OFFICE OF THE PUBLIC PRINTER,

Washington, D. C., December 5, 1898.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1898.

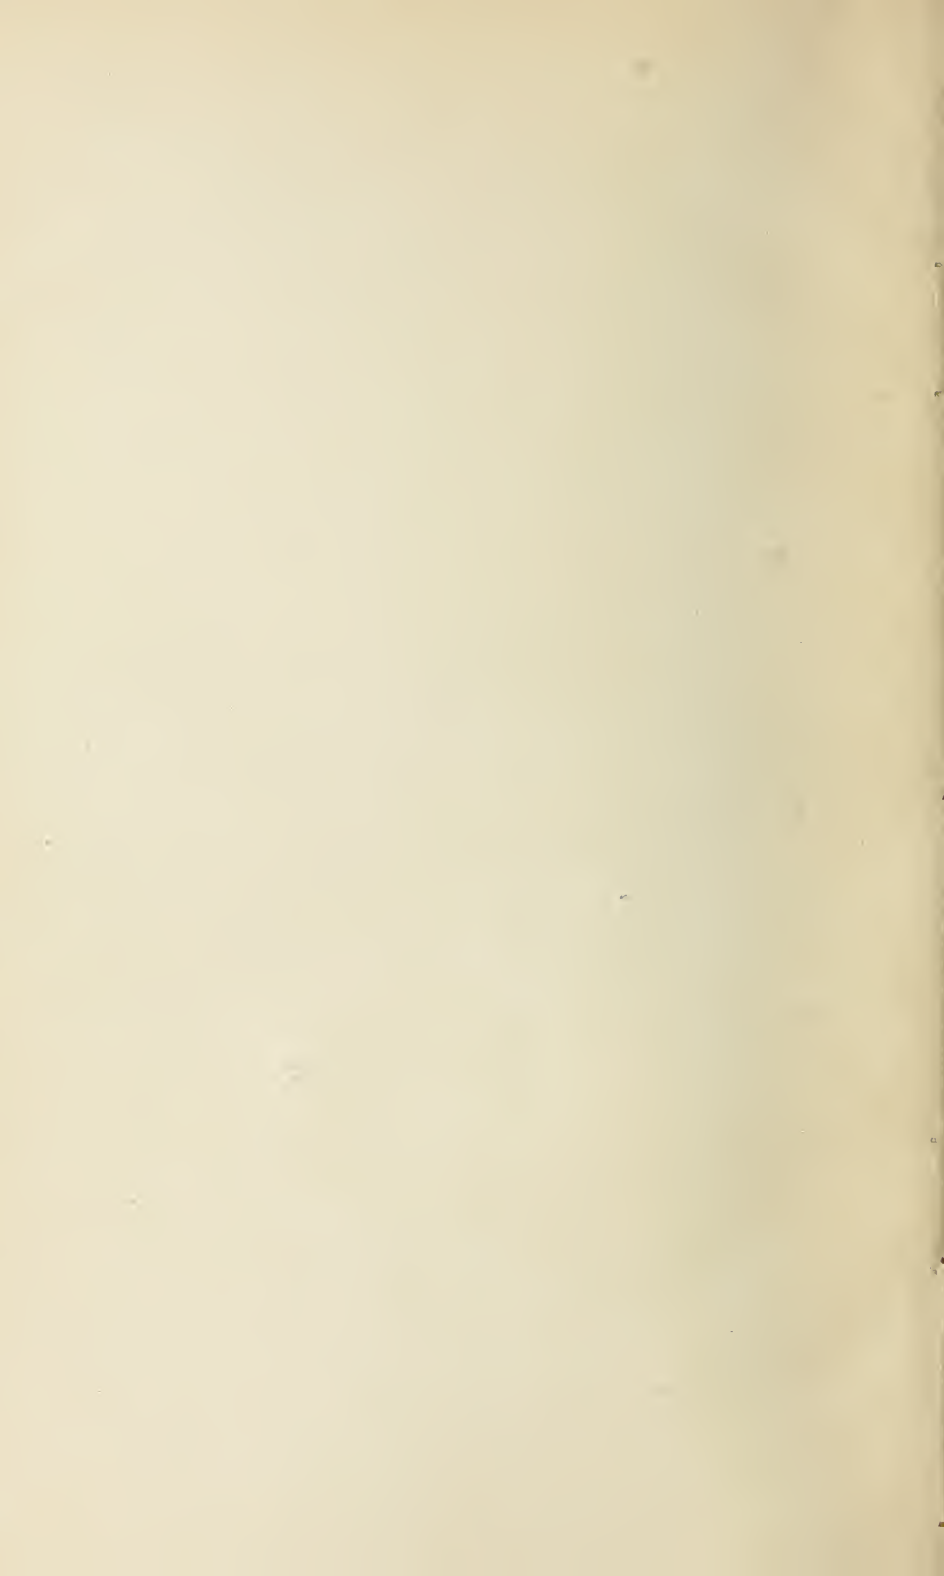

Very respectfully,

F. W. PALMER,

Public Printer.

Hon. GARRET A. HOBART,

President of the Senate.

ANNUAL REPORT

OF

THE PUBLIC PRINTER.

To the Senate and House of Representatives :

In response to a recommendation contained in my last annual report, an appropriation of \$225,000 was made during the second session of the Fifty-fifth Congress for the purchase, by condemnation proceedings, of land for the extension of the Government Printing Office. The appropriation was contained in the sundry civil appropriation act, approved July 1, 1898, in language as follows :

That the Public Printer be, and he is hereby, directed to acquire by condemnation, for the purpose of providing a site for an addition to the Government Printing Office building, the following described real estate embraced in square numbered six hundred and twenty-four in the city of Washington, District of Columbia, and containing fifty-seven thousand and five square feet, more or less, to wit: All of lots A, B, one, two, three, four, five, and six in J. C. McGuire's subdivision of said square numbered six hundred and twenty-four, as recorded in book B, folio ninety-seven, in the office of the surveyor of said District; the west eight feet of lot seven, all of lot eight, and the east six feet of lot nine of the said J. C. McGuire's subdivision of the said square numbered six hundred and twenty-four, being lots eighty-one and eighty-two, as per plat of Michael Brady's subdivision of the west eight feet of said lot seven, all of said lot eight, and the east six feet of said lot nine, as recorded in book eleven, folio eighty, in the office of the surveyor of said District; the west eighteen feet of lot nine of the said J. C. McGuire's subdivision of said square numbered six hundred and twenty-four, as recorded in book B, folio ninety-seven in the office of the surveyor of said District; all of lot ten and the east eight feet of lot eleven of the said J. C. McGuire's subdivision of the said square numbered six hundred and twenty-four, being lots sixty-eight, sixty-nine, seventy, and seventy-one, as per plat of John R. Condon's subdivision of the said lot ten and the east eight feet of said lot eleven, as recorded in book C H B, folio three hundred and eighty-four, in the office of the surveyor of said District; the west sixteen feet of lot eleven and all of lot twelve of the said J. C. McGuire's subdivision of said square numbered six hundred and twenty-four, as recorded in book B, folio ninety-seven, in the office of the surveyor of said District; the south ninety-five feet three inches of each of lots thirteen, fourteen, fifteen, and sixteen of the said J. C. McGuire's subdivision of said square numbered six

hundred and twenty-four, as recorded in book B, folio ninety-seven, in the office of the surveyor of said District; the south one hundred and ten feet three inches of lot seventeen of the said J. C. McGuire's subdivision of the said square numbered six hundred and twenty-four, being lot eighty-three as per plat of Thomas Donnelly and Joseph Anthony's subdivision of the said lot seventeen, as recorded in book eleven, folio one hundred and fifty-four, in the office of the surveyor of said District, and a sum sufficient, not to exceed two hundred and twenty-five thousand dollars, to pay for said real estate in the manner hereinafter provided is hereby appropriated.

The Attorney-General, upon request of the said Public Printer, is authorized and directed to make application to the supreme court of the District of Columbia, by petition, at a general or special term of said court, for an assessment of the value of said parcels of real estate, and said petition shall contain a particular description of the property required, with the name of the owner or owners thereof, and his, her, or their residence, as far as the same can be ascertained, and the said court is hereby authorized and required, upon such application, without delay, to notify the owners and occupants of each such parcel, and to ascertain and assess the value of the same by appointing three commissioners to appraise the values thereof and to return the assessment to the court, and when the values of such parcels are thus ascertained, and the said Public Printer shall deem the same reasonable, the sum or sums so ascertained shall be paid into said court for their use.

That the fee simple of all premises so appropriated for public use under the provisions hereof, and of which an appraisalment shall have been made under the order and by direction of said court, shall, upon payment into the said court as aforesaid of the amount so ascertained and assessed as to each parcel, be thereupon vested fully in the United States and the right of possession thereof.

That the said court may direct the time and manner in which possession of the property condemned shall be taken or delivered, and may, if necessary, enforce any order or issue any process for giving possession. The cost occasioned by the inquiry and assessment shall be paid by the United States; and as to other costs which may arise, they shall be charged or taxed as the court may direct.

That whenever, and as, title to the several parcels of such real estate shall be acquired as aforesaid, and the same shall be ready for delivery, and the sufficiency thereof shall be certified by the Attorney-General of the United States, the Secretary of the Treasury is hereby authorized and directed, upon the requisition of the said Public Printer, to pay into court the condemnation price of such property, parcel by parcel.

That the alley, fourteen feet wide, running north from the north side of G street, for a distance of one hundred and seventy-five feet three inches (being the alley in the rear of lots A, B, one, two, three, four, five, and six, and running parallel with lot seven, in J. C. McGuire's subdivision of square numbered six hundred and twenty-four, city of Washington, District of Columbia, as recorded in book B, folio ninety-seven, in the office of the surveyor of said District) be, and the same is hereby, closed and made a part of the land which the said Public Printer is herein directed to acquire for a site for a building for the Government Printing Office.

In accordance with the provisions of the foregoing appropriation, the subjoined communication was addressed to the Attorney-General:

OFFICE OF THE PUBLIC PRINTER,

Washington, D. C., July 5, 1898.

DEAR SIR: Under the provisions of section 1 of the act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1899, and for other purposes, approved July 1, 1898, I have the honor to request you to make application to the supreme court of the District of Columbia for the condem-

nation, for the purpose of providing a site for an addition to the Government Printing Office building, of certain real estate embraced in square numbered six hundred and twenty-four in this city, and which is described in the said section.

Respectfully,

The ATTORNEY-GENERAL,
Washington, D. C.

F. W. PALMER,
Public Printer.

The Attorney-General sent the following letter in reply:

DEPARTMENT OF JUSTICE,
Washington, D. C., July 8, 1898.

SIR: I beg to acknowledge the receipt of your letter of the 5th instant in relation to the proposed condemnation of certain real estate in square numbered 624, in Washington, D. C., for the purpose of providing a site for an addition to the Government Printing Office building, and to state that, agreeably to your request, instructions will this day be sent to the United States attorney for the District of Columbia, directing him to institute proceedings for such condemnation under and in conformity to the provisions of the act of July 1, 1898, referred to in your letter.

I am, sir, very respectfully,

JOHN W. GRIGGS, *Attorney General.*

The PUBLIC PRINTER.

Under an order of the supreme court of the District of Columbia, Messrs. Robert Hutcheson, John E. Herrell, and William Dickson were appointed commissioners to appraise the value of the several parcels of land heretofore described. On the 7th of November the commissioners took the oath of office, and after due notice to the parties in interest, effected an organization of their board by electing Robert Hutcheson, esq., president, and Mr. Alexander H. Galt, secretary and reporter. The commission then adjourned until November 10 to enable the District attorney to produce witnesses, and meantime met upon the premises for the purpose of viewing the land in question.

On the 10th of November the board met and continued to meet at stated intervals for the purpose of hearing testimony of interested parties, and after having given full opportunity for such hearings by owners and by counsel, the board, on the 2d day of December instant, appraised the value of the respective parcels of land and improvements as set forth in the schedule below:

Attorneys offered testimony tending to show the prospective loss of business by owners and tenants of certain parcels of land in case of condemnation. But this testimony was excluded on the ground that the claimants for such damages had no standing in law under the act of Congress making appropriation for the property condemned. To these rulings of the commission the parties in interest, by their attorneys, noted exceptions, and the exceptions were submitted for the consideration and decision of the court.

Should the property thus appraised pass into the possession of the Government, application will be made to Congress during the present session for an appropriation for an extension of the Government Printing Office upon the land thus acquired. Plans and estimates will be presented for the consideration of the Joint Committee on Printing and, if approved, submitted to Congress at an early day.

The land, for the condemnation of which proceedings have thus far progressed, consists of 57,004¹/₄ square feet, and the total value as appraised by the commissioners is \$187,999.19. The fees of the three commissioners and the reporter, will aggregate about \$850, leaving more than \$36,000 of the amount appropriated by Congress to be covered into the Treasury. The land thus condemned is bounded by Jackson alley on the north, North Capitol street on the east, G street on the south, and extending west to a point corresponding with the west line of the land on Jackson alley now owned by the Government, occupied by the boiler house of the Government Printing Office.

It is proposed that upon the land thus described there be erected a seven-story, fireproof building of brick, corresponding in external appearance with the new seven-story brick annex fronting on H street.

When completed, the four-story wings of the old building on H and North Capitol streets, which are of combustible material, could be rebuilt of fireproof material, seven stories high, and thus the Government Printing Office would be throughout secure from destruction by fire, and of dimensions sufficient for the accommodation of all its divisions save those located in the Executive Departments, which were placed therein for the convenience of the Departments. It will be in the interest of economy and for the security of property and human life for the proposed extension of the Government Printing Office to be commenced and completed at the earliest possible day.

Notwithstanding the unusual and unprecedented demands made upon this office by several of the Departments of the Government in consequence of the war with Spain, I am pleased to state that its facilities were such as to enable it to promptly fill all orders, and that no complaint has been received that the operations of any department were impeded or delayed one moment on account of the failure on the part of this office to expeditiously execute all requisitions made upon it.

The most striking illustration during the past year of the capabilities of the office for executing hurried orders was the printing of the message of the President transmitting the report of the naval court of inquiry upon the destruction of the United States battle ship *Maine*. This publication consisted of 298 pages of text, 24 full-page engravings, and 1 lithograph in colors, and although the originals of the illustrations were not in the possession of the office until 3 o'clock p. m. of March 28 and the manuscript of the text was not received until 6 o'clock p. m. of the same day, complete printed copies, in paper covers, were placed upon the desks of Senators and Representatives by 10 o'clock of the following morning.

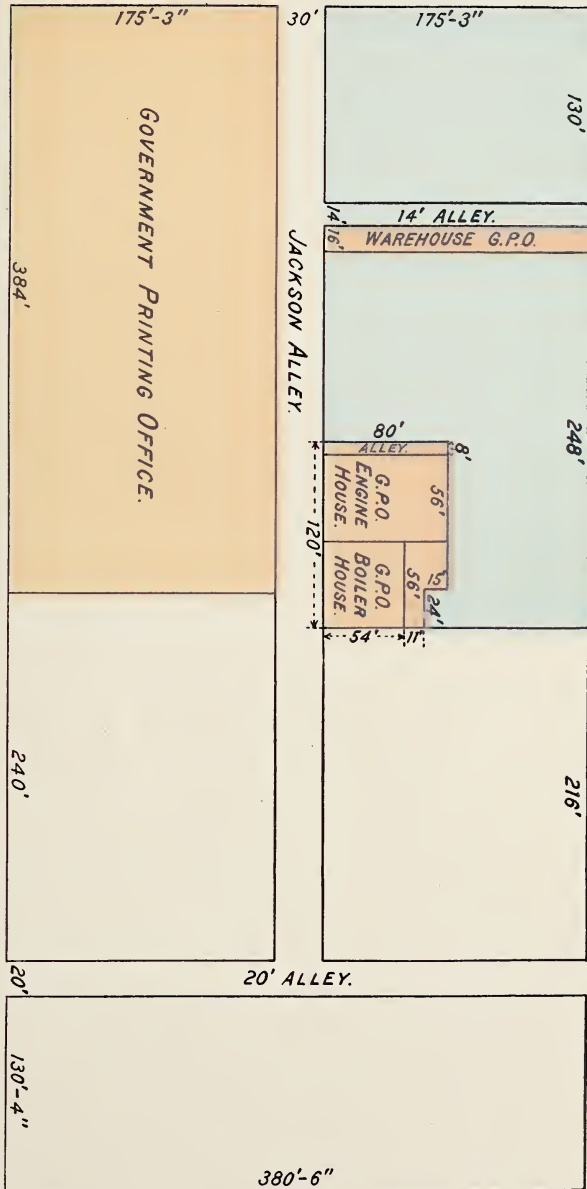

Herewith are submitted reports of the chief engineer, chief electrician, and superintendent of documents of this office, showing the condition of their several divisions.

In the tabular statements accompanying this report will be found the information which the Public Printer is required to furnish Congress under sections 19 and 22 of the act of January 12, 1895, relating to the public printing and binding.

REPORT OF THE CHIEF ENGINEER.

GOVERNMENT PRINTING OFFICE,

Washington, D. C., December 1, 1898.

SIR: In compliance with your request for a statement of the present condition of the steam power and heating plant of the Government Printing Office, I have the honor to submit the following report:

During the past year the engines and generators, which were being installed at the date of my last report to you, have been thoroughly tested and are in successful operation, giving far better results than were ever obtained from the old plant. The Westinghouse engine and direct-connected generator have been moved into the new engine house, thoroughly repaired, and are in perfect working order. The 250-horsepower vertical condensing engine, formerly used to run the three 187½-kilowatt generators, as well as the generators, have all been condemned, sold, and removed, and the space thus gained is now occupied by the machine shop. After the new boilers had been placed in service, the old locomotive boiler, which had been condemned and sold, was removed.

The old 80-horsepower beam engine in the press room has been removed, giving additional space for use of that division.

Upon removing the steam receiver and 12-inch steam main, which were used for the purpose of connecting the new boilers with the old engine plant, it was found that both were in bad condition in consequence of faulty construction, the ground joints on the steam main being nearly destroyed from erosion.

After all the piping heretofore used in connection with the old plant had been removed, a manifold was placed at the old boiler-house end of the steam main running through the conduit for the purpose of regulating the entire steam heating and manufacturing system of the office. The heating main in the new 7-story addition to the office has been connected to this manifold, thus giving two sources from which steam may be supplied to the entire plant from the boilers. By means of reducing valves, placed in the boiler house, steam at 40 pounds pressure per square inch is supplied for manufacturing purposes. Also, by use of this kind of valve on the manifold, steam at 3 pounds pressure per square inch is used for heating.

All of the hydraulic elevators formerly in use in the building have been replaced by those of modern design operated by electricity. This has effected a saving in consumption of steam power, for the reason that the steam used in pumps placed in isolated positions was in excess of that required to develop the same amount of power at the central station.

One of the Worthington duplex pumps, formerly used on the hydraulic elevators, has been placed in the cellar of the boiler house in connection with the fire and house pump. These pumps will force the water for the closets into a steel tank which has been erected in the loft of the new annex and from which it will be distributed throughout the entire office. The old wooden tank on the roof of the stereotype foundry will be removed.

Respectfully submitted.

H. K. COLLINS, *Chief Engineer.*

Public Printer.

REPORT OF THE CHIEF ELECTRICIAN.

GOVERNMENT PRINTING OFFICE.

Washington, D. C., December 1, 1898.

SIR: At the date of my last report the work of changing from the old to the new power plant was in progress. On February 2, 1898, the new engines and generators, after a trial run of ten days (which proved entirely satisfactory), were placed in commission and the old plant was abandoned. During the following month official tests of the engines and generators were made for the purpose of ascertaining whether or not they fulfilled the requirements of the specifications under which they were purchased as to efficiency, regulation, and steam consumption. These tests showed that they fully met the terms of the contract under which they were furnished. The entire work of changing the 187½-kilowatt Westinghouse engine and generator, the old switchboard, and the electric-power mains from the old to the new plant was done by the regular force and was accomplished without any interruption to work in any of the divisions of the main office.

From the beginning of the regular use of the present power plant to this time the new machinery has been constantly in commission, giving results in every way as satisfactory as those shown during the official test. The cost of current at the switchboard has been reduced, as compared with last year, from 2.65 cents to 2 cents per kilowatt hour during the months Congress is in session. The cost of production during other months varies from 2.5 to 3 cents per kilowatt hour, depending on the season of the year.

On April 14, 1898, bids were opened for 7 electric elevators, as follows: Two having capacity of 4,000 pounds each, speed 250 feet per minute; 3, capacity 2,500 pounds each, speed 250 feet per minute; 1 sidewalk hoist, capacity 4,000 pounds, speed 100 feet per minute; 1 form elevator, capacity 500 pounds, speed 200 feet per minute. Five of these were to supplant the same number of hydraulic elevators then in use. The contract for furnishing and erecting these electric elevators was awarded to the Sprague Electric Company, who furnished their latest and most improved method of control and safety devices. The final test of these elevators was made between the 19th and 27th of October last by the chief engineer of the Sprague Electric Company and myself, at which time the final adjustments and trial runs were made, which fulfilled the requirements of the specifications and in some points exceeded them.

During the summer months the machinery in the branch printing offices in the State and Navy Departments was equipped with electric motors, entirely doing away with belting and overhead shafting. Five motors, with an aggregate of 8-horsepower, were placed in the State branch, and 6 motors, with an aggregate of 9.5 horsepower, in the Navy branch. These motors are of the direct-connected type, having their armatures keyed to the shaft of the press. Each press is supplied with an independent controller, giving the operator complete control of it. Speed control is accomplished by using resistance in series with both armature and field so arranged that the press is never run steadily while resistance is in series with armature, thus insuring the most economical use of electric current. These motors have been in service about three months, and I am informed by the superintendent of the State,

War, and Navy Department building that there has been a decrease in the consumption of coal over the corresponding months of last year.

At this time the power and electric-light plant of the main office is running twenty-four hours per day, including Sundays. Thus far the demands of the main office for light and power have been successfully met by the 300-kilowatt engine and generator without assistance from one of the smaller units used at night.

Respectfully submitted.

W. H. TAPLEY, *Chief Electrician.*

This statement shows an increase of 54 and 75 per cent, respectively, in the receipt and distribution of documents as compared with last year, which is very gratifying in view of the fact that there was no corresponding increase in the number of employees.

REORGANIZATION OF THE OFFICE.

With your approval the office was organized into six sections soon after I assumed charge in November, 1897. An experienced clerk was placed at the head of each to give direction to the work in the respective sections, under my general supervision. The result has been very satisfactory indeed, and the efficiency of the office has been very largely increased, as the following statement, by sections, will indicate:

BOOKKEEPING AND CORRESPONDENCE.

The bookkeeping and correspondence relating to sales has been performed by one clerk. The general correspondence of the office is conducted by the chief of section and the superintendent. For the seven months ended June 30, 1898, 25,670 letters and cards were received and 32,106 were sent, not including books, pamphlets, and bags of mail.

Of the letters received 5,747 contained remittances for documents. Such letters are kept in files separate from the general correspondence. When opened by the receiving clerk they are given a serial number and entered in a book which shows the number, date of letter, and amount and kind of remittance, with blank spaces to enter amount returned if the order or any part can not be filled. The bookkeeper enters them by number, name, and address of writer, amount and kind of remittance, number of books sold, and amount returned, if any. Before disposing of the letters, which are filed by numbers, they are carded, with name, address of writer, and number, and the cards are filed alphabetically. The documents sold are also carded by titles, date of sale, and price. Every day at 4 o'clock the books of the receiving clerk and of the bookkeeper and the document cards are compared and must balance.

SALES.

Twenty-one thousand three hundred and sixty-three documents were sold, for which \$4,537.27 were received. This shows an increase over last year of 20 and 12 per cent respectively.

Of the documents sold 83 per cent were publications of the Department of Agriculture. The amount received for these documents, however, was but 46 per cent of the total sales. This was due to the fact that most of the publications of that Department are issued in pamphlet form and sold at from 5 to 15 cents each.

The Secretary of the Department of Agriculture, in his report for the fiscal year ended June 30, 1897, recommended that the law of January 12, 1895, be so amended as to provide for the setting aside of the moneys received for the publications of that Department, subject to the joint order of the Secretary and the superintendent of documents, for the reprint of the same for sale. Such an amendment would prove of great benefit to the public, no doubt, because it would enable this office at least to order the reprint of such publications of that Department as may be in great demand. More than one-third of the orders received from people who are willing to pay for these documents can not be executed because the editions become so soon exhausted.

At the request of the Department of State, Congress transferred the sale of the laws of the United States from that Department to the superintendent of documents. This will, no doubt, add very considerably to the cash receipts and work of the office.

CATALOGUE SECTION

There were issued 12 monthly catalogues, 2 document indexes, and 1 document catalogue (comprehensive index), aggregating 1,651 pages, showing an increase of 20 per cent as compared with last year. The number of documents received for

cataloguing purposes was 10,012; the number of cards written was 48,323; no statistics have been kept heretofore respecting these items.

One of the most important functions of the office is the preparation of the several catalogues of Government publications as required by law. The commendations of those having occasion to use them, from all sections of the country, testify to the accurate and satisfactory manner in which the work has been performed.

The work of preparing the monthly catalogue and consolidated index of Congressional documents is kept up to date, but the work on the document catalogue (comprehensive index) is very much in arrears. This arrearage is largely due to the fact that the documents required to be catalogued by the act of January 12, 1895, antedated the establishment of the office nearly two years.

The law requires the publication of three kinds of catalogues:

First. A comprehensive index at the close of each regular session of all public documents, beginning with the Fifty-third Congress.

Second. A consolidated index of Congressional documents in one volume.

Third. A catalogue on the first of each month, which shall show the documents printed the preceding month, where obtainable, and the price thereof.

It is to the first-named that I wish to invite attention. Very many objections may be urged against its publication each regular session. Some of the more serious I will point out briefly. As an illustration: The catalogue for the second session of the Fifty-fourth Congress will contain entries of documents not bearing a Congressional number from July 1, 1896, to June 30, 1897, but of Congressional documents from the first Monday in December, 1896, to March 4, 1897. Then followed a special session of the Fifty-fifth Congress, beginning March 15 and ending July 24, 1897. No provision is made in terms for cataloguing documents of special sessions. The documents of this special session can not be entered in the catalogue for the second session of the Fifty-fourth Congress, but must necessarily be entered in the catalogue for the first regular session of the Fifty-fifth Congress, which assembled the first Monday in December, 1897, and terminated July 8, 1898. It will thus be seen that the latter catalogue will lap at both ends with catalogues preceding and following, which will probably be perplexing to those not familiar with the subject.

Again, thousands of bills are introduced and reports made at the first regular session of a Congress that are not disposed of, if at all, until the last session. Full entries must necessarily be made in the catalogues for each session, and the searcher for information must examine both in order to ascertain what was done, with the chance of being misled by only examining one. The work is thus duplicated, and reference is made more difficult. Many more objections might be urged, but these are deemed sufficient for the purpose.

I therefore recommend that Congress be asked to amend the law of January 12, 1895, so as to authorize the superintendent of documents to prepare and publish a catalogue of public documents biennially, which shall show all documents printed not bearing a Congressional number during the two years ending June 30 in each odd-numbered year, and all Congressional documents for each Congress, beginning with the Fifty-fifth.

This would reduce the number of catalogues one-half. The one volume for a Congress would not exceed 80 per cent of the size of the two volumes, one for each session; 50 per cent would be saved in binding, 10 to 20 per cent in composition, and 10 to 20 per cent in the labor of preparing them.

LIBRARY.

The "document library" is probably the largest of its character in the world.

The act that created the office did not authorize in terms or by implication the establishment of a document library. Indeed, the author of the bill himself informed

me that it was never contemplated. And it would seem, from the fact that almost complete sets of public documents are in the Library of Congress and the libraries of the Senate and House, that a purely document library was unnecessary, especially as it could not be opened to the public.

The act provided, however, for the sending of two copies of each document printed, not of a confidential character, to the superintendent of documents, to enable him to prepare a catalogue of all Government publications.

Under this provision it was seen that the office was sure to accumulate, if retained, a complete set of public documents beginning with the Fifty-third Congress. As stated by my predecessor, the demands made upon the office for information by people all over the world concerning matters supposed to have been treated of in Government publications thrust upon it a function which, if assumed (and it was assumed), would give it the additional character of an "information bureau."

Information could not be furnished without the documents, hence the desirability of securing as complete a set of public documents back of the Fifty-third Congress as possible. The work was intrusted to Miss Adelaide R. Hasse, one of the foremost librarians of the country, who was in charge of the arrangement and classification of the vast number of documents turned over to the office by Departments and returned by libraries throughout the country under the clearing-house system. From these miscellaneous receipts and by special requests to libraries, which were liberally responded to, the library was built up from nothing in January, 1895, to 16,841 books and 2,389 maps June 30, 1897. This library, therefore, as long as it shall endure, will remain a monument to her zeal and industry.

I have continued the work of my predecessor in responding to all proper requests for information. Letters come from every part of this country, Europe, Asia, and Africa asking for information which could not or would not be furnished by anybody else. The library therefore enables this office to serve a most useful purpose.

The books, maps, and pamphlets in the library now number 23,247. These figures, however, fail to indicate the historical treasures in the collection, and it may be proper for me to indicate a few of the most rare and valuable, some of which antedate the adoption of the Constitution. Among them are the following:

Force's American archives, 9 volumes, complete so far as published.

Sparks's Diplomatic correspondence of the Revolution, 12 volumes, complete.

Wharton's Diplomatic correspondence of the American Revolution, 6 volumes, complete.

Diplomatic correspondence of the Revolution, issued by the State Department, 1837, 3 volumes, complete.

Journals of the Continental Congress, 4 volumes, complete.

Secret journals of the Continental Congress, 4 volumes, complete.

Elliott's Debates on the adoption of the Constitution, 5 volumes, complete.

Congressional proceedings and debates, 1789-1898, complete.

Congressional documents (sheep-bound set) beginning with the Fifteenth Congress, consisting of more than 3,600 volumes, complete with the exception of 8 volumes, 3 of which are believed never to have been issued.

Executive journals of the Senate, 1789-1828.

Five volumes of Folwell's edition of the Journals of the Continental Congress, printed in Philadelphia, 1800-1801.

Wait's State papers, first edition, 6 volumes, complete.

Wait's State papers, second edition, 10 volumes, complete.

Nine volumes of Wait's State papers, third edition, in 12 volumes.

Northeastern boundary arbitration, Washington, 1827, printed but not published.

Roll of honor, containing the names of the Union soldiers buried in national cemeteries, complete except 1 volume.

Proposed revision of laws, 1873.

Reports of Commissioner of General Land Office, 1866, 1867, in French.

Case of United States to be laid before tribunal of arbitration at Geneva, in Spanish.

Insect life, 7 volumes and index, complete.

Bulletins 1-8 of Bureau of Rolls and Library of Department of State, complete.

Perry's Expedition to China Seas and Japan, 1852-54, 3 volumes, complete.

Register of Military Academy, 1818-98, complete.

The following table shows the number of books, etc., in the library, the Government authors, and the acquisitions October 20, 1897-June 30, 1898:

MAIL SECTION.

Every document distributed or sold is wrapped, labeled, and mailed from this section. All documents received from the Government Printing Office are received into this section and held for distribution as provided by law. The statement of documents received and distributed will show that the number of documents handled aggregated more than 1,000,000, a very large increase as compared with the year previous.

MESSAGES AND PAPERS OF THE PRESIDENTS.

In no branch of the office have there been greater results from the change in business methods than in the one charged with the distribution of this publication. During the seven months ended June 30, 1898, an average force of 3 employees sent

out 95,000 volumes, as compared with 35,000 volumes sent out the preceding five months, during which 9 persons were employed. Besides the work of sending out the 95,000 volumes, the entire card system was changed, new cards were written, and the mailing list printed.

On July 1, 1897, there were 16,852 names on the mailing list. On June 30, 1898, the list contained 27,383 names. Since the latter date the force employed on this work has been reduced to 1. as against 9 a year ago, notwithstanding the work has been quadrupled.

One hundred and ninety-one thousand six hundred and seventy-four volumes have been sent out since the first volume was mailed in May, 1896. Two-thirds of this number, or 130,384, were distributed during the present fiscal year.

The compilation entitled Messages and Papers of the Presidents is distributed to persons and institutions designated by Senators, Representatives, and Delegates in Congress. Three editions have been authorized, aggregating 36,000 sets. The first two editions, of 21,000 sets, were subject to designation by members of the Fifty-fourth Congress; the third edition, of 15,000 sets, by members of the Fifty-fifth Congress. Each set will contain 9 volumes and an index. It is expected that the distribution will be finished by the 4th of March, 1899.

The value of the card system in the distribution of documents has been fully tested and demonstrated in the sending of these documents. Two thousand duplications have been prevented, a saving of four and two-fifths sets to each member on an average, and of 20,000 volumes of books which cost the Government about \$1 each to publish.

STOCK SECTION.

The clerk in charge of this section has supervision over all documents the "distribution of which is not specifically provided for by law." Such documents numbered on July 30, 1898, 358,000 in round numbers.

This clerk prepared, at great labor, an excellent card system of all the documents in his section. His cards show at all times the number of copies of each document on hand, whether bound in paper, cloth, or sheep, and where located by giving the number of the book stack and bin. The work involved in keeping these cards up to date is enormous, as each document sold or distributed from the stock or received into stock must be checked off or on, as the case may be. These cards must be consulted before any order for documents can be filled, to ascertain whether or not they are in stock.

DESIGNATED DEPOSITORIES.

The names of 1,897 libraries are on the mailing lists as depositories. Depositories are divided into three classes, as follows:

Designated depositories, State and Territorial libraries.....	472
Geological depositories.....	772
Remainder depositories.....	653

Those in the first class receive substantially all free publications of the Government. Those in the second class receive the scientific publications known as bulletins, monographs, and atlases of the Geological Survey. Those in the third class receive fractional remainders after the allotment of Congressional quotas.

Each Senator, Representative, and Delegate in Congress is entitled to name one of the first class, two of the second, and an indefinite number of the third, except that the superintendent of documents is required to see that remainder documents are equally apportioned among members as nearly as possible.

The first and third classes of depositories may be changed at the pleasure of the member to whom charged. It is proper, perhaps, to say that this privilege is rarely exercised in the case of designated depositories.

The superintendent of documents is charged with the supervision of libraries

known as designated depositories to the extent of ascertaining whether they are eligible for designation under the law, or whether those already designated possess proper qualifications for retention. The law requires him to "thoroughly investigate the condition" of depository libraries, and "whenever he shall ascertain that the number of books in any such library, other than college libraries, is below one thousand, other than Government publications, or it has ceased to be maintained as a public library, he shall strike the same from the list, and the Senator, Representative, or Delegate shall designate another depository that shall meet the conditions herein required."

Under the authority of the law just referred to, I sent to each designated depository a circular letter with twelve interrogatories, calculated, if answered fully, to give all the information necessary to enable me to fix the status of such libraries. It is quite evident, however, from the replies received that nothing short of a personal inspection will enable the superintendent of documents to determine the condition of at least 20 per cent of the libraries now listed.

The number of books in a library, other than Government publications, is not a sure indication that it is or is not a suitable depository. It seems to me that it would be much more desirable to place the valuable publications of the Government in libraries that will properly care for them and bring them to the attention of the public, irrespective of the number of books in their possession, than to send them to those that will store them in the garret or cellar.

Recently bulletin notices of "publications of the United States Government sent to designated depositories" have been substituted in place of invoices. A large number of letters have been received from librarians approving of the plan, and stating that it has caused a great increase of inquiries for public documents.

The long delay in the delivery of Congressional documents is the source of great annoyance to librarians. They all appreciate the fact that they are specially favored in having their libraries selected as depositories, but they feel that the documents they are entitled to receive under the law should be sent before they have become "ancient history," when the public has lost interest in them largely.

I assured the American Library Association, at its annual meeting at Lakewood in July, that both the Public Printer and the superintendent of documents were in sympathy with its desire for improving the service in this respect especially, and would do all in their power in that direction.

A special effort has been made by this office to complete the sets of public documents in the designated depository libraries. A complete list of all documents available for such a purpose was prepared; printed, and sent to them in May, 1898, with request that the list be returned with a check indicating the documents needed. One hundred and one lists have been returned, and 75 libraries have been supplied with upwards of 50,000 volumes of documents up to this date (October 15, 1898).

The designated depositories on the list June 30, 1898, are classified as follows:

Public libraries.....	206
College libraries.....	83
University libraries.....	61
School libraries.....	31
Institute libraries.....	16
Theological libraries.....	6
Academy libraries.....	5
Y. M. C. A. libraries.....	3
Seminary libraries.....	2
State and Territorial libraries.....	48
Special designations by law.....	11
Total.....	472

The following summary is given, by States, of the information obtained in response to the circular letter above referred to. It shows the number of designated depositories in each State, the number of documents, and the number of books other than public documents in such depositories.

A most remarkable showing is made in regard to the number of books in these 472 libraries, as compared with the statistics relating to books in Public, Society, and School Libraries in the United States, prepared by the Commissioner of Education in 1896. These statistics gave the number of such libraries containing 1,000 volumes and over as 4,026, and the number of volumes as 33,051,872. It will thus be seen that the designated depository libraries contain almost one-half as many volumes as were reported in such libraries.

Thirty or forty depositories have reported from 500 to 2,000 fewer public documents on hand in 1898 than they reported in 1895. I have begun an investigation into the matter, with a view to ascertain whether the discrepancy is due to lack of interest, or whether the documents have been improperly disposed of. It may, perhaps, be proper for me to quote the law with reference to documents supplied to libraries by the Government.

Section 506, Revised Statutes of the United States, reads as follows:

"All such books and documents, when received at the proper offices, libraries, and other depositories, as provided by law, shall be kept there and not removed from such places."

MISCELLANEOUS LIBRARIES.

A large number of documents have been sent to and received from miscellaneous libraries under the "clearing-house system." That is to say, libraries having documents in duplicate send their surplus to this office for redistribution to others that are lacking. A list of such libraries is appended, showing the number of documents sent to and received from each.

DISTRIBUTION OF OLD CONGRESSIONAL GLOBES.

Under the provisions of an act of Congress, approved June 20, 1876, a lot of bound and unbound Globes, aggregating many thousands of volumes, with plates, etc., were purchased at an expense of \$100,000. Congress refused to appropriate money to bind and complete sets, and they have been stored in the public warehouses ever since, occupying much valuable space. Under the authority of the Joint Committee on Printing, you directed me to dispose of such as were available to libraries desiring them, and to turn over those unfit for any other purpose to be sold as waste paper. Under this authority, I beg to report that I have distributed 6,613 volumes to libraries, and have disposed of 13,000 volumes as waste paper.

I was able to send out a few almost complete sets, bound and unbound. There is still on hand a large number of sets of from 40 to 50 volumes each which it is expected will be distributed very soon, especially as the libraries are beginning to understand that this is probably the last opportunity they will ever have to obtain any of these valuable documents free.

DOCUMENT REFORM.

For upwards of sixty years public documents have been distributed free to both libraries and individuals by the Government. The distribution to libraries, designated as depositories, has broadened from a few Congressional documents in the beginning to include almost everything published. Bills for the public printing have grown from about \$46,000 in 1833 to nearly \$2,000,000 in 1897, with a corresponding increase in the number of volumes of documents printed.

During the past forty years documents have been printed in such large editions and distributed with such liberal prodigality as to cheapen them in the estimation of the people at large. They were distributed broadcast without regard, in many cases, to the wishes of the recipients, and as a consequence were not only not appreciated, but were regarded with contempt. Instances have recently come to my

knowledge where retiring members of Congress shipped out by the carload the documents that had accumulated to their credit. Dozens of copies of the same document were sent to one library, where they were only an encumbrance, and after years of storage in garrets or cellars they found their way to this office in their "original wrapping" for redistribution.

Librarians, as a rule, however, have always appreciated the value of the publications of the Government. Most of them want one copy of everything they can get; they want that copy as soon after it is printed as possible; they want documents in complete sets, but they do not want them dumped upon them, as is often done, without regard to whether they have previously been supplied or not. The scientist, the student, the professional man, and the historian all recognize the value of public documents. They are the ones who consult public documents in the libraries or purchase them, if necessary, rather than ask for them as a gratuity.

But this wasteful publication and haphazard distribution of documents did not proceed without protest and serious effort upon the part of men in and out of Congress to correct the evils that were patent to anybody who cared to look into the subject. Dr. John G. Ames, superintendent of documents, Interior Department, did more, perhaps, to bring about "document reform" than any other one man. In almost every annual report submitted by him for twenty years, attention was called to the necessity for new legislation with reference to the printing, binding, and distribution of public documents.

In 1882 Congress took up the subject and, by resolution, appointed Dr. John G. Ames, A. R. Spofford, librarian of Congress, and Spencer F. Baird, secretary of the Smithsonian Institution, to "compile the laws and regulations * * * in force governing the printing and distribution of public documents, * * * to report what reductions should be made in the number of such documents, * * * and submit the draft of a bill to provide for the printing and distribution of documents."

These eminent gentlemen, no doubt the best qualified of any three men in the United States for the duties assigned them, made a very elaborate report to Congress at the second session of the Forty-seventh Congress (House mis. doc. 12, Forty-seventh Congress, second session). They stated that they were—

"deeply impressed with the number of documents printed by authority of Congress, aggregating for the Forty-sixth Congress 2,324,254. * * * [They were] no less deeply impressed with the lack of system and economy in the distribution of these documents. The one reform most essential to secure the object for which it was supposed public documents are issued is the decrease of the number of agencies by which they are distributed. Under the practice now prevailing, nearly all documents, whatever may be their cost and value, are distributed by from two to four agencies, each in ignorance of what the others are doing, so that * * * to no small extent documents are sent in duplicate and triplicate."

They recommended the establishment of a single agency, because—
"it would very greatly subserve the public convenience, as it would soon come to be recognized as the source from which information in regard to any and all documents could be readily secured."

No action was taken upon this report, and the bill and resolutions drawn by the committee died by the expiration of Congress. Dr. Ames, however, persisted in his efforts, and, aided by the librarians of the country, finally secured the passage, in an amended form, of the bill drawn by him, known as the act of January 12, 1895.

While this act was a long stride in the right direction, it did not go far enough to reach some of the chief causes for complaint. First: The "one reform most necessary," as pointed out by the report of the committee quoted above, was the decrease in the number of agencies by which public documents are distributed. The act of January 12, 1895, says that the superintendent of documents "shall have general supervision of the distribution of all public documents"; but it goes on and actually

increases the number of agencies by which they are distributed, each independent and "in ignorance of what the others are doing." Second: The multiplicity of editions of the most important publications of the Government, in different styles of binding, with varying title-pages and back-titles, is continued, "so that one may possess three or four copies of the same work without discovering from their outward appearance that they are all the same document." Third: Probably the most serious cause of complaint from librarians is the delay in the binding of documents "reserved" for that purpose, for distribution to State and Territorial libraries and designated depositories.

Section 54, paragraph 7, of the act of January 12, 1895, provides that—

"The remainder of said documents and reports shall be reserved by the Public Printer in unstitched form, and shall be held subject to be bound in the number provided by law, upon orders from the Vice-President, Senators, Representatives, Delegates, Secretary of the Senate, and Clerk of the House, in such binding as they shall select, except full morocco or calf; and when not called for and delivered within two years after printing shall be delivered in unbound form to the superintendent of documents for distribution."

It is safe to say that not to exceed 15 per cent of the documents reserved for binding under this paragraph will ever be called for by those entitled to have them bound. Five hundred copies of each document of which the "usual number" is printed are reserved for the purpose indicated. Unbound documents can not be disposed of either by free distribution to libraries or by sale to individuals, so that if the law is allowed to remain unchanged, there is not a warehouse in the city large enough to store the accumulation of a few years.

I beg to suggest, therefore, that the law be amended so as to authorize the Public Printer to bind in cloth such documents as are not called for within two years after printing, and deliver them to the superintendent of documents for distribution to public, school, or college libraries.

Several bills have been introduced in Congress to amend the law of January 12, 1895, and two or three are now pending. There are some good features in each, and I trust some legislation may be had very soon that will remedy the difficulties pointed out.

Very respectfully,

L. C. FERRELL,
Superintendent.

Hon. F. W. PALMER,
Public Printer.
