Revised Spot Authorization Plan

Including List of Orders Controlling Priorities Regulation 25 Products (as of July 1, 1945)

Pursuant to Priorities Regulation 25 as amended June 28, 1945, the revised Spot Authorization Plan is now the method for making individual exemptions from the production restrictions of: (1) those Limitation Orders which are listed in Direction 1 to the Regulation; and (2) any other Limitation Orders which expressly state that authorizations may be obtained under Priorities Regulation 25.

It is impractical to list or otherwise designate these latter orders because of impending changes. *Consult the WPB Field Office regarding any orders which were formerly covered by Priorities Regulation 25 and do not appear in the list below.*

The War Production Board will grant a spot authorization where it determines that the use of materials and manpower in the proposed production will not interfere with war production; and that the quantities of basic materials involved will not be so great as to obstruct a reasonably free supply for industry generally.

Preference ratings and allotments of materials are no longer given with spot authorizations, and the War Production Board in granting an authorization does not guarantee that materials and products will be available to a particular applicant. Applicants who are qualified under Priorities Regulation 27 may use the ratings and allotment symbol assigned by that regulation to procure production materials for use with a spot authorization.

Except where the use of a special form of application is prescribed by the governing order, Form WPB-4000 is to be used in making application under Priorities Regulation 25.

The table below lists the product groups which may

be authorized for production under Priorities Regulation 25, names the controlling order, and gives the unit of measure which is to be used in filling out applications:

<i>Product</i>	<i>Order</i>	<i>Unit of measure*</i>
Motor Trucks & Truck Trailers.	L-1-c	Units of Product
Passenger Automobiles . . .	L-2-g	Units of Product
Domestic Mechanical Refrigerators.**	L-5-c	Units of Product
Metal Furniture	L-13-b	Tons of Product
Domestic Electric Range . .	L-23-b	Tons of Product
Domestic Electric Cooking Appliances.**	L-23-c	Units of Product
Farm Machinery	L-257	Tons of Product
Wood Furniture	L-260-a	Board Feet of Lumber.
Electronic Equipment***. .	L-265	1000 Dollars of Product.

*In filling out applications for production authorization under Priorities Regulation 25 it is of particular importance to use the unit of measure shown in the above table for each product.

**Applications under Priorities Regulation 25 for authorization to produce products governed by Orders L-5-c and L-23-c must be made on Form WPB-3700 instead of on Form WPB-4000.

***In making application under Priorities Regulation 25 for authorization to produce products governed by Order L-265, certain additional information is required to be submitted in a letter of transmittal. Consult Order L-265 for particulars.

For further detailed information refer to Priorities Regulation 25 and to the instructions printed on Form WPB-4000. Application forms and instructions may be obtained from WPB Field Offices.

ALPHABETIC INDEX

A colon (:) is used to set off a term that qualifies the description in its entirety.
A comma (,) is used to mean "and" or "or".

See instructions on pages II to IV.

Applicants for priority assistance, allotments, etc., will facilitate the proper handling of their applications by describing the products involved as nearly as possible in accordance with the terms used in this index.

CMP PRODUCT GROUP NAMES

This list sets forth the names of CMP product groups in numerical sequence, together with the applicable program symbol, abbreviated names of Divisions having jurisdiction and unit used for reporting purposes.

Products in these groups which require controlled materials are handled as Class B Products with the exception of those items belonging to a product group identified by an asterisk (*), which are Class A Civilian

Type End Products. See more complete setatement on page III.

The program symbol (letter and one digit) is prefixed to the CMP product group number (three digits) in identifying allotments of materials.

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "and" or "or."

SPECIAL PURPOSE SYMBOLS

Symbol	Description or use	
AM	To transfer aluminum between mills for processing into another shape or form which is still a controlled material.	
FC-1	To transfer steel between mills for processing into another shape or form which is still a controlled material.	
FC-N	To transfer steel between mills for processing into another shape or form which is still a controlled material to fill unrated orders.	
FC-Z	To transfer steel between mills for processing into another shape or form which is still a controlled material to fill Z-symbol orders (deferred allotments).	
PX	To identify steel products purchased by one steel producer from another for re-sale without further conversion.	
WH	Prefix to warehouse serial number on shipments to replenish warehouse stocks of controlled steel products.	
X-1	Identifies purchases of non-controlled materials by controlled materials producers for use as production materials.	
SO	Small orders for materials under provisions of CMP Regulations 1 and 6.	
MRO	CMP Regulation 5, 5A, and certain "P" Orders assign the symbol "MRO" to identify allotments for maintenance, repair, and operating supplies.	
Z-1	Identifies allotments and orders under deferrable programs authorized for the resumption of civilian production under Priorities Regulation 25 when and to the extent that labor, facilities, and materials are available and no longer needed for war essential programs.	
Z-2	Identifies allotments and orders under deferrable programs authorized for the resumption of civilian production not under Priorities Regulation 25 when and to the extent that labor, facilities, and materials are available and no longer needed for war essential programs.	
Z-3	A self-assigned symbol authorized by Priorities Regulation 27, which identifies deferred allotments of controlled materials ordered by manufacturers whose production does not exceed \$50,000 worth of products per quarter.	
RO	To be used in case of "hardship" appeals to identify firm allotments of controlled materials for applicants whose deferred spot allotments were cancelled.	
	When a "P" Order assigns the symbol "MRO", the number of that order usually is made a part of the allotment symbol as for example, MRO-P-141 for public sanitary sewerage facilities. The "P" Orders which assign "MRO" as an allotment symbol are:	
	Order	Subject
	F-98-e	Petroleum equipment used by consumer accounts.
	F-120	Emergency servicing of commercial refrigerating and air-conditioning systems.
	F-139	Producers of textile fibers, and leather and textile products.
	F-141	Public sanitary sewerage facilities.

OFFICIAL CMP PRODUCT LIST

CLASS B PRODUCTS AND CLASS A CIVILIAN TYPE END PRODUCTS ONLY

This list sets forth, by CMP product groups within Divisions, those items opposite which CMP numbers are shown in the Alphabetic Index. In each case, the product group name is printed in italics. The product group name does not qualify the items listed thereunder, but is merely a general indication of the nature of these items. For the program symbols and reporting units applicable to the various product groups, see the preceding list of "CMP Product Group Names."

Products listed in the following list which require controlled materials are handled as Class B Products with the exception of those items belonging to a product group identified by an asterisk (*), which are Class A Civilian Type End Products. See more complete statement on page III.

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "and" and "or."

CRITICAL MATERIALS AND PRODUCTS

The following materials and products are critical as determined by the Joint Committee for Critical Materials and Products, of the War Production Board, the War Department and the Navy Department.

Critical materials or products are defined as those which are now, or expected to be, short in supply and which will limit the production of essential products or the fulfillment of programs of high urgency.

Changing conditions of supply and demand will necessitate revision of the list from time to time. There are now items which do not appear on the list and which might be of a critical nature, but for which sufficient information is not available to make determination of their status.

Inquiries may be directed to the Secretary of the Joint Committee for Critical Materials and Products, Mr. David L. White, Room 4028, Social Security Building, War Production Board, Washington 25, C. D., Telephone REpublic 7560, Extension 72678.

DIRECTORY OF LABOR MARKET AREAS

The following is an alphabetical list of towns and cities, grouped by states. The number preceding each listed community is the War Manpower Commission classification of the labor market area in which it is located, as of May 1, 1945. Following each community, in parentheses, is the name of the labor market area in which it is located.

Cities not listed are either unclassified or are under 1,000 in population. The official classification of unlisted communities can be obtained in Washington by calling War Manpower Commission, Executive 4660,

Extension 2701; or elsewhere by inquiring of the War Manpower Commission Area Director.

A Group 1 Labor Area is an area of *acute* labor shortage;

A Group 2 Labor Area is an area of labor *stringency* or one in which a labor shortage is anticipated within six months;

A Group 3 Labor Area is an area in which a *slight* labor reserve will remain after six months;

A Group 4 Labor Area is an area in which a *substantial* labor reserve will remain after six months.
