

ANNUAL REPORT

OF THE

PUBLIC PRINTER

FOR THE

FISCAL YEAR ENDED JUNE 30, 1902.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.

1902.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., November 2, 1902.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1902.

Very respectfully,

F. W. PALMER,
Public Printer.

THE PRESIDENT OF THE SENATE PRO TEMPORE.

ANNUAL REPORT OF THE PUBLIC PRINTER.

To the Senate and House of Representatives:

The work of this Office during the present calendar year, in volume and promptness of execution, has far exceeded that of any preceding year. In addition to the usual Congressional documents and the routine work of the several Executive Bureaus and Departments, the compilations of returns of the Twelfth Census have been printed with a rapidity which has been acknowledged in generous terms by the Director of the Census Office, as the following correspondence will show:

CENSUS OFFICE,

Washington, D. C., November 6, 1902.

MY DEAR MR. PALMER: Your Office has now practically completed the delivery of Part IV of Manufactures, which is the tenth and last volume relating to the main subject of census inquiry. I desire to express to you my sincere appreciation of the work of your Office in the mechanical production of these reports.

The law of March 3, 1899, allowed but two years for the completion not only of the great task of enumeration and tabulation, but of publication as well. As the amount of census material was steadily increasing, this was practically an impossible requirement, when viewed by the accomplishments of the past.

The law, however, has been obeyed and the Twelfth Census has been published more speedily after enumeration than any census since that of 1840. The results of the census of that year were all comprised in a volume of 840 pages; while those of 1900 required more than 10,000 pages, therefore it seems reasonable to say that the present census has been issued with greater speed than any other in the history of the Government. This noteworthy accomplishment would have been impossible without the hearty cooperation of your Office and the remarkable speed with which you performed your part of the great task.

For your interest and assistance, and for the unvarying courtesy and patience which the employees of your Office have shown to those of the Census Office, I desire to express especial appreciation.

I am, sir, with great respect, very truly, yours,

W. R. MERRIAM,
Director.

Hon. F. W. PALMER,
Public Printer, Washington, D. C.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., November 7, 1902.

MY DEAR GOVERNOR: I hasten to acknowledge the receipt of your kind letter of November 6, concerning the completion of the reports of the Twelfth Census.

Please accept my sincere thanks for your generous recognition of the part taken by this Office in the accomplishment of the finishing of the work within the time required by the act of March 3, 1899. Permit me to say, however, that the speed attained by the Office in the matter of printing and binding the reports was due in a large degree to the perfection in which the copy was prepared in your Office and the promptness with which those of your subordinates who had charge of the work returned proofs, conditions which have not existed in connection with the printing of the reports in any former census.

Respectfully,

F. W. PALMER,
Public Printer.

HON. W. R. MERRIAM,
Director of the Census, Washington, D. C.

Herewith are submitted the annual report of the Superintendent of Documents; also the following tabular statements showing the amount of work executed and the disbursements made in the Government Printing Office during the fiscal year ended June 30, 1901, to which your attention is invited.

No. 1. Financial statement of the business of the Government Printing Office for the fiscal year ended June 30, 1902, and the condition of the appropriations July 1, 1902.

No. 2. Recapitulation of statement of condition of appropriations July 1, 1902.

No. 3. Classified statement of payments, by appropriations, for the fiscal year ended June 30, 1902.

No. 4. Showing expenditures for labor, material, paper, and lithographing and engraving during the fiscal years 1895 to 1902, both inclusive.

No. 5. Showing moneys received by the Public Printer during the fiscal year ended June 30, 1902, the sources from which received, and to what accounts deposited in the Treasury.

No. 6. Showing the disbursements on account of salaries and contingent expenses in the office of the Public Printer.

No. 7. Showing the disbursements on account of public printing and binding.

No. 8. Showing the disbursements on account of paper for the public printing and binding.

No. 9. Showing the disbursements on account of lithographing and engraving.

No. 10. Showing the disbursements on account of printing Annual Report (1900) of the Secretary of Agriculture.

No. 11. Showing the disbursements on account of printing Annual Report (1901) of the Secretary of Agriculture.

No. 12. Showing the disbursements on account printing Memorial Volume Centennial Celebration of Establishment of Seat of Government in District of Columbia.

No. 13. Showing the documents printed by authority of law or by order of Congress, the approximate cost of printing and binding them, and the manner in which they are distributed.

No. 14. Showing the allotments, etc., for printing and binding for the Executive and Judicial Departments, and the approximate cost of the work executed for the same.

No. 15. Showing the cost of operating each branch office.

No. 16. Statement of the distribution of the bound and unbound copies of the Congressional Record for the first session of the Fifty-sixth Congress.

No. 17. Showing the number of copies of each Department report and document printed upon requisitions by the heads of Departments.

No. 18. Showing the number of copies of books, with their titles, bound upon requisitions for Senators, Representatives, and Delegates.

No. 19. Statement of contract made (by direction of the Joint Committee on Printing) for supplying paper for the public printing and binding from March 1, 1902, to February 28, 1903.

No. 20. Statement of contracts made for stationery, fuel, forage, ice, and miscellaneous items.

No. 21. Statement of contracts made for material (except paper).

No. 22. Statement of contracts made for lithographing and engraving.

No. 23. Statement of proposals received by the Joint Committee on Printing for furnishing paper for the public printing and binding from March 1, 1902, to February 28, 1903.

No. 24. Statement of proposals received for supplying stationery, fuel, forage, ice, and miscellaneous items.

No. 25. Statement of proposals received for supplying material.

No. 26. Statement of proposals received for lithographing and engraving.

No. 27. Showing the number of persons employed in the public printing and binding, the length of time each was employed, and the amount earned by each.

No. 28. Showing the number of persons employed in printing Annual Report (1900) of the Secretary of Agriculture, the length of time each was employed, and the amount earned by each.

No. 29. Showing the number of persons employed in printing Annual Report (1901) of the Secretary of Agriculture, the length of time each was employed, and the amount earned by each.

The installation of the 800-horsepower engines, generators, and switch-board referred to in my last annual report have been completed, fully tested, and found to fill all the conditions of the specifications. The entire power plant is now ready to meet any call which may be made upon it for heat, light, or power.

Capt. John Stephen Sewell, Corps of Engineers of the Army, who has supervision of the fireproof extension of the Government Printing Office, expressed a hope in a report made by him to the Chief of Engineers November 30, 1901, that the building would be completed by August or September, 1902. But in a subsequent report he says, "the great activity prevalent in all of the building trades has made it impossible to get work done on time." The present prospect is that the building will not be wholly completed until the spring or early summer of 1903. The necessities of the service have made necessary the occupancy of a portion of the fireproof vault for the storage of stereotype and electrotypes plates, and if other portions of the building shall be available for use before the time of final completion, occupancy of them will be authorized.

F. W. PALMER,
Public Printer.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Union Building, Washington, D. C., July 1, 1902.

SIR: I have the honor to submit herewith in compliance with the requirements of section 61 of an act approved January 12, 1895, providing for the public printing, binding, and distribution of documents, a report in detail of documents sold by this office, July 1, 1901, to June 30, 1902, inclusive.

I also submit for your information and consideration a report on the work of the public-documents office, with suggestions concerning the laws relating to the sale and distribution of documents.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Hon. F. W. PALMER, *Public Printer.*

CATALOGUING.

There were received in the catalogue section of the office during the year 50,218 documents, bills, resolutions, etc. Of these, 15,665 documents were catalogued. About four cards were written for each document catalogued, the actual number being 63,282. Of the 3,317 pages of printed matter prepared in the office, 2,327 pages was the work of the catalogue section.

An average of eleven cataloguers were employed during the year, no reduction being made on account of sickness and leaves granted. Four of the eleven were engaged three months reading proof. The trained librarian will appreciate and understand that an extraordinary amount of work has been accomplished by this small force.

The cataloguing of public documents is regarded by many cataloguers as the most difficult problem with which they have to deal. That it is so is indicated by the fact that about 85 per cent of the candidates for positions in this office have failed to pass successfully the required civil-service examinations. It is to be hoped that library schools will give the subject of public documents cataloguing more attention in the future, as there will always be a demand for experts in that branch of the profession.

CORRESPONDENCE.

The correspondence of the office was heavy, as usual. Twelve thousand six hundred and sixty letters containing remittances for documents, and 44,395 letters, mostly inquiring concerning documents, were received during the year. More than 100,000 letters and circulars were sent out. The documents office is known very generally as an "information bureau," and its correspondence will probably continue to increase.

LIBRARY.

The accessions during the year were 5,803 text publications and 804 maps, making the present total 44,785 books (including pamphlets) and 6,738 maps, the total number of pieces being 51,523.

Nine hundred volumes have been bound during the year to insure their preservation. Much more binding of paper-covered and worn-out publications remains to be done to put the library in sound and permanent condition.

Several sets entire have been added during the year, among them the records of the Second Alabama Claims Commission, 1882-1885, 153 volumes; Jefferson's Works, 1853-54, 9 volumes; The Madison Papers, 1840, 3 volumes; Consular Reports, special issue, 1888-89, 63 numbers out of 65; Correspondence of the American Revolution, Letters to Washington, 1853, 4 volumes; Works of John Adams, 1856, 10 volumes; general orders and general court-martial orders of the War Department, 1861-1893, 45 volumes; Documentary History of the Constitution, Congressional edition, 3 volumes; Executive Journals of the Senate, 1869-1891, 17 volumes.

The library has also the Executive Journals, 1789-1829, 3 volumes, but lacks the 16 volumes printed in 1867, which contain the executive proceedings for the forty years 1829-1869, and would be glad to obtain them by donation or exchange.

Among the sets fully completed and substantially bound during the year are the Smithsonian Contributions to Knowledge, 30 volumes; Smithsonian Miscellaneous Collections, 42 volumes; Official Register (Blue Book), beginning 1816, 56 volumes; bulletins of Hayden's Survey of the Territories and of the Entomological Commission, in both cases all the editions as well as all the numbers; Wait's State Papers, 3 editions, 28 volumes; Land Laws, compilations, 1810 to date, 18 volumes; Indian Treaties, 3 volumes, folio of separate prints, beginning in 1825, and 4 compiled volumes, the earliest printed in 1826; Interstate Commerce Commission reports, 8 volumes.

The set of Navy Registers has been greatly extended. An official list, issued by the Department, 1891, showed that 97 Registers had been issued to that time, including one for that year. The issues since that date number 21, making a total of 118. Of these the library has 114, lacking only those of February 14, 1814, the first official issue, January 1, 1817, January 1, 1818, and the year 1850. In addition to the 114 listed Registers, the library has a reprint of one for the year 1800, compiled by Chief Clerk C. W. Goldsborough; also a reprint of one first published in the Gentleman's Annual Pocket Remembrancer, Philadelphia, 1806; also one published as a document of the Fourteenth Congress, first session, by order of the Senate passed December 11, 1815; also in American State Papers, first volume on Naval Affairs, Registers under date of 1806; February 3, 1812; and three under as many different dates in 1814.

Of the two series of Court of Claims Reports, 54 volumes in all, only volume 5, second series, is wanting.

Other volumes of some note that have been secured during the year are Navy Regulations, 1818, being the earliest print in this series, and a Tour through the Indian Country, by Jedidiah Morse (father of F. S. B. Morse), 1820.

Though the sheep-bound set of Congressional Documents, Fifteenth to Fifty-sixth Congress, 1817-1901, 4,220 volumes, is complete so far as volumes go, about 30 of the volumes are defective, one or more of the documents, of which they should be composed being missing. It has been ascertained that the missing documents had been printed by finding them in corresponding volumes in other libraries. It has been found also that these same volumes often lack other documents which are found in the volumes in the public documents library. So slipshod was the work done by printers and binders with whom the Government contracted before the Government Printing Office was established in 1861, that it is probable no wholly complete set of the sheep-bound documents of any Congressional session was ever issued by them. The only way to get a complete set is to make one, and that is what the public documents library hopes to do. A list has been made of all defects in the sheep-bound

volumes on its shelves, and it is hoped that by exchange of volumes, or taking documents from one volume to be placed in another, a set absolutely complete and correct may in time be created.

NEW CHECK LIST.

Part II of the new checklist, being a list of and annotated index to the Congressional series of documents from the Fifteenth to the Fifty-second Congress, both inclusive, was published during the year. It is a work that is greatly appreciated by all who have occasion to consult the public documents. Several hundred letters have been received from librarians expressing their gratification and commending the work in the highest terms.

Part III will probably be published next year. It is a work of great magnitude, more than 60,000 cards having already been written in its preparation. It will list and index all the annual reports and miscellaneous publications of the Executive Departments, bureaus, and offices of the Government which have been issued in what is known as the departmental series.

AMENDMENTS TO THE PRINTING LAWS.

An important amendment to the printing laws is now pending in the House, having passed the Senate on March 6, 1902. The purpose of the bill is to enable the Superintendent of Documents to deliver the annual reports and miscellaneous publications of the Executive Departments and offices of the Government to State and Territorial libraries and designated depositories as soon as printed. It is well known to librarians, also to Senators and Representatives in Congress, that there is a delay of from one to two years in the delivery of documents included in what is known as the sheep-bound Congressional series to libraries entitled to them under the general law. The delay is not due to neglect upon the part of the Government Printing Office, but is due solely to a defect in the printing laws. Everybody will agree that the scientific, statistical, and other valuable publications of the Government should be placed in the libraries of the country for the use of the people as soon as possible after they have been printed. How to do this without disturbing the well-established methods of printing and binding has occupied the attention of this office for several years. I believe a practical solution of the problem is offered in the pending bill. It reads as follows:

“SECTION 1. That whenever any report, serial, periodical or miscellaneous publication of an Executive Department, bureau, board, commission or office of the Government shall be ordered printed upon the requisition of the head thereof, or upon the order of Congress or either House thereof, the Public Printer shall print six hundred copies in addition to the number named in the requisition or order of Congress, unless previously ordered, to be known as the ‘library edition,’ for distribution by the Superintendent of Documents to State and Territorial libraries and designated depositories: *Provided*, That this act shall not apply to confidential matter, blank forms, or circular letters.

“SEC. 2. That Congressional numbers shall not be printed upon any of the documents or reports provided for distribution to State and Territorial libraries and designated depositories under the provisions of section one of this act.

“SEC. 3. That in binding the library edition the best grades of cloth shall be used, and the Public Printer shall, as far as practicable, assign a distinctive color to the binding of the publications of each department and office, and when a color has been assigned the same shall not be changed; and to insure prompt delivery the Public Printer shall give precedence in binding to documents intended for distribution to libraries and depositories.

"SEC. 4. That whenever any printing shall be done upon the order of Congress or either House thereof, or upon the requisition of the head of an Executive Department, bureau, board, commission, office, or Congressional committee, except matter marked confidential, blank forms, and circular letters, two copies shall be sent, as soon as printed, by the Public Printer, if printed at the Government Printing Office or any branch thereof, or by the head of the office upon whose order the same was printed if printed elsewhere, to the Superintendent of Documents for entry in the Monthly Catalogue; and whenever the injunction of secrecy has been removed from any document printed as confidential two copies of the same shall be sent by the proper official to the Superintendent of Documents.

"SEC. 5. That beginning with the first session of the Fifty-eighth Congress the Public Printer shall deliver to the Superintendent of Documents for distribution to State and Territorial libraries and designated depositories, bound, of House documents and reports and of Senate documents and reports, except those included in the library edition, each six hundred copies.

"SEC. 6. That all laws in conflict with the provisions of this act are hereby repealed."

The main feature of the bill is the creation of a "library edition," which includes only the annual reports and miscellaneous publications of the executive branch of the Government. This library edition will be printed with the first order to print, whether made by the author office or by Congress. It does not include Senate or House reports, or documents originating in the Senate or House of Representatives. These will go to libraries in the same style and binding as they do now. To make the matter clear, if this bill shall be passed, the "usual number" of annual reports and miscellaneous publications of the Executive Departments and other offices will hereafter be 1,182 copies, instead of 1,682, the decrease being the 500 copies provided for depositories, which will then go to such institutions in the "library edition."

The "up number" of annual reports and miscellaneous publications of the Executive Departments, printed for the immediate use of Congress, and the "reserve" of such documents, for binding upon the orders of Senators, Representatives, and Delegates in Congress entitled to them, will be printed and numbered precisely as they are under the present law.

The existing law affected by section 1 is the last clause of section 58, and section 54, paragraphs 1, 4, and 5, of the printing act approved January 12, 1895. All the miscellaneous publications of the Executive Departments and other offices of the Government which are now distributed to depositories under the provisions of section 58 of the printing act, and all annual reports and other publications of the same offices which are included in the sheep-bound Congressional series of documents and distributed to depositories under the provisions of section 54, paragraphs 1, 4, and 5, of the printing act, are embraced in the "library edition" provided for in section 1 of the bill.

Section 2 simply provides that Congressional numbers shall not be assigned to or printed upon any of the documents included in the "library edition." The result of this change may be better understood by the following illustration, taking the finance report of the Treasury Department as an example. The back title of this report in the "library edition" will read—

ANNUAL REPORT
of the
SECRETARY OF THE TREASURY
1901
FINANCE

instead of being loaded down with a title like this—which appears on the back of the sheep-bound Congressional edition—

HOUSE DOCUMENTS
Vol. 46
No. 7
ANNUAL REPORT
of the
SECRETARY OF THE TREASURY
FINANCE
56TH CONGRESS
2d session
1900-1901

Section 3 provides for binding the "library edition" in the best grade of cloth, and for the assignment of a distinctive color to the publications of each Department. All Congressional numbered documents are supplied to depositories under the present law in sheep binding. Very few librarians like the sheep binding, even if it were equal in every respect to cloth, which it is not. The following extract from the letter of a prominent librarian is but one of many complaints concerning sheep-bound books. He says:

"We have in our library hundreds of volumes bound in sheep which has deteriorated in strength so that the sheep is not now as strong as wood-pulp paper. These volumes must be rebound at great cost. We have discarded all materials for binding except turkey morocco and canvas. If the latter can be made neat it is the best substitute for the imperfectly, or rather improperly, tanned leather now so common. Allow me to hope that the very neat sheep binding of the public documents may be changed soon to as neat, stronger, and more durable canvas."

I have seen a reference to a report by a British commission in which sheep binding is condemned as utterly bad. The report of the Commissioner of Education, 1892-93, contains an article by D. V. R. Johnson, New York State reference librarian, on "Elements of library binding," in which he declares that sheepskin should be avoided when possible, as it is thoroughly unreliable. In libraries where bituminous coal is used sheep binding is soon reduced to a powder by the action of heat and gas. As the larger number of libraries to be served desire cloth binding, and as it is much more attractive and lasting, possessing the additional advantage of cheapness, I do not imagine there will be any serious objection to its adoption.

Provision is also made in section 3 for binding the publications of each Department in a distinctive color. This will make the documents more attractive, and will, when librarians become familiar with the colors, greatly expedite reference to them.

Section 4 is intended to strengthen the present law, which requires two copies of each document printed to be sent to the superintendent of documents for entry in the official catalogue. Many documents printed by boards, commissions, and by committees of Congress have been denied the superintendent of documents for one reason or another. For instance, the proceedings of the court of inquiry in the case of Admiral Schley were refused this office, when at the same time they were being given out daily to the press and were otherwise distributed by members of the commission. A copy could not be obtained until Congress ordered the proceedings printed as a document. The official catalogues should be absolutely accurate, but they can not be made so without the cooperation of every official charged with the preparation and printing of documents. Documents supplied to this office for cata-

loguing serve another useful purpose. When catalogued they are filed in the public documents library, which contains probably the nearest complete set of Government publications in existence.

Section 5 provides for an increase in the number of depositories to accommodate the increased representation in the House in the Fifty-eighth Congress.

This bill does not in any way change the law affecting the printing or distribution of documents printed for the use of Senators and Representatives, the libraries of the Senate and House, the Library of Congress, or the Departments. If passed, the documents included in the "library edition" will be supplied to depository libraries from six months to two years earlier than they can possibly be delivered under the present law. The great advantage this will be to depositories will appear by estimating the number of volumes that will be delivered in cloth theretofore supplied in sheep binding. The documents and reports of the Fifty-sixth Congress make 332 sheep-bound volumes. Under the operation of this bill 258 of these would have been delivered as soon as printed, in cloth binding. An economical feature will be the saving of about \$100,000 annually, being the difference in the cost of binding.

Two bills prepared by this office were passed at the last session of Congress and were approved by the President. One provides for the distribution of the American Ephemeris and Nautical Almanac to depositories in cloth binding hereafter, and discontinues the Congressional series of the same. The result is an argument for the passage of Senate bill 4261 heretofore referred to, as the editions of that document for 1903, 1904, and 1905 have already been forwarded to designated depositories, while the old Congressional edition for 1902 has not been received from the Printing Office. The other bill provides for binding in cloth the documents uncalled for, reserved for binding upon orders of Senators, Representatives, and Delegates in Congress.

DESIGNATED DEPOSITORIES.

Very few changes have been made in the depositories of public documents during the fiscal year, so that the list usually printed is omitted from this report. There are now about 2,899 general and special depositories which receive documents regularly through this office.
