OFFICE OF
THE PUBLIC PRINTER
WASHINGTON

December 3, 1906.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1906.

Very respectfully,

CHAS. A. STILLINGS,
Public Printer.

The PRESIDENT OF THE SENATE.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 3, 1906.

TO THE SENATE AND HOUSE OF REPRESENTATIVES :

I have the honor to transmit herewith the report of the operations of this Office for the fiscal year ended June 30, 1906, seven months of which were under my direction.

In assuming charge of the Government Printing Office on November 28, 1905, I found a somewhat different condition of affairs from that prevailing in the average large commercial printing and binding establishment.

The requirements of the public printing and binding are, in the majority of cases, similar to those of the consuming public, although in many instances radically different from any existing conditions elsewhere.

The equipment of the Office, though remarkably good, was susceptible of change and improvement in certain divisions, but as a whole will compare very favorably with that of other large concerns doing similar work.

The personnel of the force, in the main, was found to be efficient, but owing to lax discipline and the absence of intelligent and cooperative systematizing, the product per capita was not what it should have been. This statement does not apply to the employees as a whole, but rather to that undesirable portion of the force which was being carried by the competent employees.

The gradual elimination of this element is raising the standard of the individual product without necessarily insisting upon securing more work from the individual than could properly be expected of high-grade employees, well paid and supplied with every reasonable convenience to enable them to perform their duties in the best possible manner.

To enable the Public Printer and his principal officers to take quick and intelligent action upon the many perplexing propositions continually being presented, the reorganization of the official force was found to be necessary. This task, involving in some cases the selection of competent individuals to supervise the work of the various divisions, is necessarily one requiring careful consideration and time for its completion. At the present writing only the more important positions have been permanently filled.

The methods for the purchase of equipment, material, and supplies, though safeguarded at many points, were unprotected at others, while the manner of receiving and inspecting the material and supplies and

the distribution of the same to the various divisions of the Office was unsystematic, resulting in great waste and the compilation of unreliable records.

In order that the affairs of the Government Printing Office might be administered in as creditable a manner as are those in well-organized corporations, and to enable the Public Printer to render intelligent reports to Congress, legislation has recently been secured authorizing the installation of cost, audit, and inventory systems, which will secure to the Office an organization commensurate with the growth of and improvement in public printing and binding.

The work of reorganization and systematizing has already been started, and will require several months to complete.

Until the Office is reorganized and accurate (not theoretical) data is obtainable, I do not feel warranted in presenting to Congress such comparative data as has been available up to this time.

The first session of the Fifty-ninth Congress just closed required a larger amount of Congressional printing (as regards bills, documents, and Congressional Record) than the entire three sessions of the Fifty-eighth Congress combined.

This increased volume of business was produced by the same force of employees—as regards personnel and number—as has been, in previous years, specially assigned for Congressional work; full credit is due them for the remarkably prompt and effective service rendered, and may be taken as an indication that when the Office is completely readjusted upon a normal basis the quality and quantity of its output, together with the cost of the same, will compare very favorably, indeed, with that of the leading printing and binding establishments in the United States.

I respectfully recommend that the following matters receive attention during the coming session of Congress:

Provision should be made whereby the purchases of equipment, material, and supplies by the Public Printer may be supervised and restricted within a reasonable financial limit, by methods as carefully safeguarded as those now existing in relation to the purchase of papers, etc.; and that the Joint Committee on Printing be instructed to take up this matter with a view to securing legislation covering the same. This action is necessary, not only as a protection to the Government, but in justice to the Government Printing Office and to the Public Printer.

A revision of the present printing law should be undertaken at an early date with a view to meeting existing conditions. While this law, with its many amendments, is at present inadequate, it has in past years met the requirements of the service; it is at present lax in many places and unnecessarily restrictive in others. A careful and intelligent revision will, I am quite sure, be productive of increased benefit to the

Government, and will enable this Office to advance more rapidly to that high plane upon which it properly belongs.

The condition of the old Government Printing Office building, situate immediately adjacent to the new building, is a matter of some concern, not only because of its nonfireproof construction, but from the fact that its strength will not permit of the storage of the immense number of Government documents now on hand with that degree of safety or efficiency which is required for material of that nature.

Arrangements are being made for the transfer of such mechanical forces as are now installed in the old building, thus leaving it entirely for the storage of documents on the second, third, and fourth floors, and for a certain portion of paper, leather, and other supplies on the ground floor and in the basement.

While the use of this building may be continued for a limited period for the purposes of storage alone, it is nevertheless a menace to the safety of the new building and to the surrounding property. In case of fire, especially with a strong north wind, it would be most difficult to save the new building from serious injury, with always the possibility of its being gutted by fire, destroying the contents, if not very materially injuring the new building itself.

It is only a question of time when the increase in the demand for Government documents will require an additional new building, to replace the present old building, to enable the distribution and sale of public documents to be handled in a proper manner.

The old building should be razed to the ground and the material sold to the highest bidder; a new building should be erected, thoroughly modern and fireproof in its construction. Should this be accomplished, there could very readily be established an improved method of delivering the product of the Office by preparing it wholly at this Office for shipment directly to ultimate destinations, instead of delivering at Departments and bureaus with the necessity for further handling and consequent additional expense.

While this plan is being carried out in a limited way at present for one or two bureaus, and may be still further extended with the present facilities, the expense of doing the same and the general unsatisfactory equipment leads me to recommend that serious consideration be given to this proposition at an early date.

The rapid development of the pneumatic-tube service in large business centers is a matter which could be profitably investigated by Congress, with a view to similar installation between the United States Capitol and the Government Printing Office, with provision for extensions to the Executive Departments and bureaus, should the service prove to be efficient and desirable. The time is nearing when the present method of delivery of the product of this Office should be modernized, either by

the use of power vehicles or by pneumatic tubes; the stable maintenance of this Office would then be very materially reduced if not wholly done away with, and the messenger service would be reduced fully one-half, especially during the sessions of Congress. These expenses are of minor consideration, however, compared with the improved service which pneumatic tubes should render if properly installed and operated.

Particular attention is called to the report of the Superintendent of Documents, who is engaged in the needed reorganization of the public document division of this Office on a basis which will enable the public to secure information, purchase documents, and to receive that high grade of service to which it is properly entitled.

The following are the statements accompanying the report :

No. 1. Financial statement of the business of the Government Printing Office for the fiscal year ended June 30, 1906, and the condition of the appropriations July 1, 1906.

TWELFTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS, FOR FISCAL YEAR ENDED JUNE 30, 1906

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,

Washington, D. C., August 15, 1906.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1897, I have the honor to submit the twelfth annual report of the Superintendent of Documents, covering the period from July 1, 1905, to June 30, 1906.

Owing to the conditions prevailing when by your direction I assumed charge of this office, on February 8, 1906, it was necessary for me to adopt at once new methods of filing and accounting, that the future records of the office might be found accessible and accurate. The adoption of these new methods in the midst of a year accounts for this report being in two parts; the first covering the seven months and seven days of my predecessor's incumbency, the remaining four months and twenty-one days being under my jurisdiction.

A general recapitulation of the statistical matter which forms the bulk of this report is as follows:

Publications received, distributed, and sold during fiscal year ended June 30, 1906.

Publications on hand July 1, 1905.....	1, 051, 107
Publications received July 1, 1905, to June 30, 1906.....	1, 147, 909
	2, 199, 016
Publications distributed and sold July 1, 1905, to June 30, 1906.....	897, 321
	1, 301, 690

Cash statement for fiscal year ended June 30, 1906.

DEBIT.

Cash on hand July 1, 1905.....	\$59. 55
Cash received July 1, 1905, to June 30, 1906.....	17, 597. 50

FUNCTIONS OF THE OFFICE.

There is a widespread misunderstanding relative to the functions of this office, which militates against its usefulness. Its duties are very diverse. It is the clearing house for Government publications, carrying on an enormous exchange business with libraries, educational institutions, and Members of Congress, and in this way doing something toward remedying the absurd and illogical distribution of public documents now sanctioned by law. Through this method of exchange hundreds of libraries have been supplied with publications greatly needed in their respective localities in exchange for those which were either duplicates or of no service to them.

It compiles the official catalogues of the United States Government, a task requiring a large force of experts, and one made uselessly expensive by the inconsistent demands of the printing law, which imposes duties requiring the duplication of work, thus confusing an already confused problem.

It distributes the publications supplied for State and Territorial libraries and designated depositories, now numbering 483, and also sends the publications of the Geological Survey to 1,440 libraries entitled by law to receive them.

These duties alone are sufficient to occupy the attention of a large force, but added to all this the office is constituted by law the sales office for all Government publications with but few exceptions. In this capacity it assumes the position of a retail book shop and receives daily, from all parts of this country and many foreign lands, orders for books new and old, averaging at present about \$80 per day. These orders are mainly for 5 or 10 cent pamphlets on agricultural and scientific subjects, and must be promptly and carefully filled. The accounting for these small sales and keeping track of the many thousands of titles is a task appreciable only by those who have been engaged in similar work.

Nor does the list of duties stop here. The compiling of price lists and library reference lists, special tables, bibliographies, and check lists is also a feature. Hundreds of letters are received daily and a large proportion contain requests for information upon certain subjects, or how or where to obtain books relating thereto, and great care is taken and no labor spared in supplying full and accurate information.

OFFICE PUBLICATIONS.

The publications prepared and issued by this office during the fiscal year are as follows:

	Pages.
Eleventh Annual Report of the Superintendent of Documents, 1905.....	43
Document Catalogue (Comprehensive Index) of Fifty-seventh Congress, 1901-1903.....	1264
Document Index (Consolidated Index), Fifty-eighth Congress, third session..	343
List of Documents Available for Distribution to Libraries, July 1, 1905.....	69
Monthly Catalogues, June, 1905, to May, 1906, omitting the monthly cumulative indexes.....	565
Rules Governing Sale of Public Documents.....	I

The Document Catalogue (Comprehensive Index) of the Fifty-eighth Congress, and the Document Index (Consolidated Index), Fifty-ninth Congress, first session, are prepared in part.

The catalogue and index section received 22,664 documents, 52,619 pieces of Congressional mail, wrote 96,035 cards, prepared, edited, and supervised the publication of the Document Catalogue, Document Index, and monthly catalogues in the foregoing list, and supplied indexes for several volumes of documents.

THE CATALOGUES.

Every large publisher issues catalogues. As the publisher of Government publications, this office is certainly the logical one to prepare the official catalogues. That

it is doing so to the satisfaction of those interested in public documents is evident, but that it is accomplishing this result in the most thorough and, at the same time, most economical way is a question.

A careful perusal of the sections of the printing law which state the requirements relative to cataloguing and indexing reveal the facts that a monthly priced catalogue, a yearly "comprehensive index," and a sessional "consolidated index" are desired.

That a "comprehensive index" could be made to answer all purposes as a permanent record and do away with the necessity of a "consolidated index" is now certain, and that a simple priced list, issued monthly, noting the publications printed and giving information regarding their contents and how to procure them, is all that was intended to be compiled under the title of a "monthly catalogue" is also true.

With an overworked catalogue force and the publications necessarily many months behind, it seemed advisable to employ, in the absence of legislation, such methods as would avoid duplication and at the same time provide as usable publications as possible for the aid of inquirers.

The first step in this reform was the omission of the cumulative index for the monthly catalogue, thus making it what I believe the law intended it to be—a priced list of available publications, issued as promptly as possible; not a reference work for future use, but a book list or notice for immediate information.

The time saved upon this catalogue by simplifying its form and omitting the index will be expended in bringing out the "Document Catalogue" as promptly as possible, and in making it "comprehensive" in the fullest sense of the word.

Some librarians, not realizing the distinction we had in mind between a reference catalogue and a book list, have complained, but the general opinion has been favorable to the change under the circumstances.

The lists of books shipped to depository libraries, which were also a feature of the old monthly catalogue, have been omitted, and in their stead carefully prepared invoices will be forwarded with each shipment.

I am convinced that the subject of public document cataloguing needs careful investigation and shall give it attention when possible.

LIBRARY ADDITIONS.

As soon as the arranging of stock is begun it is expected that many valuable old publications will be found to add to the library.

The additions for the year, as also the totals for each publishing department and the grand total of books and maps in the library, are shown in the following table:

Grand total	82,449		7,409	

In this connection I would recommend that at as early a date as possible provision be made for the housing of this valuable library in a fireproof building.

This would, of course, necessitate the removal also of the entire catalogue and sales forces to the same building, as our most pressing need is that the library be more accessible to these employees. Under the new stock system close connection between the library and the sales section will be even more necessary, for much information which is now obtainable from the stock bins will then have to be secured in the library.

It should be here repeated that this collection, the most complete in the world of United States Government publications, has never cost the Government one cent; that it is in no sense an added and useless expense, but the most useful working tool this Office possesses, and that the expenditure of some \$2,800 a year for its maintenance is a necessary and profitable investment.

It has been suggested that, in the interests of economy, this collection should be transferred to the Library of Congress. That those voicing this idea had no conception of the position the library holds in the working plan of the entire Office is evident. To separate the Office from its reference library would make the accomplishment of its routine work as difficult as to steer a ship to port without a rudder.

THE STOCK AND AN INVENTORY.

The vast accumulation of books, which is ever increasing, will be classified and a complete inventory made. This task seems at present almost impossible of accomplishment, but can be successfully undertaken as soon as the inventory scheme, upon which I am now at work, is sufficiently developed to apply to this mass of unassorted books.

Of the 1,301,695 books reported as on hand, not over one-sixth are arranged so as to be accessible for distribution, resulting in the loss of many sales by not being able to locate the books, though we feel reasonably certain "there are some in stock somewhere."

At present I can say but little about either the stock or the system which I feel confident will collate it. It is a self-posting inventory scheme, based on the book as the unit, and will not only present a perpetual inventory of the stock on hand,

but also give the statistics of the sales of the various publications for any stated period. The details are now being worked out and will be submitted for your approval sometime in the near future.

SALES.

In every department of the office the work has rapidly increased in the past year. The sales are steadily advancing, even though no especial effort has as yet been put forth to augment them.

It is certain that when up-to-date business methods have been inaugurated and we feel free to undertake the added business which proper advertising will surely bring, and when we complete the organization of a publicity section and endeavor systematically to place Government documents before the public, a large increase in the receipts of this office will be manifest.

CORRESPONDENCE AND INFORMATION.

It will be necessary in the near future to organize a special information division in connection with the Public Documents Library, and it will, I am sure, with the facilities afforded by the library, prove of inestimable value to those seeking information on public documents.

The daily mail is constantly increasing, bringing not only orders for publications of all kinds, but inquiries covering nearly every phase of thought. These orders are carefully considered, and every effort is made to procure the desired volume, if it is not in our stock.

As to the questions: much time is spent in reference work, and not only is the information asked for supplied, but many valuable publications on the subjects are listed and directions given as to where they may be consulted. This reference work is no small part of the functions of this office, and is destined, I feel sure, to be of larger proportions and greater utility. The desire of the office is to supply the public, not only with the public documents they desire, but also with information concerning those of which they may never have heard.

If it is not extravagant to spend several million dollars each year in manufacturing books, it would certainly not be a waste of money to invest a few thousand dollars in informing the people of what has been published. I sincerely hope some action may be taken by Congress to supply funds for advertising purposes, that attractive press notices and advertisements may be inserted in the various scientific journals and special publications.

DISTRIBUTION OF CATALOGUE CARDS.

Soon after taking charge of the affairs of this office I discontinued the sending of printed catalogue cards to the depository libraries. There being no specific law on the subject, and the libraries expressing much dissatisfaction at not receiving more than one card, it was thought best to discontinue this distribution for the time being at least.

This work is being partly accomplished by the card section of the Library of Congress, but the field of that section is so broad that it does not feel impelled to give the subject of Government publications as thorough attention as it deserves. Perhaps sometime in the future this office may be able to resume this card work.

PRICE LISTS.

As soon as the stock is in order we will resume the issue of price lists upon various popular subjects, and circulate them freely to those who may be interested. No

general price list has been issued by the office since No. 9, of April 27, 1905. The condition of the stock is such that no one can tell what it would be safe to include in a price list, as there is no way of determining how many copies of any one publication we have, and very little hope of finding them again if once lost sight of.

THE NEW CHECK LIST.

It had been confidently expected that a new and more elaborate edition of the "Check list" would have been issued before this time, but the thorough reorganization of the office, which is now in progress, has necessarily delayed work on this publication, and it is doubtful now if anything will be attempted until after the completion of the stock taking, which will continue for some months.

REORGANIZATION.

In order that this office may develop into the general distribution and sales agency of United States Government publications, which the law establishing it contemplated, it must be reorganized along the most approved business lines. The duties of each and every employee must be definitely defined and assigned and all superfluous red tape eliminated. The preparations for such a radical move are now being made, and I trust an organization of the diversified work of this office may be accomplished which will prove eminently satisfactory.

CONCLUSION.

In closing this report I wish to express my sincere thanks to the members of the office force, who have labored early and late in an endeavor to bring some kind of system out of the chaos in which unpardonable carelessness and lack of system had involved the records of this office. Whatever the good results may be of our present strenuous efforts, the bulk of the praise will be due to these faithful employees.

Through the generous cooperation and encouraging confidence which you have given me, as well as through your excellent advice, I have incurred a debt which only whole-hearted endeavor can recompense. By such endeavor I trust I may be privileged to express my appreciation.

Very respectfully,

WILLIAM L. POST,
Superintendent of Documents.

Hon. CHARLES A. STILLINGS,
Public Printer.
