

ANNUAL REPORT

OF THE

PUBLIC PRINTER

FOR THE

FISCAL YEAR ENDED JUNE 30, 1901.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1901.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 2, 1901.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1901.

Very respectfully,

F. W. PALMER,
Public Printer.

The PRESIDENT OF THE SENATE PRO TEMPORE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

To the Senate and House of Representatives:

The work of this office during the past fiscal year has been larger in volume and necessitating more rapid execution than had been ever before developed since its establishment. This work has been accomplished under the embarrassment of insufficient room, but without complaint from Congress or Executive Departments or bureaus of unnecessary delay, which is due, in part, to the installation of improved machinery in those divisions of the Office where the greatest demand for such additional facilities existed. Apparently the requisitions for official printing have kept pace with the territorial expansion and increase in population of the nation.

Capt. John Stephen Sewell, Corps of Engineers of the Army, who has direct supervision of the construction of the fireproof extension of the Government Printing Office authorized by the sundry civil act approved March 3, 1899, in a report made by him to the Chief of Engineers November 30, states that he hopes the building will be completed by August or September of the coming season and that it will probably be ready for the office to begin to move in some time in July. A portion of that part of the new building intended for a vault for the storage of stereotype plates has been finished and is now in use.

The new engines and electric generators which are intended to furnish light and power for the extension above referred to are in position ready for tests, which will be made when the switchboard now in course of erection shall have been completed. Four new 300-horsepower Scotch type marine boilers, with their steam main, pumps, and other accessories, have been installed, inspected, and found to be satisfactory.

In the interest of the public service I deem it my duty to repeat the following recommendation contained in my last annual report:

The stable at present occupied for the uses of the Government Printing Office, on G street between North Capitol street and First street east, is leased property, at a rental of \$2,600 a year. It was constructed for the special occupancy of the Government Printing Office, but the building is not fireproof, and the rental is liable to terminate at the option of the owner at the end of each year. In view of these facts,

I respectfully recommend the construction of a fireproof building for the uses of a stable as near as possible to the fireproof extension of the Government Printing Office, now in course of erection. For this purpose three lots of 24 feet frontage on G street, extending 175 feet to Jackson alley, immediately contiguous to the new extension, would be available as a site for such a building, ownership and possession to be obtained by condemnation proceedings. Two of the lots only would be necessary for the purposes of the building, but the third should be acquired to comply with the wise provision in every statute passed by Congress for the construction of public buildings, viz, that they "shall be unexposed to danger from fire by an open space of at least forty feet on each side, including streets and alleys."

To the foregoing reasons for the proposed acquisition of a site for a stable may be added this one, viz, that in the event that the use of electric automobiles should prove more practicable than horses and wagons for transporting the products of the Government Printing Office, the supply of the necessary electric currents for charging the automobiles could be furnished from the power plant of the new building.

Herewith are submitted the annual report of the Superintendent of Documents; also the following tabular statements showing the amount of work executed and the disbursements made in the Government Printing Office during the fiscal year ended June 30, 1901, to which your attention is invited.

No. 1. Financial statement of the business of the Government Printing Office for the fiscal year ended June 30, 1901, and the condition of the appropriations July 1, 1901.

No. 2. Recapitulation of statement of condition of appropriations July 1, 1901.

No. 3. Classified statement of payments, by appropriations, for the fiscal year ended June 30, 1901.

No. 4. Showing expenditures for labor, material, paper, and lithographing and engraving during the fiscal years 1894 to 1901, both inclusive.

No. 5. Showing moneys received by the Public Printer during the fiscal year ended June 30, 1901, the sources from which received, and to what accounts deposited in the Treasury.

No. 6. Showing the disbursements on account of salaries and contingent expenses in the office of the Public Printer.

No. 7. Showing the disbursements on account of public printing and binding.

No. 8. Showing the disbursements on account of paper for the public printing and binding.

No. 9. Showing the disbursements on account of lithographing and engraving.

No. 10. Showing the disbursements on account of printing Annual Report (1899) of the Secretary of Agriculture.

No. 11. Showing the disbursements on account of printing Annual Report (1900) of the Secretary of Agriculture.

No. 12. Showing the disbursements on account printing Memorial Volume Centennial Celebration of Establishment of Seat of Government in District of Columbia.

No. 13. Showing the documents printed by authority of law or by order of Congress, the approximate cost of printing and binding them, and the manner in which they are distributed.

No. 14. Showing the allotments, etc., for printing and binding for the Executive and Judicial Departments, and the approximate cost of the work executed for the same.

No. 15. Showing the cost of operating each branch office.

No. 16. Statement of the distribution of the bound and unbound copies of the Congressional Record for the second session of the Fifty-sixth Congress.

No. 17. Showing the number of copies of each Department report and document printed upon requisitions by the heads of Departments.

No. 18. Showing the number of copies of books, with their titles, bound upon requisitions for Senators, Representatives, and Delegates.

No. 19. Statement of contract made (by direction of the Joint Committee on Printing) for supplying paper for the public printing and binding from March 1, 1901, to February 28, 1902.

No. 20. Statement of contracts made for stationery, fuel, forage, ice, and miscellaneous items.

No. 21. Statement of contracts made for material (except paper).

No. 22. Statement of contracts made for lithographing and engraving.

No. 23. Statement of proposals received by the Joint Committee on Printing for furnishing paper for the public printing and binding from March 1, 1901, to February 28, 1902.

No. 24. Statement of proposals received for supplying stationery, fuel, forage, ice, and miscellaneous items.

No. 25. Statement of proposals received for supplying material.

No. 26. Statement of proposals received for lithographing and engraving.

No. 27. Showing the number of persons employed in the public printing and binding, the length of time each was employed, and the amount earned by each.

No. 28. Showing the number of persons employed in printing Annual Report (1899) of the Secretary of Agriculture, the length of time each was employed, and the amount earned by each.

No. 29. Showing the number of persons employed in printing Annual Report (1900) of the Secretary of Agriculture, the length of time each was employed, and the amount earned by each.

F. W. PALMER,
Public Printer.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., November 1, 1901.

SIR: I have the honor to transmit herewith a report in detail of documents sold by this office July 1, 1900, to June 30, 1901, with price of same, as required by law. As compared with the previous year there was an increase of 5,682 in documents sold and of \$180.48 in receipts. About two-thirds of the documents sold were publications of the Department of Agriculture.

AMENDMENT TO LAW GOVERNING SALE OF DOCUMENTS SUGGESTED.

The printing act of 1895 confers upon this office the right to sell any document in its custody the disposition of which is not otherwise specifically directed by law. Under this provision a few copies of substantially every document printed are available for sale. If a document is of more than ordinary interest, however, the supply is never adequate to the demand and much annoyance and disappointment ensues to those who desire it. The correspondence incident to explaining why a document can not be supplied, and the return of remittances, is very burdensome.

This leads me to suggest that the public would be much better served if the Public Printer were authorized to print, upon the requisition of this office, extra editions of documents whenever required for sale. There has been some opposition to this proposition, however, on the theory that it would place the Government in the position of competing with the regular private book trade. In my judgment there is no reason whatever for apprehension upon that ground. I have never heard of a private firm undertaking to reprint a Government publication for gain with but one exception. In fact, Government literature is almost purely of a statistical and scientific nature and can not be handled with profit by the book trade.

Section 42 of the printing act approved January 12, 1895, provides that not to exceed 250 copies of any one document may be ordered if the price of the same is deposited with the Public Printer before the document is put to press. It was thought that this provision would enable the public and such dealers as desired to handle public documents to obtain extra copies of any document desired. But the requirement that the price be deposited before the document is printed renders it impossible for anyone not possessed with information as to when the desired publication is to be printed to take advantage of it. A transaction occurred recently which caused much adverse criticism, yet it was strictly in accord with the provisions of section 42. The editor of the report of a Government commission knowing, by virtue of his position, when the document would go to press, and also knowing that no copies would be printed for free distribution, except to a limited number of libraries, ordered an extra number of copies, which he offered to sell at a price greatly in excess of their cost to him. While there was legally nothing wrong about it, it should be impossible for such a transaction to take place.

If section 42 were abolished and, as a substitute therefor, the Superintendent of Documents should be authorized to order extra copies of documents when needed for sale, everybody would stand on an equal footing. The provision in section 61 of the printing act limiting the sale of more than one copy of a document to the same person should also be abolished. Any person may easily supply

fictitious names and addresses if more than one copy is desired. Many reputable dealers have regular customers for the Revised Statutes, Statutes at Large, and other standard publications, and it is not right, in my opinion, to require them to furnish names and addresses. This law is especially annoying to foreigners, owing to the delay which must ensue incident to correspondence on the subject.

The Department of Agriculture, very soon after the passage of the printing act, took advantage of the provision in section 61 which authorizes any office charged with the sale of documents to turn the same over to the Superintendent of Documents. The Department supplies to this office from 100 to 500 copies of each of its sales publications. The printing of these documents is, of course, paid for out of the appropriation allotted to the Department for printing, while the money received from sales is turned into the Treasury Department as a miscellaneous receipt. From 1,500 to 3,000 copies of almost every bulletin printed by the Department could be sold if they were available. The Department is naturally averse to printing extra editions of bulletins for sale unless its appropriation could be reimbursed from the proceeds. I think the law should be amended so as to permit this to be done.

SALE AND DISTRIBUTION OF THE LAWS OF THE UNITED STATES.

This office is now charged, by special act, with the sale of the laws of the United States. The act making the transfer from the State Department to this office reads as follows:

"Hereafter the Secretary of State shall cause to be delivered to the Superintendent of Documents the Revised Statutes, supplements thereto, session laws, and Statutes at Large, to supply deficiencies, and to be sold by him under the provisions of section 61 of the act approved January 12, 1895, entitled 'An act providing for the public printing and binding and distribution of public documents.'"

The increase of the Army and Navy incident to the Spanish war, the acquisition of Porto Rico, Hawaii, and the Philippines has caused an unprecedented demand for the Revised Statutes, Statutes at Large, and session laws, for official use. Just how far this office is authorized to go in supplying such requisitions I am unable to determine, either by reference to the law under which the same were sold by the Secretary of State or by the act quoted. The laws are the most expensive publications issued by the Government, and the gratuitous distribution of the same should be specifically provided for.

DISPOSITION OF SURPLUS COPIES OF OFFICIAL REGISTER, OR "BLUE BOOK."

The distribution of the Official Register, or "Blue Book," as it is generally known, is specifically provided for by law, and all copies remaining after such distribution are required to be held for sale by the Superintendent of Documents. This requirement has come to be a great embarrassment on account of the small demand. The total sales of the last, or 1899, edition have been 61 copies of volume 1 and 23 copies of volume 2. This leaves more than 300 copies of each volume to be stored until authority can be obtained from Congress to dispose of them. The same may be said of the 1895 and 1897 editions. The 1901 edition will be printed very soon, whereupon the demand for the 1899 edition will entirely cease. The Superintendent of Documents should be authorized to distribute all unsold copies after two years to libraries, and in the meantime should have authority to supply committees in Congress and heads of departments for official use.

DOCUMENTS RECEIVED AND DISTRIBUTED.

There were received from all sources 750,495 documents. Of these 579,510 came from the Government Printing office and 34,453 were received from libraries. The remainder were turned over by the several Executive Departments and offices of the Government.

There were 689,812 documents distributed and sold. Of the documents distributed 257,945 were sent to designated depository libraries. This is equal to 527 documents to each library. Thirty-eight thousand seven hundred and forty-one publications of the Geological Survey were supplied to school, college, and public libraries under the provisions of section 79 of the printing act approved January 12, 1895; 8,692 were supplied to "remainder" depositories, and 178,253 documents were supplied to miscellaneous libraries to complete sets under the clearing-house system.

Prior to the establishment of this office in 1895 about 45,000 documents were distributed to designated depositories annually. From the foregoing statement it appears that there has been an increase in such distribution of more than 500 per cent. To many libraries the receipt of 527 documents, more than half of which are large bound volumes, is embarrassing. A few depositories have already been dropped at their own request, having no available room for documents, while others have asked permission to select such as they find most useful. I have not yet found it practicable to comply with such requests because of the great increase in labor and bookkeeping involved. It is only a question of time, however, until something must be done that will enable librarians to select documents most useful to their patrons.

PUBLIC DOCUMENTS LIBRARY.

There are now in the Public Documents Library 38,982 books, including pamphlets, and 5,934 maps. The increase during the year was 6,965 books and 907 maps.

The library continues to advance steadily toward completion. Notwithstanding the provision of the law requiring a double sending to this office of copies of all Government publications, constant vigilance is required to secure everything. It is no uncommon occurrence to see mention in the newspapers of documents which have not been received, or to hear of such in some other way. All documents thus heard of are pursued and secured. This, of course, does not apply to any of the numerous regular series. Those almost invariably come in without the necessity of making special search for them. But there is a vast variety of special and sporadic publications, mostly small, but often of importance, issued by some of the very numerous bureaus, commissions, divisions, committees, etc. Whether such publications are large or small, important or unimportant, every effort is made to secure them, for it is the duty of this office to collect and catalogue all public documents, not to attempt to pass upon their relative value. It is quite safe to say that from the establishment of the office, six and a half years ago, practically everything that can be of value to libraries or students or public men, of the present or the future, has been secured and preserved.

Beyond this, encouraging progress in gathering the documents of earlier periods has also been made. Indeed, considering the fact that there is no appropriation for supplying anything by purchase, and that consequently not a cent has ever been expended in buying documents to complete the library sets, the progress made in this direction is really remarkable.

Among the more important sets which have been nearly or quite completed may be mentioned those of the Department of Agriculture, of which the library has every bound volume, while the missing bulletins and circulars are very few and of little note; Smithsonian Institution, complete, including all the rare early reports and all the series, except volume 5, miscellaneous collections; Geological Survey, complete, including all the series and the rare first report, some maps probably excepted; Patent Office report and Official Gazette, complete, and specifications and drawings nearly so; Consular Reports, Monthly, Special, Miscellaneous, and Advance Sheets, all complete; Reports of the Secretary of the Treasury, complete, some of the early years being reprints; Bureau of Ethnology, complete; American Historical Association,

complete; Intercontinental Railway Commission, complete; International American Conference, complete; international expositions and international congress, complete sets of all that have been printed; Congressional proceedings, Annals, Register, Globe, and Record, all complete, 375 volumes; Message and Documents, complete, 449 volumes; abridgment of the same, complete, 51 volumes; explorations and surveys, full sets of all the important ones, except Wilkes's; Rebellion Record, complete, 128 volumes; Army Regulations, 16 editions, beginning with 1825; the Army Registers number 102, every year being represented back to 1813; Registers of the Military Academy, complete from 1818, partly reprints. Of the laws, there are full sets of Statutes at Large, Revised Statutes, and numerous early prints, including the original print for the first session of the First Congress and many others of earlier Congresses, a set of the Bioren edition, many Folwell prints, and so on. Of the 42 issues of the Official Register, in 53 volumes, the library has 50; Foreign Relations, complete; Commercial Relations, complete. The set of Congressional Directories begins at the Twenty-seventh Congress, 1841, and is substantially complete from that date. The set of House Manuals begins at 1856, the set of Senate Manuals at 1862. Of the portrait edition of the memorial addresses commemorating Members of Congress, Presidents, and a few others who have died in office, there are 149 volumes, including those in memory of Adams (John Quincy), Anthony, Beck, Benton, Burnside, Calhoun, Cass, Clay, Clayton, Davis (Henry Winter), Douglas, Garfield, Hill (B. H.), Jackson, Johnson, Lincoln, Logan, Marshall, Randall, Stevens (Thaddeus), Sumner, Taylor (Zachary), and Webster. Many of the incomplete sets lack very little of completion.

Of the sixty-four Journals of the Senate and House, printed during the first fourteen Congresses, the library has the original prints of forty-six, including all six of those printed in folio during the first Congress. It has also the Gales & Seaton reprints of the Senate Journals of the first thirteen Congresses, printed 1820, in 5 volumes, and of the House Journals for the same period, printed 1826, in 9 volumes; also the Executive Journals of the Senate, 1789-1829, in 3 volumes.

Of collected and reprinted State Papers, the library has Gales & Seaton's edition, complete in 38 volumes, 1832-1861; Duff Green's edition, in 5 volumes, 1835; Wait's first edition, Boston, 1815, 6 volumes; second edition, 1817, 10 volumes, and third edition, 1819, complete except 3 volumes.

Of historical documents covering earlier periods, the library has Force's American Archives, 9 volumes, covering the years 1774-1776, printed 1837-1853; the Journals of the Continental Congress, 1774-1788; Way & Gideon's reprint, 1823, in 4 volumes; also an incomplete set of Folwell's reprint, 1800-1801; the Secret Journals of the Continental Congress, printed by Wait, Boston, 1821, 4 volumes; Sparks's Diplomatic Correspondence of the Revolution, 12 volumes; Wharton's Diplomatic Correspondence of the Revolution, 3 volumes; Diplomatic Correspondence, 1783-1789, issued by the State Department, 1837; Elliot's Debates on the Adoption of the Federal Constitution, 5 volumes.

Also a set of Margry's French Discoveries and Colonies in Southern and Western North America, 1614-1754, 6 volumes, printed in the French language in Paris, 1876-1886. This is probably the only United States public document ever printed in a foreign language and in a foreign country without a word on its title-page to show that our Government had any connection with it. It consists of documents of the earlier French explorers in America, edited by Pierre Margry, and before unprinted. It is one of the "sources" of American history and one of the most important. It was printed under the direction of the Joint Committee on Library.

The "sheep set," that is, the serially numbered set of Congressional documents bound in full sheep, is now complete from the beginning of the Fifteenth Congress to date. When the printing and binding of the documents of the Fifty-sixth Congress has been finished the numbers of this set will run from 1 to 4220. No volumes

have been found for two or three of the numbers, but there is good reason for believing that they have never been issued in this form. The set in this library contains everything that has been printed in the numbered Congressional sets of documents and reports from December 1, 1817, to date, and all the Senate and House Journals in addition.

Grateful acknowledgments are due to the Library of Congress and to various Government offices and officers for aid in completing sets.

The most important wants of the library are: The Madison Papers, 3 volumes, 1840; Jefferson's Works, 9 volumes, 1853-54; Schoolcraft's History of the Indian Tribes of the United States, 6 volumes, 4°, 1851-1857.

PUBLICATIONS.

The following publications were issued by this office during the fiscal year:

	Pages.
Thirteen Monthly Catalogues	1, 155
Document catalogue of the Fifty-fourth Congress, second session	418
Schedule of volumes of documents and reports of the Fifty-sixth Congress, first session	9
Index to Senate document 270, Fifty-sixth Congress, first session	81
Sixth annual report of Superintendent of Documents, 1900	58
Tables of public documents	12
Price-list of public documents for sale (supplement to third edition)	20
Total	1, 753

The monthly catalogue has been greatly improved by an index made cumulative January to June, and July to November, with a consolidated index to the twelve catalogues in the December number.

At the date of this report there is in the hands of the printer copy for the Document Catalogue (Comprehensive Index), Fifty-fifth Congress, first, second, and third sessions, the Document Index, Fifty-sixth Congress, first session, and Part II of the new checklist, which relates to the documents of the Fifteenth to the Fifty-second Congress. Copy for the Document Index, Fifty-sixth Congress, second session, is substantially finished, but is held awaiting necessary information from officials charged with the compilation of some of the volumes.

Under the provisions of section 62 of the printing act, the Superintendent of Documents is required to index such single volumes of documents as the Joint Committee on Printing shall direct. The committee has exercised this authority in but a single instance. This was in the case of House Doc. No. 270, Fifty-sixth Congress, first session, a three-volume report on food furnished to troops in Cuba and Porto Rico.

DESIGNATED DEPOSITORY LIBRARIES.

Under the provisions of sections 501 and 502 of the Revised Statutes, each Senator, Representative, and Delegate in Congress is authorized to name one school, college, or public library to receive such documents as the law provides shall be distributed to such depositories. Prior to 1895 the distribution to libraries designated in accordance with the foregoing sections was limited to the Congressional numbered sheep-bound documents. The printing act of 1895, in section 58, provides that any document not bearing a Congressional number shall be supplied to the Superintendent of Documents for distribution to depositories, unless the same shall be of a confidential character or printed solely for official use. So that now substantially every document printed is distributed to designated depositories, State and Territorial libraries.

To enable the Superintendent of Documents to make this distribution the Public Printer is required to supply him with 500 copies of each document and report. The Fifty-eighth Congress will consist of 90 Senators, 386 Representatives, and 4 Delegates, a total of 480 members, each of whom will be entitled to name a depository of public documents. The libraries of all the States and Territories, the Executive Departments, the Military School at West Point, the Naval School at Annapolis, and one institution in Massachusetts, are depositories under the general law. These number 60, or a total of 540. It is evident that 540 libraries can not be supplied under existing law. The law should, therefore, be amended so as to authorize the Superintendent of Documents to make requisition upon the Public Printer, at the beginning of each Congress, for the number of documents required to supply designated depository libraries. This would be a more economical arrangement than to provide for the delivery of a fixed number of documents whether needed or not.

By an act approved March 3, 1887, the Secretary of the Interior is directed to supply the bulletins, monographs, and atlases prepared and published by the Geological Survey to two libraries in each Congressional district and to four libraries at large in each State and Territory, the same to be designated to him by the Senators, Representatives, and Delegates of the several States, districts, and Territories, respectively. The distribution authorized by this act will hereafter be made by this office according to an arrangement approved by the Secretary of the Interior and the Public Printer. The Superintendent of Documents is charged with a similar distribution under the provisions of section 79 of an act approved January 12, 1895, known as the printing act. This acquisition increases the number of libraries to be supplied with documents by this office to about 2,700. A list of the same is appended.

DISTRIBUTION OF THE UNITED STATES PUBLIC DOCUMENTS—HOW SOME OF THE DUPLICATION OCCURS, WITH SUGGESTIONS AS TO HOW THE SAME MAY BE PREVENTED.

There is unquestionably much wasteful duplication in the distribution of the publications of the United States Government. Duplication may occur in either of several ways. A librarian or individual may apply to two or more independent agencies which distribute the same document and may receive a copy from each. Or two or more independent agencies may, as a compliment, send the same document to an individual or library unsolicited. The result is the same.

In my opinion the chief cause of duplication is the system of printing two or more editions of a document, each with a different back title, and in at least two styles of binding.

The annual report of a bureau, for instance, is issued by the head of the bureau that compiles it; the Department to which the bureau is subordinate issues it as a part of the departmental report; the departmental report is submitted to Congress and, in pursuance of a general law, is printed in two editions, one with and the other without Congressional numbers. The four editions are printed from the same plates, except that different title-pages are made for each.

Here we have an example of a document printed in four editions, one by the bureau, one by the Department, and two by Congress. The title-pages or back titles on at least three of these editions of the same book differ so materially that an examination of the text would probably be necessary to establish their identity.

The chief desire of every librarian and of every person who has occasion to use the public documents is, that each and every copy of a document shall have the same title-page and back title. The following example alone is sufficient to show that a change in the system is desirable and, I may say, necessary. The annual report of the War Department for the fiscal year ended June 30, 1900, is published in 3 volumes; volume 1 is in 13 parts; parts 11 and 12 of volume 1 are each in 4 volumes;

volume 2 is in 8 parts, and volume 3 is in 1 part, the whole report consisting of 28 books of about 1,000 pages each. The report of the Lieutenant-General of the Army is in 7 parts—being parts 3 to 9, inclusive, of the departmental report, volume 1. The indorsement on the back of part 1 of the report issued by the Lieutenant-General reads as follows: Annual report | of the | Lieutenant-General | Commanding | the Army | in seven parts | part 1. The indorsement on the back of the same report, War Department edition, reads as follows: Report | of the | War Department | vol. 1 | 1900 | part 3 | Lieutenant-General | Commanding the Army.

It would probably puzzle most people to identify the two books as being the same from a reading of the back titles. One would have to know that volume 1 of the War Department report was in 13 parts; that the report of the Lieutenant-General formed parts 3 to 9 of that volume, consequently that part 1, report of the Lieutenant-General, is identical with volume 1, part 3, departmental report.

No more interesting or valuable matter can be found in any of the public documents issued during the year than is contained in the seven volumes of reports compiled by the Lieutenant-General Commanding the Army, but the difficulty in cataloguing them properly will probably deter all but the most persistent searcher from access to their treasures.

The following very apt illustration of the absurd system of numbering documents is given in the reports of my predecessor:

"Nowhere else is a set or series of books called a 'volume.' Nowhere else is a separate book printed in the English tongue called a 'part.' The terms used in describing the publications of the Government have no place in the dictionary, and their meaning in this use is totally different from their meaning in the general usage of the people. This nomenclature and notation perhaps reach the height of their absurdity in the series known as the 'Message and Documents,' which, though it comprises a score of volumes, has been all called House Executive Document No. 1. This No. 1 is, however, divided into eight parts, and several of these parts are divided into volumes, which are again divided into parts. Thus volume 4 of the House Executive Documents is part 2 of Document No. 1, and it is also volume 2 of part 2, and it is also part 2 of part 2 of volume 2. Its full designation is part 2 of part 2 of volume 2 of part 2 of No. 1, and volume 4. The same book is at the same time three parts, two volumes, and one number. Volume 14, House Executive Documents, goes a step farther, having seven designations, namely, part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, and volume 14. Of course all of these designations are never put into practical use. There is probably not a man living who could tell offhand what is the subject-matter of part 2 of part 2 of volume 4 of part 5 of No. 1 of part 2, volume 14, of the House Executive Documents of the Fifty-first Congress, second session. One might as well try to commit to memory the lettering of a Chinese tea chest as charge one's mind with such a rignarole.

"How distressing these methods are to librarians and their clients is probably only faintly appreciated by the Senators and Representatives from whom alone relief can come. Senators and Representatives are not, like librarians, dependent on their own efforts for a knowledge of the contents of the public documents. The Senate and the House have each a document expert who has become a living index by long years of familiarity of all the ins and outs of every Government publication. How highly Congress values these document experts may be inferred from the fact that of all the hundreds of thousands of people in the public service only these two are mentioned by name in an appropriation bill, thus making it a certainty that no gyration of politics shall deprive Senators and Representatives of their invaluable services."

Mr. A. R. Spofford, long the Librarian of Congress, says:

"The system (or rather want of system) has long been the terror of librarians and the despair of all trying to consult the documents. So intricate has been the numbering, arrangement, and indexing, and so continual the change in methods, that

no one except an expert giving his whole time to the business could possibly keep up with them or successfully find or interpret them to others."

The manner in which the bureau and departmental reports are distributed is quite as inconsistent and wasteful as the varying title-pages and back titles are puzzling and inharmonious. About 300 offices compile and publish the annual reports and miscellaneous documents of the United States Government. Each of these author offices is to a limited extent an independent agency for the distribution of its own publications, with absolutely no check system by which to prevent duplication with other agencies through which the same document is distributed.

It is quite possible, for instance, for a library to obtain as many as nine copies of one document without any of the many agencies through which it is distributed being aware of the fact. The operation would be substantially as follows: First, one copy from the bureau; second, one copy from the department to which the bureau is subordinate; third, fourth, and fifth, one copy from the Representative, and one from the two Senators representing the State; sixth, seventh, eighth, duplicating the latter operation by requesting the document, specifying its document number instead of its title; and ninth, one copy from the Superintendent of Documents. This illustrates a possible abuse of the present system of distributing documents.

Remedial legislation which will abolish such a system as I have described would result in three very important reforms in the printing and binding and distribution of documents:

First. The annual reports and other Executive publications will be excluded from the Congressional numbered series of documents; and every copy of a document will bear the same inscription on the back and the same title-page.

Second. The issue of but one edition of a document, uniform as to back title, title-page, and binding, will enable the Public Printer to deliver any document as soon as printed for distribution to those entitled to it.

Third. Duplication will be greatly reduced, both to individuals and to libraries.

Having given the subject a great deal of consideration during the past four years, I am satisfied that the only practical reform is to abolish the practice of printing the annual reports and miscellaneous publications of the Executive Departments and offices as numbered Congressional documents.

A prominent and skilled librarian said to me a short time ago:

"I am almost compelled to keep up two sets of public documents so far as I can get them. The sheep-bound Congressional set I keep because our library is a designated depository, but I never refer to it if we have the cloth-bound edition. Suppose we have a call for a certain volume or a number of volumes of reports of the Geological Survey, Education, Smithsonian, Ethnology, and the like—I can put my hand on the cloth-bound set in a moment. If we have only the sheep-bound set, I must look over several hundred books and pick them out here and there where they come in regular series."

This explains why members of Congress are continually importuned by librarians for documents that will necessarily be duplicated to them later on in another edition.

CONSOLIDATION OF DOCUMENT DISTRIBUTING AGENCIES RECOMMENDED.

The chief of the document division, Department of the Interior, in his report for the fiscal year 1891, speaking of the distribution of the reports of the Tenth Census, says:

"The further the distribution of this important series of documents proceeds the larger is the number of duplicate orders given, showing more conclusively each month the importance of having the distribution, especially of all valuable and costly publications of the Government, made through one office, by which, through a proper system of registration, all duplications can be prevented.

"The system of registration adopted in the distribution of documents is such that it is possible almost in a single moment to ascertain whether any individual or library

in the country has received any one of the 26 volumes forming the series, so that it is possible to prevent all duplication in their distribution. The number of volumes thus saved for distribution to parties who would not otherwise have received them is little if anything less than 50,000."

This office has practically completed the distribution of the Messages and Papers of the Presidents, a very valuable serial publication in ten volumes. Of the 34,000 designations made by members of Congress about 3,000 names were duplicated, but duplicate distribution was prevented in every instance except when specially directed by the member after his attention had been called to the matter. The result was the saving of 30,000 volumes for distribution to persons who would otherwise not have been supplied.

This series of documents was considered so valuable that numerous attempts were made by individuals to obtain more than one set. It would have been impossible to frustrate them had the distribution been in the hands of two or more offices. If one office can so satisfactorily handle a serial publication, why not, as far as practicable, place the distribution of all the public documents under the supervision of one office? I would suggest the consolidation of all the document-distributing agencies of the Government, except the folding rooms of the two Houses of Congress, under one head. Such a consolidation need not interfere with the distribution by the heads of the Executive Departments and other offices of their own publications just as freely as now, except that duplication would be prevented. Consolidation would result in economy in many directions, and much valuable space now occupied in the overcrowded department buildings would become available for office use.

Documents intended for distribution by the departments and offices could be stored in a central warehouse and placed to the credit of the proper officials, just as documents are placed to the credit of members of Congress in the folding rooms of the two Houses.

It was no doubt the intention of Congress to give supervisory authority over the distribution of all public documents to the Superintendent of Documents, as the language of section 61 of the printing act approved January 12, 1895, indicates. It reads as follows:

"He shall have general supervision of the distribution of all public documents, and to his custody shall be committed all documents subject to distribution, excepting those printed for the special official use of the Executive Departments, and those printed for the use of the two Houses of Congress, which shall be delivered to the folding rooms of said Houses and distributed or delivered ready for distribution to members and Delegates upon their order by the superintendents of the folding rooms of the Senate and House of Representatives."

The exception in this section removes from the supervisory charge of the Superintendent of Documents the documents printed for the special official use of the departments, and the documents authorized to be distributed by Senators, Representatives, and Delegates in Congress. But section 92 of the same act provides as follows:

"Government publications printed for or received by the Executive Departments, whether for official use or for distribution, shall be distributed by a competent person detailed to such duty in each Department by the head thereof. He shall keep an account in detail of all publications received and distributed by him. He shall prevent duplication, and make a detailed report to the head of the Department, who shall transmit the same annually to Congress."

These two sections of the law, taking into consideration the provisions of section 73 of the same act, which authorizes the printing of large editions of documents for distribution by bureaus and departments, are not harmonious. So much doubt existed in the mind of my predecessor—the first Superintendent of Documents appointed under the act—that he never assumed or attempted to assume supervision of the distribution of documents other than those actually committed to his charge. I

have felt that it was a matter rather for Congress to straighten out, hence have never claimed jurisdiction beyond what the law clearly indicated should be assumed by the head of this office.

It will be seen by a reading of section 92, previously quoted, that Congress intended to prevent duplication. The object is defeated, however, because there are so many channels through which the same document may be obtained.

Recently I sent 1,500 circular letters to librarians asking for statistics concerning public documents. One of the questions asked was, "You are requested to state your views on the desirability of consolidating under one head all the document-distributing agencies of the Government." The replies (more than 1,000) were substantially unanimous in favor of the proposition.

UNBOUND DOCUMENTS.

The question as to what shall be done with surplus unbound documents is a problem that has confronted this office for two or three years. Five hundred copies of every document and report printed by Congress are reserved for binding upon orders of Senators, Representatives, and Delegates in Congress. All copies not called for within two years after printing are required to be delivered to the Superintendent of Documents for sale or distribution. The law provides that these documents shall be delivered by the Public Printer in unstitched form. There are now upward of 250,000 volumes of unstitched documents stored in the warehouse subject to the order of this office. Some months ago I selected and had delivered about 10,000 volumes, consisting of Smithsonian reports, ethnology, geology, American Historical Association, Commissioner of Education reports, Records of the Union and Confederate Navies, etc., which are among the most valuable documents printed by the Government. I gave general notice that these documents would be sent gratuitously to any library that would agree to bind them. Not one hundred volumes of books have been taken upon this condition. The reason is that few libraries are provided with funds for binding books of any kind.

If Congress does not see proper to provide for the binding of these surplus unstitched documents, it will be necessary, in order to make room in the warehouse, to dispose of most of them as waste paper. It seems to me almost wicked to do this, as there are hundreds of school and public libraries in the country that would be glad to get them if they were suitably bound. The expense of binding these books would probably not exceed 15 cents a volume.

Another large edition of documents is issued and delivered to the Senate and House document rooms in unbound form, on the theory that they are required for immediate use of Senators and Representatives for legislative purposes. Six hundred copies of every document and report printed upon the order of Congress are so delivered. Probably not one-half of them are delivered during a session of Congress, consequently very few can be of any service to members as aids to legislation. Many of these documents are serials, such as the Naval War Records, Rebellion Records, and the like. Others are of a scientific nature, such as monographs, bulletins, and reports of the Geological Survey, the American Ephemeris and Nautical Almanac, reports of the Smithsonian Institution, Bureau of Ethnology, the American Historical Association, etc. None of these are of any use for legislative purposes, and, in my judgment, should never be sent out of the Government Printing Office in unbound form. The grand total of documents of the Fifty-sixth Congress that have been, or will be, delivered to the document rooms of the two Houses in unbound form is 225,000 volumes. Probably 100,000 volumes will be stored in the Capitol for a time and will then be disposed of as waste paper.

Very respectfully,

L. C. FERRELL,

Superintendent of Documents.

Hon. F. W. PALMER,
Public Printer.

LIST OF LIBRARIES DESIGNATED AS DEPOSITORIES OF PUBLIC DOCUMENTS.

“Designated” depositories are libraries and institutions designated by Senators, Representatives, and Delegates under the provisions of sections 501 and 502, Revised Statutes.

“Geological” depositories are libraries designated by Senators, Representatives, and Delegates to receive the scientific publications of the Geological Survey, under the provisions of an act approved March 3, 1887, Supplement Revised Statutes, volume 1, page 575, and section 79 of an act approved January 12, 1895, Supplement Revised Statutes, volume 2, Nos. 1-5, page 375.

“Remainder” depositories are libraries designated by Senators, Representatives, and Delegates under the provisions of section 68 of an act approved January 12, 1895, Supplement Revised Statutes, volume 2, Nos. 1-5, page 352.
