LETTER OF TRANSMITTAL.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 1, 1913.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1913.

Very respectfully,

CORNELIUS FORD,
Public Printer.

The PRESIDENT OF THE SENATE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 1, 1913.

To the Senate and House of Representatives:

The report of the transactions of the Government Printing Office for the fiscal year ended June 30, 1913, comprehending the administration of Samuel B. Donnelly, Public Printer, from July 1, 1912, to June 25, 1913, and of myself as Public Printer, from June 26, 1913, to the end of the fiscal year, contains all the statistical information required by law and some additional statements necessary to properly summarize the operations of the office for the period covered.

The total appropriations for salaries, maintenance, and operation of the Government Printing Office, including deficiency appropriations, were \$5,495,314. Of this amount the sum of \$238,364 was appropriated for the operation and maintenance of the office of the superintendent of documents, leaving the sum of \$5,256,950 available for the production of public printing and binding for the several allottees.

The charges for repay work (which consists of work performed for the executive departments and other branches of the service chargeable to appropriations other than those for public printing and binding) amounted to \$1,103,081.42 during the fiscal year.

The total disbursements and outstanding obligations amounted to \$6,417,613.69, leaving an unexpended balance of \$180,781.73 to the credit of the several appropriations. In this unexpended balance is included \$158,006.02, which amount represents the repay accounts and deposits by disbursing officers and individuals not transferred to the credit of the appropriation for public printing and binding on June 30, 1913, and therefore was not available for expenditures.

The unexpended balance of \$180,781.73 was composed of the following items: Statutory salaries, office of the Public Printer, \$4,701.66 leave of absence, \$810.62; pay for holidays, \$114.37; salaries, office of the superintendent of documents, \$1,264.49; general expenses, office of the superintendent of documents, \$6,857.02; public printing and binding, \$167,033.57.

The total expenditures for maintenance, operation, and general expenses of the Government Printing Office, not including the expenditures for the office of the superintendent of documents, were \$6,178,749.91.

The total charge for work performed was \$6,402,585.49, which was \$373,579.69 less than for the preceding fiscal year. This was due partly to a slightly reduced total volume of work ordered, but principally to a reduction of approximately 5 per cent in the scale of charges for certain classes of composition, presswork, and binding, which was put into effect July 1, 1912.

THE WORK OF THE FISCAL YEAR.

The following statement is a summary of the production for the fiscal years 1911, 1912, and 1913, and covers the larger items which enter into public printing and binding:

* Prior to July 1, 1912, it was charged that post-estimated section overhead charges be carried by main personnel. From July 1, 1912, said overhead charges have been carried entirely by post-estimated section. This represents total charges made at close of fiscal year, and will vary from allotment book totals by the amount of authorized changes and transfer of charges made after July 1.

PURCHASES OF NEW MACHINERY.

The important purchases of new machinery are shown in the following statement:

26-inch centrifugal extractor.....	\$235. 00
Metallic washing machine.....	550. 00
Mangle or flat-work ironer.....	635. 00
Jennell rotary scrubbing machinery.....	427. 75
Numbering machine, Improved Champion.....	348. 80
Gathering, collating, stitching, and covering machine, combined.....	10, 560. 00
Tiering machine, Economy.....	540. 80
2 Johnson folding machines.....	2, 597. 00
2 presses, Chandler & Price job printing.....	482. 64
Page machine, rapid double, motor.....	640. 00
Bundling machine, for pamphlets.....	125. 00
Total.....	17, 191. 99

RECOMMENDATIONS.

In the short period that I have been at the head of the Government Printing Office my investigations into the various departments contained therein lead me to make the following recommendations:

That portion of the monotype keyboard equipment first installed should be discarded, as it is now obsolete, and there should be installed 50 style "D" keyboards, 90-em scale, in place of the 100 monotype style "C" keyboards. Such a change would result in further decreased cost of production of monotype composition.

In line with the changes in the monotype equipment, there should also be an allowance in the appropriation act for the changing of the old linotype machines to later models, and also a sufficient amount allowed for the installing of several of the latest improved linotype machines.

The cost of operating electrically heated melting pots in the linotype and monotype sections has been investigated, and it is estimated that their use would result in a per annum saving in the monotype section of \$4,690.13 and in the linotype section of \$3,103.72. The total cost of gas consumed in these two sections during the last fiscal year was \$9,404.40 in the monotype section and \$3,314.92 in the linotype section. The cost of equipping the monotype machines with electrically heated pots would be about \$12,000 for the entire 126 machines, and the cost of equipping the 76 machines in the linotype section would be about \$11,000.

In the bindery division was found machinery now being used disadvantageously that should be replaced by more modern and up-to-date machines. The replacing of this old machinery with new would allow an increased output at a reduced cost, and would also materially increase the dispatch with which work could be turned out.

Electrically heated stoves could be installed in the bindery to replace the present gas heaters, but as these stoves are still in an experimental condition, it is believed that further tests should be made before any are purchased.

In the foundry the total cost of the gas consumed at the present time is about \$628 per month, or a total of about \$7,500 per annum. It is estimated that the melting pots in the foundry could be replaced by electrically heated melting pots at an estimated cost of about \$7,000, and the estimated saving of electrically operated melting pots over the gas pots now in use would be about \$3,000 per annum.

All of the above-mentioned equipment, namely, electrically heated melting pots for linotype machines and monotype machines and metal-melting machines in the foundry, is entirely feasible, as proven by experimental pots already installed.

With the purchase of a wax-stripping, refining, and casting apparatus and an electrically heated metal pot for backing up electrotype plate work, and a few changes in other machinery, the foundry section would be brought to a higher state of efficiency.

In the press division it was found that but few presses had been added to the equipment in several years. It was also learned that several of the presses had been condemned (worn out) and that others are old and obsolete. Ten years' wear and tear such as the machines in the Government Printing Office are subjected to can but wear out the best of machinery.

There should be appropriated sufficient money to allow the purchase of a number of modern presses, so that the increased amount of work can be handled and turned out in first-class condition and with the necessary speed.

Attention is respectfully invited to the condition of the power plant at the present time and as it will be in the near future with two new boilers installed.

For the purpose of lighting and heating the new Post Office Building Congress allowed the Public Printer \$120,000 for sufficient additional boilers and other equipment to take over this additional work, but in connection with this equipment attention is invited to the fact that two of the boilers are 15 years old and two are 16 years old, and these should be replaced as early as possible. In order, therefore, to bring the plant to a modern and economical operating basis, it is respectfully recommended that \$110,000 be allowed for additional boilers and other necessary equipment in the boiler house, including a modern coal and ash handling equipment.

Last year electricity was generated for 1.23 cents per kilowatt hour in spite of the fact that hand-fired boilers and anthracite coal were used. When the two new boilers are installed, bituminous coal for the new boilers and anthracite coal for the old ones will

be used, and a more or less makeshift condition will obtain in the boiler house. If modernized as above requested, the operating expenses can be reduced from \$12,000 to \$15,000 per annum. It is believed that this item is one of the most urgent and should be allowed.

The installation of a mail-carrier system between the Government Printing Office and the new Post Office Building was requested in the last deficiency bill but was not allowed. A belt-conveyor system, to run in the tunnel already constructed and including the necessary spiral chute and feeders, will cost about \$30,000, and it is estimated that an installation of this kind would pay for itself within less than two years. It would also result in the saving of a considerable amount of time in the mailing of documents.

During the past year the installation of a system for conveying paper cuttings from the various cutting and trimming machines in the new building to the waste-paper baling room was contemplated. The cost of an equipment for this work would be about \$5,000, and it is estimated that a total of about \$2,000 per annum can be saved.

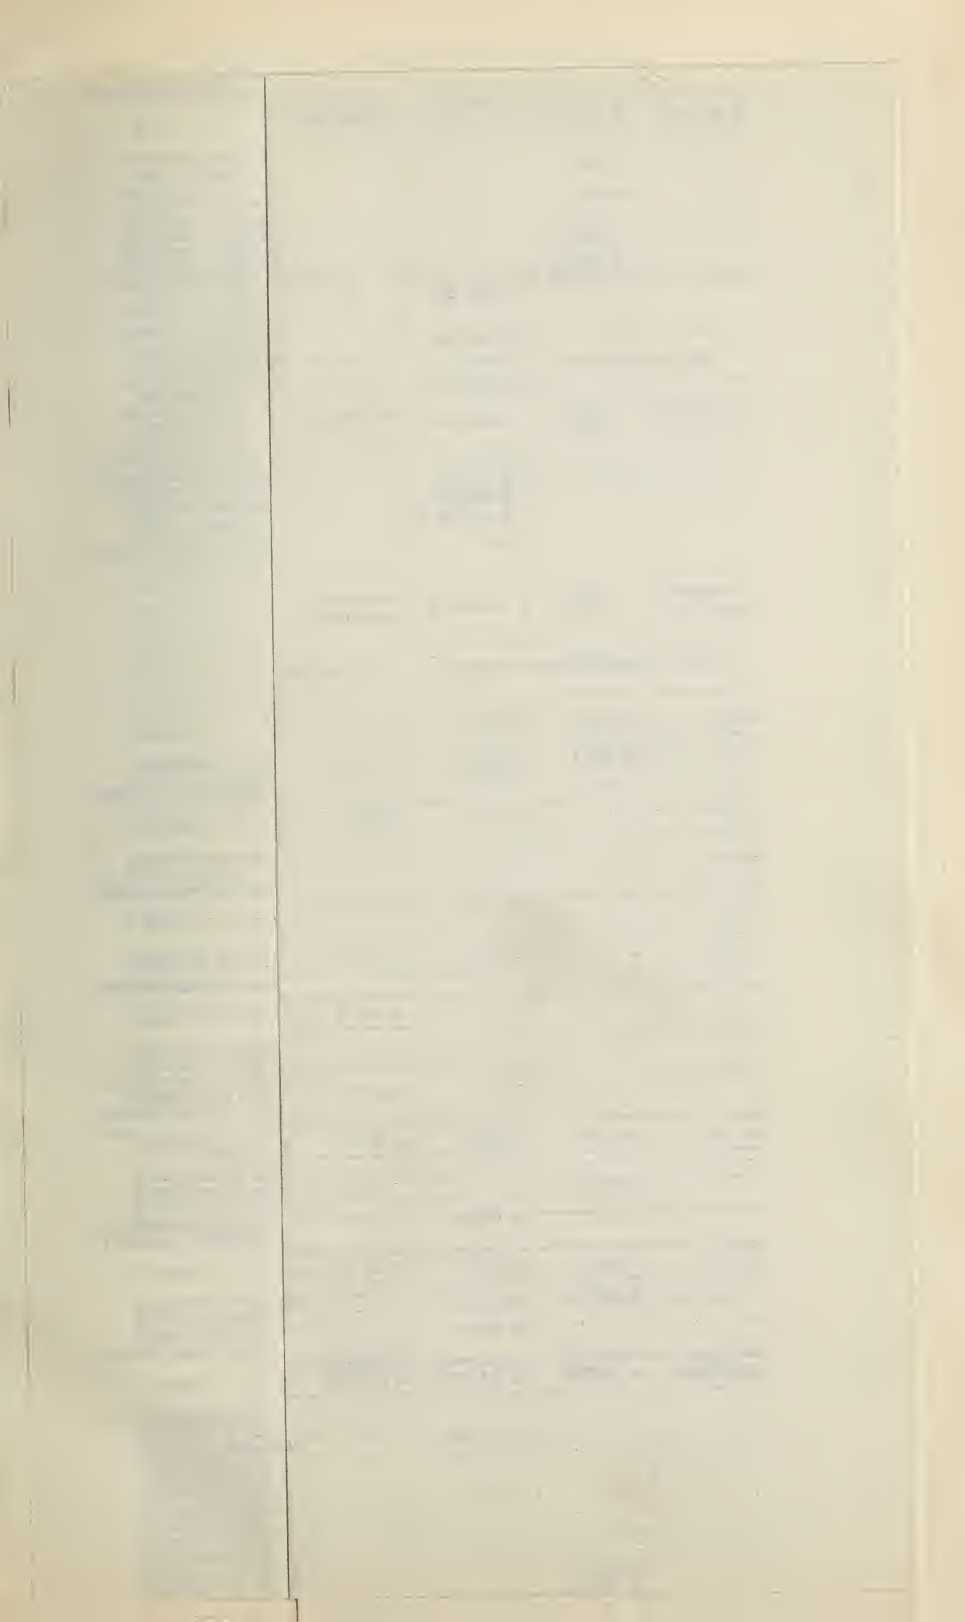

Attention is respectfully invited to the fact that all of the available space in the old building is practically filled, and there is constant demand for additional space, especially by the superintendent of documents and the bindery. The condition of the old building is such that it can not be used for anything except storage purposes, and even for such purposes can be used only to a very limited extent, for the reason that the floors and walls are not strong enough to support any great weight. This building has been condemned on several different occasions, and in several places has been reenforced and the walls tied together to prevent their falling out. It is built entirely of wood, with the exception of the exterior brick walls, and is therefore a constant menace not only to itself but also to the new building, for the reason that if a fire should break out and gain any headway whatever, it would be almost impossible to save the old building and it would probably be a difficult matter to save even the new building. The new building cost about 31 cents per cubic foot to erect, and on this basis a building to take the place of the present old building and to match the general design of the new building will cost about \$2,000,000.

In conclusion I would recommend that the wages of compositors and bookbinders, now at 50 cents per hour, be increased to 55 cents per hour, also that bookbinder machine operators be increased from 55 cents to 60 cents per hour. It is estimated that the sum of \$83,000 will be required to meet the increase in salary should this rate be granted by Congress.

Respectfully submitted.

CORNELIUS FORD,
Public Printer.

REPORT OF THE MEDICAL AND SANITARY OFFICER.

AUGUST 12, 1913.

SIR: Herewith is a statement showing the number of cases, both medical and surgical, arising during working hours, which were treated in the Government Printing Office emergency room during the fiscal year ended June 30, 1913. There is also included a list of employees who have received compensation for injuries during the fiscal year, under the provisions of the act of May 30, 1908, providing for compensation to artisans and laborers injured in the service of the United States. The number of employees quarantined because of contagious diseases is also shown.

A total of 2,548 medical and surgical cases were treated during the year, besides 820 redressings of wounds in those cases where the employees remained at work after being injured and did not apply for compensation, resulting in a grand total of 3,368 cases. One thousand four hundred and seventy cases were medical and 1,078 were surgical, as is shown in the tables accompanying this report. During the preceding fiscal year there were 1,269 medical and 1,141 surgical cases. There was one death during the year, due to heart disease.

The respective columns show the number that it was possible to relieve and the number obliged to go home after temporary relief.

Approximately \$4,842.89 was expended as compensation for injuries received during the fiscal year, as compared with \$3,393.04 in 1912 and \$4,995.95 in 1911.

Respectfully,

HON. CORNELIUS FORD,
Public Printer.

WM. J. MANNING, M. D.,
Medical Officer.

NINETEENTH ANNUAL REPORT OF
THE SUPERINTENDENT OF DOCUMENTS
FOR THE FISCAL YEAR ENDED
JUNE 30, 1913.

NINETEENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1913.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
October 1, 1913.

SIR: In conformity with the provisions of section 61 of the general printing act approved January 12, 1895, I have the honor to submit the Nineteenth Annual Report of the Superintendent of Documents for the fiscal year ended June 30, 1913.

There has been an increase of more than 25 per cent in the number of Government publications mailed through cash sales and subscriptions this fiscal year over that of last year, and more than 100 per cent increase during the past two years over that of the preceding two years, which has been caused by the increased demand of the public for documents, the tendency of the departments to cut in numbers their editions and free lists, and to the efforts made by the departments and this office to keep the public fully informed as to what is being issued by the Government.

During the year 4,195,878 documents were sold to the public, or, as required by the provisions of the law, shipped to depository libraries, miscellaneous libraries, departments, foreign legations, etc., or condemned. The cash sales amounted to \$106,153.43.

Through natural development this office has become a bureau of information and a clearing house for Government publications. Answering letters of inquiry relative to what the Government has issued on certain subjects, and, if in stock, quoting prices or directing the inquirer to the nearest library where the publication should be obtainable for reference, has shown a decided increase. The number of letters received during the year exceeded that of the previous year by 22,000.

The following statement gives the total number of letters received this and the previous fiscal year, containing money for documents or asking for information, known as cash and ordinary mail:

1911-12:	
Cash.....	84, 192
Ordinary.....	67, 749
Total.....	151, 941
1912-13:	
Cash.....	103, 256
Ordinary.....	70, 836
Total.....	174, 092

MAILING DEPARTMENTAL PUBLICATIONS.

As provided in chapter 350, section 8, of the act of August 23, 1912, in October of that year the addressing, wrapping, and mailing

of public documents for the departments was inaugurated in this office, and the stock of publications held by the departments was transferred at that time. From October 1, 1912, to June 30, 1913, there were received 34,866,026 documents. Of that stock 25,292,703 documents were mailed at the request of the departments, leaving a balance of 9,573,323.

Together with the great volume of miscellaneous orders received from the departments for mailing publications, this office handles 412 departmental mail lists containing 650,000 names and addresses.

An enormous amount of labor was required in transferring, arranging, and shelving 11,000,000 publications from the departments within the period of one month so as to be available for filling orders. At first there was some delay in filling orders from the departments, but within a period of 30 days the work was being satisfactorily performed, and since that time all orders have been mailed promptly. The result of centralization has improved and not impaired the work as some predicted.

The documents held in this office to the order of the departments are stored in an accessible manner, and it does not appear to be in the interest of economy or efficiency to return them to the departments to be again stored in basements, rented buildings, and warehouses. Another advantage in centralization is that it guards against the indefinite storing of publications, which finally become valueless because of delay in distribution. Only recently a list was compiled of nearly 3,000,000 old publications, and a schedule sent to the departments asking that action be taken looking to their distribution or disposal as waste paper, with the result that thousands of books were distributed that otherwise would have remained in storage.

OFFICE PUBLICATIONS.

It is gratifying to report that during the fiscal year the Document Catalogue of the Sixtieth Congress was published, and that of the Sixty-first Congress is in press.

Considerable work has already been performed on the catalogue for the Sixty-second Congress, and it is our aim to complete and publish it before the end of the Sixty-third Congress.

The cause for delay in the preparation of the copy for the document catalogues and indexes is that publications are ordered printed as documents that do not appear until long after the close of the Congress to which they have been assigned, thus making it necessary to delay publication until sufficient information can be obtained for making the entries.

The Monthly Catalogue is in print shortly after the close of each month, as usual, and delivery of the Document Index covering the Sixty-second Congress, first and second sessions, was made during the year.

It will probably be October before sufficient information is available to permit sending to the printer copy for the index of the Sixty-second Congress, third session.

Respectfully,

FRANK C. WALLACE,
Superintendent of Documents.

Hon. CORNELIUS FORD,
Public Printer.
