PREVIEWS

The following publications are in the process of being printed. Advance sales orders may be placed for these publications. Orders will be scheduled and copies mailed as soon as stocks are received. It is not possible to estimate the lapse of time before the publications will actually appear. All information in regard to title, series, classification, distribution, and price given in these listings is preliminary and subject to change when the publications actually come from the press. Those so marked will be sent to depository libraries, providing, that at the time of going to press, the libraries were on list to receive the items under which these publications will be distributed.

Common abbreviations for the names of States, months, etc., are also used.
 An explanation of the symbols used to designate sizes of publications is given on the inside of the front cover.

Explanation

The individual issuing department, bureau, office, or agency is considered the publisher of Government publications.

Words and figures enclosed in brackets [] in titles are given for information, but do not appear on the title pages of the publications cataloged. Place and printer are not given for publications printed at the United States Government Printing Office, Washington, D.C., or at Government departmental and field printing plants. The dates given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays.

Under provisions of the Printing Act of January 12, 1895, all Government publications, except administrative and confidential (or restricted), are entered in the Monthly Catalog.

The L.C. card number appended to some of the entries is for those libraries ordering printed cards from the Library of Congress. The number at the extreme right of an entry indicates the classification of the publication in the Office of the Superintendent of Documents.

General Information

The Superintendent of Documents, Government Printing Office, Washington, D.C., is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to book dealers and also to quantity purchasers of 100 or more copies of a single publication going to one address, on condition that they will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be overprinted with any advertising matter.

Publications cannot be supplied free to individuals nor forwarded in advance of payment.

PRICE LIST

There is no general price list of public documents, but numerous lists have been prepared on special subjects and any of these will be furnished free, on application, by subject or subjects concerning which information is desired. It will also be noted that current publications which are for sale are listed in this catalog.

LIST OF SELECTED PUBLICATIONS

In addition to the price lists, the Documents Office issues a biweekly list of Selected United States Government publications for sale by the Superintendent of Documents. Each list contains annotations and prices, and may be obtained free upon application to the Superintendent of Documents.

CONGRESSIONAL BILLS, DOCUMENTS, AND REPORTS

More than 12,000 different bills are usually introduced during a Congress, and there are additional prints on many during the progress of the legislation. With the exception of a very few—such as revenue bills—the demand is an unknown quantity and on most of them we receive no orders, which makes it impossible to print a sales supply. It may be that a copy could be obtained from your Congressman.

A difficult problem is also presented in providing a supply of Congressional documents, hearings, and reports because there are approximately 6,000 of this class of publications issued during a Congress. Sales copies of a few of the more important ones are printed. The availability of those not for sale is indicated in the individual entries.

HOW TO ORDER PUBLICATIONS

Publications entered in this catalog that are for sale by the Superintendent of Documents are indicated by an asterisk (*) preceding the price. Those for sale by the National Technical Information Service are indicated by a farad (Φ) preceding the price. A black dot (●) indicates that the publication has been, or will be, sent to depository libraries. A dagger (†) indicates that application should be made to the department, bureau, or agency issuing the document. A double dagger (‡) indicates that the document is printed for official use and is not obtainable. When additional information concerning the method of procuring a document seems necessary, it will be found under the name of the bureau by which it was published.

In ordering a publication from the Superintendent of Documents, give the name of the publishing department, bureau, or agency, the title, the classification number which is added to the entry at the extreme right, and the stock number (if given following the price). Order Congressional documents and reports by the title, together with the document or report number and the Congress, e.g., H. Doc. 103, 88th Congress.

Do not use the L.C. card number in ordering a publication from the Superintendent of Documents.

HOW TO REMIT

Remittances for documents marked with an asterisk (*) should be made to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, by coupon, postal money order, express order, or check. Publications cannot be mailed in advance of receipt of remittance. Foreign remittances should be made by international money order, or draft on an American bank.

Foreign money, defaced or smooth coins, will not be accepted. Do not send postage stamps.

For the convenience of the general public, coupons in denomination of 5¢ that are good until used in exchange for Government publications sold by the Superintendent of Documents, may be purchased from this office. Address the order to Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Persons who make frequent purchases from the Superintendent of Documents may find a deposit account convenient. Deposits of \$25.00 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are furnished for this purpose. After the handling of the order has been completed, it will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge, and the balance on deposit.

No charge is made for postage on documents forwarded to points in United States and its possessions, or to Canada, Cuba, Mexico, and certain Central and South American countries. To other countries the regular rate of postage is charged, and remittances must cover such postage. In computing foreign postage, add one-fourth of the price of the publication.

LIBRARY CLASSIFICATION IN DOCUMENTS OFFICE

The classification given at the right of entries for departmental publications is that used in the Library of the Public Documents Department. The *shilling* mark (/) separates what ordinarily would be superior or inferior numbers or letters. It is not practicable to print these numbers or letters as *superiors* or *inferiors* in the Monthly Catalog.

New Classification Numbers

A 57.6/4 : nos_____	Soil Conservation Service. Conservation guide sheets (numbered).
A 101.10 : nos_____	Animal and Plant Health Service. APHIS (series).

Air frames, *see* Airframes.

Air inlets (aircraft):

investigation of mixed compression axisymmetric inlet at Mach number 5.3, 7127

Air lines, *see* Air carriers.

Air navigation, enroute IFR peak day charts, 6196

Air pollution:

background information, proposed national emission standards for hazardous air pollutants, asbestos, beryllium, mercury, 6195

compilation of air pollutant emission factors, 6193

large power plant effluent study (LAP-PES), instrumentation, procedures and data tabulations, 6194

visible exhaust smoke from aircraft jet engines, study, 7390

see also Pollution.

Air Programs Office:

publications—

AP series, 6193

APTD series, 6194-95

Air safety, *see* Safety of life.

Air taxi operators, *see* Air carriers.

Air terminals, *see* Terminals (transportation).

Air traffic:

activity, FAA report, 1971 calendar year, 6795

dynamic simulation study of air traffic capacity of San Francisco Bay terminal area, 7394

enroute IFR peak day charts, 1971 FY, 6196

evaluation of flight plan position information display for oceanic control, 7395

measurement and analysis of en route ATC digital radar system errors, 7397

national aviation system FAA 10 year plan, 6797

Air transportation, *see* Air carriers.

Aircraft:

analytical and experimental investigation of aircraft metal structures reinforced with filamentary composites, concept development and feasibility, 7081

audit of payments from special bank account to Lockheed Aircraft Corporation for C-5A aircraft program during quarter ended Dec. 31, 1971, GAO report, 6907

aviation's environmental action report, 6794

design of convective cooling system for Mach 6 hypersonic transport airframe, 7084

development and test of explosive exit concept for civil transport aircraft, 7392

electronically or optically generated displays for aircraft control and combat cue information, military standard, 6644

fan and wing force data from wind-tunnel investigation of 0.33 meter (15-in.) diameter VTOL model lift fan installed in two-dimensional wing, 7129

flow field analysis of aircraft configurations using numerical solution to 3-dimensional unified supersonic/hypersonic small-disturbance equations, 7085

investigation of aircraft tire damage resulting from touchdown on grooved runway surfaces, 7135

national aviation system, FAA 10 year plan, 6797

noise standards and regulations, 6798

small-scale fire test of high-temperature cabin pressure sealant and insulating materials, 7399

system for buying spare parts for initial support of new military aircraft needs substantial improvements, GAO report, 6919

Aircraft—Continued

VTOL, motion effects on IFR hovering task, analytical predictions and experimental results, 7086

see also Aircraft accidents.

Aircraft accidents:

evaluation of self-sealing breakaway valves for crashworthy aircraft fuel systems, 6222

investigation of 2 methods for improving crashworthiness of integral fuel tanks, 7388

NTSB-AAR series, 7223-26

NTSB-AAS series, 7233

psychosocial reconstruction inventory, postdictal instrument in aircraft accident investigation, 6235

study of lessons to be learned from accidents attributed to turbulence, 7233

Aircraft engines, *see* Engines (aircraft).

Aircraft instruments, *see* Aeronautical instruments.

Airdrop operations, *see* Air drop operations.

Airfields, *see* Aviation fields.

Airframes, design of convective cooling system for Mach 6 hypersonic transport airframe, 7084

Airplane tires, *see* Tires.

Airplanes:

spin technology as related to light general-aviation airplanes, summary, 7109

Wright brothers biography and first flight, 7149

Airports:

dynamic simulation study of air traffic capacity in San Francisco Bay terminal area, 7394

national aviation system, FAA 10 year plan, 6797

Airspace utilization, *see* Air traffic.

Alabama:

census of housing, 1970, detailed characteristics, 6248

land management for bobwhite quail in Alabama, 7321

landings, fish and shellfish, 1969 annual summary, 7195

Alaska:

American Indian and Alaska natives, new national policy, hearings, 6576

community inventory, 6803
