OFFICE OF
SUPERINTENDENT OF DOCUMENTS
WASHINGTON

JULY 1, 1907.

SIR: In accordance with the provisions of section 61 of the general printing act, approved January 12, 1895, I have the honor to submit the Thirteenth Annual Report of the Superintendent of Documents covering the fiscal year, July 1, 1906, to June 30, 1907.

Very respectfully,

WILLIAM L. POST,
Superintendent of Documents.

Hon. CHAS. A. STILLINGS,
Public Printer.

THIRTEENTH ANNUAL REPORT OF THE SUPERINTENDENT OF DOCUMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 1907.

Before entering upon a discussion of the many interesting features of the work of this rapidly growing division, I here present a general recapitulation of the statistical matter which forms the bulk of this report:

Publications received, distributed, and sold from July 1, 1906, to June 30, 1907.

Received from—

Agriculture Department.....	281,161	
Commerce and Labor Department.....	7,234	
Interior Department.....	656,977	
Justice Department.....	480	
Navy Department.....	12,939	
Post-Office Department.....	576	
State Department.....	10,352	
Treasury Department.....	6,295	
War Department.....	14,541	
		990,555
Government Printing Office.....		1,018,893
Bureau of American Republics.....	5	
Civil Service Commission.....	1,905	
Interstate Commerce Commission.....	113	
Library of Congress.....	12,332	
Smithsonian Institution.....	48	
		14,403
Senate folding room.....	129,409	
House folding room.....	29,899	
		159,308
Miscellaneous departments and libraries.....	364,307	
Miscellaneous libraries.....	43,409	
Public document library.....	57,315	
		465,031
Exchange account.....		2,949
		2,651,139
Wrapping account.....		144,666
		<u>2,795,805</u>
Total number of volumes received.....		

Distributed—

Cash sales.....		116,009
Designated depository libraries.....	503,564	
Geological depository libraries.....	74,656	
		578,220

Distributed—Continued.

OFFICE PUBLICATIONS.

The publications prepared and issued by this office during the fiscal year are as follows:

	Pages.
Twelfth Annual Report of Superintendent of Documents, 1906.....	95
Bulletin 7; List of annual and serial public documents that should be regularly supplied to designated depository libraries.....	39
Monthly catalogues, June, 1906-May, 1907.....	434
Price list 10; Laws of United States.....	4
Price list 11; Food and diet.....	20
Price list 12; Water pollution; Water purification.....	8
Schedule of volumes of documents and reports of Fifty-ninth Congress, first session.....	10

AN ITEMIZED REPORT.

In connection with these statistics allow me to call your attention to the absurdity of the requirement of the law that the Superintendent of Documents "shall report annually the number of copies of each and every document sold by him, and the price of the same."

The preparation of this itemized report is seen to be a difficult task, when it is considered that 116,009 books were sold during the past fiscal year, in variety of titles numbering some 6,000; and this great expenditure of time and effort in tabulating these statistics is without any beneficial returns, either from the accounting standpoint or that of official records.

It is not found necessary in large publishing houses to keep the inventory minutely to the single book, nor do they attempt to balance cash returns and stock to the penny. But this is what the law rightly compels the Superintendent of Documents to do, and this can and always should be done.

To itemize a report thereof is, however, a useless task, since an itemized annual report is not even auxiliary to any part of the actual records of the office from which the audit is made.

To avoid the enormous expense annually incurred heretofore in successfully arriving at anything like a correct result in compiling such an itemized statement of cash and books, I found it necessary to install a new inventory system as the basis for the operation of any sort of proper business methods; and even though the law is amended as to the requirement of an itemized report—and this I would urge upon your consideration and that of the Joint Committee on Printing—this system of inventory will still prove invaluable as providing a means for the daily checking between the stockkeeper and the cashier of books and cash and give a daily balance.

PUBLIC DOCUMENTS—OUR SPECIALTY.

Were I asked to write a motto for this office it would consist of the words "Public documents—Our specialty;" and were I to define our interests the definition would embrace the subject of public documents from the inception of each publication as a publication to its final delivery after completion. In other words, we are interested in public documents as to their uniform make-up and mechanical perfection, comprehensive cataloguing, logical distribution, and proper appreciation by the public at large. To these ends we are endeavoring systematically to arrange them and editorially supervise their production, in the hope of eliminating many of the unexplainable eccentricities heretofore complained of; to expend our best efforts in consistently cataloguing them, as a sure means of promoting their use; to quickly distribute them, that they may be available contemporaneously with the interest in their contents, and to advertise them so extensively that their existence and value will be known to all who contribute the means for their production.

AN HISTORICAL RÉSUMÉ.

When this office was organized in May, 1895, it was with few assistants, much lack of information or practical experience, and absolutely no convenient facilities. The offices and storage space supplied were combined in a large barn-like storeroom, conveniently located on the top floor of a rented building. A few desks and chairs were obtained from the Government Printing Office, likewise several inexperienced persons to aid those in charge in their great work of organizing. Only one of the force had had any previous extended knowledge of public documents, and it became this person's duty not only to outline the policy, but instruct the others in carrying it out.

Fortunately some of the others, while not experts in public documents, were specialists as administrators or cataloguers, and the combined efforts brought out, in remarkably short order, an organization which has served as a substantial basis for the improvements which growth of business and development in comprehension of the necessities of the office have demanded.

To attack an entirely new problem, with the only directions available contained in a law the provisions of which presented the most illogical and impossible demands, and to undertake this work months after it was required by law to begin, was to say the least an embarrassing situation. But notwithstanding all these difficulties, a library was started, work on the catalogues and indexes demanded by law was proceeded with, and the sale and distribution of public documents was begun. Along all lines the work rapidly developed, so rapidly in fact that many features of it were neglected, and it was found necessary

to reorganize the office in November, 1897, when the personnel of the office, including the Superintendent, was changed.

At this time closer organization along business lines was attempted and 6 distinct sections formed, each in charge of an experienced clerk; the functions of the sections being indicated by their names, i. e., bookkeeping and correspondence, sales, catalogue, library, mail, and stock.

FUNCTIONS OF THE OFFICE.

It was early found impossible to confine the work of the office to the duties assigned to it, which are here stated in the order in which they are set down in the law, in section 61 (act of January 12, 1895, 2 Supp. R. S., p. 350) and the sections immediately following:

1. To sell at cost any public document in its charge, the distribution of which is not specifically directed in the law.
2. To receive from any Government office any document published for sale, which sale must be made under the provisions of section 61.
3. To have general supervision of the distribution of all public documents (with exceptions as enumerated).
4. To prepare at the close of each regular session of Congress a Comprehensive index (Document catalogue) of public documents.
5. To prepare and print in one volume a Consolidated index (Document index) of Congressional documents.
6. To index such single volumes of documents as the Joint Committee on Printing shall direct.
7. To receive all accumulations of documents from the several Executive Departments, bureaus, and offices of the Government, and annually to take over their surplus for distribution or sale.
8. To prepare and publish a Monthly catalogue of Government publications, which shall show the documents printed during a month, where obtainable, and the price thereof.
9. To thoroughly investigate the condition of the designated depositories.
10. To distribute the documents as issued to the designated depositories.

Several other duties were assumed, or rather were forced upon the office, as a natural result of its establishment, the most important of which was that of operating as—

A BUREAU OF INFORMATION.

Through the natural desire for enlightenment as to public documents and what they contain, this office has become a regular bureau of information on subjects dealt with in governmental literature, and much time is now devoted by our document experts to instructing people, by correspondence, how to procure books of interest to

them, or informing them where they may find them for consultation. Thousands of letters have been answered this year relative to these matters, and our research mail is constantly growing. No other feature of the office presents more promise of fruitful future development than this, and as it is meeting a long-felt want, its scope of usefulness is constantly increasing.

The idea is to develop a central information agency, where all inquiries relative to public documents or what they contain can be forwarded for reply. We are gradually training persons who are specially adapted to research work, and are digging out from the mass of useless material the really important titles and information.

Not only does this research benefit individual cases, but it is developing in this office a fund of information which will always prove a valuable asset. More prominence will be given to this feature of our work, and we feel sure that the results will justify the expenditure of time and effort.

THE CLEARING-HOUSE IDEA.

Another important function, which has evolved naturally through demand, is that of operating as a clearing-house of Government publications for the libraries.

We are in constant correspondence with hundreds of libraries and educational institutions, and are ever ready to receive from them surplus public documents for which they have no need and to supply in their stead those books for which there is a demand.

This work would be to a great degree unnecessary if the distribution were accomplished from a central agency, but until this can be accomplished this clearing-house idea provides a partial remedy and places public documents where they can be used.

What is needed in this work is a simple means of keeping track of library wants in such a manner that when the publications drift in they may be shipped at once to libraries wishing them and not put in stock or condemned. Very soon a scheme will be presented for trial.

If we are kept posted as to the library wants and our records are made in such a manner that the receipt of a book will insure its delivery to fill a need, the problem of storage of useless books will be solved, for we can then gauge the supply retained by the demand.

It is somewhat disconcerting, however, to correspond almost weekly with certain libraries, furnish them instructions relative to the supply of books, and do all in our power to convince them that the proper place to apply for public documents or for information concerning them is this office, and then have them write to a Member of Congress or their Senator requesting him to intercede with this office in order to secure the receipt of something desired, or, worse still, address their communications to the Public Printer or the Librarian

of Congress, causing extra clerical labor to those already overburdened officials.

One startling instance of unpardonable ignorance was revealed by the return of a question circular from a library which had been a depository since 1858, and had been receiving the usual shipments and invoices ever since that date, with the statement, that so far as they knew they were not a depository and that if they were "when and by whom were they designated?" In such an instance words are useless, but this case is cited as an extreme of which there are many alike in kind, if not in degree.

If the clearing-house idea is to succeed it must be by hearty cooperation on the part of all the librarians of the country. They must come forward with information when requested, and put their shoulders to the wheel in securing legislation to authorize the fulfilling of their desires. And in return for what we are able to do for them, we desire that the fact of the existence of this office and some idea of the functions assigned to it be revealed by them to the public which they serve.

As soon as the vast accumulation now being sorted is listed, printed copies of the list will be sent broadcast, and those desiring any of the books registered therein as in stock will be supplied so long as the supply lasts. After this thorough circularizing of the libraries of the country has been accomplished, a sufficient time will be allowed for selection, and then all of the accumulation, except a limited supply reserved for official use, will be sent to the warehouse to await Congressional action in condemning them for sale as waste paper.

At the same time the libraries will be given the opportunity to return their accumulations of documents, which lack of space has heretofore caused us to refuse to handle.

It is hoped that in the future such close relations can be established with the libraries that their duplicates or unused documents can be returned as soon as they discover they are not desired, that they may be redistributed while they are of current interest.

The plans of this office embrace the development of this clearing-house feature to the fullest capacity.

CONGRESSIONAL EXCHANGE.

Following out the clearing-house idea fully, we have developed another form of distribution, which has proved of mutual advantage to both this office and the Senators and Members who have availed themselves of the opportunities which it offers of securing publications they desire in exchange for those which are of little use to them or to their constituents.

As a means of procuring publications for which we may receive orders and at the same time of supplying those books which Senators

and Members desire, and which under the law this office can not give them, we have instituted a method of exchange on the basis of value for value. This has become very popular and productive of good results to all concerned.

To the city Senator or Member an exchange of a portion of his useless quota of horse books for some valuable law or historical volumes is truly a great benefit, and this office thereby obtains a fresh supply of those works most sought after by purchasers.

But the difficulty lies in getting in touch with those Senators and Members who desire such service. If we had access to their quotas it would be very easy to determine what class of literature was most desired by individuals, and we could then arrange exchanges, so as to put into circulation many hundreds of thousands of dollars worth of material which has lain for years in storage because the Senator or Member, who alone could dispose of them under the law, had no use for them, whereas those desiring copies of these very documents to supply the repeated demands of their constituents are compelled to obtain legislation for new editions, such legislation operating, of course, to increase the already unappreciated quotas. At present these quotas are distributed from the folding rooms of the Senate and House, and the statistics thereof are held there as confidential.

On many occasions the distribution of special publications for Congress has been accomplished by this office, and in the case of the "Messages and Papers of the Presidents" and the "Flags of Maritime Nations" hundreds of duplications were avoided, to the gratification of Senators and Members.

If all the distribution were accomplished from this office, much could be done not only in detecting duplications but also in securing the best distribution of publications.

If nothing more radical can be accomplished, legislation should certainly be enacted turning over to the Superintendent of Documents for distribution all books which remain undistributed two years after their issue.

EDITORIAL WORK.

The editorial work which this office is performing has been undertaken in self-defense, in an effort to prevent the errors and omissions which tend greatly to involve cataloguing or listing of Government publications.

Employing as we do expert cataloguers and persons trained in all branches of bibliographical science, it is natural that we should be called upon to direct the editorial matters connected with the printing of Government literature, in so far as these matters relate to the actual manufacture of the book, the proper construction and placing of the "apparatus," or the consistent titling and uniform lettering of the volumes.

In order to accomplish this work an editorial section has been established, and already good results are apparent in many ways. It is difficult to make changes in long-established customs, no matter how antiquated and obnoxious they may have become, but it must be admitted that, with but few exceptions, our efforts to benefit the publications bibliographically and typographically have been met with hearty approval and cooperation.

This work is only in its trial stage, but it is hoped that it will prove so fruitful of good results that its scope may be enlarged to cover matters in the issue of public documents which have long needed that careful scrutiny which the rush of a great print shop makes practically impossible.

It is not the intention of this office to attempt copy preparing beyond the title-pages, caption headings, contents, indexes, and lists of illustrations. The preparing of the main body of the work will be left to the experts in the proof room of the Government Printing Office as formerly.

Many complaints drift into this office relative to the inconsistent make-up of volumes of public documents, and much confusion arises on account of lack of uniformity in titles and general appearance in annual and serial issues. It is to avoid these complications and aid the Government Printing Office in putting forth the highest class of printing that this work has been undertaken. Then, too, the saving of time in the cataloguing department in handling properly prepared books will nearly offset the increased cost which the editorial section entails.

REORGANIZATION.

What has been thus far said regarding the lawful and the necessarily assumed functions of the office, presents but a skeleton outline of the many perplexing features connected with the now popular subject of public documents.

It was prophetically suggested during the debate incident to the adoption of the act of January 12, 1895, which contained the authority for the establishment of this office, that there was being brought into existence by the legislation under consideration a bureau which would some day employ a large corps of clerks at a great expense to the Government.

This is now a reality, but the accruments of the office more than offset the expenditure. While the great expense of preparing, editing, and publishing the extensive Government catalogues and the gratuitous distribution of documents to designated depository libraries will always prevent this office from assuming the rôle of a self-supporting institution, still the increase in sales from \$16,000 to \$32,000 in one year indicates that that portion of our duties at least will be a paying proposition in time.

Although the nine years under the organization accomplished in 1897 were years of neglected opportunities the tendency toward growth was apparent, even under the most obstructive odds.

As indicated in my last report, which covered a period of but a little over four months of my incumbency, a temporary readjustment of the affairs of the office was absolutely necessary from the moment I assumed charge. It was many months before anything like a consistent organization was developed, even with the most tireless labor—day and night—and it is still a matter of months of unceasing toil before its affairs will be adjusted to the high standard set for it.

Before proceeding with the reorganization of the office along up-to-date business lines, and as a necessary preparation for the work, I visited, under your instructions, many of the largest business organizations in the East and the Middle West, and thoroughly investigated their methods for handling routine office business.

My primary desire was to discover the simplest form for inventorying the enormous accumulation of public documents at that time lying inaccessible in heaps and serving only to occupy valuable space.

I had in mind a plan for a self-posting perpetual inventory, and in order to prove its merit I installed it in connection with certain branches of the work soon after I took charge of the office. The success which this trial developed encouraged me in the hope that, with modifications which might be suggested by other inventory schemes, it would prove ideal for our particular work.

The information obtained from the large publishers was a disappointment so far as the inventory was concerned, but many ideas were obtained as to other matters of routine work.

After diligent investigations, however, I adopted my original plan as most advantageous for our needs, and it will soon be installed in all branches of the work.

My search was not confined to publishing houses nor my inquiries to inventories. The scope of investigation gradually broadened, and was finally made to cover all routine methods of business and the labor-saving machines incident thereto, and over 75 different institutions were visited, representing printing, mercantile, insurance, railway, and financial interests.

In nearly all of these great industrial concerns the spirit of reorganization and a growing interest in new methods was very noticeable. In many their incomes had been greatly depleted by inability to install new methods fast enough to meet the growing demands, and in one instance—a large shoe house in the North—development was so rapid that it became necessary to close down for two weeks in order to readjust the business to the new conditions.

Realizing fully the important place this office is gradually assuming in the Government's dealings with the people, I was convinced that

any system which was installed must be susceptible of expansion without change, and simple enough to be handled by persons untaught in the intricacies of public documents.

I am desirous of organizing, as any large commercial concern with our advantages and possibilities would organize, of so systematizing the work that the rapid growth which is now in evidence will be no embarrassment when it develops larger problems and more serious complications in the future.

That the Government will continue to publish, and that public documents will be more generally used and more persistently sought, are conclusions which even a slight knowledge of conditions make positive. To let the public know what the Government prints, and to instruct them where they can consult the books or how they may obtain them for themselves, are some of the beneficial duties which this office is endeavoring to fulfill. And we are now striving to give the librarians prompt service, that they in turn may be able to supply their patrons with Government publications of current interest.

With a thorough knowledge of the internal conditions and needs of the office, and an enlarged sense of business practices gathered from these profitable researches, which your foresight and good judgment made possible, I took up the actual work of reorganization, confident of success.

It has been uphill work, owing to our inability to procure the proper equipment until accumulation had multiplied the difficulties involved in the change. With this condition and handling a business which has doubled in the period covered by this report, we were brought to a point where it seemed we could do no better than follow the lead of the shoe firm and close down until adequate facilities for proceeding properly could be installed.

Early and late the employees have labored, first to learn and then to put into operation the various methods decided upon after the most careful deliberation, and to them is due the lion's share of praise for the success which has been obtained.

From a condition of absolute chaos, devoid of any semblance of business method, with a force of employees disheartened by neglect and repulsed by unappreciative superiors, and even the lawful functions of the office fast losing the high standard upon which they were originally placed, the present well-regulated, contented division has been organized, with a business scheme being installed which it is believed will be found adequate for all contingencies.

THE THREE DIVISIONS.

The work of the office, though diverse in character, naturally divides itself into three distinct parts, and under the new scheme of reorganization, each is assigned to a division, namely, the Administra-

tive Division, which handles all the work of selling and distributing, as well as of diffusing information relative to public documents; the Bibliographical Division, which includes the library and all the cataloguing, indexing, and compiling sections, and the Editorial Section, which is held distinct on account of its general functions.

At present, with no chief cataloguer to assume the entire control of the Bibliographical Division and with the Editorial Section still in a formative stage, the organization is not complete, but three divisions will ultimately result.

These three divisions are composed of sections in charge of competent chiefs, and include the following:

Administrative Division—

Bookkeeping Section.

Correspondence and Filing Section.

Stock Section.

Shipping Section.

Bibliographical Division—

Catalogue Section.

Checklist and Index Section.

Library Section.

Editorial Section (to become a division).

ADMINISTRATIVE DIVISION.

More growth has been manifested in this division in the past year than in any other portion of the office, and this of course is natural, as its functions develop with the influx of business.

Briefly stated, the duties of the Administrative Division, other than those of a general administrative character, are to sell and distribute Government publications and keep accurate records of such transactions.

BOOKKEEPING SECTION.

For years the records of this office had been so neglected that it was found impossible to verify accounts or compile statistics therefrom. Even the cash receipts and the register of sales were recorded on loose sheets, which were found tucked away in unused cabinets or, in some instances, were not to be located at all. These records were made by numerous persons and in various places, thus duplicating work and preventing uniformity in the accounts.

The establishment of the Bookkeeping Section brought together under one supervision all the cash and book records of the office, and by an unique scheme of receipt and an elaboration of the "Daily sales sheet" a perfect check upon the cashier has been obtained.

The inventory, which is now in course of preparation and which will be explained in my next report, will supply the necessary check

of stock against cash, while a simple yet effective form of ordering publications out of stock has been adopted which provides a sure protection against the withdrawal of any but those books which are sold or authorized by the head of the office for distribution under the law.

The problem of keeping accurate account of over a million and a half of books, and accessioning them so as to make them immediately available, has been solved. And not only that, it has been solved in such a manner as to condense the mass of printed matter into the smallest amount of available space.

Many thousands of cards have been prepared as records for this vast accumulation, and these records are being daily brought nearer completion and will finally present an invaluable self-posting perpetual inventory. When this work is accomplished the office will be ready to handle any amount of business and give quick and accurate service at all times.

With this inventory and the accession register accounting for our book stock, and the carefully prepared daily sales sheets and cash-books, the present records are as simple and complete as any expert accountant could desire. In fact, after repeated investigations, which have been heartily aided by this office, the Treasury officials have approved our new methods.

CORRESPONDENCE AND FILING SECTION.

As previously stated, the correspondence, and necessarily the filing, have assumed large proportions for a small office, so large and important in fact as to fully warrant a separate section to handle it.

In this section all the stenographers of the office are brought together under the direct supervision of a chief, who is not only responsible for the expedition with which the work is performed, but also for its general appearance. Much time has been expended in establishing rules and instructing the stenographers so that their work is consistent, neat, and accurate.

The output averages 120 dictated letters a day besides from 75 to 100 form letters. Then there are hundreds of price lists and leaflets for which envelopes must be addressed.

The incoming mail averages over 300 letters a day, besides postal cards and letters of acknowledgment, which are not figured in our statistics as they are never filed.

To this section will fall the bulk of the work in the new mail scheme now being installed, but its operation is calculated to reduce labor and insure accuracy. It means double work, however, until it is installed.

The lack of proper filing facilities has caused much overtime work for the clerks in this section, but it is hoped soon to have all back

work on the files brought up to date, and the current work can then be handled without any difficulty.

The numerical-vertical filing is being installed and the change to it from the numerous systems heretofore in vogue has caused all the difficulties, but it was imperative that a change be made, and the new system will meet all future requirements without change.

STOCK SECTION.

For years the books had been allowed to accumulate without any attempt being made to classify or record them. In the early days of the office the stock bins and an index thereto provided accurate information for quick reference, though the entire scheme was cumbersome and expensive, involved considerable clerical labor of an experienced character, and demanded much more space for its proper operation than the office could command. Perhaps these considerations had something to do with the adoption of the policy of keeping no records whatever.

The books were dumped out of the sacks and piled in heaps upon heaps, regardless of their character. Libraries returned all sorts of books other than Government publications; in fact, it seemed they used the privilege of document returns by free frank as a means of disposing of all their useless, discarded, worn out, or dilapidated books.

During that time only a limited amount of current material had been made accessible as stock, and this was added to spasmodically by withdrawing from the unassorted piles volumes which were discovered to be of value.

Early in the past year we were called upon to estimate upon the amount of such material we had on hand, and we did this by weight—by measuring the piles with a tape measure and averaging the number of pounds to a cubic foot. There was no other way whereby we could give any idea of what we had on hand.

For six months a large force of temporary clerks and laborers has been employed in assorting, wrapping, numbering, accessioning, and listing for stock such publications as are considered to be of value for future distribution or sale.

The discarded surplus is being deposited in the warehouse to await legislative action in condemnation and sale as waste paper, the only logical distribution for such useless books.

SHIPPING SECTION.

One of the most important functions in connection with a mail-order business is that of shipping, and in the section which handles this part of the business must be placed persons who are careful to observe details.

It took some time to secure for this work just those people who were best suited to it, but by gradual development the handling of the extensive business of the office in this respect has developed to a very satisfactory point.

Besides the quantities of cash orders filled by shipment daily, this section has handled all the large book shipments to libraries and numerous special wrapping orders, with a minimum number of errors.

As in every other section of this office, the "system" is bringing quicker and more satisfactory action, and when more conveniences can be secured the work will progress with even more harmony and speed.

BIBLIOGRAPHICAL DIVISION.

In touching upon the work of the various sections embraced in this division, it is but justice to the employees who serve therein to give some explanation as to the delay in the issue of the publications with the compilation of which they are charged.

The explanation is a simple one. The work of reorganization of this office demanded the attention of every employee therein, especially those trained in the knowledge of public documents. The cataloguers, therefore, were assigned to various duties in aid of the scheme for classification and listing of the stock, and were engaged for months in directing the work of the temporary clerks drawn from the lists of the Civil Service Commission to whom public documents were a mystery and the matter of listing them an entirely new proposition.

As soon, however, as enough people had been instructed to carry on the work alone, the cataloguers were returned to their accustomed tasks, but not until the work on the catalogues and indexes had fallen behind to such an extent as to require many months to bring it as nearly up to date as it was when the stock taking was begun.

The sections of this division are still subject to rearrangement, and considerable readjustment of the work will be necessary before the proper organization can be accomplished in this branch of the office. As yet the matters of this division have not received my attention, with the exception of making a few changes which it was not possible to postpone, but I hope in the coming year, with the aid of a competent chief cataloguer, greatly to improve the organization and simplify the output of this division.

CATALOGUE SECTION.

The catalogue work is constantly increasing, so much so that it has been found necessary to remove from the Catalogue Section all work of indexing and listing and form a special section for that work.

Although the sizes of the editions of public documents have been reduced by law or by a desire to economize on the part of the pub-

lishing offices, and although the bulk of many of these reports has been reduced considerably for the same reasons, still the *number* of reports submitted for printing increases year after year. The steps taken toward economy, therefore, do not prevent an increase in the amount of work for the cataloguers, since the reduction of the size of an edition or of the contents of the volumes affects their work but slightly.

Rational editing and careful preparation of public documents would simplify the cataloguing, and this is greatly to be desired, as this class of work at its best is not easy.

Our catalogue force has been augmented through civil service examination, but those obtained must all be taught, and it will be some time before they are of any appreciable assistance. The cataloguing of public documents is a new art even to trained library assistants.

The catalogue section received 18,644 documents, 27,010 pieces of Congressional mail, wrote 188,022 cards, not including stock inventory cards, prepared, edited, and supervised the publication of Bulletin 7, the Monthly catalogues, and the Schedule of volumes entered in the list of office publications on page 322, and supplied indexes for several volumes of documents called for by the Joint Committee on Printing.

Document Catalogues.

It was our expectation to complete the Document catalogue for the Fifty-eighth Congress this year, but other contingencies which arose made it impossible to do this or even to keep up with the current work.

Document catalogue no. 7, for the Fifty-eighth Congress, has not as yet been sent to the printer, and it will be six or eight months before it can be issued.

In the meantime work will be pushed rapidly on the catalogue for the Fifty-ninth Congress, and while no promises can be made, it now seems possible to send it to press before the convening of the second session of the Sixtieth Congress, in December, 1908.

The issuance of the Document catalogue in one volume for a Congress is in violation of the law, but was begun with the issue for the Fifty-fifth Congress by my predecessor after he had become convinced that the issue by sessions was not only much more trouble and expense but that it interfered materially with the record itself.

He said in his annual report for 1898:

* * * Very many objections may be urged against its publication each regular session. Some of the more serious I will point out briefly. As an illustration: The catalogue for the second session of the Fifty-fourth Congress will contain entries of documents not bearing a Congressional number from July 1, 1896, to June 30, 1897, but of Congressional documents from the first Monday in

December, 1896, to March 4, 1897. Then followed a special session of the Fifty-fifth Congress, beginning March 15 and ending July 24, 1897. No provision is made in terms for cataloguing documents of special sessions. The documents of this special session can not be entered in the catalogue for the second session of the Fifty-fourth Congress, but must necessarily be entered in the catalogue for the first regular session of the Fifty-fifth Congress, which assembled the first Monday in December, 1897, and terminated July 8, 1898. It will thus be seen that the latter catalogue will lap at both ends with catalogue preceding and following, which will probably be perplexing to those not familiar with the subject.

Again, thousands of bills were introduced and reports made at the first regular session of a Congress that are not disposed of, if at all until the last session. Full entries must necessarily be made in the catalogues for each session, and the searcher for information must examine both in order to ascertain what was done, with the chance of being misled by only examining one. The work is thus duplicated and reference is made more difficult. Many more objections might be urged, but these are deemed sufficient for the purpose.

I therefore recommend that Congress be asked to amend the law of January 12, 1895, so as to authorize the Superintendent of Documents to prepare and publish a catalogue of public documents biennially, which shall show all documents printed not bearing a Congressional number during the two years ending June 30 in each odd-numbered year, and all Congressional documents for each Congress, beginning with the Fifty-fifth.

I heartily indorse the above recommendation. The Document catalogues form the permanent record of Government publications, and everything should be done to make their issue as convenient of reference and as complete and accurate as possible. As no objection has been raised to our violation of this law in the issue of the catalogues covering the period of a Congress instead of a session, I have directed that the Fifty-ninth Congress catalogue be completed in one volume, and hope legislation can be had before the issuance of another catalogue to authorize this very necessary change.

Document Indexes.

Like the catalogues, the Document indexes are far behind in their issue. All the available assistance has been assigned to the preparation of the catalogues in order to bring them quickly up to date. They are more generally used than the indexes, and should therefore be given the preference in issue, and in fact I am convinced, after personal investigation, that the use of the Document index is not sufficient to warrant the expense of \$1,500 for 2,000 copies at each session (which is the estimated cost), especially as the work is done in duplicate, and much more fully, in the Document catalogue.

This office has always been justly proud of its Document index, considering it a model for "title-a-liners," but in the interest of economy, and to avoid useless duplication, the discontinuance of the issue is recommended. As no legislation has as yet been obtained authorizing the abandonment of the Document index its compilation is being proceeded with, and copy for the Fifty-ninth Congress,

first session, index will be sent to the printer some time this fall. Although work has been started on the issue for the Fifty-ninth Congress, second session, it will not be published until a year hence.

Monthly Catalogues.

So much interest has been aroused through the radical changes made in this catalogue that an explanation, embodying a sketch of its development to the present form, seems necessary.

The general printing act, approved January 12, 1895, defined as one of the duties of the Superintendent of Documents the preparation of a monthly catalogue in the following language:

Section 69. A catalogue of Government publications shall be prepared by the Superintendent of Documents on the first day of each month, which shall show the documents printed during the preceding month, where obtainable, and the price thereof.

The first issue under this provision was made for the month of January, 1895, being numbered one (1) of the series, and the issue was continued in practically the same form (that of governmental author by Department) up to January 1, 1906 (no. 133), when the form was changed to governmental author by issuing office.

In December, 1897 (no. 36), a new and very useful feature, an index, was introduced, and beginning in February, 1900 (no. 62), the catalogue was further improved by making the index cumulative from January to June and July to November, with a yearly index in the December number.

With these additions, and as a result of the careful work which was put upon it by the catalogue force, the Monthly catalogue assumed an important place on the reference shelves of the libraries and became a handy manual for all persons interested in United States Government publications. In fact, from the returns received from the libraries in answer to questions relative to the usefulness of the publications of this office, it is evident that the Monthly catalogue has been more widely used and more highly prized than either the Document catalogue or the Document index.

It was not the intention of Congress, however, to have the work of cataloguing done in duplicate. Its purpose in legislating was to provide for a "Comprehensive index," or catalogue, which should be the permanent official record of all Government publications, both Congressional and departmental; a "Consolidated index" to the numbered Congressional documents and reports, instead of numerous indexes distributed through the volumes composing the four series—that is, Senate documents, Senate reports, House documents, and House reports, and a Monthly catalogue to be issued "on the first day of each month," and which should show "the documents printed during the preceding month, where obtainable, and the price thereof."

This legislation for a Monthly catalogue really contemplated a list of available publications, to be issued promptly, and to tell where they could be obtained and whether free or at what cost.

Obviously the catalogue as issued up to the present time has not strictly complied with this law, as it has been composed mainly of entries for documents and reports which were not "available" at any price.

In order to comply more strictly with the law and make it possible with a limited force of trained people to issue the Document catalogue and Document index more promptly, and in view of the fact that these same experts must be used in the reorganization of the Superintendent of Documents' office, it became necessary to eliminate from the Monthly catalogue those valuable features which were not specifically directed by law, and which only a law and an additional force of experts would warrant.

The sacrifice of the cumulative index was one which economy and the avoidance of duplication demanded. No doubt it was valuable; but since it delayed the issue of the more important bibliographical publications, its elimination was considered wise.

The dropping of this feature necessitated a less involved form of entry, and, as an experiment, the issuing office was chosen. There is a diversity of opinion as to the advisability of this experiment, even with those who are unanimous in their condemnation of the removal of the index.

After eighteen months of experiment with this form of entry we have decided to make a still more radical change, beginning with the July issue, and are of the opinion that the compilation in future, in dictionary form by subject, will be more usable and meet with general approval.

The main feature in this contemplated change is this subject arrangement, rather than that by governmental author, which without an index has been voted to be too cumbersome, although it possesses many advantages. The form of subject headings used in the Document catalogue of this office will be adopted, so as to secure uniformity in the subject treatment in all our publications. References will be made to the subject so that the publications will be fully covered. The typography will be slightly changed in order to use typesetting machines in the composition, which is necessary for promptness of issue. Furthermore, on account of the limitations imposed by the law, no publications will be entered which are not obtainable. In the past entries made for certain publications which had been printed, but which were not obtainable, have caused the various publishing offices endless annoyance, and it is to avoid this difficulty that the titles of such publications will be omitted. These titles will, of course, appear in the document catalogues.

In other words, it is hoped to make the Monthly catalogue as useful to both the public and this office as the limitations of the law will permit. The cover pages will be used for advertising public documents for sale, and some space in each catalogue will be devoted to book talks and notes of general interest, in the hope that much available valuable information relative to both old and current publications may be circulated. This move will benefit, but will by no means completely adjust, the matters which provoke discussion relative to this catalogue. In this new form the publication will be too meager in entry for a catalogue and much too elaborate for a price list. Very little advertising or cash business will be obtained from its circulation, as the limited edition allowed by law confines its distribution to libraries, which obtain their publications free. It will only partially serve the purposes of the libraries, as many valuable publications are issued which are not generally available and which will not hereafter be entered in the Monthly catalogue. But according to our present plans it will be issued in strict compliance with the law, in a form convenient for reference, and consistent in entry and style with our other catalogues.

We deplore the necessity for frequent changes in series of this kind, but experience is often the best teacher. After all, we are convinced that the most desirable form for a Monthly catalogue is that of a classed catalogue similar to the one issued up to January, 1906, with a cumulative index constructed along even more liberal lines than the one which lack of authority caused us to abandon.

If the passage of a law can be secured authorizing the change to this more usable form the price feature will be done away with, and instead of a publishers' list, which the law now contemplates, we will issue a "Monthly catalogue" in which will be found a complete register of the publications of a single month, brought together by a cumulative index as formerly.

Before the 1st of July, 1908, steps will be taken to procure such legislation, and if it is obtained a reference catalogue, instead of a publishers' list, will be issued beginning with the July, 1908, issue.

The consideration of this subject brings me to the point of discussion of what to me seems the most important matter with which this office has to deal at present.

Printed cards.

In the ninth annual report of this office, that for 1903, it is announced:

It has finally been decided by this office to furnish printed catalogue cards of Government publications to the depositories of public documents.

In conformity with this announcement a limited issue of printed catalogue cards was commenced, on a plan of entry selected by vote of the Catalogue Section of the American Library Association.

The cards were at first furnished in sufficient numbers to provide for fully cataloguing the publications they represented, but did not include any "series entries, annual reports, reports on private bills, references, or analyticals, except analyticals from the Congressional reserve."

The distribution of more than one card lasted only a little over eight months, as it was found impracticable to continue on account of the great increase of labor involved, and thereafter only a single card was supplied.

In order successfully to undertake such a work, even with the restrictions and limitations which were adopted, a thoroughly organized card section would be necessary. Lacking such organization, it was not possible long to maintain the issue. The interest which was at first manifested in the subject gradually waned, and when only one card was supplied the libraries became discouraged and so expressed themselves. The sending of a single card was of but little aid to them.

As late, however, as September, 1905, the distribution is spoken of as having proven "a great success," although it is admitted that "Librarians have been disappointed because the distribution has been limited to one card for each document." The fact that in the February following I discontinued the distribution until the matter could be satisfactorily adjusted and that but few complaints at that action were received is proof that the needs of the libraries were not being met in this respect.

But these needs are still as great as when the matter of the Government furnishing catalogue cards for the books distributed to designated depositories was first agitated many years ago. No substitute can be found for the cards in library records; and the problem of actual use of the books in the libraries will never be solved until cards are supplied in sufficient numbers to provide for the proper entries in the various library catalogues fully covering every publication issued to them.

At the Asheville conference of the American Library Association, held the latter part of May, 1907, during the discussion relative to public documents, Mr. Richard R. Bowker, editor of the *Library Journal*, and at one time chairman of the Committee on Public Documents, in the course of his remarks had this to say regarding the issue of cards:

I wish to add one more suggestion, that sooner or later there should be brought about a closer correlation between the card system of the Library of Congress and the office of the Superintendent of Documents, so that simultaneously with the volume, and perhaps in the volume itself, there may be sent to the libraries the proper analytic cards for the volume. I don't think there could be a greater saving to the libraries than a system of that sort.

Not only do I desire "closer correlation" with the Library of Congress, but with every other office which undertakes to catalogue its publications. In fact, I intend to take up this matter in such a way as to bring about as much consolidation of this work in this office as possible.

Mr. Henry M. Gill, of the New Orleans Public Library, in his interesting paper on the "Obstacles to a proper use of documents by depository libraries," which was read at the Asheville conference, has this to say relative to the discontinuance of the card issue by this office:

A few nights ago I noticed a paragraph by Mr. Roden. It was a psalm of rejoicing after a period of long suffering: "Only within the last few months have we been vouchsafed a glimpse of the promised land in the printed cards for the current documents henceforth to be issued by the document office in Washington, after a full forty years wandering in the wilderness which, unaided, we found ourselves so sadly unable to subdue." These words of triumph seem now to be surrounded by an atmosphere of mingled pathos and humor, for hardly had they been uttered when the document office, more cruel than the Amorites and the Caananites, rudely thrust the singer back into his wilderness of despair. The cards that the superintendent began to issue in full sets were found to be too expensive and the office could not sell them without the authorization of Congress. The Government owes it to the depositories to furnish them with an ample supply of catalogue cards. The money that is being spent by libraries in caring for public documents is a very considerable sum.

* * * * *

The great work, however, that the depositories should take hold of as a united body is the securing from the Government the means of cataloguing their collections.

* * * A card section should be created in the document office to supply catalogue cards in sufficient numbers to every depository library. At the very least cards should be supplied by the Superintendent for all current documents. We should assist him in securing authority from Congress to issue cards in sufficient numbers, and, if necessary, charge for them. I believe that most depository libraries would realize that it would be cheaper to buy the cards than to try to do their own cataloguing unaided.

Since the temporary abandonment of the issue of printed cards by this office the Library of Congress has taken up the matter in its well-organized Card Section and issues cards for a selected few of the most important current public documents.

The Library of Congress also prints and distributes cards for the Agriculture Department publications, these cards being prepared by the Department. The Geological Survey publications are also being thoroughly catalogued.

At present we distribute with our shipments carefully prepared invoices, which are compiled in the simplest form for checking purposes. As soon as we have caught up with our back work in cataloguing, or possibly with the commencement of the Sixtieth Congress, I hope to resume the issue of printed cards for all books sent to

designated depository libraries and furnish them in lieu of the present invoices in sufficient numbers to meet all their needs in cataloguing. If this attempt succeeds and experience warrants it we may then increase our scope to analytical work, which of course could not at present be undertaken.

The ideal plan.

After years of practical experience in the listing and uses of Government publications, I am of the opinion that the ideal plan for furnishing library aids for Government publications embraces these four important features:

1. Printed cards in sufficient numbers to catalogue completely, and as nearly as possible in conformity with the monthly catalogue entries, every publication distributed to designated depository libraries; the cards to be sent with, or as soon as possible after, the books.

2. A Monthly catalogue which shall completely cover the publications of a month, the entries to be made consistent with the Document catalogue as far as possible and set down in a classed form with a cumulative index.

3. A Document catalogue issued biennially, which shall present as the permanent record and elaborate cumulation of the Monthly catalogue for two fiscal years, thus covering the period of an entire Congress instead of a single session.

4. A monthly price list of public documents, giving the titles of important publications printed during the month, stating where they are obtainable, and the price thereof, and including such notes of general interest as it may seem desirable to make public.

This can all be accomplished with but slight duplication of work except in the matter of printing, and, as outlined, presents the simplest form we can at present devise to meet all the needs.

CHECKLIST AND INDEX SECTION.

The duties of this section have been varied. Numerous special lists and indexes have been called for in addition to the work on the Checklist.

It takes a great deal of work of this character to make any showing at all, and while progress is being made slowly, so far as the new edition of the Checklist is concerned, work on it is being accomplished.

Ever since the issue, in 1904, of the "List of publications of the Agriculture Department, 1862-1902," there has been a constant demand for the other Department lists, of which series the Agriculture list was no. 1. Had it not been for the necessary reorganization of the office of the Superintendent of Documents some of the other lists would have been issued before now, but as it is they are in comparatively the same incomplete state as they were a year and a half ago.

The work as outlined for these Department lists involves the careful listing and indexing of all the publications of each of the Executive Departments and independent publishing offices, and the compilation and issuance of this information, arranged by Departments, and uniform in every respect with the Agriculture issue.

This plan will some day be carried out, and by degrees the necessary statistics are being gathered, but it is work of such magnitude that considerable time will be spent in the mere collection of material before it can be edited or published.

To satisfy the repeated demands of those interested in public documents for some sort of a list which will indicate what completes a certain set or what constitutes a collection of a given publishing office, it has been decided to issue a "Checklist" which shall contain entries in the simplest form for all the publications of the United States Government, arranged by (1) Departments, (2) bureaus, (3) series.

The old Checklist, issued in 1895, proved one of the most popular works ever published by this office and the edition was soon exhausted. A reprint would have been made but for the fact that a revised and elaborate edition was in contemplation.

It has been further determined to issue the Checklist in advance sheets, and their publication will begin in the near future. Each publishing office will be separately treated, and space will be left on the sheets to allow for corrections or additions. These sheets will be sent out to the libraries and publishing offices with the request that they give this office the benefit of their criticism and supply it with any additional information which they may possess.

In this way a list should be evolved which, when finally issued, will be an authentic and complete bibliography of the United States Government publications.

LIBRARY SECTION.

From its inception this library, now comprising the largest collection of United States public documents in the world, has proved an indispensable adjunct to the proper conduct of the business of this office. It was instituted primarily as a key to the stock. This it accomplishes now, but it also supplies the material for the great amount of reference work we are called upon to perform. It forms a working basis for the compilation of our many catalogues, lists, and indexes, and is used continually by the editors in the Editorial Section in their endeavors to procure uniformity of issue in the output of publications of the various offices.

The systematic stock taking in which we have been engaged during the greater part of this year has been the means of adding to the library many valuable old works of which we had previously no

knowledge, and we anticipate still further accessions as we advance in this work.

The tabulated statistics of the library are as follows:

Additions and totals for the fiscal year 1907.

Government authors and publishing offices.	In library June 30, 1907.		Increase from June 30, 1906.

Total.....	81,675	10,450	8,988	688
Grand total.....	92,125		9,676	

It is our desire to make this collection as complete as possible. Up to the present time the books have been gathered from the duplicates returned by the libraries, or received by shipment from the Government Printing Office, or from the publishing offices for cataloguing. In a few instances we have begged a volume or a set from an office which we knew possessed the books desired, but as yet no special effort has been made to fill up our gaps and reduce our list of wants.

We are indebted to various publishing offices for donations to fill gaps in our collection of their early reports. The Library of Congress has also been very generous in supplying us with missing volumes and even entire sets.

Some time in the future it is our purpose to issue a list of our wants, and we feel sure from past experiences that whenever a library can supply our needs it will do so gladly. It should be, and doubtless will be, a pleasure for the libraries to contribute to this laudable purpose of completing the already magnificent collection in this office.

A general catalogue.

That the mass of publications already collected in this library will ever be catalogued is a question for future consideration. It is a task which demands not only the most experienced people to perform, but is so gigantic that those at present available could not complete it in twenty years. Public documents even in their current issues are sometimes enigmas to the trained cataloguers of this office, and usually make necessary in cataloguing great variety in treatment, on account of their lack of bibliographical and even typographical clearness. And of earlier issues nothing need be said, as all who consult them or attempt to trace them by accessible library aids know that their intricacies are appalling.

In 1874 (Forty-third Congress, first session, Senate Miscellaneous Document 125, serial no. 1584), a memorandum was submitted by the Librarian of Congress concerning a complete index to the documents and debates of Congress. The scheme proposed contemplated the indexing of some 1,600 volumes containing the documents and reports, and records of the proceedings of Congress from colonial times down to that date, and while it was admitted that it would be a stupendous task, it is denominated "an enterprise worthy of Congress, and one which no considerations of difficulty or of expense should be permitted to defeat."

After some years of experience in the practical work with the material he proposed to make available by means of a "topical" index, I am led to believe that such an index is not at all what is desired to unseal the veritable treasures which are buried in public documents. A complete dictionary catalogue is what is needed, and such a catalogue is not at present possible of production at any price, on account of the lack of trained people available for the work.

The pioneer efforts to furnish catalogues of Government publications prove the fallacy of endeavoring to compile accurate or usable library aids with untrained assistants; so that "Poore's descriptive catalogue" and "Ames's comprehensive indexes" should be allowed to fill the needs as best they may until a well-organized force of trained assistants can be procured for the compilation of a consistent and reliable catalogue embracing entries for all United States public documents.

In the 1905 report of this office my predecessor proposed to undertake the compilation, with the facilities then at his command, of an

"Analytical dictionary catalogue of all Government publications, 1789-1893," and a "Topical index to the proceedings and debates in Congress, 1789-1905," and to complete these publications in six years at \$27,400 per year, or a total cost of \$166,400.

Both publications are desirable, and will in time be compiled, but I would not undertake the work at present; and when I did I would require considerably more than \$27,400 a year to cover the expense of compilation and demand many more than six years for the completion of either one, certainly not both, of the works suggested.

When a well-established and perfectly satisfactory plan for cataloguing current issues has been devised and is being successfully operated, then will be time enough to figure on the problem of this already long delayed though very necessary cataloguing and indexing of former issues.

Government indexing.

A thoroughly interesting, and perhaps amusing, volume could be written regarding the preparation of indexes in general and those found in public documents in particular.

As a key to a volume or collection of volumes an index figures as an important factor in the use of the material comprised. It should therefore be carefully constructed along lines as strictly drawn and established as those so tenaciously adhered to by the cataloguers in the work of recording the location of the volumes or collections. It is generally supposed that it requires a special sort of intelligence and an unusual amount of careful training to evolve a cataloguer, but that anyone who can read and write can compile an index. This supposition is entirely erroneous. You can educate persons of ordinary intelligence to catalogue, but it is my opinion that indexers are born, not made. There is a certain intuitive quality which the successful indexer must possess, which is found so seldom as to place really competent indexers in the class of geniuses.

Had not the mistaken idea as to anyone's capabilities for constructing an index been so prevalent, usable books would have been the rule rather than the exception.

The indexing of volumes or series of public documents, unlike their cataloguing, presents no extraordinary difficulties, and yet, with but few notable exceptions, the work has been done in an amateurish fashion, indicative of lack of appreciation of the value of careful indexing and unfamiliarity with the subject-matter treated of.

While we have no experts in this line of work in this office, we have some promising workers, and have the advantage of being in a position to devise ways and means at least for providing uniformity in this respect.

This office should, therefore, possessing, as it does, the official cataloguing forces for Government publications, be the center from

which all Government catalogues and indexes emanate. I do not advocate the preparation of all indexes here, as I am convinced that a thorough knowledge of the subject-matter is the only surety against a poor index, but they should all be edited and published by this office, that uniformity in their form at least might be established. No more exasperating feature presents itself to the searcher in public documents than the variety of indexes which he is called upon to consult.

One unique specimen which has been discovered has not only a name, but is furnished with a motto as well. It is to be found in Senate Miscellaneous Documents 48, Fifty-second Congress, first session, and is entitled "Bird's-eye index, of the Torrey bankrupt bill," with the truly good indexing motto, "A place for everything and everything in its place." It is, however, nothing more nor less than a one-page table of contents, as complete and consistent as hundreds of other so-called indexes, but more notable on account of the pretensions expressed in its caption.

From the antiquated "chopped" index, where the title is cut in two at the word under which the entry is to be made and the first part of the sentence is transferred to the end, to the expensive and ragged "cleared" index, which is still used to some extent, and on down through various modifications of these forms to the simple "indentation index," which is now used by this office, the confused inquirer is forced to wander through a perfect maze of bibliographic absurdities.

Besides this, the enormous and useless outlay which is incurred by the adoption of systems such as the one used in the index to the Congressional Record, where the lavishness with which space is consumed adds expense to the work without any particular benefit, could be avoided.

The same arguments offered in favor of the centralization of the distribution of public documents can be offered in support of the centralization of the work of cataloguing and indexing them, and it is hoped that in acting upon these matters their merits only may be considered and all personal considerations may be set aside in the interest of the public good and in an endeavor to remove the just opprobrium which much of the present governmental business organization engenders.

EDITORIAL SECTION.

This section, which is destined to become an important division of this office, has been fully dealt with in another portion of this report, so it but remains for me to say here that if it in any degree approximates in results what is anticipated for it in my thought regarding it, its value to the future issue of Government publications will need no defense, for its work will fully justify its existence.

SALES.

No sooner had the office begun to operate in 1895 than applications were received for the purchase of publications. The first year's sales were very small in comparison with those of the present report, but the increase has been gradual year after year, until this fiscal year, 1907, when, through judicious advertising and voluminous correspondence, the sales have been increased 100 per cent.

The following table is interesting as indicating the growth in popularity of this sales feature:

Sales statement.

Fiscal year.	Sales.	Returned to remitters.	Fiscal year.	Sales.	Returned to remitters.
1896.....	\$889.09		1902.....	\$10,946.21	\$736.84
1897.....	4,016.15	\$380.75	1903.....	11,437.94	1,231.35
1898.....	4,184.22	731.70	1904.....	12,490.98	986.29
1899.....	7,328.46	654.29	1905.....	16,275.09	1,095.31
1900.....	8,644.34	953.65	1906.....	16,485.88	1,729.50
1901.....	9,062.09	1,186.25	1907.....	32,172.88	2,252.61

The amounts shown as "returned to remitters" indicate a lack of stock for demanded publications, caused to a great extent by the poor economy of the publishing offices in printing limited editions of valuable works, or more often by our inability to foresee a demand when a book is put to press and we have only its title to go by in ordering for stock.

Another annoying feature which prevents many sales being consummated is the necessity for refusing postage stamps when remitted in payment for books, as we have no means of disposing of them or converting them into cash. Our sales are largely in amounts of 5, 10, or 15 cents and other small amounts, and the farmers especially find it convenient to remit postage stamps. In many instances the return of these stamps loses us the sale, deprives the man of the book desired, and costs more clerical labor to record the return than it would to make the sale.

A legal tender of small amounts is greatly needed, and its advent would be welcomed by thousands who patronize a mail-order business such as this office conducts.

By the use of up-to-date business methods we expect to put Government documents before the public as prominently as their importance demands. We hope to continue to increase the sales year after year by educating the people to apply to this office for books or information, and to endeavor to have on hand in accessible form for immediate delivery what they desire. In the interest of this develop-

ment as much red tape as possible must be eliminated and our intercourse with our customers be as systematic and prompt as that of large commercial enterprises.

ADVERTISING.

The \$4,000 appropriated by the act of March 4, 1907 (34 Stat. L., p. 1398), for the purpose of advertising for sale the surplus of certain valuable publications was very fruitful in the desired results, and our records show that approximately \$1,800 of sales are already directly traceable to this advertising, the results of which will of course extend into the future; a splendid showing, when it is considered that this is the first time such advertising has been done in relation to public documents. It is hoped that the appropriation for the fiscal year 1908 will prove as productive.

Besides this expenditure, the issue of pamphlets on simplified spelling gained wide notoriety and proved for us another means of materially increasing our sales, but the chief factor in this increase (100 per cent during the past fiscal year) has been the intelligent handling of prospective customers by the clerks of this office, who are engaged in making quotations and filling orders. No effort has been spared in giving customers all the information procurable on the subject in which they signified an interest.

In lieu of a general price list, various small lists on subjects of special interest have been completed and distributed in large numbers.

Of price list No. 10, "Laws of the United States," two editions have been printed; large numbers of no. 11, on "Food and diet," and of no. 12, on "Water pollution and water purification," are being distributed.

Numerous other special price lists are in course of preparation, and leaflets will be issued when the material is not sufficient to warrant the compilation of a price list; in fact, this work is growing so rapidly, and is found so effectual in popularizing Government publications, that a detail of trained people is contemplated and the eventual establishment of a section devoted entirely to the work of preparing such lists and leaflets.

We are also designing a poster to be displayed in the libraries, giving direction as to how to obtain Government publications or information concerning them. It is also intended to request permission of the Post-Office Department to display these notices in the post-offices throughout the country as a means of informing the people that a large bureau is maintained in Washington for the purpose of supplying Government publications free to libraries, or at cost to individuals.

Elaborate preparations are made for the development of trade by proper "following-up" methods; and extensive classified lists are

being gradually compiled accessible for circularizing when that class of literature is received which will warrant it. In short, everything is being done within the limits of the law to inform the American people what is available in the form of public documents; and the information is put before them by as attractive and business-like methods as those employed by first-class publishers in the commercial field.

It should here be said that this work is not done in the hope of exploiting any business scheme nor to develop, primarily, a self-supporting office, although these considerations would be justifiable; but it is to fill a long-felt need—to centralize the distributing point for Government documents and information concerning them.

THREE CLASSES OF LIBRARIES.

This office is at work adding to its list the names, addresses, and statistics of all organized libraries of which it receives notice. This list is under constant revision, and the libraries thereon are supplied from time to time with literature of interest relating to United States public documents.

There are three classes of libraries with which we deal—namely, the designated depository libraries, the geological depository libraries, and the miscellaneous libraries.

DESIGNATED DEPOSITORY LIBRARIES.

Before the establishment of designated depositories, or any systematic methods for the distribution of public documents, special acts were passed at various times providing for the printing of a sufficient number of copies of the public journals of the Senate and House of Representatives for distribution to the executives of the several States and each branch of the State and Territorial legislatures. Provision was also made at times for supplying these journals, the acts, and sometimes the documents and reports, to each university and college incorporated in each State, as well as to the incorporated historical societies throughout the country.

During the Thirteenth Congress, second session, December 27, 1813, a resolution was adopted embodying these provisions which had heretofore been covered by special legislation, and not only directing for a Congress, but stating "for every future Congress." Two hundred copies in addition to the usual number was the limit named for documents, and this of course was more than sufficient for the needs at that early day.

At the third session of the same Congress, under date of December 1, 1814, the provisions of the above-mentioned resolution were extended to embrace the American Antiquarian Society at Worcester, Mass.

Again, at the Eighteenth Congress, second session, March 3, 1825, the Gardiner Lyceum was added to the list.

By joint resolutions approved July 20, 1840, and April 30, 1844, the number of copies of journals and documents printed was increased to 300.

A resolution of January 28, 1857, as amended by resolution of March 20, 1858, was the real basis of the institution of depositories. By these provisions the journals and documents which up to that time were deposited in the Library of Congress for distribution by the librarian, and 250 copies of those delivered to the Department of State for distribution by that Department to colleges and other literary institutions, were transferred to the jurisdiction of the Secretary of the Interior "for distribution to such colleges, public libraries, atheneums, literary and scientific institutions, and boards of trade or public associations as may be designated to him by the Representative in Congress from each Congressional district, and by the Delegate from each Territory in the United States."

The following February, at the second session, Thirty-fifth Congress (February 5, 1859), an act was passed providing for "keeping and distributing all public documents" (11 Stat. L., p. 379). This act charged the Secretary of the Interior "with receiving, arranging, safe-keeping, and distribution" of public documents "of every nature," already or hereafter directed by law to be printed or purchased for the use of the Government, "except such as are for the special use of Congress or the Executive Departments." It also empowered him to remove from the Congressional Library and other places all accumulations of books, journals, etc., and appropriated \$22,000 for the purpose. He was directed by the act to keep accurate statistics of the receipt and distribution of all books.

Section 5 of this act further amended the resolution of January 28, 1857, by providing for the Senators, and directing that the distribution should be made first to such States as had not yet been covered by distribution, and that in the future the distribution should be kept equal in each Congressional district and territory.

All the books, maps, charts, etc., heretofore deposited in the Department of State were also turned over to the Secretary of the Interior.

The act of February 5, 1859, was in force without amendment until March 2, 1861, at the Thirty-sixth Congress, second session, when a long act to amend was passed (12 Stat. L., p. 244), the most important feature of which as affecting general distribution was contained in the first section, which gave the Secretary of the Interior the right to designate libraries to receive publications of which the edition was not sufficient to supply the regular depositories to be named by the Senators and Members. His power of selection was

limited, however, by a proviso in section 2, which stated that in future the public documents to be distributed by the Secretary of the Interior should be sent to the institutions already designated, unless he should be satisfied that any such institution was no longer a suitable depository for the same. This act also contained a clause repealing all acts or parts of acts inconsistent with its provisions.

Upon the basis of these acts the Revised Statutes were compiled, and chapter 7, sections 497 to 511, pages 82-85, contains all operative provisions reenacted at that time.

No legislation can be found prior to that contained in the general printing act of January 12, 1895, affecting the State and Territorial libraries, and it is thought that it became customary to send documents regularly to these libraries, under the discretionary powers vested in the Secretary of the Interior, and that that accounts for their appearance on the depository list many years prior to 1895.

The designated depository list comprises at present by law the following-described libraries:

All State libraries.....	46
All Territorial libraries.....	4
One library for each Congressional district, to be designated by the Member from that district.....	391
One library to be designated in any part of the State by each Senator.....	92
One library to be designated by each Delegate in Congress in any part of a Territory.....	4

The following libraries have been added to the above list by special legislation:

The libraries of each of eight of the Executive Departments in Washington.....	8
The libraries of the United States Military and Naval academies.....	2
The library of the Philippine government.....	1
The libraries of the land-grant colleges.....	67

Total.....	615
------------	-----

At present only 474 of these libraries have been designated and many districts are without representatives. At the commencement of the Sixtieth Congress an endeavor will be made to fill up the list.

The idea of "designated depository libraries," that is, libraries scattered throughout the country in which are deposited, under the provisions of law, complete collections of all public documents which are printed "and made for distribution," is an excellent one, but as actually applied it is anything but satisfactory.

In the first place the only restrictions of the present law are that the library placed upon this list must be a public or school library, and in the case of the former must contain at least 1,000 volumes other than Government publications.

Designations may be changed at the will of the Senator, Member, or Delegate at the commencement of any Congress, and as the desig-

nators change often, the life of a library as a depository is apt to be short. This causes broken sets in numerous libraries, instead of fine collections at convenient points for reference use by the public.

The libraries now designated are in many instances unable to afford either the shelf room to accommodate the books or the clerical labor involved in properly handling them. The consequence is that volumes with pretty bindings or attractive titles are taken out from the shipments and placed upon the shelves, and the remainder are dumped in attics or cellars to await an opportunity to return them to this office; and this sort of thing will continue so long as the Government insists upon forcing upon libraries quantities of books for which they have no need.

The proper method of operating designated depositories for United States Government publications would be to create a fund for the payment of library assistants in the most important libraries in certain localities in each State, who, as agents of the Government, would look after and make available the public documents consigned to these depository libraries. Then to insist that such depositories must receive and make available for public consultation everything printed by the Government. Some such plan as this appeals to me as better adapted to the purpose of popularizing public documents and making them available than the oft-suggested method of library selection.

Under the scheme of library selections those publications only would be supplied which a librarian requested. This method involves too much of the personal equation. No one knows what contingency may arise to make interesting in a locality or section of the country certain public documents which at the time of issue are of no interest or value, seemingly. Besides, public documents as reference works should be easily available, all of them, and this desideratum will never be reached so long as the distribution is free and no provision is made for the care and preservation after being sent out.

Let me here insert, as a matter of historic record, several paragraphs from the able report of Miss Adelaide R. Hasse, made by her to the 1907 conference of the American Library Association, as chairman of its Committee on Public Documents:

While librarians are of course interested in the way in which public documents are printed, I do not think we would know enough about that to worry us, if the present system of distribution had not been devised. That system has had the effect of making the document collection an appreciable asset in 500 different libraries throughout the Union. Instead of being a convertible asset, it is in a great many cases a white elephant. These two facts, viz, the indiscriminate distribution of a public grant and failure of the grantee to convert the asset into a negotiable factor, have brought about what may without exaggeration be termed the present crisis.

A survey of the records has led to the assumption that the original motive of this depository distribution was an amiable desire legitimately to benefit struggling and worthy institutions. There was at the time of its inception no organized labor interest to cause an inflated demand for these books. It may even be doubted whether the perpetuity of the scheme entered into the consideration of the benevolent gentlemen who promoted it. Certain it is that the project was not stamped with permanence until, by the resolutions of 1858 and 1859, it was based on Congressional designation. So soon as this change took place the basis became one of population.

Public documents are used almost solely by specialists in some one of the natural, technical, or historical sciences. Yet according to the basis referred to it is the natural and artificial increment of the whole population, which determines both the number and the location of depositories. The natural increment is not sufficiently diverse in the several States to affect our particular case; that is, the birth rate of the whole population is not sufficiently fluctuating to affect it. The artificial increment is due to the influx of foreigners. This influx proceeds along a direct route, namely, through the States of New York, Pennsylvania, Ohio, and Indiana to Illinois, where it disperses. Now as depository designation is determined by representation, and representation by density of population, it follows that the location as well as the number of depositories is practically fixed by the introduced American. In Greater New York alone there are now 15 depositories.

The change in the law which brought about this condition has had the effect of increasing the depositories from 12 in 1859 to 500 in 1904. At the same time the number of volumes subject to depository distribution has increased from 105 volumes per Congress in 1859 to 341 volumes per Congress in 1904. That is, the housing burden on the individual depository is more than three times greater to-day than it was in 1859, and there are a trifle less than 500 depositories to bear this burden as against 12 in 1859. That this increase in supplying a commodity is out of all proportion to the demand for it, is shown by the huge accumulation of not wanted documents in Washington.

The fault lies in simple economic miscalculation. On the one hand we have a producer supplying a commodity on the basis of the growth of the whole population. On the other hand we have the consumer, in this case a specialized group—the American student body. This consumer is numerically far in the minority, the ratio being about 1 to 750. In trying to get away with the supply there has been incurred on his part what amounts in many cases to chronic document indigestion.

The result of this oversupply is the astounding spectacle of a producer forced to provide storage for his own unsalable goods at the same time that he is hiring an army of 3,000, more or less, to turn out more of the same kind of goods. What adds to the astonishing feature is the fact that not private but public funds are being usurped.

* * * * *

The only effective cut can be made in retrenchment in the Congressional quota and in depository distribution. The former has already been suggested by the Printing Commission. The latter has not been broached by it. I do not think that the intention has been to overlook us, but I have a feeling that it has been because the public man is perhaps the keenest of all men to follow the maxim that it is well to let sleeping dogs lie. For until to-day in all the fifty years that the depository system has been in operation Government and the depositories have never taken a single step to bring about a mutual hearing. I think legislators have all along felt that it was expedient to let us alone, and that in some way they perhaps didn't see exactly how they were accomplish-

ing a great public good in maintaining this depository system. We have allowed them to remain entirely in the dark as to our perplexities. As these have become multiplied we have been inclined to take it out on the officials appointed to carry out the law. We have seemed not to realize that the more strenuously these officials carried out the law the greater the disaster they were creating for us. For a more loosely drawn law than the printing law of 1895 is probably not written upon the statute books. The only solution which suggests itself at present is that of placing a file of Government publications in carefully selected libraries able to care for such a file, and which represent various parts of the country, and after that the withdrawal of all other documents from free distribution and their sale at a minimum cost price. You may not all agree with this suggestion, and it is by no means put out as an ultimatum. But if a change is expedient, if it is hoped for, if it is to be worked for, some one had to make the opening move.

Miss Hasse has struck the keynote which will eventually operate to attune the present inharmonious conditions she so graphically describes.

The only remedy for the "chronic document indigestion" from which this office is the greatest sufferer is to so regulate the output of Government publications that no great surplus will remain after a logical distribution has been made to selected libraries, and to dispose of what volumes do remain by sale at a minimum cost price and not further encourage any gratuitous distribution.

The statistics of this report show that 503,564 books were sent to depositories during the year, over 1,000 books and pamphlets to each library, and it is estimated that it requires nearly 50 feet of shelf room to accommodate them. For many of the libraries in the list, this contribution is the largest they receive, and doubtless with all it is the most difficult to handle.

Itemized invoices are sent out with each shipment, and everything is done to assist the libraries and interest them in making the publications available. But these books, presenting as they do problems in classification which no other books ever suggest, are often shunned by the too often overworked library assistant and allowed to accumulate in unaccessioned heaps.

Much of the material contained in public documents is of historic and scientific value and should be distributed in such a manner as to insure its being made immediately available.

To constitute permanent depositories in important centers in the various States, subject only to change at their request or upon it being discovered that they are not complying with the law, and to place therein all Government publications printed for distribution, under the control of a person trained in library methods and versed in public documents, would be a saving of money to the Government and practically accomplish that which is now only theoretically brought about.

GEOLOGICAL DEPOSITORY LIBRARIES.

By the provisions of a joint resolution approved March 3, 1887, two libraries in each Congressional district were authorized to be named by the Representatives for the several Congressional districts, respectively, and two by each Senator or Delegate, to receive the publications of the Geological Survey.

Section 79 of the act of January 12, 1895, doubled this allotment, as fully stated in Joint Resolution no. 19, approved February 26, 1896. The result of all this legislation is a list of over 1,400 libraries, which may, by law, be extended to 1,948 libraries. I am fully convinced that many of these libraries do not care to receive the material sent them, but am unable to take any action in the matter, as the law does not permit these libraries to be removed from the list once they are put on, except at their own request.

In the compiling of this list not even the few restrictions which govern the selection of designated depository libraries was adhered to, but any library which was suggested by a Senator or Member was constituted a geological depository.

Why four libraries in a Congressional district should be named to receive publications dealing with the abstruse subjects found in the publications of the Geological Survey and only one library be named by a Senator or Member to receive the much more sought after papers of the scientists of the Department of Agriculture, is a question to which I have long sought an answer.

Another questionable distribution which if made at all should be made by this office, is that of the weekly issues of the Official Gazette, which is made by the Patent Office to eight public libraries in each Congressional district. But why should patent publications be subject to wider distribution than agricultural literature?

The establishment of depository libraries under Government patronage and control as herein suggested would obviate the necessity of such widespread distribution of special classes of governmental literature, and better serve the public at an enormous saving of public funds. Even with the present depository list, and the absurd laws governing it, I do not hesitate to recommend legislation to repeal the provisions relative to geological and Gazette depositories.

MISCELLANEOUS LIBRARIES.

Hundreds of small public and school libraries apply to us for information along certain lines, and we devote much time in endeavoring to supply their needs from our vast stock of books or by reference to the volumes in their own or nearby library. We also encourage them to return to us all useless public documents, and for that purpose furnish frank labels for their free transportation. By this means our

own library has been added to and other libraries receive through this office publications which they greatly needed.

All requests from libraries for books will some day be made in stereotyped form, and we will then endeavor to keep track of their wants, so as to fill them whenever the publications desired drift in from other libraries.

DOCUMENT RETURNS.

During the year just closed this office distributed 642,599 books to libraries; 64,379 were sent out to miscellaneous libraries upon request, the balance being furnished under the law to designated and geological depositories. The returns from these libraries of useless or duplicate documents numbered 407,716 books, and this represents only a small part of the accumulation which the libraries are desirous of turning over, but which up to this time we have been unable from lack of sufficient competent help or storage space to receive.

The matter of document returns will be taken up in earnest the early part of this year, and the L street warehouse will be used to hold the useless publications which are being sorted from among the valuable books. Of the 3,065,002 books and pamphlets now on hand, two-thirds at least are fit only for condemnation and sale for waste paper, having been superseded by later editions and possessing no value to libraries.

GRATUITOUS DISTRIBUTION.

Public documents should not be given away. A nominal charge should be made, covering cost of printing and distribution. This slight charge will prevent waste and reimburse the Government, without hardship to anyone. Those who do the most talking about free distribution are usually ignorant of the disastrous consequences which such a distribution entails. I would make the price as reasonable as possible or distribute gratuitously to properly constituted depository libraries for the benefit of the public, but under no circumstances would I make a general distribution free to individuals.

The collaborators on various works, scientists engaged in research by which the Government profits, and all other contributors to knowledge should of course receive the books free in recognition of the services they may have performed.

DISTRIBUTING METHODS—PRESENT AND PROPOSED.

The entire scheme of distribution at present is erroneous. Take for instance the enormous output of bookwork of the Government Printing Office, which is, as a rule, carefully wrapped in strawboard and manila paper and tied with expensive twine for delivery to the publishing office. The bundles, so prepared at a great cost against possible injury to the books, are hauled in wagons to the various

Departments and there carried laboriously up winding stairways or by means of incapacitated elevators to already overcrowded offices. Here the wrappers are removed and each book separately encased in fresh strawboard, paper, and twine, to be labeled and again hauled down, or up, as the case may be, to other wagons for delivery to the Post-Office Department for shipment. Consider the useless expenditure of time and strength.

Why not establish a wrapping division in connection with the pamphlet bindery and deliver the volumes to the mailing section in this office for distribution? Franks or labels could be sent to the Superintendent of Documents to be placed on the volumes and they would then suffer from but one hauling. And even this hauling might be done away with by the establishment of a branch post-office in connection with this office.

A BRANCH POST-OFFICE.

During the past year this office sent to the city post-office for delivery over 175,000 packages, weighing approximately 500 tons, which does not include the shipments of the Congressional Record, of which over 28,000 pieces are sent out each night during the sessions of Congress. The greater part of this was forwarded as registered mail, which demands additional checking after it arrives at the post-office before a receipt can be given. The business of this office is constantly increasing, and it is almost a necessity now to have a branch post-office for the quick dispatch of our important cash mail. Like all large mail-order establishments, a necessary adjunct to the proper transaction of our business is a branch post-office, and its establishment should be obtained just as soon as we are settled in quarters which will accommodate it.

Inspired by the improved facilities which our mailing machines and a branch post-office would offer, the publishing offices would come to realize the advantage of having their books shipped from the Government Printing Office rather than hauled to the Department and then hauled out again. The saving in time and labor, to say nothing of that to the life of the books themselves, will more than offset the expenditure, and distribution from a central agency will be accomplished.

Our mailing room is operated in such a manner that only additional help is necessary to expand the system to meet any demands, and this assistance may be the purely undefinable quality which is usually drawn from a temporary list of civil service eligibles. We expect to handle the Congressional Record under our new method if the patentees can guarantee a supply of necessary machines and materials. So far our experiments have led us to the conclusion that the mailing devices selected are the best on the market for our particular kind of work.

MAILING MACHINES.

Many weary days have been expended in watching the operation of mailing devices in large establishments where mailing problems are of great importance. I also visited the manufacturers of the more important systems, thoroughly investigated their factories, and talked with them of our needs and of improvements to their systems or of how they might be made to apply in solving our intricate problem. The search along these lines was truly depressing. To see large editions of great magazines come from the presses in an incredibly short time, covered and stitched ready to be trimmed and mailed, and then to witness the slow, laborious process of wrapping and addressing, was a contrast so startling that it seemed hardly possible it could exist. No inventor has as yet solved the problem of a practical mailing machine—that is, a machine which prepares for mailing by wrapping and addressing the publication.

Many attempts have been made and some success has been achieved in both branches of this important operation, but no practical machine has as yet been placed upon the market which accomplishes the entire result. Even with the rapid machines which we are now using for the actual addressing, we are forced to reduce our output to the speed of human hands for the wrapping. It has always been our aim to send out cash orders within twenty-four hours of their receipt, and this is made extremely easy by the use of our stencil system.

CENTRALIZING DISTRIBUTION.

The project of centralizing the distribution of Government publications has long been discussed and is generally conceded to be most desirable. As far back as 1882, when the publication and distribution were not nearly as extensive nor involved as at present, the subject received serious consideration by a committee appointed in compliance with a resolution of the House of Representatives adopted August 8, 1882. This committee was composed of Dr. John G. Ames, the superintendent of documents of the Department of the Interior, and the foremost document expert of that period; Mr. A. R. Spofford, the veteran Librarian of Congress, and Mr. Spencer F. Baird, Secretary of the Smithsonian Institution. This eminent trio not only furnished the information requested by the resolution, but also volunteered some sound suggestions relative to more systematic issuance and distribution of public documents.

The following quotations are made as clearly stating the necessities for which this office continues to advocate remedial legislation.

As to centralizing distribution they report:

The committee are deeply impressed with the number of documents printed by authority of Congress.

* * * * *

They are no less deeply impressed with the lack of system and economy in the distribution of these documents. The one reform most essential to secure the object for which it is supposed that public documents are issued is the decrease of the number of agencies by which they are distributed. Under the practice now prevailing, nearly all documents, whatever may be their cost and value, are distributed by from two to four agencies, each in ignorance of what the other is doing, so that it is impossible but that to no small extent documents are sent in duplicate and triplicate to the same parties.

In the judgment of the committee, no distribution of public documents entirely satisfactory will be accomplished until all excepting those required for official use are distributed by a single agency, which can and should be required to detect and prevent duplications, which should be held to a strict accountability for all documents intrusted to its care and upon which all orders should be given by those entitled by law to direct their specific distribution.

It is not believed that any special inconvenience would attend such a system, or that the rights and privileges of any party would be infringed by its adoption.

The establishment of a single agency for this work would very greatly subserve the public convenience, as it would soon come to be recognized as the source from which information in regard to any and all documents could be readily secured and the party with whom most of the correspondence relating to the subject should be conducted.

Very serious inconvenience is now experienced by many, especially scientists and other students and librarians, in obtaining definite information as to particular documents desired, and often not until protracted correspondence has transpired, if at all, is such information gained.

As to centralizing the sales they have this to say:

The existing provisions for the sale of documents are very unsatisfactory; so impracticable, indeed, that very few avail themselves of them.

* * * * *

The committee are convinced that some more practical method for supplying such parties with public documents should be adopted, and that opportunity should be afforded for the purchase of any publication of the Government so long as the edition of the same printed remains unexhausted.

This can readily be accomplished by giving the officer in charge of the general distribution of documents authority to make requisition upon those offices of the Government by which or for which documents are printed for such as are not required for strictly official use. It will not be necessary for an edition of any document to be ordered for sale, but simply that some one officer of the Government shall have authority to sell any document printed, and whenever he has an order for any document to make requisition for same upon the office for which it is printed, if not already in his charge. To the care of this same officer, in the judgment of the committee, should be committed all documents which have been or may be ordered for sale, instead of as now scattering them through several Departments and offices of the Government.

In this matter, as in others, greater unity and system are much to be desired.

Although the report and the resolution submitted therewith failed to secure action on the part of Congress, they supplied an interesting chapter in public document history, and through this effort, and the

persistence of Doctor Ames perhaps more than any other person, the law of January 12, 1895, was enacted, which embodied many of the original suggestions in an elaborated form.

I have many times gone on record in protest against the illogical provisions of the printing act of 1895, but no more glaring inconsistency exists therein than that which comes about by providing, in section 61, that the Superintendent of Documents shall have general supervision of the distribution of all public documents, and then naming exceptions which remove from his jurisdiction nearly all the publications ordinarily authorized for distribution. To further complicate matters, it provides in section 92 for a competent person to be appointed in each Executive Department to oversee and keep track of the distribution for such Department.

That this garbled legislation was not enacted in the form in which it was originally prepared is a matter of record, but the concessions were necessary in order to get the printing act passed at all, and "half a loaf is better than none."

As enacted, it was intended to provide for a more complete consolidation of all Government distributing agencies, with the exception of those for Congress, but never in all the years of the existence of that law has anything been done to this end until this office made the first move in the early part of the fiscal year. We have now obtained control of nearly all of the general distribution, and at the present time the only offices of any consequence selling their own publications are the Hydrographic Office (the law governing which makes it impossible to turn them over for sale by this office), and some of the bureaus of the Interior Department, which are still considering the advisability of abandoning their distribution and sales work and turning it over to this office as the law permits.

Even when we have succeeded in securing nearly all the departmental sales, we have not begun to eliminate the cause of so much useless confusion and expensive duplication in distribution, for the Congressional distribution is by far the most illogical and can never be improved until it is accomplished from the same center as that of the other publishing branches of the Government.

This promiscuous distribution by Congress, which is to be deplored, results in sending publications such as the horse or cattle books throughout districts in which automobiles and electric cars hold sway and where cattle are represented only in butcher shops and dairies, while the rural districts are flooded with "Flags of maritime nations," or single volumes of the series of "Messages and papers of the Presidents," instead of being supplied with the books published especially for their use. This statement is not exaggerated, and the condition arises from the present unsupervised methods of distribution.

The consolidation of the two folding rooms of Congress with this office would make the Superintendent of Documents an officer of great value to the entire Government; prevent the indiscriminate distribution of valuable documents in duplicate or triplicate to individuals or institutions not desiring them; preserve the statistics of printing at one place, thus making access to the records much easier to the Members and Senators; and provide a means by which the accumulations could be disposed of under the direction of an officer with all the statistics of past distributions to guide him. Perhaps it will be a matter of years before legislation to accomplish this end can be enacted, but it must ultimately come as a part of the general movement toward reform in business methods throughout the entire governmental establishment.

That public documents should be available for the use of the general public, and not accumulated in useless masses in the storerooms of this office, or of the various publishing offices, or of Congress, is indisputable. That thousands of valuable documents are stored away in many of these places, either from lack of energy or of knowledge as to how to distribute them, or because they are tied up by the operation of restrictive legislation, is also beyond doubt.

As rapidly as possible this office has been investigating these conditions and doing everything it consistently could to relieve the situations discovered. Tons of documents have been transferred to the jurisdiction of the Superintendent of Documents, cleaned up, and distributed or sold. Entries have become possible in our price lists of valuable publications which were considered obsolete until investigation revealed quantities stored away because of lack of knowledge as to how and where to place them. Many instances of this kind could be cited.

Being in touch with the libraries and the public, this office is in a condition to advise and place by distribution the books where they are desired.

RECENT LEGISLATION.

During the past fiscal year some of the most important legislation ever enacted in relation to public documents has become effective.

Continuing its good work in the line of stopping useless printing, at the same time in no wise interfering with the supply for legitimate demands, the Printing Investigation Commission has labored to make effective the two public resolutions (nos. 13 and 14), approved March 30, 1906, and the successful operation of the provisions of these resolutions has not only reduced the expense of public printing but has relieved this office of the receipt of a mass of undesirable publications. In the first year of their operation their feasibility has been thoroughly demonstrated, even to the most skeptical.

Early in the year the Commission called upon this office for various statistics and requested suggestions looking to legislation to provide necessary authority for accomplishing certain ends which the course of events had made almost mandatory, and to insure more systematic distribution in the future to libraries. For many weeks we cooperated with the Commission in formulating into a bill such provisions as would remedy existing evils, provide against duplication in distribution, and procure a more logical arrangement for binding.

The bill evolved became a law on March 1, 1907, and much good is expected to result therefrom. Besides providing for the printing of "extra copies" of bills or documents or reports, it reiterates the provisions of public resolution no. 13, of the Fifty-ninth Congress, first session, approved March 30, 1906, relating to the payment from allotments for departmental printing, and then takes up the matters directly connected with this office. In paragraph 1, of section 81, it provides for the numbering of documents and reports in four series—namely, Senate documents, Senate reports, House documents, and House reports—and further provides that those publications which are annual or serial in character and which originate in or are prepared by an Executive Department, bureau, office, commission, or board, shall not hereafter be numbered in either of these series, but be designated by title, and that the "usual number" of the Congressional edition of Department reports shall be printed concurrently with the Department edition.

Ever since the beginning of the Fifteenth Congress the Congressional documents and reports have been numbered as a matter of convenience, and this legislation simply authorizes a valuable and long-established custom, at the same time removing the only objection to the numbering by providing that the annual and serial publications of the Departments be distributed in their Department edition instead of as Congressional documents.

The former method of numbering everything serially was objectionable, in that it compelled this office to hold up valuable publications for a year at least and sometimes longer, until they could be arranged by document numbers in suitable volumes for binding. This delay caused the libraries to apply to the publishing offices for Department editions, as the documents are most sought for when newly issued, and if withheld are practically useless when distributed. In this way the libraries obtain two copies, and eventually discard one and return it to this office to be added to our vast accumulation.

Under the new law also these publications will be issued in but one edition, rather than as both departmental and Congressional documents. This will mean a saving of at least 20 per cent in the labor and cost of cataloguing, besides removing another source of perplexing duplication for the libraries to worry over.

There should be permitted but one print of any public document, and every reprint thereof should be identical with the original print, and new revised editions should be so indicated. The practice of substituting changed title-pages and issuing the same material thereunder is the poorest kind of bookmaking, and it is time it was abolished by practice if not by law.

NEEDED LEGISLATION.

While much has been accomplished in the way of simplifying the issue of Government publications and obtaining a more logical distribution, there are still many matters which require legislative attention before the affairs of this office can be adjusted harmoniously in accord with the fine business methods for which the system installed will prove a basis.

First and foremost in the library interests is the matter of quick delivery of all publications. In furtherance of good service in this respect, a law should be passed directing the Superintendent of Documents to furnish to depository libraries in unbound form as soon as issued all Congressional documents and reports other than annual and serial publications, for the immediate delivery of which in bound form the law of March 1, 1907, provides.

It would be desirable to send the serials out unbound and also furnish them in their final volume form. All these documents and reports should of course be provided to be distributed also in bound form when properly arranged under the present statutes.

Next in importance from the library standpoint is the question of legislation which will authorize the issue of a full Monthly catalogue with a cumulative index, and for which the price feature is removed to a regular price list. This enactment should also authorize the issue of the Document catalogues in their present biennial form instead of annually as the law now being violated demands, and give directions for the preparation of all necessary cards to catalogue the books sent to designated depositories, the distribution of enough of these cards free to depositories to meet all their requirements, and their sale to other libraries at a nominal sum to cover cost of printing and distribution.

I am of the opinion that the last feature would develop enough to cover the expenses incurred.

The repeal of a portion of section 61 is also very desirable. The clause referred to, and which should be stricken from the law, reads as follows:

* * * But only one copy of any document shall be sold to the same person, excepting libraries or schools, by which additional copies are desired for separate departments thereof, and Members of Congress.

This provision was originally inserted to prevent booksellers from cornering the market on desirable publications, a practice which had become common, and which worked hardship to those who were interested in public documents. Since the law now permits the Superintendent of Documents, with the approval of the publishing office, to reprint any public document for which there may be a demand, it is now impossible for such a condition to exist, and the restrictions of the law operate only as a hindrance to our sales.

A law should also be at once enacted permitting the Superintendent of Documents to appoint a board for the condemnation of surplus public documents which have been superseded by later editions, or are useless because of their age or condition. Now he is forced to store these useless books and keep an accurate account thereof, and it costs \$10,000 a year to do this—money absolutely wasted. With permission to condemn and sell as waste paper such public documents as are useless, he could keep his stock down to a working basis and convert worthless material into cash. Nearly 2,000,000 books and pamphlets are now on hand awaiting such condemnation proceedings, occupying valuable space, and serving but to accumulate dust and vermin.

Then, too, the provision relative to an itemized annual report should be repealed, as it is of no practical value.

THE ASHEVILLE CONFERENCE.

The fourth general session of the twenty-ninth annual meeting of the American Library Association, held at the Battery Park Hotel, Asheville, N. C., on the morning of May 28, 1907, marked an epoch in the history of public documents, for at that session for the first time the Government's representative, in the person of the Superintendent of Documents, formally met with the representatives of the libraries and discussed matters pro and con relative to the present methods of distribution of public documents, the needs of the libraries, and the duties and limitations which the laws relative to the subject impose.

Two hours were allowed for papers and discussion, and with a large attendance of delegates present the time was most profitably spent.

Following the report of the committee on public documents, it was my privilege to open the discussion with a few general remarks. Not a moment was lost of the entire time and every one went away feeling that a closer bond had been established between the libraries and this office.

Such a successful meeting should argue favorably for the allotment of some time at each annual conference for the consideration of the subject of public documents, so that the representative from this office may come in touch with those who are working with us in our endeavors to make public documents better known and more available.

CONCLUSION.

Looking back upon the work of the year, I am impressed with what has been accomplished, even though still faced by many unsolved problems. We have at least founded a substantial basis for development, and are no longer compelled, through pressing difficulties, to count the struggles and failures of the past, but are looking forward to great growth in the future.

The suggestions herein made are the result of careful deliberation and due to the present stress of circumstances. Being put forward in the right spirit they demand a hearing. Those which are of value will eventually be acted upon, as the logic of events compels such action, while any and all which exhibit errors of judgment will, I hope, be frowned down to make way for the favorable consideration of matters of more importance.

Respectfully submitted,

WILLIAM L. POST,
Superintendent of Documents.
