OFFICE OF
THE PUBLIC PRINTER
WASHINGTON

DECEMBER 2, 1912.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1912.

Very respectfully,

SAM'L B. DONNELLY,
Public Printer.

The PRESIDENT OF THE SENATE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 2, 1912.

To the Senate and House of Representatives:

The statistical information of the transactions of the Government Printing Office, as required by law, is submitted in tabular form. I have included in this report a number of additional statements which clearly summarize the transactions and work performed by the establishment during the fiscal year ended June 30, 1912.

The total appropriations for salaries, maintenance, and operation of the Government Printing Office were \$5,547,634. The appropriation for the office of the superintendent of documents (\$255,884) was deducted from this amount, and there was allotted and made available for the production of public printing and binding \$5,291,750.

The charges for repay work (which consists of work performed for the departments and chargeable to appropriations other than that for public printing and binding) amounted to \$959,043.92 during the fiscal year.

The total disbursements and outstanding obligations amounted to \$6,388,730.79, leaving an unexpended balance of \$117,947.13 to the credit of the several appropriations.

In the unexpended balance is included \$75,277.26, which amount represents the repay accounts and deposits by disbursing officers and individuals not transferred to the credit of the appropriation for printing and binding June 30, 1912, and therefore not available for expenditures.

The unexpended balance of \$117,947.13 on June 30, 1912, was composed of the following items: Legislative salaries, office of the Public Printer, \$5,078.86; general expenses, office of the superintendent of documents, \$17,007.59; leaves of absence, \$15,019.41, pay for holidays, \$428.92; salaries, office of the superintendent of documents, \$2,060.98; public printing and binding, \$78,351.37.

The total charge for work performed was \$6,776,165.18, which exceeded by \$468,402.44 the total charge for work performed during the preceding fiscal year.

The total amount of expenditures for maintenance, operation, and general expenses of the Government Printing Office, not including the expenditures for the office of the superintendent of documents, was \$6,254,907.37. The total charges for completed work performed during the fiscal year (\$6,776,165.18) exceeded the total expenditures to the amount of \$521,257.81, which is 8.33 per cent of the total expenditure.

The expenditures for operating the Printing Office during the fiscal year 1911 from all appropriations except those for the salaries and

general expense of the office of superintendent of documents amounted to \$6,245,080.88, while the corresponding amount for the fiscal year 1912 was \$6,254,907.37. The total charges for completed work during these two years were \$6,307,762.74 and \$6,776,165.18, respectively. Therefore, printing for which \$1 was charged during the fiscal year 1911 cost 99 cents to produce as compared with 92 cents during the fiscal year 1912.

The increased per capita production during the fiscal year made possible a reduction of approximately 5 per cent in the scale of charges. This reduction was made, and the reduced scale will apply to work produced during the fiscal year 1913. This readjustment of the scale of charges was based upon yearly cost of production data, and was accomplished by a reduction in charges for presswork, certain classes of pamphlet and binding work, composition, and charges for handling stock, illustrations, and other purchases. It was, however, necessary to increase the charges on some items on which the cost exceeded the charges during 1912, but the reductions made in the scale will result in a reduction in charges to Congress and the departments of approximately \$300,000 during the present fiscal year.

THE WORK OF THE FISCAL YEAR.

The following statement is a summary of production for fiscal years 1910, 1911, and 1912 and covers the larger items which enter into printing and binding:

in the summary, while the allotment books are necessarily closed on June 30.

Yearly summary of expense and production, fiscal year ended June 30, 1919

The total charges for 1912 work shown in above table exceed by \$2,046.13 the totals shown in the allotment statement, due to the fact that changes and additional charges are easily kept up to date in the summary, while the allotment books are necessarily closed on June 30.

A further increase in pressroom efficiency in 1912 as compared with the previous year is shown by the fact that while the number of forms sent to press increased by 3.2 per cent the number of chargeable impressions increased by 12.5 per cent.

With few exceptions the larger items of production in 1912 show a substantial increase over previous years, due to closer supervision, improved methods, and cooperation on the part of the employees.

For two successive years the office has been operated within the appropriations, and deficiency appropriations have not been necessary. I take pleasure in calling attention to the yearly summary of expense and production (facing this page), the product of our efficient cost-accounting system. This summary is the first complete and itemized statement ever presented to Congress showing in detail the cost of maintenance, operation, and expense of the Government Printing Office, and the cost and amount of work produced therein.

PURCHASES OF NEW MACHINERY.

The important purchases of new machinery are given in the following table:

Proof presses, Vandercock (2), 25 by 25 inches.....	\$818.60
Press, rotary web perfecting job printing.....	20,000.00
Press, rotary web perfecting printing.....	19,000.00

Lathe, Hendey tool-room, 12-inch swing.....	810.10
Dexter valve reseating machine.....	337.50
Folding machine, Johnson.....	1,285.00
Book-cover cleaning machine, Drexler.....	1,282.00
Tiering machines, electrically operated.....	1,081.60
Four-roll wood planer, Crescent Machine Co.....	494.00
Matrix drying press.....	3,545.00
Hydraulic baling presses.....	2,995.00
	52,112.80

That portion of the monotype keyboard equipment first installed is now obsolete. It should be discarded and there should be installed in its place a lesser number of keyboards of the improved type. Decreased cost in production will result from this purchase and further economies can be effected by the purchase of a small number of linotype machines.

IMPROVEMENTS IN BUILDINGS AND PLANT.

The important improvements in the plant equipment and in the buildings undertaken and consummated during the fiscal year and the cost thereof were as follows:

A garage was built on the vacant lot adjoining the H Street Annex building at a cost of \$17,870.69. This building has a total volume of 227,500 cubic feet, and the cost per cubic foot was, therefore, 8 cents, which was very reasonable.

In order to protect the H Street Annex building from possible fire in the new garage, wire glass was installed on all windows of the first and second floors of the Annex building at a cost of \$927.22.

Fireproof shutters were installed on all windows of the old building, Jackson Alley side, at a cost of \$1,488.29.

A contract was made with the Henry Vogt Machine Co. for a 20-ton refrigerating plant and a 1-ton ice-making plant at a total cost of \$6,600. This machine was installed during the year, but the piping was not connected up until after the first of the new fiscal year.

A new pumping engine, contracted for in the previous fiscal year, was connected up and new water lines run where necessary, at a cost of \$797.45.

The work of painting the windows throughout the new building, that was started in the previous fiscal year, was completed at a cost of \$787.63.

A ventilating tube was installed from the toilet room in the press room, first floor, G Street side, at a cost of \$80.67.

Safety hooks were installed on the windows of the H Street Annex building for the use of window cleaners at a cost of \$39.36.

The necessary work in repairing the windows, etc., due to the gas explosion in North Capitol Street, which occurred on January 19, and for which this office was reimbursed by the Washington Gas Light Co., cost \$115.51.

The North Capitol and H Streets sides of the old building were painted by employees in this office at a cost of \$1,058.38.

A grill-work partition was installed in the bindery shipping room at a cost of \$105.83.

A new coal storage vault in the basement of the new building, including all necessary moving, protection of pipes, etc., was constructed at a cost of \$731.84.

An annunciator push-button system for the purpose of locating instantly the point at which a fire alarm may be rung was started during the previous fiscal year and completed during this fiscal year at a cost of \$584.41.

The Jackson Alley side of the old building was painted under contract at a cost of \$688.

During this year considerable work had to be performed in replastering walls and girders in the new building where the old plaster had fallen, at a total cost of \$674.89.

A one-story hydraulic elevator was installed from the basement to the press room, new building, at a cost of \$863.75.

Two new doorways were cut in the wall to make additional passageways to the monotype section, new building, at a cost of \$199.89.

A spiral stairway was installed in the old building, between the first and second floors, near the postal-card section, at a cost of \$266.22.

A section of a gallery floor was installed in the garage at a total cost of \$497.05.

The purchase and installation of charging panels and charging circuits in the new garage to accommodate the automobiles cost \$1,289.56.

During this fiscal year six electric trucks were purchased at a cost of \$17,373.

A greater part of the old traffic equipment was sold, six horses and two trucks being kept. During the first six months that these automobiles were in service the total cost of the combined garage, delivery, and stable sections was \$18,145.60, indicating an estimated saving per annum of \$12,196.90 over the cost of operating the delivery and stable sections in the previous year.

The walls of the foundry section, which had become badly soiled, due to the use of the old dry black-leading process, were cleaned and painted at a cost of \$560.29.

During this year and the year previous a number of experiments were made to determine the proper lighting system for the new building, and as a result of these experiments Tungsten lights were installed in the press room, first floor, G Street side, at a cost of \$233.39; accounting division, at a cost of \$102.16; foundry, seventh floor, at a cost of \$659.39; and job composing section, second floor, G Street side, in each alternate bay, at a cost of \$205.93.

The wiring in the old building was becoming obsolete and defective, and as a protection against fire, conduits and new wiring were installed on the second floor, old building, at a cost of \$456.53; fourth floor, old building, including the part occupied by the superintendent of documents, at a cost of \$1,045.31; and fifth floor, old building, at a cost of \$285.45.

The rewiring in the attic, new building, which was started during the previous year, was completed during this fiscal year at a cost of \$611.19.

UPKEEP OF THE BUILDINGS.

In addition to the above statement of new work performed, I have the honor to submit herewith a tabular statement (facing this page) showing the cost of upkeep of the buildings for this fiscal year. The total cost of this upkeep, including steam heating, plumbing fixtures, lighting system, electrical inspection, etc., was \$28,769.04, which was a decrease from the fiscal year 1911 of \$4,991.61. This statement shows that the cost of upkeep of the buildings, including all fixtures, in spite of the fact that it is a manufacturing plant, is considerably less than 1 per cent of the original cost of the buildings.

OPERATION OF ELECTRIC POWER PLANT.

The following statement shows the cost of operating the electric power plant for this fiscal year:

This cost does not include the entire engineer's section, which employs plumbers, steamfitters, and their helpers, and a portion of whose time is charged against maintenance, repair, and new work in connection with buildings, but includes only those costs chargeable against the electric power plant proper. The total output of the plant for this year was 3,208,073.40 kilowatt hours, as against 3,287,584.65 for the previous year, a reduction of 79,511.25 kilowatt hours.

The total expense for this year was \$39,514.13, as against \$42,227.72 for the previous year, a reduction of \$2,713.59.

The cost per kilowatt hour in this year was 1.2317 cents, as against 1.2850 cents in the previous year, or a reduction of 0.0533 cent per kilowatt hour.

The installation of stokers (machines) and coal and ash handling equipment was postponed on account of the consideration by the Treasury Department of a plan for supplying light and power for the new post-office building from the Government Printing Office and an alternative plan for supplying the Government Printing Office and the new post office from the Capitol power plant. It is recommended that the Government Printing Office power plant be modernized and that power and light for the new post-office building be supplied therefrom.

LAWS REGULATING PUBLIC PRINTING AND BINDING.

The Public Printer can not exercise any control over the volume of public printing and binding. He is responsible solely for the management of the Government Printing Office and the cost of producing the work. All printing executed in the Government Printing Office is authorized by law, and the volume of printing is controlled by Congress and the heads of the executive departments and Government establishments. An analysis of the cost of the printing authorized and ordered by Congress and the departments during the fiscal year is set forth in the chart facing this page.

In order that the Public Printer might adhere strictly to the provisions of law limiting the bindings to which each Member of Congress is entitled, a check system was inaugurated May 9, 1911, which has resulted in elimination of duplicate bindings. From May 9, 1911, to June 30, 1912, 3,900 publications (80 per cent volumes and 20 per cent pamphlets and maps) forwarded to this office for binding have been returned unbound because the Public Printer was without authority to bind them. The copies of bindings for Members of Congress during the past four years were as follows: 1909, 29,090; 1910, 52,068; 1911, 59,285; 1912, 24,900.

It is estimated that if each Member had ordered bound the entire quota of publications to which he was entitled, the total would have

PUBLIC PRINTING AND BINDING.
(Regulated by sec. 56, printing act.)

been approximately 150,000 volumes in 1912. As but 24,900 volumes were ordered bound it can be readily seen that not over 20 per cent of the possible bindings are ordered.

The law now provides that each Member of Congress may have one copy of each public document to which he may be entitled bound free, and the copies are supplied to the Public Printer by the House and Senate Document Rooms. The figures above given undoubtedly show that a vast surplus has been printed during the years mentioned.

In my report for 1910 I recommended the classification of congressional documents and reports. The printing of an unnecessary number of many documents and reports can not be avoided unless power to fix the edition is given to an officer who can act immediately when the copy is received at the Government Printing Office. The edition of 75 per cent of the documents and reports printed can be reduced without interfering with the work of the Houses and their Members or depriving the public of information, and the elimination of irrelevant matter will result in decreasing the cost of printing hearings.

My four years of experience in the printing of public documents leads me to recommend that a minimum and maximum number for editions be fixed by law and that the power of fixing the edition within these limits be conferred upon one official.

A free public distribution of documents should not be made except the same be provided for by specific act or resolution in the manner that the congressional distribution of Farmers' Bulletins and reprints of the horse and cattle books are now made. The valuation plan of congressional distribution now under consideration will, if adopted, necessitate the printing of many editions of public documents, and the present loss in unused documents will be offset by increased cost of production.

The depository libraries should be designated by specific act of Congress and the list should be revised as proposed in Senate bill 4239. The list of designated depositories appears on pages 17-20, inclusive.

All congressional documents of less than 100 pages are distributed to the depository libraries immediately after they are printed. The annual reports of the executive departments are sent to the depository libraries in bound form as soon as printed. All other congressional documents exceeding 100 pages in size are not issued to depository libraries in unbound form, but are held for binding until the schedule of volumes for the session of Congress is compiled. All congressional documents except the bound annual reports already issued are bound in buckram and sent to the libraries. There were issued during the Sixty-second Congress, first and second sessions, 4,201 Senate and House reports and documents. There were distributed to the libraries in unbound form immediately after printing 1,690,525 copies of documents and reports. The cost of printing these copies was \$7,067.15.

Authority should be given the Public Printer to decide what publications are to be sent to the depository libraries in unbound form. I am advised by those in charge of the most efficient libraries that only the matter referring to questions of public interest and amounting to less than 20 per cent of the total sent out is ever used. The copy for these publications is received at all hours of the day and night and the edition to be printed must be promptly determined.

The unbound copies of documents are returned when the bound edition is received by the libraries, and the cost to the Government of handling and transporting them is greater than the cost of printing. The power to determine the number of copies to be printed of congressional documents within the limits of a minimum and maximum fixed by Congress is not greater than that now conferred by Congress on a number of its employees. The promptness with which the work is executed requires immediate action, which can best be secured by investing some one individual with the necessary authority.

A large number of publications issued by the Government during the past 30 years will ultimately be returned, so that annual condemnations and disposals by sale as waste paper of obsolete documents will continue for some time to come. The waste-paper baling room is unfortunately the destination at which a major portion of the product of all printing presses ultimately arrives. The obsolete document is frequently nothing more than a memento of a dead political issue that no one cares to preserve.

The adoption of the recommendation of the President that resulted in the concentration of the work of mailing all Government publications at the Government Printing Office will prove of great economical value. The publications will be distributed promptly for the reason that the Public Printer does not have space in which to store them for an indefinite period, and the centralization of the storage will simplify the work of supervision and compel issuing officers to make a prompt and effective distribution. The printed matter in storage will be under one roof, and examination and inspection necessary to the intelligent consideration of methods can be readily made.

Respectfully submitted.

SAM'L B. DONNELLY,
Public Printer.

REPORT OF THE MEDICAL AND SANITARY OFFICER.

OCTOBER 14, 1912.

SIR: Herewith is a statement showing the number of cases, both medical and surgical, arising during working hours, which were treated in the Government Printing Office emergency room during the fiscal year ended June 30, 1912. There is also included a list of employees who have received compensation for injuries during that fiscal year, under the provisions of the act of May 30, 1908, providing for compensation to artisans and laborers injured in the service of the United States. The number of employees quarantined because of contagious diseases is also shown.

Two thousand four hundred and ten cases were treated during the year, besides 1,004 redressings of wounds in those cases where the employees remained at work after being injured and did not apply for compensation. One thousand one hundred and forty-one of the cases were surgical and 1,269 were medical, as is shown in the tables accompanying this report. During the preceding fiscal year there were 961 surgical and 1,142 medical cases and 990 redressings.

It will be noted that the amount paid as compensation for injuries received in cases where it was not possible for the employee to remain at work was \$3,393.04, as compared with \$4,995.85 for the fiscal year ended June 30, 1911. The sum expended for compensation for injuries is very small when the large number of employees and the amount expended in wages is considered.

Respectfully,

WM. J. MANNING, M. D.,
Medical and Sanitary Officer.

The PUBLIC PRINTER.

EIGHTEENTH ANNUAL REPORT OF
THE SUPERINTENDENT OF DOCUMENTS
FOR THE FISCAL YEAR ENDED
JUNE 30, 1912.

EIGHTEENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1912.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE SUPERINTENDENT OF DOCUMENTS,
October 11, 1912.

SIR: It becomes my duty, in compliance with the printing law of January 12, 1895, which still governs the public printing, notwithstanding the efforts made to have other legislation take its place, to lay before you my report covering the operations of this division for the last fiscal year. The report is the Eighteenth Annual Report of the Superintendent of Documents. It having been the custom annually to enumerate the duties assigned to this division, I do so herewith. They are specifically:

1. To sell public documents at cost.
2. To receive from the various issuing offices Government publications for sale.
3. To have general supervision of the distribution of public documents, except as otherwise provided.
4. To prepare, at the end of each Congress, a document catalogue of public documents.
5. To prepare a consolidated index of congressional documents.
6. To do such indexing as may be ordered by the Committee on Printing.
7. To receive the accumulations of public documents from the different departments and other issuing offices; also, once a year, to take over their accumulations for distribution or sale.
8. To issue a monthly catalogue listing all Government publications published during the month.
9. To "thoroughly investigate" the condition of designated depository libraries.
10. To distribute all Government publications, as issued, to the designated libraries.

To sum up the foregoing list of duties placed upon this division, it may be briefly stated that they embrace certain literary work, the sale of public documents to the public, and the supply of Government publications free only to certain libraries.

We have taken every means that offers itself to inform the public on this important point: That it sells only to the public, that it does not give away public documents, and if this information were to become public property much disappointment would be saved to applicants and much correspondence would be avoided. As it is, the impression is still quite general that all you have to do to obtain books published by the Government is to address some official at Washington, the request frequently being quite urgent and "ship by return mail" a frequent addition to the request. Nor is this impression confined to American citizens. I think I am safe in asserting

that not a mail reaches this office that does not bring foreign letters asking for free Government publications. Of course, so far as our own people are concerned, the fact that a limited number of publications are allotted to Senators and Representatives for free distribution, and the additional fact that a number of issuing offices follow the rule "first come, first served" in the matter of giving for the asking what later applicants must purchase, contribute to creating this impression. But that foreigners should assume that this Government will stretch international courtesy to so unreasonable an extent is not so easily explained. It may be proper, however, here to state that there is a class of publications that may be had for the asking, that being the series of price lists issued by this office. They are divided by subjects, and a reasonable number of them is sent to applicants. Frequently all of the set are asked for, but inasmuch as it is not likely that one individual is interested in the widely differing subjects covered, such wholesale requests are toned down to reasonable proportions. The requests for these price lists are steadily increasing, which promises a healthy increase in the future sale demand. Many purchasers become regular applicants, and not a few have a deposit with this office against which purchases may be charged and a periodical statement only rendered.

For several years past it has been my aim to accommodate Members of Congress to the extent of accepting from them publications to their credit for which this office has live demand, and supply them, in return, on the basis of the money value of each, with publications requested by their constituents that they are otherwise unable to furnish except by purchasing them from us. By this method no one is hurt and many are accommodated, and the courtesy of the office seems to have met the cordial approval of many public men, who in many cases find their allotment altogether insufficient to meet the demand from home. This is so often the case, as our experience perhaps best qualifies to assert, that it is quite likely that the privilege of a Member of Congress to supply a limited number of certain public documents free is more of a drawback to his popularity with constituents than the reverse. It certainly is frequently a source of trouble, and by no means seldom calls for pecuniary sacrifice on the part of a Senator or Representative who prefers not to disappoint the applicant for such literature. Fortunately the figures I am able to submit herewith showing the business transacted by our sales department indicate that the number of Americans who prefer the purchase of documents at modest prices to bothering Members at Washington is steadily growing in number.

While discussing the subject of inability, not to speak of inadvisability, of the Government supplying free its excellent reading matter to all applicants, it may be in order to refer to the publishing activity of the Department of Agriculture. It is a generally accepted fact that the farmers of the land have been wonderfully aided not only by the personal efforts of experts, but through the publications treating of the various matters that come under the heading "Farmers' bulletins," which emanate in generous volume from the department. Congress annually seconds the activity of this department, so near to the tiller of the soil, by robust appropriation for printing. But it does not begin to meet the demand for these instructive and even to the general reader interesting pamphlets.

Those who apply early, being aided perhaps by living near the seat of government, obtain what they write for from the department. The appropriation does not admit of an unlimited supply. Hence the requests for a bulletin of more than ordinary interest are invariably in excess of the power of the Division of Publications of the department to supply, which causes later applicants to be referred to this office, which then only furnishes what is wanted by sale. That this is not calculated to please the buyer, who is aware that his borough or township neighbor obtained the same publication free, need hardly be emphasized.

The figures given in succeeding pages tell the same story of increase in our sales department that I have been able to give in every report submitted by the present head of this office. The efforts to bring about this result have been constant on our part. No avenue through which the value of Government publications could properly be brought to the attention of the appreciative public has been neglected. Believing firmly that hardly anything leaves the Government Printing Office that, if issued promptly while the subject is timely, would not find plenty of buyers, it seems to the writer only necessary that the method of obtaining public documents be made a matter of public knowledge. That has been the aim of the writer. That has been the reason why an appropriation for advertising purposes has been asked for once or twice. My predecessor, I understood, was granted a certain amount one year, and while his method of placing the announcements was not exactly the plan that an experienced newspaper man would have pursued, the expenditure proved in the main a wise investment, and it is to be regretted that no succeeding "following up," which is simply imperative in advertising, was authorized by Congress. Two years ago this office was authorized to indulge in what the publisher knows and thoroughly despises as "trade ads," and knowing what I did of this feeling, it was no surprise whatever to note that the proposition was treated with silent contempt by the publishers whose space would best have served our purpose. It would be the best of economy if a modest appropriation for advertising were allowed by Congress. Many thousands of dollars' worth of books are on our shelves, gathering dust and benefiting no one, that would be turned into cash money if the public could be made aware of their existence and the modest price at which we sell. Surely this is better than finally to condemn them and sell them to the paper mill at less than a cent a pound. One single year's experiment of advertising is all that we might find it necessary to urge. The result would secure future appropriations without any difficulty.

While we have here many publications that take up room and can not be moved because those who would be glad to buy them know not of their existence, many publications are sent free to unwilling recipients. I refer to many designated depository libraries whose locality perhaps makes undesirable a certain class of books, whose accommodations may be insufficient to comply with the requirement that all publications thus sent from here be properly taken care of and made accessible. It has heretofore been the rigid requirement of this office that such libraries must take and make accessible, as just explained, all that we send them; if not, that they should be deprived of the privilege. The present superintendent has so far acquiesced in silence in this construction of the law. However, after due reflection

I decline to do so longer. It will be expected that all publications sent to such libraries receive the attention the contract has implied, but hereafter if any librarian requests that certain publications, or any certain class of publications, be no longer sent, that request will, subject to your approval, be favorably acted upon. It is morally certain that a considerable proportion of designated libraries are this very day in a condition that makes it impossible for them to comply with requirements heretofore insisted upon by this office—a fact which the “thorough investigation” of libraries which the law makes mandatory, but which Congress has never made possible by appropriating the necessary expenses, would have disclosed long ago.

The requirement alluded to in the foregoing paragraph was to carry out the idea on which the creation of designated libraries was based. That idea was to make them for all time the repository of governmental history, as recorded on the printed page. But this very idea was defeated at the outset by the manner of selecting these libraries. Each Senator and each Representative could select one, the only condition being that a selection was made at the beginning of a Congress. After such selection at the beginning of one Congress the law did not forbid dropping the favored library at the beginning of a subsequent Congress. Aside from this it would happen every 10 years, when States were redistricted, that a Representative would find two designated libraries within his district, and he was confronted with the unpleasant duty of dropping one or the other. All of which proved that while the “permanent repository” idea looked all right in theory, it failed to work out practically. Hence the common sense of the average man seems to approve of sending libraries what they can properly use and what they want, but relieve them of what they can not. It will save money at both ends. It will stop waste at both ends.

The figures showing the receipts and the outgo of publications through this office may at first glance convey the idea that much is printed that finds no market. Closer consideration of the subject should largely moderate that impression. Tens of thousands of the publications that drift in here have but a temporal mission. They have served in their day and generation. They have served their purpose. Possibly thousands have perused many volumes you may observe in the “dump.” They have fulfilled their mission, and it is entirely proper that they should go back to the paper mill to emerge as the virgin page on which other instructive matter is to be presented to the appreciative eye. Even yesterday’s newspaper is not preserved. Last year’s almanac is certainly not. Why, then, should ill-informed people deplore the “waste of public printing,” because obsolete publications are not permitted longer to absorb storage room?

Year by year the departments find that the operations of this office best relieve them of a mass of detail that they should not be bothered with. Last year the Secretary of the Treasury relieved his department of the promiscuous distribution of Treasury Decisions and Reappraisement Circulars, and those interested now pay for them an annual subscription price. There is certainly no reason why they should not, comprising as they do a prosperous class of citizens. Of late the Interstate Commerce Commission refers all interested in its decisions, opinions, and the like to this office as the source of supply.

Railroad companies, large shippers, and the like are the patrons in this case. No reason in the world why they should not pay the cost of the printing that interests them. A very simple method of transacting business with them has been devised here. They indicate at the outset what class of publications they want, and how many copies of each issue are to be sent. And as our rule is "Cash before mailing," a deposit is made against which charges are entered. A quarterly statement of account completes the *modus operandi*.

In the report I had the honor to submit to you last year reference was made to the gratifying progress on the valuable publication known as the Check List. It covers the 120 years ending 1909, and its appearance since my last report has been hailed with loud acclaim by the library world. A work of this kind demands accuracy as the first consideration, and it is extremely gratifying to this office that close examination by those most competent to judge approves of the work as eminently satisfactory on this point. Years of patient and intelligent toil have been expended on this remarkable publication, and while the superintendent has been warmly commended by many correspondents for the excellence of the production, he must decline to wear laurels that in the main belong to one of the faithful workers whose reputation stands high with librarians from Maine to California. Miss Mary A. Hartwell is the lady on whose shoulders has rested for years the responsibility of compiling a record that should embrace nearly a century and a quarter, that should be able to receive approval as a correct production from the only jury competent to give a verdict worth having—the leading librarians of the land—and it has been a great gratification to this office that her brightest hopes for the success of her years of toil have found fruition.

Still another publication that was far behind when I assumed charge of this office is the subject of earnest endeavor. I refer to the Document Catalogue. That for the Sixty-first Congress is now being compiled for the printer by the catalogue section of this office. Copy will go to the Printing Office before the close of the fiscal year. Then we shall begin on the compilation of the Document Catalogue for the present Congress, and then, for the first time for many years, we may justly claim to have caught up with its work. The reasons why so long a period of time antedated its record by this division it would be unprofitable to recite. Suffice it to say, that the force employed here has been both diligent and painstaking, and quite as eager as their chief to catch up with the work assigned us.

The concentration of mailing public documents that are distributed by the issuing offices to the public has long been urged as a measure of economy, and the late session of Congress saw legislation enacted that has made a fact what so many have urged for years. At this writing the people assigned to this division for the task have just begun operations, and it is too early to give you an idea as to how large a force will be needed for the regular transaction of this work. That it will require a less number than have heretofore been engaged in such work in the different departments admits of no doubt, and that the concentration will result in a large annual saving to the Government will speedily be demonstrated. A temporary organization of the people employed on this work has been effected, and as soon as the accumulation of requests temporarily held up by the departments from the time the transfer of mailing lists and appliances

was begun until the date—October 1—when this office began operations has been disposed of, it will be possible to determine how large a force will be needed for the regular transaction of this business. By having all this work done at the Government Printing Office much hauling to the issuing offices will be avoided, and the usual economies attending the concentration of many smaller agencies into a central establishment will be experienced. I am greatly gratified because of the cordial cooperation of the different departments in carrying the mandatory order of Congress into execution, and by the time this report is presented to Congress I doubt not that everything connected with the business will work smoothly and satisfactorily. It may be permissible here to observe that a personal inspection of the mailing operation on our premises will emphasize all that has been said as to the remarkable prodigality of our Government in the matter of supplying free reading matter, and will possibly give impetus to the efforts of those who oppose giving to a portion of our people reading matter that a larger proportion is compelled to purchase.

Frequently comparison is made, in and out of Congress, of the salaries paid by the Government with those received in private employ. It would seem equally fair to compare the salaries received by the employees of this division with the salaries paid for work of the same class in the executive departments. Such comparison, if made, would back up every plea that I have ever made for more liberal salary appropriation for the force here employed. Three clerks whose duties here call for a knowledge of stenography receive only \$60 per month. Several other clerks, doing responsible work, receive no more. And the number of other employees whose duties call for capacity that in the departments receives more liberal financial recognition is quite large. May I not ask of you to urge upon the Committee of Appropriations a kind consideration of this plea? It will not only be fair, but it will be true economy in its best sense to pay people according to merit.

In closing this report I take occasion to submit a comparative statement that will show the operations of this division, as compared with the business done during the fiscal year preceding my taking charge:

Cash sales during the last fiscal year.....	\$107, 888. 82
Cash sales during the fiscal year ending June 30, 1909.....	68, 811. 54
Increase of cash sales last year.....	39, 077. 28

The number of people employed to transact the smaller volume of business was 112. The number now employed, which have handled considerably more than 50 per cent increase of business, is 98. These facts are too eloquent to need any further statement from me. They certainly attest that the men and women employed in the Public Documents Division are faithful and efficient workers.

Very respectfully,

AUGUST DONATH,
Superintendent of Documents.

HON. SAMUEL B. DONNELLY,
Public Printer.
