OFFICE OF
THE PUBLIC PRINTER
WASHINGTON

DECEMBER 8, 1908.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1908.

Very respectfully,

SAM'L B. DONNELLY,
Public Printer.

The PRESIDENT OF THE SENATE.

ANNUAL REPORT OF THE PUBLIC PRINTER

OFFICE OF THE PUBLIC PRINTER,
Washington, December 8, 1908.

To the Senate and House of Representatives:

The report of the operations of the Government Printing Office for the fiscal year ended June 30, 1908, comprehending the administration of Charles A. Stillings, Public Printer, from July 1, 1907, to February 5, 1908; Henry T. Brian, Acting Public Printer, from February 5, 1908, to June 9, 1908; John S. Leech, Public Printer, from June 9, 1908, to and including June 30, 1908, is as near complete and in accordance with the requirements of law as the condition of the accounts in the Government Printing Office would permit. The information required in statistical tables Nos. 7, 9, 11, and 12 can not be furnished, owing to the fact that the accounts of the office were kept without regard to the plain provisions of sections 19, 22, and 31 of the act of January 12, 1895, by the representatives of a so-called cost, audit, and inventory system which seems to have held full sway in the office until its operations were suspended by the President, upon recommendation of the Printing Investigation Commission. (See H. Doc. No. 968, 60th Cong., 1st sess.)

On July 1, 1908, the present systems of organization and accounting were put into operation by Public Printer Leech, which, on account of their comparative simplicity, logical arrangement, and strict compliance with the law, are proving adaptable to the requirements of the service, and it is my purpose to continue the same in operation until such time as the needs of the service necessitate a modification or change. By the accounting system is shown monthly the total cost of operation, daily the amount of wages earned, and at any moment the amount of purchases, the total expenditures to date, and the outstanding obligations.

The present satisfactory conditions prevailing in the Government Printing Office, and the high state of efficiency which obtains throughout the plant at this time, is a tribute to the competency and loyalty of the large number of employees, as well as the completeness of the organization itself. The work of the office is kept current, and the expenditures well within the appropriation.

The division of public documents has recently been installed in the H street annex of the old Government Printing Office, which is found to be entirely inadequate for its accommodation, it being necessary to use a considerable portion of the old building in addition.

The constantly increasing demand for space on account of the rapid growth and expansion of the business of this branch of the service emphasizes the necessity for the demolition of the old Government Printing Office and the erection on its present site of a new building corresponding in design and construction to the present building at North Capitol and G streets. The present condition of the old Government Printing Office, and the inflammable material of which it is largely constructed, constitutes it a menace to the safety of adjoining buildings, and I earnestly recommend that the construction of a new building may be favorably considered during the present session of Congress.

The following tabular statements form a part of this report, a comparison of which with former reports will disclose that Tables 2, 3, 4, and 6 have been consolidated with Tables 1 and 2 in this report.

The reasons for this consolidation are that Tables 2 and 3 in former reports contained simply an incorrect rearrangement of the figures which had already been shown in Table 1, and the tables are therefore valueless both from an accounting standpoint and for statistical purposes.

Table 1 in the present report gives all the information which it was attempted to show in Tables 1, 2, and 3 in former reports, and in addition contains a statement showing the resources and liabilities from the public printing and binding appropriation. As the resources and liabilities have never been given in previous annual reports the amount stated as a balance on hand at the end of each fiscal year was very misleading, and this statement is deemed quite as important to a proper understanding of the condition of the appropriation as the financial statement itself.

Table 2 in this report is a comparative statement of the financial operations of the office for four years, and is intended to take the place of Table 4 in previous annual reports, which has always been deficient in that it did not show the expenditures made from the appropriation for the support of the Government Printing Office under the legislative, executive, and judicial appropriation act.

Table 6 is not considered of appreciable value as it is only a statement of the earnings of officials and employees specifically appropriated for, while the disbursements on this account have already been shown in the financial statement.

The disbursement statements (Tables 4, 5, and 6 in this report) should show the appropriation or balance of appropriation from which

payment for any item was made, but owing to the manner in which the accounts had been kept it was impossible to do so for the fiscal year 1908 without an unwarranted expenditure of time and labor. However, a system of bookkeeping was put in operation at the beginning of the present fiscal year from which the information can be given in subsequent reports as outlined above, and it is believed that the annual report for the fiscal year 1909 will not only be more satisfactory, but that it will give an accurate account of all the operations of the Government Printing Office.

LIST OF STATEMENTS.

No. 1. Financial statement for the fiscal year ended June 30, 1908. (See page 10.)

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
December 1, 1908.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1895, I have the honor to submit the Fourteenth Annual Report of the Superintendent of Documents covering the fiscal year July 1, 1907, to June 30, 1908.

Very respectfully,

WILLIAM L. POST,
Superintendent of Documents.

Hon. SAMUEL B. DONNELLY,
Public Printer.

FOURTEENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1908.

The following tables present a statistical résumé of the receipts and disbursements of moneys and books during the fiscal year 1908, comparative data for a period of five years, and a statement of the office publications issued since the last report:

OFFICE PUBLICATIONS.

The increase in sales is largely due to circular advertising and the careful "follow-up" methods now used. In our campaign of popularizing public documents we have been forced to issue numerous publications explanatory, not only of the contents and value of the separate publications and of certain series, but also noting those distributed free to libraries and schools. These publications were in addition to the catalogues which form the larger part of our compilation and publication work. The full list is as follows:

	Pages.
Thirteenth Annual Report of Superintendent of Documents, 1907.....	142
Author headings for United States public documents.....	32
Document Catalogue, Fifty-eighth Congress. Large 8°.....	1,581
Document Index, Fifty-ninth Congress, first session.....	788
Monthly catalogues, June, 1907–May, 1908.....	497
Numerical tables, etc., Fifty-ninth Congress, second session.....	124
Free List 1: Comprehensive list of United States public documents now offered to organized public libraries free of all cost.....	152
Bulletin 8: The Superintendent of Documents and organized libraries.....	12
Bulletin 9: Author headings for public documents.....	32
Bulletin 10: Selected list of Senate and House documents and reports of the Fifty-ninth Congress, second session.....	17
Bulletin 11: Synopsis of the thirteenth annual report of the Superintendent of Documents, 1907.....	21
Price Lists Nos. 10–22, 26, and 27, with second editions of Nos. 13–15, 17, 18....	533
Leaflets Nos. 1–25, with second editions of Nos. 3–6, 8, and 10, and third editions of No. 5.....	71
Advance sheets of Checklist of United States public documents: Agriculture Department A1–A33, complete; American Republics Bureau, one sheet AR, complete; Commerce and Labor Department, C1–C3, incomplete.....	139
Total.....	4,141

I again desire to call attention to the absurdity of requiring an itemized report of the publications sold by this office.

The accounting and inventory methods now used, and which are hereinafter described, make such a report superfluous, and legislation should certainly be had to relieve the Superintendent of Documents of the necessity of reporting "annually the number of copies of each and every document sold by him, and the price of the same."

The statistical tables just preceding exhibit a minute analysis of the monthly reports required by law to be made to the Public Printer, and such a statement is, in my judgment, adequate as an annual report.

FUNCTIONS OF THE OFFICE.

While the functions of this office are becoming better understood, there is still much ignorance manifest as to the scope of its operations which hinders its usefulness. We are endeavoring especially, through correspondence and our publications, to instruct the libra-

rians in order that they may intelligently inform the public as to the possibilities of obtaining from us information relating to our speciality.

It will not, however, be amiss to here enumerate the duties assigned in the general printing act of January 12, 1895 (2 Supp. R. S., p. 350):

1. To sell at cost any public document in its charge, the distribution of which is not specifically directed in the law.
2. To receive from any government office any document published for sale, which sale must be made under the provisions of section 61.
3. To have general supervision of the distribution of all public documents (with exceptions as enumerated).
4. To prepare at the close of each regular session of Congress a Comprehensive Index (Document catalogue) of public documents.
5. To prepare and print in one volume a Consolidated Index (Document index) of congressional documents.
6. To index such single volumes of documents as the Joint Committee on Printing shall direct.
7. To receive all accumulations of documents from the several executive departments, bureaus, and offices of the Government, and annually to take over their surplus for distribution or sale.
8. To prepare and publish a monthly catalogue of government publications, which shall show the documents printed during a month, where obtainable, and the price thereof.
9. To thoroughly investigate the condition of the designated depositories.
10. To distribute the documents as issued to the designated depositories.

To these should be added three auxiliary functions which are very extensive:

1. Answering letters of inquiry relative to what the Government has printed on certain subjects, and quoting the prices of the books containing the desired information, if they are in stock, or directing the inquirer to the nearest library where our statistics show it should be obtainable for reference.
2. Receiving the surplus accumulations of the libraries, and supplying them in exchange with publications desired.
3. Exchanging with Members of Congress in order to obtain for sale publications of which our stock is exhausted, and at the same time supply them with books they can distribute and relieve them of those which are of little or no use to them.

In order to meet all these requirements satisfactorily the office force was divided into two divisions, which in turn were separated into sections to handle special features. This organization has been gradual, and the natural result of careful consideration of the needs of the work as it has developed.

To the Administrative Division have been assigned the duties prescribed under all the headings above noted, with the exception of those numbered 4, 5, and 8, which belong to the Bibliographical Division, as distinct from any other office work.

That the organization is bringing forth good results proves its utility.

ADVERTISING.

Following up the general advertising begun last year, and with an appropriation of \$12,000 at our disposal, we have pushed forward facts and figures for the benefit of the public, and as a result have again nearly doubled our sales of last year.

The advertising first undertaken had for its object the disposing of certain accumulations, and in a general way this thought has been continued during the past year. It was, however, decided that general publicity was what was most needed in our efforts to popularize government publications, and the advertisements inserted in the leading magazines and periodicals were so worded as to attract attention and inquiry. Our mails doubled in three months, and our sales increased at an astonishing rate. The advertising was abruptly discontinued, owing to the change in the official head of the Government Printing Office, and was not taken up again during his incumbency. This action has doubtless minimized the otherwise enormous returns which a continuation of the same kind of advertising would bring, and it is hoped that at an early date it may be again taken up.

A display poster, giving direction as to how to obtain government publications, was designed and sent to all libraries as an added means of advertising.

It is hoped that permission will soon be obtained to exhibit these posters and special lists of available books in the post-offices throughout the country. In this way much free advertising, supplementing the magazine campaign, could be obtained.

Some of the money appropriated could also be profitably expended in obtaining stenciled lists of special classes of persons who might be advantageously circularized; for in the end it is demonstrated that it is the personal appeal, persistently though unobtrusively made, which gains the desired recognition.

ADMINISTRATIVE DIVISION.

Much has been done during the past year to increase the efficiency of every section in this branch of the office. Cooperation is demanded, and when the sections are more conveniently located, it is hoped that the present speed with which matters are attended to will be greatly increased.

BOOKKEEPING SECTION.

New record books for stock, office publications, and supplies have been successfully operated in the Bookkeeping Section during the past year, and now actual figures are obtainable where before they were approximate.

CORRESPONDENCE AND FILING SECTION.

The numerical-vertical filing has been fully installed in the Correspondence and Filing Section, and over 100,000 numbers assigned to correspondents; a stencil made and kept on file numerically for each name represented, as well as an alphabetical card index to both the letters and stencil files. This accumulation of letters dates back over the entire period of my incumbency, from February 8, 1906. The old files prior to that date have been assorted and arranged conveniently for reference, so that all the records and files of the office are in at least an orderly state, although no amount of labor will repair the damage which years of carelessness and neglect have wrought to these archives.

REFERENCE AND COMPILING SECTION.

With a constantly increasing daily mail, one third of which requires research in order to supply the information requested, it was soon found that the few clerks assigned to the work of conducting such correspondence could not keep abreast of the mails and do other work which was required of them.

It was, therefore, decided to organize a special section for this work, which should be conveniently located in the new building, so as to have the quickest use of the library and all other sources from which information to aid them in their work might be obtained.

As this section would be engaged in research, it might also undertake the compilation of the special publications of the office, which were issued primarily in aid of their work. So all special compilation and list work, as well as the editing of all publications prepared outside of the Catalogue Section were turned over to this section to edit and publish.

Our daily mail now averages 500 letters received, as against 300 last year. This results in a corresponding increase in dictated letters, price list distribution, and in filing. On an average of 300 letters a day are answered by price lists and leaflets, avoiding extra correspondence and giving added information beyond that specifically requested. These special price lists and leaflets are both labor and money savers, and provide quick information on live topics. Their issue will be increased with the future demands.

Fifteen price lists have been prepared and issued on subjects ranging from Americana to Water pollution, with several editions of some, and amounting to 533 pages in all.

A set of leaflets has also been begun, which includes notice of special publications or series, and 25 such leaflets of from 1 to 4 pages each have been produced.

These price lists and leaflets have proven a most effective method of advertising and answering inquiries. The lists are prepared with

an eye to attracting business and are shorn of all superfluous verbiage or technicalities. They are issued for a purpose, and while ephemeral in character are made most attractive in appearance.

STOCK SECTION.

That the old stock is not entirely assorted and disposed of is not the fault of any but the distributors and libraries, who insist on sending in books at the rate of over 100,000 a month more than we can handle. Notwithstanding this enormous receipt of books, over a million have been wrapped, shelved, and made accessible, and so carded that information as to whether or not a publication is in stock can be given on a minute's notice.

No relief has as yet been obtained in the matter of disposing of the hundreds of tons of useless publications, but we are informed that action will soon be had to permit the sale of a large portion thereof as waste paper, which is the only logical disposition of such useless books.

SHIPPING SECTION.

The work of this section has more than doubled during the year. The increase in sales is not alone responsible for this development. Returns received from the general clearing-house circularization have been so extensive that even now all "want slips" have not yet been attended to. With intelligent direction, and first-class help, the section is accomplishing its work with a minimum of errors, even though many inconveniences are now experienced which will be overcome when our new quarters are ready for occupancy.

MAILING SECTION.

In anticipation of the handling of the Congressional Record mailing by this office, a Mailing Section was established, to which were transferred all mailing lists for libraries, subscribers, office publications, and special lists of names for circularizing. All labels and registry lists are here prepared and sent to the shipper for use in the actual sending out of the mail.

The section at present is crowded for room, hampered by the necessity of instructing new help, and lacking many things which would expedite its work, but withal it is developing in importance, and its creation has made possible the handling of much more work in a limited time than would otherwise be possible.

Ample provision has been made for this section in the new building, and it is hoped that it can be settled therein before the next session of Congress convenes.

Quick compliance with requests, either for books or information, is most necessary in a large and growing mail-order business, such as this office conducts.

The latest labor-saving devices in the way of mailing machines have been installed, which are daily proving more of a satisfaction, although there is still much room for improvement in the machinery and appliances employed. The making of stencils for all customers makes "follow-up" by circularizing an easy possibility, whereas without this simple and inexpensive means of making and retaining addresses such general distribution of our literature would be impossible, except with a largely increased force.

BIBLIOGRAPHICAL DIVISION.

This division has not as yet been fully organized, owing to the fact that no chief cataloguer has been authorized. When this authorization is made and the position filled the work of the division will be greatly benefited.

CATALOGUE SECTION.

Through herculean efforts on the part of the experts in this section, even with a force of practically untrained assistants, great progress has been made toward a more prompt issue of the catalogues and indexes than has ever before existed. Document Catalogue No. 7, for the Fifty-eighth Congress, a volume of 1,581 pages, was completed and issued, as were also two document indexes, those for the first and second sessions of the Fifty-ninth Congress.

During the year 13,616 publications were received, of which number 10,563 were catalogued, besides the indexing of 4,114 others. In this work 79,380 cards were written, and 2,744 hours spent in reading and holding copy.

But over and above the actual work a great change has been wrought in the conduct of the affairs of the section, and better results are being obtained, due wholly to the intelligent administration of those in charge of the work.

CHECKLIST SECTION.

It was found necessary to relieve this section early in the year of any work other than that connected with the issue of the advance sheets of the new checklist. Not, however, until in February of this year was it possible to issue an advance sheet. Since that date the publications of the entire Agriculture Department have been listed and the sheets issued; the American Republics Bureau has been completed in one sheet; and work begun on the Commerce and Labor Department, with the three first sheets distributed. These 37 sheets will be followed by others as rapidly as possible until every publishing office under the Government has been dealt with.

Unfortunately the employees of this section are compelled to answer emergency calls from other sections in order to keep the work of the office up to date.

This word of explanation is inserted in vindication of the able and earnest workers of this section, who are sorely tried by being assigned to other duties in hindrance of their legitimate employment.

It is hoped that soon enough trained people will be available to carry on the work of the other sections in the Bibliographical Division, so that the checklist may progress without interruptions.

LIBRARY SECTION.

Like all sections, the library is suffering from lack of room. Its usefulness is also hampered on account of its location. Both of these conditions will be remedied in the new building.

The tabulated statistics of the library are as follows:

STAFF MEETINGS.

In an office composed of numerous sections, with distinct individual interests dependent largely on the work of other sections in the harmonious operations of its part of the system, an exchange of ideas and close-unity are absolutely essential. In order to provide for such united effort in the development of our business organizations staff meetings were instituted. On Wednesday of each week the superintendent meets with all the section chiefs, and matters relating to the proper conduct of the work of the various sections are discussed and instructions given. On Saturday of each week a meeting is held of the section chiefs in each of the two divisions of the office for the discussion of matters relating to their division and for the formulation of such reports or suggestions as they desire to present to the superintendent for action.

Great good has resulted from these meetings, and their continuance will insure increasing harmony and better administration.

BIBLIOGRAPHIES.

The gradual evolution of bibliographies on certain subjects is another feature of our work. The issuance of special lists on topics of general interest brings together material which is valuable from a reference as well as a sale point of view. The price lists must, however, be frequently revised so as to include only such publications as can be supplied.

The reference lists now contemplated are to contain entries for all publications or references to articles on a certain subject regardless of the possibility of their being obtainable. Such lists will also refer, in cases of old and rare books, to the libraries in which copies are known to be obtainable for reference. Nothing much has or can be done along the line of these special library reference lists until the basis has been thoroughly established in this office.

THE REFERENCE LIST.

As a foundation for this work, and in order to obtain a consolidation of the scattered information on the subject of certain publications, classes of publications, publishing offices, etc., a general reference list is now in contemplation, and a committee of our experts in documents and those versed in the knowledge of public document cataloguing is now developing a plan and drawing up forms for such a list.

It is my purpose to have gradually assembled in this reference list all information obtainable regarding public documents. The results of researches which are now made in the cases of an individual inquiry

will here be preserved for future use. It is to be free from any technical cataloguing incumbrances and supply the basis of all future lists, whether priced or for reference. It will be for the information of the entire clerical force of this office, in their cataloguing, correspondence, or inventory duties, and gradually develop that desideratum—a complete catalogue of United States Government publications.

THE STOCK INVENTORY.

In my last annual report, which was historical as well as statistical, I touched upon the inventory then in course of installation. During the period covered by this report such stock records have been nearly completed, and the accession registers show that 880,942 books have been carded, wrapped, and shelved, so as to be immediately available.

The scheme of inventory is easily understood and simple in its operations. As books are received for stock, a card is prepared giving the exact title, number of pages, binding, and selling price of the book. Sufficient accession numbers are then assigned to give each and every book an individual number, and an entry is made on an accession register accounting therefor. Individual stock cards for each book giving the same information as the original inventory card are then prepared, the books are wrapped separately, and the individual accession number stamped on the outside of each wrapper and the cards of identification. The books are then put away on a numbered shelf in a numbered stack, and the stack and shelf numbers are inserted in their proper order on the inventory cards. The cards are then filed in a classified arrangement, by department, bureau, and series (identical with the library classification used in this office), and the guide card used as a separator is supplied with any additional information which it may be interesting to retain. This file is known as the "In file."

As orders are received, a card for the desired publication is withdrawn from the "In file" and is sent to the stockkeeper, who forwards the card and book to the shipper for mailing.

The inventory has now fulfilled its mission as an order on the stockkeeper and a guide to the shipper, and after being stamped with the date of mailing of the publication is returned to the bookkeeper. When all the cards representing the orders for a day are received by the bookkeeper he posts his daily sales sheets, upon which the original entry of the cash receipts were made. In this posting he must account for every cent of the gross receipts, either by sale, by return, or by holding in suspense a deposit for further

disposition when it is determined whether or not the books can be forwarded.

It is thus seen that the accounts of this office balance daily. The sales, though small in amount, are large in number, yet the labor of accounting is reduced to a minimum.

The inventory-order cards, after use by the bookkeeper, are returned to the stockkeeper, and are filed by him as his voucher for having sent out the book described. At present this "Out file," as it is called, forms the basis for the tabulated itemized report of sales, which forms a useless appendix to this report.

Though the "Out file" is not required as an added accounting adjunct, it is useful in other ways. We determine the size of future editions of publications by the showing made by these cards; and also consult them in order to report to the publishing offices the number of copies of certain of their publications which are disposed of.

CLEARANCE OF LIBRARIES.

So much complaint was received from small libraries as to their crowded conditions, due to the indiscriminate distribution of public documents, that it was decided to remedy the matter by inaugurating a general clearing-house scheme. As a basis, we prepared a "Comprehensive list of United States public documents now offered to organized public libraries free of all cost," exhibiting the titles of such publications in our miscellaneous accumulation as we felt might be of interest or service to the libraries. This list, accompanied by a little pamphlet explaining "The relation of the office of the Superintendent of Documents to the organized libraries of the United States," a poster "How to obtain United States Government publications," and a circular (No. 18), requesting statistics, was sent to every library in the United States whose name we could obtain.

Circular 18 gave instructions as to the return of duplicates, and this was accompanied by a sheet of "Instructions for filling 'Library wants.'"

The scheme for attending to the wants expressed by several thousand libraries must of necessity be simple and consistent and in its adoption every operation from the time of its receipt to the final filling of the order must be taken into account.

After much consideration a plan was evolved which provided an easy means for recording wants, whether filled or filed, with the least amount of labor to this office.

Perforated sheets containing ten of the following blocks were printed, made up in pads, and distributed with instructions as to filling them in:

(DO NOT WRITE ON THIS LINE)	Library No. _____
Title: _____	

Series _____	
Issuing Office _____	
Ship as requested _____	

Each library as it is entered on our lists receives a number by which it is always known. The inserting of the number in the blank is all that is necessary, therefore, to identify the slips. Places are provided for the title of the book, the name of the series, if any, and the name of the publishing office if known.

When these slips are received the books are gotten out, invoiced, and shipped, and the slips for those which can not be supplied are filed in proper order, by classification numbers, in the "In file" or stock inventory. There they remain until such time as a copy of the book is received, when, of course, a card must be made and filed before the book can find a place on the stock shelves, and in filing the card the want slip is detected and the book immediately forwarded to the library desiring it. Thus the necessity for repetition of library wants is done away with, avoiding extra work and confusion, while it provides a permanent record of such want until it is supplied.

At first the libraries objected to filling out a slip for each separate volume, not realizing the necessity of this requirement, and many want slips were returned because requests for entire series were entered on one block instead of using as many blocks as the total of books desired. The excellent results thus far obtained have called forth repeated expressions of gratification on the part of the librarians, and have confirmed us in our opinion that gradually, through a process of education, cooperation will be obtained between the libraries and this office to their mutual advantage.

Many hundreds of thousands of books have been returned as useless by the libraries, and in return we have supplied hundreds of wants in an effort to fill up their sets or establish usable collections.

CONGRESSIONAL RECORD MAILING LIST.

Ever since the proceedings of Congress have had daily publication and distribution the same antiquated method has been employed in preparing the copies for the mails. When the list was small the making of wrappers, printing of franks thereon, and addressing them by means of the little printed stickers, applied by a hand-operated mailing machine, worked no great disadvantage and was considered adequate. The increased expense of such a system as the work grew in importance was not considered, for with an enormous printing force at hand the setting of the type was easily accomplished, without regard to its actual cost both in labor and type.

An investigation in the interests of other classes of mailing revealed the fact that the sending out of this great congressional daily could be accomplished in conjunction with our other work at a great saving to the Government.

The wrappers could be prepared complete with but one operation at the rate of 9,000 per hour, and the entire operation of the system, with proper supervision, could be intrusted to inexpensive stencil cutters and machine operators.

In consequence of this discovery it was decided to give the new system a trial, and for the Sixtieth Congress, first session, over 28,000 copies of the Congressional Record were satisfactorily mailed daily under the new process.

The results far surpassed our most sanguine expectations, even laboring under the difficulties of a new system and lack of experience and suitable supplies.

No comparative statement can be given to exhibit the actual saving, but it has doubtless been extensive. Besides this the Government is keeping pace with outside enterprises in the use of up-to-date labor-saving devices.

OFFICIAL GAZETTE MAILING LIST.

With the first of the calendar year this office also assumed charge of the mailing of the entire edition of the weekly issues of the Official Gazette of the Patent Office. The same mailing system is used for this purpose, and we are able to get this much-sought-after periodical in the hands of the subscribers without any delay.

By abandoning the expensive manila envelope heretofore used, and substituting a plain wrapper, the expense has been reduced 60 per cent.

OTHER MAILING LISTS.

Besides this great daily run of over 28,000 names for the Congressional Record, and the weekly run of 6,300 names for the Official Gazette, lists of libraries are retained aggregating 9,000 names.

There are also smaller subscription lists for the Experiment Station Record, Monthly Weather Review, Army List and Directory, Navy and Marine Corps List and Directory, Signatures of Public Land and Pension Decisions, Crop Reporter, Schedule of Steamers, and our own Monthly Catalogue.

That the small force at our disposal can accomplish all this work proves the simplicity and adequacy of the system, and indicates that any number of mailing lists could be operated with but a corresponding increase in ordinary clerical help, for at no point does the system develop specialists, although experts are desirable.

GRATUITOUS DISTRIBUTION.

The conviction that public documents should not be given away is but strengthened by experience in handling them. The action of the Agriculture Department in restricting the distribution of its publications has not lessened the popularity of the issues but increased it.

The Library of Congress is also referring inquiries to this office rather than indiscriminately distributing its valuable publications. The Bureau of Education is rapidly turning over its surplus and referring most of its calls from individuals to this office for quotation of price.

This is all tending in the right direction, and the extensive advertising which we are giving to the publications of the various departments is full reimbursement for the value of the books turned over for distribution by sale, which form of distribution is proving itself the most logical and effective means of properly placing government publications.

Nothing should ever be done to hinder the presentation free by the publishing offices to collaborators, scientists, and institutions of learning of their publications, but a general gratuitous distribution should never be permitted. If all the mailing lists in the various departments were used, as in the Forest Service, to advertise the issue of a publication, stating that there is no general free distribution, but that it can be obtained at a certain price from the Superintendent of Documents, an equal number of copies would reach those really interested as is now accomplished by sending out the books themselves to the entire list.

CENTRALIZING DISTRIBUTION.

Again I desire to make a plea in behalf of this most necessary reform in connection with the document question.

Nothing but the centralizing of distribution can prevent a repetition of the present congestion in the libraries and their anxiety to be relieved of their undesired surplus. It will always be a question of sending out in duplicate or triplicate, and the gradual return to this office after they have ceased to be of value.

No Member of Congress desires to embarrass the libraries in his district by sending books for which there is no room or call. Nor would he care to duplicate the sending of a department or of another Member or Senator. Yet at present this all happens, because there is no place where such duplications can be detected and reported.

Then, too, with so many distributors, requests are constantly going astray, whereas were there but one Superintendent of Documents to supervise the work of the distribution and sale of *all public documents*, whether congressional or departmental, the problem would be solved satisfactorily. The present condition represents a reversal of the popular proverb, "Willful waste makes woeful want," for no argument is necessary to reveal the fact that "woeful want" of proper supervision "makes willful waste" of thousands of valuable publications.

A BRANCH POST-OFFICE.

Permit me to renew my recommendation for the establishment in connection with this office, in the annex building, of a branch post-office.

The increase in volume of shipment up to the present time more than justifies the request made last year and if continued will make such a branch absolutely necessary.

During the past year this office sent to the city post-office for delivery over 489,940 packages, weighing approximately 550 tons, as against 175,000 packages and 500 tons last year.

The establishment of a branch office would save the extra hauling and do away with the handling and checking which is now necessary at the post-office of every package forwarded. The establishment of such a branch could be easily obtained, the more so as it would greatly relieve the already overburdened workers at the city post-office. Such a request would not be unusual, as all large mail-order houses are equipped by the Government with branch post-offices.

RECENT LEGISLATION.

As the first heading under "needed legislation" in my last annual report I requested the enactment of a law directing the Superintendent of Documents to furnish depository libraries in unbound form as soon as issued all congressional documents and reports other than the annuals and serials which were provided for immediate delivery under the act of March 1, 1907.

Such a law was enacted on January 15, 1908, and the distribution was made to cover the entire session. This enactment has met with general approval and called forth expressions of appreciation from many prominent librarians. A full report on this question, embodying all documents referring thereto, was issued among the Notes of General Interest in the Monthly Catalogue for January, 1908.

This act also modified the earlier provisions in relation to the numbering of the annual and serial publications by providing for their inclusion in the sets delivered to the congressional offices and libraries. Such legislation was necessary on account of the quick reference required in these repositories, a question which, though carefully considered and decided upon before the law of March 1, 1907, was proposed for enactment, was found to work hardship and confusion when actually applied. While much of the value of the original proportion has thus been sacrificed, the immediate delivery of the annuals and serials will partially compensate for the loss of the single-edition idea.

This legislation also accomplished another great good, though it is not therein specifically expressed. This is in connection with the issue of a full monthly catalogue, which will now be absolutely necessary, as the congressional documents and reports will be immediately obtainable. No change will be made in the catalogue until the commencement of a new volume in July, 1908, when the elaborated method, with the cumulative index as its chief feature, will be adopted.

NEEDED LEGISLATION.

Can not the repeal of that portion of section 61 which limits the sales to one copy to an individual be obtained? It greatly hinders our work and complicates our sales without any advantage to any one.

This provision was originally inserted to prevent booksellers from cornering the market on desirable publications, a practice which had become common, and which worked hardship to those who were interested in public documents. Since the law now permits the Superintendent of Documents, with the approval of the publishing office, to reprint any public document for which there may be a demand, it is now impossible for such a condition to exist, and the restrictions of the law operate only as a hindrance to our sales.

A law should also be at once enacted permitting the Superintendent of Documents to appoint a board for the condemnation of surplus public documents which have been superseded by later editions or are useless because of their age or condition. Now he is forced to store these useless books and keep an accurate account thereof, and it costs \$10,000 a year to do this—money absolutely wasted. With permission to condemn and sell as waste paper such public documents as are useless, he could keep his stock down to a working basis and convert worthless material into cash. Nearly 2,000,000 books and pamphlets are now on hand awaiting such condemnation proceedings, occupying valuable space, and serving but to accumulate dust and vermin.

Then, too, the provision relative to an itemized annual report should be repealed, as it is of no practical value.

THE MINNETONKA CONFERENCE.

That public documents are becoming of interest to libraries was manifest at the round table on that subject provided at the thirtieth annual meeting of the American Library Association, held at Lake Minnetonka, Minn., on Tuesday morning, June 23, 1908.

The Superintendent of Documents attended and addressed the large number of members assembled on the subject of Popularizing Government Publications. Considerable discussion was indulged in, and papers were read on the ways and means and on the difficulties encountered in obtaining the desired results. At the close of the session a resolution was adopted expressing the gratification of the association at the attendance of the government's representative, and recording its "sincere belief that such meetings promote a better understanding among librarians of the work, plans, and purposes of the Document Office," and that such discussions should be an annual feature of the association's gatherings.

It is my opinion that the present harmonious relations between the libraries of the country and this office are largely due to these public document conferences.

CONCLUSION

So far as the mail-routing system is concerned, it is in satisfactory operation, but it can never be fully developed until we are moved and settled in the commodious new quarters now being prepared for us in the annex building. Every false or unnecessary motion or operation which has developed has been abandoned as fast as existing conditions would warrant.

The stock inventory is a practical, operative reality instead of a questionable theory, and its development has been gratifying.

The entire force is active and interested in its work, and deserves great credit for its attention and industry. Some resignations during the year have deprived us of tried and valued workers and made it necessary to take in and teach several who were entirely ignorant of public document issues or the methods employed in cataloguing or disposing of them.

Changes in personnel are annoying, and vitally affect the work. Such readjustment of salaries should be made as will increase the interest of those now employed and at the same time make it easy to obtain competent help to fill vacancies as they occur.

Respectfully submitted.

WILLIAM L. POST,
Superintendent of Documents.
