LETTER OF TRANSMITTAL.

OFFICE OF THE PUBLIC PRINTER,
Washington, December 4, 1916.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1916.

Very respectfully,

CORNELIUS FORD,
Public Printer.

The PRESIDENT OF THE SENATE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 4, 1916.

To the Senate and House of Representatives:

The report of the transactions of the Government Printing Office for the fiscal year ended June 30, 1916, as herewith presented, contains all the statistical information required by law, and also such other information as is deemed necessary in order that the complete operations of the office during the year may be properly presented.

The total appropriations for salaries, maintenance, and operation for the Government Printing Office, including deficiency appropriations made prior to June 30, 1916, were \$5,673,337.59. Of this amount the sum of \$327,395 was appropriated for the operation and maintenance of the office of the superintendent of documents. The sum of \$5,345,942.59 of the total appropriation was therefore available for the production of public printing and binding for Congress and the departments, according to allotment.

Printing and binding to the extent of \$874,022.27 was executed for Congress and the departments, chargeable to appropriations other than those constituting the regular allotments; \$49,726.96 of this amount was not transferred upon the books of the Treasury prior to June 30, 1916, although a greater part of it had been audited and reported to the Treasury for transfer.

The total disbursements and outstanding obligations chargeable against the 1916 appropriations were \$6,530,054.12, leaving an unexpended balance of \$27,910.41 to the credit of the several appropriations as of date. The unexpended balance of \$27,910.41 was composed of the following items: Statutory salaries, office of the Public Printer, \$3,800.04; leaves of absence, \$372; salaries, office of the superintendent of documents, \$3,608.48; general expense, office of the superintendent of documents, \$13,168.88; printing and binding, \$11,915.15.

The total expenditures for maintenance, operation, and general expenses of the Government Printing Office, not including the expenditures of the office of the superintendent of documents, were \$6,214,482.34.

WORK OF THE FISCAL YEARS 1914, 1915, AND 1916.

The following comparative statement is a summary of the productive operations during the fiscal years 1914, 1915, and 1916, and covers the most important items which enter into printing and binding:

EXPENSE AND PRODUCTION.

The summary of expense and production for the fiscal year (facing p. 4) shows in detail the various items which go to make up the operating expense of each productive division, the value of product, the overhead expense, and the manner in which it is distributed, and the amount of work performed for Congress, departments, and independent bureaus, together with the condition of each printing and binding allotment at close of the fiscal year.

The total overhead expense increased \$74,551.33 over previous year; as this included an increase of \$83,329.71 in productive machinery and equipment drawn from stores by various divisions, and a slight increase in leave and holiday pay, it can be seen that expenses of nonproductive divisions actually decreased about \$11,000. In addition, the cost of heat, light, and power furnished by this office

to city post office amounted to \$23,034.01. This is an expense borne by this office without reimbursement and which, as provided by law, can not be apportioned in charges for work performed, and therefore is a dead weight.

The cost of private orders placed by Members of Congress and others during the year amounted to \$81,885.38; collections for such work are turned into the Treasury as a credit to miscellaneous receipts, as required by law. This cost represented an expenditure out of the regular appropriation for printing and binding which was not chargeable to any allotment and for which no reimbursement was made this office. The Public Printer is required by law to furnish Congress and departments and bureaus with printing and binding to the full amount of regular appropriations, and it becomes a hardship to be compelled to do this additional work and receive no reimbursement therefor. Moneys collected for such added work should become a credit to printing and binding appropriations.

Compared with previous year, the daily average number of employees on the roll decreased 66 and the daily average number of employees actually working decreased 43. Total cost of operation increased less than 1 per cent and charges for computed product decreased less than 1 per cent, exceeding cost of operation by 4 per cent, as compared with 5 per cent last year. If no decrease had been made in scale of prices for the year, computed charges would have exceeded previous year's total.

For the third consecutive year every productive division in the office operated without loss. It was only through close supervision, systematized production, and the faithful and efficient cooperation given by the employees that this desirable condition became possible.

Book composition amounted to 2,292,033,400 ems, which is a greater amount than is shown in any records covering previous years; over 99 per cent of this amount of type was machine set.

Pressroom equipment has been improved by the addition of 10 new and up-to-date presses and the discarding of an equal number of worn-out presses, with the result that, in comparison with previous year, approximately the same amount of work was produced in the press division at a decreased expense.

Production of money-order books increased 2 per cent. Contract price per book was reduced in December, 1915, and no increase has been made since that time, although the paper stock used on this work has advanced in price approximately 25 per cent.

Production of postal cards decreased very slightly—about 4,000,000. The Post Office Department makes direct purchases of roll stock for this work, and furnished this office with approximately 5,800 rolls during the year.

The demands on the Government Printing Office for work have been very heavy during the year, not only in current work for Congress and the departments and bureaus, but also in special work authorized by Congress, such as large editions of the Horse Book, the Cattle Book, the Report of the Industrial Relations Commission, etc.; the last-named report alone made some 40,000 folios of copy. All of this work was handled satisfactorily and without an increase in the force. The order on the Yearbook of the Agriculture Department was for 411,000 copies, and was completed and delivery made prior to June 30, several months in advance of the usual time.

BRANCH OFFICES.

The branch offices handled a very large amount of rush and emergency work for the departments in a satisfactory and expeditious manner. In the Library of Congress branch the printing section shows an increased output over previous year, notwithstanding the fact that very material reductions in charges for work in this section were made at different times during the year. Every effort was made to supply the Library of Congress with as much printing as possible, in view of their inadequate allotment. In the binding section of this branch the output was slightly less than in previous year, and the operating expense was also less. The State-War-Navy branch shows an increased output and a decreased operating expense. Of the total work of this branch, the State Department ordered 36 per cent, the War Department 39 per cent, and the Navy Department 25 per cent.

SCALE OF PRICES.

The scale of prices applied to work produced during the year carried a reduction of $2\frac{1}{2}$ per cent over the one in effect during the previous year, the reduction being made on such items as would give benefit uniformly to Congress and all departments. The cost of materials and supplies entering into printing and binding has increased so greatly that it may be necessary at a later date to increase the charges for some classes of work. However, this will not be done unless it becomes absolutely necessary, as it is proposed to furnish the full limit of printing and binding possible under the appropriations. The advance in paper prices is bound to make big inroads on the various allotments for 1917, and unless conditions in paper trade become more favorable Congress and the departments can not be provided the usual quantities of printing and binding without securing a deficiency appropriation. It has been necessary to raise the prices on speeches ordered and paid for by Members of Congress, on account of an increase of approximately 100 per cent in cost of stock used.

PAPER.

The abnormal conditions surrounding the paper industry confronted this office and the same difficulties were encountered that met printing plants throughout the country. An acute situation arose. Manufacturers of paper apparently were not anxious for the business of the Government, possibly in a degree due to the stringent specifications adopted by the Government. Under normal conditions this office has had no trouble in getting stock complying strictly with the specifications, but when it is considered that shipments of thousands of pounds of paper were possible of rejection by not being up to standard, either in fiber, weight, color, finish, or tensile strength, the reasons for the failure of many paper concerns to bid are explainable.

Owing to the failure or reluctance of paper manufacturers to enter into contract, the Public Printer was compelled to go into the open market to secure paper for the public printing. In several cases the Public Printer personally called upon manufacturers, who evidenced a very friendly spirit; when the difficulties of the situation were explained to them fair and courteous treatment was accorded such requests as were made on behalf of the Government, and prices eminently fair and reasonable—under existing conditions—were obtained.

With the exception of a few orders where certain paper was desired by departments we have to date, despite the many difficulties encountered, met all demands made upon this office.

NEW MACHINERY AND EQUIPMENT.

New equipment purchased last year, together with some ordered in the year covered by this report, has been installed and is now in operation. There is no doubt that the best interests of the Government are served by keeping our equipment up-to-date, the initial cost of new machines being saved in a short time. The following are the principal purchases of machinery and equipment during the year:

Machinery:

Galleys and clamps.....	838. 91
Typewriting machines (10).....	535. 00
Time stamps (4).....	200. 00

The sale of condemned machinery, equipment, and material during the year netted \$2,264.45, and this amount was deposited in the Treasury as a credit to miscellaneous receipts.

BUILDINGS AND PLANT.

The new fire-alarm and watchman's patrol system has been completely installed and is now in full operation. This system cost \$9,140, exclusive of cost of installation, which was done by our electrical section at a cost of \$6,490.93. It provides the office with a complete and satisfactory fire-alarm equipment, and all of the buildings are adequately protected, each floor having two or more patrol boxes so connected up that watchmen may report any trouble and receive assistance within a very short time. This system also provides direct communication with city fire department headquarters. Taken altogether, it is a very decided improvement toward insuring the safety of buildings.

The need of a larger metal-melting room became urgent, not only on account of lack of space, but because I was convinced the health of certain employees was endangered by smoke and gases which, in spite of all efforts, passed through some of the workrooms, and a new and larger room was constructed in areaway over the blacksmith shop. This room is 36 by 26 feet, 22 feet high, and was designed and built entirely by employees of this office at a cost of \$2,152.66. The equipment, lighting, and ventilation is excellent, and smoke and gases are now carried off in such a way as not to annoy employees in the building. Between 650,000 and 700,000 pounds of metal will be handled in this room each year. Waste metals, which up to this time have been disposed of as dross, will now be refined in this metal room, and a considerable saving is anticipated. Efforts are being

constantly made to keep down the stock of old plates on hand and thus avoid extensive purchases of new metals; departments are cooperating in this matter by authorizing the destruction of numerous plates on publications which they deem no longer of particular value.

The laundry equipment, formerly located in a small room in the basement, was moved to a new room specially prepared in the old building at a cost of \$624.75. The laundry is now modern and sanitary, and is prepared to render prompt and efficient service. An average of 3,500 towels are laundered each day.

Water and steam pipes leading to the foundry were renewed in order to secure a proper pressure; this work cost \$1,343.11.

Washbasins, toilets, and shower baths were installed in boiler room at a cost of \$665.48. This was a very necessary step toward improvement of working conditions in that part of the office.

The carpenter and paint shop produced a very considerable amount of work, including 19,369 packing boxes for use in postal-card shipments, costing \$4,290.96, and 1,850 mail-sack boards for division of public documents, costing \$575. All necessary furniture, racks, and shelving for use in the various divisions was made at a cost of \$1,762.35. The total of all lumber used was 323,600 feet, of which 254,000 was reclaimed from old boxes, furniture, etc., at an estimated saving of \$12,000 over cost of new lumber. Painting in various parts of the buildings cost \$1,563.18.

Numerous changes were made in the lighting system, all with the view of improvement to the service, at a cost of \$3,327.07. The entire office is now excellently lighted.

Considerable repairs to plastering became necessary by reason of the constant vibration caused by machinery. This work cost \$3,069.43.

The buildings division, charged with the upkeep of plant and equipment, handled approximately 42,500 repair jobs during the year. A large portion of these repairs were on productive machinery, and a decided economy and also a saving in productive time became possible by having these repairs done by our own employees, whose services are available at a moment's notice.

POWER PLANT.

Many necessary improvements in the power plant have been completed during the year, and there is now a full duplicate equipment. The boiler-room outfit is good, with the exception that the old boilers in use are hand fired, and we are thus compelled to use anthracite coal, instead of bituminous coal, as is used in new boilers. I am convinced it would be an economy of about \$10,000 each year to install four more boilers of the same type as present new boilers, complete with automatic stokers, piping, and coal and ash handling machinery. This new equipment would cost approximately \$120,000, and a

specific appropriation would be necessary. The output of the electric power plant was 3,710,948 kilowatt hours, costing 1.189 cents per kilowatt hour. Total cost of operation for entire power plant was \$106,581.77, a reduction of about \$6,000 over previous year.

MISCELLANEOUS.

During the year 3,197 medical and surgical cases were treated in the emergency hospital, in addition to 1,288 redressings of wounds in cases where employees remained at work after being injured and did not apply for compensation. The amount expended for compensation for injuries, as provided by employer's liability act, was about \$3,000, a considerable decrease over previous year. This is a very small expense when considering the vast amount of machinery in operation and the large number of employees who are in daily contact with conditions which render injuries possible, and the logical conclusion is that the reduced number of injuries is due entirely to the numerous safety devices recently installed throughout the office and also to stringent preventive regulations promulgated by the Public Printer and strictly enforced.

The presses used for printing the Congressional Record have been practically rebuilt by our own machinists, at a cost of approximately \$1,900, and are now in excellent condition. New presses would have cost at least \$40,000, and for that reason I decided upon the rebuilding by our own employees.

During the year 3,102 composition rollers and 22,636 pounds of ink, for use in pressroom, were made in the office. A considerable saving, both in cost and productive time, is possible by having these supplies produced on the premises.

Considerable new machinery has been placed in operation during the year, but much yet remains to be done if the office is to be put on the highest basis of efficiency. I am convinced that the installation of offset presses and a photomechanical process for preparation of plates would be a step in the line of progress which this office eventually must take. This equipment would cost approximately \$80,000, and would enable us to produce large quantities of work at a greatly reduced cost. Between 6,000 and 8,000 square feet of floor space would be required for the offset presses and photomechanical equipment, and this space is not available under present conditions, therefore no definite steps have as yet been taken.

PUBLIC DOCUMENTS.

The distribution of public documents continued to increase in volume, and the business for the fiscal year shows an increase over any year on record. The number of letters received was 304,341, as compared with 256,409 in previous year; the number of publications distributed was approximately 47,000,000, as compared with 35,000,000 in previous year, and the total of cash receipts was \$195,507.79, as compared with \$155,092.30 in previous year. The increase in business indicates that the public appreciates the efforts of the Government to place interesting and instructive publications at their service at a nominal cost price. Some newspapers and magazines have established service departments which give publicity to these efforts, and many sales can be traced to this source. The system of selling coupons and later redeeming them with publications is a simple, convenient, and safe business plan, and has met with favor by the public.

The distribution of publications to designated and nondesignated depository libraries increased over previous year, and it is apparent that some provision should be made for a larger distribution, especially to the nondesignated libraries, as the demand for governmental publications is increasing rapidly and should be met. The assorting and disposing of accumulated publications is practically up to date. Large quantities of old books and pamphlets are received daily from departments and bureaus, and disposed of to the best advantage; many of these publications are not needed for stock, and are therefore of no value except as junk. The large volume of business transacted taxed to the utmost the resources and efficiency of the force, and it was only through the workings of a very thorough system that the business for the year was carried on under the appropriation granted.

RECOMMENDATIONS.

I present for consideration the following:

The absolute need of a new building, to occupy the ground upon which the old building is at present located, is becoming more urgent every day. The condition of the old building is such that it can not be used to advantage for anything except storage, and even for such purpose it can be used only to a limited extent, for the reason that the walls and floors are not strong enough to support any great weight. This building has been condemned several times; many portions have been reinforced, the walls have been tied in order to prevent them falling out, and it requires constant and expensive watchfulness to keep the building in a fairly safe condition. It is built entirely of wood, excepting the exterior brick walls, and for this reason there is constant danger to life and property, for if fire should break out it does not seem possible that any of the old building could be saved, and it is doubtful that the new building could be entirely saved. The work of the office demands proper facilities for storage of paper and supplies, and room for installation of offset presses and the necessary photomechanical equipment; some of the productive divisions are now so crowded that their output is seriously interfered with, at a loss to the Government, and more room for these divisions is necessary. For these reasons, and for the general good of the service, I most earnestly and sincerely recommend that the question of a new building be seriously considered by Congress and some definite conclusion arrived at. It is estimated that a new building, to take the place of the present old building and to match the general design of the present office, would cost \$2,000,000.

The sidewalk around the old building on the H Street and North Capitol Street sides is in an extremely bad condition, and I recommend that the resurfacing of this sidewalk with concrete be authorized, at an estimated cost of \$1,900. As this walk will be outside the building line a separate appropriation will be necessary.

The annual allotment for printing and binding for the Patent Office is insufficient to carry the increasing volume of work for that bureau. In the month of June, 1916, it became necessary for me to order a suspension of some of the most important Patent Office publications, for the reason that the allotment was practically exhausted. Such action by the Public Printer becomes necessary under these conditions, but it very seriously interferes with the business administration of one of the most important bureaus of the Government, and also tends to disrupt for the time being the work organizations in some of the divisions in this office. The Patent Office is compelled every year to apply to Congress for a deficiency to carry its work through, but the deficiency granted is never large enough to fully accomplish

this purpose. For these reasons I recommend that bureau be given either a larger allotment or authority to pay for excess printing out of some other fund placed at their disposal.

The annual allotment for printing and binding for the Library of Congress is not large enough to allow all of the necessary work to be done. I am informed there are very large quantities of work, particularly binding and rebindings, ready to be started, but which can not be taken by this office for the reason that the allotment is insufficient. I recommend a larger allotment for the Library of Congress.

The amount of waste paper from the various departments and bureaus which is collected, baled, and sold by the Government Printing Office is increasing very rapidly, and has reached a point at which some relief should be given this office. The collections for the year amounted to 4,031,573 pounds, as compared with 3,500,000 pounds last year; indications are that it will continue to increase, and that the expense involved will be approximately \$12,000 each year. Under present conditions this expense must be carried as a part of the overhead expense of the Government Printing Office and prorated and charged to each piece of work produced for Congress and the departments and bureaus; this procedure does not appeal to me as being the proper one, as it goes to show an increase in overhead expense which is not actual, and reduces the amount of printing and binding in order that waste paper may be collected and baled. The present system was inaugurated July 1, 1913, in compliance with recommendations of the Commission on Economy and Efficiency and instructions from the White House. These instructions have never been construed as giving the Public Printer authority to make a charge for this service, although it would seem the cost is properly chargeable. I recommend definite authority be given whereby the departments and bureaus may be charged for the service on the basis of cost of collection per pound or per bag. The sale of waste paper during the year netted \$64,168.94, and this amount was deposited in the Treasury as a credit to miscellaneous receipts.

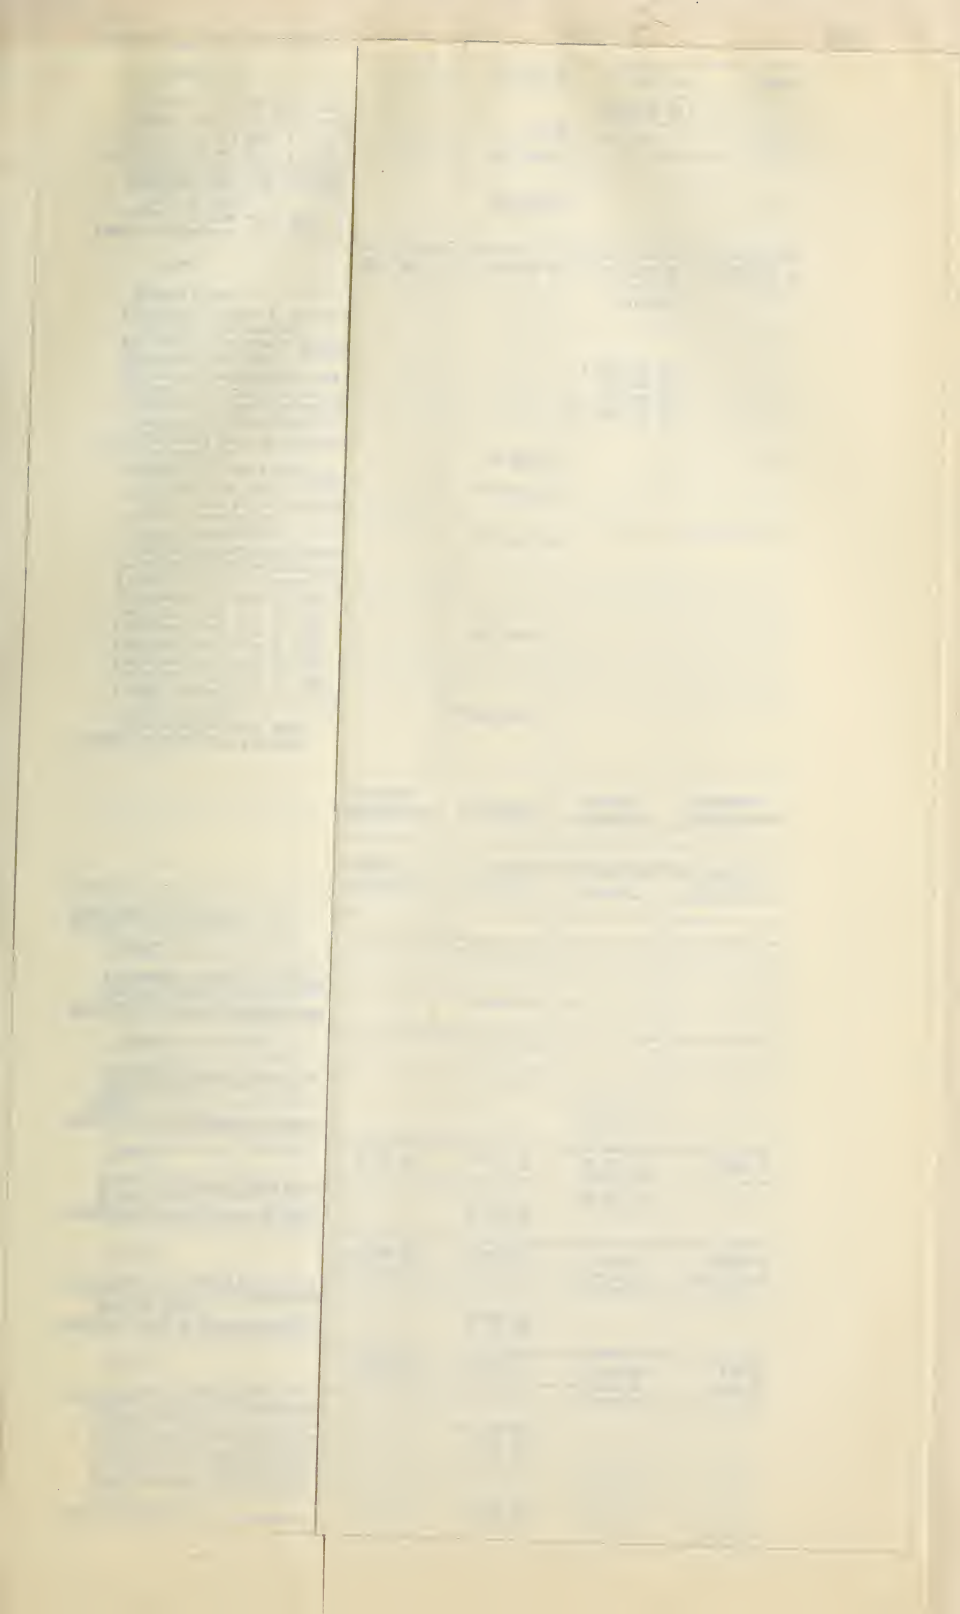

I again recommend that the requisite authority be given to increase the pay of printers and bookbinders from 50 cents to 55 cents per hour, and the pay of bookbinder machine operators from 55 cents to 60 cents per hour. The work handled by these employees is of a technical nature, requiring knowledge and skill, and the question of authorizing the increased pay has been acted upon favorably by Congress at different times, but never enacted into law. I have for several years been firmly impressed with the fairness and justice of an increased compensation for these employees, but as their pay is limited by present law I can take no action without the sanction of Congress. The annual expense involved by proposed increase would be approximately \$80,000.

In view of the fact that quite a large number of employees in the Government Printing Office have reached advanced age, and have given good service to the Government for 20 or 30 years, I can but call the attention of Congress to the necessity of legislation looking to the retirement of these worthy public servants. In the employ of this office are many male and female employees ranging in age from 60 to 80 years, and it is obvious that their services are not as valuable as would be the services of younger persons. Their earning power decreases as age advances, and this fact is particularly observable in a manufacturing establishment such as the Government Printing Office. The productive capacity of the office can, in my estimation, be materially increased if means are found whereby these worthy employees can be retired upon an equitable basis of pay and younger persons employed in their places.

Respectfully,

CORNELIUS FORD,
Public Printer.

REPORT OF THE MEDICAL AND SANITARY OFFICER.

AUGUST 1, 1916.

SIR: Herewith is a statement showing the number of cases, both medical and surgical, arising during working hours, which were treated in the Government Printing Office emergency room during the fiscal year ended June 30, 1916. There is also included a list of employees who have received compensation for injuries during the fiscal year closed, under the provisions of the act of May 30, 1908, providing for compensation to artisans and laborers injured in the service of the United States.

A total of 3,197 medical and surgical cases were treated during the year, in addition to 1,288 redressings of wounds in cases where the employee remained at work after being injured and did not apply for compensation, resulting, additional to other activities, in a grand total of 4,485 cases. One thousand five hundred and eighty-five were surgical and 1,612 medical, as shown in the table accompanying this report, an increase of 550 cases over the figures of the preceding year, which amounted to 1,319 surgical and 1,328 medical cases. There was one sudden death in the building during the year passed due to apoplexy, as compared with no deaths in the preceding year. The respective columns of table show the number that it was possible to relieve and the number obliged to go to their homes after temporary relief was rendered.

Approximately \$3,115.32 was expended as compensation for injuries received during the fiscal year closed, as compared with \$4,967.80 for the preceding year, a decrease of \$1,852.48. This would appear a very small sum indeed when due consideration is given the enormous amount of moving mechanism and the volume of wages paid each year, that totals between four and five million dollars, and can be properly attributed largely to the application of safety devices and the stringent preventive regulations promulgated and enforced by the Public Printer. Justice was attempted and rendered to all concerned in each and every casualty going on to compensation.

Respectfully submitted.

WM. J. MANNING, M. D.,
Medical Officer.

Hon. CORNELIUS FORD, *Public Printer.*

TWENTY-SECOND ANNUAL REPORT OF
THE SUPERINTENDENT OF DOCUMENTS
FOR THE FISCAL YEAR ENDED .
JUNE 30, 1916.

TWENTY-SECOND ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1916.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, September 28, 1916.

SIR: In compliance with the provisions of section 61 of the general printing act approved January 12, 1895, I have the honor to submit the Twenty-second Annual Report of the Superintendent of Documents, being for the fiscal year ended June 30, 1916.

The business of the office continues to make rapid strides and to demonstrate that the general public is becoming more interested in Government publications, as has been pointed out in my previous reports, as well as what is shown by this one. The following shows the increase in the business of this office since 1913:

Letters received during the fiscal year 1913.....	174, 092
Letters received during the fiscal year 1916.....	304, 341
Increase of letters, 130,249, or 75 per cent.	
Cash sales during the fiscal year 1913.....	\$109, 114. 38
Cash sales during the fiscal year 1916.....	\$185, 712. 01
Increase of \$76, 597.63, or 70 per cent.	
Publications distributed during the fiscal year 1913.....	29, 488, 581
Publications distributed during the fiscal year 1916.....	47, 157, 861
Increase of 17,669,280, or 60 per cent.	

The following statement will evidence the great volume of work done during the past fiscal year:

Letters handled.....	304, 341=daily average of 972.
Cash receipts.....	\$195, 507. 79=daily average of \$624.62.
Publications distributed.....	47, 157, 861=daily average of 150,664.

The foregoing tells the story of the busiest year in the history of the office, and it is gratifying to note that while the increase in the free distribution for the departments during the past year is only 6 per cent, there is an increase of 63 per cent in publications sold. This substantiates the position advocated all along as to the best method of distributing public documents for the greatest good—that is, by sale at a nominal cost, so as to bring the expense within moderate means, and to afford the opportunity to every American citizen to obtain Government publications.

The following table, showing the sales by this office of publications issued by the various departments, is further evidence of the popularity of the plan for less free distribution and greater sale distribution, and I trust will serve to stimulate coordinate branches to vie with each other to assist in placing more publications on a sales basis.

THE COUPON SYSTEM.

The coupon system continues favorably to meet the wants of the people as a simple, convenient, and safe means for doing business with the Office of Superintendent of Documents; this is shown by the many complimentary letters that have been received from individuals, business and professional firms.

The number of coupons handled during the fiscal year 1916 were 69,471 issued and 55,041 redeemed.

LIBRARIES.

To meet the growing demands of the public for governmental literature, it is suggested that the nondepository libraries throughout the country should be supplied more freely with current publications. The law now provides that departmental publications shall be distributed by the issuing offices, and that this office can only distribute the surplus copies that come into its hands from the various departments and other sources.

Below is a comparative statement of library distribution for the fiscal years 1915 and 1916:

Distributed to 482 designated depositories in 1915.....	1,335,991
Distributed to 484 designated depositories in 1916.....	1,627,405
Increase of 291,414.	
Distributed to 725 geological depositories in 1915.....	25,339
Distributed to 725 geological depositories in 1916.....	31,809
Increase of 6,470.	
Distributed to 2,321 Official Gazette depositories in 1915.....	191,724
Distributed to 2,304 Official Gazette depositories in 1916.....	185,322
Decrease of 6,402.	
Distributed to various nondepository libraries in 1915.....	27,943
Distributed to various nondepository libraries in 1916.....	43,114
Increase of 15,171.	

The designated depository libraries receive one copy of every publication printed. The geological depository libraries receive only

special publications issued by the Geological Survey. The Official Gazette depository libraries receive the weekly Gazettes and Indexes. The nondepository libraries are entitled to receive on application any surplus copies in stock for free distribution.

CATALOGUES, INDEXES, ETC.

The following publications have been compiled and issued during the fiscal year ended June 30, 1916: Document Catalogue, Sixty-second Congress, 1911-1913; Document Index No. 21, Sixty-third Congress, Second Session, December 1, 1913-October 24, 1914; Fourteenth Preliminary Schedule of Volumes, Reports and Documents of the Sixty-third Congress, Third Session, December 7, 1914-March 4, 1915; Document Index No. 22, Sixty-third Congress, Third Session, December 7, 1914-March 4, 1915; Monthly Catalogue and Index, July, 1915-June, 1916.

Forty-three price lists of United States Government publications on various subjects for sale by this office have been compiled, totaling 298,000 copies, and 283,503 copies have been distributed, as compared with 274,915 copies distributed during the fiscal year 1915.

DISTRIBUTION OF DEPARTMENTAL PUBLICATIONS.

The number of publications that are distributed free by the departments is extremely large, notwithstanding the fact that an increased number have been placed on the sales basis. During the fiscal year 1916, 47,157,861 copies of Government publications were mailed by this office on mailing lists and orders, for which we have 1,103 stenciled mailing key lists, containing 850,000 names. The handling of these lists required 33,000,000 impressions, and the adding of 274,611 names and dropping of 142,444.

ACCUMULATION OF PUBLICATIONS.

During the past year we have disposed of the accumulated publications referred to in my last report (1,506,274) and others of a similar character (816,793). We receive many sacks of old publications daily from libraries and departments, turned over to this office under the provisions of law, many of which are not needed for stock; therefore there is a continued accumulation of publications which necessarily requires a force to separate and assort them preparatory to final disposition.

STORAGE ROOM.

Our storage space for office work, stock of the office, and of the departments is limited, requiring constant effort to provide necessary room. Therefore I would ask your early consideration of this matter and the arranging for additional required space.

MACHINERY.

We have an Automatic Mailing Machine that does not do satisfactory work, also seven Automatic Rapid Addressing Machines No. 1, three Hand-feed Addressing Machines No. 3, and eight Stencil Cutting

Machines. Some of these are secondhand, turned over to this office by the departments when the transfer of publications for mailing was made under the provision of law, and others have been in use for some years.

Now, in view of the fact that we handle 47,000,000 publications annually, and for a part of this number we maintain a mailing list for the various departments of 850,000 names, which required during the past fiscal year 33,000,000 impressions, it is suggested that the office be equipped with the best and latest improved machines. Therefore I urgently recommend that the subject of machinery be considered, and prompt action be taken in regard to substituting, so far as may be necessary, new machines for the old ones.

CONDITIONS AND RECOMMENDATIONS.

The year has been one of continued activity and increase of the business of the office, as is shown by this and former reports, and the best evidence of the increased importance that it is assuming in the minds of the public is the steady and remarkable growth of the business transacted. The general public is using the sales system more than ever, for a quick and more businesslike method of acquiring publications. The transaction of such a volume of business has called for the best resources and efficiency of the force, for it will be remembered that since the addition of 14 employees to the personnel in 1914 no increase has been provided for until in the estimate for the coming fiscal year, in which 6 new employees and a few promotions (amounting in all to only \$6,680) are asked for to meet the present needs and prospective increase in the business for the fiscal year 1918 and to maintain efficient service to continue the high standard that has been built up.

To epitomize, a very large and rather complicated business has been carried on between this office and Members of Congress, the general public, and the Executive departments, and the utmost friendly and interested relations have existed. The sales have been much increased by the activities and cooperation of a number of magazines and newspapers that have opened up service departments for furnishing their patrons with up-to-date information of what Uncle Sam is doing for them.

I wish to extend my thanks to the employees of this office for the interest and conscientious efforts shown by them in the work.

Respectfully submitted.

JOSIAH H. BRINKER,
Superintendent of Documents.

Hon. CORNELIUS FORD,
Public Printer.
