WHAT PRODUCTS AND PRIORITIES TELLS YOU

PRODUCTS AND PRIORITIES tells you what Division, or related agency, has jurisdiction over your product; what section of the Division or agency handles the product; what War Production Board orders govern the product; what forms are used in connection with it; what the classification of the product is under the Controlled Materials Plan. For example, suppose you make wooden desks. First look at the Alphabetic Index and you will find it on page 21 under "Desks: wooden." The whole line reads: "545 CDGS 18 Desks: wooden . . . L-260-a."

DIVISION AND SECTION

CDGS, the abbreviation for Consumers Durable Goods Division, means that wooden desks have been assigned to that Division. Now look in the list headed "Divisions and Product Sections," starting on page 77, for CDGS—Consumers Durable Goods. Under number 18, which identifies the Product Section, you will find that the Wood Furniture Section of the Consumers Durable Goods Division handles wooden desks. The name of the person in charge of the Section to whom you should direct inquiries and his telephone extension are given.

ORDERS AND FORMS

L-260-a is the number of the Limitation Order governing wooden desks. Sometimes several orders will be listed in sequence, which means that each order governs the product. However, references to the following orders which are of general application are not carried: L-63, L-219, M-63 series. Now look in the list headed "Valid Limitation Orders ('L' Series)" starting on page 130 and you will find a brief explanation of what the order does and who the administrator is. He is the person to whom you may direct inquiries about the order. In cases where the form numbers are listed in the column headed "Related WPB Forms," you should turn to the list headed "Valid WPB Forms," starting on page 162, which gives a brief description of the form.

As a manufacturer of desks, you will need to know what orders govern the material and components out of which you make desks. This information can be found in Products and Priorities under the name of the material or component, in the same way as information about your product.

HOW TO TELL WHETHER YOUR PRODUCT IS A CLASS B PRODUCT UNDER CMP

The three-digit number 545, preceding "desks: wooden" in the Alphabetic Index, is the number of the CMP Product Group which includes desks. The CMP Product List starts on page 88. Look on page 93, first under "CDGS" and then under "545," and you will find that wooden desks are included in the wooden furniture product group. The product should be shown on your CMP-4B application. Also you will see what other products are included in the group.

Where a three-digit number precedes the name of a product in the Alphabetic Index, the product is a Class B product if it contains controlled materials (other than those contained in a Class B product incorporated as a component in the product) fabricated or assembled beyond the forms and shapes specified in Schedule I of CMP Regulation No. 1. See page 121. For example, a wooden desk which is put together with steel wire nails is a Class B product because steel wire nails are a controlled *material*. A wooden desk put together with screws and containing *no other controlled material* is not a Class B product since the only controlled material in the desk is contained in a B *product* (namely, the screws) incorporated in it.

If there is an asterisk before the three-digit number, the product is a Class A Civilian Type End Product. A Class A Civilian Type End Product is one for which a procuring Claimant Agency may elect to allot materials directly to the manufacturer instead of having allotments come from a Division.

CLASS A PRODUCTS

Products listed in the Alphabetic Index preceded by "A" are Class A Products under the Controlled Materials Plan. The Alphabetic Index does not purport to include a complete list of Class A products. However, it was thought that it might be helpful to identify such Class A products as appear on the list.

If you do not find your product in its accustomed place in the index, this does not mean that the product is no longer listed. Its position has been changed, and you will find the product ordinarily by looking under the noun. For example: "Potato graders: farm machinery" has been changed to "Graders: potato: farm machinery."

INSTRUCTIONS FOR W. P. B.

THE official Register of Product Assignments of the War Production Board, as of May 27, 1944, is reproduced in the accompanying Alphabetic Index and associated product lists.

Instructions for the use of these lists immediately precede each such list.

REFERRING APPLICATIONS, INQUIRIES, ETC.

An application or inquiry with respect to products usually involves two aspects:

What does the applicant *make*?

What does he want to *buy*?

The Division having jurisdiction over the product which the applicant *makes* is his "home" in the War Production Board. Hence his application, unless it is handled in the field, is normally referred to this home as the "Division of first reference."

However, if a different Division has jurisdiction over the product which the applicant wants to *buy*, the application may also be referred to the latter as the "Division of second reference."

JURISDICTION

When a particular product appears to be covered by two or more descriptions, with different jurisdictions, the jurisdiction indicated by the more *specific* description is to be deemed controlling.

In general, the jurisdiction over a product extends to a component part thereof when such component part is *made by the same manufacturer*. Thus, the jurisdiction over an item containing screw machine products extends to such screw machine products when made by the same manufacturer for incorporation therein, but does not extend to screw machine products produced for sale as such. Conversely, the assignment and classification indicated for a component part apply only when it is *produced for sale as such*.

PROCEDURE FOR RESOLVING JURISDICTIONAL QUESTIONS

The War Production Board has established the following procedure for resolving jurisdictional questions:

Whenever it appears to a Divisional Director or other appropriate executive that a jurisdictional question, affecting his work, exists with respect to the assignment of a product for which he considers that he either should or should not be responsible, he will consult with the

other Division or organizational unit concerned and, if possible, resolve the question.

If an understanding is reached, it will be reported promptly to the Office of Product Assignments of the War Production Board by a memorandum signed by the Directors of the Divisions or other organizational units concerned, in order that the Register of Product Assignments may be adjusted and notification of changes issued.

If an understanding is not reached, the disagreement will be reported promptly to the Office of Product Assignments in order that arrangements can be made by it for a hearing and a determination of the question in accordance with administrative orders.

INQUIRIES AND CORRECTIONS

Inquiries and corrections affecting the lists up to and including the Official CMP Product List, should be submitted to the Office of Product Assignments. In submitting corrections, the following conditions should be observed:

(a) A claim by a Division to jurisdiction over a product assigned elsewhere, or a disclaimer with respect to a product assigned to it, will be recognized by the War Production Board only after the jurisdiction over the product is transferred in accordance with the established procedure summarized above. This condition is applicable not only in the case of requested additions or eliminations but also in the case of requested changes in the context of any product description such as would change the scope of jurisdiction.

(b) Additions should be submitted only if they describe genuine products, materials, or services and require listing for any of the following purposes: (1) to define the lines of jurisdiction, (2) to assist in referring applications, inquiries, etc., or (3) to facilitate the coding of applications or allotments under CMP. Items, presently listed, which do not meet this test should be suggested for elimination with the reasons therefor.

(c) An item is intended to carry references to orders governing its manufacture, distribution or use but not to orders governing only a material or component part of the item. However, references to the following orders which are of general application are not carried: L-63, L-219, M-63 series.

Notices of changes and corrections as made, are sent on Form GA-688 to the Directors of the affected divisions or related agencies.

ALPHABETIC INDEX

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "and" or "or".

See instructions on pages IV to VI. Particulary see bold-face note on page V.

Applicants for priority assistance, allotments, etc., will facilitate the proper handling of their applications by describing the products involved as nearly as possible in accordance with the terms used in this index.

CMP PRODUCT GROUP NAMES

This list sets forth the names of CMP product groups in numerical sequence, together with the applicable program symbol, abbreviated names of Divisions having jurisdiction and unit used for reporting purposes.

Products in these groups which require controlled materials are handled as Class B Products with the exception of those items belonging to a product group identified by an asterisk (*), which are Class A Civilian Type

End Products. See more complete statement on page V.

The program symbol (letter and one digit) is prefixed to the CMP product group number (three digits) in identifying allotments of materials.

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "and" or "or."

The product group name does not qualify the items listed thereunder, but is merely a general indication of the nature of these items. For the program symbols and reporting units applicable to the various product groups, see the preceding list of "CMP Product Group Names."

Products listed in the following list which require controlled materials are handled as Class B Products with the exception of those items belonging to a product group identified by an asterisk (*), which are Class A Civilian Type End Products. See more complete statement on page V. Particularly see bold-face note on page V.

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "and" or "or."
