

NEW BUILDING FOR GOVERNMENT PRINTING OFFICE.

ANNUAL REPORT

OF THE

PUBLIC PRINTER

FOR THE

FISCAL YEAR ENDED JUNE 30, 1899.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1899.

OFFICE OF THE PUBLIC PRINTER,

Washington, D. C., December 4, 1899.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1899.

Very respectfully,

F. W. PALMER,

Public Printer.

THE PRESIDENT OF THE SENATE PRO TEMPORE.

ANNUAL REPORT

OF

THE PUBLIC PRINTER.

To the Senate and House of Representatives:

In my last annual report a statement was made of the several measures which had been taken up to that time for an extension of the Government Printing Office building. During the second session of the Fifty-fifth Congress an appropriation of \$225,000 was made for the purchase of land for this purpose, the title to be obtained by condemnation proceedings. The value of the land was appraised by a commission appointed by the supreme court of the District of Columbia, and the appraisal was approved by the court. The aggregate amount paid to the several owners was \$188,000.81; the fees paid to commissioners of condemnation, expert witnesses, etc., were \$1,210.50; paid for abstracts of title and recording deed, \$701; court fees, \$115.75, making the total expenditure for the purchase of the land \$190,028.06. The remainder of the appropriation, viz, \$34,971.94, as an unexpended balance, was covered into the Treasury of the United States.

During the third session of the Fifty-fifth Congress an appropriation was made for the construction of a fireproof extension of the Government Printing Office building on the site acquired by authority herein described. The language of the appropriation act was as follows:

Government Printing Office building: That there be constructed, upon the land acquired by the United States in square numbered six hundred and twenty-four, in the city of Washington, District of Columbia, under the provisions of the Act entitled "An Act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, eighteen hundred and ninety-nine, and for other purposes," approved July first, eighteen hundred and ninety-eight, a fireproof building for the use of the Government Printing Office, at a total cost, including approaches, elevators, lighting, and heating apparatus, not exceeding two million dollars.

That the building herein provided for shall be erected under the direction and supervision of the Chief of Engineers of the Army, by contract or hired labor, or

both, as may be to the best interests of the United States, and upon plans and specifications to be prepared by him and approved by the Public Printer. And the said Chief of Engineers is hereby authorized to enter into a contract or contracts for the construction of the whole or of any part of said building and for the removal of the old dwellings and other buildings now standing upon said land, subject to appropriations to be made therefor by Congress, and he shall also have the employment of all persons connected with the work: *Provided, however,* That the selection and appointment of a competent architect to prepare the plans and specifications for the elevations of said building shall be made by the said Chief of Engineers and the Public Printer jointly.

Toward the construction of said building and for each and every purpose connected therewith, including the cost of all professional and other personal services that the Chief of Engineers of the Army may deem necessary, and for the rent of office rooms in a locality convenient to the work, three hundred and fifty thousand dollars, to be immediately available. This appropriation and all appropriations which may hereafter be made for this purpose shall be expended under the direction and supervision of the said Chief of Engineers.

In accordance with the provisions of this appropriation, plans and specifications were prepared by the Engineer Department of the Army for the erection of the building, and the plans were approved by the Public Printer. Mr. James G. Hill, of this city, was selected by the Chief of Engineers and the Public Printer jointly as architect to prepare the plans and specifications for the elevations of the building, and his work has reached a satisfactory state of advancement. An illustration of the elevations accompanies this report.

Col. John Stephen Sewell, Corps of Engineers, United States Army, was detailed by Gen. John M. Wilson to superintend the preparation of plans and specifications for the new building and to take charge of its construction.

In preparing the site for the new extension of the Government Printing Office for the work of excavation it was necessary to demolish the temporary three-story brick warehouse owned by the Government and fronting on Jackson alley. It was occupied in the basement and first story by the carpenter and paint shops, and the second and third stories were used for the storage of the books of record of the Office and public documents. The books of record were removed to the upper floor of the fireproof annex fronting on H street, the bound and unbound documents to the leased warehouse on L street NW., and the carpenter and paint shops to the lot and buildings on the north side of Jackson alley, extending from Jackson alley to H street, and owned by Mrs. Amanda Holmes. The lot and buildings were leased for a period of one year, with the privilege of a longer period, for the sum of \$85 per month.

The transfer of titles to lots of land as a site for the new building was not completed until May 1 of the present year. Competitive bids for the old buildings on the several lots were invited by public advertisement, and on the 18th of May they were allotted to Mr. Andrew Gleeson for the sum of \$1,300. The removal of the buildings was completed

on July 6. Bids for excavation were invited, and on the 10th of July a contract was awarded to Messrs. S. Carmody & Son for 30,000 cubic yards of general excavation at 44 cents per yard, 10,000 yards of trench excavation at 75 cents per yard, and 300 linear feet of test borings at \$2 per foot. Up to the 30th of November there had been completed 29,300 cubic yards of general excavation, 4,100 cubic yards of trench excavation, and all the borings. The remainder of the work covered by the contract is proceeding as rapidly as could reasonably be expected.

The necessary cement shed, fence, tool sheds, etc., have been built, and the concrete work begun, by hired labor. About 2,100 cubic yards of concrete have been put in, and if the weather should continue good the bulk of the foundation work will be finished by January 1. The plans of the building are well advanced, and the steel work will probably be ready for bids about the middle of December. Actual expenditures up to date amount to about \$45,000, of which about \$13,000 are for office expenses and preparation of plans, including the fee to the architect, and \$32,000 are for actual work in the field.

The conditions have been more favorable than was anticipated in relation to the foundation work; the soil is better, the amount of water is less, and the weather has been better than there was reason to expect. The economy attained in carrying on the work has also been greater than was expected. The superior quality of the soil has made a reduction in the quantity of concrete required, and this, with all the other favorable conditions, will bring the cost of the foundations, including excavation, down to about \$100,000, whereas the estimated cost was about \$150,000.

Such good fortune, however, is not to be anticipated in the erection of the superstructure. The prices of building materials have risen to such an unprecedented and unlooked-for degree that, although a margin of nearly 10 per cent was left in the original estimate, based on prices prevailing at the time, it will be necessary to increase the limit of cost by another 10 per cent or else abandon some of the most important and necessary features of the building.

The actual cost of such a building as the new one proposed is now not less than 25 per cent higher than it was a year ago. Further study has shown the necessity, also, of building the G street end of the power house—over the coal vault—to the same height as the main building to secure absolutely necessary floor space. This adds about 9 per cent of floor space and about 10 per cent of cost—this on account of having to make the lower stories heavier than intended, to carry the new and superimposed ones.

Under present conditions, with no prospect of any material fall in prices in the near future, the additional cost of the original project is \$209,000, and of the proposed addition to the south end of the power house \$220,000, making the necessary increase in the limit of cost about \$429,000, if the building is to completely fulfill its ends. Attention is

invited to the fact that the increase is not necessitated by unauthorized changes in plans nor by exhausting the appropriation, with work still incomplete, but by a change in conditions wholly unlooked for by anyone and almost unprecedented. All work so far done has been accomplished within the limit of the original estimate. Actual expenditures to date amount to only \$45,000, and the amount covered by outstanding liabilities and existing contracts is not more than \$43,000 additional. The constructing engineer has submitted a detailed report to the Chief of Engineers, which will be laid, in due course, before the President of the Senate and the Speaker of the House of Representatives.

Early in the months of the present year the fact was developed that in order to provide for the storage of bound and unbound volumes of public documents formerly in the warehouse of the Government Printing Office, and for the large stock of official envelopes, paper, etc., storage space equal to that of the warehouse on L street, leased by the Government for the use of the Government Printing Office, would be necessary as early as the commencement of the present fiscal year. Accordingly, a contract was made with Mr. W. F. Nash, owner of the L street building, for the construction of a warehouse similar in all respects to the one then occupied for the uses of the Government Printing Office, to be completed on July 1, 1899, and to be leased to the Government for one year, with the privilege of renewal for a longer period, for the sum of \$5,000 per year. It is estimated that when the new extension of the Government Printing Office shall be completed, and the old and insecure portion of the present structure shall be reconstructed, sufficient room will be supplied for all the storage purposes of the office, and the time, labor, and expense of wagon transportation between the present warehouses and the office will thus be obviated.

Near the close of the last session of the Fifty-fifth Congress the following amendment was made in the sundry civil appropriation bill to the proposed appropriation for public printing and binding:

Provided, That in the expenditure of this appropriation the Public Printer may, during the fiscal year nineteen hundred, in his discretion, pay all printers and bookbinders employed in the Government Printing Office at the rate of fifty cents per hour for time actually employed.

In accordance with this authorization, the compensation of the two classes of employees named have been paid at the rate of 50 cents per hour, commencing on the 1st day of July last. The increased expenditure by reason of this change in rate of compensation will be, for the current fiscal year, about \$286,000.

Several months ago the attention of the Board of Commissioners of the District of Columbia was called to the unsatisfactory condition of the sidewalks in front of the Government Printing Office on H and North Capitol streets, with a request for their repair. The reply to this request was that no appropriation was available for such work. Inasmuch as the

District Commissioners have no power to delegate authority to the Public Printer to repair or rebuild the sidewalks herein mentioned, I have the honor to request that a sufficient sum be appropriated by Congress to construct a concrete sidewalk on H street and a sidewalk partly of concrete and partly of vitrified brick on North Capitol street, in front of the Government Printing Office, at an early day, the sum thus appropriated to be expended under the direction of the Board of Commissioners of the District of Columbia.

The report of the Superintendent of Documents is submitted herewith; also tabular statements containing detailed information which the Public Printer is required to furnish Congress, in accordance with the provisions of sections 19 and 22 of the act of January 12, 1895.

F. W. PALMER,
Public Printer.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., November 1, 1899.

MISCELLANEOUS DISTRIBUTION TO COMPLETE SETS.

The number of documents distributed to miscellaneous libraries to complete sets was larger in the aggregate (196,983) than the entire number furnished libraries for that purpose since the inauguration of the work by Dr. John G. Ames, of the Interior Department, some fifteen or twenty years ago. Any document that is available for distribution gratis is promptly supplied to any public library upon application, for the purpose of completing a set.

While this work is not a duty imposed by law, the practice has been so long continued and has served such a useful purpose that it has come to be considered as one of the important functions of the office. The labor involved in packing, registering, and mailing this vast number of books was very great, but it was not permitted to interfere with the current business, which was also extremely heavy.

The value of these documents to the libraries can not be overestimated, as most of them have been out of print so long that they are practically unobtainable elsewhere. An incomplete set of books of any kind is of little use, as a reference to it usually discloses the fact that the volume wanted is missing.

The question is frequently asked as to the source from which documents available for gratuitous distribution to public libraries, other than those distributed to designated depositories under the law, have been obtained. The larger number have been received from the Executive Departments under the provisions of the act of January 12, 1895, which directs that documents therein not required for official use shall be delivered to the superintendent of documents for distribution. Documents have been accumulating in the Departments for a century, and several hundred thousand volumes have been turned over to this office and are being disposed of by sale or distribution to libraries. Large numbers of documents are also received from libraries that have them in duplicate. Twenty-five thousand four hundred and ten volumes were received from this source during the fiscal year. Many more would have been received, but I was compelled to decline them for the present, owing to lack of room.

Much has been said concerning the duplication of documents to libraries. My experience leads me to the conclusion that a great deal of good has resulted therefrom indirectly. It is a well-known fact that the true librarian never destroys any-

thing in the way of printed matter. Thus it has happened that documents sent in duplicate to public libraries in the older States have been carefully preserved for generations, frequently at great inconvenience for lack of space. These libraries gladly availed themselves of the offer of the Government, through Dr. Ames in the first place, and later through this office, to receive the accumulations of duplicates and redistribute them to new libraries in the Western States, where they never could have been obtained otherwise.

MESSAGES AND PAPERS OF THE PRESIDENTS.

I am pleased to report that the distribution of the compilation of the Messages and Papers of the Presidents, 1789-1897, by James D. Richardson, has been substantially completed. The work was published in three editions, aggregating 36,000 sets of 10 volumes each. The first and second editions were distributed by members of the Fifty-fourth Congress, and the third edition upon orders of members of the Fifty-fifth Congress. The utmost care has been exercised in the distribution to insure prompt delivery to the person for whom intended. I am now sending out postal notices to all designees, which state that the distribution is finished, giving the name of the Senator, Representative, or Delegate on whose order the books were sent, and asking for prompt notice of failure to receive any volume or volumes of the set, so that they may be traced. Great credit is due the Post-Office Department for the promptness and accuracy with which more than 300,000 volumes of the work have been delivered, not a single case of loss having been reported that could not be traced.

SALES.

The number of documents sold, and the receipts therefrom, show an increase of 25 and 65 per cent, respectively. The average price of each document sold was about 28 cents, as against 21 cents last year. Seventy per cent of the documents sold, and 28½ per cent of the amount of sales, was on account of publications of the Department of Agriculture.

Orders aggregating several thousand dollars could not be filled because the supply of documents desired was exhausted.

It is hoped that Congress will authorize the superintendent of documents to make requisition upon the Public Printer for the reprint of documents that may be in demand by the public, upon certificate that a certain number of copies have been subscribed and paid for.

Two price lists have been published, one in October, 1898, and one May 1, 1899. The latter is the most complete price list of documents for sale that has ever been issued, and it has increased the sale of documents very materially.

PUBLICATIONS.

The documents published by this office during the fiscal year aggregate 1,872 pages, and consist of 1 document catalogue (comprehensive index), 12 monthly catalogues of public documents, 2 price lists, 1 "Reports of Explorations Printed in the Documents of the United States," by Adelaide R. Hasse, and 1 bibliography of United States documents relating to interoceanic communication across Nicaragua, Isthmus of Panama, etc. Thirteen thousand documents were received for cataloguing purposes and 49,000 cards were written.

The document catalogue (comprehensive index) of Fifty-fourth Congress, second session, is in press, and the document index of the Fifty-fifth Congress, third session, will go to press in a short time.

For some time I have had in contemplation an improvement of the monthly catalogue of public documents by making the index cumulative. This will be done as soon as the business of the office will warrant it.

In my last annual report I spoke of the desirability of publishing the document

catalogue biennially instead of for each session of Congress, as now required by law. A bill will be presented to Congress in December next that will provide, among other things, for this change. It is intended, if the bill shall pass, that the first issue shall include all the documents of the Fifty-fifth Congress, and those of the departmental series published from July 1, 1897-June 30, 1899. If this plan shall be adopted, much duplication of matter will be avoided, and consequently a great deal of labor will be saved both in the preparation and publication of the catalogues.

CHECK LIST OF PUBLIC DOCUMENTS.

Considerable progress has been made in the preparation of a new check list of public documents, so that it now seems probable that it can be finished and published next year.

It is my intention to make the check list much more systematic and comprehensive than any heretofore attempted. With this object in view many prominent librarians were consulted prior to beginning the work, and I beg to tender to them my acknowledgments for the many valuable suggestions made.

The following is a brief outline of the plan adopted for the work:

The documents are grouped under four headings, as follows:

1. Papers of the Revolutionary period.
2. Proceedings and Debates in Congress.
3. The Congressional series.
4. The Departmental series.

In the first group will be included many valuable papers not public documents, but which have been either purchased or adopted by the Government as official.

Group 2 will contain a list of the proceedings and debates in Congress from the First to the Fifty-fifth Congress, inclusive, arranged by Congresses and sessions instead of by volume numbers, for the reason that the volumes composing the set are not uniform on account of a difference in the pagination of the daily edition and those bound at the end of the session for distribution to libraries.

The third group will contain a list, as nearly complete as possible, of the Congressional documents from the First to the Fifty-fifth Congress, inclusive. The scheme devised by Dr. John G. Ames, of serial numbers for the documents of the Fifteenth to the Fifty-third Congress, has been adopted and continued. It having been found impracticable to classify the unnumbered documents of the first fourteen Congresses by serial numbers, they will be introduced immediately preceding the documents of the Fifteenth Congress under "zero numbers."

Group 4 will contain a list of the documents known as the "Departmental" series, many of which also appear in the Congressional series. The latter will be indicated so that duplication under different titles may be easily ascertained.

A new classification has been devised by this office for the Departmental series which I think will meet all requirements. By the use of this classification reference to the Departmental series is made easy and may be applied as serial numbers are to Congressional documents. A few notes, with sample page, are given herewith which probably sufficiently explain the scheme to enable librarians to adopt the classification if desirable:

Using the abbreviations for the departments (i. e., A=Agriculture; T=Treasury; W=War, etc.), and the figures *preceding* the decimal point to represent the bureau, office, etc. (i. e., A1.=Agriculture, Secretary; A2.=Agriculture, animal industry; A3.=Agriculture, botany, etc.); the figures after the decimal to represent the series (i. e., A2. 1.=Agriculture, animal industry, annual reports); the figures after the colon to be the book number, date, etc. (the latter not to be used in the tables, but to be left to be supplied by the person classifying the works). This classification is also the fruit of most trying experience and can be, I feel sure, recommended to all as the most satisfactory method which it seems possible to devise.

DEPARTMENTAL SERIES.

		No. 4	No. 9	No. 14	No. 19	
		No. 5	No. 10	No. 15	No. 20	etc.

In the above classification the following combinations are arbitrary:

Figure 1 preceding the decimal point always stands for secretary or chief executive officer of a department or office, the other numbers, indefinitely, to be applied to the various bureaus, divisions, or offices.

The figures following the decimal point and preceding the colon always stand for the following:

- 1 Annual reports.
- 2 General publications.
- 3 Bulletins.
- 4 Circulars.

The rest of the numbers, indefinitely, to be applied to other series which bear distinctive titles or numbers; but all unnumbered miscellaneous publications are to be

classed under "general publications" of the bureau or office from which they emanate, or if this fact can not be ascertained, under "general publications" of the Department.

The foregoing tables are purely suppositional, but will give an idea of the proposed arrangement.

Another new and important feature of the check list will be the cyclopedic index. In the check list, edition of 1895, the few titles given of Congressional documents appear in the tables; these will be omitted and in lieu thereof the titles of all Congressional documents will appear in the cyclopedic index in alphabetical order under subject, title, and authors when important, except such documents as relate merely to private claims and a few minor matters of no historical interest. This method will undoubtedly open up for convenient reference a vast amount of valuable historical matter that has heretofore been hidden away and almost inaccessible for lack of proper indexes.

PROPOSED AMENDMENTS TO THE ACT OF JANUARY 12, 1895, PROVIDING FOR THE PUBLIC PRINTING AND BINDING, AND THE DISTRIBUTION OF PUBLIC DOCUMENTS.

The committee appointed by you soon after the adjournment of the Fifty-fifth Congress, consisting of the foreman of printing, the chief clerk of the Government Printing Office, and the superintendent of documents, for the purpose of reporting what amendments, if any, should be made to the act of January 12, 1895, relating to the public printing and binding and the distribution of public documents, have substantially agreed to recommend certain amendments which will be presented to Congress at its next session.

I shall not attempt to analyze these amendments further than to say that it is expected, if the bill shall pass, that it will result in the prompt delivery of public documents to the designated depositories; that the binding of documents will be uniform, will give better service, will conform more closely to the literature of the day, and will present a more attractive appearance generally; that every copy of a document will bear the same title and have the same title-page, thus doing away with the confusion that now exists where a document may be issued under three or four different titles.

BINDING DOCUMENTS RESERVED FOR DISTRIBUTION TO DEPOSITORIES.

It will be very gratifying news to librarians to learn that the present Public Printer has inaugurated a plan for the binding of the documents "reserved" for binding and distribution to designated depository libraries that promises to solve the problem that has troubled them from time immemorial. That is, a special section has been established for binding these documents, and it is hoped that it will be made permanent. Up to date of making this report 4 volumes of the documents of the Fifty-fifth Congress, first session, 20 of the Fifty-fifth, second session, and 4 of the Fifty-fifth, third session, have been received from the Printing Office and distributed to the depositories. This is unprecedented in the history of that office. The determination of the Public Printer is that the work of binding the "reserve" shall be brought up to date, so far as the preparation of the matter will permit.

DESIGNATED DEPOSITORY LIBRARIES.

Appended to my report will be found a complete list of the three classes of depository libraries. There are 478 libraries on the list of designated depositories, an increase of 6 during the year. There are still 22 vacancies, which may seem very strange when the value of the privilege is considered. For the information of those concerned in making designations, etc., I quote the following from the Revised Statutes of the United States:

"SEC. 501. The copies of journals, books, and public documents which are or may be authorized to be distributed to incorporated bodies, institutions, and associations

within the States and Territories, shall be distributed to such bodies as shall be designated to the Secretary of the Interior (superintendent of documents) by each of the Senators from the several States, respectively, and by the Representatives in Congress from each Congressional district, and by the Delegate from each Territory. The distribution shall be made in such manner that the quantity distributed to each Congressional district and Territory shall be equal; except that whenever the number of copies of any publication is insufficient to supply therewith one institution, upon the designation of each member of the Senate and House of Representatives the copies at the disposal of the Secretary (superintendent of documents) may be distributed to such incorporated colleges, public libraries, athenæums, literary and scientific institutions, boards of trade, or public associations as he may select.

“SEC. 502. The selection of an institution to receive documents ordered to be published or procured at the first session of any Congress shall control the documents of the entire Congress, unless another designation be made before any distribution has taken place under the selection first made. Where the work is printed by order of both the Senate and House of Representatives, the duplicates may be sent to different institutions, if so desired, by the member whose right it is to direct the distribution, and the public documents to be distributed by the Secretary of the Interior (superintendent of documents) shall be sent to the institutions already designated, unless he shall be satisfied that any such institution is no longer a suitable depository of the same. * * *

“SEC. 506. All such books and documents when received at the proper offices, libraries, and other depositories, as provided by law, shall be kept there and not removed from such places.”

(Act of Jan. 12, 1895, 28 Statutes at Large, 601.)

“SEC. 70. The superintendent of documents shall thoroughly investigate the condition of all libraries that are now designated depositories, and whenever he shall ascertain that the number of books in any such library, other than college libraries, is below one thousand other than Government publications, or it has ceased to be maintained as a public library, he shall strike the same from the list, and the Senator, Representative, or Delegate shall designate another depository that shall meet the conditions herein required.

“SEC. 74. * * *; and all Government publications delivered to designated depositories or other libraries shall be for public use without charge.”

A great deal of confusion has arisen from time to time on account of the redistricting of States for Congressional purposes. Two and even three depositories are sometimes thrown into the same district and new districts are left without any. The result is, when the Representative of the new district exercises his right to designate a depository, one of the old depositories must be dropped, and it often happens that the library thus deposed is much more worthy than the substitute. Probably the only remedy would be to allow a number of depositories to each State and Territory equal to its Congressional delegation, with the privilege to each member to designate only when a vacancy occurred in his district, provided there was no other depository therein. It certainly seems to me that if a library is worthy of being a depository for public documents the designation should be made permanent. Under the present law a depository is liable to be dropped any time and left with an incomplete set of documents in its files.

GEOLOGICAL DEPOSITORIES.

The distribution to geological depositories is authorized by section 79 of the act of January 12, 1895, and an amendment thereto, which read as follows:

“SEC. 79. * * * . And there shall be distributed of monographs, bulletins, and reports of the United States Geological Survey now in the possession of the said Survey, being publications prior to the year 1894, one copy of every such publication to every public library which shall be designated to the superintendent of docu-

ments, as follows: Two public libraries to be designated by each of the Senators from the States, respectively, two public libraries by the Representative in Congress from each Congressional district, and two public libraries by the Delegate from each Territory; such public libraries to be additional to those to which said publications are distributed under existing law."

(Joint resolution approved February 26, 1896, 29 Statutes at Large, 465.)

"That the provisions of section 79 of 'An act providing for the public printing and binding and the distribution of public documents,' approved January 12, 1895, * * * shall be extended to the monographs, bulletins, and reports of the Geological Survey which were published during the year 1894, and to those which have been published since that year, and to those which may be published in the future.'" * * *

There are 122 vacancies in this list. By consulting the appended list of such depositories members of Congress may readily ascertain whether their districts or States are represented. These depositories when named are permanent, and some confusion has been caused by throwing three or four depositories in the same district when a State has been redistricted for Congressional purposes. A new district may be left without representation, and yet the State quota may be full.

REMAINDER DEPOSITORIES.

The following extract from the act of January 12, 1895, is the authority under which documents known as "remainders" are distributed. The superintendent of documents has endeavored to obtain designations from each district in order to make an equal distribution of these documents, but has only partially succeeded. Nearly 700 libraries are now on the list, however, as against 262 two years ago. These will be continued until dropped and others substituted by the members whose right it is to direct the distribution.

"SEC. 68. Whenever in the division among Senators, Representatives, and Delegates, of documents printed for the use of Congress there shall be an apportionment to each or either House in round numbers, the Public Printer shall not deliver the full number so accredited at the respective folding rooms, but only the largest multiple of the number constituting the full membership of each or either House, including the Secretary and Sergeant-at-Arms of the Senate, and Clerk and Doorkeeper of the House, which shall be contained in the round numbers thus accredited to each or either House, so that the number delivered shall divide evenly without remainder among the members of the House to which they are delivered; and the remainder of all documents thus resulting shall be turned over to the superintendent of documents, to be distributed by him, first, to public and school libraries for the purpose of completing broken sets; second, to public and school libraries that have not been supplied with any portion of such sets, and, lastly, by sale to other persons; said libraries to be named to him by Senators, Representatives, and Delegates in Congress; and in this distribution the superintendent of documents shall see that, as far as practicable, an equal allowance is made to each Senator, Representative, and Delegate."

REFERENCE LIBRARY.

There is now a total of 30,698 books and maps in the reference library of this office. During the year 6,534 books and 914 maps were added. Under the heading "Books" are included bulletins, periodicals, orders, circulars, separates, and miscellaneous pamphlets from departments and offices, but bills, slip laws, committee reports, and other unbound Congressional documents, of which many thousands are received, are not included. Publications in these classes are not noted as additions to the library until collected in permanent form in bound volumes.

The statistics of increase of the library do not accurately represent the publishing output of the Government for one fiscal year. Despite constant calls upon depart-

ments and bureaus for missing publications (almost always answered with promptness and courtesy) some few have doubtless escaped, though probably none of much importance. On the other hand, many documents of earlier years have been rescued and added to the library.

There have been a great many applications during the year upon the part of the public for permission to use our library, but on account of interruption to the work of the office and for lack of proper facilities I was compelled to refuse it, except in a few exceptional cases. Librarians who have called to inspect the library and take note of our classification of public documents have been shown every courtesy and afforded such assistance as our limited means would admit of. It is quite likely that such demands will be made on the library in the future by the officials of the Government that some provision will necessarily have to be made for those who desire to use it in reference work.

The following table shows the total number of books and maps, and the total number of publications of each department, bureau, and office, and the accessions during the year:
