Preface

It is OUR PURPOSE to make this edition as comprehensive as possible, for either printer or author, and arrange same so that any effort in fact-finding as to type will be minimized to the greatest degree possible.

The Alphabetical Index on pages IV and V will show the case numbers and in what section type is available. Those who wish to refer to type by case number can obtain full information by referring to pages VI and VII.

The ampersand (&) and punctuation marks do not appear on all specimen pages but are carried in every instance. The dollar sign is available in all fonts except Forum.

The letters L, M, J, Lud, or F appearing at the end of type titles indicate that only types so marked are available for machine composition, i. e., L= Linotype, M= Monotype, J= Job Section Intertype, Lud=Ludlow (Job Section), F=Fotosetter. All faces and sizes of Monotype are available in cases in the Job Composing Section.

All Foundry type is located in the Job Composing Section, but only one job case of each is available, therefore this type should not be used unless absolutely necessary.

With the acquisition of any new type faces or miscellaneous characters, supplemental pages will be distributed within the Office, so that at all times this book will be up to date.

ALPHABETICAL INDEX

"Index by Case Numbers" on pages VI and VII

NOTE.—For foreign-language sorts, see pp. 288–289, Miscellaneous sorts.

FOTOFETTER FACES

These faces can be used **ONLY** in offset or photoengraving processes. Type is composed in the form of a film or paper positive.

As a service to Government Agencies, GPO can furnish photo-composed positives, or negatives made from them, for special purposes such as preparing maps, charts, cover art, or other camera copy.

SAMPLES OF DRAWN RULES

These samples are suggested as standard for ruled forms. However, other weights may be specified and easily obtained. Also, any rule or character sampled by GPO in type metal, may be obtained by repro and applied to drawn rule forms as required.

Solid rules will be furnished unless screening or leaders are specified.

The one-way screened rules are produced by combining positives of the screened rules with positives of the type matter and solid rules. This entails an overlay for separation and a small charge for the extra negatives and positives required.

Leaders are drawn as solid rules and then cut by means of a simple overlay.

ר.....	Resh	r
ש.....	Shin or Shine	s or sh
שׁ.....	Shin	s
שׂ.....	Shin	sh
ת.....	Tav	t

SIMILARITY OF CERTAIN LETTERS:

[Beth Caph]	[Daleth Caph (final) Resh]
[Mem (final) Samekh]	[Gimel Nun]
[Teth Mem]	[Ayin Sadhe]
[Cheth He]	[Tav]
[Vau Zayin]	[Yod Nun (final)]

Hebrew is written from right to left, and has no capital letters.

Five letters, *Caph* (כ), *Mem* (מ), *Nun* (נ), *Pe* (פ), and *Sadhe* (צ), have a different form when they stand at the end of a word (ך, ם, ן, ף, ץ).

In Hebrew writings, words were never divided at the end of a line. Either a blank space was left or certain letters (א, ב, ג, ד, ה) were stretched out (hence called dilatable) to fill the line. In Yiddish (printed in Hebrew characters), however, divisions are made when necessary, particularly in newspaper work, and this practice is followed in the Government Printing Office.

α The letter *Shin* (שׁ) differs from *Shin* (שׂ) only in the position of the diacritical point. Neither is much used, שׂ (without the point) being used for both.

BRASS TYPE

in

BINDERY FINISHING SECTION

showing

Faces, number of fonts of each size, and
decorative rolls, borders,
and ornaments

This is not printer's type and can be used ONLY for stamping and lettering in the Bindery. To be used for library binding and for stamping small quantities (up to approximately 50 copies) of binders, books, etc. On larger quantities, stamping plates are usually made from type set in the Composing Division and shown in other sections of the "Specimens of Type Faces."

NOTE.—Case number in parentheses following name of type indicates typeface in composing sections.
