THE REVISED AND SIMPLIFIED PRIORITIES SYSTEM

Priorities Regulation 29 as amended August 21, 1945 gives the rules which will govern the use of priorities on October 1, 1945 and thereafter. The Controlled Materials Plan expires at midnight of September 30, 1945, and Authorized Controlled Material Orders and the AA rating system expire with it. (AA ratings may possibly continue in use for textiles and related products.)

From October 1 there will be only two rating bands, MM for military procurement and CC for non-military purposes. The CC rating will be assigned by the WPB only in exceptional circumstances as explained in Priorities Regulation 28.

MM ratings may be extended by the person who receives that rating on any order. CC rating generally may be used only by the person to whom it is assigned by the WPB. CONSULT Priorities Regulations 28 and 29 for full details.

Priorities Regulation 32 issued August 28, 1945 gives the rules which govern Inventories, effective the date of issue. This supersedes CMP Regulation 2 (revoked) and paragraph 944.14 of Priorities Regulation 1. Priorities Regulations 1, 3 and 7 are continued as basic priorities instruments. Priorities Regulations 24, 25, 26 and 30 have recently been revoked. Other Priorities Regulations continue effective until revoked. All CMP Regulations will be revoked at the close of September 30.

ALPHABETIC INDEX

A colon (:) is used to set off a term that qualifies the description in its entirety.
A comma (,) is used to mean "and" or "or".

Applicants for priority assistance, allotments, etc., will facilitate the proper handling of their applications by describing the products involved as nearly as possible in accordance with the terms used in this index.

SPECIAL PURPOSE SYMBOLS

Symbol	Description or use
AM	To transfer aluminum between mills for processing into another shape or form which is still a controlled material.
FC-1	To transfer steel between mills for processing into another shape or form which is still a controlled material.
FC-N	To transfer steel between mills for processing into another shape or form which is still a controlled material to fill unrated orders.
FC-Z	To transfer steel between mills for processing into another shape or form which is still a controlled material to fill Z-symbol orders (deferred allotments).
FX	To identify steel products purchased by one steel producer from another for re-sale without further conversion.
WH	Prefix to warehouse serial number on shipments to replenish warehouse stocks of controlled steel products.
X-1	Identifies purchases of non-controlled materials by controlled materials producers for use as production materials.
EO	Small orders for materials under provisions of CMP Regulations 1 and 6.
MRO	CMP Regulation 5, 5A, and certain "P" Orders assign the symbol "MRO" to identify allotments for maintenance, repair, and operating supplies.
Z-1	Identifies allotments and orders under deferrable programs authorized for the resumption of civilian production under Priorities Regulation 25 when and to the extent that labor, facilities, and materials are available and no longer needed for war essential programs.

Z-2	Identifies allotments and orders under deferrable programs authorized for the resumption of civilian production not under Priorities Regulation 25 when and to the extent that labor, facilities, and materials are available and no longer needed for war essential programs.
Z-3	A self-assigned symbol authorized by Priorities Regulation 27, which identifies deferred allotments of controlled materials ordered by manufacturers whose production does not exceed \$50,000 worth of products per quarter.
EO	To be used in case of "hardship" appeals to identify firm allotments of controlled materials for applicants whose deferred spot allotments were cancelled.
	When a "P" Order assigns the symbol "MRO", the number of that order usually is made a part of the allotment symbol as for example, MRO-P-141 for public sanitary sewerage facilities. The "P" Orders which assign "MRO" as an allotment symbol are:
Order	Subject
P-128	Emergency servicing of commercial refrigerating and air-conditioning systems.
P-139	Producers of textile fibers, and leather and textile products.
P-141	Public sanitary sewerage facilities.

OFFICIAL CMP PRODUCT LIST

CLASS B PRODUCTS AND CLASS A CIVILIAN TYPE END PRODUCTS ONLY

This list sets forth, by CMP product groups within Divisions, those items opposite which CMP numbers are shown in the Alphabetic Index. In each case, the product group name is printed in italics. The product group name does not qualify the items listed thereunder, but is merely a general indication of the nature of these items. For the program symbols and reporting units applicable to the various product groups, see the preceding list of "CMP Product Group Names."

Products listed in the following list which require controlled materials are handled as Class B Products with the exception of those items belonging to a product group identified by an asterisk (*), which are Class A Civilian Type End Products.

A colon (:) is used to set off a term that qualifies the description in its entirety. A comma (,) is used to mean "and" and "or."
