REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., September 14, 1905.

SIR: I have the honor to submit herewith a detailed report of public documents sold by this office July 1, 1904, to June 30, 1905, as required by law. For your information and consideration a brief report of the work of the documents office during the fiscal year is included; also a few suggestions, which are made with a view to the improvement of the service.

Very respectfully,

I. C. FERRELL,
Superintendent of Documents.

Mr. OSCAR J. RICKETTS,
Acting Public Printer.

The work of the office, in all the sections, has been heavier than ever before. While the number of documents received and distributed is somewhat less than last year, a great deal of extra work has been done by the force in the documents section in arranging, sorting, and folding documents; also in collating 166,500 printed catalogue cards distributed to depository libraries and not counted as documents in the distribution.

During the fiscal year 998,198 documents were received and 902,338 were distributed or sold, a detailed statement of the receipts, distribution, and sales being appended. There was an increase of about 45 per cent in the number of documents sold and an increase of about 35 per cent in the amount received as compared with the previous fiscal year. The increase is largely due to the passage of an act authorizing the Superintendent of Documents to order documents reprinted when needed for sale.

The publications prepared and issued by this office during the fiscal year are as follows:

	Pages.
Tenth Annual Report of the Superintendent of Documents, 1904	68
Document Index (Consolidated Index), Fifty-eighth Congress, first and second sessions, in one volume.	493
Monthly catalogues, June, 1904, to May, 1905, omitting the monthly cumulative indexes	683
Price list of United States Public Documents, No. 9	156
List of Publications, Agriculture Department, 1862-1902.	623
List of Documents Available for Distribution to Public, School, and College Libraries	12
List of Documents Available for Distribution to Libraries.	69

The Document Catalogue (Comprehensive Index) for the Fifty-seventh Congress, and all Departments of the Government, and the Document Index (Consolidated Index), Fifty-eighth Congress, third session, will be issued about December 1, 1905.

The catalogue section received 14,517 documents, 18,404 pieces of Congressional mail, wrote 65,645 cards, and prepared, edited, and supervised the publication of the Document Index and monthly catalogues in the foregoing list. Eleven of the 45 employees of the office are in this section.

The correspondence of the office was very heavy, being considerably increased by the cash orders, which exceeded by 5,000 the receipts of the previous year.

Eight thousand four hundred and twenty-six documents and 789 maps were added to the documents library during the year. The library now contains 75,041 documents, including maps and pamphlets.

PRINTED CATALOGUE CARDS.

The experiment of supplying printed catalogue cards of documents to the designated depositories has proven a great success. Librarians have been disappointed, however, because the distribution has been limited to one card for each document. They insist that they should have a card for each subject which is indicated on the card sent, and a considerable number of libraries are willing to pay for the duplicates. It has been impossible for this office to supply the duplicates free owing to the fact that at least one additional helper would be required to collate the cards, and it can not print them expressly for sale without authority from Congress. I shall therefore prepare a bill for introduction next session, which, if adopted, will enable me to have catalogue cards printed for sale upon the same terms they are now supplied by the Library of Congress and the Department of Agriculture.

NEW LEGISLATION.

The only legislation of any consequence by the Fifty-eighth Congress affecting the laws relating to printing and binding was an act approved January 20, 1905, which discontinued the "usual number" of copies of reports on simple and concurrent resolutions and on reports on private bills. The usual number is 1,682 plus 168 copies, 1,850 in all. The number of reports of this character to be printed hereafter will be 605 plus 118, or 723 in all, a saving of 1,127 copies in each case. During the Fifty-eighth Congress there were more than 8,000 reports on bills and resolutions of the foregoing description, averaging about 1 page each. A little calculation will demonstrate the fact that there will be a considerable saving in this item of printing hereafter. The act should be amended so as to provide that a special series of numbers shall be assigned to such reports, in order that they may readily be distinguished from reports on public bills. Considerable confusion has already resulted in various ways. The "usual number" having been discontinued, they will be omitted from the bound volumes of House and Senate reports, leaving gaps in the numbers which can be accounted for only by a careful examination of the index.

DOCUMENTS FOR DESIGNATED DEPOSITORIES.

Sections 501 and 502 of the Revised Statutes authorize each Senator and each Representative to designate one institution as a depository of public documents. Section 70 of the printing act approved January 12, 1895, requires that such depositories, excepting colleges, shall contain 1,000 or more books, excluding Government publications. There are now 90 Senators, 386 Representatives, and 4 Delegates; in all, 480. There are 60 depositories, including the State and Territorial libraries, named under the general law, making a total of 540 authorized depositories. The distribution of documents is made to such depositories by the Superintendent of

Documents under the provisions of sections 54 and 58 of the printing act approved January 12, 1895. The section first mentioned provides that 500 copies of all numbered Congressional documents, bound in full sheep, shall be delivered to the Superintendent of Documents for distribution to depositories, and the latter section provides that 500 copies of all documents not bearing a Congressional number shall be in like manner delivered and distributed to depositories. Congress should authorize the Public Printer to print and deliver 40 additional copies of each description of documents so that all authorized depositories may be supplied.

ANALYTICAL, DICTIONARY CATALOGUE OF ALL GOVERNMENT PUBLICATIONS, 1789-1893, AND A TOPICAL INDEX TO THE PROCEEDINGS AND DEBATES IN CONGRESS, 1789-1905.

The documents office has collected 75,041 United States public documents, including maps. This splendid collection, in some respects the most complete of any in existence, makes it possible and practicable for me to propose the making of a catalogue and index as indicated in the caption. Numerous catalogues and indexes of Government publications have been printed covering different periods prior to 1881, each inaccurate, incomplete, and on different plans. One of these cost about \$63,000, and is so incomplete and inaccurate as to be of little value. A catalogue and index prepared by this office could be compiled at the minimum cost. The work would be supervised by experts who have had ten years' experience in cataloguing Government publications, it would be uniform and accurate, and there would be no question but that it would give satisfaction. The documents office has compiled data of nearly 4,000 documents, covering the period from 1789-1817, giving title, size, number of pages, and name of library where the same may be consulted. This special work ought to be completed, even if authority is not given to do the greater.

I have given a great deal of consideration to the matter of making a general analytical dictionary catalogue of Government publications, and a topical index to the proceedings and debates in Congress. I find that more than \$100,000,000 have been expended in printing documents, and that there is no catalogue of the documents published during the first century of the existence of the Government which undertakes to give an analysis of the same. It is, therefore, impossible for anybody to make a thorough study of a particular subject. A subject may be discussed in a thousand different publications, and not one reference to it can be found in the so-called catalogues. I think that such a catalogue and index as I have described should be made, and estimate that with the facilities at the command of this office the entire work can be performed within six years at a total cost per year of \$27,400. The value of a work of such magnitude can not be estimated in dollars and cents.

DUPLICATION OF WORK AND DUPLICATE DISTRIBUTION.

One of the important questions asked by the Committee on Department Methods, appointed by the President June 5, 1905, requests information concerning the duplication of work. I know of no field of Government activities where duplication of work is carried on to a greater extent than in the distribution of public documents. About 35 offices in Washington distribute their own publications free to libraries and individuals. The greater number of such publications are distributed free to individuals and libraries by each Senator, Representative, and Delegate in Congress, and free to libraries by this office. So that the work is not only duplicated, but the distribution also by each of these independent agencies.

The extent of duplication to libraries can be more accurately estimated than the duplication to individuals from the fact that libraries usually preserve all documents sent them and have been returning duplicates for redistribution during the past

twenty-five years. Since the establishment of this office in 1895, 800,000 duplicate documents have been returned to it by libraries which received them in duplicate. Applications have been made for the return of several hundred thousand additional volumes, but they were declined owing to lack of storage facilities.

That the duplication to individuals has been equally large is unquestionable; doubtless it is much larger. I have statistics of the distribution of two sets of documents—the Tenth Census Reports and the Messages and Papers of the Presidents—where duplication between members of Congress was prevented to the extent of 85,000 volumes. The entire distribution of the former was made by the Department of the Interior, and this office had control of the distribution of the latter.

The waste of the public money in printing and binding is, in my opinion, not due so much to extravagance in ordering documents printed which ought not to be printed, as it is to the duplication of work and distribution and to the defects in the printing laws which require documents to be printed in so many different forms. All the annual reports printed as Congressional documents are issued in two or more forms with different back titles. The report of the Lieutenant-General of the Army for 1900 is a sample of the reports that are issued in three different forms and in at least two styles of binding. The different back titles on this document read as follows:

(1)

ANNUAL REPORT
OF THE
LIEUTENANT-GENERAL
COMMANDING
THE ARMY
IN SEVEN PARTS
PART 1

(2)

REPORT
OF THE
WAR DEPARTMENT
VOL. 1
1900
PART 3.
LIEUTENANT-GENERAL,
COMMANDING THE ARMY.

(3)

HOUSE DOCUMENT
VOL. 4
NO. 2
REPORTS OF WAR DEPARTMENT
1900
LIEUTENANT-GENERAL,
PT. 1
MISCELLANEOUS
56TH CONGRESS
2D SESSION
1900-1901.

It would be difficult for even an expert to determine, without an examination of the text, that the foregoing back titles describe the same book. It is therefore scarcely necessary for me to point out the desirability of amending the printing laws so as to require the assignment of the same title and back title to all copies of the same document. The editions issued under back titles 2 and 3, of Bureau publications, and 3, of departmental publications, are very largely wasted and ought not to be printed.

A more extravagant and wasteful practice, if possible, is the custom of printing as numbered Congressional documents certain departmental publications previously issued weekly, monthly, quarterly, or at irregular periods during the year in pamphlet form. Such publications are thoroughly distributed in pamphlet form from several months to two years before they are consolidated and issued in the expensive sheep-bound Congressional series. A number of annual reports, not administrative in character, are also published as Congressional documents. Such annual reports and the pamphlet publications herein referred to make 85 of the volumes of documents of the Fifty-eighth Congress. Of these 85 volumes 157,250 copies were printed, and about 51,000 of the same will be bound in full sheep. I estimate that about \$60,000 of the total cost represents the waste.

There is considerable duplication of work between this office and the several offices which sell public documents. There is not only duplication of work, but the strange anomaly is seen of two Government offices authorized by law to sell the same document at different prices. This is due to defects in the printing laws. Prior to the establishment of this office several of the Departments were authorized to sell certain publications, the prices to be fixed in various ways. In some cases a certain per cent was added to the cost. Section 61 of the printing act approved January 12, 1895, authorizes the Superintendent of Documents to sell any document in his custody not otherwise specifically disposed of by law, at the cost of printing from the plates. In estimating the cost, composition is therefore excluded. Congress evidently had in view the harmonizing of the laws relating to the sale of documents, and provided, in said section 61, that any office having documents for sale might turn the same over to the Superintendent of Documents for sale under the provisions of law governing the sale of documents by his office. But one office (the State Department) has availed itself of this suggestion, but the transfer was made by special act of Congress.

I doubt very much whether any real reform in the printing and binding of documents can be made until all document-distributing offices are consolidated under one head. The advantages of consolidation are clearly indicated herein. It is quite safe to say that no business establishment in the land would maintain 30 or 40 offices, each duplicating work and distribution of the other to a considerable extent. The money uselessly expended in maintaining so many establishments can be and ought to be saved.

STORAGE OF DOCUMENTS.

The matter of storage of public documents is a question which Congress will doubtless be called upon to consider at an early date. Notwithstanding the fact that 1,000,000 documents, in round numbers, were distributed during the fiscal year, more than 1,000,000 now remain in stock, all stored in the old Government Printing Office. Despite the efforts of the office to distribute the surplus properly to libraries and public institutions, more documents come in than go out. Not only the 1,000,000 books in stock, but the splendid public documents library of 75,000 books and maps are stored in the old Government Printing Office building, which has been condemned many times as unsafe for life or property. Senate Report 1030, Fifty-eighth Congress, second session, says:

"The danger of collapse under any excessive weight is very great and, on account of the wooden construction of the interior, the collapse would probably occur with-

out warning. We are of opinion that the building is unsafe, unhealthy, and dangerous in its present condition, and that it should not be used for heavy machinery and fixtures of a printing office. * * * In view of these facts we recommend * * * that the old Printing Office be torn down and a new building erected on the site."

I mention this matter to emphasize the necessity of making proper provision for the storage of documents and for offices for this office before such a calamity as the foregoing report foreshadows shall occur.

It is suggested that the Hall of Records, soon to be erected, can be so constructed as to be capable of storing all public documents, printed or in manuscript, and that the entire distribution and sale of documents can be made under the direction of the head of that office when the same shall be created.

Documents received, distributed, and sold July 1, 1904, to June 30, 1905.
