APPROVAL BY THE
JOINT COMMITTEE ON PRINTING

Congress of the United States,
Joint Committee on Printing,
Washington, February 4, 1922.

Dear Sir: Receipt is acknowledged of the proof pages of the Government Printing Office Style Manual for inspection and approval.

The Style Manual as compiled and submitted is approved by the Joint Committee on Printing.

Respectfully,

GEORGE H. MOSES,
Chairman.

To the PUBLIC PRINTER,
Government Printing Office.

RESOLUTION OF THE
PERMANENT CONFERENCE ON PRINTING

The following resolution was unanimously adopted on January 11, 1922, by the Permanent Conference on Printing, composed of representatives of the various executive departments and independent establishments of the Government, as organized with the approval of the President and the Director of the Bureau of the Budget:

RESOLVED, That the Government Printing Office Style Manual as compiled under direction of the Public Printer be approved and adopted as the style to be followed in all Government departments and independent bureaus on and after February 15, 1922.

SUGGESTIONS TO AUTHORS AND DEPARTMENT EDITORS.

Copy should be carefully edited, in accordance with the style laid down in this Style Manual before being sent to the Government Printing Office; that is, editing should not be done on proof sheets.

This STYLE MANUAL is intended to facilitate public printing. If those submitting copy for publication will carefully observe the following suggestions, they will contribute materially toward that end.

Copy should be sent flat, numbered consecutively, typewritten if possible, unless reprint, and each page should begin with a paragraph, as the passing of "run downs" is an expensive operation.

The Government Printing Office style must be followed in department printing in all cases.

Write on one side of the paper only. Duplicate copy of reprint must be furnished when possible if both sides are to be used.

Authors and departments are requested to send to this office the first sheets of copy, not the carbon copies, for the first sheets are much plainer than the carbons. This is especially requested for copy in foreign languages and copy containing figures.

Proper names, foreign words, and technical terms should be written plainly and verified. Illegible signatures and figures should be rewritten. Corrections of figures should not be written over the originals.

Manuscript and typewritten copy in a foreign language should be marked accurately to show capitalization, punctuation, accents, etc.

Abbreviations should not be used unless they are to be printed as written, in which case they should be marked "follow."

Answer all queries on proof, as delay and errors often result from neglecting them.

All tabulated statements should be written on separate sheets; that is, end the preceding paragraph of text on one sheet, place the table on the next, and commence the next paragraph on the following sheet.

Reference marks in text and tables should be arranged consecutively across each page. (See table, p. 36.)

Photographs, drawings, etc., for illustrations should accompany manuscript, each bearing the name of the publication in which it is to be inserted and the figure number or plate number. The proper place for each illustration should be indicated on the copy by title, legend, or otherwise.

If a publication is composed of several parts, a scheme of the desired arrangement should accompany the first installment of copy.

All corrections should be made on first proofs submitted, later proofs being intended for the purpose of verification only. Plate corrections will be made only when absolutely necessary.

Requisitions for work containing illustrations should give explicit instructions as to whether or not illustrations are to be furnished by the Government Printing Office, giving the number and indicating the process of reproduction. Instructions should be given on the margin of each illustration if reduction is necessary.

A publication containing illustrations should be accompanied by a letter certifying that the illustrations are necessary and relate entirely to the transaction of public business. (See 33 Stat. L. 1213.)

Samples are desirable and should be furnished if possible. They should be plainly marked, showing clearly whether intended for style of type, size of type page, paper, trim, lettering, or binding.

It is imperative that corrections should be marked on the margins of a proof sheet opposite the indicated errors. Do not attempt to make a correction by writing over the print or between the lines. Errors marked in this way are in danger of being overlooked and are generally illegible.

Proofs read by authors or department readers should be marked to conform to the following style:

- ⊙ Period.
- , Comma.
- Hyphen.
- : Colon.
- ⋮ Semicolon.
- ∩ Apostrophe.
- “ ” Quotations.

It does not appear that the earliest printers had any method of correcting errors before the form was on the press. The learned ~~The learned~~ correctors of the first two centuries of printing were not proofreaders in our sense; they were rather what we should term office editors. Their labors were chiefly to see that the proof corresponded to the copy, but that the printed page was correct in its latinity / ~~that the words were there~~ and that the sense was right. They cared but little about orthography, bad letters, or purely printers' errors, and when the text seemed to them wrong they consulted fresh authorities or altered it on their own responsibility. Good proofs, in the modern sense, were ~~not possible~~ until professional readers were employed / men who had first a printer's education, and then spent many years in the correction of proof. The orthography of English, which for the past century has undergone little change, was very fluctuating until after the publication of Johnson's Dictionary, and capitals, which have been used with considerable regularity for the past (50) years, were previously used on the [miss for hit] plan. The approach to regularity, so far as we have may be attributed to the growth of a class of professional proof readers, and it is to them that we owe the correctness of modern printing. More errors have been found in the Bible than in any other one work. For many generations it was frequently the case that Bibles were brought out stealthily, from fear of governmental interference. They were frequently printed from imperfect texts, and were often modified to meet the views of those who published them. The story is related that a certain woman in Germany, who was the wife of a printer, and had become disgusted with the continual assertions of the [superiority] of man over woman which she had heard, hurried into the composing room while her husband was at supper and altered a sentence in the Bible, which he was printing, so that it read Narr instead of Herr, thus making the verse read "And he shall be thy fool" instead of "And he shall be thy Lord." The word, not was omitted by Barker, the king's printer in England in 1632, in printing the seventh commandment. He was fined £3,000 on this account.

INSTRUCTIONS TO COPY EDITORS, COMPOSITORS, OPERATORS, READERS, AND REVISERS.

EDITING COPY.

The first duty of copy editors is to mark those things which are not readily understood and to indicate headings, indentions, dashes, new pages, new odd pages, and such other matters as are necessary to give the completed book a good typographic appearance. Mark size of text type and whether it is to be leaded or double leaded, etc.; verify folio numbers, and plainly indicate references, footnotes, cut-ins, etc. Copy not otherwise marked will be set solid.

It is not absolutely necessary to mark again anything which has been plainly indicated at the beginning of a sheet, as the preparation is to be followed if the same thing should appear more than once on the sheet; but on copy marked "follow" the preparation must be carried throughout.

Copy which is ordered to be kept clean and returned intact must be marked as lightly as possible, so that erasures may be easily made.

Copy editor's instructions, which accompany each job, are written to cover the general style and certain peculiarities or deviations from style. These instructions must be followed.

The following rules will apply to manuscript, typewritten, or printed copy:

Abbreviations.

In marking abbreviations to be spelled, copy editors must show what the spelled form will be, unless the abbreviations are common and not susceptible of two constructions.

Addresses.

Mark caps, small caps, italic, and abbreviations, indicating where lines are to be broken if necessary.

Capitalization.

Capital and lower-case letters must be indicated, especially unusual forms.

Decimals.

In figure columns containing decimals, editors must indicate at top of each folio the number of decimal places necessary to align the points.

Footnotes and References.

Footnotes and references should run consecutively from 1 to 99. Copy editors must see that references and footnotes are plainly marked and indicate full, half, or third measure. Last footnote number must be given to chief reviser, who will enter it on his copy book, so that there will be no question as to the next footnote number. (See also Page and stone revising, p. 7.)

Headings.

Mark case number of headings on each sheet once; if two or more sizes are used, mark each in every instance; indicate italic, small caps, and caps and small caps, specifying size of type.

Pick-up.

Always indicate jacket number of job from which matter is to be picked up.

Reprint Copy.

Copy editor *must ascertain* whether reprint can be picked up; and if it can, he must state the jacket number of the pick-up.

Signs, Symbols, Etc.

In text and tables all signs, symbols, dashes, superiors, etc., must be plainly marked; write names of Greek letters when used, as they are frequently mistaken for italic or signs.

The symbols Al, Cl, Tl are sometimes mistaken for A1, C1, T1 in typewritten matter. Copy editors must indicate that the character is an "1," not the figure 1.

Casting Tables.

In making cast for tables care must be taken to allow sufficient space in columns for the footnote figures. (See p. 36.)

COMPOSITION.

Compositors and operators are directed to study carefully the rules governing composition. A failure to do this will show plainly on the proof.

Every precaution must be taken to prevent the soiling of proof sheets, as it is necessary for the reviser to see clearly every mark on the margin of a proof after it has been corrected.

After a proof is read the first time, if a word or line is pried or a "drop-out" occurs, it is the duty of the workman to call attention to it in writing on the latest proof sheet. If a proof sheet is not available or immediately at hand, the types involved must be placed feet uppermost when returning them to position. This direction is for all who handle type.

In correcting matter set on the linotype machine, care must be taken to insert corrected type slugs in their proper places and to remove only such type slugs as contain errors. Matter must be "run down" to see that lines have not been duplicated or eliminated. If in doubt, read the slugs.

It is often impossible to decide whether a poor proof is due to bad type or cold metal or only to a poor impression; therefore, in order to insure accuracy and to save time, the operator must indicate such portions as have been reset.

Do not make corrections when queries are in a ring, as the queries are intended for the author.

READING AND COPY HOLDING.

Foremen of composing rooms will see that copy editor's instruction sheet is sent to proof room with first installment of each job.

Readers must consult copy editor's instruction sheet.

Speed is desirable and must be aimed at, but accuracy is of first importance.

If the reader detects inconsistent and erroneous statements, obviously made by the writer through lapse of memory or slip of the pen, it is his duty to correct them. He must *know, not suspect*, that they are errors, and be prepared, if called upon, to vindicate the soundness of his correction by recognized authority. If he does not know, he should query.

When the grammatical construction of a sentence or clause is questioned by a reader and it seems desirable to change the form, indicate the proposed correction, add a query mark, and inclose all in a ring. If a statement of fact is thought erroneous or is doubtful, underscore the matter in doubt and carry query mark in ring on margin.

Queried corrections inside a ring are not to be made, but are intended to go to the author. If it is desired to have a correction made and the query stand for the author, place query outside the ring.

Proofs which are not clearly printed or which are in any manner defective must be refused.

The manner in which correction marks are made on a proof is an element of considerable importance. Straggling, unsymmetrical characters, disconnected marks placed on the margins above or below the lines to which they relate, irregular lines leading from an incorrect letter or word to a correction, large marks, marks made with a blunt pencil, indistinct marks, and a frequent use of the eraser to obliterate marks hastily or incorrectly made are all faults to be avoided. In reading proof of wide tables, the reader should take advantage of white space as near as possible to the error and place the correction therein, thus aiding all who have occasion to handle the proof afterwards. Obliterate entirely a broken or defective figure and rewrite it in a ring.

In marking errors in display type always indicate the case number.

On discovering any wrong-font matrices readers must immediately notify referee, who will at once send notice to the operator.

Readers must never make important changes in indentions or tables without consulting the referee or copy editor.

The marks of the copy editor must be given consideration by all, as he is in a position to know more about the peculiarities of a job than one who reads but a small portion of it.

Instructions on copy as to the confidential nature of work, number of proofs, size of paper, number of copies, location of illustrations, new pages, new odd pages, etc., must in every instance be carried on proof sheet by readers. In passing "run downs," the galley slug of the following galley must be carried on copy where break occurs.

Folios of copy must be "run" by copyholder on first reading of proofs. This applies to all work and is especially important on indexes.

In reading copy avoid an unnecessarily loud tone of voice. Remember that small words are as important as large ones, and should be pronounced distinctly. Plurals must be clearly sounded.

REVISING.

Galley Revising.

The importance of revising proofs well can not be overestimated. While a reviser is not expected to read proof, it is not enough for him to follow slavishly the marks found on the proof sheet. He must see that all corrections have been properly made in the type, that words or lines have not been transposed by the compositor in making the corrections, and that the rules governing spacing, division of words, and good printing generally have been observed. The reader or reviser who passes bad spacing will be held at fault.

A reviser must not remodel the punctuation of the readers or make any important changes in the work. If he thinks that an important change should be made, he must submit the proposed change to the foreman for decision.

All instructions on proofs must, in every instance, be transferred to revised sheets.

All queries made by readers must be carefully transferred to the revises.

Every paragraph in a proof containing an alteration which makes one or more overruns should be reread as first proof.

Revising must be done with reasonable dispatch, but good work must not be sacrificed to haste.

The slug number of the corrector must be marked on revises if errors have been made by him in correcting.

Page and Stone Revising.

Page and stone revising is work which requires great diligence and care. Not only must the reviser see that the rules governing the work of those who precede him have been followed, but he must be on the alert for a multiplicity of points not coming within their sphere.

Special care must be exercised in revising linotype matter. It is necessary to read the lines in which corrections have been made, to see that the line has been inserted in the proper place and that the lines above and below it have not been disturbed.

Revisers must promptly notify the foreman of the proof room when variations from this Style Manual are being made by department readers.

General rules only can be given to guide the reviser. He handles a variety of work and must decide each point as it presents itself. He is cautioned never to allow his work to get behind (calling for assistance when rushed) and never to sacrifice accuracy for the sake of speed.

The following rules must be carefully studied:

1. See that the proof sheets are clean and clear; send for another proof in case they are not.
2. See that galley proofs run consecutively and, in continuous make-up, that galley slips connect, before beginning the page revise.
3. See that page folios are consecutive, that running heads are correct and uniform, and that the proper signature is correctly placed. If an error is found in running heads or in signature, notify chief reviser immediately, so that the correction may be made in other forms of same job. (See note regarding signature numbers, p. 135.)
4. Revise carefully, observe connection between pages, carry all unanswered queries if the proof goes again to the author, or if not see that all queries are answered, and take care that continued and repeated lines are free from errors.
5. If a revise is not properly corrected or is not reasonably free from error, call for another correction and proof (stating number wanted) and destroy all duplicates.
6. Be on the lookout for "drop-outs," "doublets," and "transpositions."
7. Read all running heads and box heads in continued tables; see that all leading lines are carried at the top where subordinate matter turns over; that dollar marks and italic captions of columns are properly placed and uniform; that the matter is as compact as circumstances will permit, and that footnotes fall on the page containing the corresponding references and are properly arranged.
8. Preserve complete files of all proofs returned to the desk in the ordinary course of business, especially of the final proofs from which work is sent to press or foundry.
9. On first page of a signature of a stone revise carry the number of copies and kind of paper, with any special directions that may be necessary, and see that the form is properly imposed.
10. Be particular in making the "mark off" on a galley slip when the first page proofs are sent out, cutting the proof sheet and noting upon it the connecting galley slug, the folio of the succeeding page, and the proper signature of the same. Retain the "mark off" and deliver the galley slips with the clean proof to the chief reviser.
11. Always make sure that different sets of proof sheets on any work are correctly marked in series, as "R," "2R," "3R," etc.; where a sheet is stamped "Another proof," carry the same designating "R" on the corresponding clean proof, destroying the stamped proof when it has served its purpose. Advance the "R" ("2R," "3R," etc.) on each set of page proofs returned from department if a dummy folio has been used, but when the *true* folio is finally given revert to the single "R."
12. If two or more jobs are imposed in one form, the reviser must separate the parts to verify the imposition. Until familiar with the "fold," caution must be exercised in cutting the sheet.
13. Page, stone, and foundry revises are equally important. With the latter special care must be taken that rules do not lap, that work is not jammed in the "lockup," that damaged letters and "slips" are indicated, and that the matter is ready in all respects to pass severe criticism.
14. Government publications will be made up in the following order:

Page I, title; page II, blank; page III, table of contents; when contents end on page III, then page IV, blank; page V, letter of transmittal; page VI, blank. The text proper will begin with page 1. (See note regarding signature numbers, p. 135.)

In the body of the work new pages will be properly indicated on the proof sheet. Tables of contents, letters of transmittal, lists of illustrations, the text proper of a book, and all matter following half titles (except parallel tables) must begin on a new odd page unless instructions to the contrary are given.

The legend lines of full-page cuts which run the broad way should be on the binding, or inside, margin, except where a broad cut is on an even page and a broad cut on the facing odd page, in which case both legends are to run up; that is, the even-page legend should be on the binding, or inside, margin and the odd-page legend on the outside margin.

Footnotes.—Footnote reference figures must be run consecutively from 1 to 99. This rule applies not only to text but also to tabular matter, each new table to begin with 1.

In publications that are divided into chapters, parts, or separates, begin each chapter, part, or separate with footnote 1.

If a reference is repeated on another page, it should carry the original footnote; but to prevent repetition, especially in the case of long notes, copy editor may use the words "See footnote 3 (or 6, 10, etc.) on p. —" instead of the entire footnote.

If a footnote is eliminated in proof, change reference figures down to last reference on page only. For example, if reference figures on pages 4 and 5 run from 1 to 10 on page 4 and 11 to 20 on page 5, reference 8 being eliminated, change 9 and 10 to read 8 and 9, making no change in reference figures on page 5. Remember that the purpose of ignoring breaks caused by elimination of footnotes in proof is to avoid, as far as possible, the changing of footnote references and that all text references and footnotes are to be left as prepared by copy editor; therefore consult the proper official before making any change. If footnotes in entire job have been made uniform, even though not according to style, do not change. Footnotes to be made paragraphs. Short notes may be doubled up. If a footnote is added by department, use an italic reference letter. Where table with footnotes falls on bottom of page containing footnotes in text, change references in table to italic letters.

In revising galley into pages, reviser must be careful to enter on "mark-off" slip the number of the last footnote and see that instructions to maker-up and copy editor are followed.

(See also Footnotes and references, p. 35.)

Press Revising.

Press revising calls for the exercise of extreme care. The press reviser must be thoroughly conversant with the style and make-up of Government publications and have a general knowledge of printing in its various branches. He is required to O. K. all forms that go to press—bookwork, covers, job work, etc. He must necessarily have a knowledge of the bindery operations required to complete a book or job and be familiar with the imposition of forms, with special reference to head, back, and side margins, in order to allow the trimming of the book or job to the required size. The press reviser must work to a large extent upon his own responsibility and he is accountable for the work as finally printed.

The press reviser must have a fair knowledge of the different grades of paper used in the office, so as to be positive that the right stock has been issued to the pressman.

SIGNATURE MARKS, ETC.

(See note on signature numbers, p. 135.)

The following instructions and examples serve as a guide for signature marks, etc.: Year should follow jacket number in signatures. (See below.)

Place signature mark below the "all" (O) mark if both appear on the same page.

Place the "all" mark below the bulletin or circular number if both appear on the same page.

All jobs to be cast take a degree mark (°) immediately after the jacket number in the signature line.

With the exception of pasters, and pages smaller than document, signature lines will be set in 8-point. On pages smaller than document and on pasters use 6-point.

The Government Printing Office imprint must appear on all printed matter.

Use full Government Printing Office imprint on title-page of all speeches (Washington, Government Printing Office, 1923), and when page 2 is blank place Government Printing Office crest thereon also.

A black star (★) should be placed on all jobs reprinted on account of error. The star should appear in signature line, thus:

17234—22—2★

A black star should be placed on title-page also, 3 ems from left.

RULES AND STYLE OF COMPOSITION.

INTRODUCTION.

A consistent and orderly system of capitalizing, compounding, and spelling is important in Government work. As far as the requirements of the Government printing can be provided for, specific directions covering them are given in this volume. In meeting special cases as they arise the application of the principles of the *STYLE MANUAL* will be valuable. The principles adopted in the past have been largely retained. Changes have been made only where they appeared to be necessary to meet new conditions and to add to the efficiency of the Government Printing Office in its handling of the Government printing.

AUTHORITY.

Following the custom of past years, Webster's Dictionary has been accepted as the authority in spelling, compounding, and dividing of words. The current edition of Webster's New International Dictionary will be followed in the work of the office.

CAPITALIZATION.

(See also Guide to capitalization, p. 20.)

Proper Names, Etc.

Capitalize proper names, or words used as such, singular or plural; also when used as adjectives, unless the adjective form is a different word, derived from a common noun used as a proper noun in specific cases; for example, President (presidential), Senate (senatorial), Congress (congressional), Province (provincial). Exceptions: Democratic, Territorial, as relating to the Democratic Party or a Territory of the United States.

National Legislatures, Etc.

Capitalize, singular or plural, with the name or standing alone, the title of any ruler, the name of any national legislative body and its constituent branches, and the name of domain or administrative subdivisions of any country. This includes dependencies like Australia, Canada, etc. Capitalize also the adjective forms, unless embraced in the exceptions noted in the preceding paragraph.

State Legislatures.

Capitalize the titles of State legislative bodies when accompanied by the name, as the Massachusetts General Court, the General Court of Massachusetts, the New York Assembly, the Assembly of New York, the Rhode Island House of Representatives, the House of Representatives of Rhode Island, Ohio Legislature, the Legislature of Ohio; but lower-case the general court, the assembly, the house of representatives, the legislature, etc., if standing alone.

United States Departments, Bureaus, and Offices.

Capitalize the titles of United States executive departments, bureaus, services, etc., and organizations of the Army and Navy, singular, plural, and adjective forms; lower-case department, bureau, corps, etc., when standing alone.

Capitalize department, bureau, division, office, etc., when used with a name that is capitalized, even though it is not a part of the exact title, as Pension Office for Bureau of Pensions, Census Office for Bureau of the Census, Land Department for General Land Office, Corporations Division for Bureau of Corporations, etc. This refers only to branches of the Government.

Miscellaneous Capitalized Terms.

Capitalize all geographic terms, singular or plural, when with the name. (See also Geographic names, p. 23.)

Capitalize street, avenue, road, lane, etc., singular or plural, when with the name.

Capitalize all titles immediately preceding names of persons, but lower-case when following, except as noted on page 29, and those always capitalized. In addresses and with signatures capitalize both before and after name.

Capitalize a fanciful or popular appellation as if a real name, as Keystone State, Bay State, City of Churches, Monumental City, Capital City, Twin Cities (Minneapolis and St. Paul), Windy City, the Hub, Great Father (the President), etc.

Capitalize monuments, tombs, statues, etc., if of a public character and preceded or followed by a proper name or a word used as such, as Bunker Hill Monument, Cleopatra's Needle, Grant's Tomb, Rochambeau Statue, Statue of Liberty, etc.; but lower-case the words "monument," "tomb," "statue," etc., if used in a general way or mentioned casually, as a statue of Columbus, the tomb of John Brown, etc.

Capitalize such terms as the following when with a name or number and used as a proper noun: Breakwater, chute, dam, house, light, woods, etc. Care must be taken, however, not to confound a proper adjective and common noun with a proper noun. For instance, the Johnson House, meaning a hotel, would be a proper noun; but the Johnson house (lower-case letter) shows the word "Johnson" as a proper adjective and the word "house" as a common noun. Pier A or Pier 19, but at the White Star Line's pier; Boston Light, Boston and Boone Island Lights, etc., but Massachusetts Bay lights.

Lower-case Forms.

Lower-case, when standing alone, the common noun in titles, except Government, Army, and Navy; for example, Treasury Department, Patent Office, Labor Bureau, and Interstate Commerce Commission should be printed as the department, the office, the bureau, and the commission; but the Government, the Army, and the Navy for United States Government, United States Army, and United States Navy. These exceptions are made because the short form is the one commonly used, and if lower-cased would be brought into direct contrast with titles of subordinate organizations which are capitalized.

Lower-case the names of districts (congressional, judicial, etc.), except District of Columbia, the District of Alaska, Federal District, and District of Washington (a military district embracing the District of Columbia). Also lower-case wards and precincts.

Lower-case words of common usage, originally proper names, whose significance as such has been lost, such as nouns in common use to specify merchandise, industrial processes, etc., viz, britania ware, chinaware, china clay, delaware, fuller's earth, gothic (type), macadamized road, mercerized cloth, taggers tin, etc.

A list of capitalized and lower-cased words will be found on pages 20-26, arranged alphabetically by items, in most cases, but in some instances placed under appropriate heads to avoid unnecessary repetition. The list is not to be regarded as complete.

(See also Miscellaneous caps and lower case, p. 24.)

Addresses, Etc.

Capitalize the principal words in addresses (whether specific or general), signatures, and date lines. (See also Addresses, p. 38.)

Similar capitalization to apply to State organizations.

Capitalize the names of foreign organizations, as British Army, the Royal Guards, Gordon Highlanders, Eighty-eighth Connaught Rangers, etc.

Lower-case organizations bearing names of persons, as Robinson's brigade, Wheat's regiment, etc.

(See also Guide to capitalization, p. 20.)

Capitalize all United States Government boards, bureaus, commissions, divisions, and experiment stations, as the Board of Visitors, the General Board, the Naval Retiring Board, the Bureau of Yards and Docks, the Interstate Commerce Commission, the Bureau of Soils, Storrs Experiment Station, etc.; but lower-case when standing alone, as the board, bureau, etc.

Lower-case minor departmental organizations if officially unimportant and performing operations that are chiefly clerical or mechanical; for example, the examining board, the accounting bureau, the bureau of appointments, and such divisions as applications, allowance and allotments, certificates, classification, correspondence, disbursing, distribution, drafting, equipment and supplies, examining, finance, inspection, insurance, investigation and review, mails and files, medical, pending files, personnel, planning, printing and stationery, property transfer, publications, record, requisitions and accounts, retirement, review, supplies, telegraph, telephone, transportation, etc. The purpose of this direction is to limit the capitalization of board, bureau, department, and division to Government organizations having important official functions. In case of doubt follow copy, but make uniform if conflicting.

Capitalize State and other boards when accompanied by proper name, as Board of Health of Montgomery County, Ohio Board of Health, Chamber of Commerce of Boston, etc.; but lower-case if standing alone, as the board, board of health, board of pharmacy, etc. (See also Guide to capitalization, p. 20.)

The orthography, capitalization, compounding, and use of quotations shown in the terms below must be followed in general work. It should be noted that "Coal Measures" is a subdivision of the Carboniferous system; "Calcliferous" and "Magnesian" are lithologic subdivisions of the Cambrian and Ordovician, respectively; and "Red Beds" is used for Permo-Triassic rocks of the West; and that these terms, if used in a common-noun sense, are not capitalized or quoted. The adjectives upper, middle, and lower, if used with Carboniferous or Tertiary, are not to be capitalized unless the term is quoted (upper Carboniferous; "Upper Carboniferous"). Follow copy as to any of the preceding terms.

The scheme for the use of hyphens in petrographic terms is based on the single principle that like names are connected by a hyphen and unlike names are not. The names used in such terms are of four classes—(a) rock names, (b) mineral names, (c) textural names, and (d) names expressing the kind of clastic aggregation. Any two or more names of either class are connected by a hyphen; others are not. The principal names of classes *c* and *d* are as follows: (c) Felsophyre, gneiss, porphyry, schist, vitrophyre; (d) agglomerate, breccia, conglomerate, sand, tuff

The subjoined examples will serve to illustrate the principle:

biotite gneiss.	leucite granite porphyry.	quartz-mica latite.
diabase-gabbro.	mica diorite porphyry.	quartz monzoaitite porphyry.
glaucophane schist.	olivine-augite andesite.	quartz-tourmaline porphyry.

FIGURES.

Specific rules that will govern in all cases as to what should be expressed in figures and what should be spelled can not be given. General rules, which will serve as a guide, follow:

Spell all isolated amounts under 10.

Use figures for all enumerations of weight, measure, distance, clock time, money, percentage, degrees, votes, proportion, stocks and bonds, and age.

Use figures in groups of enumerations when any one enumeration is 10 or more. Treat alike all numbers in connected groups. (See also Leader work, p. 37, and Reading columns, p. 36.)

An expression containing more than two enumerations to be regarded as a group. Example: There were eight boys and nine girls; there were 8 boys and 9 girls, 17 in all; there were 2 men, 3 women, and 5 children.

In congressional bills, resolutions, and amendments to the same, sums of money should be expressed in figures.

To avoid confusion if two numbers appear together, as "10 12-room houses," "12 6-inch guns," etc., observe the following forms in treatment of qualifying numbers: "Ten 12-room houses," "twelve 6-inch guns," etc.

Spell figures beginning a sentence except in tables, or if ordinal numbers are used at the beginning of paragraphs or sentences in certain cases.

Ordinal numbers: 1. The earth is round. (2) "The sun do move." But if copy reads "1st," etc., spell: First. The moon is not green cheese.

Figures must be used after a colon in text if matter runs on, as, the following shipment was made: 24 horses, 40 tons of hay, and 3 reaping machines; the rate was as follows: 5 cents for first mile.

Spell both numbers of two related amounts at the beginning of a sentence in such expressions as "Twenty to twenty-five horses," "Fifty or sixty persons were present," etc.

Numbers greater than 1,000, if spelled, must be expressed thus: One thousand eight hundred and fifty dollars, not eighteen hundred and fifty dollars; one thousand two hundred tons, not twelve hundred tons.

Serial numbers, in which the comma is omitted, if spelled, must be expressed as twelve hundred and six, etc., but two thousand and twenty, five thousand and forty-five.

Years if spelled must be nineteen hundred and twenty-one, etc.

Numbers of yarns and threads to be expressed as 10s, 20s, 78s, etc.

Spell numbers mentioned by way of illustration or in connection with serious and dignified subjects, as follows:

In nine hundred and ninety-nine cases out of every thousand.

The Twelve Apostles.

The Seven Sages of Greece.

The thirteen original States.

But, proportion of 1 to 4; 1 : 62,500 (note equal space each side of colon).

Years and sums of \$1 or over must be expressed in figures at beginning of questions or answers in testimony and hearings. Observe the following forms:

Q. In what year was that?—A. 1906.

Q. 1906?—A. Yes, sir.

Q. What was the amount involved?—A. \$101.50.

Q. How much was the sum?—A. \$5 (or \$15, \$67).

Q. How many Indians?—A. Fifty Indians.

Q. How many did you say?—A. Fifty or sixty.

Age.

My age is 52 years 6 months 10 days; a boy 6 years old; a boy about 6 years old; 3-year-old colt; 3-months-old child; wine 8 years old; wine 4 or 5 years old.

Bonds and Stocks.

Gold is 109; Metropolitan Railroad, 109; 5-20 bonds; 10-40 bonds; 7.30 bonds; 3.65 bonds; $4\frac{1}{2}$ per cent bonds; 3 per cent bonds; Victory notes. Liberty bonds: 3.65's; $4\frac{1}{2}$'s; 3's, etc.; but spell out five-twenties, ten-forties.

For Liberty bonds and Victory notes use the following forms for the short titles: First $3\frac{1}{2}$'s, first 4's, first $4\frac{1}{2}$'s, first second $4\frac{1}{4}$'s, second 4's, second $4\frac{1}{4}$'s, third $4\frac{1}{4}$'s, fourth $4\frac{1}{4}$'s, Victory $4\frac{3}{4}$'s, Victory $3\frac{3}{4}$'s.

Clock Time.

Use period to separate hours and minutes, as 4.30 p. m.; 4 o'clock and 30 minutes p. m.; half past 4. In scientific work, $4^h 30^m$; $4^h.5$ or 4.5^h , as indicated.

Dates.

June 29, A. D. 1882; December 6, 1846; the 1st of January, 1883; June 12; the 5th instant; the 20th day of March; the 1st (day) of the month; the last of April or the first of May; 4th of July (calendar day); Fourth of July (holiday).

Spell such expressions as "the early seventies," "it occurred in the eighties."

If a fiscal year or a year extending into the following year is intended, use an en dash and contract, except 1900-1901, as 1875-76, 1801-2 (this applies to dates only; in page folios, etc., repeat the number in full); if a period of more than two years is intended, do not contract, as 1875-1879, 1895-1904; if two or more separate years are intended, use comma, as 1894, 1895; 1873, 1876; 1888, 1891, 1894.

Decimals.

Use figures for decimals and supply cipher when there is no unit, as 0.25; 20 ounces of silver, 0.900 fine; it costs \$0.3365 per pound; scrap, at 0.75 cent per pound; referring to caliber of small arms, .30 caliber, .45-caliber Springfield rifle, distinguishing, however, if used to describe the length of a gun, as a 6-inch rapid-fire rifle, 50 calibers.

Degrees, Etc.

Longitude $77^{\circ} 04' 06''$ E., latitude $49^{\circ} 26' 14''$ N.; a polariscope test of 85° ; 45.5° below zero; an angle of 57° ; $25'.5$ or $25.5'$, as written.

Dimensions.

Use the form 8 by 12 inches in text, not 8 x 12 inches nor 8 x 12''.

Distances.

Express in figures, as 50 miles, 17 yards, 8 leagues, 9 centimeters, 5 feet 6 inches, about 10 miles; but if a fraction of a mile is given spell, as one-half mile.

Enumerations.

Use figures for all enumerations of weights and measures.

In such examples as the following use figures unless under 10, but all the enumerations should be in figures in a group where any one enumeration is 10 or more: There were 20 males and 25 females, 45 in all; six horses; 10 horses; 6 horses, 5 cows, and 26 head of sheep; 25 bulletins, containing 352 pages; the population of Chicago is more than 2,000,000; a hamlet of 18 persons; a 6-footer. If complicated spell, as twenty-five 6-inch guns, two $\frac{3}{4}$ -inch boards, five 5-cent pieces, seven 8-hour days, etc. An expression containing more than two enumerations to be regarded as a group. (See under Figures, p. 30.)

Spell such expressions as the following: Between two and three hundred horses, forty-odd people, one hundred and odd men (not 100 odd men); the population is forty or fifty thousand; but the expression "fifty-fifty" to be in figures, as, it is 50-50.

Fractions and Shilling Mark.

Spell common fractions if alone, as one-half, one-eighth, etc. Do not use a hyphen in such expressions as one half and the other half; one sixth to John and the other sixth to James. If $\frac{1}{4}$ is marked "spell," use "one-fourth." If written "one-quarter," do not change, except to secure uniformity. Use the shilling mark in statements of vision, as, sight was impaired 20/400. (See also Compound and noncompound words, p. 189.)

Whenever the nature of the work will allow, em fractions will be used in both text and tabular matter. In tabular matter the em fractions will be set flush to the rule on the right; en fractions bear off as usual.

Omit commas in built fractions, as $\frac{1}{1000000}$.

Measures.

Use figures in all cases, as 40 bushels, 1 gallon, 6 acres, etc.

Money.

Express as follows: At \$3 per 200 pounds; 75 cents apiece; 2.5 francs per yard; \$0.7525 per ounce; £2 4s. 6d.; Indian rupees should be Rs. 3,225,644, not Rs. 32,25,644.

Spell such expressions as a million dollars; a million and a half; one or two millions; millions for defense, but not one cent for tribute.

(See also Values of foreign coins, p. 126.)

Percentage.

To be expressed as 12 per cent, 25.5 per cent; but one-half of 1 per cent. Never use hyphens in such expressions as 12 per cent interest, etc.

Scriptural Texts.

Genesis xv, 24; II Samuel viii, 9-13; St. Matthew vii, 5.

Specific Gravity.

Use the period, as 1.100, 0.980.

Superiors and Inferiors.

Use superior figures for references and footnotes and also with reference letters, as A¹, A², or a¹, a², etc. Use inferiors in chemical formulas, as Al₂O₃, and always close up.

Votes, Ballots, Etc.

To be expressed as 5 votes; 50 ballots; 300 voters; 167 Democrats; 4 or 15 majority.

Weights.

To be expressed as 12 pounds; 4 hundredweight; 2 ounces, etc.

TABULAR WORK.

(See also Abbreviations, p. 27.)

Abbreviations.

Units of quantity (lower-case, except No.) to the right of reading columns and in italic (capitalized) over figure columns should be spelled when possible. When the space available requires an abbreviation, use the following forms: M, M feet, sq. feet, cu. (for cubic), kilo (for kilogram), dolls., galls., lbs., bbls., and yds.; ft., in., dwt., oz., cwt., doz., and bush. are used for either singular or plural.

If over figure columns, use the forms *a. m.* for antemeridian; *ft. in.* for feet and inches; *H. m. s.* for hours, minutes, and seconds; *p. m.* for postmeridian; *£ s. d.* for pounds, shillings, and pence; and *Mm.* for millimeter.

In columns of names of persons follow the copy as to abbreviations of given names; but well-known abbreviations of names must be used to save overruns.

Brother, Brothers, or Company, if part of a firm or corporate name, and Railroad, Railway, (Incorporated), (Limited), or (Corporation), if preceded by name, must be abbreviated Bro., Bros., Co., R. R., Ry., (Inc.), (Ltd.), or (Corp.), using parentheses as here given, but do not abbreviate railroad or railway in such names as Oregon-Washington Railroad & Navigation Co., Washington Railway & Electric Co., Midland Electric & Railway Co., etc.

Use *in* firm or corporate names.

If width of column will not admit of spelling, the following forms may be used in numbered streets throughout table to save overruns, as 4½ St. NW., 8th St. SE., etc.; the words "street" and "avenue" may also be abbreviated when necessary to save overruns.

Abbreviate months when day of month follows except May, June, and July. This applies also to notes below tables. Abbreviate months standing alone in narrow boxes.

Italic and other headings above box heads are to be considered as text, and months followed by date are to be spelled. Abbreviate months followed by date when in parentheses or brackets over tables and leader work, but spell in credit and extract lines over text.

Blanks.

Omit blank lines in tables when they carry neither figures nor references; also in divided tables omit the blank lines in each divide.

Box Heads.

To be solid and borne off an em space above and below rule except when heads run up; centered, except when column is 10 ems or more in width and the matter makes three or more lines, in which case make a hanging indentation. Run-up heads should be indented an en space at the beginning of the line and bear off an en space when reaching the rule at the top; if they make two lines, center the second; if three lines, make a hanging indentation.

To run across wherever practicable; if necessary to run up, reduce to minimum depth. If one head is required to run up, run up all heads over figure columns in the same table. Avoid running up over reading and date columns. Box heads need not run up in all sections of divided tables.

If a single box exceeds the depths of a double or triple box, place the extra space in the lowermost box.

If a head is composed of double boxes or a greater number, the greatest number of lines in the top box will control the depth of all the top boxes, unless by so doing the total depth of the heading is increased; so also in each of the other boxes. Occasionally the top box of a triple box head may be of such depth as to make a better appearance by allowing its bottom rule to align with the bottom rule of the second box.

If a box head is composed wholly of figures or the letters A, B, or (a), (b), etc., omit the period; also in cases where figures or letters are joined by a word, as 20 to 30, 30 and 35, A-B, C and D, etc.

In boxes containing two lines, the first line to be the longer when possible; but do not sacrifice good appearance by dividing short words or making two-letter divisions in wide columns.

In parallel tables, where a box head is divided, repeat the box head for each page. Words divided between pages in heads over parallel tables take no hyphen.

Referring to quantity or things, spell the word "number" in box heads when possible; use No. when referring to a serial number.

Use 8-point quad line between head and body of table when a 6-point box is used over an 8-point table and no unit of quantity is given. If unit of quantity is given, use 6-point quad line and set unit line in 6-point italic.

Braces.

Braces preferably to be placed on right of rule.

Center Heads, Flush Heads, and Subheads.

Use a full blank line above all center heads in stub. This applies to years used as heads in reading columns. Where a parallel dash, runover, etc., in another column furnishes a blank space above the head do not add an extra blank.

If the center head clears the reading matter below, and there are leaders, use a line of en quads only; if no leaders below and the center head clears at least an en space, omit blank; but if it clears less than an en space, use an en quad line. Otherwise use full blank below.

If center heads appear in figure columns, use quad line above but no space below.

Use a colon after a flush head and an em dash after each subordinate head.

(See also Date columns, p. 34.)

Ciphers.

In columns where the first number is wholly a decimal, supply cipher at left of point in first instance only and under cross rules.

Follow copy in the use of the word "none" or a cipher meaning none in figure columns. If ciphers are not in copy, use leaders. In columns of figures under the headings "Pt. in.," "£ s. d.," etc., ciphers should be supplied on the right; that is, when an even number of feet is given, supply one cipher under "in.," if an even number of pounds is given, supply one cipher under "s." and one under "d.," if only shillings are given, supply one cipher under "d."

(See also Miscellaneous examples, p. 38.)

Continued.

Omit period or colon after a center head, flush head, or subhead when the word "Continued" is used, and always use an em dash between it and the head. Use the abbreviation "Contd." (omitting apostrophe) or "Con." to avoid an overrun. If the head is all lower case or all small caps, lower-case the terms "continued," "contd.," or "con."

(See p. 190 et seq. for examples of all-lower-case heads.)

Continued Heads.

Continued heads over tables must be condensed into one line if possible. If heads of tables or box heads have a reference and footnote, do not repeat reference when continued. Six-point notes above tables should be in brackets; they generally do not repeat with continued heads.

Dashes.

Do not carry dashes in reading or date columns.

Parallel dashes should be used whenever necessary to cut off from figures below.

Date Columns.

Date columns are not classed as reading columns unless over $7\frac{1}{2}$ ems wide.

In columns cast to 5, 7, or $7\frac{1}{2}$ ems (the last named for inside columns) bear off from the rule an en space, placing the remaining space between the month and the day; when the year is used, put an en comma only between it and the day.

Omit the period at end of line when a $4\frac{1}{2}$ or 7 em column is the last one of the table.

If reference figures are used in $4\frac{1}{2}$, 5, 7, or $7\frac{1}{2}$ em date columns, place reference at right.

If the year is centered in columns consisting entirely of dates or months, use a full blank above but no space below.

If not followed by leaders, and consisting of years only, and some of the lines have a double year, center each in the column, in the following manner:

1898
1899-1900
1901-2

Ditto.

Never use "do." in the first line under a center head, under a line of leaders, or in a column consisting entirely of "Yes" and "No"; but it may be used under a blank space.

The "do." does not include the reference figure, if any, on the preceding item. Whenever a reference is intended to apply to the dittoed item also, the reference figure should be added to the "do." (See table, p. 36.)

Use "do." in reading and date columns only.

Use "do." when intended to mean the last item or date of a braced group, if the items or dates are separate lines.

If commas are used instead of "do.," invert the commas.

Capitalize if not preceded on the left by words, figures, or leaders. In the last column of a table capitalize, but do not use leaders.

In columns 6 ems or less in width use $1\frac{1}{2}$ ems of quads (including the en quad used for bearing off) or $1\frac{1}{2}$ ems of leaders, as may be required, before the "do."

In columns more than 6 ems in width use 2 ems of quads (in addition to the en quad used for bearing off) or $2\frac{1}{2}$ ems of leaders.

If a date column of 5 ems or less is the first column of a table, clear the month instead of repeating it or using "Do."

If "do." is used in stub under units of quantity, use a 2-em leader on right.

Under units of quantity which are spelled use "do.," repeat abbreviated units.

Years centered in date columns do not affect the use of "do." in other columns.

Dollar Mark.

To be placed close to figure, and repeated under cross rules only. In columns containing mixed amounts, as money, tons, gallons, etc., repeat the dollar, pound, or peso mark, etc., as required, in each instance before sums of money; but if several sums of money are grouped together and run to a total, place the dollar sign, peso, or pound mark, etc., at top of group only.

In double columns of figures in a single money column, connected by an en dash or the word "to" or similar connecting word, the dollar mark or marks will be required only in the first line at the top of the column, as \$10-\$12, etc.

Double-up Tables.

Repeat a center head, flush head, or subhead at the top of the second column, if the matter under it breaks, adding the word "Continued." Use an en quad only on each side of the parallel rule.

Bear off leaders and dashes an en space when they are used in the last column of the first half in double-up matter.

En-quadded Tables.

Omit en quads above and below dashes. Use en quads when rules are used instead of dashes. Use en quads under units in figure columns.

In 8-point en-quadded tables use 8-point en quad under units of quantity.

Example: [6-point quads.]
Inch.
[8-point en quads.]

Figure Columns.

Bear off the longest line of figures at least an en quad from right of rule. When crowded and only a few figures will touch, close up on the left; if necessary to close up on the right in one figure column, close up in all figure columns (all sections of a divided table to be considered as one table).

In double columns of figures in a single column, connected by an en dash or the word "to" or similar connecting word, the en dashes or words should be aligned.

Plus and minus marks, when appearing at left of figures, should be close to the figures, disregarding alignment.

Words in figure columns should align on right with figures. Capitalize and use a thin period. Figures expressing different units (feet, dollars, etc.) align on right.

Footnotes and References.

Footnote reference figures in tables will be run consecutively from 1 to 99. This will apply to text also. In publications which are divided into chapters, parts, or separates, begin each chapter, part, or separate with footnote 1.

References and footnotes must begin with 1 in each new table.

Use italic superior letters for footnote references in tables set in Ronaldson.

If a reference is repeated on another page it must carry the original footnote; but to prevent repetition, especially in the case of long notes, copy editor may use the words "See footnote 3 (or 6, 8, etc.) on p. —" instead of the entire footnote.

Footnotes must be paragraphs. If notes are short the arrangement must be left to the maker-up. (See also Page and stone revising, p. 7.)

Footnotes, cross headings, and notes referring to table must be solid when table is solid and leaded when table is en quadded.

Footnotes must have the same abbreviations as are used in the table. In a series of short footnotes align the reference figures on the right and the first letters of the notes.

Roman superior figures must be used for references, using a 5-em space bear-off in reading columns and a 3-em space bear-off in figure columns.

Use period between an abbreviation and a reference mark, as St. Louis, Mo.¹.....

Footnote references must be placed at the right in reading and date columns and at the left in figure columns.

References in side heads are to follow colon and precede dashes, as Construction:¹; Federal work²—.

If two or more footnotes are in one line, equalize the space; but at least 2 ems must be placed between notes.

If a reference figure stands alone in parentheses in a figure or date column, it must be centered; in a reading column, it must be in parentheses and be borne off an en quad on the left and be followed by leaders, as if it were a word.

Footnotes and notes referring to tables must be in 6-point.

References to footnotes must be numbered across the page from left to right and across both pages if parallel.

(See also Footnotes, p. 9.)

Fractions.

Whenever the nature of the work will allow, em fractions will be used in both text and tabular matter. In tabular matter the em fractions will be set flush to the rule on the right; en fractions bear off as usual; and whole numbers should clear the fractions throughout the columns.

Align decimal points except in columns containing mixed numbers having irregular decimals; that is, when one number has a decimal of one figure, another four figures, and so on, one representing pounds, another dollars, and another percentage, etc.

Italic.

Units of quantity, etc., when placed over figure columns, should be set in italic, be used only at the beginning of a new table or at the head of a continued page, and drop down on figures in solid tables. (See table, p. 36.)

Names of vessels and scientific names of genera and species should be set in roman.

Leaders.

Continue leaders across the entire width of table, except when the last column is a reading column or a 4½ or 7 em date column, in which case omit the leaders from that column. Also omit leaders in a 4½ or 7 em date column or a figure column when either is the first column of a table; but if figures are used to make a stub they may be followed by leaders.

Leading from Top or Bottom Lines.

If there is only one reading column, leader from the bottom; if more than one, leader from the top, omitting leaders in the run-over line.

Date columns 5, 7, and $7\frac{1}{2}$ ems wide are not to be regarded as reading columns in connection with leading from top line.

In parallel tables where the lines are numbered on the outside of each page, leader from the top.

Letter Spacing of Words.

Letter space words only if unavoidable, preferably last word; but letter space all of a short word rather than part of a long one.

Reading Columns.

To be borne off an en quad from rule. Indention from rule means so many ems in addition to the en quad used for bearing off.

If the last word in a leader line runs close to the rule, use an en leader if space permits; if not, use a thin space, but never use a period except when a reference mark follows an abbreviation. (See also Leader work, p. 37.)

Numerical terms should be expressed in figures, even at the beginning of a sentence: 241 days from Dec. 1; trains 3 times a day.

Overruns are usually 1-em hanging indention.

Figures beginning a stub, if totaled, should be aligned on right; if not totaled they may be aligned on left and be followed by leaders.

Tables in Rules.

Bear off all figures an em quad when an em quad can be used on each side of the figures; otherwise bear off an en quad; but the first and last columns must always be borne off an em quad from outside rules.

Units of Quantity, Dashes, Etc.

(See also *Italic*, p. 47; *Indentions*, p. 49.)

In stub columns place units of quantity on right in all cases. If the subject does not make full line and yet will not permit insertion of unit in same line, space out the subject line and begin overrun line with leaders, allowing the proper indention for the overrun, the unit of quantity to be 1 em leader from rule on right. Omit the comma preceding leaders.

If an item which has a reference figure is dittoed, the "do." does not include the reference. If the preceding reference applies to the dittoed item also, the reference figure should be added to the "do." (See following table.)

Table showing style in regard to the use of units of quantity in stub and figure columns, dashes, reference figures for footnotes, words in figure columns, plus and minus marks, use of braces, miscellaneous figures, usual form of italic and box heads, etc.

LEADER WORK.

To have the same style as tables in the following particulars: "Continued" (the use of), flush heads and subheads, indentions, numerical expressions in reading columns, aligning words in figure columns and figures in reading columns, abbreviation of railroads or railways, firm or corporate names, months when followed by day, and units of quantity at right in reading columns.

Width of figure column to be an en space more than the longest line of figures, but no column less than 2 ems.

If the last column is reading matter, run leaders to within an en space of the word and use period at end of line.

Names of vessels and scientific names of genera and species should be set in italic.

Dashes.

Use parallel dashes in figure columns if necessary to cut off from figures below. In leaded leader work omit lead above and below dashes.

Dollar Mark.

To be used at beginning of each statement, first line of double-up matter, at the head of a continued statement, and on first line of each cut-in. Center subheads are not to be considered the beginning of a statement.

Flush Heads and Subheads.

Must clear figure columns.

Units of Quantity.

If a column is composed of a quantity of one kind, and a head is desired, the head should be in 6-point roman, centered over the figure column. The examples below show the style to be observed when there is a short side head to the left (note the lead under 6-point head in solid matter):

Pennsylvania R. R.:	Tons.
Freight carried Jan. 1, 1921.....	21,000
Baltimore & Ohio R. R.:	
Freight carried—	Tons.
In the month of May.....	150,000

If there is no side head:

Freight carried by the Pennsylvania R. R. and the Baltimore & Ohio R. R.	Tons.
in the month of May.....	371,500

Miscellaneous Examples.

The following examples show leader work set in half measure and doubled up; also if the last column is composed of mixed units of quantity and amounts and words; and the use of ciphers in columns of pounds, shillings, and pence, etc.

ADDRESSES.

In long addresses, set names in caps and small caps to within 10 ems of end of line and turn over, indenting second line 2 ems.

Capitalize the principal words in business and residence addresses.

Abbreviate when necessary to the good appearance of a line.

Space with en quads in black-letter, small-cap, cap-and-small-cap, and cap lines.

Also observe same spacing when words in caps, small caps, etc., appear in text.

Omit lead when space is clear between date line and address, signature and text, or signature and address.

If end of line is 3 ems or more from dash, omit slug; if less than 3 ems, use slug.

In text, Esq., jr., sr.; in a cap-and-small-cap address or signature, Esq., Jr., Sr.; when address or signature is all caps, Esq., Jr., Sr. If set in caps of type having no small caps, use caps and lower case.

Addresses to be placed either at beginning or end of a letter or paper, as indicated by copy. Set first line flush when at beginning of a letter or paper; indent 1 em when placed at end.

The name of a person or firm, or the title of an official, in an address must be at left of page, in caps and small caps, the title or address following in italic (but "United States Army" or "United States Navy" immediately following a name must be in same line as name, using roman cap and lower case).

Use one lead under an address when at the beginning of a letter.

General addresses must be set in italic, flush, overruns indented 1 em; caps and lower case:

To Collectors of Customs and Internal Revenue:

To the Congress of the United States:

To the Senate:

To the Senate and House of Representatives:

To all whom it may concern:

The examples which follow show some of the forms to be observed:

[When italic line is longer than name line, indent italic line 2 ems under name line. Ordinarily where both lines are about same length or the italic line is the shorter, place the italic line so that its center will be at the end of the name line. When an address makes only half a line and does not touch on date or signature above, it should be in a line by itself.]

PUNCTUATION.

(See also Testimony, p. 43.)

If a sentence is divided into two clauses the second of which requires a comma, a semicolon must be used after the first clause, as the following: "The gentleman will probably be here to-day; but if he should not be, you will excuse him."

If a sentence is divided and the second clause is complete, with subject and predicate, use comma, although connected by a conjunction (or disjunctive, "or," "but," etc.), as in the following: "He listened to the statement, and he then agreed to the proposition." Otherwise omit comma, as "He listened to the statement and agreed," etc.

In sentences divided by commas, use commas before conjunctions; if divided by semicolons, use semicolons before conjunctions.

Commas before and after phrases separating conjunctions from verbs should usually be omitted. "He listened to the statement and, without further consideration, agreed to the proposition," will be punctuated as follows: "He listened to the statement and without further consideration agreed to the proposition."

Use single punctuation in citations of cases and statutes, as (124 U. S. 321; R. S. p. 310, sec. 1748).

Quote anything preceded by the terms "entitled," "the word," "the term," "termed," and "marked."

When quotation marks are used at the beginning of a line of poetry they should clear. Lines should be aligned on the left, those that rhyme taking the same indentation.

Do not quote any communication carrying date and signature.

Do not quote after the terms "known as" and "so-called" unless the words following are misnomers, slang expressions, or ordinary words and phrases used in an arbitrary way, as, they have a "gentlemen's agreement"; the "invisible government" is responsible; the doings of the "robber trust" have become; the "labor trust," the "plunder bund," "blue sky law," the "invisible empire," etc.

Use double quotes to inclose exact words of original matter; use single quotes within matter already quoted; then double quotes for quotation inside of second quote. Continue to alternate between single and double quotes to end of matter.

In quoted matter arranged by paragraphs carry all unclosed quotes at beginning of paragraph.

To prevent too many quotes at beginning of paragraphs, sometimes matter may be run in. Quotes at beginning of paragraph should be limited if possible to three sets (double, single, double).

Each part of a quotation should begin and end with quotes when interrupted.

Words and phrases are sometimes quoted for emphasis, example, or contrast, or because they are slang, technical, or rarely used terms. Copy editors will indicate quotes in such cases.

Place all points (and three stars when used at end of quoted matter) inside the quotation marks: "John B. * * *." "Is this plain? * * *." "I was going to * * *."

Do not use a period after letters in such expressions as A said to B, Mr. A told Mr. B, etc.; but the period should be used when the letters are abbreviations of actual names, as Mr. K. (for Mr. King) or Mr. A. (for Mr. Andrews), etc.

Exclamation and interrogation points, colons, and semicolons should be placed inside the quotation marks when part of the quotation; otherwise outside. For example: He asked, "Who are they?" Did you go on the "Penny"?

In direct address to a person or personified object use "O" (without exclamation point). Use "Oh" in exclamations where no direct appeal or address is made. Examples: "O my friend, let us consider this item." "Oh, but the gentleman is wrong." When strong feeling is expressed, use exclamation point, which is generally carried to the end of the expression, as "O Lord, save Thy people!"

If a city or town and State are used adjectively, put State in parentheses, as Baltimore (Md.) Sun, Boston (Mass.) City Council, etc.

In indexes, etc., observe this form: Brown, A. H., jr.; Brown, A. H., & Sons.

George G. Greene, being sworn and examined, on oath deposes and says:

Isaac Fuller, sworn, and testified as follows:

My age is 30 years 6 months 12 days.

P. L. Smith, sworn and examined.

(124 U. S. 329.)

Colonel Seventh Cavalry.

Captain, Seventh Cavalry.

John Smith, of New York; President Hadley, of Yale University; Carroll of Carrollton, Henry of Navarre (no comma in cases where the place named has become closely identified with the person); Henry Jones, private, first class.

If the name of the State is given after a duplicate name of a Senator or Representative, omit the comma after the name, as Walsh of Massachusetts.

Respectfully yours.

Yours respectfully.

Yours truly.

I am, very respectfully, yours, etc.

Have you any interest in this case? And if so, state what.

How can you explain this?—"Fee paid, \$5."

The witness, being asked if he wished to say anything further, said "No."

Mr. CURTIS. Let us see what that is:

The stipulations of the treaty—

I do not think he means that—

are to be a complete, etc.

[Note use of interrogation mark in the following:]

Mr. PENROSE. Mr. President, what does this mean?—

We have never received a dollar of this amount.

Note the omission of the comma in such expressions as \$2 gold, \$2.50 United States currency, \$3.50 Mexican.

Observe punctuation in the following forms:

GENERAL ORDERS, } No. 31.	SPECIAL ORDERS, } No. 42.	EXECUTIVE ORDER } No. 66.
GENERAL ORDER } No. 1.	SPECIAL ORDER } No. 1.	

TESTIMONY, HEARINGS, ETC.

(See also Figures, p. 30; Punctuation, p. 42.)

Make one paragraph of question and answer if abbreviated to "Q." and "A." (see also Court style, p. 50), connecting the question and its answer by an em dash; but if there is an interruption, use 2-em dash only:

Q. Did you see—A. No, sir.

If the answer is not introduced by "A.," "Ans.," or "Answer" in the copy or when the name or title of a participant is used, make a new paragraph.

In testimony when the stenographer inserts explanatory language into or at the end of the remarks of a witness, use [].

Use () for parenthetical phrases or sentences and to inclose inserted words following the name, "Q.," or "A." If an entire sentence is in () or [], the closing period should be within the () or [].

The following examples illustrate the use of brackets, colons, and parentheses:

At end of sentence [Laughter.]; within a sentence [laughter].

The paper was as follows [reads]:

I do not know. [Continues reading:]

The CHAIRMAN (to Mr. Smith).

Mr. KELLEY (to the chairman).

SEVERAL VOICES. Order!

The WITNESS. He did it that way [indicating].

Q. (By Mr. SMITH.) Do you know these men [handing witness a list]?

(Objected to.)

A. (After examining list.) Yes; I do.

Q. (Continuing.) A. (Reads:)

A. (Interrupting.)

If necessary to spell "Q." and "A.," the words in parentheses should be lower-cased, the punctuation being outside the last parenthesis, as follows:

Question (continuing). Answer (reads):

[2 leads.]

□ □ □ By the COMMISSIONER:

[1 lead.]

Observe punctuation in the following paragraph:

The defendant, George Brown, stated to the court, etc.

The following forms show punctuation required:

1. X Q.	Re X Q. 1.	24. Q.	46th. Cross-int.
X Ques. 1.	R. X Int. 1.	24. Question.	46. Cross-int.
1. Add. direct.	24. X Int.	X Q. 1.	46. Cross-ques.
2. R. D. Q.	X Int. 1.	24. Int.	46. C. Int.
3. Re D. Q.	X 20.	5. Re X Q.	46th. C. Int.
4. R. X Q.	24. X.	24th. Cross-ques.	Answer to cross-int. 1.

If the number precedes "Q.," "X Q.," etc., use an en quad after the number, otherwise use 3-em spaces, except after last period use an en quad.

If spelled out, use the following forms:

cross-examination.	recross-examination.	redirect examination.
cross-interrogatory.	re-recross-examination.	re-redirect examination.

In hearings, testimony, etc., abbreviated forms used by a speaker should be followed, as, the B. & O. has carried; the G. A. R. was organized; the new program of the K. of C.; the Y. M. C. A.; etc.

ORTHOGRAPHY, ETC.

Webster's New International Dictionary, current edition, must be followed in spelling, compounding, and dividing words. The preferred forms are to be used in spelling. Following is the office practice in regard to the words shown:

afterwards.	coconut.	reconnaissance.
airplane	dato.	reinforced.
aluminum.	disk.	reinforced (construction work; also military).
awhile (adv.); when not used ad- verbially make two words, as, for a while.	distributer.	rhyme.
blond.	draft.	sirup.
bowler.	dreadnaught (but dreadnought, meaning a ship).	sometime (adv.), but when not used adverbially make two words, as he worked for some time.
briquet.	drought.	thrash (to beat soundly, collo- quial; to sail in lively sea, nautical).
briquetted.	fuse.	thresh (beating grain).
briquetting.	inclose.	tonsillitis.
can not.	indorse.	toward.
canyon.	insanitary.	
carabao (singular or plural).	margarin (chemical).	
claw.	margarine (butter substitute).	
clue (hint to mystery).	misfire.	
	program.	

Observe the following forms in the treatment of nationalities:

Argentinian.	Dominican.	Panaman.
Brazilian.	Ecuadorian.	Paraguayan.
Chilean.	Guatemalan.	Part-Hawaiian.
Colombian.	Haitian.	Porto Rican.
Costa Rican.	Honduran.	Tennessean.
Cuban.	Montenegrin.	Venezuelan.
Czechoslovak.	Nicaraguan.	Yugoslav.

Use accents in foreign proper names and words unless otherwise directed, but not in geographic names. The Spanish tilde (ñ) and French cedilla (ç) must be followed. In general work, do not use cañon; make it canyon.

The following is a partial list of words in common use in which accented letters appear:

appliqué.	débris.	matériel.	râle.
blasé.	en arrière.	matinée.	régime.
attaché.	en échelon.	mêlée.	résumé.
café.	en règle.	moiré.	rôle.
chargé d'affaires.	entrée.	née.	rôle d'équipage.
confère.	entrepôt.	papier-mâché.	señor.
coup d'état.	exposé.	porte-cochère.	soirée.
coup de grâce.	façade.	portière.	vis-à-vis.
crèche.	faience.	procès-verbal.	visé, viséed
crêpe.	habitué.	protégé.	

See also page 130 for names of accents, list of accented letters used in modern languages, and samples of diacritical marks.

Authorities on Geographic Names.

The following authorities, in the order given, govern the spelling of geographic names:

Correct Orthography of Geographic Names (decisions of the United States Geographic Board).

United States Postal Guide.

Lippincott's Gazetteer of the World.

Rand, McNally & Co.'s Atlas.

International Postal Guide (Dictionnaire des Bureaux de Poste).

Chinese and Japanese Names.

Follow copy in the use of hyphens and apostrophes.

Indian Names.

Follow copy in the use of spaces and hyphens in Indian proper names; also the spelling of tribal names.

Plurals of Titles, Etc.

The plurals of military titles are formed by adding "s" at end, as major generals, lieutenant colonels, surgeon generals, etc., but sergeants major. Civil titles usually add "s" to first part, as attorneys general, postmasters general, etc.

For nouns ending in "o" following is the general rule: If there is a consonant before the final "o," the plural is "es"; if a vowel precedes the "o," the plural is formed by adding the "s" only. There are, however, some exceptions to this rule, and they are given here, as follows:

albinos.	Eskimos.	mestizos.	sextos.
armadillos.	gachos.	octavos.	siroccos.
cantos.	halos.	octodecimos.	solos.
cascos.	inamoratos.	planos.	tobaccos.
centos.	juntos.	provisos.	twos.
didos.	kimonos.	cuartos.	tyros.
duodecimos.	lassos.	salvos.	virtuosos.
dynamos.	mementos.	sextodecimos.	zeros.
embryos.	merinos.		

Possessives and Apostrophes.

Nouns in the singular, or in the plural when ending with any letter other than "s," require an apostrophe and "s," as man's, men's, child's, children's, Dennis's, Felix's, Burns's, Essex's, witness's, countess's, State's attorney, State's evidence, etc.

Exceptions to the foregoing: Sergeant at Arms' room, for righteousness' sake, for conscience' sake, for goodness' sake, for Jesus' sake. In titles of books the exact form must be used, as Hinds' Precedents.

Plural nouns ending in "s" require only the apostrophe, as the boys' swimming hole, the horses' trough, fingers' ends, the Charleses' reigns, the Joneses' ball, the countesses' reception, the witnesses' testimony.

Do not use the possessive form in such expressions as day labor, quartermaster stores, State prison, the doctrine of State rights.

Use the singular form for such expressions as printer's ink, 125 miner's inches.

Use apostrophe in contracted words and figures, as don't, I've, spirit of '76, etc., and to show plurals of figures and letters, such as 7's, 4's, a's, l's, etc.

The apostrophe is carried to the end in cases like these: Masters, Mates, and Pilots' Association; Painters, Paper Hangers, and Decorators' Union.

No apostrophe where no possession is intended, as grain exchanges act, infectious diseases act, teachers college, the Jones case, the Williams claim.

No apostrophe in some firm names, as Peoples Gas Co., Traders Bank. As there is no settled practice in such cases, copy must be taken as guide, but must be made uniform if written in two ways. Copy must be guide in such conflicting forms as St. Elizabeths Hospital, St. Elizabeths, St. Peter's Church, St. Peter's, etc. The customary form is with the apostrophe. In general the apostrophe must be used, but exception is frequently made in geographic names and in cases like those mentioned above.

Use of "a" and "an."

Use "a" before all consonants and aspirated "h," as a history, a human being; but do not use it before a silent "h," as an honorable man, an honest man.

Use "an" before all vowels except long "u," as in union, and "o," as in one.

BILL STYLE.

Bill style now conforms to this STYLE MANUAL in many important particulars, such as the use of figures in dates, sums of money, percentages, numbers of articles, chapters, lines, pages, paragraphs, parts, sections (including land descriptions), titles, and volumes, and in all cases where "numbered" is used or implied. (For details of bill style see Bill Style Manual; see also under "Fol.," etc., below.)

FOL., FOL. LIT., REPRINT, ETC.

(See also Supreme Court records, p. 50.)

Copy marked "Fol." means to follow signs, symbols, figures, italics, abbreviations, idiomatic words and expressions, and &c. or etc., but not capitalization, punctuation, or compounds. All orthography in "fol." matter is good that has the sanction of any dictionary.

Copy marked "Fol. lit." means to follow abbreviations, accents, capitalization, figures, italic, paragraphs, punctuation, signs, symbols, spelling, syntax, and compounding of words.

Copy marked "Reprint" means that it should be followed in regard to size and style of type for text, heads, footnotes, abbreviations (but when abbreviations are used they must conform to office style), etc., whether leaded or solid, and general arrangement. Capitalization and compounds must be made to conform to office style, and manifest errors must be corrected. If the reprint is of a technical character or contains exceptions to office style, and it is desired that the exceptions should be followed, the part or parts to be followed must be plainly indicated.

Copy marked "Bill style" means to spell everything except "Mr.," "Mrs.," the classification of vessels as "A 1," sums of money, percentages, dates, the numbers of bills, resolutions, articles, chapters, lines, pages, paragraphs, parts, sections, titles, and volumes, and any serial number when "numbered" is used or implied.

In titles and extracts from bills follow bill style, but lower-case the word "act" whenever it is used as a synonym for "bill" or "law."

Copy bearing no preparation must be set to conform to this STYLE MANUAL.

ITALIC.

Use italic *v.* in titles of cases, including contested-election cases, as *Smith v. Brown*, etc. (This does not apply to Supreme Court records. See also Court style, p. 50, and Specification style, p. 120.)

Names of vessels and floating docks, as *cruiser No. 14*, *light vessel No. 17*, *dredge No. 65*, the *Dewey*, *Eagle No. 14* (also airships, airplanes, and balloons), must be set in italic, except in tables and footnotes to same, indexes, and lists set in columns.

In Supreme Court work italic may be used with signatures, date lines, etc., but not in text except as provided for under Court style. (See p. 50.)

In cap, cap-and-small-cap, small-cap, italic, and black-letter center or side heads, in date lines, and in text when set in any of the foregoing type, the names of vessels must be quoted.

Use italic lower-case *v.* in titles of cases in small-cap lines.

The words "see," "see also," etc., must be in italic in indexes only. Set "see," "see also" in roman when they precede italic words.

Scientific names of species must be in italic; also names of genera when followed by names of species; names of classes, orders, families, etc., and of genera standing alone, in roman.

Italic will not be followed in general work, either for foreign words or to denote emphasis, unless specially prepared. (See also "Italic" under Congressional Record style, p. 79.)

MISCELLANEOUS.

Center Heads.

Copy editors are responsible for uniformity in center heads, and no changes are to be made by readers unless permission is given.

Display heads to be all capitals unless otherwise indicated.

If names like *McAdam*, *McLean*, etc., appear in a small-cap line, use an apostrophe for the "c" as *M'ADAM*, *M'LEAN*, *M'CALL*, etc.

In lower-case center and side heads capitalize only the first word and proper nouns.

Use an en space between words in small-cap and two 3-em spaces in cap heads, and an em space when an extended face or spaced caps are used, reducing space after comma.

Citations and Credits.

In text, to be sentences and in parentheses when appearing at end of a sentence, except when page only is given, in which case use lower-case letter and place period outside parentheses. Credits, when centered, to be in brackets and to follow headings, but they must precede the first of a series of subheads and also a single subhead when it is part of the original extract.

Note the following forms, as (18 [not 18th] Stat. L. 25; IV [not IVth] William and Mary, 40; 126 [not 126th] U. S. Repts.).

If names of authorities are given, as Wall. (for Wallace), Wheat. (for Wheaton), etc., copy must be followed; use abbreviated form for States.

Cuts, Legends to.

Legend lines under cuts to be leaded in leaded matter only.

Divided Words.

Except in narrow measures or to secure good spacing, the division of words in consecutive lines is to be avoided. Whenever practicable hyphenated words must be divided at the compounding hyphen. Center heads containing only two lines must not have a divided word if possible to avoid it.

"Et cetera," "etc.," "and so forth."

In extracts set in type smaller than preceding text, where speaker reads a portion and sums up the remainder by using "et cetera," "etc.," or "and so forth," observe the following rule:

If the speaker says "et cetera," or "etc.," and continues his original remarks, make it "and so forth" at beginning of following line. But if the words here given close both the extract and the speaker's remarks at the same time, use "etc.," and put it in parentheses, using an em quad between the parentheses and the close of the extract, thus: (Etc.)

Ellipsis Signs.

In document measure, "line of stars" means seven asterisks indented 2 ems at each end of the line, dividing the remaining space evenly between the asterisks; but in case two or more sizes of type are used on a page, indent 10-point 2 ems, 8-point 2½ ems, and 6-point 3½ ems; in indented matter add extra indentation.

In other than document measure the copy editors must indicate the number of asterisks and the indentions. Use three asterisks separated by an em quad to denote an ellipsis in text; if periods are used instead of stars, separate by an en quad. Do not overrun three stars or three periods at end of paragraph.

Extracts.

If beginning flush and with a lower-case letter, use an em dash at end of preceding line of text.

The date in extracts from newspapers must begin a paragraph and run on with extract, using em dash to connect. Use caps and small caps for place names and lower-case roman for date.

Footnotes and Reference Marks.

Superior figures must be used for references. Reference figures should be borne off a 3-em space in figure columns and footnotes and a 5-em space in reading columns of tables and in text.

Use italic superior letters for footnote references in tables set in Ronaldson.

Superior letters must be used to indicate references in work containing formulas in which exponents appear.

All footnotes for text, leader work, or tables must be paragraphs and set in 6-point for text type not greater than 10-point, leaded to leaded text; otherwise solid. The maker-up and page reviser, however, should see that short notes are run in to save space, with not less than 2 ems between notes in the same line.

Footnotes to briefs set in 12-point must be set in 8-point single-leaded.

Use two leads above and below the rule preceding a footnote and to separate a footnote from tabular matter. Footnotes remain with tables in make-up. (See also Footnotes and references, p. 35.)

Indentions.

In matter wider than document the indentions will be 2 ems; this applies to hanging indentions, signatures, date lines, etc.

Extracts in smaller type must have the same indention, in points, as the text. Overruns are generally 1 em more than the indention of the item; but to prevent conflict with a following indention, the overrun must be 1 em more than that of the line following.

The usual indention of a total line is 3 ems; but if the indention of the line preceding interferes, indent total an em more than preceding line. All total lines on same page must have the same indention, if possible.

Indexes.

Names of vessels in roman.

In indexes, if leaders are used and the page folios overrun, retain only the first folio number in the leader line; but if necessary to save an overrun, figures may be run back within an em leader of the text.

If the overrun folios make two or more lines, retain only the first folio number in the leader line and indent overruns 7 ems on the left in full measure and $3\frac{1}{2}$ ems in half measure (but if there are clearances, indent folios 2 ems more than the matter above or below). Use a period after last folio and quad out. If the figures extend back into the leader line, use an en quad between the leaders and the first figure.

Indexes to transcripts of records and Court of Claims cases and briefs are set in 8-point, leaded, with 5-em dash each side. (See Court style, p. 50.)

Leads and Slugs.

If extracts, etc., are set in smaller type, separate by using two leads in solid matter and three leads in leaded matter. If, however, solid extracts appear in leaded matter, use two leads only. Before signatures and under date lines in leaded matter use one lead only.

Use full slug before and after centered heads if matter preceding or following does not clear.

If slugs are required, use a slug of same body as type.

Preambles, Resolutions, Etc.

Except in bill work proper, each "Whereas" in a preamble must begin a new paragraph (indented). The "Therefore be it" must be preceded by a colon and be run in with the last "Whereas." "Be it" must run in with the word "Therefore," but must not be supplied if not in copy. Note the following:

Whereas it has been deemed advisable to, etc.: Therefore be it
Resolved, That the committee, etc.

References.

If letters are used for references in explaining diagrams, figures, etc., use italic for lower-case references and roman for caps, not quoted: The bolt *a*; a pinion, B; angle *ab*; line CD; points *a*, *b*, *c*.

Shapes, Forms, Etc.

In illustrating shapes or forms, as V-shaped, T rails, etc., use small caps of case 366 in 10-point, case 365 in 8-point, and case 364 in 6-point; but for the expression I beam use cap of case 14 in 10-point, case 13 in 8-point, and case 12 in 6-point. Use a roman cap letter for X rays. Plural form of T or Y shape, tees or wytes, as 10 tees, 12 wytes.

Side and Cut-in Notes.

Make paragraphs unless otherwise instructed; that is, first line indented 1 em and the others flush.

Allow 12 ems of 6-point for cut-in notes unless otherwise instructed; bear off at least an em from the body of the note above and below and an em space on the inside.

Commence cut-in on third line of paragraph, if paragraph is of sufficient depth. Space words as in tabular work. (See p. 36.)

Spacing.

The spacing of matter should be governed by the leading. Solid matter should be spaced with 3-em spaces, and words run up rather than divided. Leaded matter also should be spaced with 3-em spaces, and words divided rather than syllables carried up. In double-leaded matter en quads should be used and divisions avoided if possible.

Avoid if possible very thin or very wide spacing in the first line of a paragraph.

In bills classification of vessels is shown as A 1.

If letters and figures are used together they may be either closed up or separated by an en dash, but all in a series should be made uniform. Do not close up figures with Roman numerals nor either of these with the letters "O" or "I". Examples: A1, 2A, C-1, 1-B, A-IV, 2-O, 3-I.

Always keep together at the beginning or end of a line such abbreviations as U. S. N., D. C., N. Y., M. D., etc. The contractions Esq., sr., and jr. should always be in the same line as the name they follow.

In tables of contents, etc., if the word "chapter," "figure," or "plate" is used in the first line before numerals in column ("chapter," etc., being cleared in following lines), put an en space between the word and numeral in the first line and range the periods after the numerals.

Enacting and resolving clauses: In document measure space the first line so as to conform to the following examples:

Be it enacted by the Senate and House of Representatives of the United States Resolved by the Senate and House of Representatives of the United

States of America Resolved by the Senate and House of Representatives of the United States of America

Temporary Decisions.

Copy editors and referees are sometimes called upon for decisions that affect the general style. These decisions are necessary in given cases, but it must be understood that they cover only the specific case and that the STYLE MANUAL must be adhered to generally.

COURT STYLE.

(See also Fol., fol. lit., reprint, italic, etc., p. 47.)

Supreme Court Records.

Make paragraphs of answers in Q. and A. matter.

The folio number should be flush, in the same line as the first word of the folio; and in a cut-in 3 ems square, except where there is white space above or below, indentions of paragraphs, etc., to be in addition to the 3-em cut-in. In hanging indentation of headings carry extra indentation to end of heading.

Omit cut-in folio opposite paragraph reading: "Indorsement on cover."

Follow copy literally, excepting capitalization, punctuation, and italic (which stands for errors only). In typewritten records manifest errors of the typewriter are to be corrected, such, for instance, as where a letter has been struck over another or where a space in a word shows that a letter was intended to appear but was not struck hard enough to leave an impression; but if a good word is used in the wrong place, as "in" for "on" or "boot" for "boat," etc., do not change it or use italic. Words having the sanction of any dictionary are not to be changed.

Use italic letters to indicate errors in orthography—for instance, ourely, meaning surely—except in names of persons, firms, geographic names, and words from foreign languages, when not law terms. Do not correct errors in syntax. Errors in words set in italics should be indicated by roman letters.

Doublets should be indicated by italicizing the repeated portion.

Italic may be used in titles after signatures, in date lines, etc., but not in text except as shown above.

Names of vessels to be set in roman, quoted.

Titles of cases to be roman including the "v." for versus.

Use apostrophe to indicate the omission of one or more letters in a word; but in well-established abbreviations omit apostrophe and use period.

Use a 3-em quad to indicate the omission of one or more words.

Capitalize the word "The" only in such cases as the following: The said The B. & O. R. R. Co.; The Sun v. The Globe; The City of Washington v. The B. & O. R. R. Co.; the defendant The Davies County Bank.

All Printing Office marks must be erased before returning the copy. Therefore copy editors will make necessary marks only, marking lightly with a soft pencil. Do not mark cut-in folios nor carry jacket number on each folio, but put all instructions on editor's sheet. Pick-up the original folio numbers on copy. Any matter preceding or following original folios to be marked, in pencil, with a jacket number followed by "a," "b," "c," etc., to end, as J 12345a, J 12345b, etc. On instruction sheet editors will write "11-point; cut-in folios," etc.

Court Briefs, Court of Claims Opinions, Exhibits, and Decisions.

Follow copy generally in the use of abbreviations, figures, and other important matters.

The following directions and examples must, however, be observed:

Single punctuation in citations in all cases except "fol. lit."

Follow office style in testimony in Court of Claims transcripts of evidence.

Indian names should be followed as to spelling and the use of hyphen or space.

Do not use superior letters in abbreviations of words unless so indicated by copy editor.

Reports and orders of the Interstate Commerce Commission are to be treated as court work. Copy must be followed in the spelling of place names, corporation and firm titles, the punctuation of citations, and other important matters.

Follow copy in the use of singular or plural possessive referring to the United States as claimant or claimants, defendant or defendants, etc. Example: Claimant's brief (or claimants' brief); appellee's (or appellees') exhibits were placed on file. But if conflicting forms are used in copy, make them uniform, either singular or plural.

Spell out the words "Question" and "Answer" and make separate paragraphs.

If questions are numbered, the number should precede the question, as "30. Question." (See p. 44.)

In titles of cases, capitalize the first word and the principal words, but lower-case terms like "defendants," "appellees," etc.

The following examples show capitalization, italic, small caps, abbreviations, etc., generally used in court work:

The *Legal Tender cases*.

In Clarke's case the court says.

In the case of Clarke.

In *Ex parte* 74 the court said.

In the *Fifteen Per Cent Rate Increase case* the court decided.

Clarke's case (14 Hun, 14).

WALLACE, J., delivered the opinion.

(31 Stat. 154.)

Follow Rev. Stat., Stats., Stat. L., Stats. L., or R. S., as written.

In *Roe v. Doe* the court ruled.

United States v. 12 Diamond Rings.

The United States v. Forty Hogsheads of Tobacco.

In titles of cases follow copy as to figures and abbreviations.

Make sentences of single citations appearing at conclusion of sentences or paragraphs, except p. or pp., which should be close up and period outside of parentheses. When citations follow clauses, the final citation, if appearing at the end of the sentence, will necessarily be closed up. In citations of single lines, use period at end of each line. When citations are run in, use semicolons.

Observe style of the following: The said paper was marked "Defendant's Exhibit No. 4." The defendant's Exhibit No. 4 was thereupon placed on file. (See also Punctuation, p. 42.)

Footnotes to briefs set in 12-point should be set in 8-point, single leaded.

Following are some of the names and abbreviations used by United States Supreme Court reporters in citations of United States Supreme Court Reports:

Cranch (abbreviated Cr.).

Dallas (abbreviated Dall. or Dal.).

Howard (abbreviated How.).

Peters (abbreviated Pet.).

United States Reports (abbreviated U. S.).

Wheaton (abbreviated Wheat.).

NOMINATIONS, REPORTS, DOCUMENTS, AND LAWS.

GENERAL RULES FOR NOMINATIONS.

The rules governing document work apply to nominations and withdrawals, except as here noted.

Matter to be set in 10-point, double leaded.

All nominations take current date, and the legislative day must be added if necessary. (Sample of each form shown on following pages.)

In withdrawals follow the date on copy and also the wording of the date line.

Spell everything except year, day of month, section, page, paragraph numbers, and district numbers (as collection district No. 17).

The words "I nominate" are omitted in all nominations. No matter how or where written in copy they are to be left out.

In single nominations (that is, where only one person is named) where the words "I nominate" begin a paragraph in copy, indent the paragraph 6½ ems. This applies to Army and Navy as well as civilian nominations. (See sample 1, p. 55.)

In Army and Navy nominations where only lists of names are given, set flush in half measure where there are four or more in a group. If less than four, set each name as a paragraph, full measure. (See sample 2, p. 55.)

Where civilian nominations have more than one person named, each name is to be set as a separate nomination, following the form of postmasters—that is, each separate carries the same nomination number, with the black superior figure, and is set as a plain paragraph. Indent these 1 em only. (See sample 3, p. 56.)

If nomination contains an explanatory note, inclose note in parentheses and set just before the blank date line at bottom.

Note that the word "confirmed" is set in italic in the recommendation line.

"Reinstatement," "Reappointment," or similar statement, if a sentence at the end of a nomination, will be placed in parentheses. (See sample 3, p. 56.)

The President's signature indicates the end of a nomination, but is printed only in "Withdrawal" (see sample 5, p. 58) or in a withdrawal and nomination combined.

Capitalize the word "Arm" when synonymous with "Corps," as Cavalry Arm, Infantry Arm, etc.

In post-office nominations, if superior figures are used in connection with the bracketed figure at the left, bear off a 5-em space outside of the bracket. Use black superior figure. (See sample 3, p. 56.)

Style of "messages" and Executive Journal "extracts" is shown in samples 6 and 7, on pages 58 and 60, respectively.

Note the use of the "I nominate" paragraphs in the "messages."

The Select Committee on the Budget, to which was referred H. R. 30, report it to the House with a favorable recommendation and submit the following in explanation thereof:

The Budget bill agreed upon by the Senate and House of Representatives in the Sixty-sixth Congress was vetoed by the President, who objected to the section of the bill which provided that the, etc.

The following, given by one of the witnesses who appeared before the committee, most nearly meets the situation that now confronts the National Government. He states:

The National Budget is the instrument through which the several financial operations of the Government are correlated, compared one with the other, and brought under examination at one and the same time. It should be, etc.

It was brought out that the American system under which executive proposals are subjected to detailed and painstaking scrutiny by the legislative branch offers advantages which are not present under the British system. The bill thus leaves intact present conditions in respect to the location and exercise of powers by the two branches of the Government but, it is believed, provides the means for the more efficient exercise of these powers.

REPORT.

[To accompany H. R. 5214.]

The Committee on Pensions, to whom was referred sundry bills granting pensions and increase of pensions for certain soldiers and sailors of the Regular Army and Navy, etc., submit the following report:

This bill is a substitute for the following House bills referred to said committee:

H. R. 1031. Fletcher Duling.

A physician testifies as follows:

I have this day examined Julia M. Porter, aged 38 years, of Auburn, N. H., widow of Clinton A. Porter, private, Company F, First Regiment New Hampshire Volunteer Infantry. He had previously been approved for disease of eyes 4/18, etc.

It is believed that an increase of pension to \$20 per month is warranted, and it is so recommended.

The improvement contemplated involves channel enlargement and extensive easing of bends. The Board of Engineers for Rivers and Harbors deems the cost of the latter excessive and recommends a channel 10 feet deep and 60 feet wide, without easing the bends, at an estimated cost of \$88,000, and that such bends as prove obstructive be subsequently eased as a matter of maintenance.

CONGRESSIONAL RECORD STYLE.

GENERAL RULES.

The rules governing document work apply to the CONGRESSIONAL RECORD, except as may be noted herein. Generally, the variations from document style, with forms peculiar to the RECORD, are given here. All should familiarize themselves with the forms desired.

All extracts must be in 6-point type unless otherwise ordered by Senate, House, or Joint Committee on Printing.

Instructions covering the measure and the size and kind of type for parallel columns in the RECORD will be given to operators when necessary, as the general style will depend upon the character of the matter to be set.

In paragraphs beginning with a bill or resolution number, as H. R. 1296, H. Con. Res. 217, or any other form, use 4-em space after the abbreviations.

In general, operators should avoid wide spacing, especially in break lines and lines containing many points.

In resetting lines when correcting proof, operators must exercise great care to have such lines free from error.

Extreme caution must be used in making corrections in copy, and no important change should be made without authority.

Observe the lists of names of Senators and Members, committees of both Houses, and duplicate names. Changes caused by death, resignation, or otherwise must be noted. There is no excuse for error in the spelling of names of Senators, Members, or department officials. In case of doubt, the Congressional Directory will be taken as authority.

Small-cap center heads in speeches, also headings over tables, leader work, and subheads following main subject heading in the proceedings will be set in 6-point.

Queries must not be made unless it is known that the author is to see a proof.

CAPITALIZATION.

(See also Guide to capitalization, p. 20.)

It must be borne in mind that one general style of capitalization is to prevail on RECORD and document work.

In Senate and House proceedings and Senate and House Journals use Rule VI, Rule XVI, etc. Lower-case the sixth rule, the sixteenth rule, etc.

If the name of the CONGRESSIONAL RECORD is mentioned, it must be set in caps and small caps.

If the name of a Senator or a Member is used in connection with a bill or other paper, as the Curtis bill, the Smith amendment, etc., lower-case; but SMITH'S amendment, etc.

The names of Members and Members elect of both branches of the Congress will be printed in caps and small caps if mention is made of them. This applies also to eulogies, and notices of or references to eulogies, of deceased Senators or Members; but names of Members in lists of pairs in House proceedings will be set in lower case. (See under Pairs, p. 84.)

Certificates of Senators elect of a succeeding Congress are usually presented to the current Congress, and in such cases the names of the Senators' elect must be in caps and small caps.

Names of Members of Congress must be set in lower case in votes, in lists set in columns, in the list of standing and select committees, as contestants or contestees in contested-election cases, in groups of names of Members and non-Members, and in lists of pairs.

Observe that the names of all persons not certified Members of Congress are to be set in lower case; that is, names of secretaries, clerks, messengers, and others.

CONTRACTIONS.

If in a Senator's or a Member's language the copy shows such contractions as "don't," "can't," "won't," "didn't," "couldn't," and "wouldn't," spell in full, as "do not," "can not," "will not," "did not," "could not," and "would not." This is not intended to apply to extracts and anecdotes. The abbreviation "etc." must be made to read "and so forth," except in extracts.

FIGURES.

(See also Figures, p. 30.)

If an expression contains two or more enumerations, some definite and others indefinite (or not accompanied by subject), spell the indefinite and put the definite in figures (unless under 10), as four or five thousand spent out of \$6,000 appropriated; \$300 saved and a thousand dollars spent; a hundred dollars is more to me than \$500 to you or one thousand to him; if copy reads "six millions of dollars," it must be changed to read "\$6,000,000."

Use figures for all enumerations of weights and measures.

In such examples as the following use figures unless under 10, but all enumerations should be in figures in a group where any single enumeration is 10 or more: There were 20 males and 25 females, 45 in all; six horses; 10 horses; 6 horses, 5 cows, and 26 head of sheep; 25 bulletins, containing 352 pages; the population of Chicago is more than 2,000,000; a hamlet of 18 persons. If complicated, spell, as twenty-five 6-inch guns, two $\frac{3}{4}$ -inch boards, five 5-cent pieces, etc.

More than two enumerations to be regarded as a group. Example: There were four boys and five girls; there were 9 men and 8 women, 17 in all; there were 3 men, 4 women, and 6 children.

If sums of money are used as adjectives, express in figures, as a 5-cent piece, a \$10 note, a \$1,000 house, a \$1,000,000 expenditure, a \$1,200 clerk (even if copy reads "a twelve-hundred-dollar clerk").

If an expression of weight or measure is used as an adjective, use figures, as a 1-foot rule, a 2-bushel basket, a 5-acre lot, a 4-ton stone, a 3-pint pail, a 1-grain pill.

Follow copy in such expressions as twelve hundred gallons were used, fourteen hundred dollars were expended, or 1,200 gallons were used, \$1,400 were expended; a thousand dollars, a hundred pounds, two thousand million dollars.

In amendments in conference reports follow this STYLE MANUAL in regard to the use of figures.

ITALIC.

Use an italic lower case *v.* in titles of cases, including contested-election cases, as *Smith v. Brown*.

Names of vessels must be set in italic, except in tabular matter, indexes, and lists set in columns.

If it is desired that italic should be used other than as provided for herein, the word or words must be underscored and "fol. ital." written on each folio. Do not construe this to mean "*Ordered*," "*Resolved*," "*Be it enacted, etc.*," titles following signatures or addresses, or the part of date lines which should be set in italic.

If a prayer delivered in either House is printed in the proceedings and is prefaced by a quotation from the Bible, use 8-point italic for such quotation; the prayer must be set in 8-point roman.

In roman small-cap lines use a lower-case *v.* for versus in the titles of cases.

MISCELLANEOUS.

Do not quote any communication carrying date and signature.

Do not put quotation marks on 6-point center heads in 8-point quoted matter.

In newspaper extracts put place and date at beginning of paragraph. Use caps and small caps for name of place and roman lower case for date. Connect date and extract by an em dash. If date and place are credited in a bracket line above extract, they need not be used again at the beginning of paragraph. (See p. 41 under Date lines, and p. 85 under Credits.)

Except in bill work proper, each "Whereas" in a preamble must begin a new paragraph (indented). The "Therefore be it" must be preceded by a colon and be run in with the last "Whereas." "Be it" will run in with the word "Therefore," but must not be supplied when not in copy. Note the following:

Whereas it has been deemed advisable to, etc.: Therefore be it

Resolved, That the committee, etc.

Use single punctuation in citations of cases and statutes, as *Brown v. Robinson* (122 U. S. 329; R. S. p. 310, sec. 1748).

In the case of *Smith against Brown*. (A general or casual reference to a case.)

In the case of *Smith v. Brown* (122 U. S. 329). (A citation of a specific case.)

In One hundred and twenty-fourth United States Reports, page 329.

Indent star lines 2 ems on each side. Use seven stars.

If a title is used as part of the name of an organization, vessel, etc., spell, as General U. S. Grant Post, No. 76, Grand Army of the Republic.

In the RECORD proper use only one lead above and below heads and extracts, except the heads "Senate" and "House" and date line, where two leads should be used.

The order of subdivision of the Constitution of the United States is as follows: Article I, section 2, clause 3.

If an appendix appears at the end of a speech, the head "Appendix" should be set in 6-point caps, preceded by a 3-em dash.

In extracts containing votes the names must be run in, as Greene of Massachusetts, Mann, Fordney, etc.

In Senators' or Members' language, if the copy indicates "number," use the abbreviation "No.;" when the word is "numbered," use that form.

In reference to Senate and House reports and Senate and House executive and miscellaneous documents the "No." must always be used, whether in copy or not, as House Report No. 75, Executive Document No. 20, Miscellaneous Document No. 37.

In the Senate, under "House bills referred," "Message from the House," "Enrolled bills signed," "Concurrent resolutions referred," "Presidential approvals," and in lists of bills and resolutions, the numbers must come first and read "An act" (or resolution), whether copy or not, as "H. R. 722. An act," etc. In the House the same rule applies under "Message from the President," "Enrolled bills signed," "Message from the Senate," "Concurrent resolutions referred," and "Senate bills referred." This means that all bills and resolutions received in the House from the Senate or in the Senate from the House, when in lists, shall have the number begin the paragraph.

Eight-point breaks in 6-point matter should be paragraphed, as follows:

The report goes on to say that—

Observe this closely—

during the fiscal year 1921 there were, etc.

USE OF CAPS AND SMALL CAPS.

Mr. JONES of Washington. Would it not be necessary to change the resolving clause also? The resolving clause reads:

[Conference reports to be set in 8-point. Statement to be set in 8-point, except extracts, which should be set in 6-point.]

Use 8-point slug before and after conference report and statement.

SPECIFICATION STYLE.

Where no specific reference is made to specifications or to the Official Gazette, the rules herein given apply to both classes of work. The term "specifications" includes trade-marks, designs, and reissues.

PUNCTUATION.

Specifications.

Follow copy, except in headings and preambles, which should be punctuated according to office style.

Official Gazette.

Follow copy in claims; court decisions; treaties, conventions, etc., with foreign countries; rules and amendments thereto; laws; extracts; quoted matter, and acts of Congress. Punctuate everything else.

COMPOUNDS.

Specifications.

Follow copy, except in headings and preambles, where titles of invention should be compounded so as to indicate as nearly as possible the object or use of the invention. No set rules can be given for such compounds. Copy editors are expected to insert hyphens where required. Where titles consist of only two words, follow Webster's New International Dictionary in the use or omission of hyphens. (See List of compound words on pp. 190-224.)

Where two words are made of terms that are usually closed up, copy should be followed; but prefixes should be closed up with the words to which they belong, unless connected thereto by a hyphen, when copy should be followed. Examples: Horse shoe, counter shaft, rail road, fire arm, grind stone, anti-friction, electro-magnet, sub-station, ferro-manganese, etc., follow copy; but close up anti friction, electro magnet, sub station, ferro manganese, etc., if they appear as two words in copy.

Official Gazette.

Follow copy in claims and quoted matter, but compound in accordance with Webster's New International Dictionary and the rules relating to titles of invention of specifications in everything else.

ABBREVIATIONS.

Specifications.

Follow copy, except in headings, in which the names of States (except N. Y. where it follows the name of the city), fractions in assignments, etc., should be spelled.

Follow copy in the use of the word "Figure" when followed by a numeral, where reference is had to figures of the drawings. Spell or abbreviate, as in copy.

Use "etc." in headings, but follow copy (&c. or etc.) elsewhere.

Spell out "&" wherever it appears in copy, except in the names of firms and corporations and in the oaths of trade-marks, where copy should be followed.

Official Gazette.

States.—Abbreviate the names of States in all cases except in treaties, conventions, etc., with foreign countries; laws; acts of Congress; extracts, and quoted matter, where copy should be followed. (See list of abbreviations on p. 29.)

Months.—Follow copy in treaties, conventions, etc., with foreign countries; laws; acts of Congress; extracts, and quoted matter. Spell out in everything else, except in the index and in the headings of claims, where abbreviate. For the day of the month, following the name, use figures only, except in "follow" matter, where copy should be followed. Where preceding the name of the month, use 1st, 2d, 3d, etc., as "the 1st of January," "the 2d day of January," etc.

Street, avenue, road, etc.—Follow copy in treaties, conventions, etc., with foreign countries; laws; acts of Congress; extracts, and quoted matter, but spell out in everything else.

Citations.—Copy should generally be followed, but abbreviate section, chapter, page, etc.

Extracts and quoted matter.—Follow all abbreviations.

Etc. and &c.—Follow copy in treaties, conventions, etc., with foreign countries; laws; acts of Congress; extracts, and quoted matter. Use "etc." in everything else.

FIGURES.

Specifications.

Follow copy, except in assignments in headings, where they should be spelled. Change Figure one, Fig. two, etc., in the text to Figure 1, Fig. 2, etc.

Official Gazette.

Follow copy in treaties, conventions, etc., with foreign countries; laws; acts of Congress; commissioner's report; extracts, and quoted matter. Spell out figures under 10 in everything else, except figures at the beginning of paragraphs, tabular matter, enumerations, figures of reference, etc. Only a general rule can be given. Much must be left to the judgment of the copy editor.

CAPITALIZATION.

Specifications and Official Gazette.

Capitalize "Letters Patent," whether standing alone or followed by a numeral. Capitalize "Patent," "Trade-Mark," "Design," "Reissue," "Certificate," "Sheet," "Plate," "Diagram," "Case," and "Division," where followed by a numeral, in any one of the following forms: "Patent No. 680,180"; "my Patent No. 680,180"; "Patent 680,180"; "Trade-Mark No. 140,500"; "Design No. 10,500"; "Reissue No. 14,500"; "reissued Patent No. 14,500"; "Certificate No. 130,500"; "Sheet 1"; "Plate 1"; "Diagram 1"; "Case A"; and "Division A." Where reference is had to an individual member of an order, lower-case, as an alga (or the algæ) of the genus *Chondrus*.

Capitalize the principal words of titles of books, magazines, and other publications, as *The British Pharmacopœia*, *Bulletin of the American Pharmaceutical Association*, *Chemical Reactions and Equations*, etc.; but capitalize only the first word and proper nouns of titles of articles in books, magazines, and other publications, as *Brown*, *Delicacy of British Pharmacopœia tests for arsenic*, *Journal of Pharmacy*.

POSSESSIVES.

Correct errors in the use of the apostrophe in the possessive case. Follow the document style. (See p. 45).

ITALICS AND ROMAN.

Italics must be used in the Latin names of plants and animals where reference is had to the species (as *tuberosa*) or to the genus followed by the species (as *Asclepias tuberosa*); but roman should be used where reference is had to the genus alone (as *Asclepias*) or to the order (as *Asclepiadaceæ*). Also italicize the names of vessels and titles of cases in citations, as *Smith et al. v. Brown*.

Roman should be used in the Latin names of medicines, diseases, anatomical terms, chemicals and dyestuffs, geological and mineralogical terms, Latin words and phrases generally, and in titles of books, magazines, and other publications.

Where italics appear in copy for the Gazette, the same should be followed; but in specifications only such words should be set in italics as have been marked by the copy editor, except that Latin names of plants and animals should be set in italics in accordance with the above rule, even if not marked in copy.

REFERENCE LETTERS AND FIGURES.

Where copy has capitals, use roman capitals, and where copy has lower-case letters use lower-case italic, as, the wheel *A* has a rim *a* and spokes *b*; the hub *B* is of iron.

Quote reference letters and figures, if copy, as, the frame "A" consists of uprights "1" and "2."

Where the references have superiors, as 1^a, 2^b, 8^c, etc., and the superior letters "y" and "z" appear anywhere in the copy, as 9^y, 10^z, the superior "x" should be used where copy has 7^x, 11^x, etc. Where the letters do not run to "y," "z," use a superior multiple, as 4^x, 20^x, etc. Where the references have superior figures, as a⁰, a¹, b², c³, f⁴, h⁵, k⁶, g⁷, i⁸, d⁹, the "0" should be printed a cipher, not a degree mark or superior

“o.” Where there are superior letters, as 1^a, 2^b, 3^c, running through to 8^m, 9ⁿ, etc., a superior letter “o” should be used, not a cipher or degree mark.

Where copy has a₁, a₂, 1a, 1b, etc., set thus: a¹, a², 1^a, 1^b, etc., unless otherwise marked by the copy editor. Copy should be followed in respect to the prime mark or superior “1,” thus, “The wheels a’ and a²” or “The wheels a¹ and a².” Some typewriters use the prime mark for “1” after passing “9,” as a¹⁰, a¹¹, a¹², etc., which should be changed to a¹⁰, a¹¹, a¹², etc. These latter cases should be indicated by the copy editor. Follow inferiors where so used in copy, as: a₁, a₂, etc.

PLURALS.

Follow copy in the Latin or English forms for plurals where both forms are recognized. A few are:

abacus, pl. abacuses or abaci.
antenna, pl. antennæ.
apex, pl. apexes or apices.
callus, pl. calli.
candelabrum, pl. candelabrum or candelabra.
fascia, pl. fasciæ.
helix, pl. helices or helices.

lamina, pl. laminae.
matrix, pl. matrices, not matrixes.
medium, pl. mediums or media.
spatula, pl. spatulas.
speculum, pl. speculums or specula.
stylus, pl. styli.

GOTHICS.

All letters and figures relating to shape should be in gothic, except I, which should be in Clarendon. Where copy has tee shape, change to T shape; eye beam, change to I beam; ell, change to L; in the form of an A; the A frame; the Y; in the shape of an 8. Do not quote gothics, as “A” frame. If quotes are in copy, omit them.

DIVISIONS.

Follow Webster's New International Dictionary in the division of words; but if an operator has made a division which is not in accordance therewith the proof reader should not cause the resetting of the line to correct the error if such division is recognized by any other authority.

ORTHOGRAPHY.

Webster's New International Dictionary, current edition, is recognized as the standard authority in the spelling of words. Where the dictionary recognizes two different forms of spelling the same word, follow the form given in copy. An exception to this rule should be made where a word capable of two different forms of spelling appears in the title of invention in the heading and preamble, in which case Webster's preferred form should be used and the word made to conform with the spelling in the title throughout the entire specification. Copy editors will indicate the preferred form in such case on the file jacket, in the preamble, and at the beginning of each “take.”

In Gazette work follow copy in claims, but use the preferred form of spelling given in Webster's New International Dictionary in everything else.

The following list contains a number of words used in specification work, as well as some relating to capitalization, and should be followed unless otherwise marked in copy by the copy editor:

acylate.	Bourdon tube.	crêpe de chine.
addressograph.	Bowden wire.	decelerate.
aerofoil.	brassière.	decimeter.
aileron.	brisanee.	detetaphone.

The 10½-set is used in casting tables in 10-point roman. The 10-set is used in casting tables in 10-point Ronaldson.

Superior figures indicate number of thicknesses of keyboard paper to be added to measure on caster.

The measure on the spool slip is always the 6-set measure; but operators must remember that the set scale in use governs the measure to which the keyboard should be set.

MAKING-UP, IMPOSING, ELECTROTYPING, STEREOTYPING, PRESSWORK, AND BOOKBINDING.

MAKING-UP.

Roman type is commonly used in Government publications, the size generally used for text letter being 10-point, with extracts in 8-point and tabular matter and footnotes in 6-point. The size of the type page is governed by the size of the trimmed book; for instance, in the printing of an octavo book, the width of the type page being $4\frac{3}{8}$ inches, or about $26\frac{1}{2}$ picas, the trimmed leaf should be $5\frac{7}{8}$ by $9\frac{1}{8}$ inches, leaving a margin of 9 picas to be divided between the two sides of the type page. This margin should be divided so as to allow 4 picas in the back and 5 picas on the outside. With a running title, the page should have the same margin at the head as in the back. The length of the trimmed page being $9\frac{1}{8}$ inches, or $54\frac{3}{8}$ picas, the type page would be $47\frac{1}{2}$ picas, leaving margins of $3\frac{1}{8}$ picas at the top and 4 picas at the bottom. In making up the page, a pica slug should be included in the length of the gauge, thus allowing a pica blank at the bottom.

In general, whatever the margins may be, they should be so divided that in the completed book the printed matter will be a pica nearer the top than the bottom and a pica nearer the back than the front.

If a top center folio is used, the bottom folio also should be placed in the center, but inclosed in parentheses.

If type is made up for curved plates, care should be taken that no flush pages are made.

The blank, or sink, at the head of each new odd or even page should be 6 picas, and kept uniform throughout the book. "Contents," "List of illustrations," "Preface," or any other matter that makes a page in itself should be placed in the center of the page. (See also Revising, p. 7, and par. 14 et seq., p. 8.)

Caption lines, whether in black face, caps, small caps, or italic, should have more space above than below. Equal spacing should be maintained throughout the page; if this is not possible, reduce the space above and below the center lines, commencing at the bottom.

IMPOSITION.

A page is considered the unit of a signature; the two companion pages the unit in imposition. Whether the imposition is from the outside or inside, a long or a broad form, work and turn, sheetwise or tumble, these companion pages are never separated; their position is determined by the fold.

To further illustrate the fact that these companion pages are the unit of imposition, it will be found when determining margins that these two pages are always printed in the center of the untrimmed sheet when it is divided into halves, quarters, eighths, or sixteenths. For example, a sixteen is to be made up to 24 by 38 inch paper, the half of which the 24-inch way is 12 inches. The width of the two type pages, say, is 48 picas, or 8 inches, and the back is 10 picas, or $1\frac{2}{3}$ inches, leaving $2\frac{2}{3}$ inches to be used as margin, one-half of which is to go on the outside of each printed page ($1\frac{1}{3}$ inches, or 7 picas), making 12 inches in all.

The other two companion pages that go to make up the quarter of the sixteen are likewise printed in the center of the quarter sheet, which is 19 inches, one-half of the 38-inch way. It will thus be observed that two pages were used to get the outside margins and another multiple of two (four) to get the bottom margins.

The margins should be governed by the trimmed book and not by the untrimmed sheet. The back margin should be such that it will bring the pages nearly in the center of the open printed book without using fractional parts of a pica, putting the excess space in the cut, or outside, margins, except in books that are to be side stitched with wire, in which case enough allowance must be made for white that will be taken up, which should be 1 pica. In no case make the margins such that when the book is delivered from the binder the inside margin is greater than

the outside. The allowance of wide margins for artistic effect should not be made unless ordered by the Public Printer. In adopting the type page and trim allowances stated herein, the economical use of stock has been considered. The type page has been made as large as possible. The top margin of the trimmed book should be at least 3 picas and the bottom margin at least 4 picas. The outside margin should be at least 1 pica greater than the inside, but should not be wider than the bottom margin.

If a running title is used, the head margin should be the same as the back; but when there is a center folio, that line and the slug below it should be counted as part of the margin.

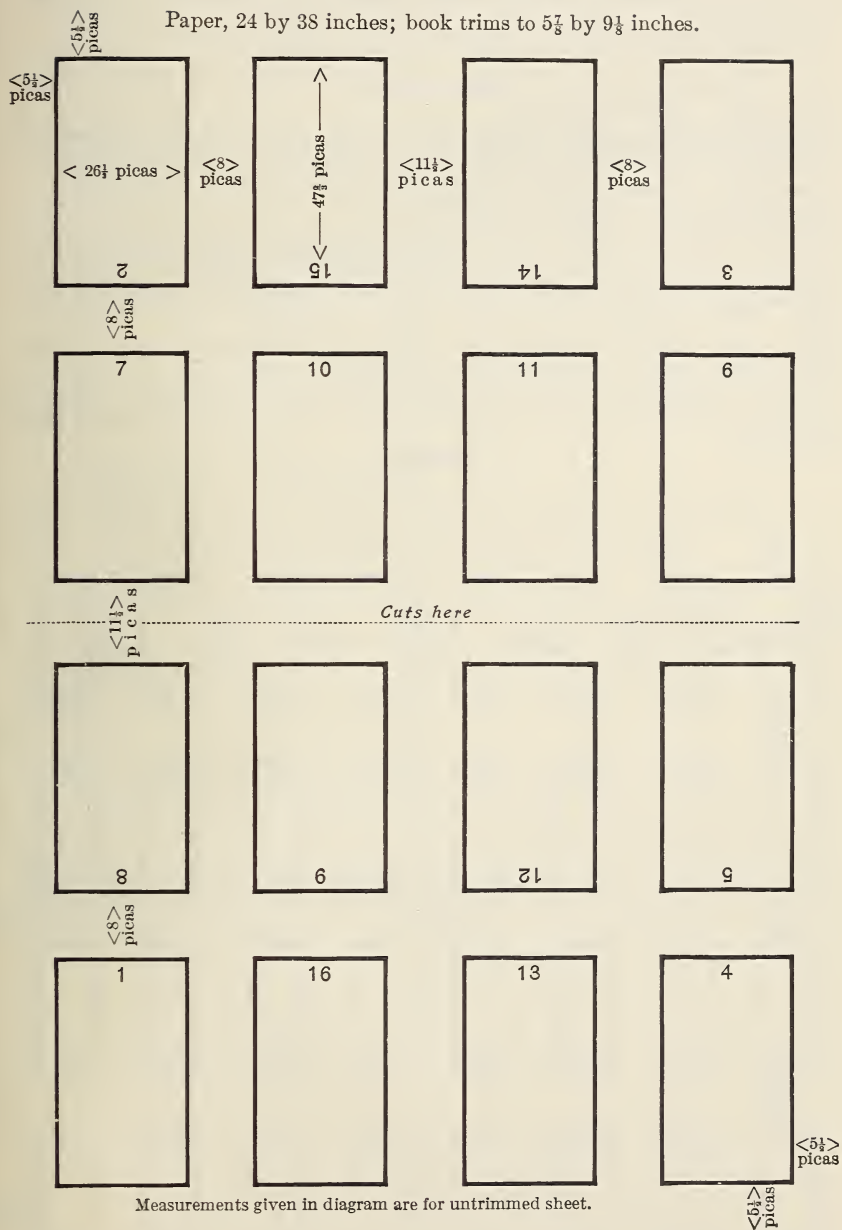

If a book makes less than 64 pages and is not to be sewed, it should be imposed as an inset.

In the following pages will be found diagrams of imposition. The maximum length of each page is shown; that is, the number of picas from top to bottom includes the folio line, the slug below that line, and an allowance for a slug at the bottom of the page.

STANDARD SIZES OF BOOKS.

Books are usually described with regard to size of leaf, as folio, quarto, octavo, 12mo, 16mo, 32mo, etc. Folio means a sheet of paper of standard size folded once, so as to make 2 leaves or 4 pages; quarto, a sheet folded twice, so as to make 4 leaves or 8 pages; and octavo, the sheet folded again, so as to make 8 leaves or 16 pages. All the other sizes are determined by the number of times the sheet is folded.

ELECTROTYPE-FOUNDRY WORK.

LOGOTYPES.

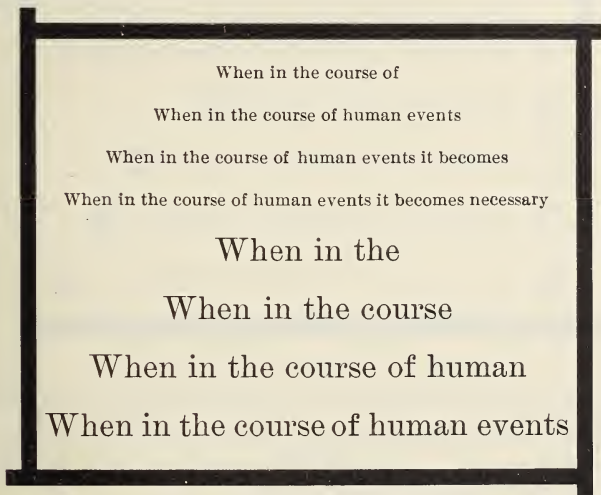

Imposition of lines for logotypes should be made according to their respective lengths, the shortest line first, grouping each size of type separately, according to the body.

Insert 10 points between each separate line, additional to the size of the body upon which the line is to be mounted. This 10 points additional space is required by the finisher when sawing the lines into separates, leaving sufficient margin for final smooth shaving to point system or exact size of body desired.

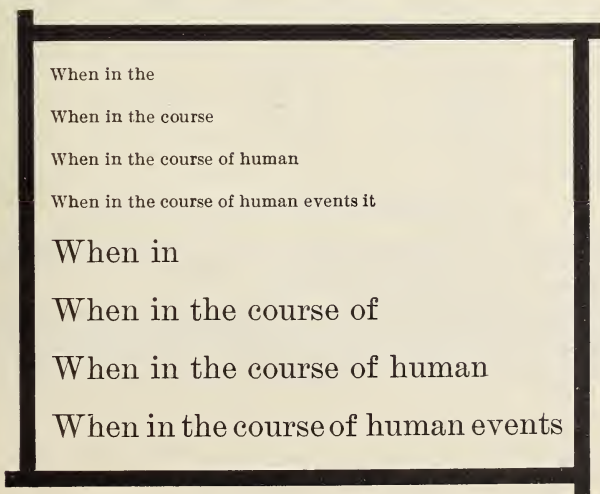

Observe the following samples:

Sample No. 1.

The following diagram shows the lockup for logotypes to be centered on any desired length of body:

*Sample No. 2.*

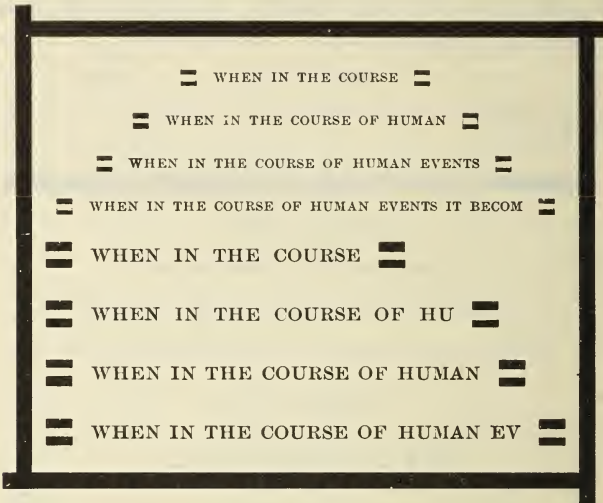

The following diagram shows the lockup for logotypes to be placed at end of slug on any desired length of body:

Sample No. 3.

The following diagram shows the lockup for logotypes where shoulder is required at top and bottom of type line on finished product.

Inverted type must be placed at each end of line of type in cases where a shoulder is required at top and bottom of type line on the finished logotype. The inverted type is necessary for the guidance of the finisher in trimming and shaving lines to required size.

The form must not be made larger than the actual size of face of type or longest line. The foundry will mount the type line on any given length of slug in ems or inches desired by the printer.

Do not impose in the same form subjects of which different number of plates are required; that is, do not lock in the same form subjects requiring six, eight, or more casts of one subject and only one cast of another.

The following table gives the number of times each line should be set when more than five casts of each line are required:

STEREOTYPING ILLUSTRATIONS WITH TEXT.

If illustrations are to be made up with the text, the cuts or illustrations should be forwarded to the foundry, for mounting on metal bases, at the same time that the copy is placed in the hands of the printer.

It is necessary to mount the cuts on metal bases for the purpose of properly drying the mold, which is dried by heat passing through the type or other substance from the bottom upward, as wood bases would not transmit a sufficient amount of heat for the drying-out operation. By observing this rule considerable time will be saved.

ILLUSTRATIONS FOR THE CONGRESSIONAL RECORD.

Illustrations which are to appear in the Congressional Record should be mounted on metal bases.

MOUNTING OF HALFTONE ILLUSTRATIONS.

If halftone illustrations are to be placed in text, upon receipt of the cuts or illustrations they should be immediately forwarded to the foundry for mounting on metal bases.

USE OF NEW AND OLD RULES IN GENERAL WORK.

In work where rules are used for blank lines, as in job work, new and old rules should never be used together. Use all new or all old rules in each job.

MAXIMUM SIZE OF PLATES.

The following sizes of chases are the largest which can be used for imposing forms for the foundry: Electrotyping, 24 by 30 inches; stereotyping, 19 by 24 inches.

PRESSWORK.

In imposing plate forms, great care should be taken with regard to margins, guide marks, folding points, and the proper position of the signature page so far as it relates to the fold. For instance, on a thirty-two—or, more properly speaking, two long sixteens—the signature page of the first sixteen should be in the lower left-hand corner, next to the grippers; the signature page of the other sixteen in the lower left-hand space, on the third row. The guide mark should be so placed that it will print on the edge of the sheet exactly where the sheet touched the guide when fed in. If there is any variation in the trim of the sheet, it will be overcome by making guides and guide marks hit the sheet at the same point. The guide mark being close to the gripper indicates at once to the boxer, the folding-machine operator, or the cutter which edges of the printed sheet are to be used in making his calculations for properly forwarding the work. The guides must invariably be used on the near side, next to the feeder, for the first printing, and on the far side for the second printing. This rule applies in sheetwise work as well. If, however, the inside of the sheetwise form for any reason be printed first, the guide and the guide mark must be used on the far side of the press.

The asterisk (*) indicates the folding point.

In order that the folding-machine operator may fill his hopper with several signatures from various presses at the same time, it is advisable on all work of the same size to maintain the same guide margins. For example, on the thirty-twos, or two long sixteens octavo, the drop-guide margin should be $8\frac{3}{4}$ inches from the top of the running head line, on the row of pages next the grippers, to the gripper edge of the sheet and fifteen-sixteenths of an inch from the side of type to the side-guide edge of sheet. The same measurements apply to a half form, sixteen octavo, except that the application is reversed, fifteen-sixteenths of an inch on the gripper margin and $8\frac{3}{4}$ inches from top of running head to side guide, and so on in all multiples of octavo make-ups.

On quarto, census, statutes, speech, specifications, and the various other forms in use these margins vary and should be 6 points more than the center cut either way unless otherwise specified. (See directions for margin, pp. 161 and 162.)

A 32-page octavo, or two long sixteens, is the most difficult layout now in use in the office, with the possible exception of the Use Book (48 pages). The first and most important move is to find the proper gripper margin. Taking it for granted that the base is clear of catches, put on page 3, if you are working with the first signature, at the gripper edge, twenty-three twenty-fourths of an inch to the right of the center of the base and approximate its distance from the gripper edge, which should be $8\frac{3}{4}$ inches from the running head on the plate to the edge of the sheet.

Page 1 should be laid to the extreme left of base, 24 inches from the left side of page 3 to the left or folio side of page 1. Page 4 should be laid $11\frac{1}{2}$ picas to the left of page 3, and page 2 to the extreme right of base, 24 inches from the right or folio side of page 4 to the right or folio side of page 2. Then lay in pages 16, 13, 14, and 15 in positions centering on the multiple of 24; that is, 8 picas between pages 1 and 16, 13 and 4, 3 and

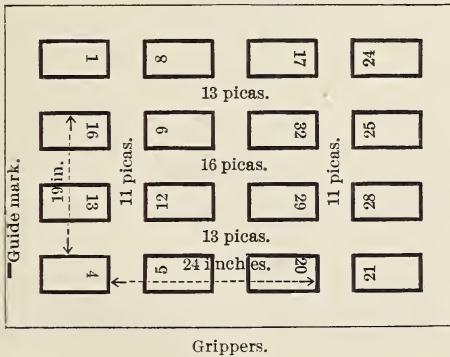

14, 15 and 2; $11\frac{1}{2}$ picas between 16 and 13, 14 and 15. The first, or gripper, row now being complete, lay page 8 directly over page 1, with $8\frac{1}{2}$ picas between heads. Directly above page 8 lay page 17, with the head 19 inches from the head of page 1, and above this lay page 24, with $8\frac{1}{2}$ picas between heads, and the head of the upper page (24) 19 inches from the head of page 8. If the pages now laid are in perfect alignment, the

pressman has two sides of a perfect square as a guide for the layout of the other rows, and the remainder of his task is simple. The principle involved in this layout can be readily applied to any form made up on these bases. The measurements will be different, of course, but the procedure will be identical.

SHEETWISE FORMS.

The layout illustrated below is the standard for regular sheetwise forms. It will be noticed that page 1 is laid opposite the grippers and not next to them, as the thirty-twos are laid. Feed to near guide on outside form. This is done to suit the folding machines.

The Blue Book make-up is similar to census, except that the head and back margins should be 10 picas each.

Too much care can not be exercised in the maintenance of proper margins on patent bases. Experience has shown that a variation in bevels on plates often necessitates the shifting of a page here and there on the base to obtain a perfect register. When the next form is dropped into the position indicated by the catches, another variation in bevels makes another shift necessary. If the catches thus moved are not brought

back into position each time a new set of plates is put on and the marginal gauges and rule applied, the pressman soon discovers that his form has spread to such an extent that it does not compare with his original, or pattern, sheet. The same is true of the drop-guide margin. When registering a sheet that has been exposed overnight to moisture or extreme heat, it is often necessary to move these guides. If they are not readjusted on the next form, the chances are that the $8\frac{3}{4}$ inches from top of running head line to edge of sheet has stretched to 9 inches or shrunk to $8\frac{1}{2}$, thus causing a readjustment of the folding-machine gauges and a loss of time, to say nothing of a spoilage, if the variation is not quickly discovered by the folding-machine operator.

Inset forms, before being issued to the pressman, will be prepared in the order in which they are to be laid, and they should always be laid as received.

Pressmen and those detailed to keep a standard color should examine all sheets of the book under the same light.

If a correction is to be made in a portion of a form requiring the unlocking and pulling out of such form on the bed of the press, the pressman will do the unlocking and place the form in such a position as will secure its safety and at the same time be as convenient as possible for the corrector. The pressman should also replace the form and lock it up again.

PAPER.

The pressman must always examine the paper delivered to him to see that it corresponds with the issue blank in quality, color, size, and quantity, the latter to be approximated, for he is not supposed to count any but the broken part of a ream. It sometimes happens that one shipment of paper is off-color, and if this becomes mixed with another shipment the difference will be clearly apparent in the completed book.

For the guidance of those who have doubts concerning the proper pages to drop out in fractional parts of sixteens, the following forms have been arranged:

Fourteen pages, blank in front.

Drop four pages out of center to make a twelve out of a sixteen.

Two fours.

Work and turn (64 pages) for parallel fold 38x48 sheet. This form is used on drill books and other work that trim less than $4\frac{3}{4} \times 6''$.

Grippers.

BOOKBINDING.

The styles of binding in the Government Printing Office embrace paper-cover work, cut-flush work, manifold work, cloth work in its various branches, and full and half leather work, each style comprising many forms.

Pamphlet work includes stitching by wire, covering, and trimming. The cover page should register correctly with the inside title-page. In trimming, if pattern is not furnished, the margins must correspond to the rules for making-up given on pages 161 and 162.

Cut-flush work is work on which all binding is done prior to trimming, including stub and form work.

Manifold work is a style of binding peculiar to itself, some having squares and others being cut flush. It is generally received in the bindery collated and numbered. When not numbered by the presses, it is numbered on the numbering machines in the bindery. Manifold work is stitched with wire through a lined board hinged by a linen guard.

In half-bound leather-case work, the books are prepared the same as full cloth. The cases being made in parts, the same preparations for board cutting are followed as in cloth cases.

Blank-book Work.

The methods of binding blank books differ greatly from those of binding printed work. The operations generally required for a blank book are ruling, numbering, indexing, forwarding, and finishing.

The principal styles of binding used on blank work are half russia, full russia, full canvas, and russia ends and bands. The principal sizes are cap, demy, double cap, double demy, medium, double medium, royal, and superroyal.

Blank books are covered in various ways, such as full leather, full canvas, half leather, and russia ends and bands; the operations covering full leather and full canvas being almost identical. Half-russia work is only different in that the sides and backs are put on separately.

If sheets have been ruled and printed, they are folded into sections (not signatures) of from four to six sheets, according to the thickness and weight of the paper, the sheets constituting a section being folded at one time.

The most recent method of sewing blank books, not including machine sewing, entails the use of patent guards, each section being sewed on an independent guard before sewing together, which insures a perfectly flat opening of the book.

The operation on russia ends and bands, designated "R. E. & B.," differs considerably from full and half bound work, requiring greater time for completion.

The full canvas or duck blank book is finished in the same manner as a full-russia book in so far as general operations are concerned, except that ink is used for lettering and embellishing.

The finishing of a half-russia blank book differs from a full-bound book in that the book requires cloth or paper sides similar to the siding of printed work, the operation being performed in the same manner.

The "R. E. & B." book differs from any of the others, both in respect to style and the execution of work, and is in a manner the combination of russia and sheep finishing, the russia being finished in gold and the flesher in blanking.

If blank books are indexed through, they should be graduated as follows:

These indexes are made of leather, cloth, or paper, and are of two kinds, "cut-in" and "extended."

For a "cut-in" index the pages are cut according to the scheme desired and the index letter pasted inside of the book. In an "extended index" the pages are not cut, but tabs are attached to the pages in a manner that will expose the letters without making it necessary to open the book.

COMPOUND AND NONCOMPOUND WORDS.

COMPOUND WORDS.

(See also Age, Bonds and stocks, and Percentage, pp. 31 and 32.)

Follow Webster's New International Dictionary generally in the use or omission of the hyphen or space between words. The List of compound words (p. 190) and Geologic ages, etc. (p. 15), are inserted for convenient reference. They show some variations which are to be followed. Compound adjectives generally take the hyphen.

all-round man.	joint-stock company.	35-candlepower lamp.
asked-for opinion.	light-green color.	75-horsepower engine.
contested-election case.	national-bank note or notes.	12-inch main.
cotton-boll weevil.	sea-island cotton.	$\frac{3}{8}$ -inch pipe.
iron-ship builder.	State-bank note or notes.	ten 10-horsepower cars.

Do not confuse a qualifying word with a subject word; for instance, a shoemaker, a wooden-shoe maker. Also observe the following forms: Young school-teacher, common-school teacher, high-school teacher, public-school teacher; distinguished-service medal, real-estate broker, navy-yard employee, etc.

A present or past participle with a noun or an adjective may take a hyphen in such expressions as the following: Always wind-obeying deep; well-dealing countrymen; dark-working sorceress; soul-killing witches; fool-begged patience, etc.

Adverbs ending with "ly" are not usually compounded with the adjectives which they qualify, as a "nicely kept lawn." But words like "above," "ill," "well," "so," etc., are compounded in such expressions as "the well-known writer," "the so-called tariff reform," "this ill-advised expenditure," "the last-named article," etc.

Fractions, when spelled, should be compounded: One twenty-first, one-fifth, eighty-one one-hundredths, one one-hundredth, the one-hundredth part, one one-hundred-and-twentieth, two one-hundred-and-twenty-sixths.

Do not use hyphen in expressions like one half and the other half, one sixth to John and the other sixth to James.

When used adjectively, the expressions "first-class," "second-class," etc., are to be hyphenated; otherwise they should be printed as two words: A first-class passage, a first-class man, a man of the first class, a work of the second class, etc.

In such expressions as the "January-June period," "Washington-Baltimore improvement," etc., when used adjectively, use hyphens; but to indicate the elision of the word "to," in such expressions as "the period January-June," use an en dash.

Mr. So-and-so.

NONCOMPOUND WORDS.

Omit the hyphen in civil and military titles, as Attorney General, Postmaster General, Paymaster General, brigadier general, lieutenant colonel, etc.

Omit the hyphen in such Latin forms as "an ex officio member," "ante bellum days," "prima facie evidence," "per diem employees," etc.; and also in such cases as "ocean mail lines," "railway rate legislation."

Omit the hyphen in abbreviated terms except "sec.-ft."

Omit hyphens in short titles of acts, bills, and laws, as pure food law, interstate commerce act, etc.

LIST OF COMPOUND WORDS.

WORD FORMS IN GENERAL USE.

Explanation of the List.

Two-word forms.—These forms are not shown in this list except in a few cases, used for purposes of illustration.

Prefixes.—Prefixes are in bold-faced type.

Suffixes.—Use the hyphen with a suffix preceded in this list by a short dash. If no dash precedes the suffix, make one word, as, *backache*, *backbite*; *blue-bellied*, *blue-ribboner*. Words taking the suffix “like” should be one word, unless ending in “ll,” when a hyphen should be used, as *shell-like*, etc.

Class words omitted.—“Rest take hyphen,” “rest one word,” means that words of the same class, but not contained in this list, should be solid or hyphenated as shown in the dictionary. Terms not shown there are generally two-word forms, except where they are temporarily joined to make a compound adjective. Example: *True blue* (two words); *true-blue loyalty* (true blue temporarily an adjective).

Abbreviations.—The abbreviations (a.), for adjective; (adv.), for adverb; (n.), for noun; or (v.), for verb after a word restrict the use of the word to the part of speech indicated.

Uniformity of treatment.—For the sake of appearance, it may be necessary sometimes to treat alike words which, if widely separated, would have different forms, as, for example, *time-work* and *piecework*. Appearing in juxtaposition, these and similar words may be made uniform, either by inserting the hyphen in one or taking the hyphen out of the other, as seems best for the time being. When this is done it should be understood that it is only a temporary expedient for the job in hand and does not supersede the list as here given.

Completeness of the list.—The words printed here, taken in connection with the accompanying statements, “rest one word,” “rest take hyphen,” form practically the entire collection found in Webster’s New International Dictionary, current edition.
