13. ABSTRACT (Maximum 200 words) This volume contains over 9,800 literature citations pertaining to all aspects of the biology of 190 species of marine and coastal birds that occur in the Atlantic Outer Continental Shelf Region of the United States. Citations are listed by species in taxonomic order after the American Ornithologists' Union Checklist (sixth edition). Over 500 of the citations focus on the potential effects and/or impacts of oil and gas activities on marine and coastal birds. Citations were limited to the period from 1980 to August 1992. Over 40,000 citations were retrieved. This bibliography is also available in an electronic format written for PROCITE version 1.2. The electronic database may be searched using any common or scientific bird name or by one or more of 21 keywords. Keywords are based on the categories found in Recent Ornithological Literature.

INTRODUCTION

The following bibliography is based on the Atlantic Coast Birds Bibliographic Database (**ATLBIRDS**), which contains over 9,800 records including conference proceedings, books, dissertations, reports, and articles from over 600 journals, published after 1979. Citations were primarily obtained from the following sources:

1. Wildlife Review on CD (WRONCD, 1980-June 1991).
2. Dissertation Abstracts International (Agriculture, Forestry, and Wildlife; Ecology; and Biology, Zoology, 1980-April 1992).
3. Government Reports, Announcements, and Index (GRA&I, 1980 - 1992 No. 22).
4. Recent Ornithological Literature (1980 #1 - 1992 # 2).

Additional references were obtained from Current Contents (Agriculture, Biology, & Environmental Sciences, 22(18) - 23(16)), Wildlife Review 229-231, and DIALOG, NOAALINC, EPA R&D, EPA Non-Point Source, National Agricultural Library, and AIBS Biological Sciences on-line databases. All practicable efforts have been made to ensure that each reference presented in this bibliography appears as it was listed in these sources. As a result, errors contained in these sources may also occur in this bibliography.

Many records include references to more than one species. To avoid unnecessary overlap due to multiple citations of the same record, we developed the following groups:

1. GREBES.
2. LOONS
3. AUKS

4. SKUAS, GULLS, AND TERNS
5. SHEARWATERS AND PETRELS
6. CORMORANTS, PELICANS, AND ALLIES
7. WATERFOWL
8. HERONS AND ALLIES
9. RAILS
10. SHOREBIRDS
11. RAPTORS
12. GENERAL
13. OIL AND OIL DEVELOPMENT

A record covering two or more species in the same group has been placed in that group's bibliography, rather than cited by species. For example, an article on both the Mallard and Black Duck would be placed among the WATERFOWL references, rather than in both the Mallard and Black Duck bibliographies. Similarly, a record covering species from more than two groups has been placed in the GENERAL bibliography. For example, an article on seabirds that included petrels, pelicans, and gulls, would be placed among the GENERAL references, rather than in three group bibliographies. Additionally, records that do not refer to a particular species or group (e.g., papers on shipboard surveys) have been placed in the GENERAL bibliography.

To use this bibliography: First check the bibliography for the species of interest (e.g., Common Murre). Bibliographies for individual species are arranged by A.O.U. number. Next, check the appropriate group bibliography (e.g., AUKS). Group bibliographies immediately follow the individual bibliographies of species contained in that group. Finally, check the GENERAL or OIL AND OIL DEVELOPMENT bibliographies, located at the end of this volume. These bibliographies must be checked because papers are not duplicated in any other bibliographies (i.e., a paper on the impacts

of oil on Common Murres would appear only in the OIL AND OIL DEVELOPMENT bibliography).

All references contained in this bibliography are identified to species in the ATLBIRDS bibliographic database. Those wishing to do multiple searches by species, or by subjects other than oil, are directed to that database. The ATLBIRDS database was compiled using PRO-CITE® bibliographic software, version 1.4. Contact the Atlantic OCS Regional Office of the Minerals Management Service, Herndon, VA about availability of this database.
