Read this page first . . .

THE way to learn to use Products and Priorities is to select a product and look for it in the Alphabetic Index, which leads to all the information related to the product. For example take "disc plows." You will find it in the Index, on page 62, under "Plows: disc" and on page 26 under "Disc plows," with the same reference information appearing in both places. The entire line on page 26 reads: "450 FARM 03 Disc plows....L-257." 450 is the number of the CMP product group which includes disc plows. FARM means that this product has been assigned to the Farm Machinery Division. 03 is the number of the product section in the Farm Machinery Division which handles disc plows. L-257 is the number of the limitation order governing disc plows. Frequently several orders will be listed in sequence, all of which govern a particular product.

For information about the division and product section and the name of the person in that section to whom inquiries to Washington should be directed, turn to DIVISIONS AND PRODUCT SECTIONS and look under FARM 03, on page 96. To see the list of CMP products grouped under CMP number 450 turn to CMP PRODUCT LIST and look under FARM and then under 450, on page 115. Beneath 450 appears in italics the product group name of that CMP classification and beneath the group name the list of products. To learn the program symbol and the reporting unit for disc plows turn to CMP PRODUCT GROUP NAMES and look under 450, on page 102.

Now turn to VALID LIMITATION ORDERS ('L') SERIES and look under L-257 on page 158, to see what the order is about, whom to direct inquiries to and what forms are involved. You will note that there are four form numbers, the first being 1768. Turn to VALID WPB FORMS and look under WPB-1768, on page 187, and you will learn what the form is for and what is to be done with it. Continue until you have checked the information on all four forms.

To find the orders and regulations governing a *product* you should look under the name of the product or of the component part of a product, the name of each material out of which the product is made, and the class of product (such as "cutlery" as related to "knives: paring"). Only those orders and regulations still in force are listed. They are indexed by the products, materials, or services mentioned therein and by products and materials which they do not mention but which they nevertheless govern.

It is important that you familiarize yourself with every feature of Products and Priorities. Study the Table of Contents on page III and make a mental note of certain sections you are likely to refer to. Turn to them to see how the information is listed.

Place a bookmark or tab in those parts of the book you use most frequently.

Special instructions for W. P. B. executives on page 94.

ALPHABETIC INDEX

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "or". The first column of the alphabetic index indicates the CMP classification. A three-digit number not preceded by an asterisk (*) means that the item is a Class B product and contains controlled material fabricated beyond the forms and shapes specified in the CMP Materials List, and is included in the official CMP Product List. A three-digit number preceded by an asterisk (*) means that the product is a Class A Civilian Type end product.

See page IV, first paragraph, for example explaining use of the other columns.

Applicants for priority assistance, allotments, etc., will facilitate the proper handling of their applications by describing the products involved as nearly as possible in accordance with the terms used in this index.

INSTRUCTIONS FOR W. P. B.

THE official Register of Product Assignments of the War Production Board, as of October 29, 1943, is reproduced in the accompanying Alphabetic Index and associated product lists.

Instructions for the use of these lists immediately precede each such list.

REFERRING APPLICATIONS, INQUIRIES, ETC.

An application or inquiry with respect to products usually involves two aspects:

What does the applicant *make*?

What does he want to *buy*?

The Division having jurisdiction over the product which the applicant *makes* is his "home" in the War Production Board. Hence his application, unless it is handled in the field, is normally referred to this home as the "Division of first reference."

However, if a different Division has jurisdiction over the product which the applicant wants to *buy*, the application may also be referred to the latter as the "Division of second reference."

JURISDICTION

When a particular product appears to be covered by two or more descriptions, with different jurisdictions, the jurisdiction indicated by the more *specific* description is to be deemed controlling.

In general, the jurisdiction over a product extends to a component part thereof when such component part is *made by the same manufacturer*. Thus, the jurisdiction over an item containing screw machine products extends to such screw machine products when made by the same manufacturer for incorporation therein, but does not extend to screw machine products produced for sale as such. Conversely, the assignment and classification indicated for a component part apply only when it is *produced for sale as such*.

PROCEDURE FOR RESOLVING JURISDICTIONAL QUESTIONS

The War Production Board has established the following procedure for resolving jurisdictional questions:

Whenever it appears to a Divisional Director or other appropriate executive that a jurisdictional question, affecting his work, exists with respect to the assignment of a product for which he considers that he either should or should not be responsible, he will consult with the

other Division or organizational unit concerned and, if possible, resolve the question.

If an understanding is reached, it will be reported promptly to the Office of Product Assignments of the War Production Board by a memorandum signed by the Directors of the Divisions or other organizational units concerned, in order that the Register of Product Assignments may be adjusted and notification of changes issued.

If an understanding is not reached, the disagreement will be reported promptly to the Office of Product Assignments in order that arrangements can be made by it for a hearing and a determination of the question in accordance with administrative orders.

INQUIRIES AND CORRECTIONS

Inquiries and corrections affecting the lists up to and including those on page 134, should be submitted to the Office of Product Assignments. In submitting corrections, the following conditions should be observed:

(a) A claim by a Division to jurisdiction over a product assigned elsewhere, or a disclaimer with respect to a product assigned to it, will be recognized by the War Production Board only after the jurisdiction over the product is transferred in accordance with the established procedure summarized above. This condition is applicable not only in the case of requested additions or eliminations but also in the case of requested changes in the context of any product description such as would change the scope of jurisdiction.

(b) Additions should be submitted only if they describe genuine products, materials, or services and require listing for any of the following purposes: (1) to define the lines of jurisdiction, (2) to assist in referring applications, inquiries, etc., or (3) to facilitate the coding of applications or allotments under CMP. Items, presently listed, which do not meet this test should be suggested for elimination with the reasons therefor.

(c) An item is intended to carry references to orders which either govern or mention it, but not to orders which merely govern materials or components and do not mention the item itself.

Notices of changes and corrections as made, are sent on Form GA-688 to the Directors of the affected divisions or related agencies.

WAR PRODUCTION BOARD FORMS RENUMBERED IN "WPB" SERIES

Standardization of War Production Board data requests into one series only, "WPB," was started on May 22, 1943. This means that all "PD," and "UF" forms and letters will be canceled as such, and will be reissued in the "WPB" series, as will also some of the "CMP" forms and letters.

"WPBI" will be the prefix for all nondata request forms and letters. These will generally be supplementary instructions for "WPB" forms.

Present "WPB," "ASU," and "WPBI" numbers will not be changed.

Authorization and allocation forms and letters will bear a "GA" prefix, thus, "Form GA-158, formerly FS-56."

As forms and letters numbers are changed to the "WPB" series, they will indicate the former series number, thus: "Form WPB-541, formerly PD-1A."

It is expected that both the old and new number will be carried on the form for 4 months, to allow time to become familiar with the new numbers.

Forms with the old number are not obsolete, and may be used up until the expiration date.

War Production Board field offices will stock all "WPB" forms and letters and "WPBI" instruction sheets, except those shown in "Products and Priorities" to be restricted.

The conversion table below lists the former "PD," "UF," and "CMP" series of forms and letters, and the numbers they carry in the "WPB" series.
