

ANNUAL REPORT

OF THE

PUBLIC PRINTER

FOR THE FISCAL YEAR ENDED
JUNE 30, 1903.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1903.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 7, 1903.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1903.

Very respectfully,

F. W. PALMER,
Public Printer.

THE PRESIDENT OF THE SENATE PRO TEMPORE.

ANNUAL REPORT OF THE PUBLIC PRINTER

FOR THE FISCAL YEAR ENDED
JUNE 30, 1903.

To the Senate and House of Representatives:

The construction of the new extension of the Government Printing Office building is so nearly completed that all portions of it are now occupied by operatives, machinery, and materials. Commodious as the new structure is, it is not large enough to accommodate all of the force of employees. Two divisions, however, viz, the specifications and branch bindery, heretofore located in the Union Building on G street, near Seventh street, have been transferred to the old building, corner of North Capitol and H streets, thus saving an expense in rental of \$6,500 per year, and it is probable that at the close of the present month the document division, for several years located in the Union Building, will be transferred to the old Government Printing Office building, thus effecting a saving of an additional expense of \$10,500 per annum. The transfer of these three divisions will have the further beneficial effect of consolidating the working force of the office, and saving the expenditure of time and money in transportation of materials and products.

During the second session of the Fifty-fifth Congress an appropriation of \$225,000 was made for the purchase of land as a site for a fireproof extension of the Government Printing Office building, title to be obtained by condemnation proceedings. The total expenditure for the purchase of the land was \$190,028.06, and an unexpended balance of \$34,971.94 was covered into the Treasury of the United States.

During the third session of the Fifty-fifth Congress an appropriation of \$2,000,000 was made for the construction of a fireproof building on the site acquired as before mentioned. Subsequently, in February, 1899,

an additional sum of \$429,000 was appropriated, made necessary by the increased cost of labor and materials.

By the terms of the appropriation the erection of this building was placed under the direction of the Chief of Engineers of the Army, upon plans and specifications to be prepared by him and approved by the Public Printer. It was also provided in the act of appropriation that the selection and appointment of a competent architect to prepare the plans and specifications for the elevations of the building should be made by the Chief of Engineers and the Public Printer. Mr. James G. Hill, of this city, was selected as the architect, and Capt. John Stephen Sewell, Corps of Engineers, United States Army, was detailed by the Chief of Engineers to superintend the preparation of plans for the new building and to take charge of its construction.

The work of planning, installing, and operating the steam power, the plumbing, ventilating, steam heating, and cold drinking water systems of the new building was intrusted to H. K. Collins, chief engineer of the Government Printing Office; and W. H. Tapley, chief electrician of the Government Printing Office, was assigned to the duty of planning, installing, and operating the electrical system by which the motive power and lighting of the new and old buildings are operated.

Excavation for the foundation of the new building was commenced in July, 1899, and it was supposed at that time that the completion of the structure would be accomplished in three years, at furthest, but by reason of delays in the delivery of materials, and in the execution of contracts, occupancy of the building for the prosecution of the work of this office was impossible until the present time.

For the purpose of giving a comprehensive idea of the advantages gained for the public service by the construction of this building, it is only necessary to state the following facts: The structure is located on the northwest corner of North Capitol and G streets, separated from the old Government Printing Office building by Jackson alley, the width of which is 30 feet. The new building fronts 175.3 feet on North Capitol street, and extends 408 feet on G street. The basement walls are of brick, and the exterior walls of red brick, with red sandstone and terra cotta trimmings. The outer walls of the court and the inner walls of the building are of white-face brick, and all stairway and elevator walls and toilet rooms are of white-enameled brick. The building rises from the surface of the ground seven full stories, exclusive of basement and attic. The floor space is equal to 377,200 square feet, or about 10½ acres. The power plant fronts on Jackson alley, and its dimensions are 130 by 112 feet.

Adjoining the basement is a fireproof vault for the storage of stereotype and electrotype plates. Its dimensions are 175 by 20 feet on North Capitol street, and 408 by 20 feet on G street. It is located under the west pave-

ment of the former street and the north pavement of the latter. It is estimated it has storage capacity for 2,000,000 plates.

The first floor of the building is occupied by the press and roller divisions; the second floor by a portion of the folding division and the supervising and clerical force of the office; the third floor by the folding division; the fourth floor by the bindery; the fifth and sixth floors by typographical and proof divisions; and the seventh floor by the divisions devoted to job work, and the electrotype and stereotype foundry.

A pneumatic-tube system for the rapid transmission of copy and proof to the various portions of the office has been installed, and is in successful operation. The central station of the system is on the sixth floor, under the direct supervision of the foreman of the proof division, and the system thence extends to the several typographical divisions, to the rooms of the foreman of printing, and to the room of the foreman of the press division. It will be an important aid in the economy of time at all hours of day or night, but especially in the execution of "rush" work, of which there is abundance during sessions of Congress and on requisitions from Executive Departments.

In the loft of the building are located ventilating fans, operated by electricity, and the machinery for operating the carriers in the pneumatic tubes, the power being also furnished by electric motors.

Provision has been made for eight elevators for passenger service, four freight elevators, one sidewalk elevator, and two form elevators.

The power, heat, and light for the old and new buildings is furnished from a plant which is remarkable for its efficiency and economy. It extends from Jackson alley on the north to G street on the south. The steam is furnished from eight boilers of Scotch marine type, of 300 horsepower each, supplied with appliances for saving and reusing heat, and these furnish steam for operating four cross-compound condensing engines direct connected to electric generators. One of the engines is of 200 horsepower, one of 450 horsepower, and two of 800 horsepower each. The economy of fuel in the production of power, heat, and light by this plant is cause for marvel in the minds of experienced operators of motive power. With one minor exception each piece of machinery in both buildings is operated by a separate electric motor, and electric currents are furnished day and night for more than 10,000 lights.

The most important consideration connected with the new building is that it is fireproof from basement to attic. The frame is of open-hearth steel, the window casings of iron, and brick and porous terra cotta protect columns, girders, and beams from expansion by fire. The structure is so substantial that heavy printing presses and other machinery are operated on the seventh floor without apparent vibration.

A novel and useful feature of the new building is a plant for the supply of drinking water, without the accompaniment of ice, to all the

operatives. Seventy-five drinking fountains are placed in convenient locations, supplied from tanks of filtered water in the basement, and the temperature of the water reduced to a palatable degree by passage through an ammonia plant.

The increase of work in the Government Printing Office has been such since the authorization of the construction of this new building that it is manifest the inflammable portion of the old building, viz, the North Capitol and H street wings, should be replaced as soon as practicable by a seven-story fireproof structure to secure necessary room for the prompt execution of requisitions and to protect property and human life from fire. Until such time as Congress shall authorize the proposed additional improvement, the old building will be occupied by a portion of the working force of the office and for storage purposes.

As the land on which is located the leased building occupied for several years by the Government Printing Office stable is to constitute a portion of the site for the proposed new railway station fronting on Massachusetts avenue, it was necessary that another building should be secured for stable purposes for the service of this office. Accordingly an agreement was executed by the Public Printer and Mr. Wilbur F. Nash, of this city, whereby Mr. Nash undertook to construct a new stable, located on L street, east of North Capitol street, in consideration of an annual rental of \$2,400, this agreement to be subject to approval in a formal lease for one year by the chairman of the Joint Committee on Printing. Such a lease was subsequently executed and approved. The annual rental of the stable previously occupied was \$2,600.

The work in this office during the last twelve months has been of increased volume, compared with any year preceding; but notwithstanding the necessary interruptions caused by removal from the old building to the new, all orders from the Executive Departments and from Congress have been executed promptly.

The report of the Superintendent of Documents is herewith submitted; also tabular statements containing detailed information showing the amount of work executed and the disbursements made in the Government Printing Office during the fiscal year ended June 30, 1903.

No. 1. Financial statement of the business of the Government Printing Office for the fiscal year ended June 30, 1903, and the conditions of the appropriations July 1, 1903.

No. 16. Showing the number of copies of each Department report and document printed upon requisitions by the heads of Departments.

No. 17. Showing the number of copies of books, with their titles, bound upon requisitions for Senators, Representatives, and Delegates.

No. 18. Statement of contract made (by direction of the Joint Committee on Printing) for supplying paper for the public printing and binding from March 1, 1903, to February 29, 1904.

No. 19. Statement of contracts made for stationery, fuel, forage, ice, and miscellaneous items.

No. 20. Statement of contracts made for material (except paper).

No. 21. Statement of contracts made for lithographing and engraving.

No. 22. Statement of proposals received by the Joint Committee on Printing for furnishing paper for the public printing and binding from March 1, 1903, to February 29, 1904.

No. 23. Statement of proposals received for supplying stationery, fuel, forage, ice, and miscellaneous items.

No. 24. Statement of proposals received for supplying material.

No. 25. Statement of proposals received for lithographing and engraving.

No. 26. Showing the number of persons employed in the public printing and binding, the length of time each was employed, and the amount earned by each.

No. 27. Showing the number of persons employed in printing Annual Report (1901) of the Secretary of Agriculture, the length of time each was employed, and the amount earned by each.

No. 28. Showing the number of persons employed in printing Annual Report (1902) of the Secretary of Agriculture, the length of time each was employed, and the amount earned by each.

Respectfully,

F. W. PALMER,
Public Printer.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., October 21, 1903.

SIR: I have the honor to submit herewith, as required by law, a report in detail of documents sold by this office during the fiscal year ended June 30, 1903.

For your information I also submit a report on the work of the office during the fiscal year, with such suggestions as appear to me to be in the interest of the service.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

HON. F. W. PALMER, *Public Printer.*

AMENDMENTS TO THE PRINTING LAWS.

No change in the printing law has been made since my last report. The Senate bill, printed in full therein, with explanations, passed the Senate and was favorably reported in the House, but it was too late for action to be taken by that body. The American Library Association, which includes in its membership substantially all librarians of depositories of United States public documents, approved this bill and will doubtless urge its passage by the Fifty-eighth Congress.

There is a real necessity for a law authorizing the Superintendent of Documents to order printed extra editions of documents required for sale, especially of the popular and cheap bulletins published by the Department of Agriculture. Last year one-tenth of all the money received by this office was returned to the remitters because the documents could not be supplied. A bill was reported favorably by the House Committee on Printing in the Fifty-seventh Congress authorizing the Public Printer to print and deliver to the Superintendent of Documents for sale 1,000 extra copies of each bulletin issued by the Department of Agriculture.

I have compiled from the sales record the following statement of sales, selecting about ten documents, which indicates the demand for such publications:

	Copies.
Yearbooks	3, 358
Special Report on Diseases of the Horse.....	1, 300
Special Report on Diseases of Cattle.....	1, 004
Botany Bulletin No. 16	3, 577
Entomology Bulletin No. 1 (new series).....	2, 135
Chemical Bulletin No. 46	1, 636
Experiment Station Bulletin No. 28	1, 330
Forestry Bulletin No. 10	1, 809
Forestry Bulletin No. 24	1, 066

Two or three times as many of these bulletins could have been sold, but they could not be supplied to me by the Department of Agriculture. While no statistics relating to the subject have been kept, I estimate that only about 40 per cent of the applications for publications relating to agriculture could be supplied. The demand for the two books, Special Report on Diseases of the Horse and Diseases of Cattle, has been extraordinary. To partially meet this demand, I was able to obtain about 1,000 copies of the former and about 800 of the latter by making exchanges of other documents with members of Congress and book dealers.

PUBLICATIONS OF THE PUBLIC DOCUMENTS OFFICE.

The publications of this office issued during the fiscal year were 12 Monthly Catalogues, with cumulative index, 656 pages; 1 Document Index (Consolidated Index), Fifty-seventh Congress, First session, 450 pages; 1 annual report, 40 pages; price list of documents for sale, 127 pages; total, 1,273 pages.

There is now in press the Document Catalogue (Comprehensive Index), Fifty-sixth Congress, 1899-1901, about 1,200 pages, the Document Index, Fifty-seventh Congress, second session, about 250 pages, and Tables of and Index to the Publications of the Department of Agriculture, 1862 to 1902, about 700 pages.

The latter is the first of a series of departmental lists which will be issued from time to time. When completed the lists will be consolidated and will form the check list of departmental publications.

CATALOGUE SECTION.

All the publications of the office in the foregoing list, except three which aggregate 867 pages, were prepared in the Catalogue Section. During the fiscal year there were received in this branch of the office 29,572 items. Seventy-five thousand seven hundred and eighty-nine cards were written in the preparation of copy for catalogues.

PRINTED CARDS.

It has finally been decided by this office to furnish printed catalogue cards for the Government publications to the depositories of public documents.

The much-discussed question of the form of heading for the cards was brought up at a meeting of Washington Departmental librarians, and a committee was appointed to lay the matter before the American Library Association at its recent meeting at Niagara Falls. This was done by means of a printed circular giving all the points for and against inversion under the distinctive word. The circular was read before the catalogue section of the association, and upon a vote being taken, the majority favored the inverted form of entry, e. g.:

U. S. Education, Bureau of

Not

U. S. Bureau of Education.

Cards will be sent inclosed with the documents to depository libraries as far as possible. No cards will be furnished for series entries, annual reports, reports on private bills, references, or analyticals, except the analyticals from the Congressional reserve. All documents and all reports not, on private bills, over 15 pages will be brought out in the Congressional reserve. The corporate author card will be the only entry furnished, but as many duplicates will be sent as are necessary, the other entries to be indicated and filled in as headings above the corporate entry by each library as it chooses, e. g.:

U. S. *Animal Industry, Bureau of.*
Squab raising; by William E. Rice. Wash.,
1903.

32 pp., 11 il. 8°. (U.S. Agriculture, Dept. of. Farmers' bulletin 177.)

Pigeons
Series=U. S. Agriculture, Department of. Farmers' bulletin
Rice, William E.=another author

In this case, although the series entry is indicated, no card will be furnished for it.

It is expected that the first installment of cards will be distributed in January, 1904.

PUBLIC DOCUMENTS LIBRARY, 1903.

The accessions for the fiscal year ended June 30, 1903, were 6,706 text publications and 716 maps, a total of 7,422. The aggregate of additions to the library from its foundation in 1895 is now 51,491 books and other printed publications and 7,454 maps, a total of 58,945 items. During the two years last passed some thousands of these items have been collected in bound volumes, and their permanent preservation in proper sequence thus secured.

The work of binding has gone on rather slowly, the total number of rebound volumes received from the binders to the present time being 1,885. This number is the result of once going through the library from A (agriculture) to Z (first fourteen Congresses), excluding the "sheep set" of numbered Congressional documents. In this latter set, which now numbers over 4,400 volumes, only about 200 volumes require immediate rebinding; but during the two years of going through the departmental sets to make up volumes for binding, additional volumes of periodicals and other numbered series have accumulated and now await binding to the number of several hundred volumes. After these arrearages have been cleared up, the binding of 300 or 400 volumes a year will keep the library in good condition in this particular.

In another important particular, that of shelf room, the library has long since outgrown its facilities, and its work has been of late carried on under great and growing embarrassments.

The growth of the library continues to include not only the current publications of the Government (which as fast as received are all carefully arranged in series and so labeled and catalogued as to be instantly available for reference), but also documents of historical value of earlier periods.

The Congressional Directories in the library now number 158, beginning in 1822 with the Seventeenth Congress, second session. The Court of Claims Reports, long incomplete for lack of a single early volume, are now complete in two series and 55 volumes. The set of annual reports of the Librarian of Congress is complete, in the pamphlet prints as well as in the Congressional documents, the first date being 1866. Of the printed catalogues of the Library of Congress there are 41, the earliest date being 1827, the latest 1880. The sets of Registers of the Interior and Justice Departments are known to be complete, and those of the State, Treasury, and War Departments are presumed to be very nearly so. The set of Land Laws begins with the earliest compilation, Joseph Gales, jr.'s, edition of 1810, containing an important historical introduction attributed to Albert Gallatin. The set includes both the Elliot and the De Krafft prints of the revised edition of 1817; Matthew St. Clair Clarke's edition of 1828, with the second volume thereto printed by Duff Green in 1836; Gales & Seaton's 2-volume edition, 1838; Kopp's 2-volume edition, 1875 and 1882, and the nine volumes issued by the Public Lands Commission, 1880 to 1884. The documents library has original prints of all the censuses except the First and Third. Its set of the Annual Registers of the Naval Academy begins with 1858 and includes all those printed at Newport while the academy temporarily sojourned there during the civil war. The completion of many other important sets in the public documents library has been noted in former reports of this office.

Gen. William Hickey (he had been brigadier-general of the District militia) was born in Washington August 12, 1800, and died in Bladensburg, Md., January 5, 1866, thus ending a service of forty-two consecutive years in the office of the Secretary of the Senate, the last ten as chief clerk. In an editorial eulogy paid to him and his works in the National Intelligencer of January 6, 1866, his "The Constitution of the United States of America, with an alphabetical analysis, etc.," is called "a faultless manual," which is about the limit to which praise could go. This manual must

have been highly popular with the Congresses before the war, for they ordered large editions of it and ordered it often. Not to mention small lots, there were 12,000 copies, February, 1847; 2,000 copies, April, 1848; 10,000, September, 1850; 10,000, January, 1853; and 38,625, February, 1854. These were very large editions for the small Congresses and small constituencies of half a century ago. They should have made General Hickey's "faultless manual" a plentiful book even in our day. It is, on the contrary, very rare. This seems to be the only conclusion to be drawn from the fact that among all the millions of the United States public documents, old and new, that have passed through the documents office no copy of Hickey's Constitution has been found. The public documents library acquired a copy during the past year by solicitation. It has a special value in this library because of its long and minute chapter on public documents. On this subject General Hickey was perhaps the leading authority of his day. He had the tastes and instincts of a librarian, and better than any other man deserves the title "founder of the Senate library." He was the chief compiler of Gales & Seaton's American State Papers, 38 volumes folio. An attempt to trace General Hickey's career in the Blue Book was not wholly successful, because he appears to have begun before there was a Blue Book. He is in the first issue (1816) and in all the later issues till his death.

The documents library has never until the present year been so fortunate as to secure even a single one of the 13 volumes (in 15 books and numbered as volumes 4 to 16) in which in 1887 the Executive Journals of the United States Senate for the forty years 1829 to 1869 were printed. The edition ordered was only 100 sets, and the compilers were paid \$10,000, or \$100 for each set of 15 books, so that each copy of each book cost \$6.67 for compilation alone. The Secretary of the Senate of that day, in the exercise of a judicious discretion, had 125 sets printed instead of the 100 that had been ordered. The Senate provided by resolution for placing 107 sets, and ordered the remaining 18 sets to be held pending further order, but it is understood that all were distributed years ago. Each Senator of that day (there were but 78 Senators in the Fiftieth Congress) got one set only, and Representatives got none at all. The sources of distribution to unofficial citizens were thus closed, and the only sets put within reach of the public were two that were allotted to the Library of Congress. It was therefore somewhat surprising that in March, 1903, the receipts of the documents office should contain 8 copies of volume 5 of the Executive Journals. How 8 copies of the same volume could be lost out of such a very limited edition is a question to which no answer thus far appears.

Wait's State Papers was reported in the second edition of the Public Document Check List, 1895, as made up of three editions, the first in 6 volumes, the second in 10 volumes, and the third in 12 volumes. This notation, without verification, had been accepted as correct, but when, in June, 1903, volumes 7 and 8 of the first edition were found in a library-exchange shipment, an examination became necessary, and it was then discovered that calling the first edition 6 volumes was an obvious error which even a superficial examination of the books should have sufficed to prevent. Wait is now complete in this library in three editions and 30 volumes.

DESIGNATED DEPOSITORIES—STATE AND TERRITORIAL LIBRARIES.

Almost from the beginning of the Government and until 1857 all incorporated historical associations, colleges, and universities were supplied regularly with public documents, and were virtually depositories. The regular distribution was made under the direction of the Secretary of State.

By a joint resolution approved January 28, 1857, the distribution of documents was placed in charge of the Secretary of the Interior, and that official was authorized to designate public libraries, colleges, and other institutions to receive the public documents. This latter provision was repealed, however, by a joint resolution approved March 20, 1858, which authorized Senators, Representatives, and Delegates in Congress to designate depositories of public documents to the Secretary of the Interior. The several acts relating to the distribution of documents to depositories have been incorporated in the Revised Statutes as sections 501 and 502, and these sections have been modified to some extent by the printing act approved January 12, 1895, which, among other changes, provides that the distribution of documents to depositories shall be made by the Superintendent of Documents.

Each Senator, Representative, and Delegate in Congress is entitled to name one depository of the United States public documents. Any library designated, other than college libraries, is required to possess 1,000 or more books other than Government publications. The libraries of the several States and Territories, of eight of the Executive Departments, of the Naval Academy at Annapolis, of the

Military Academy at West Point, and the library of the American Antiquarian Society, Worcester, Mass., are depositories designated by law. The latter institution was designated by resolution of Congress, December 1, 1814.

There are at present 492 State and Territorial libraries and designated depositories on the mailing list. A list of these depositories follows, which shows when and by whom designated.

While designations were first authorized to be made by members of Congress by the resolution of March 20, 1858, the library of the Georgia Historical Society, Savannah, Ga., was designated by Howell Cobb in 1857. There are five libraries on the list which were designated in 1858—the Public Library, Dover, N. H., by J. P. Hale; the Public Library, New Bedford, Mass., by Robert B. Hall; the Essex Institute, Salem, Mass., by Timothy Davis; the Herring Library, St. Lawrence University, Canton, N. Y., by F. E. Spinner; and the Oberlin College, Oberlin, Ohio, by Philemon Bliss. The Boston Public Library was designated in 1859 by Alexander H. Rice, and Yale University was designated the same year by John Woodruff.

A designated depository is charged on the books of this office to the Representative of the district in which located, if named by a Representative in the first instance, or to the successor of the Senator who designated it, as the case may be. Sometimes a depository is dropped at its own request, at the request of the Senator or Representative to whom charged, or because it is no longer a suitable depository of public documents. If a library is a suitable depository, it should not be changed, and the publication of the list showing when and by whom designated will, it is hoped, arouse the interest of librarians in Government publications, and stimulate their efforts to have the institutions which they represent continued as depositories.

For the information of Senators and Representatives I have caused a list, which is appended, to be prepared of the documents sent to designated depositories during the fiscal year 1903.

In the Fifty-eighth Congress there will be 30 Representatives from new districts under the apportionment of the Twelfth Census. Under the law each member will be entitled to name a depository, but no provision has been made for supplying the additional depositories with documents. The printing act approved January 12, 1895, provides that 500 copies of each document intended for distribution to depositories shall be supplied to the Superintendent of Documents. The number which will hereafter be required is 551, and Congress will be asked to increase to that extent the number of documents for distribution to depositories.

It may be interesting to librarians to learn that since the organization of this office, in 1895, it has distributed to the libraries of the country 2,955,721 public documents, the larger number consisting of bound volumes. Of these, 1,437,657 were sent to State and Territorial libraries and designated depositories, 330,942 to depositories of the scientific publications of the Geological Survey, 169,068 to what are known as "remainder" depositories, and 1,018,060 to miscellaneous libraries, upon special order or at the request of Senators and Representatives in Congress. The latter were very largely documents rescued from cellars and lofts where they had been stored by the libraries which had received them in duplicate.

List of State and Territorial libraries and designated depositories, showing when and by whom designated.
