## P R E V I E W S

The following publications are in the process of being printed. Advance sales orders may be placed for these publications. Orders will be scheduled and copies mailed as soon as stocks are received. It is not possible to estimate the lapse of time before the publications will actually appear. All information in regard to title, series, classification, distribution, and price given in these listings is preliminary and subject to change when the publications actually come from the press. Those so marked will be sent to depository libraries, providing, that at the time of going to press, the libraries were on list to receive the items under which these publications will be distributed.

|                   |  | WRPC-----         | Weather Record Proc-<br>essing Center. |

Common abbreviations for the names of States, months, etc., are also used.

## Explanation

The individual issuing department, bureau, office, or agency is considered the publisher of Government publications.

Words and figures enclosed in brackets [ ] are given for information, but do not appear on the title pages of the publications cataloged. Place and printer are not given for publications printed at the United States Government Printing Office, Washington, D. C. Size is not given for octavo publications. Size of maps is approximate, measurement being made from outer edge of border, excluding margin. The dates given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays.

The word "processed" as used in this catalog indicates publications which are reproduced by duplicating processes other than ordinary printing, e. g., mimeograph, multigraph, planograph, rotaprint, multilith. Processed publications are not obtainable from the Superintendent of Documents, and requests for them, if they are available, should be addressed to the issuing office.

Under provisions of the Printing Act of January 12, 1895, all Government publications are entered in the Monthly Catalog. However, administrative and confidential (or restricted) publications are omitted.

The L. C. card number appended to some of the entries is for those libraries ordering printed cards from the Library of Congress. The number at the extreme right of an entry indicates the classification of the publication in the Office of the Superintendent of Documents.

# General Information

The Superintendent of Documents, Government Printing Office, Washington, D. C., is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to book dealers and also to quantity purchasers of 100 or more copies of a single publication on condition that they will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be overprinted with any advertising matter.

Publications cannot be supplied free to individuals nor forwarded in advance of payment.

## PRICE LISTS

There is no general price list of public documents, but numerous lists have been prepared on special subjects and any of these will be furnished free, on application, by subject or subjects concerning which information is desired. It will also be noted that current publications which are for sale are listed in this catalog.

## LIST OF SELECTED PUBLICATIONS

In addition to the price lists, the Documents Office issues a biweekly list of Selected United States Government publications for sale by the Superintendent of Documents. Each list is arranged alphabetically by subjects, with annotations and prices, and may be obtained free upon application to the Superintendent of Documents.

## CONGRESSIONAL BILLS, DOCUMENTS, AND REPORTS

More than 12,000 different bills are usually introduced during a Congress, and there are additional prints on many during the progress of the legislation. With the exception of a very few—such as revenue bills—the demand is an unknown quantity and on most of them we receive no orders, which makes it impossible to print a sales supply. It may be that a copy could be obtained from your Congressman.

A difficult problem is also presented in providing a supply of congressional documents, hearings, and reports because there are approximately 6,000 of this class of publications issued during a Congress and only a few of them are called for. We will attempt to print for sale a few of the more important ones, but if not priced the only possible source would be from your Congressman.

## HOW TO ORDER PUBLICATIONS

Publications entered in this catalog that are for sale by the Superintendent of Documents are indicated by a star (\*) preceding the price. A dagger (†) indicates that application should be made to the department, bureau, or division issuing the document. A double dagger (‡) indicates that the document is printed for official use and is not obtainable. The symbol (ø) indicates the publication was received late and no copies are available at the Division of Public Documents. Whenever additional information concerning the method of procuring a document seems necessary, it will be found under the name of the bureau by which it was published.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing department, bureau, or division, and the title, together with the classification number which is added to the entry at the extreme right; order the congressional documents and reports by the title, together with the document or report number and the Congress, e. g., H. doc. 108, 82d Congress.

Do not use the L. C. card number in ordering a publication from the Superintendent of Documents.

### HOW TO REMIT

Remittances for documents marked with a star (\*) should be made to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C., by coupon, postal money order, express order, or check. Publications cannot be mailed in advance of receipt of remittance. Currency may be sent at sender's risk. Foreign remittances should be made either by international money order or draft on an American bank.

*Foreign money, defaced or smooth coins, will not be accepted. Do not send postage stamps.*

For the convenience of the general public, coupons in the denomination of 5c that are good until used in exchange for Government publications sold by the Superintendent of Documents may be purchased from his office. Address order to Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Persons who make frequent purchases from the Superintendent of Documents may find a deposit account convenient. Deposits of \$10.00 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are furnished for this purpose. After the handling of the order has been completed, it will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge, and the balance on deposit.

No charge is made for postage on documents forwarded to points in United States and possessions, or to Canada, Cuba, Mexico, Newfoundland (including Labrador), and certain Central and South American countries. To other countries the regular rate of postage is charged, and remittances must cover such postage. In computing foreign postage, add one-third of the price of the publication.

### LIBRARY CLASSIFICATION IN DOCUMENTS OFFICE

The classification given at the right of entries for departmental publications is that used in the Library of the Division of Public Documents. It is also used as a catalog number for sales stock of this office. The shilling mark (/) separates what would ordinarily be superior or inferior numbers or letters, as it is not practicable to print these numbers or letters as superiors or inferiors in the Monthly Catalog.

# INDEX, 1954

|  | Entry        |  | Entry        |
|--|--------------|--|--------------|
| Pin boys, in bowling alleys, the boy behind the pins-----          | 908, 5757    | Pine—Continued   |              |
| Pin insulators, <i>see</i> Insulators.                             |              | shortleaf—   |              |
| Pin oak, <i>see</i> Oak.   |              | effect of log size and grade on production rate and lumber grade-----                    | 7736         |
| Pinal County, Ariz., Dripping Spring quartzite formation-----      | 1512         | farmers' bulletin-----   | 7328         |
| Pinder, Leo F., relief-----  | 10187, 16672 | first thinning of plantations-----   | 7758         |
| Pine:  |              | littleleaf disease-----  | 9158         |
| California Coast Range subregion, ownership and use-----           | 843          | slash—   |              |
| direct seedling in central hardwoods region-----                   | 10564        | Escambia Experimental Forest, management-----  | 846          |
| dwarfmistletoe—  |              | forests, grazing-----  | 4231         |
| Pringle Falls Experimental Forest-----                             | 4225         | gum yields, south Florida-----   | 4229         |
| southwest-----   | 10572        | nomenclature and description-----  | 10579        |
| eastern white, American woods-----                                 | 15536        | practical schedule for pruning-----  | 10575        |
| grafting-----  | 9098         | southern—  |              |
| Jack pine-----   |              | characteristics and importance--   | 18741        |
| budworm, in Michigan-----  | 18749        | interim log grades-----  | 4216         |
| mortality from fire in stands-----                                 | 18751        | planting-----  | 15985        |
| loblolly—  |              | southern yellow, fence posts, grading rules-----   | 7767         |
| crown length, clue to vigor-----                                   | 4234         | tree volume equivalents-----   | 7762         |
| first thinning of plantations-----                                 | 7758         | Virginia pine gum flow and pitch-soak following Fusarium inoculation-----                | 18766        |
| growth, mortality, and regeneration after cutting-----             | 862          | western white—   |              |
| littleleaf disease-----  | 9158         | American woods-----  | 15537        |
| loblolly-shortleaf, lumber grade yields by log grade-----          | 10580        | forests, site index changes-----   | 1930         |
| stocking, 2 systems of measuring seedlings-----                    | 4230         | white, planted, growth in Ohio and Indiana-----  | 4214         |
| lodgpole—  |              | Pine Bluff, Ark., unemployment of hired farm workers-----                                | 18548        |
| bibliography-----  | 848          | Pine cones, <i>see</i> Cones (pine).   |              |
| management in intermountain region, problem analysis-----          | 18744        | Pine Flat Dam, Kings River, Calif., hydraulic model investigation-----                   | 4059         |
| seed viability after natural storage in slash-----                 | 18745        | Pine River Irrigation District:  |              |
| longleaf—  |              | repayment contract—  |              |
| forests, grazing-----  | 4231         | law-----   | 14071        |
| how to grow-----   | 4608         | reports-----   | 9945, 12093  |
| management in Escambia Experimental Forest-----                    | 846          | Pineapples, production and trade in Malaya-----  | 8773         |
| pruning, how early-----  | 12385        | <i>see also</i> Bromeliaceae.  |              |
| seeding, growth, and forest problems-----                          | 18739        | Pinellas County, Fla., beach erosion control study-----                                  | 18347, 18571 |
| soil and climatic factors related to growth-----                   | 5694         | Pink bollworms:  |              |
| turpentinizing methods development-----                            | 10576        | hibernation experiments in Texas and Oklahoma-----                                       | 9144         |
| lowland sites, burning treatment tested-----                       | 5683         | quarantine and regulations, amdt., regulated areas, extension-----                       | 719          |
| major forest types in southeast, site index-----                   | 4232         | Pins, straight and safety pins, trade agreement escape clause investigation, report----- | 15923        |
| planting-stock storage in California region-----                   | 4210         | Pinsetters, <i>see</i> Pin boys.   |              |
| ponderosa—   |              | Pinus eliottii, <i>see</i> Pine.   |              |
| American woods-----  | 839          | Pinus resinosa, <i>see</i> Pine.   |              |
| bark beetle resistance affected by logging damage-----             | 15547        | Pinworms, health information series-----   | 10770        |
| dwarfmistletoe-----  | 10572        | Pions:   |              |
| growth on best sites-----  | 1926         | attenuation of 33-Mev position pions in hydrogen-----                                    | 427          |
| pole-size, growth rel. to selection for pruning-----               | 18761        | excitation function-----   | 4931         |
| seed supply, effect of squirrels-----                              | 1929         | low-energy pion-nucleon interaction-----   | 4933         |
| site preparation rel. to ground cover in natural regeneration----- | 15538        | <i>see also</i> Mesons.  |              |
| standard stock doors, standard of trade-----                       | 18254        | Piowaty, Carl, relief-----   | 6783, 12126  |
| survival of transplants, ponderosa and Jeffrey-----                | 4207         | Piowaty, W. J., relief-----  | 6783, 12126  |
| pulpwood, southeastern, trends in price-----                       | 4228         | Pipe and pipe fittings:  |              |
| red—   |              | bends under applied moments, characteristics-----  | 1010         |
| American woods-----  | 4205         | bituminized-fibre drain and sewer pipe, standard of trade-----                           | 19318        |
| planted, growth in Ohio and Indiana-----                           | 4214         | copper pipe, seamless, standard, Federal specification-----                              | 8734         |
| pruning effect on growth-----                                      | 851          | coupling repair clamp, specification-----  | 5476         |
| suppressed for forty years responds to release-----                | 854          | gasketless joint for high temperature, high pressure water systems-----                  | 5882         |
| reproducing stands on Eastern Shore of Maryland-----               | 15549        | heat transfer coefficients for flow of water-----  | 4365         |
| sawmilling cost by log size-----                                   | 18769        | inlet pipe, invitation for bids-----   | 1062         |
|  |              | pipe threading, specification-----   | 17408        |

|   | Entry   |
|---|---|
| Pipe and pipe fittings—Continued  |   |
| steel pipe, 48-inch diameter, Angostura Canal, specifications-----                          | 12550, 15809  |
| turbine inlet pipe, invitation for bids-----  | 1063, 4452-53   |

# INDEX, 1954

|   | Entry |  | Entry                       |
|---|-------|--|-----------------------------|
| Spectra—Continued   |       | Speculation—Continued  |                             |
| light flashes, photoelectric method   |       | cotton futures—  |                             |
| of recording, change in time—   | 3423  | commitments of large traders—  | 2411, 12828                 |
| microwave, of molecules, determining spins of nuclei—                           | 4866  | cotton, wool tops, soybean and cottonseed oil, futures trading and open contracts— | 2412, 12829                 |
| ocean wave, and new method of forecasting, wind-generated sea—                  | 4058  | trade—   | 2414, 12826                 |
| ozone measurements by absorption in visible spectrum—                           | 19807 | grain futures, trade—  | 2415, 12827                 |
| particles emitted from heavy elements bombarded by 31 Mev protons—              | 3472  | potatoes, eggs, butter, and rice, futures trading and open contracts—              | 12831                       |
| photochemical transformation of F-centers in FCI crystals at high temperatures— | 4893  | potatoes, futures trading and open contracts—                                      | 2413, 12830                 |
| photographic emulsion calibration techniques—                                   | 1483  | wool cooperatives, using futures markets—  | 18602                       |
| phthalimides substituted, in vapor and in solution, investigation—              | 6384  | see also Commodity exchanges.  |                             |
| Raman—  |       | Speech:  |                             |
| and infrared, phosphonitridic dichloride—                                       | 5877  | intelligibility, bibliography—   | 11159                       |
| glass spectrograph applications—  | 6390  | normal, and delayed side-tone, comparative analysis—                               | 15630                       |
| hydrogen bond effect—   | 4885  | Speeches, see Addresses, lectures, etc.  |                             |
| intensities of frequencies of alkyllanes—                                       | 4892  | Speed, supersonic, turbulent boundary layer heat transfer—                         | 17697                       |
| redistribution of intensities of spectral lines in discharge in argon—          | 4871  | see also Air speed.  |                             |
| stochastic estimates of gamma ray spectral intensities—                         | 15754 | Speed indicators, see Air speed indicators—Tachometers.                            |                             |
| vibrational—  |       | Speedometers, see Tachometers.   |                             |
| of formic acid—   | 1453  | Spencer, Susie L., relief of estate—   | 3832                        |
| of ordering alloy—  | 3425  | Spencer, Idaho, railroad accident—   | 1965                        |
| X-ray absorption—   |       | Sperti, Vittoria, relief—  | 6920, 9777, 11305           |
| ions in solutions, fine structures, theory—                                     | 4865  | Sphygmomanometers, aneroid and mercurial, specification—                           | 18662                       |
| Ni, Cu, and Zn ions—  | 3407  | Spice box, see Spiceboxes.   |                             |
| of zinc in molecules—   | 4883  | Spiceboxes, specifications—  | 17431, 18682                |
| Spectrograms, comparative analysis of normal and delayed side-tone speech—      | 15630 | Spielman, Zita, see Klein, Zita S.   |                             |
| Spectrographs:  |       | Spies:   |                             |
| azimuth-correcting sun follower—  | 2073  | defense facilities protection act, report—   | 14609                       |
| glass, applications in Raman spectroscopy—                                      | 6390  | espionage, Army Signal Corps, hearings—  | 5445, 7076, 8568, 10255     |
| Spectrometers:  |       | espionage in defense establishments, etc., investigation, hearings—                | 7078, 19439                 |
| beta-ray—   |       | Federal espionage laws, revise and extend—   |                             |
| automatic count and control system—   | 1494  | law—   | 16910                       |
| coincidence scintillation spectrometer—   | 8078  | reports—   | 11612, 11633, 12112, 16973  |
| JENER beta-spectrometer—  | 6411  | Internal security legislation, hearings—   | 11895                       |
| transmission of 0-50 kilovolt electrons—  | 9401  | security from, commission to study, report—  | 14178                       |
| mass spectrometers—   |       | Spillways:   |                             |
| bibliography, annotated—  | 6443  | Cheatham Lock and Dam, submergible tainter gate, hydraulic model investigation—    | 10372                       |
| Inghram mass spectrometer—  | 11143 | Dickinson Dam, repair, specifications—   | 9033                        |
| magnetic, in combination with Wilson cloud chamber—                             | 4879  | mechanical, earth dam, building—   | 1103                        |
| metals, latent heats—   | 8076  | Pine Flat Dam, Kings River, Calif., hydraulic model, investigation—                | 4059                        |
| proportional counter, beta-decay study—   | 394   | Spin (aircraft):   |                             |
| scintillation spectrometry as applied to calibration of standard sources—       | 13726 | model and full-scale spin recoveries by use of rockets—                            | 4371                        |
| see also Neutron spectrometers.   |       | spin-recovery motion using rotary-balance aerodynamics—                            | 12475                       |
| Spectrophotometry:  |       | Spin (atomic):   |                             |
| determining intensity, form, and width of infrared absorption bands of liquids— | 6383  | determining spins of nuclei from microwave spectra of molecules—                   | 4866                        |
| light flashes, recording change in time—  | 3423  | Spin (isotopic):   |                             |
| Spectroscopy:   |       | isotopic-spin invariant theory of B-decay—   | 1473                        |
| infrared, bibliography—   | 11162 | Spinels, bibliography—   | 11171                       |
| PbS luminescence in infrared—   | 3416  | Spinning, cotton, test results—  | 1027, 2955, 4575, 17904-905 |
| Spectrum, see Spectra.  |       | Spittler, Alcie R., relief—  | 11794                       |
| Speculation:  |       | Spitzer, Eugene, relief—   | 14207                       |
| coffee futures trading, regulation, hearing—                                    | 7066  | Spleen, desoxyribonucleic acid content, index of recovery in X-irradiated mice—    | 17820                       |

|  | Entry               |  | Entry              |
