OFFICE OF
THE PUBLIC PRINTER
WASHINGTON

DECEMBER 4, 1911.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1911.

Very respectfully,

SAM'L B. DONNELLY,
Public Printer.

THE PRESIDENT OF THE SENATE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 4, 1911.

To the Senate and House of Representatives:

This report of the transactions of the Government Printing Office for the fiscal year ended June 30, 1911, contains all the statistical information required by law and such additional statements as are necessary to properly summarize the transactions and work of the fiscal year.

The total appropriations for salaries, maintenance, and operation of the Government Printing Office were \$5,674,734.

Deducting from this amount the appropriation for the operation and maintenance of the office of the superintendent of documents (\$260,584), there was allotted and available for the production of the public printing and binding the sum of \$5,414,150.

The charges for repay work (which consists of work performed for the departments and chargeable to appropriations other than that for public printing and binding) amounted to \$1,120,551.16 during the fiscal year.

The total disbursements and outstanding obligations amounted to \$6,463,520.09, leaving an unexpended balance of \$305,528.76 to the credit of the several appropriations.

In the unexpended balance is included \$188,194.50, which amount represents the repay accounts not transferred to the credit of the appropriation for printing and binding June 30, 1911, and therefore not available for expenditures.

The unexpended balance of \$305,528.76 on June 30, 1911, was composed of the following items: Legislative salaries, office of the Public Printer, \$6,663.34; general expenses, office of the superintendent of documents, \$36,716.95; leaves of absence, \$15,130.69; pay for holidays, \$18,304.52; salaries, office of the superintendent of documents, \$1,426.17; public printing and binding, \$227,287.09.

The total balance unexpended in departmental allotments for public printing and binding amounts to \$458,277.04, and there is a deficit in the congressional allotment of \$174,566.79.

The total charges for work performed were \$6,307,762.74, which was exceeded by \$16,632.67 by the total charge for work performed during the previous fiscal year. But, as the scale of fixed charges for the fiscal year 1911 was 3 per cent less than that of the fiscal year 1910, the value of the work performed during the year just closed

exceeded the value of that performed during the previous year by \$178,452.77.

The total amount of expenditures for maintenance, operation, and general expenses of the Government Printing Office, not including the expenditures for the office of the superintendent of documents, was \$6,245,080.88. The total charges for completed work performed during the fiscal year (\$6,307,762.74) exceeded the total expenditures to the amount of \$62,681.86, which is 1 per cent of the total expenditures. This excess being so slight, it was not deemed advisable to reduce the scale of charges for the fiscal year 1912.

I am pleased to report that for the first time in many years a deficiency appropriation for any purpose was not necessary to meet the expenses of operating the Government Printing Office, and, although the extra session of Congress was not anticipated, the Government Printing Office produced the work of the extra session without requesting the customary deficiency appropriations.

THE WORK OF THE FISCAL YEAR.

The following statement shows the larger items of production for the fiscal years ended June 30, 1910 and 1911:

Class of work.	1910	1911
Ems of type set.....	1,801,010,900	1,881,721,600
Hours of time-work in composing rooms.....	¹ 274,913	292,035
Foundry square-inch production.....	¹ 12,685,357	12,419,416
Chargeable impressions of presswork, not including postal-card or money-order presses.....	836,181,344	890,592,096
Number of forms sent to press.....	172,039	171,410
Number of money-order books registered and mailed.....	399,556	448,139
Signatures gathered on machine.....	88,157,436	91,533,833
Signatures folded on machines.....	63,812,025	76,496,216
Number of copies wire-stitched.....	21,631,448	23,409,410
Number of sheets passing through ruling machines.....	22,848,486	25,206,667
Number of signatures sewed on machines.....	72,711,576	83,075,988
Number of tablets made.....	1,417,521	1,900,421
Number of cards and sheets punched and drilled.....	17,128,306	19,265,490
Number of cases made on machines.....	¹ 1,936,691	2,014,514
Number of postal cards produced.....		1,280,895,840

¹ Represent 10 months' actual production and 2 months, approximate or average production.

The expenditure for labor, exclusive of the salaries in the offices of the Public Printer and the superintendent of documents, was \$60,790.46 less in 1911 than in the preceding fiscal year.

The saving for the fiscal year was effected as the result of greater efficiency on the part of the employees and improvement in method and equipment. For example, there was an increase in the chargeable impressions of presswork of 54,410,752 and a decrease of 629 in the number of forms sent to press.

As a recognition of the increased efficiency of the employees of the office, particularly during the past two fiscal years, it is recommended that consideration be given to their requests for an increase in pay.

Paper stock of unnecessarily heavy weight was eliminated from the contract lists, and, particularly in the job work, lighter weights than formerly used were adopted wherever possible. Efforts toward economy in this direction met with hearty cooperation on the part of the executive departments.

The Joint Committee on Printing approved of my recommendation to adopt a lighter weight of paper for use in the printing of the Congressional Record. This lighter weight of paper was used on sample issues and will be regularly used beginning with the next session of Congress.

As a result of experiments it was found possible to use lighter weight machine-finish printing and lighter weight sized and supercalendered paper on a portion of the Government publications. The Joint Committee on Printing approved of my recommendation in this respect. Although some difficulty has been experienced on account of the transparency of the lighter stock, it is hoped that stock of the desired opacity in the lighter weights can soon be secured. The saving resulting from the changes so far successfully made will amount to approximately \$40,000 annually.

A number of changes in workroom layout were made, with improved conditions.

The methods of handling work were improved in many particulars. For example, it was found possible to successfully print on muslin from sized roll stock upon one of the automatic presses purchased for use in producing tabulation cards instead of upon sheets of limp cloth.

The important improvements in the plant and in the buildings undertaken and consummated during the fiscal year and the cost thereof were as follows:

Nature of work.	Cost.
Overhead trolley system in postal-card section.....	\$129.89
Direct connection of the standpipes in the old building with city water lines, for the purpose of insuring better protection in case of fire.....	334.45
To prevent flooding of basement of new building, which had several times occurred, rain leaders were connected with North Capitol Street sewer.....	1,965.50
New pipe line from house pump to tank in H Street annex.....	937.39
Three bridges across courtyard of new building, connecting second, third, and fourth floors, respectively.....	3,642.26
Auxiliary 12-inch water main, connection on G Street.....	702.25
Gallery for lockers on sixth floor.....	588.48
Ventilators to plate vault under sidewalk, to relieve bad sanitary conditions.....	130.57
Gallery floor and shower baths in toilet room of electrotype foundry.....	713.42
Pumping engine, high-pressure, 2,000,000-gallon capacity, to provide better water supply and necessary fire protection.....	8,495.00
Foundation for pumping engine.....	1,834.63
New and larger water lines in new building.....	2,150.03
Fire escape in G Street wing to engine-house roof.....	393.00
Steel bridge across Jackson Alley, connecting second-floor levels of new and old buildings, to provide more direct interior traffic line connection with stores division.....	961.13
New toilet room in Jackson Alley wing of new building, sixth floor.....	919.00
Additional station to pneumatic-tube system on fifth floor.....	389.00
Reparing courtyard of old building.....	371.72
Twenty-ton auto-truck weighmaster's scale, with foundations.....	1,008.61
Total.....	25,666.33

The inflammable frame and brick storage warehouse on L Street was abandoned and space rented in a fireproof warehouse on M Street, with a resultant saving of \$1,500 in rent. The work of erecting a fireproof garage in the partly occupied storage yard on the west of the H Street annex was authorized by Congress and has at this date been completed. The rented stables on M Street, costing \$2,400 a year, have been abandoned, the total annual saving in rent effected being \$3,900, and the labor saving resulting from the abandoning of these stables, \$3,800 per annum.

A new press, by the use of which we are able to materially reduce the cost of producing United States money orders, was purchased.

The important additions to the productive equipment of the plant are given in the following table:

Number ordered.	Description.	Cost.
1	Ink and color grinding mill.....	\$475.00
2	Job presses, automatic feed.....	3,262.50
1	Tablet-banding machine.....	700.00
1	Milling machine.....	2,311.50
2	Stamping and embossing presses.....	12,876.00
1	Rotary perfecting press.....	13,327.50
1	Caster (lead and rule).....	810.00
1	Cutting machine, round-hole.....	510.00
1	Pumping engine, Corliss type.....	8,495.00
1	Folding machine.....	315.00
1	Sewing machine.....	136.21
1	Folding machine.....	1,290.00
2	Proof presses.....	392.00
1	Patent ink mixer, No. 30, with motor.....	536.00
3	Bundling machines.....	337.50
1	End-cloth-stripping machine.....	1,500.00
1	Slitting machine.....	685.00
3	Blackleading machines.....	2,805.00
1	Case-washing machine.....	935.00
1	Case-bending machine, with motor.....	175.50
1	Proof press, 25 by 25 inches.....	409.30
1	Folding machine, with motor.....	275.00
3	Quick-bundling machines.....	337.50
2	Automatic wire-stitcher feeders.....	2,800.00
1	Folding machine.....	1,240.00
1	Gordon press and motor.....	171.83
1	Cutting machine, 54-inch, equipped.....	2,015.00
1	Rotary perforating machine, 30-inch.....	430.50
	Total.....	48,453.84

¹ Does not include allowance of \$800 for old machines taken in exchange.

² Does not include allowance of \$500 for old machine taken in exchange.

The work of arranging and classifying samples of all job work and blanks printed during a fiscal year, referred to in my last annual report, was completed, and the report was submitted to the President's Commission on Economy and Efficiency. This compilation serves to show the total number of forms of the different sizes used by the Government. To enable the Government Printing Office to produce these forms in a more economical manner, an additional rotary printing machine, of greater capacity than those now in use and upon which manifold work can be produced, has been ordered.

The work of the office of the superintendent of documents has materially increased, but has been handled without any correspond-

ing increase in expenditure. A large number of Government publications have been returned by the depository libraries and from other sources, and although a material reduction in the volume of public documents has been effected by the Joint Committee on Printing, a major portion of the great quantity printed and distributed in the past will ultimately be returned to the Government Printing Office, condemned, and sold to the contractor for waste paper. In this connection I have the honor to renew the recommendation made in my last annual report relative to the classification of public documents and congressional printing.

The taking of a complete inventory of all Government Printing Office property has been continued and will be completed during the present fiscal year.

NEW EQUIPMENT.

The inventory of the machinery in use in the Government Printing Office showed that the total cost was \$2,306,255.78. The machinery is kept in excellent condition and is carefully maintained. In fact, machines that have been running in the Government Printing Office for 20 years are by no means worn out. Fixing the life of the Government Printing Office machinery at the maximum, it is apparent that to keep the plant up to date an average of \$100,000 per annum is the minimum amount that should be expended. The value of the machinery equipment purchased during the fiscal year 1910 was \$66,473.41, and for 1911, \$48,453.84. The limitations fixed by Congress for the present fiscal year is \$100,000, which amount can be expended to great advantage.

The installation of a new or an additional machine for refrigeration and cooling the drinking water supply will be necessary during the coming year. The work must be completed before the approach of warm weather. The estimated cost of this necessary improvement will be \$4,500.

The installation of mechanical stokers and ash-handling machines, which has been given consideration and for which tentative plans have been prepared, will cost approximately \$35,000. The saving to be effected by this improved boiler-room equipment will amount to at least \$10,000 per annum.

The installation of improved waste-paper-baling presses is necessary and will be undertaken at an early date.

RETIREMENT OF SUPERANNUATED EMPLOYEES.

There are employed in the Government Printing Office more than 250 persons above the age of 65, and it would be of advantage to the Government to provide for the retirement of those who have given to the public service the best years of their lives and who may be

unable to perform an average day's work. This could be equitably accomplished through the adoption of a plan which would in effect amount to an annuity to each employee upon arriving at the age of retirement or upon becoming disabled. The basis of such annuities should be length of service and the salary or wage received during their employment, which in the case of those who have been in the service for many years would meet their ordinary requirements during the remainder of their lives. Such a plan would result in saving a large proportion of the amount that it is conceded generally is now lost through the superannuation of employees, and would at the same time be an act of justice to the individual and a recognition of long and faithful service.

Respectfully submitted.

SAML. B. DONNELLY,
Public Printer.

REPORT OF THE MEDICAL AND SANITARY OFFICER.

WASHINGTON, October 28, 1911.

SIR: Herewith will be found a statement showing the number of cases, both medical and surgical, arising during the working hours of the office, receiving treatment or obtaining relief in the Government Printing Office emergency room, together with a list of the employees receiving compensation, under the act of Congress, for the fiscal year ended June 30, 1911.

A total of 961 surgical cases and 1,142 medical cases is presented for the year's work. Attention is respectively called to the large number of redressings (990), which represent subsequent treatments rendered after the initial injury, thus following, for all concerned, the economic policy laid down whereby the employee is enabled to remain at his work when such is possible or practical.

Permission is asked to inaugurate a custom of vaccinating any employee, upon the latter's application (adopting, in such instances, the United States Army standard), who may have been exposed to typhoid fever in his own home or other places, thus insuring not only protection to himself but to his fellow workmen as well.

Such a procedure presents, in addition, economic features from a wage-earning or industrial point of view in that the Government retains the services of the employee, who must otherwise absent himself, and the workman is saved his wages as well as the attendant risk of life with consequent suffering and other sequelae with necessarily wide ramifications.

Respectfully,

WM. J. MANNING, M. D.,
Medical and Sanitary Officer.

The PUBLIC PRINTER.

SEVENTEENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1911.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
October 2, 1911.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1895, it becomes my duty to submit herewith my annual report for the year ended June 30, 1911, being the Seventeenth Annual Report of the Superintendent of Documents. The receipts and disbursements, as well as receipts and shipments of documents, during the period stated, as well as comparative statements embracing previous years, are presented in the usual tabular form. I also enumerate the duties which the law assigns to this office, to wit:

1. To sell at cost any public document in my charge, the distribution of which is not otherwise specifically directed by law.
2. To receive from all Government offices any document published for sale, such sale to be made under the provisions of section 61.
3. To have general supervision of the distribution of all public documents, except as otherwise provided.
4. To prepare at the close of each regular session of Congress a comprehensive index (document catalogue) of public documents.
5. To prepare and print in one volume a consolidated index (document index) of congressional documents.
6. To index such single volumes of documents as the Joint Committee of Printing shall direct.
7. To receive all accumulations of documents from the several executive departments, bureaus, and offices of the Government, and annually to take over their surplus for distribution or sale.
8. To prepare and publish a monthly catalogue of Government publications, which shall show all documents printed during a month, where obtainable, and prices.
9. To thoroughly investigate the condition of designated depositories.
10. To distribute the documents as issued to the designated depositories.

Of course the operations of a business that rises to the dignity of a hundred-thousand-dollars-a-year mail-order concern bring to this office many other duties that can not be slighted. Many of my correspondents seem to regard this as a bureau of information, whence may be obtained advice on every imaginable subject, and so far as this expectation can be met without impairing the ability of this office in meeting the legitimate calls made upon it, such advice is given to the extent of my ability. Much time is devoted to the exchange with libraries of documents that they have use for in place

of others that they return. In addition I have made it my pleasant duty to accommodate Members of Congress by exchanging documents for which they have call from their constituents for others of which they have a surplus but for which I have an active sale demand. This method of exchange has apparently proven a welcome service to Members, while it has in nowise impaired the usefulness of this office.

Recurring to the enumeration of duties assigned to this office, the sale of public documents, referred to in No. 1, steadily assumes greater proportions and more and more taxes the office force in responding promptly to the demands made upon us. I shall later on present the condition of business in comparative form, when the healthy growth of the sale department of this office will be noted at a glance. This growth may well be taken as establishing several things: First, that the American public is perfectly willing to pay good money for public documents. Second, that the volume of sales steadily increases as the opportunity to buy public documents is presented to the public. To be sure, many persons prefer to obtain this class of literature without expense through Members of Congress and other sources, but as this mode of supplying publications without cost is utterly inadequate to furnish all readers with what emanates from the Nation's publishing house, it does not seem quite fair that some should obtain gratis what others have to pay for. I respectfully submit that nothing the Government prints should be furnished free through any source, at least so far as individuals are concerned. Men value what they pay for, and in my opinion nothing is printed by the Government that is not worth its price, if offered in the proper way to those interested in the subject treated.

The subject covered by No. 2 is one that leaves it optional with issuing offices to transfer the sale of their publications to me. More and more the convenience of the transfer is seen by those concerned, and in consequence the business of this office is steadily broadening in its scope. It not only relieves those offices from the duty of supplying the sales demand, but it serves the public by centralizing the source of supply, so that for a given number of publications purchasers are not compelled to address a number of officials, but can be supplied more and more fully by the Superintendent of Documents.

No. 3 is a broad subject indeed, and the "except as otherwise provided" is the large end of the proposition. That the distribution of public documents should be centralized, in the interest of economy and efficiency, is the emphatic opinion of everyone conversant with the subject. That such centralization was contemplated by the legislators who prepared the printing act of January 12, 1895, is my firm belief. Much has already been said and considerable has been printed regarding the advisability of thus concentrating in this office the distribution of public documents. The deeper this subject is gone into the more the economy of such concentration is shown. To begin with, the transportation of the printed matter from the Government Printing Office to the individual departments and bureaus is costly. Before being loaded on wagons for transportation the books are wrapped in order to protect them from injury, this calling for paper (or envelopes) and twine, besides considerable labor. Next they are delivered to the various offices, again calling for the employment of labor for such temporary storage, and the wrappings applied

at the Government Printing Office are removed. When the department is ready to mail the publications, these are once more wrapped, addressed, and then transported to the post office or direct to the Union Station. So far there has been one unnecessary wrapping, one unnecessary hauling, and many men have been employed in the process. When it is considered that the unnecessary haul is many times the distance that need be traversed if the books were mailed from a building just opposite to the establishment where they were made, and which is but 2 squares from the Union Station, the "waste" of that process will be fully made clear.

Still another economy of the proposed concentration seems to deserve consideration: Wherever publications are sent out there has been supplied an outfit, more or less ample, for the purpose. Appliances that in some instances cost thousands of dollars have been installed, and these are employed in many cases only a part of the time. Those engaged in the distribution of public documents from so many divers points may be employed in attending to other duties when not sending out these publications, but the plant purchased for mailing operations is idle much of the time. That is for the time being dead capital, and dead capital is waste. The office of the Superintendent of Documents, if charged with the whole operation of distributing the Government's publications, would employ all its appliances every hour of the working-day, thus deriving the greatest possible benefit from every kind of labor-saving appliance that can be made use of in the operation.

Nor are the foregoing the only reasons that may be urged why the distribution of public documents should be made from a central point. As is well known, there is to some extent unnecessary duplication of shipments to institutions, and possibly to individuals, apparently inseparable from the present methods. This would be at once corrected if everything went out from one office. The alphabetical arrangement of mail lists would correct the waste of duplication, as must be apparent to everyone. The various issuing offices would retain full control of their mailing lists, of course, but none of them would want a duplication of their publications to continue. That there might be exceptions to the rule, "One copy only to one recipient," in the case of large libraries, etc., but points the rule and the common sense of its application.

In view of the fact that all accumulations of publications in the various departments are required to be forwarded periodically to the Superintendent of Documents, that official is more conversant with this question than can be expected from officials not so situated. He can speak from personal knowledge on the subject of unnecessarily large editions of certain publications, and he may be relied upon to give expert testimony whether dead stock is due to excess of printing or to the faulty manner of distribution. As a broad proposition, I have no hesitation in saying that very little is printed that would not be welcomed by appreciative readers, provided it were forwarded promptly, not months after the subject treated has ceased to be of interest. That, however, is for others to discuss. My functions embrace, if not in practice, according to the letter of the law, the general distribution of public documents.

The requirement enumerated as No. 4 has for a number of years, sanctioned by proper authority, been departed from in so far as the

Document Catalogue, as issued, covers the entire Congress. The reasons were stated by me in extenso last year, and perhaps you would not care to have me repeat what can so readily be referred to. I may add that when I assumed charge of this office the preparation of this publication was many years behind, owing to causes that, as they concern my predecessors, I do not care to dilate upon. Suffice it to say that the Document Catalogue embracing the Fifty-ninth Congress was issued a number of months ago, that for the Sixtieth will be out before the close of this fiscal year, and that of the Sixty-first surely before the Sixty-second Congress has passed into history. Not until then will I feel satisfied with the condition of that department of my office.

The requirements noted in paragraph No. 5 are being met in a competent manner by the very able force of cataloguers in this division. Long years of training are required for satisfactory cataloguing work, and I challenge any equal number of cataloguers in the land, at even higher compensation, to do better work in that line than the force employed under my supervision.

Regarding the requirement marked No. 6, I expressed myself in the last report I had the honor to submit to you. Occasional service of that kind I can furnish. If there should be many calls of that sort, however, I would have to do one of two things—either declare my inability to do the work, or to neglect other work, the execution of which is made equally incumbent upon me. Indexing must be done, in order to make a good job of it, by those who know how to index, and it would be impractical and expensive to keep under pay a reserve force in view of possible calls for this kind of work. So far, I should add, I have been able to meet the demands of the Joint Committee on Printing for such indexing.

The subject referred to in No. 7 is one that deserves more consideration than seems to have been accorded it heretofore. It seems mandatory so far as the Superintendent of Documents is concerned. He must receive whatever is sent to his office by the many departments, bureaus, and other offices of the Government, and the shipments thus dumped upon the premises occupied by this office have for a number of years cramped the force employed under my supervision in the performance of the duties that primarily pertain to this division. The law does not compel me to send for these accumulations, but it does compel me to receive them, and the inconvenience it proves, the amount of labor it imposes, the encroachment upon the room assigned to this division, all compel remedial action in respect to this matter. This is my recommendation as a step in the right direction: Let the transfer of the accumulations be preceded by an invoice showing what it is proposed to send to the Superintendent of Documents; let him return this invoice, marked to indicate what publications he can make use of; then let the department, bureau, or other office concerned be authorized to sell as waste paper all that the Superintendent of Documents does not deem worth transferring to his office. This is not only common sense, but it makes for economy in marked degree. The cost of transportation to this office, the value of labor expended here in handling what is of no value, the cost of storage room for the mountains of stuff that is perhaps many years behind its time of usefulness—all these are considerations that cause me to express the hope that this office may be relieved from a task

that serves no good purpose and that can so readily be taken from it. It is these accumulations of out-of-date publications that create the impression that public printing is largely waste. Go through the list that I had the honor to submit to you some months ago, with the recommendation that the publications enumerated, a half million or so, be condemned, and you will note that many thousands of them are departmental bulletins and other papers that served their full purpose at the proper time, but have been superseded later by proper authority. What is the use of keeping these ancient papers out of the paper mill? That is where they belong, and that is where they ought to go without causing unnecessary expense in hauling and in handling that should be reduced to a minimum. I believe that there is nothing in the printing law of January 12, 1895, that will prevent the chiefs of departments, bureaus, etc., from exercising such discretion in the premises as I have here recommended, and if they see their way clear to do so it will enable me still to obtain for this office such publications as I find of value, and it will relieve not only this office from much labor that brings no results, save money that is wasted to no purpose, but relieve both the Public Printer and the Printing Investigation Commission from considerable trouble that the consideration of my "condemnation reports" now brings with it.

Referring to No. 8, it may be apropos to quote what I said in the Monthly Catalogue for July, under the heading "Dates of Issue of the Monthly Catalogue." It covers the subject quite fairly, I believe. Here it is:

The governing council of the American Library Association, in session at Pasadena, Cal., May 23, 1911, adopted a resolution urging the Superintendent of Documents to publish "if possible" a daily or weekly checklist of public documents, so that librarians might be sooner informed than by the Monthly Catalogue concerning the actual status of documents which they see mentioned in the daily papers. Under date of June 28, 1911, the secretary of the association, Mr. George B. Utley, sent to the Superintendent of Documents official information of the passage of the resolution. July 6, 1911, Mr. Utley was officially informed of the reasons why the issue of the proposed new daily or weekly periodical is not possible.

As it is likely that this information may not reach all interested librarians, a few further words on the general subject it is hoped will not be thought out of place. In a preamble to the A. L. A. resolution of May 23, it is stated that the Monthly Catalogue "is not published until several weeks after the period covered by each issue." "Several" is an indefinite term. Two might be considered "several." The statement therefore may be accepted as literally correct, though its implication, that the catalogue is many weeks behind date, is not correct. The Monthly Catalogue is required to show what documents have been published during a month. Evidently, therefore, its compilation can not be completed until after the close of the month. The compilation is always completed within three or four days after the month closes. Sometimes the printing does not follow as quickly as one would like. This may seem strange to librarians, to whom the Monthly Catalogue is perhaps the most important of all the public documents. If, however, they were in Washington they would soon realize that there are several other Government concerns, and some of them bigger and more exacting than the documents office. There is one known as the Congress of the United States which calls for thousands of pages of printing where the documents office calls for one, and which, when it calls for the right of way in the Government Printing Office (or anywhere else), is able to get it. The printing of the Superintendent of Documents receives every consideration in the Government Printing Office which it is possible to give, but it can not command the right of way over Congress, President, and Cabinet.

It has been a long time since the Monthly Catalogue has failed to be mailed during the month following its date, often by the middle of the month. It is to be noted, also, that its information is quite different from that of "press notices." It enters only documents that have been actually received, and its descriptions are minute and accurate. In its preliminary pages it gives such advance information of forthcoming documents as can be officially secured and vouched for. There is a habit in

some Government offices of giving the newspaper reporters information of proposed publications before the copy is ready for the printer, and sometimes before pen has been put to paper. Plans thus prematurely announced are subject to change and the advance notice may thus mislead the reader. Readers of the Monthly Catalogue are not thus misled.

The Superintendent of Documents is confident that those librarians who keep well informed recognize his purpose to do everything for the great library interest of the country that the limitations of the law and the Executive pressure upon his and other administrative offices for economy make possible.

Requirement No. 9 is a dead letter, and will so remain until the superintendent is given authority to make that personal inspection which is the only "thorough" investigation contemplated by the authors of the printing law. I have made a recommendation along this line heretofore, and believing that a personal visit is the only means by which it can be ascertained whether the conditions that are coupled with the privilege accorded designated depositories are met, I respectfully suggest once more that a moderate sum, say \$2,000, be made available for the purpose indicated.

The duty imposed by requirement No. 10 is met apparently in a manner that satisfies the recipients. At least I hear no complaints. The idea that inspired the creation of designated or depository libraries was evidently the thought that thus would be founded so many lasting depositories of the history of the country, as recorded through its public documents. It is my firm belief that this expectation has been only partially realized. This is due to several causes. An accession of quite a thousand publications each year is an overwhelming influx for a large proportion of the libraries who enjoy the privilege. This has been amply demonstrated by the replies to every inquiry on the subject that has emanated from proper authority, and I deem it my business to call the fact to your notice, together with a suggestion as to a possible remedy for what seems a waste of good literature and a hardship to a number of libraries who find it harder and harder as the years pass and the supply increases to yet greater proportions, to live up to what is doubtless a contract between them and the Government. It is certainly the policy of those in authority to give the American people every opportunity that can reasonably be afforded through the medium of libraries to keep in touch with what emanates from the Nation's printing house. Hence there is not the desire to harshly construe the law as it stands and visit a penalty on libraries that do the best they can in the matter, under adverse circumstances. Why not, then, change the law in the direction of greater latitude? Why not relieve the libraries that find themselves unable to comply fully with present requirements by permitting them to select, at stated periods, the class of literature they desire to have sent them? Then there will be no violation of contract expressed or implied, then there will be no deprivation of a valued privilege, then there will be no denial to a community to keep in touch with such of the country's literature as appeals most to its taste or interest. The details of the plan have been heretofore discussed. They could be readily arranged in such wise as to insure free circulation of what goes to the libraries, and the expense of shipping undesired accessions would be avoided.

In addition to faithful compliance with the foregoing requirements of the law that governs this office, much work is done by its employees that is not specifically enumerated. Perhaps the greatest of these

tasks is just nearing its end. This is the compilation of the new check list of United States public documents, a work of magnitude, which has been in progress for several years. At present writing the final card has been sent to the printer, a large part of the work is in type, the galley proofs read, and several hundred page proofs now in hand. These indicate that the complete work will occupy about 1,800 pages, and they will be about as compact and well filled as it is possible for pages to be. It will be a large book, but when it is considered that it records with a completeness never before attempted the publishing activities of the Government for 120 years—1789—1909—the wonder is that so much information could be packed into a single volume, however large. The check list has been found useful already, in the proof sheets, by Government officials, some of whom have been saved much time and outlay by having thus brought to their hands information which they had expected to acquire only after extended research. It will be even more useful to American public libraries, all of which, whatever else they may have, certainly have collections, large or small, of United States public documents. In addition to its complete lists of the documents published by Congress, the executive departments, and the various independent bureaus and commissions, the new check list contains a wealth of historical notes, by which every publishing office and every series of publications is traced to its remotest lair and brought forth to the light of day. These notes in themselves would make a volume, and the information they give is not only invaluable in itself to every librarian and collector, but doubly so from the fact that it can not be obtained elsewhere.

The public printing, involving as it does the expenditure of millions of dollars each year, has received the careful attention of legislators for a number of years. I deem it my duty, whether directly called upon or not, to offer such suggestions bearing on the subject as my experience with public documents may qualify me to give. Being the selling agent for Government publications, I know what people will buy—hence, what they want. For instance, while there is a fair demand for the “advance sheets” of the Soils Survey—each advance sheet being a pamphlet report on the survey of a designated county or area, containing also a map of the area and costing a few cents—there is hardly any sale demand for the annual volume known as Field Operations of the Bureau of Soils, this volume containing all of the advance sheets of a year bound together, accompanied by a box of maps, and costing several dollars. The price has something to do with the difference of demand for the same material in different forms of publication, but there are other causes which probably have even more influence. The principal one, no doubt, is the fact that in the bound volume incongruous matters are unnaturally brought together. The surveys are made simultaneously in various parts of the country, and the fact that one in Maine and one in California were made in the same year does not create a bond of union. The man who wants the survey of a California county does not want it bound in a big volume of surveys which have been made simultaneously in the other States. If he could have all the California surveys bound together in a big volume that would be quite a different condition. That would bring related instead of unrelated things together. If the whole number of copies were to be printed in

Soils Survey

"advance sheets" or pamphlet editions, leaving the buyers to bind their pamphlets in their own way, many disappointed applicants for advance sheets might be supplied and there would remain fewer undistributed and unsalable volumes of Field Operations. This particular publication is spoken of by way of suggestion rather than criticism. It is but one instance of many.

Again, the annual volume or volumes of Mineral Resources, a standard publication of the Geological Survey, is first issued in "separates," each pamphlet giving the information concerning some special mineral or group of related minerals. When the separates are bound together the connecting bond is not the kind of mineral, but the number of the calendar year. It seems probable that the man interested in silver or slate or coal would prefer the pamphlet relating to his own specialty by itself, rather than bound with the pamphlets giving the statistics of many other minerals in which he is not interested. If he wanted to make a permanent record it would be open to him to bind his pamphlets together at such time and in such manner as pleased him. Similar considerations are applicable to other annuals which are issued in "separates" as well as in completed volumes, and I submit them for what they may be worth. The Superintendent of Documents may be pardoned for a suggestion that seems to touch another subject within his functions. Only recently it was discovered that a so-called historical document was authorized printed by Congress in very crude and unsatisfactory form. The Library of Congress has specialists in American history, whose judgment is universally accepted as authoritative. I respectfully suggest that when a publication of what is believed historical value is contemplated it be first referred to the Library of Congress for examination and report as to its value.

Inasmuch as I have taken the liberty to criticize several provisions in the law that now governs the public printing, you may permit me to refer to a long step in the direction of betterment that has been taken during the late session. I refer to Senate bill No. 2564. This measure proposes a number of changes that will insure better service at lessened cost. It proposes to accord to designated depositories the privilege of selecting what class of documents they desire. This will save at least the cost of transportation both ways—to the libraries, and later to the great national dumping ground, the office of the Superintendent of Documents. It also provides for the adoption of the so-called valuation plan, which will give Members of Congress the opportunity to obtain, up to the value that their quotas in recent years have represented, exactly the publications that they have use for. The annual value of each legislator's share of such publications has been ascertained with practical exactness, and it is proposed, under the provisions of the bill referred to, to give each Senator and Representative a credit on my books about equal to such value, such sum to be treated as a deposit against which he could draw such publications as he has use for, equal in value to his credit. The great benefits resulting from the adoption of this plan must be apparent at a glance. The financier in a world center is not apt to be interested in literature that appeals to the farmer, and the latter may know little and care less regarding matters that city dwellers wish to become posted on. Under the present plan there is no sorting out of literature according to local demand, while under the proposition

advanced in the new bill each Senator and Representative can get just what he needs up to the full value of his allotment. This makes for convenience. More than that, it is certain to make for economy. As I stated in a former report, very little of what the Government publishes, if anything, is waste, provided it goes into channels where it is welcomed. The valuation scheme would make certain of that welcome. And if an objection is entered because the placing of such distribution according to value in the hands of the Superintendent of Documents might cause the abolishment of the folding rooms at the Capitol, permit me to observe that this may be avoided by still sending out the documents through that agency, under the direction of the Superintendent of Documents, the latter to attend principally to the necessary supervision and bookkeeping which the proposed innovation would make necessary. It is very clear to my mind that the plan would prove a welcome aid to many of our legislators in supplying to constituents the publications in demand, and that the waste now inseparable from the method of apportioning to each an equal number of all publications would be avoided.

Reference to the statistical part of this report will show that I handle public documents by the hundreds of thousands. I have to account for each of them. To do this to a certainty, and to meet the steady growth of the business of this office, besides meeting the ever-increasing demand for information, it became necessary to inaugurate a stock scheme which would make it possible to tell immediately in which publication the desired information could be found and whether or not the book, or books, were in stock. This was no simple task when you stop to consider there have been printed in the neighborhood of at least 100,000 different publications. However, a card system has been installed which, besides being a key to a stock of over 1,000,000 publications, serves as a perpetual inventory. The plan of storing under this system is such that I can use every inch of available space and it permits of a new employee being able to locate the publications as well as one who has been in the service for a number of years. A card index is maintained in conjunction with the stock which tells in which publication the information may be found. When this system was installed the possibility of the centralization of the distribution in this office was considered, and the scheme so mapped out as to provide for such centralization. Thus we are not only fully equipped, in this particular, for present needs, but the operations of this office can be greatly increased without calling for a material reconstruction of methods that serve at present.

You are personally cognizant, I think, of the fact that from the day of my entry into this office it has been my aim to conduct the business pertaining thereto, not only as expeditiously and acceptably as my business experience suggested, but at the least outlay to the public treasury that fairness to faithful workers and experience gained by many years in private pursuits would suggest. Whether I have succeeded in this aim, let the figures speak. When I assumed this office, two years ago last July, the appropriations were as follows:

Appropriation for salaries.....	\$103, 198
Appropriation for expenses.....	220, 000

The following are the appropriations for the current year:

Appropriation for salaries.....	\$100,884
Appropriation for expenses.....	155,000

To show that the lessened demand on the Treasury of \$67,314 has not been due to a decreased volume of business, again let the figures speak:

Cash sales for year ending June 30, 1909.....	\$70,919.17
Cash sales for year ending June 30, 1911.....	103,076.21

an increase of nearly 50 per cent. And while the publications sold in the first-named year numbered 377,025, during the last year they reached a total of 710,591. In other words, steadily increasing business at steadily decreasing cost.

In reaching the glad results which the foregoing figures show, I have no desire to claim undue credit for myself. While many years of business activity have tended to make me more observant of the item of "expense" than may be customary in officials who never had the training that the pursuit of business on the outside imparts, my most earnest efforts in the promotion of efficiency and economy must have gone for naught had I not received the loyal and efficient cooperation of my chief lieutenant, Mr. Alton P. Tisdell, and the faithful services of as competent and devoted a staff as ever an administrative officer directed. All honor to each and all for his or her contribution to the magnificent result. And it would be ungrateful in me, in this connection, were I to omit expressing to you my heartfelt thanks for the confidence with which you have always honored me, and for the consistent aid in reaching worthy aims that you have always given me.

Very respectfully,

AUGUST DONATH,
Superintendent of Documents.

Hon. SAMUEL B. DONNELLY,
Public Printer, Washington, D. C.
