GOVERNMENT PRINTING OFFICE,
OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 5, 1904.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1904.

Very respectfully,

F. W. PALMER,
Public Printer.

THE PRESIDENT OF THE SENATE PRO TEMPORE.

ANNUAL REPORT
OF
THE PUBLIC PRINTER
FOR
THE FISCAL YEAR ENDED JUNE 30, 1904.

To the Senate and House of Representatives:

The number of requisitions for work in the Government Printing Office during the summer and autumn of 1904 far exceeded that of the corresponding seasons in any previous year, and the increased volume of the product was without a parallel in the history of the office. The explanation of this increased demand may probably be found in the establishment of a permanent Census Bureau; in the organization and operation of the Department of Commerce and Labor; in the increasing demand in both Houses of Congress that hearings before standing committees shall be printed; and in the growing interest of the public in all official information relating to the recently acquired insular possessions.

This increase in the sources of official requisitions on this office for work suggests the importance of calling the attention of Congress to the need of additional room in which the work may be executed. When the excavation for the foundation of the new fireproof extension of the Government Printing Office was commenced nearly six years ago, the belief was entertained by those in charge of the construction of the building that all the employees in the several divisions could be accommodated with sufficient room within its walls, and perhaps the necessity be obviated for the renting of space in outside buildings for storage purposes. But when the time arrived for the occupancy of the new building, the fact was developed that the demands upon the office for work from all Departments of the Government in five years had increased to such an extent that a considerable portion of the old building was necessarily utilized for the uses of employees and the storage of material. As stated in previous reports by the Public Printer,

a portion of the old building is built of inflammable materials, and is therefore liable to destruction by fire. It is therefore deemed important that authority should be granted by Congress at an early day for the erection of a fire-proof structure on the site of the old building conforming as nearly as practicable to the seven-story extension fronting on North Capitol and G streets.

In June, 1904, contracts were made by the Public Printer with the Mergenthaler Linotype Company for the purchase of 46 double magazine typesetting machines, at a cost of \$3,600 each, and with the Lanston Monotype Company for 28 typesetting machines, at a cost of \$3,150 each. The time for the delivery of these machines, in accordance with the provisions of the contracts, was three months, and for their trial by the Government Printing Office, sixty days. On the delivery of the Mergenthaler Linotype machines, 7 of them were installed in the Job Division, 35 of them in the Congressional Record Division, and 4 in the branch of this office in the Congressional Library building. The purchase of a limited number of these machines was made with the view of testing the practicability of their use in the publication of the widely varying kinds of official documents issued by this office. At the date of publication of this report, sufficient time has not elapsed to determine the questions of their economy or adaptability. It has been the policy of the office in the selection of operators for both classes of typesetting machines to choose compositors already in service here, and they have shown thus far commendable skill in their work upon the machines.

The report of the Superintendent of Documents is herewith submitted; also tabular statements containing detailed information showing the amount of work executed and the disbursements made in the Government Printing Office during the fiscal year ended June 30, 1904.

No. 1. Financial statement of the business of the Government Printing Office for the fiscal year ended June 30, 1904, and the conditions of the appropriations July 1, 1904.

No. 2. Recapitulation of statement of condition of appropriations July 1, 1904.

No. 3. Classified statement of payments, by appropriations, for the fiscal year ended June 30, 1904.

No. 4. Showing expenditures for labor, material, paper, and lithographing and engraving during the fiscal years 1897 to 1904, both inclusive.

No. 5. Showing moneys received by the Public Printer during the fiscal year ended June 30, 1904, the sources from which received, and to what accounts deposited in the Treasury.

No. 19. Statement of contracts made for material (except paper).

No. 20. Statement of contracts made for lithographing and engraving.

No. 21. Statement of proposals received by the Joint Committee on Printing for furnishing paper for the public printing and binding from March 1, 1904, to February 28, 1905.

No. 22. Statement of proposals received for supplying stationery, fuel, forage, ice, and miscellaneous items.

No. 23. Statement of proposals received for supplying material.

No. 24. Statement of proposals received for lithographing and engraving.

No. 25. Showing the number of persons employed in the public printing and binding, the length of time each was employed, and the amount earned by each.

Respectfully,

F. W. PALMER,
Public Printer.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

GOVERNMENT PRINTING OFFICE,
OFFICE OF SUPERINTENDENT OF DOCUMENTS,
Washington, D. C., October 31, 1904.

SIR: I have the honor to submit a detailed report of United States public documents sold July 1, 1903, to June 30, 1904, as required by law.

I also make a brief summary of the work of my office, and include a list of State and Territorial libraries and institutions designated as depositories of United States public documents by Senators, Representatives, and Delegates in Congress, together with a list of documents transmitted to such institutions during the fiscal year.

Very respectfully,

L. C. FERRELL,
Superintendent of Documents.

Hon. F. W. PALMER, *Public Printer.*

MOVING THE DOCUMENTS OFFICE.

Early in 1903 it was determined to move the Documents Office from the Union Building, where it had been located since its organization, into the old building formerly used as the Government Printing Office. To plan and execute the removal of nearly 1,000,000 books and pamphlets, office furniture, etc., without interruption to the current work of the office was no light task. The work was accomplished, however, without any hitch or delay to the public business, and I desire to express my thanks to the employees of the office, whose zeal and intelligent assistance rendered the result possible.

The preliminary work was begun in July, 1903, and consisted in shifting about 300,000 books and pamphlets from large bookstacks into new boxes made for the purpose. These boxes were subsequently moved and properly placed without disturbing their contents. The entire work of removal involved the handling of about 800 wagon loads.

AMENDMENTS TO THE PRINTING LAWS.

A very important resolution was passed at the last session of Congress and approved by the President March 28, 1904. It authorizes the Superintendent of Documents to order reprinted any document needed for sale, provided the approval of the head of the office in which the document originated shall be obtained.

Under the provisions of this resolution about 25,000 documents have been reprinted since July 1, 1904. The greater number of these being the small, cheap bulletins issued by the Department of Agriculture, for which there is a great demand by people engaged in agricultural pursuits.

This office prepared a bill, which was introduced in the House at the beginning of the Fifty-eighth Congress, providing for the printing and binding of a library edition of documents and reports, to be bound in half morocco, for distribution to depository libraries. The bill requires that the "library edition" shall be printed when the first edition of any document or report shall be issued, and that the same shall be promptly bound so as to be immediately available for distribution.

At the conference of the American Library Association, held at Niagara Falls in 1903, the substance of the bill heretofore referred to was approved and its passage urged upon Congress.

At the writing of this report there remains but ten volumes of the documents and reports of the Fifty-seventh Congress to be distributed to depository libraries. The distribution is, therefore, several months in advance of any period in the past, and is about as close as it can ever be under the operation of the law of 1895. The use of public documents in the schools and colleges, and by the public, is increasing continually, as is evidenced in the table showing the receipts, distribution, and sale of documents over a period of years. It is, therefore, of the greatest importance that the distribution to depository libraries be made before the documents become stale. This can not be done unless the printing laws are amended.

Attention is invited to the fact that no provision has been made by Congress for printing the extra number of documents required to supply depositories authorized by sections 501 and 502 of the Revised Statutes, to be named by the 30 or more additional members of the House elected to the Fifty-eighth Congress under the apportionment of the twelfth census.

PRINTED CATALOGUE CARDS.

In order to render the public documents of more service to the people I began in February, 1904, the distribution of printed catalogue cards to depositories. It was my intention to print a card for each subject indicated, but I soon found it impracticable to do so on account of the great increase in labor involved. I am, therefore, now distributing but one card for each document, indicating the several subjects, so that librarians may copy and put on the proper headings. Some librarians complain that they can not do the work involved in copying, and have asked for the privilege of purchasing the duplicates. It is probable that some satisfactory method will soon be adopted to supply the duplicate cards needed to perfect this great work. From February to October 1, 1904, there had been distributed 315,000 printed cards.

The headings of the printed cards distributed are made to conform as nearly as possible to entries in the official catalogue prepared by this office. This form of heading was approved by a majority of the catalogue section of the American Library Association at the Niagara Falls conference, 1903, and has recently received the written approval of 150 designated depositories against 50 which favor other forms. Early in the summer a circular letter, with sample cards showing the form of heading used by the Library of Congress, the A. L. A. Publishing Board, et al., and the Office of the Superintendent of Documents, was sent to each designated depository, State and Territorial library, with request that the cards be marked with preference and returned. As stated heretofore, 200 libraries responded. One hundred and fifty favored the heading used by this office, 23 that of the A. L. A. Publishing Board, 21 that of the Library of Congress, and 6 "don't know."

This expression of approval of our work from a large majority of the librarians whom we serve is very gratifying. The approval is not only satisfactory in point of numbers, but it is especially gratifying because the indorsements come from so many librarians eminent in their profession and qualified to speak with authority with reference to the cataloguing of United States public documents.

Following (p. 12) is a copy of the circular notice, also of a series of the cards accompanying the same.

Notice.

Inclosed are samples of five entries for United States Government documents, each printed in three different styles, viz:

- A. The form now followed by the Library of Congress in the printed cards for all Government publications.
- B. The form adopted by the Massachusetts Library Club, the Massachusetts State Library, and the A. L. A. Publishing Board.
- C. The form followed by the Superintendent of Documents in the printed cards which he sends to depositories.

Please express your order of preference by numbering the cards and return them, with the name of the library, to the Superintendent of Documents, Washington, D. C.

PUBLICATIONS.

The following publications were issued by this office during the fiscal year:

	Pages.
Ninth Annual Report of Superintendent of Documents, 1903.....	64
Author Headings for United States Public Documents	39
Document Catalogue (Comprehensive Index), volume 5, Fifty-sixth Congress. 1, 105	
Document Index (Consolidated Index), Fifty-seventh Congress, second session	250
Monthly catalogues, June, 1903, to May, 1904 (12 numbers).....	726
Price List of Laws of United States.....	2
Total	2, 186

There is now in press the Document Catalogue (Comprehensive Index), Fifty-seventh Congress, and the Document Index (Consolidated Index), Fifty-eighth Congress, special, first, and second sessions, in one volume. One volume (List of Publications of the Agriculture Department, 1862-1902, with analytical index, 623 pp.) has been published since July 1.

CATALOGUE SECTION.

There were received for cataloguing during the fiscal year 16,791 documents. Thirty-eight thousand four hundred and forty-five items of Congressional mail were received, and 84,655 cards were written. Two thousand one hundred and twenty pages of the publications of the office issued during the year were prepared in the Catalogue Section.

PUBLIC DOCUMENTS LIBRARY.

In December, 1903, the Library was moved from the Union Building to larger quarters in the old Government Printing Office building with no loss and little damage. The immediate pressure for shelf room to accommodate the constantly incoming flood of new publications has been somewhat relieved by using packing boxes set on edge as substitutes for shelves. Such a subterfuge can, of course, be of only temporary service. Four thousand four hundred volumes of Congressional documents, a complete set from 1817 to 1903, are thus accommodated at present.

During the year the Library has very nearly completed the longest and largest series ever issued by the Government, namely, the bound volumes of the Specifications and Drawings of the Patent Office. The first issue is dated May 30, 1871, and the total number of volumes published up to the close of the fiscal year 1903 is 646. The books are very large, many of them containing more than 3,000 pages. They were issued for a short time weekly, then monthly; then the monthly issue was split into two volumes, and beginning with January, 1903, the issue is proceeding at the rate of three volumes a month. Of the 646 volumes thus far issued the Library has 644, the two missing issues being those for August, 1872, and May, 1880. These it would be glad to secure by exchange for other documents.

The set of Congressional Directories is approaching completion. The total number now in the Library is 170. The earliest one is for the Seventeenth Congress, first session (1821). Of the 43 Congresses which have held 93 sessions since that date, every Congress and every session but four are represented. For two of the unrepresented sessions (34th, 2d, and 37th, 1st), it does not appear that any directories were printed. The two missing sessions for which directories were printed are the 18th, 2d, and the 23d, 2d. The Library would be glad to secure copies of the directories for these sessions in exchange for other documents. Other possible gaps in the collection are of second or third editions, which may have been printed for sessions now represented only by first editions, but these, if they exist at all,

can be but very few. On the whole, the conclusion seems to be justified that hardly more than a dozen numbers are needed to make up a complete collection of Congressional Directories so far as they are known to exist. The earliest issue extant is for the Eleventh Congress (1809). It is in the Library of Congress.

This Library has often been able to supply for the use of officials and investigators public documents that had been unsuccessfully sought elsewhere. A couple of instances may be cited as typical of many.

The Industrial Commission of 1898-1902 was very desirous to find the printed reports of the evidence taken by the House Committee on Agriculture in 1892 during the consideration of certain bills by which it was proposed to restrict and tax such fictitious dealings in agricultural products as are carried on by means of "options," "futures," "puts," "calls," and the like forms of commercial gambling. The Commission had a man out for weeks searching the document collections at the Capitol and elsewhere. Finally he found in this Library what is, so far as known, the only existing copy of the several hundred pages of evidence collected and printed in 1892.

In Hon. George S. Boutwell's "Reminiscences of Sixty Years in Public Affairs," published in 1902, he says of the Joint Committee on Reconstruction (1865-1867), of which he was a member: "A record of its proceedings was kept which was printed recently by order of the Senate" (v. 2, p. 36). This statement came to the attention of a Boston author who is writing a history of the period during which the committee was in existence. As the committee was made up of very prominent men, as it framed the fourteenth amendment to the Constitution, as its proceedings had been held in confidence during the life of the committee, and as the journal of its proceedings might be expected to show the propositions tentatively submitted and the votes of the members upon them, it was evidently a document of more than usual historical interest. Early in 1904 a call was made on the great libraries of Boston and vicinity for the desired document. Search was made on the basis of Mr. Boutwell's statement of 1902 that it had been printed "recently." To the surprise of all concerned the document was not found. After much unavailing search, Mr. Boutwell was appealed to, in the hope that he might fix the date of publication more definitely than by the word "recently." He replied that he thought the committee's journal had been printed "about 1880." Further search based on the date given by Mr. Boutwell was still unavailing. Then the inquiry was extended to Washington, and was active and widespread, but not till it came to the Public Documents Library was it successful. The document was ordered printed by simple resolution of the Senate adopted February 26, 1884, and is of 49 pages only. The number of copies ordered to be printed was 6,000. This number having been issued only twenty years ago, it is most unlikely that the copy in the Documents Library is the only one in existence, yet it is certain that the document could not be found in many of the larger libraries of the country nor in the official depositories of public documents in Washington.

Both these instances, with others that could be cited, demonstrate the need of additional legislation to secure the preservation of the numerous publications of Congress and of Congressional committees which are not included in either of the numbered series of Congressional documents. For the numbered series there is ample provision. They are supplied to the principal libraries throughout the country in bound form, and are in most cases carefully preserved. According to law, the Journal of the Joint Committee on Reconstruction should have been made a numbered document. Had the law been complied with in this respect the journal would have been preserved; but for preserving the numerous and often important hearings which are printed on the order of the committees of Congress, like the "Fictitious dealing in agricultural products" mentioned on a preceding page, there is no legal provision whatever. They are not regularly supplied to any place where documents are pre-

served, not even to the libraries or document rooms of the Senate and House, nor to the Public Documents Library. Thousands upon thousands of pages of such hearings and other proceedings of and before committees are annually printed, of which probably not a quarter reach any custody where they will be preserved for future reference. The Public Documents Library collects as many of them as it can through the courtesy of the chairmen and clerks of committees, but the need is keenly felt of legal requirement to secure the supply of these public documents as fully and regularly as public documents of other classes. Twice Congress has enacted legislation intended by its promoters to secure the delivery and preservation of committee publications, but in both cases it has proved inoperative.

The following table shows the numerical strength of the Library in documents and maps at the close of the fiscal year 1904, and also its growth during that year:
