LETTER OF TRANSMITTAL.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 6, 1915.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1915.

Very respectfully,

CORNELIUS FORD,
Public Printer.

The PRESIDENT OF THE SENATE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 6, 1915.

To the Senate and House of Representatives:

The report of the transactions of the Government Printing Office for the fiscal year ended June 30, 1915, as herewith presented, contains all the statistical information required by law and such other information as deemed necessary to properly present the operations of the office for the fiscal year.

The total appropriations for salaries, maintenance, and operation of the Government Printing Office, including deficiency appropriations, were \$5,907,159.64. Of this amount the sum of \$331,395 was appropriated for the operation and maintenance of the office of the superintendent of documents, and \$30,000 for mail-carrying system connecting the Government Printing Office and the new city post office. The sum of \$5,545,764.64 of the total appropriation was therefore available for the production of public printing and binding for Congress and the departments according to allotment.

Printing and binding to the extent of \$778,460.20 was executed for Congress and the departments chargeable to appropriations other than those constituting the regular allotments. Of this amount \$29,058.70 remained uncollected June 30, 1915.

The total disbursements and outstanding obligations chargeable against the 1915 appropriations amounted to \$6,445,277.68, leaving an unexpended balance of \$211,283.46 to the credit of the several appropriations. To this balance the uncollected repays (\$29,058.70) will make the amount to revert to the Treasury in excess of \$240,000.

The unexpended balance of \$211,283.46 was composed of the following items: Statutory salaries, office of the Public Printer, \$7,582.06; leaves of absence, \$9,864.25; pay for holidays, \$3.26; salaries, office of the superintendent of documents, \$12,826.09; general expenses, office of the superintendent of documents, \$28,912.48; mail-carrying system, \$4,867.27; printing and binding, \$147,228.05.

The total expenditures for maintenance, operation, and general expenses of the Government Printing Office, not including the expenditures of the office of the superintendent of documents, were \$6,155,621.25, a reduction of \$297,680.62 from the figures of the previous year.

WORK OF THE FISCAL YEARS 1913, 1914, AND 1915.

The following comparative statement is a summary of the productive operations during the fiscal years 1913, 1914, and 1915, and covers the most important items entering into printing and binding:

EXPENSE AND PRODUCTION.

The summary of expense and production for the fiscal year (facing this page) shows in detail the various items which go to make up the operating expense of each productive division, the value of product, the overhead expense and the manner in which it is distributed, and the amount of work performed for each department and independent bureau, together with allotment balances at close of year.

The overhead expense increased \$71,224.16 over the previous year, due to an increase in pay for leave of absence, necessary purchases of equipment and productive machinery, and cost of the heat, light, and power for the new city post office, which this office is required to furnish without reimbursement.

As compared with previous year, the daily average number of employees who actually worked decreased 126, while operating expense and computed product both decreased approximately 5 per cent.

For several years Congress was in session the greater portion of the time, and night forces were in constant operation. In the year covered by this report Congress was in session only about seven months, and upon adjournment the decrease in volume of legislative printing and binding necessitated abolishing the night work and a reduction of forces. Rather than make extensive discharges and thus disrupt the organization of mechanical forces I decided to make short-period furloughs of employees in the various divisions affected by the decrease in work. As a further means to prevent a discharge I made an appeal to the President in regard to having departments and bureaus send to this office some of the printing and binding which they are allowed to have done in commercial offices. In response to this appeal various departments and independent bureaus gave hearty cooperation, and a large amount of miscellaneous work was forwarded to this office and handled expeditiously.

By means of close supervision and faithful service on the part of the employees it was possible to maintain to a high degree the efficiency of the office, and every division was operated without loss for the year.

Orders for postal cards decreased over previous year by 99,000,000. The Post Office Department makes direct purchase of stock for the work and furnishes it to this office.

The production of money-order books increased over previous year by 185,000 (37 per cent), and on March 1, 1915, the charges for this work were materially reduced.

SCALE OF PRICES.

A close analysis of the work of the year, and having in mind the advantages to be derived from the new machines which will be installed, made it advisable to consider a reduction in the scale of prices. After a careful study of the proposition, I authorized a reduction of $2\frac{1}{2}$ per cent, amounting to approximately \$150,000 per year, on such general items as will result in benefit to all departments and Congress. I propose to do the Government printing and binding at as low a figure as is possible and at the same time conform to the law directing work shall not be done at less than cost. Periodical readjustment of the scale may become necessary in order to achieve this result.

NEW MACHINERY AND EQUIPMENT.

By economy of operation it became possible to purchase a portion of the new machinery and equipment which has been so badly needed for years, and the service will be greatly benefited thereby. The

following shows the principal purchases of productive machinery and equipment:

IMPROVEMENTS IN THE BUILDINGS AND PLANT.

A 10-inch sewer was installed in boiler-house basement, at a cost of \$358.97. All faucets were removed from drinking fountains throughout the buildings and replaced with bubbling fountains, at a cost of \$946.75; this replacement was a decided advance in sanitation. Screens were placed at windows on sixth and seventh floors, particularly for the benefit of night forces, at a cost of \$1,183.08. Improvements and additions were made in the lighting system, at a cost of \$4,701.70; the work of replacing Cooper-Hewitt lights throughout the buildings with tungsten lights progressed satisfactorily, and the office is becoming an excellently lighted institution. Painting, outside and inside, cost \$880.46. Manufacture and repair of furniture, files, shelving, etc., cost \$3,599.08.

Approximately 39,000 repair jobs, covering every imaginable class of work, were handled by the division in charge of upkeep of buildings and plant.

The mail-carrier system, authorized in act of August 1, 1914, operating through the tunnel connecting this office with the city post office, has been installed and is now in successful operation. This system was designed by mechanical experts of this office, and furnishes the means for rapid transportation of mail from the division of public documents and various floors of the new building to mailing tables in city post office. The total appropriation for this system was \$30,000; the cost to date is \$25,098, and a decided economy is effected by its use.

A combined watchman's time detector, code-signal, and fire-alarm system was contracted for, at a cost of \$9,140. This system will show location of all watchmen at all times, allow prompt communication between the various parts of the buildings, comprises a complete fire-alarm system, and will provide direct communication with city fire department headquarters; altogether, it will be a decided improvement in the insuring of safety to the buildings.

All iron shutters on the alley side of old building have been equipped with catches which can be operated from either the outside or inside; this provides a ready means of access into the building in case of emergency.

POWER PLANT.

The authorized improvements in the power plant have been completed, with the exception of installing one small machine, and there is at present time a complete duplicate equipment, all arranged for a three-wire system 120-240 volts. The engine room has one 1,000-kilowatt turbogenerator and two 600-kilowatt generators direct-connected to cross compound engines. Work is progressing on the small unit, which has a capacity of 300 kilowatts. In the boiler house many necessary improvements have been completed, and there are two 500-horsepower Babcock & Wilcox water-tube boilers with automatic stokers, which burn bituminous coal exclusively, and six 300-horsepower Scotch marine boilers, hand fired. The equipment of the power plant is good, with the exception that the old boilers are hand fired, and we are therefore compelled to use anthracite coal instead of bituminous coal, such as is used in the new boilers. I believe that it would be a matter of efficiency and economy to install four more boilers of the same type as the two new boilers, complete with the automatic stokers, piping, and coal and ash handling machinery. If the plant were modernized as above outlined, this office could easily save \$10,000 per annum in the purchase of coal and in the labor for handling the coal and ashes.

A new ash hopper and conveyer, purchased in previous year, was installed and is now in operation. It was designed to eliminate considerable labor in removing ashes from basement to ground-floor ash heap, and also to form a part of any additional coal and ash handling machinery which may be installed in the future. The cost of installing this conveyer, exclusive of original purchase price, was \$973.45, and it is estimated that by its use there will be a saving of at least \$2,000 a year, besides furnishing a more practical and up-to-date method for doing the work.

The output of the electrical power plant was 3,960,692 kilowatt hours, an increase of 16 per cent over previous year. The cost per kilowatt hour was 1.139 cents as against 1.184 cents in previous year. The total cost of operating entire power plant was \$112,634, of which amount \$19,780.08 was the cost of heat, light, and power furnished city post office without reimbursement. Cost of power used in operation of this office, and not including that for city post office, was \$92,853.92, as against \$97,481.10 in previous year, a saving of \$4,627.18.

MISCELLANEOUS.

Notwithstanding that new machinery has been purchased during the past year, much yet remains to be done to bring the plant up to the highest point of efficiency. Day by day increased demands are being made upon the Public Printer in the amount of printing and rapidity of execution. In line with progress and the advancement of new methods in the printing industry, I have taken up the question of offset printing with the ultimate object of installing this process. Offset presses and a suitable photomechanical process for the preparation of printing plates (zinc and aluminum) could probably be installed for about \$60,000. The installation of this method will, in my judgment, provide for a wider range of work at greater speed and less cost. Between 6,000 and 8,000 square feet of space would be required for offset presses and photomechanical equipment.

In the emergency hospital room 2,647 medical and surgical cases were treated, and 1,166 wounds redressed in cases where the employees remained at work after being injured and did not apply for compensation. Approximately \$5,000 was expended during the year as compensation for injuries, as provided by employers' liability act: this is a small amount when consideration is given the vast amount of machinery in operation and the large number of employees who are in daily contact with conditions which render injuries possible. Easily breakable jars containing first-aid remedies for injuries will be installed throughout the office in close proximity to machinery, with a view of being helpful to the injured until the medical officer can reach them.

Realizing that the health of employees in the linotype section was being endangered by fumes and noxious gases arising from melted metal in the linotype pots, I installed a ventilating system in that section at a cost of \$398. The installation of this system has resulted in a very material change for the better in the atmosphere of the room and the general working conditions.

The lumber reclaimed from boxes received in this office, and which was used in the operation of the carpenter shop, amounted to approximately 275,000 square feet for the year; to purchase the same quantity of new lumber would have cost about \$11,000. This reclaimed lumber was used principally in the manufacture of over 17,000 packing boxes used in shipping postal cards and other work.

Upon adjournment of the last session of Congress it was found that two of the presses used in printing the daily Congressional Record were in such shape as to require either a practical rebuilding or the purchase of new ones at a cost of at least \$40,000. I decided to have them rebuilt by our own machinists, and the work progressed very satisfactorily. These presses will be found to be in excellent condition for handling the Congressional Record, while a decided saving will be shown when the expense of rebuilding is compared with what new machines would have cost.

A decision of the comptroller, dated February 15, 1915, definitely decided that employees of this office are entitled to leave of absence with pay for 30 working days each year. The decision was fair and just and in full conformity with law.

PUBLIC DOCUMENTS.

The distribution of Government publications during the period covered by this report has demonstrated that the general public is awakening to the fact that many valuable and interesting books are available to them at a nominal price. This is evidenced by the increase of 27,053 (12 per cent) in letters received and \$14,356.73 (11 per cent) in cash receipts from sales. It is my opinion that to a greater extent than ever before these publications are reaching the individuals who are interested in the subjects covered.

During the year 1,335,991 copies of various documents were distributed to depository libraries throughout the country and approximately 35,000,000 copies were sent out on mailing lists or individual orders. Our stenciled mailing lists contain 765,920 names, and the changes on these lists run to approximately 225,000 in one year. Considerable progress has been made in disposing of the accumulation of returned publications; a large number were placed in stock and the balance listed for selection by Members of Congress. Gradual improvement in the methods and system for handling the ex-

tremely large amount of business carried on by this division has developed a very efficient organization, and it is estimated that the operating cost will show a decrease in the future.

RECOMMENDATIONS.

I present for consideration the following:

An annual appropriation of \$20,000 should be provided to cover the cost of heat, light, and power furnished to the city post office by the power plant of the Government Printing Office. Appropriation acts direct that I furnish this service, but make no provision for reimbursement, and under the provisions of the act covering fiscal year 1916 this expense is necessarily carried as a dead weight, creating an expense which can not even be apportioned in making charges for work. This service is of the utmost importance to the Post Office Department and also to the entire city of Washington, and it is no more than reasonable that it should carry a direct appropriation and not be paid for out of moneys set aside for the maintenance of the Government Printing Office. My endeavor to reduce the charges for Government printing and binding to a low figure should not be hampered by carrying the expense of heat, light, and power necessary in the operation of a city post office; this expense very clearly should be borne by the Post Office Department. I most earnestly request the appropriation as stated above, to be made to the Post Office Department, and that authority be given me to charge for the service on the basis of cost per unit of heat, light, and power as furnished.

The annual allotment for printing and binding for the Patent Office is insufficient to carry the ever-increasing volume of work for that bureau. In the month of June, 1915, it became necessary for me to order a suspension of some of the most important Patent Office publications, for the reason that their allotment was exhausted. Such necessary action seriously affects the business of that bureau, and provision should be made either for a larger allotment or to give the Patent Office authority to pay for excess printing out of some separate fund.

The expense involved in collecting and baling waste paper from departments and bureaus should be provided for by a specific annual appropriation of \$8,000. This service was established in May, 1913, and during the fiscal year just closed this office collected and baled 81,952 bags (over 3,500,000 pounds) of waste paper at a cost of approximately \$7,500. This expense was never specifically appropriated for and thus necessarily was carried as a portion of the overhead expense and prorated in making charges for work. The quantity of waste paper to be collected and baled is increasing rapidly, and I deem it proper that the various departments and bureaus con-

cerned should pay for the service direct. Therefore I request the appropriation, together with authority to make direct charge for the service on the basis of bags or pounds collected.

With the object in view of installing offset presses and necessary photomechanical equipment, the urgent need of more room in the main building for the proper handling of work, and increasing the facilities for storage of paper, coal, and other supplies, attention is directed to the absolute need of a new building, to be erected on the site now occupied by the old building on North Capitol and H Streets. All of the available space in the old building is practically filled and there is constant demand for additional space, especially by the division of public documents and the bindery. The condition of the old building is such that it can not be used for anything except storage purposes, and even for such purposes it can be used only to a limited extent, for the reason that the walls and floors are not strong enough to support any great weight. This building has been condemned on several occasions, and in some places has been reinforced and the walls tied together to prevent them from falling out. It is built entirely of wood, with the exception of the exterior brick walls, and is, therefore, a constant menace not only to itself but also to the new building, for the reason that if fire should break out and gain any headway whatever it would be almost impossible to save the old building, and it would probably be a difficult matter to save the new building. The new building cost about 31 cents per cubic foot to erect, and on this basis a building to take the place of the present old building and to match the general design of the new building would cost about \$2,000,000. I recommend that this matter be brought to the attention of Congress and an appropriation for a suitable building be requested.

The sidewalk around the old building on the H Street and North Capitol Street sides is in an extremely bad condition, and I recommend that authority be obtained from Congress for resurfacing this sidewalk with concrete, at an estimated cost of \$1,900. As this walk will be outside the building line a separate appropriation will be necessary.

In view of the technical nature of most of the work handled in this office and the knowledge and skill required on the part of the employees, I can but repeat the recommendation contained in my previous report, and request authority be given to increase the pay of printers and bookbinders from 50 cents to 55 cents per hour and bookbinder machine operators from 55 cents to 60 cents per hour. This would involve an increase of about \$83,000 per year.

Respectfully,

CORNELIUS FORD,
Public Printer.

REPORT OF THE MEDICAL AND SANITARY OFFICER.

JULY 6, 1915.

SIR: Herewith is a statement showing the number of cases, both medical and surgical, arising during working hours, which were treated in the Government Printing Office emergency room during the fiscal year ended June 30, 1915. There is also included a list of employees who have received compensation for injuries during the fiscal year closed, under the provisions of the act of May 30, 1908, providing for compensation to artisans and laborers injured in the service of the United States.

A total of 2,647 medical and surgical cases were treated during the year, in addition to 1,166 redressings of wounds in cases where the employee remained at work after being injured and did not apply for compensation, resulting, additional to other activities, in a grand total of 3,813 cases. One thousand three hundred and nineteen were surgical, and 1,328 medical, as shown in the tables accompanying this report. During the preceding fiscal year there were 1,078 surgical and 1,297 medical cases. There were no sudden deaths in the building during the year passed, as compared with two deaths in the preceding fiscal year.

The respective columns show the number that it was possible to relieve and the number obliged to go to their homes after temporary relief was rendered.

Approximately \$4,967.80 was expended as compensation for injuries received during the fiscal year closed, as compared with \$4,603.29 for the preceding year. This would appear a very small sum indeed when due consideration is given the enormous amount of moving mechanism and the volume of wages paid each year, that totals between four and five million dollars.

I have the honor to again repeat my recommendation cited in the preceding year's report that the Public Printer will be enabled to assign, with the sanction of Congress, a staff of three trained visiting nurses attached to the emergency room, in order that the Public Printer may help, upon their application, those of his employees who are ill, and thus by scientific aid rendered in their respective homes perform a service that would tend, in addition to the humanitarian aspect, to an early resumption of duty by the employee.

Respectfully submitted.

W. J. MANNING, M. D.,
Medical Officer.

Hon. CORNELIUS FORD, *Public Printer.*

TWENTY-FIRST ANNUAL REPORT OF
THE SUPERINTENDENT OF DOCUMENTS
FOR THE FISCAL YEAR ENDED
JUNE 30, 1915.

TWENTY-FIRST ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1915.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
October 1, 1915.

SIR: In accordance with the provisions of section 61 of the general printing act approved January 12, 1895, I have the honor to submit the Twenty-first Annual Report of the Superintendent of Documents, being for the fiscal year ended June 30, 1915.

The increase in governmental business for the fiscal year ended June 30, 1915, like that of the previous year, has demonstrated that the public is awakening to the fact that the governmental bureaus are not activities foreign to the scientific investigations of the country, but are accessories and great aids to its development. A glance at the appended statements of the year's business, compared with previous ones, plainly shows the increasing demand for Government publications and that the public has begun to realize it has a strong ally in almost any field of work in which it is engaged.

When this office was established in 1895 the various departments and bureaus misapprehended the attitude and purpose of Congress in establishing a sales office for public documents. It is gratifying to be able to report that a change has taken place and with scarcely an exception the selling of Government publications is approved, and we are now receiving the most cordial cooperation in our work.

The Departments of Agriculture and Commerce are highly commended for their hearty cooperation in the work and in allowing us to use some of their periodicals as advertising mediums, which has been the means of letting thousands of people know what the Government is doing to assist them.

If the issuing offices would consider the great expense of preparing and publishing their reports they would realize that turning them out from the press is only a preliminary part, and that the public should be made acquainted with their existence and shown how access to them might be had.

Where the departments are inclined toward a free distribution of their publications, I am afraid they are unmindful of the disastrous consequences which such a distribution entails. The limited appropriation for printing makes it impossible for the departments to supply publications free to everyone. Would it not, therefore, be more equitable to place them on a sales basis to be sold by this office, which was designated under the law as the sales department of the Government?

What is needed is more publicity, and the issuing offices are the ones that should do the advertising and thereby keep in close touch with the people whom they are trying to serve.

The Department of Commerce has been following along the lines which we have long advocated, and I am sure they are more than satisfied with the results they have achieved. They have practically discontinued their general free distribution and have entered upon a campaign of advertising and publicity work which has resulted in remarkable increase in the sale of their publications.

My purpose in touching upon this subject is in the hope that it may open the way to the coordination of effort on the part of the issuing offices to increase by greater publicity the efficiency of the Government publications.

LIBRARIES.

Statement showing publications sent to depositories.

During fiscal year 1914-15.....	1, 335, 991
During fiscal year 1913-14.....	1, 311, 206
Increase.....	24, 785

In the past year 2,130 different publications were sent by this office to the 482 depository libraries now on the list. It is doubtful if all the libraries so designated are cataloguing, shelving, and making available this number of publications each year, but unfortunately no means are provided whereby this office can know what use is really being made of them.

We receive many requests from the libraries asking relief from the present burden of caring for so many publications by granting them the privilege of selection instead of being compelled, as now, to receive all that are printed. This selection plan has the sanction of the Joint Committee on Printing, and as the debate on this feature of the printing bill in both Houses of Congress has not developed any opposition, it is my purpose to consider putting the selection plan into operation at as early a date as possible.

The libraries that have been users of our library "Want system" have received thousands of books from the recent assortment of the accumulation of old publications. This system affords a surer method of filling up gaps in their sets and requires but little effort on the part of this office to hold for future consideration their wants when the publications are not in stock at the time of their receipt.

CATALOGUES, INDEXES, ETC.

The Document Catalogue for the Sixty-second Congress and the Document Index for the Sixty-third Congress, second session, will be ready for printing before the close of 1915. The Document Index for the Sixty-third Congress, third session, is well under way and will be ready for printing before the convening of the Sixty-fourth Congress in December.

The following publications have been compiled and issued during the fiscal year ended June 30, 1915:

Thirteenth Preliminary Schedule of Volumes, Reports and Documents of Sixty-third Congress, Second Session.

Monthly Catalogue, July, 1914-June, 1915, and Index.

Bulletin 16. Government Book Store, a pamphlet for distribution at the Panama Pacific International Exposition.

Bulletin 17. Outline of Revised Classification for Publications of Interstate Commerce Commission as adopted by the Public Documents Library, December, 1914.

Bulletin 18. Third edition of Author Headings for United States Public Documents as used in Official Catalogues of Superintendent of Documents.

Forty-four Price Lists of United States Government Publications, on various subjects, for sale by Superintendent of Documents (totaling 282,000 copies, of which 274,915 have been distributed).

REFERENCE SECTION.

I wish to call attention to the growing use of the "Reference Section" in this office, which is rapidly becoming a clearing house for information concerning public documents, receiving and answering each day many inquiries from Senators, Representatives, the Executive Departments, corporations, and private individuals, thus rendering great aid to the stock and sales departments in identifying publications called for and in executing orders.

THE COUPON SYSTEM.

The coupon system, greatly to the regret of this office, was suspended during the year upon the question of its legality, but, after a most earnest and persistent effort by this office, you decided that the system should be reinstated, which has proven to be of great benefit and convenience to the office and to all purchasers of Government publications. The system was reestablished February 6, 1915, and up to June 30 this office issued 37,115 coupons.

DISTRIBUTION OF DEPARTMENTAL PUBLICATIONS.

Few people realize the extent to which the United States Government distributes its publications free, although a large number have been placed on a sales basis. During the past year 34,714,186 copies of Government publications have been mailed by this office on mailing lists and miscellaneous orders of the departments.

We now have 1,068 stenciled mailing lists containing 765,920 names and the maintaining of these mailing lists entails considerable work, as will be seen by a glance at the records which show that during the last year 222,995 names were added and 229,782 dropped. The number of impressions made during the year was about 23,000,000. The greatest care has to be exercised in handling these lists to prevent erroneous distribution.

We have been greatly assisted in increasing the efficiency of this branch of our work by the willingness of the departments to cooperate with us. The delay that might result from the transmission of orders from the departments to this office for filling has been greatly reduced by the installation of the tube system connecting our mailing room with the post office, which allows for the dispatch of mails at all hours during the day.

ACCUMULATION OF PUBLICATIONS.

During the past year considerable progress has been made in disposing of the accumulation of returned publications. In my last report there were estimated about 500,000 unassorted on hand, and during the past fiscal year over 500,000 more have been received. Of this lot, thousands of copies have been taken for stock and the balance of 1,506,274, which represented excess stock and obsolete

publications, were listed for selection by Members of Congress. Only about 20 per cent of the Members availed themselves of the privilege of selection. The handling of this great number of old documents preparatory for distribution has been done without an increase of the force of the office.

The greatest care is exercised in the assortment of these old publications and none are listed for condemnation if they are of any value, or when the number in stock is insufficient for what is considered a possible future demand. It is this careful examination which is made in the assorting of these old publications that makes it slow and tedious work, but as the law requires the libraries and departments to turn over to this office publications which are no longer needed, I feel there is an implied duty on our part to preserve for the future sufficient copies of those that have not become obsolete.

The warehouse and basement of the annex have been cleared of several hundred thousands of these old books, making available considerable space, and within the next six months the congested condition resulting from this tremendous accumulation will be greatly relieved.

STORAGE ROOM.

Our storage space available both for the stock of this office and that of the departments is limited, requiring a constant review of stock on hand for the purpose of separating those publications for which there is no demand or that have become obsolete.

We are continually bringing to the attention of the departments certain of their publications which we believe should be eliminated from stock, and although some of the departments seem willing to accept our suggestions, there are others that are reluctant to dispose of any of their publications by having them condemned and sold as waste paper.

In my efforts to prevent our stock room from becoming congested it is not my purpose to force the departments to make a distribution of any of their publications, but I desire to have them see that it is not in the interest of economy or good administration that old publications for which the demand has ceased should be indefinitely stored and occupy space that could be utilized to better advantage in handling the active and current work.

Section 67 of the printing act of 1895 provides the necessary authority for the departments to turn over to this office their excess publications, but since the question of storage is no longer of any concern to the departments, suggestions relative to such action must necessarily emanate from this office.

CONDITION OF THE OFFICE.

I desire to gratefully bear testimony to the fact that whatever has been accomplished in the management and handling of the increasing large business of the office since I took charge thereof on December 1, 1913, is due in no slight degree to the uniform kindness and helpful supervision of the Public Printer.

By your confidence, I have practically been allowed the general management of the office and by your approval and suggestions have been able to reorganize the office and institute many new methods of business which brought out the greater efficiency and more har-

monious cooperation of the force, resulting in the marked increase of business, as per the following statement:

	1914	1915	Increase.	Percent- age.
Letters.....	229,356	256,409	27,053	12
Cash receipts.....	\$140,735.57	\$155,092.30	\$14,356.73	11
Publications received.....	3,635,818	5,746,069	2,110,251	58
Publications distributed.....	3,274,188	5,530,889	2,256,701	69

The estimate for 1917 appropriation is less than for previous years.

The office is to-day in close touch with the departments and bureaus with a better understanding than in the past.

With my personal supervision of all complaints and special inquiries and keeping in close touch with the different sections, much of the friction heretofore existing between the general public and other patrons has been removed, and now with Members of Congress and practically all parties concerned and interested in the business of the office, the most pleasant relations exist.

I am pleased to report that the office is now in a good and efficient working condition, due to the earnest and faithful cooperation of the chiefs and employees, all of whom have uniformly taken deep and active interest in the building up of the office to the highest possible standard, that it may meet the requirements for which it was established.

They are all worthy of praise and are entitled to and have my most hearty thanks, and I assure them of my profoundest appreciation of their fidelity and promptness in all that appertains to their several positions and duties.

Respectfully submitted.

JOSIAH H. BRINKER,
Superintendent of Documents.
