INTRODUCTION

Since the *Monthly Catalog of United States Government Publications (MOCAT)* was first published one hundred years ago, there have been few major format changes. Before this year, the most dramatic changes occurred in 1976, when the Anglo-American Cataloging Rules were first used to create catalog records for the MOCAT and, at the same time, these records were made available in electronic form through entry into the OCLC system. Of equal, or perhaps greater significance, are the changes to the MOCAT that are now taking place.

Beginning in 1996, a new CD-ROM version of the MOCAT will be introduced. Most of the features of the traditional paper version are included in the CD-ROM version. An online version of the catalog is now available on the World Wide Web. These new MOCAT formats will make it easier for users to retrieve information on Federal publications. The paper version of the MOCAT will continue to be available with shorter entries and a keyword title index. The microfiche version will be discontinued after the December 1995 issue. The magnetic tape version of the MOCAT will continue in its present form.

Users now have access to cataloged records of Federal publications in the following formats:

*Monthly Catalog of United States
Government Publications on CD-ROM*
(Monthly issues cumulate from beginning of year includes cumulative indexes)

*Monthly Catalog of United States
Government Publications (paper edition)*
(This new paper version of the MOCAT has short entries and a title keyword index (the CD-ROM version will include other indexes formerly included in paper version))

Online version of MOCAT available on GPO Access Federal Locator service via World Wide Web. (Users of the online Locator service can identify publications and locate a depository library that includes them in their collection. New records may be accessed daily on the Internet at: http://www.access.gpo.gov/su_docs)

1912-1913

During the year 1912-1913, the work of the Bureau of the Census was largely devoted to the preparation of the 1912-1913 report on the population of the United States, which was published in May, 1913.

The report contains a detailed account of the population of the United States, and of the changes in the population since 1900. It also contains a detailed account of the distribution of the population by sex, age, and race.

The report is a valuable source of information for the study of the population of the United States, and for the study of the changes in the population since 1900.

The report is a valuable source of information for the study of the population of the United States, and for the study of the changes in the population since 1900.

USERS' GUIDE

Catalog Arrangement and Indexes

The bibliographic entries in the *Periodical Supplement* are arranged in Superintendent of Documents classification number order. Each record is also assigned a unique catalog number, which consists of a two-digit prefix representing the catalog year, followed by a sequential number beginning with 1 in the first issue of each year. Within this arrangement, the publications of each Government author are further identified by the name and address of the issuing agency.

Catalog entries in this catalog may be accessed by title keyword index (an alphabetical list of truncated titles, arranged by important words selected from publication titles.)

Please consult the CD-ROM version of the MOCAT for indexing accessed by:

CAPITAL GAINS

1. *General Principles*

The general principle is that capital gains are taxable as income. This is the case for all assets, whether they are real estate, stocks, bonds, or other investments. The tax is levied on the net gain, which is the difference between the selling price and the original cost of the asset.

There are two main types of capital gains: short-term and long-term. Short-term gains are those realized on assets held for one year or less, while long-term gains are realized on assets held for more than one year.

The tax rates for capital gains are generally lower than those for ordinary income. For example, in the United States, the maximum tax rate for long-term capital gains is 15%, while the maximum rate for ordinary income is 35%.

There are several exceptions to the general rule that capital gains are taxable. For example, gains on the sale of a primary residence are exempt from capital gains tax, and gains on the sale of certain types of bonds are also exempt.

Another important exception is the "step-up in basis" rule, which allows the cost basis of an asset to be increased to its fair market value at the time of the owner's death. This means that the estate of the deceased will not have to pay capital gains tax on the asset.

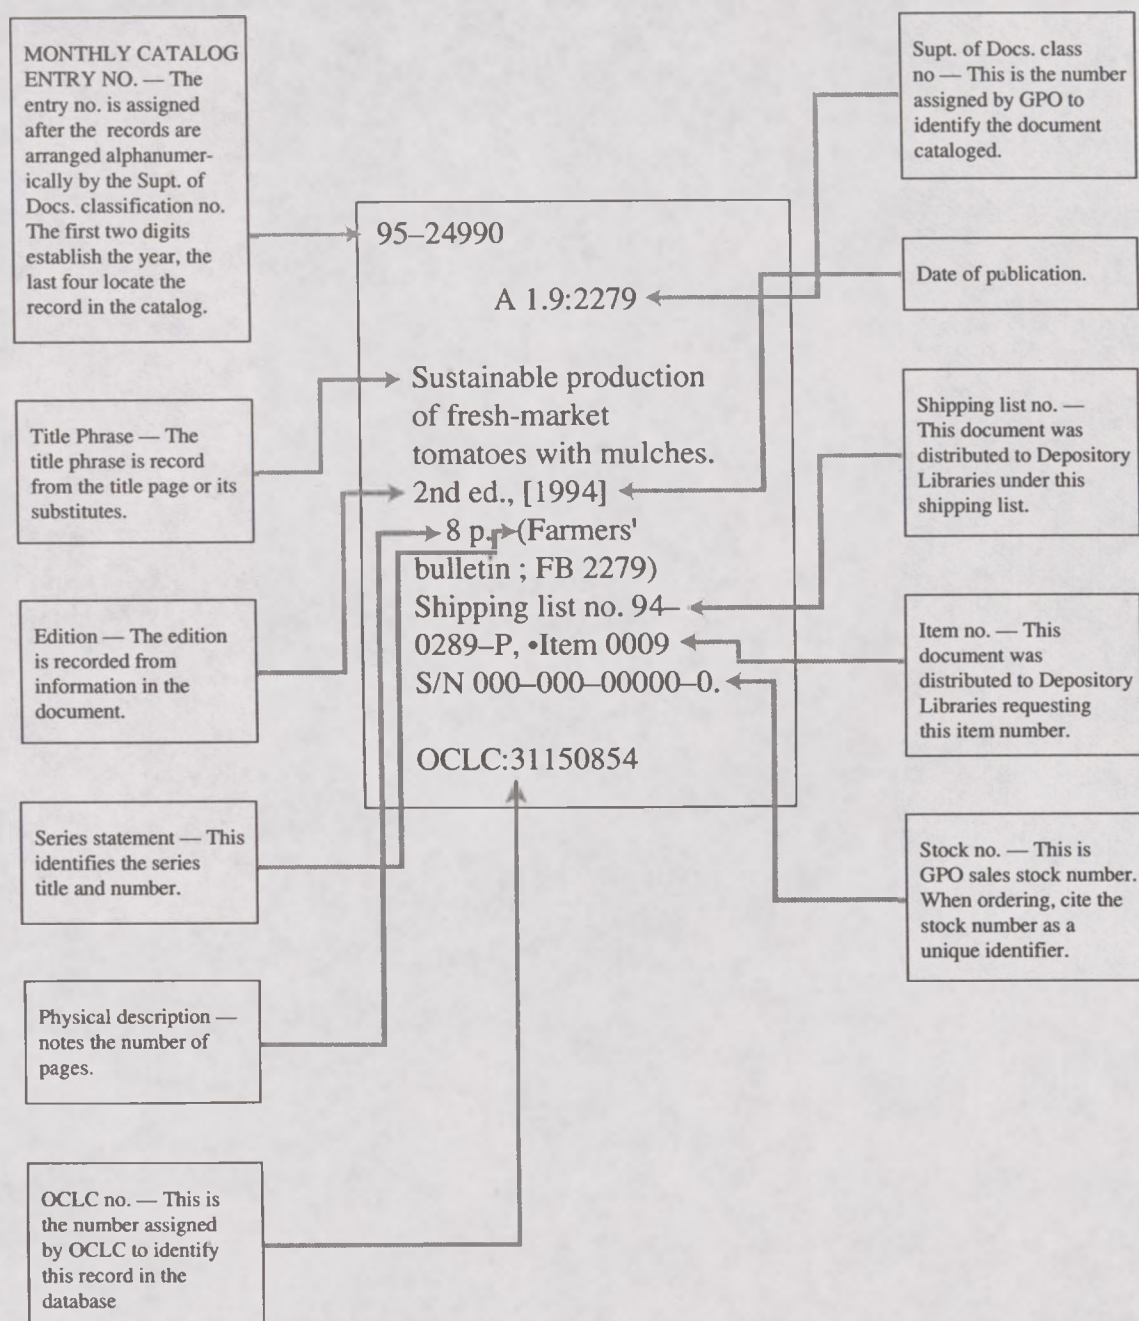

It is important to note that capital gains tax is only levied on the net gain. This means that the cost of the asset, including any commissions or fees, must be subtracted from the selling price to determine the net gain.

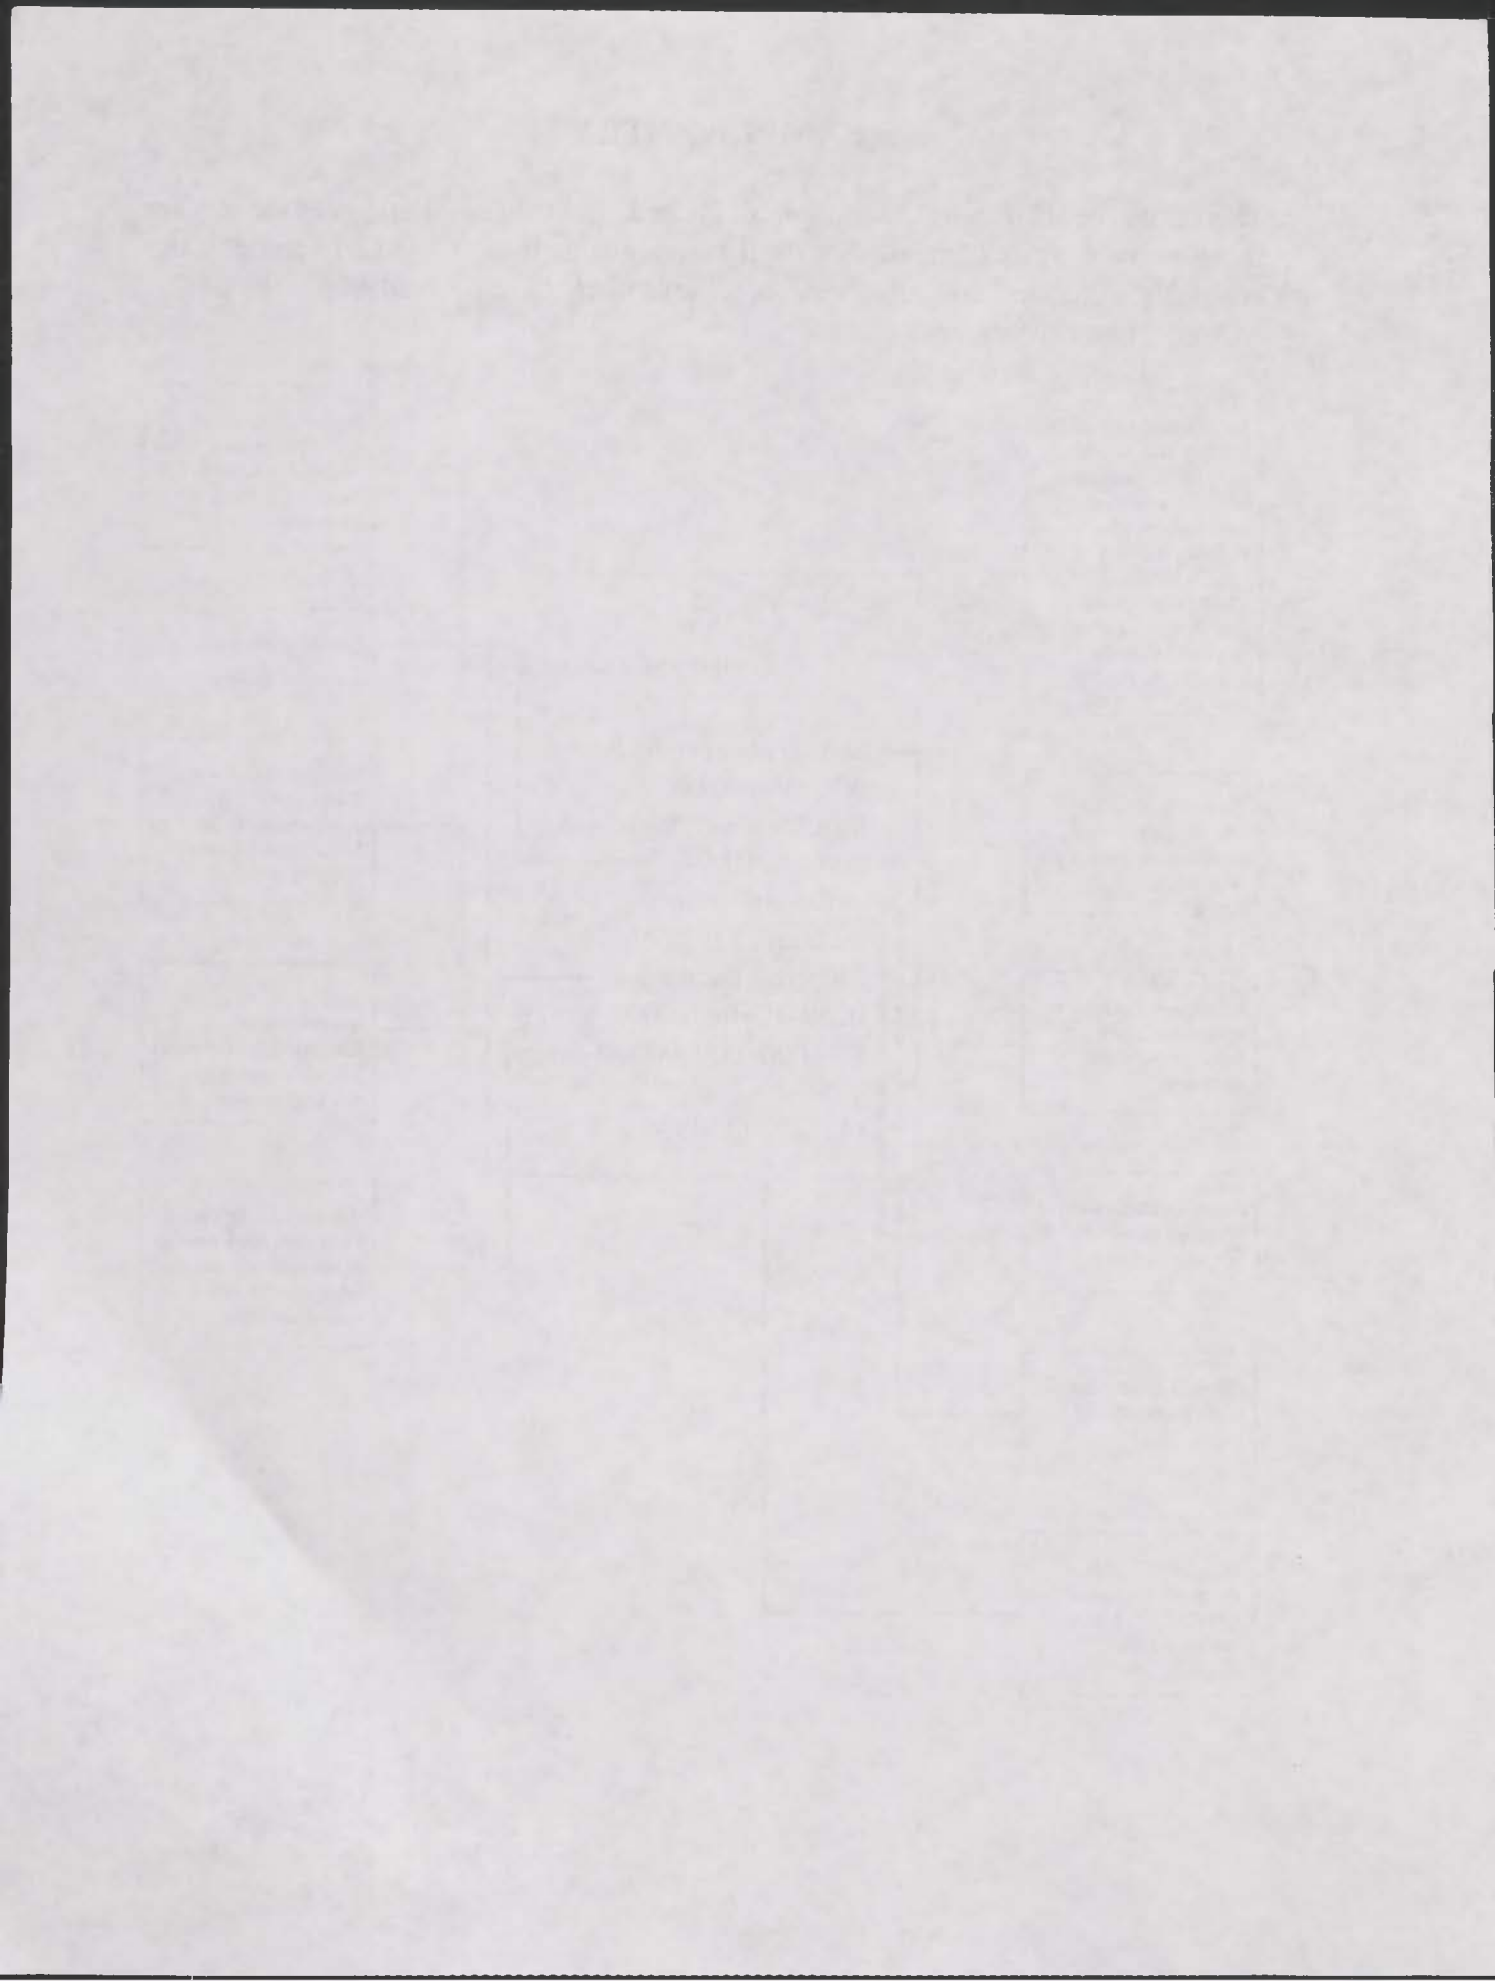

Finally, it is important to understand that capital gains tax is not levied on the entire gain. Instead, the gain is first reduced by any losses realized on other assets during the same tax year. This is known as the "netting" rule.

In summary, capital gains are taxable as income, but there are several exceptions and special rules that can reduce the tax liability. Understanding these rules is essential for maximizing the efficiency of your investments.

FEDERAL DEPOSITORY LIBRARY PROGRAM

The Federal Depository Library Program was established by Congress to provide free public access to Government publications. Nearly 1400 public, academic, State, and law libraries serve as an information link with the Federal Government by maintaining collections of Government publications. These collections, which are tailored to local needs, are open to the public. Fifty-three of the libraries are designated as regional depository libraries. They have the responsibility of retaining material permanently and providing inter-library loan and reference services in their regions.

Copies of documents no longer available through the GPO Sales Program can usually be found in regional depository collections. To determine which depository libraries have selected copies of publications listed in this catalog, consult the Superintendent of Documents World Wide Web site and use the Locator Service. A complete listing of regional depositories follows. To obtain a complete listing of all depository libraries, write to:
