To facilitate the rapid issue of shipping and storage credit when the War Production Board has received a
quotation and analysis covering an important raw material, the War Production Board has prepared a
list of warehouse steel distributors who provide directly free credit facilities. The list includes only those companies which distribute steel products of various qualities, and which have been
certified by the War Production Board as being qualified to do business with the War Production Board. The distribution of
steel is limited by a (2) for local sources of supplies.

of the following leading producers of steel products, and of the following steel
distributing firms, pipe, wire, and allied steel products, and of the following steel processors. However,
since there are over 12,000 steel processors in the country, it is not possible to list all of them. However,
any firm that has been certified by the War Production Board as being qualified to do business with the War Production Board

DIRECTORY OF WAREHOUSE DISTRIBUTORS OF "SCHEDULE A" STEEL PRODUCTS

AS DEFINED IN SUPPLEMENTARY ORDER M-21-b

To facilitate the speedy procurement of miscellaneous small steel items by Government Agencies and companies working on important War contracts, the War Production Board has prepared a directory of Warehouse Steel Distributors who purchase directly from steel producers. The list includes only those companies which distribute steel products of carbon, stainless, or alloy grade from stock which are referred to in Supplementary Order M-21-b as "Schedule A" products. Generally speaking, such products include those which are most widely in demand for War work, the distribution of which is handled by a relatively small number of warehouses.

Distributors of "Schedule B" steel products are not included in this Directory. A number of the warehouses handling "Schedule A" products also distribute varying quantities of concrete reinforcing bars, pipe, wire products, tin and terne plate, and galvanized sheets and strip. However, since there are over 12,000 warehouses who purchase "Schedule B" products from steel producers, no attempt has been made here to include only a partial list.

Additional copies of this Directory of Warehouse Distributors may be obtained from the nearest field office of the War Production Board, or upon application to the Distribution Planning Unit, War Production Board, Room 1090 Railroad Retirement Building, Washington, D. C.
