NOTE.—Documents for sale by this office will be indicated by a star (*) following the price named. Words and figures inclosed in brackets [] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 55th Congress, 2d session, is to be understood.

General Information

With Reference to the Distribution of Documents

EXCHANGES

Exchanges will be made of surplus miscellaneous documents for such other documents and books as may be required when the same can be done to the advantage of the public service.

FREE TO INDIVIDUALS

The Superintendent of Documents is not authorized to supply documents free to individuals, except publications specifically authorized by Congress to be distributed to persons designated by Senators, Representatives, or Delegates. The only documents of that character now being distributed are, the compilation entitled "Messages and Papers of the Presidents," 1787 to 1897, by Richardson, and the Official Register, or "Blue Book."

FREE TO LIBRARIES

He is directed to distribute current publications to three classes of libraries, to be designated to him by Senators, Representatives, and Delegates in Congress, as follows:

To class 1.—Designated depositories;—one to be named by each Senator, Representative, or Delegate in Congress. Libraries of this class receive one copy of each of the departmental publications and of the numbered Congressional documents. These include everything sent to the other two classes.

To class 2.—Geological libraries;—two to be named by each Senator, Representative, and Delegate in Congress under the provisions of sec. 79 of the printing law, 28 Stat. at Large, 601. These libraries receive the monographs and bulletins of the Geological Survey.

To class 3.—Remainder libraries;—public and school libraries designated by Senators, Representatives, and Delegates in Congress to receive fractional remainders of Congressional quotas, under the provisions of sec. 68 of the printing law, above referred to. Such libraries do not receive complete sets of public documents, because "remainders" vary from a dozen to four hundred copies, never equaling the number of this class of depositories.

SALES

The Superintendent of Documents is authorized to sell at cost any public document in his charge, the distribution of which is not otherwise provided for. Only one copy is permitted to be sold to the same person, excepting libraries or schools, and Members of Congress.

PRICES

Documents for sale by this office will be indicated by a (*) following the price named. The absence of a (*) indicates that application should be made to the Department, bureau, or division issuing the document.

HOW TO REMIT

Remittances may be made to the Superintendent of Documents by postal money order, express money order, draft, or check. In case of remittance by check the documents ordered will not be sent until after

the check has been collected. Any charge for collection will be deducted from the face of the check and documents sent for the remainder. *Stamps or foreign currency will not be accepted in any case.*

Remittances to the Public Printer should be made by postal money order, express money order, or draft on New York. Remittances to the Geological Survey should be made by money order. The War Records Office will receive currency as well as postal money orders if the exact amount be sent. The State Department will receive drafts on New York or Washington banks, as well as money orders or currency.

All the Government offices which have books, pamphlets, maps, or charts for sale issue price-lists, which will be sent free to all applicants. The prices charged are never more than cost and 10 per cent added, and frequently much less than that.

All public documents, from whatever Department or bureau they may be bought or procured, will be forwarded free of postage to all points in the United States, Canada, and Mexico. To other countries regular rates of postage are charged, and remittances must be made to include such postage.

A NEW FEATURE

A new, and it is hoped a helpful, feature has been added to the Monthly Catalogue, beginning with the December, 1897, issue—an index.

ALASKA

A reference list of Government publications on Alaska is printed in this issue of the Monthly Catalogue in response to many hundreds of inquiries for information on the subject.

WHERE DOCUMENTS MAY BE OBTAINED

General directions as to where documents may be procured are given in the body of the catalogue.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17½ inches in height by 11½ to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet catalogued below.

About one-fifth of the area of the country has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 2c. each.
