USERS' GUIDE

Catalog Arrangement and Indexes

The bibliographic entries in the *Periodical Supplement* are arranged in Superintendent of Documents classification number order. Each record is also assigned a unique catalog number, which consists of a two-digit prefix representing the catalog year, followed by a sequential number beginning with 1 in the first issue of each year. Within this arrangement, the publications of each Government author are further identified by the name and address of the issuing agency.

The *Periodicals Supplement* contains collective records for serial publications which are issued three or more times each year. Bibliographic records for serials issued twice annually or less frequently may be found in the issues of the *Monthly Catalog*. Bibliographic entries found in the *Periodicals Supplement* represent current serial titles. Serials that have changed title or ceased publication during the preceding year are noted in the "Title Changes" and the "Discontinued Periodicals" lists.

Superintendent of Documents classification changes for serial titles found in the *Periodicals Supplement* are identified in the "Classification Changes" list. In instances where Superintendent of Documents classification numbers are the same for different serial titles, the classification number will be qualified by a trailing superior number, for example I 19.65:(nos.) 2. The "Classification Changes," "Discontinued Periodicals," and "Title Changes" lists are located in the preliminary pages of the *Periodicals Supplement*.

Periodicals Supplement entries may be accessed through the following indexes:

Author index: An alphabetical list of government, personal, and corporate authors, editors, and conferences.

Title index: An alphabetical list of titles proper, subtitles, and alternate titles.

Subject index: An alphabetical list of subjects derived from the *Library of Congress Subject Headings*.

Series/Report index: An alphabetical listing of series statements and tracings, series numbers, and report numbers.

Stock number index: An alphanumeric list of GPO and other sales stock numbers.

Title keyword index: An alphabetical list of truncated titles, arranged by important words in publication titles.

A **Margin index** on the back cover locates the six indexes. Listings in all of the indexes are followed by the cataloging entry number, which refers the user to the complete bibliographic citation. Listings in the **Title** and **Subject indexes** are augmented with the publications' author and classification number to enhance identification and retrieval. Cumulative indexes are published in the *CD-ROM version of the Monthly Catalog* will cumulate from the beginning of the calendar year through the current issues.

Abbreviations

The abbreviations used in the bibliographic records all versions of the *Monthly Catalog* are those described in the *Anglo-American Cataloguing Rules*, 2nd ed., and the *GPO Classification Manual: A Practical Guide in the Superintendent of Documents Classification System*.

THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and change. It begins with the first settlers, who came to the Americas in search of a new life. They found a land of opportunity, but also one of challenge. The early years were marked by conflict and struggle, as the settlers fought to establish their own communities and defend their rights. Over time, the United States grew from a small colony into a powerful nation, with a rich and diverse culture. The story of the United States is a story of the American dream, of the pursuit of happiness and freedom. It is a story that continues to inspire and shape the world today.

U.S. GOVERNMENT BOOKSTORES

FEDERAL DEPOSITORY LIBRARY PROGRAM

The Federal Depository Library Program was established by Congress to provide free public access to Government publications. Nearly 1400 public, academic, State, and law libraries serve as an information link with the Federal Government by maintaining collections of Government publications. These collections, which are tailored to local needs, are open to the public. Fifty-three of the libraries are designated as regional depository libraries. They have the responsibility of retaining material permanently and providing inter-library loan and reference services in their regions.

Copies of documents no longer available through the GPO Sales Program can usually be found in regional depository collections. To determine which depository libraries have selected copies of publications listed in this catalog, consult the Superintendent of Documents World Wide Web site and use the Locator Service. A complete listing of regional depositories follows. To obtain a complete listing of all depository libraries, write to:
