Tharmophysical Properties of Working Fiulds for Binary Geothermal Cycles. Final Report. DE85000385

2-METHYLPROPANE

Tharmophysical Propartias of Working Fiulds for Binary Gaotharmai Cyclas. Final Report. DE85000385 500,790

AB INITIO ANALYSIS

Ab Initio Effactiva Spin-Orbit Oparetors for Usa in Atomic and Molecular Structure Calculations. Results for Methylidyne, Hydroxyl Redicals, Silyiidyne, Carbon Monoxida (+ 1) ion, Carbon Monoxida and Silicon Monoxide. PB85-205888 500,277

ABRASION RESISTANCE

Relationships between Knoop and Scretch Micro-Indante-tion Hardnass and Implications for Abresive Waar. 500,882

ABRASIVES

Smear Layar: Removal and Bonding Considerations PB85-189181 500,084

ABS RESINS

Acrylonitriie-Butediene-Styrena Copolymers (ABS): Pyrolysis and Combustion Products and Their Toxicity - A Raview of the Litareture, PB86-153772 501,651

ABSORPTION

Simple Accurete Absorption Model. PB86-138468 500,531

ABSORPTION COEFFICIENTS

Calorimatric Meesurement of Opticel Absorption in Sap-phire et Visible, naar IR, end neer UV Wavelengths, PB85-206738 501,496

Measuremant of Reletive Extreme-Wing Absorption Coefficients By Excited-State Deganerete Four-Wave Mixing, PB85-207272 500,292

ABSORPTION SPECTRA

Molecular X-Rey Spectra: S-K(beta) Emission and K Absorption Spectra of SCO and CS2.
PB85-197788 500,226 PB85-197788
Discrete 4D Photoabsorption Spectrum of Ba(+ 2).
500,334

Laser Tomography for Diagnostics in Reacting Flows.

PB86-122975

501.649

Laser Tomography for Tamperature Measuraments in

PB86-122983

501 650

501.035

Electric Flaid Effects on the Absorption Spectra of Molacular Hydrogen Naar the Ionization Limit. PB86-133568 500,499

ABSTRACTS

Summaries of Center for Fire Research (of the National Bureau of Standerds) Grents and In-House Programs PB86-139680

ACCELERATED TESTS

Pradiction of Concrete Sarvice-Lifa. PB86-111960

ACCELERATOR MASS SPECTROSCOPY

Estimeting the Impect of Atmospheric Cerbonaceous Per-ticulates on Urban end Rural Environments by Rediocer-bon Meesurements. PB86-111804 500,404

ACCESS METHODS

Network Access Technology: A Perspective. PB86-124807 500,728

Procedure Lenguage Access to Proposed American National Stenderd Databese Management Systems. PB86-138161 500,746

ACCREDITATION

NVLAP (National Voluntary Laboratory Accreditation Progrem) Directory of Accredited Laboratories, 1984. PB85-178317 501,160

NVLAP (Netional Voluntery Leboratory Accreditation Program) Assessment and Eveluetion Menual, PB85-200079 501, 192

NVLAP (National Voluntary Laboratory Accreditation Program) Director of Accredited Laboratories Midyeer Update,

501.243

Laboretory Evaluation Process of the National Voluntary Leboratory Accraditation Program. PB86-139821 501,314

ACCURACY

Reference Bases for Accurate Measurement. PB85-221885 500,090 Accuracy of Intarnational Time and Fraquency Comparisons via Global Positioning Systam Satellites In Common-View. PB86-128857 501,282

ACID BONDED REACTION CEMENTS

Elastic Constants of Two Dental Porceleins. PB85-229318

500.835

ACID RAIN

Evaluation of Mathods Used for the Determinetion of Acidlty in 'Acid Rain' Samples, PB85-178309 500,141

Reactions of Sulfur(IV) with Transition-Metal Ions in Aqueous Solutions. PB85-197432

Critical Reviaw of Measurament Practices for the Determination of pH and Acidity of Atmospheric Precipitetion.
PB85-197754
500, 224

Acid Precipitation: The Role of O3-Alkene-SO2 Systems in the Atmosphenc Conversion of SO2 to H2SO4 Aero-

sol. PB85-201879

ACIDITY

Evaluation of Methods Used for the Determination of Acidity in 'Acid Rein' Samples, PB85-178309 500,141

Critical Review of Meesurement Prectices for the Daterminetion of pH end Acidity of Atmospheric Precipitation. PB85-197754 500,224

ACOUSTIC DETECTORS

Simple and Effective Acoustic Emission Source Location PB85-186971 501,179

ACOUSTIC EMISSION TESTING

Acoustic-Emission-Monitored Tests for TAB Inner Lead Bond Quality. PB85-196160 501.053

Quantitative Acoustic Emission Studies for Materials Processing. PB86-123080 501,276

ACOUSTIC EMISSIONS

Analytical Approach to Acoustic Emission Signal Processing: Problems and Progress.

PB86-165461

Thermodynamic Properties of Key Organic Oxygen Compounds in the Carbon Range C1 to C4. Part 1. Properties of Condensed Phases,

PB86-165461 500.570 Not available NTIS PB86-165479

Standard Chemical Thermodynamic Properties of Alkylbenzene Isomer Groups, 500,571 Not available NTIS PB86-165479

PB86-165487

Assessment of Critical Parameter Values for H2O and D2O, PB86-165487 500,572 Not available NTIS PB86-165495

Viscosity of Nitrogen, Oxygen, and Their Binary Mixtures in the Limit of Zero Density, PB86-165495 500,573 Not available NTIS

PB86-165503

Thermal Conductivity of Fluid Air, PB86-165503 500.574 Not available NTIS

PB86-165511

Electronic Spectrum and Energy Levels of the Deuterium Molecule, PB86-165511 500.575 Not available NTIS

PB86-165529

Journal of Physical and Chemical Reference Data, Volume 14, Number 2, 1985.
PB86-165529 500,576 Not available NTIS

PB86-165537

Microwave Spectra of Molecules of Astrophysical Interest. 22. Sulfur Dioxide (SO2), PB86-165537 500,577 Not available NTIS

PB86-165545

Evaluation of the Thermodynamic Functions for Aqueous Sodium Chloride from Equilibrium and Calorimetric Measurements below 154C, PB86-165545 500,578 Not available NTIS 500,578 Not available NTIS

PB86-165552

Mark-Houwink-Sakurada Equation for the Viscosity of Linear Polyethylene, PB86-165552 500,579 Not available NTIS

PB86-165560

Journal of Physical and Chemical Reference Data, Volume 14, Number 3, 1985. PB86-165560 500,580 Not available NTIS

PB86-165578

Solubility of Mercury and Some Sparingly Soluble Mercury Salts in Water and Aqueous Electrolyte Solutions, PB86-165578 500,581 Not available NTIS

PB86-165586

Review and Evaluation of the Phase Equilibria, Liquid-Phase Heats of Mixing and Excess Volumes, and Gas-Phase PVT Measurements for Nitrogen + Methane, PB86-165586 500,582 Not available NTIS PB86-165586

PB86-165594

Homogeneous Nucleation Limits of Liquids, PB86-165594 500,583 Not available NTIS

PB86-165602

Binding Energies in Atomic Negative Ions: 2, PB86-165602 500,584 Not available NTIS

PB86-165610

Energy Levels of Phosphorus, P (I) through P (XV), PB86-165610 500,585 Not available NTIS PB86-165628

Standard Chemical Thermodynamic Properties of Alkene

Isomer Groups, PB86-165628 500 586 Not available NTIS PB86-165636

Standard Chemical Thermodynamic Properties of Alkylnaphthalene Isomer Groups, PB86-165636 500,587 Not available NTIS PB86-165644

Journal of Physical and Chemical Reference Data, Volume 14, Number 4, 1985.
PB86-165644 500,588 Not available NTIS

PB86-165651

Carbon Monoxide Thermophysical Properties from 68 to 1000 K at Pressures to 100 MPa, PB86-165651 500,589 Not available NTIS PB86-165669 Refractive Index of Water and Its Dependence on Wave-

length, Temperature, and Density,
PB86-165669 500,590 Not available NTIS

PB86-165677 Viscosity and Thermal Conductivity of Dry Air in the Gaseous Phase, PB86-165677 500,591 Not available NTIS

PB86-165685

Charge Transfer of Hydrogen Ions and Atoms in Metal PB86-165685 500,592 Not available NTIS

PB86-165693

Reactivity of HO2/O2(-1) Radicals in Aqueous Solution, PB86-165693 500,593 Not available NTIS PB86-165701 Mark-Houwink-Sakurada Equation for the Viscosity of Atac-

tic Polystyrene, PB86-165701

PB86-165719 Standard Chemical Thermodynamic Properties of Alkylcy-clopentane Isomer Groups, Alkylcyclohexane Isomer Groups, and Combined Isomer Groups, PB86-165719 500,595 Not available NTIS

500.594 Not available NTIS

PB86-165776

NBS Technical Publications Program

Periodical

Journal of Research—The Journal of Research of the National Bureau of Standards reports NBS research and development in those disciplines of the physical and engineering sciences in which the Bureau is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Bureau's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications-Include proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NBS under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

Consumer Information Series—Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

Order the above NBS publications from: Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Order the following NBS publications—FIPS and NBSIR's—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
