 136 *000,604*
Analog to Digital Conversion of Voice by 2,400 Bit/Second Linear Predictive Coding.
FIPS PUB 137 *000,605*
General Security Requirements for Equipment Using the Data Encryption Standard.
FIPS PUB 140 *000,608*
Interoperability and Security Requirements for Use of the Data Encryption Standard with CCITT Group 3 Facsimile Equipment.
FIPS PUB 141 *000,609*
Fire-Related Standards and Testing.
N88-12522/4 *001,812*
- RESEARCH**
NIST (National Institute of Standards and Technology) Research Reports, January 1990.
PB90-182213 *001,039*
Technical Activities 1989, Electron and Optical Physics Division.
PB90-207267 *001,737*
NIST (National Institute of Standards and Technology) Structural Research Publications, 1984-1989.
PB90-227992 *000,177*
NIST (National Institute of Standards and Technology) Research Reports, May 1990.
PB90-244435 *001,041*
Center for Electronics and Electrical Engineering Technical Publication Announcements Covering Center Programs, January-March 1990, with 1990 CEE Events Calendar.
PB91-107201 *000,881*
Journal of Research of the National Institute of Standards and Technology. July-August 1990. Volume 95, Number 4.
PB91-107656 *000,938*
NIST Research Reports, October 1990.
PB91-112813 *000,940*
Journal of Research of the National Institute of Standards and Technology. September-October 1990. Volume 95, Number 5.
PB91-144451 *001,506*
- RESEARCH AND DEVELOPMENT**
Evaluation of Solar Energy Inventions.
PB91-133918 *000,965*
- RESEARCH FACILITIES**
Application of PN and Avalanche Silicon Photodiodes to Low-Level Optical Radiation Measurements.
N89-13317/7 *000,022*
- RESEARCH MANAGEMENT**
Institute for Materials Science and Engineering, Fracture and Deformation Division: Technical Activities 1989.
PB90-155359 *001,663*
Institute for Materials Science and Engineering: Metallurgy Division, Technical Activities 1989.
PB90-161159 *001,276*
Institute for Materials Science and Engineering, Polymers: Technical Activities 1989.
PB90-163510 *000,528*
Institute for Materials Science and Engineering, Ceramics: Technical Activities 1989.
PB90-163981 *001,137*
Cooperative Research Opportunities at NIST (National Institute of Standards and Technology).
PB90-172453 *000,006*
Center for Electronics and Electrical Engineering Technical Publication Announcements Covering Center Programs, July to September 1989, with 1990 CEE Events Calendar.
PB90-206491 *000,908*
Physics, Chemistry and Engineering in the 1990's.
PB90-207283 *000,010*
Center for Electronics and Electrical Engineering: 1990 Program Description.
PB90-207754 *000,909*
- RESEARCH PROGRAMS**
Reference data in support of energy programs. Final report.
DE90009056 *000,993*
- RESEARCH PROJECTS**
Long-Range Plan for a Research Project on Carbon Monoxide Production and Prediction.
PB90-209602 *000,587*
Building Technology Project Summaries, 1990.
PB90-228040 *000,192*
New Program and Directions at the National Institute of Standards and Technology.
PB90-235250 *000,012*
Center for Electronics and Electrical Engineering Technical Progress Bulletin Covering Center Programs, October to December 1989, with 1990 CEE Events Calendar.
PB90-255381 *000,915*
Materials Research Laboratories: Reviewing the First Twenty-Five Years.
PB91-101568 *001,236*
- RESIDENTIAL BUILDINGS**
Risk Exposure and Risk Attitude of Homeowners in Fire Protection Investment Decisions.
PB90-141383 *000,107*
Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating.
PB90-185117 *000,089*
Rating Procedure for Mixed Air-Source Unitary Heat Pumps Operating in the Heating Mode.
PB90-221854 *000,098*
Fire Risk Assessment Method: Case Study 1, Upholstered Furniture in Residences.
PB90-234998 *000,139*
Using High-Resolution Hand-Held Radiometers to Measure In situ Thermal Resistance.
PB90-271230 *000,153*
Full Scale Simulation of a Fatal Fire and Comparison of Results with Two Multiroom Models.
PB91-107482 *000,156*
Effect of Wall Mass on the Annual Heating and Cooling Loads of Single-Family Residences for Five Selected Climates.
PB91-118018 *000,104*
- RESIDUAL STRESS**
Residual Stress Measurements by Means of Neutron Diffraction.
PB91-112581 *001,265*
- RESIN MATRIX COMPOSITES**
Opportunities for Innovation: Polymer Composites.
PB91-107078 *001,187*
- RESINS**
Ultrahigh Vacuum Leak Sealing with a Silicon Resin Product.
PB90-149378 *001,121*
Aging Effects and the Dependence of Modulus on Concentration in Isotactic Polystyrene/Cis-Decalin Gels.
PB90-170283 *000,529*
Synthesis and Properties of a Polyfluorinated Prepolymer Multifunctional Urethane Methacrylate.
PB90-260910 *000,070*
Applications of the Weibull Method to Statistical Analysis of Strength Parameters of Dental Materials.
PB90-260993 *000,071*
- RESISTANCE STANDARDS**
Investigating the Use of Multimeters to Measure Quantized Hall Resistance Standards.
PB91-101097 *000,923*
- RESISTORS**
Frequency Dependencies of Precision Resistors.
PB90-136557 *000,623*
- RESONATORS**
Reflection Matrix for Optical Resonators in FEL (Free Electron Lasers) Oscillators.

KEYWORD INDEX

SAMPLING VOLTAGE TRACKERS

- AD-A201 778/8 001,463
- RESOURCE RECOVERY**
Microbial Metal Leaching and Resource Recovery Processes. PB90-192410 000,952
- RESPONSES**
Evaluation of the Role of Luminance Distributions in Occupant Response to Lighting. PB90-241381 000,100
- RESTAURANTS**
Fire Risk Assessment Method: Case Study 4, Interior Finish in Restaurants. PB90-244450 000,145
- REVERBERATION CHAMBERS**
EMR Test Facilities Evaluation of a Small Reverberating Chamber Located at RADC, Griffiss AFB, Rome, New York. PB91-107516 000,937
Measurement and Evaluation of a TEM (Transverse Electromagnetic)/Reverberating Chamber. PB91-120105 000,942
- REVERSED FLOW**
Determination of Column Selectivity Toward Polycyclic Aromatic Hydrocarbons. PB90-188343 000,395
Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography. PB90-188350 000,237
- REVIEWS**
Evaluation and Compilation of DOE (Department of Energy) Waste Package Test Data. Biannual Report: February 1988-July 1988. NUREG/CR-4735-V5 001,426
- RF SYSTEMS**
Performance of the High Power RF System for the NIST (National Institute of Standards and Technology) - Los Alamos Racetrack Microtron. DE89016082 001,673
- RHODIUM INTERMETALLICS**
Electronic Properties, Superconductivity and Stability of the Ordered Alloys of the Ti-Rh, Zr-Rh and Hf-Rh Intermetallic Systems. PB90-169301 001,556
- RIBONUCLEASE**
Interaction of Cytidine 3'-Monophosphate and Uridine 3'-Monophosphate with Ribonuclease A at the Denaturation Temperature. PB90-136367 000,265
- RIBONUCLEASE A**
Structure of Phosphate-Free Ribonuclease A Refined at 1.26 Å. PB90-206715 001,332
- RIBONUCLEIC ACIDS**
NBS Biological Macromolecule Crystallization Database. PB90-206012 001,328
- RIBOSOMES**
Mass Spectral Identification of 2-Amino-4-(5-Nitro-2-Furyl)thiazole Metabolites. PB90-170309 001,310
- RISK**
Risk Exposure and Risk Attitude of Homeowners in Fire Protection Investment Decisions. PB90-141383 000,107
Prototype Methodology for Fire Hazard Analysis. PB90-217936 000,190
- RISK ASSESSMENT**
Fire Risk Assessment Method: Case Study 2, Carpet in Offices. PB90-235037 000,140
Fire Risk Assessment Method: Case Study 3, Concealed Combustibles in Hotels. PB90-235045 000,141
Fire Risk Assessment Method: Description of Methodology. PB90-235052 000,142
Fire Risk Assessment Method: Case Study 4, Interior Finish in Restaurants. PB90-244450 000,145
U.S. Department of Energy Risk Assessment Methodology. Volume 1. DOE Risk Assessment Guideline Instructions, Resource Table, and Completed Sample. Volume 2. DOE Risk Assessment Worksheets. PB90-244484 000,789
Department of Justice Simplified Risk Analysis Guidelines. PB90-265257 000,795
Fire Risk Assessment Method: Guide to the Risk Methodology Software. PB91-107169 000,155
- ROBOTICS**
Design of a Conformal Tactile Sensing Array. AD-A215 871/5 001,042
Flight Telerobotic Services: From Functional Architecture to Computer Architecture. N90-29823/3 001,816
Requirements for Implementing Real-Time Control Functional Modules on a Hierarchical Parallel Pipelined System. N90-29891/0 001,089
Laboratory Robotics for Trace Analysis. PB90-152844 001,319
Electronics Design of the Infrared/Ultrasonic Sensing for a Robot Gripper. PB90-160383 001,108
Optimal Control of a Flexible Robot Arm. PB90-169384 001,092
Dynamic Equations for a Two-Link Flexible Robot Arm. PB90-169392 001,093
Robotic Assembly by Constraints. PB90-187907 001,095
Applications of Capacitive Array Sensors to Nondestructive Evaluation. PB90-192642 001,075
Note on NASREM Implementation. PB90-203134 001,097
DOE (Department of Energy)/NIST (National Institute of Standards and Technology) Workshop on Common Architectures for Robotic Systems. PB90-216839 001,098
World Modeling for Sensory Interactive Trajectory Generation. PB90-217712 000,019
Concept for a Reference Model Architecture for Real-Time Intelligent Control Systems (ARTICS). PB90-220286 001,048
Technique for the Detection of Robot Joint Gear Tightness. PB91-112086 001,105
Advanced Deburring and Chamfering System. PB91-112482 001,069
Application of Measurement Error Propagation Theory to Two Measurement Systems Used to Calculate the Position and Heading of a Vehicle on a Flat Surface. PB91-112797 001,392
- ROBOTS**
Hierarchical Control of Intelligent Machines Applied to Space Station Telerobots. N89-26471/7 001,814
NASREM: A Functional Architecture for Control of the Flight Telerobotic Servicer. N90-24325/4 001,815
Dynamic Equations for a Two-Link Flexible Robot Arm. PB90-169392 001,093
Testing. PB90-187790 001,094
Prediction-Based Vision for Robot Control. PB90-188467 001,096
Control Architecture for Cooperative Intelligent Robots. PB90-218389 001,099
Implementation of a Jacobian-Transpose Algorithm. PB90-219593 001,101
Quantitative Approach to Camera Fixation. PB90-228008 001,102
Approach to Telerobot Computing Architecture. PB90-244419 001,103
Stiffness Study of a Parallel Link Robot Crane for Shipbuilding Applications. PB90-254475 001,437
System Factors in Real-Time Hierarchical Control. PB90-269473 000,738
Model-Driven Determination of Object Pose for a Visually Servoed Robot. PB90-271628 001,104
Technique for the Detection of Robot Joint Gear Tightness. PB91-112086 001,105
Overview of Off-Line Robot Programming Systems. PB91-112292 001,106
- ROCK ISLAND ARSENAL**
System Requirements Analysis for the U.S. Army Rock Island Arsenal Tool Management System. PB90-269465 001,380
- ROGERS**
Precision Engineering and Experimental Physics: William A. Rogers, the First Academic Mechanician in the U.S. PB90-217977 001,017
- ROLL FORMING**
Ultrasonic Methods of Texture Monitoring for Characterization of Formability of Rolled Aluminum Sheet. PB90-135948 001,245
- ROLLING STOCK**
Crack Inspection of Railroad Wheel Treads by EMATs. PB91-101550 001,831
- ROOFING**
Update: ASTM (American Society for Testing and Materials) Standards for Single-Ply Membranes. PB90-170739 000,130
Strength and Creep-Rupture Properties of Adhesive-Bonded EPDM Joints Stressed in Peel. PB90-257676 001,827
- ROOFING MATERIALS**
Risk of Blistering of Built-Up Roofing Membranes Applied to Polyurethane Foam Insulation. PB91-112631 000,160
- ROOFS**
Daylighting and Thermal Performance of Roof Glazing in Atrium Spaces. PB90-149253 000,080
Thermal Bridging in Mechanical Fastened Low-Slope Roofs. PB91-111997 000,157
- ROOT CANAL OBTURATION**
Calcium Phosphate Root Canal Sealer-Filler. PB90-188533 000,061
- ROSSITER 137B STAR**
IUE Observations of the M Dwarfs CM Draconis and Rossiter 137B: Magnetic Activity at Saturated Levels. PB90-169764 000,037
- ROTATIONAL SPECTRA**
Torsional-Rotational Spectrum and Structure of the Formaldehyde Dimer. PB90-187840 000,385
Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Laser-Vaporized Metal Oxides: Rotational Spectra and Electric Dipole Moments of YO, LaO, ZrO, and HfO. PB91-101600 000,490
- ROTATIONAL STATES**
Translational and Internal State Distributions of NO Produced in the 193 nm Explosive Vaporization of Cryogenic NO Films: Rotationally Cold, Translationally Fast NO Molecules. PB90-171117 000,380
Rotational State Distributions Following the Photodissociation of Cl-CN: Comparison of Classical and Quantum Mechanical Calculations. PB90-241696 000,458
- ROUGHNESS**
Interaction of a Three-Dimensional Roughness Element with a Laminar Boundary Layer. AD-A178 668/0 001,451
- RUBIDIUM FLUORIDES**
FTS Infrared Measurements of Alkali Halides in the Gas Phase: Rubidium Fluoride and Cesium Fluoride. PB90-205790 000,415
- RUST**
Measuring the Extent of Rust on Steel After Abrasive Blasting: A Feasibility Study. PB90-195033 001,193
- RUSTING**
Effect of Soil Resistivity and Soil Temperature on the Corrosion of Galvanically Coupled Metals in Soil. PB91-112169 001,203
- RUTHENIUM**
Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, 1 December 1987-30 November 1988. DE89003342 000,308
Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Final Report, December 1, 1981-December 4, 1989. DE90003244 000,310
- RUTHENIUM OXIDES**
Redox Reactions with Colloidal Metal Oxides: Comparison of Radiation-Generated and Chemically Generated Ruthenium Dioxide Dihydrate and Colloids. PB90-153461 000,338
- RUTILE**
Influence of Surface Structure on Mechanisms of Stimulated Desorption. PB90-218132 000,435
Dynamics of O(1+) Desorption from TiO(sub 2). PB90-218330 000,441
- RYDBERG CONSTANT**
Rydberg Constant and Fundamental Atomic Physics. PB90-170747 001,703
- SALES**
Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales. PB91-112367 000,992
- SAMARIUM BARIUM CUPRATES**
Antiferromagnetic Ordering in Superconducting and Oxygen-Deficient Non-superconducting R_{Ba}2Cu3O(7-δ) Compounds (R = Nd and Sm). PB90-261413 001,625
- SAMPLING**
Survey Sampling Methods. PB90-170127 001,301
Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques. PB90-170432 000,233
Effects of Timing Jitter in Sampling Systems. PB90-188491 001,007
- SAMPLING VOLTAGE TRACKERS**
Characterization of a Sampling Voltage Tracker for Measuring Fast, Repetitive Signals. PB91-107458 000,935

KEYWORD INDEX

- SAN SALVADOR ISLAND**
Laboratory Studies of Some European Artifacts Excavated on San Salvador Island.
PB91-101071 000,057
- SATELLITE THEORY**
Simplifications in the Theory of Artificial Satellites.
PB90-205758 001,821
- SCAN GENERATOR**
Versatile Scan Generator and Data Collector for Scanning Tunneling Microscopes.
PB90-205931 001,013
- SCANNING ELECTRON MICROSCOPE**
Scanning Electron Microscope-Based Metrological Electron Microscope System and New Prototype Scanning Electron Microscope Magnification Standard.
PB90-207069 001,016
- SCANNING ELECTRON MICROSCOPES**
Low-Profile High-Efficiency Microchannel-Plate Detector System for Scanning Electron Microscopy Applications.
PB90-261330 001,628
- SCANNING ELECTRON MICROSCOPY**
SEM (Scanning Electron Microscope) Imaging and Analysis of Submicrometer Particles in Air and Water Samples.
PB90-150194 000,215
Inspection of Single-Point Diamond Turning Tools at Low Accelerating Voltage in a Scanning Electron Microscope.
PB90-152489 001,107
Fingerprinting of Chemical Species in Microparticles: Correlative Laser and Electron Microprobe Studies.
PB90-152570 000,218
Monte Carlo Electron Trajectory Simulations for Scanning Electron Microscopy and Microanalysis: An Overview.
PB90-152620 000,223
Specimen Biasing at Low Accelerating Voltages.
PB90-170804 001,569
Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope).
PB90-170960 000,868
Magnetic Microstructure of Thin Films and Surfaces: Exploiting Spin-Polarized Electrons in the SEM and STM.
PB90-188210 000,388
Magnetic Microstructure Imaging Using Scanning Electron Microscopy with Polarization Analysis.
PB90-206848 001,015
New Approach to Accurate X-ray Mask Measurements in a Scanning Electron Microscope.
PB90-218025 001,440
Low-Profile Microchannel-Plate Electron Detector System for SEM.
PB91-112573 001,652
- SCANNING LIGHT MICROSCOPY**
Fluorescence Technique for Determining the Porosity of Geologic Core Samples on a Macro- and Microscale.
PB90-170705 001,385
- SCANNING SCATTERING MICROSCOPES**
Scanning Scattering Microscope with Hemispherical Mirror and Microfocused Beam.
PATENT-4 954 722 000,996
- SCANNING TUNNELING MICROSCOPE**
Versatile Scan Generator and Data Collector for Scanning Tunneling Microscopes.
PB90-205931 001,013
- SCANNING TUNNELING MICROSCOPY**
National Institute of Standards and Technology Molecular Measuring Machine: A Long-Range Scanning Tunneling Microscope for Dimensional Metrology.
PB90-136938 001,684
Modification of Hydrogen-Passivated Silicon by a Scanning Tunneling Microscope Operating in Air.
PB90-241407 001,617
Scanning-Tunneling-Microscopy Study of InSb(110).
PB91-134932 001,662
- SCATTER DIAGRAMS**
Concentration-Concentration Histograms: Scatter Diagrams Applied to Quantitative Compositional Maps.
PB90-150152 000,212
- SCATTERING CROSS SECTIONS**
Measurement of the (93)Nb(n,n') Fission Spectrum Cross Section.
PB90-193590 001,722
- SCENE ANALYSIS**
Merging 3-D Symbolic Descriptions Obtained from Multiple Views of a Scene.
PB90-254665 000,775
- SCHEDULING**
Mathematical Decomposition and Simulation in Real-Time Production Scheduling.
PB90-254483 001,053
- SCHOOL BUSES**
Assessment of the Fire Performance of School Bus Interior Components.
PB90-265307 001,833
- SCINTILLATION COUNTERS**
Development of a sup 3 He/Xe Gas Scintillation Counter to Measure the sup 3 He(n,p)T Cross Section in the Intermediate Energy Range.
DE89004815 001,670
Calibration of Scintillation Cells for Radon-222 Measurements at the U.S. Environmental Protection Agency.
PB90-255324 001,417
- SCRATCH AND DIG STANDARDS**
Scratch Standard Is Only a Cosmetic Standard.
PB90-261439 001,497
- SEATS**
Assessment of the Fire Performance of School Bus Interior Components.
PB90-265307 001,833
- SECONDARY ELECTRONS**
Magnitude of Secondary Electron Contributions in Photon Stimulated Desorption.
PB90-218496 000,443
- SECONDARY ION MASS SPECTROSCOPY**
Ion Implantation Artifacts Detected by Secondary Ion Mass Spectrometry.
PB90-150178 000,213
Progress Toward a Semiconductor Depth Profiling Standard.
PB90-217944 001,604
- SECONDARY LABORATORIES**
Concept of Secondary Laboratories.
PB90-218397 001,743
- SECURE COMMUNICATION**
Secure Data Network System (SDNS) Network, Transport, and Message Security Protocols.
PB90-198946 000,718
- SECURITY**
U.S. Department of Energy Risk Assessment Methodology. Volume 1. DOE Risk Assessment Guideline Instructions, Resource Table, and Completed Sample. Volume 2. DOE Risk Assessment Worksheets.
PB90-244484 000,789
Automated Information System Security Accreditation Guidelines.
PB90-264102 000,792
- SECURITY LABELS**
Security Labels for Open Systems: An Invitational Workshop.
PB90-247446 000,790
- SEDIMENTS**
Application of a Nd:YAG Laser-Pumped Dye Laser to the Determination of Nickel in River Sediment Using Nonresonance Flame Atomic Fluorescence Spectrometry.
PB90-149428 000,988
Determination of Hydrophilic Thiols in Sediment Porewater Using Ion-Pair Liquid Chromatography Coupled to Electrochemical Detection.
PB90-188442 000,238
- SEISMIC DETECTION**
Iterative Seismic Inversion.
PB90-170382 000,800
- SELF ADAPTIVE CONTROL SYSTEMS**
Control System Architecture for Multiple Autonomous Undersea Vehicles (MAUV).
PB91-111930 001,438
- SELF CALIBRATION**
Current Status of, and Future Directions in, Silicon Photodiode Self-Calibration.
PB90-187667 000,837
- SELF CONSISTENT FIELDS**
Comparison of Direct and through Water Binding of Platinum Amines to the Phosphate Anion.
PB90-169319 000,350
- SELF DIFFUSION (SOLID STATE)**
Self-Diffusion Measurements of a Probe in Various Bulk Polymers: A Temperature Dependence.
PB90-271677 000,551
- SEMICONDUCTOR DETECTORS**
Reflectometer for Measurements of Scattering from Photodiodes and Other Low Scattering Surfaces.
PB90-261207 000,844
- SEMICONDUCTOR DEVICES**
Center for Electronics and Electrical Engineering Technical Publication Announcements. Covering Center Programs, April-June 1989, with 1990 CEEE Events Calendar.
PB90-207309 000,823
U.S. Investment Strategies for Quality Assurance.
PB90-231150 001,483
Test Structure Data Classification Using a Directed Graph Approach.
PB90-241399 000,874
Planar Silicon Photosensors: An Overview.
PB90-254582 000,840
Semiconductor Technology for the Non-Technologist, Second Edition.
PB91-107193 000,880
Center for Electronics and Electrical Engineering Technical Publication Announcements Covering Center Programs, January-March 1990, with 1990 CEEE Events Calendar.
PB91-107201 000,881
- SEMICONDUCTOR DOPING**
Ion Implantation Artifacts Detected by Secondary Ion Mass Spectrometry.
PB90-150178 000,213
Factors That Affect Reproducibility in SIMS Analysis of Semiconductors.
PB91-112045 001,645
- SEMICONDUCTOR LASERS**
Optical Feedback Locking of Semiconductor Lasers.
PATENT-4 907 237 001,467
Optical Stabilization of Semiconductor Lasers.
PB91-134098 001,504
- SEMICONDUCTOR MATERIALS**
Effect of Annealing Conditions on Precipitate and Defect Evolution in Oxygen Implanted SOI Material.
PB90-187774 001,574
- SEMICONDUCTORS**
Semiconductor Technology for the Non-Technologist, Second Edition.
PB91-107193 000,880
High-Precision Optical Reflectometer for the Study of Semiconductor Materials and Structures.
PB91-111963 000,884
- SEMICONDUCTORS (MATERIALS)**
Center for Electronics and Electrical Engineering Technical Progress Bulletin Covering Center Programs, July to September 1989, with 1990 CEEE Events Calendar.
PB90-188095 000,905
Metrological Electron Microscope for the Certification of Magnification and Linewidth Artifacts for the Semiconductor Industry.
PB90-192444 001,009
Center for Electronics and Electrical Engineering Technical Publication Announcements. Covering Center Programs, April-June 1989, with 1990 CEEE Events Calendar.
PB90-207309 000,823
SPARCOL: A Front End for the MAIN2 Program.
PB91-107185 001,643
- SENSORS**
NBS (National Bureau of Standards) NDE (Nondestructive Evaluation) Program.
PB90-187527 001,279
- SEPARATION**
Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography.
PB90-188350 000,237
Separation of Hydrophilic Thiols Using Reversed-Phase Chromatography with Trihaloacetate Buffers.
PB90-188434 000,399
- SEPARATION PROCESSES**
Method and Apparatus for Supercritical Fluid Extraction Solution Separation.
PATENT-4 962 275 000,316
Basics of Chemical Instrumentation. Volume 1. Separation Methods.
PB90-198458 000,242
Overview of Membrane Research at NIST/CCT.
PB90-271594 000,482
Separation of Amino Acids Using Composite Ion Exchange Membranes.
PB91-133975 001,314
Investigations of Selectivity in Reversed-Phase Liquid Chromatography on Chemically Bonded C18 Phases.
PB91-135012 000,518
- SERIAL SECTIONING**
Serial Sectioning of Hardened Cement Paste for Scanning Electron Microscopy.
PB90-195009 000,562
- SERVICE LIFE**
Institute for Materials Science and Engineering, Fracture and Deformation Division: Technical Activities 1989.
PB90-155359 001,663
Study of Meteorological Processes Important in the Degradation of Materials through Surface Temperature.
PB90-222720 001,228
Models of Transport Processes in Concrete.
PB91-107219 001,428
- SETTING TIME**
Setting Time and Strength to Concrete Using the Impact-Echo Method.
PB90-170838 000,131
- SHEAR PROPERTIES**
Similarity and Bifurcation in Unstable Viscoplastic Shear.
PB90-241357 001,615
- SHEETS**
Surface Forces and Viscosity of Water Measured between Silica Sheets.
PB90-152901 000,334
- SHIPBUILDING**
Stiffness Study of a Parallel Link Robot Crane for Shipbuilding Applications.
PB90-254475 001,437
- SHIPPING CONTAINERS**
Quality Assurance and Spent Fuel Shipments for Research Reactors.
PB90-193509 001,424

KEYWORD INDEX

SLOSHING

- SHOCK TUBES**
Single Pulse Shock Tube Studies on the Stability of 1-Phenylbutene-2. PB90-217860 000,433
- SICK BUILDING SYNDROME**
Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results. PB90-164484 000,084
- SIGNAL PROCESSING**
Center for Electronics and Electrical Engineering Technical Progress Bulletin Covering Center Programs, July to September 1989, with 1990 CEEE Events Calendar. PB90-188095 000,905
- SIGNALS**
Center for Electronics and Electrical Engineering Technical Publication Announcements. Covering Center Programs, April-June 1989, with 1990 CEEE Events Calendar. PB90-207309 000,823
- SILANE**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition. PB90-187659 000,288
High Resolution Infrared Spectrum of (28)SiH(sub 3)D from 1450 to 1710 cm(-1). PB90-188376 000,396
Spatial Distribution of a-Si:H Film-Producing Radicals in Silane rf Glow Discharges. PB90-205949 000,277
Surface Reaction Probability of Film-Producing Radicals in Silane Glow Discharges. PB90-271297 000,279
- SILANES**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition. PB90-187659 000,288
Chemisorption of Chlorosilanes and Chlorine on Si(111) 7x7. PB91-101659 000,492
Investigations of Selectivity in Reversed-Phase Liquid Chromatography on Chemically Bonded C18 Phases. PB91-135012 000,518
- SILICA GLASS**
Failure of Fused Silica Fibers with Subthreshold Flaws. PB90-152786 001,132
- SILICATE MINERALS**
Interfacial Energy States of Moisture-Exposed Cracks in Mica. PB90-188582 001,386
Measuring Surface Forces to Explore Surface Chemistry: Mica, Sapphire and Silica. PB90-241548 000,453
Lithiomarsturite, a New Member of the Pyroxenoid Group, from North Carolina. PB90-261322 001,388
- SILICON**
Patterson Fourier Analysis of the Icosahedral (Al,Si)-Mn Alloy. PB90-135799 001,243
Effect of Electron-Hole Plasmas on the Density of States of Silicon and GaAs. PB90-136284 001,524
Absorption Cross Section of As in Si. PB90-136698 001,532
Artifacts Observed in Oxygen Profiles of SIMOX Samples by Secondary Ion Mass Spectrometry. PB90-149477 000,211
Selected-Area Channeling Pattern and Defect Etch Study of Silicon Implanted with Oxygen. PB90-152513 000,867
Reactions between Silicon and Nitrogen. Part 2. Microstructure. PB90-152638 000,269
Influence of Iron on the Reaction between Silicon and Nitrogen. PB90-152661 000,330
Evaluation of Instrumental Correction Factors for Infrared Absorption Concentration Measurements. PB90-170044 000,229
Fourier Transform Infrared (FTIR) Determination of Interstitial Oxygen Concentration of Single-Side-Polished Silicon Wafers. PB90-170762 000,234
Measurement of Vanadium Impurity in Oxygen-Implanted Silicon by Isotope Dilution and Resonance Ionization Mass Spectrometry. PB90-192345 000,240
Field-Ion Energy Spectroscopy of Gold Overlayers on Silicon. PB90-192584 001,589
Semiconductor Measurement Technology. EPROP: An Interactive FORTRAN Program for Computing Selected Electronic Properties of Gallium Arsenide and Silicon. PB90-222738 001,609
Modification of Hydrogen-Passivated Silicon by a Scanning Tunneling Microscope Operating in Air. PB90-241407 001,617
- Surface-Field-Induced Feature in the Quantum Yield of Silicon Near 3.5 eV. PB90-261058 000,843
Shape of the Silicon Absorption Coefficient Spectrum Near 1.63 eV. PB91-101238 001,500
Chemisorption of Chlorosilanes and Chlorine on Si(111) 7x7. PB91-101659 000,492
Summary Abstract: The Chemisorption of SiCl4, Si2Cl6, and Chlorine on Si(111) 7x7. PB91-134924 000,517
- SILICON ALLOYS**
Quasicrystalline Structures of Transition Metal/Metalloid Glasses. DE86002932 001,242
- SILICON CARBIDES**
Damage-Enhanced Creep in a Siliconized Silicon Carbide: Mechanics of Deformation. PB90-135930 001,058
Electrical Characterization of Beta Silicon Carbide MIS (Metal-Insulator-Semiconductor) Capacitors with Thermally Grown or Chemical-Vapor Deposited Oxides. PB90-136615 000,866
Corrosion Reactions in SiC Ceramics. PB90-193319 001,146
Damage Enhanced Creep in a Siliconized Carbide: Phenomenology. PB90-193566 001,147
MIS Capacitor Studies on Silicon Carbide Single Crystals: Final Report for May 8, 1989 to November 8, 1989. PB90-257718 000,875
Comparison of Methods for Determining Fiber/Matrix Interface Frictional Stresses in Ceramic Matrix Composites. PB90-260985 001,185
Fracture Resistance Behavior of Silicon Carbide Whisker-Reinforced Alumina Composites with Different Porosities. PB90-261215 001,186
Internal Strain (Stress) in an SiC-Al Particle-Reinforced Composite: An X-ray Diffraction Study. PB91-107425 001,188
Fracture Toughness Behavior of a Silicon Carbide Whisker-Reinforced Alumina Ceramic at Selected Porosities. PB91-134197 001,167
- SILICON CHLORIDES**
Resonance Enhanced Multiphoton Ionization Spectra of the SiCl Radical between 430 and 520 nm. PB90-170028 000,360
Summary Abstract: The Chemisorption of SiCl4, Si2Cl6, and Chlorine on Si(111) 7x7. PB91-134924 000,517
- SILICON DIOXIDE**
Failure of Fused Silica Fibers with Subthreshold Flaws. PB90-152786 001,132
Surface Forces and Viscosity of Water Measured between Silica Sheets. PB90-152901 000,334
Theory of Chemically Induced Kink Formation on Cracks in Silica. 2. Force Law Calculations. PB90-170317 001,141
X-ray Photoelectron Spectroscopy of O 1s and Si 2p Lines in Films of SiO(sub x) Formed by e-beam Evaporation. PB90-192741 001,593
Theory of Chemically Induced Kink Formation on Cracks in Silica. I. 3-D Crack Green's Functions. PB90-193285 001,145
Silica Particle Synthesis in a Counterflow Diffusion Flame Reactor. PB90-193608 000,585
Effects of Boron Implantation on Silicon Dioxide Passivated HgCdTe. PB90-271172 000,291
Investigations of Selectivity in Reversed-Phase Liquid Chromatography on Chemically Bonded C18 Phases. PB91-135012 000,518
- SILICON FILMS**
Surface Reaction Probability of Film-Producing Radicals in Silane Glow Discharges. PB90-271297 000,279
Interface Instabilities during Laser Melting of Thin Films. PB90-271552 001,635
- SILICON FLUORIDES**
Photon Stimulated Desorption of Fluorine from Silicon Etched by XeF2. PB91-135038 000,519
- SILICON NITRIDES**
Wear Surface Analysis of Silicon Nitride. PB90-136532 001,112
Reactions between Silicon and Nitrogen. Part 2. Microstructure. PB90-152638 000,269
- SILICON ON INSULATOR**
Nondestructive Characterization of Oxygen-Ion-Implanted Silicon-on-Insulator Using Multiple-Angle Ellipsometry. PB91-133967 000,890
- SILICON OXIDES**
Bonding Structure of Silicon Oxide Films. PB90-149329 001,536
X-ray Photoelectron Spectroscopy of O 1s and Si 2p Lines in Films of SiO(sub x) Formed by e-beam Evaporation. PB90-192741 001,593
- SILICON SOLAR CELLS**
Diagnostics of Glow Discharges Used to Produce Hydrogenated Amorphous Silicon Films: Annual Subcontract Report, June 15, 1987--November 30, 1988. DE89000887 000,963
- SILICON TRANSISTORS**
Physics for Numerical Simulation of Silicon and Gallium Arsenide Transistors. PB90-271107 000,877
- SILVER IONS**
Glycine Permeation through Na(1+), Ag(1+) and Cs(1+) - Forms of Perfluorosulfonated Ion Exchange Membranes. PB90-170465 000,369
- SILYL RADICALS**
New Electronic Spectrum of the SiH(sub 3) Radical Observed Using Multiphoton Ionization Spectroscopy. PB90-170010 000,359
- SIMOX**
Selected-Area Channeling Pattern and Defect Etch Study of Silicon Implanted with Oxygen. PB90-152513 000,867
- SIMPLE NETWORK MANAGEMENT PROTOCOL LIBRARY**
SNMPLIB: A Simple Network Management Protocol Function Library for IBM PC Compatible Computers. PB91-120188 000,735
- SIMULATION TEST DATA**
Effects of Systematic Error, Estimates and Uncertainties in Chemical Mass Balance Apportionments: Ouail Roost II Revisited. PB91-134312 000,980
- SINGLE CRYSTALS**
Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals. PB90-209594 001,601
Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals. PB91-101089 001,636
- SINGLE ION MICROSCOPY**
Hg(1+) Single Ion Spectroscopy. PB90-260928 001,755
- SINGLE SOLUTION CIRCUIT**
Initial Laboratory Evaluation of a Single Solution Circuit Cycle for Use with Nonazeotropic Refrigerants. PB91-112862 000,960
- SINTERING**
Porosity in Spinel Compacts Using Small-Angle Neutron Scattering. PB90-170093 001,138
Pressure Sintering and Transformation Toughening of Zinc Sulfide. PB90-271156 001,160
- SITE SURVEYS**
Tilt Observations Using Borehole Tiltmeters 2. Analysis of Data from Yellowstone National Park. PB90-136326 001,383
Systems and Instruments in Site Surveys. PB90-205808 000,944
Power Quality Site Surveys: Facts, Fiction, and Fallacies. PB90-261298 000,826
Power Quality Site Surveys: Facts, Fiction, and Fallacies. PB90-261306 000,827
- SIZE SCREENING**
Microcomputer Programs for Size Exclusion Chromatography. PB90-136425 000,318
- SLAGS**
Experimental and Model Determinations of Coal Mineral and Slag Phase Equilibria. PB90-153495 000,951
- SLIDING**
Comparison of Methods for Determining Wear Volumes and Surface Parameters of Spherically Tipped Sliders. PB90-193558 001,227
- SLIDING FRICTION**
Role of Interfacial Grain-Bridging Sliding Friction in the Crack-Resistance and Strength Properties of Nontransforming Ceramics. PB90-150095 001,128
Initial Frictional Behavior during the Wear of Steel, Aluminum, and Poly(Methyl Methacrylate) on Abrasive Papers. PB90-170077 001,224
- SLOSHING**
Survey of Instrumentation for Slush Hydrogen Systems. PB90-187857 000,599

KEYWORD INDEX

SMALL ANGLE SCATTERING

- Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments.
PB90-153487 001,208
- Analysis of SAS Data Dominated by Multiple Scattering.
PB90-241274 001,612

SMALL BUSINESSES

- Technology-Based Economic Development: A Study of State and Federal Technical Extension Services.
PB90-257635 000,013
- Innovation: Analyzing the Process.
PB91-134296 000,016

SMALL COMPUTER SYSTEMS

- Domestic Disaster Recovery Plan for PCs, OIS, and Small VS Systems.

SMOKE

- Burning, Smoke Production, and Smoke Dispersion from Oil Spill Combustion.
PB90-146374 000,987
- Experiments of Piston Effect on Elevator Smoke Control.
PB90-169582 000,129
- Fire Experiments of Zoned Smoke Control at the Plaza Hotel in Washington DC.
PB90-207259 000,093
- Estimating Air Leakage through Doors for Smoke Control.
PB90-218298 000,095
- Exhaust Gas Analysis for Harmful Species: 19F1A Fire Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
- Measurement of Large Scale Oil Spill Burns.
PB90-261033 000,975
- Toxic Potency of Fire Smoke: Measurement and Use.
PB90-261231 000,981
- Performance Testing for the Corrosivity of Smoke.
PB90-261355 000,592
- Smoke Measurement Results from the Cone Calorimeter.
PB90-271032 000,150
- Smoke and Soot Data Determinations in the Cone Calorimeter.
PB90-271040 000,151
- Quantitative Assessment of Smoke Toxicity Hazards in Large Structures.
PB90-271222 000,152
- Plaza Hotel Fire Experiments.
PB91-112334 000,158

SMOKE ABATEMENT

- Experimental Fire Tower Studies of Elevator Pressurization Systems for Smoke Control.
PB90-193251 000,188

SMOKING

- Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales.
PB91-112367 000,992

SOCIAL PSYCHOLOGY

- Detection: Overview of Historical, Societal, and Technical Issues.
PB90-254459 000,250

SOCIOECONOMIC FACTORS

- Socioeconomic Barriers in Computerizing Materials Data.
PB91-118463 001,063

SODIUM

- Coupled Channel Quantum Scattering Study of Alignment Effects in Na(doublet P(3/2)) + He -> Na(doublet P(1/2)) + He Collisions.
PB90-170937 000,373
- Mechanism of Collisionally Induced Transitions among Fine-Structure Levels: Semiclassical Calculations of Alignment Effects in the Na-He System.
PB90-171075 000,379
- Differential Cross Section for Na Fine-Structure Transfer Induced by Na and K Collisions.
PB90-205857 001,725

SODIUM ATOMS

- Observation of Associative Ionization of Ultracold Laser-Trapped Sodium Atoms.
PB90-149139 001,686
- Laser-Induced Photoassociation of Ultracold Sodium Atoms.
PB90-193293 001,719
- Differential, Partial Cross Sections for Electron Excitation of the Sodium 3P State.
PB91-101287 001,771

SODIUM IONS

- Glycine Permeation through Na(1+), Ag(1+) and Cs(1+) - Forms of Perfluorosulfonated Ion Exchange Membranes.
PB90-170465 000,369

SOFT X RAYS

- Ultraviolet and Soft X-ray Measurement Services at NBS (National Bureau of Standards).
PB90-170846 001,476
- Soft X-ray Optics Characterization on Surf II.
PB90-206954 001,735

SOFTWARE

- NIST-PCTS: National Institute of Standards and Technology-POSIX Conformance Test Suite.

SOIL MICROBIOLOGY

- Significance of Cell Fluorescence Color of Acridine Orange-Stained 'Thiobacillus ferrooxidans' Under Epifluorescence Microscopy.
PB91-135046 001,346

SOIL TESTS

- Energy Transfer Mechanism in SPT (Standard Penetration Test).
PB90-170184 000,574

SOLAR ENERGY

- Evaluation of Solar Energy Inventions.
PB91-133918 000,965

SOLAR WATER HEATERS

- Comparison of Experimental and Calculated Performance of Integral Collector-Storage Solar Water Heaters.
PB91-112185 000,964

SOLID-SOLID INTERFACES

- Guided Interface Waves.
PB91-118158 001,189

SOLID SOLUTIONS

- Calculation of the Anisotropy of Equilibrium Surface Composition in Metallic Solid Solutions Using the Embedded Atom Method.
PB90-192733 000,409

SOLID WASTES

- Review of Current Research and Activities Involving Characterization, Abatement and Disposal of Lead-Containing Paint Films.
PB90-225954 000,984

SOLIDIFICATION

- Development of Metastable Processing Paths for High Temperature Alloys.
AD-A210 550/0 001,240
- Initial Conditions Implied by t(1/2) Solidification of a Sphere with Capillarity and Interfacial Kinetics.
PB90-188426 001,579
- Instability of a Taylor-Couette Flow Interacting with a Crystal-Melt Interface.
PB90-192352 001,586

SOLIDS

- Production and Spectroscopy of Molecular Ions Isolated in Solid Neon.
AD-A213 723/0 000,305

SOLUBILITY

- Reply to Comment on 'Aqueous Solubility Relationships for Two Types of Calcium Silicate Hydrate.'
PB90-152828 000,333
- Relationship between the Carbon-Number of N-Paraffins and Their Solubility in Supercritical Solvents.
PB90-188202 000,387

SOLUTIONS

- Growth of a Coherent Precipitate from Supersaturated Solution.
PB90-169434 000,352

- Molecular Weight and Concentration Dependences of the Terminal Relaxation Time and Viscosity of Entangled Polymer Solutions.

- PB90-170796 000,532
- Characterization of Branching Architecture Through 'Universal' Ratios of Polymer Solution Properties.
PB91-112128 000,553

SOLVATION

- Multicomponent Cluster Ions. The Proton Solvated by Ch3Cn/H2O.
AD-A167 880/4 000,295

SOLVENT EXTRACTION

- Method and Apparatus for Supercritical Fluid Extraction Solution Separation.
PATENT-4 962 275 000,316

SOLVENTS

- Relationship between the Carbon-Number of N-Paraffins and Their Solubility in Supercritical Solvents.
PB90-188202 000,387
- Formation and Melting of Solvent Crystals in Thermoreversible Polymer Gels.
PB90-271396 000,549

SOMMERFELD CONSTANT

- High Accuracy Determination of the Fine Structure Constant via Measurement of the Proton Gyromagnetic Ratio.
PB90-242256 001,748

SOOT

- Pattern Differences in Laser Microprobe Mass Spectra of Negative Ion Carbon Clusters.
PB90-149360 000,579
- Soot Particle Formation in Laminar Diffusion Flames.
PB90-188368 000,583
- Effect of Fuel Structure on Pathways to Soot.
PB90-190778 000,584
- Smoke Measurement Results from the Cone Calorimeter.
PB90-271032 000,150
- Smoke and Soot Data Determinations in the Cone Calorimeter.
PB90-271040 000,151

SOS (SEMICONDUCTORS)

- Investigation of Photoconductive Picosecond Microstrip Switches on Self-Implanted Silicon on Sapphire (SOS).
PB90-218124 000,873

SOUND GENERATORS

- Ultrasonic Measurements Research: Progress in 1988.
AD-A201 133/6 001,444

SOUND WAVES

- Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator.
PB91-135053 001,450

SOUTH POLE

- Solar and Stellar Observations from the South Pole.
PB90-261264 000,042

SPACE HEATERS

- Experimental Study on the Performance of a Combination Appliance for Domestic Hot Water and Space Heating.
PB90-269515 000,102
- Ventilation Characterization of the Consumer Product Safety Commission Combustion Test Chamber Facility.
PB91-107490 000,103

SPACE HEATING

- Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating.
PB90-185117 000,089

SPACE HVAC SYSTEMS

- Simulation of a Multizone Air Handler.
PB90-169913 000,087

SPACE PERCEPTION

- Motion, Depth, and Image Flow.
PB90-254350 001,350

SPACE SHUTTLE MAIN ENGINE

- Vortex Shedding Flowmeters for High Velocity Liquids.
PB90-192659 000,601

SPACE SHUTTLE SOLID ROCKET ENGINE

- Accuracy Analysis of the Space Shuttle Solid Rocket Motor Profile Measuring Device.
PB90-148362 001,817

SPACE STATIONS

- Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813
- Hierarchical Control of Intelligent Machines Applied to Space Station Telerobots.
N89-26471/7 001,814
- Flight Telerobotic Services: From Functional Architecture to Computer Architecture.
N90-29823/3 001,816
- Architecture to Support Teleoperation and Autonomy.
PB91-101428 001,820

SPACE TRANSPORTATION SYSTEM

- Autonomous Propulsion System Requirements for Placement of an STS (Space Transportation System) External Tank in Low Earth Orbit.
PB90-183302 001,818

SPACECRAFT COMMUNICATION

- Ku-Band Satellite Two-Way Timing Using a Very Small Aperture Terminal (VSAT).
PB90-218116 000,617

KEYWORD INDEX

STANDARD REFERENCE MATERIALS

- SPACECRAFT COMPONENTS**
Fire-Related Standards and Testing. N88-12522/4 001,812
- SPACECRAFT CONSTRUCTION MATERIALS**
Fire-Related Standards and Testing. N88-12522/4 001,812
- SPACECRAFT MAINTENANCE**
Architecture to Support Teleoperation and Autonomy. PB91-101428 001,820
- SPACECRAFT TEMPERATURE**
Nontoxic Heat Transport Fluids for Spacecraft Two-Phase Thermal Control Systems. PB90-196510 001,819
- SPECIAL RELATIVITY**
Fundamental Tests of the Isotropy of Space Using Fast-Beam Laser Spectroscopy. PB90-136359 001,678
Improved Kennedy-Thorndike Experiment to Test Special Relativity. PB90-241522 001,747
- SPECIFIC HEAT**
Specific Heat of the High-T(sub c) Superconductor (Bi(sub 1.66)Pb(sub 0.34))Ca(sub 2)Sr(sub 2)Cu(sub 3)O(sub 10). PB90-187600 001,573
Heat Capacity, Cp, of Fluids from Transient Hot Wire Measurements. PB90-192527 001,010
Biological Thermodynamic Data for the Calibration of Differential Scanning Calorimeters: Heat Capacity Data on the Unfolding Transition of Ribonuclease A in Solution. PB90-192600 000,405
Thermodynamic Properties of Ammonium Halogen Stanates 1. Heat Capacity and Thermodynamic Functions of Deuterated Ammonium Hexachlorostannate (ND4)2SnCl6 from 5.9 to 347 K. PB91-133843 000,510
Thermodynamics of the Divalent Metal Fluorides. 2. Heat Capacity of the Fast Ion Conductor BaSnF4 from 7 to 345 K. PB91-133850 000,511
Thermodynamic Properties of CFC Alternatives: A Survey of the Available Data. PB91-134460 000,515
- SPECIFICATIONS**
NIST (National Institute of Standards and Technology) Helps Navy Define Data Needed to Produce Hybrid Microcircuit Assemblies. PB90-169376 000,897
Specifications and Tolerances for Reference Standards and Field Standard Weights and Measures. 1. Specifications and Tolerances for Field Standard Weights (NIST (National Institute of Standards and Technology) Class F). Revised 1990. PB90-232752 001,018
Specifications for Cold Weather Concreting. PB91-133876 000,167
- SPECTRAL LINES**
Atomic Transition-Probability Measurements for Prominent Spectral Lines of Neutral Nitrogen. PB90-150269 001,688
Calculation of Spectral Line Profiles of Multi-Electron Emitters in Plasmas. PB90-206707 001,730
Characterization of a Pt-Ne Hollow Cathode Spectral Line Source. PB90-261199 001,496
- SPECTROMETERS**
Developments in Atomic-Absorption, X-ray Fluorescence, and Plasma-Emission Spectrometry for the Analysis of Metals and Ores. PB90-136961 001,390
National Scales of Spectrometry in the U.S. PB90-153396 001,472
- SPECTROPHOTOMETRY**
Pulse radiolytic studies of inter- and intramolecular electron transfer processes. Progress report. DE90008697 000,312
Tunable Dye Laser Spectrometry. PB90-192576 001,480
- SPECTRODIAMETERS**
Tunable Dye Laser Spectrometry. PB90-192576 001,480

Semiconductor Measurement Technology: A Software Program for Aiding the Analysis of Ellipsometric Measurements, Simple Spectroscopic Models. PB90-216847 001,602
SPARCOL: A Front End for the MAIN2 Program. PB91-107185 001,643
- SPECTROSCOPY**
Fluorescent and Scattered Spectra: Near-Threshold Excitation of Atoms, Molecules, and Solids. PB90-136417 001,680
Tunable Far Infrared Laser Spectroscopy. PB90-136458 001,469
National Scales of Spectrometry in the U.S.
- PB90-153396 001,472
Surface Sensitivity of Electron Spectroscopies. PB90-170788 000,235
Hg(1+) Single Ion Spectroscopy. PB90-187519 000,383
Laser-Enhanced Ionization Spectroscopy in Flames and Plasmas. PB90-193327 000,411
- SPECTRUM ANALYSIS**
Biases and Variances of Several FFT (Fast Fourier Transform) Spectral Estimators as a Function of Noise Type and Number of Samples. PB90-188566 000,643
Two Photon Resonance Enhanced Multiphoton Ionization Spectroscopy of Gas Phase O(sub 2) a(sub 1)Delta(sub g) between 305-350 nm. PB90-192279 000,400
Two Photon Resonance Enhanced Multiphoton Ionization Spectroscopy of the 3p(pi) D 2II(sub r) (v' = 0,1,2)--X 2II(sub r) (v' = 0) Bands of the Fluoromethyldyne Radical between 355 and 385 nm. PB90-192287 000,401
- SPEECH RECOGNITION**
DARPA Resource Management Continuous Speech Database (RM1). Speaker-Independent Training Data (for CD-ROM). PB90-500539 000,640
DARPA Resource Management Continuous Speech Database (RM1). Development Test and Evaluation Test Data and Scoring and Speech Header Software. NIST Speech Disc 2-4.1. (for CD-ROM). PB90-500547 000,641
- SPENT FUEL CASKS**
Quality Assurance and Spent Fuel Shipments for Research Reactors. PB90-193509 001,424
- SPENT FUELS**
Evaluation and Compilation of DOE (Department of Energy) Waste Package Test Data. Biannual Report: February 1988-July 1988. NUREG/CR-4735-V5 001,426
Corrosion of Zircaloy Spent Fuel Cladding in a Repository. PB90-207291 001,427
- SPHERES**
Gibbs-Thomson Equation for a Spherical Coherent Precipitate with Applications to Nucleation. PB90-188285 000,391
Mathematical Treatment of the Spherical Stereology. PB90-257593 001,291
- SPIN EXCHANGE**
Alignment Effects in Ca-He 5(1)P1 - 5(3)P1 Energy Transfer Half-Collisions. PB90-271487 001,767
- SPIN WAVES**
Long Wavelength Spin-Wave Energies and Linewidths of the Amorphous Invar Alloy Fe(sub 100-x)B(sub x). PB90-149337 001,539
Spin Dynamics of Amorphous Magnets. PB90-192303 001,584
- SPINEL**
Porosity in Spinel Compacts Using Small-Angle Neutron Scattering. PB90-170093 001,138
- SPRAYS**
Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, November 1986. DE89015147 000,575
Particulate and Droplet Diagnostics in Spray Combustion: Annual Report and Program Plan, March 1988. DE89015148 000,576
Particulate and Droplet Diagnostics in Spray Combustion: Annual Report, April 1989. DE89015149 000,577
Aerodynamic Effects on Fuel Spray Characteristics: Air-Assist Atomizer. DE89015819 000,600
- SPRINKLERS**
Quick Response Sprinklers in Chemical Laboratories: Fire Test Results. PB90-151721 000,126
Estimating the Environment and the Response of Sprinkler Links in Compartment Fires with Draft Curtains and Fusible Link-Actuated Ceiling Vents - Theory. PB91-118133 000,163
- SPUN YARNS**
Small-Angle Neutron Scattering Study for Characterizing the Water Sorbed in High Speed Spun Poly(Ethylene Terephthalate) Filaments. PB90-153487 001,208
- SQL DATABASE LANGUAGE**
Database Language SQL. Category: Software Standard. Subcategory: Database. FIPS PUB 127-1 000,739
- SQUARE ROOTS**
Unrestricted Algorithms for Reciprocals and Square Roots. AD-A178 897/5 001,282
- SSDL**
Concept of Secondary Laboratories. PB90-241423 001,361
Secondary Standards Laboratories: An Overview. PB90-241449 001,361
- STABILITY**
Stabilization of Taylor-Couette Flow Due to Time-Periodic Outer Cylinder Oscillation. PB90-219130 001,451
- STABILITY TESTS**
Chemiluminescence Instrumentation for Fuel and Lubricant Oxidation Studies. PB90-192428 000,405
- STAINLESS STEEL-301**
Effect of Soil Resistivity and Soil Temperature on the Corrosion of Galvanically Coupled Metals in Soil. PB91-112169 001,205
- STAINLESS STEELS**
Effect of Oxygen Transport and Resistivity of the Environment on the Corrosion of Steel. PB91-107292 001,200
- STANDARD FOR THE EXCHANGE OF PRODUCT MODEL DATA**
NIST (National Institute of Standards and Technology) STEP (Standard for the Exchange of Product Model Data) Documents Configuration Management System User's Guide. PB90-207788 000,746
National PDES Testbed Strategic Plan 1990. National PDES Testbed Report Series. PB91-107177 000,762
Development Plan: Product Data Exchange Network. National PDES Testbed Report Series. PB91-107227 000,763
NIST Step Class Library (Step into the Future). PB91-107235 000,764
Development Plan: Step Production Cell. National PDES Testbed Report Series. PB91-107243 000,765
Development Plan Validation Testing System. National PDES Testbed Report Series. PB91-107581 000,766
- STANDARD REFERENCE DATA**
Journal of Physical and Chemical Reference Data, Volume 18, Number 4, 1989. PB90-161241 000,339
Fundamental Equation for Water Covering the Range from the Melting Line to 1273 K at Pressures up to 25 000 MPa(a). PB90-161258 000,340
Toluene Thermophysical Properties from 178 to 800 K at Pressures to 1000 Bar. PB90-161266 000,341
Reduction Potentials of One-Electron Couples Involving Free Radicals in Aqueous Solution. PB90-161274 000,342
Photoemission Cross Sections for Atomic Transitions in the Extreme Ultraviolet Due to Electron Collisions with Atoms and Molecules. PB90-161282 000,284
Standard Reference Data Publications, 1987-1989. PB90-161704 001,277
Technical Activities 1989, Standard Reference Data Program. PB90-185109 000,382
NIST (National Institute of Standards and Technology) Standard Reference Data Products 1990 Catalog. PB90-219841 001,031
NBS/EPA Data Base of Evaluated Electron Ionization Mass Spectra. PB90-254426 000,249
Creating a Materials Data Base Builder and Producing Publications for Ceramic Phase Diagrams. PB91-112557 001,165
- STANDARD REFERENCE DATA PROGRAM**
Standard Reference Data Publications, 1987-1989. PB90-161704 001,277
- STANDARD REFERENCE MATERIALS**
Preparation and Certification of Standard Reference Material 1507: 11-Nor-Delta(sup9)-Tetrahydrocannabinol-9-Carboxylic Acid in Freeze-Dried Urine. PB90-136524 000,208
NBS (National Bureau of Standards) Standard Reference Material for Depth Profile Analysis. PB90-149345 000,321
pH Theory and Measurement. PB90-150038 000,323
Comparison of the NIST (National Institute of Standards and Technology) and European Gold Coating Standards. PB90-164278 001,175
Optical Calibration of Accurate Particle Sizing Standards at the U.S. National Bureau of Standards. PB90-169368 000,614
Isotopic Fractionation of Gallium on an Ion Exchange Column. PB90-169459 000,227

Development Plan: Product Data Exchange Network. National PDES Testbed Report Series. PB91-107227	000,763		
NIST Step Class Library (Step into the Future). PB91-107235	000,764		
Development Plan: Step Production Cell. National PDES Testbed Report Series. PB91-107243	000,765		
Directory of European Regional Standards-Related Organizations. PB91-107599	001,026		
Standards for Waveform Metrology Based on Digital Techniques. PB91-107664	000,832		
National Bureau of Standards Program in Open System Interconnection. PB91-112623	000,655		
Status of PDES-Related Activities (Standards and Testing). National PDES Testbed Report Series. PB91-112888	000,767		
Duplex Nickel Step Test Standards. PB91-118406	001,181		
Working Implementation Agreements for Open Systems Interconnection Protocols, March 1990. PB91-120113	000,769		
Calibration Procedures for Inductance Standards Using a Commercial Impedance Meter as a Comparator. PB91-120147	000,862		
Low-Level Radioactivity Standards at the National Bureau of Standards. PB91-134122	001,799		
Nuclear Analytical Methods in Standards Certification. PB91-134304	000,260		
Verifying and Validating for Maintainability. PB91-134858	000,770		
On-Wafer Microwave Standards at NIST. PB91-134965	000,893		
STARK EFFECT			
Improved Calculation of the Quadratic Stark Effect in the 6P (sub 3/2) State of Cs. PB90-170754	000,371		
Hydrogen Treatment of Stark Effects in Rydberg Atoms. PB90-190802	001,718		
STATE ESTIMATION			
State Occupancy Information for Performance Comparisons. PB91-112870	000,771		
STATE GOVERNMENT			
Technology-Based Economic Development: A Study of State and Federal Technical Extension Services. PB90-257635	000,013		
STATE PROGRAMS			
Technology-Based Economic Development: A Study of State and Federal Technical Extension Services. PB90-257635	000,013		
STATE SERVICES			
State Weights and Measures Laboratories: State Standards Program Description and Directory. PB90-257650	001,079		
STATIC HARDNESS TESTS			
Interface Trap Effects on the Hot-Carrier Induced Degradation of MOSFETs (Metal Oxide Semiconductor Field Effect Transistors) during Dynamic Stress. PB90-188525	000,871		
STATISTICAL ANALYSIS			
Samuel Stanley Wilks' Princeton Appointment, and Statistics at Princeton Before Wilks. PB90-136441	001,307		
Computational Examination of Orthogonal Distance Regression. PB90-150129	001,297		
Survey Sampling Methods. PB90-170127	001,301		
Guidelines for the Infrastructure of Statistical Software. PB90-187733	001,302		
History of the Section on Statistics and the Environment. PB90-254756	000,989		
STATISTICAL TESTS			
Exact Distribution-Free Tests for Equality of Several Linear Models. PB91-101626	001,306		
STEEL MAKING			
Noncontact Ultrasonic Sensors for High Temperature Process Control. PB90-136789	001,209		
Process Control Sensors: Status of AISI (American Iron and Steel Institute) Collaborative Programs. PB90-170689	001,212		
STEELS			
Intelligent Processing for Primary Metals.			
PB90-146549	001,210		
Initial Frictional Behavior during the Wear of Steel, Aluminum, and Poly(Methyl Methacrylate) on Abrasive Papers. PB90-170077	001,224		
Ultrasonic Method for Measuring Internal Temperature Distributions in Steel or Aluminum. PB90-170671	001,211		
Wide-Plate Crack-Arrest Tests Utilizing a Prototypical Pressure Vessel Steel. PB90-170770	001,429		
Measuring the Extent of Rust on Steel After Abrasive Blasting: A Feasibility Study. PB90-195033	001,193		
Weld Cracking in Massive Steel Forgings. PB90-206871	001,215		
Mechanical Properties and Fracture Toughness of AAR (Association of American Railroads) TC128 Grade B Steel and a Micro-Alloyed, Control-Rolled Steel, A 8XX Grade B, from -80F to + 73F. PB90-207796	001,216		
Determination of the NDT (Nil-Ductility Transition) Temperature and Charpy V-Notch Impact Properties of AAR (American Association of Railroads) TC128 Grades B Steel and A 8XX Grade B Steel. PB90-207804	001,217		
Imaging and Assessment of Corrosion on Coated and Uncoated Steel Using Thermal-Wave Electron Microscopy. PB90-218140	001,195		
Degradation of Organic Protective Coatings on Steel in Corrosive Environments. PB90-218355	001,196		
Guidelines for Pressure Vessel Safety Assessment. PB90-219619	001,219		
Application of Thermal-Wave Electron Microscopy to Imaging and Assessment of Corrosion on Rough Steel Surface. PB91-112524	001,204		
Residual Stress Measurements by Means of Neutron Diffraction. PB91-112581	001,265		
STELLAR ATMOSPHERES			
Grid of Low Metallicity Line-Blanketed LTE Model Stellar Atmospheres. PB90-271362	000,044		
STELLAR CORONAS			
Coronal Temperatures of Selected Active Cool Stars as Derived from Low Resolution 'Einstein' Observations. PB90-169566	000,032		
Goals for the Application of High-Resolution X-ray Spectroscopy to the Diagnosis of Stellar Coronal Plasmas. PB90-271495	000,047		
Einstein and Stellar Sources. PB90-271503	000,048		
STELLAR DISKS			
Stability of Kuzmin/Toomre Discs. PB90-169723	000,034		
STELLAR ENVELOPES			
Equation of State for Stellar Envelopes. 4. Thermodynamic Quantities and Selected Ionization Fractions for Six Elemental Mixes. PB90-207036	000,040		
STELLAR EVOLUTION			
Transition from Red Giant to Planetary Nebula. PB91-112359	000,049		
STELLAR MAGNETIC FIELDS			
Measurements of Stellar Magnetic Fields: Empirical Constraints on Dynamo and Rotational Evolution Theories. Abstract Only. N88-13185/9	000,028		
4 Meter FTS Observations of Photospheric Magnetic Fields on M Dwarfs. PB90-206913	000,039		
STELLAR SPECTRA			
Unusual Infrared Line Profiles in the Post-Asymptotic Giant Branch Star HD 56126. PB91-118398	000,053		
STELLAR WINDS			
Ultraviolet Variability of HD 45166 (qWR+ B8 V): Evidence for Stellar Wind Radiative Instabilities. PB90-169574	000,033		
Radio Continuum Emission from the Ionized Stellar Winds of Warm Supergiants. PB90-169749	000,036		
STEP			
QDES User's Guide. National PDES Testbed Report Series. PB90-250085	000,751		
Development Plan: Product Data Exchange Network. National PDES Testbed Report Series. PB91-107227	000,763		
STEP RESPONSE			
Step and Frequency Response Testing of Waveform Recorders. PB90-217829	001,443		
STEP STANDARD			
NIST SQL Database Loader: STEP Working Form to SQL. National PDES Testbed Report Series.			
PB90-256868	000,753		
STEP (STANDARD FOR THE EXCHANGE OF PRODUCT DATA)			
Extending the Standard for the Exchange of Product Data to Represent Two-Dimensional Apparel Pattern Pieces. PB90-247438	001,050		
STEP (STANDARD FOR THE EXCHANGE OF PRODUCT MODEL DATA)			
Status of PDES-Related Activities (Standards and Testing). National PDES Testbed Report Series. PB91-112888	000,767		
STEREOLOGY			
Mathematical Treatment of the Spherical Stereology. PB90-257593	001,291		
STEREOSCOPY			
Holographic Stereogram Displays from Computer-Generated Polygonal Models. PB90-261223	000,845		
STIFFNESS			
Stiffness Study of a Parallel Link Robot Crane for Shipbuilding Applications. PB90-254475	001,437		
STIRLING CYCLE			
Pulse Tube Refrigeration: A New Type of Cryocooler. PB90-192469	001,119		
STIRRERS			
Modular Magnetically Coupled High Speed Stirrer for Hermetically Sealed Chemical Reactors. PB90-188244	000,272		
STOKES RADIATION			
Measurement and Prediction of Raman Q-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8	000,302		
STORAGE TANKS			
Guidelines for Pressure Vessel Safety Assessment. PB90-219619	001,219		
STRAIN SOFTENING			
Flexural Behavior of Strain-Softening Solids. PB91-112052	001,164		
STRATEGY			
National PDES Testbed Strategic Plan 1990. National PDES Testbed Report Series. PB91-107177	000,762		
STRESS ANALYSIS			
Finite Element Code Downsized for Personal Computers. PB91-101212	001,667		
STRESS CORROSION			
Role of the Oxide Film in the Transgranular Stress Corrosion Cracking of Copper. PB91-112011	001,202		
Environment-Induced Cracking of Copper Alloys. PB91-117994	001,230		
Mechanism of Stress Corrosion Crack Growth Resistance of Al-Li-Cu Alloys: Role of Grain Boundary Precipitates. PB91-134817	001,205		
STRESS RELAXATION TESTS			
Analysis of the Corrections to the Normal Force Response for the Cone and Plate Geometry in Single Step Stress Relaxation Experiments. PB90-206137	000,538		
STRESS WAVES			
Finite Element Model of Stress Wave Topology in Unidirectional Graphite/Epoxy: Wave Velocities and Flux Deviations. PB90-136623	001,529		
STRESSES			
Effect of Temperature and Stress on the Time-to-Failure of EPDM T-Peel Joints. PB90-187865	000,133		
STRONTIUM			
Alignment Effects Involving Multiple Pathways: Electronic Energy Transfer of Sr 5s6p (1P)(sub 1) with Rare Gases. PB90-171067	000,378		
STRONTIUM BISMUTH CUPRATES			
Phase Equilibria and Crystal Chemistry in Portions of the System SrO-CaO-Bi2O3-CuO, Part 2 - The System SrO-Bi2O3-CuO. PB90-256835	001,627		
STRONTIUM OXIDES			
Phase Equilibria and Crystal Chemistry in Portions of the System SrO-CaO-Bi2O3-CuO, Part 2 - The System SrO-Bi2O3-CuO. PB90-256835	001,627		
STRUCTURAL ANALYSIS			
K(sub R)-Curve with Dugdale Model. PB90-169665	000,170		
Report to Congress on the Structural Assessment of the New U.S. Embassy Office Building in Moscow. PB90-256751	000,179		
Structural Assessment of the New U.S. Embassy Office Building in Moscow. PB90-256769	000,180		
Finite Element Code Downsized for Personal Computers. PB91-101212	001,667		
Structure: U.S. Office Building in Moscow.

Dynamical Aspects of Anisotropic Correlations in Supercooled Liquids. PB90-241613 *000,454*
- SUPERCRITICAL FLOW**
Relationship between the Carbon-Number of N-Paraffins and Their Solubility in Supercritical Solvents. PB90-188202 *000,387*
- SUPERCRITICAL FLUID CHROMATOGRAPHY**
Physicochemical Applications of Supercritical Fluid Chromatography. PB90-271206 *000,251*
- SUPERCRITICAL FLUIDS**
Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques. PB90-170432 *000,233*
- SUPERGIANT STARS**
Radio Continuum Emission from the Ionized Stellar Winds of Warm Supergiants. PB90-169749 *000,036*
- SUPERHELICAL DNA**
Neutron and Light-Scattering Studies of DNA Gyrase and Its Complex with DNA. PB90-206053 *001,330*
- SUPERHIGH FREQUENCIES**
Ku-Band Satellite Two-Way Timing Using a Very Small Aperture Terminal (VSAT). PB90-218116 *000,617*
- SUPERLATTICES**
Magnetoelasticity and Structure of Er/Y Superlattices. PB90-149444 *001,543*
Magnetic Structure of Dy-Y Superlattices. PB90-149451 *001,544*
- SUPERSATURATION**
Growth of a Coherent Precipitate from Supersaturated Solution. PB90-169434 *000,352*
- SUPPORTED LIQUID MEMBRANES**
Steady State Coupled Transport of Nitric Acid through a Hollow Fiber Supported Liquid Membrane. PB90-217837 *000,281*
- SUPPORTS**
Next-Generation Tension Strap Supports for Spaceborne Dewars. PB90-218033 *001,823*
Quantification of Heat Losses through Structural Supports for Shallow Trench Heat Distribution Systems. PB90-219585 *000,958*
- SURF II STORAGE RING**
Soft X-ray Optics Characterization on Surf II. PB90-206954 *001,735*
- SURFACE ANALYSIS**
Quest for Universal Curves to Describe the Surface Sensitivity of Electron Spectroscopies. PB90-192451 *001,587*
- SURFACE AREA**
Total Molecular Surface Areas as a Predictor for Reversed-Phase High Performance Liquid Chromatography in Various Organotin Systems. PB90-193301 *000,410*
- SURFACE BARRIER DETECTORS**
Calibration of Radon-222 Reference Instrument in Sweden. PB90-255274 *001,412*
- SURFACE CHEMISTRY**
Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, December 1, 1984-November 30, 1985. DE89014113 *000,309*
Surface Conductivity Changes in SnO(sub 2)(110): Effects of Oxygen. PB90-149436 *000,322*
Progress and Pitfalls in Quantitative Surface Analysis by Auger-Electron Spectroscopy and X-ray Photoelectron Spectroscopy. PB90-188228 *000,389*
Precision, Accuracy, and Uncertainty in Quantitative Surface Analyses by Auger-Electron Spectroscopy and X-ray Photoelectron Spectroscopy. PB90-205840 *000,417*
Reference Materials, Reference Data, and Reference Procedures for Surface Analysis: National and International Standards Activities. PB90-217894 *000,434*
ESDIAD (Electron Stimulated Desorption Ion Angular Distributions) of Small Molecules on Surfaces: A Few Caveats. PB90-218306 *000,440*
Determination of Molecular Structure at Surfaces Using Electron Stimulated Desorption. PB90-218348 *000,442*
Measuring Surface Forces to Explore Surface Chemistry: Mica, Sapphire and Silica. PB90-241548 *000,453*
- Structural Characterization of Thin Metal Overlayers by X-ray Photoelectron and Auger-Electron Forward Scattering. PB90-254491 *000,462*
Chemisorption of Chlorosilanes and Chlorine on Si(111) 7x7. PB91-101659 *000,492*
Application of Thermal-Wave Electron Microscopy to Imaging and Assessment of Corrosion on Rough Steel Surface. PB91-112524 *001,204*
- SURFACE COMPOSITION**
Calculation of the Anisotropy of Equilibrium Surface Composition in Metallic Solid Solutions Using the Embedded Atom Method. PB90-192733 *000,409*
- SURFACE DEFECTS**
Comparison of Methods for Determining Wear Volumes and Surface Parameters of Spherically Tipped Sliders. PB90-193558 *001,227*
- SURFACE ENERGY**
Surface Forces and Viscosity of Water Measured between Silica Sheets. PB90-152901 *000,334*
Surface Forces and Fracture in Brittle Materials. PB90-169426 *001,557*
Interfacial Energy States of Moisture-Exposed Cracks in Mica. PB90-188582 *001,386*
Interfacial Free Energy and Interfacial Stress: The Case of an Internal Interface in a Solid. PB91-118034 *001,266*
- SURFACE FINISHING**
Acoustic Emission Studies of Electron Beam Surface Modification of Aluminum. PB90-135955 *001,246*
Evaluation of a Surface Treatment to Improve the Erosion Resistance of Coquina Stone at Castillo de San Marcos. PB90-198938 *000,175*
- SURFACE MAGNETISM**
Micromagnetic Calculations of 180 deg Surface Domain Wall Magnetization Profiles with Comparison to Measurements. PB91-107557 *001,644*
Scanning Electron Microscopy with Polarization Analysis (SEMPA). PB91-112672 *001,655*
- SURFACE NAVIGATION**
Application of Measurement Error Propagation Theory to Two Measurement Systems Used to Calculate the Position and Heading of a Vehicle on a Flat Surface. PB91-112797 *001,392*
- SURFACE PROPERTIES**
Wear Surface Analysis of Silicon Nitride. PB90-136532 *001,112*
NBS (National Bureau of Standards) Standard Reference Material for Depth Profile Analysis. PB90-149345 *000,321*
Surface Sensitivity of Electron Spectroscopies. PB90-170788 *000,235*
Magnetic Microstructure of Thin Films and Surfaces: Exploiting Spin-Polarized Electrons in the SEM and STM. PB90-188210 *000,388*
Comparison of Methods for Determining Wear Volumes and Surface Parameters of Spherically Tipped Sliders. PB90-193558 *001,227*
- SURFACE REACTIONS**
Laser studies of chemical dynamics at the gas-solid interface. Progress report, January 1987-June 1989. DE90008698 *000,313*
Intramolecular Dynamics in Molecule-Surface Collisions: Excitation, Dissociation, and Selectivity of Reactivity. PB90-149196 *000,319*
Surface Phenomena and Their Influence on Ultrahigh Vacuum Gauges. PB90-169442 *001,003*
Modification of Hydrogen-Passivated Silicon by a Scanning Tunneling Microscope Operating in Air. PB90-241407 *001,617*
Spin-Orbit State Specific Laser Probing of the desorption Kinetics and Island Behavior of In on Si(100). PB90-241639 *000,455*
Surface Reaction Probability of Film-Producing Radicals in Silane Glow Discharges. PB90-271297 *000,279*
Vibrational Relaxation at Surfaces. PB91-112029 *000,493*
- SURFACE ROUGHNESS**
Scanning Scattering Microscope with Hemispherical Mirror and Microfocused Beam. PATENT-4 954 722 *000,996*
Measuring the Root-Mean-Square Value of a Finite Record Length Periodic Waveform. PB90-163924 *001,694*
- SURFACE SCIENCE**
Technical Activities 1989, Surface Science Division. PB90-161985 *001,554*
- SURFACES**
Transient Cooling of a Hot Surface by Droplets Evaporation. PB90-227968 *001,746*

- Non-Newtonian Molecular Dynamics and Thermophysical Properties. PB90-254657 001,461
- Issues and Future Directions in Subsecond Thermophysics Research. PB90-271248 001,763
- Dynamic Technique for Thermophysical Measurements at High Temperatures in a Microgravity Environment. PB90-271255 001,824
- THERMOREVERSIBLE MATERIALS**
Formation and Melting of Solvent Crystals in Thermoreversible Polymer Gels. PB90-271396 000,549
- THERMOTROPISM**
X-ray Analysis of a Liquid Crystal Phase Diacetylene Polymerization. PB91-101543 000,552
- THIAZOLES**
Mass Spectral Identification of 2-Amino-4-(5-Nitro-2-Furyl)thiazole Metabolites. PB90-170309 001,310
- THIMEROSAL**
Determination of Thimerosal in Biological Products by Liquid Chromatography with Inductively Coupled Plasma Mass Spectrometric Detection. PB90-190679 000,239
- THIN FILMS**
pH Sensors Based on Iridium Oxide. NUREG/CR-5484 000,994
- Magnetic Microstructure of Thin Films and Surfaces: Exploring Spin-Polarized Electrons in the SEM and STM. PB90-188210 000,388
- Observation of Gold Thin Film Growth with Reflection Electron Microscopy. PB91-101329 001,021
- THIOBACILLUS OXIDANS**
Significance of Cell Fluorescence Color of Acridine Orange-Stained 'Thiobacillus ferrooxidans' Under Epifluorescence Microscopy. PB91-135046 001,346
- THIOLS**
Separation of Hydrophilic Thiols Using Reversed-Phase Chromatography with Tris(halo)acetate Buffers. PB90-188434 000,399
- Determination of Hydrophilic Thiols in Sediment Porewater Using Ion-Pair Liquid Chromatography Coupled to Electrochemical Detection. PB90-188442 000,238
- THREE BODY PROBLEM**
Theoretical Study of the Three-Body Absorption Spectrum in Pure Rare Gas Fluids. PB90-153412 000,336
- THREE DIMENSIONAL BODIES**
Framework for Representing and Reasoning about Three-Dimensional Objects for Vision. PB90-218215 000,774
- THREE DIMENSIONAL DISPLAY SYSTEMS**
Holographic Stereogram Displays from Computer-Generated Polygonal Models. PB90-261223 000,845
- Toward Real-Time Animation of Holographic Video Images. PB90-271164 000,652
- THRESHOLD REBOUND**
Temperature Induced Rebound in Power MOSFETs. PB90-192675 000,872
- THRESHOLD VOLTAGE**
Investigation of the Threshold Voltage of MOSFETs with Position- and Potential-Dependent Interface Trap Distributions Using a Fixed-Point Method. PB91-112235 000,885
- TILTMETERS**
Tilt Observations Using Borehole Tiltmeters 2. Analysis of Data from Yellowstone National Park. PB90-136326 001,383
- Measurements of Tilt Using a Borehole Tiltmeter. PB90-261249 001,387
- TIME**
NIST (National Institute of Standards and Technology) Digital Time Service. PB90-261256 000,791
- TIME DEPENDENCE**
Time Dependent Simulation of Turbulent Combustion. PB90-271073 000,593
- TIME DOMAIN SPECTROSCOPY**
Time Domain Spectroscopy to Monitor the Condition of Cable Insulation. PB91-112466 001,431
- TIME MEASUREMENT**
Effects of Timing Jitter in Sampling Systems. PB90-188491 001,007
- Ku-Band Satellite Two-Way Timing Using a Very Small Aperture Terminal (VSAT). PB90-218116 000,617
- Outlook for Advances in the Realization of the SI Unit of Time. PB90-261017 000,633
- Preliminary Comparison between GPS and Two-Way Satellite Time Transfer. PB90-261181 000,635
- Time and Frequency Users Manual (Revised 1990). PB91-107532 000,638
- TIME-OF-FLIGHT SPECTROMETERS**
Optimized Design of the Chopper Disks and the Neutron Guide in a Disk Chopper Neutron Time-of-Flight Spectrometer. PB90-260977 001,756
- TIME STANDARDS**
Adoption of Standard Time. PB90-169756 000,625
- Preliminary Comparison between GPS and Two-Way Satellite Time Transfer. PB90-261181 000,635
- TIME TRANSFER**
Estimating Combined Errors Due to Propagation and Ephemeris and Their Effect on Time and Frequency Transfer. PB90-271016 000,636
- TIME TRANSFERS**
Fundamentals of Two-Way Time Transfers by Satellite. PB90-187717 000,626
- NIST-USNO (National Institute of Standards and Technology-United States Naval Observatory) Time Comparisons Using Two-Way Satellite Time Transfer. PB90-187725 000,627
- Impact of Atmospheric Non-Reciprocity on Satellite Two-Way Time Transfers. PB90-187741 000,628
- Two-Way Satellite Time Transfers between and Within North America and Europe. PB90-188558 000,629
- TIN ALLOYS**
Effect of Anisotropic Thermal Conductivity on the Morphological Stability of a Binary Alloy. PB90-271271 001,260
- TIN/DIBUTYL**
Di- and Tributyltin Species in Marine and Estuarine Waters. Inter-laboratory Comparison of Two Ultratrace Analytical Methods Employing Hydride Generation and Atomic Absorption or Flame Photometric Detection. PB90-170713 000,982

KEYWORD INDEX

- TIN INORGANIC COMPOUNDS**
Thermodynamic Properties of Ammonium Halogen Stan-
nates 1. Heat Capacity and Thermodynamic Functions of
Deuterated Ammonium Hexachlorostannate (ND₄)₂SnCl₆
from 5.9 to 347 K.
PB91-133843 000,510
- TIN ORGANIC COMPOUNDS**
Di- and Tributyltin Species in Marine and Estuarine
Waters. Inter-laboratory Comparison of Two Ultratrace
Analytical Methods Employing Hydride Generation and
Atomic Absorption or Flame Photometric Detection.
PB90-170713 000,982
Total Molecular Surface Areas as a Predictor for Re-
versed-Phase High Performance Liquid Chromatography
in Various Organotin Systems.
PB90-193301 000,410
- TIN OXIDES**
Review of Model Sensor Studies on Pd/SnO₂(110) Sur-
faces.
N90-24604/2 000,315
Oxygen Vacancies and Defect Electronic States on the
SnO(sub 2)(110)-1x1 Surface.
PB90-136490 001,527
Oxygen-Vacancy-Derived Defect Electronic States on the
SnO(sub 2)(110) Surface.
PB90-136508 001,528
Surface Conductivity Changes in SnO(sub 2)(110): Ef-
fects of Oxygen.
PB90-149436 000,322
Preparation of Well-Ordered, Oxygen-Rich SnO₂(110)
Surfaces via Oxygen Plasma Treatment.
PB90-260951 000,278
- TIN/TRIBUTYL**
Di- and Tributyltin Species in Marine and Estuarine
Waters. Inter-laboratory Comparison of Two Ultratrace
Analytical Methods Employing Hydride Generation and
Atomic Absorption or Flame Photometric Detection.
PB90-170713 000,982
- TISSUE-EQUIVALENT DETECTORS**
Soft-Tissue-Substitute Liquid.
PB90-149097 001,352
- TITANIUM ALLOYS**
Effect of Interstitial Elements on Phase Relationships in
the Titanium-Aluminum System.
PB90-196528 001,259
- TITANIUM DIOXIDE**
Influence of Surface Structure on Mechanisms of Stimu-
lated Desorption.
PB90-218132 000,435
Dynamics of O(1+) Desorption from TiO(sub 2).
PB90-218330 000,441
- TITANIUM INTERMETALLICS**
Electronic Properties, Superconductivity and Stability of
the Ordered Alloys of the Ti-Rh, Zr-Rh and Hf-Rh Isoe-
lectronic Systems.
PB90-169301 001,556
- TOBACCO**
Measuring Medical Cost and Life Expectancy Impacts of
Changes in Cigarette Sales.
PB91-112367 000,992
- TOLERANCE LIMITS**
Computing Factors for Exact Two-Sided Tolerance Limits
for a Normal Distribution.
PB91-101188 000,729
- TOLUENE**
Toluene Thermophysical Properties from 178 to 800 K at
Pressures to 1000 Bar.
PB90-161266 000,341
- TOMOGRAPHY**
Tomographic Reconstruction of Two-Dimensional Vector
Fields: Application to Flow Imaging.
PB90-170374 001,457
- TOOL MANAGEMENT**
System Requirements Analysis for the U.S. Army Rock
Island Arsenal Tool Management System.
PB90-269465 001,380
- TOOLING**
RCS Application Example: Tool Changing on a Horizontal
Machining Center.
PB90-217910 001,047
System Requirements Analysis for the U.S. Army Rock
Island Arsenal Tool Management System.
PB90-269465 001,380
- TOOLS**
Inspection of Single-Point Diamond Turning Tools at Low
Accelerating Voltage in a Scanning Electron Microscope.
PB90-152489 001,107
System Requirements Analysis for the U.S. Army Rock
Island Arsenal Tool Management System.
PB90-269465 001,380
- TOOTH ROOT**
Enhanced Root Fluoride Uptake by Monocalcium Phos-
phate Monohydrate Gels.
PB90-171000 001,347
- TOPOLOGY**
Finite Element Model of Stress Wave Topology in Unidi-
rectional Graphite/Epoxy: Wave Velocities and Flux Devi-
ations.
PB90-136623 001,529
- TOUCH**
Design of a Conformal Tactile Sensing Array.
AD-A215 871/5 001,042
- TOUGHNESS**
Role of Interfacial Grain-Bridging Sliding Friction in the
Crack-Resistance and Strength Properties of Nontrans-
forming Ceramics.
PB90-150095 001,128
- TOXIC SUBSTANCES**
Exhaust Gas Analysis for Harmful Species: 19F1A Fire
Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
NBS Standard Reference Materials for Validating Deter-
minations of Micronutrients and Toxic Substances in
Foods.
PB90-254368 000,021
Dietary Intake Studies of Nutrients and Selected Toxic
Elements in Human Subjects: Analytical Approaches.
PB91-134171 001,373
- TOXICITY**
Effect of Copper Additives on Atmospheric Hydrogen Cy-
anide and Acute Inhalation Toxicity from the Combustion
Products of Flexible Polyurethane.
PB90-187832 001,368
Toxic Potency of Fire Smoke: Measurement and Use.
PB90-261231 000,981
Quantitative Assessment of Smoke Toxicity Hazards in
Large Structures.
PB90-271222 000,152
Combustion Product Toxic Potency Measurements: Com-
parison of a Small Scale Test and "Real-World" Fires.
PB91-101063 000,199
New Approach to Fire Toxicity Data for Hazard Evalua-
tion.
PB91-107359 000,596
Correlation of Molecular Total Surface Area with Organo-
tin Toxicity for Biological and Physicochemical Applica-
tions.
PB91-118190 001,372
- TOXICOLOGY**
Use of FTIR Spectroscopy for Multi-Component Quantita-
tion in Combustion Toxicology.
PB90-217720 000,243
Toxicological Effects of Different Time Exposures to the
Fire Gases: Carbon Monoxide or Hydrogen Cyanide or to
Carbon Monoxide Combined with Hydrogen Cyanide or
Carbon Dioxide.
PB90-217746 001,369
Toxicological Interactions between Carbon Monoxide and
Carbon Dioxide.
PB91-107433 001,370
- TOXOIDS**
Determination of Thimerosal in Biological Products by
Liquid Chromatography with Inductively Coupled Plasma
Mass Spectrometric Detection.
PB90-190679 000,239
- TRACE AMOUNTS**
Analytical Use and Applications of the Nuclear Track
Technique.
PB90-135823 000,206
- TRACE ELEMENTS**
Effect of Interstitial Elements on Phase Relationships in
the Titanium-Aluminum System.
PB90-196528 001,259
Perspectives on Detection Limits for Nuclear Measure-
ments in Selected National and International Programs.
PB90-254467 001,410
Dietary Intake Studies of Nutrients and Selected Toxic
Elements in Human Subjects: Analytical Approaches.
PB91-134171 001,373
- TRACER TECHNIQUES**
Theoretical Comparison between Intentional Elemental
and Isotopic Atmospheric Tracers.
PB90-241563 000,974
- TRAFFIC SAFETY**
Color Appearance of Traffic Control Devices under Differ-
ent Illuminants.
PB90-260969 001,832
- TRAINING**
Development of an Instructional Program for Practicing
Engineers Hazard I Users.
PB90-265315 001,837
- TRAINING DEVICES**
Exhaust Gas Analysis for Harmful Species: 19F1A Fire
Fighting Trainer at Mayport, Florida.
PB90-219577 000,972
- TRAJECTORY CONTROL**
World Modeling for Sensory Interactive Trajectory Gen-
eration.
PB90-217712 000,019
- TRANS CINNAMIC ACID**
Adsorption of Phenoxacetic Acid and Trans-Cinnamic
Acid on Hydroxyapatite.
PB90-192394 000,063
- TRANSCONDUCTANCE**
High Current, Very Wide Band Transconductance Amplifi-
er.
PATENT-4 965 529 000,834
High-Current Very Wide-Band Transconductance Amplifi-
er.
PB90-187808 000,818
- TRANSIENT RESPONSE**
Electrical Fast-Transient Tests: Applications and Limita-
tions.
PB90-271529 000,853
- TRANSIENTS**
Electrical Fast Transient Tests: Applications and Limita-
tions.
PB91-112383 000,939
- TRANSISTORS**
Semiconductor Measurement Technology: A Programmable
Reserch-Bias Safe Operating Area Transistor Tester.
PB91-112821 000,889
- TRANSITION METALS**
Photoelastic Characteristics of Fluorozirconate and Tran-
sition-Metal Fluoride Glasses.
PB90-170119 001,139
- TRANSLATOR**
Fed-X: The NIST Express Translator.
PB90-269507 000,760
- TRANSMISSION ELECTRON MICROSCOPY**
Magnetic Microstructure of Thin Films and Surfaces: Exp-
loiting Spin-Polarized Electrons in the SEM and STM.
PB90-188210 000,388
- TRANSMISSION LINES**
Propagation along a Two-Wire Line Located at the Air-
Earth Interface.
PB90-254699 000,914
Electrical Fast-Transient Tests: Applications and Limita-
tions.
PB90-271529 000,853
- TRANSMITTANCE**
International Intercomparison of Regular Transmittance
Scales.
PB90-205956 001,481
- TRANSMITTER RECEIVERS**
Measurement of Electric Field Strength Near Higher Pow-
ered Personal Transceivers.
PB91-107268 000,639
- TRANSPIRATION**
Transpiration Mass Spectrometry of Liquid LIF: Vaporiza-
tion Thermochemistry and Electron Impact Fragmenta-
tion.
PB90-150137 000,324
- TRANSPORT (COMPUTERS)**
Measurements of a Transport Implementation Running
Over an IEEE 802.3 Local Area Network.
PB90-218066 000,749
- TRANSPORT PROPERTIES**
Permeability, Diffusivity, and Microstructural Parameters:
A Critical Review.
PB90-271339 000,565
Models of Transport Processes in Concrete.
PB91-107219 001,428
- TRIBOLOGY**
Microspectroscopy Applications in Tribology.
PB90-152869 001,113
Lubricated Wear Behavior of Composition Modulated
Nickel-Copper Coatings.
PB90-188301 001,114
Computerized Tribology Information System ACTIS.
PB90-218405 001,115
Considerations in the Standardization of Generic Wear
Measurements.
PB90-271123 001,116
Considerations in Ceramic Friction and Wear Measure-
ments.
PB91-118273 001,062
- TRIETHYL PHOSPHATE**
Radicchromic Solutions for Reference Dosimetry.
PB90-149303 001,353
- TRIGGER CIRCUITS**
Microphone Triggering Circuit for Elimination of Mechan-
ically Induced Frequency-Jitter in Diode Laser Spectrom-
eters: Implications for Quantitative Analysis.
PB90-188327 000,236
- TRIPLE POINT**
Determination of the Indium Freezing-Point and Triple-
Point Temperatures.
PB90-169707 000,356
- TRITIUM**
Development of a Stable Tritium (HT) Generation System
for Testing Atmospheric HT Monitors.
PB90-192386 001,400
- TROPONIN C**
Phase Improvement in the Structure Interpretation of
Fragment TR2C from Bull Testis Calmodulin Using Com-
bined Entropy Maximization and Solvent Flattening.
PB91-101576 001,641
- TRYPSIN INHIBITORS**
Structure of Form III Crystals of Bovine Pancreatic Tryp-
sin Inhibitor.
PB90-206731 001,333

KEYWORD INDEX

VALIDATION

TUNABLE LASERS

Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents.
PB91-112201 000,254

TUNGSTEN

Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Progress Report, 1 December 1987-30 November 1988.
DE89003342 000,308

Structure and Reactivity of Chemisorbed Species and Reaction Intermediates: Final Report, December 1, 1981-December 4, 1989.
DE90003244 000,310

Characterization of Ultrathin Pt Overlayers Deposited on a W(110) Surface.
PB90-192634 000,407

Thermal Expansion of Tungsten in the Range 1500-3600 K by a Transient Interferometric Technique.
PB90-271560 001,272

TUNNEL EFFECT

Metallicity and Gap States in Tunneling to Fe Clusters on GaAs(110).
PB90-136466 001,526

TUNNELING (ELECTRONICS)

Quantum Fluctuations and the Single-Junction Coulomb Blockade.
PB91-101246 001,769

TURBINE BLADES

Aluminum Oxide Barriers in Metal CrAlY Superalloy Systems.
N89-13657/6 001,169

TURBULENCE

Numerical Method for Calculating Indoor Airflows Using a Turbulence Model.
PB90-162009 000,083

How Due Process in the Development of Voluntary Standards Can Reduce the Risk of Anti-Trust Liability.
PB90-183328 000,582

Role of Large Scale Turbulent Structures in the Lift-Off and Blow Out Behaviors of Turbulent Jet Diffusion Flames.
PB90-217878 000,588

Structure and Radiation Properties of Turbulent Diffusion Flames.
PB90-218777 000,589

Time Dependent Simulation of Turbulent Combustion.
PB90-271073 000,593

TURBULENCE FLOW

Interaction of a Three-Dimensional Roughness Element with a Laminar Boundary Layer.
AD-A178 668/0 001,451

TURNING (MACHINING)

Inspection of Single-Point Diamond Turning Tools at Low Accelerating Voltage in a Scanning Electron Microscope.
PB90-152489 001,107

TWO DIMENSIONAL FLOW

Tomographic Reconstruction of Two-Dimensional Vector Fields: Application to Flow Imaging.
PB90-170374 001,457

TWO-DIMENSIONAL GEL ELECTROPHORESIS

Separation and Characterization of Fibronectin Domains by Two-Dimensional Electrophoresis.
PB90-241415 001,312

TWO PHASE FLOW

Two-Phase Heat Transfer in the Vicinity of a Lower Condensate Point.
PB90-187758 001,710

ULTRAHIGH VACUUM

Ultrahigh Vacuum Leak Sealing with a Silicon Resin Product.
PB90-149378 001,121

ULTRASONIC RADIATION

Electronics Design of the Infrared/Ultrasonic Sensing for a Robot Gripper.
PB90-160383 001,108

Point Source/Point Receiver Ultrasonic Wave Speed Measurement.
PB90-217985 001,446

Characterization of a Piezoelectric Transducer Coupled to a Solid.
PB90-218413 001,447

ULTRASONIC TESTS

High Temperature Ultrasonic Testing of Materials for Internal Flaws.
PATENT-4 898 034 001,274

Ultrasonic Methods of Texture Monitoring for Characterization of Formability of Rolled Aluminum Sheet.
PB90-135948 001,245

Noncontact Ultrasonic Sensors for High Temperature Process Control.
PB90-136789 001,209

Ultrasonic Methods for Characterizing the Interface in Composites.
PB90-188483 001,184

Pulsed Ultrasonic Velocity Method for Determining Material Dynamic Elastic Moduli.

PB90-241290 001,235

Crack Inspection of Railroad Wheel Treads by EMATS.
PB91-101550 001,831

Monocrystal-Polycrystal Elastic-Constant Models.
PB91-134247 001,661

ULTRASONIC WAVE TRANSDUCERS

Point Source/Point Receiver Ultrasonic Wave Speed Measurement.
PB90-217985 001,446

ULTRASONIC WAVES

Ultrasonic Method for Measuring Internal Temperature Distributions in Steel or Aluminum.
PB90-170671 001,211

ULTRAVIOLET DETECTORS

Phosphor Film Characterization Measurements in the Vacuum U.V. Using a Multichannel Detector.
PB90-149287 000,798

ULTRAVIOLET LASERS

Method and Apparatus for Producing a Photopumped VUV Laser in MO6+ Ion-Containing Plasma.
PATENT-4 939 744 001,468

ULTRAVIOLET RADIATION

Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase.
PB90-169269 000,285

Ultraviolet and Soft X-ray Measurement Services at NBS (National Bureau of Standards).
PB90-170846 001,476

ULTRAVIOLET SPECTRA

Photoemission Cross Sections for Atomic Transitions in the Extreme Ultraviolet Due to Electron Collisions with Atoms and Molecules.
PB90-161282 000,284

Spectra of the Si I Isoelectronic Sequence from Cu XVI to Mo XXIX.
PB90-206863 001,733

Wavelengths and Intensities of a Platinum/Neon Hollow Cathode Lamp in the Region 1100-4000 Å.
PB90-241662 001,484

Analysis of the Spectrum of Doubly Ionized Molybdenum (Mo III).
PB91-167445 001,810

UNBALANCED VOLTAGE DIGITAL INTERFACE CIRCUITS

Telecommunications: Electrical Characteristics of Unbalanced Voltage Digital Interface Circuits.
FIPS PUB 142 000,610

UNDERGROUND CORROSION

Effect of Soil Resistivity and Soil Temperature on the Corrosion of Galvanically Coupled Metals in Soil.
PB91-112169 001,203

UNDERGROUND FACILITIES

Evaluation of Thermal Probe Method for Estimating the Heat Loss from Underground Heat Distribution Systems.
PB90-161993 000,957

UNDERWATER VEHICLES

Overview of MAUV (Multiple Autonomous Undersea Vehicles).
PB90-152885 001,435

Overview of the Multiple Autonomous Underwater Vehicles (MAUV) Project.
PB90-218017 001,436

Control System Architecture for Multiple Autonomous Undersea Vehicles (MAUV).
PB91-111930 001,438

UNITED STATES

Comparison of the NIST (National Institute of Standards and Technology) and European Gold Coating Standards.
PB90-164278 001,175

Workforce of U.S. Manufacturing in the Post-Industrial Era.
PB90-193244 000,004

Conduct and Administration of U.S. Participation and Leadership in International Standardization, Testing, and Certification in the Decade of the 1990s.
PB90-194994 001,076

Transcript of Hearing on Improving U.S. Participation in International Standards Activities. Third Day: April 5, 1990.
PB90-204694 000,007

Transcript of Hearing on Improving U.S. Participation in International Standards Activities. First Day: April 3, 1990.
PB90-204702 000,008

Transcript of Hearing on Improving U.S. Participation in International Standards Activities, Second Day: April 4, 1990.
PB90-207150 000,009

Government's Role in Standards-Related Activities: Analysis of Comments.
PB90-215534 000,011

Harmonization of Standards and Regulations: Problems and Opportunities for the United States.
PB90-218181 000,117

UNITS OF MEASUREMENT

Index to the Reports of the National Conference on Weights and Measure from the First to the Seventy-Third (1905 to 1988).

PB90-155334 001,001

UNIVERSAL TIME

Adoption of Standard Time.
PB90-169756 000,625

UNIX OPERATING SYSTEMS

SRI International: Improving the Security of Your UNIX System.
PB91-120121 000,797

UNSTEADY STATE

Transient Characteristics of Unconfined Fire-Plume-Driven Ceiling Jets.
PB90-227976 000,138

UPHOLSTERY

Fire Risk Assessment Method: Case Study 1, Upholstered Furniture in Residences.
PB90-234998 000,139

URANIUM 235 TARGET

2.5 MeV Neutron Source for Fission Cross Section Measurement.
DE89004816 001,397

Measurements of the sup 235 U(N,F) Standard Cross Section at the National Bureau of Standards.
DE89004817 001,671

Measurement of the Sup 235 U(N,F) Reaction from Thermal to 1 KeV.
DE89004819 001,672

URIC ACID

Determination of Serum Uric Acid by Isotope Dilution Mass Spectrometry as a New Candidate Definitive Method.
PB91-112151 000,253

URIDINE MONOPHOSPHATE

Interaction of Cytidine 3'-Monophosphate and Uridine 3'-Monophosphate with Ribonuclease a at the Denaturation Temperature.
PB90-136367 000,265

URINE

Preparation and Certification of Standard Reference Material 1507: 11-Nor-Delta(sup9)-Tetrahydrocannabinol-9-Carboxylic Acid in Freeze-Dried Urine.
PB90-136524 000,208

US DOE

U.S. Department of Energy Risk Assessment Methodology. Volume 1. DOE Risk Assessment Guideline Instructions, Resource Table, and Completed Sample. Volume 2. DOE Risk Assessment Worksheets.
PB90-244484 000,789

US NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

Measurement Research and the National Institute of Standards and Technology's Research Information Center.
PB90-218074 001,037

US NBS

New Program and Directions at the National Institute of Standards and Technology.
PB90-235250 000,012

US NIST

New Program and Directions at the National Institute of Standards and Technology.
PB90-235250 000,012

VACCINES

Determination of Thimerosal in Biological Products by Liquid Chromatography with Inductively Coupled Plasma Mass Spectrometric Detection.
PB90-190679 000,239

VACUUM DEPOSITION

Two Simple Metal Vapor Deposition Sources for Downward Evaporation in Ultrahigh Vacuum.
PB90-150202 001,549

VACUUM GAGES

Surface Phenomena and Their Influence on Ultrahigh Vacuum Gauges.
PB90-169442 001,003

Residual Currents in Several Commercial UHV Bayard-Alpert Gauges.

AD-A223 764/2 *000,710*

VALIDATION TESTING SYSTEM
Development Plan Validation Testing System. National PDES Testbed Report Series.
PB91-107581 *000,766*

VAN DER WAALS FORCES
Damped Dispersion Interaction Energies for He-H(sub 2), NE-H(sub 2), and AR-H(sub 2).
PB90-170945 *000,374*

VANADIUM
Measurement of Vanadium Impurity in Oxygen-Implanted Silicon by Isotope Dilution and Resonance Ionization Mass Spectrometry.
PB90-192345 *000,240*

VANADIUM HYDRIDES
Anomalous Vibrations of Hydrogen Isotopes in beta-Phase Vanadium Hydride.
PB91-112649 *001,653*

VANADIUM MOLYBDATES
Synthesis, Characterization and Inelastic Neutron Scattering Spectra of Hydrogen Insertion Compounds of the Mixed V/Mo Oxide V(sub 9)Mo(sub 6)O(sub 40).
PB90-192683 *000,273*

VANES
Aluminum Oxide Barriers in Metal CrAlY Superalloy Systems.
N89-13657/6 *001,169*

VAPOR CELLS
Search for Optical Molasses in a Vapor Cell: General Analysis and Experimental Attempt.
PB90-163932 *001,474*

VAPOR DEPOSITED COATINGS
Energy Transfers in the Quasielastic Scattering of 70-1250-eV Electrons by Surfaces.
PB90-254517 *000,464*

VAPOR DEPOSITION
Electrical Characterization of Beta Silicon Carbide MIS (Metal-Insulator-Semiconductor) Capacitors with Thermally Grown or Chemical-Vapor Deposited Oxides.
PB90-136615 *000,866*

Two Simple Metal Vapor Deposition Sources for Downward Evaporation in Ultrahigh Vacuum.
PB90-150202 *001,549*

KEYWORD INDEX

WATER

- VAPOR PHASE**
Measurements of the Ultraviolet Absorption Cross-Sections for HO(sub 2) and CH(sub 3)O(sub 2) in the Gas Phase. PB90-169269 000,285
- VAPOR PHASES**
Correlation between Gas Phase and Solution Phase Reactivities of Hydroxyl Radicals Towards Saturated Organic Compounds. PB90-193459 000,413
- VAPOR PRESSURE**
Vapor Pressures and Gas-Phase PVT Data for 1,1-Dichloro-2,2,2-trifluoroethane. PB90-271685 000,485
Thermodynamic Properties of CFC Alternatives: A Survey of the Available Data. PB91-134460 000,515
- VAPORIZING**
Transpiration Mass Spectrometry of Liquid LiF: Vaporization Thermochemistry and Electron Impact Fragmentation. PB90-150137 000,324
Laser-Induced Vaporization Mass Spectrometry of Refractory Materials: Apparatus and the BN System. PB90-152836 001,133
Ceramic Thermochemistry and Kinetics from Laser-Induced Vaporization Mass Spectrometry. PB90-153503 001,135
- VARIABLE SELECTION**
Some Thoughts on Variable-Selection in Multiple Regression. PB90-169772 001,300
- VARIANCE (STATISTICS)**
Variances Based on Data with Dead Time between the Measurements. PB90-221821 001,303
Lower Bound of Confidence Coefficients for a Confidence Interval on Variance Components. PB90-242231 001,304
- VARISTORS**
Glimpse at Long-Term Effects of Momentary Overvoltages on Zinc Oxide Varistors. PB90-192337 000,821
- VECTOR ANALYSIS**
Tomographic Reconstruction of Two-Dimensional Vector Fields: Application to Flow Imaging. PB90-170374 001,457
- VECTOR PROCESSING**
Optimizing Precompiler for Finite-Difference Computations on a Vector Computer. PB91-118265 000,734
- VEGETABLES**
Examination of Gamma-Irradiated Fruits and Vegetables by Electron Spin Resonance Spectroscopy. PB90-169814 000,020
- VEHICULAR TRAFFIC CONTROL**
Color Appearance of Traffic Control Devices under Different Illuminants. PB90-260969 001,832
- VELOCITY**
Finite Element Model of Stress Wave Topology in Unidirectional Graphite/Epoxy: Wave Velocities and Flux Deviations. PB90-136623 001,529
- VENTILATION**
Ventilation and Air Quality Investigation of the Madison Building, Phase 1 Report. PB90-155417 000,081
Numerical Method for Calculating Indoor Airflows Using a Turbulence Model. PB90-162009 000,083
Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results. PB90-164484 000,084
Model of a Simple Fan-Resistance Ventilation System and Its Application to Fire Modeling. PB90-183336 000,088
Fire Experiments of Zoned Smoke Control at the Plaza Hotel in Washington DC. PB90-207259 000,093
Measurements of Ventilation Rates and Ventilation Effectiveness. PB90-218058 000,094
Ventilation Characterization of the Consumer Product Safety Commission Combustion Test Chamber Facility. PB91-107490 000,103
Simultaneous Measurements of Infiltration and Intake in an Office Building. PB91-118430 000,105
- VENTS**
Algorithm and Associated Computer Subroutine for Calculating Flow through a Horizontal Ceiling/Floor Vent in a Zone-Type Compartment Fire Model. PB91-120170 000,166
- VERMICULITE**
Neutron Scattering Study of Layered Silicates Pillared with Alkylammonium Ions. PB91-112516 000,496
- VERY HIGH SPEED INTEGRATED CIRCUITS**
Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope). PB90-170960 000,868
- VERY LARGE SCALE INTEGRATION**
Report on an Interlaboratory Electromigration Experiment. AD-A169 652/5 000,864
Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope). PB90-170960 000,868
Semiconductor Measurement Technology: Thermal Resistance Measurements. PB90-269564 000,876
Materials Problems Affecting Reliability and Yield of Wire Bonding in VLSI (Very Large Scale Integration) Devices. PB91-112268 000,886
- VHSIC (CIRCUITS)**
Relationship between Accelerating Voltage and Electron Detection Modes to Linewidth Measurement in an SEM (Scanning Electron Microscope). PB90-170960 000,868
- VIBRATION**
Effects of Timing Jitter in Sampling Systems. PB90-188491 001,007
Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems. PB90-218314 001,740
- VIBRATION ISOLATORS**
Microphone Triggering Circuit for Elimination of Mechanically Induced Frequency-Jitter in Diode Laser Spectrometers: Implications for Quantitative Analysis. PB90-188327 000,236
Very Low Frequency Isolation Systems for Ground-Based Gravitational Wave Detectors. PB91-118588 001,789
- VIBRATION MEASUREMENT**
Calibration of High-Frequency Accelerometers by Conventional Methods. PB91-118521 001,448
Calibration of Vibration Pickups at Low Ultrasonic Frequencies. PB91-118539 001,449
- VIBRATIONAL SPECTRA**
Broadening and Shifting of the Raman Q Branch of HD. AD-A209 360/7 000,299
Measurement and Prediction of Raman Q-Branch Line Self-Broadening Coefficients for CO from 400 to 1500 K. AD-A210 933/8 000,302
The Vibrational Spectra of Molecular Ions Isolated in Solid Neon. I. CO₂(+) and CO₂(-). AD-A212 195/2 000,303
Vibrational Spectra of Molecular Ions Isolated in Solid Neon. 2. O₄(+) and O₄(-). AD-A214 512/6 000,306
Anomalous Vibrations of Hydrogen Isotopes in beta-Phase Vanadium Hydride. PB91-112649 001,653
Vibrational Spectra of Molecular Ions Isolated in Solid Neon. III. N₄(+). PB91-112714 000,498
- VIDEO DATA**
Digital Video Data Acquisition/Analysis for Existing ESDIAD Apparatus. PB90-218363 001,741
- VINYL ETHER RESINS**
Concentration Fluctuations in Mixtures of Linear and Star-Shaped Polymers. PB90-206921 000,539
Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions. PB90-235268 000,542
Phase Behavior of Polymer Blends. PB90-241506 000,543
Shear Stabilization of Critical Fluctuations in Bulk Polymer Blends Studied by Small Angle Neutron Scattering. PB90-254822 000,544
Phase-Separation Kinetics of Mixtures of Linear and Star-Shaped Polymers. PB91-118208 000,556
- VIRAL DNA**
Deletion Analysis of the DNA Sequence Required for the In vitro Initiation of Replication of Bacteriophage. PB90-169939 001,325
- VIRUS REPLICATION**
Deletion Analysis of the DNA Sequence Required for the In vitro Initiation of Replication of Bacteriophage. PB90-169939 001,325
- VISCOPLASTICITY**
Similarity and Bifurcation in Unstable Viscoplastic Shear. PB90-241357 001,615
- VISCOSITY**
Transport Properties of Fluids of Cryogenic Interest. PB90-152851 001,691
Surface Forces and Viscosity of Water Measured between Silica Sheets. PB90-152901 000,334
Molecular Weight and Concentration Dependences of the Terminal Relaxation Time and Viscosity of Entangled Polymer Solutions. PB90-170796 000,532
Viscosity and Molecular Weight Distribution of Ultra-High Molecular Weight Polyethylene Using a High Temperature Low Shear Rate Rotational Viscometer. PB90-193426 000,536
Critical Exponent for the Viscosity of Carbon Dioxide and Xenon. PB90-271115 000,477
- VISIBILITY**
Suprathreshold Visibility Meter to Directly Assess the Conspicuity of Office Tasks. PB90-161829 000,082
Evaluation of Exit Signs in Clear and Smoke Conditions. PB90-269523 000,113
- VISUAL PERCEPTION**
Motion, Depth, and Image Flow. PB90-254350 001,350
Evaluation of Exit Signs in Clear and Smoke Conditions. PB90-269523 000,113
- VOLATILE ORGANIC COMPOUNDS**
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds. PB90-192493 000,970
Monitoring the Fate of Chlorine from MSW Sampling through Combustion. Part 2. Combustion Studies. PB91-107383 000,597
- VOLTAGE DIVIDERS**
Characterizing Transient Measurements by Use of the Step Response and the Convolution Integral. PB90-207010 000,822
- VOLTAGE STANDARDS**
10-V Josephson Voltage Standard. PB90-187691 000,901
Journal of Research of the National Institute of Standards and Technology, May-June 1990. Volume 95, Number 3. PB90-256793 001,753
Operation of NIST Josephson Array Voltage Standards. PB90-256801 000,916
Calibration of dc Voltage Standards at NIST. PB90-256819 000,917
New Low-Voltage Standards in the DC to 1 MHz Frequency Range. PB91-101493 000,928
Improvements for Automating Voltage Calibrations Using a 10-V Josephson Array. PB91-101592 000,932
- VORONOI DIAGRAMS**
Expected Complexity of the 3-Dimensional Voronoi Diagram. PB90-221862 001,288
Expected Linear 3-Dimensional Voronoi Diagram Algorithm. PB90-227984 001,289
- WAFERS**
Wafer-Level ANA Calibrations at NIST (National Institute of Standards and Technology). PB91-134353 000,892
On-Wafer Microwave Standards at NIST. PB91-134965 000,893
- WALLS**
Method for Characterizing the Dynamic Performance of Wall Specimens Using a Calibrated Hot Box. PB90-135773 000,125
Influence of Horizontal Reinforcement on Shear Resistance of Concrete Block Masonry Walls. PB90-145624 000,168
Negatively Buoyant Wall Flows Generated in Enclosure Fires. PB90-152802 000,185
Evaluation of Thermal Bridges Using a Mobile Test Facility. PB90-198912 000,091
Program for Calculating the Maximum Radiation on a Wall. PB91-120139 000,165
- WASTE DISPOSAL**
Review of Current Research and Activities Involving Characterization, Abatement and Disposal of Lead-Containing Paint Films. PB90-225954 000,984
- WATER**
Multicomponent Cluster Ions. 1. The Proton Solvated by CH₃Cn/H₂O. AD-A167 880/4 000,295
Microwave Spectrum and Structure of the H₂O-SO₂ Complex. PB90-152554 000,329

KEYWORD INDEX

ZIRCONIUM OXIDES

Report of the CIB W14 Workshop on Fire Modeling (4th); Conseil International du Batiment (CIB) Commission W14 on Fire.
PB90-247420 000,147

WORKSTATIONS

Recommended Technical Specifications for Procurement of Systems for a Cleaning and Deburring Workstation.
PB90-183252 001,046

X RAY ANALYSIS

Aluminum Oxide Barriers in Metal CrAlY Superalloy Systems.
N89-13657/6 001,169

Electron/X-ray Optical Bench for the Measurement of Fundamental Parameters for Electron Probe Microanalysis.
PB90-150186 000,214

Background Correction in Electron Microprobe Compositional Mapping with Wavelength-Dispersive X-Ray Spectrometry.
PB90-152604 000,221

Monte Carlo Electron Trajectory Simulations for Scanning Electron Microscopy and Microanalysis: An Overview.
PB90-152620 000,223

Progress and Pitfalls in Quantitative Surface Analysis by Auger-Electron Spectroscopy and X-ray Photoelectron Spectroscopy.
PB90-189228 000,389

X RAY APPARATUS

New Approach to Accurate X-ray Mask Measurements in a Scanning Electron Microscope.
PB90-218025 001,440

X RAY BINARIES

Orbital Variability in the Wind of the Massive X-ray Binary HD 153919/4U 1700-37.
PB90-241498 000,041

X RAY DIFFRACTION

X-ray Line Broadening Study on Shock-Modified Hematite.
PB90-206145 000,421

Standard Reference Materials for X-ray Diffraction. Part 2. Calibration Using D-Spacing Standards.
PB90-206681 001,598

Structure of Insulin: Results of Joint Neutron and X-ray Refinement.
PB90-206723 001,311

Applications of the Double-Crystal Diffractometry to the Understanding of Ceramic Fracture.
PB90-242272 001,060

X-ray Diffraction Studies of Ni-Cr-Based Amorphous Alloys.
PB91-101683 001,263

Effects of Extinction on X-ray Powder Diffraction Intensities.
PB91-118109 000,501

X-RAY FLUORESCENCE

Developments in Atomic-Absorption, X-ray Fluorescence, and Plasma-Emission Spectrometry for the Analysis of Metals and Ores.
PB90-136961 001,390

Polarization Effects in Molecular X-Ray Fluorescence.
PB90-170259 000,365

Grazing-Angle X-ray Standing Waves.
PB91-118349 000,505

X RAY MIRRORS

Peak Reflectivity Measurements of W/C, Mo/Si, and Mo/B4C Multilayer Mirrors in the 8-190-Angstrom Range Using Both Alpha Line and Synchrotron Radiation.
PB91-118653 001,792

X RAY PHOTOELECTRON SPECTROSCOPY

Bonding Structure of Silicon Oxide Films.
PB90-149329 001,538

X-RAY RADIOGRAPHY

X-ray Attenuation Properties of Radiographic Contrast Media.
PB90-169822 001,321

X RAY SPECTRA

Spectra of the Si I Isoelectronic Sequence from Cu XVI to Mo XXIX.
PB90-206863 001,733

X RAY SPECTROMETERS

Test of a Bremsstrahlung Equation for Energy-Dispersive X-ray Spectrometers.
PB90-170721 001,702

X RAY SPECTROSCOPY

Background Correction in Electron Microprobe Compositional Mapping with Wavelength-Dispersive X-Ray Spectrometry.
PB90-152604 000,221

Precision, Accuracy, and Uncertainty in Quantitative Surface Analyses by Auger-Electron Spectroscopy and X-ray Photoelectron Spectroscopy.
PB90-205840 000,417

Soft X-ray Absorption and Emission Spectra of the YBa(sub 2)Cu(sub 3)O(sub 7-x) Superconductor.
PB90-217852 001,603

Accurate X-ray Spectroscopy.
PB90-218488 001,745

Goals for the Application of High-Resolution X-ray Spectroscopy to the Diagnosis of Stellar Coronal Plasmas.
PB90-217495 000,047

X-RAYS

Systematics of X-ray Transition Energies for High-Z Atoms.
PB90-136409 001,679

Redetermination of X-Ray Loss Due to Electron Backscatter by Monte Carlo Simulation.
PB90-152596 000,220

Calculation of Depth Distributions of X-ray Generation by the Monte Carlo Technique.
PB90-152877 000,226

Effect of X-rays on the Polycarbonate Substrate of X-ray Calibration Standards.
PB90-169673 000,286

Evaluation of NVLAP (National Voluntary Laboratory Accreditation Program) Personnel Dosimetry Testing Laboratory: X-rays.
PB90-207762 001,360

XENON

Calibration of a Monochromator/Spectrometer System for the Measurement of Photoelectron Angular Distributions and Branching Ratios.
DE86000789 000,307

Cd I Isoelectronic Sequence: Wavelengths and Energy Levels for Xe VII through Eu XVI.
PB90-169624 000,354

Critical Exponent for the Viscosity of Carbon Dioxide and Xenon.
PB90-271115 000,477

XENON IONS

New Recombination Mechanism: Tidal Termolecular Ionic Recombination.
PB90-271065 001,761

YEASTS

Autoregulation of the Yeast Copper Metallothionein Gene Depends on Metal Binding.
PB90-206103 001,331

YELLOWSTONE NATIONAL PARK

Tilt Observations Using Borehole Tiltmeters 2. Analysis of Data from Yellowstone National Park.
PB90-136326 001,383

YTTRIUM BARIUM CUPRATES

Measurement of H(Sub c1) in a Single Crystal of YBa2Cu3O7 with Low Pinning. (Abstract Only).
N90-27864/9 001,518

Micro-Raman Spectroscopy of High-T(sub c) Superconductors in the Y-Ba-Cu-O System.
PB90-149279 001,537

Resonant Photoemission Study of Superconducting Y-Ba-Cu-O.
PB90-169285 001,555

Superconductivity in Bulk and Thin Films of La(sub 1.85)Sr(sub 0.15)CuO(sub 4-x) and Ba2YCu3O(sub 7-y).
PB90-170440 001,565

Effects of Crystal Anisotropy on Magnetization and Magnetic Order in Superconducting RBa(sub 2)Cu(sub 3)O(sub 7-x).
PB90-192626 001,590

Low Temperature Chemical Approaches to Superconductive Materials: A Challenge in Chemical Synthesis.
PB90-206962 001,156

Airy Pattern, Weak-Link Modelling of Critical Currents in High-T(sub c) Superconductors.
PB90-207051 001,600

Soft X-ray Absorption and Emission Spectra of the YBa(sub 2)Cu(sub 3)O(sub 7-x) Superconductor.
PB90-217852 001,603

Photoemission Study of High T(sub c) Oxides.

PB90-217993 001,605

Relationship of Electrical, Magnetic, and Mechanical Properties to Processing in High-Temperature Superconductors.
PB90-271131 001,631

YTTRIUM IRON GARNETS

Polarimetric Magnetic Field Sensors Based on Yttrium Iron Garnet.
PB90-218009 000,839

YTTRIUM OXIDES

Low Temperature Thermal Processing of Ba(sub 2)YCu(sub 3)O(sub 7-x) Superconducting Ceramics.
PB90-135906 001,522

Processing: Property Relations for Ba(sub 2)YCu(sub 3)O(sub 7-x) High (T sub c) Superconductors.
PB90-150111 001,548

Neutron Powder Diffraction Study of Orthorhombic Ba(sub 2)YCu(sub 3)O(sub 6.5).
PB90-170267 001,140

Phase Equilibria and Crystal Chemistry in the System Ba-Y-Cu-O.
PB90-192543 001,143

Is Y(sub 1)Ba(sub 2)Cu(sub 3)O(sub 7) Stiff or Soft.
PB90-205774 001,148

X-ray Powder Characterization of Ba(sub 2)YCu(sub 3)O(sub 7-x).
PB90-206061 001,149

X-ray Study of the Barium Oxide-Yttrium Sesquioxide-Copper Oxide (CuOx) System.
PB90-206152 001,151

X-ray Studies of Helium Quenched Ba(sub 2)YCu(sub 3)O(sub 7-x).
PB90-206699 001,155

Structural Phase Transition Study of Ba2YCu3O(sub 6+x) in Air.
PB90-242264 001,159

Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Laser-Vaporized Metal Oxides: Rotational Spectra and Electric Dipole Moments of YO, LaO, ZrO, and HfO.
PB91-101600 000,490

YTTRIUM PRASEODYMIUM BARIUM FERRATE

CUPRATES

Fe Mossbauer Effect in Y(sub x)Pr(sub 1-x)Ba2(Cu0.98Fe0.02)3O7.
PB90-254889 001,623

ZEEMAN EFFECT

Quadratic Zeeman Effect in Moderately Strong Magnetic Fields.
PB90-135963 001,676

ZINC

Effect of Soil Resistivity and Soil Temperature on the Corrosion of Galvanically Coupled Metals in Soil.
PB91-112169 001,203

ZINC ORGANIC COMPOUNDS

Formation and Decay of Zinc Tetrakis(N-methyl-4-pyridinio)porphyrin pi-Radical Cation in Aqueous Solutions Containing Azide Ions and Polyelectrolyte.
PB90-169715 000,271

ZINC SULFIDES

Pressure Sintering and Transformation Toughening of Zinc Sulfide.
PB90-271156 001,160

ZINCALLOYS

Corrosion of Zircaloy Spent Fuel Cladding in a Repository.
PB90-207291 001,427

ZIRCONIUM ALLOYS

Electronic Properties, Superconductivity and Stability of the Ordered Alloys of the Ti-Rh, Zr-Rh and Hf-Rh Isoelectronic Systems.
PB90-169301 001,556

ZIRCONIUM CONTAINING ALLOYS

Magnetic Correlations in Amorphous Fe-Zr Alloys.
PB90-192501 001,588

ZIRCONIUM OXIDES

X-ray Line Broadening Study on Shock-Modified Zirconia.
PB90-169863 001,559

Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Laser-Vaporized Metal Oxides: Rotational Spectra and Electric Dipole Moments of YO, LaO, ZrO, and HfO.
PB91-101600 000,490

TITLE INDEX

- Algorithm and Computer Program for the Calculation of Envelope Curves.
PB90-155409 001,299 PC A03/MF A01
- Algorithm for the Mass-Loss Rate of a Burning Wall.
PB91-112458 000,159 Not available NTIS
- Algorithms for Calculating Radiation View Factors between Plane Convex Polygons with Obstructions.
PB90-218470 001,744 Not available NTIS
- Alignment Effects in Ca-He (5(1)P1 - 5(3)PJ) Energy Transfer Half-Collisions.
PB90-271487 001,767 Not available NTIS
- Alignment Effects Involving Multiple Pathways: Electronic Energy Transfer of Sr 5s6p (1)P(sub 1) with Rare Gases.
PB90-171067 000,375 Not available NTIS
- Aluminum Hydroxides as Solid Lubricants.
PATENT-4 919 829 001,221 Not available NTIS
- Aluminum Oxide Barriers in Metal CrAlY Superalloy Systems.
N89-13657/6 001,169
(Order as N89-13642/8, PC A10/MF A01)
- AMPLE Core Interpreter: User's Guide (Version 1.0).
PB91-107250 001,057 PC A04/MF A01
- Analog to Digital Conversion of Voice by 2,400 Bit/Second Linear Predictive Coding.
FIPS PUB 137 000,605 PC E01
- Analysis of Carboxyhemoglobin and Cyanide in Blood from Victims of the Dupont Plaza Hotel Fire in Puerto Rico.
PB90-205782 001,320 Not available NTIS
- Analysis of CH(sub 2) a tilde (sup 1)A(sub 1) (1,0,0) and (0,0,1) Coriolis-Coupled States, a tilde (sup 1)A(sub 1) - X tilde (sup 3)B(sub 1) Spin-Orbit Coupling, and the Equilibrium Structure of CH(sub 2) a tilde (sup 1)A(sub 1) State.
PB90-170952 000,375 Not available NTIS
- Analysis of Circular Bends in Planar Optical Waveguides.
PB90-149204 000,850 Not available NTIS
- Analysis of SAS Data Dominated by Multiple Scattering.
PB90-241274 001,612 Not available NTIS
- Analysis of the Corrections to the Normal Force Response for the Cone and Plate Geometry in Single Step Stress Relaxation Experiments.
PB90-206137 000,538 Not available NTIS
- Analysis of the Microwave and Far Infrared Spectrum of the Water Dimer.
PB90-170150 000,362 Not available NTIS
- Analysis of the Spectrum of Doubly Ionized Molybdenum (Mo III).
PB91-167445 001,810
(Order as PB91-167411, PC A05/MF A01)
- Analytical Method to Characterize the Performance of Multiple Section Straight-Sided Neutron Guide Systems.
PB90-190711 001,717 Not available NTIS
- Analytical Use and Applications of the Nuclear Track Technique.
PB90-135823 000,206 Not available NTIS
- Anisotropic Neutron Emission from a Californium-252 Source.
PB91-118182 001,786 Not available NTIS
- Anomalous Behavior of Selected Methyl-Substituted Polycyclic Aromatic Hydrocarbons in Reversed-Phase Liquid Chromatography.
PB91-112730 000,256 Not available NTIS
- Anomalous Vibrations of Hydrogen Isotopes in beta-Phase Vanadium Hydride.
PB91-112649 001,653 Not available NTIS
- Antenna Far-Field Pattern Accuracies at Millimeter Wave Frequencies Using the Planar Near-Field Technique.
PB90-187626 000,803 Not available NTIS
- Antiferromagnetic Ordering in Superconducting and Oxygen-Deficient Nonsuperconducting Rb₂Cu₃O(7-delta) Compounds (R = Nd and Sm).
PB90-261413 001,629 Not available NTIS
- Apollo Retroreflector Arrays Revisited: A Lunar Beacons Array.
PB90-254525 001,811 Not available NTIS
- Apparatus for Measuring High-Flux Heat Transfer in Radiatively Heated Compact Exchangers.
PB90-155870 001,692 PC A03/MF A01
- Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions.
PB90-235268 000,542
(Order as PB90-235243, PC A06)
- Application of a Nd:YAG Laser-Pumped Dye Laser to the Determination of Nickel in River Sediment Using Nonresonance Flame Atomic Fluorescence Spectrometry.
PB90-149428 000,988 Not available NTIS
- Application of Measurement Error Propagation Theory to Two Measurement Systems Used to Calculate the Position and Heading of a Vehicle on a Flat Surface.
PB91-112797 001,392 PC A03/MF A01
- Application of PN and Avalanche Silicon Photodiodes to Low-Level Optical Radiation Measurements.
N89-133177 000,022
(Order as N89-13310/2, PC A14/MF A01)
- Application of Thermal-Wave Electron Microscopy to Imaging and Assessment of Corrosion on Rough Steel Surface.
PB91-112524 001,204 Not available NTIS
- Applications of Capacitive Array Sensors to Nondestructive Evaluation.
PB90-192642 001,075 Not available NTIS
- Applications of Compositional Mapping in Materials Science.
PB90-152612 000,222 Not available NTIS
- Applications of the Double-Crystal Diffractometry to the Understanding of Ceramic Fracture.
PB90-242272 001,060 Not available NTIS
- Applications of the Weibull Method to Statistical Analysis of Strength Parameters of Dental Materials.
PB90-260993 000,071 Not available NTIS
- Approach to Telerobot Computing Architecture.
PB90-244419 001,103 PC A03/MF A01
- Approximate Scattering Wave Functions for Few-Particle Continua.
PB90-171125 001,709 Not available NTIS
- Architecture to Support Teleoperation and Autonomy.
PB91-101428 001,820 Not available NTIS
- Architectures for Future Multigigabit Lightwave Networks.
PB90-198953 000,615 PC A04/MF A01
- Argine Substituted for Leucine at Position 195 Produces a Cyclic Amp-Independent Form of the 'Escherichia Coli' Cyclic AMP Receptor Protein.
PB90-153446 001,324 Not available NTIS
- Artifacts Observed in Oxygen Profiles of SIMOX Samples by Secondary Ion Mass Spectrometry.
PB90-149477 000,211 Not available NTIS
- Aspects of the Crystallization and Morphology of Poly(Phenylene Sulfide).
PB90-261165 000,547 Not available NTIS
- Assessing Radiation Dose to Food.
PB91-101162 001,366 Not available NTIS
- Assessment of Loosely-Bound and Firmly-Bound Fluoride Uptake by Tooth Enamel from Topically Applied Fluoride Treatments.
PB90-254905 001,349 Not available NTIS
- Assessment of the Fire Performance of School Bus Interior Components.
PB90-265307 001,833 PC A09/MF A01
- Assessment of the Performance and Reliability of Older ERW (Electric Resistance Welding) Pipelines.
PB90-148776 001,828 PC A04/MF A01
- ASTM (American Society for Testing and Materials) Dosimetry Activities: A Progress Report.
PB90-170473 001,700 Not available NTIS
- Asymptotic Approximation of Integral Manifolds.
PB91-112250 001,294 Not available NTIS
- Atom Probe Field-Ion Microscopy Applications.
PB91-118059 000,257 Not available NTIS
- Atomic Transition-Probability Measurements for Prominent Spectral Lines of Neutral Nitrogen.
PB90-150269 001,688 Not available NTIS
- Austenitic Stainless Steels with Emphasis on Strength at Low Temperatures.
PB90-218462 001,218 Not available NTIS
- Automated Extraction of Regular Spot Arrays from Electron Diffraction Images.
PB90-241324 001,614 Not available NTIS
- Automated Fingerprint Identification Systems Bench Mark Tests of Relative Performance.
PB90-170457 001,834 Not available NTIS
- Automated Information System Security Accreditation Guidelines.
PB90-264102 000,792 PC A03/MF A01
- Automated Maintenance Management Program Part 2: The Integration of Databases and Image Processing Results for the Quantitative Assessment of the Exterior Condition of Metal Buildings.
PB90-162090 000,108 PC A03/MF A01
- Automated Multi-Axis Motor Controller and Data Acquisition System for Near-Field Scanners.
PB90-187683 000,804 Not available NTIS
- Automatically Running Command Files at Any Future Time.
PB90-218454 000,721 Not available NTIS
- Autonomous Propulsion System Requirements for Placement of an STS (Space Transportation System) External Tank in Low Earth Orbit.
PB90-183302 001,818 PC A03/MF A01
- Autoregulation of the Yeast Copper Metallothionein Gene Depends on Metal Binding.
PB90-206103 001,331 Not available NTIS
- Average L-Shell Fluorescence Yields for Elements 56 < Z < 92.
PB91-112680 001,781 Not available NTIS
- Background Correction in Electron Microprobe Compositional Mapping with Wavelength-Dispersive X-Ray Spectrometry.
PB90-152604 000,221 Not available NTIS
- Basics of Chemical Instrumentation. Volume 1. Separation Methods.
PB90-198458 000,242 PC A09/MF A01
- Beam Current Density Monitor for Intense Electron Beams.
AD-A137 146/7 001,668 PC A02/MF A01
- Behavior of Liposomes in Flow Injection Systems.
PB90-241332 000,247 Not available NTIS
- Behavior of Primary Radicals during Thermal Degradation of Poly(Methyl Methacrylate).
PB90-136607 000,523 Not available NTIS
- Benchmarking.
PB91-118166 000,656 Not available NTIS
- Bent Planar Waveguides and Whispering Gallery Modes: A New Method of Analysis.
PB90-254624 001,487 Not available NTIS
- Biases and Variances of Several FFT (Fast Fourier Transform) Spectral Estimators as a Function of Noise Type and Number of Samples.
PB90-188566 000,643 Not available NTIS
- Bibliography of the NIST (National Institute of Standards and Technology) Electromagnetic Fields Division Publications.
PB90-163635 000,896 PC A06/MF A01
- Binding of Substituted cis-Pt(II)-Diammines to Duplex DNA.
PB90-218447 001,335 Not available NTIS
- Biological Thermodynamic Data for the Calibration of Differential Scanning Calorimeters: Heat Capacity Data on the Unfolding Transition of Ribonuclease A in Solution.
PB90-192600 000,405 Not available NTIS
- Bonding Structure of Silicon Oxide Films.
PB90-149329 001,538 Not available NTIS
- Book Review: The Current Comparator by W. J. M. Moore and P. N. Miljanic.
PB90-170929 000,857 Not available NTIS
- Break Junction Measurement of the Tunneling Gap of a Thallium-Based High-Temperature Superconductor Crystal.
PB90-136334 001,525 Not available NTIS
- Bremsstrahlung Radiation Emitted in Fast-Electron-H-Atom Collisions.
PB90-171109 001,708 Not available NTIS
- Brittle Fracture Behavior of Ceramics.
PB91-118224 001,061 Not available NTIS
- Broadening and Shifting of the Raman O Branch of HD.

TITLE INDEX

- Dynamical Aspects of Anisotropic Correlations in Supercooled Liquids.
PB90-241613 *000,454* Not available NTIS
- Dynamics of O(1 +) Desorption from TiO(sub 2).
PB90-218330 *000,441* Not available NTIS
- Dynamics of the Bell Prover, II.
PB90-235276 *001,460*
(Order as PB90-235243, PC A06)
- Eddy Current Measurement of Density during Hot Isostatic Pressing.
PB90-193400 *001,255* Not available NTIS
- Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein.
PB90-218322 *001,334* Not available NTIS
- Effect of a Crystal-Melt Interface on Taylor-Vortex Flow with Buoyancy.
PB90-244401 *001,619* PC A03/MF A01
- Effect of an Electric Field on the Morphological Stability of the Crystal-Melt Interface on a Binary Alloy.
PB90-193541 *001,256* Not available NTIS
- Effect of Anisotropic Thermal Conductivity on the Morphological Stability of a Binary Alloy.
PB90-271271 *001,260* Not available NTIS
- Effect of Annealing Conditions on Precipitate and Defect Evolution in Oxygen Implanted SOI Material.
PB90-187774 *001,574* Not available NTIS
- Effect of Aqueous Environments on the Fracture Behavior of Ductile Nickel Aluminate.
PB90-206970 *001,194* Not available NTIS
- Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane.
PB90-187832 *001,368* Not available NTIS
- Effect of Electron-Hole Plasmas on the Density of States of Silicon and GaAs.
PB90-136284 *001,524* Not available NTIS
- Effect of Fuel Structure on Pathways to Soot.
PB90-190778 *000,584* Not available NTIS
- Effect of Gravity Modulation on Solutal Convection during Directional Solidification.
PB90-265281 *001,630* PC A03/MF A01
- Effect of Humidity on Commercial Cesium Beam Atomic Clocks.
PB90-261082 *000,634* Not available NTIS
- Effect of Hyperfine Structure on the 2 (3)P1 and the 2 (3)P0 Lifetime in Heliumlike Ions.
PB91-101303 *001,772* Not available NTIS
- Effect of Interstitial Elements on Phase Relationships in the Titanium-Aluminum System.
PB90-196528 *001,259* PC A04/MF A01
- Effect of Oxygen Transport and Resistivity of the Environment on the Corrosion of Steel.
PB91-107292 *001,200* PC A03/MF A01
- Effect of Phase Length on Column Selectivity for the Separation of Polycyclic Aromatic Hydrocarbons by Reversed-Phase Liquid Chromatography.
PB90-188350 *000,237* Not available NTIS
- Effect of Soil Resistivity and Soil Temperature on the Corrosion of Galvanically Coupled Metals in Soil.
PB91-112169 *001,203* Not available NTIS
- Effect of Surface Tension Anisotropy on Cellular Morphologies.
PB91-101444 *001,262* Not available NTIS
- Effect of Temperature and Stress on the Time-to-Failure of EPDM T-Peel Joints.
PB90-187865 *000,133* Not available NTIS
- Effect of Wall Mass on the Annual Heating and Cooling Loads of Single-Family Residences for Five Selected Climates.
PB91-118018 *000,104* Not available NTIS
- Effect of X-rays on the Polycarbonate Substrate of X-ray Calibration Standards.
PB90-169673 *000,286* Not available NTIS
- Effective Core Potentials and Accurate Energy Curves for Cs2 and Other Alkali Diatomics.
PB91-134205 *000,514* Not available NTIS
- Effects of Boron Implantation on Silicon Dioxide Passivated HgCdTe.
PB90-271172 *000,291* Not available NTIS
- Effects of Chemical Inhomogeneities on Grain Growth and Microstructure in Al(sub 2)O(sub 3).
PB90-153438 *001,134* Not available NTIS
- Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems.
PB90-218314 *001,740* Not available NTIS
- Effects of Crystal Anisotropy on Magnetization and Magnetic Order in Superconducting RBA(sub 2)Cu(sub 3)O(sub 7-x).
PB90-192626 *001,590* Not available NTIS
- Effects of Extinction on X-ray Powder Diffraction Intensities.
PB91-118109 *000,501* Not available NTIS
- Effects of Initial Molecular Weight on Thermal Degradation of Poly(Methyl Methacrylate) 1 - Model 1.
PB90-152760 *001,270* Not available NTIS
- Effects of Melt Viscosity and Thermal Stability on Polymer Gasification.
PB90-271412 *000,550* Not available NTIS
- Effects of Particle Size Distribution on the Kinetics of Hydration of Tricalcium Silicate.
PB90-241340 *000,450* Not available NTIS
- Effects of Sample Geometry on Interelement Quantitation in Laser Microprobe Mass Spectrometry.
PB90-152588 *000,219* Not available NTIS
- Effects of Systematic Error, Estimates and Uncertainties in Chemical Mass Balance Apportionments: Quail Roost II Revisited.
PB91-134312 *000,980* Not available NTIS
- Effects of Timing Jitter in Sampling Systems.
PB90-188491 *001,007* Not available NTIS
- Effects of Track Structure on Neutron Microdosimetry and Nanodosimetry.
PB90-190703 *001,355* Not available NTIS
- Einstein and Stellar Sources.
PB90-271503 *000,048* Not available NTIS
- Elastic Constants of Three Ni-Cr Dental Alloys at Room Temperature and Elevated Temperatures.
PB90-169632 *000,059* Not available NTIS
- Elastic Effects during Late Stage Phase Transformations.
PB91-134841 *000,516* Not available NTIS
- Electric and Magnetic Dipole Radiation in a Random Medium.
PB90-254673 *000,912* Not available NTIS
- Electrical Characterization of Beta Silicon Carbide MIS (Metal-Insulator-Semiconductor) Capacitors with Thermally Grown or Chemical-Vapor Deposited Oxides.
PB90-136615 *000,866* Not available NTIS
- Electrical Fast-Transient Tests: Applications and Limitations.
PB90-271529 *000,853* Not available NTIS
PB91-112383 *000,939* Not available NTIS
- Electrical Performance Tests for Storage Oscilloscopes.
PB90-155367 *000,815* PC A16/MF A02
- Electrodeposition of an Aluminum-Manganese Metallic Glass from Molten Salts.
PB90-188509 *001,252* Not available NTIS
- Electrodeposition of Wear Resistant Coatings.
PB90-221839 *001,178* PC A06/MF A01
- Electrodynamics of Materials for Dielectric Measurement Standardization.
PB90-261066 *000,919* Not available NTIS
- Electromechanical Properties of Superconductors for High-Energy Physics Applications. Part 2.
PB90-163627 *001,693* PC A07/MF A01
- Electron Inelastic Mean Free Paths in Solids at Low Energies.
PB91-112706 *001,782* Not available NTIS
- Electron/X-ray Optical Bench for the Measurement of Fundamental Parameters for Electron Probe Microanalysis.
PB90-150186 *000,214* Not available NTIS
- Electronic Properties, Superconductivity and Stability of the Ordered Alloys of the Ti-Rh, Zr-Rh and Hf-Rh Isoelectronic Systems.
PB90-169301 *001,556* Not available NTIS
- Electronic Structure of High-(T sub c) Superconductors Studied Using Photoelectron Spectroscopy.
PB91-101386 *001,638* Not available NTIS
- Electronics Design of the Infrared/Ultrasonic Sensing for a Robot Gripper.
PB90-160383 *001,108* PC A03/MF A01
- Electrophoretic Response of Submicron Particles to Alternating Electric Fields.
PB90-218280 *000,439* Not available NTIS
- ELENDIF: A Time-Dependent Boltzmann Solver for Partially Ionized Plasmas.
PB90-241605 *001,508* Not available NTIS
- Ellipsoidal Mirror Analyzer for the Study of Photon Stimulated Desorption.
PB90-218272 *000,438* Not available NTIS
- EMAT (Electromagnetic-Acoustic Transducers) Examination for Cracks in Railroad Wheel Treads.
PB90-271636 *001,830* Not available NTIS
- Emerging Technologies in Electronics and Their Measurement Needs. Second Edition.
PB90-188087 *000,904* PC A09/MF A02
- EMR Test Facilities Evaluation of a Small Reverberating Chamber Located at RADC, Griffiss AFB, Rome, New York.
PB91-107516 *000,937* PC A05/MF A01
- Emulation Through Time Dilation.
PB90-228024 *000,650* PC A03/MF A01
- ENEA Reference Atmosphere Facility for Testing Radon and Daughters Measuring Equipment.
PB90-255316 *001,416*
(Order as PB90-255266, PC A06)
- Energetics and Spin- and Lambda-Doublet Selectivity in the Infrared Multiphoton Dissociation DN3 yields DN(X 3 Sigma(-), a 1 Delta) + N2(X 1 Sigma g (+)); Experiment. AD-A210 250/7 *000,301* PC A03/MF A01
- Energy Analysis of Heat Pumps.
PB90-150210 *000,956* Not available NTIS
- Energy Dependence of Polarization Observables in the (sup 2)H(d,gamma)(sup 4)He Reaction.
PB90-193533 *001,720* Not available NTIS
- Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1990.
PB90-219858 *000,201* PC A04/MF A01
- Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1991. Annual Supplement to NIST Handbook 135 and NBS Special Publication 709.
PB91-113613 *000,962* PC A04/MF A01
- Energy Rating of Refrigerators with Variable Defrost Controls.
PB90-170358 *000,948* Not available NTIS
- Energy Related Inventions Program: A Joint Program of the Department of Energy and the National Institute of Standards and Technology Status Report for Recommendations 1 through 250.
PB90-225988 *000,967* PC A08/MF A01
- Energy Related Inventions Program: A Joint Program of the Department of Energy and the National Institute of Standards and Technology Status Report for Recommendations 251 through 486.
PB90-221813 *000,966* PC A09/MF A01
- Energy Transfer Mechanism in SPT (Standard Penetration Test).
PB90-170184 *000,574* Not available NTIS
- Energy Transfer Processes of Aligned Excited States of Ca Atoms.
AD-A177 536/0 *000,297* PC A02/MF A01
- Energy Transfers in the Quasielastic Scattering of 70-1250-eV Electrons by Surfaces.
PB90-254517 *000,464* Not available NTIS
- Engineering Analysis of Major Plant Components.
PB90-169897 *000,085* Not available NTIS
- Engineering Data Collected during the Operation of a Total Energy Plant.
PB90-169905 *000,086* Not available NTIS
- Engineering of Binding Affinity at Metal Ion Binding Sites for the Stabilization of Proteins: Subtilisin as a Test Case.
PB90-152455 *001,309* Not available NTIS
- Enhanced Root Fluoride Uptake by Monocalcium Phosphate Monohydrate Gels.
PB90-171000 *001,347* Not available NTIS
- Enhancement of Sensitivity in Capillary Supercritical Fluid Chromatography through Optimization of Injection and Detection Techniques.
PB90-170432 *000,233* Not available NTIS
- Ensemble Time and Frequency Stability of GPS Satellite Clocks.
PB90-260902 *000,632* Not available NTIS
- Enthalpies of Combustion of Triphenylphosphine and Triphenylphosphine Oxide.
PB90-169608 *000,581* Not available NTIS
- Entropy-Driven Ion-Molecule Reactions.
PB90-218264 *000,437* Not available NTIS
- Environment-Induced Cracking of Copper Alloys.
PB91-117994 *001,230* Not available NTIS
- Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results.
PB90-164484 *000,084* PC A03/MF A01
- Environmentally Induced Cracking.
PB90-149485 *001,192* Not available NTIS

N90-27797/1 *001,516*
(Order as N90-27797/1, PC A07/MF A02)
- Formation and Decay of Zinc Tetrakis(N-methyl-4-pyridinio)porphyrin pi-Radical Cation in Aqueous Solutions Containing Azide Ions and Polyelectrolyte.
PB90-169715 *000,271* Not available NTIS
- Formation and Melting of Solvent Crystals in Thermoreversible Polymer Gels.
PB90-271396 *000,549* Not available NTIS
- Forward Smolder Propagation Over Solid Wood.
PB90-218223 *001,273* Not available NTIS
- Fostering General Awareness of the Importance of Inventiveness.
PB91-134288 *000,015* Not available NTIS
- Fourier Transform Infrared (FTIR) Determination of Interstitial Oxygen Concentration of Single-Side-Polished Silicon Wafers.
PB90-170762 *000,234* Not available NTIS
- Fourth Generation Software Tools for Prototyping.
PB90-254558 *000,724* Not available NTIS
- Fracture of Epoxy and Elastomer-Modified Epoxy Polymers.
PB90-150087 *001,269* Not available NTIS
- Fracture of Polycrystalline Ceramics.
PB91-134007 *001,166* Not available NTIS
- Fracture Resistance Behavior of Silicon Carbide Whisker-Reinforced Alumina Composites with Different Porosities.
PB90-261215 *001,186* Not available NTIS
- Fracture Toughness Behavior of a Silicon Carbide Whisker-Reinforced Alumina Ceramic at Selected Porosities.
PB91-134197 *001,167* Not available NTIS
- Framework for Developing a CALS Data Dictionary.
PB90-257585 *000,754* PC A03/MF A01
- Framework for Representing and Reasoning about Three-Dimensional Objects for Vision.
PB90-218215 *000,774* Not available NTIS
- Free-Electron Laser Driven by the NBS (National Bureau of Standards) CW Microtron.
AD-A201 170/8 *001,462* PC A07/MF A01
- Free Radical Chemistry of Aqueous-Phase SO(sub 2).
PB90-218207 *000,289* Not available NTIS
- Frequency Dependencies of Precision Resistors.
PB90-136557 *000,623* Not available NTIS
- Frequency Standards in the Optical Spectrum.
PB90-261397 *001,759* Not available NTIS
- Frost-Resistance of Concrete.
PB90-162116 *000,561* PC A03/MF A01
- FTAM Interoperability Tests.
PB91-107565 *001,036* PC A06/MF A01
- FTS Infrared Measurements of Alkali Halides in the Gas Phase. Rubidium Fluoride and Cesium Fluoride.
PB90-205790 *000,415* Not available NTIS
- Fugacity Coefficients of Hydrogen in (Hydrogen + 2-Methylpropane): Pressure Dependence.
PB91-133835 *000,509* Not available NTIS
- Full Scale Simulation of a Fatal Fire and Comparison of Results with Two Multitroom Models.
PB91-107482 *000,156* PC A06/MF A01
- Fundamental Configurations of Doubly-Ionized Molybdenum (Mo III).
PB90-152752 *000,332* Not available NTIS
- Fundamental Equation for Water Covering the Range from the Melting Line to 1273 K at Pressures up to 25 000 MPa(a).
PB90-161258 *000,340* Not available NTIS
- Fundamental Molecular Data to Support CAR3 (Coherent Anti Stokes Resonance Raman Spectrometry) Diagnostics of Temperature, Pressure, and Species Concentration.
AD-A212 411/3 *000,304* PC A06/MF A01
- Fundamental Processes of SF(sub 6) Decomposition and Oxidation in Glow and Corona Discharges.
PB90-193343 *000,906* Not available NTIS
- Fundamental Tests of the Isotropy of Space Using Fast-Beam Laser Spectroscopy.
PB90-136359 *001,678* Not available NTIS
- Fundamentals of Enclosure Fire 'Zone' Models, 1989.
PB90-254855 *000,148* Not available NTIS
- Fundamentals of Two-Way Time Transfers by Satellite.
PB90-187717 *000,626* Not available NTIS
- Furniture Flammability: An Investigation of the California Bulletin 133 Test. Part 2. Characterization of the Ignition Source and a Comparable Gas Burner.
PB90-257692 *000,111* PC A03/MF A01
- Furniture Flammability: An Investigation of the California Technical Bulletin 133 Test. Part 1. Measuring the Hazards of Furniture Fires.
PB90-256850 *000,110* PC A03/MF A01
- Furniture Flammability: An Investigation of the California Technical Bulletin 133 Test. Part 3. Full Scale Chair Burns.
PB90-257700 *000,112* PC A03/MF A01
- Gallium Arsenide (GaAs)-Based Photoconductive Switches for Pulse Generation and Sampling Applications in the Nanosecond Regime.
PB90-170978 *000,836* Not available NTIS
- Gas Isotope Dilution Mass Spectrometry: Use of Multiple Fractional Abundance Ratios.
PB91-134833 *000,263* Not available NTIS
- Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ethers Over the Temperature Range 240-440 K.
PB90-193491 *000,276* Not available NTIS
- Gas-Phase Reactions of Hydroxyl Radicals with the Fuel Additives Methyl Tert-Butyl Ether and Tert-Butyl Alcohol Over the Temperature Range 240-440 K.
PB90-193467 *000,414* Not available NTIS
- Gas Phase Reactions of Phenyl Radicals with Aromatic Molecules.
PB90-149295 *000,266* Not available NTIS
- Gateway between MHS (X.400) and SMTP.
PB90-218199 *000,618* Not available NTIS
- GATT (General Agreement on Tariffs and Trade) Standards Code Activities of the National Institute of Standards and Technology 1989.
PB90-219817 *000,204* PC A04/MF A01
- Gauge Invariance and Approximate Multiphoton Calculations in Hydrogen.
PB90-206020 *001,729* Not available NTIS
- General Purpose 37-Position and 9-Position Interface between Data Terminal Equipment and Data Circuit-Terminating Equipment.
FIPS PUB 143 *000,611* PC E01
- General Security Requirements for Equipment Using the Data Encryption Standard.
FIPS PUB 140 *000,608* PC E01
- Generalized Corresponding States and High-Temperature Aqueous Solutions.
PB91-118513 *000,507* Not available NTIS
- Generating Standard Reference Electromagnetic Fields in the NIST (National Institute of Standards and Technology) Anechoic Chamber, 0.2 to 40 GHz.
PB90-221797 *000,644* PC A03/MF A01
- Generational Mass Generation and Symmetry Breaking.
PB91-118372 *001,787* Not available NTIS
- Gibbs-Thomson Equation for a Spherical Coherent Precipitate with Applications to Nucleation.
PB90-188285 *000,391* Not available NTIS
- Glass Formation and Glassy Behavior.
PB90-170291 *000,530* Not available NTIS
- Glimpse at Long-Term Effects of Momentary Overvoltages on Zinc Oxide Varistors.
PB90-192337 *000,821* Not available NTIS
- Global Thermodynamic Behavior of Fluids in the Critical Region.
PB91-118091 *000,500* Not available NTIS
- Glycine Permeation through Na(1+), Ag(1+) and Cs(1+) - Forms of Perfluorosulfonated Ion Exchange Membranes.
PB90-170465 *000,369* Not available NTIS
- Goals for the Application of High-Resolution X-ray Spectroscopy to the Diagnosis of Stellar Coronae Plasmas.
PB90-271495 *000,047* Not available NTIS
- Government's Role in Standards-Related Activities: Analysis of Comments.
PB90-215534 *000,011* PC A03/MF A01
- GRAMPS (General Real-Time Asynchronous Multi-Processor System) Multiprocessor Operating System.
PB90-171257 *000,786* PC A03/MF A01
- Graphics Standards in the Computer-Aided Acquisition and Logistic Support (CALS) Program, Fiscal Year 1989. Volume 1. Test Requirements Document, Extended CGM (CGEM).
PB90-257759 *000,756* PC A15/MF A02
- Graphics Standards in the Computer-Aided Acquisition and Logistic Support (CALS) Program, Fiscal Year 1989. Volume 2. MIL-D-28003 Revisions, CGM Registration.
PB90-228016 *001,379* PC A15/MF A02
- Gravitational Radiation from the Galaxy.
PB91-118307 *000,050* Not available NTIS
- Grazing-Angle X-ray Standing Waves.
PB91-118349 *000,505* Not available NTIS
- Grid of Low Metallicity Line-Blanketed LTE Model Stellar Atmospheres.
PB90-271362 *000,044* Not available NTIS
- Group-Theoretical Formalism for the Large-Amplitude Vibration-Rotation Problem in Methylamine-d1.
PB90-271586 *000,481* Not available NTIS
- Growth of a Coherent Precipitate from Supersaturated Solution.
PB90-169434 *000,352* Not available NTIS
- Growth of Ultrathin Fe Films on Cu(100): Mechanisms, Morphology and Stability.
PB90-192717 *001,591* Not available NTIS
- Guide for Selecting Automated Risk Analysis Tools.
PB90-148784 *000,784* PC A03/MF A01
- Guide Specifications and Reference Specification System.
PB90-139635 *000,114* PC A05/MF A01
- Guide to Available Mathematical Software, March 1990.
PB90-216508 *001,308* PC A99/MF A04
- Guide to Data Administration.
PB90-147919 *001,027* PC A05/MF A01
- Guide to Software Acceptance.
PB90-219627 *000,722* PC A03/MF A01
- Guided Interface Waves.
PB91-118158 *001,189* Not available NTIS
- Guideline for Quality Control of Image Scanners; Category: Hardware Standard; Subcategory: Calibration, Validation, and Testing. Recommended Practice for Quality Control of Image Scanners. Standard.
FIPS PUB 157 *000,741* PC E18
- Guidelines for Pressure Vessel Safety Assessment.
PB90-219619 *001,219* PC A05/MF A01
- Guidelines for Realizing the International Temperature Scale of 1990 (ITS-90).
PB91-112854 *001,783* PC A09/MF A02
- Guidelines for the Evaluation of Message Handling Systems Implementations.
PB90-269598 *000,622* PC A07/MF A01
- Guidelines for the Infrastructure of Statistical Software.
PB90-187733 *001,302* Not available NTIS
- Gylden Systems: Rotation of Pericenters.
PB90-136391 *000,023* Not available NTIS
- Gyroscope-Weighing Experiment with a Null Result.
PB90-205972 *001,728* Not available NTIS
- Harmonic Generation by a Classical Hydrogen Atom in the Presence of an Intense Radiation Field.
PB90-205873 *001,726* Not available NTIS
- Harmonization of Standards and Regulations: Problems and Opportunities for the United States.
PB90-218181 *000,117* Not available NTIS
- Heat Capacity, Cp, of Fluids from Transient Hot Wire Measurements.
PB90-192527 *001,010* Not available NTIS
- Heat Induced Instability in a Model Liquid.
PB91-133991 *001,796* Not available NTIS
- Heat of Reaction and Curing of Epoxy Resin.
PB90-135872 *000,522* Not available NTIS
- Heat Transfer in a Compact Tubular Heat Exchanger with Helium Gas at 3.5 MPa.
PB91-107573 *001,120* PC A04/MF A01
- Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm(-1).
PB90-206897 *000,425* Not available NTIS
- Heterodyne Frequency Measurements on N(sub 2)O Near 930 cm(-1).
PB90-136318 *000,317* Not available NTIS
- Heterodyne Frequency Measurements on OCS Near 61.76 THz (2060 cm(-1)).
PB90-206806 *000,423* Not available NTIS

TITLE INDEX

- Heterodyne Frequency Measurements on SO₂ Near 41 THz (1370 cm⁻¹). PB91-134791 001,803 Not available NTIS
- Hg(1+) Single Ion Spectroscopy. PB90-187519 000,383 Not available NTIS
PB90-260928 001,755 Not available NTIS
- Hierarchical Control of Intelligent Machines Applied to Space Station Telerobots. N89-26471/7 001,814
(Order as N89-26454/3, PC A16/MF A01)
- Hierarchical Real-Time Control Task Decomposition for a Coal Mining Automation Project. PB90-198433 001,391 PC A04/MF A01
- High Accuracy, Absolute Wavelength Determination of Capture Gamma Ray Energies for E less than or equal to 5 MeV and the Direct Determination of Binding Energies in Light Nuclei. PB90-261157 001,758 Not available NTIS
- High Accuracy Determination of the Fine Structure Constant via Measurement of the Proton Gyromagnetic Ratio. PB90-242256 001,748 Not available NTIS
- High Accuracy Spectroscopy of Stored Ions. PB90-188624 001,716 Not available NTIS
- High Current, Very Wide Band Transconductance Amplifier. PATENT-4 965 529 000,834 Not available NTIS
PB90-187808 000,818 Not available NTIS
- High-Dose Intercomparison Study Involving Red 4034 Persepe and FWT-60-00 Radiochromic Dye Films. PB91-101048 000,292 Not available NTIS
- High-Precision Optical Reflectometer for the Study of Semiconductor Materials and Structures. PB91-111963 000,884 Not available NTIS
- High Resolution Infrared Spectrum of (28)SiH(sub 3)D from 1450 to 1710 cm⁻¹. PB90-188376 000,396 Not available NTIS
- High Resolution Inverse Raman Spectroscopy of the CO Q Branch. AD-A205 450/0 000,298 PC A03/MF A01
- High-Resolution Measurement of Water-Vapor Overtone Absorption in the Visible by Frequency-Modulation Spectroscopy. PB90-169871 000,357 Not available NTIS
- High Spatial Resolution Secondary Ion Imaging and Secondary Ion Mass Spectrometry of Aluminum-Lithium Alloys. PB90-193574 001,257 Not available NTIS
- High-Tc Superconducting Unit Having Low Contact Surface Resistivity and Method of Making. PATENT-4 963 523 000,894 Not available NTIS
- High Technology Office Evaluation Survey: A Pilot Study. PB90-244427 000,101 PC A04/MF A01
- High Temperature Lubricants from Biodeuterated Materials Produced by Algae. PB90-169921 001,222 Not available NTIS
- High Temperature Ultrasonic Testing of Materials for Internal Flaws. PATENT-4 898 034 001,274 Not available NTIS
- Histogram Specification as a Method of Density Modification. PB90-153479 001,553 Not available NTIS

N89-13323/5
Optical Heterodyne Densitometer.
N89-13323/5 001,466 (Order as N89-13310/2, PC A14/MF A01)

N89-13657/6
Aluminum Oxide Barriers in Metal CrAlY Superalloy Systems.
N89-13657/6 001,169 (Order as N89-13642/8, PC A10/MF A01)

N89-16614/4
IUE's Legacy for the Future: The Final Archive and Goals for Its Implementation.
N89-16614/4 000,030 (Order as N89-16535/1, PC A19/MF A01)

N89-20317/8
Dynamic Thermophysical Measurements in Space.
N89-20317/8 001,822 (Order as N89-20305/3, PC A13/MF A01)

N89-23501/4
Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813 PC A03/MF A01

N89-26471/7
Hierarchical Control of Intelligent Machines Applied to Space Station Telebots.
N89-26471/7 001,814 (Order as N89-26454/3, PC A16/MF A01)

N90-13945/2
Physical Phenomena and the Microgravity Response.
N90-13945/2 001,317 (Order as N90-13939/5, PC A14/MF A02)

N90-17903/7
Radiation Thermometry at NIST: An Update of Services and Research Activities.
N90-17903/7 000,995 (Order as N90-17894/8, PC A16/MF A03)

N90-24325/4
NASREM: A Functional Architecture for Control of the Flight Telerobotic Servicer.
N90-24325/4 001,815 (Order as N90-24280/1, PC A19/MF A03)

N90-24604/2
Review of Model Sensor Studies on Pd/SnO₂(110) Surfaces.
N90-24604/2 000,315 (Order as N90-24586/1, PC A18/MF A03)

N90-27796/3
Pinning, Flow and Plastic Deformation of Flux Vortices in High T(Sub c) Superconductors. (Abstract Only).
N90-27796/3 001,515 (Order as N90-27792/2, PC A07/MF A02)

N90-27797/1
Flux Flow and Flux Dynamics in High-T(Sub c) Superconductors.(Abstract Only).
N90-27797/1 001,516 (Order as N90-27797/1, PC A07/MF A02)

N90-27860/7
Processing Bi-Pb-Sr-Ca-Cu-O Superconductors from Amorphous State.(Abstract Only).
N90-27860/7 001,517 (Order as N90-27792/2, PC A07/MF A02)

N90-27864/9
Measurement of H(Sub c1) in a Single Crystal of YBa₂Cu₃O₇ with Low Pinning.(Abstract Only).
N90-27864/9 001,518 (Order as N90-27792/2, PC A07/MF A02)

N90-27865/6
Studies of Iron Impurities in Y(x)Pr(1-x)Ba₂Cu₃O₇(δ). (Abstract Only).
N90-27865/6 001,519 (Order as N90-27792/2, PC A07/MF A02)

N90-29823/3
Flight Telerobotic Services: From Functional Architecture to Computer Architecture.
N90-29823/3 001,816 (Order as N90-29780/5, PC A23/MF A04)

N90-29891/0
Requirements for Implementing Real-Time Control Functional Modules on a Hierarchical Parallel Pipelined System.
N90-29891/0 001,089 (Order as N90-29874/6, PC A19/MF A03)

NAS 1.26:182266
Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813 PC A03/MF A01

NASA-CR-182266
Expert Systems Applied to Spacecraft Fire Safety.
N89-23501/4 001,813 PC A03/MF A01

NBS/SW/DK-90/005
Federal Building Life-Cycle Cost (FBLCC) Program (for Microcomputers).

NIST/TN-1277
Concept for a Reference Model Architecture for Real-Time Intelligent Control Systems (ARTICS).
PB90-220286 001,048 PC A03/MF A01

NIST/TN-1278
Preliminary Screening Procedures and Criteria for Replacements for Halons 1211 and 1301.
PB91-107110 000,595 PC A14/MF A02

NIST/TN-1279
Construction of an Exploratory List of Chemicals to Initiate the Search for Halon Alternatives.
PB91-107508 000,598 PC A10/MF A02

NIST/TN-1280
Absolute Specular Reflectometer with an Autocollimator Telescope and Auxiliary Mirrors.
PB90-269572 001,498 PC A03/MF A01

NIST/TN-1281
NIST (National Institute of Standards and Technology) Digitally Synthesized Power Calibration Source.
PB91-107474 000,831 PC A04/MF A01

NIST/TN-1318
Variances Based on Data with Dead Time between the Measurements.
PB90-221821 001,303 PC A03/MF A01

NIST/TN-1332
Systematic Errors in Power Measurements Made with a Dual Six-Port ANA.
PB90-145160 000,814 PC A04/MF A01

NIST/TN-1333
Coaxial Intrinsic Impedance Standards.
PB90-155797 000,816 PC A03/MF A01

NIST-TN/1334
Thermophysical Properties of Helium-4 from 0.8 to 1500 K with Pressures to 2000 MPa.
PB90-183351 000,381 PC A07/MF A01

NIST/TN-1335
Generating Standard Reference Electromagnetic Fields in the NIST (National Institute of Standards and Technology) Anechoic Chamber, 0.2 to 40 GHz.
PB90-221797 000,644 PC A03/MF A01

NIST/TN-1336
Wavelength Measurement System for Optical Fiber Communications.
PB90-221805 000,619 PC A03/MF A01

NIST/TN-1337
Characterization of Clocks and Oscillators.
PB91-100909 000,637 PC A16/MF A02

NIST/TN-1338
Dielectric Characterization and Reference Materials.
PB90-257742 000,918 PC A06/MF A01

NIST/TN-1342
Measurement and Evaluation of a TEM (Transverse Electromagnetic)/Reverberating Chamber.
PB91-120105 000,942 PC A06/MF A01

NISTIR-85/3273-4
Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1990.
PB90-219858 000,201 PC A04/MF A01

NISTIR-85/3273-5
Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1991. Annual Supplement to NIST Handbook 135 and NBS Special Publication 709.
PB91-113613 000,962 PC A04/MF A01

NISTIR-88/3856
Effect of Interstitial Elements on Phase Relationships in the Titanium-Aluminum System.
PB90-196528 001,259 PC A04/MF A01

NISTIR-88/4009
Evaluation of Thermal Probe Method for Estimating the Heat Loss from Underground Heat Distribution Systems.
PB90-161993 000,957 PC A07/MF A01

NISTIR-89/3912
Electromechanical Properties of Superconductors for High-Energy Physics Applications. Part 2.
PB90-163627 001,693 PC A07/MF A01

NISTIR-89/3916
Time Domain Frequency Stability Calculated from the Frequency Domain Description: Use of the SIGINT Software Package to Calculate Time Domain Frequency Stability from the Frequency Domain.
PB90-257684 000,631 PC A03/MF A01

NISTIR-89/3920
Bibliography of the NIST (National Institute of Standards and Technology) Electromagnetic Fields Division Publications.
PB90-163635 000,896 PC A06/MF A01

NISTIR-89/3921
Metrology for Electromagnetic Technology: A Bibliography of NIST (National Institute of Standards and Technology) Publications.
PB90-161670 001,473 PC A04/MF A01

NISTIR-89/3924
Near-Field Gain of Pyramidal Horns from 18 to 40 GHz.
PB90-155854 000,802 PC A03/MF A01

NISTIR-89/3925
Development of a Computer-Controlled Hot-Deformation Apparatus at NIST (National Institute of Standards and Technology).
PB90-149964 001,045 PC A05/MF A01

NISTIR-89/3926
Apparatus for Measuring High-Flux Heat Transfer in Radiatively Heated Compact Exchangers.
PB90-155870 001,692 PC A03/MF A01

NISTIR-89/3927
Recent Improvements in Time-Domain EMC (Electromagnetic Compatibility) Measurement System.
PB90-155821 000,018 PC A03/MF A01

NISTIR-89/3928
Facilities for Improving Evaluations of Electromagnetic Susceptibilities of Weapon Systems and Electronic Equipment.
PB90-155862 001,376 PC A03/MF A01

NISTIR-89/3929
Planar Near-Field Codes for Personal Computers.
PB90-155839 000,801 PC A04/MF A01

NISTIR-89/3931
Materials Studies for Magnetic Fusion Energy Applications at Low Temperatures--XII.
PB90-157553 001,395 PC A13/MF A02

NISTIR-89/3932
Nontoxic Heat Transport Fluids for Spacecraft Two-Phase Thermal Control Systems.
PB90-196510 001,819 PC A05/MF A01

NISTIR-89/3933
Basics of Chemical Instrumentation. Volume 1. Separation Methods.
PB90-198458 000,242 PC A09/MF A01

NISTIR-89/4030
Ignition and Lateral Flame Spread Characteristics of Certain Composite Materials.
PB90-205188 000,586 PC A03/MF A01

NISTIR-89/4036
NVLAP (National Voluntary Laboratory Accreditation Program) Program Handbook. Computer Network Interface Protocol X.25. Requirements for Accreditation.
PB90-156894 000,647 PC A04/MF A01

NISTIR-89/4044
Screening Procedures for Detecting Lead in Existing Paint Films: A Literature Review.
PB90-162082 001,173 PC A03/MF A01

NISTIR-89/4064
Mechanism, Measurement, and Influence of Properties on the Galling of Metals.
PB90-160334 001,275 PC A06/MF A01

NISTIR-89/4066
Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results.
PB90-164484 000,084 PC A03/MF A01

NISTIR-89/4078
Role of the National Institute of Standards and Technology as It Relates to Product Data Driven Engineering.
PB90-161720 001,067 PC A03/MF A01

NISTIR-89/4079
Determination of Fiber/Matrix Interfacial Properties of Ceramic and Glass Matrix Composites.
PB90-163254 001,136 PC A05/MF A01

NISTIR-89/4091
Burning, Smoke Production, and Smoke Dispersion from Oil Spill Combustion.
PB90-146374 000,987 PC A04/MF A01

NISTIR-89/4094
Guide Specifications and Reference Specification System.
PB90-139635 000,114 PC A05/MF A01

NISTIR-89/4104
Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating.
PB90-185117 000,089 PC A06/MF A01

NISTIR-89/4114
Corrosion of Zircaloy Spent Fuel Cladding in a Repository.
PB90-207291 001,427 PC A03/MF A01

NISTIR-89/4115
Recommended Technical Specifications for Procurement of Systems for a Cleaning and Deburring Workstation.
PB90-183252 001,046 PC A03/MF A01

NISTIR-89/4125
NVLAP (National Voluntary Laboratory Accreditation Program) Program Handbook: Personnel Radiation Dosimetry. Requirements for Accreditation.
PB90-242298 001,364 PC A04/MF A01

NISTIR-89/4129
Life-Cycle Costing for Energy Conservation in Buildings: Instructor's Guide.
PB90-198441 000,090 PC A09/MF A01

NISTIR-89/4130
Life-Cycle Costing for Energy Conservation in Buildings: Student's Manual.
PB90-199068 000,092 PC A13/MF A02

NISTIR-89/4134
Quantification of Heat Losses through Structural Supports for Shallow Trench Heat Distribution Systems.
PB90-219585 000,958 PC A05/MF A01

NISTIR-89/4136
Assessment of the Performance and Reliability of Older ERW (Electric Resistance Welding) Pipelines.
PB90-148776 001,828 PC A04/MF A01

NISTIR-89/4141
Model of a Simple Fan-Resistance Ventilation System and Its Application to Fire Modeling.
PB90-183336 000,088 PC A03/MF A01

NISTIR-89/4148
Institute for Materials Science and Engineering, Ceramics: Technical Activities 1989.
PB90-163981 001,137 PC A08/MF A01

NISTIR-89/4149
Institute for Materials Science and Engineering, Fracture and Deformation Division: Technical Activities 1989.
PB90-155359 001,663 PC A05/MF A01

NISTIR-89/4150
Institute for Materials Science and Engineering, Polymers: Technical Activities 1989.
PB90-163510 000,528 PC A06/MF A01

NISTIR-89/4151
Institute for Materials Science and Engineering: Metallurgy Division, Technical Activities 1989.
PB90-161159 001,276 PC A07/MF A01

NISTIR-89/4156
Preliminary Performance Criteria for the Bond of Portland-Cement and Latex-Modified Concrete Overlays.
PB90-204520 000,571 PC A06/MF A01

NISTIR-89/4162
Comparison of the NIST (National Institute of Standards and Technology) and European Gold Coating Standards.
PB90-164278 001,175 PC A03/MF A01

NISTIR-89/4171
Accuracy Analysis of the Space Shuttle Solid Rocket Motor Profile Measuring Device.
PB90-148362 001,817 PC A05/MF A01

NISTIR-89/4177
Decoding Bar Codes from Image Data.
PB90-136995 000,772 PC A03/MF A01

NISTIR-89/4179
Automated Maintenance Management Program Part 2: The Integration of Databases and Image Processing Results for the Quantitative Assessment of the Exterior Condition of Metal Buildings.
PB90-162090 000,108 PC A03/MF A01

NISTIR-89/4181
Center for Electronics and Electrical Engineering Technical Progress Bulletin Covering Center Programs, April to June 1989, with 1989 CEEE Events Calendar.
PB90-132721 000,865 PC A03/MF A01

PATENT-4 963 826 001,070 Not available NTIS

- PAT-APPL-7-382 884**
Scanning Scattering Microscope with Hemispherical Mirror and Microfocussed Beam.
PATENT-4 954 722 000,996 Not available NTIS
- PAT-APPL-7-409 854**
Thermal Technique for Determining Interface and/or Interply Strength in Composites.
PATENT-4 972 720 001,182 Not available NTIS
- PAT-APPL-7-410 387**
High Current, Very Wide Band Transconductance Amplifier.
PATENT-4 965 529 000,834 Not available NTIS
- PAT-APPL-7-436 839**
Method and Apparatus for Producing a Photopumped VUV Laser in MO₆+ Ion-Containing Plasma.
PATENT-4 939 744 001,468 Not available NTIS
- PAT-APPL-7-452 439**
Transparent Thin Film Thermocouple.
PATENT-4 969 956 000,854 Not available NTIS
- PAT-APPL-7-482 589**
Method and Apparatus for Supercritical Fluid Extraction Solution Separation.
PATENT-4 962 275 000,316 Not available NTIS
- PATENT-4 830 917**
Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.
PATENT-4 830 917 001,223 Not available NTIS
- PATENT-4 898 034**
High Temperature Ultrasonic Testing of Materials for Internal Flaws.
PATENT-4 898 034 001,274 Not available NTIS
- PATENT-4 907 237**
Optical Feedback Locking of Semiconductor Lasers.
PATENT-4 907 237 001,467 Not available NTIS
- PATENT-4 919 829**
Aluminum Hydroxides as Solid Lubricants.
PATENT-4 919 829 001,221 Not available NTIS
- PATENT-4 939 744**
Method and Apparatus for Producing a Photopumped VUV Laser in MO₆+ Ion-Containing Plasma.
PATENT-4 939 744 001,468 Not available NTIS
- PATENT-4 954 722**
Scanning Scattering Microscope with Hemispherical Mirror and Microfocussed Beam.
PATENT-4 954 722 000,996 Not available NTIS
- PATENT-4 962 275**
Method and Apparatus for Supercritical Fluid Extraction Solution Separation.
PATENT-4 962 275 000,316 Not available NTIS
- PATENT-4 963 523**
High-Tc Superconducting Unit Having Low Contact Surface Resistivity and Method of Making.
PATENT-4 963 523 000,894 Not available NTIS
- PATENT-4 963 826**
Reference Standard Block for Use in Nondestructive Test Probe Calibration and Method of Manufacture Thereof.
PATENT-4 963 826 001,070 Not available NTIS
- PATENT-4 965 529**
High Current, Very Wide Band Transconductance Amplifier.
PATENT-4 965 529 000,834 Not available NTIS
- PATENT-4 968 908**
Method and Apparatus for Wide Band Phase Modulation.
PATENT-4 968 908 000,813 Not available NTIS
- PATENT-4 969 956**
Transparent Thin Film Thermocouple.
PATENT-4 969 956 000,854 Not available NTIS
- PATENT-4 972 720**
Thermal Technique for Determining Interface and/or Interply Strength in Composites.
PATENT-4 972 720 001,182 Not available NTIS
- PB90-132721**
Center for Electronics and Electrical Engineering Technical Progress Bulletin Covering Center Programs, April to June 1989, with 1989 CEEE Events Calendar.
PB90-132721 000,865 PC A03/MF A01
- PB90-135773**
Method for Characterizing the Dynamic Performance of Wall Specimens Using a Calibrated Hot Box.
PB90-135773 000,125 Not available NTIS
- PB90-135781**
Reply to Discussion of Order-Disorder in Omphacitic Pyroxenes: A Model for Coupled Substitution in the Point Approximation.
PB90-135781 001,389 Not available NTIS
- PB90-135799**
Patterson Fourier Analysis of the Icosahedral (Al,Si)-Mn Alloy.
PB90-135799 001,243 Not available NTIS
- PB90-135807**
Influence of Equilibrium Shape on Heterogeneous Nucleation Textures.
PB90-135807 001,520 Not available NTIS
- PB90-135815**
Standard Flaws for Eddy Current Probe Characterizations.
PB90-135815 001,244 Not available NTIS
- PB90-135823**
Analytical Use and Applications of the Nuclear Track Technique.
PB90-135823 000,206 Not available NTIS
- PB90-135831**
Performance Measurement Instrumentation at NBS (National Bureau of Standards).
PB90-135831 000,645 Not available NTIS
- PB90-135849**
Advances in Research on Dynamic Measurements of Thermophysical Properties at High Temperatures.
PB90-135849 000,997 Not available NTIS
- PB90-135856**
Identification and Comparison of Low-Molecular-Weight Neutral Constituents in Two Different Coal Extracts.
PB90-135856 000,950 Not available NTIS
- PB90-135864**
Correlation of Cure Monitoring Techniques.
PB90-135864 000,521 Not available NTIS
- PB90-135872**
Heat of Reaction and Curing of Epoxy Resin.
PB90-135872 000,522 Not available NTIS
- PB90-135880**
Kim Model for Magnetization of Type-II Superconductors.
PB90-135880 001,521 Not available NTIS
- PB90-135898**
Computer Systems as Scientific Theories: A Popperian Approach to Testing.
PB90-135898 000,712 Not available NTIS
- PB90-135906**
Low Temperature Thermal Processing of Ba(sub 2)YCu(sub 3)O(sub 7-x) Superconducting Ceramics.
PB90-135906 001,522 Not available NTIS
- PB90-135914**
Orientation Distribution of Fiber-Axes and Neutron Powder Diffraction Profiles.
PB90-135914 001,523 Not available NTIS
- PB90-135930**
Damage-Enhanced Creep in a Siliconized Silicon Carbide: Mechanics of Deformation.
PB90-135930 001,058 Not available NTIS
- PB90-135948**
Ultrasonic Methods of Texture Monitoring for Characterization of Formability of Rolled Aluminum Sheet.
PB90-135948 001,245 Not available NTIS
- PB90-135955**
Acoustic Emission Studies of Electron Beam Surface Modification of Aluminum.
PB90-135955 001,246 Not available NTIS
- PB90-135963**
Quadratic Zeeman Effect in Moderately Strong Magnetic Fields.
PB90-135963 001,676 Not available NTIS
- PB90-136276**
Spectral Diagnostics from X-ray to Radio Wavelengths.
PB90-136276 000,031 Not available NTIS
- PB90-136284**
Effect of Electron-Hole Plasmas on the Density of States of Silicon and GaAs.
PB90-136284 001,524 Not available NTIS
- PB90-136292**
How High is the Level of Electromagnetic Fields Radiated by an ESD (Electrostatic Discharge).
PB90-136292 001,511 Not available NTIS
- PB90-136300**
Theory and Measurements of Unintentional Radiators.
PB90-136300 000,895 Not available NTIS
- PB90-136318**
Heterodyne Frequency Measurements on N(sub 2)O Near 930 cm⁻¹.
PB90-136318 000,317 Not available NTIS
- PB90-136326**
Tilt Observations Using Borehole Tiltmeters 2. Analysis of Data from Yellowstone National Park.
PB90-136326 001,363 Not available NTIS
- PB90-136334**
Break Junction Measurement of the Tunneling Gap of a Thallium-Based High-Temperature Superconductor Crystal.
PB90-136334 001,525 Not available NTIS
- PB90-136342**
Characteristics of an Optically Pumped Cs Frequency Standard at the NRLM (National Research Laboratory of Metrology).
PB90-136342 001,677 Not available NTIS
- PB90-136359**
Fundamental Tests of the Isotropy of Space Using Fast-Beam Laser Spectroscopy.
PB90-136359 001,678 Not available NTIS
- PB90-136367**
Interaction of Cytidine 3'-Monophosphate and Uridine 3'-Monophosphate with Ribonuclease a at the Denaturation Temperature.
PB90-136367 000,265 Not available NTIS
- PB90-136383**
Ceramic Heat Exchangers.
PB90-136383 001,126 Not available NTIS
- PB90-136391**
Gylden Systems: Rotation of Pericenters.
PB90-136391 000,023 Not available NTIS
- PB90-136409**
Systematics of X-ray Transition Energies for High-Z Atoms.
PB90-136409 001,679 Not available NTIS
- PB90-136417**
Fluorescent and Scattered Spectra: Near-Threshold Excitation of Atoms, Molecules, and Solids.
PB90-136417 001,680 Not available NTIS
- PB90-136425**
Microcomputer Programs for Size Exclusion Chromatography.
PB90-136425 000,318 Not available NTIS
- PB90-136433**
Characterization of Epitaxial Fe on GaAs(110) By Scanning Tunneling Microscopy.
PB90-136433 001,170 Not available NTIS
- PB90-136441**
Samuel Stanley Wilks' Princeton Appointment, and Statistics at Princeton Before Wilks.
PB90-136441 001,307 Not available NTIS
- PB90-136458**
Tunable Far Infrared Laser Spectroscopy.
PB90-136458 001,469 Not available NTIS
- PB90-136466**
Metallicity and Gap States in Tunneling to Fe Clusters on GaAs(110).
PB90-136466 001,526 Not available NTIS
- PB90-136482**
Color and Lighting.
PB90-136482 000,079 Not available NTIS
- PB90-136490**
Oxygen Vacancies and Defect Electronic States on the SnO(sub 2)(110)-1x1 Surface.
PB90-136490 001,527 Not available NTIS
- PB90-136508**
Oxygen-Vacancy-Derived Defect Electronic States on the SnO(sub 2)(110) Surface.
PB90-136508 001,528 Not available NTIS
- PB90-136516**
Two-Dimensional POMMIE J (CH)-Resolved (13)C NMR Spectrum Editing Application to Peptide and Carbohydrate Derivatives.
PB90-136516 000,207 Not available NTIS
- PB90-136524**
Preparation and Certification of Standard Reference Material 1507: 11-Nor-Delta(sup 9)-Tetrahydrocannabinol-9-Carboxylic Acid in Freeze-Dried Urine.
PB90-136524 000,208 Not available NTIS
- PB90-136532**
Wear Surface Analysis of Silicon Nitride.
PB90-136532 001,112 Not available NTIS
- PB90-136557**
Frequency Dependencies of Precision Resistors.
PB90-136557 000,623 Not available NTIS
- PB90-136581**
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method.
PB90-136581 000,624 Not available NTIS
- PB90-136607**
Behavior of Primary Radicals during Thermal Degradation of Poly(Methyl Methacrylate).
PB90-136607 000,523 Not available NTIS
- PB90-136615**
Electrical Characterization of Beta Silicon Carbide MIS (Metal-Insulator-Semiconductor) Capacitors with Thermally Grown or Chemical-Vapor Deposited Oxides.
PB90-136615 000,866 Not available NTIS
- PB90-136623**
Finite Element Model of Stress Wave Topology in Unidirectional Graphite/Epoxy: Wave Velocities and Flux Deviations.
PB90-136623 001,529 Not available NTIS
- PB90-136631**
Thermoelastic Coefficient and Its Pressure Derivative: Derivation from a Mie-Gruneisen Interatomic Potential.
PB90-136631 001,530 Not available NTIS
- PB90-136656**
Plate-Like Rigid Inclusions and the Ductile-Brittle Transition.
PB90-136656 001,247 Not available NTIS
- PB90-136664**
Relativistic BCS-OHR Model.
PB90-136664 001,531 Not available NTIS
- PB90-136698**
Absorption Cross Section of As in Si.
PB90-136698 001,532 Not available NTIS
- PB90-136789**
Noncontact Ultrasonic Sensors for High Temperature Process Control.
PB90-136789 001,209 Not available NTIS
- PB90-136870**
Distance Measurements in Space: Gravitational Physics Tests and a Proposed Laser Gravitational Wave Antenna.
PB90-136870 001,681 Not available NTIS
- PB90-136888**
ETRAN-Experimental Benchmarks.
PB90-136888 001,682 Not available NTIS

NTIS ORDER/REPORT NUMBER INDEX

- PB90-136896**
NIST's (National Institute of Standards and Technology) Ultra-Clean Ceramic Processing Laboratory.
PB90-136896 001,127 Not available NTIS
- PB90-136912**
Object Finder Based on Multiple Thresholds, Connectivity, and Internal Structure.
PB90-136912 001,683 Not available NTIS
- PB90-136920**
Development of a Weld Procedure to Repair Joints in a Railroad-Type Track.
PB90-136920 001,829 Not available NTIS
- PB90-136938**
National Institute of Standards and Technology Molecular Measuring Machine: A Long-Range Scanning Tunneling Microscope for Dimensional Metrology.
PB90-136938 001,684 Not available NTIS
- PB90-136953**
Influence of Pressure and Humidity on the Medium and Long-Term Frequency Stability of Quartz Oscillators.
PB90-136953 000,855 Not available NTIS
- PB90-136961**
Developments in Atomic-Absorption, X-ray Fluorescence, and Plasma-Emission Spectrometry for the Analysis of Metals and Ores.
PB90-136961 001,390 Not available NTIS
- PB90-136995**
Decoding Bar Codes from Image Data.
PB90-136995 000,772 PC A03/MF A01
- PB90-139635**
Guide Specifications and Reference Specification System.
PB90-139635 000,114 PC A05/MF A01
- PB90-141383**
Risk Exposure and Risk Attitude of Homeowners in Fire Protection Investment Decisions.
PB90-141383 000,107 PC A05/MF A01
- PB90-145095**
Management Guide to the Protection of Information Resources.
PB90-145095 000,780 PC A03/MF A01
- PB90-145160**
Systematic Errors in Power Measurements Made with a Dual Six-Port ANA.
PB90-145160 000,814 PC A04/MF A01
- PB90-145624**
Influence of Horizontal Reinforcement on Shear Resistance of Concrete Block Masonry Walls.
PB90-145624 000,168 PC A04/MF A01
- PB90-145855**
Production of Microporous Finely Divided Matrix Material with Nuclear Tracks from an Isotropic Source and Product Thereof.
PATENT-4 830 917 001,223 Not available NTIS
- PB90-146374**
Burning, Smoke Production, and Smoke Dispersion from Oil Spill Combustion.
PB90-146374 000,987 PC A04/MF A01
- PB90-146440**
Working Implementation Agreements for Open Systems Interconnection (OSI) Protocols.
PB90-146440 000,613 PC A20/MF A03
- PB90-146465**
Report of the National Conference on Weights and Measures (74th).
PB90-146465 000,998 PC A12/MF A02
- PB90-146549**
Intelligent Processing for Primary Metals.
PB90-146549 001,210 PC A03/MF A01
- PB90-147406**
Thermal Effects of Handling Ball Bars.
PB90-147406 000,999 PC A03/MF A01
- PB90-147489**
Computer User's Guide to the Protection of Information Resources.
PB90-147489 000,781 PC A03/MF A01
- PB90-147919**
Guide to Data Administration.
PB90-147919 001,027 PC A05/MF A01
- PB90-147968**
Discount Factor Tables for Life-Cycle Cost Analyses.
PB90-147968 000,205 PC A05/MF A01
- PB90-148123**
Report of the Invitational Workshop on Data Integrity.
PB90-148123 000,782 PC A17/MF A02
- PB90-148362**
Accuracy Analysis of the Space Shuttle Solid Rocket Motor Profile Measuring Device.
PB90-148362 001,817 PC A05/MF A01
- PB90-148750**
Executive Guide to the Protection of Information Resources.
PB90-148750 000,783 PC A03/MF A01
- PB90-148776**
Assessment of the Performance and Reliability of Older ERW (Electric Resistance Welding) Pipelines.
PB90-148776 001,828 PC A04/MF A01
- PB90-148784**
Guide for Selecting Automated Risk Analysis Tools.
PB90-148784 000,784 PC A03/MF A01
- PB90-149071**
Photons, Rotons and Fractionally-Charged Vortices in the Quantum Hall Effect.
PB90-149071 001,533 Not available NTIS
- PB90-149089**
Photochemistry of Diacetylene.
PB90-149089 000,282 Not available NTIS
- PB90-149097**
Soft-Tissue-Substitute Liquid.
PB90-149097 001,352 Not available NTIS
- PB90-149105**
Correction to 'Calorimetric Measurement of the Carbon Kerma Factor for 14.6-MeV Neutrons' by J. C. McDonald.
PB90-149105 001,685 Not available NTIS
- PB90-149113**
Thermal Contraction of Fiberglass-Epoxy Sample Mandrels and Its Effect on Critical-Current Measurements.
PB90-149113 001,534 Not available NTIS
- PB90-149121**
Suppression of Superconductivity by Antiferromagnetism in $Tm_{(sub\ 2)}Fe_{(sub\ 3)}Si_{(sub\ 5)}$.
PB90-149121 001,535 Not available NTIS
- PB90-149139**
Observation of Associative Ionization of Ultracold Laser-Trapped Sodium Atoms.
PB90-149139 001,686 Not available NTIS
- PB90-149147**
Six-Dimensional Fourier Analysis of Icosahedral $Al_{(sub\ 73)}Mn_{(sub\ 21)}Si_{(sub\ 6)}$ Alloy.
PB90-149147 001,248 Not available NTIS
- PB90-149154**
International Harmonization of Standards: Done with or without Us.
PB90-149154 000,115 Not available NTIS
- PB90-149162**
Thermoreversible Gelation of Isotactic Polystyrene: Thermodynamics and Phase Diagrams.
PB90-149162 000,524 Not available NTIS
- PB90-149170**
Selection and Application Guide to Police Body Armor.
PB90-149170 000,077 Not available NTIS
- PB90-149188**
Thermal Wave Inspection of Heat Resistant Ceramic Coatings.
PB90-149188 001,171 Not available NTIS
- PB90-149196**
Intramolecular Dynamics in Molecule-Surface Collisions: Excitation, Dissociation, and Selectivity of Reactivity.
PB90-149196 000,319 Not available NTIS
- PB90-149204**
Analysis of Circular Bends in Planar Optical Waveguides.
PB90-149204 000,850 Not available NTIS
- PB90-149212**
Identification of Mutagenic Methylbenz(a)anthracene and Methylchrysenes Isomers in Natural Samples by Liquid Chromatography and Shpol'skii Spectroscopy.
PB90-149212 000,209 Not available NTIS
- PB90-149220**
Thermodynamics of Calcium Silicate Hydrates and Their Solutions.
PB90-149220 000,559 Not available NTIS
- PB90-149238**
Crystal Structure of $Ba_3V_4O_{13}$.
PB90-149238 000,320 Not available NTIS
- PB90-149246**
Bubble Formation from a Sparger in Polymer Solutions-II. Moving Liquid.
PB90-149246 000,525 Not available NTIS
- PB90-149253**
Daylighting and Thermal Performance of Roof Glazing in Atrium Spaces.
PB90-149253 000,080 Not available NTIS
- PB90-149261**
Off-Diagonal Long-Range Order in the Quantum Hall Effect.
PB90-149261 001,536 Not available NTIS
- PB90-149279**
Micro-Raman Spectroscopy of High-T(sub c) Superconductors in the Y-Ba-Cu-O System.
PB90-149279 001,537 Not available NTIS
- PB90-149287**
Phosphor Film Characterization Measurements in the Vacuum U.V. Using a Multichannel Detector.
PB90-149287 000,798 Not available NTIS
- PB90-149295**
Gas Phase Reactions of Phenyl Radicals with Aromatic Molecules.
PB90-149295 000,266 Not available NTIS
- PB90-149303**
Radiochromic Solutions for Reference Dosimetry.
PB90-149303 001,353 Not available NTIS
- PB90-149311**
New Applications of Tetracyanoethylene in Organometallic Chemistry.
- PB90-149311** 000,267 Not available NTIS
- PB90-149329**
Bonding Structure of Silicon Oxide Films.
PB90-149329 001,538 Not available NTIS
- PB90-149337**
Long Wavelength Spin-Wave Energies and Linewidths of the Amorphous Invar Alloy $Fe_{(sub\ 100-x)}B_{(sub\ x)}$.
PB90-149337 001,539 Not available NTIS
- PB90-149345**
NBS (National Bureau of Standards) Standard Reference Material for Depth Profile Analysis.
PB90-149345 000,321 Not available NTIS
- PB90-149352**
Observations Derived from the Application of Principal Component Analysis to Laser Microprobe Mass Spectrometry.
PB90-149352 000,210 Not available NTIS
- PB90-149360**
Pattern Differences in Laser Microprobe Mass Spectra of Negative Ion Carbon Clusters.
PB90-149360 000,579 Not available NTIS
- PB90-149378**
Ultrahigh Vacuum Leak Sealing with a Silicon Resin Product.
PB90-149378 001,121 Not available NTIS
- PB90-149386**
VAMAS (Versailles Project on Advanced Materials and Standards) Interlaboratory Comparisons of Critical Current versus Strain in $Nb_{(sub\ 3)}Sn$.
PB90-149386 001,540 Not available NTIS
- PB90-149394**
Transverse Stress Effect on the Critical Current of Internal Tin and Bronze Process $Nb_{(sub\ 3)}Sn$ Superconductors.
PB90-149394 001,541 Not available NTIS
- PB90-149402**
Dependence of the Critical Current on Angle between Magnetic Field and Current in Y-, Bi-, and Tl-Based High-T(sub c) Superconductors.
PB90-149402 001,542 Not available NTIS
- PB90-149410**
Load Duration and Probability Based Design of Wood Structural Members.
PB90-149410 000,169 Not available NTIS
- PB90-149428**
Application of a Nd:YAG Laser-Pumped Dye Laser to the Determination of Nickel in River Sediment Using Nonresonance Flame Atomic Fluorescence Spectrometry.
PB90-149428 000,988 Not available NTIS
- PB90-149436**
Surface Conductivity Changes in $SnO_{(sub\ 2)}$ (110): Effects of Oxygen.
PB90-149436 000,322 Not available NTIS
- PB90-149444**
Magnetoelectricity and Structure of Er/Y Superlattices.
PB90-149444 001,543 Not available NTIS
- PB90-149451**
Magnetic Structure of Dy-Y Superlattices.
PB90-149451 001,544 Not available NTIS
- PB90-149469**
Tracking Chemical Transformations of Particles in the Raman Microprobe.
PB90-149469 000,268 Not available NTIS
- PB90-149477**
Artifacts Observed in Oxygen Profiles of SIMOX Samples by Secondary Ion Mass Spectrometry.
PB90-149477 000,211 Not available NTIS
- PB90-149485**
Environmentally Induced Cracking.
PB90-149485 001,192 Not available NTIS
- PB90-149493**
Post-Irradiation Dosimetry of Meat by Electron Spin Resonance Spectroscopy of Bones.
PB90-149493 001,354 Not available NTIS
- PB90-149501**
Tunneling through a Spin-Polarizing Barrier: Boltzman Equation Study.
PB90-149501 001,545 Not available NTIS
- PB90-149519**
Preparation of Polymer Crystal Nuclei.
PB90-149519 000,526 Not available NTIS
- PB90-149527**
Evaluation of Quarter-Scale Compartment Fire Modeling for Constant and Stepped Heat Inputs.
PB90-149527 000,184 Not available NTIS
- PB90-149535**
Structure of Asymmetric Small-Angle Grain Boundaries.
PB90-149535 001,546 Not available NTIS
- PB90-149543**
NBS (National Bureau of Standards) Boil-Off Calorimeter for Measuring Thermal Conductivity of Insulating Materials.
PB90-149543 001,000 Not available NTIS
- PB90-149683**
Pore Structure of Concrete and Freezing Vulnerability.
PB90-149683 000,570 PC A03/MF A01

NTIS ORDER/REPORT NUMBER INDEX

PB90-152901

PB90-149964
Development of a Computer-Controlled Hot-Deformation Apparatus at NIST (National Institute of Standards and Technology).
PB90-149964 001,045 PC A05/MF A01

PB90-150038
pH Theory and Measurement.
PB90-150038 000,323 Not available NTIS

PB90-150046
Role of Multiple Scattering in XPS and Auger Electron Diffraction in Crystals.
PB90-150046 001,547 Not available NTIS

PB90-150079
Roles of the National Bureau of Standards in Quality Assurance in Buildings and Other Construction.
PB90-150079 000,116 Not available NTIS

PB90-150087
Fracture of Epoxy and Elastomer-Modified Epoxy Polymers.
PB90-150087 001,269 Not available NTIS

PB90-150095
Role of Interfacial Grain-Bridging Sliding Friction in the Crack-Resistance and Strength Properties of Nontransforming Ceramics.
PB90-150095 001,128 Not available NTIS

PB90-150103
ETRAN: Experimental Benchmarks.
PB90-150103 001,687 Not available NTIS

PB90-150111
Processing: Property Relations for Ba(sub 2)YCu(sub 3)O(sub 7-x) High (T sub c) Superconductors.
PB90-150111 001,548 Not available NTIS

PB90-150129
Computational Examination of Orthogonal Distance Regression.
PB90-150129 001,297 Not available NTIS

PB90-150137
Transpiration Mass Spectrometry of Liquid LiF: Vaporization Thermochemistry and Electron Impact Fragmentation.
PB90-150137 000,324 Not available NTIS

PB90-150145
Usefulness of Various Computer Algorithms for Locating Spots and Arrays in Electron Diffraction Patterns.
PB90-150145 000,325 Not available NTIS

PB90-150152
Concentration-Concentration Histograms: Scatter Diagrams Applied to Quantitative Compositional Maps.
PB90-150152 000,212 Not available NTIS

PB90-150160
State-Resolved Evidence for Hot Carrier Driven Surface Reactions: Laser Induced Desorption of NO from Pt(111).
PB90-150160 000,326 Not available NTIS

PB90-150178
Ion Implantation Artifacts Detected by Secondary Ion Mass Spectrometry.
PB90-150178 000,213 Not available NTIS

PB90-150186
Electron/X-ray Optical Bench for the Measurement of Fundamental Parameters for Electron Probe Microanalysis.
PB90-150186 000,214 Not available NTIS

PB90-150194
SEM (Scanning Electron Microscope) Imaging and Analysis of Submicrometer Particles in Air and Water Samples.
PB90-150194 000,215 Not available NTIS

PB90-150202
Two Simple Metal Vapor Deposition Sources for Downward Evaporation in Ultrahigh Vacuum.
PB90-150202 001,549 Not available NTIS

PB90-150210
Energy Analysis of Heat Pumps.
PB90-150210 000,956 Not available NTIS

PB90-150228
Magnetic Microstructure of the (0001) Surface of hcp Cobalt.
PB90-150228 001,550 Not available NTIS

PB90-150236
Scanning Electron Microscopy with Polarization Analysis Studies of Ni-Fe Magnetic Memory Elements.
PB90-150236 001,551 Not available NTIS

PB90-150244
National Reference System for Cholesterol.
PB90-150244 001,318 Not available NTIS

PB90-150251
Collisional Electron Detachment and Decomposition Cross Sections for SF(sub 6)(1-), SF(sub 5)(1-), and F(1-) on SF(sub 6) and Rare Gas Targets.
PB90-150251 000,327 Not available NTIS

PB90-150269
Atomic Transition-Probability Measurements for Prominent Spectral Lines of Neutral Nitrogen.
PB90-150269 001,688 Not available NTIS

PB90-150368
Overview of the IGES (Initial Graphics Exchange Specification)/PDES (Product Data Exchange Standards) Testing Project, Version 1.0.
PB90-150368 000,713 PC A03/MF A01

PB90-151234
000,560 PC A03/MF A01

PB90-151721
Quick Response Sprinklers in Chemical Laboratories: Fire Test Results.
PB90-151721 000,126 PC A04/MF A01

PB90-151747
Orthogonal Distance Regression.
PB90-151747 001,298 PC A03/MF A01

PB90-151754
Fire Propagation in Concurrent Flows, Final Progress Report.
PB90-151754 000,580 PC A03/MF A01

PB90-152430
Compositional Mapping with a TV Camera-Based Imaging System on an Ion Microscope.
PB90-152430 001,382 Not available NTIS

PB90-152448
Performance of a 'Conventional' Monte Carlo Program at Low-Beam Energy.
PB90-152448 000,216 Not available NTIS

PB90-152455
Engineering of Binding Affinity at Metal Ion Binding Sites for the Stabilization of Proteins: Subtilisin as a Test Case.
PB90-152455 001,309 Not available NTIS

PB90-152463
Substrate Surface Relaxation for Cl and S on Cu(001).
PB90-152463 000,328 Not available NTIS

PB90-152471
Magnetization of Imperfect Superconducting Grains.
PB90-152471 001,552 Not available NTIS

PB90-152489
Inspection of Single-Point Diamond Turning Tools at Low Accelerating Voltage in a Scanning Electron Microscope.
PB90-152489 001,107 Not available NTIS

PB90-152497
Tensile Strength and Ductility of Indium.
PB90-152497 001,249 Not available NTIS

PB90-152505
Defining a Faceted Generalized Cylinder by Projections of Cross Sections.
PB90-152505 001,283 Not available NTIS

PB90-152513
Selected-Area Channeling Pattern and Defect Etch Study of Silicon Implanted with Oxygen.
PB90-152513 000,867 Not available NTIS

PB90-152521
Mode-Locked, Long Cavity, Erbium Fiber Lasers with Subsequent Soliton-Like Compression.
PB90-152521 001,470 Not available NTIS

PB90-152539
Metal Transfer in Gas Metal Arc Welding: Droplet Rate.
PB90-152539 001,064 Not available NTIS

PB90-152547
Chromatographic Separations of Serum Proteins on Immobilized Metal Ion Stationary Phases.
PB90-152547 000,217 Not available NTIS

PB90-152554
Microwave Spectrum and Structure of the H2O-SO2 Complex.
PB90-152554 000,329 Not available NTIS

PB90-152562
Measurement and Formulation of the Thermodynamic Properties of Refrigerants 134a (1,1,1,2-Tetrafluoroethane) and 123 (1,1-Dichloro-2,2,2-Trifluoroethane).
PB90-152562 001,232 Not available NTIS

PB90-152570
Fingerprinting of Chemical Species in Microparticles: Correlative Laser and Electron Microprobe Studies.
PB90-152570 000,218 Not available NTIS

PB90-152588
Effects of Sample Geometry on Interelement Quantitation in Laser Microprobe Mass Spectrometry.
PB90-152588 000,219 Not available NTIS

PB90-152596
Redetermination of X-Ray Loss Due to Electron Backscatter by Monte Carlo Simulation.
PB90-152596 000,220 Not available NTIS

PB90-152604
Background Correction in Electron Microprobe Compositional Mapping with Wavelength-Dispersive X-Ray Spectrometry.
PB90-152604 000,221 Not available NTIS

PB90-152612
Applications of Compositional Mapping in Materials Science.
PB90-152612 000,222 Not available NTIS

PB90-152620
Monte Carlo Electron Trajectory Simulations for Scanning Electron Microscopy and Microanalysis: An Overview.
PB90-152620 000,223 Not available NTIS

PB90-152638
Reactions between Silicon and Nitrogen. Part 2. Microstructure.
PB90-152638 000,269 Not available NTIS

PB90-152646
Design of High Strength Cement-Based Materials. Part 3. State of the Art.

PB90-152646
001,129 Not available NTIS

PB90-152653
Design of High Strength Cement-Based Materials. Part 1. Fracture Mechanics.
PB90-152653 001,130 Not available NTIS

PB90-152661
Influence of Iron on the Reaction between Silicon and Nitrogen.
PB90-152661 000,330 Not available NTIS

PB90-152679
Cyclic Fatigue Behavior of an Alumina Ceramic with Crack-Resistance Characteristics.
PB90-152679 001,131 Not available NTIS

PB90-152687
New Compensation Method for Bulk Optical Sensors with Multiple Birefringences.
PB90-152687 001,471 Not available NTIS

PB90-152695
Raman Spectroscopy of Single Optically Levitated Droplets.
PB90-152695 000,331 Not available NTIS

PB90-152703
Positioning of GPS (Global Positioning System) Antennas in Time-Keeping Laboratories of North America.
PB90-152703 001,394 Not available NTIS

PB90-152711
Neutron Microprobe: Prospects and Potential Applications.
PB90-152711 000,224 Not available NTIS

PB90-152729
Inorganic Cluster Ion Formation in the Laser Microprobe.
PB90-152729 000,225 Not available NTIS

PB90-152737
Rate Constants for One-Electron Oxidation by the CF(sub 3)O(sub 2)·, CCl(sub 3)O(sub 2)·, and CBr(sub 3)O(sub 2)· Radicals in Aqueous Solutions.
PB90-152737 000,270 Not available NTIS

PB90-152745
Calibration of a Structured Light Vision System.
PB90-152745 000,773 Not available NTIS

PB90-152752
Fundamental Configurations of Doubly-Ionized Molybdenum (Mo III).
PB90-152752 000,332 Not available NTIS

PB90-152760
Effects of Initial Molecular Weight on Thermal Degradation of Poly(Methyl Methacrylate) 1 - Model 1.
PB90-152760 001,270 Not available NTIS

PB90-152778
Interim Thermodynamic Property Formulation for Air.
PB90-152778 001,689 Not available NTIS

PB90-152786
Failure of Fused Silica Fibers with Subthreshold Flaws.
PB90-152786 001,132 Not available NTIS

PB90-152794
Creep Deformation of Ceramics in Four Point Bending.
PB90-152794 001,059 Not available NTIS

PB90-152802
Negatively Buoyant Wall Flows Generated in Enclosure Fires.
PB90-152802 000,185 Not available NTIS

PB90-152810
Active Target Production of Muons for Muon Catalyzed Fusion.
PB90-152810 001,690 Not available NTIS

PB90-152828
Reply to Comment on 'Aqueous Solubility Relationships for Two Types of Calcium Silicate Hydrate.'
PB90-152828 000,333 Not available NTIS

PB90-152836
Laser-Induced Vaporization Mass Spectrometry of Refractory Materials: Apparatus and the BN System.
PB90-152836 001,133 Not available NTIS

PB90-152844
Laboratory Robotics for Trace Analysis.
PB90-152844 001,319 Not available NTIS

PB90-152851
Transport Properties of Fluids of Cryogenic Interest.
PB90-152851 001,691 Not available NTIS

PB90-152869
Microspectroscopy Applications in Tribology.
PB90-152869 001,113 Not available NTIS

PB90-152877
Calculation of Depth Distributions of X-ray Generation by the Monte Carlo Technique.
PB90-152877 000,226 Not available NTIS

PB90-152885
Overview of MAUV (Multiple Autonomous Undersea Vehicles).
PB90-152885 001,435 Not available NTIS

PB90-152893
Numerical Modeling of Capacitive Array Sensors Using the Finite Element Method.
PB90-152893 000,856 Not available NTIS

PB90-152901
Surface Forces and Viscosity of Water Measured between Silica Sheets.

- PB90-163890**
Absolute Isotopic Abundance Ratios and Atomic Weight of a Reference Sample of Nickel.
PB90-163890 000,344 (Order as PB90-163874, PC A04)
- PB90-163908**
Absolute Isotopic Composition and Atomic Weight of Terrestrial Nickel.
PB90-163908 000,345 (Order as PB90-163874, PC A04)
- PB90-163916**
Report on the 1989 Meeting of the Radionuclide Measurements Section of the Consultative Committee on Standards for the Measurement of Ionizing Radiations: Special Report on Standards for Radioactivity.
PB90-163916 000,346 (Order as PB90-163874, PC A04)
- PB90-163924**
Measuring the Root-Mean-Square Value of a Finite Record Length Periodic Waveform.
PB90-163924 001,694 (Order as PB90-163874, PC A04)
- PB90-163932**
Search for Optical Molasses in a Vapor Cell: General Analysis and Experimental Attempt.
PB90-163932 001,474 (Order as PB90-163874, PC A04)
- PB90-163981**
Institute for Materials Science and Engineering, Ceramics: Technical Activities 1989.
PB90-163981 001,137 PC A08/MF A01
- PB90-164278**
Comparison of the NIST (National Institute of Standards and Technology) and European Gold Coating Standards.

PB90-164278	001,175	PC A03/MF A01	PB90-169566	000,032	Not available NTIS	PB90-169822	001,321	Not available NTIS
PB90-164484			PB90-169574			PB90-169830		
Environmental Evaluation of the Portland East Federal Office Building Preoccupancy and Early Occupancy Results.			Ultraviolet Variability of HD 45166 (qWR+ B8 V): Evidence for Stellar Wind Radiative Instabilities.			Nonplanar Interface Morphologies during Unidirectional Solidification of a Binary Alloy. 2. Three-Dimensional Computations.

PB90-169376			PB90-169723			PB90-170028		
NIST (National Institute of Standards and Technology) Helps Navy Define Data Needed to Produce Hybrid Microcircuit Assemblies.			Stability of Kuzmin/Toomre Discs.			Resonance Enhanced Multiphoton Ionization Spectra of the SiCl Radical between 430 and 520 nm.		
PB90-169376	000,897	Not available NTIS	PB90-169723	000,034	Not available NTIS	PB90-170028	000,360	Not available NTIS
PB90-169384			PB90-169731			PB90-170036		
Optimal Control of a Flexible Robot Arm.			Survey of the Radio Continuum Emission of RS Canum Venaticorum and Related Active Binary Systems.			Determination of Cyclodextrin Formation Constants Using Dynamic Coupled-Column Liquid Chromatography.		
PB90-169384	001,092	Not available NTIS	PB90-169731	000,035	Not available NTIS	PB90-170036	000,228	Not available NTIS
PB90-169392			PB90-169749			PB90-170044		
Dynamic Equations for a Two-Link Flexible Robot Arm.			Radio Continuum Emission from the Ionized Stellar Winds of Warm Supergiants.			Evaluation of Instrumental Correction Factors for Infrared Absorption Concentration Measurements.		
PB90-169392	001,093	Not available NTIS	PB90-169749	000,036	Not available NTIS	PB90-170044	000,229	Not available NTIS
PB90-169400			PB90-169756			PB90-170051		
Finite Element Procedures for Large Strain Elastic-Plastic Theories.			Adoption of Standard Time.			Multiple-Scattering Angular Deflections and Energy-Loss Straggling.		
PB90-169400	001,664	Not available NTIS	PB90-169756	000,625	Not available NTIS	PB90-170051	001,699	Not available NTIS
PB90-169418			PB90-169764			PB90-170069		
Laser Length Metrology.			IUE Observations of the M Dwarfs CM Draconis and Rossiter 137B: Magnetic Activity at Saturated Levels.			Inactivation of Human Immunodeficiency Virus (HIV) by Ionizing Radiation in Body Fluids and Serological Evidence.		
PB90-169418	001,697	Not available NTIS	PB90-169764	000,037	Not available NTIS	PB90-170069	001,343	Not available NTIS
PB90-169426			PB90-169772			PB90-170077		
Surface Forces and Fracture in Brittle Materials.			Some Thoughts on Variable-Selection in Multiple Regression.			Initial Frictional Behavior during the Wear of Steel, Aluminum, and Poly(Methyl Methacrylate) on Abrasive Papers.		
PB90-169426	001,557	Not available NTIS	PB90-169772	001,300	Not available NTIS	PB90-170077	001,224	Not available NTIS
PB90-169434			PB90-169780			PB90-170085		
Growth of a Coherent Precipitate from Supersaturated Solution.			Measurement Quality Assurance through a National System of Secondary Laboratories.			Infrared and Microwave Study of Angular-Radial Coupling Effects in Ar-HCN.		
PB90-169434	000,352	Not available NTIS	PB90-169780	001,402	Not available NTIS	PB90-170085	000,361	Not available NTIS
PB90-169442			PB90-169798			PB90-170093		
Surface Phenomena and Their Influence on Ultrahigh Vacuum Gauges.			Standard Reference Materials for Use in Precision Thermometry.			Porosity in Spinel Compacts Using Small-Angle Neutron Scattering.		
PB90-169442	001,003	Not available NTIS	PB90-169798	001,004	Not available NTIS	PB90-170093	001,138	Not available NTIS
PB90-169459			PB90-169806			PB90-170101		
Isotopic Fractionation of Gallium on an Ion Exchange Column.			Radiation Standards and Calibrations: Documentation Available from NBS (National Bureau of Standards).			Residual Currents in Several Commercial UHV Bayard-Alpert Gauges.		
PB90-169459	000,227	Not available NTIS	PB90-169806	001,025	Not available NTIS	PB90-170101	001,005	Not available NTIS
PB90-169467			PB90-169814			PB90-170119		
Stability of a Current-Carrying Hollow Liquid-Metal Cylinder.			Examination of Gamma-Irradiated Fruits and Vegetables by Electron Spin Resonance Spectroscopy.			Photoelastic Characteristics of Fluorozirconate and Transition-Metal Fluoride Glasses.		
PB90-169467	001,698	Not available NTIS	PB90-169814	000,020	Not available NTIS	PB90-170119	001,139	Not available NTIS
PB90-169566			PB90-169822					
Coronal Temperatures of Selected Active Cool Stars as Derived from Low Resolution 'Einstein' Observations.			X-ray Attenuation Properties of Radiographic Contrast Media.

NTIS ORDER/REPORT NUMBER INDEX

PB90-187881

- PB90-171018**
Clinical Biocompatibility of an Experimental Dentine-Enamel Adhesive for Composites.
PB90-171018 000,060 Not available NTIS
- PB90-171026**
NBS (National Bureau of Standards) Triple Quadrupole Tandem Mass Spectrometer.
PB90-171026 000,376 Not available NTIS
- PB90-171034**
Experimental Aspects and Metrological Applications.
PB90-171034 001,571 Not available NTIS
- PB90-171042**
Reactions of H(sub 2) with He(1+) at Temperatures Below 40 K.
PB90-171042 000,377 Not available NTIS
- PB90-171059**
Unrestricted Algorithms for Mathematical Functions.
PB90-171059 000,715 Not available NTIS
- PB90-171067**
Alignment Effects Involving Multiple Pathways: Electronic Energy Transfer of Sr 5s6p (1)P(sub 1) with Rare Gases.
PB90-171067 000,378 Not available NTIS
- PB90-171075**
Mechanism of Collisionally Induced Transitions among Fine-Structure Levels: Semiclassical Calculations of Alignment Effects in the Na-He System.
PB90-171075 000,379 Not available NTIS
- PB90-171083**
Excitation of the Isobaric Analog State of (165)Ho by Pion Single Charge Exchange.
PB90-171083 001,706 Not available NTIS
- PB90-171091**
Prospects for Using Laser-Prepared Atomic Fountains for Optical Frequency Standards Applications.
PB90-171091 001,707 Not available NTIS
- PB90-171109**
Bremsstrahlung Radiation Emitted in Fast-Electron-H-Atom Collisions.
PB90-171109 001,708 Not available NTIS
- PB90-171117**
Translational and Internal State Distributions of NO Produced in the 193 nm Explosive Vaporization of Cryogenic NO Films: Rotationally Cold, Translationally Fast NO Molecules.
PB90-171117 000,380 Not available NTIS
- PB90-171125**
Approximate Scattering Wave Functions for Few-Particle Continua.
PB90-171125 001,709 Not available NTIS
- PB90-171257**
GRAMPS (General Real-Time Asynchronous Multi-Processor System) Multiprocessor Operating System.
PB90-171257 000,786 PC A03/MF A01
- PB90-172453**
Cooperative Research Opportunities at NIST (National Institute of Standards and Technology).
PB90-172453 000,006 PC A04/MF A01
- PB90-182213**
NIST (National Institute of Standards and Technology) Research Reports, January 1990.
PB90-182213 001,039 PC A03/MF A01
- PB90-183245**
NIST (National Institute of Standards and Technology) Serial Holdings 1990.
PB90-183245 001,040 PC A12/MF A02
- PB90-183252**
Recommended Technical Specifications for Procurement of Systems for a Cleaning and Deburring Workstation.
PB90-183252 001,046 PC A03/MF A01
- PB90-183260**
NIST (National Institute of Standards and Technology) Network Common Memory User Manual.
PB90-183260 000,716 PC A03/MF A01
- PB90-183278**
Packet-Oriented Communication Using a Stream Protocol or Making TCP/IP on Berkeley Unix a Little More Pleasant to Use.
PB90-183278 000,717 PC A03/MF A01
- PB90-183286**
Report on Interactions between the National Institute of Standards and Technology and the American Society of Mechanical Engineers.
PB90-183286 001,118 PC A03/MF A01
- PB90-183294**
PDES (Production Data Exchange Specification) Physical File Exchange Testing in the PDES Validation System.
PB90-183294 001,043 PC A03/MF A01
- PB90-183302**
Autonomous Propulsion System Requirements for Placement of an STS (Space Transportation System) External Tank in Low Earth Orbit.
PB90-183302 001,818 PC A03/MF A01
- PB90-183310**
NIST (National Institute of Standards and Technology) Standard Reference Materials Catalog 1990-91.
PB90-183310 000,558 PC A08/MF A01
- PB90-183328**
How Due Process in the Development of Voluntary Standards Can Reduce the Risk of Anti-Trust Liability.
PB90-183328 000,582 PC A06/MF A01
- PB90-183336**
Model of a Simple Fan-Resistance Ventilation System and Its Application to Fire Modeling.
PB90-183336 000,088 PC A03/MF A01
- PB90-183344**
Report on Interactions between the National Institute of Standards and Technology and the Institute of Electrical and Electronic Engineers.
PB90-183344 000,900 PC A04/MF A01
- PB90-183351**
Thermophysical Properties of Helium-4 from 0.8 to 1500 K with Pressures to 2000 MPa.
PB90-183351 000,381 PC A07/MF A01
- PB90-184599**
Performance of Structures during the Loma Prieta Earthquake of October 17, 1989.
PB90-184599 000,171 PC A10/MF A02
- PB90-184961**
Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices as Adopted by the 74th National Conference on Weights and Measures 1989 (1990 Edition).
PB90-184961 001,071 PC A13/MF A02
- PB90-185109**
Technical Activities 1989, Standard Reference Data Program.
PB90-185109 000,382 PC A05/MF A01
- PB90-185117**
Study on the Performance of Residential Boilers for Space and Domestic Hot Water Heating.
PB90-185117 000,089 PC A06/MF A01
- PB90-185570**
Laser Induced Damage in Optical Materials: 1988.
PB90-185570 001,225 PC A25/MF A04
- PB90-186826**
Wind and Seismic Effects. Proceedings of the Joint Meeting of the U.S.-Japan Cooperative Program in Natural Resources Panel on Wind and Seismic Effects (21st).
PB90-186826 000,172 PC A18/MF A03
- PB90-187493**
Rational Development of Bench-Scale Fire Tests for Full-Scale Fire Prediction.
PB90-187493 000,132 Not available NTIS
- PB90-187501**
Three Dimensional Modeling of Optical Microlithography for Positive Photoresists.
PB90-187501 000,869 Not available NTIS
- PB90-187519**
Hg(1+) Single Ion Spectroscopy.
PB90-187519 000,383 Not available NTIS
- PB90-187527**
NBS (National Bureau of Standards) NDE (Nondestructive Evaluation) Program.
PB90-187527 001,279 Not available NTIS
- PB90-187535**
Stability of High Quality Quartz Crystal Oscillators: An Update.
PB90-187535 000,858 Not available NTIS
- PB90-187543**
Fire Hazard Protection Hazard I and Its Role in Fire Codes and Standards.
PB90-187543 000,187 Not available NTIS
- PB90-187550**
Characterization of Eddy Current Probes: Results of an Interlaboratory Intercomparison.
PB90-187550 001,377 Not available NTIS
- PB90-187568**
Measurement Quality Assurance through a National System of Secondary Laboratories.
PB90-187568 001,398 Not available NTIS
- PB90-187576**
Double-Step Behavior of Critical Current versus Magnetic Field in Y-, Bi- and Ti-Based Bulk High-T(sub c) Superconductors.
PB90-187576 001,572 Not available NTIS
- PB90-187584**
Probability-Based Criteria for Serviceability Limit States.
PB90-187584 000,173 Not available NTIS
- PB90-187592**
Experimental Measurement and Prediction of Thermophysical Property Data of Carbon Dioxide Rich Mixtures.
PB90-187592 000,384 Not available NTIS
- PB90-187600**
Specific Heat of the High-T(sub c) Superconductor (Bi(sub 1.66)Pb(sub 0.34))Ca(sub 2)Sr(sub 2)Cu(sub 3)O(sub 10).
PB90-187600 001,573 Not available NTIS
- PB90-187618**
Materials Characterization Using Neutrons.
PB90-187618 001,226 Not available NTIS
- PB90-187626**
Antenna Far-Field Pattern Accuracies at Millimeter Wave Frequencies Using the Planar Near-Field Technique.
PB90-187626 000,803 Not available NTIS
- PB90-187634**
Optical Fiber Measurements: Results of Interlaboratory Evaluations.
PB90-187634 001,477 Not available NTIS
- PB90-187642**
Small Signal Modeling of the MOSOS Capacitor.
PB90-187642 000,870 Not available NTIS
- PB90-187659**
Plasma Chemistry in Silane and Silane-Germane Discharge Deposition.
PB90-187659 000,288 Not available NTIS
- PB90-187667**
Current Status of, and Future Directions in, Silicon Photodiode Self-Calibration.
PB90-187667 000,837 Not available NTIS
- PB90-187675**
New 'Filtered Allan Variance' and Its Application to the Identification of Phase and Frequency Noise Sources.
PB90-187675 000,642 Not available NTIS
- PB90-187683**
Automated Multi-Axis Motor Controller and Data Acquisition System for Near-Field Scanners.
PB90-187683 000,804 Not available NTIS
- PB90-187691**
10-V Josephson Voltage Standard.
PB90-187691 000,901 Not available NTIS
- PB90-187709**
Standards and High-Speed Instrumentation.
PB90-187709 000,902 Not available NTIS
- PB90-187717**
Fundamentals of Two-Way Time Transfers by Satellite.
PB90-187717 000,626 Not available NTIS
- PB90-187725**
NIST-USNO (National Institute of Standards and Technology-United States Naval Observatory) Time Comparisons Using Two-Way Satellite Time Transfer.
PB90-187725 000,627 Not available NTIS
- PB90-187733**
Guidelines for the Infrastructure of Statistical Software.
PB90-187733 001,302 Not available NTIS
- PB90-187741**
Impact of Atmospheric Non-Reciprocity on Satellite Two-Way Time Transfers.
PB90-187741 000,628 Not available NTIS
- PB90-187758**
Two-Phase Heat Transfer in the Vicinity of a Lower Consonate Point.
PB90-187758 001,710 Not available NTIS
- PB90-187766**
Collisions of Ultracold Trapped Atoms.
PB90-187766 001,711 Not available NTIS
- PB90-187774**
Effect of Annealing Conditions on Precipitate and Defect Evolution in Oxygen Implanted SOI Material.
PB90-187774 001,574 Not available NTIS
- PB90-187782**
Absorber Characterization.
PB90-187782 000,903 Not available NTIS
- PB90-187790**
Testing.
PB90-187790 001,094 Not available NTIS
- PB90-187808**
High-Current Very Wide-Band Transconductance Amplifier.
PB90-187808 000,818 Not available NTIS
- PB90-187816**
Low-Temperature Magnetic-Elastic Anomalies in FCC (Face-Centered-Cubic) Fe-Cr-Ni Alloys.
PB90-187816 001,213 Not available NTIS
- PB90-187824**
Low-Temperature Elastic Constants of Polycrystalline La(sub 2)CuO(sub 4) and La(sub 1.85)Sr(sub 0.15)CuO(sub 4).
PB90-187824 001,575 Not available NTIS
- PB90-187832**
Effect of Copper Additives on Atmospheric Hydrogen Cyanide and Acute Inhalation Toxicity from the Combustion Products of Flexible Polyurethane.
PB90-187832 001,368 Not available NTIS
- PB90-187840**
Torsional-Rotational Spectrum and Structure of the Formaldehyde Dimer.
PB90-187840 000,385 Not available NTIS
- PB90-187857**
Survey of Instrumentation for Slush Hydrogen Systems.
PB90-187857 000,599 Not available NTIS
- PB90-187865**
Effect of Temperature and Stress on the Time-to-Failure of EPDM T-Peel Joints.
PB90-187865 000,133 Not available NTIS
- PB90-187873**
Capture of Inner-Shell Electrons in the Strong-Potential Born (SPB) Approximation.
PB90-187873 001,712 Not available NTIS
- PB90-187881**
Search for a Joint Spin-Orbit and Exchange Asymmetry in Elastic Electron Scattering from Spin-Polarised Sodium.
PB90-187881 001,713 Not available NTIS

PB90-192287	000,401	Not available	NTIS
PB90-188343 Determination of Column Selectivity Toward Polycyclic Aromatic Hydrocarbons.				PB90-188582 Interfacial Energy States of Moisture-Exposed Cracks in Mica. PB90-188582	001,386	Not available	NTIS				

NTIS ORDER/REPORT NUMBER INDEX

PB90-19347E

- PB90-192295**
Rare Gas Interaction Energy Curves.
PB90-192295 000,402 Not available NTIS
- PB90-192303**
Spin Dynamics of Amorphous Magnets.
PB90-192303 001,584 Not available NTIS
- PB90-192311**
Magnetic Ordering of Nd in (Nd, Ce)₂CuO₄.
PB90-192311 001,585 Not available NTIS
- PB90-192329**
Monitoring Power Quality.
PB90-192329 000,820 Not available NTIS
- PB90-192337**
Glimpse at Long-Term Effects of Momentary Overvoltages on Zinc Oxide Varistors.
PB90-192337 000,821 Not available NTIS
- PB90-192345**
Measurement of Vanadium Impurity in Oxygen-Implanted Silicon by Isotope Dilution and Resonance Ionization Mass Spectrometry.
PB90-192345 000,240 Not available NTIS
- PB90-192352**
Instability of a Taylor-Couette Flow Interacting with a Crystal-Melt Interface.
PB90-192352 001,586 Not available NTIS
- PB90-192360**
New Dosimetry Systems.
PB90-192360 001,406 Not available NTIS
- PB90-192378**
Sensitive Dichromate Dosimeter for the Dose Range, 0.2-3 kGy.
PB90-192378 001,399 Not available NTIS
- PB90-192386**
Development of a Stable Tritium (HT) Generation System for Testing Atmospheric HT Monitors.
PB90-192386 001,400 Not available NTIS
- PB90-192394**
Adsorption of Phenoxyacetic Acid and Trans-Cinnamic Acid on Hydroxyapatite.
PB90-192394 000,063 Not available NTIS
- PB90-192402**
Intercomparison of AC Voltage Using a Digitally Synthesized Source.
PB90-192402 001,074 Not available NTIS
- PB90-192410**
Microbial Metal Leaching and Resource Recovery Processes.
PB90-192410 000,952 Not available NTIS
- PB90-192428**
Chemiluminescence Instrumentation for Fuel and Lubricant Oxidation Studies.
PB90-192428 000,403 Not available NTIS
- PB90-192436**
Morphological Partitioning of Chain Ends and Methyl Branches in Melt Crystallized Polyethylene by ¹³C NMR.
PB90-192436 000,533 Not available NTIS
- PB90-192444**
Metrological Electron Microscope for the Certification of Magnification and Linewidth Artifacts for the Semiconductor Industry.
PB90-192444 001,009 Not available NTIS
- PB90-192451**
Quest for Universal Curves to Describe the Surface Sensitivity of Electron Spectroscopies.
PB90-192451 001,587 Not available NTIS
- PB90-192469**
Pulse Tube Refrigeration: A New Type of Cryocooler.
PB90-192469 001,119 Not available NTIS
- PB90-192477**
Mechanistic and Physiological Consequences of HPr(ser) Phosphorylation on the Activities of the Phosphoenolpyruvate: Sugar Phosphotransferase System in Gram-Positive Bacteria. Studies with Site-Specific Mutants of HPr.
PB90-192477 001,344 Not available NTIS
- PB90-192485**
Crystallographic Texture in Rolled Aluminum Plates: Neutron Pole Figure Measurements.
PB90-192485 001,253 Not available NTIS
- PB90-192493**
Development of Multicomponent Parts-per-Billion-Level Gas Standards of Volatile Toxic Organic Compounds.
PB90-192493 000,970 Not available NTIS
- PB90-192501**
Magnetic Correlations in Amorphous Fe-Zr Alloys.
PB90-192501 001,588 Not available NTIS
- PB90-192519**
Measurement of Diffusion Coefficients by DC and EHD Electrochemical Methods.
PB90-192519 000,404 Not available NTIS
- PB90-192527**
Heat Capacity, Cp, of Fluids from Transient Hot Wire Measurements.
PB90-192527 001,010 Not available NTIS
- PB90-192535**
Measurement of Thermal Conductivity and Thermal Diffusivity of Fluids Over a Wide Range of Densities.
PB90-192535 001,011 Not available NTIS
- PB90-192543**
Phase Equilibria and Crystal Chemistry in the System Ba-Y-Cu-O.
PB90-192543 001,143 Not available NTIS
- PB90-192550**
Phase Diagrams for Ceramists Volume 6.
PB90-192550 001,144 Not available NTIS
- PB90-192568**
Microstructure and Isotopic Labeling Effects on the Miscibility of Polybutadiene Blends Studied by the Small-Angle Neutron Scattering Technique.
PB90-192568 000,534 Not available NTIS
- PB90-192576**
Tunable Dye Laser Spectrometry.
PB90-192576 001,480 Not available NTIS
- PB90-192584**
Field-Ion Energy Spectroscopy of Gold Overlayers on Silicon.
PB90-192584 001,589 Not available NTIS
- PB90-192592**
Fast Fourier Transforms for Direct Solution of Poisson's Equation with Staggered Boundary Conditions.
PB90-192592 001,287 Not available NTIS
- PB90-192600**
Biological Thermodynamic Data for the Calibration of Differential Scanning Calorimeters: Heat Capacity Data on the Unfolding Transition of Ribonuclease A in Solution.
PB90-192600 000,405 Not available NTIS
- PB90-192618**
Mechanisms of Condensation of Biaryl Hydrocarbons.
PB90-192618 000,406 Not available NTIS
- PB90-192626**
Effects of Crystal Anisotropy on Magnetization and Magnetic Order in Superconducting RBA(sub 2)Cu(sub 3)O(sub 7-x).
PB90-192626 001,590 Not available NTIS
- PB90-192634**
Characterization of Ultrathin Pt Overlayers Deposited on a W(110) Surface.
PB90-192634 000,407 Not available NTIS
- PB90-192642**
Applications of Capacitive Array Sensors to Nondestructive Evaluation.
PB90-192642 001,075 Not available NTIS
- PB90-192659**
Vortex Shedding Flowmeters for High Velocity Liquids.
PB90-192659 000,601 Not available NTIS
- PB90-192667**
Preliminary Radon Progeny Measurements in Three Federal Office Buildings.
PB90-192667 000,983 Not available NTIS
- PB90-192675**
Temperature Induced Rebound in Power MOSFETs.
PB90-192675 000,872 Not available NTIS
- PB90-192683**
Synthesis, Characterization and Inelastic Neutron Scattering Spectra of Hydrogen Insertion Compounds of the Mixed V/Mo Oxide V(sub 9)Mo(sub 6)O(sub 40).
PB90-192683 000,273 Not available NTIS
- PB90-192691**
Difficulties Encountered with Some Intermediate-Atomic Number Radiation Protection Dosimeters Irradiated on-Phantom in Low-Energy Photon Beams.
PB90-192691 001,357 Not available NTIS
- PB90-192709**
Resonance Structure in the Vibrationally Resolved Photoelectron Branching Ratios and Angular Distributions of the 2p(π-1) Channel of NO.
PB90-192709 000,408 Not available NTIS
- PB90-192717**
Growth of Ultrathin Fe Films on Cu(100): Mechanisms, Morphology and Stability.
PB90-192717 001,591 Not available NTIS
- PB90-192725**
Observation of Intensity Oscillations in RHEED during the Epitaxial Growth of Cu and fcc Fe on Cu(100).
PB90-192725 001,592 Not available NTIS
- PB90-192733**
Calculation of the Anisotropy of Equilibrium Surface Composition in Metallic Solid Solutions Using the Embedded Atom Method.
PB90-192733 000,409 Not available NTIS
- PB90-192741**
X-ray Photoelectron Spectroscopy of O 1s and Si 2p Lines in Films of SiO(sub x) Formed by e-beam Evaporation.
PB90-192741 001,593 Not available NTIS
- PB90-193236**
Corrosion and Degradation of a Polyurethane/Co-Ni-Cr-Mo (MP35N) Pacemaker Lead.
PB90-193236 000,064 Not available NTIS
- PB90-193244**
Workforce of U.S. Manufacturing in the Post-Industrial Era.
PB90-193244 000,004 Not available NTIS
- PB90-193251**
Experimental Fire Tower Studies of Elevator Pressurization Systems for Smoke Control.
PB90-193251 000,188 Not available NTIS
- PB90-193269**
Lattice Statics Green's Function Method for Calculation of Atomic Structure of Grain Boundary Interfaces in Solids 2. Anharmonic Theory.
PB90-193269 001,594 Not available NTIS
- PB90-193277**
Lattice Statics Green's Function Method for Calculation of Atomic Structure of Grain Boundary Interfaces in Solids 1. Harmonic Theory.
PB90-193277 001,595 Not available NTIS
- PB90-193285**
Theory of Chemically Induced Kink Formation on Cracks in Silica. I. 3-D Crack Green's Functions.
PB90-193285 001,145 Not available NTIS
- PB90-193293**
Laser-Induced Photoassociation of Ultracold Sodium Atoms.
PB90-193293 001,719 Not available NTIS
- PB90-193301**
Total Molecular Surface Areas as a Predictor for Reversed-Phase High Performance Liquid Chromatography in Various Organotin Systems.
PB90-193301 000,410 Not available NTIS
- PB90-193319**
Corrosion Reactions in SiC Ceramics.
PB90-193319 001,146 Not available NTIS
- PB90-193327**
Laser-Enhanced Ionization Spectroscopy in Flames and Plasmas.
PB90-193327 000,411 Not available NTIS
- PB90-193335**
Initial Color Development in Radiochromic Dye Films After a Short Intense Pulse of Accelerated Electrons.
PB90-193335 001,407 Not available NTIS
- PB90-193343**
Fundamental Processes of SF(sub 6) Decomposition and Oxidation in Glow and Corona Discharges.
PB90-193343 000,906 Not available NTIS
- PB90-193350**
Resource Letter OHE-1: The Integral and Fractional Quantum Hall Effects.
PB90-193350 001,596 Not available NTIS
- PB90-193368**
Proton MAS NMR Method for Determining Intimate Mixing in Polymer Blends.
PB90-193368 000,535 Not available NTIS
- PB90-193376**
Fiber Optic Sensing of Pulsed Currents.
PB90-193376 000,838 Not available NTIS
- PB90-193384**
Preparation of Microgram Samples on Iron Wool for Radio-carbon Analysis via Accelerator Mass Spectrometry: A Closed-System Approach.
PB90-193384 000,241 Not available NTIS
- PB90-193392**
Interfaces: The Next NDE Challenge.
PB90-193392 001,254 Not available NTIS
- PB90-193400**
Eddy Current Measurement of Density during Hot Isostatic Pressing.
PB90-193400 001,255 Not available NTIS
- PB90-193418**
Microscopic Origins of Acoustic Emission.
PB90-193418 001,445 Not available NTIS
- PB90-193426**
Viscosity and Molecular Weight Distribution of Ultra-High Molecular Weight Polyethylene Using a High Temperature Low Shear Rate Rotational Viscometer.
PB90-193426 000,536 Not available NTIS
- PB90-193434**
Coming to OSI: Network Resource Management and Global Reachability.
PB90-193434 000,648 Not available NTIS
- PB90-193442**
Comparison of the Optoacoustic and Hg Tracer Methods for the Study of Energy Transfer Processes in Gas Mixtures.
PB90-193442 000,412 Not available NTIS
- PB90-193459**
Correlation between Gas Phase and Solution Phase Reactivities of Hydroxyl Radicals Towards Saturated Organic Compounds.
PB90-193459 000,413 Not available NTIS
- PB90-193467**
Gas-Phase Reactions of Hydroxyl Radicals with the Fuel Additives Methyl Tert-Butyl Ether and Tert-Butyl Alcohol Over the Temperature Range 240-440 K.
PB90-193467 000,414 Not available NTIS
- PB90-193475**
Flash Photolysis Resonance Fluorescence Investigation of the Gas Phase Reactions of Hydroxyl Radicals with a Series of Aliphatic Ketones Over the Temperature Range 240-440 K.
PB90-193475 000,274 Not available NTIS

NTIS ORDER/REPORT NUMBER INDEX

PB90-198425 Experimental Study of Post-Installed Anchors Under Combined Shear and Tension Loading. PB90-198425 000,174 PC A05/MF A01		
PB90-198433 Hierarchical Real-Time Control Task Decomposition for a Coal Mining Automation Project. PB90-198433 001,391 PC A04/MF A01		
PB90-198441 Life-Cycle Costing for Energy Conservation in Buildings: Instructor's Guide. PB90-198441 000,090 PC A09/MF A01		
PB90-198458 Basics of Chemical Instrumentation. Volume 1. Separation Methods.		

NTIS ORDER/REPORT NUMBER INDEX

PB90-212192

- PB90-206103**
Autoregulation of the Yeast Copper Metallothionein Gene Depends on Metal Binding. PB90-206103 001,331 Not available NTIS
- PB90-206111**
X-ray Diffraction Studies of Amorphous (Fe(sub 1-x)Ni(sub x))(sub 77)Si(sub 10)B(sub 13) Alloys. PB90-206111 001,214 Not available NTIS
- PB90-206129**
Neutron Scattering Studies of Potassium-Ammonia Layers in Graphite. PB90-206129 000,420 Not available NTIS
- PB90-206137**
Analysis of the Corrections to the Normal Force Response for the Cone and Plate Geometry in Single Step Stress Relaxation Experiments. PB90-206137 000,538 Not available NTIS
- PB90-206145**
X-ray Line Broadening Study on Shock-Modified Hematite. PB90-206145 000,421 Not available NTIS
- PB90-206152**
X-ray Study of the Barium Oxide-Yttrium Sesquioxide-Copper Oxide (CuOx) System. PB90-206152 001,151 Not available NTIS
- PB90-206160**
Standard X-ray Diffraction Powder Patterns of Fifteen Ceramic Phases. PB90-206160 001,152 Not available NTIS
- PB90-206178**
Standard X-ray Diffraction Powder Patterns of Sixteen Ceramic Phases. PB90-206178 001,153 Not available NTIS
- PB90-206186**
Standard X-ray Diffraction Powder Patterns of Fifteen Ceramic Phases. PB90-206186 001,154 Not available NTIS
- PB90-206491**
Center for Electronics and Electrical Engineering Technical Publication Announcements Covering Center Programs, July to September 1989, with 1990 CEEE Events Calendar. PB90-206491 000,908 PC A03/MF A01
- PB90-206673**
Computerization of the ICDD Powder Diffraction Database Critical Review of Sets 1 to 32(1). PB90-206673 000,422 Not available NTIS
- PB90-206681**
Standard Reference Materials for X-ray Diffraction. Part 2. Calibration Using D-Spacing Standards. PB90-206681 001,598 Not available NTIS
- PB90-206699**
X-ray Studies of Helium Quenched Ba(sub 2)YCu(sub 3)O(sub 7-x). PB90-206699 001,155 Not available NTIS
- PB90-206707**
Calculation of Spectral Line Profiles of Multi-Electron Emitters in Plasmas. PB90-206707 001,730 Not available NTIS
- PB90-206715**
Structure of Phosphate-Free Ribonuclease A Refined at 1.26 A. PB90-206715 001,332 Not available NTIS
- PB90-206723**
Structure of Insulin: Results of Joint Neutron and X-ray Refinement. PB90-206723 001,311 Not available NTIS
- PB90-206731**
Structure of Form III Crystals of Bovine Pancreatic Trypsin Inhibitor. PB90-206731 001,333 Not available NTIS
- PB90-206749**
Comparison of Liquid Chromatography with Fluorescence Detection and Gas Chromatography/Mass Spectrometry for the Determination of Polycyclic Aromatic Hydrocarbons in Environmental Samples. PB90-206749 000,971 Not available NTIS
- PB90-206756**
Liquid-in-Glass Thermometers - Why Are They Still Being Used Today. PB90-206756 001,014 Not available NTIS
- PB90-206764**
Laser Cooling. PB90-206764 001,731 Not available NTIS
- PB90-206772**
Iron and Cadmium Capture Gamma Ray Photofission Measurements. PB90-206772 001,432 Not available NTIS
- PB90-206780**
Niobium as a Neutron Dosimeter. PB90-206780 001,408 Not available NTIS
- PB90-206798**
Measure h/e(2) by Counting Electrons or Ions in a Storage Ring. PB90-206798 001,732 Not available NTIS
- PB90-206806**
Heterodyne Frequency Measurements on OCS Near 61.76 THz (2060 cm⁻¹). PB90-206806 000,423 Not available NTIS
- PB90-206830**
Unstable Periodic Orbits, Recurrences, and Diffuse Vibrational Structures in the Photodissociation of Water Near 128 nm. PB90-206830 000,424 Not available NTIS
- PB90-206848**
Magnetic Microstructure Imaging Using Scanning Electron Microscopy with Polarization Analysis. PB90-206848 001,015 Not available NTIS
- PB90-206855**
Station-to-Station. PB90-206855 000,746 Not available NTIS
- PB90-206863**
Spectra of the Si I Isoelectronic Sequence from Cu XVI to Mo XXIX. PB90-206863 001,733 Not available NTIS
- PB90-206871**
Weld Cracking in Massive Steel Forgings. PB90-206871 001,215 Not available NTIS
- PB90-206889**
Temperature and Composition Dependence of the Energy Gap of Hg(sub 1-x)Cd(sub x)Te by Two-Photon Magneto Absorption Techniques. PB90-206889 001,599 Not available NTIS
- PB90-206897**
Heterodyne Frequency Measurements of (12)C(16)O Laser Transitions Near 2050 cm⁻¹. PB90-206897 000,425 Not available NTIS
- PB90-206905**
Rotational Distributions in the Photodetachment of IHI(1-) and in the I + HI Reaction: The Influence of IHI Transition State Resonances. PB90-206905 000,426 Not available NTIS
- PB90-206913**
4 Meter FTS Observations of Photospheric Magnetic Fields on M Dwarfs. PB90-206913 000,039 Not available NTIS
- PB90-206921**
Concentration Fluctuations in Mixtures of Linear and Star-Shaped Polymers. PB90-206921 000,539 Not available NTIS
- PB90-206939**
Observation of the NF(2+) Dication in the Electron Impact Ionization Mass Spectrum of NF(sub 3). PB90-206939 000,427 Not available NTIS
- PB90-206947**
Distinct Alignment Effects for Y(sub 2.0) versus Y(sub 2, + or - 1) Angular Wave Functions Observed in Collisions of an Atomic Ca D State. PB90-206947 001,734 Not available NTIS
- PB90-206954**
Soft X-ray Optics Characterization on Surf II. PB90-206954 001,735 Not available NTIS
- PB90-206962**
Low Temperature Chemical Approaches to Superconductive Materials: A Challenge in Chemical Synthesis. PB90-206962 001,156 Not available NTIS
- PB90-206970**
Effect of Aqueous Environments on the Fracture Behavior of Ductile Nickel Aluminide. PB90-206970 001,194 Not available NTIS
- PB90-206988**
Spectrum and Energy Levels of Six-Times-Ionized Molybdenum (Mo VII). PB90-206988 000,428 Not available NTIS
- PB90-206996**
Modified Leung-Griffiths Model for Vapor-Liquid Equilibria: Application to Polar Fluid Mixtures. PB90-206996 000,429 Not available NTIS
- PB90-207002**
Optical Waveguide Dosimetry for Gamma-Radiation in the Dose Range 10⁻¹-10⁴ Gy. PB90-207002 001,409 Not available NTIS
- PB90-207010**
Characterizing Transient Measurements by Use of the Step Response and the Convolution Integral. PB90-207010 000,822 Not available NTIS
- PB90-207028**
Vibrational Mode Mixing in Terminal Acetylenes: High-Resolution Infrared Laser Study of Isolated J States. PB90-207028 000,430 Not available NTIS
- PB90-207036**
Equation of State for Stellar Envelopes. 4. Thermodynamic Quantities and Selected Ionization Fractions for Six Elemental Mixes. PB90-207036 000,040 Not available NTIS
- PB90-207044**
Adsorption of Zinc 3,3-Dimethylacrylate and 3,3-Dimethylacrylic Acid on Hydroxyapatite from Solution: Reversibility and Variability of Isotherms. PB90-207044 000,066 Not available NTIS
- PB90-207051**
Airy Pattern, Weak-Link Modelling of Critical Currents in High-T(sub c) Superconductors. PB90-207051 001,600 Not available NTIS
- PB90-207069**
Scanning Electron Microscope-Based Metrological Electron Microscope System and New Prototype Scanning Electron Microscope Magnification Standard. PB90-207069 001,016 Not available NTIS
- PB90-207077**
Theory of Spin-Polarized Metastable-Atom-Deexcitator Spectroscopy: Ni-He. PB90-207077 001,736 Not available NTIS
- PB90-207150**
Transcript of Hearing on Improving U.S. Participation in International Standards Activities, Second Day: April 4 1990. PB90-207150 000,009 PC A12/MF A02
- PB90-207259**
Fire Experiments of Zoned Smoke Control at the Plaza Hotel in Washington DC. PB90-207259 000,093 PC A05/MF A01
- PB90-207267**
Technical Activities 1989, Electron and Optical Physics Division. PB90-207267 001,737 PC A04/MF A01
- PB90-207275**
Studies on the Melt Flow Rate of the SRM 1474, a Polyethylene Resin. PB90-207275 001,271 PC A03/MF A01
- PB90-207283**
Physics, Chemistry and Engineering in the 1990's. PB90-207283 000,010 PC A03/MF A01
- PB90-207291**
Corrosion of Zircaloy Spent Fuel Cladding in a Repository. PB90-207291 001,427 PC A03/MF A01
- PB90-207309**
Center for Electronics and Electrical Engineering Technical Publication Announcements. Covering Center Programs, April-June 1989, with 1990 CEEE Events Calendar. PB90-207309 000,823 PC A03/MF A01
- PB90-207358**
Proposed Integration Framework for Step (Standard for the Exchange of Product Model Data). PB90-207358 000,747 PC A03/MF A01
- PB90-207754**
Center for Electronics and Electrical Engineering: 1990 Program Description. PB90-207754 000,909 PC A03/MF A01
- PB90-207762**
Evaluation of NVLAP (National Voluntary Laboratory Accreditation Program) Personnel Dosimetry Testing Laboratory: X-rays. PB90-207762 001,360 PC A03/MF A01
- PB90-207770**
Workloads, Observables, Benchmarks and Instrumentation. PB90-207770 000,649 PC A03/MF A01
- PB90-207788**
NIST (National Institute of Standards and Technology) STEP (Standard for the Exchange of Product Model Data) Documents Configuration Management System User's Guide. PB90-207788 000,748 PC A03/MF A01
- PB90-207796**
Mechanical Properties and Fracture Toughness of AAR (Association of American Railroads) TC128 Grade B Steel and a Micro-Alloyed, Control-Rolled Steel, A 8XX Grade B, from -80F to + 73F. PB90-207796 001,216 PC A03/MF A01
- PB90-207804**
Determination of the NDT (Nil-Ductility Transition) Temperature and Charpy V-Notch Impact Properties of AAR (American Association of Railroads) TC128 Grades B Steel and A 8XX Grade B Steel. PB90-207804 001,217 PC A03/MF A01
- PB90-208273**
Calibration of Road Roughness Measuring Equipment. Volume 1. Experimental Investigation. PB90-208273 000,572 PC A05/MF A01
- PB90-208281**
Calibration of Road Roughness Measuring Equipment. Volume 2. Calibration Procedures. PB90-208281 000,573 PC A03/MF A01
- PB90-209578**
Special Test and Evaluation Methods Used for a Nine-Axis Accelerometer. PB90-209578 000,861 PC A03/MF A01
- PB90-209586**
Voila: A System for Looking at Processes. PB90-209586 000,736 PC A03/MF A01
- PB90-209594**
Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals. PB90-209594 001,601 PC A03/MF A01
- PB90-209602**
Long-Range Plan for a Research Project on Carbon Monoxide Production and Prediction. PB90-209602 000,587 PC A03/MF A01
- PB90-212192**
Stable Implementation Agreements for Open Systems Interconnection Protocols. Version 3, Edition 1. December 1989. PB90-212192 000,616 PC A99/MF A04

NTIS ORDER/REPORT NUMBER INDEX

- PB90-214453**
High Temperature Ultrasonic Testing of Materials for Internal Flaws.
PATENT-4 898 034 001,274 Not available NTIS
- PB90-215534**
Government's Role in Standards-Related Activities: Analysis of Comments.
PB90-215534 000,011 PC A03/MF A01
- PB90-215807**
Standard Reference Materials: Glasses for Microanalysis: SRM's 1871-1875.
PB90-215807 001,157 PC A04/MF A01
- PB90-215823**
FIREDOC Vocabulary List, 3rd Edition.
PB90-215823 000,189 PC A06/MF A01
- PB90-215849**
Periodic and Chaotic Motions of a Modified Stoker Column: Experimental and Numerical Results.
PB90-215849 000,176 PC A03/MF A01
- PB90-215864**
Proceedings of the Hypertext Standardization Workshop, January 16-18, 1990 National Institute of Standards and Technology.
PB90-215864 001,030 PC A16/MF A02
- PB90-216508**
Guide to Available Mathematical Software, March 1990.
PB90-216508 001,308 PC A99/MF A04
- PB90-216813**
Object Database Management Systems: Concepts and Features.
PB90-216813 000,720 PC A04/MF A01
- PB90-216839**
DOE (Department of Energy)/NIST (National Institute of Standards and Technology) Workshop on Common Architectures for Robotic Systems.
PB90-216839 001,098 PC A08/MF A01
- PB90-216847**
Semiconductor Measurement Technology: A Software Program for Aiding the Analysis of Ellipsometric Measurements, Simple Spectroscopic Models.
PB90-216847 001,602 PC A16/MF A02
- PB90-217712**
World Modeling for Sensory Interactive Trajectory Generation.
PB90-217712 000,019 Not available NTIS
- PB90-217720**
Use of FTIR Spectroscopy for Multi-Component Quantitation in Combustion Toxicology.
PB90-217720 000,243 Not available NTIS
- PB90-217738**
Use of Acceptance Diagrams to Calculate the Performance of Multiple-Section Straight-Sided Neutron Guide Systems.
PB90-217738 001,738 Not available NTIS
- PB90-217746**
Toxicological Effects of Different Time Exposures to the Fire Gases: Carbon Monoxide or Hydrogen Cyanide or to Carbon Monoxide Combined with Hydrogen Cyanide or Carbon Dioxide.
PB90-217746 001,369 Not available NTIS
- PB90-217753**
Tooth-Bound Fluoride and Dental Caries.
PB90-217753 001,339 Not available NTIS
- PB90-217761**
Threshold Cerenkov Radiation and Beam Diagnostics.
PB90-217761 001,739 Not available NTIS
- PB90-217779**
Thermodynamic Aspects of Concrete Durability.
PB90-217779 000,134 Not available NTIS
- PB90-217787**
System of PC Computer Programs for Size Exclusion Chromatography.
PB90-217787 000,431 Not available NTIS
- PB90-217795**
Surface Tension of Refrigerants R123 and R134a.
PB90-217795 001,233 Not available NTIS
- PB90-217803**
Structure of the Polymer-Solvent Interface.
PB90-217803 000,540 Not available NTIS
- PB90-217811**
Stimulated Desorption from CO Chemisorbed on Cr(110): Sensitivity to Bonding Changes.
PB90-217811 000,432 Not available NTIS
- PB90-217829**
Step and Frequency Response Testing of Waveform Recorders.
PB90-217829 001,443 Not available NTIS
- PB90-217837**
Steady State Coupled Transport of Nitric Acid through a Hollow Fiber Supported Liquid Membrane.
PB90-217837 000,281 Not available NTIS
- PB90-217845**
Standard Field Generation for Microwaves and Millimeter Waves.
PB90-217845 001,512 Not available NTIS
- PB90-217852**
Soft X-ray Absorption and Emission Spectra of the YBa(sub 2)Cu(sub 3)O(sub 7-x) Superconductor.
PB90-217852 001,603 Not available NTIS
- PB90-217860**
Single Pulse Shock Tube Studies on the Stability of 1-Phenylbutene-2.
PB90-217860 000,433 Not available NTIS
- PB90-217878**
Role of Large Scale Turbulent Structures in the Lift-Off and Blow Out Behaviors of Turbulent Jet Diffusion Flames.
PB90-217878 000,588 Not available NTIS
- PB90-217886**
Research on Inverse Problems in Materials Science and Engineering.
PB90-217886 001,023 Not available NTIS
- PB90-217894**
Reference Materials, Reference Data, and Reference Procedures for Surface Analysis: National and International Standards Activities.
PB90-217894 000,434 Not available NTIS
- PB90-217902**
Quantitative Isotope and Elemental Ratio Measurements with a Camera-Based Imaging System on an Ion Microscope.
PB90-217902 000,244 Not available NTIS
- PB90-217910**
RCS Application Example: Tool Changing on a Horizontal Machining Center.
PB90-217910 001,047 Not available NTIS
- PB90-217928**
Quantitative Characterization of the Microstructure of Hardened Tricalcium Silicate Paste Using Computer Image Analysis.
PB90-217928 001,158 Not available NTIS
- PB90-217936**
Prototype Methodology for Fire Hazard Analysis.
PB90-217936 000,190 Not available NTIS
- PB90-217944**
Progress Toward a Semiconductor Depth Profiling Standard.
PB90-217944 001,604 Not available NTIS
- PB90-217951**
Pressure Effects on Partial Discharges in Hexane under DC Voltage.
PB90-217951 000,910 Not available NTIS
- PB90-217969**
Prediction of Service Life of Building and Construction Materials.
PB90-217969 000,135 Not available NTIS
- PB90-217977**
Precision Engineering and Experimental Physics: William A. Rogers, the First Academic Mechanician in the U.S.
PB90-217977 001,017 Not available NTIS
- PB90-217985**
Point Source/Point Receiver Ultrasonic Wave Speed Measurement.
PB90-217985 001,446 Not available NTIS
- PB90-217993**
Photoemission Study of High T(sub c) Oxides.
PB90-217993 001,605 Not available NTIS
- PB90-218009**
Polarimetric Magnetic Field Sensors Based on Yttrium Iron Garnet.
PB90-218009 000,839 Not available NTIS
- PB90-218017**
Overview of the Multiple Autonomous Underwater Vehicles (MAUV) Project.
PB90-218017 001,436 Not available NTIS
- PB90-218025**
New Approach to Accurate X-ray Mask Measurements in a Scanning Electron Microscope.
PB90-218025 001,440 Not available NTIS
- PB90-218033**
Next-Generation Tension Strap Supports for Spaceborne Dewars.
PB90-218033 001,823 Not available NTIS
- PB90-218041**
Modeling of Critical Currents in Granular High-T(sub c) Superconductors.
PB90-218041 001,606 Not available NTIS
- PB90-218058**
Measurements of Ventilation Rates and Ventilation Effectiveness.
PB90-218058 000,094 Not available NTIS
- PB90-218066**
Measurements of a Transport Implementation Running Over an IEEE 802.3 Local Area Network.
PB90-218066 000,749 Not available NTIS
- PB90-218074**
Measurement Research and the National Institute of Standards and Technology's Research Information Center.
PB90-218074 001,037 Not available NTIS
- PB90-218082**
Malcolm Baldrige National Quality Improvement Award.
PB90-218082 000,005 Not available NTIS
- PB90-218090**
Magneto-Optical Investigation of Impurity and Defect Levels in HgCdTe Alloys.
PB90-218090 001,607 Not available NTIS
- PB90-218108**
Mobile Antennas.
PB90-218108 000,810 Not available NTIS
- PB90-218116**
Ku-Band Satellite Two-Way Timing Using a Very Small Aperture Terminal (VSAT).
PB90-218116 000,617 Not available NTIS
- PB90-218124**
Investigation of Photoconductive Picosecond Microstripline Switches on Self-Implanted Silicon on Sapphire (SOS).
PB90-218124 000,873 Not available NTIS
- PB90-218132**
Influence of Surface Structure on Mechanisms of Stimulated Desorption.
PB90-218132 000,435 Not available NTIS
- PB90-218140**
Imaging and Assessment of Corrosion on Coated and Uncoated Steel Using Thermal-Wave Electron Microscopy.
PB90-218140 001,195 Not available NTIS
- PB90-218157**
Ion Desorption Induced by Core Exciton States in MgO.
PB90-218157 000,436 Not available NTIS
- PB90-218165**
Investigation of the Effects of a Stratified Two Layer Environment on Fire Plume Temperatures.
PB90-218165 000,136 Not available NTIS
- PB90-218173**
HVAC Emulation and On-Line Testing of EMC Systems.
PB90-218173 001,378 Not available NTIS
- PB90-218181**
Harmonization of Standards and Regulations: Problems and Opportunities for the United States.
PB90-218181 000,117 Not available NTIS
- PB90-218199**
Gateway between MHS (X.400) and SMTP.
PB90-218199 000,618 Not available NTIS
- PB90-218207**
Free Radical Chemistry of Aqueous-Phase SO(sub 2).
PB90-218207 000,289 Not available NTIS
- PB90-218215**
Framework for Representing and Reasoning about Three-Dimensional Objects for Vision.
PB90-218215 000,774 Not available NTIS
- PB90-218223**
Forward Smolder Propagation Over Solid Wood.
PB90-218223 001,273 Not available NTIS
- PB90-218231**
Fluorescence Spectrometry in Analytical Chemistry and Color Science.
PB90-218231 000,245 Not available NTIS
- PB90-218249**
Fields Scattered by a Dielectric Strip on a Dielectric Half-Space.
PB90-218249 001,608 Not available NTIS
- PB90-218256**
EXIT: A Simulation Model of Occupant Decisions and Actions in Residential Fires.
PB90-218256 000,191 Not available NTIS
- PB90-218264**
Entropy-Driven Ion-Molecule Reactions.
PB90-218264 000,437 Not available NTIS
- PB90-218272**
Ellipsoidal Mirror Analyzer for the Study of Photon Stimulated Desorption.
PB90-218272 000,438 Not available NTIS
- PB90-218280**
Electrophoretic Response of Submicron Particles to Alternating Electric Fields.
PB90-218280 000,439 Not available NTIS
- PB90-218298**
Estimating Air Leakage through Doors for Smoke Control.
PB90-218298 000,095 Not available NTIS
- PB90-218306**
ESDIAD (Electron Stimulated Desorption Ion Angular Distributions) of Small Molecules on Surfaces: A Few Caveats.
PB90-218306 000,440 Not available NTIS
- PB90-218314**
Effects of Chopper Jitter on the Time-Dependent Intensity Transmitted by Multiple-Slot Multiple Disk Chopper Systems.
PB90-218314 001,740 Not available NTIS
- PB90-218322**
Effect of a Camp-Independent Mutation on Crystal Structure of Catabolite Gene Activator Protein.
PB90-218322 001,334 Not available NTIS
- PB90-218330**
Dynamics of O(1+) Desorption from TiO(sub 2).
PB90-218330 000,441 Not available NTIS
- PB90-218348**
Determination of Molecular Structure at Surfaces Using Electron Stimulated Desorption.
PB90-218348 000,442 Not available NTIS
- PB90-218355**
Degradation of Organic Protective Coatings on Steel in Corrosive Environments.

NTIS ORDER/REPORT NUMBER INDEX

PB90-235276

PB90-218355 001,196 Not available NTIS

PB90-218363
Digital Video Data Acquisition/Analysis for Existing ESDIAD Apparatus.
PB90-218363 001,741 Not available NTIS

PB90-218371
Current View of the Iota/E System.
PB90-218371 001,742 Not available NTIS

PB90-218389
Control Architecture for Cooperative Intelligent Robots.
PB90-218389 001,099 Not available NTIS

PB90-218397
Concept of Secondary Laboratories.
PB90-218397 001,743 Not available NTIS

PB90-218405
Computerized Tribology Information System ACTIS.
PB90-218405 001,115 Not available NTIS

PB90-218413
Characterization of a Piezoelectric Transducer Coupled to a Solid.
PB90-218413 001,447 Not available NTIS

PB90-218421
Chain Dimension Determination of Deuterated Polybutadiene by Small-Angle Neutron Scattering on the Basis of Random Phase Approximation.
PB90-218421 000,541 Not available NTIS

PB90-218439
Calibration and Meaning of Antenna Factor and Gain for EMI Antennas.
PB90-218439 000,811 Not available NTIS

PB90-218447
Binding of Substituted cis-Pt(II)-Diammines to Duplex DNA.
PB90-218447 001,335 Not available NTIS

PB90-218454
Automatically Running Command Files at Any Future Time.
PB90-218454 000,721 Not available NTIS

PB90-218462
Austenitic Stainless Steels with Emphasis on Strength at Low Temperatures.
PB90-218462 001,218 Not available NTIS

PB90-218470
Algorithms for Calculating Radiation View Factors between Plane Convex Polygons with Obstructions.
PB90-218470 001,744 Not available NTIS

PB90-218488
Accurate X-ray Spectroscopy.
PB90-218488 001,745 Not available NTIS

PB90-218496
Magnitude of Secondary Electron Contributions in Photon Stimulated Desorption.
PB90-218496 000,443 Not available NTIS

PB90-218777
Structure and Radiation Properties of Turbulent Diffusion Flames.
PB90-218777 000,589 PC A06/MF A01

PB90-219130
Stabilization of Taylor-Couette Flow Due to Time-Periodic Outer Cylinder Oscillation.
PB90-219130 001,458 PC A03/MF A01

PB90-219551
Computerization of Welding Data: Proceedings of the Conference and Workshop.
PB90-219551 001,065 PC A06/MF A01

PB90-219569
NASREM Implementation of Position Determination from Motion.
PB90-219569 001,100 PC A03/MF A01

PB90-219577
Exhaust Gas Analysis for Harmful Species: 19F1A Fire Fighting Trainer at Mayport, Florida.
PB90-219577 000,972 PC A03/MF A01

PB90-219585
Quantification of Heat Losses through Structural Supports for Shallow Trench Heat Distribution Systems.
PB90-219585 000,958 PC A06/MF A01

PB90-219593
Implementation of a Jacobian-Transpose Algorithm.
PB90-219593 001,101 PC A03/MF A01

PB90-219601
Measurements of Coefficients of Discharge for Concentric Flange-Tapped Square-Edged Orifice Meters in Natural Gas Over the Reynolds Number Range 25,000 to 16,000,000.
PB90-219601 000,953 PC A16/MF A02

PB90-219619
Guidelines for Pressure Vessel Safety Assessment.
PB90-219619 001,219 PC A05/MF A01

PB90-219627
Guide to Software Acceptance.
PB90-219627 000,722 PC A03/MF A01

PB90-219783
Manual for the Cement Hydration Simulation Model.
PB90-219783 000,137 PC A07/MF A01

PB90-219791
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB90-219791 000,973 PC A03/MF A01

PB90-219809
Fire Research Publications, 1989.
PB90-219809 000,096 PC A03/MF A01

PB90-219817
GATT (General Agreement on Tariffs and Trade) Standards Code Activities of the National Institute of Standards and Technology 1989.
PB90-219817 000,204 PC A04/MF A01

PB90-219825
Quality Assurance Tests for Adhesion of Paint on Tactical Rigid Wall Shelters.
PB90-219825 001,177 PC A03/MF A01

PB90-219833
Post Occupancy Evaluation of Federal Buildings - The Portland Federal Building and Others.
PB90-219833 000,097 PC A09/MF A01

PB90-219841
NIST (National Institute of Standards and Technology) Standard Reference Data Products 1990 Catalog.
PB90-219841 001,031 PC A03/MF A01

PB90-219858
Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1990.
PB90-219858 000,201 PC A04/MF A01

PB90-219866
Information Management Directions: The Integration Challenge.
PB90-219866 001,032 PC A09/MF A01

PB90-220286
Concept for a Reference Model Architecture for Real-Time Intelligent Control Systems (ARTICS).
PB90-220286 001,048 PC A03/MF A01

PB90-221789
Proceedings of CIMCON '90.
PB90-221789 001,049 PC A23/MF A03

PB90-221797
Generating Standard Reference Electromagnetic Fields in the NIST (National Institute of Standards and Technology) Anechoic Chamber, 0.2 to 40 GHz.
PB90-221797 000,644 PC A03/MF A01

PB90-221805
Wavelength Measurement System for Optical Fiber Communications.
PB90-221805 000,619 PC A03/MF A01

PB90-221813
Energy Related Inventions Program: A Joint Program of the Department of Energy and the National Institute of Standards and Technology Status Report for Recommendations 251 through 486.
PB90-221813 000,966 PC A09/MF A01

PB90-221821
Variances Based on Data with Dead Time between the Measurements.
PB90-221821 001,303 PC A03/MF A01

PB90-221839
Electrodeposition of Wear Resistant Coatings.
PB90-221839 001,178 PC A06/MF A01

PB90-221847
Summary Report of NIST's (National Institute of Standards and Technology's) Industry-Government Consortium Research Program on Flowmeter Installation Effects with Emphasis on the Research Period November 1988-May 1989.
PB90-221847 001,459 PC A04/MF A01

PB90-221854
Rating Procedure for Mixed Air-Source Unitary Heat Pumps Operating in the Heating Mode.
PB90-221854 000,098 PC A03/MF A01

PB90-221862
Expected Complexity of the 3-Dimensional Voronoi Diagram.
PB90-221862 001,288 PC A03/MF A01

PB90-222720
Study of Meteorological Processes Important in the Degradation of Materials through Surface Temperature.
PB90-222720 001,228 PC A03/MF A01

PB90-222738
Semiconductor Measurement Technology. EPROP: An Interactive FORTRAN Program for Computing Selected Electronic Properties of Gallium Arsenide and Silicon.
PB90-222738 001,609 PC A06/MF A01

PB90-225947
Cell as Part of a Manufacturing System.
PB90-225947 000,737 PC A03/MF A01

PB90-225954
Review of Current Research and Activities Involving Characterization, Abatement and Disposal of Lead-Containing Paint Films.
PB90-225954 000,984 PC A03/MF A01

PB90-225988
Energy Related Inventions Program: A Joint Program of the Department of Energy and the National Institute of Standards and Technology Status Report for Recommendations 1 through 250.
PB90-225988 000,967 PC A08/MF A01

PB90-227968
Transient Cooling of a Hot Surface by Droplets Evaporation.
PB90-227968 001,746 PC A06/MF A01

PB90-227976
Transient Characteristics of Unconfined Fire-Plume-Driven Ceiling Jets.
PB90-227976 000,138 PC A15/MF A01

PB90-227984
Expected Linear 3-Dimensional Voronoi Diagram Algorithm.
PB90-227984 001,289 PC A03/MF A01

PB90-227992
NIST (National Institute of Standards and Technology) Structural Research Publications, 1984-1989.
PB90-227992 000,177 PC A04/MF A01

PB90-228008
Quantitative Approach to Camera Fixation.
PB90-228008 001,102 PC A03/MF A01

PB90-228016
Graphics Standards in the Computer-Aided Acquisition and Logistic Support (CALS) Program, Fiscal Year 1989 Volume 2. MIL-D-28003 Revisions, CGM Registration.
PB90-228016 001,379 PC A15/MF A02

PB90-228024
Emulation Through Time Dilation.
PB90-228024 000,650 PC A03/MF A01

PB90-228032
Research for Electric Energy Systems - An Annual Report (1989).
PB90-228032 000,945 PC A05/MF A01

PB90-228040
Building Technology Project Summaries, 1990.
PB90-228040 000,192 PC A06/MF A01

PB90-231150
U.S. Investment Strategies for Quality Assurance.
PB90-231150 001,483 PC A11/MF A02

PB90-232752
Specifications and Tolerances for Reference Standards and Field Standard Weights and Measures. 1. Specifications and Tolerances for Field Standard Weights (NIST (National Institute of Standards and Technology) Class F). Revised 1990.
PB90-232752 001,018 PC A03/MF A01

PB90-232810
Least-Cost Energy Decisions for Buildings: Introduction to Life-Cycle Costing. Video Training Workbook.
PB90-232810 000,099 PC A03/MF A01

PB90-233891
Technical Activities 1986, Center for Analytical Chemistry.
PB90-233891 000,246 PC A09/MF A01

PB90-234998
Fire Risk Assessment Method: Case Study 1, Upholstered Furniture in Residences.
PB90-234998 000,139 PC A04/MF A01

PB90-235003
Experimental Evaluation of Two Nonazeotropic Refrigerant Mixtures in a Water-to-Water, Breadboard Heat Pump.
PB90-235003 001,234 PC A04/MF A01

PB90-235011
Evaluation of the Integral $\int_{k'}^{k''} \int_{l'}^{l''} \int_{m'}^{m''} \dots$ = Integral from C to infinity (j sub l)(k'r)(j sub l')(k'r) squared dr.
PB90-235011 001,290 PC A03/MF A01

PB90-235029
Selection of Siliceous Aggregate for Concrete.
PB90-235029 000,563 PC A03/MF A01

PB90-235037
Fire Risk Assessment Method: Case Study 2, Carpet in Offices.
PB90-235037 000,140 PC A03/MF A01

PB90-235045
Fire Risk Assessment Method: Case Study 3, Concealed Combustibles in Hotels.
PB90-235045 000,141 PC A03/MF A01

PB90-235052
Fire Risk Assessment Method: Description of Methodology.
PB90-235052 000,142 PC A05/MF A01

PB90-235243
Journal of Research of the National Institute of Standards and Technology. January-February 1990. Volume 95, Number 1.
PB90-235243 000,444 PC A06

PB90-235250
New Program and Directions at the National Institute of Standards and Technology.
PB90-235250 000,012 (Order as PB90-235243, PC A06)

PB90-235268
Apparatus for Simultaneous Small Angle Neutron Scattering and Steady Shear Viscosity Studies of Polymer Melts and Solutions.
PB90-235268 000,542 (Order as PB90-235243, PC A06)

PB90-235276
Dynamics of the Bell Prover, II.
PB90-235276 001,460 (Order as PB90-235243, PC A06)

NTIS ORDER/REPORT NUMBER INDEX

PB90-235284 Proposed Dynamic Pressure and Temperature Primary Standard. PB90-235284 (Order as PB90-235243, PC A06)	000,445 000,445	Not available NTIS	
PB90-235292 Spectroradiometric Determination of the Freezing Temperature of Gold. PB90-235292 (Order as PB90-235243, PC A06)	000,446 000,446	Not available NTIS	
PB90-235300 Report on the Session of the Consultative Committee on Thermometry (17th). PB90-235300 (Order as PB90-235243, PC A06)	000,447 000,447	Not available NTIS	
PB90-235318 New Assignment of Mass Values and Uncertainties to NIST Working Standards. PB90-235318 (Order as PB90-235243, PC A06)	000,448 000,448	Not available NTIS	
PB90-235326 Observation and an Explanation of Breakdown of the Quantum Hall Effect. PB90-235326 (Order as PB90-235243, PC A06)	001,610 001,610	Not available NTIS	
PB90-235417 Development of Test Methods to Determine the Compatibility of Liquid Hazardous Materials with Polyethylene Packagings. PB90-235417	000,985 000,985	PC A04/MF A01	
PB90-237264 Scanning Scattering Microscope with Hemispherical Mirror and Microfocused Beam. PATENT-4 954 722	000,996 000,996	Not available NTIS	
PB90-237355 Hospital Energy Analysis Toolkit (HEAT): User Manual. PB90-237355	000,990 000,990	PC A03/MF A01	
PB90-238320 Method and Apparatus for Producing a Photopumped VUV Laser in MO ₆ + Ion-Containing Plasma. PATENT-4 939 744	001,468 001,468	Not available NTIS	
PB90-241225 Corrosion Data for Materials Performance Characterization. PB90-241225	001,197 001,197	Not available NTIS	
PB90-241233 Three Dimensional Modeling of Optical Microlithography for Positive Photoresists. PB90-241233	001,068 001,068	Not available NTIS	
PB90-241241 Fire Induced Flow Field - Theory and Experiment. PB90-241241	001,381 001,381	Not available NTIS	
PB90-241258 Nuclear Magnetic Resonance. PB90-241258	001,611 001,611	Not available NTIS	
PB90-241266 Using the Computer to Analyze Coating Defects. PB90-241266	001,179 001,179	Not available NTIS	
PB90-241274 Analysis of SAS Data Dominated by Multiple Scattering. PB90-241274	001,612 001,612	Not available NTIS	
PB90-241282 Hydrogen Transfer from 9,10-Dihydrophenanthrene to Anthracene. PB90-241282	000,449 000,449	Not available NTIS	
PB90-241290 Pulsed Ultrasonic Velocity Method for Determining Material Dynamic Elastic Moduli. PB90-241290	001,235 001,235	Not available NTIS	
PB90-241308 Magnetic-Field-Modulated Microwave-Absorption Detection in a Bi-Sr-Ca-Cu-O Superconductor. PB90-241308	001,613 001,613	Not available NTIS	
PB90-241316 Reactions of Iron Porphyrins with CF ₃ , CF ₃ O ₂ , and CBr ₃ O ₂ Radicals. PB90-241316	000,290 000,290	Not available NTIS	
PB90-241324 Automated Extraction of Regular Spot Arrays from Electron Diffraction Images. PB90-241324	001,614 001,614	Not available NTIS	
PB90-241332 Behavior of Liposomes in Flow Injection Systems. PB90-241332	000,247 000,247	Not available NTIS	
PB90-241340 Effects of Particle Size Distribution on the Kinetics of Hydration of Tricalcium Silicate. PB90-241340	000,450 000,450	Not available NTIS	
PB90-241357 Similarity and Bifurcation in Unstable Viscoplastic Shear. PB90-241357	001,615 001,615	Not available NTIS	
PB90-241365 Quantised Dissipative States at Breakdown of the Quantum Hall Effect. PB90-241365	001,616 001,616	Not available NTIS	
PB90-241373 Density Dependence of the 5 micrometers Infrared Spectrum of NH ₃ .			
PB90-241373 Evaluation of the Role of Luminance Distributions in Occupant Response to Lighting. PB90-241381	000,451 000,100	Not available NTIS	
PB90-241399 Test Structure Data Classification Using a Directed Graph Approach. PB90-241399	000,874 000,874	Not available NTIS	
PB90-241407 Modification of Hydrogen-Passivated Silicon by a Scanning Tunneling Microscope Operating in Air. PB90-241407	001,617 001,617	Not available NTIS	
PB90-241415 Separation and Characterization of Fibronectin Domains by Two-Dimensional Electrophoresis. PB90-241415	001,312 001,312	Not available NTIS	
PB90-241423 Concept of Secondary Laboratories. PB90-241423	001,361 001,361	Not available NTIS	
PB90-241431 Interagency Committee on Occupational Radiation Protection Measurements. PB90-241431	001,362 001,362	Not available NTIS	
PB90-241449 Secondary Standards Laboratories: An Overview. PB90-241449	001,363 001,363	Not available NTIS	
PB90-241456 Critical Currents of High (T sub c) Superconductors: Pinning, Weak Links, Conduction, Anisotropy, and Contact Resistivities. PB90-241456	001,618 001,618	Not available NTIS	
PB90-241464 Multidimensional Internal Setting Expansion of a Phosphate-Bonded Casting Investment Measured with Strain Gauges. PB90-241464	000,067 000,067	Not available NTIS	
PB90-241472 Standard Reference Materials for Eddy Current Nondestructive Evaluation: Research Material 8458. PB90-241472	001,077 001,077	Not available NTIS	
PB90-241480 Cigarette Ignition of Soft Furnishings. PB90-241480	000,109 000,109	Not available NTIS	
PB90-241498 Orbital Variability in the Wind of the Massive X-ray Binary HD 153919/4U 1700-37. PB90-241498	000,041 000,041	Not available NTIS	
PB90-241506 Phase Behavior of Polymer Blends. PB90-241506	000,543 000,543	Not available NTIS	
PB90-241514 U.S. Government Procurement of Open Systems Products and Services. PB90-241514	000,723 000,723	Not available NTIS	
PB90-241522 Improved Kennedy-Thorndike Experiment to Test Special Relativity. PB90-241522	001,747 001,747	Not available NTIS	
PB90-241530 Surface Forces and Their Action in Ceramic Materials. PB90-241530	000,452 000,452	Not available NTIS	
PB90-241548 Measuring Surface Forces to Explore Surface Chemistry: Mica, Sapphire and Silica. PB90-241548	000,453 000,453	Not available NTIS	
PB90-241555 Liquid Chromatography Element-Specific Detection Systems for Analysis of Molecular Species. PB90-241555	000,248 000,248	Not available NTIS	
PB90-241563 Theoretical Comparison between Intentional Elemental and Isotopic Atmospheric Tracers. PB90-241563	000,974 000,974	Not available NTIS	
PB90-241571 Small-Angle Neutron Scattering from Bacterial Magnetite. PB90-241571	001,345 001,345	Not available NTIS	
PB90-241589 Review of Economic Methods and Risk Analysis Techniques for Evaluating Building Investments (Part 1). PB90-241589	000,124 000,124	Not available NTIS	
PB90-241597 Coupling, Propagation, and Side Effects of Surges in an Industrial Building. PB90-241597	000,946 000,946	Not available NTIS	
PB90-241605 ELENDIF: A Time-Dependent Boltzmann Solver for Partially Ionized Plasmas. PB90-241605	001,508 001,508	Not available NTIS	
PB90-241613 Dynamical Aspects of Anisotropic Correlations in Supercooled Liquids. PB90-241613	000,454 000,454	Not available NTIS	
PB90-241621 Computer-Generated Graphical Analysis of Citation Searches.			
PB90-241621 Information Center Assists Users in Identifying Standards and Provides Technical Assistance. PB90-241647	001,033 001,038	Not available NTIS	
PB90-241639 Spin-Orbit State Specific Laser Probing of the desorption Kinetics and Island Behavior of In on Si(100). PB90-241639	000,455 000,455	Not available NTIS	
PB90-241647 More Effective Federal Computer Systems: The Role of NIST (National Institute of Standards and Technology) and Standards. PB90-241654	000,750 000,750	Not available NTIS	
PB90-241662 Wavelengths and Intensities of a Platinum/Neon Hollow Cathode Lamp in the Region 1100-4000 Å. PB90-241662	001,484 001,484	Not available NTIS	
PB90-241670 Individual Cross Sections for (1)D ₂ Sublevels ((M sub L)= 0, + or - 1, + or - 2) in the Alignment-Dependent Process: Ca(4p(2) (1)D ₂ + Fg -> Ca (3d4p (1)F ₃ + Fg as a Function of Rare Gas. PB90-241670	000,456 000,456	Not available NTIS	
PB90-241688 Evaluation of Shape Selectivity in Liquid Chromatography. PB90-241688	000,457 000,457	Not available NTIS	
PB90-241696 Rotational State Distributions Following the Photodissociation of Cl-CN: Comparison of Classical and Quantum Mechanical Calculations. PB90-241696	000,458 000,458	Not available NTIS	
PB90-242173 Concentration Measurements of OH- and Equilibrium Analysis in a Laminar Methane-Air Diffusion Flame. PB90-242173	000,590 000,590	Not available NTIS	
PB90-242181 Cyclopolymerizable Monomers for Use in Dental Resin Composites. PB90-242181	000,068 000,068	Not available NTIS	
PB90-242199 Durability of Cement Pastes, Mortars, and Concretes. PB90-242199	000,143 000,143	Not available NTIS	
PB90-242207 National Institute of Standards and Technology Molecular Measuring Machine Project: Metrology and Precision Engineering Design. PB90-242207	001,109 001,109	Not available NTIS	
PB90-242215 Instrumentation Everywhere (Editorial). PB90-242215	001,019 001,019	Not available NTIS	
PB90-242223 Fluoride Analysis in Nanoliter- and Microliter-size Fluid Samples. PB90-242223	001,340 001,340	Not available NTIS	
PB90-242231 Lower Bound of Confidence Coefficients for a Confidence Interval on Variance Components. PB90-242231	001,304 001,304	Not available NTIS	
PB90-242249 Photodissociation of Vibrationally Excited Water in the First Absorption Band. PB90-242249	000,459 000,459	Not available NTIS	
PB90-242256 High Accuracy Determination of the Fine Structure Constant via Measurement of the Proton Gyromagnetic Ratio. PB90-242256	001,748 001,748	Not available NTIS	
PB90-242264 Structural Phase Transition Study of Ba ₂ YCu ₃ O _{7-x} in Air. PB90-242264	001,159 001,159	Not available NTIS	
PB90-242272 Applications of the Double-Crystal Diffractometry to the Understanding of Ceramic Fracture. PB90-242272	001,060 001,060	Not available NTIS	
PB90-242298 NVLAP (National Voluntary Laboratory Accreditation Program) Handbook: Personnel Radiation Dosimetry. Requirements for Accreditation. PB90-242298	001,364 001,364	PC A04/MF A01	
PB90-244401 Effect of a Crystal-Melt Interface on Taylor-Vortex Flow with Buoyancy. PB90-244401	001,619 001,619	PC A03/MF A01	
PB90-244419 Approach to Telerobot Computing Architecture. PB90-244419	001,103 001,103	PC A03/MF A01	
PB90-244427 High Technology Office Evaluation Survey: A Pilot Study. PB90-244427	000,101 000,101	PC A04/MF A01	
PB90-244435 NIST (National Institute of Standards and Technology) Research Reports, May 1990. PB90-244435	001,041 001,041	PC A03/MF A01	

NTIS ORDER/REPORT NUMBER INDEX

PB90-254885

- PB90-244443**
Experimental Investigation of Glass Breakage in Compartment Fires.
PB90-244443 000,144 PC A05/MF A01
- PB90-244450**
Fire Risk Assessment Method: Case Study 4, Interior Finish in Restaurants.
PB90-244450 000,145 PC A03/MF A01
- PB90-244468**
Thermal Analysis of a Compartment Fire on Window Glass.
PB90-244468 000,146 PC A03/MF A01
- PB90-244476**
Progress Report of the Quality in Automation Project for FY89.
PB90-244476 001,078 PC A08/MF A01
- PB90-244484**
U.S. Department of Energy Risk Assessment Methodology. Volume 1. DOE Risk Assessment Guideline Instructions, Resource Table, and Completed Sample. Volume 2. DOE Risk Assessment Worksheets.
PB90-244484 000,789 PC A09/MF A02
- PB90-247420**
Report of the CIB W14 Workshop on Fire Modeling (4th); Conseil International du Batiment (CIB) Commission W14 on Fire.
PB90-247420 000,147 PC A05/MF A01
- PB90-247438**
Extending the Standard for the Exchange of Product Data to Represent Two-Dimensional Apparel Pattern Pieces.
PB90-247438 001,050 PC A03/MF A01
- PB90-247446**
Security Labels for Open Systems: An Invitational Workshop.
PB90-247446 000,790 PC A11/MF A02
- PB90-250044**
NIST Working Form for STEP: National PDES Testbed.
PB90-250044 001,051 PC A03/MF A01
- PB90-250051**
Software Development Tools.
PB90-250051 001,835 PC A03/MF A01
- PB90-250069**
QDES Administrative Guide: National PDES Testbed.
PB90-250069 001,055 PC A03/MF A01
- PB90-250077**
NIST STEP Working Form Programmer's Reference. National PDES Testbed.
PB90-250077 001,056 PC A03/MF A01
- PB90-250085**
QDES User's Guide. National PDES Testbed Report Series.
PB90-250085 000,751 PC A03/MF A01
- PB90-250093**
NIST PDES Toolkit: Technical Fundamentals. National PDES Testbed Report Series.
PB90-250093 001,052 PC A03/MF A01
- PB90-250101**
Need for Research in Electronics Assembly Technology.
PB90-250101 000,911 PC A03/MF A01
- PB90-250119**
Naming Forum: Proceedings of the IRDS Workshop on Data Entity Naming Conventions.
PB90-250119 000,752 PC A07/MF A01
- PB90-250184**
Consolidation Compartment Fire Model (CCFM) Computer Code Application CCFM, Vents. Parts I, II, III, and IV.
PB90-250184 000,193 PC E99/MF E99
- PB90-250192**
Consolidated Compartment Fire Model (CCFM) Computer Code Application CCFM, Vents - Part 1: Physical Basis.
PB90-250192 000,194 PC A05/MF A01
- PB90-250200**
Consolidated Compartment Fire Model (CCFM) Computer Code Application CCFM, Vents - Part 2: Software Reference Guide.
PB90-250200 000,195 PC A05/MF A01
- PB90-250218**
Consolidated Compartment Fire Model (CCFM) Computer Code Application CCFM, Vents - Part 3: Catalog of Algorithms and Subroutines.
PB90-250218 000,196 PC A06/MF A01
- PB90-250226**
Consolidated Compartment Fire Model (CCFM) Computer Code Application CCFM, Vents - Part 4: User Reference Guide.
PB90-250226 000,197 PC A04/MF A01
- PB90-254350**
Motion, Depth, and Image Flow.
PB90-254350 001,350 Not available NTIS
- PB90-254368**
NBS Standard Reference Materials for Validating Determinations of Micronutrients and Toxic Substances in Foods.
PB90-254368 000,021 Not available NTIS
- PB90-254376**
Mathematical Modeling of the Deposition of Alloys Onto Moving Filers.
PB90-254376 001,180 Not available NTIS
- PB90-254384**
Microplasmas.
PB90-254384 001,749 Not available NTIS
- PB90-254392**
Laser Produced Plasma X-ray Ultraviolet (XUV) Radiation Source.
PB90-254392 001,485 Not available NTIS
- PB90-254400**
Hydrogen-Component Fugacity Coefficients in Binary Mixtures with Isobutane: Temperature Dependence.
PB90-254400 000,460 Not available NTIS
- PB90-254418**
Hydrogen Component Fugacity in Binary Mixtures with Carbon Monoxide: Temperature Dependence.
PB90-254418 000,461 Not available NTIS
- PB90-254426**
NBS/EPA Data Base of Evaluated Electron Ionization Mass Spectra.
PB90-254426 000,249 Not available NTIS
- PB90-254434**
Seismic Performance of 1/3 Scale Post-Tensioned Precast Beam-Column Connections.
PB90-254434 000,178 Not available NTIS
- PB90-254442**
Chlorine Mass Balance in the Combustion of Refuse-Derived Fuel.
PB90-254442 000,986 Not available NTIS
- PB90-254459**
Detection: Overview of Historical, Societal, and Technical Issues.
PB90-254459 000,250 Not available NTIS
- PB90-254467**
Perspectives on Detection Limits for Nuclear Measurements in Selected National and International Programs.
PB90-254467 001,410 Not available NTIS
- PB90-254475**
Stiffness Study of a Parallel Link Robot Crane for Shipbuilding Applications.
PB90-254475 001,437 Not available NTIS
- PB90-254483**
Mathematical Decomposition and Simulation in Real-Time Production Scheduling.
PB90-254483 001,053 Not available NTIS
- PB90-254491**
Structural Characterization of Thin Metal Overlayers by X-ray Photoelectron and Auger-Electron Forward Scattering.
PB90-254491 000,462 Not available NTIS
- PB90-254509**
Predictive, Exact Shape Factor Extended Corresponding States Model for Mixtures.
PB90-254509 000,463 Not available NTIS
- PB90-254517**
Energy Transfers in the Quasielastic Scattering of 70-1250-eV Electrons by Surfaces.
PB90-254517 000,464 Not available NTIS
- PB90-254525**
Apollo Retroreflector Arrays Revisited: A Lunar Beacons Array.
PB90-254525 001,811 Not available NTIS
- PB90-254533**
Determination of Iodine in Oyster Tissue by Isotope Dilution Laser Resonance Ionization Mass Spectroscopy.
PB90-254533 001,433 Not available NTIS
- PB90-254541**
Modeling Refractive Index in Mixed Component Systems.
PB90-254541 001,486 Not available NTIS
- PB90-254558**
Fourth Generation Software Tools for Prototyping.
PB90-254558 000,724 Not available NTIS
- PB90-254566**
Field-Space Conformal Solution Method.
PB90-254566 000,465 Not available NTIS
- PB90-254574**
Localization Model of Rubber Elasticity. 2.
PB90-254574 001,206 Not available NTIS
- PB90-254582**
Planar Silicon Photosensors: An Overview.
PB90-254582 000,840 Not available NTIS
- PB90-254590**
Mean Lifetime Calculations of Quantum Well Structures: A Rigorous Analysis.
PB90-254590 000,841 Not available NTIS
- PB90-254608**
Proposed Study on the Effect of Sampling Bonding Techniques on the Measured Critical Current of Nb3Sn Superconductors.
PB90-254608 001,620 Not available NTIS
- PB90-254616**
Structure and Radiation Properties of Large Two Phase Flames.
PB90-254616 000,591 Not available NTIS
- PB90-254624**
Bent Planar Waveguides and Whispering Gallery Modes: A New Method of Analysis.
PB90-254624 001,487 Not available NTIS
- PB90-254632**
International Harmonization of Standards.
PB90-254632 000,118 Not available NTIS
- PB90-254640**
Microstructure and Isotopic Labeling Effects on the Miscibility of Polybutadiene Blends Studied by the Small-Angle Neutron Scattering Technique, 1990.
PB90-254640 001,207 Not available NTIS
- PB90-254657**
Non-Newtonian Molecular Dynamics and Thermophysical Properties.
PB90-254657 001,461 Not available NTIS
- PB90-254665**
Merging 3-D Symbolic Descriptions Obtained from Multiple Views of a Scene.
PB90-254665 000,775 Not available NTIS
- PB90-254673**
Electric and Magnetic Dipole Radiation in a Random Medium.
PB90-254673 000,912 Not available NTIS
- PB90-254681**
Magnetic Dipole Excitation of an Insulated Conductor of Finite Length.
PB90-254681 000,913 Not available NTIS
- PB90-254699**
Propagation along a Two-Wire Line Located at the Air-Earth Interface.
PB90-254699 000,914 Not available NTIS
- PB90-254707**
Properties of a Soft-Sphere Liquid from Non-Newtonian Molecular Dynamics.
PB90-254707 001,750 Not available NTIS
- PB90-254715**
Quantum Zero Effect.
PB90-254715 001,751 Not available NTIS
- PB90-254723**
Thermodynamic Property Formulation for Air. 2. Pressure and Density Estimation Functions for the Dew and Bubble Lines.
PB90-254723 000,055 Not available NTIS
- PB90-254731**
Critical Behavior of a Conducting Ionic Solution Near Its Consolute Point.
PB90-254731 000,466 Not available NTIS
- PB90-254749**
Stimulated Raman Scattering and Coherent Anti-Stokes Raman Spectroscopy in High-Pressure Oxygen.
PB90-254749 001,488 Not available NTIS
- PB90-254756**
History of the Section on Statistics and the Environment.
PB90-254756 000,989 Not available NTIS
- PB90-254764**
Onset of Nucleate and Film Boiling Resulting from Transient Heat Transfer to Liquid Hydrogen.
PB90-254764 000,467 Not available NTIS
- PB90-254772**
Magnetic Order and Spin Fluctuations in Oxide Superconductors.
PB90-254772 001,621 Not available NTIS
- PB90-254780**
Two-Dimensional Magnetic Order of Er in ErBa2Cu3O7.
PB90-254780 001,622 Not available NTIS
- PB90-254798**
Theoretical Studies of cis-Pt(II)-Diammine Binding to Duplex DNA.
PB90-254798 001,348 Not available NTIS
- PB90-254806**
Reference Dosimetry and Measurement Quality Assurance.
PB90-254806 001,365 Not available NTIS
- PB90-254814**
Ergodic Convergence in Liquids and Glasses.
PB90-254814 001,752 Not available NTIS
- PB90-254822**
Shear Stabilization of Critical Fluctuations in Bulk Polymer Blends Studied by Small Angle Neutron Scattering.
PB90-254822 000,544 Not available NTIS
- PB90-254830**
Rotational Spectrum of the CH Radical in Its a(4)Sigma- State, Studied by Far-Infrared Laser Magnetic Resonance.
PB90-254830 000,468 Not available NTIS
- PB90-254848**
Vapor + Liquid Equilibria and Coexisting Densities of (Carbon Dioxide + n-butane) at 311 to 395 K.
PB90-254848 000,469 Not available NTIS
- PB90-254855**
Fundamentals of Enclosure Fire 'Zone' Models, 1989.
PB90-254855 000,148 Not available NTIS
- PB90-254863**
Towards an Understanding of Camera Fixation, 1990.
PB90-254863 001,441 Not available NTIS
- PB90-254871**
Comparisons of NBS/Harvard VI Simulations and Data from all Runs of a Full-Scale Multi-Room Fire Test Program.
PB90-254871 000,149 Not available NTIS
- PB90-254889**
Fe Mossbauer Effect in Y(sub x)Pr(sub 1-x)Ba2(Cu0.98Fe0.02)3O7.
PB90-254889 001,623 Not available NTIS

NTIS ORDER/REPORT NUMBER INDEX

- PB90-254897**
Integrated-Optic Laser Fabricated by Field-Assisted Ion Exchange in Neodymium-Doped Soda-Lime-Silicate Glass.
PB90-254897 001,489 Not available NTIS
- PB90-254905**
Assessment of Loosely-Bound and Firmly-Bound Fluoride Uptake by Tooth Enamel from Topically Applied Fluoride Treatments.
PB90-254905 001,349 Not available NTIS
- PB90-254913**
Magnetic Properties of Pr in Non-Superconducting PrBa₂Cu₃O₇.
PB90-254913 001,624 Not available NTIS
- PB90-254921**
Magnetic Phase Transitions in Nd₂CuO₄.
PB90-254921 001,625 Not available NTIS
- PB90-254939**
Radical Concentration Measurements in Hydrocarbon Diffusion Flames.
PB90-254939 000,470 Not available NTIS
- PB90-254947**
Superconducting Tunnel Junction Receiver for 345 GHz.
PB90-254947 000,824 Not available NTIS
- PB90-254954**
Micro-Analysis of Plaque Fluid from Single-Site Fasted Plaque.
PB90-254954 001,341 Not available NTIS
- PB90-254962**
Pinhole Camera Imaging Without Lenses or Mirrors.
PB90-254962 001,442 Not available NTIS
- PB90-254970**
Two- and Three-Dimensional Magnetic Order of the Rare-Earth Ions in RbBa₂Cu₄O₈.
PB90-254970 001,626 Not available NTIS
- PB90-255266**
Journal of Research of the National Institute of Standards and Technology, March-April 1990, Volume 95, Number 2. Special Issue: Radon Measurement Standards and Calibration.
PB90-255266 001,411 PC A06
- PB90-255274**
Calibration of Radon-222 Reference Instrument in Sweden.
PB90-255274 001,412 (Order as PB90-255266, PC A06)
- PB90-255282**
Bureau of Mines Method of Calibrating a Primary Radon Measuring Apparatus.
PB90-255282 001,413 (Order as PB90-255266, PC A06)
- PB90-255290**
Calibration and Quality Assurance Program for Environmental Radon Measurements.
PB90-255290 001,414 (Order as PB90-255266, PC A06)
- PB90-255308**
U.K. National Radiological Protection Board Radon Calibration Procedures.
PB90-255308 001,415 (Order as PB90-255266, PC A06)
- PB90-255316**
ENEA Reference Atmosphere Facility for Testing Radon and Daughters Measuring Equipment.
PB90-255316 001,416 (Order as PB90-255266, PC A06)
- PB90-255324**
Calibration of Scintillation Cells for Radon-222 Measurements at the U.S. Environmental Protection Agency.
PB90-255324 001,417 (Order as PB90-255266, PC A06)
- PB90-255332**
ICARE Radon Calibration Device.
PB90-255332 001,418 (Order as PB90-255266, PC A06)
- PB90-255340**
NIST Primary Radon-222 Measurement System.
PB90-255340 001,419 (Order as PB90-255266, PC A06)
- PB90-255357**
Closed-Can Exhalation Method for Measuring Radon.
PB90-255357 001,420 (Order as PB90-255266, PC A06)
- PB90-255365**
Standardization of Rn-222 at the Australian Radiation Laboratory.
PB90-255365 001,421 (Order as PB90-255266, PC A06)
- PB90-255373**
Standardization of Radon Measurements: 2. Accuracy and Proficiency Testing.
PB90-255373 001,422 (Order as PB90-255266, PC A06)
- PB90-255381**
Center for Electronics and Electrical Engineering Technical Progress Bulletin Covering Center Programs, October to December 1989, with 1990 CEET Events Calendar.
PB90-255381 000,915 PC A03/MF A01
- PB90-256751**
Report to Congress on the Structural Assessment of the New U.S. Embassy Office Building in Moscow.
PB90-256751 000,179 PC A03/MF A01
- PB90-256769**
Structural Assessment of the New U.S. Embassy Office Building in Moscow.
PB90-256769 000,180 PC A15/MF A02
- PB90-256793**
Journal of Research of the National Institute of Standards and Technology, May-June 1990, Volume 95, Number 3.
PB90-256793 001,753 PC A08
- PB90-256801**
Operation of NIST Josephson Array Voltage Standards.
PB90-256801 000,916 (Order as PB90-256793, PC A08)
- PB90-256819**
Calibration of dc Voltage Standards at NIST.
PB90-256819 000,917 (Order as PB90-256793, PC A08)
- PB90-256827**
NBS/NIST Gas Thermometry from 0 to 660C.
PB90-256827 001,754 (Order as PB90-256793, PC A08)
- PB90-256835**
Phase Equilibria and Crystal Chemistry in Portions of the System SrO-CaO-Bi₂O₃-CuO, Part 2 - The System SrO-Bi₂O₃-CuO.
PB90-256835 001,627 (Order as PB90-256793, PC A08)
- PB90-256843**
Scattered Light and Other Corrections in Absorption Coefficient Measurements in the Vacuum Ultraviolet: A Systems Approach.
PB90-256843 001,490 (Order as PB90-256793, PC A08)
- PB90-256850**
Furniture Flammability: An Investigation of the California Technical Bulletin 133 Test. Part 1. Measuring the Hazards of Furniture Fires.
PB90-256850 000,110 PC A03/MF A01
- PB90-256868**
NIST SOL Database Loader: STEP Working Form to SOL. National PDES Testbed Report Series.
PB90-256868 000,753 PC A03/MF A01
- PB90-257585**
Framework for Developing a CALS Data Dictionary.
PB90-257585 000,754 PC A03/MF A01
- PB90-257593**
Mathematical Treatment of the Spherical Stereology.
PB90-257593 001,291 PC A03/MF A01
- PB90-257601**
Exposure: An Expert System Fire Code.
PB90-257601 001,836 PC A03/MF A01
- PB90-257619**
Scanning System for Measuring Uniformity of Laser Detector Response and Laser Beam Dimensions.
PB90-257619 001,491 PC A06/MF A01
- PB90-257627**
Stable Implementation Agreements for Open Systems Interconnection Protocols: Version 3, Edition 1, December 1989 Change Page Index.
PB90-257627 000,755 PC A08/MF A01
- PB90-257635**
Technology-Based Economic Development: A Study of State and Federal Technical Extension Services.
PB90-257635 000,013 PC A08/MF A01
- PB90-257643**
Standard Reference Materials: Description and Use of a Precision Thermometer for the Clinical Laboratory, SRM 934.
PB90-257643 000,069 PC A03/MF A01
- PB90-257650**
State Weights and Measures Laboratories: State Standards Program Description and Directory.
PB90-257650 001,079 PC A04/MF A01
- PB90-257668**
Survey of Selected Topics Relevant to Bioprocess Engineering.
PB90-257668 000,954 PC A05/MF A01
- PB90-257676**
Strength and Creep-Rupture Properties of Adhesive-Bonded EPDM Joints Stressed in Peel.
PB90-257676 001,827 PC A04/MF A01
- PB90-257684**
Time Domain Frequency Stability Calculated from the Frequency Domain Description: Use of the SIGINT Software Package to Calculate Time Domain Frequency Stability from the Frequency Domain.
PB90-257684 000,631 PC A03/MF A01
- PB90-257692**
Furniture Flammability: An Investigation of the California Bulletin 133 Test. Part 2. Characterization of the Ignition Source and a Comparable Gas Burner.
PB90-257692 000,111 PC A03/MF A01
- PB90-257700**
Furniture Flammability: An Investigation of the California Technical Bulletin 133 Test. Part 3. Full Scale Chair Burns.
PB90-257700 000,112 PC A03/MF A01
- PB90-257718**

Laboratory Studies of Some European Artifacts Excavated on San Salvador Island. PB91-101071 000,057 Not available NTIS

PB91-101089
 Numerical and Analytical Study of Nonlinear Bifurcations Associated with the Morphological Stability of Two-Dimensional Single Crystals.
 PB91-101089 001,636 Not available NTIS

PB91-101097
 Investigating the Use of Multimeters to Measure Quantized Hall Resistance Standards.
 PB91-101097 000,923 Not available NTIS

PB91-101105
 Quasi-Periodic Crystals: A Revolution in Crystallography.
 PB91-101105 001,637 Not available NTIS

PB91-101113
 Flaw Detection in Concrete by Frequency Spectrum Analysis of Impact-Echo Waveforms.
 PB91-101113 000,566 Not available NTIS

PB91-101121
 Quick and Easy Multiple Use Calibration Curve Procedure.
 PB91-101121 001,020 Not available NTIS

PB91-101139
 Direct Time-Resolved Observations of Vibrational Energy Flow in Weakly Bound Complexes.
 PB91-101139 000,486 Not available NTIS

PB91-101147
 Role of Grain Size in the Strength and R-Curve Properties of Alumina.
 PB91-101147 001,163 Not available NTIS

PB91-101154
 Rayleigh Wave Propagation in Deformed Orthotropic Materials, 1987.
 PB91-101154 001,665 Not available NTIS

PB91-101162
 Assessing Radiation Dose to Food.
 PB91-101162 001,366 Not available NTIS

PB91-101170
 Wide Plate Crack Arrest Testing: Evolution of Experimental Procedures.
 PB91-101170 001,666 Not available NTIS

PB91-101188
 Computing Factors for Exact Two-Sided Tolerance Limits for a Normal Distribution.
 PB91-101188 000,729 Not available NTIS

PB91-101196
 Digital Source for a New Impedance Bridge.
 PB91-101196 000,828 Not available NTIS

PB91-101204
 International Comparison of Low Audio Frequency Power Meter Calibrations Conducted in 1989.
 PB91-101204 000,924 Not available NTIS

PB91-101212
 Finite Element Code Downsized for Personal Computers.
 PB91-101212 001,667 Not available NTIS

PB91-101220
 Building a PC-Based Knowledge Base for Improving NDE (Nondestructive Evaluation) Reliability.
 PB91-101220 001,080 Not available NTIS

PB91-101238
 Shape of the Silicon Absorption Coefficient Spectrum Near 1.63 eV.
 PB91-101238 001,500 Not available NTIS

PB91-101246
 Quantum Fluctuations and the Single-Junction Coulomb Blockade.
 PB91-101246 001,769 Not available NTIS

PB91-101253
 Above-Threshold Dissociation of (H sub 2, sup +) in Intense Laser Fields.
 PB91-101253 001,770 Not available NTIS

PB91-101261
 Development and Enforcement of U.S. Building Regulations.
 PB91-101261 000,121 Not available NTIS

PB91-101279
 Spatial Light Modulator for Texture Classification.
 PB91-101279 000,777 Not available NTIS

PB91-101287
 Differential, Partial Cross Sections for Electron Excitation of the Sodium 3P State.
 PB91-101287 001,771 Not available NTIS

PB91-101295
 RF-DC Differences of Thermal Voltage Converters Arising from Input Connectors.
 PB91-101295 000,925 Not available NTIS

PB91-101303
 Effect of Hypertine Structure on the 2 (3)P1 and the 2 (3)P0 Lifetime in Heliumlike Ions.
 PB91-101303 001,772 Not available NTIS

PB91-101311
 Minimum Cost Inspection Intervals for a Two-State Process.
 PB91-101311 001,081 Not available NTIS

PB91-101329
 Observation of Gold Thin Film Growth with Reflection Electron Microscopy.
 PB91-101329 001,021 Not available NTIS

PB91-101337
 Thermodynamic Property Formulation for Air. 1. Single-Phase Equation of State from 60 to 873 K at Pressures to 70 MPa.
 PB91-101337 000,487 Not available NTIS

PB91-101345
 Use of Rootfinding ODE (Ordinary Differential Equations) Software for the Solution of a Common Problem in Nonlinear Dynamical Systems.
 PB91-101345 000,730 Not available NTIS

PB91-101352
 New Method of Extracting the Channel Length from the Gate Current of p-Channel MOSFETS.
 PB91-101352 000,879 Not available NTIS

PB91-101360
 Hybrid Construction of Multijunction Thermal Converters.
 PB91-101360 000,926 Not available NTIS

PB91-101378
 AC-DC Difference Relationships for Current Shunt and Thermal Converter Combinations.
 PB91-101378 000,927 Not available NTIS

PB91-101386
 Electronic Structure of High-(T sub c) Superconductors Studied Using Photoelectron Spectroscopy.
 PB91-101386 001,638 Not available NTIS

PB91-101394
 Hypertermal (0.1-4 eV) F Atom Beam Source Suitable for Surface Etching Investigations.
 PB91-101394 001,639 Not available NTIS

PB91-101402
 Redistributed Spectrum of Scattered Light.
 PB91-101402 001,501 Not available NTIS

PB91-101410
 Comments on Entropy-Driven Ion-Molecule Reactions by M. Mautner.
 PB91-101410 000,488 Not available NTIS

PB91-101428
 Architecture to Support Teleoperation and Autonomy.
 PB91-101428 001,820 Not available NTIS

PB91-101436
 Hydrodynamic and Free Boundary Instabilities during Crystal Growth: The Effect of a Plane Stagnation Flow.
 PB91-101436 001,640 Not available NTIS

PB91-101444
 Effect of Surface Tension Anisotropy on Cellular Morphologies.
 PB91-101444 001,262 Not available NTIS

PB91-101451
 Acceptance Diagrams for Curved Neutron Guides.
 PB91-101451 001,773 Not available NTIS

PB91-101469
 Comments on 'Design Optimization of a Small-Angle Neutron Scattering Spectrometer.'
 PB91-101469 001,774 Not available NTIS

PB91-101477
 Multiple Reflections within Neutron Optical Devices.
 PB91-101477 001,775 Not available NTIS

PB91-101485
 Multiprocessor Performance-Measurement Instrumentation.
 PB91-101485 000,653 Not available NTIS

PB91-101493
 New Low-Voltage Standards in the DC to 1 MHz Frequency Range.
 PB91-101493 000,928 Not available NTIS

PB91-101501
 Monitoring the Mass Standard: A Comparison of Mechanical to Electrical Power.
 PB91-101501 000,929 Not available NTIS

PB91-101519
 Protecting Fire Fighters Exposed in Room Fires. Part 2. Performance of Turnout Coat Materials under Actual Fire Conditions.
 PB91-101519 001,838 Not available NTIS

PB91-101527
 Qualifying Watthour Meters for Use as MAP Transport Standards.
 PB91-101527 000,930 Not available NTIS

PB91-101535
 Watt Transfer Standard.
 PB91-101535 000,931 Not available NTIS

PB91-101543
 X-ray Analysis of a Liquid Crystal Phase Diacetylene Polymerization.
 PB91-101543 000,552 Not available NTIS

PB91-101550
 Crack Inspection of Railroad Wheel Treads by EMATs.
 PB91-101550 001,831 Not available NTIS

PB91-101568
 Materials Research Laboratories: Reviewing the First Twenty-Five Years.
 PB91-101568 001,236 Not available NTIS

PB91-101576
 Phase Improvement in the Structure Interpretation of Fragmented TR2C from Bull Testis Calmodulin Using Combined Entropy Maximization and Solvent Flattening.
 PB91-101576 001,641 Not available NTIS

PB91-101584
 Near-Threshold Vibrational Excitation of HF by Electron Impact.
 PB91-101584 000,489 Not available NTIS

PB91-101592
 Improvements for Automating Voltage Calibrations Using a 10-V Josephson Array.
 PB91-101592 000,932 Not available NTIS

PB91-101600
 Pulsed-Nozzle Fourier-Transform Microwave Spectroscopy of Laser-Vaporized Metal Oxides: Rotational Spectra and Electric Dipole Moments of YO, LaO, ZrO, and HfO.
 PB91-101600 000,490 Not available NTIS

PB91-101618
 Polarization X-ray Absorption Near-Edge Structure Study of Pr2-xCexCuO4 Single Crystals: The Nature of Ce Doping.
 PB91-101618 001,642 Not available NTIS

PB91-101626
 Exact Distribution-Free Tests for Equality of Several Linear Models.
 PB91-101626 001,306 Not available NTIS

PB91-101634
 Performance Evaluation of a New Audio-Frequency Power Bridge.
 PB91-101634 000,829 Not available NTIS

PB91-101642
 Vapor-Liquid Equilibrium in Binary Systems of Chlorotrifluoromethane with n-Butane and Isobutane.
 PB91-101642 000,491 Not available NTIS

PB91-101659
 Chemisorption of Chlorosilanes and Chlorine on Si(111) 7x7.
 PB91-101659 000,492 Not available NTIS

PB91-101667
 Comparison of Theoretical and Experimental Data for the Near Field of an Open-Ended Rectangular Waveguide.
 PB91-101667 000,933 Not available NTIS

PB91-101675
 Liposome-Based Flow Injection Enzyme Immunoassay for Theophylline.
 PB91-101675 001,313 Not available NTIS

PB91-101683
 X-ray Diffraction Studies of Ni-Cr-Based Amorphous Alloys.
 PB91-101683 001,263 Not available NTIS

PB91-107078
 Opportunities for Innovation: Polymer Composites.
 PB91-107078 001,187 Not available NTIS

PB91-107086
 Materials Studies for Magnetic Fusion Energy Applications at Low Temperatures-XIII.
 PB91-107086 001,396 PC A17/MF A02

PB91-107094
 Wind and Seismic Effects. Proceedings of the Joint Meeting of the U.S.-Japan Cooperative Program in Natural Resources Panel on Wind and Seismic Effects (22nd). Held in Gaithersburg, MD, on May 15-18, 1989.
 PB91-107094 000,181 PC A22/MF A03

PB91-107102
 Uniform Laws and Regulations as Adopted by the National Conference on Weights and Measures (75th), 1990 (1991 Edition).
 PB91-107102 001,082 PC A09/MF A01

PB91-107110
 Preliminary Screening Procedures and Criteria for Replacements for Halons 1211 and 1301.
 PB91-107110 000,595 PC A14/MF A02

PB91-107128
 Spectroscopic Library for Alternative Refrigerant Analysis.
 PB91-107128 000,252 PC A09/MF A01

PB91-107136
 Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices as Adopted by the 75th National Conference on Weights and Measures 1990 (1991 Edition).
 PB91-107136 001,083 PC A10/MF A02

PB91-107144
 Checking the Net Contents of Packaged Goods. Third Edition, Supplement.
 PB91-107144 000,200 PC A04/MF A01

PB91-107151
 Model for Predicting the Generation Rate and Distribution of Products of Combustion in Two-Layer Fire Environments.
 PB91-107151 000,154 PC A04/MF A01

PB91-107169
 Fire Risk Assessment Method: Guide to the Risk Methodology Software.
 PB91-107169 000,155 PC A04/MF A01

PB91-107177
 National PDES Testbed Strategic Plan 1990. National PDES Testbed Report Series.
 PB91-107177 000,762 PC A05/MF A01

PB91-107185
 SPARCOL: A Front End for the MAIN2 Program.
 PB91-107185 001,643 PC A03/MF A01

PB91-107193
 Semiconductor Technology for the Non-Technologist, Second Edition.
 PB91-107193 000,880 PC A03/MF A01

NTIS ORDER/REPORT NUMBER INDEX

- PB91-107201**
Center for Electronics and Electrical Engineering Technical Publication Announcements Covering Center Programs, January-March 1990, with 1990 CEEE Events Calendar.
PB91-107201 000,881 PC A03/MF A01
- PB91-107219**
Models of Transport Processes in Concrete.
PB91-107219 001,428 PC A06/MF A01
- PB91-107227**
Development Plan: Product Data Exchange Network. National PDES Testbed Report Series.
PB91-107227 000,763 PC A03/MF A01
- PB91-107235**
NIST Step Class Library (Step into the Future).
PB91-107235 000,764 PC A03/MF A01
- PB91-107243**
Development Plan: Step Production Cell. National PDES Testbed Report Series.
PB91-107243 000,765 PC A03/MF A01
- PB91-107250**
AMPLE Core Interpreter: User's Guide (Version 1.0).
PB91-107250 001,057 PC A04/MF A01
- PB91-107268**
Measurement of Electric Field Strength Near Higher Powered Personal Transceivers.
PB91-107268 000,639 PC A04/MF A01
- PB91-107276**
Dynamic Characteristics of Hypertext.
PB91-107276 001,034 PC A03/MF A01
- PB91-107284**
Data Bases Available in the Research Information Center of the National Institute of Standards and Technology.
PB91-107284 001,035 PC A06/MF A01
- PB91-107292**
Effect of Oxygen Transport and Resistivity of the Environment on the Corrosion of Steel.
PB91-107292 001,200 PC A03/MF A01
- PB91-107359**
New Approach to Fire Toxicity Data for Hazard Evaluation.
PB91-107359 000,596 Not available NTIS
- PB91-107367**
Turn-Off Failure of Power MOSFET's.
PB91-107367 000,882 Not available NTIS
- PB91-107375**
Performing EM Susceptibility/Vulnerability Measurements Using a Reverberation Chamber.
PB91-107375 000,934 Not available NTIS
- PB91-107383**
Monitoring the Fate of Chlorine from MSW Sampling through Combustion. Part 2. Combustion Studies.
PB91-107383 000,597 Not available NTIS
- PB91-107391**
Standard Linear Antennas, 30 to 1000 MHz.
PB91-107391 000,812 Not available NTIS
- PB91-107409**
Performance Trade-Off for the Insulated Gate Bipolar Transistor: Buffer Layer versus Base Lifetime Reduction.
PB91-107409 000,883 Not available NTIS
- PB91-107417**
Precision Power Amplifier for Power/Energy Calibration Applications.
PB91-107417 000,830 Not available NTIS
- PB91-107425**
Internal Strain (Stress) in an SiC-Al Particle-Reinforced Composite: An X-ray Diffraction Study.
PB91-107425 001,188 Not available NTIS
- PB91-107433**
Toxicological Interactions between Carbon Monoxide and Carbon Dioxide.
PB91-107433 001,370 Not available NTIS
- PB91-107441**
Piece-Wise Analytic Evaluation of the Radiative Tail from Elastic and Inelastic Electron Scattering.
PB91-107441 001,776 Not available NTIS
- PB91-107458**
Characterization of a Sampling Voltage Tracker for Measuring Fast, Repetitive Signals.
PB91-107458 000,935 Not available NTIS
- PB91-107466**
Characterizing Square and Triangular Waveforms.
PB91-107466 000,936 Not available NTIS
- PB91-107474**
NIST (National Institute of Standards and Technology) Digitally Synthesized Power Calibration Source.
PB91-107474 000,831 PC A04/MF A01
- PB91-107482**
Full Scale Simulation of a Fatal Fire and Comparison of Results with Two Multiroom Models.
PB91-107482 000,156 PC A06/MF A01
- PB91-107490**
Ventilation Characterization of the Consumer Product Safety Commission Combustion Test Chamber Facility.
PB91-107490 000,103 PC A03/MF A01
- PB91-107508**
Construction of an Exploratory List of Chemicals to Initiate the Search for Halon Alternatives.
PB91-107508 000,598 PC A10/MF A02
- PB91-107516**
EMR Test Facilities Evaluation of a Small Reverberating Chamber Located at RADC, Griffiss AFB, Rome, New York.
PB91-107516 000,937 PC A05/MF A01
- PB91-107524**
NVLAP Program Handbook. Acoustical Testing Services.
PB91-107524 001,024 PC A04/MF A01
- PB91-107532**
Time and Frequency Users Manual (Revised 1990).
PB91-107532 000,638 PC A08/MF A01
- PB91-107540**
Computer Security and Privacy Plans (CSPP) Review Project: A First-Year Federal Response to the Computer Security Act of 1987 (Final Report), 1989.
PB91-107540 000,796 PC A09/MF A01
- PB91-107557**
Micromagnetic Calculations of 180 deg Surface Domain Wall Magnetization Profiles with Comparison to Measurements.
PB91-107557 001,644 PC A03/MF A01
- PB91-107565**
FTAM Interoperability Tests.
PB91-107565 001,036 PC A06/MF A01
- PB91-107573**
Heat Transfer in a Compact Tubular Heat Exchanger with Helium Gas at 3.5 MPa.
PB91-107573 001,120 PC A04/MF A01
- PB91-107581**
Development Plan Validation Testing System. National PDES Testbed Report Series.
PB91-107581 000,766 PC A03/MF A01
- PB91-107599**
Directory of European Regional Standards-Related Organizations.
PB91-107599 001,026 PC A09/MF A02
- PB91-107607**
Metrology for Space Power: Metrology Development and Survey of Space-Based Measurements.
PB91-107607 001,374 PC A05/MF A01
- PB91-107615**
Development Plan Configuration Management Systems and Services.
PB91-107615 000,003 PC A03/MF A01
- PB91-107623**
Performance of 1/3-Scale Model Precast Concrete Beam-Column Connections Subjected to Cyclic Inelastic Loads.
PB91-107623 000,182 PC A06/MF A01
- PB91-107656**
Journal of Research of the National Institute of Standards and Technology. July-August 1990. Volume 95, Number 4.
PB91-107656 000,938 PC A06
- PB91-107664**
Standards for Waveform Metrology Based on Digital Techniques.
PB91-107664 000,832
(Order as PB91-107656, PC A06)
- PB91-107672**
Diffusion of Charged Particles in Collisional Plasmas: Free and Ambipolar Diffusion at Low and Moderate Pressures.
PB91-107672 001,509
(Order as PB91-107656, PC A06)
- PB91-107680**
Tables of the Inverse Laplace Transform of the Function e^{-s} (-s (sup beta)).
PB91-107680 001,293
(Order as PB91-107656, PC A06)
- PB91-110429**
Method and Apparatus for Wide Band Phase Modulation.
PATENT-4 968 908 000,813 Not available NTIS
- PB91-110635**
Transparent Thin Film Thermocouple.
PATENT-4 969 956 000,854 Not available NTIS
- PB91-111930**
Control System Architecture for Multiple Autonomous Undersea Vehicles (MAUV).
PB91-111930 001,438 Not available NTIS
- PB91-111948**
NACE-NBS Corrosion Data Program.
PB91-111948 001,201 Not available NTIS
- PB91-111955**
ADC Errors in Quantitative FT-IR Spectroscopy.
PB91-111955 001,502 Not available NTIS
- PB91-111963**
High-Precision Optical Reflectometer for the Study of Semiconductor Materials and Structures.
PB91-111963 000,884 Not available NTIS
- PB91-111971**
Methacrylate Oligomers with Pendant Isocyanate Groups as Tissue Adhesives.
PB91-111971 000,074 Not available NTIS
- PB91-111989**
Influence of Swirling Flow on Orifice and Turbine Flowmeter Performance.
PB91-111989 001,110 Not available NTIS
- PB91-111997**
Thermal Bridging in Mechanical Fastened Low-Slope Roofs.
PB91-111997 000,157 Not available NTIS
- PB91-112003**
Statistical Characteristics of New Pin Penetration Test.
PB91-112003 000,567 Not available NTIS
- PB91-112011**
Role of the Oxide Film in the Transgranular Stress Corrosion Cracking of Copper.
PB91-112011 001,202 Not available NTIS
- PB91-112029**
Vibrational Relaxation at Surfaces.
PB91-112029 000,493 Not available NTIS

Effect of Soil Resistivity and Soil Temperature on the Corrosion of Galvanically Coupled Metals in Soil.
PB91-112169 001,203 Not available NTIS
- PB91-112177**
Surface, Interface, and Thin-Film Magnetism.
PB91-112177 001,648 Not available NTIS
- PB91-112185**
Comparison of Experimental and Calculated Performance of Integral Collector-Storage Solar Water Heaters.
PB91-112185 000,964 Not available NTIS
- PB91-112193**
Inception and Structure of Prebreakdown Streamers in Perfluorinated Polyethers.
PB91-112193 001,237 Not available NTIS
- PB91-112201**
Tunable Diode Laser Absorption Spectrometry for Ultra-Trace Measurement and Calibration of Atmospheric Constituents.
PB91-112201 000,254 Not available NTIS
- PB91-112227**
Pumping and Probing: Vibrational Relaxation in Time Domain Spectroscopy.
PB91-112227 000,495 Not available NTIS
- PB91-112235**
Investigation of the Threshold Voltage of MOSFETs with Position- and Potential-Dependent Interface Trap Distributions Using a Fixed-Point Method.
PB91-112235 000,885 Not available NTIS
- PB91-112243**
Proposed Test of the Symmetrization Postulate and Exclusion Principle.
PB91-112243 001,779 Not available NTIS
- PB91-112250**
Asymptotic Approximation of Integral Manifolds.
PB91-112250 001,294 Not available NTIS
- PB91-112268**
Materials Problems Affecting Reliability and Yield of Wire Bonding in VLSI (Very Large Scale Integration) Devices.

NTIS ORDER/REPORT NUMBER INDEX

PB91-118109

PB91-112268 000,886 Not available NTIS

PB91-112276
Investigation of the Drive Circuit Requirements for the Power Insulated Gate Bipolar Transistor (IGBT).
PB91-112276 000,887 Not available NTIS

PB91-112284
Large Surface Anisotropies in Ultrathin Films of bcc and fcc Fe(001).
PB91-112284 001,649 Not available NTIS

PB91-112292
Overview of Off-Line Robot Programming Systems.
PB91-112292 001,106 Not available NTIS

PB91-112300
Reporting Combustion Product Toxicity Test Results.
PB91-112300 001,371 Not available NTIS

PB91-112318
Mechanisms of Galling and Abrasive Wear.
PB91-112318 001,229 Not available NTIS

PB91-112326
Chemistry of Dioxymethylenes and Dioxiranes.
PB91-112326 000,280 Not available NTIS

PB91-112334
Plaza Hotel Fire Experiments.
PB91-112334 000,158 Not available NTIS

PB91-112342
National Training Program of the National Conference on Weights and Measures - Looking Back, Looking Ahead.
PB91-112342 000,058 Not available NTIS

PB91-112359
Transition from Red Giant to Planetary Nebula.
PB91-112359 000,049 Not available NTIS

PB91-112367
Measuring Medical Cost and Life Expectancy Impacts of Changes in Cigarette Sales.
PB91-112367 000,992 Not available NTIS

PB91-112375
Crystal Structure, Atomic Ordering and Charge Localization in Pb₂Sr₂Y(sub 1-x)Ca_xCu₃O(sub 8+ delta) (x= 0, delta= 1.47).
PB91-112375 001,650 Not available NTIS

PB91-112383
Electrical Fast Transient Tests: Applications and Limitations.
PB91-112383 000,939 Not available NTIS

PB91-112409
Persistent Photoconductivity in SIMOX Film Structures.
PB91-112409 000,888 Not available NTIS

PB91-112417
Precision and Accuracy of Mass Flow Measurement in the NIST-Boulder Nitrogen Flow Facility.
PB91-112417 000,255 Not available NTIS

PB91-112425
Dosimetry for Low-Energy Electron Machine Performance and Process Control.
PB91-112425 001,084 Not available NTIS

PB91-112433
Program Generator for Efficient Evaluation of Fourier Series.
PB91-112433 000,731 Not available NTIS

PB91-112441
AC Electric and Magnetic Field Measurement Fundamentals.
PB91-112441 000,947 Not available NTIS

PB91-112458
Algorithm for the Mass-Loss Rate of a Burning Wall.
PB91-112458 000,159 Not available NTIS

PB91-112466
Time Domain Spectroscopy to Monitor the Condition of Cable Insulation.
PB91-112466 001,431 Not available NTIS

PB91-112474
Pd-Na/F Double Exploding Foil Photoionization Experiment.
PB91-112474 001,780 Not available NTIS

PB91-112482
Advanced Deburring and Chamfering System.
PB91-112482 001,069 Not available NTIS

PB91-112490
Shear Induced Phase Behavior of Polymer Blends by Small Angle Neutron Scattering.
PB91-112490 000,554 Not available NTIS

PB91-112516
Neutron Scattering Study of Layered Silicates Pillared with Alkylammonium Ions.
PB91-112516 000,496 Not available NTIS

PB91-112524
Application of Thermal-Wave Electron Microscopy to Imaging and Assessment of Corrosion on Rough Steel Surface.
PB91-112524 001,204 Not available NTIS

PB91-112532
Combined SANS-SAXS Study of Blends of Styrene-Butadiene Block Copolymer with Deuterated Polybutadiene.
PB91-112532 000,555 Not available NTIS

PB91-112540
Catalytic Decomposition of S2F10 and Its Implications on Sampling and Detection from SF6-Insulated Equipment.

PB91-112540 000,497 Not available NTIS

PB91-112557
Creating a Materials Data Base Builder and Producing Publications for Ceramic Phase Diagrams.
PB91-112557 001,165 Not available NTIS

PB91-112565
Experimental Program on High (T sub c) Oxide Superconductors at the Naval Research Laboratory.
PB91-112565 001,651 Not available NTIS

PB91-112573
Low-Profile Microchannel-Plate Electron Detector System for SEM.
PB91-112573 001,652 Not available NTIS

PB91-112581
Residual Stress Measurements by Means of Neutron Diffraction.
PB91-112581 001,265 Not available NTIS

PB91-112599
100 GHz SIS Quasiparticle Mixer with 10 dB Coupled Gain.
PB91-112599 000,833 Not available NTIS

PB91-112607
Low-Temperature Properties of High-Manganese Austenitic Steels.
PB91-112607 001,220 Not available NTIS

PB91-112615
Hybrid Performance Measurement Instrumentation for Loosely-Coupled MIMD Architectures.
PB91-112615 000,654 Not available NTIS

PB91-112623
National Bureau of Standards Program in Open System Interconnection.
PB91-112623 000,655 Not available NTIS

PB91-112631
Risk of Blistering of Built-Up Roofing Membranes Applied to Polyurethane Foam Insulation.
PB91-112631 000,160 Not available NTIS

PB91-112649
Anomalous Vibrations of Hydrogen Isotopes in beta-Phase Vanadium Hydride.
PB91-112649 001,653 Not available NTIS

PB91-112656
Detecting Delaminations in Concrete Slabs with and without Overlays Using the Impact-Echo Method.
PB91-112656 000,568 Not available NTIS

PB91-112664
180 deg Surface Domain Wall Magnetization Profiles: Comparisons between Scanning Electron Microscopy with Polarization Analysis Measurements, Magneto-Optic Kerr Microscopy Measurements and Micromagnetic Models.
PB91-112664 001,654 Not available NTIS

PB91-112672
Scanning Electron Microscopy with Polarization Analysis (SEMPA).
PB91-112672 001,655 Not available NTIS

PB91-112680
Average L-Shell Fluorescence Yields for Elements 56 < Z < 92.
PB91-112680 001,781 Not available NTIS

PB91-112698
Evaluation of Spiro Orthocarbonate Monomers Capable of Polymerization with Expansion as Ingredients in Dental Composite Materials.
PB91-112698 000,075 Not available NTIS

PB91-112706
Electron Inelastic Mean Free Paths in Solids at Low Energies.
PB91-112706 001,782 Not available NTIS

PB91-112714
Vibrational Spectra of Molecular Ions Isolated in Solid Neon. III. N4(+).
PB91-112714 000,498 Not available NTIS

PB91-112722
Surface Forces at Crack Interfaces in Mica in the Presence of Capillary Condensation.
PB91-112722 001,238 Not available NTIS

PB91-112730
Anomalous Behavior of Selected Methyl-Substituted Polycyclic Aromatic Hydrocarbons in Reversed-Phase Liquid Chromatography.
PB91-112730 000,256 Not available NTIS

PB91-112738
Report of the National Conference on Weights and Measures (75th).
PB91-112738 * 001,085 PC A11/MF A02

PB91-112771
Implementing Fast Part Probing and Error Compensation on Machine Tools.
PB91-112771 001,111 PC A03/MF A01

PB91-112789
Message Handling Systems Interoperability Tests.
PB91-112789 000,732 PC A05/MF A01

PB91-112797
Application of Measurement Error Propagation Theory to Two Measurement Systems Used to Calculate the Position and Heading of a Vehicle on a Flat Surface.
PB91-112797 001,392 PC A03/MF A01

PB91-112805
Closed-Form Massively-Parallel Range-from-Image-Flow Algorithm.

PB91-112805 000,778 PC A03/MF A01

PB91-112813
NIST Research Reports, October 1990.
PB91-112813 000,940 PC A03/MF A01

PB91-112821
Semiconductor Measurement Technology: A Programmable Reverse-Bias Safe Operating Area Transistor Tester.
PB91-112821 000,889 PC A04/MF A01

PB91-112839
Development of Thermal Envelope Design Guidelines for Federal Office Buildings.
PB91-112839 000,122 PC A05/MF A01

PB91-112847
User's Guide to CMMAP: Cement Microstructure Modelling and Analysis Package.
PB91-112847 000,569 PC A04/MF A01

PB91-112854
Guidelines for Realizing the International Temperature Scale of 1990 (ITS-90).
PB91-112854 001,783 PC A09/MF A02

PB91-112862
Initial Laboratory Evaluation of a Single Solution Circuit Cycle for Use with Nonazeotropic Refrigerants.
PB91-112862 000,960 PC A03/MF A01

PB91-112870
State Occupancy Information for Performance Comparisons.
PB91-112870 000,771 PC A03/MF A01

PB91-112888
Status of PDES-Related Activities (Standards and Testing). National PDES Testbed Report Series.
PB91-112888 000,767 PC A03/MF A01

PB91-113613
Energy Prices and Discount Factors for Life-Cycle Cost Analysis 1991. Annual Supplement to NIST Handbook 135 and NBS Special Publication 709.
PB91-113613 000,962 PC A04/MF A01

PB91-113654
Adsorption Modeling for Macroscopic Contaminant Dispersal Analysis.
PB91-113654 000,977 PC A03/MF A01

PB91-117960
Nomenclature for Lambda Doublet Levels in Rotating Linear Molecules.
PB91-117960 001,784 Not available NTIS

PB91-117978
Ultrafast Infrared Response of Adsorbates on Metal Surfaces: Vibrational Lifetime of CO/Pt(111).
PB91-117978 000,499 Not available NTIS

PB91-117986
Microwave and Optical Lunar Transponders.
PB91-117986 000,024 Not available NTIS

PB91-117994
Environment-Induced Cracking of Copper Alloys.
PB91-117994 001,230 Not available NTIS

PB91-118000
Transient Sources for Acoustic Emission Work.
PB91-118000 001,086 Not available NTIS

PB91-118018
Effect of Wall Mass on the Annual Heating and Cooling Loads of Single-Family Residences for Five Selected Climates.
PB91-118018 000,104 Not available NTIS

PB91-118026
Measurement of the Neutron Lifetime by Counting Trapped Protons.
PB91-118026 001,785 Not available NTIS

PB91-118034
Interfacial Free Energy and Interfacial Stress: The Case of an Internal Interface in a Solid.
PB91-118034 001,266 Not available NTIS

PB91-118042
Introduction to Quasicrystals.
PB91-118042 001,295 Not available NTIS

PB91-118059
Atom Probe Field-Ion Microscopy Applications.
PB91-118059 000,257 Not available NTIS

PB91-118067
Structure: U.S. Office Building in Moscow.
PB91-118067 000,183 Not available NTIS

PB91-118075
Investigation into the Factors Affecting Infrared Temperature Measurements for Building Applications.
PB91-118075 000,161 Not available NTIS

PB91-118083
Infrared Inspection Techniques for Assessing the Exterior Envelopes of Office Buildings.
PB91-118083 000,162 Not available NTIS

PB91-118091
Global Thermodynamic Behavior of Fluids in the Critical Region.
PB91-118091 000,500 Not available NTIS

PB91-118109
Effects of Extinction on X-ray Powder Diffraction Intensities.
PB91-118109 000,501 Not available NTIS

NTIS ORDER/REPORT NUMBER INDEX

- PB91-118117**
Certification of Bilirubin SRM 916a.
PB91-118117 000,258 Not available NTIS
- PB91-118125**
Thermal Analysis of Ba₂YCu₃O (sub 7-x) at 700-1000C in Air.

PB91-118570 000,017 Not available NTIS
- PB91-118588**
Very Low Frequency Isolation Systems for Ground-Based Gravitational Wave Detectors.
PB91-118588 001,789 Not available NTIS
- PB91-118596**
Laser Interferometer for Gravitational Wave Astronomy in Space.
PB91-118596 001,790 Not available NTIS
- PB91-118604**
X-ray Photoelectron Spectroscopy/Ar(1+) Ion Profile Study of Thin Oxide Layers on InP.
PB91-118604 001,657 Not available NTIS
- PB91-118612**
Problems and Artifacts on Extraction Replicas of Membrane Filters.
PB91-118612 000,979 Not available NTIS
- PB91-118620**
Stochastic Properties of Trichel-Pulse Corona: A Non-Markovian Random Point Process.
PB91-118620 001,791 Not available NTIS
- PB91-118638**
Small-Scale Vertical Flammability Testing for Fabrics.
PB91-118638 000,164 Not available NTIS
- PB91-118646**
Acoustic Emission: Nature's Ultrasound.
PB91-118646 001,087 Not available NTIS
- PB91-118653**
Peak Reflectivity Measurements of W/C, Mo/Si, and Mo/B₄C Multilayer Mirrors in the 8-190-Angstrom Range Using Both Kalpha Line and Synchrotron Radiation.
PB91-118653 001,792 Not available NTIS
- PB91-119610**
Thermal Technique for Determining Interface and/or Interply Strength in Composites.
PATENT-4 972 720 001,182 Not available NTIS
- PB91-119701**
NIST-PCITS: National Institute of Standards and Technology-POSIX Conformance Test Suite. NIST-PCITS:151-1 (Version 1.1). Installation Guide.
PB91-119701 000,768 PC A03/MF A03
- PB91-120105**
Measurement and Evaluation of a TEM (Transverse Electromagnetic)/Reverberating Chamber.
PB91-120105 000,942 PC A06/MF A01
- PB91-120113**
Working Implementation Agreements for Open Systems Interconnection Protocols, March 1990.
PB91-120113 000,769 PC A20/MF A03
- PB91-120121**
SRI International: Improving the Security of Your UNIX System.
PB91-120121 000,797 PC A04/MF A01
- PB91-120139**
Program for Calculating the Maximum Radiation on a Wall.
PB91-120139 000,165 PC A03/MF A01
- PB91-120147**
Calibration Procedures for Inductance Standards Using a Commercial Impedance Meter as a Comparator.
PB91-120147 000,862 PC A03/MF A01
- PB91-120154**
Estimation of the Rate of Heat Release and Induced Wind Field in a Large Scale Fire.
PB91-120154 001,393 PC A04/MF A01
- PB91-120162**
Methodology for Certifying Sensitive Computer Applications.
PB91-120162 000,001 PC A05/MF A01
- PB91-120170**
Algorithm and Associated Computer Subroutine for Calculating Flow through a Horizontal Ceiling/Floor Vent in a Zone-Type Compartment Fire Model.
PB91-120170 000,166 PC A04/MF A01
- PB91-120188**
SNMPLIB: A Simple Network Management Protocol Function Library for IBM PC Compatible Computers.
PB91-120188 000,735 PC A04/MF A01
- PB91-120196**
3D Piping IGES Application Protocol, Version 1.0.
PB91-120196 000,106 PC A12/MF A02
- PB91-133777**
Use of a Statistical Software for Monitoring Material Quality.
PB91-133777 001,280 Not available NTIS
- PB91-133785**
Magnetic-Field-Modulated Written Bits in TbFeCo Thin Films: Transmission Electron Microscopy Lorentz and Scanning Electron Microscopy with Polarization Analysis Studies.
PB91-133785 001,658 Not available NTIS
- PB91-133793**
Synchronization of Clocks.
PB91-133793 001,793 Not available NTIS
- PB91-133801**
State Equation of Liquid Helium - 4 from 0.8 to 2.5 K.
PB91-133801 001,794 Not available NTIS
- PB91-133819**
Observation of Shell Structures with Ions Stored in Traps.
PB91-133819 001,795 Not available NTIS
- PB91-133835**
Fugacity Coefficients of Hydrogen in (Hydrogen + 2-Methylpropane): Pressure Dependence.
PB91-133835 000,509 Not available NTIS
- PB91-133843**
Thermodynamic Properties of Ammonium Halogen Stannates 1. Heat Capacity and Thermodynamic Functions of Deuterated Ammonium Hexachlorostannate (ND₄)₂SnCl₆ from 5.9 to 347 K.
PB91-133843 000,510 Not available NTIS
- PB91-133850**
Thermodynamics of the Divalent Metal Fluorides. 2. Heat Capacity of the Fast Ion Conductor BaSnF₄ from 7 to 345 K.
PB91-133850 000,511 Not available NTIS
- PB91-133876**
Specifications for Cold Weather Concrete.
PB91-133876 000,167 Not available NTIS
- PB91-133884**
Measurement of Fiber Fracture and Fiber-Matrix Interface Shear Strengths in Metal Matrix Composites.

PB91-133884 001,190 Not available NTIS

PB91-133918
Evaluation of Solar Energy Inventions.
PB91-133918 000,965 Not available NTIS

PB91-133926
Fiber-Reinforced Composites: Models for Macroscopic Elastic Constants.
PB91-133926 001,191 Not available NTIS

PB91-133934
Recent Advances in Faraday Effect Sensors.
PB91-133934 000,848 Not available NTIS

PB91-133959
Magnetic Properties of Sandwiches and Superlattices of fcc Fe(001) Grown on Cu(001) Substrates.
PB91-133959 001,659 Not available NTIS

PB91-133967
Nondestructive Characterization of Oxygen-Ion-Implanted Silicon-on-Insulator Using Multiple-Angle Ellipsometry.
PB91-133967 000,890 Not available NTIS

PB91-133975
Separation of Amino Acids Using Composite Ion Exchange Membranes.
PB91-133975 001,314 Not available NTIS

PB91-133991
Heat Induced Instability in a Model Liquid.
PB91-133991 001,796 Not available NTIS

PB91-134007
Fracture of Polycrystalline Ceramics.
PB91-134007 001,166 Not available NTIS

PB91-134015
New Theoretical Aspects in DIET.
PB91-134015 000,512 Not available NTIS

PB91-134023
Transient Heat-Transfer Studies in Low-Gravity Using Optical Measurement Techniques.
PB91-134023 001,797 Not available NTIS

PB91-134031
Magnetic Susceptibility of Inconel Alloys 718, 625, and 600 at Cryogenic Temperatures.
PB91-134031 001,268 Not available NTIS

PB91-134049
Magnetic Characteristics and Measurements of Filamentary Nb-Ti Wire for the Superconducting Super Collider.
PB91-134049 001,798 Not available NTIS

PB91-134064
Thermal Contraction of Fiberglass-Epoxy Sample Holders Used for Nb3Sn Critical-Current Measurements.
PB91-134064 001,660 Not available NTIS

PB91-134072
Developing a Response to EC '92.
PB91-134072 000,123 Not available NTIS

PB91-134080
Melting Curve of Tetrahydrofuran Hydrate in D2O.
PB91-134080 000,513 Not available NTIS

PB91-134098
Optical Stabilization of Semiconductor Lasers.
PB91-134098 001,504 Not available NTIS

PB91-134122
Low-Level Radioactivity Standards at the National Bureau of Standards.
PB91-134122 001,799 Not available NTIS

PB91-134155
Coulomb Clusters of Ions in a Paul Trap.
PB91-134155 001,800 Not available NTIS

PB91-134163
Quantitative Study of Laser Cooling in a Penning Trap.
PB91-134163 001,801 Not available NTIS

PB91-134171
Dietary Intake Studies of Nutrients and Selected Toxic Elements in Human Subjects: Analytical Approaches.
PB91-134171 001,373 Not available NTIS

PB91-134197
Fracture Toughness Behavior of a Silicon Carbide Whisker-Reinforced Alumina Ceramic at Selected Porosities.
PB91-134197 001,167 Not available NTIS

PB91-134205
Effective Core Potentials and Accurate Energy Curves for Cs2 and Other Alkali Diatomics.
PB91-134205 000,514 Not available NTIS

PB91-134247
Monocrystal-Polycrystal Elastic-Constant Models.
PB91-134247 001,661 Not available NTIS

PB91-134288
Fostering General Awareness of the Importance of Inventiveness.
PB91-134288 000,015 Not available NTIS

PB91-134296
Innovation: Analyzing the Process.
PB91-134296 000,016 Not available NTIS

PB91-134304
Nuclear Analytical Methods in Standards Certification.
PB91-134304 000,260 Not available NTIS

PB91-134312
Effects of Systematic Error, Estimates and Uncertainties in Chemical Mass Balance Apportionments: Quail Roost II Revisited.

PB91-134312 000,980 Not available NTIS

PB91-134346
Comments on 'Improved Calibration and Measurement of the Scattering Parameters of Microwave Integrated Circuits'.
PB91-134346 000,891 Not available NTIS

PB91-134353
Wafer-Level ANA Calibrations at NIST (National Institute of Standards and Technology).
PB91-134353 000,892 Not available NTIS

PB91-134361
Fabrication of Ultrasmall Nb-AiOx-Nb Josephson Tunnel Junctions.
PB91-134361 000,863 Not available NTIS

PB91-134379
Causal Green Function in Relativistic Quantum Mechanics.
PB91-134379 001,802 Not available NTIS

PB91-134387
Determination of Tributyltin in Estuarine Water Using Bonded C-18 Silica Solid Phase Extraction, Hydride Derivatization and GC-FPD.
PB91-134387 000,261 Not available NTIS

PB91-134395
Determination of Dibutyltin and Tributyltin in Sediment and Microbial Biofilms Using Acidified Methanol Extraction, Sodium-Borohydride Derivatization and Gas Chromatography with Flame Photometric Detection.
PB91-134395 000,262 Not available NTIS

PB91-134429
Models for Strong Interactions in Proteins and Enzymes. 1. Enhanced Acidities of Principal Biological Hydrogen Donors.
PB91-134429 001,315 Not available NTIS

PB91-134437
Models for Strong Interactions in Proteins and Enzymes. 2. Interactions of Ions with the Peptide Link and with Imidazole.
PB91-134437 001,316 Not available NTIS

PB91-134452
Optimum Refrigerants for Non-Ideal Cycles: An Analysis Employing Corresponding States.
PB91-134452 001,239 Not available NTIS

PB91-134460
Thermodynamic Properties of CFC Alternatives: A Survey of the Available Data.
PB91-134460 000,515 Not available NTIS

PB91-134775
Overview of Techniques of Analysis of Cell Damage.
PB91-134775 001,338 Not available NTIS

PB91-134783
Investigations on Gel Forming Media for Use in Low Gravity Bioprocesses Research.
PB91-134783 001,826 Not available NTIS

PB91-134791
Heterodyne Frequency Measurements on SO2 Near 41 THz (1370 cm⁻¹).
PB91-134791 001,803 Not available NTIS

PB91-134809
Far Infrared Lasing Frequencies of CH2DOD.
PB91-134809 001,505 Not available NTIS

PB91-134817
Mechanism of Stress Corrosion Crack Growth Resistance of Al-Li-Cu Alloys: Role of Grain Boundary Precipitates.
PB91-134817 001,205 Not available NTIS

PB91-134833
Gas Isotope Dilution Mass Spectrometry: Use of Multiple Fractional Abundance Ratios.
PB91-134833 000,263 Not available NTIS

PB91-134841
Elastic Effects during Late Stage Phase Transformations.
PB91-134841 000,516 Not available NTIS

PB91-134858
Verifying and Validating for Maintainability.
PB91-134858 000,770 Not available NTIS

PB91-134890
Crack Velocity Functions Thresholds in Brittle Solids.
PB91-134890 001,168 Not available NTIS

PB91-134908
Fluorescence Properties of a Rod-Like Polymer and Its Model Compound.
PB91-134908 000,557 Not available NTIS

PB91-134924
Summary Abstract: The Chemisorption of SiCl4, Si2Cl6, and Chlorine on Si(111) 7x7.
PB91-134924 000,517 Not available NTIS

PB91-134932
Scanning-Tunneling-Microscopy Study of InSb(110).
PB91-134932 001,662 Not available NTIS

PB91-134965
On-Wafer Microwave Standards at NIST.
PB91-134965 000,893 Not available NTIS

PB91-134973
Latest Results from the Proton Gyromagnetic Ratio in Water and Related Experiments.
PB91-134973 001,804 Not available NTIS

PB91-134981
Iron and Cadmium Capture Gamma Ray Photofission Measurement.

PB91-134981 001,425 Not available NTIS

PB91-134999
Ion Traps for Large Storage Capacity.
PB91-134999 001,805 Not available NTIS

PB91-135004
Digitized Atom and Optical Pumping.
PB91-135004 001,806 Not available NTIS

PB91-135012
Investigations of Selectivity in Reversed-Phase Liquid Chromatography on Chemically Bonded C18 Phases.
PB91-135012 000,518 Not available NTIS

PB91-135038
Photon Stimulated Desorption of Fluorine from Silicon Etched by XeF2.
PB91-135038 000,519 Not available NTIS

PB91-135046
Significance of Cell Fluorescence Color of Acridine Orange-Stained 'Thiobacillus ferrooxidans' Under Epifluorescence Microscopy.
PB91-135046 001,346 Not available NTIS

PB91-135053
Sound Speed Measurements on Gas Mixtures of Natural Gas Components Using a Cylindrical Resonator.
PB91-135053 001,450 Not available NTIS

PB91-144451
Journal of Research of the National Institute of Standards and Technology. September-October 1990. Volume 95, Number 5.
PB91-144451 001,506 PC A05/MF A01

PB91-144469
Recommended Values of the Fundamental Physical Constants: A Status Report.
PB91-144469 001,807 (Order as PB91-144451, PC A05/MF A01)

PB91-144527
Software Techniques to Improve Data Reliability in Superconductor and Low-Resistance Measurements.
PB91-144527 000,943 (Order as PB91-144451, PC A05/MF A01)

PB91-167411
Journal of Research of the National Institute of Standards and Technology.
PB91-167411 001,808 PC A05/MF A01

PB91-167429
1990 NIST Scales of Thermal Radiometry.
PB91-167429 001,809 (Order as PB91-167411, PC A05/MF A01)

PB91-167437
Low-Contrast Thermal Resolution Test Targets: A New Approach.
PB91-167437 000,849 (Order as PB91-167411, PC A05/MF A01)

PB91-167445
Analysis of the Spectrum of Doubly Ionized Molybdenum (Mo II).
PB91-167445 001,810 (Order as PB91-167411, PC A05/MF A01)

PB91-167452
Survey of Industrial, Agricultural, and Medical Applications of Radiometric Gauging and Process Control.
PB91-167452 001,088 (Order as PB91-167411, PC A05/MF A01)

PB91-167460
Vapor-Liquid Equilibrium of Carbon Dioxide with Isobutane and n-Butane: Modified Leung-Griffiths Correlation and Data Evaluation.
PB91-167460 000,520 (Order as PB91-167411, PC A05/MF A01)

PB91-167734
Aluminum Hydroxides as Solid Lubricants.
PATENT-4 919 829 001,221 Not available NTIS

REPT-19
Mechanical Properties and Fracture Toughness of AAR (Association of American Railroads) TC128 Grade B Steel and a Micro-Alloyed, Control-Rolled Steel, A 8XX Grade B, from -80F to + 73F.
PB90-207796 001,216 PC A03/MF A01

REPT-20
Determination of the NDT (Nil-Ductility Transition) Temperature and Charpy V-Notch Impact Properties of AAR (American Association of Railroads) TC128 Grades B Steel and A 8XX Grade B Steel.
PB90-207804 001,217 PC A03/MF A01

SERI/STR-211-3473
Diagnostics of Glow Discharges Used to Produce Hydrogenated Amorphous Silicon Films: Annual Subcontract Report, June 15, 1987--November 30, 1988.
DE89000887 000,963 PC A03/MF A01

WHOI-89-56
Report on Sediment Transport Events on Shelf and Slope (STRESS) Field Season 1: Winter 1988-1989 Benthic Acoustic Stress Sensor (BASS) Component.
AD-A222 068/9 001,434 PC A03/MF A01

APPENDIX A

List of Depository Libraries in the United States

ALABAMA

Auburn

Auburn University Ralph Brown Draughon Library (1873)

Birmingham

Birmingham Public Library (1895)
Birmingham-Southern College Library (1932)
Jefferson State Community College James B. Allen Library (1970)
Samford University Library Harwell G. Davis Library (1884)

Enterprise

Enterprise State Junior College Learning Resources Center (1967)

Fayette

Brewer State Junior College Learning Resources Center Library (1979)

Florence

University of North Alabama Collier Library (1932)

Gadsden

Gadsden Public Library (1963)

Huntsville

University of Alabama in Huntsville Library (1964)

Jacksonville

Jacksonville State University Houston Cole Library (1929)

Mobile

Mobile Public Library (1963)
Spring Hill College Thomas Byrne Memorial Library (1937)
University of South Alabama Library (1968)

Montgomery

Alabama Public Library Service (1984)
Alabama Supreme Court and State Law Library (1884)
Auburn University at Montgomery Library (1971) REGIONAL
Air University Library Maxwell Air Force Base (1963)

Normal

Alabama Agricultural and Mechanical University J. F. Drake Memorial Learning Resources Center (1963)

Troy

Troy State University Library (1963)

Tuscaloosa

University of Alabama Amelia Gayle Gorgas Library (1860) REGIONAL
University of Alabama School of Law Library (1967)

Tuskegee

Tuskegee University Hollis Burke Frissell Library (1907)

ALASKA

Anchorage

Anchorage Law Library (1973)
Anchorage Municipal Libraries Z. J. Loussac Public Library (1978)
University of Alaska at Anchorage Library (1961)
U.S. Alaska Resources Library (1981)
U.S. District Court Law Library (1983)

Fairbanks

University of Alaska Elmer E. Rasmuson Library (1922)

Juneau

Alaska State Library (1900)
University of Alaska-Juneau Library (1981)

Ketchikan

Ketchikan College Library (1970)

AMERICAN SAMOA

Pago Pago

American Samoa Community College Learning Resources Center (1985)

ARIZONA

Coolidge

Central Arizona College Instructional Materials Center (1973)

Flagstaff

Northern Arizona University Cline Library (1937)

Glendale

Glendale Public Library (1986)

Holbrook

Northland Pioneer College Learning Resources Center (1985)

Mesa

Mesa Public Library (1983)

Phoenix

Department of Library Archives, and Public Records (unknown)
REGIONAL

Grand Canyon University Fleming Library (1978)

Phoenix Public Library (1917)

U.S. Court of Appeals 9th Circuit Library (1984)

Prescott

Yavapai College Library (1976)

Tempe

Arizona State University College of Law Library (1977)

Arizona State University Hayden Library (1944)

Tucson

Tucson Public Library (1970)

University of Arizona Library (1907) REGIONAL

Yuma

Yuma County Library (1963)

ARKANSAS

Arkadelphia

Ouachita Baptist University Riley Hickingbotham Library (1963)

Batesville

Arkansas College Library (1963)

Clarksville

University of the Ozarks Dobson Memorial Library (1925)

Conway

Hendrix College Olin C. Bailey Library (1903)

Fayetteville

University of Arkansas Mullins Library (1907)

University of Arkansas School of Law Library Robert A. Leflar (1978)

Little Rock

Arkansas State Library (1978) REGIONAL

Arkansas Supreme Court Library (1962)

Central Arkansas Library System Main Library (1953)

University of Arkansas at Little Rock Library Ottenheimer Library (1973)

University of Arkansas at Little Rock Pulaski County Law Library
(1979)

Magnolia

Southern Arkansas University Magale Library (1956)

Monticello

University of Arkansas at Monticello Library (1956)

Pine Bluff

University of Arkansas at Pine Bluff Watson Memorial Library (1976)

Russellville

Arkansas Technical University Tomlinson Library (1925)

Searcy

Harding University Brackett Library (1963)

State University

Arkansas State University Dean B. Ellis Library (1913)

Walnut Ridge

Southern Baptist College Felix Goodson Library (1967)

CALIFORNIA

Anaheim

Anaheim Public Library (1963)

Arcadia

Arcadia Public Library (1975)

Arcata

Humboldt State University Library (1963)

Bakersfield

California State University Bakersfield Library (1974)

Kern County, Beale Memorial Library (1943)

Berkeley

University of California General Library (1907)

University of California Boalt Law Library (1963)

Carson

California State University Dominguez Hills Library (1973)
Carson Regional Library (1973)

Chico

California State University, Chico Merriam Library (1962)

Claremont

Government Publications and Microforms Department Honnold Library,
Claremont College (1913)

Compton

Compton Public Library (1972)

Culver City

Culver City Public Library (1966)

Davis

University of California Shields Library (1953)
University of California at Davis Law Library (1972)

Downey

Downey City Library (1963)

Fresno

California State University, Fresno, Henry Madden Library (1962)
Government Documents Department Library (1920)

Fullerton

California State University at Fullerton Library (1963)

Garden Grove

Orange County Public Library (1963)

Gardena

County of Los Angeles Public Library (1966)

Hayward

California State University, Hayward Library (1963)

Huntington Park

Huntington Park Library (1970)

Inglewood

Inglewood Public Library (1963)

Irvine

University of California at Irvine Main Library (1963)

La Jolla

University of California at San Diego Central University Library (1963)

Lakewood

Angelo Iacoboni Public Library (1970)

Lancaster

Lancaster Library (1967)

La Verne

University of La Verne College of Law Library (1979)

Long Beach

California State University at Long Beach Library (1962)
Long Beach Public Library (1933)

Los Angeles

California State University, Los Angeles University Library (1956)
Los Angeles County Law Library (1963)
Los Angeles Public Library (1891)
Loyola Marymount University Charles Von der Ahe Library (1933)
Loyola Law School William M. Rains Law Library (1979)
Occidental College Library (1941)
Southwestern University School of Law Library (1975)
University of California, University Research Library (1932)
University of California, Los Angeles Law Library (1958)
University of Southern California Doheny Memorial Library (1933)
University of Southern California Law Library (1978)
U.S. Court of Appeals Ninth Circuit Library (1981)
Whittier College School of Law Library (1978)

Mallbu

Pepperdine University Payson Library (1963)

Menlo Park

U.S. Geological Survey Library (1962)

Montebello

Montebello Regional Library (1966)

Monterey

U.S. Naval Postgraduate School Dudley Knox Library (1963)

Monterey Park

Bruggemeyer Memorial Library (1964)

Northridge

California State University at Northridge Oviatt Library (1958)

Norwalk

Norwalk Regional Library (1973)

Oakland

Mills College Library (1966)
Oakland Public Library (1923)

Ontario

Ontario City Library (1974)

Palm Springs

Palm Springs Public Library (1980)

Pasadena

California Institute of Technology Millikan Memorial Library (1933)
Pasadena Public Library (1963)

Pleasant Hill

Contra Costa County Library (1964)

Redding

Shasta County Library (1956)

Redlands

University of Redlands Armacost Library (1933)

Redwood City

Redwood City Public Library (1966)

Reseda

West Valley Regional Branch Library (1966)

Richmond

Richmond Public Library (1943)

Riverside

Riverside City and County Public Library (1947)
University of California at Riverside Library (1963)

Sacramento

California State Library (1895) REGIONAL
California State University Sacramento Library (1963)
Sacramento County Law Library (1963)
Sacramento Public Library (1880)
University of the Pacific McGeorge School of Law Library (1978)

San Bernardino

Don A. Turner County Law Library (1984)
San Bernardino County Library (1964)

San Diego

National University Law Library (1989)
San Diego County Law Library (1973)
San Diego County Library (1973)

BIBLIOGRAPHIC DATA SHEET

4. TITLE AND SUBTITLE

Publications of the National Institute of Standards and Technology, 1990 Catalog

5. AUTHOR(S)

Ernestine T. Gladden, Editor

6. PERFORMING ORGANIZATION (IF JOINT OR OTHER THAN NIST, SEE INSTRUCTIONS)

U.S. DEPARTMENT OF COMMERCE
NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY
GAITHERSBURG, MD 20899

7. CONTRACT/GRANT NUMBER

8. TYPE OF REPORT AND PERIOD COVERED
January-December 1990

9. SPONSORING ORGANIZATION NAME AND COMPLETE ADDRESS (STREET, CITY, STATE, ZIP)

Same as item 6.

10. SUPPLEMENTARY NOTES

DOCUMENT DESCRIBES A COMPUTER PROGRAM; SF-185, FIPS SOFTWARE SUMMARY, IS ATTACHED.

11. ABSTRACT (A 200-WORD OR LESS FACTUAL SUMMARY OF MOST SIGNIFICANT INFORMATION. IF DOCUMENT INCLUDES A SIGNIFICANT BIBLIOGRAPHY OR LITERATURE SURVEY, MENTION IT HERE.)

The 22 Supplement to Special Publication 305 contains full bibliographic citations including keywords and abstracts for National Institute of Standards and Technology (NIST) 1990 papers published and entered into the National Technical Information Service (NTIS) collection. (Also included are NBS/NIST papers published prior to 1990 but not reported in previous supplements of this annual catalog.) Four indexes are included to allow the user to identify NBS/NIST papers by personal author, keywords, titles, and NTIS order/report number.

12. KEY WORDS (6 TO 12 ENTRIES; ALPHABETICAL ORDER; CAPITALIZE ONLY PROPER NAMES; AND SEPARATE KEY WORDS BY SEMICOLONS)

abstracts, NBS/NIST publications; catalog, NBS/NIST publications; NBS/NIST publications; publications, NBS/NIST

13. AVAILABILITY

UNLIMITED
FOR OFFICIAL DISTRIBUTION. DO NOT RELEASE TO NATIONAL TECHNICAL INFORMATION SERVICE (NTIS).
 ORDER FROM SUPERINTENDENT OF DOCUMENTS, U.S. GOVERNMENT PRINTING OFFICE,
WASHINGTON, DC 20402.
 ORDER FROM NATIONAL TECHNICAL INFORMATION SERVICE (NTIS), SPRINGFIELD, VA 22161

14. NUMBER OF PRINTED PAGES

465

15. PRICE

ELECTRONIC FORM

**ANNOUNCEMENT OF NEW PUBLICATIONS OF THE
NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY**

Superintendent of Documents
Government Printing Office
Washington, DC 20402

Dear Sir:

Please add my name to the announcement list of new publications as issued by the National Institute of Standards and Technology.

Name _____

Company _____

Address _____

City _____ State _____ Zip Code _____

(Notification key N519)

Superintendent of Documents Publications and Subscriptions Order Form

Order Processing Code:
***6870**

**Charge your order.
It's easy!**

To fax your orders and inquiries—(202) 275-0019

PUBLICATIONS

Please Type or Print (Form is aligned for typewriter use.)

SPECIAL RUSH and EXPRESS ORDERING OPTIONS

Telephone: (800) 336-4700
in Virginia call
(703) 487-4700

RUSH SERVICE—Add \$10 per item: Orders are processed within 24 hours and sent First Class or equivalent. Available to U.S. addresses.

EXPRESS SERVICE—Add \$20 per item: Orders are processed within 24 hours AND delivered by overnight courier. Available to U.S. addresses only.

NIST *Technical Publications*

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences.

Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bi-monthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW., Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program as a supplement to the activities of the private sector standardizing organizations.

Consumer Information Series—Practical information, based on NIST research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

Order the above NIST publications from: Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Order the following NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
