Internal Revenue cumulative bulletin

1989-1

January-June

Department of the Treasury
Internal Revenue Service

In This Issue

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402

Mission of the Service

The purpose of the Internal Revenue Service is to collect the proper amount of tax revenues at the least cost to the public, and in a manner that warrants the highest degree of public confidence in our integrity, efficiency and fairness. To achieve that purpose, we will:

—Encourage and achieve the highest possible degree of voluntary compliance in accordance with the tax law and regulations;

—Advise the public of their rights and responsibilities;

—Determine the extent of compliance and the causes of noncompliance;

—Do all things needed for the proper administration and enforcement of the tax laws;

—Continually search for and implement new, more efficient and effective ways of accomplishing our Mission.

Statement of Principles of Internal Revenue Tax Administration

The function of the Internal Revenue Service is to administer the Internal Revenue Code. Tax policy for raising revenue is determined by Congress.

With this in mind, it is the duty of the Service to carry out that policy by correctly applying the laws enacted by Congress; to determine the reasonable meaning of various Code provisions in light of the Congressional purpose in enacting them; and to perform this work in a fair and impartial manner, with neither a government nor a taxpayer point of view.

At the heart of administration is interpretation of the Code. It is the responsibility of each person in the Service, charged with the duty of interpreting the law, to try to find the true meaning of the statutory provision and not to adopt a strained construction in the belief that he or she is "protecting the revenue." The revenue is properly protected only when we ascertain and apply the true meaning of the statute.

The Service also has the responsibility of applying and administering the law in a reasonable, practical manner. Issues should only be raised by examining officers when they have merit, never arbitrarily or for trading purposes. At the same time, the examining officer should never hesitate to raise a meritorious issue. It is also important that care be exercised not to raise an issue or to ask a court to adopt a position inconsistent with an established Service position.

Administration should be both reasonable and vigorous. It should be conducted with as little delay as possible and with great courtesy and considerateness. It should never try to overreach, and should be reasonable within the bounds of law and sound administration. It should, however, be vigorous in requiring compliance with law and it should be relentless in its attack on unreal tax devices and fraud.

These principles of tax administration were previously published in the Internal Revenue Bulletin as Revenue Procedure 64-22, 1964-1 (Part I) C.B. 689. They are restated here to emphasize their importance to all employees of the Internal Revenue Service.

Introduction

The Internal Revenue Bulletin is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Unpublished rulings will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings, and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

Cumulative Bulletin 1989-1 is a consolidation of all items of permanent nature published in the weekly Bulletins 1989-1 through 1989-26 for the period of January 1 through June 30, 1989.

The Internal Revenue Cumulative Bulletin is prepared in three parts as follows:

Part I.—1986 Code.
This part includes rulings and decisions based on provisions of the Internal Revenue Code of 1986. Arrangement is sequential according to Code and regulations sections. The code section is shown at the top of each page.

Part II.—Treaties and Tax Legislation.
This part is divided into two subparts as follows: Subpart A, Tax Conventions, and Subpart B, Legislation and Related Committee Reports.

Part III.—Administrative, Procedural, and Miscellaneous.
To the extent practicable, pertinent cross references to these subjects are contained in the other Parts and Subparts. Included in this Part is a list of persons disbarred or suspended from practice before the Internal Revenue Service.

Notice of Proposed Rulemaking

The preambles and text of proposed regulations that were published in the **Federal Register** during this six-month period are printed in this section.

The Bulletin Index-Digest System, a research and reference service supplementing the Bulletin, may be obtained from the Superintendent of Documents on a subscription basis. It consists of four Services: Service No. 1, Income Tax; Service No. 2, Estate and Gift Taxes; Service No. 3, Employment Taxes; Service No. 4, Excise Taxes. Each Service consists of a basic volume and a cumulative supplement that provides (1) finding lists of items published in the Bulletin, (2) digests of revenue rulings, revenue procedures, and other published items, and (3) topical indexes of Public Laws, Treasury Decisions, and Tax Conventions.

Definition of Terms

Revenue rulings and revenue procedures (hereinafter referred to as "rulings") that have an effect on previous rulings use the following defined terms to describe the effect:

Amplified describes a situation where no change is being made in a prior published position, but the prior position is being extended to apply to a variation of the fact situation set forth therein. Thus, if an earlier ruling held that a principle applied to A, and the new ruling holds that the same principle also applies to B, the earlier ruling is amplified. (Compare with *modified, below*).

Clarified is used in those instances where the language in a prior ruling is being made clear because the language has caused, or may cause, some confusion. It is not used where a position in a prior ruling is being changed.

Distinguished describes a situation where a ruling mentions a previously published ruling and points out an essential difference between them.

Modified is used where the substance of a previously published position is being changed. Thus, if a prior ruling held that a principle applied to A but not to B, and the new ruling holds that it applies to both A and B, the prior ruling is modified because it corrects a published position. (Compare with *amplified* and *clarified*, above).

Obsoleted describes a previously published ruling that is not considered determinative with respect to future transactions. This term is most commonly used in a ruling that lists previously published rulings that are obsoleted because of changes in law or regulations. A ruling may also be obsoleted because the substance has been included in regulations subsequently adopted.

Revoked describes situations where the position in the previously published ruling is not correct and the correct position is being stated in the new ruling.

Superseded describes a situation where the new ruling does nothing more than restate the substance and situation of a previously published ruling (or rulings). Thus, the term is used to republish under the 1986 Code and regulations the same position published under the 1939 Code and regulations. The term is also used when it is desired to republish in a single ruling a series of situations, names, etc., that were previously published over a period of time in separate rulings. If the new ruling does more than restate the substance of a prior ruling, a combination of terms is used. For example, *modified and superseded* describes a situation where the substance of a previously published ruling is being changed in part and is continued without change in part and it is desired to restate the valid portion of the previously published ruling in a new ruling that is self contained. In this case the previously published ruling is first modified and then, as modified, is superseded.

Supplemented is used in situations in which a list, such as a list of the names of countries, is published in a ruling and that list is expanded by adding further names in subsequent rulings. After the original ruling has been supplemented several times, a new ruling may be published that includes the list in the original ruling and the additions, and supersedes all prior rulings in the series.

Suspended is used in rare situations to show that the previous published rulings will not be applied pending some future action such as the issuance of new or amended regulations, the outcome of cases in litigation, or the outcome of a Service study.

Abbreviations

The following abbreviations in current use and formerly used will appear in material published in the Bulletin.

A—Individual.
Acq.—Acquiescence.
B—Individual.
BE—Beneficiary.
BK—Bank.
B.T.A.—Board of Tax Appeals.

Cumulative List of Announcements Relating to Decisions of the Tax Court Published in the Internal Revenue Bulletin from January 1, 1989 thru June 30, 1989

It is the policy of the Internal Revenue Service to announce in the Internal Revenue Bulletin at the earliest practicable date the determination of the Commissioner to acquiesce or not acquiesce in a decision of the Tax Court which disallows a deficiency in tax determined by the Commissioner to be due.

Notice that the Commissioner has acquiesced or nonacquiesced in a decision of the Tax Court relates only to the issue or issues decided adversely to the Government.

Actions of acquiescences in adverse decisions shall be relied on by Revenue officers and others concerned as conclusions of the Service only to the application of the law to the facts in the particular case. Caution should be exercised in extending the application of the decision to a similar case unless the facts and circumstances are substantially the same, and consideration should be given to the effect of new legislation, regulations, and rulings as well as subsequent court decisions and actions thereon.

Acquiescence in a decision means acceptance by the Service of the conclusion reached, and does not necessarily mean acceptance and approval of any or all of the reasons assigned by the Court for its conclusions.

No announcements are made in the Bulletin with respect to memorandum opinions of the Tax Court.

The announcements published in the weekly Internal Revenue Bulletins are consolidated semiannually and annually. The semiannual consolidation appears in the first Bulletin for July and in the Cumulative Bulletin for the first half of the year and the annual consolidation appears in the first Bulletin for the following January and in the Cumulative Bulletin for the last half of the year.

The Commissioner ACQUIESCES in the following decisions:

Taxpayer	Docket No.	Report Volume	Report Page
Bailey, James[1]	21107-85	88	1293
Follender, David B., et ux[2]	14625-85	89	943
Givens, Donald[3]	4951-85	90	1145
Longue Vue Foundation, Transferee[4]	4440-85	90	150
Schirmer, Dolphus E., et ux[5]	32772-85	89	277
Standard Oil Co. (Indiana)[6]	5319-76	77	349
Winokur, James[7]	143-85	90	733

The Commissioner does NOT ACQUIESCE in the following decision:

Taxpayer	Docket No.	Report Volume	Report Page
Givens, Donald[8]	4951-85	90	1145

[1]Acquiescence relating to whether the payments made by the Urban Redevelopment Authority under an easement to rehabilitate the historic facade of petitioner's property are includable in petitioner's gross income.

[2]Acquiescence in the issues relating to (1) what extent petitioner, a limited partner in Brooke Associates, a New York limited partnership, increased his amount at risk by assuming a primary obligation to pay the principal, but not the interest, of a partnership recourse purchase note bearing nonrecourse interest, (2) whether nonrecourse interest due on a recourse purchase note payable solely from gross receipts is "contingent interest" under section 843 of the Code, and (3) whether petitioners are liable for the increased rate of interest under section 6621(c), formerly section 6621(d).

[3]Acquiescence relating to whether the Tax Court correctly held that the Service failed to meet its burden of proof as to whether the taxpayer had unreported income.

[4]Acquiescence in result relating to whether a forced heir's state-law created right to set aside a portion of a charitable transfer renders that portion contingent within the meaning of section 20.2055-2(b) of the regulations. Acquiescence "in result" means acceptance of the Court but disagreement with some or all the reasons assigned for the decision.

[5]Acquiescence relating to whether a taxpayer who fails to come within the protection of a revenue procedure issued in accordance with section 1.6666-4(c) of the regulations and who fails to make specific reference to section 6661 of the Code can nonetheless satisfy the requirement of section 6661(b)(2)(B)(ii) by providing on the return information sufficient for the Commissioner to identify the potential controversy involved.

[6]Acquiescence in result relating to whether the nonmaterial costs related to the fabrication of dual purpose jacket-type offshore drilling and production platforms may be deducted as expenses under section 263(c) of the Code and section 1.612-4 of the regulations. Acquiescence "in result" means acceptance of the Court but disagreement with some or all the reasons assigned for the decision.

[7]Acquiescence relating to whether a charitable contribution deduction is allowable under section 170 of the Code and section 1.170A-5(a)(2) of the regulations for the donation of an undivided interest in tangible personal property, if the donee is given the immediate right to possession of the property for a portion of every year equal to its interest, but does not take actual possession within one year of delivery of the deed of gift.

[8]Nonacquiescence relating to whether amounts designated as "sick pay" and received under a county statute by an employee who is injured in the course of employment are fully excludable from gross income under section 104(a)(1) of the Code.

Part I. Rulings and Decisions Under the Internal Revenue Code of 1986

Subpart A.—Income Taxes
Chapter 1.—Normal Taxes and Surtaxes
Subchapter A.—Determination of Tax Liability
Part IV.—Credits Against Tax
Subpart A.—Nonrefundable Personal Credits

Section 25.—Interest on Certain Home Mortgages

26 CFR 1.25-1T: Credit for interest paid on certain home mortgages.

Average area purchase price safe harbor limitations for Guam and Puerto Rico are added to the list in Rev. Proc. 88-48, 1988-2 C.B. 635. See Rev. Proc. 89-27, page 892.

26 CFR 1.25-3T: Qualified mortgage credit certificate.

The median gross income for the United States and the average purchase prices for the United States are set forth for use in computing the income limitation under section 143(f)(5) of the Code. See Rev. Proc. 89-32, page 904.

Subpart D.—Business Related Credits

Section 38.—General Business Credit

When, pursuant to a single integrated transaction, a corporation transfers section 38 property to a newly formed subsidiary in year one and distributes its stock in the subsidiary to its shareholders in year two, the disposition of the section 38 property triggering investment credit recapture under section 47(a) of the Code occurs in year one. See Rev. Rul. 89-18, page 14.

Section 41.—Credit for Increasing Research Activities

26 CFR 1.41-0: Table of contents.

T.D. 8251

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Parts 1 and 602

Credit for Increasing Research Activity

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final amendments to the income tax regulations to provide rules for the credit for increasing research activities. The research credit was added to the law by the Economic Recovery Tax Act of 1981. The research credit was subsequently amended by the Tax Reform Act of 1984, the Tax Reform Act of 1986, and the Technical and Miscellaneous Revenue Act of 1988. The regulations provide the public with guidance needed to comply with the applicable tax law.

EFFECTIVE DATE: These regulations are effective for amounts paid or incurred after June 30, 1981, and before January 1, 1990.

SUPPLEMENTARY INFORMATION:

Background

On January 21, 1983, the Federal Register published (48 FR 2790) [LR-236-81, 1983-1 C.B. 1003] proposed amendments to the Income Tax Regulations (26 CFR Part 1) relating to the credit for increasing research activities. A large number of comments were received and a public hearing was held on April 14, 1983. The credit for increasing research activities was originally provided by section 44F of the Internal Revenue Code, as added by section 221 of the Economic Recovery Tax Act of 1981 [Pub. L. 97-34, 1981-2 C.B. 256, 293]. Section 471(c) of the Tax Reform Act of 1984 [Pub. L. 98-369, 1984-3 C.B. (Vol. 1) 1, 334] redesignated section 44F as section 30. The Tax Reform Act of 1984 did not amend the research credit provisions substantively. Section 231 of the Tax Reform Act of 1986 [Pub. L. 99-514, 1986-3 C.B. (Vol. 1) 1, 90] redesignated section 30 as section 41. The Tax Reform Act of 1986 extended the credit to amounts paid or incurred before January 1, 1989; amended the definition of qualified research for taxable years beginning after December 31, 1985; provided a separate credit with respect to certain payments to qualified organizations for basic research; and amended the credit provisions in certain other aspects. The Technical and Miscellaneous Revenue Act of 1988 extended the credit to amounts paid or incurred before January 1, 1990.

The regulations provided in this document are promulgated under section 41 for conformity purposes. Where the law has changed the regulations contain separate provisions with their own effective dates. In general, those portions of the regulations relating to the Tax Reform Act of 1986 have been reserved.

Explanation of Provisions

Joint Ventures

Section 41(b)(1) defines the term "qualified research expenses" as the sum of the taxpayer's in-house research expenses and the taxpayer's contract research expenses, that are paid or incurred by the taxpayer during the taxable year in carrying on any trade or business of the taxpayer. If the taxpayer is not carrying on the trade or business for section 162 purposes to which the research relates, then the taxpayer is not entitled to the research credit for such expenditures. In the case of partnerships the carrying on a trade or business requirement must be satisfied at the partnership level without regard to the trade or business of any partner.

Section 1.44F-2(a)(4)(ii) of the proposed regulations provided an exception to the carrying on a trade or business requirement at the partnership level in the case of certain joint ventures if all the partners are entitled to the results of the research and the following is true with respect to each partner. If the partner had carried on the research that was in fact carried on by the partnership, all the research expense paid or incurred in carrying on the research would have been paid or incurred by the partner in carrying on a trade or business of the partner. Several commentators suggested that the regulations should not require each member of the joint venture to satisfy the "carrying on" test for the particular research being performed by the joint venture. They suggested that the regulations be modified to deny the credit only to those joint venturers who do not satisfy the "carrying on" test. Section 1.41-2(a)(4)(ii) of the final regulations removes the requirement that all partners must satisfy the "carrying on" test. However, to ensure that the removal of that requirement does not lead to abuse, the final regulations add certain limitations similar to those in section 168(h)(6) relating to tax-exempt use property.

Funded Research

Section 41(d)(4)(H) provides that the term qualified research does not include any research to the extent funded by any grant, contract, or otherwise by another person (or governmental entity). Section 1.44F-4(d)(1) of the proposed regulations provided that amounts paid under any agreement that are contingent on the success of the research and thus considered to be paid for the product or result of the research are not treated as funding. Section 1.44F-4(d)(2) of the proposed regulations provided that, if a taxpayer performing research for another person retains no substantial rights in the research under the agreement providing for the research, the research is treated as fully funded, and none of the expenses paid or incurred by the taxpayer in performing the research is treated as paid or incurred for qualified research. One commentator stated that, in a case where the researcher does not retain substantial rights in the results of the research and the funder's payments are contingent on the success of the research, neither the researcher nor the funder is entitled to treat any of the expenditures as paid or incurred for qualified research. The commentator's reading of the interaction of the contingent payment and the substantial rights rules is the correct reading of the two provisions. The proposed regulations are finalized as proposed on this matter. Section 1.44F-4(d)(4) of the proposed regulations provided that independent research and development payments under certain government contracts are treated as funding the research to which the payments relate. Several commentators suggested that such payments are analogous to the recovery of overhead costs through the sale of products. The final regulations provide that such payments are not to be treated as funding except where they are properly severable from the underlying contract.

Definition of Research and Experimental Expenditures

Section 41(d)(1) provides, in part, that the term "qualified research" means research with respect to which expenditures may be treated as expenses under section 174. Section 1.174-2 of the proposed regulations that was originally proposed on January 21, 1983, included extensive clarifications of the regulations under section 174, including a clarification of the treatment of computer software.

This portion of the proposed regulations is not being finalized by this document. The proposed amendments to §1.174-2 have been revised and superseded by a separate notice of proposed rulemaking [PS-002-89, page 1058, this Bulletin].

Special Analyses

The amendment of the regulations proposed by notice of proposed rulemaking on January 21, 1983, and adopted by this Treasury decision is interpretative. Accordingly, the Regulatory Flexibility Act (5 U.S.C. chapter 6) did not apply to the notice of proposed rulemaking and no Regulatory Flexibility Analysis was required. The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required.

* * * * * *

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 and Part 602 are amended as follows:

PART 602—[AMENDED]

Paragraph 1. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 2. In the table of control numbers in §602.101, the language "§1.41-4(b) and (c) .... 1541-0074" is removed and the language "§1.41-4A(b) and (c) .... 1545-0074" is added in its place.

PART 1—[AMENDED]

Par. 3. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Par. 4. Sections 1.41-0 through 1.41-8 are redesignated §§1.41-0A through 1.41-8A, respectively.

Par. 5. In §1.41-0A as redesignated, the language "1.41-1 through -8" is removed and the language "1.41-1A through -8A" is added in its place.

Par. 6. In §1.41-1A(a) as redesignated, the language "§1.41-3(a)" is removed and the language "§1.41-3A(a)" is added in its place.

Par. 7. In §1.218-0, the language "1.41-0 through -8" is removed and the language "12.41-0A through -8A" is added in its place.

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Par. 8. The following new §§1.41-0 through 1.41-9 are added in the appropriate places.

§1.41-0 Table of Contents.

This section lists the paragraphs contained in sections 1.41-0 through 1.41-9.

(2) Short base period year.

(3) Years overlapping the effective dates of section 41 (section 44F).

(i) Determination years.

(ii) Base period years.

(4) Number of months in a short taxable year.

(e) Examples.

§1.41-4 Qualified research for taxable years beginning after December 31, 1985. [Reserved]

§1.41-5 Qualified research for taxable years beginning before January 1, 1986.

(a) General rule.

(b) Activities outside the United States.

(1) In-house research.

(2) Contract research.

(c) Social sciences arts or humanities.

(d) Research funded by any grant, contract, or otherwise.

(1) In general.

(2) Research in which taxpayer retains no rights.

(3) Research in which the taxpayer retains substantial rights.

(i) In general.

(ii) Pro rata allocation.

(iii) Project-by-project determination.

(4) Independent research and development under the Federal Acquisition Regulations System and similar provisions.

(5) Funding determinable only in subsequent taxable year.

(6) Examples.

§1.41-6 Basic research for taxable years beginning after December 31, 1985. [Reserved]

§1.41-7 Basic research for taxable years beginning before January 1, 1986.

(a) In general.

(b) Trade or business requirement.

(c) Prepaid amounts.

(1) In general.

(2) Transfers of property.

(d) Written research agreement.

(1) In general.

(2) Agreement between a corporation and a qualified organization after June 30, 1983.

(i) In general.

(ii) Transfers of property.

(3) Agreement between a qualified fund and a qualified educational organization after June 30, 1983.

(e) Exclusions.

(1) Research conducted outside the United States.

(2) Research in the social sciences or humanities.

(f) Procedure for making an election to be treated as a qualified fund.

§1.41-8 Aggregation of expenditures.

(a) Controlled group of corporations; trade or businesses under common control.

(1) In general.

(2) Definition of trade or business.

(3) Determination of common control.

(4) Examples.

(b) Minimum base period research expenses.

(c) Tax accounting periods used.

(1) In general.

(2) Special rule where timing of research is manipulated.

(d) Membership during taxable year in more than one group.

(e) Intra-group transactions.

(1) In general.

(2) In-house research expenses.

(3) Contract research expenses.

(4) Lease Payments.

(5) Payment for supplies.

§1.41-9 Special rules.

(a) Allocations.

(1) Corporation making an election under subchapter S.

(i) Pass-through, for taxable years beginning after December 31, 1982, in the case of an S corporation.

(ii) Pass-through, for taxable years beginning before January 1, 1983, in the case of a subchapter S corporation.

(2) Pass-through in the case of an estate or trust.

(3) Pass-through in the case of a partnership.

(i) In general.

(ii) Certain expenditures by joint ventures.

(4) Year in which taken into account.

(5) Credit allowed subject to limitation.

(b) Adjustments for certain acquisitions and dispositions—Meaning of terms.

(c) Special rule for pass-through of credit.

(d) Carryback and carryover of unused credits.

§1.41-1 Introduction to regulations under section 41.

Sections 1.41-2 through 1.41-9 deal only with certain provisions of section 41. The following table identifies the provisions of section 41 that are dealt with, and lists each with the section of the regulations in which it is covered:

Section of the regulations	*Section of the Code*
§1.41-2	41(b)(1) 41(b)(2)(A)(ii) 41(b)(2)(A)(iii) 41(b)(2)(B) 41(b)(3)
§1.41-3	41(c)(2) 41(f)(4)
§1.41-5	41(d)
§1.41-7	41(e)
§1.41-8	41(f)(1)
§1.41-9	41(f)(2) 41(f)(3) 41(g)

Sections 1.41-4 and 1.41-6 deal with the definition of qualified research and basic research for taxable years beginning after December 31, 1985. Section 1.41-3 also deals with the special rule in section 221(d)(2) of the Economic Recovery Tax Act of 1981 relating to taxable years overlapping the effective dates of section 41. Section 41 was formerly designated sections 30 and 44F. The regulations refer to these sections as section 41 for conformity purposes. Of course, whether section 41, 30 or 44F applies to a particular expenditure depends upon when the expenditure was paid or incurred.

§1.41-2 Qualified Research Expenses.

(a) *Trade or business requirement*—(1) *In general.* An in-house research expense of the taxpayer or a contract research expense of the taxpayer is a qualified research expense only if the expense is paid or incurred by the taxpayer in carrying on a trade or business of the taxpayer. The phrase "in carrying on a trade or business" has the same meaning for purposes of section 41(b)(1) as it has for purposes of section 162; thus, expenses paid or incurred in connection with a trade or business within the meaning of section 174(a) (relating to the deduction for research and experimental expenses) are not necessarily paid or incurred in carrying on a trade or business for purposes of section 41. A research expense must relate to a particular trade or business being carried on by the taxpayer at the time the expense is paid or incurred in order to be a qualified research expense. For purposes of section 41, a contract research expense of the taxpayer is not a qualified research expense if the product or result of the research is intended to be transferred to another in return for license or royalty payments and the taxpayer does not use the product of the research in the taxpayer's trade or business.

(2) *New business*. Expenses paid or incurred prior to commencing a new business (as distinguished from expanding an existing business) may be paid or incurred in connection with a trade or business but are not paid or incurred in carrying on a trade or business. Thus, research expenses paid or incurred by a taxpayer in developing a product the sale of which would constitute a new trade or business for the taxpayer are not paid or incurred in carrying on a trade or business.

(3) *Research performed for others*—(i) *Taxpayer not entitled to results*. If the taxpayer performs research on behalf of another person and retains no substantial rights in the research, that research shall not be taken into account by the taxpayer for purposes of section 41. See §1.41-5(d)(2).

(ii) *Taxpayer entitled to results*. If the taxpayer in carrying on a trade or business performs research on behalf of other persons but retains substantial rights in the research, the taxpayer shall take otherwise qualified expenses for that research into account for purposes of section 41 to the extent provided in §1.41-5(d)(3).

(4) *Partnerships*—(i) *In general*. An in-house research expense or a contract research expense paid or incurred by a partnership is a qualified research expense of the partnership if the expense is paid or incurred by the partnership in carrying on a trade or business of the partnership, determined at the partnership level without regard to the trade or business of any partner.

(ii) *Special rule for certain partnerships and joint ventures*. (A) If a partnership or a joint venture (taxable as a partnership) is not carrying on the trade or business to which the research relates, then the general rule in paragraph (a)(4)(i) of this section would not allow any of such expenditures to qualify as qualified research expenses.

(B) Notwithstanding paragraph (a)(4)(ii)(A) of this section, if all the partners or venturers are entitled to make independent use of the results of the research, this paragraph (a)(4)(ii) may allow a portion of such expenditures to be treated as qualified research expenditures by certain partners or venturers.

(C) First, in order to determine the amount of credit that may be claimed by certain partners or venturers, the amount of qualified research expenditures of the partnership or joint venture is determined (assuming for this purpose that the partnership or joint venture is carrying on the trade or business to which the research relates).

(D) Second, this amount is reduced by the proportionate share of such expenses allocable to those partners or venturers who would not be able to claim such expenses as qualified research expenditures if they had paid or incurred such expenses directly. For this purpose such partners' or venturers' proportionate share of such expenses shall be determined on the basis of such partners' or venturers' share of partnership items of income or gain (excluding gain allocated under section 704(c)) which results in the largest proportionate share. Where a partner's or venturer's share of partnership items of income or gain (excluding gain allocated under section 704(c)) may vary during the period such partner or venturer is a partner or venturer in such partnership or joint venture, such share shall be the highest share such partner or venturer may receive.

(E) Third, the remaining amount of qualified research expenses is allocated among those partners or venturers who would have been entitled to claim a credit for such expenses if they had paid or incurred the research expenses in their own trade or business, in the relative proportions that such partners or venturers share deductions for expenses under section 174 for the taxable year that such expenses are paid or incurred.

(F) For purposes of section 41, research expenditures to which this paragraph (a)(4)(ii) applies shall be treated as paid or incurred directly by such partners or venturers. See §1.41-9(a)(3)(ii) for special rules regarding these expenses.

(iii) The following examples illustrate the application of the principles contained in paragraph (a)(4)(ii) of this section.

Example (1). A joint venture (taxable as a partnership) is formed by corporations A, B, and C to develop and market a supercomputer. A and B are in the business of developing computers, and each has a 30 percent distributive share of each item of income, gain, loss, deduction, credit and basis of the joint venture. C, which is an investment banking firm, has a 40 percent distributive share of each item of income, gain, loss, deduction, credit and basis of the joint venture. The joint venture agreement provides that A's, B's and C's distributive shares will not vary during the life of the joint venture, liquidation proceeds are to be distributed in accordance with the partners' capital account balances, and any partner with a deficit in its capital account following the distribution of liquidation proceeds is required to restore the amount of such deficit to the joint venture. Assume in Year 1 that the joint venture incurs $100x of "qualified research expenses." Assume further that the joint venture cannot claim the research credit for such expenses because it is not carrying on the trade or business to which the research relates. In addition A, B, and C are all entitled to make independent use of the results of the research. First, the amount of qualified research expenses of the joint venture is $100x. Second, this amount is reduced by the proportionate share of such expenses allocable to C, the venturer which would not have been able to claim such expenses as qualified research expenditures if it had paid or incurred them directly. C's proportionate share of such expenses is $40x (40% of $100x). The reduced amount is $60x. Third, the remaining $60x of qualified research expenses is allocated between A and B in the relative proportions that A and B share deductions for expenses under section 174. A is entitled to treat $30x ((30% / (30% + 30%)) $60x) as a qualified research expense. B is also entitled to treat $30x ((30% / (30% + 30%)) $60x) as a qualified research expense.

Example (2). Assume the same facts as in example (1) except that the joint venture agreement provides that during the first 2 years of the joint venture, A and B are each allocated 10 percent of each item of income, gain, loss, deduction, credit and basis, and C is allocated 80 percent of each item of income, gain, loss, deduction, credit and basis. Thereafter the allocations are the same as in example (1). Assume for purposes of this example that such allocations have substantial economic effect for purposes of section 704(b). C's highest share of such items during the life of the joint venture is 80 percent. Therefore C's proportionate share of the joint venture's qualified research expenses is $80x (80% of $100x). The reduced amount of qualified research expenses is $20x ($100x — $80x). A is entitled to treat $10x ((10% / (10% + 10%)) $20x) as a qualified research expense in Year 1. B is also entitled to treat $10x ((10% / (10% + 10%)) $20x) as a qualified research expense in Year 1.

(b) *Supplies and personal property used in the conduct of qualified research*—(1) *In general*. Supplies and personal property (except to the extent provided in paragraph (b)(4) of this section) are used in the conduct of qualified research if they are used in the performance of qualified services (as defined in section 41(b)(2)(B), but without regard to the last sentence thereof) by an employee of the taxpayer (or by a person acting in a capacity similar to that of an employee of the taxpayer; see example (6) of §1.41-2(e)(5)). Expenditures for supplies or for the use of personal property that are indirect research expenditures or general and administrative expenses do not qualify as in-house research expenses.

(2) *Certain utility charges*—(i) *In general.* In general, amounts paid or incurred for utilities such as water, electricity, and natural gas used in the building in which qualified research is performed are treated as expenditures for general and administrative expenses.

(ii) *Extraordinary expenditures.* To the extent the taxpayer can establish that the special character of the qualified research required additional extraordinary expenditures for utilities, the additional expenditures shall be treated as amounts paid or incurred for supplies used in the conduct of qualified research. For example, amounts paid for electricity used for general laboratory lighting are treated as general and administrative expenses, but amounts paid for electricity used in operating high energy equipment for qualified research (such as laser or nuclear research) may be treated as expenditures for supplies used in the conduct of qualified research to the extent the taxpayer can establish that the special character of the research required an extraordinary additional expenditure for electricity.

(3) *Right to use personal property.* The determination of whether an amount is paid to or incurred for another person for the right to use personal property in the conduct of qualified research shall be made without regard to the characterization of the transaction as a lease under section 168(f)(8) (as that section read before it was repealed by the Tax Reform Act of 1986). See §5c.168(f)-(8)-1(b).

(4) *Use of personal property in taxable years beginning after December 31, 1985.* For taxable years beginning after December 31, 1985, amounts paid or incurred for the use of personal property are not qualified research expenses, except for any amount paid or incurred to another person for the right to use (time-sharing) computers in the conduct of qualified research. The computer must be owned and operated by someone other than the taxpayer, located off the taxpayer's premises, and the taxpayer must not be the primary user of the computer.

(c) *Qualified services*—(1) *Engaging in qualified research.* The term "engaging in qualified research" as used in section 41(b)(2)(B) means the actual conduct of qualified research (as in the case of a scientist conducting laboratory experiments).

(2) *Direct supervision.* The term "direct supervision" as used in section 41(b)(2)(B) means the immediate supervision (first-line management) of qualified research (as in the case of a research scientist who directly supervises laboratory experiments, but who may not actually perform experiments). "Direct supervision" does not include supervision by a higher-level manager to whom first-line managers report, even if that manager is a qualified research scientist.

(3) *Direct support.* The term "direct support" as used in section 41(b)(2)(B) means services in the direct support of either—

(i) Persons engaging in actual conduct of qualified research, or

(ii) Persons who are directly supervising persons engaging in the actual conduct of qualified research. For example, direct support of research includes the services of a secretary for typing reports describing laboratory results derived from qualified research, of a laboratory worker for cleaning equipment used in qualified research, of a clerk for compiling research data, and of a machinist for machining a part of an experimental model used in qualified research. Direct support of research activities does not include general administrative services, or other services only indirectly of benefit to research activities. For example, services of payroll personnel in preparing salary checks of laboratory scientists, of an accountant for accounting for research expenses, of a janitor for general cleaning of a research laboratory, or of officers engaged in supervising financial or personnel matters do not qualify as direct support of research. This is true whether general administrative personnel are part of the research department or in a separate department. Direct support does not include supervision. Supervisory services constitute "qualified services" only to the extent provided in paragraph (c)(2) of this section.

(d) *Wages paid for qualified services*—(1) *In general.* Wages paid to or incurred for an employee constitute in-house research expenses only to the extent the wages were paid or incurred for qualified services performed by the employee. If an employee has performed both qualified services and nonqualified services, only the amount of wages allocated to the performance of qualified services constitutes an in-house research expense. In the absence of another method of allocation that the taxpayer can demonstrate to be more appropriate, the amount of in-house research expense shall be determined by multiplying the total amount of wages paid to or incurred for the employee during the taxable year by the ratio of the total time actually spent by the employee in the performance of qualified services for the taxpayer to the total time spent by the employee in the performance of all services for the taxpayer during the taxable year.

(2) "*Substantially all.*" Notwithstanding paragraph (d)(1) this section, if substantially all of the services performed by an employee for the taxpayer during the taxable year consist of services meeting the requirements of section 41(b)(2)(B)(i) or (ii), then the term "qualified services" means all of the services performed by the employee for the taxpayer during the taxable year. Services meeting the requirements of section 41(b)(2)(B)(i) or (ii) constitute substantially all of the services performed by the employee during a taxable year only if the wages allocated (on the basis used for purposes of paragraph (d)(1) of this section) to services meeting the requirements of section 41(b)(2)(B)-(i) or (ii) constitute at least 80 percent of the wages paid to or incurred by the taxpayer for the employee during the taxable year.

(e) *Contract research expenses*—(1) *In general.* A contract research expense is 65 percent of any expense paid or incurred in carrying on a trade or business to any person other than an employee of the taxpayer for the performance on behalf of the taxpayer of—

(i) Qualified research as defined in §1.41-5, or

(ii) Services which, if performed by employees of the taxpayer, would constitute qualified services within the meaning of section 41(b)(2)(B).

Where the contract calls for services other than services described in this paragraph (e)(1), only 65 percent of the portion of the amount paid or incurred that is attributable to the services described in this paragraph (e)(1) is a contract research expense.

(2) *Performance of qualified research.* An expense is paid or incurred for the performance of qualified research only to the extent that it is paid or incurred pursuant to an agreement that—

(i) Is entered into prior to the performance of the qualified research.

(ii) Provides that research be performed on behalf of the taxpayer, and

(iii) Requires the taxpayer to bear the expense even if the research is not successful.

If an expense is paid or incurred pursuant to an agreement under which payment is contingent on the success of the research, then the expense is considered paid for the product or result rather than the performance of the research, and the payment is not a contract research expense. The previous sentence applies only to that portion of a payment which is contingent on the success of the research.

(3) "*On behalf of.*" Qualified research is performed on behalf of the taxpayer if the taxpayer has a right to the research results. Qualified research can be performed on behalf of the taxpayer notwithstanding the fact that the taxpayer does not have exclusive rights to the results.

(4) *Prepaid amounts.* Notwithstanding paragraph (e)(1) of this section, if any contract research expense paid or incurred during any taxable year is attributable to qualified research to be conducted after the close of such taxable year, the expense so attributable shall be treated for purposes of section 41(b)(1)-(B) as paid or incurred during the period during which the qualified research is conducted.

(5) *Examples.* The following examples illustrate provisions contained in paragraphs (e)(1) through (4) of this section.

Example (1). A, a cash-method taxpayer using the calendar year as the taxable year, enters into a contract with B Corporation under which B is to perform qualified research on behalf of A. The contract requires A to pay B $300x, regardless of the success of the research. In 1982, B performs all of the research, and A makes full payment of $300x under the contract. Accordingly, during the taxable year 1982, $195x (65 percent of the payment of $300x) constitutes a contract research expense of A.

Example (2). The facts are the same as in example (1), except that B performs 50 percent of the research in 1983. Of the $195x of contract research expense paid in 1982, paragraph (e)(4) of this section provides that $97.5x (50 percent of $195x) is a contract research expense for 1982 and the remaining $97.5x is contract research expense for 1983.

Example (3). The facts are the same as in example (1), except that instead of calling for a flat payment of $300x, the contract requires A to reimburse B for all expenses plus pay B $100x. B incurs expenses attributable to the research as follows:

Labor	$ 90x
Supplies	20x
Depreciation on equipment	50x
Overhead	40x
Total	$ 200x

Under this agreement A pays B $300x during 1982. Accordingly, during taxable year 1982, $195x (65 percent of $300x) of the payment constitutes a contract research expense of A.

Example (4). The facts are the same as in example (3), except that A agrees to reimburse B for all expenses and agrees to pay B an additional amount of $100x, but the additional $100x is payable only if the research is successful. The research is successful and A pays B $300x during 1982. paragraph (e)(2) of this section provides that the contingent portion of the payment is not an expense incurred for the performance of qualified research. Thus, for taxable year 1982, $130x (65 percent of the payment of $200x) constitutes a contract research expense of A.

Example (5). C conducts in-house qualified research in carrying on a trade or business. In addition, C pays D Corporation, a provider of computer services, $100x to develop software to be used in analyzing the results C derives from its research. Because the software services, if performed by an employee of C, would constitute qualified services, $65x of the $100x constitutes a contract research expense of C.

Example (6). C conducts in-house qualified research in carrying on C's trade or business. In addition, C contracts with E Corporation, a provider of temporary secretarial services, for the services of a secretary for a week. The secretary spends the entire week typing reports describing laboratory results derived from C's qualified research. C pays E $400 for the secretarial service, none of which constitutes wages within the meaning of section 41(b)(2)(D). These services, if performed by employees of C, would constitute qualified services within the meaning of section 41(b)(2)(B). Thus, pursuant to paragraph (e)(1) of this section, $260 (65 percent of $400) constitutes a contract research expense of C.

Example (7). C conducts in-house qualified research in carrying on C's trade or business. In addition, C pays F, an outside accountant, $100x to keep C's books and records pertaining to the research project. The activity carried on by the accountant does not constitute qualified research as defined in section 41(d). The services performed by the accountant, if performed by an employee of C, would not constitute qualified services (as defined in section 41(b)(2)(B)). Thus, under paragraph (e)(1) of this section, no portion of the $100x constitutes a contract research expense.

§1.41-3 Base period research expense.

(a) *Number of years in base period.* The term "base period" generally means the 3 taxable years immediately preceding the year for which a credit is being determined ("determination year"). However, if the first taxable year of the taxpayer ending after June 30, 1981, ends in 1981 or 1982, then with respect to that taxable year the term "base period" means the immediately preceding taxable year. If the second taxable year of the taxpayer ending after June 30, 1981, ends in 1982 or 1983, then with respect to that taxable year the term "base period" means the 2 immediately preceding taxable years.

(b) *New taxpayers.* If, with respect to any determination year, the taxpayer has not been in existence for the number of preceding taxable years that are included under paragraph (a) of this section in the base period for that year, then for purposes of paragraph (c)(1) of this section (relating to the determination of average qualified research expenses during the base period), the taxpayer shall be treated as—

(1) Having been in existence for that number of additional 12-month taxable years that is necessary to complete the base period specified in paragraph (a) of this section, and

(2) Having had qualified research expenses of zero in each of those additional years.

(c) *Definition of base period research expenses.* For any determination year, the term "base period research expenses" means the greater of—

(1) The average qualified research expenses for taxable years during the base period, or

(2) Fifty percent of the qualified research expenses for the determination year.

(d) *Special rules for short taxable years*—(1) *Short determination year.* If the determination year for which a research credit is being taken is a short taxable year, the amount taken into account under paragraph (c)(1) of this section shall be modified by multiplying that amount by the number of months in the short taxable year and dividing the result by 12.

(2) *Short base period year.* For purposes of paragraph (c)(1) of this section. if a year in the base period is a short taxable year, the qualified research expenses paid or incurred in the short taxable year are deemed to be equal to the qualified research expenses actually paid or incurred in that year multiplied by 12 and divided by the number of months in that year.

(3) *Years overlapping the effective dates of section 41 (section 44F)*—(i) *Determination years.* If a determination year includes months before July 1981, the determination year is deemed to be a short taxable year including only the months after June 1981. Accordingly. paragraph (d)(1) of this section is applied for purposes of determining the base period expenses for such year. See section 221(d)(2) of the Economic Recovery Tax Act of 1981.

(ii) *Base period years.* No adjustment is required in the case of a base period year merely because it overlaps June 30, 1981.

(4) *Number of months in a short taxable year.* The number of months in a short taxable year is equal to the number of whole calendar months contained in the year plus fractions for any partially included months. The fraction for a partially included month is equal to the number of days in the month that are included in the short taxable year divided

by the total number of days in that month. Thus, if a short taxable year begins on January 1, 1982, and ends on June 9, 1982, it consists of 5 and 9/30 months.

(e) *Examples*. The following examples illustrate the application of this section.

Example (1). X Corp., an accrual-method taxpayer using the calendar year as its taxable year, is organized and begins carrying on a trade or business during 1979 and subsequently incurs qualified research expenses as follows:

1979	$ 10x
1980	150x
1/1/81—6/30/81	90x
7/1/81—12/31/81	110x
1982	250x
1983	450x

(i) *Determination year 1981*. For determination year 1981, the base period consists of the immediately preceding taxable year, calendar year 1980. Because the determination year includes months before July 1981, paragraph (d)(3)(i) requires that the determination year be treated as a short taxable year. Thus, for purposes of paragraph (c)(1), as modified by paragraph (d)(1), the average qualified research expenses for taxable years during the base period are $75x ($150x, the average qualified research expenses for the base period, multiplied by 6, the number of months in the determination year after June 30, 1981, and divided by 12). Because this amount is greater than the amount determined under paragraph (c)(2)(50 percent of the determination year's qualified research expense of $110x, or $55x), the amount of base period research expenses is $75x. The credit for determination year 1981 is equal to 25 percent of the excess of $110x (the qualified research expenditures incurred during the determination year including only expenditures accrued on or after July 1, 1981, through the end of the determination year) over $75x (the base period research expenses).

(ii) *Determination year 1982*. For determination year 1982, the base period consists of the 2 immediately preceding taxable years, 1980 and 1981. The amount determined under paragraph (c)(1) of this section (the average qualified research expenses for taxable years during the base period) is $175x (($150x + $90x + $110x) / 2). This amount is greater than the amount determined under paragraph (c)(2)(50 percent of $250x, or $125x). Accordingly, the amount of base period research expenses is $175x. The credit for determination year 1982 is equal to 25 percent of the excess of $250x (the qualified research expenses incurred during the determination year) over $175x (the base period research expenses).

(iii) *Determination year 1983*. For determination year 1983, the base period consists of the 3 immediately preceding taxable years 1980, 1981 and 1982. The amount determined under paragraph (c)(1) of this section (the average qualified research expenses for taxable years during the base period) is $200x (($150x + $200x + $250x) / 3). The amount determined under paragraph (c)(2) is $225x (50 percent of the $450x of qualified research expenses in 1983). Accordingly, the amount of base period research expenses is $225x. The credit for determination year 1983 is equal to 25 percent of the excess of $450x (the qualified research expenses incurred during the determination year) over $225x (the base period research expenses).

Example (2). Y, an accrual-basis corporation using the calendar year as its taxable year comes into existence and begins carrying on a trade or business on July 1, 1983. Y incurs qualified research expenses as follows:

7/1/83 -12/31/83	$ 80x
1984	200x
1985	200x

(i) *Determination year 1983*. For determination year 1983, the base period consists of the 3 immediately preceding taxable years: 1980, 1981 and 1982. Although Y was not in existence during 1980, 1981 and 1982, Y is treated under paragraph (b) of this section as having been in existence during those years with qualified research expenses of zero. Thus, the amount determined under paragraph (c)(1) of this section (the average qualified research expenses for taxable years during the base period) is $0x (($0x + $0x + $0x) / 3). The amount determined under paragraph (c)(2) of this section is $40x (50 percent of $80x). Accordingly, the amount of base period research expenses is $40x. The credit for determination year 1983 is equal to 25 percent of the excess of $80x (the qualified research expenses incurred during the determination year) over $40x (the base period research expenses).

(ii) *Determination year 1984*. For determination year 1984, the base period consists of the 3 immediately preceding taxable years: 1981, 1982, and 1983. Under paragraph (b) of this section, Y is treated as having been in existence during years 1981 and 1982 with qualified research expenses of zero. Because July 1 through December 31, 1983 is a short taxable year, paragraph (d)(2) of this section requires that the qualified research expenses for that year be adjusted to $160x for purposes of determining the average qualified research expenses during the base period. The $160x results from the actual qualified research expenses for that year ($80x) multiplied by 12 and divided by 6 (the number of months in the short taxable year). Accordingly, the amount determined under paragraph (c)(1) of this section (the average qualified research expenses for taxable years during the base period) is $53-1/3x (($0x + $0x + $160x) / 3). The amount determined under paragraph (c)(2) of this section is $100x (50 percent of $200x). The amount of base period research expenses is $100x. The credit for determination year 1984 is equal to 25 percent of the excess of $200x (the qualified research expenses incurred during the determination year) over $100x (the base period research expenses).

(iii) *Determination year 1985*. For determination year 1985, the base period consists of the 3 immediately preceding taxable years: 1982, 1983, and 1984. Pursuant to paragraph (b) of this section, Y is treated as having been in existence during 1982 with qualified research expenses of zero. Because July 1 through December 31, 1982, is a short taxable year, paragraph (d)(2) of this section requires that the qualified research expense for that year be adjusted to $160x for purposes of determining the average qualified research expenses for taxable years during the base period. This $160x is the actual qualified research expense for that year ($80x) multiplied by 12 and divided by 6 (the number of months in the short taxable year). Accordingly, the amount determined under paragraph (c)(1) of this section (the average qualified research expenses for taxable years during the base period) is $120x (($0x + $160x + $200x) / 3). The amount determined under paragraph (c)(2) of this section is $100x (50 percent of $200x). The amount of base period research expenses is $120x. The credit for determination year 1985 is equal to 25 percent of the excess of $200x (the qualified research expenses incurred during the determination year) over $120x (the base period research expenses).

§1.41-4 Qualified research for taxable years beginning after December 31, 1985.

[Reserved]

§1.41-5 Qualified research for taxable years beginning before January 1, 1986.

(a) *General rule*. Except as otherwise provided in section 30 (d) (as that section read before amendment by the Tax Reform Act of 1986) and in this section, the term "qualified research" means research, expenditures for which would be research and experimental expenditures within the meaning of section 174. Expenditures that are ineligible for the section 174 deduction elections are not expenditures for qualified research. For example, expenditures for the acquisition of land or depreciable property used in research, and mineral exploration costs described in section 174(d), are not expenditures for qualified research.

(b) *Activities outside the United States*—(1) *In-house research*. In-house research conducted outside the United States (as defined in section 7701(a)(9)) cannot constitute qualified research. Thus, wages paid to an employee scientist for services performed in a laboratory in the United States and in a test station in Antarctica must be apportioned between the services performed within the United States and the services performed outside the United States, and only the wages apportioned to the services conducted within the United States are qualified research expenses unless the 80 percent rule of §1.41-2(d)(2) applies.

(2) *Contract research*. If contract research is performed partly within the United States and partly without, only 65 percent of the portion of the contract amount that is attributable to the research performed within the United States can qualify as contract research expense (even if 80 percent or more of the contract amount was for research performed in the United States).

(c) *Social sciences or humanities*. Qualified research does not include research in the social sciences or humanities. For purposes of section 30(d)(2) (as that section read before amendment by the Tax Reform Act of 1986) and of this section, the phrase "research in the social sciences or humanities" encompasses all areas of research other than research in a field of laboratory science (such as physics or biochemistry), engineering or technology. Examples of research in the social sciences or humanities include the development of a new life insurance contract, a new economic model or theory, a new accounting procedure or a new cookbook.

(d) *Research funded by any grant, contract, or otherwise*—(1) *In general.* Research does not constitute qualified research to the extent it is funded by any grant, contract, or otherwise by another person (including any governmental entity). All agreements (not only research contracts) entered into between the taxpayer performing the research and other persons shall be considered in determining the extent to which the research is funded. Amounts payable under any agreement that are contingent on the success of the research and thus considered to be paid for the product or result of the research (see §1.41-2(e)(2)) are not treated as funding. For special rules regarding funding between commonly controlled businesses, see §1.41-8(e).

(2) *Research in which taxpayer retains no rights.* If a taxpayer performing research for another person retains no substantial rights in research under the agreement providing for the research, the research is treated as fully funded for purposes of section 41(d)(4)(H), and no expenses paid or incurred by the taxpayer in performing the research are qualified research expenses. For example, if the taxpayer performs research under an agreement that confers on another person the exclusive right to exploit the results of the research, the taxpayer is not performing qualified research because the research is treated as fully funded under this paragraph (d)(2). Incidental benefits to the taxpayer from performance of the research (for example, increased experience in a field of research) do not constitute substantial rights in the research. If a taxpayer performing research for another person retains no substantial rights in the research and if the payments to the researcher are contingent upon the success of the research, neither the performer nor the person paying for the research is entitled to treat any portion of the expenditures as qualified research expenditures.

(3) *Research in which the taxpayer retains substantial rights*—(i) *In general.* If a taxpayer performing research for another person retains substantial rights in the research under the agreement providing for the research, the research is funded to the extent of the payments (and fair market value of any property) to which the taxpayer becomes entitled by performing the research. A taxpayer does not retain substantial rights in the research if the taxpayer must pay for the right to use the results of the research. Except as otherwise provided in paragraph (d)(3)(ii) of this section, the taxpayer shall reduce the amount paid or incurred by the taxpayer for the research that would, but for section 41(d)(4)(H), constitute qualified research expenses of the taxpayer by the amount of funding determined under the preceding sentence.

(ii) *Pro rata allocation.* If the taxpayer can establish to the satisfaction of the district director—

(A) The total amount of research expenses,

(B) That the total amount of research expenses exceed the funding, and

(C) That the otherwise qualified research expenses (that is, the expenses which would be qualified research expenses if there were no funding) exceed 65 percent of the funding, then the taxpayer may allocate the funding pro rata to nonqualified and otherwise qualified research expenses, rather than allocating it 100 percent to otherwise qualified research expenses (as provided in paragraph (d)(3)(i) of this section). In no event, however, shall less than 65 percent of the funding be applied against the otherwise qualified research expenses.

(iii) *Project-by-project determination.* The provisions of this paragraph (d)(3) shall be applied separately to each research project undertaken by the taxpayer.

(4) *Independent research and development under the Federal Acquisition Regulations System and similar provisions.* The Federal Acquisition Regulations System and similar rules and regulations relating to contracts (fixed price, cost plus, etc.) with government entities provide for allocation of certain "independent research and development costs" and "bid and proposal costs" of a contractor to contracts entered into with that contractor. In general, any "independent research and development costs" and "bid and proposal costs" paid to a taxpayer by reason of such a contract shall not be treated as funding the underlying research activities except to the extent the "independent research and development costs" and "bid and proposal costs" are properly severable from the contract. See §1.451-3(e); see also section 804(d)(2) of the Tax Reform Act of 1986.

(5) *Funding determinable only in subsequent taxable year.* If at the time the taxpayer files its return for a taxable year, it is impossible to determine to what extent particular research performed by the taxpayer during that year may be funded, then the taxpayer shall treat the research as completely funded for purposes of completing that return. When the amount of funding is finally determined, the taxpayer should amend the return and any interim returns to reflect the proper amount of funding.

(6) *Examples.* The following examples illustrate the application of the principles contained in this paragraph.

Example (1). A enters into a contract with B Corporation, a cash-method taxpayer using the calendar year as its taxable year, under which B is to perform research that would, but for section 41(d)(3)(H), be qualified research of B. The agreement calls for A to pay B $120x, regardless of the outcome of the research. In 1982, A makes full payment of $120x under the contract, B performs all the research, and B pays all the expenses connected with the research, as follows:

In-house research expenses	$100x
Outside research (amount B paid to third parties for research, 65 percent of which ($26x) is treated as a contract research expense of B)	40x
Overhead and other expenses	10x
Total	$150x

If B has no rights to the research, B is fully funded. Alternatively, assume that B retains the right to use the results of the research in carrying on B's business. Of B's otherwise qualified research expenses of $126x ($100x + $26x), $120x is treated as funded by A. Thus $6x ($126x — $120x) is treated as a qualified research expense of B. However, if B establishes the facts required under paragraph (d)(3) of this section, B can allocate the funding pro rata to nonqualified and otherwise qualified research expenses. Thus $100.8x ($120x ($126x/$150x)) would be allocated to otherwise qualified research expenses. B's qualified research expenses would be $25.2x ($126x — $100.8x). For purposes of the following examples (2), (3) and (4) assume that B retains substantial rights to use the results of the research in carrying on B's business.

Example (2). The facts are the same as in example (1) (assuming that B retains the right to use the results of the research in carrying on B's business) except that, although A makes full payment of $120x during 1982, B does not perform the research or pay the associated expenses until 1983. The computations are unchanged. However, B's qualified research expenses determined in example (1) are qualified research expenses during 1983.

Example (3). The facts are the same as in example (1) (assuming that B retains the right to use the results of the research in carrying on B's business) except that, although B performs the research and pays the associated expenses during 1982, A does not pay the $120x until 1983. The computations are unchanged and the amount determined in example (1) is a qualified research expense of B during 1982.

Example (4). The facts are the same as in example (1) (assuming that B retains the right to use the results of the research in carrying on B's business) except that, instead of agreeing to pay B $120x, A agrees to pay $100x regardless of the outcome and an additional $20x only if B's research produces a useful product. B's research produces a useful product and A pays B $120x during 1982. The $20x payment that is conditional on the success of the research is not treated as funding. Assuming that B establishes to the satisfaction of the district director the actual research expenses, B can allocate the funding to nonqualified and otherwise qualified research expenses. Thus $84x ($100x ($126x/$150x)) would be allocated to otherwise qualified research expenses. B's qualified research expenses would be $42x ($126x — $84x).

Example (5). C enters into a contract with D, a cash-method taxpayer using the calendar year as its taxable year, under which D is to perform research in which both C and D will have substantial rights. C agrees to reimburse D for 80 percent of D's expenses for the research. D performs part of the research in 1982 and the rest in 1983. At the time that D files its return for 1982, D is unable to determine the extent to which the research is funded under the provisions of this paragraph. Under these circumstances, D may not treat any of the expenses paid by D for this research during 1982 as qualified research expenses on its 1982 return. When the project is complete and D can determine the extent of funding, D should file an amended return for 1982 to take into account any qualified research expense for 1982.

§1.41-6 Basic research for taxable years beginning after December 31, 1985.

[Reserved]

§1.41-7 Basic research for taxable years beginning before January 1, 1986.

(a) *In general.* The amount expended for basic research within the meaning of section 30(e) (before amendment by the Tax Reform Act of 1986) equals the sum of money plus the taxpayer's basis in tangible property (other than land) transferred for use in the performance of basic research.

(b) *Trade or business requirement.* Any amount treated as a contract research expense under section 30(e) (before amendment by the Tax Reform Act of 1986) shall be deemed to have been paid or incurred in carrying on a trade or business, if the corporation that paid or incurred the expense is actually engaged in carrying on some trade or business.

(c) *Prepaid amounts*—(1) *In general.* If any basic research expense paid or incurred during any taxable year is attributable to research to be conducted after the close of such taxable year, the expense so attributable shall be treated for purposes of section 30(b)(1)(B) (before amendment by the Tax Reform Act of 1986) as paid or incurred during the period in which the basic research is conducted.

(2) *Transfers of property.* In the case of transfers of property to be used in the performance of basic research, the research in which that property is to be used shall be considered to be conducted ratably over a period beginning on the day the property is first so used and continuing for the number of years provided with respect to property of that class under section 168(c)(2) (before amendment by the Tax Reform Act of 1986). For example, if an item of property which is 3-year property under section 168(c) is transferred to a university for basic research on January 12, 1983, and is first so used by the university on March 1, 1983, then the research in which that property is used is considered to be conducted ratably from March 1, 1983, through February 28, 1986.

(d) *Written research agreement*—(1) *In general.* A written research agreement must be entered into prior to the performance of the basic research.

(2) *Agreement between a corporation and a qualified organization after June 30, 1983*—(i) *In general.* A written research agreement between a corporation and a qualified organization (including a qualified fund) entered into after June 30, 1983, shall provide that the organization shall inform the corporation within 60 days after the close of each taxable year of the corporation what amount of funds provided by the corporation pursuant to the agreement was expended on basic research during the taxable year of the corporation. In determining amounts expended on basic research, the qualified organization shall take into account the exclusions specified in section 30(e)(3) (before amendment by the Tax Reform Act of 1986) and in paragraph (e) of this section.

(ii) *Transfers of property.* In the case of transfers of property to be used in basic research, the agreement shall provide that substantially all use of the property is to be for basic research, as defined in section 30(e)(3) (before amendment by the Tax Reform Act of 1986).

(3) *Agreement between a qualified fund and a qualified educational organization after June 30, 1983.* A written research agreement between a qualified fund and a qualified educational organization (see section 30(e)(4)(B)(iii) (before amendment by the Tax Reform Act of 1986)) entered into after June 30, 1983, shall provide that the qualified educational organization shall furnish sufficient information to the qualified fund to enable the qualified fund to comply with the written research agreements it has entered into with grantor corporations, including the requirement set forth in paragraph (d)(2) of this section.

(e) *Exclusions*—(1) *Research conducted outside the United States.* If a taxpayer pays or incurs an amount for basic research to be performed partly within the United States and partly without, only 65 percent of the portion of the amount attributable to research performed within the United States can be treated as a contract research expense (even if 80 percent or more of the contract amount was for basic research performed in the United States).

(2) *Research in the social sciences or humanities.* Basic research does not include research in the social sciences or humanities, within the meaning of §1.41-5(c).

(f) *Procedure for making an election to be treated as a qualified fund.* In order to make an election to be treated as a qualified fund within the meaning of section 30(e)(4)(B)(iii) (before amendment by the Tax Reform Act of 1986) or as an organization described in section 41(e)(6)(D), the organization shall file with the Internal Revenue service center with which it files its annual return a statement that—

(1) Sets out the name, address, and taxpayer identification number of the electing organization (the "taxpayer") and of the organization that established and maintains the electing organization (the "controlling organization"),

(2) Identifies the election as an election under section 41(e)(6)(D) of the Code,

(3) Affirms that the controlling organization and the taxpayer are section 501(c)(3) organizations,

(4) Provides that the taxpayer elects to be treated as a private foundation for all Code purposes other than section 4940,

(5) Affirms that the taxpayer satisfies the requirement of section 41(e)(6)(D)(iii), and

(6) Specifies the date on which the election is to become effective.

If an election to be treated as a qualified fund is filed before February 1, 1982, the election may be made effective as of any date after June 30, 1981, and before January 1, 1986. If an election is filed on or after February 1, 1982, the election may be made effective as of any date on or after the date on which the election is filed.

§1.41-8 Aggregation of expenditures.

(a) *Controlled group of corporations; trades or businesses under common control*—(1) *In general.* In determining the amount of research credit allowed with respect to a trade or business that at the end of its taxable year is a member of a controlled group of corporations or a member of a group of trades or businesses under common control, all members of the group are treated as a single taxpayer and the credit (if any) allowed to the member is determined on the basis of its proportionate share (if any) of the increase in qualified research expenses of the aggregated group.

(2) *Definition of trade or business.* For purposes of this section, a trade or business is a sole proprietorship, a partnership, a trust, an estate, or a corporation that is carrying on a trade or business (within the meaning of section 162). For purposes of this section, any corporation that is a member of a commonly controlled group shall be deemed to be carrying on a trade or business if any other member of that group is carrying on any trade or business.

(3) *Determination of common control.* For rules for determining whether trades or businesses are under common control, see paragraphs (b) (g) of §1.52-1 except that the words "singly or" in §1.52-1(d)(1)(i) shall be treated as deleted.

(4) *Examples.* The following examples illustrate provisions of this paragraph.

Example (1). (i) *Facts.* A controlled group of four corporations (all of which are calendar-year taxpayers) had qualified research expenses ("research expenses") during the base period and taxable year as follows:

Corporation	*Base Period (average)*	*Taxable year*	*Change*
A	$60	$40	$20
B	10	15	5
C	30	70	40
D	15	25	10

(ii) *Total credit.* Because the research expenses of the four corporations are treated as if made by one taxpayer, the total amount of incremental expenses eligible for the credit is $35 ($55 increase attributable to B, C, and D less $20 decrease attributable to A). The total amount of credit allowable to members of the group is 20% of the incremental amount or $7.00.

(iii) *Allocation of credit.* No amount of credit is allocated to A since A's research expenses did not increase in the taxable year. The $7.00 credit is allocated to B, C, and D, the members of the group that increased their research expenses. This allocation is made on the basis of the ratio of each corporation's increase in its research expenses to the sum of increases in those expenses. Inasmuch as the total increase made by those members of the group whose research expenses rose (B, C, and D) was $55, B's share of the $7.00 credit is 5/55; C's share is 40/55; and D's share is 10/55.

Example (2). The facts are the same as in example (1) except that A had zero research expenses in the taxable year. Thus, the controlled group had a decrease rather than an increase in aggregate research expenses. Accordingly, no amount of credit is allowable to any member of the group even though B, C, and D actually increased their research expenses in comparison with their own base period expenses.

(b) *Minimum base period research expenses.* For purposes of this section, the rule in section 41(c)(3) (pertaining to minimum base period research expenses) shall be applied only to the aggregate amount of base period research expenses. See the treatment of corporation C in example (1) of paragraph (a)(4) of this section.

(c) *Tax accounting periods used*—(1) *In general.* The credit allowable to a member of a controlled group of corporations or of a group of trades or businesses under common control is that member's share of the aggregate credit computed as of the end of such member's taxable year. In computing the aggregate credit in the case of a group whose members have different taxable years, a member shall generally treat the taxable year of another member that ends with or within the determination year of the computing member as the determination year of that other member. The base period research expenses taken into account with respect to a determination year of another member shall be the base period research expenses determined for that year under §1.41-3, except that §1.41-3(c)(2) shall be applied only at the aggregate level.

(2) *Special rule where timing of research is manipulated.* If the timing of research by members using different tax accounting periods is manipulated to generate a credit in excess of the amount that would be allowable if all members of the group used the same tax accounting period, the district director may require each member of the group to calculate the credit in the current taxable year and all future years as if all members of the group had the same taxable year and base period as the computing member.

(d) *Membership during taxable year in more than one group.* A trade or business may be a member of only one group for a taxable year. If, without application of this paragraph, a business would be a member of more than one group at the end of its taxable year, the business shall be treated as a member of the group in which it was included for its preceding taxable year. If the business was not included for its preceding taxable year in any group in which it could be included as of the end of its taxable year, the business shall designate in its timely filed (including extensions) return the group in which it is being included. If the return for a taxable year is due before July 1, 1983, the business may designate its group membership through an amended return for that year filed on or before June 30, 1983. If the business does not so designate, then the district director with audit jurisdiction of the return will determine the group in which the business is to be included.

(e) *Intra-group transactions*—(1) *In general.* Because all members of a group under common control are treated as a single taxpayer for purposes of determining the research credit, transfers between members of the group are generally disregarded.

(2) *In-house research expenses.* If one member of a group performs qualified research on behalf of another member, the member performing the research shall include in its qualified research expenses any in-house research expenses for that work and shall not treat any amount received or accrued as funding the research. Conversely, the member for whom the research is performed shall not treat any part of any amount paid or incurred as a contract research expense. For purposes of determining whether the in-house research for that work is qualified research, the member performing the research shall be treated as carrying on any trade or business carried on by the member on whose behalf the research is performed.

(3) *Contract research expenses.* If a member of a group pays or incurs contract research expenses to a person outside the group in carrying on the member's trade or business, that member shall include those expenses as qualified research expenses. However, if the expenses are not paid or incurred in carrying on any trade or business of that member, those expenses may be taken into account as contract research expenses by another member of the group provided that the other member—

(i) Reimburses the member paying or incurring the expenses, and

(ii) Carries on a trade or business to which the research relates.

(4) *Lease Payments.* The amount paid or incurred to another member of the group for the lease of personal property owned by a member of the group is not

taken into account for purposes of section 41. Amounts paid or incurred to another member of the group for the lease of personal property owned by a person outside the group shall be taken into account as in-house research expenses for purposes of section 41 only to the extent of the lesser of—

(i) The amount paid or incurred to the other member, or

(ii) The amount of the lease expenses paid to the person outside the group.

(5) *Payment for supplies.* Amounts paid or incurred to another member of the group for supplies shall be taken into account as in-house research expenses for purposes of section 41 only to the extent of the lesser of—

(i) The amount paid or incurred to the other member, or

(ii) The amount of the other member's basis in the supplies.

§1.41-9 Special rules.

(a) *Allocations*—(1) *Corporation making an election under subchapter S*—(i) *Pass-through, for taxable years beginning after December 31, 1982, in the case of an S corporation.* In the case of an S corporation (as defined in section 1361) the amount of research credit computed for the corporation shall be allocated to the shareholders according to the provisions of section 1366 and section 1377.

(ii) *Pass-through, for taxable years beginning before January 1, 1983, in the case of a subchapter S corporation.* In the case of an electing small business corporation (as defined in section 1371 as that section read before the amendments made by the Subchapter S Revision Act of 1982), the amount of the research credit computed for the corporation for any taxable year shall be apportioned pro rata among the persons who are shareholders of the corporation on the last day of the corporation's taxable year.

(2) *Pass-through in the case of an estate or trust.* In the case of an estate or trust, the amount of the research credit computed for the estate or trust for any taxable year shall be apportioned among the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each.

(3) *Pass-through in the case of a partnership*—(i) *In general.* In the case of a partnership, the research credit computed for the partnership for any taxable year shall be apportioned among the persons who are partners during the taxable year in accordance with section 704 and the regulations thereunder. See, for example, §1.704-1(b)(4)(ii). Because the research credit is an expenditure-based credit, the credit is to be allocated among the partners in the same proportion as section 174 expenditures are allocated for the year.

(ii) *Certain expenditures by joint ventures.* Research expenses to which §1.41-2(a)(4)(ii) applies shall be apportioned among the persons who are partners during the taxable year in accordance with the provisions of that section. For purposes of section 41, these expenses shall be treated as paid or incurred directly by the partners rather than by the partnership. Thus, the partnership shall disregard these expenses in computing the credit to be apportioned under paragraph (a)(3)(i) of this section, and in making the computations under section 41 each partner shall aggregate its distributive share of these expenses with other research expenses of the partner. The limitation on the amount of the credit set out in section 41(g) and in paragraph (c) of this section shall not apply because the credit is computed by the partner, not the partnership.

(4) *Year in which taken into account.* An amount apportioned to a person under this paragraph shall be taken into account by the person in the taxable year of such person which or within which the taxable year of the corporation, estate, trust, or partnership (as the case may be) ends.

(5) *Credit allowed subject to limitation.* The credit allowable to any person to whom any amount has been apportioned under paragraph (a)(1), (2) or (3)(i) of this section is subject to section 41(g) and sections 38 and 39 of the Code, if applicable.

(b) *Adjustments for certain acquisitions and dispositions—Meaning of terms.* For the meaning of "acquisition," "separate unit," and "major portion," see paragraph (b) of §1.52-2. An "acquisition" includes an incorporation or a liquidation.

(c) *Special rule for pass-through of credit.* The special rule contained in section 41(g) for the pass-through of the credit in the case of an individual who owns an interest in an unincorporated trade or business, is a partner in a partnership, is a beneficiary of an estate or trust, or is a shareholder in an S corporation shall be applied in accordance with the principles set forth in §1.53-3.

(d) *Carryback and carryover of unused credits.* The taxpayer to whom the credit is passed through under paragraph (c) of this section shall not be prevented from applying the unused portion in a carryback or carryover year merely because the entity that earned the credit changes its form of conducting business.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved April 6, 1989.

John G. Wilkins,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on May 16, 1989, 8:45 a.m., and published in the issue of the Federal Register for May 17, 1989, 54 F.R. 21203)

Subpart E.—Rules for Computing Credit for Investment in Certain Depreciable Property

Section 47.—Certain Dispositions, Etc., of Section 38 Property

26 CFR 1.47-3: Exceptions to the application of section 1.47-1.
(Also Sections 38, 355, 368.)

Recapture; investment credit; divisive reorganizations. When, pursuant to a single integrated transaction, a corporation transfers section 38 recovery property to a newly formed subsidiary in year one and distributes its stock in the subsidiary to its shareholders in year two, the disposition of the section 38 recovery property triggering investment credit recapture under section 47(a) of the Code occurs in year one.

Rev. Rul. 89-18

ISSUE

If, pursuant to a reorganization described under sections 368(a)(1)(D) and 355(a)(1) of the Internal Revenue Code, section 38 recovery property of a corporation is transferred to a newly formed subsidiary in year one and the subsidiary's stock is distributed to the corporation's shareholders in year two, then, for purposes of section 47(a), does the resulting disposition of the section 38 recovery property occur in year one or in year two?

FACTS

X, a domestic corporation, has several divisions that conduct separate businesses. *X* files its federal income tax return on the basis of a calendar year.

On May 1, 1988, *X* announced a plan to transfer the assets of division *a* and certain of *X*'s liabilities to *Y*, a newly formed corporation, in exchange for the stock of *Y*, and then to transfer to the *X* shareholders the stock received from *Y*.

The transfer to *Y* of division *a*'s assets and of *X*'s liabilities took place on December 31, 1988. The assets that were transferred included section 38 recovery property with respect to which *X* had been allowed an investment credit in an earlier year. *X* distributed *Y*'s stock to *X*'s shareholders on February 1, 1989. Both the transfer of the assets to *Y* and the distribution of *Y*'s stock to the *X* shareholders were part of a single integrated plan, all aspects of which were known when the transaction began.

X's transfer of the assets to *Y* solely for *Y* stock followed by the subsequent distribution of *Y*'s stock to *X*'s shareholders constituted a divisive reorganization within the meaning of section 368(a)(1)(D) of the Code. It met the requirements for nonrecognition of gain or loss to *X*'s shareholders pursuant to section 355(a). As a result of the integrated transaction, the section 38 recovery property that had been transferred from *X* to *Y* ceased to be section 38 property with respect to *X*.

The specific issue is whether that section 38 recovery property was disposed of, for purposes of section 47(a) of the Code, when the assets were transferred to *Y* (in *X*'s 1988 taxable year) or when *X* distributed the *Y* stock to the *X* shareholders (in *X*'s 1989 taxable year).

LAW AND ANALYSIS

Section 47(a)(1) of the Code provides that, if during any taxable year any property is disposed of or otherwise ceases to be section 38 property with respect to the taxpayer before the close of the useful life that was taken into account in computing the credit under section 38, the tax for such taxable year shall be increased. Section 47(a)(5) provides a similar rule with respect to section 38 recovery property.

Section 47(b) of the Code provides that property shall not be treated as ceasing to be section 38 property with respect to the taxpayer if the transaction involves a mere change in form of conducting the trade or business so long as the property transferred is retained in the trade or business as section 38 property and the taxpayer retains a substantial interest in the trade or business.

Section 1.47-3(f)(1)(i) of the Income Tax Regulations provides that the mere-change-in-form exception to the recapture of the investment credit will not apply unless certain conditions specified in section 1.47-3(f)(1)(ii) are met, including the condition that the transferor of the section 38 property retains a "substantial interest" in the trade or business.

Section 1.47-3(f)(5)(ii) of the regulations provides rules concerning investment credit recapture for situations in which an initial transfer of section 38 property is subject to the mere-change-in-form exception but the transferor subsequently fails to retain a substantial interest in the trade or business.

Rev. Rul. 74-101, 1974-1 C.B. 7, concerns a corporation engaged in the same business in three states that transferred its business activities in two of the states and all related assets, including section 38 property, to two newly formed corporations solely in exchange for all their stock and immediately thereafter transferred the stock to its sole shareholder in a section 368(a)(1)(D) divisive reorganization. The ruling holds that investment credit recapture under section 47(a)(1) of the Code is required. The mere-change-in-form exception does not apply, because after the reorganization the corporation was not the owner of a substantial interest in the transferred businesses.

Rev. Rul. 82-20, 1982-1 C.B. 6, concerns a transfer of section 38 property between members of an affiliated group in a consolidated return year. The transfer was part of a plan to transfer the section 38 property outside the affiliated group in a transaction qualifying as a reorganization under section 368(a)(1)-(D). Holding that the transfer constitutes a disposition of section 38 property under section 47(a)(1) of the Code, that ruling concludes that the exception to recapture of investment credit contained in section 1.1502-3(f)(2)(i) of the regulations for transfers of section 38 property between members of the affiliated group does not apply to the transaction. The exception is inapplicable because the transfer of the section 38 property was a step in the planned transfer of the property outside the affiliated group.

Both Rev. Rul. 74-101 and Rev. Rul. 82-20 conclude that recapture is triggered by the disposition of the section 38 property that occurred in the divisive section 368(a)(1)(D) reorganizations. Neither ruling, however, explicitly addresses the issue of whether the event triggering recapture is the transfer of section 38 property or the subsequent distribution of the stock.

The legislative history to section 47 of the Code contains an example similar to the fact pattern in this ruling. In the example, section 38 property was transferred to a subsidiary as part of a transaction that included a subsequent transfer of the subsidiary's stock. Section 47(a) applied to the transfer of the section 38 property to the subsidiary. The mere-change-in-form exception of section 47(b) was not discussed. *See* Example 2 in S. Rep. No. 1881, 87th Cong., 2d Sess. 153 (1962), 1962-3 C.B. 707, 857.

The transfer of section 38 property from a corporation to a newly formed subsidiary triggers investment credit recapture unless the mere-change-inform exception is applicable. In the present situation, the transfer of the section 38 property by *X* to *Y* and the subsequent distribution by *X* of *Y*'s stock to the *X* shareholders were parts of a single integrated transaction, a divisive reorganization. Because *X* retains no substantial interest in division *a* upon completion of the reorganization, the mere-change-in-form exception does not apply to this transaction. Therefore, the general recapture rules of section 47(a) of the Code are triggered by the transfer of the section 38 recovery property to *Y*, and *X* is subject to recapture in the year the property is so transferred. The rules of section 1.47- 3(f)(5)(ii) of the regulations do not apply here, because the mere-change-in-form exception was not applicable to the transfer of the section 38 recovery property from *X* to *Y*.

HOLDING

When, pursuant to a single integrated transaction, a corporation transfers section 38 recovery property to a newly formed subsidiary in year one and distributes its stock in the subsidiary to its shareholders in year two, the disposition under section 47(a) of the Code occurs in year one.

Part VI.—Alternative Minimum Tax

Section 58.—Denial of Certain Losses

26 CFR 1.58-9T: Application of the tax benefit rule to the minimum tax for taxable years beginning prior to 1987 (temporary).

T.D. 8249

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Parts 1 and 602

Minimum Tax—Tax Benefit Rule

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the application of the tax benefit rule to the minimum tax. Changes to the applicable law were made by the Tax Reform Act of 1976. The regulations provide taxpayers with guidance necessary to determine the amount of tax preference items that do not provide a current tax benefit because of available credits and, therefore, are not subject to minimum tax. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in * * * [IA-56-87, page 1018, this Bulletin].

DATES: Except as otherwise provided, the amendments are effective for items of tax preference that are subject to the minimum tax imposed by section 56 of the Code and arise in taxable years beginning after December 31, 1975, and before January 1, 1987.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This regulation is being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collection of information requirements contained in this regulation have been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget (OMB) under control number 1545-1093. The estimated annual burden per respondent or recordkeeper varies from 10 minutes to 14 minutes, depending on individual circumstances, with an estimated average of 12 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on individual circumstances.

For further information concerning these collections of information, where to submit comments on these collections of information, the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-reference notice of proposed rulemaking published * * * [page 1018, this Bulletin].

BACKGROUND

This document contains temporary regulations amending the Income Tax Regulations (26 CFR Part 1) under section 58(h) of the Internal Revenue Code of 1954 (Code). These amendments would conform the regulations to section 301(d)(3) of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1553) [1976-3 C.B. (Vol. 1) 1, 29] and are issued under the authority contained in sections 58(h) and 7805 of the Code (90 Stat. 1553 and 68A Stat. 917; 26 U.S.C. 58(h), 7805).

These temporary regulations are applicable for purposes of determining minimum tax liability imposed by section 56 of the Code for taxable years beginning before January 1, 1987. Except as otherwise provided, the temporary regulations do not apply for purposes of determining alternative minimum tax liability imposed by section 55.

EXPLANATION OF PROVISIONS

In general

For taxable years beginning after December 31, 1976, and before January 1, 1987, section 56 of the Code imposes a 15-percent minimum tax on a corporate taxpayer's tax preference items, as defined in section 57, to the extent that such preference items exceed the greater of (i) $10,000, or (ii) the taxpayer's regular tax liability computed without regard to taxes imposed by sections 531 and 541 and after reduction by credits. This minimum tax is imposed in addition to other taxes imposed by chapter 1 of the Code. Section 58(h) provides that the Secretary shall prescribe regulations under which items of tax preference shall be properly adjusted where the tax treatment giving rise to such items will not result in the reduction of tax under subtitle A of the Code for any taxable years.

Application of the Tax Benefit Rule

Section 1.58-9T(a) of the temporary regulations provides that under section 58(h) of the Code taxpayers are not liable for the minimum tax imposed by section 56 on tax preference items from which no current tax benefit is derived because available credits would have reduced or eliminated the taxpayer's regular tax liability if preference items had not been allowed in computing taxable income. These regulations follow the holding in *First Chicago Corp. v. Commissioner*, 88 T.C. 663 (1987), *aff'd*, 842 F.2d 180 (7th Cir. 1988). In *First Chicago* the court held that under section 58(h) the taxpayer owed no minimum tax on items of tax preference that did not produce a current tax benefit because available credits would have eliminated tax liability even if the preference items had not been allowed. The court recognized that the effect of the tax preference items was to "free up" for possible use in subsequent years additional credits that otherwise would have been used to reduce tax liability. Section 1.58-9T(a) of the temporary regulations further provides that any credits that, because of such preference items, are not needed for use against regular tax ("freed-up credits"), are required to be reduced under the rules of §1.58-9T(c) of the temporary regulations.

Adjustment to credits

Section 1.58-9T(c) of the temporary regulations provides that a taxpayer's freed-up credits must be reduced by the additional minimum tax that would have been imposed if a current tax benefit had been derived from preference items that did not actually produce a current tax benefit. The amount of this reduction shall be calculated in the following manner—

(i) Determine the amount of freed-up credits,

(ii) Determine the amount of tax preference items (if any) for which a current tax benefit was derived for the taxable year ("beneficial preferences"), and the amount of preferences for which no current tax benefit was derived for the taxable year ("non-beneficial preferences"), and

(iii) Determine the portion of the total minimum tax on all tax preference items for the taxable year that is attributable to the non-beneficial preferences. The freed-up credits are then reduced by an amount equal to such portion of the minimum tax.

The regulations include rules necessary to allocate properly the required credit reduction among credits that are of more than one type (*e.g.*, investment tax credits and foreign tax credits) or that were earned in more than one taxable year. These rules take into account the order in which such credits would have been applied to offset the additional tax that would have been imposed if preferences had not been allowed, percentage limitations that would have affected the use of such credits against this additional tax, and the marginal rates at which this additional tax would have been imposed.

Determination of Freed-up Credit

Section 1.58-9T(c)(2)(i) of the temporary regulations provides that to determine the freed-up credits for the taxable year, the first step is to determine the regular tax that would have been imposed if preference items had not been allowed in computing taxable income ("non-preference regular tax"). The second step is to compute the amount of credits that would have been allowed to reduce the non-preference regular tax. The third step is to subtract the amount of credits that were actually allowed to reduce the regular tax for such taxable year from the amount of credits that would have been allowed to reduce non-preference regular tax. The result is the amount of the freed-up credits.

Determination of Beneficial and Non-beneficial Preferences

Section 1.58-9T(c)(3) of the temporary regulations provides the method for determining the amount of tax preferences from which a current tax benefit is derived ("beneficial preferences") and the amount from which no current tax benefit is derived ("non-beneficial preferences") for the taxable year. If the taxpayer's tax liability (after credits) would be the same regardless of whether preference items were allowed to reduce taxable income, then all of the taxpayer's preference items are non-beneficial preference items.

If tax liability (after credits) is less because preference items are allowed to reduce taxable income, then some of these preference items have provided a current tax benefit. In such cases, the non-beneficial preferences are determined by converting the freed-up credits for such taxable year into an amount of taxable income. To make this conversion, freed-up credits are "grossed up" (*i.e.*, divided by the regular tax marginal rate at which such credits would have offset non-preference regular tax) to determine the amount of tax preferences that freed up such credits. The aggregate of these grossed-up amounts is the total amount of non-beneficial preferences for the taxable year.

The freed-up credits are to be grossed up beginning at the lowest marginal tax rate that would have applied to the additional taxable income arising if tax preferences were not allowed. Thus, the marginal tax rates at which the actual regular tax was imposed shall not be taken into account in grossing up freed-up credit, even if all or a portion of such tax is not offset by credits because of limitations on the allowance of such credits (such as the section 904 limit on foreign tax credits or the section 38(c) limit on investment tax credits). For example, if the first dollar of additional non-preference taxable income would have been taxed at a rate of 46 percent, then freed-up credits shall be grossed up at 46 percent, even if regular tax imposed on taxable income at a 40-percent rate was not offset by credits because of the limitations on investment tax credits under section 38(c).

The amount of beneficial preferences for the taxable year is computed by subtracting the non-beneficial preferences for the taxable year from the total amount of tax preferences for such year.

Determination of the Credit Reduction Amount

Section 1.58-9T(c)(4) of the temporary regulations provides the method for determining the amount of minimum tax attributable to the nonbeneficial preferences. This amount is also referred to as the credit reduction amount. The credit reduction amount is determined by computing the amount of minimum tax that would be imposed on all tax preference items for the taxable year if all such preferences had produced a current tax benefit. The minimum tax that is imposed on only beneficial preferences is subtracted from this amount. The result is the minimum tax attributable to the non-beneficial preferences for the taxable year.

Reduction of Freed-up Credits

Section 1.58-9T(c)(5)(i) of the temporary regulations provides that the freed-up credits are reduced by an amount equal to the minimum tax attributable to the non-beneficial preferences ("credit reduction amount"). If the taxpayer only has one type of freed-up credit (*i.e.*, only investment tax credit or only foreign tax credit) and that credit was earned in only one year (the current year or a carryback or carryforward year), then such credit is reduced by the credit reduction amount.

However, if the taxpayer has more than one type of freed-up credit, or the taxpayer's credits are from more than one taxable year, then the credit reduction amount must be allocated either under the exact method of credit reduction, or if an election is made, under the simplified method.

Section 1.58-9T(c)(5)(ii) of the temporary regulations provides that under the exact method of credit reduction, for each type of freed-up credits and for each taxable year within such type from which any such credits are earned, the amount of credit reduction shall be equal to the amount of minimum tax attributable to the non-beneficial preferences that freed up the credits for that type and taxable year. The amount of the credit reduction is computed by multiplying the amount of non-beneficial preferences which freed up credits for each type and taxable year by the minimum tax rate.

In lieu of the exact credit reduction method, taxpayers may elect to use the simplified credit reduction method described in §1.58-9T(c)(5)(iii)(A). Under the simplified credit reduction method, the amount of freed-up credits for each type of credit and for each taxable year from which such credit is carried over is multiplied by a fraction. The numerator of the fraction is the total credit reduction amount. The denominator is the total amount of freed-up credits. The product of this multiplication is the amount of credit reduction for each type and taxable year of freed-up credit.

Section 1.58-9T(c)(5)(iii)(B) provides that a taxpayer may elect to use the simplified credit reduction method for all taxable years to which these regulations apply by attaching a statement indicating such an election on the amended Federal income tax return or returns applying the adjustments of these regulations. If an election is made for any taxable year, it must be made for all taxable years. Once an election has been made, it can be revoked only with the permission of the Commissioner. Similarly, once returns have been filed applying the exact credit reduction method, an election to apply the simplified method can be made only with the consent of the Commissioner.

Section 1.58-9T(c)(5)(iv) of the temporary regulations provides that under both the exact method and the simplified method, the determination of credit carrybacks and carryforwards to other taxable years is made on the basis of freed-up credits remaining after such reduction, plus any other unused credits. Thus, an amount of freed-up credits equal to the credit reduction amount shall not reduce tax liability in any taxable year. Such disallowance is without regard to whether such credits would otherwise be allowed as a carryback or carryforward. No minimum tax liability shall be due with respect to the non-beneficial preferences for any taxable year.

Periods of limitations; adjustments to tax liability

Section 1.58-9T(e)(2) of the temporary regulations provides that the adjustments described in the temporary regulations shall, in general, apply for purposes of assessing deficiencies or claiming refunds of tax for any taxable year for which the tax liability for such year is affected by these adjustments, provided that the period of limitations under section 6501 has not expired for such taxable year. Therefore, these adjustments generally apply for purposes of assessing deficiencies and refunding any overpayment of tax for all years for which the period of limitations has not expired regardless of whether the period of limitations has expired for the taxable year in which the non-beneficial preferences arose. However, the adjustments contained in these temporary regulations do not apply to reduce freed-up credits otherwise allowable in any year where:

(i) The taxpayer paid minimum tax on all tax preference items arising in the taxable year in which the non-beneficial preferences arose;

(ii) The taxpayer has not made a claim for a credit or refund for such minimum tax; and

(iii) The period of limitations for claiming a credit or refund under section 6511 has expired for such taxable year.

Claim for credit or refund

Section 1.58-9T(e)(3) of the temporary regulations provides that a taxpayer generally may claim a credit or refund of minimum tax that was paid on non-beneficial preferences. However, such a claim for a credit or refund shall be disallowed to the extent that the taxpayer has reduced tax liability in a taxable year for which the period of limitations has expired by using freed-up credits in excess of the amount that would have been available if the credit reduction required under these regulations had been made. Such a claim must be made by filing an amended return for the taxable year for which such minimum tax was paid. Further, if a claim for credit or refund is filed, amended returns must also be filed for any taxable year for which tax liability would be affected as a result of the reduction, under these regulations, of credits freed up by such non-beneficial preferences.

Net operating losses

Section 1.58-9T(f) of the temporary regulations has been reserved for the purpose of providing rules relating to the application of the tax benefit rule in cases where tax preference items provide no tax benefit in the current taxable year because available net operating loss carrybacks or carryforwards would have reduced or eliminated tax liability if the preference items had not been allowed in computing taxable income. The Internal Revenue Service intends to issue additional regulations at a later date which will address the adjustments required in such cases.

SPECIAL ANALYSES

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule. The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

* * * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Parts 1 and 602 are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805 * * * Section 1.58-9T is also issued under 26 U.S.C. 58(h).

Par. 2. A new §1.58-9T is added immediately following §1.58-8 to read as set forth below:

§1.58-9T Application of the tax benefit rule to the minimum tax for taxable years beginning prior to 1987 (Temporary).

(a) *In general.* For purposes of computing the minimum tax liability imposed under section 56 of the Internal Revenue Code of 1954 (Code), taxpayers are not liable for minimum tax on tax preference items from which no current tax benefit is derived because available credits would have reduced or eliminated the taxpayer's regular tax liability if the preference items had not been allowed in computing taxable income. However, any credits that, because of such preference items, are not needed for use against regular tax ("freed-up credits"), are required to be reduced under the rules of paragraph (c) of this section. For purposes of this section, a taxpayer's regular tax is the Federal income tax liability under subchapter A of Chapter 1 of the Code, not including the minimum tax imposed by section 56. Unless otherwise noted, all references to Internal Revenue Code sections refer to the Internal Revenue Code of 1954.

(b) *Effective date*. The rules of this section are effective for tax preference items which arise in taxable years beginning after December 31, 1976, and before January 1, 1987.

(c) *Adjustment of carryback and carryover credits*—(1) *In general*. A taxpayer's freed-up credits must be reduced by the additional minimum tax that would have been imposed if a current tax benefit had been derived from preference items that did not actually produce a current tax benefit. The amount of this reduction shall be calculated in the following manner—

(i) Determine the amount of freed-up credits,

(ii) Determine the amount of tax preference items (if any) for which a current tax benefit was derived for the taxable year ("beneficial preferences"), and the amount of preferences for which no current tax benefit was derived for the taxable year ("non-beneficial preferences"), and

(iii) Determine the portion of the total minimum tax on all tax preference items for the taxable year that is attributable to the non-beneficial preferences.

The freed-up credits are then reduced by an amount equal to such portion of the minimum tax.

(2) *Determine freed-up credits*. (i) To determine the freed-up credits for the taxable year, first determine the regular tax that would have been imposed if preference items had not been allowed in computing taxable income ("non-preference regular tax"). Second, compute the amount of credits that would have been allowed to reduce the non-preference regular tax. Third, subtract the amount of credits that were actually allowed to reduce the regular tax for such taxable year from the amount of credits that would have been allowed to reduce non-preference regular tax. The result is the amount of the freed-up credits.

(ii) The following examples illustrate the determination of freed-up credits:

Example (1). In 1982 Corporation B has $17.6 million dollars in foreign tax credits available for the taxable year. Assume that the foreign tax credits being used in this example do not exceed the limitation under section 904. If preference items were not allowed in determining regular tax, the regular tax would have been $10.2 million and foreign tax credits used to reduce regular tax would have been $10.2 million. Because of tax preference items, however, B's regular tax is $6.3 million and the amount of foreign tax credits actually used to reduce the regular tax is $6.3 million. The amount of freed-up foreign tax credits is $3.9 million ($10.2 million minus $6.3 million).

Example (2). Assume the same facts as in Example (1) except that Corporation B has $7.2 million dollars in foreign tax credits. If preference items were not allowed, the non-preference regular tax would have been $10.2 million and the foreign tax credits used to reduce the regular tax would have been $7.2 million. Because of tax preference items, B's regular tax, however, is $6.3 million, and the foreign tax credits actually used to reduce the regular tax is $6.3 million. The amount of freed-up foreign tax credits is $.9 million ($7.2 million minus $6.3 million).

Example (3). In 1983 Corporation C has $500,000 of investment tax credits available. If preference items were not allowed, non-preference regular tax would have been $690,000 and all $500,000 of investment tax credits would have been allowed to reduce non-preference regular tax liability. Because of tax preferences, however, C's actual regular tax is $439,750. As a result of the limitation under section 38(c), only $377,537 of the investment tax credits are allowed to reduce the actual regular tax. Freed-up credits are $122,463 ($500,000 minus $377,537).

(3) *Determination of beneficial and non-beneficial preferences*—(i) *In general*. The amount of tax preferences from which a current tax benefit is derived ("beneficial preferences") and the amount from which no current tax benefit is derived ("non-beneficial preferences") for the taxable year are determined as set forth below.

(ii) *Regular tax liability is the same regardless of preference items*. (A) If the taxpayer's tax liability (after credits) would be the same regardless of whether preference items were allowed to reduce taxable income, then all of the taxpayer's preference items are non-beneficial preference items.

(B) The following example illustrates the rule set forth in paragraph (c)(3)(ii)-(A) of this section. This example assumes that foreign tax credits being used do not exceed the limitation under section 904.

Example (4). Assume the facts in Example (1). All of B's $17.6 million of credits are foreign tax credits. The total amount of B's tax preference items is $8.4 million. B's non-preference regular tax is $10.2 million and, reduced by foreign tax credits, is zero. B's actual regular tax is $6.3 million, and, reduced by foreign tax credits, is zero. Since the amount of credits that would have been allowed to offset the non-preference regular tax would have reduced such tax to an amount ($0) equal to the actual regular tax liability ($0), B received a tax benefit from none of the $8.4 million of tax preferences and therefore all of these preferences are non-beneficial preferences.

(iii) *Regular tax liability differs because of preference items*. If tax liability (after credits) is less because preference items are allowed to reduce taxable income, then some of these preference items have provided a current tax benefit. In such cases, the amount of beneficial and non-beneficial preferences are determined as follows:

(A) *Non-beneficial preferences*. (*1*) The non-beneficial preferences are determined by converting the freed-up credits for such taxable year into an amount of taxable income. To make this conversion, freed-up credits are "grossed up" (*i.e.*, divided by the regular tax marginal rate at which such credits would have offset non-preference regular tax) to determine the amount of tax preferences that freed up such credits. For purposes of this calculation, the 5-percent addition to tax provided by section 11 (b) shall be included in determining the marginal rate. The aggregate of these grossed-up amounts is the total amount of non-beneficial preferences for the taxable year.

(*2*) The freed-up credits shall be grossed up beginning at the lowest marginal tax rate that would have applied to the additional taxable income arising if tax preferences were not allowed. Thus, the marginal tax rates at which the actual regular tax was imposed shall not be taken into account in grossing up freed-up credits, even if all or a portion of such tax is not offset by credits because of limitations on the allowance of such credits (such as the section 904 limit on foreign tax credits or the section 38 (c) limit on investment tax credits). For example, if the first dollar of additional non-preference taxable income would have been taxed at a rate of 46 percent, then freed-up credits shall be grossed up at 46 percent, even if regular tax imposed on taxable income at a 40-percent rate was not offset by credits because of the limitations on investment tax credits under section 38 (c). *See* Examples (12) and (13) in paragraph (d) of this section for illustrations of the gross up of freed-up credits in cases where limitations apply to the amount of credit allowed to offset actual regular tax.

(*3*) The following example illustrates the gross up of freed-up credits to determine non-beneficial preferences. This example assumes that foreign tax credits being used do not exceed the limitation under section 904.

Example (5). Corporation L has the following items for the 1985 taxable year:

Actual taxable income		$90,000
Regular tax		21,750
Available credits:		
Foreign tax credits for 1985	$15,000	
Foreign tax credits carried forward from 1984	25,000	
Investment tax credits carried forward from 1984	20,000	
		$60,000
Credit allowed to offset actual regular tax:		
Foreign tax credits for 1985	$15,000	
Foreign tax credits carried forward from 1984	6,750	
		$21,750
Actual regular tax liability		-0-
Preferences		110,000
Taxable income for 1985 determined as though preferences were not allowed		200,000
Non-preference regular tax		71,750
Credits allowed to offset non-preference regular tax:		
Foreign tax credits for 1985	$15,000	
Foreign tax credits carried forward from 1984	25,000	
Investment tax credits carried forward from 1984	20,000	
		$60,000
Non-preference regular tax liability		11,750

The freed-up credits for 1985 are $38,250 ($60,000 minus $21,750).

The non-preference regular tax of $71,750 is determined by applying the regular tax rates set forth in section 11 (b) to the $200,000 of taxable income as follows:

Taxable Income	*Rate*	*Tax*
$ 25,000	× .15 =	$ 3,750
25,000	× .18 =	4,500
25,000	× .30 =	7,500
25,000	× 40 =	10,000
100,000	× 46 =	46,000
$200,000		$71,750

Thus, for purposes of determining the non-beneficial preferences, freed-up credits are grossed up as follows:

The credits allowed against the regular tax and the freed-up credits are treated as offsetting non-preference regular tax in the same order as such credits would have been allowed to offset such tax, beginning at the lowest marginal tax rate. The freed-up credits are grossed up beginning at the lowest marginal tax rate at which additional taxable income would have been taxed if preferences were not allowed. Thus, in this example freed-up credits are grossed up beginning at 40 percent, and the amount of L's non-beneficial preferences for the 1985 taxable year is $84,456.

Type	*Credit allowed against regular tax*	*Freed-up Credit*	*Divided by tax Rate*		*Non-beneficial preferences*
FTC (85)	$ 3,750	—	.15		—
"	4,500	—	.18		—
"	6,750	—	.30		—
FTC (84)	750	—	.30		—
"	6,000	—	40		—
"	—	$ 4,000	40	=	$10,000
"	—	14,250	.46	=	30,978
ITC (84)	—	20,000	.46	=	43,478
	$21,750	$38,250			$84,456

Foreign tax credit = FTC (year)
Investment tax credit = ITC (year)

(B) *Beneficial preferences.* The amount of beneficial preferences for the taxable year is computed by subtracting the non-beneficial preferences for the taxable year from the total amount of tax preferences for such year. This rule may be illustrated by the following example:

Example (6). Assume the same facts as in Example (5). The amount of L's beneficial preferences for 1985 is $25,544 (total preferences of $110,000, minus non-beneficial preferences of $84,456).

(4) *Determine the minimum tax attributable to non-beneficial preferences.* (i) The portion of the minimum tax that is attributable to the non-beneficial preferences is computed as follows—

(A) Compute the minimum tax that would be imposed on all tax preference items for the taxable year if all of the preferences had produced a tax benefit.

(B) Compute the minimum tax that would be imposed on the beneficial preferences if these were the taxpayer's only preferences. (This is the amount of minimum tax actually imposed for the taxable year.)

(C) Subtract the amount computed in (B) from the amount computed in (A). The result is the minimum tax attributable to the non-beneficial preferences for the taxable year. This amount is sometimes referred to hereinafter as the "credit reduction amount".

(ii) The following examples illustrate determination of the credit reduction amount.

Example (7). Assume the facts in Example (4) above. Since B has $8.4 million in total preference items and no regular tax liability, the minimum tax on that amount would be $1,258,500 (($8.4 million minus $10,000) multiplied by .15). None of the preference items is a beneficial preference. Thus, the minimum tax attributable to non-beneficial preferences (and therefore, the credit reduction amount) is $1,258,500.

Example (8). Assume the facts in Example (5) above. The minimum tax on L's total preference items of $110,000 would be $15,000 (($110,000 minus $10,000) multiplied by .15). Since the amount of non-beneficial preferences is $84,456, the amount of L's beneficial preferences for 1985 is $25,544 ($110,000 minus $84,456). The minimum tax on L's beneficial preferences of $25,544 is $2,332 (($25,544 minus $10,000) multiplied by .15). (This is the amount of minimum tax imposed for 1985.) The minimum tax attributable to non-beneficial preference items (and therefore, the credit reduction amount) is $12,668 ($15,000 minus $2,332).

(5) *Reduction of freed-up credits*—(i) *In general.* The freed-up credits are reduced by an amount equal to the minimum tax attributable to the non-beneficial preferences ("credit reduction amount"). If the taxpayer has only one type of freed-up credit (*i.e.*, only investment tax credit or only foreign tax credit) and that credit was earned in only one year (the current year or a carryback or carryforward year), then the credit is reduced by the credit reduction amount. This rule may illustrated by the following example:

Example (9). Assume the facts in Example (7) above. Further assume that all of the $3.9 million of freed-up credits are foreign tax credits that arise in the same year and that otherwise would be carried forward. Since the entire amount of B's tax preferences are non-beneficial preferences, the minimum tax of $1,258,500 that would be imposed on the total tax preferences is the credit reduction amount. Thus, B's $3.9 million of freed-up foreign tax credits is reduced by $1,258,500. The foreign tax credit carryforward from 1982 is $10,041,500. This amount is the sum of $2,641,500 (the freed-up foreign tax credit of $3,900,000, reduced by the credit reduction amount of $1,258,500), plus $7.4 million (the foreign tax credit that would have been carried over even if tax preference items had not been allowed).

However, if the taxpayer has more than one type of freed-up credit, or the taxpayer's freed-up credits are from more than one taxable year, then the credit reduction amount must be allocated under the exact method described in paragraph (c)(5)(ii) of this section, unless an election is made under paragraph (c)(5)(iii) of this section to use the simplified method.

(ii) *Exact method*. For each type of freed-up credits and for each taxable year within such type from which any such credits are earned, the amount of credit reduction shall be equal to the amount of minimum tax attributable to the non-beneficial preferences that freed up the credits for that type and taxable year. The amount of the credit reduction is computed by multiplying the amount of non-beneficial preferences which freed up credits for each type and taxable year by the minimum tax rate. For purposes of this computation, if the amount of the taxpayer's minimum tax exemption for the taxable year (as determined under section 56(a)) exceeds the amount of the taxpayer's beneficial preferences, such excess exemption shall reduce the amount of non-beneficial preferences to be multiplied by the minimum tax rate. The non-beneficial preferences shall be reduced by any such excess exemption in the same order in which the credits that were freed up by such preferences would have been allowed to offset tax. Thus, for example, any excess exemption shall first reduce non-beneficial preferences that freed up foreign tax credits. Any such excess exemption remaining after reducing non-beneficial preferences that freed up foreign tax credits to zero would then be used to reduce the non-beneficial preferences that freed up investment tax credits.

(iii) *Simplified method*—(A) *Description of method*. In lieu of the exact credit reduction method described in paragraph (c)(5)(ii) of this section, taxpayers may elect to use the simplified credit reduction method. Under the simplified credit reduction method, the amount of freed-up credits for each type of credit and for each taxable year in which such credit is earned is multiplied by a fraction. The numerator of the fraction is the total credit reduction amount as determined in paragraph (c)(4)(i)(C) of this section. The denominator is the total amount of freed-up credits as determined in paragraph (c)(2)(i) of this section. The product of this multiplication is the amount of credit reduction for each type and taxable year of freed-up credit.

(B) *Election to use simplified method*. A taxpayer may elect to use the simplified credit reduction method for all taxable years to which this section applies by attaching a statement indicating such an election on the amended Federal income tax return or returns applying the adjustments of this section. If an election is made for any taxable year, it must be made for all taxable years. Once an election has been made, it can be revoked only with the permission of the Commissioner. Similarly, once returns have been filed applying the exact credit reduction method, an election to apply the simplified method can be made only with the consent of the Commissioner.

(iv) *Effect of credit reduction on credit carrybacks and carryforwards*. Under both the exact method and the simplified method, the determination of credit carrybacks and carryforwards to other taxable years is made on the basis of freed-up credits remaining after such reduction, plus any other unused credits. Thus, an amount of freed-up credits that is equal to the credit reduction amount shall not be allowed to reduce tax liability in any taxable year. Such disallowance is without regard to whether such credits would otherwise be allowed as a carryback or carryforward. No minimum tax liability shall be due with respect to the non-beneficial preferences for any taxable year.

(v) *Examples*. The following examples illustrate reduction of freed-up credits.

Example (10). Assume the facts in Example (8) above. The credit reduction amount for 1985 is $12,668, the amount of minimum tax attributable to L's non-beneficial preferences. This amount is allocated to reduce each category of freed-up credit and to each year from which such credit is carried over. L's $38,250 of freed-up credits consists of $18,250 of foreign tax credits carried forward from 1984, which were freed up by $40,978 of non-beneficial preferences, and $20,000 of investment tax credits carried forward from 1984, which were freed up by $43,478 of non-beneficial preferences.

(a) The apportionment of this credit reduction amount to each category of freed-up credit and each taxable year from which such credits are carried over is determined as follows under the exact credit reduction method:

(i) Foreign tax credits carried forward from 1984:

Non-beneficial preferences that freed up 1984 FTC	× .15 =	Credit reduction of 1984 FTC
$40,978	× .15 =	$6,146

(ii) Investment tax credits carried forward from 1984:

Non-beneficial preferences that freed up 1984 ITC	× .15 =	Credit reduction of 1984 ITC
$43,478	× .15 =	$6,522

Thus, the foreign tax credits from 1984 that are carried forward to 1986 are $12,104 ($18,250 minus $6,146). The investment tax credits from 1984 that are carried forward to 1986 are $13,478 ($20,000 minus $6,522).

(b) The reduction of the freed-up credit under the simplified credit reduction method is as follows:

(i) Foreign tax credit carried forward from 1984:

$$\text{Freed-up foreign tax credits from 1984} \times \frac{\text{Credit reduction amount}}{\text{Total freed-up credit}}$$
$$= \text{Credit reduction allocated to freed-up foreign tax credits carried forward from 1984}$$

$$\$18{,}250 \times \frac{\$12{,}668}{\$38{,}250} = \$6{,}044$$

(ii) Investment tax credits carried forward from 1984:

$$\text{Freed-up investment tax credits from 1984} \times \frac{\text{Credit reduction amount}}{\text{Total freed-up credit}}$$
$$= \text{Credit reduction allocated to freed-up investment tax credit carried forward from 1984}$$

$$\$20{,}000 \times \frac{\$12{,}668}{\$38{,}250} = \$6{,}624$$

Thus, under the simplified credit reduction method, L has $12,206 of foreign tax credits for 1984 ($18,250 minus $6,044) that are carried forward to 1986, and $13,376 of investment tax credits for 1984 ($20,000 minus $6,624) that are carried forward to 1986.

Example (11). Assume the same facts as in Example (10), except that the foreign tax credits available for use in 1985 include $10,750 in credits carried forward from 1980 and $14,250 in credits carried forward from 1984, rather than $25,000 carried forward from 1984. Thus, $4,000 of the freed-up foreign tax credit is carried over from 1980. The other $14,250 of freed-up foreign tax credit is carried over from 1984. The non-beneficial preferences that freed up the 1980 foreign tax credit are $10,000. The non-beneficial preferences that freed up the 1984 foreign tax credit are $30,978. Under the exact credit reduction method, the credit reduction amounts for each of these credits are determined as follows:

(a) Foreign tax credit carried forward from 1980:

$10,000 × .15 = $1,500

(b) Foreign tax credit carried forward from 1984:

$30,978 × .15 = $4,646

Thus, the foreign tax credit from 1984 that is carried forward to 1986 is $9,604 ($14,250 minus $4,646). Since the foreign tax credit from 1980 expires after 1985, none of that credit is carried forward to 1986.

(d) *Examples*. The following examples are comprehensive illustrations of the adjustments described in paragraph (c) of this section:

Example (12). This example illustrates the operation of the credit reduction adjustment when the amount of foreign tax credit allowed is subject to the overall limitation under section 904. For purposes of this example, assume that Corporation X has the following items for the 1984 taxable year:

Taxable income (determined as though preferences were not allowed)	$ 140,000
From foreign sources	70,000
Foreign tax credits from 1984	5,000
Foreign tax credits from 1983	7,000
Actual taxable income	50,000
From foreign sources	25,000

The credit reduction adjustment and minimum tax liability for the taxable year are determined as follows:

1. Taxable income (determined as though preferences were not allowed) $140,000
2. Tax preferences for 1984. 90,000
3. Taxable income (line 1 minus line 2) . . . 50,000
4. Regular tax on line 3 amount (actual regular tax) before credits:

   25,000 × .15 = $3,750
   25,000 × .18 = 4,500 8,250
5. Foreign tax credits allowed against regular tax (limited to 50% of actual regular tax under sec. 904) — 1984 foreign tax credits 4,125
6. Regular tax after credits (line 4 minus line 5) 4,125
7. Regular tax on line 1 amount (non-preference regular tax) before credits:

   $25,000 × .15 = $ 3,750
   25,000 × .18 = 4,500
   25,000 × .3 = 7,500
   25,000 × 4 = 10,000
   40,000 × 46 = 18,400. 44,150
8. Foreign tax credits allowed against non-preference regular tax:

   5,000 (1984 foreign tax credits)
   7,000 (1983 foreign tax credits) 12,000
   (the allowed credits do not exceed the section 904 limitation of $22,075)
9. Non-preference regular tax after credits (line 7 minus line 8) 32,150
10. Freed-up credits (line 8 minus line 5):

    1984 foreign tax credits $5,000
    (4,125)
    $875
    1983 foreign tax credits $7,000
    - 0 -
    7,000
    Total $7,875
11. Non-beneficial preferences are computed as set forth in the table below. Under this computation, non-beneficial preferences are considered to free up credits that would have offset non-preference regular tax beginning at the lowest tax rates at which income that was offset by tax preferences otherwise would have been subject to regular tax. In this case, income that was offset by tax preferences would have been taxed beginning at the 30 percent marginal tax rate.

Type	*Freed-up Credit*	*Divided by tax Rate*	*Non-beneficial preferences*
FTC (84)	$ 875	.30	$ 2,917
FTC (83)	6,625	.30	22,083
"	375	.40	938
	$7,875		$25,938

Total non-beneficial preferences 25,938

12. Beneficial preferences (line 2 minus line 11) 64,062
13. Minimum tax on total tax preferences ((line 2 minus the greater of line 6 or $10,000) × .15). 12,000
14. Minimum tax on beneficial preferences ((line 12 minus the greater of line 6 or $10,000) × .15) 8,109
15. Credit reduction amount (line 13 minus line 14) 3,891
16. Reduction of freed-up credits under the exact method (subtotals of line 11 multiplied by .15):

    (a) 1984 foreign tax credits:
    $2,917 × .15 = $438
    (b) 1983 foreign tax credits:
    ($22,083 + $938) × .15 = $3,453
    (c) Total credit reduction. 3,891

Note: If X had elected to use the simplified credit reduction method, the amount of credit reduction would be determined by multiplying the amount of freed-up credit in each category and taxable year by the following ratio:

$$\frac{\text{credit reduction amount}}{\text{total freed-up credit}} = \frac{\$3,891}{\$7,875} = .494$$

Under this method, the 1984 freed-up foreign tax credits would be reduced by $433 ($875 × .494) and the 1983 freed-up foreign tax credits would be reduced by $3,458 ($7,000 × 494).

17. Freed-up credits after reduction under the exact method (line 10 subtotal minus line 16 subtotals):

    (a) 1984 foreign tax credits (875 minus 438) 437
    (b) 1983 foreign tax credits (7,000 minus 3,453) 3,547

Thus, assuming that Corporation X did not elect to use the simplified method, Corporation X will carryover $437 of 1984 foreign tax credits to 1985 and $3,547 of 1983 foreign tax credits to 1985.

Had Corporation X elected to use the simplified method, freed-up credits after reduction would be as follows:

(a) 1984 foreign tax credits (875 minus 433). . 442
(b) 1983 foreign tax credits (7,000 minus 3,458) 3,542

Example (13). Corporation X has the following items for its 1985 taxable year:

Taxable income (determined as though preferences were not allowed)	$1,500,000
1984 investment tax credits	400,000
1985 investment tax credits	100,000
Actual taxable income	1,000,000

The credit reduction and minimum tax of X for 1985 are determined as follows:

1. Taxable income determined as though preferences were not allowed $1,500,000
2. Tax preferences for 1985 500,000
3. Taxable income (line 1 minus line 2) 1,000,000
4. Regular tax on line 3 amount (actual regular tax) before credits:

   $25,000 × .15 = $ 3,750
   25,000 × .18 = 4,500
   25,000 × .30 = 7,500
   25,000 × .40 = 10,000
   900,000 × .46 = 414,000 439,750
5. Investment tax credits allowed (limited under section 38 (c) to $25,000 of net tax liability, plus 85 percent of net tax liability in excess of $25,000 377,537
6. Regular tax after credits (line 4 minus line 5) 62,212
7. Regular tax on line 1 amount (non-preference regular tax) before credits:

   $ 25,000 × .15 = $ 3,750
   25,000 × .18 = 4,500
   25,000 × .30 = 7,500
   25,000 × .40 = 10,000
   900,000 × .46 = 414,000
   405,000 × .51 = 206,550
   95,000 × .46 = 43,700. 690,000
8. Investment tax credits allowed against non-preference regular tax 500,000
9. Non-preference regular tax after credits (line 7 minus line 8) 190,000
10. Freed-up credits (line 8 minus line 5):

    1984 investment tax credit $400,000
    (377,537)
    22,463
    1985 investment tax credit $100,000
    0
    100,000
    Total $122,463
11. Non-beneficial preferences are computed as set forth in the table below. Under this computation, non-beneficial preferences are considered to free up credits that would have offset non-preference regular tax beginning at the lowest tax rates at which income that was offset by tax preferences otherwise would have been subject to regular tax. In this case, income that was offset by tax preferences would have been taxed beginning at the 51 percent marginal tax rate. Although some of the income offset by preferences would be taxed at the 46 percent marginal rate (because taxable income in excess of $1,405,000 is not subject to the 5 percent addition to tax on taxable income in excess of $1 million), the 51 percent marginal rate is taken into account first.

Type	*Freed-up Credit*	*Divided by tax Rate*	*Non-beneficial preferences*
ITC (84)	$22,463	.51	$44,045
ITC (85)	100,000	.51	196,078
	$122,463		$240,123

Total non-beneficial preferences 240,123

12. Beneficial preferences (line 2 minus line 11) 259,877
13. Minimum tax on total tax preferences ((line 2 minus the greater of line 6 or $10,000) × .15). 65,668
14. Minimum tax on beneficial preferences ((line 12 minus the greater of line 6 or $10,000) × .15) 29,650

15. Credit reduction amount (line 13 minus line 14) 36,018
16. Reduction of freed-up credits under the exact method (subtotals of line 11 multiplied by .15):
   (a) 1984 investment tax credits: $44,045 × .15 = $6,607
   (b) 1985 investment tax credits: $196,078 × .15 = $29,411
   (c) Total credit reduction. 36,018
17. Freed-up credits after reduction (assuming that Corporation X does not elect the simplified method):
   (a) 1984 investment credit ($22,463 minus $6,607) 15,856
   (b) 1985 investment credit ($100,000 minus $29,411). 70,589

(e) *Miscellaneous rules*—(1) *Investment Credit Recapture*. If during any taxable year, property to which section 47 applies is disposed of, then for purposes of determining any increase in tax under section 47 for such year, the amount of any reduction under this section of freed-up section 38 credit which was earned in the year the property was placed in service shall be treated as a credit that was allowed in a prior taxable year.

Example (14). Assume corporation D places property in service in 1983 that generates investment tax credits of $10,000. D earned no other investment tax credits in 1983. None of the investment tax credits are used to reduce tax liability in 1983 or any prior years. In 1984, D uses $1,000 of this credit to reduce regular tax liability. In addition, D has items of tax preference in 1984. However, under section 58 (h), D is not liable for minimum tax on any of these preference items because none of these preference items produced a tax benefit in 1984. As a result, an adjustment is made under the provisions of §1.58-9T and the investment tax credit carryforward from 1983 is reduced by $4,000. Thus, D has an investment tax credit carryforward of $5,000 that is attributable to the property placed in service in 1983. In 1986, the property is disposed of and the investment tax credits earned in 1983 are recomputed as required under section 47. This recomputation results in a reduction of $6,000 of the investment tax credits earned in 1983. D must now adjust its 1983 investment tax credit carryforward under section 47(a)(6) by reducing this carryforward to zero. In addition, D has an additional tax liability of $1,000 for 1986.

(2) *Period of limitations; adjustments to tax liability*. (i) The adjustments described in this section shall, in general, apply for purposes of assessing deficiencies or claiming refunds of tax for any taxable year for which the tax liability is affected by the adjustments of this section, provided that the period of limitations under section 6501 has not expired for such taxable year. Therefore, these adjustments generally apply for purposes of assessing deficiencies and refunding any overpayment of tax for all years for which the period of limitations has not expired regardless of whether the period of limitations has expired for the taxable year in which the non-beneficial preferences arose.

(ii) However, the adjustments of this section do not apply to reduce otherwise allowable credits that were freed up by such non-beneficial preferences where:

(A) The taxpayer paid minimum tax on all tax preference items arising in the taxable year in which the non-beneficial preferences arose;

(B) The taxpayer has not made a claim for a credit or refund for such minimum tax; and

(C) The period of limitations for claiming a credit or refund under section 6511 has expired for such taxable year.

(iii) Further, if—

(A) the taxpayer never paid minimum tax attributable to non-beneficial preferences,

(B) credits that were freed up by such preferences were used to reduce tax liability for a taxable year for which the period of limitations has expired, and

(C) credits so used exceed the amount of credits that would have been available if the credit reduction required under this section with respect to such preferences had been made,

then the taxpayer shall be liable for the minimum tax equal to the amount of credits so used, provided the period of limitations has not expired for the taxable year in which preferences arose.

(3) *Claims for credit or refund*. A taxpayer may claim a credit or refund of minimum tax that was paid on non-beneficial preferences. However, such a claim for a credit or refund shall be disallowed to the extent that the taxpayer has reduced tax liability in a taxable year for which the period of limitations has expired by using freed-up credits in excess of the amount that would have been available if the credit reduction required under this section had been made. Such claim must be made by filing an amended return for the taxable year for which such minimum tax was paid. Further, if a claim for credit or refund is filed, amended returns must also be filed for any taxable year for which tax liability would be affected as a result of the reduction, under this section, of credits freed up by such non-beneficial preferences. See section 6511 and the regulations thereunder regarding the period of limitations for claiming a credit or refund.

(4) *Carryforwards of foreign tax credit to taxable years after 1986*. In the case of foreign tax credit carryforwards to taxable years beginning after December 31, 1986, reductions in such credits required under this section shall apply for purposes of computing the alternative minimum tax foreign tax credit under section 59(a) of the Internal Revenue Code of 1986 as well as for purposes of computing the foreign tax credit for regular tax purposes.

(5) *Credit carrybacks*. If credit carrybacks increase the amount of credits for a taxable year, the adjustments described in this section shall be recomputed taking into account the additional credits. This rule may be illustrated by the following examples:

Example (15). Assume that in 1981, corporation D has actual taxable income of $72,500 and regular tax before credits of $15,000. Also assume that, in computing actual regular taxable income, D made use of $36,739 of tax preference items, so that D's taxable income determined as though preference were not allowed would be $109,239. D's non-preference regular tax before credits is $30,000. D earned $25,000 of foreign tax credits in 1981, none of which exceed the limitation under section 904 determined using either actual regular taxable income or the non-preference taxable income. These credits reduce actual regular tax to zero ($0) and would have reduced non-preference regular tax to $5,000 ($30,000 minus $25,000). Thus, D has freed-up foreign tax credits from 1981 of $10,000 ($25,000 minus $15,000). Pursuant to the adjustments required under this section, D determines that its credit reduction amount is $3,843 and reduces its freed-up credit (and its credit carryover) from 1981 to $6,157 ($10,000 minus $3,843). D also pays minimum tax of $167 on $11,114 of beneficial preferences (($11,114 minus $10,000) multiplied by .15).

In 1982, D earns additional foreign tax credits. After application of the foreign tax credit carryback rules, D would have $5,000 of 1982 foreign tax credits available for use in 1981. D must recalculate the adjustments required under this section by treating $5,000 of foreign tax credit from 1982 as carried back and (assuming that these credits do not exceed the limitation under section 904) used to reduce non-preference regular tax liability in 1981 to zero ($0). That is, $5,000 of the foreign tax credits earned in 1982 are treated as credits freed up because of D's tax preference items in 1981. Pursuant to the rules set forth herein, D must take into account the foreign tax credits from both 1981 and 1982 in determining to what extent a tax benefit was derived from the preference items used to determine actual regular tax liability in 1981 and in computing the credit reduction amount. When the $5,000 of foreign tax credits from 1982 are considered, all preferences become non-beneficial preferences, and the credit reduction amount is $4,010. Assuming that D elects the simplified method, the 1981 freed-up credits and the 1982 freed-up credits will each be reduced by the following percentage:

$$\frac{4{,}010 \text{ (credit reduction amount)}}{15{,}000 \text{ (total freed up credits)}} = .2673$$

The 1981 freed-up foreign tax credits of $10,000 are thus reduced by $2,673 ($10,000 multiplied by .2673), to $7,327 and the 1982 freed-up foreign tax credits of $5,000 are reduced by $1,334 ($5,000 multiplied by .2673) to $3,666. D also files a claim for credit or refund of the $167 of minimum tax paid in 1981.

Example (16). In 1985, corporation E's non-preference regular taxable income is $25,000. E has no available credits. It pays zero in regular tax, however, because of $25,000 in preference items. E paid $2,250 of minimum tax on these preferences (($25,000 minus $10,000) multiplied by .15). In 1986, E has additional investment tax credits. After application of the investment tax credit carryback rules, E would have $1,000 investment tax credit from 1986 available for use in 1985. E must recompute the adjustments required under this section by treating $1,000 of these 1986 investment tax credits as carried back and used to reduce non-preference regular tax liability for 1985. Pursuant to the rules of this section, all of these $1,000 of credits are freed-up credits. Non-beneficial preferences are $6,667 ($1,000 grossed up at a 15 percent regular tax rate). Beneficial preferences are $18,333 ($25,000 minus $6,667). Minimum tax on all preferences would be $2,250 (($25,000 minus $10,000) multiplied by .15); minimum tax on beneficial preferences would be $1,250 (($18,333 minus $10,000) multiplied by .15) Minimum tax attributable to the non-beneficial preferences is thus $1,000 ($2,250 minus $1,250), which is the credit reduction amount. E thus reduces the $1,000 of credits carried back to 1985 to zero. Under the rules of this section, the amount of minimum tax due for 1985 is redetermined. It is equal to the minimum tax on beneficial preferences, which, as described above, is $1,250. Because E paid minimum tax of $2,250 in 1985, E files a claim for credit or refund for $1,000 of the minimum tax paid in 1985.

(f) *Treatment of net operating losses.* [Reserved]

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 3. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805

Par. 4. Section 602.101(c) is amended by adding in the appropriate place in the table:

" §1.58-9T(c)(5)(iii)(B) 1545-1093."

" §1.58-9T(e)(3). . . . . . .1545-1093."

There is need for immediate guidance with the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitations of subsection (d) of that section.

Michael J. Murphy,
Acting Commissioner of Internal Revenue.

Approved March 16, 1989.

Dennis E. Ross,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on May 4, 1989, 8:45 a.m., and published in the issue of the Federal Register for May 5, 1989, 54 F.R. 19363)

Part VII.—Environmental Tax

Section 59A.—Environmental Tax

(Also Part I, Section 1363.)

Section 59A environmental tax and S corporations. An S corporation is not subject to the section 59A environmental tax because under section 1361 of the Code an S corporation is not subject to the taxes imposed by Chapter 1 of the Code and section 59A is a Chapter 1 tax.

Rev. Rul. 89-82

ISSUE

Is an S corporation subject to the environmental tax imposed by section 59A of the Internal Revenue Code?

FACTS

X is an S corporation as defined under section 1361 of the Internal Revenue Code.

LAW AND ANALYSIS

Section 59A(a) of the Code provides that in the case of a corporation there is imposed a tax equal to 0.12 percent of the excess of the corporation's modified alternative minimum taxable income (MAMTI) for the taxable year over $2 million.

Under section 59A(b), MAMTI is defined to mean the alternative minimum taxable income (AMTI) (as defined in section 55(b)(2)), but determined without regard to the alternative tax net operating loss deduction (as defined in section 56(d)), and the deduction allowed under section 164(a)(5) (and the last sentence of section 56(f)(2)(B)). Pursuant to section 59A(e), this tax is applicable to taxable years beginning after December 31, 1986, and before January 1, 1992, but is subject to earlier termination under section 4611 where applicable.

Under section 1361(a), an S corporation is a small business corporation, as that term is defined under section 1361(b) of the Code, for which an election under section 1362(a) is in effect. Section 1363(a) provides that, except as otherwise provided in Subchapter S, an S corporation is not subject to the taxes imposed by Chapter 1 of the Code. The environmental tax imposed on corporations by section 59A is a tax imposed by Chapter 1 of the Code and no provision of Subchapter S provides that an S corporation is subject to the environmental tax. Therefore, an S corporation is not subject to the section 59A tax.

HOLDING

An S corporation is not subject to the environmental tax imposed by section 59A of the Code.

Subchapter B.—Computation of Taxable Income

Part I.—Deinition of Gross Income, Adjusted Gross Income, Taxable Income, etc.

Section 67.—2-Percent Floor on Miscellaneous Itemized Deductions

If a taxpayer incurs expenses to secure a ruling from the Service on a non-business tax issue and deducts those expenses under section 212 of the Code, are those expenses considered miscellaneous itemized deductions subject to the 2-percent floor provided by section 67. See Rev. Rul. 89-68, page 82.

Part III.—Items Specifically Excluded from Gross Income

Section 101.—Certain Death Benefits

26 CFR 1.101-1: Exclusion from gross income of proceeds of life insurance contracts payable by reason of death.

Whether the Service will rule as to whether proceeds of "self-insured" life insurance and survivor benefit plans established through a trust qualified under section 501(c)(9) of the Code are excludable from the beneficiary's gross income as amounts paid by reason of the death of the insured under section 101(a). See Rev. Proc. 89-36, page 919.

Section 103.—Interest on State and Local Bonds

26 CFR 1.103-1: Interest upon obligations of a State, Territory, etc.

Average area purchase price safe harbor limitations for Guam and Puerto Rico are added to the list in Rev. Proc. 88-48, 1988-2 C.B. 635. See Rev. Proc. 89-27, page 892.

26 CFR 1.103-1. Interest upon obligations of a State, Territory, etc.

The median gross income for the United States and the average purchase prices for the United States are set forth for use in computing the income limitation under section 143(f)(5) of the Code. See Rev. Proc. 89-32, page 904.

26 CFR 1.103-8: Interest on bonds to finance certain exempt facilities.

Guidance is provided for computing the income limits applicable to exempt facility bonds issued to provide for qualified residential rental projects. See Rev. Rul. 89-24, page 24.

26 CFR 1.103-14: Temporary investments, reserve funds, and refunding issues.

Rev. Proc. 89-3, page 761, this Bulletin, is modified regarding whether the Service will issue rulings that state or local governmental obligations are arbitrage bonds under former section 103(c)(2) of the Code if bond proceeds are invested at a materially higher yield beyond a temporary period. See Rev. Proc. 89-5, page 774.

Section 133.—Interest on Certain Loans Used to Acquire Employer Securities

26 CFR 1.133-1T: Questions and answers relating to interest on certain loans used to acquire employer securities.

Interest on certain loans used to acquire employer securities. A corporation's actions as an underwriter in the sale of notes evidencing a securities acquisition loan will not adversely affect the status, under section 133 of the Code, of interest received or accrued on such notes. A qualified lender will be entitled to the partial interest exclusion of section 133 without regard to whether each previous holder of the note was a qualified lender.

Rev. Rul. 89-76

ISSUES

1) Whether X corporation's actions as an underwriter in the sale of ESOP notes will adversely affect the status, under section 133 of the Internal Revenue Code, of interest on an ESOP note that is received or accrued by a "qualified lender" (as described in section 133(a)).

2) Whether a qualified lender will be entitled to the partial interest exclusion of section 133 with respect to interest received or accrued on a note evidencing a securities acquisition loan for the period that it holds the note without regard to whether each previous holder of the note was a qualified lender.

FACTS

X is a corporation whose activities consist of underwriting debt and equity securities and providing research and financial services to clients. *X* is not a qualified lender as described in section 133(a).

Corporation *Y* maintains an employee stock ownership plan (ESOP) that is a qualified plan under section 401(a) and satisfies the requirements of section 4975(e)(7). The ESOP will borrow money through the issuance of notes guaranteed by Corporation *Y* and will purchase employer securities (as defined in section 409(l)) with the borrowed funds.

X will act as the ESOP's underwriter in the sale of the notes guaranteed by Corporation *Y*. *X* will underwrite the notes on either a "best efforts" or "firm commitment" basis. In a "best efforts" underwriting, *X* arranges for the borrower (the ESOP trust) to sell the notes directly to investors. This is contrasted with a "firm commitment" underwriting in which the ESOP trust initially sells all the notes to *X* which then resells the notes to investors. If *X* cannot resell the ESOP notes, the ESOP trust has no obligation to repurchase the notes. (See Rev. Rul. 78-294, 1978-2 C.B. 141, for a further discussion of these underwriting techniques.) *X* will receive a percentage of the principal amount of the notes as commission.

X sells or arranges to sell the note evidencing the ESOP loan to *Z*, a qualified lender. *Z* subsequently sells the note to *R*, an underwriter who is not a qualified lender. *R*, in turn, sells the note to its client *W*, who is a qualified lender.

LAW AND ANALYSIS

Section 133(a) of the Code provides that fifty percent of the interest received or accrued with respect to a "securities acquisition loan" by (1) a bank (as defined in section 581); (2) an insurance company to which subchapter L applies; (3) a corporation actively engaged in the business of lending money; or (4) a regulated investment company (as defined in section 851) is excludable from gross income.

The actions of *X* as an underwriter (on either a best efforts or firm commitment basis) will not adversely affect the status, under section 133 of the Code, of interest on an ESOP note that is received or accrued by a qualified lender. However, if *X* receives or accrues any interest with respect to an ESOP note, the interest will not be excludable under section 133 because *X* is not a qualified lender.

Interest received or accrued by *Z* with respect to the notes purchased from *X* in either a best efforts or firm commitment underwriting would be eligible for the partial interest exclusion of section 133 because *Z* is a qualified lender.

If *X*, or another investor that purchased the ESOP note, sells the note evidencing the ESOP loan to a party that is not a qualified lender, the partial interest exclusion of section 133 will apply to interest received or accrued by a qualified lender who subsequently purchases the note regardless of whether all prior holders of the note were qualified lenders.

Therefore, if *Z* subsequently sells the note to *R*, and *R* then sells the note to *W*, the interest received or accrued by *W* is eligible for the partial interest exclusion of section 133 because *W* is a qualified lender.

HOLDINGS

(1) X corporation's actions as an underwriter (on either a best efforts or firm commitment basis) in the sale of notes evidencing a securities acquisition loan, will not adversely affect the status, under section 133 of the Code, of interest received or accrued by a qualified lender with respect to the ESOP notes. Question and Answer 3 of section 1.133-1T of the Temporary Income Tax Regulations will be modified in a manner consistent with the holding of this revenue ruling.

(2) A qualified lender will be entitled to the partial interest exclusion of section 133 with respect to interest received or accrued on a note evidencing a securities acquisition loan for the period that it holds the note without regard to whether each previous holder of the note was a qualified lender.

Part IV.—Tax Exemption Requirements for State and Local Bonds

Subpart A.—Private Activity Bonds

Section 142.—Exempt Facility Bond

(Also Sections 42, 103, 6652; 1.42-1T, 1.103-8.)

Exempt facility bonds; low-income housing credit. Guidance is provided for computing the income limits applicable to exempt facility bonds issued to provide for qualified residential rental projects under section 142 of the Code and to low-income housing credits under section 42.

Rev. Rul. 89-24

This revenue ruling provides the manner in which properly to compute the income limits applicable both to exempt facility bonds issued to provide for qualified residential rental projects under section 142 of the Internal Revenue Code and to low-income housing credits under section 42.

LAW

Section 1301 of the Tax Reform Act of 1986, 1986-3 (Vol. 1) C.B. 524 (the Act), revised the income limits applicable to exempt facility bonds issued to provide for multifamily residential rental projects. *Compare* section 142(d) and former section 103(b)(4)(A) of the Code.

In general, in order for interest on an exempt facility bond issued to provide for a multifamily residential rental project to be tax-exempt, the project must meet the income limit requirement of section 142(d)(1) of the Code. Under section 142(d)(1), a "qualified residential rental project" is defined to include only residential rental projects where, either (A) 20 percent or more of the residential units in the project are occupied by individuals whose income is 50 percent or less of the area median gross income (the 20-50 requirement), or (B) 40 percent or more of the residential units in the project are occupied by individuals whose income is 60 percent or less of the area median gross income (the 40-60 requirement), whichever is elected by the issuer of the bonds providing for such project.

Section 142(d)(4) of the Code provides that, in the case of a deep rent skewed project, 15 percent or more of the low-income units must be occupied by individuals whose income is 40 percent or less of the area median gross income.

Section 142(d)(2) of the Code provides that the income of individuals and the area median gross income shall be determined by the Secretary in a manner consistent with determinations of lower income families and area median gross income under section 8 of the United States Housing Act of 1937 or, if such program is terminated, under such program as in effect immediately before such termination. Determinations under the preceding sentence shall include adjustments for family size.

Section 252 of the Act enacted section 42 of the Code, which provides a new federal income tax credit that may be claimed by owners of residential rental projects providing low-income housing. Section 42(a) provides that the amount of the credit shall be based on an applicable percentage of the qualified basis of each qualified low-income building. Section 42(c)(2) defines the term "qualified low-income building" to mean, in part, any building that at all times during the compliance period with respect to such building is part of a qualified low-income housing project.

Section 42(g)(1) provides that the term "qualified low-income housing project" means any project for residential rental property if, either (A) 20 percent or more of the units in the project are both rent-restricted and occupied by individuals whose income is 50 percent or less of the area median gross income, or (B) 40 percent or more of the units in the project are both rent-restricted and occupied by individuals whose income is 60 percent or less of the area median gross income, whichever is elected by the taxpayer.

Section 42(g)(4) of the Code provides, in part, that paragraph (2) (other than subparagraph (A)) and paragraph (4) of section 142(d) shall apply for purposes of determining whether any project is a qualified low-income housing project and whether any unit is a low-income unit.

ANALYSIS AND HOLDING

The income limits applicable to qualified residential rental projects and to qualified low-income housing projects are required to be made in a manner consistent with determinations of lower income families under section 8 of the United States Housing Act of 1937. With respect to the 20-50 requirement of sections 142(d)(1)(A) and 42(g)(1)(A) of the Code, 20 percent or more of the applicable units must be occupied by individuals or families having incomes equal to or less than the income limit for a "very low-income" family of the same size. With respect to the 40-60 requirement of sections 142(d)(1)(B) and 42(g)(1)(B) , 40 percent of the applicable units must be occupied by individuals or families having incomes equal to 120 percent or less of the income limit for a very low-income family of the same size.

With respect to certain deep rent skewed projects, as described in section 142(d)(4), the determination of whether 15 percent of the low-income units are occupied by individuals having incomes equal to 40 percent or less of the area median gross income shall be made by determining whether 15 percent of such units are occupied by individuals or families having incomes equal to or less than 80 percent of the income limit for a very low-income family of the same size.

The income limits for very low-income families are computed and listed, according to family size, by the Department of Housing and Urban Development (HUD) for every Metropolitan Statistical Area, Primary Metropolitan Statistical Area, and nonmetropolitan county of the United States and Puerto Rico. HUD also releases income limits for the possessions of Guam and the Virgin Islands.

A list of income limits released by HUD may be relied upon until 30 days after the Internal Revenue Service publishes an announcement or notice in the Internal Revenue Bulletin indicating that HUD has released updated income limits.

Section 143.—Mortgage Revenue Bonds: Qualified Mortgage Bond and Qualified Veterans' Mortgage Bond

26 CFR 6a.103A-2: Qualified mortgage bond.

Average area purchase price safe harbor limitations for Guam and Puerto Rico are added to the list in Rev. Proc. 88-48, 1988-2 C.B. 635. See Rev. Proc. 89-27, page 892.

---

26 CFR 6a.103A-2: Qualified mortgage bond.

The median gross income for the United States and the average purchase prices for the United States are set forth for use in computing the income limitation under section 143(f)(5) of the Code. See Rev. Proc. 89-32, page 904.

Subpart B.—Requirements Applicable to all State and Local Bonds

---

Section 148.—Arbitrage

26 CFR 1.148-OT: Scope and effective date of restrictions on arbitrage (temporary).

T.D. 8252

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Parts 1 and 602

Arbitrage Restrictions on Tax-Exempt Bonds

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to arbitrage restrictions on tax-exempt bonds. In addition, the text of the temporary regulations set forth in this document serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking * * * [FI-91-86, page 1011, this Bulletin]. Changes to the applicable law were made by the Tax Reform Act of 1986 and the Technical and Miscellaneous Revenue Act of 1988. These regulations affect issuers of tax-exempt bonds and provide them with the guidance needed to comply with the law.

EFFECTIVE DATE: The temporary regulations generally are effective for private activity bonds issued after December 31, 1985, and for bonds other than private activity bonds issued after August 31, 1986.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This regulation is being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collections of information contained in this regulation have been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget (OMB) under control number 1545-1098. The estimated annual burden per respondent varies from 60 minutes to 120 minutes, depending on individual circumstances, with an estimated average of 90 minutes.

These estimates are an approximation of the average time expected to be necessary for the collections of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances. For further information concerning these collections of information, and where to submit comments on these collections of information, the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the cross-reference notice of proposed rulemaking published in * * * [FI-91-86, page 1011, this Bulletin].

Issuance of Proposed Regulation and Submission to Small Business Administration

The rules contained in this document are also being issued as proposed regulations by the notice of proposed rulemaking on this subject in * * * [page 1011, this Bulletin]. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of the rules will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Background

This document amends the Income Tax Regulations (26 CFR Part 1) to provide temporary rules relating to arbitrage restrictions on tax-exempt bonds under sections 148 and 149(d) of the Internal Revenue Code of 1986. The temporary regulations reflect the addition to the Internal Revenue Code of sections 148 and 149(d) by section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602) [Pub. L. 99-514, 1986-3 C.B. (Vol. 1) 1, 558], amendments made by sections 1013, 4005(d), and 5053(b) of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100-647), and the applicable effective date provisions of sections 1311-1314 of the Tax Reform Act of 1986 (100 Stat. 2659) [1986-3 C.B. (Vol. 1) 1, 576].

Explanation of Provisions

I. Scope and Effective Date of Restrictions on Arbitrage

A. Section 148 in General

Section 103(a) of the Internal Revenue Code of 1986 provides generally that gross income does not include interest on any State or local bond. If a State or local bond is an arbitrage bond (within the meaning of section 148), interest on the bond is not excluded from gross income under section 103(a). See, section 103(b)(2). Section 148 was added to the Internal Revenue Code by section 1301 of the Tax Reform Act of 1986 (1986 Act) and amended by the Technical and Miscellaneous Revenue Act of 1988 (1988 Act).

The federal income tax exemption of interest on State and local bonds enables State and local governments to borrow at lower interest rates than taxable issuers. This lower interest rate enables State and local governments to finance their governmental activities at significantly less cost. The lower interest rate also provides the potential to benefit from tax arbitrage by investing proceeds of the bonds in taxable investments. The principal purpose of section 148 is to eliminate significant arbitrage incentives to issue more bonds, to issue bonds earlier, and to leave bonds outstanding longer than necessary to carry out the governmental purpose of the tax-exempt issue. A secondary purpose of section 148 is to minimize the tax arbitrage benefit associated with investing proceeds of the bonds in taxable investments. Minimizing this tax benefit targets the tax benefits to the activities for which the tax exemption is provided.

The arbitrage restrictions applicable to State and local bonds formerly were contained in section 103(c) of the Internal Revenue Code of 1954 (1954 Code). Regulations under section 103(c) are contained in §§1.103-13, 1.103-14, 1.103-15, and 1.103-15AT.

The 1986 Act revised the arbitrage restrictions applicable to State and local bonds in response to a growing tendency to maximize arbitrage profits in connection with the issuance of such bonds. Bonds routinely were issued in larger amounts and earlier than necessary to satisfy actual financing needs. A large volume of so-called collapsible bonds were issued, the proceeds of which may never be used for a governmental purpose. A lack of accurate and detailed rules under prior law led to arbitrage abuses, particularly in connection with advance refundings. Section 148 and section 149(d) (relating to advance refundings) were enacted to prevent these and other abuses from recurring.

The most significant changes made by the 1986 Act are the following:

1. Under section 148(a), a bond that is part of an issue is an arbitrage bond if the issuer reasonably expects (at the time of issuance of the bond) to use any portion of the proceeds of the issue to acquire higher yielding investments or to replace funds that were used to acquire such investments unless a specific exception applies. In addition, a bond is treated as an arbitrage bond if the issuer at any time intentionally uses any portion of the proceeds of the issue in such manner.

2. Under section 148(b), the arbitrage restrictions apply to any annuity contract or investment-type property. In addition, under section 148(b) as amended by the 1988 Act, the arbitrage restrictions apply to tax-exempt bonds subject to the alternative minimum tax if acquired with proceeds of bonds issued after March 31, 1988 that are not subject to the alternative minimum tax.

3. Under section 148(c), the initial temporary period for proceeds to be used to make loans is subject to special limits. In addition, under section 149(f) as added by the 1988 Act, pooled financing bonds issued after October 21, 1988 are subject to additional restrictions, including a requirement that 95 percent or more of the lendable proceeds are reasonably expected to be loaned within 3 years.

4. Under section 148(d)(1), the amount of proceeds of the issue that may be invested in higher yielding investments as part of a reasonably required reserve or replacement fund generally is limited to 10 percent of the proceeds of the issue.

5. Under section 148(d)(2), the amount of proceeds from the sale of the

issue that may be part of a reserve or replacement fund generally is limited to 10 percent of the proceeds of the issue.

6. Under section 148(d)(3), the restrictions on investing in higher yielding nonpurpose investments apply to all private activity bonds other than qualified 501(c)(3) bonds.

7. Under section 148(e), the minor portion that may be invested in higher yielding investments is limited to the lesser of 5 percent of the proceeds of the issue and $100,000.

8. Under section 148(f), the requirement that issuers rebate arbitrage profits on nonpurpose investments to the United States is extended to all bonds (other than qualified mortgage bonds and qualified veterans' mortgage bonds subject to the arbitrage rebate requirement of section 143(g)(3)). In addition, under section 148(f) as amended by the 1988 Act, qualified mortgage bonds issued after December 31, 1988 are subject to the arbitrage rebate requirement of section 148(f) rather than section 143(g)(3).

9. Under section 148(h), the yield on the issue is determined on the basis of the issue price to the public.

10. Under section 149(d), advance refundings are subject to several additional restrictions relating to arbitrage.

B. Temporary Regulations Under Section 148

Section 1.148-0T describes the scope and effective date of section 148 and the temporary regulations thereunder and includes a list of the subjects covered by the regulations.

Sections 1.148-1T through 1.148-8T provide rules relating to the arbitrage rebate requirement of section 148(f). A substantial portion of these rules are reserved and will be the subject of a future notice.

Section 1.148-9T provides that some of the new rules apply for purposes of section 148 generally. Except to the extent changed by the 1986 or 1988 Act or by §1.148-9T, issuers should rely on the rules contained in §§1.103-13, 1.103-14, and 1.103-15 for purposes of determining compliance with the requirements of section 148 (other than section 148(f)).

Section 1.150-1T provides definitions and special rules relating to the tax exempt bond requirements in general.

C. Effective Dates

Section 148, as added by the 1986 Act, generally applies to bonds issued after August 15, 1986 (after August 31, 1986 if the bond is a governmental bond described in section 1312(c)(2) of the 1986 Act). In addition, the arbitrage rebate requirement of section 148(f) applies to any bond issued after December 31, 1985 if the bond is not a governmental bond described in section 1312(c)(2) of the 1986 Act (after 3 p.m. E.D.T., July 17, 1986 if the bond is a governmental pool bond described in sections 1312(c)(2) and 1314(d)(3)).

Sections 1.148-1T through 1.148-8T generally apply to any bond to which the arbitrage rebate requirement of section 148(f) applies. An exception is provided for issues retired on or before May 15, 1989, if the issuer in good faith determines and pays the final rebate (if any) no later than the later of May 15, 1989, and the date 60 days after the issue is retired. In the case of any issue to which the new rules apply, the final rebate is considered timely paid if paid no later than January 16, 1990.

The Treasury Department and the Internal Revenue Service carefully considered whether the new rules should apply only to bonds issued after the date of publication, and whether issuers should be allowed to apply the rules in §1.103-15AT of the temporary regulations for purposes of determining compliance with the requirements of section 148(f) in the case of bonds issued before such date. The determination was made, however, that general transitional relief was not necessary or appropriate for bonds still outstanding after the date of publication.

Section 148(f) requires issuers to rebate earnings in excess of the yield on the issue and any income earned on the excess as a condition of tax-exemption. The first rebate with respect to most of the bonds is not due until 1991 or 1992, and many of the bonds will remain outstanding a long time thereafter. Section 148(f), by itself, provides no guidance as to how the rebate is to be computed. In the absence of guidance, issuers could not determine whether they are complying with the requirements of section 148(f), and the Internal Revenue Service could not effectively administer the requirements.

Moreover, the rules in §1.103-15AT were developed to implement the arbitrage rebate requirement of section 103(c)(6)(D) of the 1954 Code, which applied only to certain industrial development bonds (IDBs). Those rules were not intended to apply to other types of bonds and do not provide the necessary detail or special rules needed to accommodate other bonds. Furthermore, it is important to note that the rebate computation under §1.103-15AT can be very complicated, that the results under those rules are often quite harsh, and that the results under the new rules are ordinarily more favorable for issuers.

Although general transitional relief was determined not to be necessary or appropriate, several special transition rules have been provided to protect issuers that reasonably may have relied on regulations promulgated under section 103(c) of the 1954 Code from any material adverse effect that might otherwise arise from such reliance. These transition rules are described below and generally apply to issues sold on or before May 15, 1989, and issued on or before June 14, 1989. Public comments are invited regarding any additional transitional rules that may be necessary or appropriate.

Issuers of certain IDBs to which the arbitrage rebate requirement of section 103(c)(6)(D) of the 1954 Code applies may elect to apply the new rules for purposes of determining compliance with the requirements of section 103(c)(6)(D). Absent this election, the rules in §1.103-15AT will apply.

Section 1.148-9T generally applies to any bond sold after May 15, 1989, or issued after June 14, 1989.

II. Required Rebate to the United States

A. In General

Section 148(f) requires issuers of State and local bonds to rebate arbitrage profits from investing in nonpurpose investments as a condition of tax exemption. This requirement is intended to minimize the tax arbitrage benefit associated with investing proceeds of the bonds in taxable investments, and to provide the accuracy needed to prevent abuses that occurred under prior law from recurring.

B. Exceptions to Rebate Requirement

Congress recognized the potential complexity and administrative burdens associated with requiring arbitrage profits to be rebated and, accordingly, provided two exceptions to the requirement. One exception applies to governmental bonds issued by small issuers with general taxing powers. Under this exception, the rebate does not apply to many small towns, cities, counties, and school districts. The other exception provides a means by which any issuer can avoid the rebate requirement simply by issuing bonds no earlier than 6 months before the proceeds are to be spent.

The 6-month exception generally does not apply unless all the gross proceeds of the issue are spent for the governmental purpose of the issue no later than 6 months after the date of issue. The statute includes special rules relating to bona fide debt service funds, an additional 6-month period for certain bonds, and a safe harbor for tax and revenue anticipation bonds. Rules relating to the 6-month exception will be the subject of a future notice, but certain aspects of those rules can be described at this time.

First, special rules are necessary to enable issuers that do not issue bonds earlier than 6 months before the proceeds are needed to finance expenditures to qualify for the 6-month exception. For example, some bonds may not be marketable without a debt service reserve fund. The regulations will clarify that the 6-month exception is available to issuers of these bonds. Only the earnings attributable to the reserve fund will be subject to rebate if the issue otherwise qualifies. The regulations also will clarify that investment proceeds of an issue may be part of a bona fide debt service fund for purposes of the 6-month exception (and for purposes of the special rule that excludes amounts earned on certain such funds).

Second, special safe harbors are being considered that would encourage more issuers to rely on the 6-month exception. A special safe harbor might apply, for example, if substantially all, but not all, of the gross proceeds of the issue were spent within 6 months, and the delay in spending all the gross proceeds was due to unanticipated events over which the issuer had no control.

Public comments are invited regarding these and other special rules that may be necessary or appropriate to encourage greater reliance on the 6-month exception.

C. Temporary Regulations in General

A primary objective of the temporary regulations is to provide rules that minimize administrative burdens associated with the rebate requirement for those issues that remain subject to the requirement. The regulations provide specific guidance relating to the computation of the rebatable arbitrage, the yield on the issue, and other related matters.

The temporary regulations are lengthy because specific guidance is provided for many types of issues. Only a portion of the rules apply to a particular issue, and most of the more complicated rules apply only to noncustomary or more sophisticated transactions. The rules that apply to the large majority of issues are not difficult to understand or apply. Moreover, the specificity of the rules should significantly reduce administrative burdens by eliminating uncertainty and by facilitating the development of computer programs that can be used to determine the rebatable arbitrage without difficulty.

The basic method for computing the rebatable arbitrage involves future valuing the nonpurpose investment cash flows at an interest rate equal to the yield on the issue. As explained below, this method is accurate and very simple. For example, an issuer that invests all the bond proceeds in a widely held mutual fund can compute the rebatable arbitrage simply by future valuing the initial amount invested and the amount of each mutual fund share redemption that is spent for the governmental purpose of the issue.

States may organize similar funds to enhance investment opportunities of their local governments and reduce compliance costs through economies of scale. The regulations do not yet provide specific rules as to the treatment of these funds. However, it is anticipated that in appropriate cases the State and local governments investing in the funds will be treated in the same manner as if they had invested in shares of a widely held fund. For example, amounts earned by the fund and used to pay reasonable costs incurred by the fund to purchase and account for the investments will not be treated as earnings of the fund investors. Only the dividends actually paid by the fund to the investors will be taken into account for purposes of computing the rebatable arbitrage.

Most of the rules for allocating proceeds of an issue to investments and expenditures are reserved. These rules will accommodate customary governmental accounting practices to the extent possible. For example, a general purpose governmental unit may normally commingle bond proceeds and other funds for investment purposes and allocate earnings to each source of funds on an arm's length basis (*i.e.*, in a manner similar to that of a widely held mutual fund). The regulations will provide that this method of accounting for the bond proceeds may be used for purposes of determining the rebatable arbitrage. In many cases, the allocation of the investment earnings may be reasonably accurate but not fully arm's length (*e.g.*, the investment fund may not be revalued or investment earnings may not be credited to each source of funds on a regular and accurate basis). It is anticipated that the regulations generally will not require issuers to change their normal accounting practices for purposes of determining the rebatable arbitrage. Simplified accounting rules, however, will not apply to any fund formed or availed of to distort the rebatable arbitrage (or to proceeds of bonds issued to advance refund another bond).

The rules for computing the yield on the issue are much more detailed than under prior law. The yield on the issue for arbitrage yield restriction purposes generally is determined on the basis of the issuer's reasonable expectations as of the date of issue regarding the actual yield on the issue. Prior to the 1986 Act, arbitrage yield restrictions typically applied only to advance refundings. Since these bonds pay interest at fixed interest rates, the use of the reasonably expected yield provided a workable (albeit an imperfect) standard. The scope of the arbitrage rebate requirement is much broader. The rebate affects every type of issue and applies to all the gross proceeds. Much more detailed and accurate rules are necessary.

Separate rules are provided for computing the yield on variable yield and fixed yield issues. A variable yield issue includes bonds the interest rates on which are determined by reference to future market rates. For purposes of computing the rebatable arbitrage, the yield on a variable yield issue changes each 5-year period during the term of the issue (or more often, if the issuer elects). Computing the yield separately for each five years is simpler, fairer, and more accurate than computing the yield on a cumulative basis at the end of each five years. Under this method, the rebatable arbitrage reflects the amount earned on each investment in excess of the interest cost on the issue during the 5-year period the investment is held. Since the interest rates on the issue and the investments are properly matched, the rebatable arbitrage from investing during a 5-year period will not change after the 5-year period because of subsequent changes in interest rates.

A transition rule allows issuers of variable yield issues sold on or before May 15, 1989, and issued on or before June

14, 1989, to elect to compute the yield over the term of the issue.

A fixed yield issue is an issue of bonds the interest rates on which are fixed and determinable as of the date of issue. The actual yield on a fixed yield issue may depend on whether bonds are retired early if the issue includes bonds with different interest rates. Interest on such an issue often will accrue at a rate that is lower in the earlier years and at a rate that is higher in the later years. These temporary regulations allow issuers to initially assume, for purposes of making installment payments, that the higher rates will be paid. The computation of the actual yield on the issue and the rebatable arbitrage, however, eventually take into account any early retirements. In most cases, the difference between the actual yield, determined with regard to early retirements, and the expected yield, determined without regard to such retirements, will be very small.

Computation of the actual yield generally is not difficult. In the case of smaller issues, however, the administrative burdens are comparatively larger and the importance of using the actual yield much less. A special rule, therefore, provides that the yield for certain small issues is the expected yield as of the date of issue (determined without regard to early retirements) unless the issuer elects to use the actual yield. Public comments are invited regarding other special rules that may be necessary or appropriate to minimize administrative burdens.

A transition rule generally allows issuers of fixed yield issues sold on or before May 15, 1989, and issued on or before June 14, 1989, to compute the rebatable arbitrage by using the expected yield on the issue as of the date of issue (determined without regard to early retirements) unless the issuer elects to use the actual yield.

III. Rebate Requirement in General

A. General Rule

Section 1.148-1T provides generally that a bond is treated as an arbitrage bond if the bond is issued as part of an issue that does not meet the rebate requirement.

An issue generally meets the rebate requirement if the issuer pays to the United States: (1) At least 90 percent of the rebatable arbitrage as of each installment computation date (rebate installments); and (2) all the rebatable arbitrage as of the final computation date and any income attributable to such rebatable arbitrage (final rebate).

Since a refunding issue continues or replaces the refunded issue, a refunding issue meets the rebate requirement only if each tax-exempt refunded issue also meets any applicable rebate requirement. A tax-exempt issue includes any issue that (when issued) purported to be a tax-exempt issue. A refunding issue includes the nonrefunding portion of the refunding issue, and a refunded issue includes the nonrefunded portion of the refunded issue.

B. Computation and Payment Dates

The rebatable arbitrage is computed as of each installment computation date and as of the final computation date. The first installment computation date is the last day of the fifth bond year. The issuer may select as the last day of each bond year any calendar day that is the last day of a compounding interval used in computing the yield on the issue. Each succeeding installment computation date ends 5 years after the preceding installment computation date. The final computation date is the date the last bond is discharged. The issuer need not actually compute the rebatable arbitrage as of a computation date if there is none.

Rebate installments are due 60 days after each installment computation date. The final rebate is due on the latest of: (1) the date 60 days after the final computation date; (2) the date 8 months after the date of issue; (3) the earlier of the date the issuer no longer reasonably expects the 6-month temporary investment exception to apply, and the date 14 months after the date of issue; and (4) January 16, 1990. Special rules for a series of issues are reserved.

C. Income Included in Final Rebate

The final rebate includes income attributable to the rebatable arbitrage during the final payment period. The final payment period begins on the final computation date and ends 15 days before the final rebate is paid.

An issuer may identify the funds that are to be used to pay the final rebate and rebate income on the basis of the amount actually earned. Otherwise, the income is determined on the basis of the amount that would have been earned if the rebatable arbitrage had been invested at the maximum interest rate in effect on the final computation date for a time deposit security of the State and Local Government Series (SLG) with a term equal to the final payment period. This rate is one-eighth percent less than the United States Treasury borrowing rate for a security with a comparable maturity. If the final rebate is paid no later than January 16, 1990, the applicable rate will not exceed the average of the maximum interest rates in effect on the first business day of each month during the final payment period for a SLG with a term of 60 days.

D. De Minimis Rules

There are three *de minimis* rules. First, the amount of each rebate installment and the final rebate may be rounded down to the nearest multiple of $100. Any amount less than $100 is rounded to zero.

Second, no income is included in the final rebate if the income is less than $300, and the final rebate is paid no later than 60 days after the final computation date. In addition, if the final rebate is paid no later than January 16, 1990, no income is included if the income is less than $1,000.

Third, as described below, the rebatable arbitrage is reduced by a computation date credit. The maximum credit on each computation date is $1,000.

E. Certain Failures Not to Result in Loss of Tax Exemption

Issuers may correct innocent failures (without penalty) if the failure is corrected no later than 60 days after the failure is discovered (180 days if the correction amount is less than $50,000). The Commissioner may extend the time to correct an innocent failure if the correction amount is less than $50,000, or if the issuer requests an extension before the expiration of such time.

A failure is corrected by paying the correction amount. This is the amount not paid when required, together with interest for the period of delay at the maximum interest rate for a SLG with a term equal to such period. In the case of a failure to pay a rebate installment, the interest is computed at a rate no less than the yield on the issue.

If the correction amount is $50,000 or more, a failure is not treated as innocent unless the issuer submits with the correction amount a brief explanation of the failure and basis for concluding that it is innocent. The failure is treated as innocent if the brief description is reasonably accurate (or not required) unless the issuer is notified otherwise within 90 days. It is anticipated that the vast majority of errors can be corrected under this rule.

Issuers may obtain relief from other failures by submitting a request to the Commissioner. Relief is available if the Commissioner determines that the failure is not due to willful neglect, and the issuer pays the correction amount and a penalty. The Commissioner may waive all or any portion of the penalty.

F. Recovery of Overpayments

Rebate payments are not refundable. However, it is anticipated that the regulations will provide that issuers generally may recover overpayments if the issuer establishes to the satisfaction of the Commissioner that: (1) The issuer paid an amount in excess of the rebatable arbitrage determined as of the day before the date of payment (and in certain cases as of the computation date immediately preceding such date); (2) the excess was paid as the result of a mistake (*e.g.*, a mathematical error); and (3) recovery of the overpayment on the date the recovery was first requested would result in no rebatable arbitrage as of such date.

IV. Computation of Rebatable Arbitrage

A. In General

Section 148(f) provides generally that the rebatable arbitrage is the sum of: (1) The excess of (i) the amount earned on nonpurpose investments (other than investments that are attributable to the excess described in this clause (1)), over (ii) the amount that would have been earned on such investments if the yield on such investments was equal to the yield on the issue; and (2) any income attributable to the excess described in clause (1).

The temporary regulations provide a simple and accurate method for computing this sum that does not rely on more complicated and less accurate federal income tax accounting principles. This method involves future valuing the nonpurpose investment cash flows at an interest rate equal to the yield on the issue.

B. Future Value Method

Section 1.148-2T provides generally that the rebatable arbitrage as of a computation date is the excess of: (1) The future value of the nonpurpose receipts (the amounts received from investing in nonpurpose investments); over (2) the future value of the nonpurpose payments (the amounts paid to purchase nonpurpose investments). All future values are computed as of the computation date and by using an interest rate equal to the yield on the issue.

Computation of the rebatable arbitrage under the future value method is very simple, because the computation focuses exclusively on cash flows. Investments attributable to an excess do not have to be separately accounted for to compute the income earned from reinvesting the excess. The amount actually earned is automatically taken into account if the excess is reinvested. If the excess is spent, the issuer's tax-exempt borrowing rate is used as the excess earnings rate. An issuer with a negative excess benefits from the full time value of the negative excess if a positive excess arises in a later year.

The focus on cash flows also eliminates the need to make separate computations with respect to nonpurpose investments that are not held on a computation date. In many cases, the issuer can compute the rebatable arbitrage simply by keeping track of the initial amount that is invested and each amount that is spent.

To illustrate, assume a $100 issue with a 10 percent annual yield. On the date of issue, the $100 is invested in a zero coupon investment that matures at the end of Year 4. The amount the issuer would receive at the end of Year 4 if the $100 was invested at the bond yield is the future value of $100 at the end of Year 4, determined by using an interest rate equal to 10 percent ($146.41).

Example (1). Assume the issuer actually receives $156.41 when the investment matures at the end of Year 4 (a $10 excess) and reinvests the entire amount (the $10 excess and the $146.41 nonexcess) in a 1-year zero coupon investment with a 10 percent yield, which matures at the end of Year 5. The issuer receives $172.05 at the end of Year 5 ($156.41 plus $156.41 × 10%). Since the $146.41 nonexcess is invested at the bond yield, no new positive or negative excess arises from this reinvestment. The amount earned at the end of Year 5 from reinvesting the $10 excess is $1 ($10 × 10%). The rebatable arbitrage at the end of Year 5 is $11 (the sum of the $10 excess and $1 earned from reinvesting the $10 excess).

Under the future value method, the rebatable arbitrage would be computed as follows:

Year	*Receipt (Payment)*	*FV (End of Year 5)*
0	$(100.00)	$(161.05)
4	156.41	172.05
4	(156.41)	(172.05)
5	172.05	172.05
	Rebatable arbitrage	$11.00

Note that the two cash flows in Year 4 (the $156.41 receipt and reinvestment) can be disregarded since they cancel each other out.

The ability to disregard reinvestments makes the computation much simpler. For example, assume the issuer had invested the $100 in a series of many different investments during the first 5 years (rather than only two). Regardless of the number of receipts and payments generated by the additional reinvestments, the issuer could still compute the rebatable arbitrage by future valuing only two cash flows (the initial payment in Year 0 and the final receipt in Year 5). All the other receipts and payments cancel each other out. See, §1.148-2T(c)(2) (Examples).

Example (2). (i) Assume the issuer received $179.87 at the end of Year 5 (instead of $172.05, which is $7.82 less). The rebatable arbitrage at the end of Year 5 is $7.82 more:

Year	*Receipt (Payment)*	*FV (End of Year 5)*
0	$(100.00)	$(161.05)
5	179.87	179.87
	Rebatable arbitrage	$18.82

The $18.82 reflects the Year 4 $10 excess, $1.50 earned from reinvesting the $10 excess during Year 5, and a new $7.32 excess from reinvesting the $146.41 nonexcess at a 5 percent higher yield during Year 5 ($146.41 × 5%).

(ii) Assume the issuer received $164.23 at the end of Year 5 (instead of $172.05, which is $7.82 more). The rebatable arbitrage at the end of Year 5 is $7.82 less:

Year	*Receipt (Payment)*	*FV (End of Year 5)*
0	$(100.00)	$(161.05)
5	164.23	164.23
	Rebatable arbitrage	$ 3.18

The $3.18 reflects the Year 4 $10 excess, $.50 earned from reinvesting the $10 excess during Year 5, and a new $7.32 negative excess from reinvesting the Year 4 $146.41 nonexcess at a 5 percent lower yield during Year 5 ($146.41 × 5%).

Example (3). Assume the issuer spent the $146.41 nonexcess at the end of Year 4 and reinvested only the $10 excess. The yield on the 1-year reinvestment is 5 percent; the issuer therefore receives $10.50 at the end of Year 5. The rebatable arbitrage at the end of Year 5 is computed as follows:

Year	*Receipt (Payment)*	*FV (End of Year 5)*
0	$(100.00)	$(161.05)
4	146.41	161.05
5	10.50	10.50
	Rebatable arbitrage	$10.50

The $10.50 reflects the Year 4 $10 excess and $.50 earned from reinvesting the $10 excess during Year 5. The net receipt at the end of Year 4 is the amount that was spent (*i.e.*, the portion of the $156.41 receipt that was not reinvested).

Example (4). Assume the issuer spent the entire $156.41 at the end of Year 4. The rebatable arbitrage at the end of Year 5 is computed as follows:

Year	*Receipt (Payment)*	*FV (End of Year 5)*
0	$(100.00)	$(161.05)
4	156.41	172.05
	Rebatable arbitrage	$11.00

The $11.00 reflects the Year 4 $10 excess and $1 earned on the $10 excess during Year 5. Since the $10 excess was not reinvested, the issuer's tax-exempt borrowing rate is used to determine what was earned by spending the excess. The receipt at the end of Year 4 is the amount that was spent.

C. Nonpurpose Payments and Receipts

If a nonpurpose investment is purchased with gross proceeds, the amount paid to purchase the investment is the nonpurpose payment. A nonpurpose receipt includes any amount received from investing in nonpurpose investments (including amounts received from the sale of investments). Gain or loss, therefore, is taken into account in computing the rebatable arbitrage.

In addition to these actual amounts, the following amounts are treated as nonpurpose payments and receipts:

1. *Constructive payments and receipts.* If a nonpurpose investment is not actually purchased with gross proceeds, the investment is treated as if purchased for fair market value when it is allocated to gross proceeds (*e.g.*, investments purchased before the date of issue and contributed to a debt service reserve fund are treated as if purchased for fair market value on the date of issue). Similarly, if a nonpurpose investment ceases to be a nonpurpose investment but is not actually sold, the investment is treated as if sold for fair market value (*e.g.*, all nonpurpose investments are treated as if sold for fair market value on the final computation date).

Under these rules, market gain or loss for the period during which an investment is allocated to an issue is the same whether or not the investment is purchased (or sold) at the time it is (or ceases to be) allocated to the issue. In addition, the yield on each investment is based on market interest rates in effect at the time the investment is allocated to the issue whether or not the investment is actually purchased at that time.

Fair market value generally is the price at which a willing buyer would purchase the investment from a willing seller. Specific rules are provided for determining the fair market value of investments traded in an established securities market. Special rules are provided for valuing SLGs that are not in a restricted escrow and certain investment contracts.

2. *Installment date receipt.* For purposes of computing the rebatable arbitrage as of an installment computation date, the fair market value of any nonpurpose investments held on that date is treated as a nonpurpose receipt. Fair market value is generally easy to determine, and the use of fair market value allows net unrealized losses to be counted.

In the case of fixed rate investments, the issuer has the option on any installment computation date to value the investments at present value. Valuing the investments at present value eliminates net unrealized gains from the installment date computation. The present value generally is the present value of the future receipts to be paid on the investment, discounted at the yield on the investment. If the investment is purchased at par, the par amount plus accrued interest can be used (instead of the par amount plus the present value of such interest).

3. *Rebate payment.* Payments of rebatable arbitrage to the United States no later than the date due are treated as nonpurpose payments. These payments, therefore, reduce the rebatable arbitrage. Any amount not paid on or before the date due is treated as a nonpurpose payment as of the due date. The failure to timely pay is corrected by paying the correction amount as described above.

4. *Computation date credit.* A computation date credit generally is taken into account as a nonpurpose payment on each computation date. The credit on each computation date is $1,000 if the outstanding amount of bonds is more than $5 million, $625 if the outstanding amount of bonds is more than $1 million but not more than $5 million, and $250 if the outstanding amount of bonds is $1 million or less. No credit is allowed on a computation date if the computation period is less than one year, or if less than 75 percent of the net sale proceeds have been spent for a governmental purpose by that date.

In the case of a refunding issue, the net sale proceeds requirement is applied separately to each refunding portion and to the nonrefunding portion of the issue. In the case of each refunding portion, the requirement is applied by reference to the use of the sale proceeds of the refunded issue (or in the case of a series of refundings, by reference to the use of the sale proceeds of the original issue). Thus, refunding issues (including advance refundings) are eligible for the credit if all the refunded issues were eligible for the credit (and any new money portion of the refunding issue also qualifies). In addition, a refunding issue can qualify for the credit on a computation date (even if the refunded issue was not eligible) if the 75 percent expenditure requirement is later met.

5. *Imputed receipt.* Imputed receipts are treated as nonpurpose receipts. Section 1.148-5T will contain rules relating to the transactions that give rise to such receipts and the method of determining the amount thereof.

Receipts generally will be imputed to obligations that do not bear interest at an arm's length interest rate. Section 1.148-5T provides two exceptions that apply to investments of gross proceeds in demand accounts that are used to hold funds for a short period of time until the funds can be invested at an arm's length interest rate or spent. The exceptions do not apply to reserve or replacement funds (other than bona fide debt service funds), to proceeds subject to arbitrage yield restrictions, or to accounts formed or availed of to take advantage of the exception and deflect arbitrage profits to third parties. The purpose of the exceptions is to further simplify computation of the rebatable arbitrage under the future value method.

Under the first exception, no receipt is imputed to investments of small balances in a nonpurpose receipt account. This rule facilitates the netting of nonpurpose receipts and payments. The investment activity in the nonpurpose receipt account can be disregarded for purposes of computing the rebatable arbitrage, since all the receipts in the account are reinvested. The investments in the account, however, are taken into account in determining the amount of the rebatable arbitrage (*e.g.*, as zero yielding investments if the account does not pay interest).

Under the second exception, receipts are not imputed to investments of significantly larger balances in a nonpurpose receipt account, a purpose receipt account, or a checking account to produce a yield higher than the yield on the issue. This rule also simplifies the computation. For example, the rule allows an issuer to treat amounts deposited in a qualified checking account as if they were spent on the date of the deposit.

D. Special Rules for Restricted Escrows

Special rules apply to investments in restricted escrows. An investment is in a restricted escrow if the investment is in an advance refunding escrow or an excess proceeds escrow. These rules are necessary primarily to accommodate advance refundings. The rules reflect the economic reality that all investments in a restricted escrow (whether or not held concurrently) are part of a single "locked in" investment.

Nonpurpose investments are in an advance refunding escrow if allocated (without regard to transferred proceeds rules) to proceeds of a refunding issue that are to be used to discharge principal or interest on a refunded issue or that are part of a reserve or replacement fund (until the adjusted maturity date of the refunded issue) unless the proceeds qualify for a temporary period longer than 30 days.

Nonpurpose investments (not in an advance refunding escrow or part of a reasonably required reserve or replacement fund) are in an excess proceeds escrow if allocated (without regard to transferred proceeds rules) to proceeds that are to be used to discharge principal or interest (other than accrued or capitalized interest) on the issue to which the proceeds are allocated. Amounts to be used to pay debt service are not part of a reasonably required reserve or replacement fund unless the purpose of the fund is to cover a temporary shortfall in revenues (or the fund is a bona fide debt service fund). For example, an escrow fund established to defease bonds (legally or economically) is not reasonably required.

The special rules that apply to investments in restricted escrows are as follows:

1. *Installment date receipt.* The installment date receipt is always determined by reference to present value.

2. *Transferred investments.* If the investments transfer to a refunding issue, the present value is always treated as the nonpurpose receipt with respect to the refunded issue and as the nonpurpose payment with respect to the refunding issue. (This rule generally does not apply if the refunded issue is a tax-exempt issue to which the rebate requirement applies unless the refunding issue also is tax-exempt.)

3. *Composite yield.* The present value is determined by treating all investments in the same restricted escrow as one investment (whether or not the investments are held concurrently). Therefore, the discount rate used in computing the present value of the investments is the composite yield on all the investments (not the yield on the investments that happen to be in the escrow on a particular date).

4. *Imputed escrow receipts.* Section 1.148-5 provides that receipts are imputed to investments in an escrow in certain cases. For purposes of these rules, investments in an escrow include tax-exempt investments and investments allocated to gross proceeds (other than proceeds).

The first rule provides that interest savings directly attributable to the defeasance of bonds with investments in an escrow are treated as imputed receipts with respect to those investments. These savings might occur if, as a result of the defeasance, the interest rate on the defeased bonds is reduced, or fees for a guarantee of the defeased bonds no longer have to be paid. A transition rule applies to bonds sold on or before May 15, 1989, and issued on or before June 14, 1989. The transition rule does not apply to any refunding issue issued after August 31, 1986 and to which section 149(d)(4) (relating to abusive advance refunding transactions) applies unless certain interest savings are taken into account in computing the yield on the refunding issue.

The second rule provides that excess receipts from tax-exempt investments in an escrow established after June 14, 1989, are treated as imputed receipts with respect to nonpurpose investments in the same escrow. Excess receipts may arise if the tax-exempt investments are invested at a yield higher than one eighth percent above the yield on the nonpurpose investments in the same escrow. The excess receipts are the receipts on the tax-exempt investments that produce this excess yield.

E. Certain Lower Yielding Investments Not Taken Into Account

Two classes of nonpurpose investments are not taken into account in computing the rebatable arbitrage if the yield on the class as a whole is lower than the yield on the issue. The first class comprises all investments (including transferred investments) in advance refunding escrows and all transferred investments in excess proceeds escrows. The second class comprises all investments allocated to gross proceeds (other than proceeds) that are part of a reserve or replacement fund that is neither reasonably required nor a bona fide debt service fund.

Congress provided the Treasury Department with broad general regulatory authority under section 148 and section 149(d) (relating to advance refundings) and specific authority under section 148(f)(6)(B) to determine what gross proceeds include. The netting limitations herein constitute a necessary exercise of such authority. The limitations are necessary because a tax-exempt issuer enjoys a tax arbitrage benefit whenever the bond proceeds are invested (unless the bond proceeds are invested exclusively in tax-exempt investments). This benefit is equal to the interest rate differential between the tax-exempt issue and a comparable taxable issue.

The two classes of funds to which the netting limitations apply are long-term investment funds that involve major exploitation of arbitrage. These funds rarely, if ever, exist outside the tax-exempt bond market. The netting limitations prevent these funds from being used to exploit arbitrage twice. The double exploitation would occur if the funds were invested at taxable interest rates and also were used to eliminate rebatable arbitrage profits from investing other, unrelated funds at taxable interest rates. The advance refunding escrow limitation prevents advance refunding issues from enjoying a rebate advantage as compared to the refunded and all other issues. The sinking fund limitation prevents sinking funds from being established and unreasonably accumulated for the primary (if not sole) purpose of eliminating rebatable arbitrage profits. These limitations do not prevent negative arbitrage profits from the investment of other, unrelated funds from being used to offset positive arbitrage profits from the investment of these funds.

V. Computation of Yield on Issue

A. In General

Section 1.148-3T distinguishes between fixed yield issues and variable yield issues. A fixed yield issue includes only fixed yield bonds. A variable yield issue includes one or more variable yield bonds.

A variable yield bond includes any bond the interest rate on which is determined by reference to market interest rates after the date of issue. A bond is not a variable yield bond merely because the interest rate will change (*e.g.*, to another interest rate fixed and determinable as of the date of issue) or may change in the event of an unanticipated event (*e.g.*, if there is a change in income tax rates).

The yield on a fixed yield issue is the same throughout the term of the issue. For purposes of computing the rebatable arbitrage as of each installment computation date, the expected actual yield on the issue as of the computation date is used to future value the nonpurpose receipts and payments from the date of issue to the computation date. On the final computation date, the actual yield on the issue over the term of the issue is used to future value the nonpurpose receipts and payments from the date of issue to the final computation date.

In contrast, the yield on a variable yield issue changes each yield period.

For purposes of computing the rebatable arbitrage, the nonpurpose receipts and payments are future valued during each yield period at an interest rate equal to the yield on the issue computed separately for that yield period. Each yield period ends on a computation date (*e.g.*, the first yield period ends on the last day of the fifth bond year). The issuer may elect to treat the last day of any other bond year as the end of another yield period. The yield, therefore, may be computed for each 5-year period or more often (in any combination of 1-year periods).

Under the variable yield rules, the rebatable arbitrage reflects the amount earned on each investment in excess of the interest cost on the issue during the yield period the investment is held. Computation of the rebatable arbitrage on a yield period basis minimizes distortions from changes in market interest rates. For example, if the yield on an issue of long-term current index bonds was recomputed over the term of the issue, the rebatable arbitrage from investing during the construction period would change later if interest rates changed. The issuer could not recover rebate payments if interest rates rose (at least 90 percent must be paid each 5 years), but the issuer would have to rebate more if interest rates fell. The issuer should not have to rebate more, since the arbitrage profits do not in fact change.

The variable yield rules apply to tender bonds that bear interest at short-term rates during the construction period (when the proceeds are invested) and thereafter convert to a long-term fixed interest rate. As applied to these issues, the rules are also necessary to minimize distortions from comparing the current short-term investment rates and the future long-term borrowing rates. Although yield curve distortions can occur in connection with long-term fixed rate issues, there is a fundamental difference between a long-term fixed rate bond and a tender bond. The issuer of a long-term fixed rate bond agrees in advance to pay a fixed rate of interest over the term of the bond. As discussed below, the yield on such a bond should not be viewed as changing because market interest rates later change. By contrast, the yield on a tender bond changes whenever the interest rate on the bond is reset. Moreover, the conversion of a tender bond to a long-term fixed rate bond resembles the refunding of a short-term bond with a long-term bond. A refunding issue is a separate issue and involves a separate yield and rebatable arbitrage computation.

A transition rule provides that the issuer of any variable yield issue sold on or before May 15, 1989, and issued on or before June 14, 1989, may elect to treat the issue as a fixed yield issue. If the issuer so elects, the yield on the issue is computed over the term of the issue.

B. Issue Price

The yield on a bond or issue is determined on the basis of the issue price to the public. The issue price of substantially identical bonds that are publicly offered generally is the initial offering price at which price a substantial amount of the bonds was sold to the public. This price generally is determined on the basis of reasonable expectations as of the date the issuer enters into a binding contract to sell the bonds if the underwriter or other intermediary makes a bona fide public offering of the bonds at the reasonably expected price. The issue price of bonds to be sold after the date of issue must be adjusted to reflect an equivalent date of issue price (*e.g.*, interest accrued after the date of issue is not taken into account).

C. Actually Paid

Payments of principal and interest on a bond that are unconditionally payable generally are treated as if paid on the date actually and unconditionally due (whether or not actually paid on that date) unless the yield is higher by taking into account payments when actually paid (*i.e.*, where taking into account late payments and interest on the late payments produces a higher yield).

This special rule applies only if the bondholders are reasonably assured that sufficient funds will be available to fully retire the bonds if none or an insubstantial portion of the proceeds are used for a governmental purpose. For this purpose, the available funds are reduced by the arbitrage profits (determined without regard to the special rule), and funds are considered available only if there is a binding obligation of a person with sufficient funds to provide them. This exception is necessary to prevent arbitrage profits from being used to pay the issuance costs of collapsible bond issues.

D. Qualified Guarantees

Section 1.103-13(c)(8) provides that premiums paid to insure an issue are taken into account in computing the yield on the issue. Under §1.103-13(c)(5), payments for other bond guarantees (*e.g.*, letters of credit) and for guarantees of purpose investments are taken into account in computing the yield on purpose investments, but not in computing the yield on the issue. The distinction under prior law between bond insurance and other bond guarantees is eliminated.

In some cases, the terms of a purpose investment may be virtually identical to the terms of the bonds, and the obligor on the purpose investment may even be treated for other tax purposes as the obligor on the bonds. In these cases, a guarantee of the purpose investment is treated as a guarantee of the bonds, rather than as a project-related credit enhancement feature of the bonds. This treatment applies if: (1) The purpose investment is acquired with sale proceeds of the issue; (2) the payments on the purpose investment are exclusively and unconditionally pledged to pay the bonds; (3) the payments on the purpose investment coincide with the payments on the bonds; and (4) the yield on the purpose investment does not exceed the yield on the issue by more than one-eighth percent. The last requirement may be satisfied by modifying the purpose investment to comply with the requirement if the purpose investment is acquired on or before June 14, 1989.

In addition, special rules are provided that permit purpose investment guarantees to be treated as bond guarantees in certain cases even though the payments on the purpose investment and the bonds do not exactly coincide, and even though the payments on the purpose investment are not exclusively pledged to pay the bonds. These rules: (1) Treat payments on a purpose investment and a bond as coinciding where the purpose investment provides for monthly payments of principal and interest and the bonds provide for semiannual or annual payments of principal and interest; and (2) treat payments on a purpose investment as exclusively pledged to pay the bonds where the bonds are equally and ratably secured with other bonds under a master resolution if all bonds issued under the master resolution are used only to finance purpose investments that are insured by the same guarantor (*e.g.*, by the Federal Government).

A guarantee is an unconditional obligation of a guarantor enforceable by or on behalf of the bondholder to pay principal or interest on the bond or the tender price of a tender bond. The guarantee may be in the form of an insurance policy, surety bond, irrevocable letter or line of credit, or standby purchase agreement. A line of credit obtained for liquidity reasons is not a guarantee unless the bondholders can unconditionally rely on it. A guarantee also may be in the form of a recourse loan to the guarantor (where the guarantor re-loans the proceeds to the ultimate borrower) if the terms of the loan and the bonds are virtually identical.

The guarantor must be the Federal Government or an entity that is subject to Federal income tax and is either a bank or rated "AA" or "AAA" by a nationally recognized rating agency. The guarantor must be legally entitled to full reimbursement immediately or upon commercially reasonable repayment terms (during a workout period that is not unreasonably long). An obligation to pay is not a guarantee unless it is reasonably expected that the guarantor will not be called upon to make any payment under the guarantee (or will be reimbursed immediately in cash for any payment). For example, a commitment to make a permanent loan is not a guarantee (whether or not the commitment is unconditional).

Payments for the guarantee may not exceed a reasonable charge for the transfer of credit risk and may not include direct or indirect payment for a cost, risk, or other element that is not customarily borne by guarantors of tax-exempt bonds (in transactions in which the guarantor has no other involvement). The reasonable charge requirement is not satisfied unless it is reasonably expected that the guarantee will result in a net present value savings. A nonguarantee element is present, for example, if the guarantee is in the form of a loan to the guarantor unless payments for all nonguarantee services being provided by the guarantor fully and adequately compensate the guarantor for those services (and no portion of such payments is taken into account as a payment for the guarantee). The fees charged for the nonguarantee services must be separately stated if the guarantee is entered into after June 14, 1989.

E. Allocation Rules for Guarantees

Rules are provided for allocating payments for guarantees to the bonds guaranteed and, if the bonds are variable yield bonds, to the proper yield period. In general, level payments are allocated in accordance with the level payment formula and treated as paid when actually paid. Nonlevel (front-loaded or back-loaded) payments are reallocated.

A level payment generally is one of a series of payments determined by use of the same formula (*e.g.*, a series of payments all of which are based on a constant percentage of the amount of guaranteed bonds then outstanding plus an appropriate amount of accrued interest). The series of payments must be payable at regular intervals (*e.g.*, on the first day of each bond year, properly adjusted to take into account any short year).

Nonlevel payments generally are allocated to each guaranteed bond in the same proportion as the interest savings resulting from the guarantee. For example, if the guaranteed bonds are not all substantially identical, the nonlevel payments are allocated to each group of substantially identical guaranteed bonds in the same proportion as the total interest savings with respect to the group bears to the total interest savings with respect to all the guaranteed bonds (determined on a present value basis). Payments allocated to substantially identical bonds are allocated ratably.

Nonlevel payments allocated to a variable yield bond generally are treated as paid on the first day the guarantee is in effect and on the first day of each succeeding bond year during which the guarantee is in effect. The same amount is treated as paid each bond year (other than a short year). The present value of all the amounts treated as paid equals the present value of all the nonlevel payments, using a discount rate equal to the yield on all the guaranteed bonds during the first yield period during which the guarantee is in effect (determined without regard to the nonlevel payments). All guarantees entered into with the same guarantor before the first installment computation date generally are treated as one guarantee for purposes of applying these rules.

If a guaranteed variable yield bond is actually retired before maturity, the amount treated as paid during the bond year is prorated. No other amounts with respect to the bond are thereafter taken into account with respect to the issue.

F. Hedging Transactions

Certain hedging transactions, such as those involving interest rate swaps and interest rate caps or collars, should be taken into account in computing the yield on the issue. The rules relating to hedging transactions are reserved. Public comments are invited regarding the types of hedging transactions that should be taken into account, the methods that should be used to determine whether a particular hedging transaction is entered into with respect to a particular issue, and the method that should be used to take into account payments with respect to each type of transaction. Issuers should be aware that the regulations will apply to interest rate swaps that involve the swap of a fixed rate of interest for a variable rate of interest, and that these swaps may be taken into account in determining whether the issue is a variable yield issue.

VI. Computation of Yield on Fixed Yield Issue

A. In General

The yield on a fixed yield issue as of any computation date is determined by taking into account the issue payments paid on or before the computation date and to be paid after the computation date. The issue payments paid are the amounts paid to discharge principal and interest (not including amounts paid in connection with the early retirement of a bond), the early retirement value of bonds retired before maturity, and the amounts paid for a qualified guarantee. The issue payments to be paid after the computation date generally are determined by assuming that the bonds will remain outstanding until maturity (unless the bonds are subject to mandatory early redemption or otherwise are required to be retired early).

B. Early Retirements

The early retirement value of a bond (rather than the amount actually paid to retire the bond) is treated as the issue payment when a bond is retired before the final maturity date. The early retirement value generally is the price that when used in computing the actual bond yield (the yield to the actual retirement date) produces the original bond yield (the yield to the final maturity date).

The price that preserves the original bond yield is the present value as of the early retirement date of the originally scheduled payments of principal and interest (and payments for a guarantee) to be paid on or after that date, discounted at an interest rate equal to the yield-to-maturity on the bond. The present value of a bond issued at par plus accrued interest is approximately the par amount of the bond plus accrued interest (if the bond pays current interest). This approximate present value can be used instead of actually computing the exact present value. The exact present value may have to be computed for guaranteed bonds and bonds that are issued at a discount (or premium). The present value of these bonds increases (or decreases) as the discount (or premium) accrues, so that the actual yield on the bond is always the same.

The actual price paid to retire the bond is not used, because changes in market interest rates should not be viewed as changing the yield on a fixed yield bond. Economically, the yield over the original term of a noncallable fixed yield bond never changes. If the issuer retires the bond early, the market premium (or discount) paid to retire the bond will reflect the lower (or higher) current market interest rate, which is the same rate at which the early retirement is financed. Financing of the early retirement with a new borrowing will change the timing of the originally scheduled payments, but will not change the present value of the payments or the yield over the original term of the bond. Financing of the early retirement with equity also produces the same results on a present value basis (*i.e.*, the same result as if the equity had been invested at the current market rate and the bond had not been retired, and the same result as if the bond had been retired with new borrowing at the current market rate).

Similarly, the yield over the original term of a callable bond should not be viewed as increasing if the bond is retired early. In this case, the yield with respect to the financing over the original term of the bond may actually decrease. For example, the yield over the original term of a 9 percent 30-year bond would decrease if the bond was called after 10 years at a 3 percent call premium to take advantage of a lower 6 percent interest rate. The higher original bond yield is used for purposes of computing the rebatable arbitrage whether or not the bond is called early (*i.e.*, the yield is not reduced to take into account the value of the call option or the fact that it is exercised).

Issuers should be aware, however, that the issuance of callable bonds for the primary or sole purpose of hedging against a rise in interest rates may violate, *inter alia*, the 10-percent reserve or replacement fund financing limitation added by the 1986 Act. See, H. Rep. No. 100-795, 100th Cong. 447, 451 (1988). Rules relating to this limitation will be the subject of a future notice.

A bond may be subject to optional purchase or redemption at a small discount below present value. For example, a 30-year bond issued at a one percent premium may be subject to optional redemption at par after 20 years. In this case, it is initially assumed that the yield on the bond is the higher yield-to-maturity rather than the lower yield to the par call date. If the bond is part of a fixed yield issue and is retired at or about the time the bond is subject to redemption at a price less than present value, the lower redemption price is the early retirement value (rather than the higher present value).

In extraordinary cases, a bond may be subject to optional purchase or redemption before maturity at a substantial discount below present value. In this case, it is initially assumed that the yield on the bond is the yield-to-call (*i.e.*, the yield computed by treating the optional purchase or call date as the final maturity date). A bond that is part of a fixed yield issue is a yield-to-call bond if the yield-to-maturity on the bond is more than one-fourth percent higher than the lowest yield. If the bond is not retired on or before the call date, the bond is treated as if issued on that date for an issue price equal to the lower call price. The bond, therefore, is treated as a lower yielding bond before the call date and as a higher yielding bond after the call date (assuming the bond is still outstanding after the call date). A yield-to-call bond does not cause the issue of which the bond is a part to be treated as a variable yield issue.

In some cases, bonds may be subject to mandatory sinking fund redemption before the final maturity date. If these bonds are issued at a discount, the present value of the bonds on the mandatory early redemption dates would be less than par if the yield-to-maturity were used as the discount rate in computing the present value. If the bonds are not issued at a large discount, the issuer expects to redeem the bonds at par (rather than at a lower market price), and the yield on each bond is actually the composite yield-to-maturity on all the bonds, determined by treating the mandatory early redemption dates and prices as the final maturity dates and prices. This higher composite yield is used as the discount rate in computing the present value of each bond when it is retired (and each bond is treated as maturing on a mandatory redemption date for purposes of computing the present value). The actual yield on the bonds, therefore, is always the composite yield-to-maturity on all the bonds (regardless of when or at what price the bonds are retired). The lower yield-to-maturity is used for purposes of determining the issue payments to be paid if the bonds are issued at a deep discount.

A single loan that provides for partial principal payments before the final principal payment is due is treated as a series of separate bonds that are subject to mandatory early redemption. The yield on the loan is always the composite yield-to-maturity on all the bonds.

C. Special Rule for Small Issues

Unless the issuer otherwise elects, the yield on certain small fixed yield issues is the expected actual yield as of the date of issue. This yield is computed in the same manner as the actual yield, except that the date of issue is treated as the only computation date. Thus, actual facts after the date of issue (including early retirements) are not taken into account.

For this purpose, an issue is a small issue if the aggregate issue price of the bonds is $5 million or less. This amount is increased to $10 million for governmental issues if the aggregate issue price of all tax-exempt bonds (other than private activity bonds) issued by the issuer and certain related issuers during the same and the immediately preceding calendar years is $30 million or less.

The special rule applies only if: (1) It is reasonably expected that no investments (other than purpose investments) will be subject to arbitrage yield restrictions; (2) the issuer at no time enters into a hedging transaction that is taken into account in computing the yield on the issue and that, if taken into account, would increase the rebatable arbitrage; and (3) at least 75 percent of the net sale proceeds are used for a governmental purpose within 3 years of the date of issue. This 3-year requirement is applied in the same way as the net sale proceeds requirement that applies for purposes of the computation date credit.

D. Transition Rule for Fixed Yield Issues

A transition rule provides that, unless the issuer otherwise elects, the yield on a fixed yield issue sold on or before May 15, 1989, and issued on or before June 14, 1989, is the expected actual yield on the issue, computed by treating the date of issue as the only computation date.

This transition rule applies only if: (1) The issuer at no time enters into a hedging transaction that is taken into account in computing the yield on the issue and that, if taken into account, would increase the rebatable arbitrage; and (2) at least 25 percent of the net sale proceeds are used for a governmental purpose within 3 years of the date of issue.

E. Transitioned Variable Yield Bonds

Special rules are provided for determining the issue payments in connection with variable yield bonds that are part of a fixed yield issue. The issue payments paid generally are determined in the same manner as if the issue were a variable yield issue, except that the term of the issue is the yield period. The interest to be paid after a computation date is determined by assuming that market interest rates in effect on the computation date do not later change. If a tender bond converts to a fixed rate, the bond is thereafter treated as a fixed yield bond for purposes of determining the issue payments paid and to be paid.

VII. Computation of Yield on Variable Yield Issue

A. General Rule

The yield on a variable yield issue during a yield period is determined by taking into account the issue payments attributable to the yield period and the issue prices of bonds issued during the yield period. The issue payments attributable to the yield period include the early retirement value of the bonds outstanding at the end of the yield period, and these same bonds are treated as if issued at the beginning of the next yield period for the same value. In effect, the bonds are treated as if retired and reissued at the end of each yield period for purposes of computing the yield.

A variable yield issue may include tender bonds, other variable yield bonds, and fixed yield bonds. Separate rules are provided for each type of bond.

B. Tender Bonds

Variable yield bonds are tender bonds if the holders are entitled to tender the bonds for purchase at par on one or more tender dates, and all interest on the bonds accrues (and is currently paid) at the lowest rate that would permit the bonds to be remarketed at par on each tender date.

The issue payments attributable to a yield period include: (1) Any interest that accrued and was paid during the yield period; (2) the tender price of any bond tendered during the yield period; (3) the par amount of any bond retired during the yield period; and (4) the par amount plus unpaid accrued interest (as of the date the interest is scheduled to be paid) of any bond outstanding at the end of the yield period.

Remarketed bonds are treated as if issued after the close of business on the date remarketed. The issue price should equal (and offset) the tender price if the bond is remarketed on the tender date. A bond outstanding at the end of the yield period is treated as if issued at the beginning of the next yield period for the par amount.

A tender bond that converts to a fixed rate is thereafter treated as a fixed yield bond. The issue payment taken into account with respect to the tender bond is the par amount plus unpaid accrued interest (as of the date the interest is scheduled to be paid). The fixed yield bond is treated as if issued for the par amount.

C. Other Variable Yield Bonds

In the case of all other variable yield bonds, the issue payments attributable to a yield period include: (1) Interest that accrued and was paid during the yield period; (2) the early retirement value of any bond retired before maturity during the yield period; (3) the retirement price of any bond retired at maturity during the yield period; and (4) the early retirement value plus unpaid accrued interest (as of the date the interest is scheduled to be paid) of any bond outstanding at the end of the yield period.

For purposes of applying the yield-to-call and early retirement value rules to these bonds: (1) Interest on a bond that is determined by reference to market interest rates after the date of issue (*e.g.*, by reference to the prime rate of a designated financial institution) is assumed to be paid on the basis of market interest rates as of the date of issue (*e.g.*, the prime rate as of the date of issue is assumed to remain the same throughout the term of the issue); (2) payments for a guarantee are taken into account only for purposes of determining whether the bond is a yield-to-call bond; and (3) the early retirement value on any day is determined without regard to unpaid accrued interest at the assumed rate (*e.g.*, if the early retirement value otherwise would be par plus the present value of the unpaid accrued interest, the early retirement value is par).

A bond (other than a tender bond) that is part of a variable yield issue is a yield-to-call bond if the yield-to-maturity on the bond is higher than the yield-to-call unless the bond is a fixed yield bond or a current index bond. A fixed yield bond or current index bond is a yield-to-call bond only if the yield-to-maturity on the bond is more than one sixteenth percent higher than the yield-to-call. A variable yield bond is a current index bond if all interest on the bond accrues (and is currently paid) at rates that are based on a single interest index or that are fixed and determinable as of the date of issue.

A bond outstanding at the end of a yield period is treated as if issued at the beginning of the next yield period for the early retirement value.

D. Fixed Yield Bonds

The issue payments in connection with fixed yield bonds that are attributable to a yield period generally are determined in the same manner as for fixed yield bonds that are part of a fixed yield issue. The amount treated as an issue payment on the last day of a yield period is the early retirement value (less principal and interest paid that day). The bond is treated as if issued at the beginning of the next yield period for the same value.

E. Conversion to Fixed Yield Issue

Unless the issuer otherwise elects, a variable yield issue is treated as a fixed yield issue as of the first day of a yield period if the issue would be a fixed yield issue if issued that day. For example, if the first yield period for an issue of tender bonds ends on the last day of the third bond year and all the bonds convert to a fixed rate during the third bond year, the issue is treated as a fixed yield issue as of the first day of the fourth bond year. If the first yield period ended on the last day of the fifth bond year, the issue would be treated as a fixed yield issue as of the first day of the sixth bond year. Each bond is treated as if issued for the same amount that would have been taken into account as the issue price if the issue had remained a variable yield issue. The yield on the issue is thereafter computed in the same manner as for a fixed yield issue.

VIII. Allocation and Accounting Rules

A. In General

Section 1.148-4T provides generally that an investment is allocated to an issue for the period: (1) That begins on the date gross proceeds are allocated to the issue and to the investment; and (2) that ends on the date such gross proceeds cease to be allocated to the issue or to the investment. Less than all the gross proceeds may be allocated to the issue in certain cases if the unspent gross proceeds substantially exceed the outstanding amount of the issue.

Most of the rules for allocating gross proceeds to investments and expenditures are reserved. These rules will provide when proceeds of an issue that are not directly used to pay an expenditure may be allocated to the expenditure. In this connection, issuers should be aware that the use of proceeds of an issue to fund an investment fund does not result in a reduction in the amount of the unspent gross proceeds of the issue. Even if the proceeds were allocated to expenditures rather than to the investments in the fund, the investments would still be allocated to gross proceeds (other than the proceeds) if the investment fund is a direct or indirect replacement fund for the issue. Compare, Revenue Ruling 82-101. See, also, section 148(d)(2).

B. Gross Proceeds

Gross proceeds include proceeds and funds (other than proceeds) that are part of a reserve or replacement fund. Proceeds include original, discount, and transferred proceeds. Original proceeds include sale proceeds (amounts received from the sale of the issue) and investment proceeds (amounts received from investing original proceeds). Public comments are invited regarding the appropriate scope of an exception for investment earnings that are commingled with substantial other revenues of the issuer.

The definitions of discount proceeds and reserve or replacement funds are reserved. Discount proceeds may arise in certain cases if the amount of outstanding bonds substantially increases during the term of the issue because the bonds do not pay interest currently. If discount proceeds arise, the proceeds would be allocated to investments or expenditures as appropriate. Reserve or replacement funds include certain pledged and sinking funds that were treated as proceeds under prior law. Issuers should be aware that funds of the issuer or a beneficiary of the financing (or related person) indirectly pledged to pay debt service on the issue are part of a reserve or replacement fund (*e.g.*, funds pledged by an issuer to reimburse a guarantor in the event the guarantor is called upon to make a payment under the guarantee are gross proceeds).

C. Indirect Use

Proceeds of an issue may be used directly to acquire one investment and indirectly to acquire another investment. Any reference in the temporary regulations to proceeds is to be construed to include a reference to proceeds used directly or indirectly. If proceeds are used directly and indirectly, the proceeds are treated as used directly or indirectly (whichever produces the larger amount of rebatable arbitrage).

The indirect use of proceeds of a refunding issue is illustrated in §1.148-8T(d)(9)(ii) (Examples). These examples illustrate that an indirect use occurs if fully fungible dollars are substituted for other fully fungible dollars solely for tax reasons, and the substitution involves a change in the purpose for which the funds are to be used. The indirect use concept in section 148(a) and §1.103-13(b)(1), and the requirement in 1.103-13(f)(4)(ii) that investments purchased with proceeds of a refunding issue must be allocated to such proceeds, implicate and give meaning to one another. A fundamental principle of Federal income taxation is that the substance of a transaction controls if the form of the transaction has no bona fide business purpose other than tax avoidance. This rule applies even when there is no reference to "indirectly" in the Code or regulations.

D. Nonpurpose Investment

Nonpurpose investment includes any taxable investment other than a purpose investment. Purpose investment means any investment (including a tax-exempt bond) that is allocated to gross proceeds of an issue, and that is acquired in order to carry out the governmental purpose of the issue. The use of gross proceeds to make a loan to a borrower in order to carry out the governmental purpose of the issue is not, in itself, an expenditure of the gross proceeds. The use of the gross proceeds by the borrower to finance expenditures is the relevant expenditure. Taxable investments by the borrower prior to actual expenditure of the gross proceeds are nonpurpose investments.

Arbitrage earned on purpose investments is not subject to rebate under section 148(f). In addition, amounts received with respect to purpose investments are not treated as sale or investment proceeds to the extent properly allocated to recoverable administrative costs or to the permitted one eighth percent higher yield.

E. Check Expenditures

An expenditure of proceeds in a checking or similar account may be treated as made on the date a negotiable check is written on the account if the check is delivered or mailed no later than one business day thereafter, and the payor has no reason to believe that the check will not clear within a reasonable period of time. If the check is delivered or mailed more than one business day after it is written, the expenditure may be treated as occurring on the date of delivery or mailing.

F. Refunding Escrows

Allocation rules are provided for excess gross proceeds of a refunded issue. These rules apply for purposes of section 148 generally.

First, excess replacement funds and excess proceeds of a refunded issue are allocated to investments in the escrow that are to be used to discharge the refunded issue. Second, the excess replacement funds and excess proceeds are allocated to investments in the escrow so that these amounts are used to discharge the refunded issue before sale proceeds of the refunding issue are so used. In other words, the refunding proceeds in the escrow are allocated to the investments that are to be used to discharge the latest payments of principal and interest.

Excess replacement funds of a refunded issue generally include gross proceeds (other than proceeds) of the refunded issue that at or around the time of issuance of the refunding issue were part of a sinking fund for the refunded issue and that are not thereafter part of a reasonably required reserve or replacement fund or bona fide debt service fund for the refunded issue or part of a sinking fund for the refunding issue. Excess replacement funds also include all amounts that were accumulated in a bona fide debt service fund for the refunded portion of the refunded issue. No inference is intended that the freeing up of pledged (non-sinking) funds in connection with a refunding cannot involve a replacement.

Excess proceeds of a refunded issue generally include proceeds of the refunded issue that are to be used to discharge principal or interest on the refunded issue, or that were to be used to pay capitalized interest on the refunded portion of the refunded issue.

A transition rule applies (for purposes of section 148(f)) to refunding issues sold on or before May 15, 1989, and issued on or before June 14, 1989. If the transition rule applies, the first allocation rule does not apply, and the second allocation rule applies only to refunding issues issued after August 31, 1986 and to which section 149(d)(4) (relating to abusive advance refunding transactions) applies. If the second allocation rule applies, the rule applies only to excess replacement funds that were gross proceeds of the refunded issue before the refunding and were not part of a reasonably required reserve or replacement fund or used to defease bonds (legally or economically) before the refunding and excess proceeds that were to be used to pay capitalized interest. In addition, the rule applies only for purposes of determining the extent to which proceeds of the refunded issue become transferred proceeds of the refunding issue (not for purposes of determining the rebatable arbitrage with respect to investments of proceeds of the refunding issue other than transferred proceeds).

G. Transferred Proceeds

Section 1.103-14(e)(2)(ii) provides that proceeds of a refunded issue become transferred proceeds of the refunding issue when the refunding proceeds discharge principal of the refunded issue. Unspent and spent proceeds transfer ratably. The transferred proceeds rule has been modified. The new rule applies for purposes of section 148 generally.

Under the new rule, the proceeds of the refunded issue become transferred proceeds of the refunding issue when the refunding proceeds discharge principal or interest on the refunded issue. The same amount of proceeds generally become transferred proceeds as the amount of the proceeds used to discharge such principal or interest. However, in the case of an advance refunding issue to which section 149(d)(4) applies, no transfer occurs on a date to the extent that the transfer would cause the value of the investments allocated to the refunding portion of the refunding issue to exceed by more than 10 percent the value of the outstanding bonds allocated (on a pro rata basis) to the refunding portion of the issue. Unspent proceeds become transferred proceeds before spent proceeds. For this purpose, proceeds invested exclusively in a purpose investment are spent.

The new transferred proceeds rule is simpler. The proceeds are allocated to expenditures on a first-in, first-out basis. The new rule also more accurately reflects the economics of the replacement. To the extent of the unspent proceeds of the refunded issue, the refunding really involves a replacement (rather than a true refunding). The new rule eliminates any benefit from the replacement by eliminating the replacement.

A transition rule applies (for purposes of section 148(f)) to refunding issues sold on or before May 15, 1989, and issued on or before June 14, 1989. If the transition rule applies, the transferred proceeds of the refunding issue are determined as provided in §1.103-14(e)(2)(ii).

The transition rule does not apply to refunding issues issued after August 31, 1986 that (if the transition rule did apply) would be described in section 149(d)(4) (relating to abusive advance refunding transactions). This exception is intended to apply to an advance refunding that was deliberately structured to earn arbitrage profits through employment of the window refunding device described in the legislative history of section 149(d)(4). See, S. Rep. No. 99-313, 99th Cong., 2d Sess. 850, 851 (1986) (Example (4)).

IX. Elections

Elections under the regulations must be in writing and signed by an authorized representative of the issuer no later than the later of: (1) The date of issue; or (2) if the issue is issued on or before November 15, 1989, the first date after June 14, 1989, that any rebate is paid or required to be paid to the United States. An election is not effective unless the election identifies the issue to which it applies and is maintained as part of the official transcript of the proceedings relating to the issuance. Elections, once made, generally are not revocable.

X. Rules Applicable for Section 148 Generally

Section 1.148-9T provides that the following rules apply for purposes of section 148 generally:

1. The rules for computing the yield on a fixed yield issue apply for purposes of section 148(a) and (d)(3). For this purpose, the date of issue is treated as the only computation date.

2. For purposes of section 148, the yield on nonpurpose investments not purchased with gross proceeds (*e.g.*, investments purchased before the date of issue and contributed to a debt service reserve fund for the issue) is determined on the basis of the same purchase price that is used for purposes of computing the rebatable arbitrage (*e.g.*, a purchase price equal to the fair market value of the investment on the date the investment is allocated to the gross proceeds).

3. The special refunding allocation rules and transferred proceeds rule apply for purposes of section 148. In addition, receipts imputed to an investment in an escrow are treated as interest on the investment for purposes of section 148.

4. A rule that provides that certain perpetual trust funds are not treated as reserve or replacement funds applies for purposes of section 148.

5. The definition of investment property applies for purposes of section 148.

Section 1.148-9T generally applies to issues sold after May 15, 1989, or issued after June 14, 1989.

XI. Abusive Advance Refunding Transactions

Section 149(d)(4) provides that interest on a bond is not tax-exempt if any bond that is part of the issue is issued to advance refund another bond and a device is employed in connection with the issuance to obtain any material financial advantage (based on arbitrage) apart from savings attributable to lower interest rates. Advance refundings are sophisticated financial transactions that present serious potential for arbitrage abuse. Section 1.149(d)-1T(d)(2) provides that any issue to which section 149(d)(4) and the rebate requirement apply that fails to meet the rebate requirement is issued in connection with such a device.

XII. Definitions and Special Rules Relating to Tax-Exempt Bond Requirements in General

Section 1.150-1T includes definitions that apply for purposes of the regulations under sections 141 through 150 except to the extent otherwise provided. These definitions include: (1) definitions of private activity bond, fixed yield bond, variable yield bond, tender bond, and current index bond; and (2) definitions of sale date, date of issue, and final maturity date.

Regulatory Impact Analysis

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

* * * * * *

Adoption of amendments to the regulations

For the reasons set forth in the preamble, Parts 1 and 602 of Title 26, Code of Federal Regulations, are amended as set forth below:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C 7805. * * * Sections 1.148-0T through 1.148-9T also issued under 26 U.S.C. 148(f) and (i). Section 1.149(d)-1T also issued under 26 U.S.C. 149(d)(7).

Par. 2. Sections. 1.148-0T through 1.148-9T and sections 1.149(d)-1T, 1.150-0T and 1.150-1T are added in the appropriate places. The new sections read as follows:

§1.148-0T Scope and effective date of restrictions on arbitrage (temporary).

(a) *Scope*—(1) *In general.* The provisions of §§1.148-1T through 1.148-9T prescribe temporary regulations under section 148. The Federal income tax exemption of interest on State and local bonds under section 103(a) enables State and local governments to borrow at lower interest rates than taxable issuers. This lower interest rate enables State and local governments to finance their governmental activities at significantly less cost. The lower interest rate also provides the potential to benefit from tax arbitrage by investing proceeds of the bonds in taxable investments. The principal purpose of section 148 is to eliminate significant arbitrage incentives to issue more bonds, to issue bonds earlier, and to leave bonds outstanding longer than necessary to carry out the governmental purpose of the tax-exempt issue. A secondary purpose of section 148 is to minimize the tax arbitrage benefit associated with investing proceeds of the bonds in taxable investments. Minimizing this tax benefit targets the tax benefits to the activities for which the tax exemption is provided. If a State or local bond is an arbitrage bond (within the meaning of section 148), interest on the bond is not excluded from gross income under section 103(a). See section 103(b)(2).

(2) *Arbitrage bond defined.* Section 148(a) provides generally that the term "arbitrage bond" means any bond issued as part of an issue any portion of the proceeds of which is reasonably expected (at the time of issuance of the bond) to be used to acquire higher yielding investments or to replace funds that were used to acquire such investments. In addition, a bond is treated as an arbitrage bond if the issuer at any time intentionally uses any portion of the proceeds of the issue in such manner. Section 148(b) provides generally that the term "higher yielding investments" means investments (other than certain tax-exempt bonds) that produce a yield over the term of the issue that is materially higher than the yield on the issue. Section 148 (c), (d), and (e) provide exceptions for proceeds invested for a reasonable temporary period, as part of a reasonably required reserve or replacement fund, and as part of a minor portion.

(3) *Required rebate to the United States.* Section 148(f) provides generally that a bond that is part of an issue shall be treated as an arbitrage bond unless the issuer rebates to the United States arbitrage profits earned from investing in nonpurpose investments. Section 148(f)-(6) provides generally that the term "nonpurpose investment" means any investment (other than certain tax-exempt bonds) that is acquired with gross proceeds of the issue, and that is not acquired in order to carry out the governmental purpose of the issue. Section 148(f)(4) provides exceptions for certain 6-month temporary investments and for small issuers with general taxing powers. Section 148(f) does not apply to qualified veterans' mortgage bonds, or to qualified mortgage bonds issued on or before December 31, 1988.

(4) *Reserve or replacement fund financing limitation.* Section 148(d)(2) provides generally that a bond that is part of an issue shall be treated as an arbitrage bond if the amount of the sale proceeds of the issue that is part of a reserve or replacement fund exceeds 10 percent of the proceeds of the issue. This limitation restricts overissuance of tax-exempt bonds in order to obtain significant financial advantages through exploitation of the interest rate differential between the tax-exempt issue and a comparable taxable issue. See also section 149(d) (relating to additional restrictions on advance refundings) and section 149(f) (relating to additional restrictions on pooled financings).

(5) *Nonpurpose investment yield restriction.* Section 148(d)(3) provides generally that a private activity bond (other than a qualified 501(c)(3) bond) that is part of an issue shall be treated as an arbitrage bond if the amount invested during any bond year in nonpurpose investments with a yield materially higher than the yield on the issue exceeds 150 percent of the debt service on the issue for the bond year.

(b) *Effective dates*—(1) *In general*—(i) *1986 Reform Act.* Section 148 was added to the Internal Revenue Code by section 1301 of the Tax Reform Act of 1986 (hereinafter in this section referred to as the "1986 Act"). The restrictions on arbitrage formerly were contained in section 103(c) of the 1954 Code. Regulations under section 103(c) are contained in §§1.103-13, 1.103-14, 1.103-15, and 1.103-15AT.

(ii) *General effective date.* The amendments made by section 1301 of the 1986 Act (including the provisions of section 103 and section 148) generally apply to any bond issued after—

(A) August 15, 1986 if the bond is not a governmental bond described in section 1312(c)(2) of the 1986 Act; and

(B) August 31, 1986 if the bond is a governmental bond described in section 1312(c)(2).

See section 1311(a) and section 1312(c) of the 1986 Act.

(iii) *General transition rules.* In the case of a bond to which the amendments made by section 1301 of the 1986 Act do not apply solely by reason of section 1312(a) (relating to construction or binding agreements) or section 1313(a) or (b) (relating to certain current or advance refundings), the requirements of section 148 are treated as included in section 103 of the 1954 Code. See section 1312(b)-(1)(H) and section 1313(a)(3)(C) and (b)(3)(C) of the 1986 Act. If a bond to which section 148 applies by reason of such provisions is treated as an arbitrage bond under section 148, interest on the bond is not excluded from gross income under section 103(a) of the 1954 Code.

(2) *Required rebate*—(i) *Bonds issued before general effective date or pursuant to special transition rules.* Under section 1314(d) of the 1986 Act, section 103 of the 1954 Code is treated as including the requirements of section 148(f) in order for section 103(a) of the 1954 Code to apply in the case of any bond issued after—

(A) December 31, 1985 if the bond is not a governmental bond described in section 1312(c)(2) of the 1986 Act;

(B) 3 p.m. E.D.T., July 17, 1986 if the bond is a governmental pool bond described in section 1312(c)(2) and section 1314(d)(3); and

(C) August 31, 1986 if the bond is a governmental bond described in section 1312(c)(2) and is not a governmental pool bond described in section 1314(d)(3).

No provision of subtitle B of Title XIII of the 1986 Act overrides the provisions of section 1314(d) unless the provision expressly refers to section 148(f). See section 1314(i) of the 1986 Act.

(ii) *Bonds to which §§1.148-1T through 1.148-8T apply*—(A) *In general.* Except as otherwise provided, the provisions of §§1.148-1T through 1.148-8T apply to any bond to which section 148(f) applies.

(B) *Certain retired issues.* The provisions of §§1.148-1T through 1.148-8T shall not apply to any bond that is part of an issue if—

(*1*) The last bond that is part of the issue is discharged on or before May 15, 1989; and

(*2*) The issuer in good faith determines the amount described in section 148(f)(2) (if any) and pays such amount to the United States no later than the later of May 15, 1989, and the date 60 days after the last bond that is part of the issue is discharged.

(C) *Election in.* In the case of a bond to which section 148(f) does not apply and to which section 103(c)(6)(D) of the 1954 Code applies, the issuer may elect to apply the provisions of §§1.148-1T through 1.148-8T (in lieu of the provisions of §1.103-15AT(d)) for purposes of determining whether the bond meets the requirements of section 103(c)(6)(D) of the 1954 Code. See §1.148-8T(h) for elections.

(3) *Bonds to which §§1.148-9T applies.* Section 1.148-9T provides that certain provisions of §§1.148-1T through 1.148-8T apply for purposes of section 148 generally. Section 1.148-9T generally applies to any bond sold after May 15, 1989, or issued after June 14, 1989.

(c) *Cross reference.* See §1.148-8T for definitions and special rules relating to required rebate. See §1.150-1T for definitions and special rules relating to tax-exempt bond requirements in general.

(d) *List of subjects.* This paragraph (d) lists the paragraphs, subparagraphs, and subdivisions contained in §§1.148-1T through 1.148-9T.

(ii) Yield-to-call bond.
(5) Bond yield.
(i) In general.
(ii) Yield-to-maturity.
(iii) Lowest yield.
(6) Retirement prices.
(i) In general.
(ii) Stated retirement price.
(7) Early retirement value.
(i) In general.
(ii) Tender bond.
(iii) Special rules for certain discount bonds subject to mandatory early redemption.
(8) Present value.
(i) In general.
(ii) Discount rate, etc.
(iii) Approximate method.
(iv) Special present value for large fixed yield issues.
(9) Special rules for variable yield bonds.
(10) Actually paid.
(i) In general.
(ii) Unconditionally payable.
(11) Compounding interval.
(i) Bond.
(ii) Issue.
(12) Qualified guarantees.
(i) In general.
(ii) Guarantee.
(iii) Reasonable charge.
(iv) Nonguarantee element.
(v) Purpose investment bond guarantee.
(vi) When payments coincide.
(vii) Special rule for parity issues.
(viii) Eligible purpose investment.
(ix) Transition rule.
(13) Special rules for guarantee payments.
(i) Allocation to bonds.
(ii) Special rules for variable yield bonds.
(iii) Definitions and special rules.
(14) Certain hedging transactions. [Reserved]
(c) Computation of yield on fixed yield issue.
(1) General rule.
(i) Issue payments.
(ii) Issue prices.
(2) Determination of issue payments paid.
(i) Principal and interest.
(ii) Qualified guarantee.
(iii) Early retirement value.
(iv) Retirement price.
(3) Determination of issue payments to be paid.
(i) Scheduled early retirements.
(ii) Optional retirements.
(4) Special rule for small issues.
(i) In general.
(ii) Eligible small issue.
(5) Transition rule for fixed yield issues.
(6) Special rules for transitioned variable yield bonds.
(i) Issue payments paid.
(ii) Issue payments to be paid.
(iii) Tender bond remarketing.
(7) Examples.
(d) Computation of yield on variable yield issue.
(1) General rule.
(i) Issue payments.
(ii) Issue prices.
(2) Variable yield bonds.
(i) Issue payments.
(ii) Issue prices.
(3) Fixed yield bonds.
(i) Issue payments.
(ii) Issue prices.
(4) Examples.

§1.148-4T Allocation and accounting rules (temporary).

(a) General rule.
(b) Allocation of gross proceeds to issue. [Reserved]
(c) Allocation of gross proceeds to expenditures.
(1) In general. [Reserved]
(2) Expenditures from checking account.
(d) Allocation of gross proceeds to investments. [Reserved]
(e) Special allocation rules for refundings.
(1) Allocation of excess gross proceeds of refunded issue.
(i) Allocation of excess gross proceeds to escrow.
(ii) Allocation of excess gross proceeds in escrow.
(iii) Excess replacement funds.
(iv) Excess proceeds.
(v) Transition rule.
(2) Transferred proceeds.
(i) In general.
(ii) Special rules.
(iii) Transition rule.

§1.148-5T Transactions giving rise to imputed receipts (temporary).

(a) In general. [Reserved]
(b) Certain temporary investment accounts.
(1) No receipt imputed.
(2) Bond yield limit.
(3) Qualified accounts.
(i) Nonpurpose receipt account.
(ii) Purpose receipt account.
(iii) Checking account.
(iv) Disqualified account.
(4) Aggregation of accounts.
(5) Gross proceeds.
(c) Certain imputed escrow receipts.
(1) Defeasance receipt.
(i) In general.
(ii) Interest saving.
(iii) Transition rule.
(iv) Savings treated as paid in computing yield on defeased bond.
(2) Excess tax-exempt receipt.
(i) In general.
(ii) Excess receipts.
(3) Escrow.
(4) Examples.

§1.148-6T 6-month temporary investment exception and other special rules (temporary). [Reserved]

§1.148-7T Exception for small issuers with general taxing powers (temporary). [Reserved]

§1.148-8T Definitions and special rules relating to required rebate (temporary).

(a) Applicability.
(b) Computations and determinations.
(1) Computation dates.
(i) In general.
(ii) Installment date.
(iii) Final date.
(iv) Other date.
(2) Bond year.
(3) Discharge.
(4) Actual facts.
(5) Present value.
(6) Conventions.
(i) Whole intervals.
(ii) Short intervals.
(iii) Yield.
(iv) Other conventions.
(c) Issue price.
(1) In general.

(2) Special rules.
(i) Reasonable expectations.
(ii) Bonds offered at a discount.
(iii) Bona fide offering required.
(iv) Tender bond remarketing.
(3) Fair market value limit.
(4) Aggregate issue price.
(d) Gross proceeds.
(1) In general.
(2) Proceeds.
(3) Original proceeds.
(4) Sale proceeds.
(5) Investment proceeds.
(6) Net sale proceeds.

(3) Investment property.

§1.148-1T Required rebate to the United States (temporary).

(a) *General rule.* Under section 148(f) and this section, any bond that is part of an issue shall be treated as an arbitrage bond (within the meaning of section 148) if the requirements of this section are not met with respect to the issue. This section does not apply to any qualified veterans' mortgage bond, or to any qualified mortgage bond issued on or before December 31, 1988. See §1.148- 0T for scope and effective date. See §1.148-6T for 6-month temporary investment exception. See §1.148-7T for exception for small issuers with general taxing powers. See §1.148-8T for definitions and special rules relating to required rebate. See §1.150-1T for definitions and special rules relating to tax-exempt bond requirements in general.

(b) *Required rebate*—(1) *General rule*—(i) *In general.* Except as otherwise provided in paragraph (b)(1)(ii) of this section, an issue meets the requirements of this section if—

(A) *Rebate installments.* At least 90 percent of the rebatable arbitrage as of each installment computation date; and

(B) *Final rebate.* All the rebatable arbitrage as of the final computation date and any income attributable to such rebatable arbitrage;

is paid to the United States in accordance with the requirements of paragraph (b)(3) of this section. See §1.148-8T(b)(1) for definitions of installment and final computation date. See §1.148-2T for computation of rebatable arbitrage. See paragraph (b)(2) of this section for income included in final rebate.

(ii) *Refunding issues.* A refunding issue shall not be treated as meeting the requirements of this section unless—

(A) Each tax-exempt refunded issue to which this section, §1.103-15AT(d), or §6a.103A-2(i)(4) applies; and

(B) If the refunding issue is part of a series of refundings, each tax-exempt refunded issue in the series and to which this section, §1.103-15AT(d), or §6a.103A-2(i)(4) applies;

meets the requirements of this section, §1.103-15AT(d), or §6a.103A-2(i)(4) (whichever applies).

(2) *Income included in final rebate.* For purposes of this section—

(i) *In general.* Except as otherwise provided in paragraph (b)(2)(iv) of this section, the income attributable to the rebatable arbitrage is—

(A) To the extent amounts are identified under a reasonable accounting system as the rebatable arbitrage and invested at an arm's length interest rate during the final payment period, the amount earned from investing such amounts during the final payment period; and

(B) To the extent amounts are not so identified or invested, the amount that would have been earned if such amounts had been so identified and were invested during the final payment period at the final payment rate.

(ii) *Final payment period.* The final payment period begins on the final computation date and ends on the date 15 days before the final rebate is paid. Such period shall not include any day after the final rebate is required to be paid.

(iii) *Final payment rate.* The final payment rate is the maximum interest rate (with interest compounded and added to principal semiannually) in effect on the final computation date for a SLG with a term equal to the longer of the final payment period and 30 days. If the final rebate is paid no later than January 16, 1990, such rate shall not exceed the average of the maximum interest rates in effect on the first business day of each month during the final payment period for a SLG with a term of 60 days.

(iv) *De minimis rule.* No income shall be attributable to the rebatable arbitrage if—

(A) The amount described in paragraph (b)(2)(i) of this section is less than $300; and

(B) The final rebate is paid no later than 60 days after the final computation date.

If the final rebate is paid no later than January 16, 1990, paragraph (b)(2)(iv)(A) shall be applied by substituting "less than $1000" for "less than $300", and paragraph (b)(2)(iv)(B) shall not apply.

(3) *Payment of required rebate.* For purposes of this section—

(i) *Rebate installments.* Each rebate installment is required to be paid no later than the date 60 days after the installment computation date.

(ii) *Final rebate.*The final rebate is required to be paid no later than the latest of—

(A) The date 60 days after the final computation date;

(B) The date 8 months after the date of issue; and

(C) The earlier of the date the issuer no longer reasonably expects section 148(f)(4)(B) (relating to temporary investment exception) to apply to the issue, and the date 14 months after the date of issue.

In no event shall such date be earlier than January 16, 1990.

(iii) *De minimis rule.* Each rebate installment and the final rebate may be rounded down to the nearest multiple of $100. For example, $793,785.86 is rounded to $793,700. Any amount less than $100 is rounded to zero.

(iv) *Series of issues.* [Reserved]

(v) *Method of payment.* A rebate or correction amount is paid when filed with the Internal Revenue Service Center, Philadelphia, Pennsylvania 19255. The payment shall be accompanied by Form 8038-T if the payment is filed after such form has been made generally available. Prior to such time, the payment should be accompanied by a statement identifying the issuer and the issue with respect to which the rebate or correction amount is paid and a copy of the Form 8038, 8038-G, or 8038-GC filed with respect to the issue (if such form is required to be filed). The statement should include the Committee on Uniform Security Identification Procedures (CUSIP) number for the bond with the latest maturity for which there is a CUSIP number.

(c) *Certain failures not to result in loss of tax exemption.* For purposes of this section—

(1) *Innocent failures may be corrected without penalty*—(i) *In general.* An issue shall be treated as meeting the requirements of this section notwithstanding an innocent failure to meet a requirement if the issuer pays the correction amount to the United States in the manner provided in paragraph (b)(3)(v) of this section no later than the date that is—

(A) 60 days after the later of the date the failure first occurred or is discovered if the correction amount is $50,000 or more; or

(B) 180 days after the later of the date the failure first occurred or is discovered if the correction amount is less than $50,000.

The Commissioner may extend the time specified in this paragraph (c)(1)(i) if the correction amount is less than $50,000, or if the issuer files a request for extension before the expiration of such time.

(ii) *Innocent failure*—(A) *In general.* Factors to be taken into account in determining whether a failure is innocent include the size of the correction amount, the size of the issue, the sophistication of the issuer (or ultimate obligor), the steps taken to comply, the nature of the failure, and the length of the delay.

(B) *Explanation required.* If the correction amount is $50,000 or more, a failure shall be treated as innocent only if the correction amount is accompanied by a brief explanation of the failure and basis for concluding that the failure is innocent.

(C) *Safe harbor.* A failure shall be treated as innocent if—

(*1*) The correction amount is paid no later than the date specified in paragraph (c)(1)(i) of this section;

(*2*) If the correction amount is $50,000 or more, the brief explanation required under paragraph (c)(1)(ii)(B) of this section is reasonably accurate; and

(*3*) The Commissioner does not notify the issuer within 90 days after the receipt of the correction amount that this paragraph (c)(1)(ii)(C) shall not apply.

This paragraph (c)(1)(ii)(C) shall not apply to a failure if the issue is under examination by the Commissioner at any time during the period beginning on the date the failure first occurred and ending on the date 90 days after the receipt of the correction amount.

(iii) *Aggregation rule.* If an issue fails to meet more than one of the requirements of this section as of a date, all the failures as of such date shall be treated as one failure and all the correction amounts shall be treated as one correction amount for purposes of applying this paragraph (c)(1).

(2) *Correction amount*—(i) *In general.* Except as otherwise provided in paragraph (c)(2)(ii) of this section, the correction amount with respect to a failure is the sum of—

(A) The amount of the rebate not paid when required; and

(B) The amount that would have been earned if such amount had been invested during the correction period at the correction rate.

(ii) *Installment failure*—(A) *Corrected on or before final computation date.* The correction amount with respect to a failure to pay a rebate installment that is corrected on or before the final computation date shall not be less than the future value (as of the date the correction amount is paid) of the amount of the rebate installment not paid when required. Future value is determined as provided in §1.148-2T(c)(1) by treating the first interval as beginning on the date the rebate installment was required to be paid and the last interval as ending on the date the correction amount is paid.

(B) *Corrected after final computation date.* The correction amount with respect to a failure to pay a rebate installment that is corrected after the final computation date shall not be less than the sum of—

(*1*) The amount described in paragraph (c)(2)(ii)(A) of this section (determined as if the correction amount was paid on the final computation date); and

(*2*) The amount that would have been earned on such amount after the final computation date and during the correction period if such amount had been invested at the correction rate (determined as if the correction period began on the final computation date).

(iii) *Correction period.* The correction period begins on the date the rebate is required to be paid and ends on the date 7 days before the correction amount is paid.

(iv) *Correction rate.* The correction rate is the maximum interest rate (with interest compounded and added to principal semiannually) in effect on the first business day of the correction period for a SLG with a term equal to the longer of the correction period and 30 days. In the case of a failure to pay the final rebate, such rate shall not be less than the maximum interest rate in effect on the final computation date for a SLG with a term equal to the final payment period and correction period.

(3) *Payment of penalty in lieu of loss of tax exemption.* An issue that (but for this paragraph (c)(3)) would fail to meet a requirement of this section shall be treated as meeting such requirement if (and only if)—

(i) The Commissioner determines that the failure is not due to willful neglect; and

(ii) The issuer pays to the United States no later than the date specified by the Commissioner in such determination—

(A) The correction amount; and

(B) A penalty equal to the sum of—

(*1*) 50 percent of the amount of the rebate not paid when required (100 percent if any bond that is part of the issue is a private activity bond other than a qualified 501(c)(3) bond); and

(*2*) Interest on the amount of the rebate not paid when required for the period beginning on the date the rebate was required to be paid (at the underpayment rate established under section 6621 and the regulations thereunder).

The Commissioner may waive all or any portion of the penalty under paragraph (c)(3)(ii)(B) of this section.

(d) *Recovery of overpayment.* [Reserved]

(e) *Exemption from gross income of sum rebated.* [Reserved]

§1.148-2T Computation of rebatable arbitrage (temporary).

(a) *General rule.* The rebatable arbitrage with respect to an issue as of any computation date is the excess of—

(1) *Nonpurpose receipts.* The future value of all the nonpurpose receipts with respect to the issue; over

(2) *Nonpurpose payments.* The future value of all the nonpurpose payments with respect to the issue.

Future value is computed as of the computation date. See paragraph (b) of this section for determination of nonpurpose receipts and payments. See paragraph (c) of this section for computation of future value. See §1.148-6T for 6-month temporary investment exception and other special rules. See §1.148-8T for definitions and special rules relating to required rebate. See §1.150-1T for definitions and special rules relating to tax-exempt bond requirements in general.

(b) *Determination of nonpurpose receipts and payments*—(1) *In general.* For purposes of paragraph (a) of this section, any receipt or payment with respect to a nonpurpose investment allocated to an issue is a nonpurpose receipt or payment with respect to such issue. See §1.148-4T for allocation and accounting rules.

(2) *Receipts.* For purposes of this section—

(i) *Actual receipt.* The term "receipt" means, with respect to an investment allocated to an issue, any amount actually or constructively received with respect to the investment. Receipts are not reduced by selling commissions, administrative expenses, or similar expenses. See §1.451-2 for examples of constructive receipt.

(ii) *Disposition receipt.* An investment that ceases to be allocated to an issue other than by reason of a sale or retirement shall be treated as if sold on the date of such cessation for fair market value. For example, an investment allocated to an issue on the final computation date is treated as if sold for fair market value on such date. See paragraph (d) of this section for determination of fair market value. This paragraph (b)(2)(ii) shall not apply for purposes of computing the present value of an investment under paragraph (e) of this section.

(iii) *Installment date receipt.* For purposes of applying paragraph (a)(1) of this section on an installment computation date, the fair market value of all nonpurpose investments allocated to the issue at the close of business on such date shall be taken into account as a nonpurpose receipt with respect to the issue as of such date. The preceding sentence may be applied on any installment computation date to all fixed rate investments by substituting "present value" for "fair market value". See paragraph (e) of this section for computation of present value.

(iv) *Rebate receipt.* Any amount recovered with respect to an issue under §1.148-1T(d) shall be treated as a nonpurpose receipt with respect to the issue.

(v) *Imputed receipt.* Any imputed receipt with respect to an investment shall be treated as a receipt with respect to such investment. See §1.148-5T for transactions giving rise to imputed receipts.

(3) *Payments.* For purposes of this section—

(i) *Direct payment.* The term "payment" means, with respect to an investment allocated to an issue, the amount of gross proceeds of the issue to which the investment is allocated directly used to purchase the investment. Payments do not include brokerage commissions, administrative expenses, or similar expenses.

(ii) *Constructive payment.* An investment that was not directly purchased with gross proceeds of the issue to which the investment is allocated shall be treated as if directly purchased with such gross proceeds for fair market value on the date so allocated. For example, an investment in a reserve fund that was not purchased with gross proceeds allocated to the issue is treated as if purchased with such gross proceeds for fair market value on the date the investment is allocated to the issue.

(iii) *Rebate payment.* Any payment of rebatable arbitrage with respect to an issue as provided in §1.148-1T(b)(3)(v) no later than the date required under §1.148-1T(b)(3)(i) shall be treated as a nonpurpose payment with respect to the issue.

(iv) *Coordination with correction amount.* The amount of any rebate installment with respect to an issue required to be paid under §1.148-1T(b)-(1)(i)(A) but not paid by the date required under §1.148-1T(b)(3)(i) shall be treated as a nonpurpose payment with respect to the issue as of the date the amount is required to be paid.

(4) *Computation date credit*—(i) *In general.* For purposes of paragraph (a)(2) of this section, the computation date credit on each eligible computation date shall be treated as a nonpurpose payment with respect to the issue as of such date.

(ii) *Credit amount.* The computation date credit with respect to an issue on an eligible computation date is—

(A) $1,000 if the aggregate issue price of the bonds that are part of the issue and outstanding immediately before such date is more than $5 million;

(B) $625 if the aggregate issue price of such bonds is more than $1 million but not more than $5 million; and

(C) $250 if the aggregate issue price of such bonds is not more than $1 million.

(iii) *Eligible computation date.* For purposes of this paragraph (b)(4), a computation date is an eligible computation date unless—

(A) Such date is less than one year after the immediately preceding computation date (or the date of issue if such date is the first computation date); or

(B) Less than 75 percent of the net sale proceeds have been allocated to expenditures (other than expenditures for the payment of the principal or interest on or the retirement price of any bond) no later than such date. See §1.148-8T(d)(6).

(5) *Certain lower yielding investments not taken into account*—(i) *Advance refunding escrows*—(A) *In general.* For purposes of paragraph (b)(1) and (b)(2)(iii) of this section, investments in advance refunding escrows shall not be treated as nonpurpose investments as of a computation date if the rebatable arbitrage as of such date (with regard to such investments) is lower than the rebatable arbitrage as of such date (without regard to such investments). For purposes of this section, any investment allocated to an issue that ceases to be in an advance refunding escrow (but does not cease to be allocated to the issue) shall be treated as if sold and purchased for present value at the time of such cessation. The receipt arising from such sale shall be treated as a receipt with respect to the investment in the advance refunding escrow, and the payment arising from such purchase shall be treated as a payment with respect to the investment that is not in the advance refunding escrow. See §1.148-8T(g)(5) (Examples).

(B) *Excess proceeds escrows.* For purposes of paragraph (b)(5)(i)(A) of this section, an investment in an excess proceeds escrow shall be treated as in an advance refunding escrow if the investment is a transferred investment. For purposes of this section, an investment shall be treated as if sold and purchased for fair market value at the time the investment is first in an excess proceeds escrow. The receipt arising from such sale shall be treated as a receipt with respect to the investment that is not in the excess proceeds escrow, and the payment arising from such purchase shall be treated as a payment with respect to the investment in the excess proceeds escrow. The preceding two sentences shall not apply if the second sentence of paragraph (b)(5)(i)(A) of this section applies to the investment at such time. See §1.148-8T(g)(5) (Examples).

(ii) *Certain reserve or replacement funds*—(A) *In general.* For purposes of paragraph (b)(1) and (b)(2)(iii) of this section, investments allocated to gross proceeds (other than proceeds) that are part of a reserve or replacement fund (other than a reasonably required reserve or replacement fund or bona fide debt service fund) shall not be treated as nonpurpose investments as of a computation date if the rebatable arbitrage as of such date (with regard to such investments) is lower than the rebatable arbitrage as of such date (without regard to such investments).

(B) *Special rule where necessary to blend down.* If investments allocated to a refunding issue and described in paragraph (b)(5)(ii)(A) of this section are at all times (to the extent practicable) invested in SLGs that pay no interest for the purpose of reducing the yield on transferred investments to which paragraph (b)(5)(i) of this section applies, paragraph (b)(5)(ii)(A) shall not apply to such investments, and such investments shall be treated as investments in an advance refunding escrow for purposes of this section. In the case of an issue sold on or before May 15, 1989, and issued on or before June 14, 1989, the preceding sentence shall be applied by substituting "invested in SLGs" for "invested in SLGs that pay no interest".

(c) *Computation of future value*—(i) *In general.* For purposes of paragraph (a) of this section, the future value of a nonpurpose receipt or payment at the end of any interval is determined by using the following formula:

$$FV = PV\,(1 + i)^n$$

where:

FV = The future value of the nonpurpose receipt or payment at the end of the interval. Each interval ends on the last day of a compounding interval. The compounding interval is the same compounding interval used in computing the yield on the issue.

PV = The future value of the nonpurpose receipt or payment at the beginning of the interval or the amount thereof if the computation is for the first interval. The first interval begins on the date the nonpurpose receipt or payment is actually or constructively received or paid (or otherwise is taken into account). The amount of every nonpurpose receipt and payment with respect to an issue that is taken into account at the beginning of the first interval may be rounded to the nearest whole dollar. The preceding sentence shall not apply to receipts and payments with respect to investments in a restricted escrow.

i = The yield on the issue during the interval (expressed as a decimal) divided by the number of compounding intervals in a year. See §1.148-3T for computation of yield on issue.

n = A fraction, the numerator of which is the length of the interval, and the denominator of which is the length of a whole compounding interval. See §1.148-8T(b)(6) for computation conventions.

(2) *Examples.* The following examples illustrate the application of this paragraph (c):

Example (1). (i) On January 15, 1987, City A issues a fixed yield issue (as defined in §1.148-3T(b)(1)). The compounding interval is each 6-month (or shorter) period ending July 1 and January 1, and the bond year is each 1-year (or shorter) period ending January 1. See §1.148-8T(b)(2). On January 15, 1987, City A invests all the sale proceeds of the issue ($49 million, consisting of the $50 million issue price, less underwriters' discount of $1 million) in shares of a widely held mutual fund to which section 852 applies. The mutual fund does not pay exempt interest dividends. The only investment proceeds of the issue are the daily cash dividends paid on the mutual fund shares, which are reinvested each day in additional mutual fund shares, and amounts received from redemption of the mutual fund shares. Assume there are no other gross proceeds.

(ii) City A redeems the mutual fund shares and expends the gross proceeds for the governmental purpose of the issue as follows:

Date	*Amount*
2/01/87	$2,000,000.00
4/01/87	5,000,000.00
6/01/87	15,000,000.00
9/01/87	20,000,000.00
1/01/88	9,000,000.00

(iii) The first installment computation date is January 1, 1992. See §1.148-8T(b)(1)(ii). The yield on the issue as of the first installment computation date is 7.000 percent per annum compounded semiannually (computed on a 30 day month/360 day year basis). The rebatable arbitrage as of the first installment computation date is $161,590.75, computed as follows:

Date	*Receipts (Payments)*	*FV (7.000%)*
1/15/87	$(49,000,000.00)	$(68,934,646.17)
2/01/87	2,000,000.00	2,805,068.27
4/01/87	5,000,000.00	6,932,714.69
6/01/87	15,000,000.00	20,561,011.00
9/01/87	20,000,000.00	26,947,161.62
1/01/88	9,000,000.00	11,851,281.33
1/01/92	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/92)	$	161,590.75

The initial $49 million investment and each daily reinvestment of a cash dividend is a nonpurpose payment. See paragraph (b)(3)(i) of this section. Each daily cash dividend and each amount received from redemption of the mutual fund shares is a nonpurpose receipt. See paragraph (b)(2)(i) of this section. Each nonpurpose receipt arising from a daily cash dividend can be netted against the nonpurpose payment arising from the reinvestment of that dividend. Accordingly, the above computation reflects only the initial $49 million nonpurpose payment, the 5 nonpurpose receipts arising from the mutual fund share redemptions, and the $1,000 computation date credit under paragraph (b)(4) of this section.

(iv) City A pays 90 percent of the rebatable arbitrage ($145,431.68) to the United States on February 28, 1992. City A redeems all the bonds on January 1, 1994. The final computation date is January 1, 1994. See §1.148-8T(b)(1)(iii). The yield on the fixed yield issue as of the final computation date is 6.500 percent per annum compounded semiannually. This yield is used to future value the receipts and payments from the date of issue to the final computation date. See paragraph (c)(1) of this section. The rebatable arbitrage as of the final computation date is $217,090.69, computed as follows:

Date	*Receipts (Payments)*	*FV (6.500%)*
1/15/87	$(49,000,000.00)	$(76,485,055.58)
2/01/87	2,000,000.00	3,112,976.41
4/01/87	5,000,000.00	7,699,913.01
6/01/87	15,000,000.00	22,854,780.43
9/01/87	20,000,000.00	29,989,605.98
1/01/88	9,000,000.00	13,210,621.00
1/01/92	(1,000.00)	(1,136.48)
2/28/92	(145,431.68)	(163,614.11)
1/01/94	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/94)	$	217,090.69

Example (2). (i) The facts are the same as in Example (1), except that the issue is a variable yield issue (as defined in §1.148-3T(b)(2)). The yield on the variable yield issue during the first yield period (the period beginning on the date of issue and ending on the first installment computation date) is 7.000 percent per annum compounded semiannually. The rebatable arbitrage as of the first installment computation is the same as in Example (1)(iii) ($161,590.75).

(ii) City A pays 90 percent of the rebatable arbitrage ($145,431.68) to the United States on February 28, 1992. The yield on the variable yield issue during the second yield period (the period beginning after the close of business on the first installment computation date and ending on the final computation date, 1/01/94) is 6.500 percent per annum compounded semiannually. This yield is used to future value the receipts and payments after the first installment computation date (1/01/92). See paragraph (c)(1) of this section. The rebatable arbitrage as of the final computation date is $19,029.89, computed as follows:

Date	*Receipts (Payments)*	*FV (7.000/6.500%)*
1/15/87	$(49,000,000.00)	$(78,342,565.99)
2/01/87	2,000,000.00	3,187,892.56
4/01/87	5,000,000.00	7,878,863.36
6/01/87	15,000,000.00	23,367,094.06
9/01/87	20,000,000.00	30,624,800.52
1/01/88	9,000,000.00	13,468,695.95
1/01/92	(1,000.00)	(1,136.48)
2/28/92	(145,431.68)	(163,614.11)
1/01/94	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/94)	$	19,029.89

Alternatively, the rebatable arbitrage as of the final computation date could be computed as follows:

Date	*Receipts (Payments)*	*FV (6.500%)*
1/01/92	$ 161,590.75	$ 183,644.00
2/28/92	(145,431.68)	(163,614.11)
1/01/94	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/94)		$ 19,029.89

Example (3). (i) The facts are the same as in Example (2), except that all the bonds are redeemed on January 1, 2001, and the issue is treated as a fixed yield issue after the close of business on the first installment computation date (1/01/92). See §1.148-3T(b)(3)(ii). The yield on the fixed yield issue as of the second installment computation date (1/01/97) is 7.500 percent per annum compounded annually. This yield is used to future value the receipts and payments after the first installment computation date. See paragraph (c)(1) of this section. The rebatable arbitrage as of the second installment computation date is $24,575.56, computed as follows:

Date	*Receipts (Payments)*	*FV (7.000/7.500%)*
1/15/87	$(49,000,000.00)	$(98,964,599.63)
2/01/87	2,000,000.00	4,027,038.27
4/01/87	5,000,000.00	9,952,808.51
6/01/87	15,000,000.00	29,517,990.37
9/01/87	20,000,000.00	38,686,135.49
1/01/88	9,000,000.00	17,014,047.03
1/01/92	(1,000.00)	(1,435.63)
2/28/92	(145,431.68)	(206,408.86)
1/01/97	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/97)	$	24,575.56

Alternatively, the rebatable arbitrage as of the second installment computation date could be computed as follows:

Date	*Receipts (Payments)*	*FV (7.500%)*
1/01/92	$ 161,590.75	$ 231,984.42
2/28/92	(145,431.68)	(206,408.86)
1/01/97	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/97)		$ 24,575.56

(ii) City A pays 90 percent of the rebatable arbitrage ($22,118.00) to the United States on February 28, 1997. The yield on the fixed yield issue as of the final computation date (1/01/01) is 7.000 percent per annum compounded annually. This yield is used to future value the receipts and payments after the first installment computation date (1/01/92) and until the final computation date. See paragraph (c)(1) of this section. The rebatable arbitrage as of the final computation date is $1,562.68, computed as follows:

Date	*Receipts (Payments)*	*FV (7.000/7.000%)*
1/15/87	$(49,000,000.00)	$126,733,535.30)
2/01/87	2,000,000.00	5,157,003.60
4/01/87	5,000,000.00	12,745,513.18
6/01/87	15,000,000.00	37,800,580.10
9/01/87	20,000,000.00	49,541,257.54
1/01/88	9,000,000.00	21,788,097.35
1/01/92	(1,000.00)	(1,838.46)
2/28/92	(145,431.68)	(264,521.26)
1/01/97	(1,000.00)	(1,310.80)
2/28/97	(22,118.00)	(28,683.26)
1/01/01	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/01)	$	1,562.68

Alternatively, the rebatable arbitrage as of the final computation date could be computed as follows:

Date	*Receipts (Payments)*	*FV (7.000%)*
1/01/92	$ 161,590.75	$ 297,078.00
2/28/92	(145,431.68)	(264,521.26)
1/01/97	(1,000.00)	(1,310.80)
2/28/97	(22,118.00)	(28,683.26)
1/01/01	(1,000.00)	(1,000.00)
Rebatable arbitrage (1/01/01)		$ 1,562.68

(d) *Determination of fair market value*—(1) *In general.* Except as otherwise provided in this paragraph (d), the fair market value of an investment is the price at which a willing buyer would purchase the investment from a willing seller. If the investment is not readily salable, the fair market value shall be determined by taking into account the price at which a willing buyer would purchase the same (or a substantially similar) investment from the issuer of the investment. The price shall not be increased by brokerage commissions, administrative expenses, or similar expenses.

(2) *Established securities market.* The price at which a willing buyer would purchase an investment that is traded in an established securities market (within the meaning of §§15A.453-1(e)(4)(iv)) shall be determined as provided in §§20.2031-2 of this chapter (Estate Tax Regulations); provided that, if the investment is an obligation of the United States (or any agency or instrumentality thereof, within the meaning of section 149(b)) and is backed by the full faith and credit of the United States (or any such agency or instrumentality), such price shall be the mean of the bid and asked prices on the date of determination (or, if there are no bid and asked prices on such date, on the first day preceding such date for which there are bid and asked prices). The bid and asked prices shall be determined either by reference to "Composite Closing Quotations for United States Government Securities" published by the Federal Reserve Bank of New York, or by reference to a comparable compilation of bid and asked prices regularly published in a newspaper of general circulation throughout the United States.

(3) *Restricted escrows*—(i) *In general.* For purposes of applying—

(A) Paragraph (b)(2)(iii) of this section to any investment in a restricted escrow on an installment computation date; and

(B) Paragraph (b)(2)(ii) and (b)(3)(ii) of this section to any investment in a restricted escrow when the investment ceases to be allocated to a refunded issue and is allocated to a refunding issue by reason of §1.148-4T(e)(2) (including §1.103-14(e)(2)(ii) if §1.148-4(e)(2)(iii)-(A) applies);

the present value of the investment shall be treated as the fair market value.

(ii) *Exception.* Paragraph (d)(3)(i)(B) of this section shall not apply to an investment that ceases to be allocated to a refunded issue and is allocated to a refunding issue if—

(A) The refunded issue is a tax-exempt issue to which §1.148-1T applies and §1.148-7T does not apply;

(B) The refunding issue is not a tax-exempt issue; and

(C) The refunded issue is sold after May 15, 1989, or issued after June 14, 1989,

or if paragraph (d)(3)(i)(B) of this section previously did not apply to the investment by reason of this paragraph (d)(3)(ii).

(4) *Certain SLGs.* If an SLG is not in a restricted escrow, the present value of the SLG shall be treated as the fair market value. See paragraph (e)(2)(iii)(B) of this section for special rule for determining this present value.

(5) *Investment contract.* In the case of nonpurpose investments purchased pursuant to an investment contract, the outstanding principal balance plus accrued interest shall be treated as the fair market value for purposes of applying paragraph (b)(2)(iii) of this section on an installment computation date.

(e) *Computation of present value.* For purposes of this section—

(1) *In general.* The present value of an investment on any date is the present value as of such date of all the receipts to be received with respect to the investment after such date. In the case of an investment in a restricted escrow, payments to be paid after such date shall be taken into account as negative receipts. See §1.148-8T(b)(5) for formula for determining present value. See paragraph (e)(5) of this section for approximate method for determining present value of certain investments.

(2) *Discount rate*—(i) *In general.* The present value of an investment is computed by using the yield on the investment as the discount rate. The yield on an investment that is allocated to an issue is the discount rate that when used in computing the present value of all the receipts received and to be received with respect to the investment payments with respect to the investment. For purposes of the preceding sentence, present value is computed as of the date the investment became allocated to the issue.

(ii) *Special rules for restricted escrows.* The yield on an investment in a restricted escrow is computed by treating—

(A) All investments in the same restricted escrow (whether or not held concurrently) as one investment; and

(B) The date any investment in the restricted escrow was first in the escrow as the date the one investment became allocated to the issue.

(iii) *Special rules for certain SLGs.* If an SLG is not in a restricted escrow—

(A) *Present value.* Except for purposes of paragraph (d)(4) of this section, the yield on the issue to which the SLG is allocated shall be treated as the yield on the SLG for purposes of computing the present value of the SLG; and

(B) *Fair market value.* For purposes of paragraph (d)(4) of this section, the maximum interest rate in effect on the date of determination for an SLG with a term equal to the remaining term of the SLG shall be treated as the yield on the SLG for purposes of computing the present value of the SLG.

(3) *Disposition assumption.* For purposes of computing the present value of and yield on any investment that is not in a restricted escrow, it shall be assumed that the investment remains allocated to the issue until and will be sold on the highest yield date for the stated price on such date. The highest yield date is the date on which the holder is entitled (under the terms of the investment or pursuant to a separate agreement or option) to require the investment to be purchased, redeemed, or retired at a stated price that, when used in computing the yield on the investment, produces the highest yield.

(4) *Compounding interval.* For purposes of computing the present value of and yield on an investment, the compounding interval is the accrual period (within the meaning of section 1272 and the regulations thereunder) except that—

(i) The accrual period shall be determined by treating the date the investment became allocated to the issue as the issue date;

(ii) If the investment is in a restricted escrow, the accrual period shall be the same as the compounding interval used in computing the yield on the issue that established the escrow or an issue for which the escrow was established or to which the investment is allocated; and

(iii) If the yield on the issue to which an SLG is allocated is treated as the yield on the SLG, the accrual period shall be the same as the compounding interval used in computing the yield on the issue.

(5) *Approximate method*—(i) *In general.* If an investment is an eligible investment, the issuer may treat the outstanding par amount of the investment plus accrued interest unpaid at the close of business on a date as the present value of the investment on such date.

(ii) *Eligible investment.* An investment is an eligible investment if—

(A) The investment is a fixed rate investment that is not an SLG and is not in a restricted escrow;

(B) The payment taken into account with respect to the investment is equal to the outstanding par amount of the investment plus accrued interest (if any) for the period that begins on a date that is less than one year before the date the investment is allocated to the issue and that ends on the date the investment is allocated to the issue;

(C) All interest on the investment (other than such accrued interest) accrues on the outstanding par amount of the investment and is actually and unconditionally due at periodic intervals of one year or less;

(D) The first payment of interest on the investment (including such accrued interest) is due at the end of the first short compounding interval or at the end of the first whole compounding interval; and

(E) The final maturity date of the investment is the highest yield date. See paragraph (e)(3) of this section for highest yield date. See §1.150-1T(d)(1) for final maturity date.

(6) *Example.* The following example illustrates the application of this paragraph (e):

Example. (i) On July 1, 1993, the first installment computation date, City Y holds two fixed rate investments that are not in a restricted escrow. City Y may treat both of these investments as if sold for present value (or both as if sold for fair market value) for purposes of determining the installment date receipt on the first installment computation date under paragraph (b)(2)(iii) of this section.

(ii) One of the investments is a $100,000 face amount 8.625% United States Treasury note due August 15, 1997, that pays interest on February 15 and August 15 of each year. The present value of the Treasury note is determined by using the yield on the Treasury note as the discount rate. See paragraph (e)(2)(i) of this section. The Treasury note was purchased with gross proceeds for $112,000 (including accrued interest) on February 1, 1990. The yield on the Treasury note is 7.225% per annum compounded semiannually, computed as follows:

Date	*Receipts*	*PV (7.2251652778%)*
2/15/90	$ 4,312.50	$ 4,300.61
8/15/90	4,312.50	4,150.67
2/15/91	4,312.50	4,005.95
8/15/91	4,312.50	3,866.28
2/15/92	4,312.50	3,731.47
8/15/92	4,312.50	3,601.37
2/15/93	4,312.50	3,475.80
8/15/93	4,312.50	3,354.62
2/15/94	4,312.50	3,237.65
8/15/94	4,312.50	3,124.77
2/15/95	4,312.50	3,015.82
8/15/95	4,312.50	2,910.67
2/15/96	4,312.50	2,809.19
8/15/96	4,312.50	2,711.24
2/15/97	4,312.50	2,616.71
8/15/97	104,312.50	61,087.19
	Payment (2/01/90) $	112,000.00

See paragraph (e)(2)(i) of this section.

(iii) The present value of the Treasury note on the first installment computation date is $108,159.41, computed as follows:

Date	*Receipts*	*PV (7.225%)*
8/15/93	$ 4,312.50	$ 4,275.25
2/15/94	4,312.50	4,126.19
8/15/94	4,312.50	3,982.33
2/15/95	4,312.50	3,843.49
8/15/95	4,312.50	3,709.48
2/15/96	4,312.50	3,580.15
8/15/96	4,312.50	3,455.32
2/15/97	4,312.50	3,334.85
8/15/97	104,312.50	77,852.35
	Treasury note PV (7/01/93) $	108,159.41

See paragraph (e)(1) and (e)(2)(i) of this section.

§1.148-3T Computation of yield on issue (temporary).

(a) *In general.* Under this section, the yield on a fixed yield issue is the same throughout the term of the issue, whereas the yield on a variable yield issue changes each yield period. See paragraph (b) of this section for definitions and special rules. See paragraph (c) of this section for computation of yield on fixed yield issue. See paragraph (d) of this section for computation of yield on variable yield issue. See §1.148-8T for definitions and special rules relating to required rebate. See §1.150-1T for definitions and special rules relating to tax-exempt bond requirements in general.

(b) *Definitions and special rules.* For purposes of this section—

(1) *Fixed yield issue*—(i) *In general.* The term "fixed yield issue" means any issue if each bond that is part of the issue is a fixed yield bond. See §1.150-1T(b)(5) and (b)(6) for definitions of fixed yield bond and variable yield bond.

(ii) *Transition rule.* Any issue sold on or before May 15, 1989, and issued on or before June 14, 1989, shall be treated as a fixed yield issue if the issuer elects to treat the issue as a fixed yield issue. See §1.148-8T(h) for elections.

(2) *Variable yield issue*—(i) *In general.* The term "variable yield issue" means any issue that is not a fixed yield issue.

(ii) *Yield period*—(A) *In general.* The first yield period for a variable yield issue begins on the date of issue and ends at the close of business on the first computation date. Each succeeding yield period begins immediately after the close of business on a computation date and ends at the close of business on the next succeeding computation date.

(B) *Bond year election.* The issuer of a variable yield issue may elect to treat the last day of any bond year that is not a computation date as a computation date for purposes of applying paragraph (b)(2)(ii)(A) of this section. An election under the preceding sentence with respect to the last day of a bond year may be revoked at any time before the close of business on a computation date (without regard to the preceding sentence) that precedes such last day. The revocation shall be effective only if it is in writing and signed by an authorized representative of the issuer and satisfies the procedural requirements of §1.148-8T(h)(2).

(C) *First and last day.* Any reference to the last day of a yield period shall be construed as a reference to the period before the close of business on such day, and any reference to the first day of a yield period shall be construed as a reference to the period after the close of business on such day.

(3) *Conversion to fixed yield*—(i) *Conversion to fixed yield bond.* A variable yield bond shall be treated as a fixed yield bond after the close of business on the first day the bond would be a fixed yield bond if issued immediately after the close of business on such day. The fixed yield bond shall be treated as if issued on such day for an issue price equal to the amount taken into account with respect to the bond on such day under paragraph (d)(2)(ii) of this section (without regard to any accrued interest taken into account under paragraph (d)(2)(ii)(A)). The preceding sentence shall not apply for purposes of paragraph (c)(1)(ii) of this section. Principal or interest that accrued on the variable yield bond on or before such day shall not be treated as principal or interest on the fixed yield bond. See paragraph (d)(4) of this section (Examples (9)-(11)). This paragraph (b)(3)(i) shall apply to a variable yield bond that is not a tender bond only if the issuer elects to apply this paragraph (b)(3)(i) to the bond.

(ii) *Conversion to fixed yield issue.* Unless the issuer otherwise elects, a variable yield issue shall be treated as a fixed yield issue as of the first day of a yield period if the issue would be a fixed yield issue if issued on such day. Each bond that is part of the fixed yield issue shall be treated as if issued on such day for the amount that (but for this paragraph (b)(3)(ii)) would have been taken into account with respect to the bond on such day under paragraph (d)(2)(ii) or (d)(3)(ii) of this section (without regard to any accrued interest that would be taken into account under paragraph (d)(2)(ii)(A)). The preceding sentence shall not apply for purposes of paragraph (d) of this section. No issue payment taken into account with respect to the variable yield issue under paragraph (d) of this section shall be taken into account with respect to the fixed yield issue under paragraph (c) of this section. See paragraph (d)(4) of this section (Examples (9)-(11)).

(4) *Yield-to-call bond*—(i) *In general.* A yield-to-call bond shall be treated as if the lowest yield date were the final maturity date and the stated retirement price on the lowest yield date were the stated retirement price on the final maturity date. If a bond to which the preceding sentence applies is not retired on or before the lowest yield date, the bond shall be treated as if it were retired on such date for the stated retirement price on such date, and shall be treated as if issued on such date (as part of the same issue) for an issue price equal to such price (less any amount included in such price and paid to discharge principal or interest on such date). See paragraph (c)(7) of this section (Examples (4), (5), and (6)) for fixed yield bonds and paragraph (d)(4) of this section (Example (3)) for current index bonds.

(ii) *Yield-to-call bond.* The term "yield-to-call bond" means—

(A) Any bond that is part of a fixed yield issue if the yield-to-maturity on the bond is more than one-fourth of one percent higher than the lowest yield;

(B) Any fixed yield bond or current index bond that is part of a variable yield issue if the yield-to-maturity on the bond is more than one-sixteenth of one percent higher than the lowest yield; and

(C) Any variable yield bond (other than a current index bond) that is part of a variable yield issue if the yield-to-maturity on the bond is higher than the lowest yield;

determined without regard to paragraph (b)(3)(ii) and (b)(4)(i) of this section.

Such term shall not include any tender bond. See §1.150-1T(b)(7) and (b)(8) for definitions of tender bond and current index bond.

(5) *Bond yield*—(i) *In general.* The term "yield" means, with respect to a bond, the discount rate that when used in computing the present value of all the unconditionally payable payments of principal and interest and all the payments for a qualified guarantee paid and to be paid with respect to the bond produces an amount equal to the present value of the issue price of the bond. Present value is computed as of the date of issue of the bond. See §1.148-8T(c) for definition of issue price (in general). For purposes of computing the yield, the stated retirement price of the bond on the assumed retirement date shall be treated as an unconditionally payable payment of principal and interest. If paragraph (b)(3) of this section applied to the bond, payments for a qualified guarantee with respect to the variable yield bond shall not be taken into account.

(ii) *Yield-to-maturity.* The term "yield-to-maturity" means, with respect to a bond, the yield on the bond determined by assuming the bond is retired on the final maturity date for the stated retirement price on such date. See §1.150-1T(d)(1) for definition of final maturity date. See paragraph (b)(4)(i) of this section for special rules for yield-to-call bonds.

(iii) *Lowest yield.* The term "lowest yield" means, with respect to a bond, the yield on the bond determined by assuming the bond is retired on the lowest yield date for the stated retirement price on such date. The lowest yield date is the date that when used in computing the yield on the bond produces the lowest yield.

(6) *Retirement prices*—(i) *In general.* The term "retirement price" means, with respect to a bond, the amount paid in connection with the retirement or redemption of the bond.

(ii) *Stated retirement price*—(A) *In general.* The stated retirement price of a bond on a date is the lowest price at which the issuer or any ultimate obligor (or related person, as defined in section 147(a)(2)) has a right (under the terms of the bond or pursuant to a separate agreement or option entered into in connection with the issuance of the bond) to retire or redeem the bond as of such date.

(B) *Right to retire.* A person has a right to retire or redeem a bond as of a date even if the exercise of the right is subject to a contingency; provided that, a right to redeem a bond only in the event of a remote contingency shall not be taken into account unless and until the remote contingency has occurred. An example of a remote contingency is the destruction or condemnation of facilities financed with proceeds of the issue of which the bond is a part. In no event shall any contingency related to the failure to spend proceeds of an issue be considered remote. See paragraph (d)(4) of this section (Example (3)).

(7) *Early retirement value*—(i) *In general.* Except as otherwise provided in this paragraph (b)(7), the early retirement value of a bond on any date is the lesser of—

(A) The present value of the bond on such date; and

(B) If the bond is part of a fixed yield issue (without regard to paragraph (b)(3)(ii) of this section) and the yield-to-maturity on the bond is higher than the lowest yield, the lowest stated retirement price (properly adjusted to take into account accrued interest) on any day during the period beginning one year before such date and ending 90 days after such date.

See paragraph (c)(7) of this section (Examples (1), (2), (4), (5), (7), and (9)) for fixed yield bonds and paragraph (c)(4) of this section (Examples (1)-(3)) for current index bonds.

(ii) *Tender bond.* The early retirement value of a tender bond on any date is the outstanding par amount of the bond on such date. See §1.150-1T(b)(7) for definition of tender bond. See paragraph (d)(4) of this section (Examples (4)-(11)).

(iii) *Special rules for certain discount bonds subject to mandatory early redemption*—(A) *In general.* If the yield to maturity on a bond that is subject to mandatory early redemption (determined without regard to any payment for a qualified guarantee) is more than one fourth of one percent lower than the composite yield-to-maturity determined as provided in paragraph (b)(8)(ii)(B) of this section (but without regard to any payment for a qualified guarantee)—

(*1*) Paragraph (b)(8)(ii)(B) of this section shall not apply for purposes of determining the issue payments to be paid on the bond under paragraph (c) of this section or for purposes of determining the early retirement value of the bond under paragraph (d)(2)(i)(F)(*1*) and (d)(3)(i)(E) of this section;

(*2*) For purposes of determining the issue payments paid on the bond under paragraph (c) of this section, the early retirement value of the bond on the date the bond is retired shall not exceed an amount equal to the greater of (*i*) the retirement price of the bond; and (*ii*) the present value of the bond on the retirement date (determined without regard to paragraph (b)(8)(ii)(B) of this section);

(*3*) For purposes of determining the early retirement value of the bond under paragraph (d) of this section on the date the bond is retired, the early retirement value of the bond shall not exceed an amount: equal to the greater of (*i*) the retirement price of the bond less interest paid in connection with the retirement; and (*ii*) the present value of the bond on the retirement date (determined without regard to paragraph (b)(8)(ii)(B) of this section); and

(*4*) The early retirement value of the bond on the date the bond is retired may be determined without regard to paragraph (b)(8)(ii)(B) of this section if the bond is or was part of a variable yield issue.

See paragraph (c)(7) of this section (Example (9)).

(B) *Mandatory early redemption.* A bond is subject to mandatory early redemption if the final maturity date of the bond is not the earliest date on which the final payment of principal and interest on the bond is actually and unconditionally due (without regard to any unanticipated event or optional retirement). See §1.150-1T(d)(1) and (d)(2) for definitions of final maturity date and actually and unconditionally due. Bonds evidenced by a single loan instrument and to which §§1.150-1T(d)(3) applies shall not be treated as subject to mandatory early redemption for purposes of paragraph (b)(7)(iii)(A) of this section.

(8) *Present value*—(i) *In general.* The present value of a bond on any date is the present value as of such date of all the unconditionally payable payments of principal and interest and all payments for a qualified guarantee to be paid on and after such date with respect to the bond. See §1.148-8T(b)(5) for formula for determining present value. See paragraph (b)(8)(iii) of this section for approximate method for determining present value of certain bonds. See paragraph (b)(8)(iv) of this section for special present value for large fixed yield issues.

(ii) *Discount rate, etc*—(A) *In general.* For purposes of computing the present value of a bond, the yield-to-maturity on the bond shall be used as the discount rate, the bond shall be assumed to be retired on the final maturity date for the stated retirement price on such date, and the stated retirement price on such date shall be treated as an unconditionally payable payment of principal and interest on the bond.

(B) *Bonds subject to mandatory early redemption.* For purposes of applying paragraph (b)(8)(i) and (b)(8)(ii)(A) of this section to substantially identical bonds that are subject to mandatory early redemption—

(*1*) The composite yield-to-maturity on all such bonds shall be treated as the yield-to-maturity on each bond;

(*2*) The composite yield-to-maturity shall be determined by assuming the bonds are retired on the scheduled early retirement dates and by treating such dates as the final maturity dates; and

(*3*) The present value of each bond retired in satisfaction of a mandatory early redemption requirement shall be determined by treating the mandatory early redemption date (in satisfaction of which the bond is retired) as the final maturity date and the stated retirement price on such date as the stated retirement price on the final maturity date.

For purposes of this paragraph (b)(8)(ii)-(B), the scheduled early retirement dates (and mandatory redemption dates) shall be determined on the basis of reasonable expectations as of the date of issue (if the dates are not fixed and determinable as of the date of issue). See paragraph (c)(7) of this section (Examples (7)-(10)).

(iii) *Approximate method*—(A) *In general.* If a bond is an eligible bond, the issuer may treat the outstanding par amount of the bond plus (if the bond is not a variable yield bond) unpaid accrued interest as of a date (including interest paid on such date) as the present value of the bond on such date. The preceding sentence shall not apply for purposes of paragraph (d)(3)(i)(E) of this section if there is unpaid accrued interest as of such date (not including interest paid on such date).

(B) *Eligible bond.* A bond is an eligible bond if—

(*1*) The issue price of the bond is par plus accrued interest on such par amount (if any) for the period that begins on a date that is less than one year before the date of issue and ends on the date of issue;

(*2*) All interest on the bond (other than such accrued interest) accrues on the outstanding par amount of the bond and is actually and unconditionally due at periodic intervals of one year or less;

(*3*) The first payment of interest on the bond (including such accrued interest) is due at the end of the first short compounding interval or at the end of the first whole compounding interval;

(*4*) The lowest stated retirement price of the bond is not less than the outstanding par amount of the bond plus accrued interest; and

(*5*) No payment for a qualified guarantee is taken into account with respect to the bond (without regard to paragraph (b)(13)(ii)(D) of this section).

(iv) *Special present value for large fixed yield issues.* If the aggregate issue price of the bonds issued as part of a fixed yield issue is $35 million or more, the present value of the bonds that are part of the issue shall be determined by substituting "one sixteenth of one percent" for "one fourth of one percent" in paragraph (b)(4)(ii)(A) of this section.

(9) *Special rules for variable yield bonds.* For purposes of determining whether a variable yield bond (other than a tender bond) is a yield-to-call bond and for purposes of computing the yield on and present value and early retirement value of the bond—

(i) Any interest that is unconditionally payable but that does not accrue at a rate that is fixed and determinable as of the date of issue shall not be taken into account;

(ii) The interest described in paragraph (b)(9)(i) of this section shall be treated as unconditionally payable at a rate that is fixed and determinable as of the date of issue and shall be fixed and determined on the basis of the rate established by the interest index or other interest rate setting mechanism as of such date;

(iii) Payments for a qualified guarantee shall be taken into account only for purposes of determining whether the bond is a yield-to-call bond and shall be treated as level payments for such purpose; and

(iv) Interest that accrued on the bond on or before a date and that is payable on or after such date (including the interest treated as so accruing under paragraph (b)(9)(ii) of this section) shall not be taken into account in determining the present value of the bond on such date.

See paragraph (d)(4) of this section (Examples (1)-(3)).

(10) *Actually paid*—(i) *In general.* Payments of principal and interest on a bond that are unconditionally payable shall be treated as if paid on the date actually and unconditionally due if—

(A) The rebatable arbitrage (with regard to this paragraph (b)(10)) is lower than the rebatable arbitrage (without regard to this paragraph (b)(10));

(B) As of the date of issue, it is reasonably expected that all payments of principal and interest payable on the bond will be paid no later than the date actually and unconditionally due; and

(C) As of the date of issue, the holders of all bonds that are part of the issue are reasonably assured that sufficient funds will be available to fully retire the bonds (after reduction for any amount required to be paid under §1.148-1T(b)(1)(i), determined without regard to this paragraph (b)(10)) in the event that none (or an insubstantial portion) of the proceeds of the issue are expended for a governmental purpose (not including the payment of the principal or interest on or the retirement price of any bond that is part of the issue).

The reasonable assurance must be predicated on a binding obligation (enforceable by or on behalf of the bondholders) of a person or persons with sufficient funds (and to the extent necessary the binding obligation must be enforced). See §1.150-1T(d)(2) for definition of actually and unconditionally due.

(ii) *Unconditionally payable*—(A) *In general.* A payment of principal or interest on a bond is unconditionally payable if the amount of the payment and date the amount is actually and unconditionally due is fixed and determinable as of the date of issue. The determination under the preceding sentence shall be made without regard to unanticipated events and by assuming that no payment is paid before the latest date the payment is actually and unconditionally due.

(B) *Variable yield bonds.* Any payment of interest on a variable yield bond that is determined by reference to market interest rates (including by reference to any index of such rates) after the date of issue shall be treated as unconditionally payable if the payment would be unconditionally payable if the payment were determined by reference to interest rates that were fixed and determinable as of the date of issue.

(11) *Compounding interval*—(i) *Bond.* The compounding interval used in computing the yield on and the present value of a bond is the accrual period

(within the meaning of section 1272 and the regulations thereunder) with respect to the bond.

(ii) *Issue*. The compounding interval used in computing the yield on an issue and the present value of amounts under paragraphs (c)(1) and (d)(1) of this section is the shortest accrual period (within the meaning of section 1272 and the regulations thereunder) with respect to any bond that is part of the issue.

(12) *Qualified guarantees*—(i) *In general*. The term "qualified guarantee" means, with respect to a bond, any guarantee of the bond if the guarantee meets each of the requirements of this paragraph (b)(12).

(ii) *Guarantee*—(A) *In general*. The term "guarantee" means, with respect to a bond, an unconditional and recourse obligation of a guarantor (enforceable by or on behalf of the holder of the bond) to pay all or part of any payment of principal or interest on the bond (or any payment of the tender price of the bond if the bond is a tender bond) that is actually and unconditionally due under the terms of the bond.

(B) *Secondary liability*. An obligation to pay shall not be treated as a guarantee unless—

(*1*) It is reasonably expected that the guarantor will not be called upon to make any payment under the guarantee (for which the guarantor will not be reimbursed immediately in cash); and

(*2*) The guarantor is entitled to be fully reimbursed immediately or upon commercially reasonable repayment terms (during a workout period that is not unreasonably long) for any payment under the guarantee.

In no event shall any hedging transaction described in section 1256(e)(2)(A)(i) or (ii) be treated as a guarantee. See paragraph (b)(14) of this section for treatment of hedging transactions.

(C) *Guarantor*. The term "guarantor" includes only—

(*1*) The United States (or any agency or instrumentality thereof, within the meaning of section 149(b));

(*2*) An entity that is not exempt from Federal income taxation and is either a bank (within the meaning of section 581 or 585(a)(2)(B)) or is rated in one of the two highest ("AA" or "AAA") categories for long-term debt by a nationally recognized rating agency; and

(*3*) A State insurance fund established before May 15, 1989, but only with respect to guarantees of obligations of persons other than State or local government units and of the type guaranteed by such fund before such date.

Such term shall not include any person that is to use 20 percent or more of the proceeds of the issue of which the bond is a part for a private business use (within the meaning of section 141(b)(6)) or a person related to such a person (within the meaning of section 144(a)(3)).

(D) *Risk shifting*. An obligation to pay shall be treated as a guarantee only to the extent that the obligation shifts ultimate credit risk with respect to the issue. An obligation to pay does not shift ultimate credit risk with respect to an issue to the extent that the guarantor or a person related to the guarantor (within the meaning of section 144(a)(3)) is obligated to pay any amount that is taken into account with respect to the issue under section 141(b)(2). For purposes of this paragraph (b)(12)(ii)(D), any person that owns a share of the beneficial ownership interests of another person shall be treated as owning a proportionate share of the beneficial ownership interests owned by such other person, any person a share of the beneficial ownership interests of which is owned by another person shall be treated as owning a proportionate share of the beneficial ownership interests owned by such other person, and any obligation to pay shall be treated as the obligation of any person that owns a proportionate share of the beneficial ownership interests of the obligor and of any person a proportionate share of the beneficial ownership interests of which is owned by the obligor in the same proportion as the proportionate share so owned. For purposes of the preceding sentence, proportionate shares shall be determined on the basis of fair market value, and no share shall be taken into account that is less than 10 percent of the total.

(E) *Form of guarantee*. A guarantee may be in the form of an insurance policy, surety bond, irrevocable letter or line of credit, or standby purchase agreement. A guarantee of the principal and interest on a bond may be in the form of a recourse loan to the guarantor if the loan is in substance a guarantee of the bond. A loan is not in substance a guarantee unless the terms of the loan and bond are substantially identical (without regard to any discrepancy in payment dates of no more than 15 business days).

(iii) *Reasonable charge*. A guarantee of a bond does not meet the requirements of this paragraph (b)(12) if the payments for the guarantee of the bond exceed a reasonable charge for the transfer of credit risk. In determining whether this requirement is met, there shall be taken into account payments charged by guarantors in comparable transactions (including transactions in which the guarantor has no involvement other than as a guarantor). In no event shall this requirement be considered met unless the present value of such payments is less than the present value of the interest to be saved as a result of the guarantee. Present value is computed by using the yield-to-maturity on the bond (with regard to payments for the guarantee) as the discount rate.

(iv) *Nonguarantee element*—(A) *In general*. A guarantee of a bond does not meet the requirements of this paragraph (b)(12) if any payment denominated as a payment for the guarantee or taken into account by the issuer as a payment for a qualified guarantee with respect to the bond includes direct or indirect payment for a cost, risk, or other element that is not customarily borne by guarantors of tax-exempt bonds (in transactions in which the guarantor has no involvement other than as a guarantor).

(B) *Nonguarantee charges must be separately stated*. A guarantee shall not be treated as meeting the requirements of paragraph (b)(12)(iv)(A) of this section if the guarantor (or a related person within the meaning of section 147(a)(2)) provides any nonguarantee service(s) the fee(s) for which are not separately stated. The preceding sentence shall not apply to any guarantee entered into on or before June 14, 1989.

(C) *Examples*. The following are examples of payments that include a nonguarantee element:

(*1*) Payments for the guarantee of the tender price of tender bonds include indirect payment for a noncustomary cost (the cost of remarketing the bonds) if the issuer or an ultimate obligor (or its agent) is not required to use best efforts to remarket bonds that are tendered for purchase and not retired.

(*2*) Payments for a guarantee include indirect payment for a noncustomary risk if the guarantor is not reasonably assured that sufficient funds will be available to fully retire the bonds (after reduction for any amount required to be paid under §1.148-1T(b)(1)(i), determined without regard to any payment for any qualified guarantee) in the event that none (or an insubstantial portion) of the proceeds of the issue are expended for a governmental purpose (not including the payment of the principal or interest on or the retirement price of any bond that is part of the issue). The reasonable assurance must be predicated on a binding obligation (enforceable by the guarantor) of a person or persons with sufficient funds (and to the extent necessary the binding obligation must be enforced).

(*3*) Payments for a guarantee include a nonguarantee element if the issuer is entitled to a refund in the event a guaranteed bond is retired before the final maturity date, and the amount of the refund exceeds the unearned portion of the payments for the guarantee.

(*4*) If a guarantee is in the form of a loan to the guarantor, payments to the guarantor include a nonguarantee element if the payment for any nonguarantee service performed by the guarantor does not fully and adequately compensate the guarantor for such service (or any portion of such payment is taken into account as a payment for a qualified guarantee). For purposes of determining whether the guarantor is fully and adequately compensated for such a service, the payments for the service are compared to payments that would be charged for the service if the service was performed by a person other than a guarantor.

(*5*) Payments to a guarantor of a revenue bond include a nonguarantee element if the property securing the bond normally would be insured against certain risks and the guarantee is used to replace such insurance. For example, if a bond is secured solely by a multifamily housing project and the revenues derived therefrom, and the project is not insured against any fire damage, payments to the guarantor of the bond would include a nonguarantee element. Similarly, payments to the guarantor of a qualified mortgage bond would include a nonguarantee element if the mortgage loans securing the bond did not satisfy minimum underwriting standards.

(v) *Purpose investment bond guarantee*. A guarantee of the principal or interest on an eligible purpose investment shall be treated as a guarantee of the related payments of principal or interest on bonds that are part of an issue and as if paid for a guarantee with respect to such bonds if (and only if)—

(A) All payments of principal and interest on the purpose investment that are original proceeds of the issue coincide (in all events) with payments on such bonds; and

(B) All such payments on the purpose investment (and all related payments under the guarantee) are at all times pledged unconditionally and exclusively to the payment of principal and interest on such bonds (without regard to any bond after the bond is legally defeased).

See paragraph (b)(12)(vi) of this section for when payments coincide. See paragraph (b)(12)(vii) of this section for special rule for parity issues. See paragraph (b)(12)(viii) of this section for definition of eligible purpose investment.

(vi) *When payments coincide*. For purposes of paragraph (b)(12)(v)(A) of this section—

(A) Regularly scheduled payments of interest on a purpose investment and a bond coincide if the payments are actually and unconditionally due during the same compounding interval used in computing the yield on the bond, determined by taking into account only payments of interest on the bond;

(B) Regularly scheduled payments of principal of a purpose investment and a bond coincide if the payments are actually and unconditionally due during the same compounding interval used in computing the yield on the bond, determined by taking into account only payments of principal of the bond; and

(C) Other payments on a purpose investment and a bond coincide if the payments on the bond are actually and unconditionally due no later than one month after the payments on the purpose investment.

In applying this paragraph (b)(12)(vi) to an issue, there shall not be taken into account any discrepancy of no more than one month, or any amount less than $250,000 that is required to be used to redeem bonds no later than the first available call date.

(vii) *Special rule for parity issues*. Payments on a purpose investment (and related payments under a guarantee) shall not be treated as failing to meet the requirement of paragraph (b)(12)(v)(B) of this section that such payments are pledged exclusively to the payment of principal or interest on bonds that are part of the issue solely by reason of the fact the payments are pledged to the payment of principal and interest on bonds that are part of one or more other issues if—

(A) The issue and all the other issues to which the payments are pledged are issued by the same issuer pursuant to the same master resolution or indenture;

(B) All bonds issued under the master resolution or indenture are equally and ratably secured at all times (without regard to any bond after the bond is legally defeased);

(C) Original proceeds of the issues of which such bonds are a part may be used only to make or finance purpose investments that are unconditionally and exclusively pledged to the payment of such bonds and guaranteed by the same guarantor (and to pay administrative expenses relating to the financing of such purpose investments); and

(D) The payments on the purpose investment are not guaranteed by the guarantor to any lesser extent than the payments on any purpose investment financed with original proceeds of any of the other issues.

(viii) *Eligible purpose investment*. The term "eligible purpose investment" means, with respect to an issue, any purpose investment (or portion thereof) that is allocated to sale proceeds of the issue (including sale proceeds allocated to the refunding portion of a refunding issue) if—

(A) The investment is an obligation that is not a student loan or for the financing of an owner-occupied residence; and

(B) The yield on the investment is not reasonably expected to be materially higher than the yield on the issue (within the meaning of §1.103-13(b)(5)(i)(A)) but determined—

(*1*) Without regard to any other purpose investment and without regard to any payment for a guarantee of any other purpose investment; and

(*2*) Except as otherwise provided in paragraph (b)(12)(ix)(A) of this section, by taking into account payments for the guarantee of the purpose investment as interest on the issue and as interest on the purpose investment and not as administrative costs for purposes of §1.103-13(c)(5).

(ix) *Transition rule*. The requirements of paragraph (b)(12)(viii)(B) of this section shall be treated as satisfied with respect to a purpose investment acquired on or before June 14, 1989, if the requirements are satisfied determined by taking into account—

(A) Payments for the guarantee of the purpose investment as administrative costs for purposes of §1.103-13(c)(5) and not as interest on the issue; and

(B) Any amendment to the terms of the purpose investment no later than the first date after June 14, 1989, that any amount with respect to the issue is paid or required to be paid to the United States under §1.148-1T(b)(1).

(13) *Special rules for guarantee payments*—(i) *Allocation to bonds*—(A) *Level payments*. A level payment for a guarantee shall be allocated to the bond to which the level payment properly relates.

(B) *Nonlevel payments*. Nonlevel payments for a guarantee shall be allocated to bonds in a manner that properly reflects the proportionate credit risk for which the guarantor is compensated. In the case of identical bonds (including bonds subject to mandatory early redemption), the proportionate credit risk with respect to each bond is the same. The proportionate credit risk with respect to bonds that are not identical shall be determined by reference to the proportionate interest reduction resulting from the guarantee (determined on a present value basis and with adjustments, if necessary, to take into account any level payments); provided that, in the case of bonds that are not readily marketable without a guarantee and for which the proportionate interest reduction cannot reasonably be estimated in such a way as to properly reflect the proportionate credit risk, the proportionate credit risk shall be determined by use of a reasonable method that properly reflects such risk.

(ii) *Special rules for variable yield bonds*—(A) *Level payments*. Level payments allocated to a variable yield bond shall be treated as paid when paid (but not earlier than when actually due). See paragraph (d)(4) of this section (Examples (4)-(11)). For purposes of this paragraph (b)(13)(ii), all payments for a guarantee allocated to a bond shall be treated as level payments if all such payments are paid during a single yield period, the bond is outstanding only during such yield period, and the bond is not retired before the final maturity date of the bond. See paragraph (c)(7) of this section (Example (11)).

(B) *Nonlevel payments*. Nonlevel payments allocated to a variable yield bond shall be treated as paid on the first day of each bond year. The amount treated as paid on the first day of each bond year (other than a short bond year) shall be the constant payment amount. The amount treated as paid on the first day of each short bond year shall be the product of the constant payment amount, and the fraction of a full year represented by the short bond year. See paragraph (d)(4) of this section (Examples (4)-(11)).

(C) *Early retirement*. If a variable yield bond is retired before the final maturity date, no payment for a guarantee shall be treated as paid with respect to the bond after the retirement date, and the amount or amounts treated as paid on any day during the 1-year period immediately preceding the retirement date (without regard to this sentence) shall not be treated as paid to the extent properly allocable to the period during which the bond is retired. For example, the constant payment amount treated as paid on the first day of the bond year during which the bond is retired is the product of the constant payment amount that would be treated as paid if the bond were not retired, and the fraction representing the portion of the bond year during which the bond is not retired. See paragraph (d)(4) of this section (Examples (6) and (10)).

(D) *Conversion to fixed yield bond*. If a fixed yield bond was a variable yield bond, amounts paid for a qualified guarantee with respect to the variable yield bond shall be treated as paid with respect to the fixed yield bond in the manner provided in this paragraph (b)(13)(ii) for purposes of paragraphs (c) and (d) of this section. See paragraph (d)(4) of this section (Examples (9)-(11)).

(iii) *Definitions and special rules*. For purposes of this paragraph (b)(13)—

(A) *Level payment*. A payment for a qualified guarantee of a bond is a level payment if—

(*1*) The payment is one of a series of payments with respect to the bond;

(*2*) Each payment in the series is the same percentage of the outstanding amount of the bond plus accrued interest for a period of no longer than one year, determined as of the date the payment is calculated;

(*3*) Each payment in the series is due no earlier than one year before and no later than one year after the date the payment is calculated; and

(*4*) The series of payments are due at periodic intervals (properly adjusted to take into account any short interval) and at least one payment is due each bond year while the guarantee of the bond is in effect.

The accrued interest referred to in paragraph (b)(13)(iii)(A)(*2*) may be based on a hypothetical interest rate (but not at a rate above a reasonable maximum rate) if the method of calculating such interest does not vary and is not designed to front-load or back-load payments. See paragraph (d)(4) of this section (Examples (4) and (7)).

(B) *Nonlevel payment*. Any payment for a qualified guarantee of a bond that is not a level payment is a nonlevel payment.

(C) *Constant payment amount*. The constant payment amount, with respect to a variable yield bond, is equal to the present value of all the nonlevel payments for a qualified guarantee allocated to the bond, divided by the present value of all the nominal amounts paid on the first day of each bond year while the guarantee of the bond is in effect (without regard to any retirement of the bond before the final maturity date). The nominal amount paid on the first day of each bond year (other than a short bond year) is $1. The nominal amount paid on the first day of a short bond year is the product of $1, and the fraction of a full year represented by the short bond year. Present value is computed as of the first day the guarantee is in effect by using as the discount rate the composite yield on all the variable yield bonds to which the nonlevel payments relate (determined with regard to level payments but without regard to any nonlevel payment and by applying rules similar to the rules in paragraph (d) of this section) during the period beginning on the first day the guarantee is in effect and ending on the last day of the first yield period that is at least one full year during which the guarantee is in effect (not taking into account any period after which the guarantee is no longer in effect). For purposes of the preceding sentence, the yield period for a fixed yield issue shall be the period determined under paragraph (b)(2)(ii)(A) of this section. See paragraph (d)(4) of this section (Examples (4)-(11)).

(D) *Bond year*. The first bond year shall be treated as beginning on the first day the guarantee of the bond is in effect, and the last bond year shall be treated as ending on the last day the guarantee of the bond is in effect (without regard to any retirement of the bond before the final maturity date). Any bond year that is less than 12 full months is a short bond year.

(E) *Aggregation rule*. All guarantees with respect to variable yield bonds that are part of the same issue and are entered into with the same guarantor (or a related person within the meaning of section 144(a)(3)) on or before the first computation date shall be treated as one guarantee. The preceding sentence shall not apply to guarantees that are not in effect and are not entered into within one year of each other.

(14) *Certain hedging transactions*. [Reserved]

(c) *Computation of yield on fixed yield issue*—(1) *General rule.* The yield on a fixed yield issue as of any computation date is the discount rate that produces the same present value when used in computing—

(i) *Issue payments.* The present value of all the issue payments paid and to be paid in connection with the bonds that are part of the issue; and

(ii) *Issue prices.* The present value of all the issue prices of the bonds that are part of the issue.

Present value is computed as of the date of issue of the fixed yield issue. See §1.148-8T(b)(5) for formula for determining present value. See paragraph (c)(2) of this section for determination of issue payments paid. See paragraph (c)(3) of this section for determination of issue payments to be paid. See paragraph (c)(4) of this section for special rule for small issues. See paragraph (c)(5) of this section for transition rule for fixed yield issues. See paragraph (c)(6) of this section for special rules for transitioned variable yield bonds. See paragraph (b) of this section for definitions and special rules.

(2) *Determination of issue payments paid.* For purposes of this paragraph (c), the issue payments paid as of any computation date in connection with the fixed yield bonds that are part of a fixed yield issue are—

(i) *Principal and interest.* Any amounts paid on or before the computation date to discharge principal or interest on the bonds (not including the retirement price or any amount taken into account in computing the early retirement value of a bond on the retirement date);

(ii) *Qualified guarantee.* Any amounts paid on or before the computation date for a qualified guarantee with respect to the bonds (not including any amount taken into account in computing the early retirement value of the bond on the retirement date);

(iii) *Early retirement value.* If any bond is retired before the final maturity date and on or before the computation date, an amount equal to the early retirement value of the bond on the retirement date; and

(iv) *Retirement price.* If any bond is retired on the final maturity date and on or before the computation date, an amount equal to the retirement price of the bond.

(3) *Determination of issue payments to be paid.* For purposes of this paragraph (c), the issue payments to be paid as of any installment computation date in connection with the bonds that are part of a fixed yield issue shall be determined—

(i) *Scheduled early retirements.* By assuming that bonds are retired on the scheduled early retirement date if—

(A) Bonds are subject to mandatory early redemption or are to be retired before the final maturity date pursuant to a binding obligation that exists on the computation date; or

(B) Bonds are to be retired before the final maturity date with proceeds of a refunding issue issued on or before the computation date.

(ii) *Optional retirements.* Except as otherwise provided in paragraph (c)(3)(i) of this section, by assuming that bonds are retired on the final maturity date for the stated retirement price on such date.

(4) *Special rule for small issues*—(i) *In general.* Unless the issuer otherwise elects, the yield on an eligible small issue shall be the yield on the issue determined by treating the date of issue as the only computation date if—

(A) The issue is a fixed yield issue (without regard to paragraphs (b)(1)(ii) and (b)(3)(ii) of this section);

(B) As of the date of issue, it is reasonably expected that no bond that is part of the issue would be an arbitrage bond (as defined in section 148(a), but without regard to section 148(d)(3)) if all the proceeds of the issue (exclusive of amounts reasonably set aside to pay any amount required to be paid with respect to the issue under §1.148-1T(b)(1)(i)) to be used to acquire investments (other than purpose investments) were used to acquire higher yielding investments (as defined in section 148(b)(1));

(C) At least 75 percent of the net sale proceeds are allocated to expenditures (other than expenditures for the payment of the principal or interest on or the retirement price of any bond) no later than the date that is 3 years after the date of issue (and no later than the final computation date); and

(D) No hedging transaction to which paragraph (b)(14) of this section applies is entered into with respect to the issue which would increase the rebatable arbitrage if taken into account in computing the yield on the issue.

See paragraph (c)(7) of this section (Examples (3), (6), (8), and (10)). See §1.148-8T(d)(6) for expenditure of net sale proceeds.

(ii) *Eligible small issue*—(A) *In general.* For purposes of paragraph (c)(4)(i) of this section, an issue is an eligible small issue if the aggregate issue price of the bonds issued as part of the issue does not exceed $5 million.

(B) *Certain governmental issues.* Paragraph (c)(4)(ii)(A) of this section shall be applied by substituting "$10 million" for "$5 million" if—

(*1*) No bond issued as part of the issue is a private activity bond; and

(*2*) The aggregate issue price of all tax-exempt bonds (other than private activity bonds) issued by the issuer during the calendar year in which the issue is issued and during the immediately preceding calendar year does not exceed $30 million.

For purposes of paragraph (c)(4)(ii)(B)-(*2*), an issuer and all entities that issue bonds on behalf of the issuer shall be treated as one issuer.

(5) *Transition rule for fixed yield issues.* Unless the issuer otherwise elects, the yield on an issue shall be the yield on the issue determined by treating the date of issue as the only computation date if—

(i) The issue is a fixed yield issue (without regard to paragraphs (b)(1)(ii) and (b)(3)(ii) of this section);

(ii) The issue is sold on or before May 15, 1989, and issued on or before June 14, 1989;

(iii) At least 25 percent of the net sale proceeds are allocated to expenditures (other than expenditures for the payment of the principal or interest on or the retirement price of any bond) no later than the date that is 3 years after the date of issue (and no later than the final computation date); and

(iv) No hedging transaction to which paragraph (b)(14) of this section applies is entered into with respect to the issue which would increase the rebatable arbitrage if taken into account in computing the yield on the issue.

See paragraph (c)(7) of this section (Examples (3), (6), (8), and (10)). See §1.148-8T(d)(6) for expenditure of net sale proceeds.

(6) *Special rules for transitioned variable yield bonds.* For purposes of this paragraph (c)—

(i) *Issue payments paid.* The provisions of paragraph (d)(2) of this section shall apply in determining the issue payments paid as of any computation date in connection with the variable yield bonds that are part of a fixed yield issue. For purposes of applying such provisions, the yield period for the issue shall begin on the date of issue and end on the final computation date.

(ii) *Issue payments to be paid.* The issue payments to be paid as of any installment computation date in connection with the variable yield bonds that are part of a fixed yield issue shall be determined by assuming that market interest rates in effect on the computation date do not later change, and that no discretionary action is taken after the computation date to affect the interest rate on (or any other term of) the bonds.

(iii) *Tender bond remarketing.* The provisions of paragraph (d)(2)(ii)(A) of this section shall apply in determining the issue price to be taken into account under paragraph (c)(1)(ii) of this section when a tender bond is remarketed.

See paragraph (c)(7) of this section (Example (11)).

(7) *Examples.* The following examples illustrate the application of this paragraph (c):

Example (1). (i) On March 1, 1988, City A issues an issue consisting of identical fixed yield bonds. The final maturity date of each bond is July 1, 1998. Interest is payable on July 1 of each year at a rate of 10 percent per annum on the outstanding principal amount. The aggregate principal amount of the bonds is $20 million. The aggregate issue price of the bonds (determined under §1.148-8T(c)) is $21,333,333.33 (including $1,333,333.33 for accrued interest from July 1, 1987 to March 1, 1988). The bonds are subject to optional redemption on July 1, 1994 at 103 percent of par plus accrued interest, and on July 1 of any year thereafter at par plus accrued interest. The issuer elected under paragraph (c)(5) of this section not to apply the transition rule for fixed yield issues.

(ii) All the bonds are outstanding on the first installment computation date (7/01/92). The yield on the issue as of the first installment computation date is 9.983 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (9.9830505029%)*
7/01/88	$ 2,000,000.00	$ 1,937,558.13
7/01/89	2,000,000.00	1,761,687.94
7/01/90	2,000,000.00	1,601,781.30
7/01/91	2,000,000.00	1,456,389.23
7/01/92	2,000,000.00	1,324,194.25
7/01/93	2,000,000.00	1,203,998.47
7/01/94	2,000,000.00	1,094,712.75
7/01/95	2,000,000.00	995,346.78
7/01/96	2,000,000.00	905,000.15
7/01/97	2,000,000.00	822,854.20
7/01/98	22,000,000.00	8,229,810.13
	PV Issue Prices (3/01/88)	$ 21,333,333.33

See paragraph (c)(2)(i), (c)(2)(iv), and (c)(3)(ii) of this section. The bonds are not yield-to-call bonds because the yield-to-maturity on the bonds (9.983%, the same as the yield on the issue to maturity computed above) is not more than one-fourth of one percent higher than the lowest yield on the bonds (9.979%, the same as the yield on the issue to the first par call date computed in subdivision (iii) below). See paragraph (b)(4)(ii)(A), (b)(5)(ii), and (b)(5)(iii) of this section.

(iii) All the bonds are redeemed on July 1, 1995 at par plus accrued interest ($22 million). The aggregate issue payment taken into account as of July 1, 1995 is the aggregate early retirement value of the bonds on July 1, 1995. See paragraph (c)(2)(iii) of this section. Since the yield-to-maturity on the bonds is higher than the lowest yield, the aggregate early retirement value of the bonds is the lesser of the aggregate present value of the bonds on July 1, 1995, and the lowest aggregate stated retirement price of the bonds at any time during the period beginning July 1, 1994 and ending September 29, 1995 (par plus accrued interest). See paragraph (b)(7)(i) of this section. The aggregate present value of the bonds on July 1, 1995 determined by using the exact method is $22,008,457.83, computed as follows:

Date	*Payments*	*PV (9.983%)*
7/01/95	$ 2,000,000.00	$ 2,000,000.00
7/01/96	2,000,000.00	1,818,462.85
7/01/97	2,000,000.00	1,653,403.57
7/01/98	22,000,000.00	16,536,591.40
	PV (7/01/95)	$ 22,008,457.83

See paragraph (b)(8)(i) of this section. The aggregate present value of the bonds determined by using the approximate method is par plus accrued interest ($22 million), which is lower. See paragraph (b)(8)(iii) of this section. Since the lowest aggregate stated retirement price of the bonds during the relevant period ($22 million) is lower than the aggregate present value of the bonds on July 1, 1995 ($22,008,457.83), the aggregate issue payment taken into account on July 1, 1995 is $22 million. See paragraphs (b)(7)(i) and (c)(2)(iii) of this section. The yield on the issue as of the final computation date (7/01/95) is 9.979 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (9.9788917222%)*
7/01/88	$ 2,000,000.00	$ 1,937,582.56
7/01/89	2,000,000.00	1,761,776.76
7/01/90	2,000,000.00	1,601,922.64
7/01/91	2,000,000.00	1,456,572.81
7/01/92	2,000,000.00	1,324,411.25
7/01/93	2,000,000.00	1,204,241.31
7/01/94	2,000,000.00	1,094,974.95
7/01/95	22,000,000.00	10,951,851.06
	PV Issue Prices (3/01/88)	$ 21,333,333.33

See paragraphs (c)(2)(i) and (c)(2)(iii) of this section.

Example (2). The facts are the same as in Example (1), except that all the bonds are retired on September 15, 1991 for $17.5 million. Since the bonds are not subject to redemption at any time during the period beginning September 15, 1990 and ending December 14, 1991, the aggregate early retirement value of the bonds on September 15, 1991 is the aggregate present value of the bonds on that date. See paragraph (b)(7)(i) of this section. The aggregate present value of the bonds on September 15, 1991 determined by using the exact method is $20,411,935.28, computed as follows:

Date	*Payments*	*PV (9.983%)*
7/01/92	$ 2,000,000.00	$ 1,854,381.70
7/01/93	2,000,000.00	1,686,062.12
7/01/94	2,000,000.00	1,533,020.67
7/01/95	2,000,000.00	1,393,870.57
7/01/96	2,000,000.00	1,267,350.92
7/01/97	2,000,000.00	1,152,315.29
7/01/98	22,000,000.00	11,524,934.01
	PV (9/15/91)	$ 20,411,935.28

See paragraph (b)(8)(i) of this section. The aggregate present value of the bonds determined by using the approximate method is par plus accrued interest ($20,411,111.11), which is lower. See paragraph (b)(8)(iii) of this section. The yield on the issue as of the final computation date (9/15/91) is 9.983 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (9.9831105266%)*
7/01/88	$ 2,000,000.00	$ 1,937,557.78
7/01/89	2,000,000.00	1,761,686.66
7/01/90	2,000,000.00	1,601,779.26
7/01/91	2,000,000.00	1,456,386.58
9/15/91	20,411,935.28	14,575,923.05
	PV Issue Prices (3/01/88)	$ 21,333,333.33

See paragraph (c)(2)(i) and (c)(2)(iii) of this section.

Example (3). The facts are the same as in Examples (1) and (2), except that the transition rule for fixed yield issues applies. The yield on the issue for purposes of computing the rebatable arbitrage as of each computation date is the yield on the issue determined by treating the date of issue as the only computation date. See paragraph (c)(5) of this section. This yield (9.983%) is the same as the yield computed as of the first installment computation date in Example (1)(ii) when all the bonds were outstanding.

Example (4). (i) On July 1, 1988, City A issues an issue consisting of two fixed yield bonds. The final maturity dates of the bonds are July 1, 2003 (the "2003 bond") and July 1, 2008 (the "2008 bond"). Interest on the 2003 bond is payable on July 1 of each year at a rate of 8 percent per annum on the outstanding principal amount. The principal amount of the 2003 bond is $10 million. The issue price of the 2003 bond is $11 million (including $1 million issue premium). The 2003 bond is subject to optional redemption on or after July 1, 1998, at par ($10 million) plus accrued interest. Interest on the 2008 bond is payable on July 1 of each year at a rate of 10 percent per annum on the outstanding principal amount. The principal amount and issue price of the 2008 bond are $10 million. The 2008 bond is subject to optional redemption on or after July 1, 1998, at 103 percent of par ($10.3 million) plus accrued interest. The issuer elected under paragraph (c)(5) of this section not to apply the transition rule for fixed yield issues.

(ii) The 2003 bond is a yield-to-call bond, because the yield-to-maturity (6.908%) is more than one-fourth of one percent higher than the lowest yield (6.602%). See paragraph (b)(4)(ii)(A) of this section. The yield-to-maturity and lowest yield are computed as follows:

Date	*Payments*	*PV (6.90839766673%)*
7/01/89	$ 800,000.00	$ 748,304.17
7/01/90	800,000.00	699,948.92
7/01/91	800,000.00	654,718.37
7/01/92	800,000.00	612,410.61
7/01/93	800,000.00	572,836.77
7/01/94	800,000.00	535,820.18
7/01/95	800,000.00	501,195.59
7/01/96	800,000.00	468,808.44
7/01/97	800,000.00	438,514.14
7/01/98	800,000.00	410,177.45
7/01/99	800,000.00	383,671.87
7/01/00	800,000.00	358,879.08
7/01/01	800,000.00	335,688.39
7/01/02	800,000.00	313,996.28
7/01/03	10,800,000.00	3,965,029.74
	Issue Price	11,000,000.00

Date	Payments	PV (6.6022869808%)
7/01/89	$ 800,000.00	$ 750,452.94
7/01/90	800,000.00	703,974.52
7/01/91	800,000.00	660,374.69
7/01/92	800,000.00	619,475.16
7/01/93	800,000.00	581,108.70
7/01/94	800,000.00	545,118.42
7/01/95	800,000.00	511,357.15
7/01/96	800,000.00	479,686.85
7/01/97	800,000.00	449,978.01
7/01/98	10,800,000.00	5,698,473.55
	Issue Price	$ 11,000,000.00

See paragraph (b)(5)(ii) and (b)(5)(iii) of this section. The 2003 bond is treated as if the lowest yield date (7/01/98) were the final maturity date, the stated retirement price on such date ($10.8 million) were the stated retirement price on the final maturity date, and the yield-to-maturity were the lowest yield (6.602%). See paragraph (b)(4)(i) of this section.

(iii) Both bonds are outstanding on the first installment computation date (7/01/93). The yield on the issue as of the first installment computation date is 8.554 percent per annum compounded annually, computed as follows:

Date	Issue Payments	PV (8.5542432566%)
7/01/89	$ 1,800,000.00	$ 1,658,157.20
7/01/90	1,800,000.00	1,527,491.83
7/01/91	1,800,000.00	1,407,123.10
7/01/92	1,800,000.00	1,296,239.61
7/01/93	1,800,000.00	1,194,093.91
7/01/94	1,800,000.00	1,099,997.45
7/01/95	1,800,000.00	1,013,315.94
7/01/96	1,800,000.00	933,465.07
7/01/97	1,800,000.00	859,906.57
7/01/98	11,800,000.00	5,192,947.90
7/01/99	1,000,000.00	405,401.32
7/01/00	1,000,000.00	373,455.06
7/01/01	1,000,000.00	344,026.22
7/01/02	1,000,000.00	316,916.42
7/01/03	1,000,000.00	291,942.91
7/01/04	1,000,000.00	268,937.36
7/01/05	1,000,000.00	247,744.68
7/01/06	1,000,000.00	228,222.01
7/01/07	1,000,000.00	210,237.76
7/01/08	11,000,000.00	2,130,377.67
	PV Issue Prices (7/01/88)	$ 21,000,000.00

See paragraphs (b)(4)(i), (c)(2)(i), (c)(2)(iv), and (c)(3)(ii) of this section.

(iv) The 2003 yield-to-call bond is retired on July 1, 1994. The present value of the 2003 yield-to-call bond on July 1, 1994 is $11,277,818.08, computed as follows:

Date	Payments	PV (6.602%)
7/01/94	$ 800,000.00	$ 800,000.00
7/01/95	800,000.00	750,454.96
7/01/96	800,000.00	703,978.31
7/01/97	800,000.00	660,380.03
7/01/98	10,800,000.00	8,363,004.77
	PV (7/01/94)	$ 11,277,818.08

See paragraph (b)(4)(i) and (b)(8)(i) of this section. The 2008 bond is redeemed on July 1, 1998 for 103 percent of par plus accrued interest ($11.3 million). The present value of the 2008 bond on July 1, 1998 is par plus accrued interest ($11 million). See paragraph (b)(8) of this section. In the case of both bonds, the yield-to-maturity is not higher than the lowest yield (and the present value is not higher than the stated retirement price). Accordingly, the early retirement value of each bond is the present value. See paragraph (b)(7)(i) of this section. The yield on the issue as of the final computation date (7/01/98) is 8.542 percent per annum compounded annually, computed as follows:

Date	Issue Payments	PV (8.5424831007%)
7/01/89	$ 1,800,000.00	$ 1,658,336.85
7/01/90	1,800,000.00	1,527,822.85
7/01/91	1,800,000.00	1,407,580.52
7/01/92	1,800,000.00	1,296,801.47
7/01/93	1,800,000.00	1,194,740.93
7/01/94	12,277,818.08	7,507,972.59
7/01/95	1,000,000.00	563,380.40
7/01/96	1,000,000.00	519,041.38
7/01/97	1,000,000.00	478,191.91
7/01/98	11,000,000.00	4,846,131.10
	PV Issue Prices (7/01/88)	$ 21,000,000.00

See paragraph (c)(2)(i) and (c)(2)(iii) of this section.

Example (5). The facts are the same as in Example (4), except that the 2003 bond is retired on July 1, 2000, and the 2008 bond is retired on July 1, 2001. Since the 2003 bond is outstanding after the lowest yield date (7/01/98), the 2003 bond is treated as if it were retired for $10.8 million (the stated retirement price on such date) and reissued on the same date (as part of the same issue) for $10 million (the stated retirement price less the interest payable on such date). See paragraph (b)(4)(i) of this section. The early retirement value of each bond is the present value. See paragraph (b)(7)(i) of this section. The present value of the reissued 2003 bond on July 1, 2000 is $10.8 million. See paragraph (b)(8)(i) of this section. The present value of the 2008 bond on July 1, 2001 is $11 million. See paragraph (b)(8) of this section. The yield on the issue as of the final computation date (7/01/01) is 8.363 percent per annum compounded annually, computed as follows:

Date	Issue Payments	PV (8.3629495686%
7/01/89	$ 1,800,000.00	$ 1,661,084.35
7/01/90	1,800,000.00	1,532,889.57
7/01/91	1,800,000.00	1,414,588.27
7/01/92	1,800,000.00	1,305,416.91
7/01/93	1,800,000.00	1,204,670.89
7/01/94	1,800,000.00	1,111,699.98
7/01/95	1,800,000.00	1,025,904.14
7/01/96	1,800,000.00	946,729.62
7/01/97	1,800,000.00	873,665.42
7/01/98	11,800,000.00	5,285,350.95
7/01/98	(10,000,000.00)	(4,479,110.97)
7/01/99	1,800,000.00	744,018.12
7/01/00	11,800,000.00	4,501,032.97
7/01/01	11,000,000.00	3,872,059.79
	PV Issue Prices (7/01/88)	$ 21,000,000.00

See paragraphs (b)(4)(i), (c)(2)(i), and (c)(2)(iii) of this section. In the above computation, the $10 million issue price of the 2003 bond on July 1, 1998 is taken into account as a negative issue payment on that date. The result would be the same if the negative issue payment were not taken into account, and the present value of the issue prices on July 1, 1988 included the present value of the $10 million issue price of the 2003 bond. The result also would be the same if neither the retirement nor the reissuance of the 2003 bond on July 1, 1998 was taken into account.

Example (6). The facts are the same as in Examples (4) and (5), except that the transition rule for fixed yield issues applies. The yield on the issue for purposes of computing the rebatable arbitrage as of each computation date is the yield on the issue determined by treating the date of issue as the only computation date. See paragraph (c)(5) of this section. This yield (8.554%) is the same as the yield computed as of the first installment computation date in Example (4)(iii) when all the bonds were outstanding.

Example (7). (i) On July 1, 1988, City B issues an issue consisting of five fixed yield bonds. The final maturity date of each bond is July 1, 1998. Interest on the bonds is payable on July 1 of each year at a rate of 7 percent per annum on the outstanding principal amount. The principal amount of each bond is $5 million. The issue price of each bond is 99.5 percent of par ($4.975 million). The bonds are subject to mandatory sinking fund redemption on July 1 of each year beginning July 1, 1994. On each sinking fund redemption date, one of the bonds is chosen by lottery and is required to be redeemed at par plus accrued interest ($5.35 million). The issuer elected under paragraph (c)(5) of this section not to apply the transition rule for fixed yield issues.

(ii) All the bonds are outstanding on the first installment computation date (7/01/93). The bonds are assumed to be retired on each scheduled mandatory early redemption date for purposes of determining the issue payments to be paid after the first installment computation date. See paragraph (c)(3)(i)(A) of this section. The issue payment taken into account on each mandatory early redemption date is the early retirement value of a bond on such date. See paragraph (c)(2)(iii) of this section. The early retirement value of a bond assumed to be retired on each mandatory early redemption date is the present value of the bond on such date. See paragraph (b)(7)(i) of this section. This present value is computed by treating the scheduled early retirement date (in satisfaction of which the bond is to be retired) and the stated retirement price on such date as the final maturity date and stated retirement price of the bond on the final maturity date. See paragraph (b)(8)(ii)(B)(*3*) of this section. The present value of each bond on the assumed retirement date (determined in this manner) is equal to the stated retirement price of the bond on the assumed retirement date ($5.35 million). Accordingly, the yield on the issue as of the first installment computation date (7/01/93) is 7.085 percent per annum compounded annually, computed as follows:

Date	Issue Payments	PV (7.0845525262%)
7/01/89	$ 1,750,000.00	$ 1,634,222.64
7/01/90	1,750,000.00	1,526,104.93
7/01/91	1,750,000.00	1,425,140.13
7/01/92	1,750,000.00	1,330,855.01
7/01/93	1,750,000.00	1,242,807.65
7/01/94	6,750,000.00	4,476,543.57
7/01/95	6,400,000.00	3,963,621.64
7/01/96	6,050,000.00	3,498,974.40
7/01/97	5,700,000.00	3,078,459.32
7/01/98	5,350,000.00	2,698,270.71
	PV Issue Prices (7/01/88)	$ 24,875,000.00

See paragraph (c)(2)(i), (c)(2)(iii), (c)(2)(iv), (c)(3)(i)(A), and (c)(3)(ii) of this section. The special rule in paragraph (b)(7)(iii)(A) of this section for determining the early retirement value of certain discount bonds does not apply, because the yield-to-maturity is not more than one fourth of one percent lower than the composite yield-to-maturity. See subdivision (v) below.

(iii) All the bonds are redeemed on July 1, 1994 pursuant to an optional redemption provision for par plus accrued interest ($5.35 million). Since all the bonds are retired before the final maturity date (7/01/98), the issue payment taken into account on the retirement date (7/01/94) is the early retirement value of the bonds. See paragraph (c)(2)(iii) of this section. The early retirement value of each bond on July 1, 1994 is the present value of the bond on that date. See paragraph (b)(7)(i) of this section. The discount rate used in computing this present value is the composite yield-to-maturity on all 5 bonds, determined by assuming the bonds are retired on the scheduled early retirement dates and by treating those dates as the final maturity dates of the bonds. See paragraph (b)(8)(ii)(B) of this section. The composite yield-to-maturity on the bonds (determined in this manner) is 7.085 percent per annum compounded annually (the same as the yield as of the first installment computation date computed in subdivision (ii) above). Four of the five bonds are retired in satisfaction of the mandatory early redemption requirements. The present value of each of these bonds on July 1, 1994 is determined by treating the mandatory early redemption date (in satisfaction of which the bond is retired) and the stated retirement price on such date ($5.35 million) as the final maturity date and stated retirement price on the final maturity date. See paragraph (b)(8)(ii)(B)(3) of this section. The present value of the bond retired in satisfaction of the July 1, 1994 mandatory early date is $5.35 million. The present value of each of the other four bonds is computed as follows:

Date	*Payments*	*PV (7.085%)*
7/01/94	$ 350,000.00	$ 350,000.00
7/01/95	5,350,000.00	4,996,031.19
	PV (7/01/94)	$ 5,346,031.19

Date	*Payments*	*PV (7.085%)*
7/01/94	$ 350,000.00	$ 350,000.00
7/01/95	350,000.00	326,843.16
7/01/96	5,350,000.00	4,665,481.80
	PV (7/01/94)	$ 5,342,324.97

Date	*Payments*	*PV (7.085 %)*
7/01/94	$ 350,000.00	$ 350,000.00
7/01/95	350,000.00	326,843.16
7/01/96	350,000.00	305,218.44
7/01/97	5,350,000.00	4,356,802.36
	PV (7/01/94)	$ 5,338,863.96

Date	*Payments*	*PV (7.085%)*
7/01/94	$ 350,000.00	$ 350,000.00
7/01/95	350,000.00	326,843.16
7/01/96	350,000.00	305,218.44
7/01/97	350,000.00	285,024.45
7/01/98	5,350,000.00	4,068,545.88
	PV (7/01/94)	$ 5,335,631.93

(iv) The yield on the issue as of the final computation date (9/01/94) is 7.084 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (7.08444316237%)*
7/01/89	$ 1,750,000.00	$ 1,634,224.31
7/01/90	1,750,000.00	1,526,108.05
7/01/91	1,750,000.00	1,425,144.50
7/01/92	1,750,000.00	1,330,860.45
7/01/93	1,750,000.00	1,242,814.00
7/01/94	5,350,000.00	3,548,097.01
7/01/94	5,346,031.19	3,545,464.91
7/01/94	5,342,324.97	3,543,006.97
7/01/94	5,338,863.96	3,540,711.64
7/01/94	5,335,631.93	3,538,568.17
	PV Issue Prices (7/01/88)	$ 24,875,000.00

See paragraph (c)(2)(i) and (c)(2)(iii) of this section. The discrepancy between this yield (7.084%) and the yield computed as of the first installment computation date (7.085%) is due solely to rounding of the discount rate used in computing the present values of the bonds.

(v) The special rule in paragraph (b)(7)(iii)(A) of this section for determining the early retirement value of certain discount bonds did not apply to the bonds, because the yield-to-maturity on the bonds is not more than one fourth of one percent lower than the composite yield-to-maturity determined as provided in paragraph (b)(8)(ii)(B) of this section (7.085%). The yield-to-maturity on the bonds is 7.071 percent per annum compounded annually, computed as follows:

Dates	*Payments*	*PV (7.07142396776%)*
7/01/89	$ 350,000.00	$ 326,884.60
7/01/90	350,000.00	305,295.84
7/01/91	350,000.00	285,132.89
7/01/92	350,000.00	266,301.57
7/01/93	350,000.00	248,713.95
7/01/94	350,000.00	232,287.89
7/01/95	350,000.00	216,946.67
7/01/96	350,000.00	202,618.65
7/01/97	350,000.00	189,236.91
7/01/98	5,350,000.00	2,701,581.02
	Issue Price	$ 4,975,000.00

See paragraph (b)(5)(ii) of this section.

Example (8). The facts are the same as in Example (7), except that the transition rule for fixed yield issues applies. The yield on the issue for purposes of computing the rebatable arbitrage as of each computation date is the yield on the issue determined by treating the date of issue as the only computation date. See paragraph (c)(5) of this section. This yield (7.085%) is the same as the yield computed as of the first installment computation date in Example (7)(ii) when all the bonds were outstanding.

Example (9). (i) The facts are the same as in Example (7), except that the issue price of each bond is 80 percent of par ($4 million).

(ii) The special rule in paragraph (b)(7)(iii)(A) of this section for determining the early retirement value of the bonds applies to the bonds, because the yield-to-maturity on the bonds is more than one fourth of one percent lower than the composite yield-to-maturity determined as provided in paragraph (b)(8)(ii)(B) of this section. The yield-to-maturity and composite yield-to-maturity are 10.296 percent and 10.906 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (10.2964780071%)*
7/01/89	$ 350,000.00	$ 317,326.54
7/01/90	350,000.00	287,703.24
7/01/91	350,000.00	260,845.36
7/01/92	350,000.00	236,494.73
7/01/93	350,000.00	214,417.30
7/01/94	350,000.00	194,400.86
7/01/95	350,000.00	176,253.01
7/01/96	350,000.00	159,799.31
7/01/97	350,000.00	144,881.60
7/01/98	5,350,000.00	2,007,878.06
	Issue Price	$ 4,000,000.00

See paragraph (b)(5)(ii) of this section.

Date	*Payments*	*PV (10.9059654240%)*
7/01/89	$ 1,750,000.00	$ 1,577,913.32
7/01/90	1,750,000.00	1,422,748.82
7/01/91	1,750,000.00	1,282,842.47
7/01/92	1,750,000.00	1,156,693.84
7/01/93	1,750,000.00	1,042,950.06
7/01/94	6,750,000.00	3,627,223.64
7/01/95	6,400,000.00	3,100,956.17
7/01/96	6,050,000.00	2,643,115.38
7/01/97	5,700,000.00	2,245,332.67
7/01/98	5,350,000.00	1,900,223.63
	Issue Prices (7/01/88)	$ 20,000,000.00

See paragraph (b)(8)(ii)(B) of this section.

(iii) The yield on the issue as of the first installment computation date is determined by assuming the bonds are retired on the scheduled early retirement dates for the early retirement value of the bonds on such dates. See paragraphs (c)(2)(iii) and (c)(3)(i)(A) of this section. The early retirement value is equal to the present value of the bonds, determined by using a discount rate equal to the yield-to-maturity on the bonds (10.296%). See paragraphs (b)(7)(i) and (b)(8)(ii)(A) of this section. The present value of a bond on each mandatory early redemption date is computed as follows:

Date	*Payments*	*PV (10.296%)*
7/01/94	$ 350,000.00	$ 350,000.00
7/01/95	350,000.00	317,327.92
7/01/96	350,000.00	287,705.74
7/01/97	350,000.00	260,848.75
7/01/98	5,350,000.00	3,615,053.52
	PV (7/01/94)	$ 4,830,935.92

Date	*Payments*	*PV (10.296%)*
7/01/95	$ 350,000.00	$ 350,000.00
7/01/96	350,000.00	317,327.92
7/01/97	350,000.00	287,705.74
7/01/98	5,350,000.00	3,987,259.43
	PV (7/01/95)	$ 4,942,293.09

Date	*Payments*	*PV (10.296%)*
7/01/96	$ 350,000.00	$ 350,000.00
7/01/97	350,000.00	317,327.92
7/01/98	5,350,000.00	4,397,787.67
	PV (7/01/96)	$ 5,065,115.58

Date	*Payments*	*PV (10.296%)*
7/01/97	$ 350,000.00	$ 350,000.00
7/01/98	5,350,000.00	4,850,583.88
	PV (7/01/97)	$ 5,200,583.88

The yield on the issue as of the first installment computation date (7/01/93) is 10.297 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (10.2965625327%)*
7/01/89	$ 1,750,000.00	$ 1,586,631.50
7/01/90	1,750,000.00	1,438,514.00
7/01/91	1,750,000.00	1,304,223.78
7/01/92	1,750,000.00	1,182,470.02
7/01/93	1,750,000.00	1,072,082.39
7/01/94	6,230,935.92	3,460,839.19
7/01/95	5,992,293.09	3,017,582.86
7/01/96	5,765,115.58	2,632,159.47
7/01/97	5,550,583.88	2,297,634.12
7/01/98	5,350,000.00	2,007,862.67
	Issue Prices (7/01/88)	$20,000,000.00

See paragraphs (c)(2)(i), (c)(2)(iii), (c)(2)(iv), (c)(3)(i)(A), and (c)(3)(ii) of this section. The issue payment taken into account on each mandatory early redemption date includes the early retirement value of the bond assumed to be retired on that date and interest on any other bond still outstanding on that date. The discrepancy between this yield (10.297%) and the yield-to-maturity on the bonds (10.296%) is due solely to rounding of the discount rate used in computing the present values of the bonds.

Example (10). The facts are the same as in Examples (7), (8), and (9), except that the bonds are subject to mandatory early redemption at par plus accrued interest ($5.35 million) on July 1 of each year beginning July 1, 1994 only to the extent there are excess revenues available for such purpose in a special redemption fund established under the indenture securing the bonds. On the date of issue and the first installment computation date, the issuer is reasonably certain that the excess revenues will be sufficient to redeem one bond on each July 1 beginning July 1, 1994. The results are the same as in Examples (7), (8), and (9). See paragraph (b)(8)(ii)(B) of this section (last sentence) and §1.148-8T(b)(4).

Example (11). (i) The facts are the same as in Example (4) in paragraph (d)(4) of this section, except that the issuer of the tender bonds elected to treat the variable yield issue as a fixed yield issue. See paragraph (b)(1)(ii) of this section.

(ii) The yield on the issue as of the first installment computation date (9/01/93) is 6.518 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.5181030537%)
9/01/88		$175,000.00	$ 175,000.00
9/01/89	$ 1,393,750.00	140,000.00	1,438,461.73
9/01/90	1,393,750.00	140,000.00	1,349,093.50
9/01/91	1,393,750.00	140,000.00	1,265,277.50
9/01/92	1,651,250.00	140,000.00	1,385,897.63
9/01/93	1,651,250.00	140,000.00	1,299,795.08
9/01/94	1,522,500.00	140,000.00	1,131,420.58
9/01/95	1,522,500.00	140,000.00	1,061,128.09
9/01/96	1,522,500.00	140,000.00	995,202.71
9/01/97	1,522,500.00	140,000.00	933,373.11
9/01/98	26,522,500.00		13,965,350.07
		PV Issue Prices (9/01/88)	$ 25,000,000.00

See paragraphs (c)(3)(ii), (c)(6), (d)(2)(i)(A), (d)(2)(i)(B), and (d)(2)(i)(E) of this section. The interest rate on the tender bonds after the first installment computation date (9/01/93) is assumed to be 6 percent per annum (the same as the interest rate on the bonds for the period beginning on that date). See paragraph (c)(6)(ii) of this section. All payments for the qualified guarantee are treated as paid when paid (but not earlier than when actually due). See paragraph (b)(13)(ii)(A) of this section.

(iii) All the bonds are redeemed on September 1, 1995 at par ($25 million) plus accrued interest ($1,651,250). The yield on the issue as of the final computation date is 6.614 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.6135975396%)
9/01/88		$144,579.16	$ 144,579.16
9/01/89	$ 1,393,750.00	144,579.16	1,441,423.06
9/01/90	1,393,750.00	144,579.16	1,350,621.49
9/01/91	1,393,750.00	144,579.16	1,265,539.92
9/01/92	1,651,250.00	144,579.16	1,384,311.37
9/01/93	1,651,250.00	144,579.16	1,297,107.53
9/01/94	1,651,250.00	144,579.16	1,215,397.03
9/01/95	26,651,250.00		16,901,020.44
		PV Issue Prices (9/01/88)	$ 25,000,000.00

See paragraphs (c)(6), (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(D), and (b)(7)(ii) of this section. The initial fee for the guarantee is a nonlevel payment and is treated as paid on the first day of each bond year in amounts equal to the constant payment amount ($4,579.16). See paragraph (b)(13)(ii)(B) of this section and paragraph (d)(4) of this section (Example (4)).

(d) *Computation of yield on variable yield issue*—(1) *General rule.* The yield on a variable yield issue during any yield period is the discount rate that produces the same present value when used in computing—

(i) *Issue payments.* The present value of all the issue payments in connection with the bonds that are part of the variable yield issue that are attributable to the yield period; and

(ii) *Issue prices.* The present value of all the issue prices of the bonds issued as part of the variable yield issue during the yield period.

Present value is computed as of the first day of the yield period. See §1.148-8T(b)(5) for formula for determining present value. See paragraph (d)(2) of this section for rules for variable yield bonds. See paragraph (d)(3) of this section for rules for fixed yield bonds. See paragraph (b) of this section for definitions and special rules.

(2) *Variable yield bonds*—(1) *Issue payments.* For purposes of paragraph (d)(1)(i) of this section, the issue payments in connection with a variable yield bond that are attributable to a yield period are—

(A) *Interest.* Any amounts paid during the yield period to discharge interest that accrued on the bond during the yield period;

(B) *Qualified guarantee.* Any amounts paid during the yield period for a qualified guarantee with respect to the bond;

(C) *Tender price.* If the bond is a tender bond and is purchased pursuant to the tender right during the yield period, the amount paid pursuant to the tender right to purchase the bond;

(D) *Early retirement.* If the bond is retired before the final maturity date and during the yield period, an amount equal to the early retirement value of the bond on the retirement date;

(E) *Retirement price.* If the bond is retired on the final maturity date and during the yield period, an amount equal to the retirement price of the bond (not including any payment of interest taken into account under paragraph (d)(2)(i)(A) or (d)(2)(i)(C) of this section); and

(F) *End-of-period (and conversion) value.* If the bond is outstanding at the close of business on the last day of the yield period or is treated under paragraph (b)(3)(i) of this section as a fixed yield bond immediately after the close of business on a day (and is not a tender bond that is purchased pursuant to the tender right on such day)—

(*1*) An amount equal to the early retirement value of the bond at such time; and

(*2*) An amount equal to any unpaid interest at such time that accrued on the bond during the yield period (taken into account as of the next regular interest payment date when such amount is scheduled to be paid).

(ii) *Issue prices.* For purposes of paragraph (d)(1)(ii) of this section—

(A) *Tender bond remarketing.* A tender bond to which paragraph (d)(2)(i)(C) of this section applied on a day shall be treated as if issued immediately after the close of business on the day the bond is remarketed for an issue price equal to the issue price of the bond (determined under §1.148-8T(c)); and

(B) *Start-of-period (and conversion) value.* A bond to which paragraph (d)(2)(i)(F) of this section applied on a day shall be treated as if issued immediately after the close of business on such day for an issue price equal to the early retirement value of the bond taken into account on such day under paragraph (d)(2)(i)(F)(*1*) of this section.

(3) *Fixed yield bonds*—(i) *Issue payments.* For purposes of paragraph (d)(1)(i) of this section, the issue payments in connection with a fixed yield bond that are attributable to a yield period are—

(A) *Principal and interest.* Any amounts paid during the yield period to discharge principal or interest on the bond;

(B) *Qualified guarantee.* Any amounts paid during the yield period for a qualified guarantee with respect to the bond;

(C) *Early retirement value.* If the bond is retired before the final maturity date and during the yield period, an amount equal to the early retirement value of the bond on the retirement date;

(D) *Retirement price.* If the bond is retired on the final maturity date and during the yield period, an amount equal to the retirement price of the bond; and

(E) *End-of-period value.* If the bond is outstanding at the close of business on the last day of the yield period, the early retirement value of the bond on such day.

The amount taken into account under paragraphs (d)(3)(i)(C), (d)(3)(i)(D), and (d)(3)(i)(E) on a date shall not include any amount taken into account under paragraph (d)(3)(i)(A) or (d)(3)(i)(B) on such date.

(ii) *Issue prices.* For purposes of paragraph (d)(1)(ii) of this section, a bond to which paragraph (d)(3)(i)(E) of this section applied on the last day of a yield period shall be treated as if issued on the first day of the next succeeding yield period for an issue price equal to the amount taken into account with respect to the bond on such last day under paragraph (d)(3)(i)(E) of this section.

(4) *Examples.* The following examples illustrate the application of this paragraph (d):

Example (1). (i) On December 1, 1988, County C issues an issue consisting of identical current index bonds. The aggregate principal amount and issue price of the bonds (determined under §1.148-8T(c)) is $10 million. The final maturity date of each bond is December 1, 1995. The bonds are not subject to redemption or purchase before maturity. Interest on the bonds is payable on December 1 of each year. The interest rate on the bonds for each 1-year period beginning December 1 is 85 percent of the prime rate of Bank B as of such December 1. The prime rate of Bank B as of the date of issue is 7 percent per annum. Therefore, the assumed interest rate for purposes of computing the yield on and present value of the bonds is 5.95 percent (85% of 7%). See paragraph (b)(9)(ii) of this section. The prime rate of Bank B as of each December 1 beginning December 1, 1989 is 6 percent per annum. Therefore, the actual rate of interest on the bonds after the first 1-year period is 5.1 percent for each year. All the bonds are outstanding at the end of the first yield period (12/01/93).

(ii) The yield-to maturity on the bonds is 5.950 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (5.950000000%)*
12/01/89	$ 595,000.00	$ 561,585.65
12/01/90	595,000.00	530,047.81
12/01/91	595,000.00	500,281.08
12/01/92	595,000.00	472,186.02
12/01/93	595,000.00	445,668.73
12/01/94	595,000.00	420,640.61
12/01/95	10,595,000.00	7,069,590.10
PV Issue Prices (12/01/88)		$ 10,000,000.00

See paragraphs (b)(5)(ii), (b)(9)(i), and (b)(9)(i) of this section. The aggregate present value of the bonds on the last day of the first yield period (12/01/93) determined by using the exact method is $10,000,000, computed as follows:

Date	*Payments*	*PV (5.950%)*
12/01/94	$ 595,000.00	$ 561,585.65
12/01/95	10,595,000.00	9,438,414.35
	PV (12/01/93)	$ 10,000,000.00

See paragraphs (b)(8)(i) and (b)(9) of this section. The present value on December 1, 1993 is determined without regard to interest at the assumed rate that accrued on or before that date and is payable on or after that date (*i.e.*, without regard to the $595,000 payable on 12/01/93). See paragraph (b)(9)(iv) of this section. The present value would be the same if the issuer used the approximate method to determine the present value. See paragraph (b)(8)(iii) of this section. The aggregate early retirement value of the bonds on the last day of the first yield period is the aggregate present value of the bonds. See paragraph (b)(7)(i) of this section.

(iii) The aggregate early retirement value of the bonds on the last day of the first yield period ($10 million) and the actual interest paid on that date ($510,000) are taken into account as issue payments on that date for purposes of computing the yield on the issue during the first yield period (the period ending 12/01/93). See paragraph (d)(2)(i)(A) and (d)(2)(i)(F)(1) of this section. The yield on the issue during the first yield period is 5.288 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (5.2879549712%)*
12/01/89	$ 595,000.00	$ 565,116.87
12/01/90	510,000.00	460,058.22
12/01/91	510,000.00	436,952.38
12/01/92	510,000.00	415,006.99
12/01/93	10,510,000.00	8,122,865.54
PV Issue Prices (12/01/88)		$ 10,000,000.00

(iv) Assume all the bonds are retired on December 1, 1994 for 99.9 percent of par ($9.99 million) plus accrued interest ($510,000). For purposes of computing the yield on the issue during the second yield period (the period ending 12/01/94), the aggregate issue price of the bonds taken into account on the first day of the second yield period is the same as the early retirement value of the bonds taken into account on the last day of the first yield period ($10 million). See paragraph (d)(2)(ii)-(B) of this section. The issue payments taken into account on the early retirement date (12/01/94) are the accrued interest paid on that date ($510,000) and the aggregate early retirement value of the bonds on that date. See paragraph (d)(2)(i)(A) and (d)(2)(i)(D) of this section. The aggregate early retirement value of the bonds on the early retirement date is the present value of the bonds on that date, which is $10 million (determined by using the exact or the approximate method). See paragraph (b)(7)(i), (b)(8)(i), (b)(8)(iii), and (b)(9) of this section. The yield on the issue during the second yield period is 5.100 percent per annum compounded annually, computed as follows:

Date	*Issue Payment*	*PV (5.1000000000%)*
12/01/94	$10,510,000.00	$ 10,000,000.00
PV Issue Prices (12/01/93)		$ 10,000,000.00

Example (2). (i) The facts are the same as in Example (1), except that the aggregate issue price of the bonds is $10,025,000, and the bonds are subject to optional redemption at par plus accrued interest on or after December 1, 1993.

(ii) The bonds are not yield-to-call bonds, because the yield-to-maturity on the bonds is not more than one sixteenth of one percent higher than the lowest yield. See paragraph (b)(4)(ii)(B) of this section. The yield-to-maturity on the bonds is 5.905 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (5.9053667634%)*
12/01/89	$ 595,000.00	$ 561,822.33
12/01/90	595,000.00	530,494.67
12/01/91	595,000.00	500,913.87
12/01/92	595,000.00	472,982.52
12/01/93	595,000.00	446,608.64
12/01/94	595,000.00	421,705.39
12/01/95	10,595,000.00	7,090,472.57
PV Issue Prices (12/01/88)		$ 10,025,000.00

See paragraph (b)(5)(ii) and (b)(9) of this section. The lowest yield on the bonds is 5.891 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (5.8908270554%)*
12/01/89	$ 595,000.00	$ 561,899.47
12/01/90	595,000.00	530,640.37
12/01/91	595,000.00	501,120.24
12/01/92	595,000.00	473,242.35
12/01/93	10,595,000.00	7,958,097.57
PV Issue Prices (12/01/88)		$ 10,025,000.00

See paragraph (b)(5)(iii) and (b)(9) of this section.

(iii) The aggregate present value and early retirement value of the bonds on the last day of the first yield period (12/01/93) is $10,008,261.26, computed as follows:

Date	*Payments*	*PV (5.905%)*
12/01/94	$ 595,000.00	$ 561,824.28
12/01/95	10,595,000.00	9,446,436.99
	PV (12/01/93)	$ 10,008,261.26

See paragraph (b)(7)(i), (b)(8)(i) and (b)(9) of this section.

The yield on the issue during the first yield period (the period ending 12/01/93) is 5.245 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (5.2445513152%)*
12/01/89	$ 595,000.00	$ 565,349.93
12/01/90	510,000.00	460,437.76
12/01/91	510,000.00	437,493.21
12/01/92	510,000.00	415,692.02
12/01/93	10,518,261.26	8,146,027.07
PV Issue Prices (12/01/88)		$ 10,025,000.00

See paragraph (d)(2)(i)(A) and (d)(2)(i)(F)(1) of this section.

(iv) Assume that all the bonds remain outstanding to maturity (12/01/95). The aggregate issue price taken into account on the first day of the second yield period is the aggregate early retirement value of the bonds on such date ($10,008,261.26, computed in subdivision (iii) above). See paragraph (d)(2)(ii)(B) of this section. The aggregate issue payments taken into account on the final maturity date are the accrued interest paid on the retirement date ($510,000) and the aggregate retirement price of the bonds less such accrued interest ($10 million). See paragraph (d)(2)(i)(A) and (d)(2)(i)(E) of this section. The yield on the issue during the second yield period is 5.056 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (5.0555355756%)*
12/01/94	$ 510,000.00	$ 485,457.52
12/01/95	10,510,000.00	9,522,803.74
PV Issue Prices (12/01/93)		$ 10,008,261.26

Example (3). (i) The facts are the same as in Example (2), except that the bonds are subject to extraordinary optional or mandatory redemption at par plus accrued interest on December 1, 1990 with proceeds of the issue that have not been spent before that date. County C spent all the proceeds of the issue before such date.

(ii) The bonds are yield-to-call bonds, because the yield-to-maturity on the bonds is more than one sixteenth of one percent higher than the lowest yield. See paragraph (b)(4)(ii)(B) of this section. The yield-to-maturity on the bonds is the same as the yield-to-maturity computed in Example (2) (5.905%). The lowest yield on the bonds is 5.814 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (5.8139961083%)*
12/01/89	$ 595,000.00	$ 562,307.47
12/01/90	10,595,000.00	9,462,692.53
PV Issue Prices (12/01/88)		$ 10,025,000.00

See paragraph (b)(5)(iii) and (b)(9) of this section. The bonds are treated as if the final maturity date of the bonds were December 1, 1990, and as if the stated retirement price on the final maturity date were $10.595 million. See paragraph (b)(4)(i) of this section. Since the bonds are not actually retired on or before December 1, 1990, the bonds are treated as if issued on that date for $10 million. See paragraph (b)(4)(i) of this section. The yield-to-maturity on the reissued bond is 5.950 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (5.9500000000%)*
12/01/91	$ 595,000.00	$ 561,585.65
12/01/92	595,000.00	530,047.81
12/01/93	595,000.00	500,281.08
12/01/94	595,000.00	472,186.02
12/01/95	10,595,000.00	7,935,899.44
PV Issue Prices (12/01/90)		$ 10,000,000.00

See paragraph (b)(4)(i), (b)(5)(ii), and (b)(9) of this section. The early retirement value of the reissued bond on the last day of the first yield period (12/01/93) is $10 million, computed as follows:

Date	*Payments*	*PV (5.950%)*
12/01/94	$ 595,000.00	$ 561,585.65
12/01/95	10,595,000.00	9,438,414.35
	PV (12/01/93)	$ 10,000,000.00

See paragraph (b)(7)(i) and (b)(9) of this section.

(iii) The yield on the issue during the first yield period is 5.230 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (5.2296467486%)*
12/01/89	$ 595,000.00	$ 565,430.01
12/01/90	10,510,000.00	9,491,317.27
12/01/90	(10,000,000.00)	(9,030,749.07)
12/01/91	510,000.00	437,679.13
12/01/92	510,000.00	415,927.59
12/01/93	10,510,000.00	8,145,395.07
PV Issue Prices (12/01/88)		$ 10,025,000.00

See paragraph (d)(2)(i)(A), (d)(2)(i)(E), and (d)(2)(i)(F)(1) of this section. The yield on the issue during the second yield period is 5.100 percent per annum compounded annually, computed as follows:

Date	*Issue Payments*	*PV (5.1000000000%)*
12/01/94	$ 510,000.00	$ 485,252.14
12/01/95	10,510,000.00	9,514,747.86
PV Issue Prices (12/01/93)		$ 10,000,000.00

See paragraph (d)(2)(i)(A), (d)(2)(i)(E), and (d)(2)(ii)(B) of of this section.

Example (4). (i) On September 1, 1988, City A issues an issue consisting of identical tender bonds. The aggregate principal amount and issue price of the bonds (determined under §1.148-8T(c)) is $25 million, and the final maturity date of the bonds is September 1, 1998. Interest on the bonds is payable on September 1 of each year. The bondholders are entitled to tender the bonds at par (plus accrued interest if the tender date is not an interest payment date) to an independent remarketing agent on March 1 and September 1 of each year. On February 20 and August 20 of each year, the remarketing agent determines the lowest interest rate on the bonds that would enable the bonds that will be tendered on the next tender date to be remarketed on such date at par (plus any accrued interest). Under the terms of the bonds, this interest rate will be the interest rate for the next 6-month period beginning on the tender date (unless such rate exceeds 12 percent, which is the maximum interest rate payable on the bonds). Interest is compounded on each tender date. The remarketing agent is required to use best efforts to remarket tendered bonds at par (plus any accrued interest) on each tender date and, if any tendered bonds cannot be remarketed on such date, to continue to use best efforts to remarket the bonds. The tender price of tendered bonds is to be paid with proceeds received from remarketing the bonds. If the remarketing proceeds (and other available funds) are insufficient to make full payment, the remarketing agent is required to draw on an irrevocable letter of credit issued by Bank A to the extent necessary to make full payment. The letter of credit also guarantees regular payments of principal and interest on the bonds. Any bond that cannot be remarketed on a tender date is delivered to Bank A as security for repayment of the letter of credit advance. Advances under the letter of credit bear interest at the maximum interest rate payable on the bonds (compounded semiannually and payable each September 1). Any interest due on the bonds held by Bank A is paid to Bank A and credited against the interest accruing on the letter of credit advance. Bank A is entitled to reimbursement for any advances under the letter of credit and interest thereon from proceeds of any subsequent remarketing of the bonds delivered to Bank A (and from other available funds). The term of the letter of credit ends on the final maturity date of the bonds. The initial fee for providing the letter of credit is $35,000 payable on the date of issue. Annual fees for providing the letter of credit are payable in advance on the date of issue and on each September 1 thereafter in an amount equal to one-half of one percent of the sum of the outstanding par amount of the bonds on such date and simple interest for one year at the maximum interest rate.

(ii) Assume that the letter of credit is a qualified guarantee, that all bonds tendered on each tender date are remarketed at par (plus any accrued interest) on the same date, and that no draws are made under the letter of credit. Assume further that if all the bonds remain outstanding until maturity, the interest rates and payments for debt service and for the qualified guarantee are as follows:

Date	*Interest Rate*	*Debt Service*	*Guarantee*
9/01/88	5%		$ 175,000.00
3/01/89	6%		
9/01/89	5%	$1,393,750.00	140,000.00
3/01/90	6%		
9/01/90	5%	1,393,750.00	140,000.00
3/01/91	6%		
9/01/91	6%	1,393,750.00	140,000.00
3/01/92	7%		
9/01/92	6%	1,651,250.00	140,000.00
3/01/93	7%		
9/01/93	6%	1,651,250.00	140,000.00
3/01/94	7%		
9/01/94	6%	1,651,250.00	140,000.00
3/01/95	7%		
9/01/95	5%	1,651,250.00	140,000.00
3/01/96	6%		
9/01/96	6%	1,393,750.00	140,000.00
3/01/97	5%		
9/01/97	7%	1,393,750.00	140,000.00
3/01/98	6%		
9/01/98		26,651,250.00	

(iii) The annual letter of credit fees are level payments and are treated as paid when actually paid (but not earlier than when actually due). See paragraphs (b)(13)(ii)(A) and (b)(13)(iii)(A) of this section. The initial fee for the letter of credit ($35,000) is a nonlevel payment and is treated as paid on the first day of each bond year during the term of the letter of credit. See paragraphs (b)(13)(ii)(B) and (b)(13)(iii)(B) of this section. The amount of the initial letter of credit fee treated as paid on each September 1 is the constant payment amount. The aggregate constant payment amount is the present value of the initial fee on September 1, 1988 ($35,000), divided by the sum of the present values on September 1, 1988 of $1 paid on each September 1. For this purpose, the yield on the tender bonds during the first yield period (without regard to the initial fee) is used as the discount rate. See paragraph (b)(13)(iii)(C) of this section.

(iv) Assume all the bonds are outstanding on the last day of the first yield period (9/01/93). For purposes of computing the yield on the issue during the first yield period, the aggregate issue payments taken into account as of the last day of the first yield period are the early retirement value of the bonds ($25 million) and the accrued interest paid on such day ($1,651,250). See paragraphs (d)(2)(i)(A) and (d)(2)(i)(F)(*1*) of this section. The aggregate early retirement value of the bonds is the outstanding par amount of the bonds. See paragraph (b)(7)(ii) of this section. The yield on the tender bonds during the first yield period (determined without regard to the initial letter of credit fee) is 6.441 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (6.4412399054%)*
9/01/88		$40,000.00	$ 140,000.00
9/01/89	$ 1,393,750.00	140,000.00	1,439,533.08
9/01/90	1,393,750.00	140,000.00	1,351,103.82
9/01/91	1,393,750.00	140,000.00	1,268,106.70
9/01/92	1,651,250.00	140,000.00	1,390,031.04
9/01/93	26,651,250.00		19,411,225.36
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), and (b)(13)(ii)(A) of this section. Since the amounts paid to purchase tendered bonds were exactly offset on the same date by amounts received from remarketing the tendered bonds, both amounts may be disregarded in computing the yield. See paragraphs (d)(2)(i)(C) and (d)(2)(ii)(A) of this section. The present value of $1 paid on each September 1 is $7.64332, computed as follows:

Date	*Payment*		*PV (6.441%)*
9/01/88	$1		$1.00000
9/01/89	1		.93857
9/01/90	1		.88092
9/01/91	1		.82681
9/01/92	1		.77602
9/01/93	1		.72835
9/01/94	1		.68361
9/01/95	1		.64162
9/01/96	1		.60221
9/01/97	1		.56521
		PV (9/01/88)	$7.64332

The aggregate constant payment amount is $4,579.16 ($35,000 divided by $7.64332). See paragraph (b)(13)(iii)(C) of this section. The yield on the issue during the first yield period is 6.460 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (6.4601482415%)*
9/01/88		$144,579.16	$ 144,579.16
9/01/89	$ 1,393,750.00	144,579.16	1,443,566.50
9/01/90	1,393,750.00	144,579.16	1,354,641.31
9/01/91	1,393,750.00	144,579.16	1,271,194.01
9/01/92	1,651,250.00	144,579.16	1,392,563.81
9/01/93	26,651,250.00		19,393,455.21
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), (b)(13)(ii)(A), and (b)(13)(ii)(B) of this section.

(v) Assume all the bonds are outstanding until maturity (9/01/98). For purposes of computing the yield on the issue during the second yield period (the period ending 9/01/98), the bonds are treated as if issued for an aggregate issue price equal to the early retirement value of the bonds that was taken into account on the last day of the first yield period ($25 million). See paragraph (d)(2)(ii)(B) of this section. The aggregate issue payment taken into account on the final maturity date is the retirement price of the bonds ($26,651,250). See paragraphs (d)(2)(i)(A) and (d)(2)(i)(E) of this section. The yie]d on the issue during the second yield period is 6.713 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (6.7130248542%)*
9/01/93		$144,579.16	$ 144,579.16
9/01/94	$ 1,651,250.00	144,579.16	1,681,083.66
9/01/95	1,651,250.00	144,579.16	1,573,669.88
9/01/96	1,393,750.00	144,579.16	1,261,892.02
9/01/97	1,393,750.00	144,579.16	1,181,262.73
9/01/98	26,651,250.00		19,157,512.55
		PV Issue Prices (9/01/93)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), (b)(13)(ii)(A), and (b)(13)(ii)(B) of this section.

Example (5). The facts are the same as in Example (4), except that all the bonds are redeemed on the first installment computation date (9/01/93) at par ($25 million) plus accrued interest ($1,651,250). The aggregate issue payments taken into account on September 1, 1993 total $26,651,250. See paragraphs (d)(2)(i)(A), (d)(2)(i)(D), and (b)(7)(ii) of this section. The yield on the issue during the first yield period is 6.460 percent per annum compounded semiannually (the same as the yield on the issue during the first yield period computed in Example (4)(iv)).

Example (6). (i) The facts are the same as in Example (4), except that $10 million of the bonds are redeemed on September 1, 1992 at par ($10 million) plus accrued interest ($660,500), and all the remaining bonds are redeemed on June 1, 1996 at par ($15 million) plus accrued interest ($605,625). The annual letter of credit fee paid on each September 1 annual letter of credit fee paid on each September 1 on and after September 1, 1992 (when $10 million of the bonds are retired) is $84,000 (the product of $140,000 and 15 divided by 25). The last annual letter of credit fee is paid on September 1, 1995 (the last September 1 before the remaining $15 million of bonds are retired).

(ii) The yield on the tender bonds during the first yield period (without regard to the initial letter of credit fee) is 6.393 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.3931795670%)
9/01/88		$40,000.00	$ 140,000.00
9/01/89	$ 1,393,750.00	140,000.00	1,440,203.57
9/01/90	1,393,750.00	140,000.00	1,352,362.73
9/01/91	1,393,750.00	140,000.00	1,269,879.46
9/01/92	11,651,250.00	84,000.00	9,123,670.21
9/01/93	15,990,750.00		11,673,884.03
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(D), (d)(2)(i)(F)(*1*), and (b)(13)(ii)(A) of this section. The present value as of September 1, 1988 (using a discount rate equal to 6.393%) of $1 paid on each September 1 on which an annual letter of credit fee is payable (*i.e.*, each September 1 beginning 9/01/88 and ending 9/01/97) is $7.65749. The aggregate constant payment amount is $4,570.69 ($35,000 divided by $7.65749). See paragraph (b)(13)(iii)(C) of this section. The aggregate constant payment amount taken into account on September 1, 1992 includes only the portion of such amount attributable to the $15 million of bonds remaining outstanding after September 1, 1992 ($2,742.41; the product of $4,570.69 and 15 divided by 25). See paragraph (b)(13)(ii)(C) of this section. The yield on the issue during the first yield period is 6.412 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.4120605006%)
9/01/88		$44,570.69	$ 144,570.69
9/01/89	$ 1,393,750.00	144,570.69	1,444,231.24
9/01/90	1,393,750.00	144,570.69	1,355,896.65
9/01/91	1,393,750.00	144,570.69	1,272,964.93
9/01/92	11,651,250.00	86,742.41	9,119,126.41
9/01/93	15,990,750.00		11,663,210.08
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(D), (d)(2)(i)(F)(*1*), (b)(13)(ii)(A), (b)(13)(ii)(B), and (b)(13)(ii)(C) of this section. .

(iii) For purposes of computing the yield on the issue during the second yield period, both the annual letter of credit fee paid on September 1, 1995 and the aggregate constant payment amount normally treated as paid on September 1, 1995 are reduced to reflect the fact that the bonds were retired before the end of the bond year. The aggregate amount taken into account on September 1, 1995 is the product of $86,742.41 and 9 divided by 12 (the portion of the bond year during which the bonds were not retired). See paragraph (b)(13)(ii)(C) of this section. The yield on the issue during the second yield period is 6.807 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.8066199593%
9/01/93		$86,742.41	$ 86,742.41
9/01/94	$ 990,750.00	86,742.41	1,007,732.67
9/01/95	990,750.00	65,056.81	923,520.83
6/01/96	15,605,625.00		12,982,004.09
		PV Issue Prices (9/01/93)	$15,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(D), (d)(2)(ii)(B), (b)(13)(ii)(A), (b)(13)(ii)(B), and (b)(13)(ii)(C) of this section.

Example (7). (i) The facts are the same as in Example (4), except that the annual letter of credit fee for each of the first five years is an amount equal to two-thirds of one percent of the sum of the outstanding par amount of the bonds and simple interest for one year at the maximum interest rate and thereafter is an amount equal to one third of one percent of such sum.

(ii) All the bonds are outstanding on the first installment computation date (9/01/93). Both the initial and the annual letter of credit fees are nonlevel payments and must be reallocated. See paragraph (b)(13)(iii)(B) of this section. The aggregate constant payment amount is the present value of all the fees on September 1, 1988, divided by the sum of the present values as of September 1, 1988 of $1 paid on each September 1. See paragraph (b)(13)(iii)(C) of this section. The yield on the tender bonds during the first yield period (without regard to any of the fees) is used as the discount rate. The yield on the tender bonds during the first yield period (as so determined) is 5.866 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	PV (5.8656597372%)
9/01/89	$ 1,393,750.00	$ 1,315,458.21
9/01/90	1,393,750.00	1,241,564.34
9/01/91	1,393,750.00	1,171,821.34
9/01/92	1,651,250.00	1,310,332.55
9/01/93	26,651,250.00	19,960,823.56
	PV Issue Prices (9/01/88)	$25,000,000.00

See paragraph (d)(2)(i)(A) and (d)(2)(i)(F)(*1*) of this section. The present value of all the fees as of September 1, 1988 is $1,181,584.35, computed as follows:

Date	Guarantee	PV (5.866%)
9/01/88	$ 221,666.67	$ 221,666.67
9/01/89	186,666.67	176,180.37
9/01/90	186,666.67	166,283.16
9/01/91	186,666.67	156,941.93
9/01/92	186,666.67	148,125.47
9/01/93	93,333.33	69,902.14
9/01/94	93,333.33	65,975.27
9/01/95	93,333.33	62,269.01
9/01/96	93,333.33	58,770.94
9/01/97	93,333.33	55,469.39
	PV (9/01/88)	$ 1,181,584.35

The present value as of September 1, 1988 of $1 paid on each September 1 during the term of the guarantee is $7.81592. The aggregate constant payment amount is $151,176.62 ($1,181,584.35 divided by $7.81592). See paragraph (b)(13)(iii)(C) of this section. The yield on the issue during the first yield period is 6.487 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.4873997624%)
9/01/88		$151,176.62	$ 151,176.62
9/01/89	$ 1,393,750.00	151,176.62	1,449,374.90
9/01/90	1,393,750.00	151,176.62	1,359,732.94
9/01/91	1,393,750.00	151,176.62	1,275,635.21
9/01/92	1,651,250.00	151,176.62	1,396,204.76
9/01/93	26,651,250.00		19,367,875.57
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), and (b)(13)(ii)(B) of this section.

Example (8). (i) The facts are the same as in Example (7), except that the bonds are issued on March 1, 1989, and the annual letter of credit fee payable on March 1, 1989 (for the first bond year) is one half of the regular annual fee ($93,333.34).

(ii) The yield on the tender bonds during the first yield period (without regard to any of the fees) is 5.974 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	PV (5.9752161006%)
9/01/89	$ 750,000.00	$ 728,246.49
9/01/90	1,393,750.00	1,275,957.74
9/01/91	1,393,750.00	1,203,013.68
9/01/92	1,651,250.00	1,343,794.28
9/01/93	26,651,250.00	20,448,987.81
	PV Issue Prices (3/01/89)	$25,000,000.00

See paragraphs (d)(2)(i)(A) and (d)(2)(i)(F)(*1*) of this section. The present value of all the fees as of March 1, 1989 (the first day of the first bond year) is $1,112,913.51, computed as follows:

Date	Guarantee	(PV (5.974%)
3/01/89	$ 128,333.34	$ 128,333.34
9/01/89	186,666.67	181,252.65
9/01/90	186,666.67	170,891.14
9/01/91	186,666.67	161,121.96
9/01/92	186,666.67	151,911.25
9/01/93	93,333.33	71,613.53
9/01/94	93,333.33	67,519.67
9/01/95	93,333.33	63,659.83
9/01/96	93,333.33	60,020.64
9/01/97	93,333.33	56,589.50
	PV (3/01/89)	$ 1,112,913.51

The present value as of March 1, 1989 of $0.50 paid on March 1, 1989 and $1 paid on each September 1 thereafter is $7.48563, computed as follows:

Date	Payment	PV (5.974%)
3/01/89	$0.50	$ .50000
9/01/89	1.00	.97100
9/01/90	1.00	.91549
9/01/91	1.00	.86315
9/01/92	1.00	.81381
9/01/93	1.00	.76729
9/01/94	1.00	.72343
9/01/95	1.00	.68207
9/01/96	1.00	.64308
9/01/97	1.00	.60632
	PV (3/01/89)	$7.48563

The aggregate constant payment amount is $148,673.33 ($1,112,913.51, divided by $7.48563). See paragraph (b)(13)(iii)(C) of this section. The amount treated as paid on March 1, 1989 (the first day of the short bond year) is $74,336.67 ($148,673.33, divided by 2). See paragraph (b)(13)(ii)(B) of this section. The yield on the issue during the first yield period is 6.587 percent per annum compounded semiannually, computed as follows:

Date	Debt Service	Guarantee	PV (6.586752004%)
3/01/89		$ 74,336.56	$ 74,336.57
9/01/89	$ 750,000.00	148,673.33	870,020.10
9/01/90	1,393,750.00	148,673.33	1,399,542.57
9/01/91	1,393,750.00	148,673.33	1,311,720.09
9/01/92	1,651,250.00	148,673.33	1,434,652.28
9/01/93	26,651,250.00		19,909,728.39
		PV Issue Prices (3/01/89)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), and (b)(13)(ii)(B) of this section.

Example (9). (i) The facts are the same as in Example (4), except that the final maturity date of the bonds is September 1, 2003, and the bonds provide that the issuer may elect to convert the tender bonds to fixed rate bonds without a tender right. If the issuer so elects, (A) the remarketing agent determines the lowest interest rate at which tendered bonds could be remarketed on the next tender date at par without the tender right and this interest rate is the interest rate on the fixed rate bonds from that date until maturity; (B) interest on the fixed rate bonds is still payable on September 1 of each year but is not compounded semiannually; and (C) the fixed rate bonds are subject to optional redemption at 103 percent of par plus accrued interest 5 years after the conversion date or at any time thereafter. Principal and interest on the fixed rate bonds is not secured by the letter of credit issued by Bank A.

(ii) The issuer elects to convert all the tender bonds to fixed rate bonds on September 1, 1991. The interest rate on the fixed rate bonds is 8.5 percent per annum. All the bonds are outstanding on the first installment computation date (9/01/93). The bonds are treated as fixed yield bonds after the close of business on September 1, 1991. See paragraph (b)(3)(i) of this section. The aggregate issue payments taken into account on September 1, 1991 with respect to the tender bonds are the outstanding par amount of the bonds ($25 million) and accrued interest paid on that date ($1,393,750). See paragraphs (d)(2)(i)(A), (d)(2)(i)(F)(*1*), and (b)(7)(ii) of this section. The composite yield on the tender bonds (without regard to the nonlevel initial letter of credit fee) is 6.077 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (6.0772180296%)*
9/01/88		$140,000.00	$ 140,000.00
9/01/89	$ 1,393,750.00	140,000.00	1,444,623.25
9/01/90	1,393,750.00	140,000.00	1,360,675.69
9/01/91	26,393,750.00		22,054,701.05
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), (b)(13)(ii)(A), and (b)(7)(ii) of this section. The present value as of September 1, 1988 of $1 paid on each September 1 an annual letter of credit fee is payable (*i.e.*, on each September 1 beginning 9/01/88 and ending 9/01/97) is $7.75185. The aggregate constant payment amount is $4,515.05 ($35,000 divided by $7.75185). See paragraph (b)(13)(iii)(C) of this section. This amount is taken into account as an issue payment with respect to the variable yield bonds before the conversion and with respect to the fixed yield bonds after the conversion. See paragraphs (b)(13)(ii)(B) and (b)(13)(ii)(D) of this section. The fixed yield bonds are treated as if issued immediately after the close of business on September 1, 1991 for par. See paragraphs (b)(3)(i) and (d)(2)(ii) of this section. The aggregate issue payments taken into account with respect to the fixed yield bonds on the last day of the first yield period (9/01/93) are the accrued interest paid on such date ($2,125,000) and the aggregate early retirement value of the fixed yield bonds as of such date less the interest paid on such date ($25 million). See paragraphs (d)(3)(i)(A), (d)(3)(i)(E), (b)(7)(i), (b)(8)(i), and (b)(8)(iii) of this section. The yield on the issue during the first yield period is 6.911 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (6.9110284128%)*
9/01/88		$144,515.05	$ 144,515.05
9/01/89	$ 1,393,750.00	144,515.05	1,437,222.10
9/01/90	1,393,750.00	144,515.05	1,342,816.28
9/01/91	26,393,750.00	4,515.05	21,530,470.64
9/01/91	(25,000,000.00)		(20,390,043.25)
9/01/92	2,125,000.00	4,515.05	1,622,749.80
9/01/93	27,125,000.00		19,312,269.38
		PV Issue Prices (9/01/88)	$25,000,000.00

See paragraphs (d)(2)(i)(A), (d)(2)(i)(B), (d)(2)(i)(F)(*1*), (d)(2)(ii)(B), (d)(3)(i)(A), (d)(3)(i)(B), (d)(3)(i)(E), (b)(13)(ii)(A), (b)(13)(ii)(B), (b)(3)(i), (b)(7)(i), (b)(8)(i), and (b)(8)(iii) of this section.

(iii) All the bonds are outstanding on the second installment computation date (9/01/98). The issue is treated as a fixed yield issue issued as of the first day of the second yield period (9/01/93), and each fixed yield bond that is part of the issue is treated as if issued after the close of business on such date for an issue price equal to the outstanding par amount of the bond on such date. See paragraphs (b)(3)(ii), (d)(3)(ii), (b)(7)(i), (b)(8)(i), and (b)(8)(iii) of this section. The yield on the fixed yield issue as of the second installment computation date is 8.512 percent per annum compounded annually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (8.5117724651%)*
9/01/93		$ 4,515.05	$ 4,515.05
9/01/94	$ 2,125,000.00	4,515.05	1,962,473.75
9/01/95	2,125,000.00	4,515.05	1,808,535.34
9/01/96	2,125,000.00	4,515.05	1,666,672.01
9/01/97	2,125,000.00	4,515.05	1,535,936.58
9/01/98	2,125,000.00		1,412,455.09
9/01/99	2,125,000.00		1,301,660.69
9/01/00	2,125,000.00		1,199,557.12
9/01/01	2,125,000.00		1,105,462.65
9/01/02	2,125,000.00		1,018,749.05
9/01/03	27,125,000.00		11,983,982.67
		PV Issue Prices (9/01/93)	$25,000,000.00

See paragraphs (b)(3)(ii), (c)(2)(i), (c)(2)(ii), (c)(2)(iv), (c)(3)(ii), (b)(13)(ii)(B), (b)(13)(ii)(C), (b)(7)(i), (b)(8)(i), (b)(8)(iii), and (b)(11)(ii) of this section.

(iv) All the bonds are redeemed on September 1, 2000 at 103 percent of par ($25,750,000) plus accrued interest ($2,125,000). The aggregate early retirement value of the fixed yield bonds on September 1, 2000 is the aggregate present value, which is par ($25 million) plus accrued interest ($2,125,000). See paragraphs (b)(7)(i), (b)(8)(i), and (b)(8)(iii) of this section. The yield on the fixed yield issue as of the final computation date (9/01/00) is 8.515 percent per annum compounded annually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (8.5150899027%)*
9/01/93		$ 4,515.05	$ 4,515.05
9/01/94	$ 2,125,000.00	4,515.05	1,962,413.75
9/01/95	2,125,000.00	4,515.05	1,808,424.76
9/01/96	2,125,000.00	4,515.05	1,666,519.16
9/01/97	2,125,000.00	4,515.05	1,535,748.77
9/01/98	2,125,000.00		1,412,239.20
9/01/99	2,125,000.00		1,301,421.95
9/01/00	27,125,000.00		15,308,717.36
		PV Issue Prices (9/01/93)	$25,000,000.00

See paragraphs (c)(2)(i), (c)(2)(ii), (c)(2)(iii), (b)(13)(ii)(B), and (b)(13)(ii)(C) of this section.

Example (10). The facts are the same as in Example (9), except that all the bonds are retired on March 1, 1997. The aggregate early retirement value of the fixed yield bonds on March 1, 1997 is the aggregate present value of the bonds. See paragraph (b)(7)(i) of this section. The aggregate present value of the bonds determined by using the exact method is $26,040,833.32, computed as follows:

Date	*Debt Service*		*PV (8.500%)*
9/01/97	$ 2,125,000.00		$ 2,040,065.28
9/01/98	2,125,000.00		1,880,244.50
9/01/99	2,125,000.00		1,732,944.24
9/01/00	2,125,000.00		1,597,183.63
9/01/01	2,125,000.00		1,472,058.65
9/01/02	2,125,000.00		1,356,736.08
9/01/03	27,125,000.00		15,961,600.94
		PV (3/01/97)	$26,040,833.32

See paragraph (b)(8)(i) of this section. The aggregate present value of the bonds determined by using the approximate method is $26,062,500, which is higher. See paragraph (b)(8)(iii) of this section. The yield on the fixed yield issue as of the final computation date (3/01/97) is 8.542 percent per annum compounded annually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (8.5419391395%)*
9/01/93		$ 4,515.05	$ 4,515.05
9/01/94	$ 2,125,000.00	4,515.05	1,961,928.33
9/01/95	2,125,000.00	4,515.05	1,807,530.20
9/01/96	2,125,000.00	2,257.53	1,663,517.37
3/01/97	26,062,500.00		19,562,509.05
		PV Issue Prices (9/01/93)	$25,000,000.00

See paragraphs (c)(2)(i), (c)(2)(ii), (c)(2)(iii), (b)(13)(ii)(B), (b)(13)(ii)(C), and (b)(13)(ii)(D) of this section.

Example (11). (i) The facts are the same as in Example (9), except that the issuer elected to convert all the tender bonds to fixed rate bonds on March 1, 1991 (instead of September 1, 1991), the interest rate on the fixed rate bonds is 8.5 percent per annum, $20 million of the bonds are tendered and remarketed at par on March 1, 1991, and all the bonds are outstanding on the first installment computation date (9/01/93).

(ii) The aggregate issue payment taken into account on March 1, 1991 with respect to the tendered bonds is par ($20 million) plus accrued interest paid on March 1, 1991 ($500,000). See paragraph (d)(2)(i)(C) of this section. The aggregate issue payments taken into account with respect to the nontendered bonds on March 1, 1991 is par ($5 million) on March 1, 1991 and accrued interest to March 1, 1991 (to be paid on 9/01/91) as of September 1, 1991 ($125,000). See paragraph (d)(2)(i)(F) of this section. The yield on the tender bonds (without regard to the initial letter of credit fee) is 5.978 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (5.9782082303%)*
9/01/88		$140,000.00	$ 140,000.00
9/01/89	$ 1,393,750.00	140,000.00	1,446,012.39
9/01/90	1,393,750.00	70,000.00	1,301,073.37
3/01/91	25,500,000.00		22,008,162.24
9/01/91	125,000.00		104,752.00
		PV Issue Prices (9/01/88)	$25,000,000.00

The present value as of September 1, 1988 of $1 paid on each September 1 an annual letter of credit fee is payable is $7.78180. The aggregate constant payment amount is $4,497.67 ($35,000 divided by $7.78180). See paragraph (b)(13)(iii)(C) of this section. The fixed yield bonds are treated as if issued on March 1, 1991 for par ($25 million). The accrued interest to be paid on the bonds that were not tendered on March 1, 1991 is not treated as interest on the fixed yield bonds issued on March 1, 1991. See paragraph (b)(3)(i) of this section. The early retirement value of the fixed yield bonds on the first installment computation date (9/01/93) is the present value of the bonds on that date. See paragraph (b)(7)(i) of this section. The yield-to-maturity on the fixed yield bonds is 8.511 percent per annum compounded annually, computed as follows:

Date	*Payments*	*PV (8.5110819458%)*
9/01/91	$ 1,062,500.00	$ 1,019,980.55
9/01/92	2,125,000.00	1,879,956.47
9/01/93	2,125,000.00	1,732,501.82
9/01/94	2,125,000.00	1,596,612.80
9/01/95	2,125,000.00	1,471,382.25
9/01/96	2,125,000.00	1,355,974.18
9/01/97	2,125,000.00	1,249,618.15
9/01/98	2,125,000.00	1,151,604.18
9/01/99	2,125,000.00	1,061,277.94
9/01/00	2,125,000.00	978,036.46
9/01/01	2,125,000.00	901,324.03
9/01/02	2,125,000.00	830,628.55
9/01/03	27,125,000.00	9,771,102.62
	PV Issue Prices (3/01/91)	$25,000,000.00

See paragraph (b)(5)(ii) of this section. The aggregate present value of the fixed yield bonds on September 1, 1993 determined by using the exact method is $27,106,965.13, computed as follows:

Date	*Payments*	*PV (8.511%)*
9/01/93	$ 2,125,000.00	$ 2,125,000.00
9/01/94	2,125,000.00	1,958,326.81
9/01/95	2,125,000.00	1,804,726.53
9/01/96	2,125,000.00	1,663,173.81
9/01/97	2,125,000.00	1,532,723.69
9/01/98	2,125,000.00	1,412,505.36
9/01/99	2,125,000.00	1,301,716.29
9/01/00	2,125,000.00	1,199,616.90
9/01/01	2,125,000.00	1,105,525.61
9/01/02	2,125,000.00	1,018,814.32
9/01/03	27,125,000.00	11,984,835.81
	PV (9/01/93)	$27,106,965.13

See paragraph (b)(8)(i) of this section. The aggregate present value of the bonds determined by using the approximate method is $27,125,000, which is higher. See paragraph (b)(8)(iii) of this section. The Yield on the variable yield issue as of the first installment computation date is 7.149 percent per annum compounded semiannually, computed as follows:

Date	*Debt Service*	*Guarantee*	*PV (7.1485008956%)*
9/01/88		$144,497.67	$ 144,497.67
9/01/89	$ 1,393,750.00	144,497.67	1,433,912.56
9/01/90	1,393,750.00	144,497.67	1,336,654.21
3/01/91	25,500,000.00		21,393,467.67
3/01/91	(25,000,000.00)		(20,973,987.91)
9/01/91	1,187,500.00	4,497.67	965,527.42
9/01/92	2,125,000.00	4,497.67	1,607,913.85
9/01/93	27,125,000.00		19,092,014.53
		PV Issue Prices (9/01/88)	$25,000,000.00

§1.148-4T Allocation and accounting rules (temporary).

(a) *General rule.* An investment is allocated to an issue for the period that—

(1) Begins on the date gross proceeds are allocated to the issue and to the investment; and

(2) Ends on the date such gross proceeds cease to be allocated to the issue or to the investment.

See §1.148-8T for definitions and special rules relating to required rebate. See §1.150-1T for definitions and special rules relating to tax-exempt bond requirements in general.

(b) *Allocation of gross proceeds to issue.* [Reserved]

(c) *Allocation of gross proceeds to expenditures*—(1) *In general.* [Reserved]

(2) *Expenditures from checking account.* An expenditure of proceeds in a checking or similar account may be treated as made—

(i) On the date a negotiable check is written on the account if the check is delivered or mailed no later than one business day after such date; or

(ii) On the date the check is delivered or mailed; if the payor has no reason to believe that the check will not clear within a reasonable period of time thereafter.

(d) *Allocation of gross proceeds to investments.* [Reserved]

(e) *Special allocation rules for refundings*—(1) *Allocation of excess gross proceeds of refunded issue*—(1) *Allocation of excess gross proceeds to escrow.* Excess replacement funds and excess proceeds of a refunded issue shall be allocated to investments the receipts from which are to be used to discharge the principal or interest on or the retirement price of bonds that are part of the refunded issue.

(ii) *Allocation of excess gross proceeds in escrow.* Excess replacement funds and excess proceeds of a refunded issue shall be allocated to investments described in paragraph (e)(1)(i) of this section in such manner as to ensure that the expenditure of such funds and proceeds does not occur later than the expenditure of any sale proceeds of the refunding issue that are allocated to investments described in paragraph (e)(1)(i) of this section.

(iii) *Excess replacement funds.* The term "excess replacement funds" means, with respect to a refunded issue, amounts that at the time of the issuance of the refunding issue or at any time within 6 months thereof are or were gross proceeds (other than proceeds) of the refunded issue if—

(A) The amounts are or were to be used to discharge the principal or interest on or the retirement price of any bond that is part of the refunded issue (or a related issue that is equally and ratably secured) without regard to this paragraph (e)(1);

(B) The amounts are not gross proceeds of the refunding issue after the date of issue of the refunding issue and at all times thereafter until used to discharge the principal or interest on or the retirement price of any bond that is part of the refunding issue (or until such time as this paragraph (e)(1) applies to such amounts by reason of a subsequent refunding);

(C) The amounts were not used to defease bonds (legally or economically) that are part of the refunded issue on a date earlier than the date that is 6 months before the date of issue of the refunding issue in a transaction unrelated to the issuance of the refunding issue; and

(D) The amounts are not part of a reasonably required reserve or replacement fund or bona fide debt service fund for the refunded issue after the date of issue of the refunding issue.

No amount that was part of a bona fide debt service fund for the refunded issue shall be treated as described in paragraph (e)(1)(iii)(B).

(iv) *Excess proceeds.* The term "excess proceeds" means, with respect to a refunded issue, amounts that at the time of issuance of the refunding issue are proceeds of the refunded issue if—

(A) The amounts are allocated to investments described in paragraph (e)(1)(i) of this section and are described in paragraph (e)(1)(iii)(C) or (e)(1)(iii)(D) of this section; or

(B) The amounts were to be used to pay interest on the refunded portion of the refunded issue that accrues within the period of time described in §1.103-15(b)(2) and are described in paragraph (e)(1)(iii)(C) of this section.

(v) *Transition rule.* If a refunding issue is sold on or before May 15, 1989, and issued on or before June 14, 1989—

(A) Paragraph (e)(1)(i) of this section shall not apply;

(B) Paragraph (e)(1)(ii) of this section shall not apply to any refunding issue to which section 149(d)(4) does not apply;

(C) In the case of any refunding issue to which section 149(d)(4)applies, paragraph (e)(1)(ii) of this section—

(*1*) Shall not apply to excess replacement funds that were not gross proceeds of the refunded issue or that were part of a reasonably required reserve or replacement fund (other than a bona fide debt service fund) before the date of issue of the refunding issue or that were used to defease bonds (legally or economically) before such date;

(*2*) Shall not apply to excess proceeds of the refunded issue that were not to be used to pay interest on the refunded portion of the refunded issue that accrues within the period of time described in §1.103-15(b)(2); and

(*3*) Shall apply only for purposes of applying paragraph (e)(2) of this section (including §1.103-14(e)(2)(ii) if paragraph (e)(2)(iii)(A) of this section applies).

(2) *Transferred proceeds*-(i) *In general.* At the close of business on the date that any amount of the proceeds of a refunding issue are used to discharge the principal or interest on or the retirement price of any bond that is part of a refunded issue, the same amount of the proceeds of the refunded issue shall cease to be treated as proceeds of the refunded issue and shall be treated as transferred proceeds of the refunding issue.

(ii) *Special rules*—(A) *Unspent proceeds transfer first.* Proceeds of the refunded issue not allocated to expenditures shall cease to be proceeds (and become transferred proceeds) under paragraph (e)(2)(i) of this section before any other proceeds of the refunded issue.

(B) *Transfer otherwise is ratable.* Except as otherwise provided in paragraph (e)(2)(ii)(A) of this section, proceeds of the refunded issue ratably cease to be proceeds (and become transferred proceeds) under paragraph (e)(2)(i) of this section.

(C) *Transfer cap.* In the case of a refunding issue to which section 149(d)(4) applies, paragraph (e)(2)(i) of this section shall not apply on a date to the extent that it would cause the value of the nonpurpose investments allocated to the refunding portion of the issue to exceed by more than 10 percent the value of the bonds allocated (on a pro rata basis) to such portion of the issue.

The value of an investment is the receipt that would be taken into account under §1.148-2T(b)(2)(iii) on the following date if such date were an installment computation date. The value of a bond is the excess of the issue payments that would be taken into account under §1.148-3T on the following date if the bond were retired on such date, over any amounts actually paid on such date with respect to the bond. For purposes of this paragraph (e)(2)(ii)(C), tax-exempt investments shall be treated as nonpurpose investments.

(D) *No transfer in abusive cases.* Paragraph (e)(2)(i) of this section shall not apply to the extent that the principal purpose for issuing any portion of the refunding issue is to cause proceeds of the refunded issue to cease to be treated as proceeds of the refunded issue (or to become transferred proceeds of the refunding issue).

(iii) *Transition rule*—(A) *In general.* Section 1.103-14(e)(2)(ii) shall apply (and paragraph (e)(2)(i) and (e)(2)(ii) of this section shall not apply) for purposes of determining the extent to which proceeds of a refunded issue cease to be proceeds of the refunded issue (and become transferred proceeds of the refunding issue) if the refunding issue is sold on or before May 15, 1989, and issued on or before June 14, 1989. In applying §1.103-14(e)(2)(ii), the definition of refunding issue in §1.148-8T(f)-(2)(i) shall apply (in lieu of the definition in §1.103-14(e)(2)(i)).

(B) *Exception.* Paragraph (e)(2)(iii)-(A) of this section shall not apply to a refunding issue to which section 149(d)-(4) applies if (*1*) the weighted average maturity of the refunding issue is greater than 10 years and greater than 105 percent of the remaining weighted average maturity of the refunded bonds (as of the date of issue of the refunding issue but without regard to the refunding); (*2*) less than 35 percent of the original and investment proceeds of the refunding issue to be used to pay the principal of or interest on or the retirement price of the refunded bonds is to be used to pay principal; and (*3*) a forward purchase contract was entered into in connection with the issuance of the refunding issue in order to invest amounts other than such proceeds and to use such amounts to discharge principal of bonds that are part of a refunded issue. The preceding sentence shall not apply if the Commissioner determines that the refunding issue is not described in section 149(d)(4) (without regard to this paragraph (e)(2)(iii)(B)).

(C) *Average maturity, etc.* For purposes of paragraph (e)(2)(iii)(B) of this section (*1*) the term "refunded bonds" means bonds the principal of or interest on or the retirement price of which is to be discharged with proceeds of the refunding issue; (*2*) the weighted average maturity is determined by taking into account the respective issue prices of the bonds; and (*3*) if the present value of a bond (determined as provided in §1.148-3T) is at any time greater than 110 percent of the issue price of the bond, the average of the present values of the bond as of the first day of each bond year shall be treated as the issue price.

§1.148-5T Transactions giving rise to imputed receipts (temporary).

(a) *In general.* [Reserved]

(b) *Certain temporary investment accounts*—(1) *No receipt imputed.* No receipt shall be imputed with respect to investments of gross proceeds of an issue in a nonpurpose receipt account on any day during a calendar month if the average daily balance in the account during the month does not exceed the greater of—

(i) $10,000; and

(ii) The lesser of (A) 10 percent of the unspent gross proceeds of the issue, and (B) $50,000.

(2) *Bond yield limit.* No receipt shall be imputed with respect to investments of gross proceeds of an issue in a nonpurpose receipt account, a purpose receipt account, or a checking account on any day during a calendar month to the extent that the receipt would cause the yield on the investments of gross proceeds of the issue in such account during such month to exceed the yield on the issue if the average daily balance in the account during the month does not exceed the greater of—

(i) $250,000; and

(ii) The lesser of (A) 10 percent of the unspent gross proceeds of the issue, and (B) $2.5 million.

(3) *Qualified accounts.* For purposes of paragraphs (b)(1) and (b)(2) of this section—

(i) *Nonpurpose receipt account.* The term "nonpurpose receipt account" means a demand deposit or similar account with a bank, trust company, or broker if—

(A) The account is used for the purpose of holding amounts received with respect to investments (other than purpose investments) for a short period of time until the amounts can be reinvested at an arm's length interest rate;

(B) Substantially all such amounts are in the account for five business days or less before being used for such purpose; and

(C) Substantially all investments acquired with such amounts are not demand deposits and are held, on the average, for a period of 30 days or more.

(ii) *Purpose receipt account.* The term "purpose receipt account" means an account that would be a nonpurpose receipt account if paragraph (b)(3)(i)(A) of this section were applied by substituting "purpose investments" for "investments (other than purpose investments)".

(iii) *Checking account.* The term "checking account" means a checking or similar account if—

(A) The account is used for the purpose of holding funds for a short period of time until the funds are used to pay expenditures; and

(B) Substantially all such funds are transferred to the account no earlier than five business days before such funds are used to pay expenditures.

(iv) *Disqualified account.* Paragraphs (b)(1) and (b)(2) of this section shall not apply to an account if all or any portion of the account is formed or availed of for the principal purpose of taking advantage of this paragraph (b).

(4) *Aggregation of accounts.* For purposes of applying paragraphs (b)(1) and (b)(2) of this section—

(i) All nonpurpose receipt accounts in which gross proceeds of an issue are invested shall be treated as one separate account;

(ii) All purpose receipt accounts in which gross proceeds of an issue are invested shall be treated as one separate account;

(iii) All checking accounts in which gross proceeds of an issue are invested shall be treated as one separate account; and

(iv) *Gross proceeds* of an issue and funds (other than gross proceeds of the issue) shall not be treated as in the same account.

(5) *Gross proceeds.* For purposes of paragraphs (b)(1) and (b)(2) of this sec-

tion, the term "gross proceeds" shall not include—

(i) Any amount that may not be invested in higher yielding investments (as defined in section 148(b)(1)) without causing bonds that are part of the issue to be arbitrage bonds (as defined in section 148(a)); and

(ii) Any amount that is part of a reserve or replacement fund that is not a bona fide debt service fund.

(c) *Certain imputed escrow receipts*—(1) *Defeasance receipt*—(i) *In general.* Any interest saving with respect to a bond that is directly attributable to an investment in an escrow shall be treated as an imputed receipt with respect to such investment. The preceding sentence shall not apply to the extent that the interest saving is eliminated by payment of a similar amount with respect to a refunding bond. No interest saving is eliminated by a similar payment if the similar payment may be taken into account under §1.148-3T in computing the yield on the issue of which the refunding bond is a part.

(ii) *Interest saving.* The term "interest saving" means, with respect to a bond—

(A) Any reduction in a payment of interest on the bond;

(B) Any reduction in a payment for a guarantee with respect to a bond or a purpose investment; and

(C) Any recovery of a payment described in paragraph (c)(2)(ii)(A) or (c)(2)(ii)(B) of this section.

(iii) *Transition rule.* This paragraph (c)(1) shall apply to an issue sold on or before May 15, 1989, and issued on or before June 14, 1989, only to the extent that the interest saving is attributable to an investment in an escrow established after June 14, 1989. The preceding sentence shall not apply to a refunding issue to which section 149(d)(4) applies if any interest saving described in paragraph (c)(1)(ii)(A) or (c)(1)(ii)(C) of this section that is attributable to investments (other than transferred investments) that are allocated to the issue and in an advance refunding escrow is not taken into account in computing the yield on such issue for purposes of §1.148-3T.

(iv) *Savings treated as paid in computing yield on defeased bond.* A payment with respect to a bond that is reduced or recovered shall nonetheless be treated as paid with respect to the bond for purposes of §1.148-3T if the interest saving from the reduction or recovery is treated as an imputed receipt with respect to an investment under paragraph (c)(1)(i) of this section (or is taken into account in computing the yield on a refunding issue under paragraph (c)(1)(iii) of this section).

(2) *Excess tax-exempt receipt*—(i) *In general.* Any excess receipts from tax-exempt investments in an escrow established after June 14, 1989, shall be treated as imputed receipts with respect to the nonpurpose investments in the same escrow.

(ii) *Excess receipts.* There are excess receipts from tax-exempt investments in an escrow if—

(A) The composite yield on the tax-exempt investments in the escrow exceeds the composite yield on the nonpurpose investments in the same escrow by more than one-eighth of one percent; and

(B) The weighted average maturity of the tax-exempt investments in the escrow (determined as provided in §1.148-4T(e)(2)(iii)(C)(*2*) and (*3*) but without regard to any investment that is in the escrow for 3 months or less) is more than 25 percent greater or less than the weighted average maturity of the nonpurpose investments in the escrow (determined in the same manner).

The excess receipts are all the receipts with respect to the tax-exempt investments in excess of the receipts that produce a composite yield on the tax-exempt investments no greater than one-eighth of one percent higher than the composite yield on the nonpurpose investments.

(3) *Escrow.* An investment is in an escrow if the investment is in an advance refunding escrow or an excess proceeds escrow. For purposes of the preceding sentence, §1.148-8T(g) shall be applied by treating every investment (other than a purpose investment) as a nonpurpose investment, and §1.148-8T(g)(3) and (g)(4) shall be applied by substituting "gross proceeds" for "proceeds" each place it appears.

(4) *Examples.* The following examples illustrate the application of this paragraph (c):

Example (1). (i) In June 1989 City E issues a refunding issue the proceeds of which are to be used (together with other available funds) to defease all the outstanding bonds that are part of a refunded issue. The other available funds to be used to defease the outstanding bonds are proceeds of the refunded issue that were in a reasonably required reserve fund for the refunded issue, gross proceeds of the refunded issue that were in a bona fide debt service fund for the refunded issue, and other available funds that were not gross proceeds of the refunded issue before the date of issue of the refunding issue. A portion of the investments acquired with the proceeds of the refunding issue and the other available funds are tax-exempt investments. All of the investments allocated to the proceeds of the refunding issue that are to be used to defease the outstanding bonds are in the same advance refunding escrow. All of the investments allocated to the other available funds are in the same excess proceeds escrow. See paragraph (c)(3) of this section.

(ii) The terms of the outstanding bonds provide that the 9 percent interest rate otherwise payable on any bond that is defeased is reduced by one percent per annum. All of the reduced payments of interest resulting from the defeasance of the outstanding bonds are interest savings described in paragraph (c)(1)(ii)(A) of this section. Since the interest savings are directly attributable to the investments in the escrows, the savings are treated as imputed receipts with respect to the investments for purposes of §1.148-2T. The allocation rules in §1.148-4T(e)(1) apply for purposes of determining the portion of the interest savings that are allocated to each investment. The reduction in the 9 percent interest rate on the outstanding bonds is not taken into account in computing the yield on the outstanding bonds (or the issue of which such bonds are a part) under §1.148-3T. See paragraph (c)(1)-(iv) of this section.

Example (2). The facts are the same as in Example (1), except that (instead of a one percent reduction in payments of interest on the outstanding bonds), the defeasance results in a one percent reduction in payments for a guarantee with respect to the outstanding bonds. The outstanding bonds were secured by a letter of credit. The letter of credit is not a qualified guarantee (within the meaning of §1.148-3T(b)(12)). The annual letter of credit fee payable each year is equal to one percent of the outstanding principal amount of the bonds. The terms of the outstanding bonds provide that the letter of credit is not required to secure bonds that have been defeased. As a result of the defeasance, City E is no longer required to pay the annual letter of credit fees. Assume that City E will pay identical annual letter of credit fees for a letter of credit to secure the refunding issue, and that this letter of credit is a qualified guarantee (within the meaning of §1.148-3T(b)(12)). The reductions in the payments for the letter of credit fees with respect to the outstanding bonds are interest savings described in paragraph (c)(1)(ii)(B) of this section that are directly attributable to the investments in the escrows. These interest savings are treated as imputed receipts with respect to the escrow investments. The interest savings would not be treated as imputed receipts if the letter of credit securing the refunding issue was not a qualified guarantee (within the meaning of §1.148-3T(b)(12)).

Example (3). The facts are the same as in Example (2), except that the entire letter of credit fee was prepaid on the date of issue of the outstanding bonds, and a portion of the prepaid fee is refunded by the guarantor when the outstanding bonds are defeased. The portion of the refunded fee that is properly allocable to the period that begins on the date the outstanding bonds are defeased and that ends on the date the outstanding bonds are retired is an interest saving directly attributable to the investments in the escrows. The portion of the refunded fee properly allocable to the period beginning on the date the outstanding bonds are retired and ending on the final maturity date of the outstanding bonds is not attributable to the investments in the escrows. The constant payment allocation method is a proper method of allocating the refund for this purpose. See §1.148-3T(b)(13)(iii)(C).

§1.148-6T 6-month temporary investment exception and other special rules (temporary). [Reserved]

§1.148-7T Exception for small issuers with general taxing powers (temporary). [Reserved]

§1.148-8T Definitions and special rules relating to required rebate (temporary).

(a) *Applicability.* The definitions and rules in this section apply for purposes of this section and §§1.148-0T through §1.148-7T except to the extent otherwise provided. See §1.150-1T for definitions and special rules relating to tax-exempt bond requirements in general.

(b) *Computations and determinations*—(1) *Computation dates*—(i) *In general.* The term "computation date" means an installment computation date or the final computation date.

(ii) *Installment date.* The term "installment computation date" means, with respect to an issue, the last day of the fifth and each succeeding fifth bond year.

(iii) *Final date.* The term "final computation date" means, with respect to an issue, the date the last bond that is part of the issue is discharged.

(iv) *Other date.* If the Commissioner determines that an issue is likely to fail to meet the requirements of §1.148-1T and that a failure to serve a notice of demand for payment on the issuer will jeopardize the assessment or collection of tax on interest paid or to be paid on the issue, the date the Commissioner serves such notice on the issuer shall be treated as a computation date. The Commissioner shall designate in the notice whether such date shall be treated as an installment computation date or a final computation date (whichever is necessary to carry out the purposes of this paragraph (b)(1)(iv)).

(2) *Bond year.* The term "bond year" means, with respect to an issue, each 1-year period (or shorter period from the date of issue) that ends at the close of business on the day in the calendar year that is selected by the issuer. The day selected by the issuer must be the last day of a compounding interval used in computing the yield on the issue under §1.148-3T.

(3) *Discharge.* A bond is discharged on the date all amounts due thereunder are actually and unconditionally due if cash is available at the place of payment, and no interest accrues with respect to the bond after such date. See §1.150-1T(d)(2) for definition of actually and unconditionally due. An amount is paid or used to discharge the principal or interest on or the retirement price of a bond on the date such principal or interest or retirement price is actually and unconditionally due if cash is available at the place of payment, and no interest accrues with respect to such payment after such date.

(4) *Actual facts.* Except as otherwise provided, all computations and determinations shall be made on the basis of actual facts as of the computation date and reasonable expectations as to future events.

(5) *Present value.* The present value of an amount to be received or paid is determined by using the following formula:

$$PV = \frac{FV}{(1 + i)^n)}$$

where:

PV = The present value of the amount to be received or paid.

FV = The amount to be received or paid.

i = The discount rate (expressed as a decimal) divided by the number of compounding intervals in a year.

n = The sum of the number of whole compounding intervals during the period beginning on the date as of which the present value is computed and ending on the date the amount is to be received or paid, and a fraction, the numerator of which is the length of any short compounding interval during such period, and the denominator of which is the length of a whole compounding interval.

(6) *Conventions*—(i) *Whole intervals.* All whole intervals and compounding intervals, whether expressed annually, semiannually, monthly, or with reference to any other regular interval, shall be treated as having equal length.

(ii) *Short intervals.* In computing the length of any short interval or compounding interval, either the 30 days per month/360 days per year convention or the actual days per month/actual days per year convention shall be consistently used; provided that, either convention may be consistently used for each investment. The examples herein use the 30 days per month/360 days per year convention.

(iii) *Yield.* Yield is an annual percentage rate and, when expressed as a decimal, shall be accurate to at least six places (and rounded to at least five).

(iv) *Other conventions.* Other standard financial conventions may be used. For example, amounts payable on the first business day of a month may be treated as if payable on the first day of the month.

(c) *Issue price*—(1) *In general.* The term "issue price" has the meaning given such term by sections 1273 and 1274. Thus, if bonds are publicly offered (*i.e.*, sold by the issuer to a bond house, broker, or similar persons acting in the capacity of underwriters or wholesalers) and are not issued for property, the issue price of the bonds is determined on the basis of the initial offering price to the public at which price a substantial amount of the bonds was sold to the public. Such price shall be determined separately for bonds that are not substantially identical. Such price also shall be determined separately for substantially identical bonds that are sold at one price to the general public and to institutional or other investors at a discount from that price. If a bond is sold to the public after the date of issue, the price at which the bond is sold must be adjusted to reflect the price at which the bond would have been sold on the date of issue. This adjustment shall eliminate any change in the fair market value of the bond after the date of issue (including any change attributable to interest and premium or discount that accrues on the bond after such date). If a bond is issued for property, appropriate adjustments shall be made to the applicable Federal rate to take into account the tax exemption of the bond in applying section 1274. See section 1288(b)(1).

(2) *Special rules.* For purposes of determining the issue price of a bond under paragraph (c)(1) of this section—

(i) *Reasonable expectations.* Except as otherwise provided in this paragraph (c)(2), the issue price of a bond that is publicly offered shall be determined on the basis of actual facts and reasonable expectations as of the sale date and shall not be adjusted to take into account actual facts after such date. See §1.150-1T(c)(1) for definition of sale date.

(ii) *Bonds offered at a discount.* If substantially identical bonds are offered at one price to the general public and at a discount from that price to institutional or other investors, the determination as to which bonds are sold at each price shall be made on the basis of actual facts and reasonable expectations as of the date of issue. See §1.150-1T(c)(2) for definition of date of issue.

(iii) *Bona fide offering required.* Paragraph (c)(2)(i) and (c)(2)(ii) of this section shall not apply to any bond that is not actually offered to the general public in a bona fide public offering for the issue price of the bond (determined without regard to this sentence).

(iv) *Tender bond remarketing.* For purposes of determining the issue price of a tender bond under §1.148-3T(d)(2)-(ii)(A) when the bond is remarketed, this paragraph (c) shall be applied by treating the date on which the interest rate is reset as the sale date and the date on which the bond is remarketed as the date of issue.

(3) *Fair market value limit.* In no event shall the issue price of a bond determined under this paragraph (c) exceed the fair market value of the bond as of the sale date.

(4) *Aggregate issue price.* The term "aggregate issue price" refers to the sum of the issue prices of the bonds issued as part of the issue as determined under this paragraph (c) (but without regard to any tender bond remarketing).

(d) *Gross proceeds*—(1) *In general.* The term "gross proceeds" means, with respect to an issue, any proceeds of the issue and any funds (other than proceeds of the issue) that are part of a reserve or replacement fund for the issue.

(2) *Proceeds.* The term "proceeds" means, with respect to an issue, any original proceeds, any discount proceeds, and any transferred proceeds of the issue.

(3) *Original proceeds.* The term "original proceeds" means, with respect to an issue, any sale proceeds and any investment proceeds of the issue. Such term shall also include any amount recovered with respect to the issue under §1.148-1T(d). Such term shall not include amounts actually or constructively received with respect to a purpose investment to the extent such amounts are properly allocated to administrative costs recoverable under §1.103-13(c)(5) or to the higher yield permitted under §1.103-13(b)(5)(i)(A). For purposes of the preceding sentence, a purpose investment that is a tax-exempt bond shall not be treated as tax-exempt.

(4) *Sale proceeds.* The term "sale proceeds" means, with respect to an issue, any amounts actually or constructively received from the sale (or other disposition) of any bond that is part of the issue.

(5) *Investment proceeds.* The term "investment proceeds" means, with respect to an issue, any amounts actually or constructively received from investing original proceeds of the issue.

(6) *Net sale proceeds*—(i) *In general.* The term "net sale proceeds" means, with respect to an issue, any sale proceeds of the issue (without regard to §1.148-4T(e)(2) and §1.103-14(e)(2)(ii)) other than—

(A) Sale proceeds that are part of a reasonably required reserve or replacement fund;

(B) Sales proceeds used to pay accrued interest included in the issue price of any bond that is part of the issue no later than the date that is less than one year after the date of issue;

(C) Sale proceeds used to pay capitalized interest on the issue that accrues no later than the date that is 3 years after the date of issue; and

(D) Sale proceeds received with respect to a purpose investment that are allocated to an expenditure no later than 13 months after the date of receipt thereof.

(ii) *Capitalized interest.* The term "capitalized interest" means, with respect to an issue, interest paid on the sale proceeds of the issue that have been allocated to an expenditure if—

(A) The expenditure is not for the payment of the principal or interest on or the retirement price of any bond; and

(B) The expenditure is of a type that is chargeable to capital account for Federal income tax purposes (with or without an election by a taxpayer).

Such term shall also include interest on the sale proceeds of the issue that are allocated to expenditures for the payment of capitalized interest on the issue.

(iii) *Special rules for refunded and refunding issues.* For purposes of applying any requirement relating to the expenditure of the net sale proceeds of a refunded issue or refunding issue—

(A) Net sale proceeds properly allocated to the refunding portion of an issue shall not be treated as net sale proceeds;

(B) Net sale proceeds properly allocated to the refunded portion of an issue shall be treated as net sale proceeds of the refunded issue and of the refunding issue; and

(C) The requirement shall be treated as met with respect to a refunding issue only if the requirement is met separately with respect to the nonrefunding portion of the issue and each refunding portion of the issue.

(7) *Discount proceeds.* [Reserved]

(8) *Transferred proceeds.* The term "transferred proceeds" means, with respect to a refunding issue, proceeds that have ceased to be proceeds of a refunded issue and are transferred proceeds of the refunding issue by reason of §1.148-4T(e)(2) (including amounts actually or constructively received from investing such proceeds).

(9) *Indirect use*—(i) *In general.* Any reference to proceeds shall be construed to include a reference to proceeds used directly or indirectly. Such reference has the same meaning as when used in section 148(a). If proceeds are used directly and indirectly, the proceeds shall be treated as used directly or indirectly (whichever produces the larger amount of rebatable arbitrage).

(ii) *Examples.* The following examples illustrate the application of this paragraph (d)(9):

Example (1). The facts are the same as in Example (1) in paragraph (g)(5) of this section, except that $1 million of the proceeds of the 1985 issue are not used directly to discharge the 1983 issue. Instead, as part of the very same transaction or a series of closely related and interdependent transactions, City A deposited this $1 million of proceeds of the 1985 issue into its General Fund and transferred approximately the same amount from its General Fund to the trustee for the 1983 issue. City A had been advised by its tax counsel that this substitution of fully fungible dollars would result in greater debt service savings from the refunding. A nonpurpose investment is in an advance refunding escrow if the investment is allocated to proceeds to which §1.103-13(b)(5)(iii) applies. See paragraph (g)(2)(i) of this section. Section 1.103-13(b)(5)(iii) applies to proceeds used directly or indirectly to discharge the 1983 issue. See §1.103-13(b)(1) and (f)(4)(ii). City A used proceeds of the 1985 issue indirectly to discharge the 1983 issue and to purchase the investments purchased directly with the money transferred from the General Fund. Consequently, if the 1985 issue is refunded in 1987 and the larger amount of rebatable arbitrage is produced by allocating these proceeds of the 1985 issue to the investments indirectly acquired with such proceeds, the result is the same as in Example (1) in paragraph (g)(5) of this section.

Example (2). The facts are the same as in Example (1), except that the proceeds of the 1985 issue were not transferred to the General Fund and money in the General Fund was not transferred to the trustee for the 1983 issue. Instead, the same substitution of fully fungible dollars was arranged with respect to funds that were in a General Construction Fund or Pension Fund, proceeds of the 1983 issue that were in the City Office Building Construction Fund established with proceeds of the 1983 issue, gross proceeds in a restricted escrow established with proceeds of a 1980 issue, or gross proceeds in a debt service reserve or replacement fund allocated to an issue other than the 1983 issue. The result is the same as in Example (1).

(10) *Reserve or replacement fund*—(i) *In general.* [Reserved]

(ii) *Certain perpetual trust funds*—(A) *In general.* A fund described in paragraph (d)(10)(ii)(B) of this section shall not be treated as a reserve or replacement fund solely by reason of the fact that the fund is used to guarantee the payment of the principal or interest on or the tender or retirement price of a bond described in paragraph (d)(10)(ii)(D) of this section. The preceding sentence shall not apply to a guarantee if any fee is charged for the guarantee in excess of a nominal charge for administrative costs, shall not apply to a fund unless the fund is described in paragraph (d)(10)(ii)(B) of this section on August 31, 1986, and shall not apply to a fund on or after the date the fund is no longer described in paragraph (d)(10)(ii)(B) of this section.

(B) *Fund described.* A fund established pursuant to a State constitutional provision is described in this paragraph (d)(10)(ii)(B) if—

(*1*) Substantially all of the corpus of the fund consists of long-term nonfinancial assets, revenues derived from such assets, gifts, and bequests;

(*2*) Pursuant to such constitutional provision, the corpus of the fund may not be invaded for any purpose other than for the support of specifically designated essential governmental functions carried on by political subdivisions of the State with general taxing powers; and

(*3*) Pursuant to such constitutional provision, substantially all of the available income of the fund is required to be applied annually for the support of such functions.

(C) *Treatment of additions to fund*—(*1*) *In general.* For purposes of paragraph (d)(10)(ii)(A) of this section, no addition to the corpus of a fund described in paragraph (d)(10)(ii)(B) of this section on or after May 15, 1989, shall be considered part of a fund described in paragraph (d)(10)(ii)(B) of this section. For purposes of the preceding sentence, all revenues derived from assets that are part of the corpus of a fund (exclusive of amounts received from the sale or other disposition of such assets) shall be treated as additions to the corpus of a fund.

(*2*) *Allocation rule.* Additions to which paragraph (d)(10)(ii)(C)(*1*) of this section applies shall be considered used to guarantee bonds described in paragraph (d)(10)(ii)(D) of this section only to the extent that the outstanding amount of the bonds guaranteed by the fund exceeds 250 percent of the lower of the amortized cost or fair market value of the fund (without regard to the additions).

(D) *Bond described.* A bond is described in this paragraph (d)(10)(ii)(D) if—

(*1*) The bond is a general obligation of a political subdivision referred to in paragraph (d)(10)(ii)(B)(*2*) of this section and is not a private activity bond;

(*2*) No income referred to in paragraph (d)(10)(ii)(B)(*3*) of this section is reasonably expected (as of the date of issuance of the bond) to be used (directly or indirectly) for the payment of the principal or interest on or the tender or retirement price of any bond of such political subdivision or to fund a reserve or replacement fund for any such bond; and

(*3*) Substantially all of the proceeds of the issue of which the bond is a part is to be used to provide facilities necessary to carry on the functions referred to in paragraph (d)(10)(ii)(B)(*2*) of this section.

(e) *Investments*—(1) *In general.* The term "investment" means any investment property or tax-exempt bond. The purpose of acquiring or holding an investment is not a governmental purpose, and the use of gross proceeds to acquire an investment is not an expenditure. If an investment is allocated to more than one source, all payments and receipts with respect to the investment shall be allocated ratably to each source.

(2) *Investment property.* The term "investment property" means any security, obligation, annuity contract, or investment-type property. Such term shall not include any tax-exempt bond or qualified exempt investment. In the case of any bond (other than a private activity bond) issued after October 21, 1988 and to which section 148(b)(2)(E) applies, such term shall also include any residential rental property for family units not located within the jurisdiction of the issuer unless such property is acquired to implement a court ordered or approved housing or segregation plan.

(*3*) *Tax-exempt* bond. For purposes of paragraphs (e)(2) and (e)(3)(iii) of this section—

(i) *In general.* The term "tax-exempt bond" shall not include any bond owned by a person if the person had reason to believe (at the time the person entered into a binding contract to acquire the bond) that interest on the bond is not excluded from gross income.

(ii) *AMT bond.* The term "tax-exempt bond" shall not include a specified private activity bond (as defined in section 57(a)(5)(C)) in the case of an issue that is issued after March 31, 1988 and a part of which is not a specified private activity bond (as so defined). The preceding sentence shall not apply for purposes of paragraph (e)(3)(iii) of this section if the requirements of paragraph (e)(3)(iii) are satisfied, determined without regard to paragraph (e)(3)(iii)(C) and by substituting "85 percent" for "98 percent" in paragraph (e)(3)(iii)(D).

(iii) *Tax-exempt mutual fund.* The term "tax-exempt bond" shall include stock of a corporation during any quarter of the taxable year of the corporation that—

(A) The corporation is a regulated investment company (as defined in section 851(a)) which, for the taxable year, meets the requirements of section 852(a);

(B) The corporation has authorized and outstanding only one class of stock;

(C) The corporation to the extent practicable invests all its assets in tax-exempt bonds;

(D) At least 98 percent of—

(*1*) The gross income of the corporation (without regard to the exclusion of interest from gross income under section 103) is derived from interest on or gains from the sale or other disposition of tax-exempt bonds; or

(*2*) The weighted average value of the assets of the corporation is represented by investments in tax-exempt bonds.

The Commissioner may for good cause waive one or more of the requirements of this paragraph (e)(3)(iii).

(4) *Qualified exempt investment*—(i) *In general.* The term "qualified exempt investment" means any exempt demand deposit and any exempt temporary investment.

(ii) *Exempt demand deposit.* The term "exempt demand deposit" means any obligation acquired with gross proceeds of an issue if—

(A) The obligation is a one-day certificate of indebtedness issued by the United States Treasury pursuant to the Demand Deposit State and Local Government Series program described in 31 CFR Part 344; and

(B) The issuer in good faith attempts to comply with all the requirements of such program relating to the investment of the gross proceeds of the issue.

(iii) *Exempt temporary investment.* [Reserved]

(5) *Security.* [Reserved]

(6) *Obligation.* [Reserved]

(7) *Annuity contract.* [Reserved]

(8) *Investment-type property.* [Reserved]

(9) *Nonpurpose investment.* The term "nonpurpose investment" means any investment property that is not a purpose investment.

(10) *Purpose investment.* The term "purpose investment" means any investment that is allocated to gross proceeds of an issue and that is acquired in order to carry out the governmental purpose of the issue. Such term does not include any temporary investment until the proceeds of the issue are needed for the governmental purpose of the issue, any investment that is acquired in order to fund a reserve or replacement fund, or any other investment if the principal purpose for acquiring the investment is to earn arbitrage.

(11) *Transferred investment.* The term "transferred investment" means, with respect to an issue, any investment allocated to transferred proceeds of the issue.

(12) *SLG.* The term "SLG" means a time deposit security issued by the United States Treasury pursuant to the Time Deposit State and Local Government Series program described in 31 CFR Part 344.

(13) *Fixed rate investment.* The term "fixed rate investment" means any investment that is a fixed yield bond and is not purchased pursuant an investment contract. See §1.150-1T(b)(5) for definition of fixed yield bond.

(14) *Investment contract.* The term "investment contract" means, with respect an issue, a contract entered into for the purpose of investing gross proceeds of the issue (and related amounts) from time to time in obligations of the other party to the contract at an interest rate or rates specified in the contract if all such obligations are purchased at par and retired or redeemed at par plus accrued interest.

(f) *Issues*—(1) *In general.* [Reserved]

(2) *Refundings*—(i) *Refunding issue.* The term "refunding issue" means an issue any portion of the proceeds of which are used to discharge the principal or interest on or the retirement price of any bond that is part of another issue.

(ii) *Refunded issue.* The term "refunded issue" means an issue if any portion of the principal or interest on or the retirement price of any bond that is part of the issue is discharged with proceeds of another issue.

(g) *Restricted escrows*—(1) *In general.* An investment is in a restricted escrow if the investment is a nonpurpose investment that is in an advance refunding escrow or an excess proceeds escrow.

(2) *Advance refunding escrow.* An investment is in an advance refunding escrow if the investment is a nonpurpose investment—

(i) That is allocated to proceeds to which §1.103-13(b)(5)(iii) applies (without regard to an initial temporary period of no longer than 30 days or the effective date of such provision); and

(ii) That is not properly allocated to the nonrefunding portion of the refunding issue.

In applying §1.103-13(b)(5)(iii) for purposes of paragraph (g)(2)(i) of this section, the definition of refunding issue in paragraph (f)(2)(i) of this section shall apply (in lieu of the definition in §1.103-14(e)(2)(i)).

(3) *Excess proceeds escrow.* An investment is in an excess proceeds escrow if—

(i) The investment is a nonpurpose investment that is not in an advance refunding escrow;

(ii) The proceeds allocated to the investment are to be used to discharge the principal or interest on or the retirement price of any bond that is part of the issue to which such proceeds are allocated (without regard to §1.148-4T(e)(2) and §1.103-14(e)(2)(ii)); and

(iii) Such proceeds are not part of a reasonably required reserve or replacement fund and may not be invested in higher yielding investments for a reasonable temporary period under section 148(c) (or under section 103(c)(4) of the 1954 Code).

(4) *Same escrow.* Except as otherwise provided in this paragraph (g)(4), investments are in the same restricted escrow (whether or not held concurrently) if the investments are (or were or will be) allocated to proceeds of the same issue (without regard to §1.148-4T(e)(2) and §1.103-14(e)(2)(ii)). Investments in an advance refunding escrow are not in the same restricted escrow as investments in an excess proceeds escrow. Investments in excess proceeds escrows that were not established at or around the same time are not in the same restricted escrow.

(5) *Examples.* The following examples illustrate the application of this paragraph (g):

Example (1). (i) In 1983, City A issues an issue (the "1983 issue") to finance the construction of a City office building and to refund two prior issues. A portion of the proceeds of the 1983 issue (including investment proceeds) are to be used to discharge the prior issues in 1995. Prior to the discharge date, such proceeds will be held by the respective trustees for the two prior issues. All nonpurpose investments allocated to such proceeds are and will continue to be (until the 1995 discharge date) in the same advance refunding escrow (the "1983 advance refunding escrow"). See paragraph (g)(2) and (g)(4) of this section.

(ii) In 1985, City A issues an issue (the "1985 issue") to refund a portion of the 1983 issue. Proceeds of the 1985 issue (including investment proceeds) are to be used to discharge interest on the 1983 issue, to discharge principal of and call premium on the 1983 issue in 1990, and to fund a reasonably required reserve fund for the 1985 issue. Amounts that were in a bona fide debt service fund for the 1983 issue also will be used to discharge principal of the 1983 issue in 1990. The proceeds of the 1985 issue and amounts that were in the bona fide debt service fund for the 1983 issue that are to be used to discharge the 1983 issue will be held by the trustee for the 1983 issue, and the proceeds of the 1985 issue in the reserve fund will be held by the trustee for the 1985 issue. All nonpurpose investments allocated to these proceeds of the 1985 issue are and will continue to be (until the 1990 discharge date) in the same advance refunding escrow (the "1985 advance refunding escrow"). See paragraph (g)(2) and (g)(4) of this section. The proceeds in the 1985 advance refunding escrow are not (and never will be) in the same advance refunding escrow as the proceeds in the 1983 advance refunding escrow. See paragraph (g)(4) of this section. Investments allocated to amounts that were in the bona fide debt service fund for the 1983 issue are not in a restricted escrow.

(iii) A transfer occurs in 1990 when a portion of the 1983 issue is discharged with proceeds of the 1985 issue. To the extent of this transfer, a ratable portion of the proceeds (and investments and expenditures) of the 1983 issue cease to be treated as proceeds (and investments and expenditures) of the 1983 issue and become transferred proceeds (and transferred investments and expenditures) of the 1985 issue. See §1.148-4T(e)(2)(iii)(A). The nonpurpose receipt with respect to the 1983 issue and the nonpurpose payment with respect to the 1985 issue that arise by reason of this transfer equal the present value of the transferred investments at the time of the transfer. See §1.148-2T(b)(2)(ii), (b)(3)(ii), and (d)(3)(i)(B). The discount rate used in computing this present value is the yield on all nonpurpose investments (including the transferred investments) in the 1983 advance refunding escrow. That yield is not affected by this (or any other) transfer. See §1.148-2T(e)(2)(ii).

(iv) After the 1990 discharge date, nonpurpose investments allocated to the proceeds of the 1985 issue in the reserve fund for the 1985 issue cease to be in the 1985 advance refunding escrow. See paragraph (g)(2)(i) of this section. These investments are at the same time treated as if sold and purchased for present value. The receipt arising from this sale is a receipt with respect to an investment in the 1985 advance refunding escrow; the payment arising from this purchase is a payment with respect to an investment that is not in a restricted escrow. See §1.148-2T(b)(5)(i)(A).

Example (2). (i) The facts are the same as in Example (1), except that City A issues an issue in 1987 (the "1987 issue") to refund a portion of the 1985 issue. Proceeds of the 1987 issue (including investment proceeds) are to be used to discharge a portion of the 1985 issue in 1989. Proceeds of the 1985 issue that were in the reserve fund for the 1985 issue (including investment proceeds) are to be used to discharge a portion of the 1985 issue in 1991.

(ii) In 1989, a ratable portion of the investments allocated to the proceeds of the 1985 issue (including the proceeds that were in the reserve fund for the 1985 issue) transfer to the 1987 issue. See §1.148-4T(e)(2)(iii)(A).

(iii) In 1990, the investments allocated to the proceeds of the 1985 issue that were in the reserve fund for the 1985 issue (including the investments that transferred in 1989) cease to be in the 1985 advance refunding escrow. See paragraph (g)(2)(i) of this section. These investments at the same time become investments in an excess proceeds escrow. See paragraph (g)(3) of this section. These investments at the same time are treated as if sold and purchased for present value. See §1.148-2T(b)(5)-(i)(A) and (b)(5)(i)(B) (last sentence). This present value is computed by using the yield on all the investments in the 1985 advance refunding escrow as the discount rate. This is the same yield referred to in Example (1)(iii) (the yield on the investments in the excess proceeds escrow also is the same). The investments in the excess proceeds escrow that are transferred investments of the 1987 issue are treated as in an advance refunding escrow for purposes of the first sentence of §1.148-2T(b)(5)(i)-(A).

(h) *Elections*—(1) *In general.* Any election with respect to an issue must be in writing and must be signed by an authorized representative of the issuer on or before the later of—

(i) The date of issue; and

(ii) If the issue is issued on or before November 15, 1989, the first date after June 14, 1989, that any amount with respect to the issue is paid or required to be paid to the United States under §1.148-1T(b)(1).

An election, once made, shall be irrevocable after such date.

(2) *Procedural requirements.* If the rebatable arbitrage with respect to an issue (determined by taking into account an election) is smaller than the rebatable arbitrage (determined without taking into account the election), the election shall be effective only if the election identifies the issue to which it applies and is maintained as part of the official transcript of the proceedings relating to the issuance of the issue until 6 years after the final computation date. The Commissioner may waive the requirements of this paragraph (h)(2) if the Commissioner determines that the failure to meet the requirements was inadvertent.

(3) *Special rules.* For purposes of this paragraph (h)—

(i) *Issue.* The term ''issue'' shall include all issues that are treated by the issuer as one issue under §1.149(e)-1T(d)(2)(ii) or (iii), and any election with respect to one of such issues shall apply equally to all of such issues.

(ii) *Extension of time.* The Commissioner may extend the time to make an election if—

(A) The Commissioner determines that the failure to make the election in a timely manner was due to reasonable cause;

(B) The Commissioner determines that as of the date of issue (and without regard to later facts) it was in the best interests of the issuer to make the election, and the failure to make the election was not deliberate; and

(C) The aggregate issue price of the bonds issued as part of the issue is less than $50 million.

(4) *Cross reference.* The elections to which this paragraph (h) applies are in §1.148-0T(b)(2)(ii)(C) and §1.148-3T(b)(1)(ii), (b)(2)(ii)(B), (b)(3)(i), (b)-(3)(ii), (c)(4)(i), and (c)(5).

§1.148-9T Certain rules applicable for purposes of section 148 generally (temporary).

(a) *Computation of yield on fixed yield issue.* Section 1.148-3T shall apply for purposes of determining the yield on a fixed yield issue for purposes of section 148(a) and (d)(3). For purposes of computing such yield, the date of issue of the fixed yield issue shall be treated as the only computation date. See §1.148-3T(c)(7) (Examples (3), (6), (8), and (10)).

(b) *Computation of yield on investments.* The yield on a nonpurpose investment that is not directly purchased with gross proceeds to which the investment is allocated shall be determined on the basis of a purchase price equal to the fair market value of the investment on the date the investment is allocated to the issue for purposes of section 148 (a) and (d)(3). Fair market value has the same meaning as when used in §1.148-2T(b)-(3)(ii).

(c) *Refunding allocation rules.* Section 1.148-4T(e) shall apply for purposes of applying the requirements of section 148.

(d) *Certain imputed escrow receipts.* Any receipt imputed under §1.148-5T(c) to an investment in an escrow shall be treated as interest on the investment for purposes of section 148(a).

(e) *Certain perpetual trust funds.* Section 1.148-8T(d)(10)(ii) shall apply for purposes of section 148.

(f) *Investment property.* The definition of the term ''investment property'' in §1.148-8T(e)(2) shall apply for purposes of section 148.

(g) *Effective date*—(1) *In general.* Except as otherwise provided in this paragraph (g), the provisions of this section apply to any issue sold after May 15, 1989, or issued after June 14, 1989.

(2) *Computation of yield on investments.* Paragraph (b) of this section may be applied in the case of any issue to which §1.148-1T applies that is not described in paragraph (g)(1) of this section.

(3) *Investment property.* Paragraph (f) of this section shall apply to any bond that is not described in paragraph (g)(1) of this section to the same extent that section 148(b)(2) applies to such bond.

§1.149(d)-1T Restrictions on advance refundings (temporary).

(a) *General rule.* Under section 149(d) and this section, nothing in section 103(a) or in any other provision of law shall be construed to provide an exemption from Federal income tax for interest on any bond issued as part of an issue described in paragraph (b), (c), or (d) of this section.

(b) *Certain private activity bonds.* [Reserved]

(c) *Other bonds.* [Reserved]

(d) *Abusive transactions prohibited*—(1) *In general.* [Reserved]

(2) *Failure to pay required rebate.* Any issue to which section 149(d)(4) and §1.148-1T apply that fails to meet the requirements of §1.148-1T is described in this paragraph (d). Section 149(d)(4) and this paragraph (d)(2) apply to any bond issued after August 31, 1986 if any bond issued as part of the issue (of which such bond is a part) is issued to advance refund another bond (within the meaning of section 149(d)(5)). See §1.148-0T(b)-(2)(ii) for bonds to which 1.148-1T applies.

§1.150-0T Table of contents (temporary).

This section lists the paragraphs, subparagraphs, and subdivisions contained in 1.150-1T.

(5) Fixed yield bond.
(6) Variable yield bond.
(7) Tender bond.
(i) In general.
(ii) Tender right.
(iii) Tender rate.
(8) Current index bond.
(i) In general.
(ii) Interest index.
(iii) Current rate.
(c) Sale and issue date.
(1) Sale date.
(2) Date of issue.
(d) Final maturity date.
(1) In general.
(2) Actually and unconditionally due.
(3) Single loan with partial principal repayments.
(e) Internal Revenue Code.

§1.150-1T Definitions and special rules relating to tax-exempt bond requirements in general (temporary).

(a) *Applicability.* Except to the extent otherwise provided, the definitions and rules in this section apply for purposes of the regulations under sections 141 through 150.

(b) *Bonds*—(1) *Bond.* The term "bond" includes any obligation. Whenever necessary or appropriate to carry out the purposes of a provision, a single bond shall be treated as separate bonds (or separate bonds shall be treated as a single bond).

(2) *Tax-exempt bond (or issue).* The term "tax-exempt bond (or issue)" means any bond (or issue) the interest on which is excluded from gross income under any provision of law. Any bond (or issue) that (when issued) purported to be a tax-exempt bond (or issue) shall be treated as a tax-exempt bond (or issue).

(3) *State or local bond.* The term "State or local bond" means any bond that is (or would be) a tax-exempt bond (without regard to the last sentence of paragraph (b)(2) of this section) if the appropriate requirements of sections 141-150 are (or were) met.

(4) *Private activity bond*—(i) *In general.* The term "private activity bond" includes any bond that is a private activity bond (as defined in section 141). Such term shall not include any bond described in section 1312(c)(2) of the Tax Reform Act of 1986 to which section 141(a) does not apply by reason of section 1312 or 1313 of such Act.

(ii) *Qualified bond.* The term "qualified bond" means any private activity bond that is a qualified bond (within the meaning of section 141(e)). Each bond described in a subparagraph of section 141(e)(1) has the same meaning as when used in such subparagraph. Any bond to which section 141(a) does not apply by reason of section 1312 or 1313 of the Tax Reform Act of 1986 shall be treated as a bond described in the subparagraph of section 141(e)(1) to which the use of the proceeds of such bond most closely relates.

(5) *Fixed yield bond.* The term "fixed yield bond" means any bond that is not a variable yield bond.

(6) *Variable yield bond.* The term "variable yield bond" means any bond if any interest or other amount payable on the bond (other than in the event of an unanticipated contingency) is determined by reference to (or by reference to an index that reflects) market interest rates or stock or commodity prices after the date of issue.

(7) *Tender bond*—(i) *In general.* The term "tender bond" means any variable yield bond that is subject to a tender right if—

(A) All interest on the bond (other than in the event of a remote contingency) accrues at a tender rate; and

(B) Such interest is actually and unconditionally due at periodic intervals of one year or less.

(ii) *Tender right.* A bond is subject to a tender right if the holder of the bond is entitled (or required) to tender the bond for purchase or redemption at par on one or more tender dates before the final maturity date (plus accrued interest to the tender date if the tender date is not a regular interest payment date).

(iii) *Tender rate.* Interest on a bond that is subject to a tender right accrues at a tender rate if—

(A) In the case of interest accruing to the first tender date, the interest rate is set on or after the sale date at the lowest rate that would enable the bond to be marketed at par (plus accrued interest, if any) on the date of issue; and

(B) In the case of interest accruing for each period between tender dates (and for the final period to maturity), under the terms of the bond the interest rate is reset for such period at the lowest rate that would enable the bond to be remarketed at par (plus accrued interest, if any) at the beginning of the period.

The interest accruing for each period may be subject to a minimum and/or maximum rate if the minimum and/or maximum rate is not designed to front-load or back-load interest.

(8) *Current index bond*—(i) *In general.* The term "current index bond" means any variable yield bond if—

(A) All interest on the bond (other than in the event of a remote contingency) accrues at the current rate established by a single interest index or at a rate that is fixed and determinable as of the date of issue; and

(B) Such interest is actually and unconditionally due at periodic intervals of one year or less.

The rate may vary from the current rate established by the interest index if the variation is based on a percentage or multiple of the current rate and/or a number of percentage or basis points more or less than the current rate and the variation is the same at all times.

(ii) *Interest index.* The term "interest index" means a series of interest rates that reflect either—

(A) The rate that is currently publicly offered by a financial institution for a particular type of loan to a significant class of unrelated borrowers; or

(B) The average of a statistically significant sample of current yields on a class of publicly traded bonds.

Examples of interest indexes include the prime rate of a designated financial institution, LIBOR, the applicable Federal rate, and the average yield on United States Treasury securities of a particular class.

(iii) *Current rate.* The interest rate in effect on a bond accrues at the current rate if it is based on a rate that is established by the interest index no earlier than six months before and no later than six months after the rate first is in effect.

(c) *Sale and issue date*—(1) *Sale date.* The sale date of a bond is the first day on which there is a binding contract in writing for the sale or exchange of the bond on specific terms that are not later modified or adjusted in any material respect. The sale date is the date on which the bond is sold by the issuer.

(2) *Date of issue.* The date of issue of a bond is the first day on which there is a physical delivery of the written evidence of the bond in exchange for the purchase price. Such day shall not be earlier than the first day on which interest begins to accrue on the bond for federal income tax purposes.

(d) *Final maturity date*—(1) *In general.* The final maturity date of a bond is the latest date on which any principal or interest on the bond is actually and unconditionally due.

(2) *Actually and unconditionally due.* A payment of principal or interest on or the tender price or retirement price of a bond is actually and unconditionally due on the first day on which the failure to make the payment on a timely basis results in significant remedies and consequences to the issuer that are normal in similar lending transactions.

(3) *Single loan with partial principal repayments.* If a single debt instrument requires one or more payments of principal before the latest date that the final payment of principal and interest is actually and unconditionally due, each payment of principal (and related payments of interest) shall be treated as a separate bond. The final maturity date of each separate bond shall be the latest date on which any payment of principal or interest under the debt instrument is actually and unconditionally due.

(e) *Internal Revenue Code.* The term "1954 Code" means the Internal Revenue Code of 1954 as in effect before the enactment of the Tax Reform Act of 1986. Any reference to a section of the Internal Revenue Code (other than the 1954 Code) is to a section of the Internal Revenue Code of 1986.

PART 602—[AMENDED]

Par. 3. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 602.101(c) is amended by inserting in the appropriate place in the table "§1.148-0T through §1.148-9T ... 1545-1098."

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impractical to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved: January 31, 1989.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on May 12, 1989, 8:45 a.m., and published in the issue of the Federal Register for May 15, 1989, 54 F.R. 20787)

Part VI.—Itemized Deductions for Individuals and Corporations

Section 162.—Trade or Business Expenses

26 CFR 1.162-1: Business expenses.
(Also Section 831; 1.831-3.)

Wholly owned insurance subsidiary. Rev. Rul. 88-72, which holds that a parent corporation and its subsidiaries cannot deduct under section 162 of the Code amounts paid to the parent's wholly owned insurance subsidiary as "insurance premiums" notwithstanding the insurance subsidiary's acceptance of insurance risks from unrelated parties, is clarified.

Rev. Rul. 89-61

This revenue ruling clarifies the LAW AND ANALYSIS portion of Rev. Rul. 88-72, 1988-2 C.B. 31. In its discussion of the economics of insurance, Rev. Rul. 88-72 states that the increase in average loss predictability resulting from the acceptance of additional risks "helps protect the [insurance] company's solvency." This statement could cause confusion. The improved average loss predictability indeed may allow the insurance company to use its capital more efficiently in protecting its solvency. However, in the absence of some additional capital, the improved predictability is normally accompanied by a reduced probability of the insurance company's solvency.

When additional statistically independent risk exposure units are insured, an insurance company's potential total loss increases, as does the uncertainty of the amount of that loss. As the uncertainty regarding the company's total loss increases, however, there is an increase in the predictability of the insurance company's average loss (total loss divided by the number of exposure units). That is, by insuring a large number of statistically independent risk exposure units, a company takes advantage of the statistical phenomenon known as the law of large numbers. (When the sample number increases, the probability density function of the *average* loss tends to become more concentrated around the mean.) Due to this increase in predictability, there is a downward trend in the amount of capital that the company needs *per risk unit* to remain at a given level of solvency. In this sense, the additional insureds may make a company more efficient in the way its capital provides security, and thus may "help protect the company's solvency." Without an increase in capital, however, the increase in the predictability of the average loss is at the cost of an upward trend in the company's risk of ruin (the probability that total losses may exceed total premiums and capital).

In the absence of an addition to the insurance company's aggregate capital, insuring additional risk exposure units at competitive rates normally increases the company's risk of ruin. To avoid such an increase, when an insurance company expands its business, there is an addition to the amount of capital that state insurance regulators require the company to hold. The grater need for capital when risks are added demonstrates that the new insureds do not take on any risks previously assumed by the company. If some of the company's risks were transferred to the new insureds, the company would not need more capital to keep its risk of ruin from increasing.

Accordingly, the LAW AND ANALYSIS portion of Rev. Rul. 88-72 is clarified by deleting from the sixth paragraph the sentence "This increase in predictability helps protect the company's solvency."

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 88-72 is clarified. This clarification of Rev. Rul. 88-72 will appear in that revenue ruling when it is republished in 1988-2 C.B.

26 CFR 1.162-1: Business expenses.

If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code. If expenditures are incurred prior to January 1, 1987, must they be capitalized under section 263. If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Regulations. See Rev. Rul. 89-23, page 85.

Section 163.—Interest

26 CFR 1.163-1: Interest deduction in general.

If an accrual method corporate taxpayer remits the total amount of unassessed tax proposed in a 30-day letter, plus appropriate interest, does not designate the amount remitted as a deposit in the nature of a cash bond, and contests the proposed tax and related interest, is the portion of the remittance that is attributable to interest deductible under sections 163(a) and 461(f) of the Code in the tax year of the remittance. See Rev. Rul. 89-6, page 119.

---

26 CFR 1.163-5: Denial of interest deduction on certain obligations issued after December 31, 1982, unless issued in registered form.

Interest; temporary global security. A temporary security that remains outstanding beyond a reasonable time after the completion of the initial offering must meet the foreign targeting requirements.

Rev. Rul. 89-9

ISSUES

(1) Does the term "temporary global security" include an obligation that is not retired within a reasonable period of time after the completion of the initial offering?

(2) Does such a temporary security meet the foreign targeting requirements of section 1.163-5(c)(2)(i)(B), if the certificate described in section 1.163-5(c)(2)(i)(B)(iv) is not presented to the issuer or underwriter?

FACTS

X, a domestic corporation, planned a public offering of bearer bonds in foreign markets through *Y*, an underwriter. The bonds were exempt from registration under section 3 of the Securities Act of 1933. Under the arrangements between *X* and *Y*, the bonds satisfied all the predelivery requirements of section 1.163-5(c)(2)(B) of the Income Tax Regulations.

As part of the offering, *X* issued *Y* a seven-year obligation designated a "temporary global security." A temporary global security is typically issued to the underwriter at the outset of an offering, and interests in the security are given to bond purchasers pending delivery of the bonds. At the close of the offering, the underwriter obtains statements that no United States person owns an interest in the security, the bonds are delivered, and the security is promptly retired.

X, however, never issued the definitive bearer bonds. The temporary global security remained outstanding for its full term, after which *X* paid its indebtedness in full and the security was cancelled.

LAW AND ANALYSIS

Section 163(f) of the Code denies a deduction for interest on any "registration required obligation" unless the obligation is in registered form. Section 163(f)(2) describes certain foreign-targeted obligations that are not registration required obligations.

Section 1.163-5(c)(2)(i)(B) of the regulations lists five requirements that obligations exempt from registration by section 3 of the Securities Act of 1933 must meet to qualify for the section 163(f)(2) exception. Section 1.163-5(c)(2)(i)(B)(iv) provides that one of those requirements is that a bearer obligation cannot be delivered to the person entitled to receive it unless that person presents a signed certificate to the issuer or underwriter which states that the obligation is not being acquired by or on behalf of a United States person, or for offer to sell or for resale to a United States person or any person inside the United States. The certification requirement ensures that bearer obligations will not be available to United States persons or to any persons within the United States.

Section 1.163-5(c)(2)(i) of the regulations provides that a temporary global security need not satisfy the requirements of section 1.163-5(c)(2)(i)(B). The reason for this exception is that a temporary global security is retired promptly at the close of the offering after the underwriter obtains the statement described in section 1.163-5(c)(2)(i)(B)(iv) and delivers the bearer obligations in definitive form.

The exception provided by section 1.163-5(c)(2)(i) does not apply to the seven-year obligation issued by *X*. The temporary security issued by *X* was not promptly retired, but remained outstanding for its full term. It is therefore not a "temporary global security" within the meaning of section 1.163-5(c)(2)(i) of the regulation. Because it is not a temporary global security, it must satisfy all of the requirements of section 1.163-5(c)(2)(i)(B), including the certification requirements of section 1.163-5(c)(2)(i)(B)(iv). That requirement was not satisfied, and therefore the obligation does not qualify under section 1.163-5(c)(2)(i)(B).

HOLDING

(1) The term "temporary global security" does not include an obligation that is not retired within a reasonable period of time after the completion of the initial offering.

(2) A temporary security that remains outstanding beyond a reasonable time after the completion of the initial offering must meet the foreign targeting requirements of section 1.163-5(c)(2). Such an obligation does not qualify under section 1.163-5(c)(2)(i)(B) unless each of the five requirements thereunder is satisfied.

Section 164.—Taxes

26 CFR 1.164-1: Deduction for taxes.

State income taxes; mandatory wage assessments. Amounts withheld from the wages of employees for contribution to the West Virginia Unemployment Compensation Trust Fund qualify as state "income taxes" and, therefore, are deductible by the employees under section 164(a)(3) of the Code.

Rev. Rul. 89-16

ISSUE

Are contributions made by employees and employers pursuant to the West Virginia Unemployment Compensation Law taxes which are allowed as a deduction under section 164(a) of the Internal Revenue Code for the taxable year in which paid or accrued?

FACTS

The State of West Virginia pays unemployment compensation benefits, based upon average weekly wages, from the state's Unemployment Compensation Trust Fund (the Fund). Because the state's Fund was depleted, the West Virginia Department of Employment Security (the Department), a state agency, was advanced funds by the federal government under the provisions of section 1201 of the Social Security Act, 42 U.S.C.A. section 1321, as amended in 1981, to help pay the unemployment compensation benefits.

In order for West Virginia to repay the debt the state owed to the federal government, the state in 1987 amended its Unemployment Compensation Law (Law), Chap. 21A of the West Virginia Code, to authorize the Department to borrow money by the issuance of revenue bonds or notes. To repay the notes and bonds, the Law requires all employers as defined therein to withhold a percentage of the gross wages paid to each employee and remit the withheld amounts to the Department. W. Va. Code ch. 21A-8A-8(a) (Michie 1985 & Supp. 1987). All employers for which employee withholding is required are also subject to, and must remit to the Department, a compulsory contribution based on a percentage of each employee's gross wages. W. Va. Code ch. 21A-8A-8(b).

The Law further empowers the state to impose an additional "stabilization" assessment on employees and employers for any calendar quarter for which the Department determines that benefits paid out of the Fund will exceed the contributions received. W. Va. Code ch. 21A-5-10a(a). This optional stabilization assessment is computed similarly to the mandatory one described above. W. Va. Code ch. 21A-5-10a(b).

LAW AND ANALYSIS

Section 164(a)(3) of the Code provides, in part, that state income taxes shall be allowed as a deduction for the taxable year in which they are paid or accrued. Section 164(a) also allows as a deduction state taxes not otherwise specifically described therein that are paid or accrued within the taxable year in carrying on a trade or business.

In Rev. Rul. 81-191, 1981-2 C.B. 49, employees were required to contribute to the Rhode Island temporary disability insurance benefit fund pursuant to the Rhode Island Temporary Disability Insurance Act (Act). The employer was required to withhold the amount of such contributions from the employees' wages at the time the wages were paid. If the employer failed to withhold the contributions of any employee within the time provided by the Act, the employer became solely liable for such contributions under the Act.

Rev. Rul. 81-191 holds (1) that the contributions withheld from the wages of an employee are state "income taxes" that are deductible by the employee under section 164(a)(3) of the Code, provided that the employee itemizes deductions in computing taxable income, and (2) that amounts paid or accrued by an employer are "excise taxes" that are deductible by the employer under section 164(a). Rev. Rul. 81-191 reasons that the employee and employer contributions to the fund are "taxes" because they are exacted pursuant to legislative authority in the exercise of the taxing power of the state, and they are imposed and collected by the state for the purpose of raising revenue to be used for a governmental function that serves public purposes. The ruling further reasons that the employee contributions to the fund are "income taxes" because they are measured by wages paid during the calendar year, and that the employer contributions to the fund are state taxes paid or accrued in carrying on a trade or business. For similar results and rationale, see Rev. Rul. 81-192, 1981-2 C.B. 50 (New York) ; Rev. Rul. 81-193, 1981-2 C.B. 52 (New Jersey); and Rev. Rul. 81-194, 1981-2 C.B. 54 (California).

In West Virginia, the contributions under its Unemployment Compensation Law by both employees and employers are taxes. The law requires employers to withhold a portion of each employee's wages at the time the wages are paid, and subjects employers to compulsory contributions based on a percentage of each employee's gross wages. In addition, the Law provides for a similarly computed stabilization assessment on employees and employers if needed. These withheld and contributed amounts are exacted pursuant to legislative authority in the exercise of the taxing power of the State of West Virginia, and are imposed and collected by the State for the purpose of raising revenue to be used for a governmental function that serves public purposes, namely, to repay a State public debt that was incurred to provide unemployment compensation benefits to qualified recipients.

Moreover, the amounts withheld from the employees' wages are "income taxes" because they are measured by wages paid during the calendar year, and the amounts contributed by employers are paid or accrued "in carrying on a trade or business." *See* Rev. Rul. 81-191, and *Trujillo v. Commissioner*, 68 T.C. 670 (1977).

HOLDING

Amounts withheld from the wages of an employee for contribution under the West Virginia Unemployment Compensation Law are state income taxes and, therefore, shall be deductible by the employee under section 164(a)(3) of the Code for the taxable year in which paid or accrued. However, such amounts are deductible by an employee only if the employee's deductions are itemized in computing taxable income under section 63 of the Code.

Amounts contributed by an employer under the Law are state taxes paid or accrued by the employer in carrying on a trade or business and, therefore, shall be deductible by the employer under section 164(a) of the Code for the taxable year in which paid or accrued.

Section 165.—Losses

26 CFR 1.165-2: Obsolescence of nondepreciable property.

A procedure is provided for certain taxpayers to obtain expeditious consent from the Commissioner to change their method of accounting for package design costs to a capitalization method in accordance with Rev. Rul. 89-23. See Rev. Proc. 89-16, page 822.

26 CFR 1.165-2: Obsolescence of nondepreciable property.

If a syndication effort fails and is abandoned, is the deduction under section 165 precluded by the prohibition on deductions for syndication expenses under section 709 of the Code. See Rev. Rul. 89-11, page 179.

26 CFR 1.165-2: Obsolescence of nondepreciable property.

If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code. If expenditures are incurred prior to January 1, 1987, must they be capitalized under section 263. If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Regulations. See Rev. Rul. 89-23, page 85.

26 CFR 1.165-11: Election in respect of losses attributable to a disaster.

Losses; casualty; disaster areas; year of deduction. Disaster areas in which losses during 1988 qualify for special tax treatment under section 165(i) of the Code are listed.

Rev. Rul. 89-21

LAW AND ANALYSIS-HOLDING

Under section 165(i) of the Internal Revenue Code, if a taxpayer suffers a loss attributable to a disaster occurring in an area subsequently determined by the President of the United States to warrant assistance by the Federal Government under the Disaster Relief Act of 1974, sections 101 and 102, 42 U.S.C. sections 5121 and 5122 (1982), 1974-2 C.B. 414, then the taxpayer may elect to take a deduction for that loss on the taxpayer's federal income tax return for the taxable year immediately preceding the taxable year in which the disaster occurred.

The election to deduct for the preceding year must be made on or before the later of (1) the original due date of the taxpayer's income tax return for the year in which the disaster occurred, or (2) the due date of the preceding year's return (taking into account extensions of time for filing granted to the taxpayer). Section 1.165-11 of the Income Tax Regulations. This section of the regulations sets forth the procedures for making an election with respect to such losses.

The provisions of section 165(i) of the Code apply only to losses that are otherwise deductible under section 165(a). An individual taxpayer may deduct losses if they are incurred in a trade or business, if they are incurred in a transaction entered into for profit, or if they are casualty losses under section 165(c)(3).

As of December 12, 1988, the President had determined that the areas listed below have been adversely affected by disasters of sufficient severity occurring during 1988 to warrant disaster assistance by the Federal Government under the Disaster Relief Act of 1974.

There may be areas in which a disaster occurred during 1988 and which the President, after December 12, 1988, declares eligible for disaster assistance under the Disaster Relief Act of 1974. Information concerning these areas will be published in future issues of the Internal Revenue Bulletin, and these areas will be included in this revenue ruling when it is published in the Cumulative Bulletin.

Disaster Areas in 1988	Type of Disaster	Date Disaster Occurred or Began
Alaska Borough of North Slope	Fire	February 10, 1988
Arkansas Counties of Chicot, Clark, Columbia, Craighead, Faulkner, Garland, Greene, Hot Spring, Independence, Izard, Johnson, Logan, Lonoke, Nevada, Ouachita, Phillips, Poinsett, Prairie, Pulaski, Saline, Stone, Van Buren, White, and Woodruff	Tornadoes and severe storms	November 15-20, 1988
California Counties of Los Angeles, Orange, San Diego, and Santa Barbara; and the City of San Buenaventura	Severe winds, rainstorms, high tides, and flooding	January 17, 1988
Counties of Nevada, Shasta, Solano, and Yuba	Wildfires	September 11-24, 1988
Guam	Typhoon Roy	January 11-12, 1988
Iowa County of Pottawattamie	Tornadoes, rains, and high winds	July 15-16, 1988
Marshall Islands Kwajalein Atoll	Severe winds, high waves, and flooding caused by Tropical Storm Roy	January 9, 1988
North Carolina Counties of Currituck, Dare, Franklin, Halifax, Hyde, Nash, Northampton, Pamlico, and Wake	Tornadoes and severe storms	November 28, 1988
Northern Mariana Islands Island of Rota	Typhoon Roy	January 11-12, 1988
Texas Counties of Bexar, Cameron, and Hidalgo	Hurricane Gilbert and resulting tornadoes	September 15-17, 1988

Section 167.—Depreciation

26 CFR 1.167(a)-1: Depreciation in general.
(Also Section 168.)

Depreciation; videocassettes. Videocassettes are depreciable under section 167 of the Code in accordance with the straight line method or the income forecast method.

Rev. Rul. 89-62

ISSUE

What is the proper method of depreciating videocassettes under the Internal Revenue Code?

FACTS

In 1988 the taxpayer established a videocassette rental business. A videocassette consists of a cartridge mechanism containing a designated length of magnetic video tape. Videocassettes are used in videocassette recorders or players. The taxpayer purchases mass-produced copies of master versions of movies in the videocassette format and rents them to the public.

LAW AND ANALYSIS

Section 167(a) of the Code provides that there shall be allowed as a depreciation deduction a reasonable allowance for the exhaustion and wear and tear (including a reasonable allowance for obsolescence) of property used in the trade or business or held for the production of income.

Section 168(a) of the Code provides that, except as otherwise provided in this section, the depreciation deduction provided by section 167(a) for any tangible property shall be determined by using the applicable depreciation method, recovery period, and convention.

Section 168(f)(3) of the Code provides that section 168 does not apply to "any motion picture film or video tape". If videocassettes are encompassed within the phrase "any motion picture film or video tape", they are not subject to section 168(a). The language of section 168(f)(3) is broadly inclusive. Similarly inclusive language was used in section 168(e)(5) of the Internal Revenue Code of 1954, the predecessor of section 168(f)(3). There is nothing in the legislative history of these sections to suggest that they were to be narrowly applied. H.R. Conf. Rep. No. 861, 98th Cong., 2d Sess. 1009 (1984), 1984-3 (Vol. 2) C.B. 263.

A videocassette is a video tape adapted for use in a videocassette recorder or player. Accordingly, videocassettes are among the motion picture films and video tapes excluded from the scope of section 168.

If property is excluded from section 168 of the Code, the provisions of section 167 apply in determining the allowable depreciation deduction with respect to such property.

Section 167(b) of the Code provides that a reasonable allowance for depreciation shall include an allowance computed under the straight line method and certain accelerated methods.

Section 167(c) of the Code provides that the accelerated methods of depreciation described in section 167(b) do not apply to any motion picture film, video tape, or sound recording. This broadly inclusive language encompasses videocassettes. Accordingly, the taxpayer may depreciate the videocassettes utilizing the straight line method over their useful life in the taxpayer's business, but may not utilize the methods of depreciation described in paragraphs (2), (3), and (4) of section 167(b).

A taxpayer's videocassettes may be depreciated in a group account consistent with the rules set forth in section 1.167(a)(7) of the Income Tax Regulations. In addition, taxpayers may be able to demonstrate that some of their videocassettes will not have a useful life in excess of 1 year. The cost of such videocassettes may be deducted under section 162 of the Code.

The legislative history of section 167(c) states that the income forecast method of depreciation is available with respect to motion picture films, video tapes, and sound recordings. H.R. Rep. No. 426, 99th Cong., 2d Sess. 914-15 (1985), 1986-3 (Vol. 2) C.B. 914-15. For a description of the income forecast method, see Rev. Rul. 60-358, 1960-2 C.B. 68 (income forecast method applied to films). The income forecast method recognizes that certain assets generate uneven flows of income and have unique income producing potential. To properly apply the income forecast method, taxpayers must make income projections for each asset subject to the method. Taxpayers may group their videocassettes by videocassette title for purposes of making the required income projections. Broader groupings of videocassettes for projection purposes are not permissible under the income forecast method.

HOLDING

Videocassettes are subject to section 167 of the Code and may be depreciated in accordance with the straight line method over the useful life of the videocassettes in the particular taxpayer's business. Alternatively, the income forecast method may be used.

26 CFR 1.167(a)-2: Tangible property.

Depreciation; home-builder; houses used as models and or sales offices. Houses that a home-builder used for models and/or sales offices were not subject to an allowance for depreciation under section 167 of the Code.

Rev. Rul. 89-25

ISSUE

If a home-builder temporarily used new houses for models and/or sales offices, were the houses subject to an allowance for depreciation?

FACTS

The taxpayer is in the business of building and selling residential houses. To assist in its sales activity, the taxpayer used certain houses as models and/or sales offices temporarily (*i.e.*, for a small fraction of their expected useful life). Such use generated no rental income to the taxpayer. During the period of that use, the taxpayer made no effort to sell those houses; however, the taxpayer expected to sell all houses in development D within a few years (including the houses temporarily used as models and/or sales offices).

LAW AND ANALYSIS

Section 167 of the Internal Revenue Code provides that there shall be allowed as a depreciation deduction a reasonable allowance for the exhaustion, wear and tear (including a reasonable allowance for obsolescence) of property used in the trade or business or held for the production of income.

Section 1.167(a)-2 of the Income Tax Regulations provides that the depreciation allowance in the case of tangible property applies only to that part of the property that is subject to wear and tear, to decay or decline from natural causes, to exhaustion, and to obsolescence, and the allowance does not apply to inventories or stock in trade.

Rev. Rul. 75-538, 1975-2 C.B. 35, concerns the treatment for federal income tax purposes of motor vehicles held by a taxpayer engaged in the business of selling motor vehicles. A taxpayer engaged in the trade or business of selling motor vehicles is presumed to hold all such vehicles primarily for sale to customers in the ordinary course of the taxpayer's trade or business. To overcome this presumption, the taxpayer must show clearly that the motor vehicle was actually devoted to use in the business of the dealer and that the dealer looks to consumption through use of the vehicle in the ordinary course of business operation to recover the dealer's cost. Rev. Rul. 75-538 provides that a vehicle is not property used in the business if it is used merely for demonstration purposes, or temporarily withdrawn from stock-in-trade or inventory for business use.

Duval Motor Co. v. Commissioner, 264 F.2d 548 (5th Cir. 1959), *aff'g* 28 T.C. 42 (1957), concerned automobiles used as demonstrators and provided by a car dealer to company officials and salesmen for other business uses. The court found that these automobiles were held primarily for sale to customers. As a result, the dealer was not entitled to a depreciation deduction with respect to such automobiles. *See also Luhring Motor Co. v. Commissioner*, 42 T.C. 732 (1964); *R.E. Moorhead & Son, Inc. v. Commissioner*, 40 T.C. 704 (1963).

In the present situation the houses were used as models and/or sales offices for a small fraction of their expected useful lives and never generated any rental income. After this period of use, the taxpayer expected to sell the houses in the same manner as it had been selling its other houses. Moreover, the essential purpose for which the houses were built — sale to customers — was never altered. Thus, although the houses were used temporarily as models and/or sales offices, and although the taxpayer may have been reluctant or unwilling to sell the houses while they were being used in this way, they remained property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's business rather than property used in the trade or business. Thus, they may not be depreciated. See section 167(a) of the Code; *Duval Motor Co., Supra*.

HOLDING

Houses that a home-builder temporarily used for models and/or sales offices were not subject to an allowance for depreciation.

26 CFR 1.167(a)-3: Intangibles.

A procedure is provided for certain taxpayers to obtain expeditious consent from the Commissioner to change their method of accounting for package design costs to a capitalization method in accordance with Rev. Rul. 89-23. See Rev. Proc. 89-16, page 822.

---

26 CFR 1.167(a)-3: Intangibles.

Taxpayers that incur package design costs are allowed to deem the useful lives of certain package designs to be 60 months. See Rev. Proc. 89-17, page 827.

---

26 CFR 1.167(a)-3: Intangibles.

If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code. If expenditures are incurred prior to January 1, 1987, must they be capitalized under section 263. If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Regulations. See Rev. Rul. 89-23, page 85.

Section 168.—Accelerated Cost Recovery System

What is the proper method of depreciating videocassettes under the Internal Revenue Code? See Rev. Rul. 89-62, page 78.

Section 170.—Charitable, Etc., Contributions and Gifts

26 CFR 1.170A-1: Charitable, etc., contributions and gifts; allowance of deduction.

If a taxpayer purchases property at a charitable auction, paying fair market value for it, is any part of the payment deductible as a charitable contribution. See Rev. Rul. 89-51, page 89.

---

26 CFR 1.170A-1: Charitable, etc., contributions and gifts; allowance of deduction.

Whether churches such as those described in Rev. Rul. 78-232, 1978-1 C.B. 69, and Rev. Rul. 81-94, 1981-1 C.B. 330, are "tax shelters" for purposes of the substantial understatement penalty. See Rev. Rul. 89-74, page 311.

---

26 CFR 1.170A-6: Charitable contributions in trust.

The Service ordinarily will not issue rulings as to whether a transfer to an inter vivos charitable remainder trust described in section 664 of the Code that provides for annuity or unitrust payments for one measuring life qualifies for a charitable deduction under section 170(f)(2)(A). See Rev. Proc. 89-19, page 841.

---

26 CFR 1.170A-6: Charitable contributions in trust.

Contributions to a qualifying inter vivos charitable remainder unitrust providing for unitrust payments during one life are deductible for income tax purposes, assuming that all other applicable requirements for a charitable contribution are met. See Rev. Proc. 89-20, page 841.

---

26 CFR 1.170A-6: Charitable contributions in trust.

Contributions to a qualifying inter vivos charitable remainder annuity trust providing for annuity payments during one life are deductible for income tax purposes, assuming that all other applicable requirements for a charitable contribution are met. See Rev. Proc. 89-21, page 842.

---

26 CFR 1.170A-7: Contributions not in trust of partial interests in property.

If a taxpayer purchases property at a charitable auction, paying fair market value for it, is any part of the payment deductible as a charitable contribution. See Rev. Rul. 89-51, page 89.

26 CFR 1.170A-9: Definition of section 170(b)(1)(A) organization.

Guidelines for the circumstances where grantmaking private foundations will not be considered to be responsible for substantial and material changes in the sources of financial support of recipient organizations for purposes of sections 1.170A-9(e)(4)(v)(b) and 1.170A- 9(e)(5)(iii)(c) of the regulations. See Rev. Proc. 89-23, page 844.

Section 172.—Net Operating Loss Deduction

26 CFR 1.172-4: Net operating loss carrybacks and net operating loss carryovers.
(Also Section 593; 1.593-1.)

Net operating loss deduction; carrybacks and carryovers. For purposes of section 172(b)(1)(L) of the Code, (1) a taxpayer must be an organization to which section 593 applied in the year that the net operating loss was incurred, and (2) the relevant version of section 593 is former section 593, as in effect during the loss year.

Rev. Rul. 89-78

ISSUES

For purposes of section 172(b)(1)(L) of the Internal Revenue Code, (1) when must a taxpayer be an organization to which section 593 applies; and (2) which version of section 593 (former section 593 or section 593 as amended by the Tax Reform Act of 1986) applies?

FACTS

Situation 1. Corporation *X* files its federal income tax return on a calendar year basis. *X* came into existence on January 1, 1982, as a financial institution described in section 582(c)(5) of the Code but, during that year, was not an organization to which former section 593 applied. *X* incurred a net operating loss (NOL) in 1982, a portion of which it had not yet deducted by the end of 1987. *X* had taxable income in 1988 and, throughout the year, was an organization to which section 593 as amended applied.

Situation 2. The facts concerning corporation *Y* are the same as those concerning *X* in *Situation 1* except that in 1982, *Y* was an organization to which former section 593 of the Code applied. Throughout that year, however, *Y* was not an organization to which section 593, as amended, would have applied if the amendment had been effective for that year.

LAW AND ANALYSIS

Section 593 of the Code, effective for taxable years beginning after December 31, 1986, applies to any cooperative bank without capital stock organized and operated for mutual purposes and without profit, any domestic building and loan association, and any mutual savings bank (hereinafter referred to collectively as thrift institutions), provided that the thrift institution meets the 60-percent asset test of section 7701(a)(19)(C). Former section 593, effective for taxable years beginning before January 1, 1987, applies to the same thrift institutions, but without the section 7701(a)(19)(C) limiting proviso.

Section 582(c)(5) of the Code refers to certain financial institutions, which include (but are not limited to) thrift institutions described in section 593.

Section 172(a) of the Code provides that there shall be allowed as a deduction for the taxable year an amount equal to the aggregate of (1) the NOL carryovers to such year, plus (2) the NOL carrybacks to such year. Section 172(b)(1)(A) provides the general rule that an NOL for any taxable year shall be an NOL carryback to each of the 3 taxable years preceding the taxable year of such loss. Section 172(b)(1)(B) provides the general rule that an NOL for any taxable year ending after December 31, 1975, shall be an NOL carryover to each of the 15 taxable years following the taxable year of such loss.

Section 172(b)(1)(F) of the Code provides that an NOL incurred in any of the taxable years beginning after December 31, 1975, and before January 1, 1987, in the case of a financial institution to which section 582(c)(5) applies (a "financial institution"), shall be an NOL carryback to each of the 10 taxable years preceding the taxable year of such loss and shall be an NOL carryover to each of the 5 taxable years following the taxable year of such loss.

By amending section 172(b)(1)(F) of the Code to read as described above, section 903 of the Tax Reform Act of 1986 (the Act), 1986-3 (Vol. 1) C.B. 300, removed, for loss years beginning after December 31, 1986, the special rule granting financial institutions an NOL carryback to the preceding 10 taxable years and an NOL carryover to the succeeding 5 taxable years.

Thus, for losses incurred in taxable years beginning after December 31, 1986, financial institutions generally are subject to the rule in section 172(b)(1)(A) and (B) of the Code, which permits taxpayers to carry NOLs back to the preceding 3 taxable years and forward to the succeeding 15 taxable years. However, section 172(b)(1)(L), as added by section 903(b)(1) of the Act, and as redesignated by section 1009(c)(1) of the Technical and Miscellaneous Revenue Act of 1988, provides a transition rule for thrift institutions.

Section 172(b)(1)(L) of the Code provides that, in the case of an organization to which section 593 applies, an NOL for any taxable year beginning after December 31, 1981, and before January 1, 1986, shall be an NOL carryback to each of the 10 taxable years preceding the taxable year of such loss and shall be an NOL carryover to each of the 8 taxable years following the taxable year of such loss. Thus, section 172(b)(1)(L) extends the NOL carryforward period with respect to certain NOLs from 5 taxable years to 8 taxable years.

The statute is silent both as to when the taxpayer must be an organization to which section 593 of the Code applies and as to which version of section 593 (before or after the 1986 amendment) is relevant. The legislative history accompanying the Act indicates congressional concern with NOLs incurred by thrift institutions, partly as a result of deregulation, during the early 1980s. The Senate Finance Committee believed that the limited transition period was appropriate as thrift institutions recovered from the change in the regulatory rules that caused the NOLs. Thus, the Finance Committee report supports the conclusion that to be entitled to the 3-year extension of the NOL carryforward period, the taxpayer must have been an organization to which section 593 applied in the loss year. The same legislative intent also supports the conclusion that former section 593, as effective during the loss year, is the relevant version of section 593. *See* S. Rep. No. 313, 99th Cong., 2d Sess. 289 (1986), 1986-3 (Vol. 3) C.B. 289; 2 H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-335 (1986), 1986-3 (Vol. 4) C.B. 335.

Section 172(b)(1)(L) of the Code therefore extends for 3 years the NOL carryforward periods of those taxpayers that incurred NOLs in taxable years beginning after December 31, 1981, and before January 1, 1986, provided that those taxpayers were organizations to which former section 593 applied in the loss year.

Situation 1. Section 172(b)(1)(L) of the Code does not apply to *X*, because in 1982, the loss year, *X* was not an organization to which former section 593 applied. Section 172(b)(1)(F) determines the carryforward period for *X*'s 1982 NOL. Thus, *X*'s 1982 NOL is subject to a 5-year carryforward under section 172(b)(1)(F) rather than an 8-year carryforward under section 172(b)(1)(L). The unused portion of *X*'s 1982 NOL expires at the end of *X*'s 1987 taxable year.

Situation 2. Section 172(b)(1)(L) of the Code applies to *Y* and allows *Y* to carry forward to 1988 its entire 1982 NOL. Because *Y* was an organization to which former section 593 applied in 1982, the loss year, *Y* qualifies for the 3-year extension of the NOL carryforward period under section 172(b)(1)(L). *Y*'s 1982 NOL does not expire at the end of its 1987 taxable year.

HOLDING

For purposes of section 172(b)(1)(L) of the Code, (1) a taxpayer must be an organization to which section 593 applied in the taxable year that the NOL was incurred; and (2) the relevant version of section 593 is former section 593, as in effect during the loss year.

Section 177.—Trademark and Trade Name Expenditures [Repealed]

26 CFR 1.177-1: Election to amortize trademark and trade name expenditures.

If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code. If expenditures are incurred prior to January 1, 1987, must they be capitalized under section 263. If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Regulations. See Rev. Rul. 89-23, page 85.

Section 179.—Election to Expense Certain Depreciable Business Assets

26 CFR 1.179-1: Election to expense certain depreciable assets.

If a partner's distributive share of the partnership's expenses under section 179 of the Code is not fully deductible by the partner because, when combined with the partner's section 179 expenses from other sources, the partner's section 179 expenses from all sources exceed the maximum amount allowable to the partner under section 179(b)(1), is the partner's basis in the partnership interest reduced by the partner's full distributive share of the partnership's section 179 expenses, including the partnership's section 179 expenses that the partner cannot deduct? See Rev. Rul. 89-7, page 178.

Part VII.—Additional Itemized Deductions for Individuals

Section 212.—Expenses for Production of Income

26 CFR 1.212-1: Nontrade or nonbusiness expenses.
(Also Section 67.)

Deduction of expenses for the preparation of a ruling request and the user fee. A fee paid to a tax practitioner to prepare and submit a request for a ruling concerning a nonbusiness transaction, as well as the related user fee paid to the Service, are deductible under section 212 of the Code. These amounts are miscellaneous itemized deductions subject to the 2-percent floor provided by section 67.

Rev. Rul. 89-68

ISSUES

(1) Is a fee paid to a tax practitioner, including an amount for the preparation and submission of a ruling request to the Internal Revenue Service, deductible under section 212(3) of the Internal Revenue Code?

(2) Is a user fee paid to the Internal Revenue Service in connection with the ruling request deductible under section 212(3) of the Code?

(3) If these fees are deductible under section 212(3) of the Code, are they subject to the 2-percent floor under section 67(a)?

FACTS

A, an individual, contacted *C*, a tax practitioner, and inquired whether a certain expense paid by *A* was deductible under section 213 of the Code as an amount paid for medical care. *C* researched the issue and advised *A* that in *C*'s opinion it was not clear that the expense was a deductible medical care expense. *C* recommended that a ruling be requested from the Internal Revenue Service if *A* desired a definitive answer.

A asked *C* to prepare and submit the ruling request, and *C* did so in February 1989. *A* paid *C* $1000 for professional services rendered, including preparation and submission of the ruling request, and also paid a user fee of $300 to the Internal Revenue Service.

LAW AND ANALYSIS

Section 212(3) of the Code allows a deduction to an individual for all the ordinary and necessary expenses paid or incurred during the taxable year in connection with the determination, collection, or refund of any tax. Section 1.212-1(l) of the Income Tax Regulations states that expenses are deductible if paid or incurred by an individual (1) for tax counsel, (2) in connection with the preparation of tax returns or with any proceeding involved in determining the extent of tax liability, or (3) in contesting tax liability.

Section 67(a) of Code provides that an individual's miscellaneous itemized deductions are allowed only to the extent that they exceed 2 percent of adjusted gross income. Section 67(b) defines miscellaneous itemized deductions as all itemized deductions other than the ones specified in section 67(b)(1) through (13).

Section 63(d) of the Code defines itemized deductions as the deductions allowable under chapter 1 of the Code (sections 1 to 1399) other than (1) the deductions allowable in arriving at adjusted gross income under section 62, and (2) the deduction for personal exemptions provided by section 151.

Section 10511 of the Revenue Act of 1987, Pub. L. 100-203, requires the payment of a user fee to the Internal Revenue Service in connection with a request for a ruling. A schedule in Rev. Proc. 89-4, page 767, this Bulletin, sets forth the amount of the user fee payable with respect to each category or subcategory of a request. Pursuant to that schedule, *A* was charged the $300 user fee.

C's fee for profession services, including the portion attributable to the preparation and submission of the ruling request, was paid by *A* in the process of determining whether the expense paid by *A* was a deductible medical expense, and the $300 user fee was paid for a similar purpose. Accordingly, both *C*'s fee and the user fee were paid in connection with determining the extent of *A*'s tax liability, and thus the fees are deductible under section 212(3) of the Code.

However, a deduction allowed by section 212 of the Code is an itemized deduction under section 63(d) that is not excepted by section 67(b)(1) through (13) of the Code from the definition of a miscellaneous itemized deduction. Thus, *A*'s section 212(3) deductions and *A*'s other miscellaneous itemized deductions are subject to the 2-percent floor under section 67(a).

HOLDINGS

(1) and (2) The fees paid by *A* to a tax practitioner, including the portion for the preparation and submission of the ruling request, and to the Internal Revenue Service as a user fee in connection with the ruling request, are deductible under section 212(3) of the Code.

(3) These fees, along with A's other miscellaneous itemized deductions, are subject to the 2-percent floor under section 67(a) of the Code.

Part IX.—Items Not Deductible

Section 262.—Personal, Living and Family Expenses

26 CFR 1.262-1: Personal, living and family expenses.

Whether churches such as those described in Rev. Rul. 78-232, 1978-1, C.B. 69, and Rev. Rul. 81-94, 1981-1 C.B. 330, are "tax shelters" for purposes of the substantial understatement penalty. See Rev. Rul. 89-74, page 311.

Section 263.—Capital Expenditures

26 CFR 1.263(a)-2: Examples of capital expenditures.

A procedure is provided for certain taxpayers to obtain expeditious consent from the Commissioner to change their method of accounting for package design costs to a capitalization method in accordance with Rev. Rul. 89-23. See Rev. Proc. 89-16, page 822.

26 CFR 1.263(a)-2: Examples of capital expenditures.

Taxpayers that incur package design costs are allowed to deem the useful lives of certain package designs to be 60 months. See Rev. Proc. 89-17, page 827.

26 CFR 1.263(a)-2: Examples of capital expenditures.

If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code. If expenditures are incurred prior to January 1, 1987, must they be capitalized under section 263. If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Regulations. See Rev. Rul. 89-23, page 85.

26 CFR 1.263(c)-1: Intangible drilling and development costs in the case of oil and gas wells. (Also Section 612; 1.612-4.)

Capital expenditures; intangible drilling and development costs; offshore platforms. Guidance is provided regarding which costs incurred in the course of fabricating, transporting and installing an offshore oil and gas drilling and production platform and the related facilities and equipment are within the option to expense intangible drilling and development costs provided by section 263(c) of the Code. Rev. Rul. 70-596 modified and superseded.

Rev. Rul. 89-56

ISSUE

Which costs incurred in the course of fabricating, transporting, and installing an offshore oil and gas drilling and production platform and the related facilities and equipment are within the option to expense intangible drilling and development costs provided by section 263(c) of the Internal Revenue Code?

FACTS

The taxpayer, an oil and gas company, determined through exploratory drilling and other methods that there was a substantial likelihood of commercial quantities of oil and gas in a domestic offshore property in which the taxpayer held an operating interest. The taxpayer decided to install an offshore platform in a particular location as a base from which to drill wells, prepare for production, and produce oil and gas. The taxpayer contracted for the fabrication of the three major components of the platform.

The three major components of the particular type of platform constructed for the taxpayer (a "jacket-type" platform) are (1) the deck, which holds the equipment required to drill the well and produce the oil and gas; (2) the support system, which supports the deck and the operating equipment, and which consists of a "jacket" (a framework of cross-braced tubular steel legs); and (3) the anchoring system, which stabilizes and anchors the platform to a fixed site, and which consists of pilings (large tubular members fabricated from steel) that are inserted through the hollow jacket legs and driven into the sea floor.

The platform and its three major components were designed as an integrated unit for a particular well site, taking into consideration the condition of the ocean bed, storm ratings, water depths, tides, wave forces, well spacing, and other factors that affect the number and depth of wells desired and the size and configuration of the components. To the extent the major components were constructed by combining subcomponents also fabricated by the contractor, those subcomponents (such as the tubular jacket members, which were rolled and welded from sheet metal) were also designed and built for use in this specific platform. Once fabricated, neither the platform as a unit, nor the major components or subcomponents of this type of platform, were ordinarily reusable at a different well site without substantial and costly modifications.

The deck, jacket, and pilings were constructed at the contractor's onshore shipyard. The taxpayer provided engineering and design specifications in addition to technical consultations during the construction process. After construction, the platform (in component form) was removed from the shipyard and transported to the well site by barge. These transportation operations were contracted for separately. At the well site the platform was positioned, erected, and anchored to the ocean bed. On the deck of the platform, the taxpayer installed the necessary drilling and production equipment and facilities, some of which were purchased by the taxpayer and some of which were fabricated for the taxpayer by a contractor. Although some of the drilling equipment was designed and intended for use at this specific platform, all of the equipment was capable of being installed or reinstalled at other drill sites without substantial and expensive modifications.

LAW AND ANALYSIS

Section 263(a) of the Code generally provides that no deduction shall be allowed for capital expenditures. Section 263(c) provides that, notwithstanding section 263(a), regulations shall be prescribed that grant the option to deduct as expenses intangible drilling and development costs (IDC) in the case of domestic oil and gas wells.

Section 1.612-4(a) of the Income Tax Regulations describes the expenditures that are included in this IDC option as:

> all expenditures made by an operator for wages, fuel, repairs, hauling, supplies, etc., incident to and necessary for the drilling of wells and the preparation of wells for the production of oil or gas. ... They include the cost to operators of any drilling or development work (excluding ... amounts properly allocable to cost of depreciable property) done for them by contractors under any form of contract, including turnkey contracts. Examples of items to which this option applies are, all amounts paid for labor, fuel, repairs, hauling, and supplies, or any of them, which are used —
>
> (1) In the drilling, shooting, and cleaning of wells,
>
> (2) In such clearing of ground, draining, road making, surveying, and geological works as are necessary in preparation for the drilling of wells, and
>
> (3) In the construction of such derricks, tanks, pipelines, and other physical structures as are necessary for the drilling of wells and the preparation of wells for the production of oil or gas.
>
> In general, this option applies only to expenditures for those drilling and developing items which in themselves do not have a salvage value. For the purpose of this option, labor, fuel, repairs, hauling, supplies, etc., are not considered as having a salvage value, even though used in connection with the installation of physical property which has a salvage value.

Section 1.612-4(c)(1) of the regulations describes the nonoptional items that must be capitalized as:

> expenditures by which the taxpayer acquires tangible property ordinarily considered as having a salvage value. Examples of such items are the costs of the actual materials in those structures which are constructed in the wells and on the property, and the cost of drilling tools, pipe, casing, tubing, tanks, engines, boilers, machines, etc. The option does not apply to any expenditure for wages, fuel, repairs, hauling, supplies, etc., in connection with equipment, facilities, or structures, not incident to or necessary for the drilling of wells, such as structures for storing or treating oil or gas. These are capital items and are returnable through depreciation.

Rev. Rul. 70-596, 1970-2 C.B. 68, considering a situation substantially similar to the situation considered here, concludes that the offshore platform in question was incident to and necessary for the drilling of wells, even though it was useful in connection with subsequent production activities. Rev. Rul. 70-596 holds that the costs of transporting components to the well site and installing the platform are therefore within the scope of the IDC option. Under Rev. Rul. 70-596, however, the costs of fabricating the components onshore (including design costs) must be capitalized. The rationale for this treatment of the fabrication costs is that such a platform is "tangible property ordinarily considered as having a salvage value" within the meaning of section 1.612-4(c)(1) of the regulations. Expenditures relating to its fabrication are thus costs of acquiring depreciable property. Rev. Rul. 70-596 also notes that the IDC option granted by the regulations does not apply to expenditures incurred in connection with equipment, facilities, or structures not incident to or necessary for the drilling of wells, such as the costs of fabricating, transporting, and installing production facilities or equipment. The conclusions in Rev. Rul. 70-596 regarding the costs of transporting and installing offshore drilling platforms, and the costs of fabricating, transporting, and installing offshore production facilities or equipment have not been the subject of litigation. Several courts, however, have considered the proper treatment of the costs of fabricating offshore platforms.

In *Exxon Corp. v. United States,* 547 F.2d 548 (Ct. Cl. 1976), the court considered costs incurred in the fabrication of "templet-type" platforms, which differ from the jacket-type platforms described above in that their supporting structures are made up from standardized templet units. The templets were designed to be salvaged as a unit and reused, with some modification and reconditioning, when the platforms were dismantled. The court held that the costs for labor, fuel, repairs, supplies, and hauling incurred in fabricating the platform, including the costs of fabricating the standardized components, were eligible for the IDC option. Adopting the decision of the trial judge, the court interpreted the regulations as excluding from optional treatment only expenditures for "actual materials"—which, in the court's view, meant only steel beams, pipes, etc.—used to fabricate the platforms.

In *Standard Oil Co. (Indiana) v. Commissioner,* 77 T.C. 349 (1981), the Tax Court considered costs incurred in fabricating jacket-type platforms. Consistent with Rev. Rul. 70-596, the Commissioner took the position that the deck, jacket, and pilings—as units—were salvageable "actual materials," the costs of which must be capitalized under section 1.612-4(c)(1) of the regulations. See 77 T.C. at 391. Citing *Exxon,* the taxpayer argued that the term "actual materials" means only those items purchased by the platform fabricator. See *id.* at 349.

The court held for the taxpayer under a different rationale, formulating a "risk analysis" based on the premise that Congress intended to include within the IDC option expenditures that are "at risk", that is, that ordinarily are economically unrecoverable should the well be dry, whether those expenditures are represented by physical property or not. Conversely, expenditures for items that ordinarily are recoverable are excluded from the option. See 77 T.C. at 396-97. Under this approach, platform design and fabrication costs must be analyzed in terms of the salvageability of the components at each stage of fabrication. Even if the ultimate tangible property, the platform, is not ordinarily considered as having a salvage value, intangible-type costs expended to create a component that is ordinarily considered as having a salvage value are not IDC and must be capitalized. Intangible-type costs expended to integrate salvageable materials or components into a component that is, after integration, not ordinarily considered as having a salvage value are deductible IDC, as are any further intangible-type costs expended to integrate this "first unsalvageable component" into the ultimate tangible property. See *id.* at 399-400.

Applying this approach to the facts in *Standard,* the Tax Court determined that neither the jacket-type platform itself, nor its major components, nor any of the subcomponents above the level of such basic "materials" as angle iron, sheet metal, etc., were property ordinarily considered as having salvage value. See 77 T.C. at 401-404. There was no evidence that any platforms had been salvaged or reused in their entirety at the end of their normal useful lives, and there was evidence of only occasional salvage of platform components or subcomponents. Thus, all the fabrication costs claimed by the taxpayer were deductible as IDC. The court noted, however, that given a factual finding that a platform component, such as the templet in the *Exxon* case, was designed to be and was in fact salvageable, the costs of fabricating that component would not be within the option. See *id.* at 399.

In *Texaco, Inc. v. United States,* 598 F. Supp. 1165 (S.D. Texas 1984), and *Gulf Oil Corp. v. Commissioner,* 87 T.C. 324 (1986), the courts considered several different types of offshore platforms. In each case the courts allowed as IDC the intangible fabrication costs. The district court in *Texaco* adopted the Tax Court's risk analysis (also agreeing with the Tax Court that the costs of standardized components such as the *Exxon* templets would not be eligible for the option). See 598 F. Supp. at 1172. In reaching their decisions, both courts emphasized that each type of platform in question was designed and constructed for use at a specific site and that its components were designed for use in a specific platform. Evidence that a platform or component could hypothetically be reused after substantial modifications, or that particular platforms or components were occasionally salvaged, did not establish that the item was "ordinarily" considered salvageable. See *Texaco,* 598 F. Supp. at 1176-77; *Gulf,* 87 T.C. at 347-348.

In view of these decisions, the Service will no longer follow the holding in Rev. Rul. 70-596 that all expenditures incurred in the onshore fabrication of offshore drilling and production platforms are necessarily ineligible for IDC expense treatment. Instead, each platform will be analyzed separately. Design and fabrication expenditures may be treated as IDC if the evidence shows that the platform in question is incident to and necessary for the drilling of wells (even though subsequently used for production), that the platform is designed and constructed for use at a specific site, and that platforms of that type are not ordinarily reused or otherwise salvaged as a unit. To be considered site-specific, a platform must not ordinarily be usable at another site without extensive modifications. Design and fabrication expenditures are not disqualified by evidence that a type of platform could hypothetically be reused (with substantial modification and expense), or by evidence that platforms of that type have occasionally been salvaged in extraordinary circumstances.

If, following this approach, a given platform is determined to be unsalvageable, the same analysis will be applied to its structural components and subcomponents. In other words, the intangible-type costs of fabricating such items qualify for the IDC option if the type of component or subcomponent in question is designed for permanent use at a specific site in a specific platform structure and is not ordinarily used or useable at another site without extensive modifications. The Service will not follow the *Exxon* case to the extent that case holds that costs incurred in the fabrication of a standardized, reusable structural component such as a templet are eligible for IDC treatment. The costs of fabricating such an item must be capitalized, although additional costs incurred to integrate that item into a specific structure may qualify as IDC.

Several restrictions on the scope of the IDC option as it relates to offshore operations should be noted. First, without regard to salvageability, the option to expense IDC is not available for the costs of items acquired by purchase. The regulations authorize optional treatment only for those intangible costs that are incurred directly by an operator or indirectly by an operator who hires a contractor; they do "not permit an operator to look behind a mere purchase ... of materials and claim IDC treatment for intangible costs that his supplier may have incurred in manufacturing those materials ...." *Texaco*, 598 F. Supp. at 1171, n.10.

Second, costs of fabricating drilling equipment, machinery, and similar items installed on offshore platforms are not eligible for the IDC option, whether they are acquired through purchase, contract, or self-construction. Section 1.612-4(c)-(1) of the regulations denies optional treatment not only to "actual materials" used in construction, but also to the cost of acquiring such items as drilling tools, casing, engines, boilers, machines, etc. Although in a given case such items may be intended for permanent use at a specific site and may in fact have no salvage value at the end of their useful lives, as a class they are not site-specific and can ordinarily be used or reused at another site without significant and expensive modification. *Cf. Harper Oil Co. v. United States*, 425 F.2d 1335 (10th Cir. 1970) (costs of surface casing are not within the option even though the casing could not be removed under Oklahoma law and had no salvage value). Thus, costs related to the manufacture of such items, even though necessary for drilling, are not subject to the IDC option, although costs incurred in transporting them to the well site and installing them on the platform remain eligible.

Third, the IDC option applies only to costs that are both incident to and necessary for drilling or development. Expenditures excluded from optional treatment on this basis would include costs relating to a platform that is not incident to and necessary for drilling, as well as costs relating to production structures, facilities, and equipment, such as service facilities for production personnel, pumping equipment, flow lines, separators, storage tanks, treating equipment, salt water disposal equipment, etc. *See* Rev. Rul. 70-414, 1970-2 C.B. 132.

Fourth, the option to expense IDC does not apply to IDC paid or incurred after December 31, 1986, in tax years ending after that date, with respect to wells (other than nonproductive wells) located outside the United States. Section 263(i) of the Code. *See also* Rev. Rul. 87-134, 1987-2 C.B. 69.

HOLDING

The taxpayer's platform is incident to and necessary for drilling. This type of platform, and the structural components and subcomponents integrated into the platform, are designed for permanent installation at a specific site and are not ordinarily reused or otherwise salvaged. Accordingly, they are not tangible property ordinarily considered as having a salvage value, and all the expenditures incurred in design and fabrication, as well as the transportation and installation costs, are within the option to expense intangible drilling and development costs under section 263(c) of the Code.

The drilling equipment and machinery installed on the platform is all property of a type that is ordinarily considered as having a salvage value. Therefore, the costs of fabrication (including related design costs) must be capitalized regardless of whether the items were acquired through purchase, under contract, or by self-construction. Costs of transporting and installing the machinery and equipment, however, remain within the option.

The costs incurred in fabricating, transporting and installing production facilities and equipment are not within the option and must be capitalized.

EFFECT ON OTHER DOCUMENTS

Rev. Rul. 70-596 is modified and superseded.

Section 263A.—Capitalization and Inclusion In Inventory Costs of Certain Expenses

26 CFR 1.263A-1T: Capitalization and inclusion in inventory costs of certain expenses.
(Also Sections 162, 165, 167, 177, 263, 446; 1.162-1(a), 1.165-2(a), 1.167(a)-3, 1.177-1(b), 1.263(a)-2, 1.446-1.)

Inventories; package design costs. Expenditures incurred after December 31, 1986, in connection with the development and design of product packages must be capitalized under section 263A of the Code. Expenditures incurred prior to January 1, 1987, in connection with the development and design of product packages must be capitalized under section 263. In general, the cost of package designs may not be amortized under section 1.167(a)-3 of the regulations because their useful lives cannot be ascertained.

Rev. Rul. 89-23

ISSUES

(1) If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Internal Revenue Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code? If expenses are incurred prior to January 1, 1987, must they be capitalized under section 263?

(2) If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Income Tax Regulations?

FACTS

Corporation *X* is a domestic corporation that manufactures and markets consumer goods at retail. *X* files its federal income tax returns on a calendar year basis using an accrual method of accounting.

During 1986 and 1987, *X* introduced three new products. *X* incurred package design costs for each new product. Although the useful life of each package design could not be ascertained at the time it was placed in service, the useful life of each package design was more than one year.

The term "package design", as used in this revenue ruling, means an asset that is created by a specific graphic arrangement or design of shapes, colors, words, pictures, lettering, and so forth on a given product package, or the design of a container with respect to its shape or function.

The term "package design cost", as used in this revenue ruling, means the cost of package designs. If the taxpayer develops the package design, the term includes the cost of materials, labor, and overhead associated with the design, including all design exploration and study, refinement of the basic design selected, testing, and preparation of the final master comprehensive design. If an independent contractor performs the work, the term includes all billings related to the development of the particular package, including all design exploration and study, refinement of the basic design selected, testing, and preparation of the final master comprehensive design. If the taxpayer purchases the package design, the term includes the purchase price. (*See also* section 1.263A-1T(a)(5)(ii) of the regulations that treats a taxpayer purchasing a package design as also producing such design to the extent the taxpayer incurs costs with respect to the design). The term, however, does not include costs associated with coupon inserts, refund offers, and other promotion-related changes, nor does it include costs that are unrelated to the package design itself, such as a change to the list of ingredients. Moreover, the term does not include costs that would have qualified as "trademark or trade name expenditures" under section 177 of the Internal Revenue Code of 1954 (the 1954 Code); such costs must be capitalized and recovered on a disposition of the asset.

In 1988, all three products were still currently marketed by *X* using the 1986 and 1987 package designs.

LAW AND ANALYSIS

Section 162 of the Code provides that there shall be allowed as a deduction all the ordinary and necessary expenses paid or incurred during the tax year in carrying on a trade or business. Section 1.162-1(a) of the regulations provides that among the items included in business expenses are advertising and other selling expenses.

Section 263A of the Code and the regulations thereunder provide for the capitalization of certain direct and indirect costs with respect to real or tangible personal property produced by the taxpayer and certain property acquired for resale. Section 263A was enacted by the 1986 Act, section 803(a), 1986-3 (Vol. 1) C.B. 267. In general, section 263A is effective for costs incurred after December 31, 1986; in the case of property that is inventory in the hands of the taxpayer, the section is generally effective for tax years beginning after that date.

Section 1.263A-1T of the temporary Income Tax Regulations provides that all costs that directly benefit or are incurred by reason of the production of real or tangible personal property, or property that is acquired for resale, are to be capitalized with respect to that property. *See* section 1.263A-1T(b)(2)(iii), which provides examples of indirect costs that must be capitalized with respect to production or resale activities. *See also* section 1.263A-1T(b)(2)(iv), which provides generally that interest on debt incurred or continued to finance the production of real or tangible personal property to which such section otherwise applies must be capitalized.

Section 1.263A-1T(a)(5)(ii) states that the term "produce" includes construct, build, install, manufacture, develop, improve, create, raise or grow. Although section 263A of the Code does not require the costs of producing intangible personal property to be capitalized, section 263A(b) defines tangible personal property to include a film, sound recording, video tape, book, or similar property. For this purpose, tangible personal property includes property embodying words, ideas, concepts, images, or sounds. See section 1.263A-1T(a)(5)(iii) of the temporary regulations; see also 2 H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-308 (1986), 1986-3 (Vol. 4) C.B. 308. Moreover, section 1.263A-1T(a)(5)(iii) applies to the production of "tangible personal property" within the meaning of that provision without regard to whether that property is treated as tangible or intangible under other provisions of the Code. Thus, the requirements of section 1.263A-1T(a)(5)(iii) apply to the costs of the properties enumerated therein, although those costs may consist of copyrights, licenses, manuscripts, and other items that may be treated as intangible for other purposes of the Code.

Section 1.263A-1T(b)(4)(x) of the temporary regulations, in illustrating required allocations of administrative, service, and support costs to various activities, provides that the costs of engineering and design services are to be so allocated. *See also* section 1.263A-1T(b)(2)(iii)(S), which provides that engineering and design expenses (to the extent that such amounts are not research and experimental expenses as described in section 174 and the regulations thereunder) are indirect costs that must be capitalized with respect to production and resale activities.

If a taxpayer purchases a package design from another person after December 31, 1986, section 1.263A-1T(a)(5)-(ii) of the temporary regulations treats the taxpayer as producing the package design to the extent that the taxpayer incurs costs (*e.g.*, general and administrative costs, interest, etc.) with respect to the package design. The taxpayer must capitalize these costs, in addition to capitalizing the purchase price of the package design, as part of the total package design expenditures.

The above provisions of the Code and the temporary regulations require that expenses incurred after December 31, 1986, in connection with the development and design, or purchase, of product packages must be capitalized under section 263A of the Code for tax years ending after such date. On the other hand, for tax years not covered by section 263A and section 1.263A-1T of the temporary regulations, a similar result is required by section 263 and the regulations thereunder.

Section 263(a) of the Code provides that no deduction shall be allowed for any amount paid for permanent improvements made to increase the value of any property or estate. Section 1.263(a)-2 of the regulations provides examples of capital expenditures and includes the costs of acquiring property having a useful life substantially beyond the taxable year.

Section 167 of the Code provides that there shall be allowed as a depreciation deduction a reasonable allowance for the exhaustion, wear and tear (including a reasonable allowance for obsolescence) of property used in the trade or business. Section 1.167(a)-3 of the regulations provides that if an intangible asset is known from experience or other factors to be of use in the business or in the production of income for only a limited period, the length of which can be estimated with reasonable accuracy, such an intangible asset may be the subject of a depreciation allowance. If the useful life is not limited, no depreciation is allowed. No allowance is permitted based upon the unsupported opinion of the taxpayer that the asset has a limited useful life.

Section 165(a) of the Code provides that there shall be allowed as a deduction any loss sustained during the taxable year and not compensated for by insurance or otherwise. Section 1.165-2(a) of the regulations provides that a loss incurred in a business or a transaction entered into for profit and arising from the sudden termination of the usefulness in such business or transaction of any nondepreciable property, in a case in which such business or transaction is discontinued or when such property is permanently discarded from use therein, shall be allowed as a deduction under section 165(a) for the taxable year in which the loss is actually sustained. For this purpose, the tax year in which the loss is sustained is not necessarily the tax year in which the overt act of abandonment, or the loss of title to the property, occurs.

An expenditure generally must be capitalized under section 263 of the Code if the expenditure creates, enhances, or is part of the cost of acquiring a tangible or intangible asset with a useful life greater than one year. *See Commissioner v. Lincoln Savings and Loan Association*, 403 U.S. 345 (1971), 1971-2 C.B. 116; *Cen-*

tral Texas Savings and Loan Association v. United States, 731 F.2d 1181 (5th Cir. 1984); *Ellis Banking Corp. v. Commissioner*, 688 F.2d 1376 (11th Cir. 1982), *cert. denied*, 463 U.S. 1207 (1983), and *Cleveland Electric Illuminating Company v. United States*, 7 Cl. Ct. 220 (1985). Because package designs generally have useful lives greater than one year, package design costs generally must be capitalized under section 263. For these purposes, it is irrelevant whether a package design was created in-house, was created by an independent contractor, or was purchased from a third party that produced it.

Advertising expenditures, which are distinguishable from package design costs, are currently deductible either because they are of a recurring nature or because their benefit does not extend beyond the tax year. *See Davee v. United States*, 444 F.2d 551 (Ct. Cl. 1971). In contrast, package design costs more closely resemble nonrecurring promotional or advertising expenditures that result in benefits to the taxpayer which extend beyond the year in which the expenditures are incurred; such expenditures are a capital investment and are not currently deductible. *See Alabama Coca-Cola Bottling Company*, T.C.M. 1969-123. *See also*, *Cleveland Electric Illuminating Company v. United States*, 7 Cl. Ct. 220 (1985), which held that advertising to lessen the public's fear of nuclear plants had to be capitalized.

X incurred certain costs in its 1986 and 1987 tax years to develop the package designs for three new products. Because these same three package designs will be used by *X* to generate income in its business for an indeterminate number of future years, no amortization or depreciation is allowable under section 167 of the Code and section 1.167(a)-3 of the regulations. Only when a particular package design is abandoned by *X* may the accumulated costs be deducted. *See* section 165 of the Code and section 1.165-2(a) of the regulations.

HOLDINGS

(1) Expenditures incurred by *X* after December 31, 1986, in connection with the development and design of its product packages must be capitalized under section 263A of the Code. *X*'s package design expenditures incurred prior to January 1, 1987, must be capitalized pursuant to section 263 of the Code and the regulations thereunder.

(2) *X*'s package design costs are not amortizable under section 1.167(a)-3 of the Income Tax Regulations. See, however, Rev. Proc. 89-17, page 827, this Bulletin, which allows a taxpayer to elect a deemed 60-month useful life for certain package designs.

APPLICATION

Any change in a taxpayer's method of accounting from the current expensing of package design costs to the method of capitalizing such costs described in the holding of this revenue ruling is a change in method of accounting to which sections 446 and 481 of the Code and regulations thereunder apply. See Rev. Proc. 89-16, page 822, this Bulletin, which provides additional guidance to taxpayers regarding the change in method of accounting with respect to package design costs.

This ruling is identified as a designated ruling pursuant to section 5.12(2) of Rev. Proc. 84-74, 1984-2 C.B. 736, 745.

---

26 CFR 1.263A-1T: Capitalization and inclusion in inventory costs of certain expenses.

Inventories; gross receipts exception. Retailers and wholesalers with annual gross receipts of less than $10 million are exempt from the capitalization rules of section 263A of the Code. Gross receipts from all businesses of the taxpayer are included in the computation for purposes of the $10 million test.

Rev. Rul. 89-26

ISSUE

If a taxpayer's average annual gross receipts from all of its businesses exceed $10,000,000 but its average annual gross receipts from the sale of personal property acquired for resale do not, is the taxpayer subject to the uniform capitalization rules under section 263A of the Internal Revenue Code?

FACTS

X corporation is primarily engaged in the performance of credit reporting services, collection services, and data processing services. As a convenience to its customers, *X* sells and repairs data-terminal equipment that is used to gain access to *X*'s credit history data base. *X* does not manufacture the data terminals but purchases them from an unrelated entity and resells them to *X*'s customers.

For the three tax years preceding the current tax year, *X* had average annual gross receipts of $42,000,000. Of these gross receipts, the average annual gross receipts from the sale of data-terminal equipment was $4,000,000.

LAW AND ANALYSIS

Section 263A(a) of the Code provides that in the case of property to which section 263A applies and which is inventory in the hands of the taxpayer, certain specified direct and allocable indirect costs must be included in inventory costs.

Section 263A(b)(2)(A) of the Code provides that, in general, section 263A applies to real or personal property described in section 1221(1) that is acquired by the taxpayer for resale. Section 1221(1) property is stock in trade or other property of a kind properly includable in inventory or property held primarily for sale to customers in the ordinary course of a trade or business.

Section 263A(b)(2)(B) of the Code provides, however, that section 263A(b)-(2)(A) does not apply to any personal property acquired during any tax year by the taxpayer for resale if the average annual gross receipts of the taxpayer (or any predecessor) for the 3-tax year period ending with the tax year preceding the year of acquisition do not exceed $10,000,000.

Section 1.263A-1T(d)(2)(iv)(A) of the temporary Income Tax Regulations provides that the term "gross receipts" means the total amount, as determined under the taxpayer's method of accounting, received from all trades or businesses carried on by the taxpayer (e.g., revenue derived from the sale of inventory before reduction for cost of goods sold).

In determining whether the exception contained in section 263A(b)(2)(B) of the Code applies, section 1.263A-1T(d)-(2)(iv)(A) of the temporary regulations requires that receipts from all of a taxpayer's trades or businesses be included in gross receipts. The parenthetical reference to "revenue derived from the sale of inventory" in this section is an example intended to demonstrate that, for purposes of applying the exception, gross receipts are not reduced by such basis items as cost of goods sold; it does not restrict "gross receipts" to receipts from sales of inventory, or sales of property in general.

X's average annual gross receipts from all of its trades or businesses for the three tax years preceding the current tax year exceed $10,000,000. Accordingly, the gross receipts exception, set forth in section 263A(b)(2)(B) of the Code and the temporary regulations under that provision, does not apply, and *X* is subject to the provisions of section 263A with respect to its data terminal inventory acquired for resale. This result is not changed by either the fact that *X* is principally engaged in providing services or the fact that the average annual gross receipts from the sale of data-terminal inventory, alone, do not exceed $10,000,000.

HOLDING

A taxpayer is required to include certain costs in its inventory costs under section 263A of the Code if its average annual gross receipts from all of its businesses exceed $10,000,000 even though its average annual gross receipts from the sale of personal property acquired for resale do not exceed $10,000,000.

An optional simplified method of accounting for resale costs is provided in section 1.263A-1T(d)(3) of the temporary regulations.

---

26 CFR 1.263A-1T: Capitalization and inclusion in inventory costs of certain expenses.

A procedure is provided for certain taxpayers to obtain expeditious consent from the Commissioner to change their method of accounting for package design costs to a capitalization method in accordance with Rev. Rul. 89-23. See Rev. Proc. 89-16, page 822.

---

26 CFR 1.263A-1T: Capitalization and inclusion in inventory costs of certain expenses.

Taxpayers that incur package design costs are allowed to deem the useful lives of certain packages designs to be 60 months. See Rev. Proc. 89-17, page 827.

Section 265.—Expenses and Interest Relating to Tax-Exempt Income

Qualified tax-exempt obligations; draw-down note. A draw-down note is considered issued, for purposes of section 265(b) of the Code, on the date that more than a *de minimis* amount is first advanced under the note. The amount of the draw-down note is its stated principal amount.

Rev. Rul. 89-70

ISSUES

(1) For purposes of section 265(b) of the Internal Revenue Code, what is the date of issue of a draw-down note?

(2) For purposes of section 265(b), what is the amount of a draw-down note?

FACTS

X is a financial institution described in section 265(b)(5) of the Code. In November 1987, *X* entered into a construction loan agreement with city *CI* pursuant to which *X* agreed to provide the financing for construction of a new facility. At the closing of the loan agreement, *CI* executed and delivered to *X* its note, the interest on which is exempt from federal income tax under section 103 of the Code. *CI* intends to designate the note as a "qualified tax-exempt obligation" within the meaning of section 265(b)(3) of the Code.

Under the terms of the note, *X* agrees to honor requests by *CI* for draw-down advances on an as-needed basis. The note provides for a rate of interest that applies to all advances under the note. Interest accrues from the time amounts are advanced.

The total amount of the advances to *CI* cannot exceed the stated principal amount of the note. All advances under the note are secured by the same collateral and are repayable from substantially the same source of funds.

In January 1988, *CI* received the first significant advance under the note.

LAW AND ANALYSIS

Section 265(b)(1) of the Code provides the general rule that, in the case of a financial institution, no deduction shall be allowed for that portion of a taxpayer's interest expense that is allocable to tax-exempt interest income.

Section 265(b)(2) provides that the portion of interest expense that is allocable to tax-exempt interest income is that amount that bears the same ratio to such interest expense as the taxpayer's average adjusted bases of tax-exempt obligations acquired after August 7, 1986, bears to the average adjusted bases of all assets of the taxpayer.

Section 265(b)(3) of the Code provides that qualified tax-exempt obligations will be treated as if they were acquired on August 7, 1986. A qualified tax-exempt obligation is a tax-exempt obligation that (1) is issued after August 7, 1986, by a qualified small issuer, (2) is not a private activity bond (as defined in section 141), and (3) is designated by the issuer for purposes of section 265(b)(3).

Sections 265(b)(3)(C) and (D) of the Code impose volume limitations on the issuers of qualified tax-exempt obligations. Under section 265(b)(3)(C), a "qualified small issuer" means any issuer that reasonably anticipates that the amount of tax-exempt obligations (other than certain obligations described in section 265(b)(3)(C)(ii)) that it will issue during the calendar year will not exceed $10,000,000. In addition, section 265(b)(3)(D) provides that not more than $10,000,000 of the obligations issued by an issuer during any calendar year may be designated by the issuer for purposes of section 265(b)(3).

Section 265(b)(4)(B) of the Code provides that the term "tax-exempt obligation" means any obligation the interest on which is wholly exempt from federal income tax.

Section 103(a) of the Code provides that, except as provided in section 103(b), gross income does not include interest on any state or local bond.

The exception in section 265(b)(3) of the Code for qualified tax-exempt obligations is intended to reduce the extent to which section 265(b) increases the borrowing costs of smaller localities that depend on local financial institutions for financing bona fide governmental projects. H.R. Rep. No. 426, 99th Cong., 1st Sess. 589 (1985), 1986-3 (Vol. 2) C.B. 589. The volume limitations of sections 265(b)(3)(C) and (D) are intended to limit the benefit of the exception to small governmental units.

Although the regulations under section 265 of the Code do not address the volume limitations of sections 265(b)(3)(C) and (D), these limitations may be construed in light of regulations under related sections of the Code that affect the issuance of tax-exempt obligations. Generally, for purposes of determining whether a debt is a tax-exempt obligation, these other regulations provide that a loan agreement providing for periodic advances is treated as a single issue the date of issue of which is the first date on which more than a *de minimis* amount of loan proceeds is advanced. Sections 1.103-13(b)(6) and 1.103-13(b)(10) of the Income Tax Regulations; section 1.103-7(a) of the regulations; section 1.103-15AT(b)(8) of the temporary Income Tax Regulations.

In the present situation, *CI* obtained a commitment from *X* for funding in an amount equal to the stated principal amount of the note. Each advance received by *CI* pursuant to the note is part of a single, integrated financing arrangement under which all advances are subject to the same interest rate. The total amount borrowed is secured by the same collateral and repayable from substantially the same source of funds.

Accordingly, for purposes of section 265(b) of the Code, the advances under the draw-down note are advances made under a single obligation that is issued on the date on which more than a *de minimis* amount of funds is first advanced. The amount of the obligation is the maximum amount that can be advanced under the note.

Therefore, for purposes of section 265(b)(3)(C) of the Code, *CI* includes the stated principal amount of the note in determining the amount of obligations it reasonably anticipates issuing during 1988. Furthermore, in designating tax-exempt obligations as qualified tax-exempt obligations under section 265-(b)(3), *CI* treats the note as issued in 1988 in an amount equal to its stated principal amount.

The determination of the amount of a draw-down note in the manner described above applies only with respect to the issuers of the tax-exempt obligations. Thus, it does not affect the computation of a financial institution's adjusted basis in such a note for purposes of section 265(b)(2) of the Code.

HOLDINGS

(1) For purposes of section 265(b) of the Code, the date of issue of the draw-down note is the date on which more than a *de minimis* amount of funds is first advanced under the note.

(2) For purposes of section 265(b)(3), the amount of the draw-down note is the stated principal amount of the note.

Section 280A.—Disallowance of Certain Expenses in Connection with Business Use of Home, Rental of Vacation Homes, Etc.

(Also Section 170; 26 CFR 1.170A-1, 1.170A-7.)

Business expenses; rental of vacation home. The right to use a vacation home for one week, donated by the owner to a charitable fund-raising auction and sold for fair rental value, is counted as one week of personal use by the owner in determining the owner's right to deduct expenses.

Rev. Rul. 89-51

ISSUE

If the owner of a vacation home donates a week's use of the home to a charity auction, is the use of the home by the successful bidder deemed personal use by the owner under section 280A(d) of the Internal Revenue Code?

FACTS

A, an individual, owns a vacation home that is a dwelling unit under section 280A(f)(1). *A* rented the home to individuals unrelated to *A* for 80 days during 1988 at fair rental value. *A* occupied the home for 14 days during the year for personal purposes.

In 1988 *A* donated to charity *X* a 1-week right of occupancy in the property, for disposition at *X*'s fund-raising auction. At the auction, *B* was the highest bidder and paid *X* an amount that represented fair rental. *B* occupied the property for one week during that year.

LAW AND ANALYSIS

Section 280A(a) of the Code generally disallows business deductions for an individual with respect to the use of a dwelling unit which is used by the individual during the taxable year as a residence.

Section 280(c)(3) of the Code provides that section 280A(a) shall not apply to an item attributable to the rental of the dwelling unit. This exemption is subject to the gross income limitation of section 280A(c)(5).

Section 280A(d) of the Code provides that a taxpayer uses a dwelling unit during a tax year as a residence if the taxpayer uses the unit for personal purposes for a number of days that exceeds the greater of 14 days or 10 percent of the number of days during the year for which the unit is rented at fair rental. Section 280A(d)(2)(C) provides that a taxpayer is deemed to have used a dwelling unit for personal purposes for a day if, for any part of such day, the unit is used by any individual, unless for such day the dwelling unit is rented for a rental which, under the facts and circumstances, is fair rental.

Congress enacted section 280A of the Code to provide objective standards for the allocation of expenses attributable to a residence between personal and business use. *See* H.R. Rep. No. 658, 94th Cong., 1st Sess. 164 (1975), 1976-3 (Vol. 2) C.B. 695, 856. Under section 280A(d)(2)(C), the use of a dwelling unit by any individual is generally attributed to the owner and treated as personal use by the owner. *B*'s use of *A*'s vacation home is use by an individual under section 280A(d)(2)(C) of the Code and is deemed personal use by *A*.

Section 280A(d)(2)(C) excepts from its application use by any individual on a day on which the unit is rented for fair rental value. The purpose of that rental exception is to prevent a taxpayer's business use of a dwelling unit from being counted as personal use. The donation of the use of a dwelling unit for charitable purposes is not business use by a taxpayer. Thus even though the amount *B* paid to *X* equalled fair rental for the home, *B*'s use did not fall within the fair rental exception to the attribution rule of section 280A(d)(2)(C). Similarly, *B*'s payment to *X* could not be fair rental under the rule for attributing expenses to rental under section 280A(e)(1).

A used the dwelling unit as a residence during 1988 because the sum of the days *A* personally occupied the dwelling unit (14 days) and the days for which *A* is deemed to have used the property (7 days) is 21 days, which exceeds the greater of 14 days or 10 per cent of the number of days (80 days) during the year for which the unit was rented at fair rental (8 days).

Neither A nor B is entitled to a charitable contribution deduction. The gift of the right to use property is not a deductible contribution. Income Tax Regulations section 1.170A-7(a)(1). A payment to a charity is not a contribution to the extent that valuable consideration is received in return. Revenue Ruling 67-246, 1967-2 C.B. 104.

HOLDING

For purposes of section 280A(d) of the Code, the one week occupancy of the dwelling unit by *B* constitutes personal use of the unit by *A*, the owner, who had donated the right of occupancy to charity *X*. Because *A* used the unit as a residence during the taxable year, *A*'s deductions with respect to the dwelling unit are subject to the gross income limitation of section 280A(c)(5).

Subchapter C.—Corporate Distributions and Adjustments
Part I.—Distributions by Corporations
Subpart A.—Effects on Recipients

Section 302.—Distributions in Redemption of Stock

26 CFR 1.302-1: General.

When a redeemed shareholder receives an option to repurchase the redeemed stock, the receipt of the option prevents the redemption from meeting the requirements of section 302(b)(2) of the Code because the optioned stock is attributable to the redeemed shareholder under section 318(a)(4), even though the option is only exercisable after a period of time has elapsed. See Rev. Rul. 89-64, page 91.

Section 304.—Redemption Through Use of Related Corporations

26 CFR 1.304-2: Acquisition by related corporation (other than subsidiary).

Redemption; related corporation; control, value test in the aggregate. In determining whether the control requirement of section 304(a)(1)(A) of the Code is met the value test of section 304(c)(1) is not applied class-by-class but, instead, is applied to the aggregate of all classes of a corporation's stock.

Rev. Rul. 89-57

ISSUE

If a person owns 50 percent or more of the aggregate value of all the stock of a corporation but owns less than 50 percent of one of the classes of the corporation's stock, is the person in control of the corporation for purposes of section 304(c)(1) of the Internal Revenue Code?

FACTS

I owned all of the outstanding stock of corporation *Y*.

I and *C*, a person not related to *I*, together owned all the outstanding stock of corporation *X*. *I* owned the *X* Class B stock (44 shares) and *C* owned the *X* Class A stock (45 shares). The fair market value of the 44 shares of *X* Class B stock held by *I* was 30*x* dollars, and the fair market value of the 45 shares of *X* Class A stock held by *C* was 20*x* dollars. Thus, *I* owned 60 percent (30/50) of the aggregate fair market value of the *X* stock outstanding. The Class A stock and the Class B stock each had one vote per share. Thus, *I* held less than 50 percent of the vote in *X* (44/89). The difference in value between the Class A stock and the Class B stock was due to differences in dividend and liquidation rights.

Y purchased *I*'s *X* stock for 30*x* dollars cash, the stock's fair market value.

LAW AND ANALYSIS

Section 304(a)(1) of the Code deals with acquisitions of stock between commonly controlled corporations other than those in a parent-subsidiary relationship. Section 304(a)(1) provides that, for purposes of section 302, if a person is in control of each of two corporations and, in return for property, one of the corporations (the acquiring corporation) acquires stock in the other corporation (the issuing corporation) from that person, then the property is treated as a distribution in redemption of the stock of the acquiring corporation.

Section 304(c)(1) of the Code provides that control, for purposes of section 304, means the ownership of stock possessing either at least 50 percent of the total combined voting power of all classes of stock entitled to vote (the voting power test), or at least 50 percent of the total value of shares of all classes of stock (the value test).

Under section 317(a) of the Code, money is property for purposes of section 304(a)(1). Because *I* received money from *Y* in exchange for stock in *X*, *I*'s receipt of the money is subject to the provisions of section 304(a)(1) if *I* was in control of both *X* and *Y* within the meaning of section 304(c)(1).

I was in control of *Y* because *I* owned all of the outstanding *Y* stock immediately before the transaction.

Because *I* owned stock in *X* possessing only 44 votes out of a total of 89 votes, *I* did not satisfy the voting power test of section 304(c)(1) of the Code. If the value test of section 304(c)(1) is determined in an aggregate manner, then *I* was in control of *X* because *I* owned 60 percent of the total value of the *X* stock outstanding. If, however, the value test is determined in a class-by-class manner, then *I* was not in control of *X* because *I* did not own any of the *X* Class A stock.

The fact that the statute bases the value test of section 304(c)(1) of the Code on the total value of shares implies that the test is applied in an aggregate manner rather than in a class-by-class manner. *See* Rev. Rul. 87-88, 1987-2 C.B. 81 (concluding that if a corporation has more than one class of common stock outstanding, the provisions of section 302(b)(2)(C) are applied in an aggregate manner and not in a class-by-class manner). Moreover, construing the value test as involving a class-by-class approach would render that test meaningless. Under such a construction, the value test could be satisfied only when the voting power test is also satisfied. Thus, control would exist if, and only if, the voting power test is met. Therefore, for purposes of section 304(c)(1), the determination of the total value of the *X* stock must be made by aggregating all of the outstanding classes of *X* stock.

HOLDING

Because *I* owned *X* Class B stock having a value of at least 50 percent of the total value of all of the outstanding *X* stock, *I* is in control of *X* for purposes of section 304(c)(1) of the Code, even though *I* owned none of the *X* Class A stock.

Under section 304(a) and (b) of the Code, the 30*x* dollars *I* received from *Y* is treated as a distribution in redemption of stock in *Y*, and this redemption is tested under section 302(b) by reference to the stock of *X*. Under sections 304(b)(1) and 318(a)(2)(C), *I*'s equity interest in *X* is not decreased and, therefore, paragraphs (1), (2), and (3) of section 302(b) do not apply. Accordingly, this deemed redemption is described in section 302(d), and not section 302(a).

Section 306.—Dispositions of Certain Stock

26 CFR 1.306-2: Exceptions.

Section 306 stock; transactions not in avoidance. The fact that section 306 stock is widely held is in itself not sufficient grounds for relief under section 306(b)(4). Rev. Ruls. 56-116, 57-103 and 57-212 revoked.

Rev. Rul. 89-63

The Internal Revenue Service has reconsidered Rev. Rul. 56-116, 1956-1 C.B. 164, Rev. Rul. 57-103, 1957-1 C.B. 113, and Rev. Rul. 57-212, 1957-1 C.B. 114. In each of these rulings, certain preferred stock that qualified as section 306 stock within the meaning of section 306(c)(1)(B) of the Internal Revenue Code was held to fall within the exception provided by section 306(b)(4), which renders the provisions of section 306(a) inapplicable. Those revenue rulings are hereby revoked.

LAW AND ANALYSIS

Section 306(a) of the Code concerns the treatment of the amount realized on the disposition or redemption of section 306 stock (as defined in section 306(c)). Section 306(b)(4) provides in part that section 306(a) shall not apply if it is established to the satisfaction of the Secretary that the distribution and the disposition or redemption of the section 306 stock was not in pursuance of a plan having as one of its principal purposes the avoidance of federal income tax.

In Rev. Rul. 56-116, two widely held corporations, *X* and *Y*, were merged in a reorganization qualifying under section 368(a)(1)(A) of the Code. In the merger, both preferred and common stock of *X* were issued in exchange for the common stock of *Y*. There was a business reason for issuing both preferred and common stock of *X* in exchange for the *Y* common stock. The management of *X* had no intention of redeeming any of the preferred stock issued in connection with the merger, except as required under the provisions of purchase fund and sinking fund agreements.

That ruling holds that the *X* preferred stock issued in connection with the merger is section 306 stock, but it concludes without full explanation that section 306(a)(1) of the Code does not apply to the proceeds of the disposition of such stock, unless the disposition is in anticipation of redemption.

In Rev. Rul. 57-103, 1957-1 C.B. 113, a publicly held corporation acquired all the assets of a closely held corporation with only common stock outstanding in return for voting preferred stock and common stock, constituting 5 percent of the acquiring corporation's outstanding stock, in a reorganization described in section 368(a)(1)(C) of the Code.

Although the preferred stock issued in the reorganization constituted section 306 stock, as defined in section 306(c)(1)(B) of the Code, that ruling holds, citing Rev. Rul. 56-116, that the issuance of such stock was not in pursuance of a plan having as one of its principal purposes the avoidance of federal income tax within the meaning of section 306(b)(4).

In Rev. Rul. 57-212, 1957-1 C.B. 114, publicly held corporation *B* was merged into publicly held corporation *C* in a reorganization described in section 368(a)(1)(A) of the Code. Each share of *B* common stock (the only class of *B* stock outstanding) was converted into one share of first preferred stock, one-half share of second preferred stock, and three shares of common stock of *C*. All three classes of *C* stock were widely held and traded on the New York Stock Exchange. Pursuant to the provisions of a sinking fund, so long as any of the shares of first preferred stock were outstanding, *C* was required to redeem 3 percent of the outstanding first preferred shares annually.

Rev. Rul. 57-212 reasons that Rev. Rul. 56-116 stands for the proposition that section 306(b)(4) of the Code provides relief from section 306(a)(1) on the disposition of section 306 stock issued by a widely held corporation unless the disposition was in anticipation of redemption. The ruling then considers whether the sinking fund provisions precluded relief under section 306(b)(4) from the operation of section 306(a)(2). It holds that the distribution of the first preferred stock and the subsequent redemption of portions thereof under the sinking fund provisions were not in pursuance of a plan having as one of its principal purposes the avoidance of federal income tax within the meaning of section 306(b)(4). The ruling also states in summary that the provisions of section 306(a)(1) are not applicable to the proceeds of a sale of such shares (whether or not in anticipation of a redemption through the operation of the sinking fund), and the provisions of section 306(a)(2) are not applicable to amounts distributed by *C* in redemption of such first preferred shares to meet the requirements of its sinking fund provisions.

Upon reconsideration, the Service has concluded that the fact that the section 306 stock is issued by a corporation whose stock is widely held is not sufficient grounds for the application of section 306(b)(4) of the Code. Thus, in such circumstances, relief from the provisions of section 306(a) should not be automatic. Although Rev. Rul. 56-116 does not support its application of section 306(b)(4) by specifically relying on the fact that the section 306 stock was issued by a widely held corporation, Rev. Rul. 56-116 was cited in both Rev. Ruls. 57-103 and 57-212 for that proposition. Both Rev. Ruls. 57-103 and 57-212 use that proposition to support their holdings. Because these rulings conflict with the conclusion that the widely held nature of the issuing corporation's stock is not sufficient grounds for the application of section 306(b)(4), they are revoked.

EFFECT ON OTHER RULINGS

Rev. Ruls. 56-116, 57-103, and 57-212 are revoked.

PROSPECTIVE APPLICATION

Pursuant to the authority contained in section 7805(b) of the Code, the conclusion of this revenue ruling will not be applied adversely to taxpayers who treat transactions in accordance with the position set forth in Rev. Ruls. 56-116, 57-103, 57-212 in the case of stock either issued before May 1, 1989, date of publication of this revenue ruling in the Internal Revenue Bulletin, or issued after that date pursuant to the terms of a plan of reorganization which was adopted before that date and the terms of which remained in effect at all times until that date.

Subpart C.—Definitions: Constructive Ownership of Stock

Section 318.—Constructive Ownership of Stock

26 CFR 1.318-3: Estates, trusts, and options.
(Also Section 302; 1.302-1.)

Constructive ownership of stock; option not currently exercisable. An option constitutes an option for purposes of section 318(a)(4) of the Code, even though it is only exercisable after a period of time has elapsed. Rev. Rul. 68-601 clarified.

Rev. Rul. 89-64

ISSUE

If an option is exercisable only after the lapse of a fixed period of time, is it an option within the meaning of section 318(a)(4) of the Internal Revenue Code and, therefore, must it be taken into consideration in determining whether a redemption qualifies as substantially disproportionate within the meaning of section 302(b)(2)?

FACTS

X, a domestic manufacturing corporation, had outstanding solely 100 shares of voting common stock. *A*, an officer of *X*, held 30 shares of this stock. *A* resigned from *X* in order to devote time and money to an unrelated endeavor, and *X* redeemed 15 shares of A's *X* stock. *A* received in the redemption cash plus an option to purchase 15 shares of *X* stock. This option was exercisable only after the lapse of a fixed period of time following the redemption. Except for the provision that the option could not be exercised until the fixed period of time had elapsed, there were no limitations on the exercise of the option. The fair market value of the *X* stock surrendered by *A* was equal to the fair market value of the cash and option that *A* received from *X* in exchange therefor.

The redemption constituted a substantially disproportionate redemption of stock within the meaning of section 302(b)(2) of the Code, provided that the option received by *A* did not constitute an option within the meaning of section 318(a)(4).

LAW AND ANALYSIS

The treatment of distributions in redemption of stock is governed by the provisions of section 302 of the Code. Pursuant to section 302(c)(1), the constructive ownership rules of section 318(a) are applicable in determining the ownership of stock for purposes of section 302.

Section 318(a)(4) of the Code provides that, if a person has an option to acquire stock, this stock is considered as owned by this person. Neither section 318 of the Code nor the regulations thereunder define the term "option." Moreover, neither section 302 of the Code nor the regulations thereunder specifically address the question of how section 318(a)(4) is to be interpreted for section 302 purposes.

Rev. Rul. 68-601, 1968-2 C.B. 124, dealing with the effect of warrants and convertible debentures on the substantially disproportion computation of section 302(b)(2) of the Code states:

> In order for a warrant to acquire stock to qualify as an option, the holder must have the right to obtain the stock at his election. When this right to acquire stock exists, warrants or convertible debentures are not realistically different from options as referred to in section 318(a)(4) of the Code. In each instance, stock may be acquired at the election of the shareholder and there exist no contingencies with respect to such election.

The phrase "at the election of the shareholder" in Rev. Rul. 68-601 is intended to distinguish situations where the holder of a warrant, convertible debenture, or option has a unilateral right to acquire stock, from situations where there is a bilateral contract. This phrase does not address the question here at issue of whether a delay in the right to exercise prevents an otherwise valid option from constituting an option for purposes of section 318(a)(4).

In the present situation, the delay does not prevent *A* from being viewed as having a right to receive 15 shares of *X* stock at *A*'s election. In enacting section 302(b)(2) of the Code, Congress intended not only that certain specific limitations be met at the time of the transaction, but also that the circumstances of the redemption offer some assurance that the redeemed shareholder will sustain the required contraction of equity with a degree of permanence. Here, the option not only meets the literal wording of section 318(a)(4) but also prevents the transaction from meeting this intent underlying section 302(b)(2). The option distributed by *X* to *A* in redemption of *A*'s *X* stock constitutes an option within the meaning of section 318(a)(4); accordingly, *A* owned, directly and constructively, the same number of shares of *X* stock after the redemption that *A* owned before the redemption.

HOLDING

The option distributed by *X* to *A* in redemption of *A*'s *X* stock, though exercisable only after the lapse of a fixed period of time following the redemption, is an option within the meaning of section 318(a)(4) of the Code and must be taken into consideration in determining whether the redemption qualified under section 302(b)(2). As a result of owning the option, *A* is considered as owning the stock covered by the option and, thus, fails to meet the requirement of section 302(b)(2).

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 68-601 is clarified.

Part II.—Corporate Liquidations
Subpart A.—Effects on Recipients

Section 332.—Complete Liquidations of Subsidiaries

26 CFR 1.332-2: Requirements for nonrecognition of gain or loss.

Does section 332 of the Code apply to a distributee corporation's receipt of property in complete liquidation of a distributor corporation, if the distributee owns no stock in the distributor. See Rev. Rul. 89-46, page 272.

Section 334.—Basis of Property Received in Liquidation

26 CFR 1.334-1: Basis of property received in liquidation.

Whether the Service will issue rulings treating the life insurance reserves received by the distributee corporation in a liquidation as unsecured liabilities assumed. See Rev. Proc. 89-36, page 919.

Subpart B.—Effects on Corporations

Section 336.—Gain or Loss Recognized on Property Distributed in Complete Liquidation

26 CFR 1.336-1: General rule on liquidation of corporation.

Whether the Service will rule as to whether the liquidation of a life insurance subsidiary is a termination pursuant to section 815(d)(2) of the Code as in effect before the enactment of the Tax Reform Act of 1984. See Rev. Proc. 89-36, page 919.

Section 338.—Certain Stock Purchases Treated As Asset Acquisitions

Whether the Service will rule as to the tax consequences, under subchapter L, from the stock purchase and the deemed purchase of assets of a life insurance subsidiary. See Rev. Proc. 89-36, page 919.

Part III.—Corporate Organizations and Reorganizations
Subpart A.—Corporate Organizations

Section 351.—Transfer to Corporation Controlled by Transferor

26 CFR 1.351-1: Transfer to corporation controlled by transferor.

If a member of an affiliated group filing consolidated income tax returns transfers property to another corporation in exchange for a security and has no actual stock ownership in the transferee, can section 351(a) of the Code apply to prevent recognition of gain or loss on the transfer. See Rev. Rul. 89-46, page 272.

Subpart B.—Effects of Shareholders and Security Holders

Section 354.—Exchanges of Stock and Securities in Certain Reorganizations

26 CFR 1.354-1: Exchanges of stock and securities in certain reorganizations.

If a recapitalization that qualifies under section 368(a)(1)(E) increases the value of the stock held by a trust and reduces the value of the stock held by the controlling shareholder, who is the original grantor of the trust, has a gift been made to the trust beneficiaries for federal gift tax purposes, and has an addition to corpus been made for purposes of the generation-skipping transfer tax? See Rev. Rul. 89-3, page 278.

Section 355.—Distributions Of Stock And Securities Of A Controlled Corporation

When, pursuant to a single integrated transaction, a corporation transfers section 38 property to a newly formed subsidiary in year one and distributes its stock in the subsidiary to its shareholders in year two, the disposition of the section 38 property triggering investment credit recapture under section 47(a) of the Code occurs in year one. See Rev. Rul. 89-18, page 14.

26 CFR 1.355-1: Distribution of stock and securities of a controlled corporation.

T.D. 8238

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Part 1

Corporate Separations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to corporate separations. A corporate separation, typically, is a transaction in which a distributing corporation distributes to its shareholders or security holders stock, or stock and securities, of a controlled corporation and after which the distributing and the controlled corporations conduct businesses previously conducted directly or indirectly by the distributing corporation. These regulations revise existing regulations to reflect administrative and judicial experience under those existing regulations. These regulations apply to the shareholders and security holders of corporations under-taking corporate separations and provide guidance needed to comply with the law. The final regulations do not reflect amendments to section 355 of the Internal Revenue Code of 1986 made by the Revenue Act of 1987 and the Technical and Miscellaneous Revenue Act of 1988.

EFFECTIVE DATE: These regulations apply to transactions occurring after February 6, 1989.

SUPPLEMENTARY INFORMATION:

Background

On January 21, 1977, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 355 and 346 (as in effect prior to its amendment by the Tax Equity and Fiscal Responsibility Act of 1982) of the Internal Revenue Code of 1954 (42 FR 38866). The amendments were proposed to revise the existing regulations to reflect administrative and judicial experience under those existing regulations. Since a public hearing was not requested, none was held. After consideration of all of the comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

Section 355 provides that, under certain conditions, a corporation may distribute stock, or stock and securities, of a subsidiary without recognition of gain or loss to its shareholders or security holders. The proposed regulations made two major changes to the existing regulations under section 355. First, the regulations under section 355(a)(1)(B) (requiring that the transaction not be used principally as a device for the distribution of earnings and profits) were revised to specify factors to be taken into account in determining whether a transaction was used principally as such a device. Second, the regulations under section 355(b) (relating to active businesses) were revised to permit the separation of a single business, thereby conforming them to the holdings of *Commissioner v. Coady*, 289 F.2d 490 (6th Cir. 1961), *aff'g* 33 T.C. 771 (1960), and *United States v. Marett*, 325 F.2d 28 (5th Cir. 1963). The proposed regulations also proposed to clarify the business purpose requirement under section 355. A discussion of the more important comments received on, and a description of the changes made to, the proposed regulations follow.

Comments On, And Changes To, Proposed Regulations

Business Purpose

(1) *Independent requirement.* Section 1.355-2(b)(1) of the proposed regulations expressed the business purpose requirement as an independent requirement under section 355. Commenters objected to the treatment of the business purpose requirement as a separate requirement and suggested that the existence of a corporate business purpose should be considered only in determining whether a transaction was used principally as a device for the distribution of earnings and profits within the meaning of section 355(a)(1)(B).

Treasury and the Internal Revenue Service acknowledge that there is a very close relationship between the business purpose requirement and the requirement that the transaction not be used principally as a device for the distribution of earnings and profits. Accordingly, the final regulations clarify that the corporate business purpose is evidence that the transaction was not used principally as such a device. See §1.355-2(d)(3)(ii) in this document. This new provision is discussed below under the heading "Evidence of Nondevice."

However, Treasury and the Internal Revenue Service believe that, as held in *Commissioner v. Wilson*, 353 F.2d 184 (9th Cir. 1965), a transaction that is not carried out for a corporate business purpose should not qualify under section 355, even if it was not used principally as a device for the distribution of earnings and profits. Accordingly, the final regulations retain the independent business purpose requirement. See §1.355-2(b)(1) in this document.

(2) *Corporate business purpose.* Section 1.355-2(b)(1) of the proposed regulations provided that a distribution qualifies under section 355 only if it is carried out for one or more corporate business purposes. Corporate business purposes were identified as "real and substantial nontax reasons germane to the business of the corporations."

Commenters objected to the "real and substantial" standard on the grounds that it is not useful and is confusing. However, Treasury and the Internal Revenue Service continue to believe that the "real and substantial" standard provides a useful description of the type of corporate business purpose required under section 355. Accordingly, the final regulations retain that standard. See §1.355-2(b)(2) in this document.

Commenters requested reconsideration of the "nontax" standard. The Internal Revenue Service has ruled that reduction of state and local capital taxes is a corporate business purpose. Rev. Rul. 76-187, 1976-1 C.B. 97. That rule will remain in effect. However, Treasury and the Internal Revenue Service continue to believe that reduction of Federal taxes should not be regarded as a corporate business purpose. Accordingly, the final regulations replace the "nontax" standard with a "non Federal tax" standard.

Commenters wondered whether the potential reduction of Federal taxes will offset or negate the existence of a non-Federal tax business purpose. In response, the final regulations clarify that only a transaction motivated in whole or in substantial part by a corporate business purpose will satisfy the corporate business purpose requirement. Further, the final regulations clarify that the potential reduction of Federal taxes by the distributing or controlled corporations (or a corporation controlled by either) is relevant in determining whether a corporate business purpose motivated the distribution. The final regulations also provide that a purpose of reducing non Federal taxes is not a corporate business purpose if (i) the transaction will effect a reduction in both Federal and non Federal taxes because of similarities between Federal tax law and the tax law of the other jurisdiction and (ii) the reduction of Federal taxes is greater than or substantially coextensive with the reduction of non Federal taxes. See §1.355-2(b)(1) and (2) in this document. Three examples are also added in §1.355-2(b)(5). The first illustrates that a distribution which is made to enable the distributing and/or controlled corporation to make an election to be an S corporation does not meet the corporate business purpose requirement. The second example illustrates that the result is the same if the distribution is made to enable the distributing and/or controlled corporation to elect to become an S corporation both for Federal tax purposes and for purposes of a state that has tax law provisions similar to Subchapter S of the Internal Revenue Code of 1986. The third example illustrates that the magnitude of the potential reduction of Federal taxes is relevant to the determination of whether the distribution is motivated by a corporate business purpose.

(3) *Shareholder purpose.* Section 1.355-2(b)(1) of the proposed regulations provided that a distribution qualifies under section 355 only if it is carried out for purposes "germane to the business of the corporations." It further provided that "a shareholder purpose for a transaction may be so nearly coextensive with a corporate business purpose as to preclude any distinction between them. In such a case, the transaction is carried out for purposes germane to the business of the corporations." Some commenters complained that the proposed regulations did not adequately acknowledge that, in a closely held corporation, the purposes of the shareholders cannot be distinguished from those of the corporation. Other commenters complained that the proposed regulations addressed cases in which the shareholder purposes are totally coextensive with the corporate business purposes, but failed to address the more common cases in which there is only partial overlap.

In response, the final regulations revise example (2) of §1.355-2(b)(2) of the proposed regulations to present a disproportionate distribution that satisfies the business purpose requirement without a shareholder disagreement. See example (2) of §1.355-2(b)(5) in this document. The final regulations also provide that a purpose germane to the business of the affiliated group to which a corporation belongs is a corporate business purpose. See §1.355-2(b)(2) in this document.

As explained above, the final regulations clarify that a transaction that is motivated in substantial part by a corporate business purpose does not fail to satisfy the business purpose requirement merely because it is motivated in part by non-Federal tax shareholder purposes. See §1.355-2 (b) (1) in this document.

(4) *Business purposes for distribution.* The final regulations provide that the distribution of the stock, or stock and securities, of the controlled corporation to the shareholders must be carried out for one or more corporate business purposes. In example (3) of §1.355-2(b)(2) of the proposed regulations, the distribution is not carried out for a corporate business purpose. The alleged corporate business purpose for the transaction is protection of a business from the risks of another business. Because that purpose is satisfied as soon as the risky business is dropped down to a subsidiary, the distribution of the stock of the subsidiary is not carried out for that purpose. Commenters argued that separate incorporation might not satisfy the alleged corporate business purpose because a court might disregard the separate corporate identity of the subsidiary. Upon reconsideration, Treasury and the Internal Revenue Service continue to believe that example (3) is an appropriate illustration of the requirement that the distribution be carried out for a corporate business purpose. The facts of that example have been clarified, however, to assume that, under applicable law, risk is alleviated by the transfer of assets to the subsidiary. See example (3) of §1.355-2(b)(5) in this document.

(5) *Availability of alternative arrangement.* Example (4) of §1.355-2(b)(2) of the proposed regulations involves a transfer by the distributing corporation of one of its two businesses to a new controlled corporation and a distribution of the stock of the controlled corporation where the transfer and the distribution are required by a lender as a condition on additional loans. The example concludes that the distribution was carried out for one or more corporate business purposes. Commenters asked whether the distribution in example (4) would be carried out for one or more corporate business purposes if the lender would have been satisfied to have the distributing corporation transfer its two businesses to two new controlled corporations and continue as a holding company.

Commenters referred to Rev. Rul. 77-22, 1977-1 C.B. 91, in which a distribution by the distributing corporation of the stock of a preexisting controlled corporation is carried out for one or more corporate business purposes, where the distribution is made in response to the concerns of a lender that the proceeds of loans to the controlled corporation not be applied to the business of the distributing corporation. They hypothesized the existence of lenders who would have been satisfied to have the distributing corporation transfer its other business to a new controlled corporation and continue as a holding company. They noted that Rev. Rul. 77-22 could be read to hold that, under these hypothetical facts, a distribution by the distributing corporation of the stock of the preexisting controlled corporation would be carried out for one or more corporate business purposes.

Treasury and the Internal Revenue Service believe that a distribution satisfies the business purpose requirement only if the distributing corporation cannot achieve its corporate business purpose through a nontaxable transaction that does not involve a distribution of the stock of a subsidiary and that is neither impractical nor unduly expensive. Thus, if such an alternative transaction is available, the distribution is not carried out for a corporate business purpose. Accordingly, example (4) is replaced by new examples illustrating this aspect of the business purpose requirement. See examples (4) and (5) of §1.355-2(b)(5) in this document.

Continuity of Interest

Section 1.355-2(b)(1) of the proposed regulations provided that section 355 contemplates a continuity of interest in all or part of the business enterprise on the part of those persons who, directly or indirectly, were the owners of the enterprise prior to the distribution or exchange. There was concern it could be argued that the phrase "all or part" meant a transaction could qualify even if none of the owners of the enterprise before the separation had, after the distribution, an interest in the business enterprise of one of the separated corporations. The final regulations make clear that the separation must effect only a readjustment of continuing interests in the property of the distributing and controlled corporations. In this regard, section 355 requires that one or more persons who, directly or indirectly, were the owners of the enterprise prior to the distribution or exchange own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. These rules have been relocated in a new §1.355-2(c). Four examples illustrating the continuity of interest requirement are added, the principles of which are based on previously published revenue rulings. See Rev. Rul. 69-293, 1969-1 C.B. 102 and Rev. Rul. 79-293, 1979-2 C.B. 125.

Device For Distribution Of Earnings and Profits

In General

Section 1.355-2(c) of the proposed regulations interpreted the requirement of section 355(a)(1)(B) that the transaction not be used principally as a device for the distribution of earnings and profits of the distributing corporation, the controlled corporation, or both (a ''device''). That interpretation consisted of a description of the tax avoidance that could be achieved through the use of a device, a specification of factors (''device factors'') whose presence is evidence that the transaction was used principally as a device (''evidence of device''), and a specification of certain transactions that ordinarily would not be considered to be a device for the distribution of earning and profits. The final regulations generally retain these provisions. At the request of commenters, they also specify factors (''nondevice factors'') whose presence is evidence that the transaction was not used principally as a device (''evidence of nondevice''). See §1.355-2(d) in this document.

Section 1.355-2(c)(1) of the proposed regulations explained that a corporate separation can present potential for the avoidance of the dividend provisions of the Code. The final regulations make clear that avoidance potential is presented by the substitution of stock interests in two or more corporations for a stock interest in a single corporation. In particular, avoidance potential can be presented by distributions in which the distributing corporation liquidates as well as by distributions in which the distributing corporation does not liquidate. The final regulations also replace the reference to sales or liquidations with a reference to sales, exchanges, or transactions that are treated as exchanges under the Code, thus making clear that redemptions as well as liquidations are covered by the rules. They also limit the rules to transactions involving stock on the grounds that sections 355(a)(3) and 356(d)(2)(C) generally render transactions involving securities incapable of use to avoid the dividend provisions of the Code. At the request of commenters, the final regulations clarify that the determination whether a transaction was used principally as a device depends on all of the facts and circumstances, and that the presence of the device factors specified in §1.355-2(d)(2) is not alone controlling. See §1.355-2(d)(1) in this document. The final regulations also make clear that a device can include a transaction that effects a recovery of basis.

The provision in §1.355-2(c)(1) of the proposed regulations regarding pro rata distributions is clarified and made a separate provision in the final regulations. See §1.355-2(d)(2)(ii) in this document. Certain transactions that are ordinarily considered not to have been used principally as a device are specified in a separate provision in the final regulations. As suggested by commenters, that provision clarifies that these transactions are ordinarily considered not to have been used principally as a device, notwithstanding the presence of any of the device factors specified in §1.355-2(d)(2). See §1.355-2(d)(5) in this document.

Subsequent Sale Or Exchange Of Stock

(1) *Per se rule*. Section 1.355-2(c)(2) of the proposed regulations provided that a subsequent sale or exchange of 20 percent or more of the stock of either the distributing or the controlled corporation, negotiated or agreed upon before the distribution, is conclusive evidence of device. Commenters objected to this rule on the grounds that it is arbitrary, that it has no case law support, and that it is inconsistent with the facts and circumstances standard mandated by the Code and expressed in §1.355-1(c)(1) of the proposed regulations.

Upon reconsideration, Treasury and the Internal Revenue Service continue to believe that a subsequent sale or exchange of stock of either the distributing or the controlled corporation, negotiated or agreed upon before the distribution, is substantial evidence of device. However, they agree with the commenters that section 355(a)(1)(B) does not require that this evidence be treated as conclusive, and that taxpayers should not be denied the opportunity to prove that, despite the sale or exchange, the transaction was not used principally as a device. Accordingly, the *per se* rule is eliminated in the final regulations.

The final regulations provide that a subsequent sale or exchange of stock of either the distributing or the controlled corporation, negotiated or agreed upon before the distribution, is substantial evidence of device. Generally, the greater the percentage of stock sold or exchanged, the stronger the evidence of device. See §1.355-2(d)(2)(iii)(A) in this document. In addition, the shorter the period of time between the distribution and the sale or exchange, the stronger the evidence of device.

(2) *Negotiated or agreed upon before the distribution*. The final regulations retain the rules of the proposed regulations concerning whether a sale or exchange is considered to be negotiated or agreed upon before the distribution. See §1.355-2(d)(2)(iii)(D) in this document.

(3) *Subsequent reorganizations*. The final regulations retain the provision in §1.355-2(c)(2) of the proposed regulations that an exchange of stock pursuant to a plan of reorganization in which either no gain or loss or only an insubstantial amount of gain is recognized is not evidence of device. The final regulations provide that for this purpose, gain treated as a dividend pursuant to sections 356(a)(2) and 316 shall be disregarded. They also add a provision that any stock received in a reorganization exchange excepted from the subsequent sale rules will be treated, for purposes of those subsequent sale rules, as the stock surrendered. Thus, any sale or exchange of the stock received will be subject to the subsequent sale rules. See §1.355-2(d)-(2)(iii)(E) in this document.

Nature And Use Of Assets

(1) *Assets not used in a qualifying trade or business*.

Section 1.355-2(c)(3)(iii) of the proposed regulations provided that the transfer or retention of cash or liquid assets in excess of the reasonable needs of the post-distribution business of the transferee or the retaining corporation (''excess liquid assets'') is evidence of device. Some commenters agreed that the transfer of excess liquid assets should be evidence of device, but asserted that the retention of excess liquid assets should be a neutral factor. Other commenters noted that, because liquid assets must either be transferred or retained, the proposed regulations appeared to find evidence of device whenever excess liquid assets are present.

Section 1.355-2(c)(3)(ii) of the proposed regulations provided that, if a substantial portion of the post-distribution assets of the distributing or the controlled corporation consists of a trade or business acquired during the five-year period preceding the distribution in a transaction in which the basis of the assets was not determined in whole or in part by reference to the transferor's basis, this fact is evidence of device (the ''new trade or business device factor''). Some commenters objected to this device factor on the grounds that the acquisition of a trade or business should be treated under the active business requirements of section 355(b) instead of the device clause of section 355(a)(1)(B). They pointed out that section 355(b)(2)(C) denies qualification under section 355 to a distribution after which the only trade or business of the distributing or the controlled corporation is a trade or business that was acquired during the five-year period preceding the distribution in a transaction in which the basis of the assets was not determined in whole or in part by reference to the transferor's basis. Other commenters objected to this device factor on the grounds that the presence of operating assets, even if newly acquired, should not be evidence of device. They argued that operating assets are not suitable for use in a device.

Treasury and the Internal Revenue Service believe that the presence of excess liquid assets permits avoidance of the dividend provisions of the Code, regardless of the corporation that holds them. Treasury and the Internal Revenue Service also believe that the active business requirements of section 355(b) do not render unnecessary the principle of the new trade or business device factor of §1.355-2(c)(3)(ii) of the proposed regulations. Those requirements can be satisfied by a distribution after which the distributing corporation holds a business that it has conducted for five years, while the controlled corporation holds such a business and a business that was acquired during the five-year period preceding the distribution in a transaction in which the basis of the assets was not determined in whole or part by reference to the transferor's basis. Rev. Rul. 73-44, 1973-1 C.B. 182, as clarified in Rev. Rul. 76-54, 1976-1 C.B. 96.

The new trade or business device factor of the proposed regulations was limited to trades or businesses. Thus, it was generally consistent with §1.355-2(b)(3) of the existing regulations, which provides that, if substantially all of the assets of the distributing and the controlled corporations are and have been used in the active conduct of trades or businesses that meet the requirements of section 355(b), this fact will be evidence of nondevice. On the other hand, the new trade or business device factor of the proposed regulations failed to find evidence of device in the presence of business assets that were not acquired as part of a trade or business and that are not or have not been used in the active conduct of a trade or business that satisfies the requirements of section 355(b). Such assets include excess inventory. The final regulations correct this oversight.

Accordingly, the final regulations provide that the existence of assets that are not used in a trade or business that satisfies the requirements of section 355(b) is evidence of device. For this purpose, assets that are not used in a trade or business that satisfies the requirements of section 355(b) include, but are not limited to, cash and other liquid assets that are not related to the reasonable needs of a business satisfying such section. The strength of the evidence depends on all the facts and circumstances, including, but not limited to, the ratio for each corporation of the value of assets not used in a trade or business that satisfies the requirements of section 355(b) to the value of its business that is so described. A difference in the ratio described in the preceding sentence for the distributing and controlled corporation is ordinarily not evidence of device if the distribution is not pro rata among the shareholders of the distributing corporation and such difference is attributable to a need to equalize the value of the stock distributed and the value of stock or securities exchanged by the distributees. See §1.355-2(d)(2)(iv)-(B).

(2) *Related function.* Section 1.355-2(c)(3)(iv) of the proposed regulations provided that the continued integration of a function with the business from which it has been separated is evidence of device. Commenters objected to this device factor on the grounds that the specified conditions present no compelling evidence of device.

Treasury and the Internal Revenue Service believe that the continued integration of a function with the business from which it has been separated should be evidence of device. This belief is based on the interpretation of section 355(a)(1)(B) expressed in §1.355-2(c)(1) of the proposed regulations. Under certain circumstances, continued integration indicates a likelihood of avoidance of the dividend provisions of the Code.

Most commenters agreed that the continued integration of a function consisting of real estate with the business from which it has been separated should be evidence of device. However, they questioned whether other cases of continued integration should be evidence of device. The function might be truly integral to the business from which it has been separated, in which case it could not be sold without adversely affecting that business.

Accordingly, the final regulations revise the related function device factor of §1.355-2(c)(3)(iv) of the proposed regulations. The device factor is restricted to apply to the continued integration of a function with the business from which it has been separated only if the function can be sold without adversely affecting the business from which it has been separated. For example, the function may be capable of sale without an adverse effect on the business from which it has been separated because adequate substitutes are available. See §1.355-2(d)(2)(iv)(C) in this document.

Evidence Of Nondevice

Section 1.355-2(c)(1), (2), and (3) of the proposed regulations specified device factors whose presence is evidence of device. At the request of commenters, the final regulations specify several nondevice factors whose presence is evidence of nondevice. See §1.355-2(d)(3) in this document.

Commenters suggested that the business purposes for a transaction may indicate that it was not used for tax avoidance purposes and, therefore, was not used principally as a device. Upon reconsidering the device rules, Treasury and the Internal Revenue Service agree that the corporate business purposes for a transaction may be sufficiently compelling to outweigh the evidence of device that the transaction presents. Accordingly, the final regulations reflect this conclusion. See §1.355-2(d)(3)(ii) in this document.

The final regulations provide that the corporate business purposes for a transaction present evidence of nondevice. In accordance with the facts and circumstances standard of §1.355-2(c)(1) of the proposed regulations, the strength of this evidence depends on all of the facts and circumstances. The final regulations adopt a sliding scale approach. Thus, the greater the evidence of device, the stronger the corporate business purpose necessary to outweigh that evidence. Evidence of device presented by a disproportionate allocation of assets not used in a trade or business that satisfies the requirements of section 355 (b) can be outweighed by the presence of a strong corporate business purpose for that allocation. The final regulations also specify nonexclusive factors to be taken into account in assessing the strength of a corporate business purpose. See §1.355-2(d)(3)(ii) in this document.

The final regulations specify other nondevice factors. One of these nondevice factors is that the distributing corporation is publicly traded and has no shareholders who hold large blocks of stock. See §1.355-2(d)(3)(iii) in this document. Another nondevice factor is that all of the distributees are domestic corporations that would be entitled to the deduction under section 243(a)(1) available to corporations meeting the stock ownership requirements of section 243(c), 243(a)(2), 243(a)(3), or 245(b) if the distribution were taxable as a dividend. See §1.355-2(d)(3)(iv) in this document.

Examples

In light of the changes made to the device rules in the final regulations, the examples in §1.355-2(c)(4) of the proposed regulations are replaced by new examples. The examples illustrate the application of the facts and circumstances device standard of §1.355-2(d)(1) and the balancing of the evidence of device presented by the device factors specified in §1.355(d)(2) against the evidence of nondevice presented by the corporate business purpose nondevice factor specified in §1.355-2(d)(3)(ii). See §1.355-2(d)(4) in this document.

Example (1) illustrates that the transaction will be considered to have been used principally as a device if there is a subsequent sale of stock by a shareholder to a key employee that is negotiated or agreed upon before the distribution, even though the employee could have acquired an equivalent amount of stock directly from the corporation.

Example (2) involves the retention of liquid assets in excess of the reasonable needs of the business of the retaining corporation. That example concludes that the transaction was not used principally as a device because of the corporate business purpose for the transaction and the other facts and circumstances, including the facts that the excess liquid assets are not a substantial portion of the postdistribution assets of the retaining corporation and that the assets not used in the trade or business are divided between the two businesses in proportion to their values. In contrast, example (3) presents a case in which there is a strong corporate business purpose for the distribution, but there is also a transfer of cash substantially in excess of the reasonable needs of the business of the transferor and transferee corporations. That example concludes that, based on all of the facts and circumstances, the transaction was used principally as a device. Example (4) illustrates that the result will be the same as in example (3) if, instead of cash being transferred, operating assets unrelated to the business of the transferee corporation are purchased and transferred to it in anticipation of the distribution.

Transactions Ordinarily Not A Device

Section 1.355-2(c)(1) of the proposed regulations specified two transactions that are ordinarily not considered to be a device for the distribution of earnings and profits. The final regulations specify those transactions in a separate provision. As suggested by commenters, that provision clarifies that such a transaction is ordinarily considered not to have been used principally as a device, notwithstanding the presence of any of the device factors specified in §1.355-2(d)(2). See §1.355-2(d)(5)(i) in this document.

Section 1.355-2(c)(1) of the proposed regulations accorded a presumption against device to a distribution if, in the absence of section 355, no part of a distribution of money by the distributing corporation, the controlled corporation, or any corporation controlled, directly or indirectly, by either of those corporations would be taxable as a dividend because of the absence of earnings and profits.

Commenters questioned the relevance of the earnings and profits of the corporations other than the distributing corporation. They argued that the dividend avoidance interpretation of section 355(a)(1)(B) expressed in §1.355-2(c)(1) of the proposed regulations made only the earnings and profits of the distributing corporation relevant. Treasury and the Internal Revenue Service, however, believe that the earnings and profits of both the distributing and controlled corporations must be taken into account, and the final regulations so provide. See §1.355-2(d)(5)(ii) in this document. Also, the application of the presumption must take into account the possibility that a distribution by the distributing corporation would create earnings and profits if section 355 did not apply.

Section 1.355-2(d)(5)(iii) provides that distributions that would be entitled to sale or exchange treatment under section 303(a) if section 355 did not apply are ordinarily considered not to have been used principally as a device. Section 1.355-2(d)(5)(iv) contains the presumption against device specified in §1.355-2(c)(1) of the proposed regulations for distributions that would be entitled to sale or exchange treatment under section 302 (a) if section 355 did not apply.

The final regulations also clarify that a transaction to which section 302(a) or 303(a) would apply if section 355 did not is not accorded the presumption against device if it involves the distribution of the stock of more than one controlled corporation and facilitates the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of the stock of one corporation and the retention of the stock of another. The final regulations also add an example of a transaction that is not accorded the presumption because it presents such tax avoidance potential. See example (2) of §1.355-2(d)(5)(v) in this document.

Active Conduct Of A Trade Or Business

(1) *In general.* Section 1.355-3 of the proposed regulations interpreted the active business requirements of section 355(b). The final regulations retain those provisions and make clarifying revisions to §1.355-3(b)(2)(iii) (the "active conduct" requirement of section 355(b)(2)(A)) and §1.355-3(b)(3) (the "five-year active conduct" requirement of section 355(b)(2)(B)).

Section 1.355-3(b)(2)(iii) of the proposed regulations provided that the active conduct of a trade or business requires the performance of active and substantial management and operational functions. Commenters inquired whether a corporation may satisfy that requirement if some or all of its activities are performed by independent contractors. In response, the final regulations clarify that, in determining whether a corporation is actively conducting a trade or business, the activities performed by persons outside the corporation, including independent contractors, generally will not be taken into account. However, a corporation may satisfy that requirement through the activities that it performs directly, even though other activities are performed by independent contractors. See §1.355-3(b)(2)(iii) in this document.

The final regulations slightly revise examples (1), (2), and (3) of §1.355-3(c) of the proposed regulations to explain why the described activities do not satisfy the active business requirements. Example (1) illustrates that the holding of investment securities is not the active conduct of a trade or business. See §1.355-3(b)(2)(iv)(A) in this document. This example is consistent with Rev. Rul. 66-204, 1966 C.B. 113, which holds that activity generated by trading in stock and securities held for one's own account is an investment function and is not the active conduct of a trade or business within the meaning of section 355. Examples (2) and (3) illustrate that the activities relied upon to satisfy the active business requirements must have been actively conducted throughout the five-year period preceding the distribution. See §1.355-3(b)(3) in this document.

(2) *Separation of a single business.* The proposed regulations provided for the separation of a single business in §1.355-1(a). They interpreted the five-year active conduct requirement accordingly in §1.355-3(b)(3). The final regulations retain these provisions. They redesignate example (10) of §1.355-3(c) of the proposed regulations, which was based on *Commissioner v. Coady,* 289 F.2d 490 (6th Cir. 1961), *aff'g* 33 T.C. 771 (1960), as example (4). They redesignate example (11) of §1.355-3(c) of the proposed regulations, which was based on *United States v. Marett*, 325 F.2d 28 (5th Cir. 1963), as example (5) and revise it to conform more closely to the facts of that case. See examples (4) and (5) of §1.355-3(c) in this document.

(3) *Single or multiple businesses.* In reexamining the active business requirements, Treasury and the Internal Revenue Service recognized that it is often difficult to determine whether a corporation is conducting a single business, which may be separated under section 355 if it has been actively conducted for five years, or multiple businesses, which may be separated from each other under section 355 only if each has been actively conducted for five years. Correlatively, they recognized that it is difficult to determine whether a corporate expenditure for a new activity constitutes the acquisition or creation of a new business or the expansion of an existing business. Accordingly, it is considered to be appropriate to simplify these determinations.

As in *Estate of Lockwood v. Commissioner*, 350 F.2d 712 (8th Cir. 1965), the final regulations provide that, for purposes of the five-year active conduct requirement, a new activity in the same line of business as an activity that has been actively conducted by the distributing corporation for the five-year period preceding the distribution ordinarily will not be considered a separate business. As a result, the distribution of a new activity will more easily satisfy the five-year active conduct requirement. See §1.355-3(b)(3)(ii) in this document.

In example (12) of §1.355-3(c) of the proposed regulations, a department store that was constructed within the preceding five years is separated from a department store business that has been actively conducted for nine years. The separation satisfies the five-year active conduct requirement because the newly constructed department store became part of the existing business. The final regulations revise example (12) and redesignate it as example (7). Example (7) illustrates that the five-year active conduct requirement is met, whether or not the new and old stores are operated as a single unit prior to the separation. The final regulations also add a new example (8) to illustrate that the same result obtains, whether the new activity results from internal corporate expansion or is purchased as a going concern. See examples (7) and (8) of §1.355-3(c) in this document.

(4) *Functional separations.* The proposed regulations provided for the separation of a single business in §1.355-1(a). They interpreted the five-year active conduct requirement accordingly in §1.355-3(b)(3). Examples (8), (9), and (14) of §1.355-3(c) of the proposed regulations presented separations of businesses along functional lines satisfying the active business requirements. These examples are grouped together as examples (9), (10), and (11) in the final regulations. Example (14) of the proposed regulations presented the separation of a research department from a business engaged in the manufacture and sale of household products. The final regulations redesignate example (14) as example (9) and revise it to illustrate that the separation satisfies the active business requirements, whether the research department subsequently provides services only to the business from which it was separated or also to others. See examples (9), (10), and (11) of §1.355-3(c) in this document. It should be noted that functional separations may present evidence of device under §1.355-2(d)(2)-(iv)(C).

(5) *Owner-occupied real estate.* The proposed regulations interpreted the active business requirements to permit functional separations. Commenters noted that, in appropriate cases, the separation of real estate occupied by its owner prior to the distribution ("owner-occupied real estate") should satisfy those requirements. Treasury and the Internal Revenue Service recognize that the separation of owner-occupied real estate may satisfy the active business requirements, but they also recognize that such a separation presents significant tax avoidance opportunities. Accordingly, the final regulations revise §1.355-3(b)(2)(iv)(B) of the proposed regulations to provide that the separation of owner-occupied real estate will be subject to careful scrutiny under the active business requirements. Also, such a separation may be subject to close examination under the related function device factor of §1.355-2(d)(2)(iv)(C).

Examples (4), (5), (6), and (13) of §1.355-3(c) of the proposed regulations presented separations of owner-occupied real estate. The final regulations delete examples (6) and (13). Example (13) is deleted because it is redundant. Example (6) is deleted because it is misleading. Thus, in determining whether the separation of owner-occupied real estate satisfies the active business requirements, it is immaterial whether, prior to the distribution, the real estate is owned by the distributing corporation or by a wholly owned subsidiary. Examples (4) and (5) presented separations of owner-occupied real estate that do and do not satisfy the active business requirements. The final regulations redesignate them as examples (12) and (13). Whether separations of owner-occupied real estate that differ from those presented in these examples satisfy the active business requirements will be decided on a case-by-case basis.

Use Of Section 355 (b) Definition Of Active Conduct Of A Trade Or Business For Purposes Of Section 346(b)

In 26 CFR 1.346-1(c) (revised as of April 1, 1987), the term "active conduct of a trade or business" is given the same meaning for purposes of section 346(b) (as in effect before its amendment by the Tax Equity and Fiscal Responsibility Act of 1982) as the term is given in §1.355-1(c) of the existing regulations. In what was intended merely as a conforming change, the proposed amendments substituted in §1.346-1(c) a reference to the definition of "active conduct of a trade or business" in §1.355-3(b)(2) of the proposed regulations. Treasury and the Internal Revenue Service have decided not to adopt the conforming change at this time.

General Utilities Repeal

The Internal Revenue Service is developing regulations under section 337(d) of the Code that will relate to the distribution of stock, or stock and securities, of a controlled corporation.

New §1.355-6 is reserved for this purpose.

Special Analyses

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Because the notice of proposed rulemaking for these regulations was filed with the Federal Register on January 19, 1977, no regulatory flexibility analysis is required.

* * * * * *

Adoption of amendment to the regulations

Accordingly, 26 CFR Part 1 is amended as follows:

Paragraph 1. The authority citation for Part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805. * * *

Par. 2. A new section 1.355-0 is added to read as follows:

§1.355-0 In order to facilitate the use of §§1.355-1 through 1.355-6, this section lists the paragraphs, subparagraphs, and subdivisions in those sections.

§1.355-1 Distribution of stock and securities of a controlled corporation

(a) *Effective date of certain sections.*

(b) *Application of section.*

§1.355-2 Limitations

(a) *Property distributed.*

(b) *Independent business purpose.*

(1) *Independent business purpose requirement.*

(2) *Corporate business purpose.*

(3) *Business purpose for distribution.*

(4) *Business purpose as evidence of nondevice.*

(5) *Examples.*

(c) *Continuity of interest requirement.*

(1) *Requirement.*

(2) *Examples.*

(d) *Device for distribution of earnings and profits.*

(1) *In general.*

(2) *Device factors.*

(i) *In general.*

(ii) *Pro rata distribution.*

(iii) *Subsequent sale or exchange of stock.*

(A) *In general.*

(B) *Sale or exchange negotiated or agreed upon before the distribution.*

(C) *Sale or exchange not negotiated or agreed upon before the distribution.*

(D) *Negotiated or agreed upon before the distribution.*

(E) *Exchange in pursuance of a plan of reorganization.*

(iv) *Nature and use of assets.*

(A) *In general.*

(B) *Assets not used in a trade or business meeting the requirement of section 355 (b).*

(C) *Related function.*

(3) *Nondevice factors.*

(i) *In general.*

(ii) *Corporate business purpose.*

(iii) *Distributing corporation publicly traded and widely held.*

(iv) *Distribution to domestic corporate shareholders.*

(4) *Examples.*

(5) *Transactions ordinarily not considered as a device.*

(i) *In general.*

(ii) *Absence of earnings and profits.*

(iii) *Section 303(a) transactions.*

(iv) *Section 302(a) transactions.*

(v) *Examples.*

(e) *Stock and securities distributed.*

(1) *In general.*

(2) *Additional rules.*

(f) *Principal amount of securities.*

(1) *Securities received.*

(2) *Only stock received.*

(g) *Period of ownership.*

(1) *Other property.*

(2) *Example.*

(h) *Active conduct of a trade or business.*

§1.355-3 Active conduct of a trade or business

(a) *General requirements.*

(1) *Application of section 355.*

(2) *Examples.*

(b) *Active conduct of a trade or business defined.*

(1) *In general.*

(2) *Active conduct or a trade or business immediately after distribution.*

(i) *In general.*

(ii) *Trade or business.*

(iii) *Active conduct.*

(iv) *Limitations.*

(3) *Active conduct for five year period preceding distribution.*

(4) *Special rules for acquisition of a trade or business (Prior to the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988).*

(i) *In general.*

(ii) *Example.*

(iii) *Gain or loss recognized in certain transactions.*

(iv) *Affiliated group.*

(5) *Special rules for acquisition of a trade or business (After the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988).*

(c) *Examples.*

§1.355-4 Non pro rata distributions, etc.

§1.355-5 Records to be kept and information to be filed.

§1.355-6 [Reserved.]

Par. 3. Sections 1.355-1 through 1.355-4 are revised to read as follows:

§1.355-1 Distribution of stock and securities of a controlled corporation.

(a) *Effective date of certain sections.* Sections 1.355-1 through 1.355-4 apply to transactions occurring after February 6, 1989. For transactions occurring on or before that date, see 26 CFR 1.355-1 through 1.355-4 (revised as of April 1, 1987). Sections 1.355-1 through 1.355-4 do not reflect the amendments to section 355 made by the Revenue Act of 1987 and the Technical and Miscellaneous Revenue Act of 1988.

(b) *Application of section.* Section 355 provides for the separation, without recognition of gain or loss to (or the inclusion in income of) the shareholders and security holders, of one or more existing businesses formerly operated, directly or indirectly, by a single corporation (the "distributing corporation"). It applies only to the separation of existing businesses that have been in active operation for at least five years (or a business that has been in active operation for at least five years into separate businesses), and which, in general, have been owned, directly or indirectly, for at least five years by the distributing corporation. A separation is achieved through the distribution by the distributing corporation of stock, or stock and securities, of one or more subsidiaries (the "controlled corporations") to its shareholders with respect to its stock or to its security holders in exchange for its securities. The controlled corporations may be preexisting or newly created subsidiaries.

Throughout the regulations under section 355, the term "distribution" refers to a distribution by the distributing corporation of stock, or stock and securities, of one or more controlled corporations, unless the context indicates otherwise. Section 355 contemplates the continued operation of the business or businesses existing prior to the separation. See §1.355-4 for types of distributions that may qualify under section 355, including pro rata distributions and non pro rata distributions. For purposes of section 355, stock rights and stock warrants are not included in the term "stock and securities."

§1.355-2 Limitations.

(a) *Property distributed.* Section 355 applies to a distribution only if the property distributed consists solely of stock, or stock and securities, of a controlled corporation. If additional property (including an excess principal amount of securities received over securities surrendered) is received, see section 356.

(b) *Independent business purpose* — (1) *Independent business purpose requirement.* Section 355 applies to a transaction only if it is carried out for one or more corporate business purposes. A transaction is carried out for a corporate business purpose if it is motivated, in whole or substantial part, by one or more corporate business purposes. The potential for the avoidance of Federal taxes by the distributing or controlled corporations (or a corporation controlled by either) is relevant in determining the extent to which an existing corporate business purpose motivated the distribution. The principal reason for this business purpose requirement is to provide nonrecognition treatment only to distributions that are incident to readjustments of corporate structures required by business exigencies and that effect only readjustments of continuing interests in property under modified corporate forms. This business purpose requirement is independent of the other requirements under section 355.

(2) *Corporate business purpose.* A corporate business purpose is a real and substantial non Federal tax purpose germane to the business of the distributing corporation, the controlled corporation, or the affiliated group (as defined in §1.355-3(b)(4)(iv)) to which the distributing corporation belongs. A purpose of reducing non Federal taxes is not a corporate business purpose if (i) the transaction will effect a reduction in both Federal and non Federal taxes because of similarities between Federal tax law and the tax law of the other jurisdiction and (ii) the reduction of Federal taxes is greater than or substantially coextensive with the reduction of non Federal taxes. See examples (7) and (8) of paragraph (b)(5) of this section. A shareholder purpose (for example, the personal planning purposes of a shareholder) is not a corporate business purpose. Depending upon the facts of a particular case, however, a shareholder purpose for a transaction may be so nearly coextensive with a corporate business purpose as to preclude any distinction between them. In such a case, the transaction is carried out for one or more corporate business purposes. See example (2) of paragraph (b)(5) of this section.

(3) *Business purpose for distribution.* The distribution must be carried out for one or more corporate business purposes. See example (3) of paragraph (b)(5) of this section. If a corporate business purpose can be achieved through a nontaxable transaction that does not involve the distribution of stock of a controlled corporation and which is neither impractical nor unduly expensive, then, for purposes of paragraph (b)(1) of this section, the separation is not carried out for that corporate business purpose. See examples (3) and (4) of paragraph (b)(5) of this section. For rules with respect to the requirement of a business purpose for a transfer of assets to a controlled corporation in connection with a reorganization described in section 368(a)(1)(D), see §1.368-1(b).

(4) *Business purpose as evidence of nondevice.* The corporate business purpose or purposes for a transaction are evidence that the transaction was not used principally as a device for the distribution of earnings and profits within the meaning of section 355(a)(1)(B). See paragraph (d)(3)(ii) of this section.

(5) *Examples.* The provisions of this paragraph (b) may be illustrated by the following examples:

Example (1). Corporation X is engaged in the production, transportation, and refining of petroleum products. In 1985, X acquires all of the properties of corporation Z, which is also engaged in the production, transportation, and refining of petroleum products. In 1991, as a result of antitrust litigation, X is ordered to divest itself of all of the properties acquired from Z. X transfers those properties to new corporation Y and distributes the stock of Y pro rata to X's shareholders. In view of the divestiture order, the distribution is carried out for a corporate business purpose. See paragraph (b)(1) of this section.

Example (2). Corporation X is engaged in two businesses: the manufacture and sale of furniture and the sale of jewelry. The businesses are of equal value. The outstanding stock of X is owned equally by unrelated individuals A and B. A is more interested in the furniture business, while B is more interested in the jewelry business. A and B decide to split up the businesses and go their separate ways. A and B anticipate that the operations of each business will be enhanced by the separation because each shareholder will be able to devote his undivided attention to the business in which he is more interested and more proficient. Accordingly, X transfers the jewelry business to new corporation Y and distributes the stock of Y to B in exchange for all of B's stock in X. The distribution is carried out for a corporate business purpose, notwithstanding that it is also carried out in part for shareholder purposes. See paragraph (b)(2) of this section.

Example (3). Corporation X is engaged in the manufacture and sale of toys and the manufacture and sale of candy. The shareholders of X wish to protect the candy business from the risks and vicissitudes of the toy business. Accordingly, X transfers the toy business to new corporation Y and distributes the stock of Y to X's shareholders. Under applicable law, the purpose of protecting the candy business from the risks and vicissitudes of the toy business is achieved as soon as X transfers the toy business to Y. Therefore, the distribution is not carried out for a corporate business purpose. See paragraph (b)(3) of this section.

Example (4). Corporation X is engaged in a regulated business in State T. X owns all of the stock of corporation Y, a profitable corporation that is not engaged in a regulated business. Commission C sets the rates that X may charge its customers, based on its total income. C has recently adopted rules according to which the total income of a corporation includes the income of a business if, and only if, the business is operated, directly or indirectly, by the corporation. Total income, for this purpose, includes the income of a wholly owned subsidiary corporation but does not include the income of a parent or "brother/sister" corporation. Under C's new rule, X's total income includes the income of Y, with the result that X has suffered a reduction of the rates that it may charge its customers. It would not be impractical or unduly expensive to create in a nontaxable transaction (such as a transaction qualifying under section 351) a holding company to hold the stock of X and Y. X distributes the stock of Y to X's shareholders. The distribution is not carried out for the purpose of increasing the rates that X may charge its customers because that purpose could be achieved through a nontaxable transaction, the creation of a holding company, that does not involve the distribution of stock of a controlled corporation and which is neither impractical nor unduly expensive. See paragraph (b)(3) of this section.

Example (5). The facts are the same as in example (4), except that C has recently adopted rules according to which the total income of a corporation includes not only the income included in example (3), but also the income of any member of the affiliated group to which the corporation belongs. In order to avoid a reduction in the rates that it may charge its customers, X distributes the stock of Y to X's shareholders. The distribution is carried out for a corporate business purpose. See paragraph (b)(3) of this section.

Example (6). (i) Corporation X owns all of the one class of stock of corporation Y. X distributes the stock of Y pro rata to its five shareholders, all of whom are individuals, for the sole purpose of enabling X and/or Y to elect to become an S corporation. The distribution does not meet the corporate business purpose requirement. See paragraph (b)(1) and (2) of this section.

(ii) The facts are the same as in Example 6(i), except that the business of Y is operated as a division of X. X transfers this division to new corporation Y and distributes the stock of Y pro rata to its shareholders, all of whom are individuals, for the sole purpose of enabling X and/or Y to elect to become an S corporation. The distribution does not meet the corporate business purpose requirement. See paragraph (b)(1) and (2) of this section.

Example (7). The facts are the same as in example (6)(i), except that the distribution is made to enable X to elect to become an S corporation both for Federal tax purposes and for purposes of the income tax imposed by State M. State M has tax law provisions similar to subchapter S of the Internal Revenue Code of 1986. An election to be an S corporation for Federal tax purposes will effect a substantial reduction in Federal taxes that is greater than the reduction of State M taxes pursuant to an election to be an S corporation for State M purposes. The purpose of reducing State M taxes is not a corporate business purpose. The distribution does not meet the corporate business purpose requirement. See paragraph (b)(1) and (2) of this section.

Example (8). The facts are the same as Example (7), except that the distribution also is made to enable *A*, a key employee of Y, to acquire stock of Y without investing in X. A is considered to be critical to the success of Y and he has indicated that he will seriously consider leaving the company if he is not given the opportunity to purchase a significant amount of stock of Y. As a matter of state law, Y could not issue stock to the employee while it was a subsidiary of X. As in Example (7), the purpose of reducing State M taxes is not a corporate business purpose. In order to determine whether the issuance of stock to the key employee, in fact, motivated the distribution of the Y stock, the potential avoidance of Federal taxes is a relevant factor to take into account. If the facts and circumstances establish that the distribution was substantially motivated by the need to issue stock to the employee, the distribution will meet the corporate business purpose requirement.

(c) *Continuity of interest requirement*—(1) *Requirement.* Section 355 applies to a separation that effects only a readjustment of continuing interests in the property of the distributing and controlled corporations. In this regard section 355 requires that one or more persons who, directly or indirectly, were the owners of the enterprise prioı to the distribution or exchange own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. This continuity of interest requirement is independent of the other requirements under section 355.

(2) *Examples.*

Example (1). For more than five years, corporation X has been engaged directly in one business, and indirectly in a different business through its wholly owned subsidiary, S. The businesses are equal in value. At all times, the outstanding stock of X has been owned equally by unrelated individuals A and B. For valid business reasons, A and B cause X to distribute all of the stock of S to B in exchange for all of B's stock in X. After the transaction, A owns all the stock of X and B owns all the stock of S. The continuity of interest requirement is met because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.

Example (2). Assume the same facts as in Example (1), except that pursuant to a plan to acquire a stock interest in X without acquiring, directly or indirectly, an interest in S, C purchased one-half of the X stock owned by A and immediately thereafter X distributed all of the S stock to B in exchange for all of B's stock in X. After the transactions, A owns 50 percent of X and B owns 100 percent of S. The distribution by X of all of the stock of S to B in exchange for all of B's stock in X will satisfy the continuity of interest requirement for section 355 because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.

Example (3). Assume the same facts as in Example (1) and (2), except that C purchased all of the X stock owned by A. After the transactions, neither A nor B own any of the stock of X, and B owns all the stock of S. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, own an amount of stock establishing a continuity of interest in each of X and S after the distribution, *i.e.*, although A and B collectively have retained 50 percent of their equity interest in the former combined enterprise, they have failed to continue to own the minimum stock interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

Example (4). Assume the same facts as in Examples (1) and (2), except that C purchased 80 percent of the X stock owned by A. After the transactions, A owns 20 percent of the stock of X, B owns no X stock, and B owns 100 percent of the S stock. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, have a continuity of interest in each of X and S after the distribution, *i.e.*, although A and B collectively have retained 60 percent of their equity interest in the former combined enterprise, the 20 percent interest of A in X is less than the minimum equity interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

(d) *Device for distribution of earnings and profits*—(1) *In general.* Section 355 does not apply to a transaction used principally as a device for the distribution of the earnings and profits of the distributing corporation, the controlled corporation, or both (a "device"). Section 355 recognizes that a tax-free distribution of the stock of a controlled corporation presents a potential for tax avoidance by facilitating the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of stock of one corporation and the retention of the stock of another corporation. A device can include a transaction that effects a recovery of basis. In this paragraph (d), "exchange" includes transactions, such as redemptions, treated as exchanges under the Code. Generally, the determination of whether a transaction was used principally as a device will be made from all of the facts and circumstances, including, but not limited to, the presence of the device factors specified in paragraph (d)(2) of this section ("evidence of device"), and the presence of the nondevice factors specified in paragraph (d)(3) of this section ("evidence of nondevice"). However, if a transaction is specified in paragraph (d)(5) of this section, then it is ordinarily considered not to have been used principally as a device.

(2) *Device factors*—(i) *In general.* The presence of any of the device factors specified in this subparagraph (2) is evidence of device. The strength of this evidence depends on the facts and circumstances.

(ii) *Pro rata distribution.* A distribution that is pro rata or substantially pro rata among the shareholders of the distributing corporation presents the greatest potential for the avoidance of the dividend provisions of the Code and, in contrast to other types of distributions, is more likely to be used principally as a device. Accordingly, the fact that a distribution is pro rata or substantially pro rata is evidence of device.

(iii) *Subsequent sale or exchange of stock*—(A) *In general.* A sale or exchange of stock of the distributing or the controlled corporation after the distribution (a "subsequent sale or exchange") is evidence of device. Generally, the greater the percentage of the stock sold or exchanged after the distribution, the stronger the evidence of device. In addition, the shorter the period of time between the distribution and the sale or exchange, the stronger the evidence of device.

(B) *Sale or exchange negotiated or agreed upon before the distribution.* A subsequent sale or exchange pursuant to an arrangement negotiated or agreed upon before the distribution is substantial evidence of device.

(C) *Sale or exchange not negotiated or agreed upon before the distribution.* A subsequent sale or exchange not pursuant to an arrangement negotiated or agreed upon before the distribution is evidence of device.

(D) *Negotiated or agreed upon before the distribution.* For purposes of this subparagraph (2), a sale or exchange is always pursuant to an arrangement negotiated or agreed upon before the distribution if enforceable rights to buy or sell existed before the distribution. If a sale or exchange was discussed by the buyer and the seller before the distribution and was reasonably to be anticipated by both parties, then the sale or exchange will ordinarily be considered to be pursuant to an arrangement negotiated or agreed upon before the distribution.

(E) *Exchange in pursuance of a plan of reorganization*. For purposes of this subparagraph (2), if stock is exchanged for stock in pursuance of a plan of reorganization, and either no gain or loss or only an insubstantial amount of gain is recognized on the exchange, then the exchange is not treated as a subsequent sale or exchange, but the stock received in the exchange is treated as the stock surrendered in the exchange. For this purpose, gain treated as a dividend pursuant to sections 356(a)(2) and 316 shall be disregarded.

(iv) *Nature and use of assets*—(A) *In general*. The determination of whether a transaction was used principally as a device will take into account the nature, kind, amount, and use of the assets of the distributing and the controlled corporations (and corporations controlled by them) immediately after the transaction.

(B) *Assets not used in a trade or business meeting the requirement of section 355 (b)*. The existence of assets that are not used in a trade or business that satisfies the requirements of section 355(b) is evidence of device. For this purpose, assets that are not used in a trade or business that satisfies the requirements of section 355(b) include, but are not limited to, cash and other liquid assets that are not related to the reasonable needs of a business satisfying such section. The strength of the evidence of device depends on all the facts and circumstances, including, but not limited to, the ratio for each corporation of the value of assets not used in a trade or business that satisfies the requirements of section 355(b) to the value of its business that satisfies such requirements. A difference in the ratio described in the preceding sentence for the distributing and controlled corporation is ordinarily not evidence of device if the distribution is not pro rata among the shareholders of the distributing corporation and such difference is attributable to a need to equalize the value of the stock distributed and the value of the stock or securities exchanged by the distributees.

(C) *Related function*. There is evidence of device if a business of either the distributing or controlled corporation (or a corporation controlled by it) is (*1*) a "secondary business" that continues as a secondary business for a significant period after the separation, and (*2*) can be sold without adversely affecting the business of the other corporation (or a corporation controlled by it). A secondary business is a business of either the distributing or controlled corporation, if its principal function is to serve the business of the other corporation (or a corporation controlled by it). A secondary business can include a business transferred to a newly-created subsidiary or a business which serves a business transferred to a newly-created subsidiary. The activities of the secondary business may consist of providing property or performing services. Thus, in example (11) of §1.355-3(c), evidence of device would be presented if the principal function of the coal mine (satisfying the requirements of the steel business) continued after the separation and the coal mine could be sold without adversely affecting the steel business. Similarly, in example (10) of §1.355-3 (c), evidence of device would be presented if the principal function of the sales operation after the separation is to sell the output from the manufacturing operation and the sales operation could be sold without adversely affecting the manufacturing operation.

(3) *Nondevice factors*—(i) *In general*. The presence of any of the nondevice factors specified in this subparagraph (3) is evidence of nondevice. The strength of this evidence depends on all of the facts and circumstances.

(ii) *Corporate business purpose*. The corporate business purpose for the transaction is evidence of nondevice. The stronger the evidence of device (such as the presence of the device factors specified in paragraph (d)(2) of this section), the stronger the corporate business purpose required to prevent the determination that the transaction was used principally as a device. Evidence of device presented by the transfer or retention of assets not used in a trade or business that satisfies the requirements of section 355(b) can be outweighed by the existence of a corporate business purpose for those transfers or retentions. The assessment of the strength of a corporate business purpose will be based on all of the facts and circumstances, including, but not limited to, the following factors:

(A) The importance of achieving the purpose to the success of the business;

(B) The extent to which the transaction is prompted by a person not having a proprietary interest in either corporation, or by other outside factors beyond the control of the distributing corporation; and

(C) The immediacy of the conditions prompting the transaction.

(iii) *Distributing corporation publicly traded and widely held*. The fact that the distributing corporation is publicly traded and has no shareholder who is directly or indirectly the beneficial owner of more than five percent of any class of stock is evidence of nondevice.

(iv) *Distribution to domestic corporate shareholders*. The fact that the stock of the controlled corporation is distributed to one or more domestic corporations that, if section 355 did not apply, would be entitled to a deduction under section 243(a)(1) available to corporations meeting the stock ownership requirements of section 243(c), or a deduction under section 243(c)(2) or (3) or 245(b) is evidence of nondevice.

(4) *Examples*. The provisions of paragraph (d)(1) through (3) of this section may be illustrated by the following examples:

Example (1). Individual A owns all of the stock of corporation X, which is engaged in the warehousing business. X owns all of the stock of corporation Y, which is engaged in the transportation business. X employs individual B, who is extremely knowledgeable of the warehousing business in general and the operations of X in particular. B has informed A that he will seriously consider leaving the company if he is not given the opportunity to purchase a significant amount of stock of X. Because of his knowledge and experience, the loss of B would seriously damage the business of X. B cannot afford to purchase any significant amount of stock of X as long as X owns Y. Accordingly, X distributes the stock of Y to A and A subsequently sells a portion of his X stock to B. However, X could have issued additional shares to B sufficient to give B an equivalent ownership interest in X. There is no other evidence of device or evidence of nondevice. In light of the fact that X could have issued additional shares to B, the sale of X stock by A is substantial evidence of device. The transaction is considered to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iii)(A)(B) and (D), and (3)(i) and (ii) of this section.

Example (2). Corporation X owns and operates a fast food restaurant in State M and owns all of the stock of corporation Y, which owns and operates a fast food restaurant in State N. X and Y operate their businesses under franchises granted by D and E, respectively. X owns cash and marketable securities that exceed the reasonable needs of its business but whose value is small relative to the value of its business. E has recently changed its franchise policy and will no longer grant or renew franchises to subsidiaries (or other members of the same affiliated group) of corporations operating businesses under franchises granted by its competitors. Thus, Y will lose its franchise if it remains a subsidiary of X. The franchise is about to expire. Accordingly, X distributes the stock of Y pro rata among X's shareholders. X retains its business and transfers cash and marketable securities to Y in an amount proportional to the value of Y's business. There is no other evidence of device or evidence of nondevice. The transfer by X to Y and the retention by X of cash and marketable securities is relatively weak evidence of device because after the transfer X and Y hold cash and marketable securities in amounts proportional to the values of their businesses. The fact that the distribution is pro rata is evidence of device. A strong corporate business purpose is relatively strong evidence of nondevice. Accordingly, the transaction is considered not to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iv)(A), and (B) and (3)(i) and (ii)(A), (B), and (C) of this section.

Example (3). Corporation X is engaged in a regulated business in State M and owns all of the stock of corporation Y, which is not engaged in a regulated business in State M. State M has recently amended its laws to provide that affiliated corporations operating in M may not conduct both regulated and unregulated businesses. X transfers cash not related to the reasonable needs of the business of X or Y to Y and then distributes the stock of Y pro rata among X's shareholders. As a result of the transfer of cash, the ratio of the value of its assets not used in a trade or business that satisfies the requirements of section 355(b) to the value of its business is substantially greater for Y than for X. There is no other evidence of device or evidence of nondevice. The transfer of cash by X to Y is relatively strong evidence of device because after the transfer Y holds disproportionately many assets that are not used in a trade or business that satisfies the requirements of section 355(b). The fact that the distribution is pro rata is evidence of device. The strong business purpose is relatively strong evidence of nondevice, but it does not pertain to the transfer. Accordingly, the transaction is considered to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iv)(A) and (B), and (3)(i) and (ii) of this section.

Example (4). The facts are the same as in example (3), except that, instead of transferring cash to Y, X purchases operating assets unrelated to the business of Y and transfers them to Y prior to the distribution. There is no other evidence of device or evidence of nondevice. The transaction is considered to have been used principally as a device. See paragraph (d)(1), (2)(ii), (iv)(A) and (B), and (3)(i) and (ii) of this section.

(5) *Transactions ordinarily not considered as a device*—(i) *In general.* This subparagraph (5) specifies three distributions that ordinarily do not present the potential for tax avoidance described in paragraph (d)(1) of this section. Accordingly, such distributions are ordinarily considered not to have been used principally as a device, notwithstanding the presence of any of the device factors described in paragraph (d)(2) of this section. A transaction described in paragraph (d)(5)(iii) or (iv) of this section is not protected by this subparagraph (5) from a determination that it was used principally as a device if it involves the distribution of the stock of more than one controlled corporation and facilitates the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of stock of one corporation and the retention of the stock of another corporation.

(ii) *Absence of earnings and profits.* A distribution is ordinarily considered not to have been used principally as a device if—

(A) The distributing and controlled corporations have no accumulated earnings and profits at the beginning of their respective taxable years,

(B) The distributing and controlled corporations have no current earnings and profits as of the date of the distribution, and

(C) No distribution of property by the distributing corporation immediately before the separation would require recognition of gain resulting in current earnings and profits for the taxable year of the distribution.

(iii) *Section 303(a) transactions.* A distribution is ordinarily considered not to have been used principally as a device if, in the absence of section 355, with respect to each shareholder distributee, the distribution would be a redemption to which section 303(a) applied.

(iv) *Section 302(a) transactions.* A distribution is ordinarily considered not to have been used principally as a device if, in the absence of section 355, with respect to each shareholder distributee, the distribution would be a redemption to which section 302(a) applied. For purposes of the preceding sentence, section 302(c)(2)(A)(ii) and (iii) shall not apply.

(v) *Examples.* The provisions of this subparagraph (5) may be illustrated by the following examples:

Example (1). The facts are the same as in example (3) of paragraph (d)(4) of this section, except that X and Y had no accumulated earnings and profits at the beginning of its taxable year, X and Y have no current earnings and profits as of the date of the distribution, and no distribution of property by X immediately before the separation would require recognition of gain that would result in earnings and profits for the taxable year of the distribution. The transaction is considered not to have been used principally as a device. See paragraph (d)(5)(i) and (ii) of this section.

Example (2). Corporation X is engaged in three businesses: a hotel business, a restaurant business, and a rental real estate business. Individuals A, B, and C own all of the stock of X. X transfers the restaurant business to new corporation Y and transfers the rental real estate business to new corporation Z. X then distributes the stock of Y and Z pro rata between B and C in exchange for all of their stock in X. In the absence of section 355, the distribution would be a redemption to which section 302(a) applied. Since this distribution involves the stock of more than one controlled corporation and facilitates the avoidance of the dividend provisions of the Code through the subsequent sale or exchange of stock in one corporation and the retention of the stock of another corporation, it i not protected by paragraph (d)(5)(i) and (iv) of this section from a determination that it was used principally as a device. Thus, the determination of whether the transaction was used principally as a device must be made from all the facts and circumstances, including the presence of the device factors and nondevice factors specified in paragraph (d)(2) and (3) of this section.

(e) *Stock and securities distributed*—(1) *In general.* Section 355 applies to a distribution only if the distributing corporation distributes—

(i) All of the stock and securities of the controlled corporation that it owns, or

(ii) At least an amount of the stock of the controlled corporation that constitutes control as defined in section 368(c). In such a case, all, or any part, of the securities of the controlled corporation may be distributed, and paragraph (e)(2) of this section shall apply.

(2) *Additional rules.* Where a part of either the stock or the securities of the controlled corporation is retained under paragraph (e)(1)(ii) of this section, it must be established to the satisfaction of the Commissioner that the retention by the distributing corporation was not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax. Ordinarily, the corporate business purpose or purposes for the distribution will require the distribution of all of the stock and securities of the controlled corporation. If the distribution of all of the stock and securities of a controlled corporation would be treated to any extent as a distribution of "other property" under section 356, this fact tends to establish that the retention of stock or securities is in pursuance of a plan having as one of its principal purposes the avoidance of Federal income tax.

(f) *Principal amount of securities*—(1) *Securities received.* Section 355 does not apply to a distribution if, with respect to any shareholder or security holder, the principal amount of securities received exceeds the principal amount of securities surrendered, or securities are received but no securities are surrendered. In such cases, see section 356.

(2) *Only stock received.* If only stock is received in a distribution to which section 355(a)(1)(A) applies, the principal amount of the securities surrendered, if any, and the par value or stated value of the stock surrendered, if any, are not relevant to the application of that section.

(g) *Period of ownership*—(1) *Other property.* For purposes of section 355(a)(1)(A), stock of a controlled corporation acquired in a transaction in which gain or loss was recognized in whole or in part (other than a transaction described in §1.355-3(b)(4)(iii)) within the five-year period ending on the date of the distribution shall not be treated as stock of the controlled corporation but shall be treated as "other property." See section 356. However, for purposes of section 355(a)(1)(D), the stock so acquired is stock of the controlled corporation.

(2) *Example*. Paragraph (g) (1) of this section may be illustrated by the following example:

Example. Corporation X has held 85 of the 100 outstanding shares of the stock of corporation Y for more than five years on the date of the distribution. Six months before that date, X purchased ten more shares. If X distributes all of its 95 shares of the stock of Y, so much of section 356 as relates to section 355 may apply to the transaction and the ten newly acquired shares are treated as other property. On the other hand, if X retains ten of the shares of the stock of Y then the application of paragraph (e) of this section must take into account all of the stock of Y, including the ten shares newly acquired by X and the five shares owned by others. Similarly, if, by the use of any agency, X acquired any of the stock of Y within the five-year period ending on the date of the distribution in a transaction in which gain or loss was recognized in whole or in part (for example, where another subsidiary of X purchased stock of Y), then that stock is treated as other property. If X had held only 75 of the 100 outstanding shares of the stock of Y for more than five years on the date of the distribution and had purchased the remaining 25 shares six months before that date, then neither section 355 nor section 356 would apply to the distribution.

(h) *Active conduct of a trade or business*. Section 355 applies to a distribution only if the requirements of §1.355-3 (relating to the active conduct of a trade or business) are satisfied.

§1.355-3 Active conduct of a trade or business.

(a) *General requirements*—(1) *Application of section 355*. Under section 355(b)(1), a distribution of stock, or stock and securities, of a controlled corporation qualifies under section 355 only if—

(i) The distributing and the controlled corporations are each engaged in the active conduct of a trade or business immediately after the distribution (section 355(b)(1)(A)), or

(ii) Immediately before the distribution, the distributing corporation had no assets other than stock or securities of the controlled corporations, and each of the controlled corporations is engaged in the active conduct of a trade or business immediately after the distribution (section 355(b)(1)(B)). A *de minimis* amount of assets held by the distributing corporation shall be disregarded for purposes of this paragraph (a)(1)(ii).

(2) *Examples*. Paragraph (a) (1) of this section may be illustrated by the following examples:

Example (1). Prior to the distribution, corporation X is engaged in the active conduct of a trade or business and owns all of the stock of corporation Y, which also is engaged in the active conduct of a trade or business. X distributes all of the stock of Y to X's shareholders, and each corporation continues the active conduct of its trade or business. The active business requirement of section 355(b)(1)(A) is satisfied.

Example (2). The facts are the same as in example (1), except that X transfers all of its assets other than the stock of Y to a new corporation in exchange for all of the stock of the new corporation and then distributes the stock of both controlled corporations to X's shareholders. The active business requirement of section 355(b)(1)(B) is satisfied.

(b) *Active conduct of a trade or business defined*—(1) *In general*. Section 355(b)(2) provides rules for determining whether a corporation is treated as engaged in the active conduct of a trade or business for purposes of section 355(b)(1). Under section 355(b)(2)(A), a corporation is treated as engaged in the active conduct of a trade or business if it is itself engaged in the active conduct of a trade or business or if substantially all of its assets consist of the stock, or stock and securities, of a corporation or corporations controlled by it (immediately after the distribution) each of which is engaged in the active conduct of a trade or business.

(2) *Active conduct of a trade or business immediately after distribution*—(i) *In general*. For purposes of section 355(b), a corporation shall be treated as engaged in the "active conduct of a trade or business" immediately after the distribution if the assets and activities of the corporation satisfy the requirements and limitations described in paragraph (b)(2)(ii), (iii), and (iv) of this section.

(ii) *Trade or business*. A corporation shall be treated as engaged in a trade or business immediately after the distribution if a specific group of activities are being carried on by the corporation for the purpose of earning income or profit, and the activities included in such group include every operation that forms a part of, or a step in, the process of earning income or profit. Such group of activities ordinarily must include the collection of income and the payment of expenses.

(iii) *Active conduct*. For purposes of section 355(b), the determination whether a trade or business is actively conducted will be made from all of the facts and circumstances. Generally, the corporation is required itself to perform active and substantial management and operational functions. Generally, activities performed by the corporation itself do not include activities performed by persons outside the corporation, including independent contractors. A corporation may satisfy the requirements of this subdivision (iii) through the activities that it performs itself, even though some of its activities are performed by others. Separations of real property all or substantially all of which is occupied prior to the distribution by the distributing or the controlled corporation (or by any corporation controlled directly or indirectly by either of those corporations) will be carefully scrutinized with respect to the requirements of section 355(b) and this §1.355-3.

(iv) *Limitations*. The active conduct of a trade or business does not include—

(A) The holding for investment purposes of stock, securities, land, or other property, or

(B) The ownership and operation (including leasing) of real or personal property used in a trade or business, unless the owner performs significant services with respect to the operation and management of the property.

(3) *Active conduct for five-year period preceding distribution*. Under section 355(b)(2)(B), a trade or business that is relied upon to meet the requirements of section 355(b) must have been actively conducted throughout the five-year period ending on the date of the distribution. For purposes of this subparagraph (3)—

(i) activities which constitute a trade or business under the tests described in paragraph (b)(2) of this section shall be treated as meeting the requirement of the preceding sentence if such activities were actively conducted throughout the 5-year period ending on the date of distribution, and

(ii) the fact that a trade or business underwent change during the five-year period preceding the distribution (for example, by the addition of new or the dropping of old products, changes in production capacity, and the like) shall be disregarded, provided that the changes are not of such a character as to constitute the acquisition of a new or different business. In particular, if a corporation engaged in the active conduct of one trade or business during that five-year period purchased, created, or otherwise acquired another trade or business in the same line of business, then the acquisition of that other business is ordinarily treated as an expansion of the original business, all of which is treated as having been actively conducted during that five-year period, unless that purchase, creation, or other acquisition effects a change of such a character as to constitute the acquisition of a new or different business.

(4) *Special rules for acquisition of a trade or business (Prior to the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988)*—(i) *In general.* Under section 355(b)(2)(C), a trade or business relied upon to meet the requirements of section 355(b) must not have been acquired by the distributing corporation, the controlled corporation, or another member of the affiliated group during the five-year period ending on the date of the distribution unless it was acquired in a transaction in which no gain or loss was recognized. Similarly, under section 355(b)(2)(D), the trade or business must not have been indirectly acquired by any of those corporations (or a predecessor in interest of any of those corporations) during that five-year period in a transaction in which gain or loss was recognized in whole or in part and which consisted of the acquisition of control of the corporation directly engaged in the trade or business, or the indirect acquisition of control of that corporation through the direct or indirect acquisition of control of one or more other corporations. A trade or business acquired, directly or indirectly, within the five-year period ending on the date of the distribution in a transaction in which the basis of the assets acquired was not determined in whole or in part by reference to the transferor's basis does not qualify under section 355(b)(2), even though no gain or loss was recognized by the transferror.

(ii) *Example.* Paragraph (b)(4)(i) of this section may be illustrated by the following example:

Example. In 1985, corporation X, which operates a business and has cash and other liquid assets, purchases all of the stock of corporation Y, which is engaged in the active conduct of a trade or business. Later in the same year, X merges into Y in a "downstream" statutory merger. In 1986, Y transfers the business assets formerly owned by X to a new subsidiary, corporation Z, and then distributes the stock of Z to Y's shareholders. Section 355 does not apply to the distribution of the stock of Z because the trade or business of Y was indirectly acquired by X, a predecessor in interest of Y, during the five-year period preceding the distribution.

(iii) *Gain or loss recognized in certain transactions.* The requirements of section 355(b)(2)(C) and (D) are intended to prevent the direct or indirect acquisition of a trade or business by a corporation in anticipation of a distribution by the corporation of that trade of business in a distribution to which section 355 would otherwise apply. A direct or indirect acquisition of a trade or business by one member of an affiliated group from another member of the group is not the type of transaction to which section 355 (b)(2)(C) and (D) is intended to apply. Therefore, in applying section 355 (b)(2)(C) or (D), such an acquisition, even though taxable, shall be disregarded.

(iv) *Affiliated group.* For purposes of this subparagraph (4), the term "affiliated group" means an affiliated group as defined in section 1504(a) (without regard to section 1504(b)), except that the term "stock" includes nonvoting stock described in section 1504(a)(4).

(5) *Special rules for acquisition of a trade or business (After the Revenue Act of 1987 and Technical and Miscellaneous Revenue Act of 1988).* [Reserved]

(c) *Examples.* The following examples illustrate section 355(b)(2)(A) and (B) and paragraph (b)(1), (2), and (3) of this section. However, a transaction that satisfies these active business requirements will qualify under section 355 only if it satisfies the other requirements of section 355(a) and (b).

Example (1). Corporation X is engaged in the manufacture and sale of soap and detergents and also owns investment securities. X transfers the investment securities to new subsidiary Y and distributes the stock of Y to X's shareholders. Y does not satisfy the requirements of section 355(b) because the holding of investment securities does not constitute the active conduct of a trade or business. See paragraph (b)(2)(iv)(A) of this section.

Example (2). Corporation X owns, manages, and derives rental income from an office building and also owns vacant land. X transfers the land to new subsidiary Y and distributes the stock of Y to X's shareholders. Y will subdivide the land, install streets and utilities, and sell the developed lots to various homebuilders. Y does not satisfy the requirements of section 355(b) because no significant development activities were conducted with respect to the land during the five-year period ending on the date of the distribution. See paragraph (b)(3) of this section.

Example (3). Corporation X owns land on which it conducts a ranching business. Oil has been discovered in the area, and it is apparent that oil may be found under the land on which the ranching business is conducted. X has engaged in no significant activities in connection with its mineral rights. X transfers its mineral rights to new subsidiary Y and distributes the stock of Y to X's shareholders. Y will actively pursue the development of the oil producing potential of the property. Y does not satisfy the requirements of section 355(b) because X engaged in no significant exploitation activities with respect to the mineral rights during the five-year period ending on the date of the distribution. See paragraph (b)(3) of this section.

Example (4). For more than five years, corporation X has conducted a single business of constructing sewage disposal plants and other facilities. X transfers one half of its assets to new subsidiary Y. These assets include a contract for the construction of a sewage disposal plant in State M, construction equipment, cash, and other tangible assets. X retains a contract for the construction of a sewage disposal plant in State N, construction equipment, cash, and other intangible assets. X then distributes the stock of Y to one of X's shareholders in exchange for all of his stock of X. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section.

Example (5). For the past six years, corporation X has owned and operated two factories devoted to the production of edible pork skins. The entire output of one factory is sold to one customer, C, while the output of the second factory is sold to C and a number of other customers. To eliminate errors in packaging, X opens a new factory. Thereafter, orders from C are processed and packaged at the two original factories, while the new factory handles only orders from other customers. Eight months after opening the new factory, X transfers it and related business assets to new subsidiary Y and distributes the stock of Y to X's shareholders. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) and (ii) of this section.

Example (6). Corporation X has owned and operated a men's retail clothing store in the downtown area of the City of G for nine years and has owned and operated another men's retail clothing store in a suburban area of G for seven years. X transfers the store building, fixtures, inventory, and other assets related to the operations of the suburban store to new subsidiary Y. X also transfers to Y the delivery trucks and delivery personnel that formerly served both stores. Henceforth, X will contract with a local public delivery service to make its deliveries. X retains the warehouses that formerly served both stores. Henceforth, Y will lease warehouse space from an unrelated public warehouse company. X then distributes the stock of Y to X's shareholders. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section.

Example (7). For the past nine years, corporation X has owned and operated a department store in the downtown area of the City of G. Three years ago, X acquired a parcel of land in a suburban area of G and constructed a new department store on it. X transfers the suburban store and related business assets to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, each store has its own manager and is operated independently of the other store. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) and (ii) of this section.

Example (8). For the past six years, corporation X has owned and operated hardware stores in several states. Two years ago, X purchased all of the assets of a hardware store in State M, where X had not previously conducted business. X transfers the State M store and related business assets to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, the State M store has its own manager and is operated independently of the other stores. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) and (ii) of this section.

Example (9). For the past eight years, corporation X has engaged in the manufacture and sale of household products. Throughout this period, X has maintained a research department for use in connection with its manufacturing activities. The research department has 30 employees actively engaged in the development of new products. X transfers the research department to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, Y continues its research operations on a contractual basis with several corporations, including X. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section. The result in this example is the same if, after the distribution, Y continues its research operations but furnishes its services only to X. See paragraph (b)(3)(i) of this section. However, see §1.355-2(d)(2)(iv)(C) (related function device factor) for possible evidence of device.

Example (10). For the past six years, corporation X has processed and sold meat products. X derives income from no other source. X separates the sales function from the processing function by transferring the business assets related to the sales function and cash for working capital to new subsidiary Y. X then distributes the stock of Y to X's shareholders. After the distribution, Y purchases for resale the meat products processed by X. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section. However, see §1.355-2(d)(2)(iv)(C) (related function device factor) for possible evidence of device.

Example (11). For the past eight years, corporation X has been engaged in the manufacture and sale of steel and steel products. X owns all of the stock of corporation Y, which, for the past six years, has owned and operated a coal mine for the sole purpose of supplying X's coal requirements in the manufacture of steel. X distributes the stock of Y to X's shareholders. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3)(i) of this section. However, see §1.355-2(d)(2)(iv)(C) (related function device factor) for possible evidence of device.

Example (12). For the past seven years, corporation X, a bank, has owned an eleven-story office building, the ground floor of which X has occupied in the conduct of its banking business. The remaining ten floors are rented to various tenants. Throughout this seven-year period, the building has been managed and maintained by employees of the bank. X transfers the building to new subsidiary Y and distributes the stock of Y to X's shareholders. Henceforth, Y will manage the building, negotiate leases, seek new tenants, and repair and maintain the building. X and Y both satisfy the requirements of section 355(b). See paragraph (b)(3) of this section.

Example (13). For the past nine years, corporation X, a bank, has owned a two-story building, the ground floor and one half of the second floor of which X has occupied in the conduct of its banking business. The other half of the second floor has been rented as storage space to a neighboring retail merchant. X transfers the building to new subsidiary Y and distributes the stock of Y to X's shareholders. After the distribution, X leases from Y the space in the building that it formerly occupied. Under the lease, X will repair and maintain its portion of the building and pay property taxes and insurance. Y does not satisfy the requirements of section 355(b) because it is not engaged in the active conduct of a trade or business immediately after the distribution. See paragraph (b)(2)(iv)(A) of this section. This example does not address the question of whether the activities of X with respect to the building prior to the separation would constitute the active conduct of a trade or business.

§1.355-4 Non pro rata distributions, etc.

Section 355 provides for nonrecognition of gain or loss with respect to a distribution whether or not (a) the distribution is pro rata with respect to all of the shareholders of the distributing corporation, (b) the distribution is pursuant to a plan of reorganization within the meaning to section 368(a)(1)(D), or (c) the shareholder surrenders stock in the distributing corporation. Under section 355, the stock of a controlled corporation may consist of common stock or preferred stock. (See, however, section 306 and the regulations thereunder.) Section 355 does not apply, however, if the substance of a transaction is merely an exchange between shareholders or security holders of stock or securities in one corporation for stock or securities in another corporation. For example, if two individuals, A and B, each own directly 50 percent of the stock of corporation X and 50 percent of the stock of corporation Y, section 355 would not apply to a transaction in which A and B transfer all of their stock of X and Y to a new corporation Z, for all of the stock of Z, and Z then distributes the stock of X to A and the stock of Y to B.

Par. 4. A new section 1.355-6 is added to read as follows:

§1.355-6 Certain distributions qualifying under section 355 made ineligible for nonrecognition of gain to the distributing corporation under 337(d). [RESERVED]

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved December 15, 1988

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

26 CFR 1.355-3: Active conduct of a trade or business.

Active conduct of a trade or business; oil and gas. A nonoperator owner of working interests in oil and gas properties satisfies the active conduct of a trade or business requirement of section 355(b) of the Code under certain circumstances.

Rev. Rul. 89-27

ISSUE

Can a corporation that is a nonoperator owner of working interests in oil and gas properties satisfy the active conduct of a trade or business requirement of section 355(b) of the Internal Revenue Code?

FACTS

For more than 5 years, *X*, a domestic corporation, has been engaged directly and through its subsidiaries in the exploration, development, production and marketing of petroleum products.

Y is a domestic corporation engaged, as discussed below, in the oil and gas business in state *Z*. All of the stock of *Y* has been owned by *X* for more than 5 years. The activities of *Y* are performed by its employees. *Y* employs, on a full time basis, geologists, petroleum engineers, accountants and other employees necessary to conduct its business.

Y is in constant search for properties that may yield commercial quantities of oil and gas and has, in previous years, acquired nonoperator working interests in such properties.

As an owner of a working interest, *Y* participates in deciding whether to develop the property. This requires extensive gathering and analyzing of technical data by *Y*. Once a decision is made to develop any property, *Y* enters into a standard form operating agreement with other owners of working interests in the property.

Under the agreement, one working interest owner (other than *Y*) is designated as operator and generally supervises the daily activities involved in development and production. *Y* pays its pro rata share of costs of development and expenses of operations involving the property. In addition, *Y* meaningfully participates in management decisions, inspects the drilling site to determine if the drilling operations conform to the agreement, and analyzes data obtained from drillsite activities. *Y* also participates in deciding the location and depth of the wells to be drilled and whether to drill a new well, deepen an old well, and to abandon a well. Although the operating agreement reserves the right to *Y* to take the production in kind, *Y* typically authorizes an agent to market the production. *Y* has derived substantial revenue from its oil and gas operations during the last 5 years.

For valid business reasons, *X* proposes to distribute pro-rata to its shareholders all of the shares of *Y*. Thereafter, *Y* will continue its present operations, including the acquisition of additional working interests in new properties.

Except for the question here at issue concerning the active conduct of a trade or business requirement of section 355(b) of the Code, the distribution by *X* of the *Y* shares meets all of the other requirements of section 355 and the regulations thereunder.

LAW AND ANALYSIS

Section 355 of the Code provides rules for the distribution of stock of a corporation controlled by the distributing corporation without recognition of gain or loss to the shareholders. For such treatment, section 355(b)(1)(A) requires that both the distributing corporation and the controlled corporation must be engaged in the active conduct of a trade or business. Section 355(b)(2)(B) provides that a corporation will be treated as engaged in the active conduct of a trade or business only if such trade or business has been actively conducted throughout the 5-year period ending on the date of distribution.

Section 1.355-3(b)(2)(ii) of the Income Tax Regulations, in defining "trade or business" for section 355 purposes, provides that a trade or business consists of a specific existing group of activities being carried on for the purpose of earning income or profit from such group of activities, and the activities included in such group must include every operation which forms a part of, or a step in, the process of earning income or profit. Such group of activities ordinarily must include the collection of income and the payment of expenses.

In defining "active conduct" of a trade or business the regulations indicate that in order for a trade or business to be actively conducted, substantial management and operational activities generally must be directly carried on by the corporation itself and such activities generally do not include the activities of others outside the corporation, including independent contractors. However, the fact that a portion of a corporation's business activities is performed by others will not preclude the corporation from being engaged in the active conduct of a trade or business if the corporation itself directly performs active and substantial management and operational functions. Section 1.355-3(b)(2)(iii) of the regulations.

In Revenue Ruling 73-237, 1973-1 C.B. 184, a corporation's direct performance of substantial management and operational activities, apart from those activities performed by independent contractors, was held to satisfy the active conduct of a trade or business requirement of section 355(b) of the Code.

A determination whether a trade or business is actively conducted for purposes of section 355(b) is based on all the facts and circumstances. In the instant case, *Y's* business activities include its direct performance of active and substantial management and operational functions, apart from those activities performed by others. Section 1.355-3(b)(2)(iii) of the regulations; Rev. Rul. 73-237; *also see* Rev. Rul. 73-234, 1973-1 C.B. 180; *compare* Rev. Rul. 73-236, 1973-1 C.B. 183.

HOLDING

Under the facts of this case, *Y*, a non-operator owner of working interests in oil and gas properties, is engaged in the active conduct of a trade or business within the meaning of section 355(b) of the Code. Accordingly, the distribution by *X* to its shareholders of the *Y* stock qualifies as a tax-free distribution under section 355(a)(1) of the Code.

---

26 CFR 1.355-4: Active conduct of a trade or business.

Controlled corporation; stock distributing; active business. A corporation purchased all of the stock of another corporation in a transaction in which gain or loss was recognized. Two years later, the acquired corporation distributed the stock of its wholly owned subsidiary, whose stock it had acquired more than five years before that time, to the acquiring corporation. The distribution fails to meet the active trade or business requirement of section 355(b)(2)(D) of the Code, as amended by the Revenue Act of 1987 and the Technical and Miscellaneous Revenue Act of 1988. Rev. Rul. 74-5 obsoleted.

Rev. Rul. 89-37

PURPOSE

This revenue ruling obsoletes Rev. Rul. 74-5, 1974-1 C.B. 82, in light of the amendment of section 355(b)(2)(D) of the Internal Revenue Code by section 10223(b) of the Revenue Act of 1987, Pub. L. No. 100-203, 101 Stat. 1330 (1987) ("Act") and section 2004(k)(1) of the Technical and Miscellaneous Revenue Act of 1988, Pub. L. No. 100-647, 102 Stat. 3342 (1988) ("TMRA").

LAW AND ANALYSIS

Rev. Rul. 74-5 involved a distribution of the stock of a controlled corporation, *Y*, by a distributing corporation, *X*, to *X*'s parent corporation, *P*, 2 years after *P* acquired the stock of *X* for cash in a transaction in which gain or loss was recognized ("first distribution"). At the time of the first distribution, *X* had owned the stock of *Y* for more than 5 years. *P* subsequently distributed the stock of *Y* to its shareholders at a time when it had not owned the stock of *Y* directly or indirectly through *X* for a 5-year period prior to the distribution ("second distribution"). Rev. Rul. 74-5 considered whether the requirements of section 355(b)(2)(D) of the Code were met with regard to each of the distributions, since *P* acquired control of *X* directly and *Y* indirectly in a transaction in which gain or loss was recognized within the 5-year period prior to each of the distributions.

Section 355(b)(2)(D) of the Code, prior to its amendment by the Act and TMRA, provided that control of a corporation that, at the time of acquisition of control, was conducting an active trade or business, must not have been acquired directly (or through one or more corporations) by "another corporation" within the 5-year period described in section 355(b)(2)(B), or if so acquired by "another corporation" within such period, such control must not have been acquired by reason of transactions in which gain or loss was recognized in whole or in part, or acquired by reason of such transactions combined with acquisitions before the beginning of such period. Rev. Rul. 74-5 reasoned that the purpose of section 355(b)(2)(D) was to prevent a distributing corporation from accumulating excess funds to purchase the stock of a corporation having an active business and then immediately distributing such stock to its shareholders. Rev. Rul. 74-5 concluded that the first distribution was not the type of transaction to which section 355(b)(2)(D) of the Code was directed because *P* was merely the shareholder receiving the distribution and not the distributing corporation or the controlled corporation and, therefore, the ruling held that section 355(b)(2)(D) was inapplicable to the first distribution. Rev. Rul. 74-5 further held that the second distribution did not meet the requirements of section 355(b)(2)(D) because the distributing corporation, *P*, indirectly acquired control of the controlled corporation, *Y*, through another corporation, *X*, in a transaction in which gain or loss was recognized within the 5-year period prior to the distribution.

Section 10223(b) of the Act and section 2004(k)(1) of TMRA amended section 355(b)(2)(D) of the Code to provide that a corporation is engaged in the active conduct of a trade or business only if control of a corporation which (at the time of acquisition of control) was conducting such trade or business (i) was not acquired by any distributee corporation directly (or through one or more corporations, whether through the distributing corporation or otherwise) within the 5-year period ending on the date of the distribution, and was not acquired by the distributing corporation directly (or through one or more corporations) within such period, or (ii) was so acquired by any such corporation within such period, but, in each case in which such control was so acquired, it was so acquired only by reason of transactions in which gain or loss was not recognized in whole or in part, or only by reason of such transactions combined with acquisitions before the beginning of such period.

Under section 355(b)(2)(D) of the Code, as amended by section 10223(b) of the Act and section 2004(k)(1) of TMRA, the first distribution described in Rev. Rul. 74-5 is now a transaction described in section 355(b)(2)(D). Therefore, because *Y* was acquired by a distributee corporation within the meaning of section 355(b)(2)(D) in a transaction in which gain or loss was recognized within the 5-year period prior to the distribution, the first distribution fails to meet the active trade or business requirement of section 355(b)(2)(D).

The holding as to the second distribution in Rev. Rul. 74-5 has not been affected by the Act or by TMRA.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 74-5 is obsoleted.

PROSPECTIVE APPLICATION

This revenue ruling is effective for distributions of stock which are subject to the amendments made by section 10223(b) of the Act and section 2004(k)-(1) of TMRA. Under section 10223(d)-(2)(A) of the Act and section 2004(k) of TMRA, the transition rules provide that the amendments do not apply to any distribution after December 15, 1987, and before January 1, 1993, if (1) 80 percent or more of the stock of the distributing corporation was acquired by the distributee before December 15, 1987, or (2) 80 percent or more of the stock of the distributing corporation was acquired by the distributee before January 1, 1989, pursuant to a binding written contract or tender offer in effect on December 15, 1987. For purposes of these transition rules, stock described in section 1504(a)-(4) of the Code is not taken into account.

Subpart D.—Special Rules; Definitions

Section 367.—Foreign Corporations

26 CFR 7.367(b)-2: Definitions.

T.D. 8243

TITLE 26—INTERNAL REVENUE.—CHAPTER 1, SUBCHAPTER A, PART 7—TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976

Requirements Relating to Certain Exchanges Involving a Foreign Corporation

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary Income Tax Regulations concerning requirements relating to certain exchanges involving a foreign corporation as required by section 367(b) of the Internal Revenue Code as enacted by the Tax Reform Act of 1976 [1976-3 C.B. (Vol. 1), 1]. These regulations would provide guidance needed to comply with these requirements. The text of the temporary regulations set forth in this document also serves as the text of proposed regulations that are cross-referenced in * * * [INTL-988-86, page 1024, this Bulletin].

DATES: Section 7.367(b)-2(d) and (f) are effective on January 1, 1978, and applies to exchanges beginning on or after that date. Sections 7.367(b)-7(c)(1) and 7.367(b)-9(b)(4) are effective on March 3, 1989, and apply to transactions beginning on or after that date.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains amendments to §§7.367(b)-2(d) and (f), 7.367(b)-7(c)(1) and 7.367(b)-9(b) of 26 CFR Part 7. Temporary regulations under those sections with cross-reference notice were originally published on December 20, 1977 (42 FR 65152, 65204) [1977-2 C.B. 112].

NEED FOR TEMPORARY REGULATIONS

This Treasury decision with respect to §7.367(b)-2(d) and (f) merely clarifies existing rules in the section 367(b) temporary regulations. With respect to §§7.367(b)-7(c)(1) and 7.367(b)-9(b)(4) this Treasury decision eliminates unintended opportunities available under the existing section 367(b) temporary regulations to avoid liability for income tax. For these reasons, it is found impractical to issue this Treasury decision with notice and public procedure either under section 553(b) of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section. In addition, in order to prevent avoidance by taxpayers of the changes made to §§7.367(b)-7(c)(1) and 7.367-(b)-9(b)(4), it is provided that those changes will be effective on March 3, 1989.

EXPLANATION OF PROVISIONS

Section 7.367(b)-2(d) defines the term "section 1248 amount" to mean the earnings and profits or deficit in earnings and profits which would have been attributed under section 1248 to the stock of the foreign corporation exchanged if the stock had been sold in a transaction to which section 1248(a) applied. Section 7.367(b)-2(f) defines the term "all earnings and profits amount" to mean the earnings and profits or deficit in earnings and profits for all taxable years which are attributable to the stock of the foreign corporation exchanged under the principles of section 1246 or 1248. This section is amended by these regulations to clarify that for purposes of exchanges of stock in a first-tier foreign corporation described by §7.367(b)-7(c)(1)(i) or distributions by a foreign corporation covered by §7.367(b)-10(i) in which an inclusion determined by reference to the "section 1248 amount" is required, the term "section 1248 amount" means only the net positive earnings and profits attributable to stock. For purposes of asset repatriations covered by §§7.367-(b)-5(b), 7.367(b)-6(c), 7.367(b)-7(c)(2) and 7.367(b)-10(j), the term "all earnings and profits amount" means only the net positive earnings and profits. This amendment applies to exchanges beginning on or after January 1, 1978. For all other purposes, the terms "section 1248 amount" and "all earnings and profits amount" mean earnings and profits or deficits for all taxable years attributable to stock. Section 7.367(b)-7(c)(1) is amended by these regulations to provide that the addition procedure of paragraph (c)(1)(ii) will not apply if the stock received is of a domestic corporation which is a member of the affiliated group as defined in section 1504(a) (without application of section 1504(b)(3)) that also includes the exchanging foreign corporation. This amendment applies to exchanges beginning on or after March 3, 1989.

Section 7.367(b)-9 is amended by these regulations to provide that a foreign corporation will not succeed to the earnings and profits or deficit in earnings and profits of another foreign corporation except to the extent provided in section 381(a) and the regulations under that section if the stock of such corporation is received in an exchange subject to section 7.367(b)-9, and a U.S. shareholder described in section 7.367(b)-7(b) or section 7.367(b)-8(c)(1) owns (applying the attribution rules of section 958) more than 50 percent of either the total voting power or the total value of the stock of both the corporation whose stock is received in the exchange and the corporation whose stock is exchanged. This amendment is effective on or after March 3, 1989. Under these regulations, the foreign corporation whose stock is received in the exchange will only succeed to the earnings and profits or deficit in earnings and profits of the acquired corporation and lower-tier subsidiaries of the acquired corporation as provided in section 381(a) and the regulations thereunder.

Post-exchange distributions of earnings and profits and sales of stock may in some circumstances result in double counting of section 1248 earnings. Regulations which will finalize the temporary regulations under section 367(b) will be issued to prevent this double counting of earnings and profits. The regulations with regard to this issue, when finalized, will be retroactive to the effective date of the above amendment.

SPECIAL ANALYSES

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. §553 for temporary regulations. Therefore, these rules do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6) and a Regulatory Flexibility Analysis is not required.

* * * * * *

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 7 is amended as follows:

TEMPORARY INCOME TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1976 (26 CFR Part 7)

Paragraph 1. The authority for Part 7 continues to read as follows:

Authority: 26 U.S.C. 7805. * * * Section 7.367(b)-2 (d) and (f) also issued under 26 U.S.C. 367(b)(2). * * * Section 7.367(b)-7(c)(1) also issued under 26 U.S.C. 367(b)(2) * * * Section 7.367(b)-9(b)(4) also issued under 26 U.S.C. 367(b)(2). * * *

Par. 2. Section 7.367(b)-2 is amended by revising paragraphs (d) and (f) to read as set forth below:

§7.367(b)-2 Definitions.

* * * * * *

(d) *Section 1248 amount.* In the case of an exchange of stock in a first-tier foreign corporation described in §7.367(b)-7(c)(1)(i) or a distribution by a foreign corporation described in §7.367(b)-10(i) in which an inclusion in gross income determined by reference to the "section 1248 amount" is required by those provisions, the term "section 1248 amount" means the net positive earnings and profits which would have been attributable under section 1248 and the regulations under that section to the stock of the foreign corporation exchanged if the stock had been sold in a transaction to which section 1248(a) applied. For all other purposes of this section, in the case of an exchange of stock in a first-tier foreign corporation to which section 367(b) applies, the term "section 1248 amount" means the earnings and profits or deficit in earnings and profits which would have been attributable under section 1248 and the regulations under that section to the stock of the foreign corporation exchanged if the stock had been sold in a transaction to which section 1248(a) applied.

* * * * * *

(f) *All earnings and profits amount.* For purposes of asset repatriations covered by §§7.367(b)-5(b), 7.367-(b)-6(c), 7.367(b)-7(c)(2) and 7.367-(b)-10(j), the term "all earnings and profits amount" means the net positive earnings and profits, if any, for all taxable years which are attributable to the stock of the foreign corporation exchanged under the principles of section 1246 or 1248 (whichever is applicable) and the regulations under that section. For all other purposes, the term "all earnings and profits amount" means the earnings and profits or deficit in earnings and profits for all taxable years which are attributable to the stock of the foreign corporation exchanged under the principles of section 1246 or 1248 (whichever is applicable) and the regulations under that section. The determination shall be made by applying section 1246 or 1248 as modified by §§7.367(b)-2 through 7.367(b)-12 as if there were no distinction in those sections between earnings and profits accumulated before or after December 31, 1962.

* * * * * *

Par. 3. Section 7.367(b)-7(c)(1) is amended as follows:

1. Subdivision (ii) is amended by adding after the second sentence the following sentence "Subdivision (iii) of this paragraph, and not this subdivision (ii), applies if the stock received (A) is of a domestic corporation which is a member of an affiliated group (as defined in section 1504(a), without application of section 1504(b)(3)) that also includes the exchanging foreign corporation as a member, and (B) is not received in an exchange pursuant to which the foreign corporation whose stock is exchanged transfers its assets to a domestic corporation."

2. Subdivision (iii) is redesignated as subdivision (iv) and a new subdivision (iii) is added immediately after subdivision (ii) and before subdivision (iv) to read as follows:

§7.367(b)-7 Exchange of stock described in section 354.

* * * * * *

(c) *Receipt of other stock*—(i) *General rule.*

* * * * * *

(iii) For exchanges beginning after March 3, 1989, if the stock received is described in the last sentence of subdivision (ii), then the foreign corporation whose stock is exchanged will be considered to be a foreign corporation for purposes of section 354 or 356. This subdivision (iii) may be illustrated by the following examples:

Example (1). A U.S. parent corporation (USP) owns all of the stock of a foreign corporation (CFC1), which in turn owns all of the stock of a second foreign corporation (CFC2), which in turn owns all of the stock of a third foreign corporation (CFC3). USP also owns all of the stock of U.S. subsidiary (Subsidiary). CFC2 and CFC3 have accumulated earnings and profits or accumulated deficits in earnings and profits. Subsidiary acquires all of the stock of CFC2 from CFC1 in exchange for stock of Subsidiary in a reorganization described in section 368(a)(1)(B). CFC1 will not recognize gain on the exchange. Moreover, CFC2's and CFC3's accumulated earnings and profits or accumulated deficits in earnings and profits will remain in CFC2 and CFC3, respectively, and will not be added to the earnings and profits account of CFC1.

Example (2). USP owns all of the stock of CFC1, which in turn owns all of the stock of CFC2. USP also owns all of the stock of a U.S. subsidiary (Subsidiary), which in turn owns all of the stock of CFC3. CFC3 acquires the assets of CFC2 in exchange for voting stock of Subsidiary in a reorganization described in section 368(a)(1)(C). Pursuant to the reorganization, CFC2 distributes the stock of Subsidiary to CFC1. CFC1 will not recognize gain on the exchange. In addition, CFC2's accumulated earnings and profits or accumulated deficit in earnings and profits will be added to CFC3's earnings and profits account under section 381(c)(2), subject to the limitations contained in section 381 and in the regulations under that section.

Par. 4. Section 7.367(b)-9 is amended by adding a new paragraph (b)(4) immediately after paragraph (b)(3) to read as follows:

§7.367(b)-9 Attribution of earnings and profits on an exchange described in section 351, 354, or 356.

* * * * * *

(b) *General rule.* * * *

(4) For exchanges beginning on or after March 3, 1989, paragraph (b)(2) and (3) of this section will not apply if a U.S. shareholder described in §7.367(b)-7(b) or §7.367(b)-8(c)(1) owns (applying the attribution rules of section 958) more than 50 percent of either the total voting power or the total value of the stock of both the corporation whose stock is received in the exchange and the corporation whose stock is exchanged. If this paragraph (b)(4) applies, the rules of section 381(a) and the regulations under that section will determine the extent to which the corporation whose stock is received in the exchange (or other acquiring corporation) will succeed to the earnings and profits or a deficit in earnings and profits of the corporation whose stock is exchanged and of lower-tier corporations. This paragraph (b)(4) may be illustrated by the following examples:

Example (1). A U.S. parent owns all of the stock of CFC1 and CFC2. CFC1 has accumulated earnings and profits or an accumulated deficit in earnings and profits. CFC2 acquires all of the stock of CFC1 from the U.S. parent in a reorganization described in section 368(a)(1)(B). CFC2 will not succeed to the earnings and profits or the accumulated deficit in earnings and profits of CFC1.

Example (2). A U.S. parent owns all of the stock of CFC1, which in turn owns all of the stock of CFC2. The U.S. parent also owns all of the stock of CFC3. CFC2 has accumulated earnings and profits or an accumulated deficit in earnings and profits. CFC3 acquires all of the assets of CFC1, including the stock of CFC2, in a reorganization described in section 368(a)(1)(D). CFC3 will not succeed to the earnings and profits or the accumulated deficit in earnings and profits of CFC2.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved January 30, 1989.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on March 3, 1989, 11:08 a.m., and published in the issue of the Federal Register for March 6, 1989, 54 F.R. 9200)

Section 368.—Definitions Relating To Corporate Reorganizations

When, pursuant to a single integrated transaction, a corporation transfers section 38 property to a newly formed subsidiary in year one and distributes its stock in the subsidiary to its shareholders in year two, the disposition of the section 38 property triggering investment credit recapture under section 47(a) of the Code occurs in year one. See Rev. Rul. 89-18, page 14.

26 CFR 1.368-2: Definition of terms.

If a recapitalization that qualifies under section 368(a)(1)(E) increases the value of the stock held by a trust and reduces the value of the stock held by the controlling shareholder, who is the original grantor of the trust, has a gift been made to the trust beneficiaries for federal gift tax purposes, and has an addition to corpus been made for purposes of the generation-skipping transfer tax? See Rev. Rul. 89-3, page 278.

Part V.—Carryovers

Section 381.—Carryovers in Certain Corporate Acquisitions

26 CFR 1.381(c)(1)-1: Net operating loss carryovers in certain corporate acquisitions.

After a consolidation of the common parents of two unrelated affiliated groups described in section 368(a)(1)(A) of the Code, to what extent may the transferor corporations carry back consolidated net operating losses that are attributable to the newly formed common parent corporation. See Rev. Rul. 89-80, page 273.

Section 382.—Limitation on Net Operating Loss Carryforwards and Certa Built-In Losses Following Ownersh Change

The adjusted federal long-term rate is set for for the month of April 1989. See Rev. Rul. 89-3 page 264.

The adjusted federal long-term rate is set for for the month of May 1989. See Rev. Rul. 89-6 page 265.

The adjusted federal long-term rate is set for for the month of June 1989. See Rev. Rul. 89-7 page 266.

Subchapter D.—Deferred Compensation, etc.

Part I.—Pension, Profit-Sharing, Stock Bonus Plans, et

Subpart A.—General Rule

Section 401.— Qualified Pensior Profit-Sharing, and Stock Bonus Plans

Final guidelines for determining whether a fast vesting rate than would otherwise be required appropriate for advance determination purposes d to actual or potential discrimination in favor of high compensated employees. See Rev. Proc. 89-29, pa 893.

26 CFR 1.401-1: Qualified pension, profit-shari and stock bonus plans.

Qualification; participants right t exercise control of assets. A plan do not qualify under section 401(a) of t Code where plan participants have t right to acquire, hold and dispose of a amount attributable to their account ba ances in the plan.

Rev. Rul. 89-52

ISSUE

Did a written instrument create qualified trust under section 401(a) of t Internal Revenue Code if participar have the right to acquire, hold and d pose of amounts attributable to their account balances in the plan?

FACTS

An employer adopted a written instrument intended to be a trust forming part of a qualified defined contribution plan. The instrument permits a participant to hold an amount equal to his account balance in the plan. Thus, a participant may invest or reinvest the amounts as the participant determines is appropriate. However, the participant must segregate such investments from such funds and periodically account for them to the trustee named in the instrument. Furthermore, the participant must return the investments to the trustee upon separation from service to be used to provide retirement benefits for the participant.

LAW AND ANALYSIS

Section 401(a) of the Code provides that a trust created or organized in the United States and forming part of a stock bonus, pension or profit-sharing plan of an employer will constitute a qualified trust if certain conditions are met.

Section 1.401-1(a)(3) of the Income Tax Regulations provides that a qualified trust under section 401(a) of the Code must be created or organized in the United States and must be maintained at all times as a domestic trust in the United States.

The term "trust" is not a term of art or of fixed content, and its meaning for the purposes of employee trusts under section 401(a) of the Code is not necessarily the same as under state law or as under other sections of the Internal Revenue Code. *Tavannes Watch Co. v. Commissioner,* 176 F.2d 211, 215 (2d Cir. 1949).

Generally, for a trust to be qualified under section 401(a) of the Code, the trust must be a valid trust under the law of the jurisdiction in which the trust is located. See section 1.401-1(a)(3)(i) of the regulations. However, even if the trust is valid under local law, the arrangement may be required to satisfy certain other requirements in order to be considered a trust for purposes of section 401(a). For example, Rul. Rul. 69-231, 1969-1 C.B. 118, holds that a qualified trust under section 401(a) of the Code must be in writing, even though oral trusts are valid in some states.

In Rev. Rul. 71-437, 1971-2 C.B. 185, the Service considered the qualification of a noncontributory money purchase pension plan that permitted the trustee to make two year loans to plan participants secured by the account balance. The revenue ruling concluded that the plan was not qualified because there was "a tacit understanding between the parties that collection is not intended." Therefore, these so-called "loans" were effectively distributions that violated the requirements for qualification under section 401(a) of the Code.

Similarly, the participants may not have rights which effectively eliminate the trust arrangement required for qualification under section 401(a) of the Code. While a qualified trust may permit a participant to elect how amounts attributable to the participant's account balance will be invested (*see* Rev. Rul. 55-354, 1955-1 C.B. 396), it may not allow the participant to have the right to acquire, hold and dispose of amounts attributable to the participant's account balance at will. *See also* Rev. Rul. 60-323, 1960-2 C.B. 148, *modifying* Rev. Rul. 56-693, 1956-2 C.B. 282. To give the participants such rights effectively eliminates the trust arrangement.

HOLDING

The written instrument described in this case did not create a qualified trust under section 401(a) of the Code because participants have the right to acquire, hold and dispose of an amount attributable to their account balances in the plan.

---

26 CFR 1.401(a)-13: Assignment or alienation of benefits.

Employee loans at low interest rates. A loan to a qualified plan participant that is secured by the participant's accrued nonforfeitable benefit constitutes an assignment or alienation if the loan is made at an unreasonable interest rate.

Rev. Rul. 89-14

ISSUE

Whether the benefits of a participant in a qualified plan have been assigned or alienated in violation of section 401(a)(13) of the Internal Revenue Code where the accrued nonforfeitable benefits of the participant were used as security for a loan from the plan's trust to the participant at an unreasonably low interest rate.

FACTS

The employer maintains a plan qualified under section 401 of the Code. The plan provides that a loan from the plan's trust to a plan participant may not exceed the participant's accrued nonforfeitable benefit under the plan. The individual's account is the security for the loan. The plan provides that such a loan is available to all participants on an equivalent basis and is not made available to highly compensated employees in an amount greater than the amount available to other employees.

In 1989 *A*, a participant in the plan, borrowed 100x dollars from the trust of the plan at an unreasonably low interest rate. The loan was secured by *A*'s accrued nonforfeitable benefit under the plan, the value of which was greater than 100x dollars.

A was not a disqualified person within the meaning of section 4975(e)(2) of the Code.

LAW AND ANALYSIS

In general, section 401(a)(13) of the Code states that benefits provided under a qualified plan may not be assigned or alienated. However, a loan from the trust of a plan to a participant secured by the accrued nonforfeitable benefit of the participant shall not be treated as an assignment or alienation, provided the loan is exempt from the tax imposed by section 4975 by reason of section 4975(d)(1).

Section 4975 of the Code imposes an excise tax on prohibited transactions between a qualified plan and a disqualified person. Section 4975(d)(1) provides that the term "prohibited transaction" does not apply to any loan by the plan to a disqualified person who is a participant or beneficiary of the plan if such loan satisfies certain requirements, including the requirement that the loan bear a reasonable rate of interest.

Section 1.401(a)-13(d)(2)(iii) of the Income Tax Regulations states that, if the loan is made to a participant or beneficiary who is not a disqualified person, the loan must be one which would be exempt from the tax imposed by section 4975 by reason of section 4975(d)(1) if the loan were made to a disqualified person.

The loan from the plan to *A* must satisfy the requirements of section 4975(d)(1) even though *A* is not a disqualified person. Since the rate of interest on the loan was not reasonable, the use of *A*'s accrued nonforfeitable benefit constitutes an assignment of *A*'s benefits.

HOLDING

The participant's benefits under the plan were assigned or alienated in violation of section 401(a)(13) because the accrued nonforfeitable benefits of the participant were used as security for the loan from the plan's trust to the participant at an unreasonable rate of interest.

This revenue ruling only deals with the issue whether, under the above facts, the participant's benefits under the plan were assigned or alienated in violation of section 401(a)(13) of the Code. It does not deal with other issues, including the question of whether the loan also violated the requirements of section 401(a) of the Code that the plan be for the exclusive benefit of the employer's employees or with whether the loan may be treated as a distribution under section 72(p).

Section 403.—Taxation of Employee Annuities

26 CFR 1.403(b)-1: Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.

Individual retirement accounts; rollover; annuity contract. The portion of a distribution from a section 403(b) annuity contract that was previously included in an employee's income may not be rolled over into an IRA.

Rev. Rul. 89-50

ISSUE

Is the transfer to an individual retirement account (IRA) of amounts distributed from an annuity contract described in section 403(b) of the Internal Revenue Code a rollover contribution described in section 403(b)(8) if it includes amounts contributed by the employer in excess of the exclusion allowance under section 403(b)(2)?

FACTS

An employee of an employer described in section 501(c)(3) of the Code received a total distribution within the meaning of section 403(b)(8)(B)(ii) from an annuity contract described in section 403(b)(1). The distribution included contributions made by the employer that had not been excluded from the employee's gross income under section 403(b)(1) because they were in excess of the exclusion allowance of section 403(b)(2). The employee transferred the entire amount of the distribution into an IRA described in section 408 within 60 days of receipt. The annuity contract did not provide for deductible employee contributions under section 72(o).

LAW AND ANALYSIS

Section 403(b)(1) of the Code provides that if certain conditions are met, amounts contributed by an employer described in section 501(c)(3) and exempt from tax under section 501(a) to purchase an annuity contract for an employee shall be excluded from the employee's gross income to the extent such amounts do not exceed the applicable exclusion allowance.

Section 403(b)(8)(A) and (B) of the Code provides that a total distribution from an annuity contract described in section 403(b)(1) shall not be includible in an employee's gross income to the extent that it is transferred to an IRA or another annuity contract described in section 403(b)(1).

Section 403(b)(8)(C) of the Code provides that, for purposes of section 403(b)(8)(A), rules similar to those of section 402(a)(5)(B) shall apply. Under section 402(a)(5)(B), the maximum amount of any total distribution that may be transferred as a rollover contribution is the amount distributed reduced by the employee contributions (other than accumulated deductible employee contributions under section 72(o)).

Section 402(a)(5)(E)(ii) of the Code defines employee contributions for purposes of section 402(a)(5) as the amount considered contributed by the employee, determined by applying section 72(f), less amounts previously distributed to the employee which were not includible in gross income. Section 72(f) provides that the amount of employer contributions includible in the gross income of the employee are considered employee contributions.

A total distribution from an annuity contract described in section 403(b)(1) of the Code is eligible for treatment as a rollover contribution described in section 403(b)(8) only to the extent that it does not exceed the amount received less employee contributions. Any amount transferred in excess of the limitation is not treated as a rollover contribution.

In this case, the amount transferred includes employer contributions that were includible in the employee's gross income and, therefore, pursuant to section 72(f) of the Code, considered employee contributions.

Under section 4973 of the Code, a six percent tax is imposed on the amounts transferred that are not eligible for rollover treatment, except to the extent that such amounts are allowable as contributions under section 408(a) or are distributed from the IRA in accordance with section 408(d)(4).

HOLDING

The portion of the distribution transferred to the IRA that was previously included in the employee's gross income is not a rollover contribution described in section 403(b)(8) of the Code. The fact that part of the amount transferred is not a rollover contribution does not affect the rollover treatment of the eligible portion of the transferred amounts.

Subpart B.—Special Rules

Section 411.— Minimum Vesting Standards

Final guidelines for determining whether a faster vesting rate than would otherwise be required is appropriate for advance determination purposes due to actual or potential discrimination in favor of highly compensated employees. See Rev. Proc. 89-29, page 893.

26 CFR 1.411(a)-6: Year of service, hour of service, breaks in service.

Plan year ending on other than last day of month. A plan does not fail to satisfy the computation period requirements of section 410(a)(3)(A), 411(a)(5)(A) and 411(b)(4)(A) of the Code merely because those periods are based on a plan year that ends on a date other than the last day of the month.

Rev. Rul. 89-13

ISSUE

Will a retirement plan satisfy the computation period requirements of sections 410(a)(3)(A), 411(a)(5)(A), and 411(b)-(4)(A) of the Internal Revenue Code if the plan's eligibility, vesting, and benefit accrual computation periods are based on the plan year, which ends on a specified date other than the last day of the month?

FACTS

An employer maintains a plan having a plan year based on a 12 consecutive month period ending on June 19 of each calendar year. The plan designates the plan year as the vesting and benefit accrual computation periods and as the computation period to be used to determine service for eligibility to participate after the initial eligibility computation period. Each employee who is credited with 1,000 or more hours of service during a plan year is credited with a year of service for eligibility to participate and for vesting in accrued benefits and a full year of participation for benefit accrual.

LAW AND ANALYSIS

Section 410(a)(3)(A) of the Code defines a year of service for eligibility to participate as a 12-month period. Years of service, after the initial 12-month period that begins on the employee's employment commencement date, may be determined by reference to the plan year.

Section 411(a)(5)(A) of the Code defines a year of service for minimum vesting purposes as a calendar year, plan year, or other 12-consecutive month period designated by the plan during which the employee has completed 1,000 hours of service.

Section 411(b)(4)(A) of the Code defines a year of participation for benefit accrual as a period of service calculated on a reasonable and consistent basis. Section 411(b)(4)(C) provides that for any employee whose service is less than 1,000 hours during any calendar year, plan year, or other 12-consecutve month period designated by the plan, the calculation of the employee's period of service shall not be treated as not made on a reasonable and consistent basis solely because such service is not taken into account.

Although, with certain exceptions, section 441 of the Code precludes a taxable year from ending in the middle of a month, this prohibition does not apply to a plan year. The computation periods in this case are based on a designated 12-consecutive month period and are calculated on a reasonable and consistent basis.

It should be noted that the taxable year of any trust forming part of a plan must end on the last day of a month or be based on a 52-53 week year, because the trust is a taxpayer that must comply with the requirements of section 441 of the Code. Section 441(f) permits a taxable year to end on a day other than the last day of a month only when the taxpayer has a 52-53 week year, which could not end on the same date each year.

HOLDING

A plan does not fail to satisfy the computation period requirements of sections 410(a)(3)(A), 411(a)(5)(A), and 411(b)(4)(A) of the Code merely because those periods are based on a plan year that ends on a specified date other than the last day of the month.

---

26 CFR 1.411(c)-1 Allocation of accrued benefits between employer and employee contributions.

Allocation of accrued benefit between employee and employer contributions. Guidance is provided as to the effect on section 411(c) of the Code of changes made by section 9346 of the Pension Protection Act (part II of title IX of the Omnibus Budget Reconciliation Act of 1987). Rev. Ruls. 76-47 and 78-202 amplified.

Rev. Rul. 89-60

ISSUES

(1) What interest rates are used to determine an employee's "accumulated contributions" under section 411(c)(2) of the Internal Revenue Code, as amended by section 9346 of the Pension Protection Act ("PPA"), part II of title IX of the Omnibus Budget Reconciliation Act of 1987, Pub. L. No. 100-203?

(2) If a plan distributes the employee's accumulated contributions with interest as a single sum at termination of employment before normal retirement age, what is the amount of the remaining vested accrued benefit in the form of a single life annuity commencing at normal retirement age that satisfies section 411(c)?

FACTS

Employer *X* maintains a qualified defined benefit plan that required mandatory employee contributions for 1987 and prior years, but not for years after 1987. The plan year is the calendar year. The plan provides for a normal retirement age of 65, and 100-percent vesting in the employer-derived portion of a participant's accrued benefit after 5 years of service.

The terms of the plan provide that a participant who terminates employment with *X* prior to attaining normal retirement age may elect, among other optional forms of benefit, to receive one of the following distributions as an alternative to an annual single life annuity commencing at normal retirement age:

1) A single-sum distribution of his or her accrued benefit upon termination of employment. The plan provides that the single sum is calculated using the UP-1984 Mortality Table with a 1-year age set-forward and interest at the applicable rates in effect on the first day of the plan year described in section 417(e) of the Code.

2) A single-sum distribution of his or her employee contributions as of the date of termination of employment, credited with interest to the date of distribution ("determination date") at the rate specified in section 411(c) of the Code, and a distribution of the remainder of his or her vested accrued benefit in the form of an annual single life annuity commencing at normal retirement age.

A, an unmarried participant terminated employment with *X* on July 1, 1988, at age 50 with 7 years of service. *A*'s total accrued benefit under the plan in the form of an annual single life annuity commencing at age 65 is $2,949 per year. As of December 31, 1987, *A*'s total accumulated mandatory employee contributions to the plan, including interest compounded annually at 5 percent, equaled $3,021. On January 1, 1988, 120 percent of the federal mid-term rate under section 1274 of the Code was 10.61 percent.

LAW AND ANALYSIS

Section 411(a)(1) of the Code provides that an employee's rights in the employee's accrued benefit derived from the employee's own contributions must be nonforfeitable.

Section 411(a)(2) of the Code provides that an employee's rights in the employee's accrued benefit derived from employer contributions must be nonforfeitable in accordance with one of the vesting schedules described in section 411(a)(2).

Section 411(c)(1) of the Code provides that an employee's accrued benefit derived from employer contributions is the excess, if any, of the employee's accrued benefit over the employee's accrued benefit derived from contributions made by the employee.

Section 411(c)(2)(B)(i) of the Code provides that, in the case of a defined benefit plan providing an annual benefit in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, the accrued benefit derived from employee contributions is the annual benefit equal to the employee's accumulated contributions multiplied by the appropriate conversion factor. Section 411(c)(2)(B)(ii) of the Code provides that the appropriate conversion factor is the factor necessary to convert an amount equal to the accumulated contributions to a single life annuity (without ancillary benefits) commencing at normal retirement age, and that this factor shall be 10 percent if the normal retirement age is 65.

Prior to the enactment of section 9346 of the PPA, section 411(c)(2)(C) provided that the term "accumulated contributions" was defined as the sum of (1) mandatory contributions made by the employee; (2) interest under the plan (if any) to the end of the last plan year to which section 411(a)(2) does not apply; and (3) with respect to each subsequent plan year, interest on the amounts determined under (1) and (2) at the rate of 5 percent. Section 9346(b) of the PPA amended section 411(c)(2)(C) by replacing 5 percent with 120 percent of the federal mid-term rate as in effect under section 1274 of the Code for the first month of the plan year ("mid-term AFR"). Section 9346(c) of the PPA provides that the amendments made by section 9346 are effective for plan years beginning after December 31, 1987.

Section 411(c)(2)(E) of the Code provides that the accrued benefit derived from employee contributions shall not exceed the greater of the employee's accrued benefit under the plan, or the accrued benefit derived from employee contributions accumulated using an interest rate of zero.

Section 411(c)(3) of the Code provides:

> ACTUARIAL ADJUSTMENT.—For purposes of this section, in the case of any defined benefit plan, if an employee's accrued benefit is to be determined as an amount other than an annual benefit commencing at normal retirement age, or if the accrued benefit derived from contributions made by an employee is to be determined with respect to a benefit other than an annual benefit in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, the employee's accrued benefit, or the accrued benefits derived from contributions made by an employee, as the case may be, shall be the actuarial equivalent of such benefit or amount determined under paragraph (1) or (2) [of section 411(c)].

Section 1.411(c)-1(e) of the Income Tax Regulations provides that the actuarial equivalent of the employee's accrued benefit under section 411(c)(1) and the actuarial equivalent of the accrued benefit derived from employee contributions under section 411(c)(2)(B) of the Code shall be as determined by the Commissioner.

Rev. Rul. 76-47, 1976-1 C.B. 109, provides that a benefit in a form other than the normal form of benefit shall not be less than an actuarial equivalent of the normal form of benefit, using the actuarial assumptions or actuarial tables prescribed by the plan or by any insurance or annuity contracts used to provide benefits under the plan ("plan assumptions"). Rev. Rul. 76-47 also states that, notwithstanding that the benefit must be the actuarial equivalent of the normal form of benefit using plan assumptions, the amount of benefits under any form of retirement benefit other than the normal form of benefit shall not be less than the benefit that would be derived from employee contributions if such benefit were the normal form of benefit. Rev. Rul. 76-47 provides appropriate conversion factors to determine the minimum accrued benefit derived from employee contributions when the normal retirement age is not 65. It also sets forth the actuarial adjustment required when the normal form of benefit is other than a single life annuity (without ancillary benefits).

Rev. Rul. 78-202, 1978-1 C.B. 124, requires, generally, that if a benefit derived from employee contributions is payable other than at normal retirement age, the benefit must be at least the actuarial equivalent of the employee-derived benefit payable at normal retirement age, based on the same actuarial assumptions required by section 411(c) and Rev. Rul. 76-47 to be used to determine the accrued benefit derived from employee contributions at normal retirement age. Rev. Rul. 78-202 provides methods for determining a single sum that satisfies this requirement.

Thus, a benefit derived from both employee and employer contributions that is to be distributed in a form other than a single life annuity commencing at normal retirement age must satisfy two requirements. First, the amount of the employee's accrued benefit must be the actuarial equivalent of his or her accrued benefit in the form of a single life annuity commencing at normal retirement age. For this first requirement, the actuarial equivalence is determined using plan assumptions, subject to the interest rate limitation described in section 417(e) of the Code. Second, the amount of the benefit must not be less than the actuarial equivalent of the employee-derived accrued benefit payable in the form of a single life annuity commencing at normal retirement age. For this second requirement, the actuarial equivalence is determined using the actuarial assumptions and factors specified in section 411(c)(2) and Rev. Rul. 76-47, taking into account the principle illustrated in Rev. Rul. 78-202.

Generally, section 411 of the Coc provides that an employee's rights in tl portion of his or her accrued benefit that derived from employee contributions mu be nonforfeitable (vested) at all times, an that the employee's rights in the portion (his or her accrued benefit that is derive from employer contributions become ves ted in accordance with one of variou schedules. Section 411(c) sets forth th requirements for allocating an employee' total accrued benefit between employe and employer contributions.

To comply with the requirements o section 411(c), the plan must first deter mine an employee's vested accrued ben efit in the form of an annual single lif annuity commencing at normal retire ment age. Generally, this amount i determined by converting the accumu lated contributions to a benefit anc adding the vested percentage of th remainder, if any, of the employee' total accrued benefit.

Under section 411(c)(2)(C), accumu lated contributions are all mandatory contributions made by the employee anc interest on such contributions until the employee attains normal retirement age. The interest rate for all plan years begin ning on or after the effective date of sec tion 411(a)(2) and before January 1, 1988, is 5 percent. For each plan yea beginning after December 31, 1987, the interest rate is 120 percent of the mid term AFR for the month that includes the first day of that plan year. The interes rate for the plan year that includes the determination date is also used for the entire period from the determination date to the date on which the employee woul attain normal retirement age.

Accordingly, for plan year 1987 anc each prior plan year, *A*'s accumulatec contributions are credited with interest a 5 percent. For plan year 1988 and al subsequent plan years up to and includ ing the plan year in which *A* would attai normal retirement age, *A*'s accumulate contributions are credited with interest compounded annually, at 120 percent o the mid-term AFR on January 1, 1988 *i.e.*, 10.61 percent. (If *A* were to termi nate employment on July 1, 1989, in stead of 1988, *A*'s accumulated contri butions would be credited with interest a 10.61 percent for 1988 and, because 12 percent of the mid-term AFR on Januar 1, 1989, was 11.11 percent, interest a 11.11 percent for the 1989 plan year an all subsequent plan years up to an including the plan year in which *A* woul attain normal retirement age.)

SINGLE LIFE ANNUITY COMMENCING AT NORMAL RETIREMENT AGE

If *A* elects to receive *A*'s accrued benefit in the form of an annual single life annuity commencing at *A*'s normal retirement age, *A*'s benefit would be determined as follows:

(1) Determine *A*'s total accrued benefit in the form of an annual single life annuity commencing at normal retirement age under the plan's formula ($2,949 per year payable at age 65).

(2) Determine *A*'s accumulated contributions with interest to normal retirement age using, for years prior to January 1, 1988, 5-percent interest (which compounds to $3,021 as of December 31, 1987, in this example) and, for the 1988 plan year until normal retirement age, 10.61-percent interest ($14,420).

(3) Determine the accrued benefit derived from *A*'s contributions by multiplying *A*'s accumulated contributions determined in step (2) by the conversion factor specified in section 411(c)(2)(B)(ii) ($14,420 × 10 percent = $1,442 per year) and then limiting the result as required by section 411(c)(2)(E) to the greater of *A*'s accrued benefit under the plan or the employee's accrued benefit derived from the employee's mandatory contributions, without crediting interest.

(4) Determine the accrued benefit derived from employer contributions by subtracting the accrued benefit derived from employee contributions from the employee's accrued benefit under the plan, but in no event is the accrued benefit derived from employer contributions less than zero ($2,949 − $1,442 = $1,507 per year).

(5) Determine the vested percentage of the accrued benefit derived from employer contributions under the plan's vesting schedule (100 percent).

(6) Determine the vested accrued benefit derived from employer contributions by multiplying the accrued benefit derived from employer contributions by the vested percentage ($1,507 × 100 percent = $1,507 per year).

(7) Determine *A*'s vested accrued benefit in the form of an annual single life annuity commencing at normal retirement age by adding the accrued benefit derived from employee contributions and the vested accrued benefit derived from employer contributions ($1,442 + $1,507 = $2,949 per year).

SINGLE SUM DISTRIBUTION UPON TERMINATION OF EMPLOYMENT

If *A* elects to receive *A*'s accrued benefit as a single sum at termination of employment on July 1, 1988, the vested accrued benefit payable as a single sum as of July 1, 1988, is determined as follows:

(1) Determine *A*'s vested accrued benefit in the form of an annual single life annuity commencing at normal retirement age ($2,949 per year; see steps (1) through (7) under "Single Life Annuity Commencing at Normal Retirement Age").

(2) Determine the single sum as of July 1, 1988, that is the actuarial equivalent of the vested accrued benefit using the plan interest rate ($7,108).

(3) Determine the accrued benefit derived from *A*'s mandatory contributions as of July 1, 1988, in the form of an annual single life annuity commencing at normal retirement age ($1,442 per year; see step (3) under "Single Life Annuity Commencing at Normal Retirement Age").

(4) Determine the single sum as of July 1, 1988, that is the actuarial equivalent of the amount in step (3), following the rules of Rev. Rul. 78-202 and using the interest rate specified in section 411(c)(2)(C)(iii), a conversion factor of 10 percent, and the adjustment factors specified in Rev. Rul. 76-47 ($3,177).

(5) *A*'s vested accrued benefit payable as a single sum upon termination of employment is the greater of (A) the single sum as determined in step 2, or (B) the single sum determined in step (4) ($7,108).

SINGLE SUM DISTRIBUTION OF ACCUMULATED CONTRIBUTIONS UPON TERMINATION OF EMPLOYMENT AND DEFERRED ANNUITY OF EMPLOYER CONTRIBUTIONS

If *A* elects to receive *A*'s employee contributions with interest as a single sum at termination of employment on July 1, 1988, and the remainder of *A*'s accrued benefit as an annual single life annuity commencing at normal retirement age, section 411(c)(3) of the Code is not satisfied unless the single sum and the deferred annuity are the actuarial equivalent of *A*'s vested accrued benefit in the form of an annual single life annuity commencing at normal retirement age. The plan assumptions, including the interest rates described in section 417(e) of the Code, are used to determine this actuarial equivalence. Also, section 411(c)(3) is not satisfied unless the single sum and the deferred annuity are at least as great as the actuarial equivalent of the accrued benefit derived from *A*'s contributions, using the actuarial assumptions and factors specified in section 411(c)(2) and Rev. Rul. 76-47.

Because *A*'s accrued benefit must be the actuarial equivalent of the accrued benefit in the form of a single life annuity commencing at normal retirement age, the minimum deferred annuity is determined as follows:

(1) Determine *A*'s vested accrued benefit in the form of a single life annuity commencing at normal retirement age ($2,949 per year; see steps (1) through (7) under "Single Life Annuity Commencing at Normal Retirement Age").

(2) Determine the amount of *A*'s single-sum distribution by crediting *A*'s accumulated contributions with interest to the date of distribution, using 5 percent for years prior to 1988, and 10.61 percent for January 1, 1988, to July 1, 1988 ($3,177).

(3) Using the plan assumptions, including the section 417(e) interest rates, determine the benefit in the form of an annual single life annuity commencing at normal retirement age that is the actuarial equivalent of the single-sum distribution determined in step (2) ($1,318 paid annually commencing at age 65 is the actuarial equivalent of *A*'s accumulated contributions with interest to the determination date).

(4) Determine the minimum benefit payable at normal retirement age that is necessary to satisfy the requirement that *A*'s accrued benefit be the actuarial equivalent of *A*'s accrued benefit in the form of a single life annuity commencing at normal retirement age. This determination is made by reducing *A*'s vested accrued benefit in the form of a single life annuity commencing at normal retirement age by the annuity determined in step (3) that is equivalent to the single-sum distribution ($2,949 — $1,318 = $1,631 per year). The minimum benefit cannot be less than zero.

The requirement that the amount of *A*'s benefit not be less than the actuarial equivalent of the employee-derived accrued benefit payable in the form of a single life annuity commencing at normal retirement age is satisfied without regard to the amount of the deferred annuity, because *A* will receive a single-sum distribution of *A*'s accumulated contributions with interest at the section 411(c) rates, as illustrated in this ruling. However, if the plan distributes to *A* a single sum that is less than A's accumulated contributions with interest at the section 411(c) rates, additional steps would be needed to determine whether the single sum and deferred annuity meet this requirement.

The above examples address situations where the participant is fully vested. Similar rules apply with respect to a non-vested participant.

HOLDINGS

(1) Under section 411(c)(2), an employee's accumulated contributions are determined using 5-percent interest for all plan years beginning on or after the effective date of section 411(a)(2) and before January 1, 1988. For plan years beginning after December 31, 1987, the rate to be used is 120 percent of the mid-term AFR for the month that includes the first day of the plan year. The interest rate for the plan year that includes the determination date is also used for the period from the determination date to the date on which the employee attains normal retirement age.

(2) If the employee's accumulated contributions with interest are distributed as a single sum at termination of employment before normal retirement age, the annuity commencing at normal retirement age must be at least as great as the annuity determined by (a) using the plan interest rate, subject to the section 417(e) limitation, and plan assumptions to convert the single sum previously distributed to the employee to an actuarially equivalent single life annuity commencing at normal retirement age, and (b) subtracting the resulting annuity from the total vested accrued benefit, expressed as a single life annuity commencing at normal retirement age.

EFFECT ON OTHER REVENUE RULINGS:

Rev. Rul. 78-202, 1978-1 C.B. 124, and Rev. Rul. 76-47, 1976-1 C. B. 109, are amplified to reflect the application of the new interest rate contained in section 411(c)(2)(C)(iii) of the Code, as explained in this ruling.

---

26 CFR 1.411(d)-2: Termination or partial termination; discontinuance of contributions.

Minimum vesting standards; discontinuance of contributions. A profit-sharing plan that did not contain a provision that employees' accrued benefits become nonforfeitable upon the complete discontinuance of contributions did not qualify under section 401(a) of the Code during its first plan year, even though contributions were made during the first year. Rev. Rul. 68-137 revoked.

Rev. Rul. 89-53

PURPOSE

The purpose of this revenue ruling is to revoke Rev. Rul. 68-137, 1968-1 C.B. 164, in view of the amendment of section 401(b) of the Internal Revenue Code by the Employee Retirement Income Security Act of 1974 (ERISA), Pub. L. 93-406, 1974-3 C.B. 1.

ISSUE

Does a profit-sharing plan fail to meet the requirements for qualification under section 401(a) of the Code, during the first plan year, because the plan does not initially contain a specific provision requiring that employees' rights to benefits become nonforfeitable upon the complete discontinuance of contributions?

FACTS

An employer established a profit-sharing plan and trust to which it made a contribution for the first plan year. Under the plan, a contribution was required as a precondition of the plan's existence. The plan provided that employer contributions would be nonforfeitable in the event of termination or partial termination of the plan. The plan met all the other requirements for qualification under section 401(a) of the Code, except that it did not contain a specific provision requiring that, in the event of a complete discontinuance of employer contributions, employees' rights to accrued benefits become nonforfeitable. Such a requirement was added to the plan by an amendment that was adopted and made effective for the second plan year.

LAW AND ANALYSIS

Under the holding of Rev. Rul. 68-137, the plan in the present case would not fail to qualify under section 401(a) of the Code. In Rev. Rul. 68-137, a contribution was required as a precondition of the plan's existence, and such a contribution was actually made for the first plan year. Consequently, a discontinuance of contributions could not occur in the first year. Absent this holding, the plan could not have qualified under section 401(a) for the first plan year because section 401(b)(which provides for the retroactive effect of certain plan amendments) had limited applicability prior to ERISA.

Section 401(b) of the Code, as amendment by ERISA, provides that a stock bonus, pension, profit-sharing, or annuity plan shall be considered to satisfy the requirements of section 401(a) for the period beginning with the date on which it was put into effect, or for the period beginning with the earlier of the date on which there was adopted or put into effect any amendment which caused the plan to fail to satisfy such requirements and ending with the time prescribed by law for filing the return of the employer for his taxable year in which such plan or amendment was adopted, including extensions thereof, or such later time as the Secretary may designate, if all provisions of the plan which are necessary to satisfy all qualification requirements are in effect by the end of such period and have been made effective for the whole of such period.

Section 411(d)(3) of the Code provides that a trust shall not constitute a qualified trust under section 401(a) unless the plan of which such trust is a part provides that, upon its termination or partial termination, or in the case of a plan to which section 412 does not apply, upon complete discontinuance of contributions under the plan, the rights of all affected employees to benefits accrued to the date of such termination, partial termination, or discontinuance, to the extent funded as of such date, or the amounts credited to the employees' accounts, are nonforfeitable.

Section 412(h)(1) of the Code provides that section 412 shall not apply to any profit-sharing or stock bonus plan. Consequently, profit-sharing plans are subject to the requirement that employees' rights to their account balances become nonforfeitable upon complete discontinuance of contributions.

Section 411(d)(3) of the Code and section 1.411(d)-2(a) of the Income Tax Regulations require that, in order to qualify under section 401(a), certain plans, including profit-sharing plans, must provide for nonforfeitability of the amounts credited to the employees' accounts upon complete discontinuance of contributions. Section 411(d)(3) neither states nor implies that such a provision is unnecessary for plan qualification if, in actual plan operation, a complete discontinuance of contributions does not or could not occur.

HOLDING

The profit-sharing plan in the present case did not qualify under section 401(a) of the Code for its first plan year because it did not then contain the required provision that employees' accrued benefits become nonforfeitable upon complete discontinuance of contributions. This result obtains whether or not a contribution under the plan is required as a condition of the plan's existence.

However, if a plan amendment effective for the first plan year, adding the required provision is made within the remedial amendment period provided under section 401(b) of the Code and section 1.401(b)-1 of the regulations, the plan will qualify under section 401(a) from the date of its adoption.

PROSPECTIVE APPLICATION

Pursuant to section 7805(b) of the Code, this revenue ruling will be effective, in the case of plans in existence on or before May 10, 1989, for a plan's second year of existence. For plans that come into existence after May 10, 1989, this revenue ruling will be immediately effective.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 68-137 is revoked.

Section 414.—Definition and Special Rules

Governmental plan; volunteer fire company. A retirement plan maintained by an organization is not a governmental plan within the meaning of section 414(d) of the Code since the governmental unit did not have sufficient control over the organization.

Rev. Rul. 89-49

ISSUE

Is a retirement plan, adopted under the circumstances described below, a governmental plan within the meaning of section 414(d) of the Internal Revenue Code?

FACTS

The citizens of a municipality in State *X* organized a volunteer fire company to provide fire protection services to their community. The company was incorporated under State *X*'s nonprofit corporation statute. Under its charter, the company is managed by a board of trustees elected by the volunteer firefighters. The company entered into contracts with several municipalities, including the municipality where it was created, under which the company agreed to provide fire protection services to the municipalities. Under the contracts, the municipalities agreed that the operations of the company would be under the exclusive control of the board of trustees. The funds for the company are provided in part by community donations from the residents of the municipalities served by the company and in part by payments made by municipalities under the contracts with the company. In 1989, the company established a retirement plan for its employees. The municipalities do not make any direct contributions to the retirement plan. The employees were never treated by State *X* as employees of the state or a political subdivision thereof.

LAW AND ANALYSIS

Section 414(d) of the Code provides that a governmental plan means a plan established and maintained for its employees by the Government of the United States, by the government of any state or political subdivision thereof, or by any agency or instrumentality of any of the foregoing.

A plan will not be considered a governmental plan merely because the sponsoring organization has a relationship with a governmental unit or some quasi-governmental power. One of the most important factors to be considered in determining whether an organization is an agency or instrumentality of the United States or any state or political subdivision is the degree of control that the federal or state government has over the organization's everyday operations. Other factors include: (1) whether there is specific legislation creating the organization; (2) the source of funds for the organization; (3) the manner in which the organization's trustees or operating board are selected; and (4) whether the applicable governmental unit considers the employees of the organization to be employees of the applicable governmental unit. Although all of the above factors are considered in determining whether an organization is an agency of a government, the mere satisfaction of one or all of the factors is not necessarily determinative.

In this case, the degree of control which the municipalities exert over the fire company in its everyday operations is minimal. Although the company was incorporated under a nonprofit corporation statute, there was no specific legislation which affiliated the company with the state. Further, the company's expenses are, in part, paid by community donations. In addition, the board of trustees which controls the company's basic operations is elected by the volunteer firefighters. Finally, State *X* has not treated the company's employees as employees of the state or political subdivision thereof.

HOLDING

The retirement plan in this case is not a governmental plan within the meaning of section 414(d) of the Code.

Subpart D.—Treatment of Welfare Benefit Funds

Section 419.—Treatment of Funded Welfare Benefit Plans

Whether the Service will rule as to whether proceeds of "self-insured" life and survivor benefit plans established through a trust qualified under section 501(c)(9) of the Code are excludable from the beneficiary's gross income under section 101(a). See Rev. Proc. 89-36, page 919.

Part II.—Certain Stock Options

Section 423.—Employee Stock Purchase Plan

26 CFR 1.423-2: Employee stock purchase plan defined.

T.D. 8235

TITLE 26—INTERNAL REVENUE SERVICE—CHAPTER I, SUBCHAPTER A, PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953; PART 14A—TEMPORARY INCOME TAX REGULATIONS RELATING TO INCENTIVE STOCK OPTIONS

Stockholder Approval of Incentive Stock Option and Employee Stock Purchase Plans

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary and final regulations.

SUMMARY: This document contains temporary regulations relating to stockholder approval of incentive stock option plans and final regulations relating to stockholder approval of employee stock purchase plans. Questions have arisen concerning the method and degree of stockholder approval necessary with respect to incentive stock option plans and employee stock purchase plans. The regulations affect corporations establish-

ing incentive stock option or employee stock purchase plans and provide them with guidance concerning plan qualification requirements under sections 422A and 423 of the Code.

EFFECTIVE DATES: Section 14a.422A-2 is effective on August 13, 1981, and applies to options granted on or after such date and to certain options granted after December 31, 1975. Section 1.423-2(c)-(1) is effective on January 1, 1964, and applies to options granted on or after such date.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) under section 423 of the Internal Revenue Code of 1954, relating to employee stock purchase plans, and to the Temporary Income Tax Regulations Relating to Incentive Stock Options (26 CFR Part 14a) under section 422A of the Code. These amendments prescribe the method and degree of stockholder approval necessary to qualify a plan under sections 423 and 422A.

CURRENT STOCKHOLDER APPROVAL REQUIREMENTS

For a stock option plan to qualify either as an employee stock purchase plan under section 423 or as an incentive stock option plan under section 422A, the plan must be approved by the stockholders of the corporation within 12 months before or after the date such plan is adopted. The regulations under section 423 provide that the stockholder approval must comply with all applicable provisions of the corporate charter and bylaws and the law of the State of incorporation. In addition, they provide that an employee stock purchase plan must be approved at a duly held stockholders' meeting and that the stockholders voting in favor of the plan must hold a majority of the outstanding voting stock of the corporation.

The temporary regulations under section 422A do not address the stockholder approval issue generally, but proposed regulation §1.422A-2(b)(2) would permit stockholder approval in any manner consistent with applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of approval for the granting of incentive stock options. In the absence of such a prescribed method and degree of stockholder approval, the proposed regulations would require an incentive stock option plan to be approved by a simple majority vote of stockholders, voting either in person or by proxy, at a duly held stockholders' meeting.

EXPLANATION OF PROVISIONS

This document amends the regulations under sections 423 and 422A to provide uniform rules relating to stockholder approval. Stockholder approval of either an employee stock purchase plan or an incentive stock option plan must comply with all applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of stockholder approval required for the issuance of corporate stock or options. If the applicable State law does not prescribe a method and degree of stockholder approval in such cases, then the plan must be approved either (a) by a majority of the votes cast at a duly held stockholders' meeting at which a quorum representing a majority of all outstanding voting stock is, either in person or by proxy, present and voting on the plan, or (b) by a method and in a degree that would be adequate under applicable State law in the case of an action requiring stockholder approval. For this purpose, an action requiring stockholder approval is an action on which stockholders would be entitled to vote if the action were taken at a duly held stockholders' meeting. Thus, if the applicable State law provides that an action must be approved either by majority vote of the stockholders at an annual or special meeting or by the written consent of stockholders, the action is one that requires stockholder approval and approval of the action through the use of either procedure is adequate.

Although the amendment of the regulations under section 423 was not the subject of a notice of proposed rulemaking, the issues considered in connection with this amendment were the subject of a notice of proposed rulemaking under section 422A (LR-279-81, 49 FR 4,504 (February 7, 1984) [1984-1 C.B. 714]). For this reason, and because the amendment provides a less burdensome standard for stockholder approval than the current regulations, the Service has concluded that it is not necessary to issue a separate notice of proposed rulemaking with respect to the section 423 amendment.

INCONSISTENT RULINGS

In Revenue Ruling 75-256, 1975-2 C.B. 194, the Service ruled that a stockholder approval requirement identical to the requirement in the current regulations under section 423 was not satisfied when votes were cast by stockholders holding 40 percent of the total outstanding voting stock of the corporation, and the plan was approved by 80 percent of the votes cast, because the plan was not approved by stockholders holding a majority of the outstanding voting stock of the corporation. In Revenue Ruling 80-29, 1980-1 C.B. 94, the Service ruled that a stockholders' meeting is not required when, in accordance with State law, a corporation's qualified stock option plan or employee stock purchase plan is approved by unanimous written consent of the stockholders of the corporation, but that a stockholders' meeting is required if there is less than unanimous written consent by the stockholders.

Under the amended regulations, the stockholder approval requirements of sections 423 and 422A may be satisfied even if (a) the stockholders voting in favor of the plan hold less than a majority of the outstanding voting stock, or (b) the plan is approved by written consent that is less than unanimous. Accordingly, the Service will not follow Revenue Rulings 75-256 and 80-29 in determining whether the stockholder approval requirements of sections 423 and 422A are satisfied, and the portion of Revenue Ruling 80-29 that deals with section 423 will be revoked.

SPECIAL ANALYSES

The Commissioner of Internal Revenue has determined that these rules are not major rules as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required.

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations or for final regulations to which 5 U.S.C. 553(b) does not apply. Accordingly, the temporary and final regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

* * * * * *

Adoption of amendments to the regulations.

For the reasons set out in the preamble, Parts 1 and 14a of Title 26, Chapter 1, Subchapter A of the Code of Federal Regulations are amended as follows:

INCOME TAX REGULATIONS
(26 CFR Part 1)

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. Section 1.423-2 is amended by revising paragraph (c)(1) to read as follows:

§1.423-2 Employee stock purchase plan defined.

* * * * * *

(c) *Stockholder approval.* (1) An employee stock purchase plan must be approved by the stockholders of the granting corporation within 12 months before or after the date such plan is adopted. The approval of stockholders must comply with all applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of stockholder approval required for the issuance of corporate stock or options. If the applicable State law does not prescribe a method and degree of stockholder approval in such cases an employee stock purchase plan must be approved—

(i) By a majority of the votes cast at a duly held stockholders' meeting at which a quorum representing a majority of all outstanding voting stock is, either in person or by proxy, present and voting on the plan; or

(ii) By a method and in a degree that would be treated as adequate under applicable State law in the case of an action requiring stockholder approval (i.e., an action on which stockholders would be entitled to vote if the action were taken at a duly held stockholders' meeting).

* * * * * *

TEMPORARY INCOME TAX REGULATIONS RELATING TO INCENTIVE STOCK OPTIONS
(26 CFR Part 14a)

Par. 3. The authority for Part 14a continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Part 14a is amended by adding §14a.422A-2 to read as follows:

§14a.422A-2 Question and answer relating to the stockholder approval of incentive stock option plans.

The following question and answer relates to the stockholder approval of incentive stock option plans required by section 422A of the Internal Revenue Code as added by section 251 of the Economic Recovery Tax Act of 1981:

Q: In what manner must the stockholders' approval required by section 422A(b)(1) be obtained?

A: The approval of stockholders must comply with all applicable provisions of the corporate charter, bylaws and applicable State law prescribing the method and degree of stockholder approval required for the issuance of corporate stock or options. If the applicable State law does not prescribe a method and degree of stockholder approval in such cases an incentive stock option plan must be approved—

(1) By a majority of the votes cast at a duly held stockholders' meeting at which a quorum representing a majority of all outstanding voting stock is, either in person or by proxy, present and voting on the plan; or

(2) By a method and in a degree that would be treated as adequate under applicable State law in the case of an action requiring stockholder approval (i.e., an action on which stockholders would be entitled to vote if the action were taken at a duly held stockholders' meeting).

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved November 2, 1988.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on December 1, 1988, 8:45 a.m., and published in the issue of the Federal Register for December 2, 1988, 53 F.R. 48639)

Subchapter E.—Accounting Periods and Methods of Accounting
Part II.—Methods of Accounting
Subpart A.—Methods of Accounting in General

Section 446.—General Rule for Method of Accounting

26 CFR 1.446-1: General rule for method of accounting.

A procedure is provided for certain taxpayers to obtain expeditious consent from the Commissioner to change their method of accounting for package design costs to a capitalization method in accordance with Rev. Rul. 89-23. See Rev. Proc. 89-16, page 822.

26 CFR 1.446-1: General rule for method of accounting.

Taxpayers that incur package design costs are allowed to deem the useful lives of certain package designs to be 60 months. See Rev. Proc. 89-17, page 827.

26 CFR 1.446-1: General rule for method of accounting.

If expenditures are incurred after December 31, 1986, in connection with the development and design of product packages, are those expenditures deductible as ordinary and necessary business expenses under section 162(a) of the Code in the tax year in which the expenditures are incurred, or must they be capitalized under section 263A of the Code. If expenditures are incurred prior to January 1, 1987, must they be capitalized under section 263. If such expenditures must be capitalized under section 263 or section 263A of the Code, are they amortizable under section 1.167(a)-3 of the Regulations. See Rev. Rul. 89-23, page 85.

Subpart C.—Taxable Year for Which Deductions Taken

Section 461.—General Rule for Taxable Year of Deduction

26 CFR 1.461-2: Timing of deductions in certain cases where asserted liabilities are contested.
(Also Section 163; 1.163-1.)

Interest; timing of deduction; contested tax liability; asserted liability. Interest paid by accrual basis corporation in connection with a contested tax liability is deductible under sections 163(a) and 461(f) of the Code in the tax year of payment when the taxpayer remits the total amount of the proposed tax liability and does not designate the amount remitted as a deposit in the nature of a cash bond.

Rev. Rul. 89-6

ISSUE

If an accrual method corporate taxpayer remits the total amount of unassessed tax proposed in a 30-day letter accompanied by an examiner's report, plus appropriate interest, does not designate the amount remitted as a deposit in the nature of a cash bond, and contests the proposed tax and related interest, both before and after making the remittance, is the portion of the remittance that is attributable to interest deductible under sections 163(a) and 461(f) of the Internal Revenue Code in the tax year of the remittance?

FACTS

X is a corporate taxpayer and thus not subject to the disallowance of deduction for personal interest under section 163(h) of the Code. *X* uses the accrual method of accounting for federal income tax purposes. After auditing *X*'s 1986 federal income tax return, a revenue agent proposed several adjustments that would result in an increase in *X*'s tax liability for 1986. The increase in tax liability would also result in liabilities for interest. *X* disagreed with the proposed adjustments and subsequently received a Notice of Proposed Deficiency (30-day letter) from the District Director accompanied by an examiner's report explaining the basis of the proposed deficiency. *X* filed a protest with the District Director contesting the proposed deficiency. While the issues set forth in the protest were pending, *X*, pursuant to section 4.03(1) of Rev. Proc. 84-58, 1984-2 C.B. 501, made a remittance with respect to the proposed deficiency, and the related interest. *X* did not designate that the remittance was to be treated as a deposit in the nature of a cash bond. On the day *X* made the remittance, *X* filed a claim for refund of the remittance. But for the contest posed by the claim for refund, *X* had satisfied all of the requirements for deduction of the interest portion of the remittance under section 163.

LAW AND ANALYSIS

Section 163(a) of the Code provides that there shall be allowed as a deduction all interest paid or accrued within the taxable year on indebtedness.

Section 461(a) of the Code provides that the amount of any deduction or credit allowed by subtitle A of the Code shall be taken for the taxable year that is the proper taxable year under the method of accounting used in computing taxable income.

Section 1.461-1(a)(2) of the Income Tax Regulations provides that, under an accrual method of accounting, an expense is deductible for the taxable year in which all the events have occurred which determine the fact of the liability and the amount thereof can be determined with reasonable accuracy. In the instant situation, the all events test of section 1.461-1(a)(2) is not met because *X* contests the liability. Nevertheless, the taxpayer may be allowed a deduction if the requirements of section 461(f) of the Code are met.

Section 461(f) of the Code provides an exception to the all events test in certain situations in which a taxpayer transfers money or other property to provide for the satisfaction of a contested liability. The provision provides that if (1) the taxpayer contests an asserted liability, (2) the taxpayer transfers money or other property to provide for the satisfaction of the asserted liability, (3) the contest with respect to the asserted liability exists after the time of the transfer, and (4) but for the fact that the asserted liability is contested, a deduction would be allowed for the taxable year of the transfer (or for an earlier taxable year) determined after application of section 461(h), then the deduction shall be allowed for the taxable year of the transfer.

Section 1.461-2(b)(1) of the regulations provides that the term "asserted liability" means an item with respect to which, but for the existence of any contest in respect of such item, a deduction would be allowable under an accrual method of accounting.

Section 1.461-2(b)(2) of the regulations provides that any contest that would prevent accrual of a liability under section 461(a) of the Code shall be considered to be a contest. A contest arises when there is a bona fide dispute as to the proper evaluation of the law or the facts necessary to determine the existence or correctness of the amount of an asserted liability. It is not necessary to institute suit in a court of law in order to contest an asserted liability. An affirmative act denying the validity or accuracy, or both, of an asserted liability to the person who is asserting the liability, such as including a written protest with payment of the asserted liability, is sufficient to commence a contest.

Section 1.461-2(c)(1) of the regulations provides that a taxpayer may provide for the satisfaction of an asserted liability by transferring money or other property beyond the taxpayer's control to the person who is asserting the liability. In order for money or other property to be beyond the control of the taxpayer, the taxpayer must relinquish all authority over such money or other property.

Section 1.461-2(d) of the regulations provides that, in order for a contest with respect to an asserted liability to exist after the time of transfer, such contest must be pursued subsequent to such time.

Section 1.461-2(e)(1) of the regulations provides that the existence of the contest with respect to an asserted liability must prevent (without regard to section 461(f)) and be the only factor preventing a deduction for the taxable year of transfer (or, in the case of an accrual method taxpayer, for an earlier taxable year for which such amount would be accruable) to provide for the satisfaction of the liability.

Rev. Proc. 84-58, 1984-2 C.B. 501, sets forth procedures for taxpayers to make remittances in order to stop the running of interest on federal income tax deficiencies. Section 4.03 of Rev. Proc. 84-58 provides that a remittance not specifically designated as a deposit in the nature of a cash bond will be treated as a payment of tax if it is made in response to a proposed liability, for example, as proposed in a revenue agent's or examiner's report, and remittance in full of the proposed liability is made.

In order to receive an interest deduction under sections 163(a) and 461(f) of the Code, the taxpayer must meet each of the requirements of section 461(f)(1) through (4).

Section 461(f)(1) provides that the taxpayer must contest an asserted liability. *X* has contested the proposed liability for tax and interest by filing a protest to deny its validity. As required under section 1.461-2(b)(2) of the regulations, there is a bona fide dispute as to the proper evaluation of the law or facts necessary to determine the existence and correctness of the amount of *X*'s liability. Further, the 30-day letter and examiner's report resulted in the existence of an asserted liability within the meaning of section 461(f)(1).

Section 461(f)(2) of the Code provides that the taxpayer must transfer money or other property to provide for the satisfaction of the asserted liability. Here, *X* has made a payment of money to the Service for satisfaction of the asserted liability. Because *X* has made a payment and not a deposit in the nature of a cash bond, the funds are placed beyond X's control within the meaning of section 1.461-2(c)(1) of the regulations.

Section 461(f)(3) of the Code provides that the contest with respect to the asserted liability must exist after the time of the transfer. Thus, the contest must have been neither settled nor abandoned at the time of the transfer. *See* section 1.461-2(d) of the regulations. In the instant situation, *X* has filed a claim for the refund of the amounts paid and continues to contest the validity of the asserted liability even after it is paid.

Section 461(f)(4) of the Code requires that, but for the fact that the asserted liability is contested, a deduction would be allowed for the taxable year of the transfer (or for an earlier taxable year) determined after application of section 461(h). This requirement is also met because *X* has made a payment to the Service for satisfaction of the asserted tax liability and associated interest.

In *Charles Leich and Co. v. United States*, 329 F.2d 649, *reh'g denied*, 333 F.2d 871 (Ct. Cl. 1964), the taxpayer made remittances in response to deficiencies proposed in a revenue agent's report. The taxpayer never signed a waiver agreeing to the assessment of all or any portion of the proposed deficiencies, no statutory notice of deficiency was ever issued to the taxpayer formally proposing any of the deficiencies, and none of the proposed deficiencies were ever assessed. The Court of Claims held that the remittances were not overpayments upon which interest could be recovered, and the portions of the remittances that represented interest could not be deducted as interest expenses in the years of the remittances.

In denying the taxpayer's motion for a rehearing, the Court of Claims considered the language currently contained in section 461(f) of the Code. The court noted that the legislative history of that language seems to indicate that before section 461(f) "becomes operative taxpayer must be put in a position where inaction on his part will cause him to have a legal obligation to pay the tax." 333 F.2d at 872. The court stated that Congress intended an asserted liability to be "something akin to a 'tax assessment.'" *Id.* The court concluded that there was no asserted liability in the *Leich* case, since there had not been an assessment with respect to the tax.

Unlike the administrative procedures of the Service when *Leich* was decided, currently, as provided in section 4.03 of Rev. Proc. 84-58, assessment of the amount remitted by a taxpayer in response to a liability proposed in a revenue agent's or examiner's report is not required for such a remittance to qualify as a payment of tax. Thus, a remittance not specifically designated as a deposit in the nature of a cash bond is considered a payment of tax if it is made in response to a revenue agent's or examiner's report, and remittance in full of the proposed liability is made, even if there has not been an assessment of the tax. Because of this change in administrative procedures, the Service will no longer follow the court's conclusion in *Leich* that, in the absence of a tax assessment, an amount proposed in a revenue agent's or examiner's report is not an asserted liability within the meaning of section 461(f) of the Code.

HOLDING

If an accrual method corporate taxpayer remits the total amount of unassessed tax proposed in a 30-day letter accompanied by an examiner's report, plus appropriate interest, does not designate the amount remitted as a deposit in the nature of a cash bond, and contests the proposed tax and related interest, both before and after making the remittance, then the portion of the remittance that is attributable to interest is deductible under sections 163(a) and 461(f) of the Code in the tax year of the remittance.

APPLICATION

This revenue ruling is not restricted to instances in which a taxpayer makes a remittance of the full amount of proposed liability. Rather, it applies also to partial remittances that constitute payments of tax and interest under section 4.03 of Rev. Proc. 84-58.

Section 467.—Certain Payments for the Use of Property or Services

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Parts 1 and 602

Limitations on Passive Activity Losses and Credits—Definition of Activity

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations relating to the definition of "activity" for purposes of applying the limitations on passive activity losses and passive activity credits and amends previously issued temporary regulations relating to the limitations. Changes to the applicable tax law were made by the Tax Reform Act of 1986, the Revenue Act of 1987, and the Technical and Miscellaneous Revenue Act of 1988. The temporary regulations affect taxpayers subject to the limitations on passive activity losses and passive activity credits and provide them

with the guidance needed to comply with the law. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations for the notice of proposed rulemaking on this subject in * * * [PS-001-89, page 1057, this Bulletin].

EFFECTIVE DATE: These regulations are effective for taxable years beginning after December 31, 1986, except for §§1.469-2T(f)(3) through (7), which are effective for taxable years beginning after December 31, 1987.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This regulation is being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the requirements for collecting information contained in this regulation have been reviewed and, pending receipt and evaluation of public comments, approved for use through January 31, 1991, by the Office of Management and Budget (OMB) under control number 1545-1037. The estimated annual burden per respondent for making a written election varies from 5 minutes to 15 minutes, depending on individual circumstances, with an estimated average of 6 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require more or less time, depending on their circumstances. For further information concerning this collection of information, and where to submit comments on this collection of information, the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-reference notice of proposed rulemaking published in * * * [PS-001-89, page 1057, this Bulletin].

Issuance of Proposed Regulation and Submission to Small Business Administration

The rules contained in this document are also being issued as proposed regulations by the notice of proposed rulemaking on this subject in * * * [page 1057, this Bulletin]. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of the rules will be submitted to the Administrator of the Small Business Administration for comment on their impact on small business.

Background

Temporary regulations under section 469 were published in the Federal Register for February 25, 1988 (53 FR 5686, T.D. 8175) [1988-1 C.B. 191]. Those regulations added §§1.469-0T, 1.469-1T, 1.469-2T, 1.469-3T, 1.469-5T, and 1.469-11T to Title 26 of the Code of Federal Regulations, and indicated that the definition of activity would be contained in §1.469-4T. This document adds rules for identifying activities in §1.469-4T and amends §§1.469-0T, 1.469-1T, 1.469-2T, 1.469-3T, 1.469-5T, and 1.469-11T in certain respects.

The temporary regulations reflect the amendment of the Internal Revenue Code by sections 501 and 502 of the Tax Reform Act of 1986 (Pub. L. 99-514) [1986-3 C.B. (Vol. 1) 1, 150, 158], which added section 469, and the amendment of section 469 by section 10212 of the Revenue Act of 1987 (Pub. L. 100-203) and sections 1005(a) and 2004(g) of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. 100-647). Section 469 disallows the passive activity loss and the passive activity credit for the taxable year. Section 469(l)(1) provides that the Secretary of the Treasury or his delegate shall prescribe such regulations as may be necessary or appropriate to carry out provisions of section 469, including regulations which specify what constitutes an activity.

Definition of activity

I. Description of provisions.

A. Scope and structure of §1.469-4T.

Section 1.469-4T provides rules under which endeavors to which the passive loss and credit limitations apply (business and rental operations) are treated as one or more activities for purposes of those limitations. In general, these rules are divided into three groups: (i) rules that identify the business and rental operations that constitute an undertaking (the undertaking rules); (ii) rules that identify the undertaking or undertakings that constitute an activity (the activity rules); and (iii) rules that apply only under certain special circumstances (the special rules).

B. Undertaking rules.

The undertaking is generally the smallest unit that can constitute an activity, and an undertaking may include diverse business and rental operations. The basic undertaking rule identifies the business and rental operations that constitute an undertaking by reference to their location and ownership. Under this rule, business and rental operations that are conducted at the same location and are owned by the same person are generally treated as part of the same undertaking. Conversely, business and rental operations generally constitute separate undertakings to the extent that they are conducted at different locations or are not owned by the same person.

In some circumstances the undertaking in which business and rental operations are included does not depend on the location at which the operations are conducted. Operations that are not conducted at any fixed place of business or that are conducted at the customer's place of business are treated as part of the undertaking with which the operations are most closely associated. In addition, operations that are conducted at a location but do not relate to the production of property at that location or to the transaction of business with customers at that location are treated, in effect, as part of the undertaking or undertakings that the operations support.

The basic undertaking rule is also modified if the undertaking determined under that rule includes both rental and nonrental operations. In such cases, the rental operations and the nonrental operations generally must be treated as separate undertakings. This rule does not apply, however, if more than 80 percent of the income of the undertaking determined under the basic rule is attributable to one class of operations (*i.e.*, rental or nonrental) or if the rental operations would not be treated as part of a rental activity because of the exceptions contained in §1.469-1T(e)(3)(ii). For purposes of this rule, short-term rentals of real property (*e.g.*, hotel-room rentals) are generally treated as nonrental operations. The regulations also treat oil and gas wells that are subject to the working-interest exception in §1.469-1T(e)(4) as separate undertakings.

C. Activity rules.

The basic activity rule treats each undertaking in which a taxpayer owns an interest as a separate activity of the taxpayer. In the case of trade or business undertakings, professional service undertakings, and rental real estate undertakings, additional rules may either require or permit the aggregation of two or more undertakings into a single activity.

Trade or business undertakings include all nonrental undertakings other than oi and gas undertakings described above and professional service undertakings described below. An aggregation rule treats trade or business undertakings that are both similar and controlled by the same interests as part of the same activity. This rule is, however, generally inapplicable to small interests held by passive investors in such undertakings, except to the extent such interests are held through the same passthrough entity. Undertakings are similar for purposes of this rule if more than half (by value) of their operations are in the same line of business (as defined in a revenue procedure that the Service is issuing in conjunction with these regulations) or if the undertakings are vertically integrated. All the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests. If, however, each member of a group of five or fewer persons owns a substantial interest in each of the undertakings, the undertakings may be rebuttably presumed to be controlled by the same interests.

Trade or business undertakings (including undertakings that are aggregated under the rules described above) are also subject to a second aggregation rule. Under this rule, undertakings that constitute an integrated business and are controlled by the same interests must be treated as part of the same activity.

Broader aggregation rules apply to professional service undertakings (*i.e.*, undertakings that predominantly involve the provision of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts or consulting). In general, professional service undertakings that are either similar, related, or controlled by the same interests must be treated as part of the same activity. The rules for determining whether trade or business undertakings are controlled by the same interests also apply with respect to professional service undertakings. Professional service undertakings are similar, however, if more than 20 percent (by value) of their operations are in the same field, and two professional service undertakings are related if one of the undertakings derives more than 20 percent of its gross income from persons who are customers of the other undertaking.

The rules for aggregating rental real estate undertakings are generally elective. They permit taxpayers to treat any combination of rental real estate undertakings as a single activity. Taxpayers may also divide their rental real estate undertakings and then treat portions of the undertakings as separate activities or recombine the portions into activities that include parts of different undertakings. The fragmentation of rental real estate into separate activities is limited by two consistency requirements. Taxpayers may not fragment their rental real estate in a manner that is inconsistent with their treatment of such property in prior taxable years or with the treatment of such property by the passthrough entity through which it is held. There are no comparable limitations on the aggregation of rental real estate into a single activity. A coordination rule provides, however, that a rental real estate undertaking must be treated as a separate activity if income or gain from the undertaking is subject to recharacterization under §1.469-2T(f)(3) (relating to the rental of nondepreciable property).

Another elective rule permits taxpayers to treat a nonrental undertaking as a separate activity even if the undertaking would be treated as part of a larger activity under the aggregation rules applicable to the undertaking. This elective rule is limited by consistency requirements similar to those that apply to rental real estate operations. Moreover, in cases in which a taxpayer elects to treat a nonrental undertaking as a separate activity, the taxpayer's level of participation (*i.e.*, material, significant, or otherwise) in the separate activity is the same as the taxpayer's level of participation in the larger activity in which the undertaking would be included but for the election.

D. Special rules.

Special rules apply to the business and rental operations of consolidated groups of corporations and publicly traded partnerships. Under these rules, a consolidated group is treated as one taxpayer in determining its activities and those of its members, and business and rental operations owned through a publicly traded partnership cannot be aggregated with operations that are not owned through the partnership.

There is also a special rule for taxable years ending before August 10, 1989. In those years, taxpayers may organize business and rental operations into activities under any reasonable method. A taxpayer will also be permitted to use any reasonable method to allocate disallowed deductions and credits among activities for the first taxable year in which the taxpayer's activities are determined under the general rules of §1.469-4T.

II. Significant policy issues.

A. Definition of undertaking.

Under the regulations, an activity of a taxpayer generally consists of either a single undertaking or a combination of two or more undertakings. Thus, the definition of undertaking should be broad enough to provide a useful intermediate step in determining a taxpayer's activities, but not so broad that unrelated business and rental operations are inappropriately combined in the same activity. Moreover, an undertaking should be defined with such precision that the business and rental operations that constitute an activity can be determined with reasonable certainty. The Service recognizes that no single definition of undertaking can reconcile these objectives in all cases. It believes, however, that a definition that strikes a reasonable balance among these competing objectives is essential to carry out the purposes of section 469 and to comply with section 469(l)(1), which directs the Service to prescribe regulations that specify what constitutes an activity.

Location and ownership are the primary factors used to identify the business and rental operations that constitute an undertaking. Thus, the number of a taxpayer's undertakings is generally limited to the number of locations at which the taxpayer conducts business directly plus the number of locations at which business is conducted by passthrough entities in which the taxpayer owns an interest. In most cases, the number of undertakings should be small enough to avoid the need for extensive application of the aggregation rules contained in the regulations. In fact, for the large number of taxpayers who conduct all their business operations at a single location, either directly or through a single passthrough entity, the determination that such operations constitute a single undertaking is generally the only analysis that the regulations require.

The use of location and ownership as the primary factors in determining undertakings also contributes to certainty in the determination of activities. While some uncertainty is likely in the case of operations that are included in an undertaking without regard to the location at which the operations are conducted (*i.e.*, operations that are not conducted at a fixed place of business, operations that are conducted at the customer's place of business, and support operations), the Service contemplates that reasonable methods will be used in determining the undertaking with which such operations are associated and that any reasonable method will be respected. The Service invites public comment regarding the desirability of detailed rules for determining the undertakings with which such operations are associated.

The Service recognizes that unrelated business operations may be treated as part of a single undertaking under these rules. In the typical case, however, operations that are conducted at the same location and are owned by the same person constitute an integrated and interrelated economic unit. Moreover, identification of the exceptional case in which such operations do not constitute an integrated and interrelated economic unit and might appropriately be treated as multiple undertakings would require additional analysis that would greatly undermine the certainty that these regulations are intended to provide. In addition, the accurate measurement of gain or loss from, and participation in, such multiple undertakings would generally require unduly burdensome allocations of income, expenses, and participation among the undertakings. For these reasons, the regulations do not provide an exception to the basic undertaking rule for those few cases in which, based on all the facts and circumstances, the operations conducted at a single location might appropriately be treated as multiple undertakings.

B. Rental undertaking.

All rental activities are passive, but other activities are passive only if the taxpayer does not materially participate. Because of this difference in treatment, it is inappropriate in most cases to combine rental operations and nonrental operations in a single activity. In the absence of a special rule, however, the basic undertaking rule would often treat rental operations and nonrental operations that are conducted at the same location as part of the same undertaking. To prevent this, the regulations provide in such cases that the rental operations and the nonrental operations are generally treated as two separate undertakings.

In some cases, however, it is appropriate to treat rental operations and nonrental operations as part of the same activity. For example, operations that are incidental to other operations should be treated as part of the same activity even if they are not in the same class (*i.e.*, rental or nonrental) as such other operations. Although all the facts and circumstances should be taken into account in determining whether operations in one class are incidental to operations in the other class, one of the most significant factors is the substantiality of the operations in each class relative to those in the other class. Moreover, even though it is generally more appropriate to separate rental and nonrental operations, the separation of those operations increases accounting burdens because of the need to allocate income, expenses, and participation between the rental and nonrental undertakings. As a result, it is difficult to justify treating rental and nonrental operations that are conducted at the same location as separate undertakings unless substantial operations are included in each undertaking. For these reasons, the rule separating rental and nonrental operations conducted at the same location does not apply if more than 80 percent of the aggregate income from the operations is attributable to one class of operations.

C. Aggregation of nonrental undertakings.

The purpose of the aggregation rules applicable to nonrental undertakings is to identify undertakings that constitute an integrated and interrelated economic unit. This purpose suggests that all the facts and circumstances should be taken into account in determining whether undertakings are aggregated into a single activity. On the other hand, a rule requiring consideration of all relevant facts and circumstances would necessitate difficult and time-consuming analyses of the relationships between undertakings and would also introduce substantial uncertainty into the identification of activities. Accordingly, the regulations generally limit the relevant factors to the two that the Service believes are most significant (similarity and control) and provide specific rules for taking those factors into account.

The first of these factors, similarity, involves either common lines of business or different stages in the production or distribution of the same product or group of products. The function of this factor is to ascertain whether the nature of the businesses in which the undertakings are engaged is such that there can be meaningful interactions among undertakings, whether in the form of economies of scale, transactions between undertakings, or otherwise. Such interactions are an essential characteristic of an integrated and interrelated economic unit and do not typically occur between businesses that are conducted at different locations unless the businesses are similar within the meaning of the regulations.

Businesses that, by their nature, could constitute an integrated and interrelated economic unit may, nevertheless, be competitors (if they involve a common line of business) or adversarial in their dealings (if they involve different stages in production or distribution) unless they serve and are coordinated by common interests. Conversely, businesses that are commonly controlled are typically integrated if the nature of the businesses is such that integration would result in economies of scale or other efficiencies. Accordingly, the second factor that must be taken into account under the regulations is control of the undertakings.

The rules for determining whether undertakings are similar and are controlled by the same interests further limit the need to consider all relevant facts and circumstances. The regulations provide bright-line tests for determining whether undertakings are similar. Under these tests, the only relevant factors are the line of business (if any) from which more than 50 percent of an undertaking's gross income is derived and whether the undertaking provides more than 50 percent (by value) of its property and services to related undertakings or obtains more than 50 percent (by value) of its property and services from a related undertaking. Moreover, the lines of business used to determine similarity are generally adapted from the Standard Industrial Classification (SIC) of the United States, and thus are consistent with an established method of distinguishing and categorizing business operations. Similarly, the regulations simplify and minimize the uncertainty in determinations of common control by providing a rebuttable presumption under which undertakings are generally presumed to be controlled by the same interests if more than 50 percent of the interests in the undertakings are owned by the members of a group of five or fewer persons.

The Service recognizes that unrelated business operations may be treated as part of the same activity under these rules. This raises essentially the same issue as treating unrelated business operations as part of the same undertaking, and the considerations taken into account in that context are equally applicable here. Accordingly, the regulations do not provide an exception to the aggregation rules for those few cases in which, based on all the facts and circumstances, similar and commonly-controlled undertakings might appropriately be treated as multiple activities.

The aggregation rules are generally inapplicable to small interests held by passive investors in the undertakings, except to the extent such interests are held through the same passthrough entity. The purpose of this exception is not to ascertain more accurately whether undertakings constitute an integrated and interrelated business activity, but rather to simplify the determination of activities for the taxpayers to whom it applies. In general, such taxpayers may accept a passthrough entity's identification and aggregation of undertakings and need not engage in further analysis to determine whether undertakings held through the entity should be aggregated with undertakings held directly or through other passthrough entities.

In some cases, businesses that are not similar within the meaning of the regulations nonetheless constitute an integrated business if all the facts and circumstances are taken into account. The Service believes that a rule requiring such businesses to be treated as a single activity, if applied after the rule aggregating similar and commonly controlled undertakings, would not affect a large number of taxpayers. Moreover, even though such a rule requires consideration of all relevant facts and circumstances, this should not be a substantial burden if the only analysis required is of the relationships among a few large groups of operations. Accordingly, the regulations provide that one or more undertakings (or groups of undertakings that have been aggregated because of their similarity) are treated as a single activity if the undertakings (or groups of undertakings) are controlled by the same interests and, based on all the facts and circumstances, their operations constitute a single integrated business.

Special aggregation rules are provided for professional service undertakings. These rules are necessary, in part, because of the material participation rule applicable to personal service activities. Thus, the rules do not permit the aggregation of professional service activities and other activities. In addition, the rules are significantly broader than those applicable to other nonrental undertakings. The Service believes that broader aggregation rules are appropriate in this context because all professional services share certain similarities and it is increasingly common for professional-service firms to provide services in more than one field. Moreover, a professional-service firm's success in one field is more likely to be attributable to expertise and goodwill developed in another field than is the case with other nonrental businesses.

D. Rental real estate undertakings.

The treatment of a taxpayer's nonrental operations as one or more activities significantly affects the computation of the taxpayer's passive activity loss and credit, primarily because material and significant participation are measured on an activity-by-activity basis and because certain rules that recharacterize income associated with nonrental operations also apply on an activity-by-activity basis. Thus, to prevent avoidance of the passive loss rules by inappropriately grouping operations into activities that do not constitute integrated and interrelated economic units, taxpayers are required to conform to precise rules for identifying the operations that are included in a nonrental activity.

The organization of rental operations into activities does not provide comparable opportunities for avoidance of the passive loss rules because the character of the income or loss from rental operations is generally not affected by the taxpayer's participation in the activity in which the operations are included and the rules recharacterizing income from rental operations generally apply on a property-by-property basis. A taxpayer's participation is relevant in computing the $25,000 offset for rental real estate activities. The purpose of the offset, however, is to provide targeted relief to moderate income taxpayers, and its amount and the taxpayers to which it applies are limited accordingly. Thus, the Service does not believe it is necessary to provide rules in these regulations that further restrict the availability of the offset.

Because specific rules similar to those applicable to nonrental operations are not necessary in the case of rental operations, the regulations generally permit taxpayers to organize their rental real estate operations into activities in any manner they find convenient or advantageous. Taxpayers are not permitted, however, to fragment their rental real estate operations into separate activities to a greater extent than in preceding taxable years or to a greater extent than such operations are fragmented by the passthrough entity through which they are held. The first limitation prevents taxpayers from treating operations as an activity in cases in which their records are not likely to contain sufficient detail to permit them to compute the suspended loss from the activity. Similarly, the second limitation prevents taxpayers from treating operations as an activity in cases in which the accounting information provided to them by the passthrough entity is unlikely to be detailed enough to permit them to compute the net income or loss from the activity. A third limitation provides that a rental real estate undertaking must be treated as a separate activity if income from the undertaking is subject to recharacterization under §1.469-2T(f)(3). This limitation is necessary to maintain the integrity of the recharacterization rule.

The rules described above apply only to rental operations involving real property. The Service invites public comment regarding the desirability of providing similar flexibility with respect to rental operations involving personal property.

E. Election to treat nonrental undertakings as separate activities.

Although a nonrental undertaking may, with other nonrental undertakings, constitute an integrated and interrelated economic unit, the synergistic effects resulting from the conduct of the undertaking as part of an integrated business generally cease when there is a disposition of the undertaking. Thus, the activity that remains after such a disposition is fundamentally different from the activity conducted before the disposition. As a result, the disposition of an undertaking will often be an appropriate time to measure economic income or loss. Moreover, an undertaking generally consists of identifiable operations that are conducted at a single location, and a disposition of such operations should, in most cases, permit the accurate measurement of the economic income or loss from the portion of a business that is conducted at the location.

For the reasons described above, the Service believes that an undertaking may constitute an appropriate unit for measuring gain or loss even in cases in which it is part of a larger integrated business. Accordingly, the regulations permit taxpayers to elect to treat a nonrental undertaking as a separate activity (other than for purposes of measuring participation) even though under the aggregation rules the undertaking would be treated as part of a larger activity. This election is not available, however, if the taxpayer treated the undertaking as part of a larger activity in a preceding taxable year or if the passthrough entity through which the undertaking is held treats it as part of a larger activity. The purpose of these exceptions is the same as the purpose of the similar limitations that apply to the election to treat rental real estate operations as separate activities.

In some cases, an undertaking may be conducted in a manner that enhances the value of other undertakings to the detriment of its own value. In such cases, the economic income or loss from an undertaking cannot be accurately measured at the time of its disposition. Accordingly, the Service is considering a rule that would provide in such cases that a disposition of a taxpayer's interest in such an undertaking is not treated as a disposition of the taxpayer's entire interest in an activity for purposes of section 469(g). If adopted, this rule would be contained in the regulations to be issued under §1.469-6T (relating to the treatment of losses upon certain dispositions of passive and former passive activities).

Amendments made to existing regulations

This document also amends portions of the existing regulations under section 469 to coordinate those regulations with the definition of activity contained in §1.469-4T and to make certain clarifying and corrective changes to the existing regulations. The significant changes made to the existing regulations by these amendments are described below.

I. Section 1.469-1T.

The determination of whether an activity is a rental activity under §1.469-1T(e)(3) generally requires the computation of an average period of customer use for the activity. The average period of customer use, as defined in §1.469-1T(e)(3)(iii), is not weighted to reflect differences in the rental value of the activity's property. Thus, property that produces an insignificant amount of an activity's rental income might significantly affect the activity's average period of customer use. Therefore, this document amends the definition of average period of customer use to take into account the amount of income generated by an item of property.

This document also amends the rules contained in §1.469-1T(f)(4) (relating to the allocation of disallowed deductions and credits among activities) to reflect the possibility that the composition of an activity may change from year to year.

II. Section 1.469-2T.

This document amends §1.469-2T(c) and (d) to provide rules for characterizing the gain and loss from the sale of property held in a dealing activity at the time of the sale. For purposes of characterizing the gain or loss from the sale of any such property that was used predominantly in one or more nondealing activities and was not acquired for the principal purpose of dealing in such property, the rules provide that holding the property in the dealing activity is treated as the use of the property in the last nondealing activity in which such property was used before its sale. In all other cases, the rules provide that the property is treated as used in the dealing activity, and treat such property as used in a dealing activity for any period during which it is simultaneously offered for sale to customers and used in a nondealing activity. These rules replace the provision contained in §1.469-1T(e)(3)(vi)(D) of the existing regulations. Under that provision, certain rentals of property were treated as incidental to an activity of dealing in such property rather than as part of a rental activity.

The Service has received numerous comments regarding the income-recharacterization rule contained in §1.469-2T(f)(5), relating to the treatment of net income from certain property rented incidental to a development activity. Some commentators have argued that there are a substantial number of cases in which the gain on the disposition of property that is used in a rental activity for less than 24 months after its development is predominantly attributable to its use in a rental activity rather than to the development of the property. Other commentators have argued that there should be no special recharacterization rule with respect to development activities. After careful consideration, it has been determined that §1.469-2T(f)(5) should apply only if the use of an item of property in an activity involving the rental of such property commenced less than 12 months prior to its sale (or contracting for its sale). Accordingly, this document amends the existing regulations to provide for this result.

III. Section 1.469-5T.

Under §1.469-4T, the business and rental operations that constitute an activity may change from year to year. The existing regulations do not address how the material participation tests that are based on participation in prior years will apply in cases in which such changes occur. Accordingly, this document amends §1.469-5T to provide that, for purposes of the material participation tests that are based on participation in prior years, a taxpayer is treated as materially participating in an activity for a prior taxable year if the activity includes an undertaking involving substantially the same operations as an undertaking that was included in an activity in which the taxpayer materially participated during such prior taxable year.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

* * * * * *

Adoption of amendments to the regulations

Accordingly, Title 26, Chapter 1, Parts 1 and 602 of the Code of Federal Regulations are amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.469-4T also issued under 26 U.S.C. 469(l)(1).

Par. 2. Section 1.469-0T is revised to read as follows:

§ 1.469-0T Table of contents (temporary).

This section lists the captions that appear in the temporary regulations under section 469.

§ 1.469-1T General rules (temporary).

(a) Passive activity loss and credit disallowed.

(1) In general.

(2) Exceptions.

(b) Taxpayers to whom these rules apply.

(c) Cross references.
(1) Definition of passive activity.
(2) Passive activity loss.
(3) Passive activity credit.
(4) Effect of rules for other purposes.
(5) Special rule for oil and gas working interests.
(6) Treatment of disallowed losses and credits.
(7) Corporations subject to section 469.
(8) Consolidated groups.
(9) Joint returns.
(10) Material participation.
(11) Effective date and transition rules.
(12) Future regulations.
(d) Effect of section 469 and the regulations thereunder for other purposes.
(1) Treatment of items of passive activity income and gain.
(2) Coordination with sections 613A(d) and 1211.
(3) Treatment of passive activity losses.
(e) Definition of ''passive activity.''
(1) In general.
(2) Trade or business activity.
(3) Rental activity.
(i) In general.
(ii) Exceptions.
(iii) Average period of customer use.
(A) In general.
(B) Average use factor.
(C) Average period of customer use for class of property.
(D) Period of customer use.
(E) Class of property.
(F) Gross rental income and daily rent.
(iv) Significant personal services.
(A) In general.
(B) Excluded services.
(v) Extraordinary personal services.
(vi) Rental of property incidental to a nonrental activity of the taxpayer.
(A) In general.
(B) Property held for investment.
(C) Property used in a trade or business.
(D) Lodging rented for convenience of employer.
(E) Unadjusted basis.
(vii) Property made available for use in a nonrental activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest.
(viii) Examples.
(4) Special rule for oil and gas working interests.
(i) In general.
(ii) Exception for deductions attributable to a period during which liability is limited.
(A) In general.
(B) Coordination with rules governing the identification of disallowed passive activity deductions.
(C) Meaning of certain terms.
(*1*) Allocable deductions.
(*2*) Disqualified deductions.
(*3*) Net loss.
(*4*) Ratable portion.
(iii) Examples.
(iv) Definition of ''working interest.''
(v) Entities that limit liability.
(A) General rule.
(B) Other limitations disregarded.
(C) Examples.
(vi) Cross reference to special rule for income from certain oil or gas properties.
(5) Rental of dwelling unit.
(6) Activity of trading personal property.
(i) In general.
(ii) Personal property.
(iii) Example.
(f) Treatment of disallowed passive activity losses and credits.
(1) Scope of this paragraph.
(2) Identification of disallowed passive activity deductions.
(i) Allocation of disallowed passive activity loss among activities.
(A) General rule.
(B) Loss from an activity.
(C) Significant participation passive activities.
(D) Examples.
(ii) Allocation within loss activities.
(A) In general.
(B) Excluded deductions.
(iii) Separately identified deductions.
(3) Identification of disallowed credits from passive activities.
(i) General rule.
(ii) Coordination rule.
(iii) Separately identified credits.
(4) Carryover of disallowed deductions and credits.
(i) In general.
(ii) Operations continued through C corporations or similar entities.
(iii) Examples.
(g) Application of these rules to C corporations.
(1) In general.
(2) Definitions.
(3) Participation of corporations.
(i) Material participation.
(ii) Significant participation.
(iii) Participation of individual.
(4) Modified computation of passive activity loss in the case of closely held corporations.
(i) In general.
(ii) Net active income.
(iii) Examples.
(5) Allowance of passive activity credit of closely held corporations to extent of net active income tax liability.
(i) In general.
(ii) Net active income tax liability.
(h) Special rules for affiliated group filing consolidated return.
(1) In general.
(2) Definitions.
(3) Disallowance of consolidated group's passive activity loss or credit.
(4) Status and participation of members.
(i) Determination by reference to status and participation of group.
(ii) Determination of status and participation of consolidated group.
(5) Modification of rules for identifying disallowed passive activity deductions and credits.
(i) Identification of disallowed deductions.
(ii) Ratable portion of disallowed passive activity loss.
(iii) Identification of disallowed credits.
(6) Transactions between members of a consolidated group.
(i) Scope.
(ii) Recharacterization of gain or loss from intercompany transactions other than deferred intercompany transactions.
(A) In general.
(B) Recharacterization of gain or loss as portfolio items.
(iii) Deferred intercompany transactions.
(A) In general.
(B) Deferred intercompany transactions involving property subject to depreciation, amortization, or depletion.
(C) Restoration of deferred gain or loss on dispositions.

(D) Certain recharacterized items treated as portfolio items.

(E) Property involved in deferred intercompany transaction.

(iv) Definitions.

(A) Deferred intercompany transaction.

(B) Directly related.

(C) Intercompany transaction.

(D) Purchasing member.

(E) Selling member.

(7) Disposition of stock of a member of an affiliated group.

(8) Dispositions of property used in multiple activities.

(i) [Reserved.]

(j) Spouses filing joint return.

(1) In general.

(2) Exceptions to treatment as one taxpayer.

(i) Identification of disallowed deductions and credits.

(ii) Treatment of deductions disallowed under sections 704(d), 1366(d), and 465.

(iii) Treatment of losses from working interests.

(3) Joint return no longer filed.

(4) Participation of spouses.

(k) Former passive activities and changes in status of corporations. [Reserved.]

§1.469-2T Passive activity loss (temporary).

(a) Scope of this section.

(b) Definition of passive activity loss.

(1) In general.

(2) Cross references.

(c) Passive activity gross income.

(1) In general.

(2) Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity.

(i) In general.

(A) Treatment of gain.

(B) Dispositions of partnership interests and S corporation stock.

(C) Interest in property.

(D) Examples.

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition.

(iii) Disposition of substantially appreciated property formerly used in nonpassive activity.

(A) In general.

(B) Date of disposition.

(C) Substantially appreciated property.

(D) Investment property.

(E) Coordination with paragraph (c)-(2)(ii) of this section.

(F) Coordination with section 163(d).

(G) Examples.

(iv) Taxable acquisitions.

(v) Property held for sale to customers.

(A) Sale incidental to another activity.

(*1*) Applicability.

(*i*) In general.

(*ii*) Principal purpose.

(*2*) Dealing activity not taken into account.

(B) Use in a nondealing activity incidental to sale.

(C) Examples.

(3) Items of portfolio income specifically excluded.

(i) In general.

(ii) Gross income derived in the ordinary course of a Trade or business.

(iii) Special rules.

(A) Income from property held for investment by dealer.

(B) Royalties derived in the ordinary course of the trade or business of licensing intangible property.

(*1*) In general.

(*2*) Substantial services or costs.

(*i*) In general.

(*ii*) Exception.

(*iii*) Expenditures taken into account.

(*3*) Passthrough entities.

(*4*) Cross reference.

(C) Mineral production payments.

(iv) Examples.

(4) Items of personal service income specifically excluded.

(i) In general.

(ii) Example.

(5) Income from section 481 adjustment.

(i) In general.

(ii) Positive section 481 adjustments.

(iii) Ratable portion.

(6) Gross income from certain oil or gas properties.

(i) In general.

(ii) Gross and net passive income from the property.

(iii) Property.

(iv) Examples.

(7) Other items specifically excluded.

(d) Passive activity deductions.

(1) In general.

(2) Exceptions.

(3) Interest expense.

(4) Clearly and directly allocable expenses.

(5) Treatment of loss from disposition.

(i) In general.

(ii) Disposition of property used in more than one activity in 12-month period preceding disposition.

(iii) Other applicable rules.

(A) Applicability of rules in paragraph (c)(2).

(B) Dispositions of partnership interests and S corporation stock.

(6) Coordination with other limitations on deductions that apply before section 469.

(i) In general.

(ii) Proration of deductions disallowed under basis limitations.

(A) Deductions disallowed under section 704(d).

(B) Deductions disallowed under section 1366(d).

(iii) Proration of deductions disallowed under at-risk limitation.

(iv) Coordination of basis and at-risk limitations.

(v) Separately identified items of deduction and loss.

(7) Deductions from section 481 adjustment.

(i) In general.

(ii) Negative section 481 adjustments.

(iii) Ratable portion.

(8) Taxable year in which item arises.

(e) Special rules for partners and S corporation shareholders.

(1) In general.

(2) Payments under sections 707(a), 707(c), and 736(b).

(i) Section 707(a).

(ii) Section 707(c).

(iii) Payments in liquidation of a partner's interest in partnership property.

(A) In general.

(B) Payments in liquidation of a partner's interest in unrealized receivables and goodwill under section 736(a).

(3) Sale or exchange of interest in passthrough entity.

(i) Application of this paragraph (e)-(3).

(ii) General rule.

(A) Allocation among activities.

(B) Ratable portion.

§1.469-11T Effective date and transition rules (temporary).

(a) Effective date.

(1) In general.

(2) Application of certain income recharacterization rules.

(i) In general.

(ii) Property rented to a nonpassive activity.

(3) Qualified low-income housing projects.

(4) Effect of events occurring in years prior to 1987.

(5) Examples.

(b) Transitional rule for pre-enactment loss and pre-enactment credit.

(1) In general.

(2) Applicable percentage.

(3) Pre-enactment loss.

(4) Pre-enactment credit.

(5) Examples.

(c) Definition of pre-enactment interest.

(1) General rule.

(2) Qualified interest.

(i) In general.

(ii) Stock in a C corporation.

(3) Pre-enactment activity.

(i) In general.

(ii) Character before 1987 irrelevant.

(4) Examples.

(5) Effect of changes in a taxpayer's interest in a pre-enactment activity.

(i) In general.

(ii) Partnership terminations under section 708(b)(1)(B).

(iii) Examples.

(6) Special rule for beneficiaries of trusts or estates.

(i) In general.

(ii) Interests distributed to beneficiaries.

(7) Written binding contract.

(i) In general.

(ii) Special rule for contract of partnership or S corporation.

(iii) Application of rule to partnership agreements.

§1.469-1T [Amended]

Par. 3. Section 1.469-1T is amended as follows:

1. Paragraph (d)(2) is amended by revising the heading and first sentence to read as follows:

(d) * * *

(2) *Coordination with sections 613A(d) and 1211.* A passive activity deduction that is not disallowed for the taxable year under section 469 and the regulations thereunder may nonetheless be disallowed for the taxable year under section 613A(d) or 1211. * * *

* * * * *

2. Paragraph (e)(2) is revised to read as follows:

(e) * * *

(2) *Trade or business activity.* An activity (within the meaning of §1.469-4T) is a trade or business activity for a taxable year if and only if such activity—

(i) Is not a rental activity for such taxable year; and (ii) Involves the conduct during such taxable year of business or rental operations (within the meaning of §1.469-4T(b)(2)(ii)) that are not treated under paragraph (e)(3)(vi)(B) of this section as incidental to an activity of holding property for investment.

* * * * *

3. Paragraph (e)(3)(iii) is revised to read as follows:

(e) * * *

(3) * * *

(iii) *Average period of customer use*—(A) *In general.* For purposes of this paragraph (e)(3), the average period of customer use for property held in connection with an activity (the "activity's average period of customer use") is the sum of the average use factors for each class of property held in connection with the activity.

(B) *Average use factor.* The average use factor for a class of property held in connection with an activity is the average period of customer use for such class of property multiplied by the fraction obtained by dividing—

(*1*) The activity's gross rental income attributable to such class of property; by

(*2*) The activity's gross rental income.

(C) *Average period of customer use for class of property.* In determining an activity's average period of customer use for a taxable year, the average period of customer use for a class of property held in connection with an activity is determined by dividing—

(*1*) The aggregate number of days in all periods of customer use for property in such class (taking into account only periods that end during such taxable year or that include the last day of such taxable year); by

(*2*) The number of such periods of customer use.

(D) *Period of customer use.* Each period during which a customer has a continuous or recurring right to use an item of property held in connection with the activity (without regard to whether the customer uses the property for the entire period or whether such right to use the property is pursuant to a single agreement or to renewals thereof) is treated for purposes of this paragraph (e)(3)(iii) as a separate period of customer use. The duration of a period of customer use that includes the last day of a taxable year may be determined on the basis of reasonable estimates.

(E) *Class of property.* Taxpayers may organize property into classes for purposes of this paragraph (e)(3)(iii) using any method under which items of property for which the daily rent differs significantly are not included in the same class.

(F) *Gross rental income and daily rent.* In determining an activity's average period of customer use for a taxable year—

(*1*) The activity's gross rental income is the gross income from the activity for such taxable year taking into account only income that is attributable to amounts paid for the use of property;

(*2*) The activity's gross rental income attributable to a class of property is the gross income from the activity for such taxable year taking into account only income that is attributable to amounts paid for the use of property in such class; and

(*3*) The daily rent for items of property may be determined on any basis that reasonably reflects differences during the taxable year in the amounts ordinarily paid for one day's use of such items of property.

* * * * *

4. Paragraph (e)(3)(vi) is amended by removing paragraph (e)(3)(vi)(D) and by redesignating paragraph (e)(3)(vi)(E) and (F) as paragraph (e)(3)(vi)(D) and (E).

5. Paragraph (e)(4)(iv) is revised to read as follows:

(e) * * *

(4) * * *

(iv) *Definition of "working interest."* For purposes of section 469 and the regulations thereunder, the term "working interest" means a working or operating mineral interest in any tract or parcel of land (within the meaning of §1.612-4(a)).

* * * * *

6. Paragraph (e)(5) is revised to read as follows:

(e) * * *

(5) *Rental of dwelling unit.* An activity involving the rental of a dwelling unit is not a passive activity of a taxpayer for any taxable year in which section 280A(c)(5) applies to the taxpayer's use of such dwelling unit.

* * * * *

7. Paragraph (f)(4) is revised to read as follows:

(f) * * *

(4) *Carryover of disallowed deductions and credits*—(i) *In general.* If any deductions or credits from an activity of a taxpayer (the loss activity) are disallowed for a taxable year under paragraph (f)(2) or (f)(3) of this section—

(A) The disallowed deductions or credits shall be allocated among the taxpayer's activities for the succeeding taxable year in a manner that reasonably reflects the extent to which each such activity continues the business and rental operations that constituted the loss activity; and

(B) The disallowed deductions or credits allocated to an activity under paragraph (f)(4)(i)(A) of this section shall be treated as deductions or credits from such activity for the succeeding taxable year.

(ii) *Operations continued through C corporations or similar entities.* (A) If a taxpayer continues part or all of the business and rental operations that constitute a loss activity through a C corporation or similar entity, the taxpayer's interest in such entity shall be treated for purposes of this paragraph (f)(4) as an interest in a passive activity that continues such operations. An entity is similar to a C corporation for this purpose if the owners of interests in the entity derive only portfolio income (within the meaning of §1.469-2T(c)(3)(i)) from such interests.

(B) If, after the application of this paragraph (f)(4)(ii), an interest in a C corporation or similar entity is a loss activity for a taxable year, such interest shall be treated for purposes of applying this paragraph (f)(4) in the succeeding taxable year as an interest in a passive activity that continues the business and rental operations of such loss activity.

(iii) *Examples.* The following examples illustrate the application of this paragraph (f)(4). In each example, the taxpayer is an individual whose taxable year is the calendar year.

Example (1). (i) The taxpayer owns interests in a convenience store and an apartment building. In each taxable year, the taxpayer's interests in the convenience store and the apartment building are treated under §1.469-4T as interests in two separate passive activities of the taxpayer. A $5,000 loss from the convenience-store activity and a $3,000 loss from the apartment-building activity are disallowed under paragraph (f)(2) of this section for 1989.

(ii) Under paragraph (f)(2) of this section, the $5,000 loss from the convenience-store activity is allocated among the passive activity deductions from that activity for 1989, and the $3,000 loss from the apartment-building activity is treated similarly. In 1990, the business and rental operations that constituted the convenience-store activity are continued in a single activity, and the business and rental operations that constituted the apartment-building activity are similarly continued in a separate activity. Thus, the disallowed deductions from the convenience-store activity for 1989 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's convenience-store activity in 1990. Similarly, the disallowed deductions from the apartment-building activity for 1989 must be allocated to the taxpayer's apartment-building activity in 1990. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the convenience-store activity in 1990 are treated as deductions from that activity for 1990, and the disallowed deductions allocated to the apartment-building activity for 1990 are treated as deductions from the apartment-building activity for 1990.

Example (2). (i) In 1991, the taxpayer acquires a restaurant and a catering service. In 1991 and 1992, the restaurant and the catering service are conducted at the same location, and the taxpayer's interests in the restaurant and catering service are treated under §1.469-4T as an interest in a single passive activity of the taxpayer. A $10,000 loss from the activity is disallowed under paragraph (f)-(2) of this section for 1992. In 1993, the restaurant and the catering service are conducted at different locations, and the taxpayer's interests in the restaurant and the catering service are treated under §1.469-4T as interests in two separate passive activities of the taxpayer.

(ii) Under paragraph (f)(2) of this section, the $10,000 loss from the restaurant and catering activity is allocated among the passive activity deductions from that activity for 1992. In 1993, the business and rental operations that constituted the restaurant and catering activity are continued, but are treated as two separate activities under §1.469-4T. Thus, the disallowed deductions from the restaurant and catering activity for 1992 must be allocated under paragraph (f)(4)(i)(A) of this section between the restaurant activity and the catering activity in 1993 in a manner that reasonably reflects the extent to which each of the activities continues the operations of the restaurant and catering activity. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the restaurant activity in 1993 are treated as deductions from the restaurant activity for 1993, and the disallowed deductions allocated to the catering activity in 1993 are treated as deductions from the catering activity for 1993.

Example (3). (i) The facts are the same as in example (2). In addition, a $20,000 loss from the activity was disallowed under paragraph (f)(2) of this section for 1991, and the gross income and deductions (including deductions that were disallowed for 1991 under paragraph (f)(2) of this section) from the restaurant and catering service for 1991 and 1992 are as follows:

	Restaurant	*Catering service*
1991		
Gross income	$20,000	$60,000
Deductions	40,000	60,000
Net income (loss)	($20,000)	—
1992		
Gross income	$40,000	$50,000
Deductions	30,000*	70,000**
Net income (loss)	$10,000	($20,000)

*Includes $8,000 of deductions that were disallowed for 1991 ($20,000 × $40,000/$100,000).

**Includes $12,000 of deductions that were disallowed for 1991 ($20,000 × $60,000/$100,000).

(ii) Under paragraph (f)(4)(i)(A) of this section, the disallowed deductions from the restaurant and catering operations must be allocated among the taxpayer's activities for the succeeding year in a manner that reasonably reflects the extent to which such activities continue the restaurant and catering operations. The remainder of this example describes a number of allocation methods that will ordinarily satisfy the requirement of paragraph (f)-(4)(i)(A) of this section. One or more of the allocation methods described in this example may, however, be unreasonable in certain cases. In addition, the description of specific allocation methods in this example does not preclude the use of other reasonable allocation methods for purposes of paragraph (f)(4)(i)(A) of this section.

(iii) Ordinarily, an allocation of disallowed deductions from the restaurant operations to the restaurant activity and disallowed deductions from the catering operations to the catering activity would satisfy the requirement of paragraph (f)(4)-(i)(A) of this section. Under paragraph (f)(2)(ii) of this section, a ratable portion of each deduction from the restaurant and catering activity is disallowed for 1992. Thus, $3,000 of the 1992 deductions from the restaurant operations are disallowed ($10,000 × $30,000/$100,000), and $7,000 of the 1992 deductions from the catering operations are disallowed ($10,000 × $70,000/$100,000). Thus, the taxpayer can ordinarily treat $3,000 of the disallowed deductions as deductions from the restaurant activity for 1993, and $7,000 of the disallowed deductions as deductions from the catering activity for 1993.

(iv) Ordinarily, an allocation of disallowed deductions between the restaurant and catering activities in proportion to the losses from the restaurant operations and the catering operations for 1992 would also satisfy the requirement of paragraph (f)(4)(i)(A) of this section. If the restaurant operations and the catering operations had been treated as separate activities in 1992, the restaurant activity would have had net income of $10,000 and the catering activity would have had a $20,000 loss. Thus, the taxpayer can ordinarily treat all $10,000 of disallowed deductions as deductions from the catering activity for 1993.

(v) Ordinarily, an allocation of disallowed deductions between the restaurant and catering activities in proportion to the losses from the restaurant operations and catering operations for 1992 (determined as if the restaurant operations and the catering operations had been separate activities for all taxable years) would also satisfy the requirement of paragraph (f)(4)(i)(A) of this section. If the restaurant operations and the catering operations had been treated as separate activities for all taxable years, the entire $20,000 loss from the restaurant operations in 1991 would have been allocated to the restaurant activity in 1992, and the gross income and deductions from such separate activities for 1992 would be as follows:

	Restaurant	Catering service
Gross income	$40,000	$50,000
Deductions	42,000	58,000
Net income (loss)	($2,000)	($8,000)

Thus, the taxpayer can ordinarily treat $2,000 of the disallowed deductions as deductions from the restaurant activity for 1993, and $8,000 of the disallowed deductions as deductions from the catering activity for 1993.

Example (4). (i) The taxpayer is a partner in a law partnership that acquires a building in December 1988 for use in the partnership's law practice. In taxable year 1989, four floors that are not needed in the law practice are leased to tenants; in taxable year 1990, two floors are leased to tenants; in taxable years after 1990, only one floor is leased to tenants. Under §1.469-4T(d), the law practice and the rental operations with respect to the leased property are treated as a trade or business activity and a separate rental activity for taxable years 1989 and 1990 and as a single trade or business activity for taxable years after 1990. The trade or business activity is not a passive activity of the taxpayer. The rental activity, however, is a passive activity. Under paragraph (f)(2) of this section, a $12,000 loss from the rental activity is disallowed for 1989, and a $9,000 loss from the rental activity is disallowed for 1990.

(ii) Under paragraph (f)(2) of this section, the $12,000 loss from the rental activity for 1989 is allocated among the passive activity deductions from that activity for 1989. In 1990, the business and rental operations that constituted the rental activity are continued in two separate activities. Only the business and rental operations with respect to two floors of the building are continued in the rental activity, and the other two floors (*i.e.*, the floors that were leased to tenants in 1989, but not in 1990) are used in the taxpayer's law-practice activity. Thus, the disallowed deductions from the rental activity for 1989 must be allocated under paragraph (f)(4)(i)(A) of this section between the rental activity and the law-practice activity in a manner that reasonably reflects the extent to which each of the activities continues the operations with respect to the four floors that were leased to tenants in 1989. In these circumstances, the requirement of paragraph (f)(4)(i)(A) of this section would ordinarily be satisfied by any of the allocation methods illustrated in example (3) or by an allocation of 50 percent of the disallowed deductions ($6,000) to each activity. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the rental activity in 1990 are treated as deductions from the rental activity for 1990, and the disallowed deductions allocated to the law-practice activity in 1990 are treated as deductions from the law-practice activity for 1990.

(iii) Under paragraph (f)(2) of this section, the $9,000 loss from the rental activity for 1990 is allocated among the passive activity deductions from that activity for 1990. In 1991, the business and rental operations that constituted the rental activity are continued in the taxpayer's law-practice activity. Thus, the disallowed deductions from the rental activity for 1990 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's law-practice activity in 1991. Under paragraph (f)(4)(i)(B) of this section, the disallowed deductions allocated to the law-practice activity are treated as deductions from the law-practice activity for 1991.

(iv) Rules relating to former passive activities will be contained in paragraph (k) of this section. Under those rules, any disallowed deductions from the rental activity that are treated as deductions from the law-practice activity will be treated as unused deductions that are allocable to a former passive activity.

Example (5). (i) The taxpayer owns stock in a corporation that is an S corporation for the taxpayer's 1991 taxable year and a C corporation thereafter. The only activity of the corporation is a rental activity. For 1991, the taxpayer's pro rata share of the corporation's loss from the rental activity is $5,000, and the entire loss is disallowed under paragraph (f)(2) of this section.

(ii) Under paragraph (f)(2) of this section, the taxpayer's $5,000 loss from the rental activity is allocated among the taxpayer's deductions from that activity for 1991. In 1992, the business and rental operations that constituted the rental activity are continued through a C corporation, and the taxpayer's interest in the C corporation is treated under paragraph (f)(4)(ii)(A) of this section as a passive activity that continues such operations (the C corporation activity). Thus, the disallowed deductions from the rental activity for 1991 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's C corporation activity in 1992, and are treated under paragraph (f)(4)(i)(B) of this section as deductions from the C corporation activity for 1992.

(iii) Treating the taxpayer's interest in the C corporation as an interest in a passive activity that continues the operations of the rental activity does not change the character of the taxpayer's dividend income from the C corporation. Thus, the taxpayer's dividend income is portfolio income (within the meaning of §1.469-2T(c)(3)(i)) and is not included in passive activity gross income. Accordingly, the taxpayer's loss from the C corporation activity for 1992 is $5,000.

Example (6). (i) The facts are the same as in example (5), except that the taxpayer has income from other passive activities for 1992, and only 60 percent of the taxpayer's loss from the C corporation activity ($3,000) is disallowed for 1992 under paragraph (f)(2) of this section.

(ii) Under paragraph (f)(2) of this section, the $3,000 disallowed loss from the C corporation activity is allocated among the passive activity deductions from that activity for 1992. In effect, therefore, 60 percent of each disallowed deduction from the rental activity for 1991 is again disallowed for 1992.

(iii) Under paragraph (f)(4)(ii)(B) of this section, the taxpayer's interest in the C corporation is treated for years after 1992 as an interest in a passive activity that continues the business and rental operations of the C corporation activity. Thus, the disallowed deductions from the C corporation activity for 1992 must be allocated under paragraph (f)(4)(i)(A) of this section to the taxpayer's C corporation activity in 1993, and are treated under paragraph (f)(4)(i)(B) of this section as deductions from that activity for 1993.

* * * * *

8. Paragraph (g)(4)(ii)(C) is amended by removing "§1.469-2T(c)(2)(iii)(E)" and adding in its place "§1.469-2T(c)(2)(iii)(F)".

9. Paragraph (h)(4) is amended by removing the word "material" from the captions of paragraphs (h)(4) and (h)(4)(ii) and by adding the words "or significantly" immediately after the word "materially" in paragraph (h)(4)(ii).

§1.469-2T [Amended]

Par. 4. Section 1.469-2T is amended as follows:

1. Paragraphs (c)(2)(iii)(D) through (c)(2)(iii)(F) are redesignated as paragraphs (c)(2)(iii)(E) through (c)(2)(iii)(G) and the following new paragraph (c)(2)(iii)(D) is added:

(c) * * *

(2) * * *

(iii) * * *

(d) *Investment property.* For purposes of this paragraph (c)(2)(iii), an interest in property shall be treated as an interest in property used in an activity other than a passive activity and as an interest in property held for investment for any period during which such interest is held through a C corporation or similar entity. An entity is similar to a C corporation for this purpose if the owners of interests in the entity derive only portfolio income (within the meaning of paragraph (c)(3)(i) of this section) from such interests.

* * * * *

2. Paragraph (c)(2)(iii)(G) (as redesignated by this Treasury decision) is revised to read as follows:

(c) * * *

(2) * * *

(iii) * * *

(G) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(iii):

Example (1). A acquires a building on January 1, 1987, and uses the building in a trade or business activity in which A materially participates until March 31, 1998. On April 1, 1998, A leases the building to B. On December 31, 1999, A sells the building. At the time of the sale, A's interest in the building is substantially appreciated (within the meaning of paragraph (c)(2)(iii)(C) of this section). Assuming A's lease of the building to B constitutes a rental activity (within the meaning of §1.469-1T(e)(3)), the building is used in a passive activity for 21 months (April 1, 1998, through December 31, 1999). Thus, the building was not used in a passive activity for the entire 24-month period ending on the date of the sale. In addition, the 21-month period during which the building was used in a passive activity is less than 20 percent of A's holding period for the building (13 years). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

Example (2). (i) A, an individual, is a stockholder of corporation X. X is a C corporation until December 31, 1990, and is an S corporation thereafter. X acquires a building on January 1, 1990, and sells the building on March 1, 1991. At the time of the sale, A's interest in the building held through X is substantially appreciated (within the meaning of paragraph (c)(2)(iii)(C) of this section). The building is leased to various tenants at all times during the period in which it is held by X. Assume that the lease of the building would constitute a rental activity (within the meaning of §1.469-1T(e)(3)) with respect to a person that holds the building directly or through an S corporation.

(ii) Paragraph (c)(2)(iii)(D) of this section provides that an interest in property is treated for purposes of this paragraph (c)(2)(iii) as used in an activity other than a passive activity and as held for investment for any period during which such interest is held through a C corporation. Thus, for purposes of determining the character of A's gain from the sale of the building, A's interest in the building is treated as an interest in property held for investment for the period from January 1, 1990 to December 31, 1990, and as an interest in property used in a passive activity for the period from January 1, 1991 to February 28, 1991.

(iii) A's interest in the building was not used in a passive activity for the entire 24-month period ending on the date of the sale. In addition, the 2-month period during which A's interest in the building was used in a passive activity is less than 20 percent of the period during which A held an interest in the building (14 months). Therefore, the gain from the sale is treated under this paragraph (c)(2)(iii) as not from a passive activity.

(iv) Under paragraph (c)(2)(iii)(F) of this section, gain that is treated as nonpassive under this paragraph (c)(2)(iii) is treated as portfolio income (within the meaning of paragraph (c)(3)(i) of this section) if the gain is from the disposition of an interest in property that was held for investment for more than 50 percent of the period during which the taxpayer held such interest in activities other than passive activities. In this case, A's interest in the building was treated as held for investment for the entire period during which it was used in activities other than passive activities (*i.e.*, the 12-month period from January 1, 1990 to December 31, 1990). Accordingly, A's gain from the sale is treated under this paragraph (c)(2)(iii) as portfolio income.

* * * * *

3. New paragraphs (c)(2)(iv) and (c)-(2)(v) are added to read as follows:

(c) * * *

(2) * * *

(iv) *Taxable acquisitions.* If a taxpayer acquires an interest in property in a transaction other than a nonrecognition transaction (within the meaning of section 7701(a)(45)), the ownership and use of such interest in property before such transaction shall not be taken into account for purposes of applying this paragraph (c)(2) to any subsequent disposition of such interest in property by the taxpayer. For example, if a taxpayer is a partner in a partnership that owns an interest in property and the taxpayer acquires such interest in property from the partnership in a fully taxable sale or exchange, such interest shall be treated, in applying this paragraph (c)(2) to any subsequent disposition of such interest, as an interest in property that was not held by the taxpayer until the date on which such interest was acquired from the partnership and that was not used before such date in any activity of the taxpayer.

(v) *Property held for sale to customers*—(A) *Sale incidental to another activity*—(*1*)—*Applicability*—(*i*) *In general.* This paragraph (c)(2)(v)(A) applies to the disposition of a taxpayer's interest in property if and only if—

(*A*) At the time of the disposition, the taxpayer holds the interest in property in an activity that involves holding similar property that is treated for purposes of section 1221(1) as property held primarily for sale to customers in the ordinary course of a trade or business (a "dealing activity");

(*B*) One or more other activities of the taxpayer do not involve holding similar property for sale to customers in the ordinary course of a trade or business ("nondealing activities") and the interest in property was used in such activity or activities for more than 80 percent of the period during which the taxpayer held such interest in property; and

(*C*) The interest in property was not acquired and held by the taxpayer for the principal purpose of selling such interest to customers in the ordinary course of a trade or business.

(*ii*) *Principal purpose.* For purposes of this paragraph (c)(2)(v)(A), a taxpayer is rebuttably presumed to have acquired and held an interest in property for the principal purpose of selling such interest to customers in the ordinary course of a trade or business if—

(*A*) The period during which the interest in property was used in nondealing activities of the taxpayer does not exceed the lesser of 24 months or 20 percent of the recovery period (within the meaning of section 168) applicable to such property; or

(*B*) The interest in property was simultaneously offered for sale to customers and used in a nondealing activity of the taxpayer for more than 25 percent of the period during which such interest in property was used in nondealing activities of the taxpayer.

For purposes of the preceding sentence, an interest in property shall not be considered to be offered for sale to customers solely because a lessee of the property has been granted an option to purchase the property.

(*2*) *Dealing activity not taken into account.* If this paragraph (c)(2)(v)(A) applies to the disposition of a taxpayer's interest in property, holding such interest in the dealing activity shall, for purposes of this paragraph (c)(2), be treated as the use of such interest in the last nondealing activity of the taxpayer in which such interest in property was used prior to its disposition.

(B) *Use in a nondealing activity incidental to sale.* If paragraph (c)(2)(v)(A) of this section does not apply to the disposition of a taxpayer's interest in property that is held in a dealing activity of the taxpayer at the time of disposition, the use of such interest in property in a nondealing activity of the taxpayer for any period during which such interest in property is also offered for sale to customers shall, for purposes of this paragraph (c)(2), be treated as the use of such interest in property in the dealing activity of the taxpayer.

(C) *Examples.* The following examples illustrate the application of this paragraph (c)(2)(v):

Example (1). (i) The taxpayer acquires a residential apartment building on January 1, 1987, and uses the building in a rental activity. In January 1990, the taxpayer converts the apartments into condominium units. After the conversion, the taxpayer holds the condominium units for sale to customers in the ordinary course of a trade or business of dealing in such property. (Assume that these dealing operations are treated as a separate activity under §1.469-4T, and that the taxpayer materially participates in this activity.) In addition, the taxpayer continues to use the units in the rental activity until they are sold. The units are first held for sale on January 1, 1990, and the last unit is sold on December 31, 1990.

(ii) This paragraph (c)(2)(v) provides that holding an interest in property in a dealing activity (the marketing of the property) is treated for purposes of this paragraph (c)(2) as the use of such interest in a nondealing activity if the marketing of the property is incidental to such use. Under paragraph (c)(2)-(v)(A)(*2*) of this section, such interests in property are treated as used in the last nondealing activity in which they were used prior to their disposition. In addition, paragraph (c)(2)(v)(A)(*1*) of this section provides rules for determining whether the marketing of the property is incidental to the use of an interest in property in a nondealing activity. Under these rules, the marketing of the property is treated as incidental to such use if (a) the interest in property was used in nondealing activities for more than 80 percent of the taxpayer's holding period in the property (the holding period requirement) and (b) the taxpayer did not acquire and hold the interest in property for the principal purpose of selling it to customers in the ordinary course of a trade or business (a dealing purpose).

(iii) In this case, the apartments were used in a rental activity for the entire period during which they were held by the taxpayer. Thus, the apartments were used in a nondealing activity for more than 80 percent of the taxpayer's holding period in the property, and the marketing of the property satisfies the holding period requirement.

(iv) Paragraph (c)(2)(v)(A)(*1*)(*ii*) of this section provides that a taxpayer is rebuttably presumed to have a dealing purpose unless the interest in property was used in nondealing activities for more than 24 months or 20 percent of the property's recovery period (whichever is less). The same presumption applies if the interest in property was offered for sale to customers during more than 25 percent of the period in which the interest was held in nondealing activities. In this case, the taxpayer used each apartment in a nondealing activity (the rental activity) for a period of 36 to 48 months (*i.e.*, from January 1, 1987, to the date of sale in the period from January through December 1990). Thus, the apartments were used in nondealing activities for more than 24 months, and the first of the rebuttable presumptions described above does not apply. In addition, the apartments were offered for sale to customers for up to 12 months (depending on the month in which the apartment was sold) during the period in which the apartments were used in a nondealing activity. The percentage obtained by dividing the period during which an apartment was held for sale to customers by the period during which the apartment was used in nondealing activities ranges from zero in the case of apartments sold on January 1, 1990, to 25 percent (*i.e.*, 12 months/48 months) in the case of apartments sold on December 31, 1990. Thus, no apartment was offered for sale to customers during more than 25 percent of the period in which it was used in nonrental activities, and the second rebuttable presumption does not apply.

(v) Because neither of the rebuttable presumptions in paragraph (c)(2)(v)(A)(*1*)(*ii*) of this section applies in this case, the taxpayer will not be treated as having a dealing purpose unless other facts and circumstances establish that the taxpayer acquired and held the apartments for the principal purpose of selling the apartments to customers in the ordinary course of a trade or business. Assume that none of the facts and circumstances suggest that the taxpayer had such a purpose. If that is the case, the taxpayer does not have a dealing purpose.

(vi) The marketing of the property satisfies the holding period requirement, and the taxpayer does not have a dealing purpose. Thus, holding the apartments in the taxpayer's dealing activity is treated for purposes of this paragraph (c)(2) as the use of the apartments in a nondealing activity. In this case, the rental activity is the only nondealing activity in which the apartments were used prior to their disposition. Thus, the apartments are treated under paragraph (c)(2)(v)(A)(*2*) of this section as interests in property that were used only in the rental activity for the entire period during which the taxpayer held such interests. Accordingly, the rules in paragraph (c)(2)(ii) and (iii) of this section do not apply, and all gain from the sale of the apartments is treated as passive activity gross income.

Example (2). (i) The facts are the same as in example (1), except that the taxpayer converts the apartments into condominium units on July 1, 1987, and the first unit is sold on January 1, 1988.

(ii) In this case, all of the apartments were simultaneously offered for sale to customers and used in a nondealing activity of the taxpayer for more than 25 percent of the period during which the apartments were used in nondealing activities. Thus, the taxpayer is rebuttably presumed to have acquired the apartments (including apartments that are used in the rental activity for at least 24 months) for the principal purpose of selling them to customers in the ordinary course of a trade or business. Assume that the facts and circumstances do not rebut this presumption. If that is the case, the taxpayer has a dealing purpose, and paragraph (c)-(2)(v)(A) of this section does not apply to the disposition of the apartments.

(iii) Paragraph (c)(2)(v)(B) of this section provides that if paragraph (c)(2)(v)(A) of this section does not apply to the disposition of a taxpayer's interest in property that is held in a dealing activity of the taxpayer at the time of the disposition, the use of the interest in property in any nondealing activity of the taxpayer for any period during which the interest is also offered for sale to customers is treated as incidental to the use of the interest in the dealing activity. Accordingly, for purposes of applying the rules of this paragraph (c)-(2) to the disposition of the apartments, the rental of the apartments after July 1, 1987, is treated as the use of the apartments in the taxpayer's dealing activity.

Example (3). (i) The facts are the same as in example (1), except that the last unit is sold in 1991.

(ii) The treatment of apartments sold in 1990 is the same as in example (1). The apartments sold in 1991, however, were simultaneously offered for sale to customers and used in a nondealing activity for more than 25 percent of the period during which such apartments were used in nondealing activities. (For example, an apartment that is sold on January 31, 1991, has been offered for sale for 13 months or 26.1 percent of the 49-month period during which it was used in nondealing activities.) Thus, the taxpayer is rebuttably presumed to have acquired the apartments sold in 1991 for the principal purpose of selling them to customers in the ordinary course of a trade or business. Assume that the facts and circumstances do not rebut this presumption. In that case, the marketing of the apartments sold in 1991 does not satisfy the principal purpose requirement, and paragraph (c)(2)(v)(A) of this section does not apply to the disposition of those apartments. Accordingly, for purposes of applying the rules of this paragraph (c)(2) to the disposition of the apartments sold in 1991, the rental of the apartments after January 1, 1990, is treated, under paragraph (c)(2)(v)(B) of this section, as the use of the apartments in the taxpayer's dealing activity.

4. Paragraph (c)(6)(i), (ii), and (iii) is revised to read as follows:

(c) * * *

(6) *Gross income from certain oil or gas properties*—(i) *In general.* Notwithstanding any other provision of the regulations under section 469, passive activity gross income for any taxable year does not include an amount of the taxpayer's gross passive income for such year from—

(A) An oil or gas property that includes an oil or gas well if, for any prior taxable year beginning after December 31, 1986, any of the taxpayer's loss from the well was treated, solely by reason of §1.469-1T(e)(4) (relating to a special rule for losses from oil and gas working interests), and not by reason of the taxpayer's material participation in the activity, as a loss that is not from a passive activity; or

(B) Any property the basis of which is determined in whole or in part by reference to the basis of property described in paragraph (c)(6)(i)(A) of this section; equal to the taxpayer's net passive income from such property for the taxable year.

(ii) *Gross and net passive income from the property.* For purposes of this paragraph (c)(6)—

(A) The taxpayer's gross passive income for any taxable year from any property described in paragraph (c)(6)(i) of this section is any passive activity gross income for such year (determined without regard to this paragraph (c)(6) and paragraph (f) of this section) from such property;

(B) The taxpayer's net passive income for any taxable year from any property described in paragraph (c)(6)(i) of this section is the excess, if any, of—

(*1*) The taxpayer's gross passive income for the taxable year from such property; over

(*2*) Any passive activity deductions for the taxable year (including any deduction treated as a deduction for such year under §1.469-1T(f)(4)) that are reasonably allocable to such income; and

(C) If any oil or gas well or other item of property (the item) is included in two or more properties described in paragraph (c)(6)(i) of this section (the properties), the taxpayer shall allocate the passive activity gross income (determined without regard to this paragraph (c)(6) and paragraph (f) of this section) from such item and the passive activity deductions reasonably allocable to such item among such properties.

(iii) *Property.* For purposes of paragraph (c)(6)(i)(A) of this section, the term "property" does not have the meaning given such term by section 614 (a) or the regulations thereunder, and an oil or gas property that includes an oil or gas well is—

(A) The well; and

(B) Any other item of property (including any oil or gas well) the value of which is directly enhanced by any drilling, logging, seismic testing, or other activities the costs of which were taken into account in determining the amount of the taxpayer's income or loss from the well.

* * * * *

5. Paragraph (c)(6)(iv) is amended by removing the phrase "net income" in the last sentences of examples (1) and (2), and adding the phrase "net passive income" in its place.

6. Paragraph (d)(1), *Example*, is amended by removing "sections 469 and 1211" and adding "sections 469, 613A(d), and 1211" each place the former occurs.

7. Paragraph (d)(2)(ix) is amended by adding "section 613A(d)," immediately before "section 1212(a)(1)(B)".

8. Paragraph (d)(5)(iii)(A) is revised to read as follows:

(d) * * *

(5) * * *

(iii) * * *

(A) *Applicability of rules in paragraph (c)(2).* For purposes of this paragraph (d)(5), a taxpayer's interests in property used in an activity and the amounts allocated to such interests shall be determined under paragraph (c)(2)(i)-(C) of this section. In addition, the rules contained in paragraph (c)(2)(iv) and (v) of this section shall apply in determining for purposes of this paragraph (d)(5) the activity (or activities) in which an interest in property is used at the time of its disposition and during the 12-month period ending on the date of its disposition.

* * * * *

9. Paragraph (d)(6)(v)(E) is revised to read as follows:

(d) * * *

(6) * * *

(v) * * *

(E) Are taken into account under section 613A(d) (relating to limitations on certain depletion deductions), section 1211 (relating to the limitation on capital losses), or section 1231 (relating to property used in a trade or business and involuntary conversions); or

* * * * *

10. Paragraph (d)(8) is amended by removing the phrase "sections 469 and 1211" and adding the following in its place: "sections 469, 613A(d), and 1211".

11. Paragraphs (e)(2)(ii) and (iii) are revised to read as follows:

(e) * * *

(2) * * *

(ii) *Section 707(c).* Except as provided in paragraph (e)(2)(iii)(B) of this section, any payment to a partner for services or the use of capital that is described in section 707(c) (including any payment described in section 736(a)-(2)) (relating to guaranteed payments made in liquidation of the interest of a retiring or deceased partner) shall be characterized as a payment for services or as the payment of interest, respectively, and not as a distributive share of partnership income.

(iii) *Payments in liquidation of a partner's interest in partnership property*—(A) *In general.* If any gain or loss is taken into account by a retiring partner (or any other person that owns (directly or indirectly) an interest in such partner if such partner is a passthrough entity) or a deceased partner's successor in interest as a result of a payment to which section 736(b) (relating to payments made in exchange for a retired or deceased partner's interest in partnership property) applies, such gain or loss shall be treated as passive activity gross income or a passive activity deduction only to the extent that such gain or loss would have been passive activity gross income or a passive activity deduction of such retiring or deceased partner (or such other person) if it had been recognized at the time the liquidation of such partner's interest commenced.

(B) *Payments in liquidation of a partner's interest in unrealized receivables and goodwill under section 736(a).*

(*1*) If a payment is made in liquidation of a retiring or deceased partner's interest, such payment is described in section 736(a), and any income—

(*i*) Is taken into account by the retiring partner (or any other person that owns (directly or indirectly) an interest in such partner if such partner is a passthrough entity) or the deceased partner's successor in interest as a result of such payment; and

(*ii*) Is attributable to the portion (if any) of the payment that is allocable to the unrealized receivables (within the meaning of section 751(c)) and goodwill of the partnership;

the percentage of such income that is treated as passive activity gross income shall not exceed the percentage of passive activity gross income that would be included in the gross income that such retiring or deceased partner (or such other person) would have recognized if such unrealized receivables and goodwill had been sold at the time that the liquidation of such partner's interest commenced.

(*2*) For purposes of this paragraph (e)-(2)(iii)(B), the portion (if any) of a payment under section 736(a) that is allocable to unrealized receivables and goodwill of a partnership shall be determined in accordance with the principles employed under §1.736-1(b) for determining the portion of a payment made under section 736 that is treated as a distribution under section 736(b).

* * * * *

12. Paragraph (e)(3)(iii)(B) is revised to read as follows:

(e) * * *

(3) * * *

(iii) * * *

(B) An amount of gain that would have been treated as gain that is not from a passive activity under paragraph (c)(2)-(iii) (relating to substantially appreciated property formerly used in a nonpassive activity), (c)(6) (relating to certain oil or gas properties), (f)(5) (relating to certain property rented incidental to development), (f)(6) (relating to property rented to a nonpassive activity), or (f)(7) (relating to certain interests in a passthrough entity engaged in the trade or business of licensing intangible property) of this section would have been allocated to such holder (or such other person) with respect to such interest if all of the property used in such passive activity had been sold immediately prior to the disposition for its fair market value on the applicable valuation date (within the meaning of paragraph (e)(3)(ii)(D)(*1*) of this section); and

* * * * *

13. Paragraph (f)(5)(i) is amended by removing the phrase "used in a rental activity for such year", by removing "24" and adding "12" in its place, and by removing the phrase ", but without regard to paragraph (e) thereof" from the parenthetical immediately following the words "materially participated".

14. Paragraph (f)(5)(ii) is amended by adding the following phrase immediately after the word "when": "the performance of the services described in paragraph (f)(5)(i)(C) of this section is complete, and".

15. Paragraph (f)(5)(iii)(C) is amended by removing the parenthetical phrase and adding the following in its place: "(but only if, as of the time the taxpayer acquires an interest in the property, a substantial portion of the property is not leased)".

16. Paragraph (f)(5)(iv), *Example*, is revised to read as follows:

(f) * * *

(5) * * *

(iv) * * *

Example. (i) A, a calendar year individual, is a partner in calendar year partnership P, which develops commercial real estate. In 1988, P acquires an interest in undeveloped land, and arranges for the financing and construction of an office building on the land. Construction is completed in February 1990, and substantially all of the building is held out for rent and is in a state of readiness for rental beginning on March 1, 1990.

(ii) P holds the building for rent for the remainder of 1990 and all of 1991, and sells the building on January 15, 1992, pursuant to a contract entered into on January 15, 1991. P did not hold the building (or any other buildings) for sale to customers in the ordinary course of P's trade or business (see paragraph (c)(2)(v) of this section). A's distributive share of P's taxable losses from the rental of the building is $50,000 for 1990 and $30,000 for 1991. All of A's losses from the rental of the building are disallowed under §1.469-1T((a)-(1)(i). A's distributive share of the gain recognized by P on the sale of the building is $150,000. A has no other gross income or deductions from the activity of renting the building.

(iii) For purposes of paragraph (f)(5)(i)(C) of this section, in 1988, 1989, and 1990, the real estate development activity that A holds through P involves the performance of services for the purpose of enhancing the value of the building. In 1992, the building is sold, and the date on which the use of the building in the rental activity commenced (March 1, 1990) was less than 12 months before the date on which a binding contract for such sale was entered into (January 15, 1991). Accordingly, if A materially participated in the real estate development activity in 1988, 1989, or 1990 (without regard to whether A materially participated in the activity in more than one of those years), an amount of A's gross rental activity income for 1992 from the building equal to A's net rental activity income for 1992 from such building ($150,000 − $80,000 of previously disallowed deductions = $70,000) is treated under this paragraph (f)(5) as gross income that is not from a passive activity.

17. Paragraph (f)(6) is amended by removing the phrase "used in a rental activity for such year" and by removing the phrase ", but without regard to paragraph (e) thereof" from the parenthetical immediately following the words "materially participates".

18. Paragraph (f)(9)(iii) is revised to read as follows:

(f) * * *

(9) * * *

(iii) The gross rental activity income for a taxable year from an item of property is any passive activity gross income (determined without regard to paragraph (f)(2) through (6) of this section) that—

(A) Is income for such year from the rental or disposition of such item of property; and

(B) In the case of income from the disposition of such item of property, is income from an activity that involved the rental of such item of property during the 12-month period ending on the date of the disposition (see paragraph (c)(2)(ii) of this section); and

* * * * *

19. Paragraph (f)(9)(iv)(B) is amended by removing the phrase "the use of such item of property in the rental activity" and adding in its place the words "such income".

20. Paragraph (f)(10) is revised to read as follows:

(f) * * *

(10) *Coordination with section 163-(d).* Gross income that is treated as not from a passive activity under paragraph (f)(3), (4), or (7) of this section shall be treated as income described in section 469(e)(1)(A) and paragraph (c)(3)(i) of this section except in determining whether—

(i) Any property is treated for purposes of section 469(e)(1)(A)(ii)(I) and paragraph (c)(3)(i)(C) of this section as property that produces income of a type described in paragraph (c)(3)(i)(A) of this section;

(ii) Any property is treated for purposes of section 469(e)(1)(A)(ii)(II) and paragraph (c)(3)(i)(D) of this section as property held for investment;

(iii) An expense (other than interest expense) is treated for purposes of section 469(e)(1)(A)(i)(II) and paragraph (d)(4) of this section as clearly and directly allocable to portfolio income (within the meaning of paragraph (c)(3)-(i) of this section); and

(iv) Interest expense is allocated under §1.163-8T to an investment expenditure (within the meaning of §1.163-8T(b)(3)) or to a passive activity expenditure (within the meaning of §1.163-8T(b)(4)).

* * * * *

Par. 5. Section 1.469-3T is amended as follows:

1. Paragraph (e) is revised.

2. Paragraph (f) is redesignated as paragraph (g), and a new paragraph (f) is added.

3. The revised provisions read as follows:

§1.469-3T Passive activity credit (temporary).

* * * * *

(e) *Coordination with section 38(b).* Any credit described in section 38(b)(1) through (5) is taken into account in computing the current year business credit for the first taxable year in which such credit is subject to section 469 and is not disallowed by section 469 and the regulations thereunder.

(f) *Coordination with section 47.* In the case of any cessation described in section 47(a)(1), (3), or (5) or any change in use described in section 47(a)-(2) or (4), the credits allocable to the taxpayer's activities under §1.469-1T(f)(4) shall be adjusted by reason of such cessation (or change in use).

* * * * *

Par. 6. The text of §1.469-4T is added to read as follows:

§1.469-4T Definition of activity (temporary).

(a) *Overview*—(1) *Purpose and effect of overview.* This paragraph (a) contains a general description of the rules contained in this section and is intended solely as an aid to readers. The provisions of this paragraph (a) are not a substitute for the more detailed rules contained in the remainder of this section and cannot be relied upon in cases in which those rules qualify the general description contained in this paragraph (a).

(2) *Scope and structure of §1.469-4T.* This section provides rules under which a taxpayer's business and rental operations are treated as one or more activities for purposes of section 469 and the regulations thereunder. (See paragraph (b)-(2)(ii) of this section for the definition of business and rental operations.) In general, these rules are divided into three groups:

(i) Rules that identify the business and rental operations that constitute an undertaking (the undertaking rules).

(ii) Rules that identify the undertaking or undertakings that constitute an activity (the activity rules).

(iii) Rules that apply only under certain special circumstances (the special rules).

(3) *Undertaking rules*—(i) *In general.* The undertaking is generally the smallest unit that can constitute an activity. (See paragraph (b)(1) of this section for the general rule and paragraph (k)(2)(iii) of this section for a special rule that permits taxpayers to treat a single rental real estate undertaking as multiple activities.) An undertaking may include diverse business and rental operations.

(ii) *Basic undertaking rule.* The basic undertaking rule identifies the business and rental operations that constitute an undertaking by reference to their location and ownership. Under this rule, business and rental operations that are conducted at the same location and are owned by the same person are generally treated as part of the same undertaking. Conversely, business and rental operations generally constitute separate undertakings to the extent that they are conducted at different locations or are not owned by the same person. (See paragraph (c)(2)(i) of this section.)

(iii) *Circumstances in which location is disregarded.* In some circumstances, the undertaking in which business and rental operations are included does not depend on the location at which the operations are conducted. Operations that are not conducted at any fixed place of business or that are conducted at the customer's place of business are treated as part of the undertaking with which the operations are most closely associated (see paragraph (c)(2)(iii)(C) of this section). In addition, operations that are conducted at a location but do not relate to the production of property at that location or to the transaction of business with customers at that location are treated, in effect, as part of the undertaking or undertakings that the operations support (see paragraph (c)(2)(ii) of this section).

(iv) *Rental undertakings.* The basic undertaking rule is also modified if the undertaking determined under that rule includes both rental and nonrental operations. In such cases, the rental operations and the nonrental operations generally must be treated as separate undertakings (see paragraph (d)(1) of this section). This rule does not apply if more than 80 percent of the income of the undertaking determined under the basic rule is attributable to one class of operations (*i.e.*, rental or nonrental) or if the rental operations would not be treated as part of a rental activity because of the exceptions contained in §1.469-1T(e)(3)(ii) (see paragraph (d)(2) of this section). In applying the rental undertaking rules, short-term rentals of real property (*e.g.*, hotel-room rentals) are generally treated as nonrental operations (see paragraph (d)(3)(ii) of this section).

(v) *Oil and gas wells.* Another exception to the basic undertaking rule treats oil and gas wells that are subject to the working-interest exception in §1.469-1T((e)(4) as separate undertakings (see paragraph (e) of this section).

(4) *Activity rules*—(i) *In general.* The basic activity rule treats each undertaking in which a taxpayer owns an interest as a separate activity of the taxpayer (see paragraph (b)(1) of this section). In the case of trade or business undertakings, professional service undertakings, and rental real estate undertakings, additional rules may either require or permit the aggregation of two or more undertakings into a single activity.

(ii) *Aggregation of trade or business undertakings*—(A) *Trade or business undertakings.* Trade or business undertakings include all nonrental undertakings other than oil and gas undertakings described in paragraph (a)(3)(v) of this section and professional service undertakings described in paragraph (a)(4)(iii) of this section (see paragraph (f)(1)(ii) of this section).

(B) *Similar, commonly-controlled undertakings treated as a single activity.* An aggregation rule treats trade or business undertakings that are both similar and controlled by the same interests as part of the same activity. This rule is, however, generally inapplicable to small interests held by passive investors in such undertakings, except to the extent such interests are held through the same passthrough entity. (See paragraph (f)(2) of this section.) Undertakings are similar for purposes of this rule if more than half (by value) of their operations are in the same line of business (as defined in a revenue procedure issued pursuant to paragraph (f)(4)(iv) of this section) or if the undertakings are vertically integrated (see paragraph (f)(4)(iii) of this section). All the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests for purposes of the aggregation rule (see paragraph (j)(1) of this section). If, however, each member of a group of five or fewer persons owns a substantial interest in each of the undertakings, the undertakings may be rebuttably presumed to be controlled by the same interests (see paragraph (j)(2) and (3) of this section).

(C) *Integrated businesses treated as a single activity.* Trade or business undertakings (including undertakings that have been aggregated because of their similarity and common control) are subject to a second aggregation rule. Under this rule undertakings that constitute an integrated business and are controlled by the same interests must be treated as part of the same activity. (See paragraph (g) of this section.)

(iii) *Aggregation of professional service undertakings.* Professional service undertakings are nonrental undertakings that predominantly involve the provision of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting (see paragraph (h)(1)(ii) of this section). In general, professional service undertakings that are either similar, related, or controlled by the same interests must be treated as part of the same activity (see paragraph (h)(2) of this section). The rules for determining whether trade or business undertakings are controlled by the same interests also apply with respect to professional service undertakings. Professional service undertakings are similar, however, if more than 20 percent (by value) of their operations are in the same field, and two professional service undertakings are related if one of the undertakings derives more than 20 percent of its gross income from persons who are customers of the other undertaking (see paragraph (h)(3) of this section).

(iv) *Rules for rental real estate*—(A) *Taxpayers permitted to determine rental real estate activities.* The rules for aggregating rental real estate undertakings are generally elective. They permit taxpayers to treat any combination of rental real estate undertakings as a single activity. Taxpayers may also divide their rental real estate undertakings and then treat portions of the undertakings as separate activities or recombine the portions into activities that include parts of different undertakings. (See paragraph (k)(2)(i) and (iii) of this section.)

(B) *Limitations on fragmentation and aggregation of rental real estate.* Taxpayers may not fragment their rental real estate in a manner that is inconsistent with their treatment of such property in prior taxable years or with the treatment of such property by the passthrough entity through which it is held (see paragraph (k)(2)(ii) and (3) of this section). There are no comparable limitations on the aggregation of rental real estate into a single activity. If, however, the income or gain from a rental real estate undertaking is subject to recharacterization under §1.469-2T(f)(3) (relating to the rental of nondepreciable property), a coordination rule provides that the undertaking must be treated as a separate activity (see paragraph (k)(6) of this section).

(v) *Election to treat nonrental undertakings as separate activities.* Another elective rule permits taxpayers to treat a nonrental undertaking as a separate activity even if the undertaking would be treated as part of a larger activity under the aggregation rules applicable to the undertaking (see paragraph (o)(2) of this section). This elective rule is limited by consistency requirements similar to those that apply to rental real estate operations (see paragraph (o)(3) and (4) of this section). Moreover, in cases in which a taxpayer elects to treat a nonrental undertaking as a separate activity, the taxpayer's level of participation (*i.e.*, material, significant, or otherwise) in the separate activity is the same as the taxpayer's level of participation in the larger activity in which the undertaking would be included but for the election (see paragraph (o)(6) of this section).

(5) *Special rules*—(i) *Consolidated groups and publicly traded partnerships.* Special rules apply to the business and rental operations of consolidated groups of corporations and publicly traded partnerships. Under these rules, a consolidated group is treated as one taxpayer in determining its activities and those of its members (see paragraph (m) of this sec-

tion), and business and rental operations owned through a publicly traded partnership cannot be aggregated with operations that are not owned through the partnership (see paragraph (n) of this section).

(ii) *Transitional rule.* A special rule applies for taxable years ending before August 10, 1989. In those years, taxpayers may organize business and rental operations into activities under any reasonable method (see paragraph (p)(1) of this section). A taxpayer will also be permitted to use any reasonable method to allocate disallowed deductions and credits among activities for the first taxable year in which the taxpayer's activities are determined under the general rules of §1.469-4T (see paragraph (p)(3) of this section).

(b) *General rule and definitions of general application*—(1) *General rule.* Except as otherwise provided in this section, each undertaking in which a taxpayer owns an interest shall be treated as a separate activity of the taxpayer. See paragraphs (f), (g), and (h) of this section for rules requiring certain nonrental undertakings to be treated as part of the same activity and paragraph (k) of this section for rules identifying the rental real estate undertakings (or portions thereof) that are included in an activity.

(2) *Definitions of general application.* The following definitions set forth the meaning of certain terms for purposes of this section:

(i) *Passthrough entity.* The term "passthrough entity" means a partnership, S corporation, estate, or trust.

(ii) *Business and rental operations*—(A) *In general.* Except as provided in paragraph (b)(2)(ii)(B) of this section, the term "business and rental operations" means all endeavors that are engaged in for profit or the production of income and satisfy one or more of the following conditions for the taxable year:

(*1*) Such endeavors involve the conduct of a trade or business (within the meaning of section 162) or are conducted in anticipation of such endeavors becoming a trade or business;

(*2*) Such endeavors involve making tangible property available for use by customers; or

(*3*) Research or experimental expenditures paid or incurred with respect to such endeavors are deductible under section 174 (or would be deductible if the taxpayer adopted the method described in section 174(a)).

(B) *Operations conducted through nonpassthrough entities.* For purposes of applying section 469 and the regulations thereunder, a taxpayer's activities do not include operations that the taxpayer conducts through one or more entities (other than passthrough entities). The following example illustrates the operation of this paragraph (b)(2)(ii)(B):

Example. (i) A, an individual, owns stock of X, a closely held corporation (within the meaning of §1.469-1T(g)(2)(ii)) that is directly engaged in the conduct of a real estate development business. A participates in X's real estate development business, but does not own any interest in the business other than through ownership of the stock of X.

(ii) X is subject to section 469 (see §1.469-1T-((b)(5)) and does not hold the real estate development business through another entity. Accordingly, for purposes of section 469 and the regulations thereunder, the operations of X's real estate development business are treated as part of X's activities.

(iii) A is also subject to section 469 (see §1.469-1T(b)(1)), but A's only interest in the real estate development business is held through X. X is a C corporation and therefore is not a passthrough entity. Thus, for purposes of section 469 and the regulations thereunder, A's activities do not include the operations of X's real estate development business. Accordingly, A's participation in X's business is not participation in an activity of A, and is not taken into account in determining whether A materially participates (within the meaning of §1.469-5T) or significantly participates (within the meaning of §1.469-5T(c)(2)) in any activity. (See, however, §1.469-1T(g)(3) for rules under which a shareholder's participation is taken into account for purposes of determining whether a corporation materially or significantly participates in an activity.)

(c) *Undertaking*—(1) *In general.* Except as otherwise provided in paragraphs (d), (e), and (k)(2)(iii) of this section, business and rental operations that constitute a separate source of income production shall be treated as a single undertaking that is separate from other undertakings.

(2) *Operations treated as a separate source of income production*—(i) *In general.* Except as otherwise provided in this paragraph (c)(2), business and rental operations shall be treated for purposes of this paragraph (c) as a separate source of income production if and only if—

(A) Such operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (within the meaning of paragraph (c)(2)(v) of this section); and

(B) Income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) owned by such person are conducted at such location.

(ii) *Treatment of support operations*—(A) *In general.* For purposes of section 469 and the regulations thereunder—

(*1*) The support operations conducted at a location shall not be treated as part of an undertaking under paragraph (c)(2)(i) of this section; and

(*2*) The income and expenses that are attributable to such operations and are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity or activities that include such undertaking.

(B) *Support operations.* For purposes of this paragraph (c)(2), the business and rental operations conducted at a location are treated as support operations to the extent that—

(*1*) Such operations and an undertaking that is conducted at a different location are owned by the same person (within the meaning of paragraph (c)(2)(v) of this section);

(*2*) Such operations involve the provision of property or services to such undertaking; and

(*3*) Such operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section).

(iii) *Location.* For purposes of this paragraph (c)(2)—

(A) The term "location" means, with respect to any business and rental operations, a fixed place of business at which such operations are regularly conducted;

(B) Business and rental operations are conducted at the same location if they are conducted in the same physical structure or within close proximity of one another;

(C) Business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises shall be treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated;

(D) All the facts and circumstances (including, in particular, the factors listed in paragraph (c)(3) of this section) are taken into account in determining the location with which business and rental operations are most closely associated; and

(E) Oil and gas operations that are conducted for the development of a common reservoir are conducted within close proximity of one another.

(iv) *Income-producing operations.* For purposes of this paragraph (c)(2), the term "income-producing operations" means business and rental operations that are conducted at a location and relate to (or are conducted in reasonable anticipation of)—

(A) The production of property at such location;

(B) The sale of property to customers at such location;

(C) The performance of services for customers at such location;

(D) Transactions in which customers take physical possession at such location of property that is made available for their use; or

(E) Any other transactions that involve the presence of customers at such location.

(v) *Ownership by the same person.* For purposes of this paragraph (c)(2), business and rental operations are owned by the same person if and only if one person (within the meaning of section 7701(a)(1)) is the direct owner of such operations.

(3) *Facts and circumstances determinations.* In determining whether a location is the location with which business and rental operations are most closely associated for purposes of paragraph (c)(2)(iii)(D) of this section, the following relationships between operations that are conducted at such location and other operations are generally the most significant:

(i) The extent to which other persons conduct similar operations at one location;

(ii) Whether such operations are treated as a unit in the primary accounting records reflecting the results of such operations;

(iii) The extent to which other persons treat similar operations as a unit in the primary accounting records reflecting the results of such similar operations;

(iv) The extent to which such operations involve products or services that are commonly provided together;

(v) The extent to which such operations serve the same customers;

(vi) The extent to which the same personnel, facilities, or equipment are used to conduct such operations;

(vii) The extent to which such operations are conducted in coordination with or reliance upon each other;

(viii) The extent to which the conduct of any such operations is incidental to the conduct of the remainder of such operations;

(ix) The extent to which such operations depend on each other for their economic success; and

(x) Whether such operations are conducted under the same trade name.

(4) *Examples.* The following examples illustrate the application of this paragraph (c). In each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusion relate to a single taxable year.

Example (1). The taxpayer is the sole owner of a department store and a restaurant and conducts both businesses in the same building. Thus, the department store and restaurant operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, property is sold to customers and services are performed for customers on the premises of the department store). Accordingly, the department store and restaurant operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

Example (2). (i) The facts are the same as in example (1), except that the taxpayer is also the sole owner of an automotive center that services automobiles and sells tires, batteries, motor oil, and accessories. The taxpayer operates the automotive center in a separate structure in the shopping mall in which the department store is located. Although the automotive center operations and the department store and restaurant operations are not conducted in the same physical structure, they are conducted within close proximity (within the meaning of paragraph (c)(2)(iii)(B) of this section) of one another. Thus, the department store, restaurant, and automotive center operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section).

(ii) As in example (1), the operations conducted at the same location are owned by the same person, and the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location. Accordingly, the department store, restaurant, and automotive center operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

Example (3). (i) The facts are the same as in example (2), except that the automotive center is located several blocks from the shopping mall. As in example (1), the department store and restaurant operations are treated as a single undertaking that is separate from other undertakings. Because, however, the automotive center operations are not conducted within close proximity (within the meaning of paragraph (c)(2)(iii)(B) of this section) of the department store and restaurant operations, all of the taxpayer's operations are not conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section).

(ii) All of the automotive center operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, property is sold to customers and services are performed for customers on the premises of the automotive center). Accordingly, the automotive center operations are also treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See, however, paragraph (g) of this section for rules under which certain trade or business activities are treated as a single activity.

Example (4). The taxpayer is the sole owner of a building and rents residential, office, and retail space in the building to various tenants. The taxpayer manages these rental operations from an office located in the building. The rental operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, customers take physical possession in the building of property made available for their use). Accordingly, the rental operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See paragraph (d) of this section for rules for determining whether this undertaking is a rental undertaking and paragraph (k) of this section for rules for identifying rental real estate activities.

Example (5). (i) The facts are the same as in example (4), except that the taxpayer also uses the rental office in the building ("Building #1") to manage rental operations in another building ("Building #2") that the taxpayer owns. The rental operations conducted in Building #2 are treated as a separate source of income production under paragraph (c)(2) of this section and as a single undertaking that is separate from other undertakings (the "Building #2 undertaking") under paragraph (c)(1) of this section.

(ii) The operations conducted at the rental office in Building #1 and the Building #2 undertaking are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the operations conducted at the rental office with respect to the Building #2 undertaking relate to transactions in which customers take physical possession at another location of property that is made available for their use (*i.e.*, the operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section)). Thus, to the extent the operations conducted at the rental office involve the management of the Building #2 undertaking, they are support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) with respect to the Building #2 undertaking.

(iii) Paragraph (c)(2)(ii)(A)(*1*) of this section provides that support operations are not treated as part of an undertaking under paragraph (c)(2)(i) of this section. Therefore, the support operations conducted at the rental office are not treated as part of the undertaking that consists of the rental operations conducted in Building #1 (the "Building #1 undertaking"). Paragraph (c)(2)(ii)(A)(*2*) of this section provides that the income and expenses that are attributable to support operations and are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity that includes such undertaking. Accordingly, the income and expenses of the rental office that are reasonably allocable to the Building #2 undertaking are taken into account in determining the income or loss from the activity or activities that include the Building #2 undertaking. See paragraph (k) of this section for rules for identifying rental real estate activities.

(iv) Rental office operations that involve the management of rental operations conducted in

Building #1 are not support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) because they relate to an undertaking that is conducted at the same location (the "Building #1 undertaking"). Thus, the rules for support operations in paragraph (c)(2)(ii)(A) of this section do not apply to such operations, and they are treated as part of the Building #1 undertaking.

Example (6). (i) The taxpayer conducts business and rental operations at eleven different locations (within the meaning of paragraph (c)(2)(iii) of this section). At ten of the locations the taxpayer owns grocery stores, and at the eleventh location the taxpayer owns a warehouse that receives goods and supplies them to the taxpayer's stores. The operations of each store are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at each location (*i.e.*, property is sold to customers on the store premises, and customers take physical possession on the store premises of property made available for their use). Accordingly, the operations of each of the ten grocery stores are treated as a separate source of income production (see paragraph (c)(2) of this section), and each store is treated as a single undertaking (a "grocery store undertaking") that is separate from other undertakings (see paragraph (c)(1) of this section). The operations conducted at the warehouse, however, do not include any income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section). Accordingly, the warehouse operations do not satisfy the requirements of paragraph (c)(2)(i) of this section and are not treated as a separate undertaking under paragraph (c)(1) of this section.

(ii) The warehouse operations and the grocery store undertakings are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations), the operations conducted at the warehouse involve the provision of property to the grocery store undertakings, and the warehouse operations are not income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section). Thus, the warehouse operations are support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) with respect to the grocery store undertakings. Paragraph (c)(2)(ii)(A)(*2*) of this section provides that the income and expenses that are attributable to support operations and are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity or activities that include such undertaking. Accordingly, the income and expenses of the warehouse operations that are reasonably allocable to a grocery store undertaking are taken into account in determining the income or loss from the activity or activities that include such undertaking. See paragraph (f) of this section for rules under which certain similar, commonly-controlled undertakings are treated as a single activity.

Example (7). (i) The facts are the same as in example (6), except that the warehouse operations also include the sale of goods to grocery stores that the taxpayer does not own ("other grocery stores"). Because of these sales, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the warehouse. The warehouse operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). Accordingly, prior to the application of the rules for support operations in paragraph (c)(2)(ii) of this section, the warehouse operations are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking (the "separate warehouse undertaking") that is separate from other undertakings (see paragraph (c)(1) of this section).

(ii) As in example (6), the warehouse operations that involve supplying goods to the taxpayer's grocery store undertakings are support operations with respect to those undertakings. Therefore, those operations are not treated as part of the separate warehouse undertaking (see paragraph (c)(2)(ii)(A)-(*1*) of this section), and the income and expenses of such operations are taken into account, as in example (6), in determining the income or loss from the activity or activities that include the taxpayer's grocery store undertakings.

Example (8). (i) A partnership is formed to acquire real property and construct a building on the property. The partnership hires brokers to locate a suitable parcel of land, lawyers to negotiate zoning variances, easements, and building permits, and architects and engineers to design the improvements. After the architects and engineers have designed the improvements and other preliminaries have been completed, the partnership hires a general contractor who hires subcontractors and oversees construction. During the construction process and after construction has been completed, the partnership leases out space in the building. The partnership then operates the building as a rental property. The operations of acquiring the real property, negotiating contracts, overseeing the designing and construction of the improvements, leasing up the building, and operating the building are conducted at an office (the "management office") that is not at the same location (within the meaning of paragraph (c)(2)(iii) of this section) as the building.

(ii) The operations conducted at the building site (*e.g.*, excavating the land, pouring the concrete for the foundation, erecting the frame of the building, completing the exterior of the building, and building out the interior of the building) are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the partnership is the direct owner of the operations). In addition, the partnership conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, during the construction period property (the building) is produced at the building site, and during the rental period customers take physical possession in the building of property made available for their use). Accordingly, the operations conducted at the building site are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

(iii) The operations conducted at the management office and the undertaking conducted at the building site are owned by the same person (*i.e.*, the partnership is the direct owner of the operations). In addition, the operations conducted at the management office relate to transactions in which customers take physical possession at another location of property that is made available for their use (*i.e.*, the operations are not income-producing operations (within the meaning of paragraph (c)(2)-(iv) of this section)). Thus, to the extent the operations conducted at the management office involve the provision of services to the undertaking conducted at the building site, they are support operations (within the meaning of paragraph (c)(2)(ii)(B) of this section) with respect to such undertaking.

(iv) Paragraph (c)(2)(ii)(A)(*2*) of this section provides that the income and expenses of support operations that are reasonably allocable to an undertaking conducted at a different location shall be taken into account in determining the income or loss from the activity that includes such undertaking. Accordingly, the income and expenses of the management office that are reasonably allocable to the undertaking conducted at the building site are taken into account in determining the income or loss from the activity or activities that include such undertaking.

(v) Until the building is first held out for rent and is in a state of readiness for rental, the undertaking conducted at the building site is a trade or business undertaking (within the meaning of paragraph (f)(1)(ii) of this section). See paragraph (d) of this section for rules for determining whether the undertaking is a rental undertaking for periods after the building is first held out for rent and is in a state of readiness for rental and paragraph (k) of this section for rules for identifying rental real estate activities.

Example (9). The taxpayer owns 15 oil wells pursuant to a single working interest (within the meaning of §1.469-1T(e)(4)(iv)). All of the wells are drilled and operated for the development of a common reservoir. Thus, all of the wells are at the same location (see paragraph (c)(2)(iii)(E) of this section). All of the wells are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations), and the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, oil wells are drilled in reasonable anticipation of producing oil at the location). Accordingly, the operations of the wells are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See paragraph (e) of this section for rules under which certain oil and gas operations are treated as multiple undertakings even if they would be part of the same undertaking under the rules of this paragraph (c).

Example (10). (i) Partnership X owns an automobile dealership and partnership Y owns an automobile repair shop. The dealership and repair shop operations are conducted in the same physical structure. Individuals A, B, and C are the only partners in partnerships X and Y, and each of the partners owns a one-third interest in both partnerships.

(ii) The dealership operations and the repair-shop operations are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section), but are owned by different persons (*i.e.*, X is the direct owner of the dealership operations, and Y is the direct owner of the repair-shop operations). Moreover, indirect ownership of the operations is not taken into account under paragraph (c)-(2)(v) of this section. Thus, it is irrelevant that the two partnerships are owned by the same persons in identical proportions. Accordingly, the dealership and repair-shop operations are not treated as part of the same source of income production (see paragraph (c)(2) of this section) or as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See, however, paragraph (g) of this section for rules under which certain trade or business activities are treated as a single activity.

Example (11). (i) The taxpayer owns and operates a delivery service. The business consists of a central office, retail establishments, and messengers who transport packages from one place to another. Customers may bring their packages to a retail establishment for delivery elsewhere or, by calling the central office, may have packages picked up at their homes or offices. The central office dispatches messengers and coordinates all pickups and deliveries. Customers may pay for deliveries when they drop off or pick up packages at a retail establishment, or the central office will bill the customer for services rendered. In addition, many packages are routed through the central office.

(ii) The operations conducted at the central office are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). The operations actually conducted at the central office, however, do not include any income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section).

(iii) Under paragraph (c)(2)(iii)(C) and (D) of this section, business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises are treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated, and all the facts and circumstances are taken into account in determining the location with which business and rental operations are most closely associated. The facts and circumstances in this case (including the facts that the central office dispatches messengers, coordinates all pickups and deliveries, and is the transshipment point for many packages) establish that the operations of delivering packages from one location to another are most closely associated with the central office. Thus, the delivery operations are treated as operations that are conducted at the central office, and the deliveries are treated as income-producing operations (*i.e.*, the performance of services for customers) that the taxpayer conducts at the central office. Accordingly, the operations conducted at the central office are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section).

(iv) The operations conducted at each retail establishment are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). At each retail establishment, the taxpayer's operations include transactions that involve the presence of customers at the establishment. Thus, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv)(E) of this section) at the retail establishments. Accordingly, the operations of each retail establishment are treated as a separate source of income production (see paragraph (c)(2) of this section) and as a single undertaking that is separate from other undertakings (see paragraph (c)(1) of this section). See, however, paragraph (f) of this section for rules under which certain similar, commonly-controlled undertakings are treated as a single activity.

Example (12). (i) The taxpayer is the sole owner of a saw mill and a lumber yard. The taxpayer's business operations consist of converting timber into lumber and other wood products and selling the resulting products. The timber is processed at the saw mill, and the resulting products are transported to the lumber yard where they are sold. The saw mill and the lumber yard are at different locations (within the meaning of paragraph (c)(2)(iii) of this section). The transportation operations are managed at the saw mill.

(ii) The operations conducted at the saw mill are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, lumber is produced at the mill). Similarly, the selling operations at the lumber yard are conducted at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are owned by the same person (*i.e.*, the taxpayer is the direct owner of the operations). In addition, the taxpayer conducts income-producing operations (within the meaning of paragraph (c)(2)(iv) of this section) at the location (*i.e.*, lumber is sold to customers at the lumber yard). Thus, the milling operations and the selling operations are treated as separate sources of income production (see paragraph (c)(2) of this section) and as separate undertakings (see paragraph (c)(1) of this section).

(iii) The operations conducted at the mill involve the provision of property to the lumber-yard undertaking. Nonetheless, the milling operations are income-producing operations because they relate to the production of property at the mill, and an undertaking's income-producing operations are not treated as support operations (see paragraph (c)(2)(ii)(B)(*3*) of this section). Accordingly, the milling operations are not support operations with respect to the lumber-yard undertaking. See, however, paragraph (f) of this section for rules under which certain vertically-integrated undertakings are treated as part of the same activity.

(iv) The operations of transporting finished products from the saw mill to the lumber yard are not conducted at a fixed location. Under paragraph (c)(2)(iii)(C) and (D) of this section, business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises are treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated, and all the facts and circumstances are taken into account in determining the location with which business and rental operations are most closely associated. The facts and circumstances in this case (including the fact that the transportation operations are managed at the saw mill) establish that the transportation operations are most closely associated with the saw mill. Thus, the transportation operations are treated as operations that are conducted at the mill and as part of the undertaking that consists of the milling operations.

(d) *Rental undertaking*—(1) *In general.* This paragraph (d) applies to operations that are treated, under paragraph (c) of this section and before the application of paragraph (d)(1)(i) of this section, as a single undertaking that is separate from other undertakings (a "paragraph (c) undertaking"). For purposes of this section—

(i) A paragraph (c) undertaking's rental operations and its operations other than rental operations shall be treated, except as otherwise provided in paragraph (d)(2) of this section, as two separate undertakings;

(ii) The income and expenses that are reasonably allocable to an undertaking (determined after the application of paragraph (d)(1)(i) of this section) shall be taken into account in determining the income or loss from the activity or activities that include such undertaking; and

(iii) An undertaking (determined after the application of paragraph (d)(1)(i) of this section) shall be treated as a rental undertaking if and only if such undertaking, considered as a separate activity, would constitute a rental activity (within the meaning of §1.469-1T(e)(3)).

(2) *Exceptions.* Paragraph (d)(1)(i) of this section shall not apply to a paragraph (c) undertaking for any taxable year in which—

(i) The rental operations of the paragraph (c) undertaking, considered as a separate activity, would not constitute a rental activity (within the meaning of §1.469-1T(e)(3));

(ii) Less than 20 percent of the gross income of the paragraph (c) undertaking is attributable to rental operations; or

(iii) Less than 20 percent of the gross income of the paragraph (c) undertaking is attributable to operations other than rental operations.

(3) *Rental operations.* For purposes of this paragraph (d), a paragraph (c) undertaking's rental operations are determined under the following rules:

(i) *General rule.* Except as otherwise provided in paragraph (d)(3)(ii) or (iii) of this section, a paragraph (c) undertaking's rental operations are all of the undertaking's business and rental operations that involve making tangible property available for use by customers and the provision of property and services in connection therewith.

(ii) *Real property provided for short-term use.* A paragraph (c) undertaking's operations that involve making short-term real property available for use by customers and the provision of property and services in connection therewith shall not be treated as rental operations if such operations, considered as a separate activity, would not constitute a rental activity. An item of property is treated as short-term real property for this purpose if and only if such item is real property that the paragraph (c) undertaking makes available for use by customers and the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for all of the paragraph (c) undertaking's real property of the same type as such item is 30 days or less.

(iii) *Property made available to licensees.* A paragraph (c) undertaking's operations that involve making tangible property available during defined business hours for nonexclusive use by various customers shall not be treated as rental operations. (See §1.469-1T(e)(3)-(ii)(E).)

(4) *Examples.* The following examples illustrate the application of this paragraph (d). In each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusions relate to a single taxable year.

Example (1). (i) The taxpayer owns a building in which the taxpayer rents office space to tenants and operates a parking garage that is used by tenants and other persons. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The taxpayer's tenants typically occupy an office for at least one year, and the services provided to tenants are those customarily provided in office buildings. Some persons (including tenants) rent spaces in the parking garage on a monthly or annual basis. In general, however, spaces are rented on an hourly or daily basis, and the average period for which all customers (including tenants) use the parking garage is less than 24 hours. The paragraph (c) undertaking derives 75 percent of its gross income from office-space rentals and 25 percent of its gross income from the parking garage. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)-(3)(vi)).

(ii) The parking spaces are real property and the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for the parking spaces is 30 days or less. Thus, the parking spaces are short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section). (For this purpose, individual parking spaces that are rented on a monthly or annual basis are, nevertheless, short-term real properties because all the parking spaces are property of the same type, and the average rental period taking all parking spaces into account is 30 days or less.) In addition, the parking-garage operations involve making short-term real properties available for use by customers and the provision of property and services in connection therewith.

(iii) Paragraph (d)(3)(i) and (ii) of this section provides, in effect, that a paragraph (c) undertaking's operations that involve making short-term real properties available for use by customers and the provision of property and services in connection therewith are treated as rental operations if and only if the operations, considered as a separate activity, would constitute a rental activity (within the meaning of §1.469-1T(e)(3)). In this case, the parking-garage operations, if considered as a separate activity, would not constitute a rental activity because the average period of customer use for the parking spaces is seven days or less (see §1.469-1T(e)(3)(ii)(A)). Accordingly, the parking-garage operations are not treated as rental operations.

(iv) The paragraph (c) undertaking's remaining operations involve the provision of tangible property (the office spaces) for use by customers and the provision of property and services in connection therewith. The average period of customer use for the office spaces exceeds 30 days. Thus, the office spaces are not short-term real properties, and the undertaking's operations involving the rental of office spaces are rental operations.

(v) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, at least 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the office-space operations) and at least 20 percent is attributable to operations other than rental operations (the parking-garage operations). Thus, the exceptions in paragraph (d)(2)(ii) and (iii) of this section do not apply. In addition, the average period of customer use for the office spaces exceeds 30 days, extraordinary personal services (within the meaning of §1.469-1T(e)(3)(v)) are not provided, and the rental of the office spaces is not treated as incidental to a nonrental activity under §1.469-1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the rental operations, if considered as a separate activity, would constitute a rental activity, and the exception in paragraph (d)-(2)(i) of this section does not apply. Accordingly, the rental operations and the parking-garage operations are treated as two separate undertakings (the "office-space undertaking" and the "parking-garage undertaking").

(vi) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the office-space undertaking, if considered as a separate activity, would constitute a rental activity (see (v) above), and the parking-garage undertaking, if considered as a separate activity, would not constitute a rental activity (see (iii) above). Accordingly, the office-space undertaking is treated as a rental undertaking, and the parking-garage undertaking is not.

Example (2). (i) The taxpayer owns a building in which the taxpayer rents apartments to tenants and operates a restaurant. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The taxpayer's tenants typically occupy an apartment for at least one year, and the services provided to tenants are those customarily provided in residential apartment buildings. The paragraph (c) undertaking derives 85 percent of its gross income from apartment rentals and 15 percent of its gross income from the restaurant. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)(3)(vi)).

(ii) The operations with respect to apartments (the "apartment operations") involve the provision of tangible property (the apartments) for use by customers and the provision of property and services in connection therewith. In addition, the apartments are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for the apartments exceeds 30 days. Accordingly, the apartment operations are rental operations (within the meaning of paragraph (d)(3) of this section). The restaurant operations do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the restaurant operations are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the exception in paragraph (d)(2)(iii) of this section applies because less than 20 percent of the paragraph (c) undertaking's gross income is attributable to operations other than rental operations (the restaurant operations). Accordingly, the rental operations and the restaurant operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the undertaking (determined after the application of paragraph (d)(1)(i) of this section) includes both the apartment operations and the restaurant operations, and the gross income of this undertaking represents amounts paid principally for the use of tangible property (the apartments). Moreover, the average period of customer use for the apartments exceeds 30 days, extraordinary personal services (within the meaning of §1.469-1T(e)(3)(v)) are not provided, and the rental of the apartments is not treated as incidental to a nonrental activity under §1.469-1T-(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the undertaking, if considered as a separate activity, would constitute a rental activity. Accordingly, the undertaking is treated as a rental undertaking.

Example (3). (i) The taxpayer owns a building in which the taxpayer rents hotel rooms, meeting rooms, and parking spaces to customers, rents space to various retailers, and operates a restaurant and health club. (Assume that, under paragraph (c)-(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) Although some customers occupy hotel rooms for extended periods (including some customers who reside in the hotel), customers use hotel rooms for an average period of two days and meeting rooms for an average period of one day. The services provided to persons using the hotel rooms and meeting rooms are those customarily provided in hotels (including wake-up calls, valet services, and delivery of food and beverages to rooms). Some customers rent spaces in the parking garage on a monthly or annual basis. In general, however, parking spaces are rented on an hourly or daily basis, and the average period for which customers use the parking garage is less than 24 hours. Retail tenants typically occupy their space for at least one year, and the services provided to retail tenants are those customarily provided in commercial buildings. The paragraph (c) undertaking derives 45 percent of its gross income from renting hotel rooms, meeting rooms, and parking spaces, 35 percent of its gross income from renting retail space, and 20 percent of its gross income from the restaurant and health club. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)(3)(vi)).

(ii) The parking spaces, hotel rooms, and meeting rooms are real property of three different types, but the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for property of each type is 30 days or less. Thus, the parking spaces, hotel rooms, and meeting rooms are short-term real properties. (For this purpose, individual parking spaces or hotel rooms that are rented for extended periods are, nevertheless, short-term real properties if the average rental period for all parking spaces is 30 days or less and the average rental period for all hotel rooms is 30 days or less.) In addition, the parking garage operations, the operations with respect to hotel rooms (the "hotel-room operations"), and the operations with respect to meeting rooms (the "meeting-room operations") involve making short-term real properties available for use by customers and the provision of property and services in connection therewith.

(iii) Paragraph (d)(3)(i) and (ii) of this section provides, in effect, that a paragraph (c) undertaking's operations that involve making short-term real properties available for use by customers and the provision of property and services in connection therewith are treated as rental operations if and only if the operations, considered as a separate activity, would constitute a rental activity (within the meaning of §1.469-1T(e)(3)). In this case, the parking-garage, hotel-room and meeting-room operations, if considered as separate activities, would not constitute rental activities because the average period of customer use for parking spaces, hotel rooms, and meeting rooms does not exceed seven days (see §1.469-1T(e)(3)(ii)(A)). Accordingly, the parking-garage, hotel-room, and meeting-room operations are not treated as rental operations.

(iv) The operations with respect to retail space in the building (the "retail-space operations") involve the provision of tangible property (the retail spaces) for use by customers and the provision of property and services in connection therewith. In addition, the retail spaces are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for the retail spaces exceeds 30 days. Accordingly, the retail-space operations are rental operations.

(v) The health-club operations involve making tangible property available for use by customers, but the property is customarily made available during defined business hours for nonexclusive use by various customers. Accordingly, the health-club operations are not rental operations (see paragraph (d)(3)(iii) of this section). The restaurant operations do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Accordingly, the restaurant operations also are not rental operations.

(vi) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, at least 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (35 percent of the paragraph (c) undertaking's gross income is from the retail-space operations) and at least 20 percent is attributable to operations other than rental operations (45 percent from the hotel-room, meeting-room and parking-garage operations and 20 percent from the restaurant and health-club operations). Thus, the exceptions in paragraph (d)(2)(ii) and (iii) of this section do not apply. In addition, the average period of customer use for the retail space exceeds 30 days, extraordinary personal services (within the meaning of §1.469-1T(e)(3)(v)) are not provided, and the rental of the retail space is not treated as incidental to a nonrental activity under §1.469-1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the retail-space operations, if considered as a separate activity, would constitute a rental activity, and the exception in paragraph (d)(2)(i) of this section does not apply. Accordingly, the retail-space operations are treated as an undertaking (the "retail-space undertaking") and all the other operations conducted in the building (*i.e.*, renting hotel and meeting rooms and parking spaces and operating the restaurant and health club) are treated as a separate undertaking (the "hotel undertaking").

(vii) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the retail-space undertaking, if considered as a separate activity, would constitute a rental activity (see (iv) above). Accordingly, the retail-space undertaking is treated as a rental undertaking. The hotel undertaking, if considered as a separate activity, would not constitute a rental activity because all tangible property provided for the use of customers in the hotel undertaking is either property for which the average period of customer use is seven days or less (see §1.469-1T(e)(3)(ii)(A)) or property customarily made available during defined business hours for nonexclusive use by various customers (see §1.469-1T(e)(3)(ii)(E)). Accordingly, the hotel undertaking is not treated as a rental undertaking.

Example (4). (i) A law partnership owns a ten-story building. The partnership uses eight floors of the building in its law practice and leases two floors to one or more tenants. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) Tenants typically occupy space on the two rented floors for at least one year, and the services provided to tenants are those customarily provided in office buildings. The paragraph (c) undertaking derives 90 percent of its gross income from rendering legal services and 10 percent of its gross income from renting space. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)(3)(vi)).

(ii) The operations with respect to the office space leased to tenants (the "office-space operations") involve the provision of tangible property (the office space) for use by customers and the provision of property and services in connection therewith. In addition, the office spaces are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for the office space exceeds 30 days. Accordingly, the office-space operations are rental operations (within the meaning of paragraph (d)(3) of this section).

(iii) The operations that involve the performance of legal services (the "law-practice operations") do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Accordingly, the law-practice operations are not rental operations.

(iv) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the exception in paragraph (d)(2)(ii) of this section applies because less than 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the office-space operations). Accordingly, the law-practice operations and the office-space operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(v) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the undertaking (determined after the application of paragraph (d)(1)(i) of this section) includes both the law-practice operations and the office-space operations, and the gross income of this undertaking does not represent amounts paid principally for the use of tangible property. Thus, the undertaking, if considered as a separate activity, would not constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (5). (i) The facts are the same as in example (4), except that the building is owned by a separate partnership (the "real estate partnership") which leases eight floors of the building to the law partnership for use in its law practice and two floors to one or more other tenants. The law partnership and the real estate partnership are owned by the same individuals in identical proportions.

(ii) The operations conducted in the building are owned by two different persons (*i.e.*, the law partnership and the real estate partnership). (See paragraph (c)(2)(v) of this section.) Thus, the operations conducted in the building are not treated as a single undertaking under paragraph (c)(1) of this section. Instead, each partnership's share of such operations is treated as a separate paragraph (c) undertaking (the "law-practice undertaking" and the "office-space undertaking").

(iii) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the office-space undertaking, if considered as a separate activity, would constitute a rental activity because all of the undertaking's gross income (including rents paid by the law partnership) represents amounts paid principally for the use of tangible property (the office space), the average period of customer use for the office space exceeds 30 days, extraordinary personal services (within the meaning of §1.469-1T(e)(3)(v)) are not provided, and the rental of the office space is not treated as incidental to a nonrental activity under §1.469-1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Accordingly, the office-space undertaking is treated as a rental undertaking. See, however, §1.469-2T(f)(6) (relating to certain rentals of property to a trade or business activity in which the taxpayer materially participates).

(iv) The law-practice undertaking, if considered as a separate activity, would not constitute a rental activity because none of the undertaking's gross income represents amounts paid principally for the use of tangible property. Accordingly, the law-practice undertaking is not treated as a rental undertaking.

Example (6). (i) The taxpayer owns a building in which the taxpayer operates a nursing home and a medical clinic. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The nursing-home operations consist of renting apartments in the nursing home to elderly and handicapped persons and providing medical care, meals, and social activities. (Assume that these services are extraordinary personal services (within the meaning of §1.469-1T(e)(3)(v)).) The medical clinic provides medical care to nursing-home residents and other individuals. Nursing-home residents typically occupy an apartment for at least one year. The paragraph (c) undertaking derives 55 percent of its gross income from nursing-home operations (including the provision of medical services to nursing-home residents) and 45 percent of its gross income from medical-clinic operations. The operations conducted in the building are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)(3)(vi)).

(ii) The paragraph (c) undertaking's nursing-home operations involve the provision of tangible property (the apartments) for use by customers and the provision of property and services in connection therewith. In addition, the apartments are not short-term real properties (within the meaning of paragraph (d)(3)(ii) of this section) because the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for the apartments exceeds 30 days. Accordingly, the nursing-home operations are rental operations (within the meaning of paragraph (d)(3) of this section). The medical-clinic operations do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the medical-clinic operations are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the nursing-home operations, if considered as a separate activity, would not constitute a rental activity because extraordinary personal services are provided in connection with making nursing-home apartments available for use by customers (see §1.469-1T(e)(3)(ii)(C)). Thus, the exception in paragraph (d)(2)(i) of this section applies, and the nursing-home operations and the medical-clinic operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the nursing-home operations, if considered as a separate activity, would not constitute a rental activity (see (iii) above). Thus, an undertaking that includes no rental operations other than the nursing-home operations would not, if considered as a separate activity, constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (7). (i) The taxpayer rents and sells videocassettes. (Assume that, under paragraph (c)(1) of this section, the videocassette operations are treated as a single paragraph (c) undertaking.) Renters of videocassettes typically keep the videocassettes for one or two days, and do not receive any other property or services in connection with videocassette rentals. The paragraph (c) undertaking derives 70 percent of its gross income from renting videocassettes and 30 percent of its gross income from selling videocassettes. The videocassette operations are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)(3)(vi)).

(ii) The rental of videocassettes involves the provision of tangible property (the videocassettes) for use by customers. In addition, the special rules for short-term real properties contained in paragraph (d)(3)(ii) of this section do not apply in this case because the videocassettes are not real property. Thus, the operations that involve videocassette rentals are rental operations (within the meaning of paragraph (d)(3) of this section). The sale of videocassettes does not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the operations that involve videocassette sales are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the rental operations, if considered as a separate activity, would not constitute a rental activity because the average period of customer use for rented videocassettes does not exceed seven days (see §1.469-1T(e)(3)(ii)(A)). Accordingly, the exception in paragraph (d)(2)(i) of this section applies, and the videocassette-rental operations and videocassette-sales operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the videocassette-rental operations, if considered as a separate activity, would not constitute a rental activity (see (iii) above). Thus, an undertaking that includes no rental operations other than the videocassette-rental operations would not, if considered as a separate activity, constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (8). (i) The taxpayer owns a building in which the taxpayer sells, leases, and services automobiles. (Assume that, under paragraph (c)(1) of this section, the operations conducted in the building are treated as a single paragraph (c) undertaking.) The minimum lease term for any leased automobile is 31 days, and the services provided to lessees (including periodic oil changes, lubrication, and routine services and repairs) are those customarily provided in long-term automobile leases. The paragraph (c) undertaking derives 75 percent of its gross income from selling automobiles, 15 percent of its gross income from servicing automobiles other than leased automobiles, and 10 percent of its gross income from leasing automobiles. The taxpayer's automobile operations are not incidental to any other activity of the taxpayer (within the meaning of §1.469-1T(e)(3)(vi)).

(ii) The paragraph (c) undertaking's automobile-leasing operations involve the provision of tangible property (the automobiles) for use by customers and the provision of services in connection therewith. In addition, the special rules for short-term real properties contained in paragraph (d)(3)(ii) of this section do not apply in this case because the automobiles are not real property. Accordingly, the automobile-leasing operations are rental operations (within the meaning of paragraph (d)(3) of this section). The paragraph (c) undertaking's automobile-sales operations and servicing operations for automobiles other than leased automobiles (the "selling-and-servicing operations") do not involve the provision of tangible property for use by customers or the provision of property or services in connection therewith. Thus, the selling-and-servicing operations are not rental operations.

(iii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, however, the exception in paragraph (d)(2)(ii) of this section applies because less than 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the "automobile-leasing operations"). Accordingly, the rental operations and the selling-and-servicing operations are not treated as two separate undertakings under paragraph (d)(1)(i) of this section.

(iv) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the undertaking (determined after the application of paragraph (d)(1)(i) of this section) includes both the selling-and-servicing operations and the automobile-leasing operations, and the gross income of the undertaking does not represent amounts paid principally for the use of tangible property. Thus, the undertaking, if considered as a separate activity, would not constitute a rental activity. Accordingly, the undertaking is not treated as a rental undertaking.

Example (9). (i) The facts are the same as in example (8), except that the paragraph (c) undertaking derives 60 percent of its gross income from selling automobiles, 15 percent of its gross income from servicing automobiles other than leased automobiles, and 25 percent of its gross income from leasing automobiles.

(ii) Paragraph (d)(1)(i) of this section provides, with certain exceptions, that a paragraph (c) undertaking's rental operations and its operations other than rental operations are treated as two separate undertakings. In this case, more than 20 percent of the paragraph (c) undertaking's gross income is attributable to rental operations (the automobile-leasing operations), and more than 20 percent is attributable to operations other than rental operations (the selling-and-servicing operations). Thus, the exceptions in paragraph (d)(2)(ii) and (iii) of this section do not apply. In addition, the average period of customer use for leased automobiles exceeds 30 days, extraordinary personal services (within the meaning of §1.469-1T(e)(3)(v)) are not provided, and the leasing of the automobiles is not treated as incidental to a nonrental activity under §1.469-1T(e)(3)(vi) (relating to incidental rentals that are not treated as a rental activity). Thus, the leasing operations, if considered as a separate activity, would constitute a rental activity, and the exception in paragraph (d)(2)(i) of this section does not apply. Accordingly, the rental operations and the selling-and-servicing operations are treated as two separate undertakings (the "automobile-leasing undertaking" and the "automobile selling-and-servicing undertaking").

(iii) Paragraph (d)(1)(iii) of this section provides that an undertaking (determined after the application of paragraph (d)(1)(i) of this section) is treated as a rental undertaking if and only if the undertaking, considered as a separate activity, would constitute a rental activity. In this case, the automobile-leasing undertaking would, if considered as a separate activity, constitute a rental activity, and the automobile selling-and-servicing undertaking would not, if considered as a separate activity, constitute a rental activity (see example (8) and (ii) above). Accordingly, the automobile-leasing undertaking is treated as a rental undertaking, and the automobile selling-and-servicing undertaking is not.

(e) *Special rules for certain oil and gas operations*—(1) *Wells treated as nonpassive under §1.469-1T(e)(4)(i).* An oil or gas well shall be treated as an undertaking that is separate from other undertakings in determining the activities of a taxpayer for a taxable year if the following conditions are satisfied:

(i) The well is drilled or operated pursuant to a working interest (within the meaning of §1.469-1T(e)(4)(iv)) and at any time during such taxable year the taxpayer holds such working interest either—

(A) Directly; or

(B) Through an entity that does not limit the liability of the taxpayer with respect to the drilling or operation of such well pursuant to such working interest; and

(ii) The taxpayer would not be treated as materially participating (within the meaning of §1.469-5T) for the taxable year in the activity in which such well would be included if the taxpayer's activities were determined without regard to this paragraph (e).

(2) *Business and rental operations that constitute an undertaking*. In any case in which an oil or gas well is treated under this paragraph (e) as an undertaking that is separate from other undertakings, the business and rental operations that constitute such undertaking are the business and rental operations that are attributable to such well.

(3) *Examples*. The following examples illustrate the application of this paragraph (e). In each example, the taxpayer is an individual whose taxable year is the calendar year.

Example (1). During 1989, A directly owns an undivided interest in a working interest (within the meaning of §1.469-1T(e)(4)(iv)) in two oil wells. A does not participate in the activity in which the wells would be included if A's activities were determined without regard to this paragraph (e). Under paragraph (e)(1) of this section, each well is treated as a separate undertaking in determining A's activities for 1989 because A holds the working interest directly and would not be treated as materially participating for 1989 in the activity in which the wells would be included if A's activities were determined without regard to this paragraph (e). The aggregation rules in paragraph (f) of this section do not apply to these undertakings (see paragraph (f)(1)(ii)(B) of this section). Thus, each of the undertakings is treated as a separate activity under paragraph (b)(1) of this section. The result is the same even if A has net income from one or both wells for 1989 and even if the wells would otherwise be treated as part of the same undertaking under paragraph (c) of this section. The result would also be the same if A held the working interest through an entity, such as a general partnership, that does not limit A's liability with respect to the drilling or operation of the wells pursuant to the working interest.

Example (2). (i) During 1989, B is a general partner in a partnership that owns a working interest (within the meaning of §1.469-1T(e)(4)(iv)) in an oil well. B does not own any interest in the well other than through the partnership. At the end of 1989, however, B's partnership interest is converted into a limited partnership interest, and during 1990 B holds the working interest only as a limited partner. B does not participate in the activity in which the well would be included if B's activities were determined without regard to this paragraph (e).

(ii) Under paragraph (e)(1) of this section, the well is treated as a separate undertaking in determining B's activities for 1989 because B holds the working interest during 1989 through an entity that does not limit B's liability with respect to the drilling or operation of the well pursuant to the working interest, and B would not be treated as materially participating for 1989 in the activity in which the well would be included if B's activities were determined without regard to this paragraph (e). Throughout 1990, however, B's liability with respect to the drilling and operation of the well is limited by the entity through which B holds the working interest (*i.e.*, the limited partnership). Accordingly, paragraph (e)(1) of this section does not apply to the well in 1990, and the well may be included under paragraph (c) of this section in an undertaking that includes other operations.

Example (3). The facts are the same as in example (2), except that B's partnership interest is converted into a limited partnership interest at the end of November 1989. An oil or gas well may be treated as a separate undertaking under paragraph (e)(1) of this section if at any time during the taxable year the taxpayer holds a working interest in the well directly or through an entity that does not limit the taxpayer's liability with respect to the drilling or operation of the well pursuant to the working interest (see §1.469-1T(e)(4)(i)). Thus, although B's liability with respect to the drilling and operation of the well is limited during December 1989, the result in both 1989 and 1990 is the same as in example (2). In 1989, however, disqualified deductions and a ratable portion of the gross income from the well may be treated under §1.469-1T(e)(4)(ii) as passive activity deductions and passive activity gross income, respectively.

(f) *Certain trade or business undertakings treated as part of the same activity*—(1) *Applicability*—(i) *In general*. This paragraph (f) applies to a taxpayer's interests in trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section).

(ii) *Trade or business undertaking*. For purposes of this paragraph (f), the term "trade or business undertaking" means any undertaking in which a taxpayer has an interest, other than—

(A) A rental undertaking (within the meaning of paragraph (d) of this section);

(B) An oil or gas well treated as an undertaking that is separate from other undertakings under paragraph (e) of this section; or

(C) A professional service undertaking (within the meaning of paragraph (h) of this section).

(2) *Treatment as part of the same activity*. A taxpayer's interests in two or more trade or business undertakings that are similar (within the meaning of paragraph (f)(4) of this section) and controlled by the same interests (within the meaning of paragraph (j) of this section) shall be treated as part of the same activity of the taxpayer for any taxable year in which the taxpayer—

(i) Owns interests in each such undertaking through the same passthrough entity;

(ii) Owns a direct or substantial indirect interest (within the meaning of paragraph (f)(3) of this section) in each such undertaking; or

(iii) Materially or significantly participates (within the meaning of §1.469-5T) in the activity that would result if such undertakings were treated as part of the same activity.

(3) *Substantial indirect interest*—(i) *In general*. For purposes of this paragraph (f), a taxpayer owns a substantial indirect interest in an undertaking for a taxable year if at any time during such taxable year the taxpayer's ownership percentage (determined in accordance with paragraph (j)(3) of this section) in a passthrough entity that directly owns such undertaking exceeds ten percent.

(ii) *Coordination rule*. A taxpayer shall be treated for purposes of this paragraph (f) as owning a substantial indirect interest in each of two or more undertakings for any taxable year in which—

(A) Such undertakings are treated as part of the same activity of the taxpayer under paragraph (f)(2)(i) of this section; and

(B) The taxpayer owns a substantial indirect interest (within the meaning of paragraph (f)(3)(i) of this section) in any such undertaking.

(4) *Similar undertakings*—(i) *In general*. Except as provided in paragraph (f)(4)(iii) of this section, two undertakings are similar for purposes of this paragraph (f) if and only if—

(A) There are predominant operations in each such undertaking; and

(B) The predominant operations of both undertakings are in the same line of business.

(ii) *Predominant operations*. For purposes of paragraph (f)(4)(i)(A) of this section, there are predominant operations in an undertaking if more than 50 percent of the undertaking's gross income is attributable to operations in a single line of business.

(iii) *Vertically-integrated undertakings*. If an undertaking (the "supplier undertaking") provides property or services to other undertakings (the "recipient undertakings"), the following rules apply for purposes of this paragraph (f):

(A) *Supplier undertaking similar to recipient undertaking*. If the supplier undertaking predominantly involves the provision of property and services to a recipient undertaking that is controlled by the same interests (within the meaning of paragraph (j) of this section), the supplier undertaking shall be treated as similar to the recipient undertaking. For purposes of applying the preceding sentence—

(*1*) If a supplier undertaking and two or more recipient undertakings that are similar (within the meaning of paragraph (f)(4)(i) of this section) are controlled by the same interests, such recipient undertakings shall be treated as a single undertaking; and

(*2*) A supplier undertaking predominantly involves the provision of property and services to a recipient undertaking for any taxable year in which such recipient undertaking obtains more than 50 percent (by value) of all property and services provided by the supplier undertaking.

(B) *Recipient undertaking similar to supplier undertaking*. If the supplier undertaking is the predominant provider of property and services to a recipient undertaking that is controlled by the same interests (within the meaning of paragraph (j) of this section), the recipient undertaking shall be treated, except as otherwise provided in paragraph (f)(4)(iii)(C) of this section, as similar to the supplier undertaking. For purposes of the preceding sentence, a supplier undertaking is the predominant provider of property and services to a recipient undertaking for any taxable year in which the supplier undertaking provides more than 50 percent (by value) of all property and services obtained by the recipient undertaking.

(C) *Coordination rules*. (*1*) Paragraph (f)(4)(iii)(B) of this section does not apply if, under paragraph (f)(4)(iii)(A) of this section—

(*i*) The supplier undertaking is treated as an undertaking that is similar to any recipient undertaking;

(*ii*) The recipient undertaking is treated as a supplier undertaking that is similar to another recipient undertaking; or

(*iii*) Another supplier undertaking is treated as an undertaking that is similar to the recipient undertaking.

(*2*) If paragraph (f)(4)(iii)(A) of this section applies to a supplier undertaking, the supplier undertaking shall be treated as similar to undertakings that are similar to the recipient undertaking and shall not otherwise be treated as similar to undertakings to which the supplier undertaking would be similar without regard to paragraph (f)(4)(iii) of this section.

(*3*) If paragraph (f)(4)(iii)(B) of this section applies to a recipient undertaking, the recipient undertaking shall be treated as similar to undertakings that are similar to the supplier undertaking and shall not otherwise be treated as similar to undertakings to which the recipient undertaking would be similar without regard to paragraph (f)(4)(iii) of this section.

(iv) *Lines of business*. The Commissioner shall establish, by revenue procedure, lines of business for purposes of this paragraph (f)(4). Business and rental operations that are not included in the lines of business established by the Commissioner shall nonetheless be included in a line of business for purposes of this paragraph (f)(4). Such operations shall be included in a single line of business or in multiple lines of business on a basis that reasonably reflects—

(A) Similarities and differences in the property or services provided pursuant to such operations and in the markets to which such property or services are offered; and

(B) The treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences.

(5) *Examples*. The following examples illustrate the application of this paragraph (f). In each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusions relate to a single taxable year.

Example (1). (i) The taxpayer is a partner in partnerships A, B, C, and D and owns a five-percent interest in each partnership. Each partnership owns a single undertaking (undertakings A, B, C, and D), and the undertakings are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that are controlled by the same interests (within the meaning of paragraph (j) of this section). In addition, undertakings A, B, and D are similar (within the meaning of paragraph (f)(4) of this section). The taxpayer is not related to any of the other partners, and does not participate in any of the undertakings.

(ii) In general, each undertaking in which a taxpayer owns an interest is treated as a single activity that is separate from other activities of the taxpayer (see paragraph (b)(1) of this section). This paragraph (f) provides aggregation rules for trade or business undertakings that are similar and controlled by the same interests. These aggregation rules do not apply, however, unless the taxpayer owns interests in the undertakings through the same passthrough entity, owns direct or substantial indirect interests in the undertakings, or materially or significantly participates in the undertakings. In this case, the taxpayer does not satisfy any of these conditions, and the aggregation rules in this paragraph (f) do not apply. Accordingly, except as otherwise provided in paragraph (g) of this section (relating to an aggregation rule for integrated businesses), undertakings A, B, C, and D are treated as separate activities of the taxpayer under paragraph (b)(1) of this section.

Example (2). (i) The facts are the same as in example (1), except that the taxpayer owns a 25-percent interest in partnership A, a 15-percent interest in partnership B, and a 40-percent interest in partnership C.

(ii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the taxpayer owns more than ten percent of partnerships A, B, and C, and these partnerships directly own undertakings A, B, and C. Thus, the taxpayer owns a substantial indirect interest in undertakings A, B, and C (see paragraph (f)(3)(i) of this section). Of these undertakings, only undertakings A and B are both similar and controlled by the same interests. Accordingly, the taxpayer's interests in undertakings A and B are treated as part of the same activity. As in example (1), the aggregation rules in this paragraph (f) do not apply to undertakings C and D, and except as otherwise provided in paragraph (g) of this section, undertakings C and D are treated as separate activities.

Example (3). (i) The facts are the same as in example (1), except that the taxpayer participates (within the meaning of §1.469-5T(f)) for 60 hours in undertaking A and for 60 hours in undertaking B.

(ii) Paragraph (f)(2)(iii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer materially or significantly participates (within the meaning of §1.469-5T) in the activity that would result from the treatment of similar, commonly-controlled undertakings as part of the same activity. In this case, the activity that would result from treating the similar, commonly-controlled undertakings as part of the same activity consists of undertakings A, B, and D, and the taxpayer participates for 120 hours in the activity that results from this treatment. Accordingly, undertakings A, B, and D are treated as part of the same activity because the taxpayer significantly participates (within the meaning of §1.469-5T(c)(2)) in the activity that results from this treatment. The result is the same whether the taxpayer participates in one, two, or all three of the similar, commonly-controlled undertakings, so long as the taxpayer's aggregate participation in undertakings A, B, and D exceeds 100 hours. As in example (1), the aggregation rules in this paragraph (f) do not apply to undertaking C, and except as otherwise provided in paragraph (g) of this section, undertaking C is treated as a separate activity.

Example (4). (i) The taxpayer owns a 5-percent interest in partnership A. Partnership A owns interests in partnerships B and C, each of which owns a single undertaking (undertakings B and C). In addition, the taxpayer is a partner in partnerships C and D and directly owns a 15-percent interest in each partnership. Partnership D also owns a single undertaking (undertaking D). Undertakings B, C, and D are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that are similar (within the meaning of paragraph (f)(4) of this section) and controlled by the same interests (within the meaning of paragraph (j) of this section). The taxpayer does not participate in undertaking B, C, or D.

(ii) Paragraph (f)(2)(i) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns interests in the undertakings through the same passthrough entity. In this case, the taxpayer owns interests in undertakings B and C through partnership A. Thus, the taxpayer's interests in undertakings B and C are treated as part of the same activity.

(iii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the taxpayer owns more than ten percent of partnerships C and D, and these partnerships directly own undertakings C and D. Thus, the taxpayer owns a substantial indirect interest in undertakings C and D (see paragraph (f)(3)(i) of this section).

(iv) The coordination rule in paragraph (f)(3)(ii) of this section applies to undertakings B and C because they are treated as part of the same activity under paragraph (f)(2)(i) of this section, and the taxpayer owns a substantial indirect interest in undertaking C. Under the coordination rule, the taxpayer is treated as owning a substantial indirect interest in undertaking B as well as undertaking C. Accordingly, the taxpayer's interests in undertakings B, C, and D are treated as part of the same activity.

Example (5). (i) Undertakings A, B, C, and D are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section), each of which involves the operation of a department store, restaurants, and movie theaters. The following table shows, for each undertaking, the percentages of gross income attributable to the various operations of the undertaking.

	Department store	*Restaurants*	*Movie Theaters*
Undertaking A	70%	20%	10%
Undertaking B	60%	20%	20%
Undertaking C	35%	35%	30%
Undertaking D	35%	10%	55%

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if and only if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that "general merchandise stores," "eating and drinking places," and "motion picture services" are three separate lines of business.)

(iii) Undertaking A and undertaking B each derives more than 50 percent of its gross income from department-store operations, which are in the general-merchandise-store line of business. Thus, there are predominant operations in undertaking A and undertaking B, and the predominant operations of the two undertakings are in the same line of business. Accordingly, undertakings A and B are similar.

(iv) Undertaking C does not derive more than 50 percent of its gross income from operations in any single line of business. Thus, there are no predominant operations in undertaking C, and undertaking C is not similar to any of the other undertakings.

(v) Undertaking D derives more than 50 percent of its gross income from movie-theater operations, which are in the motion-picture-services line of business. Thus, there are predominant operations in undertaking D. The predominant operations of undertaking D, however, are not in the same line of business as those of undertakings A and B. Accordingly, undertaking D is not similar to undertakings A and B.

Example (6). (i) Undertakings A and B are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that derive all of their gross income from the sale of automobiles. Undertakings C and D derive all of their gross income from the rental of automobiles. Undertaking C is not a rental undertaking (within the meaning of paragraph (d)(1)(iii) of this section) because the average period of customer use (within the meaning of §1.469-1T(e)(3)(iii)) for its automobiles does not exceed seven days (see §1.469-1T(e)(3)(ii)(A)). Undertaking D, on the other hand, leases automobiles for periods of one year or more and is a rental undertaking.

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if and only if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that (a) "automotive dealers and service stations" (automotive retail) and (b) "auto repair, services (including rentals), and parking" (automotive services) are two separate lines of business.)

(iii) Undertakings A and B both derive more than 50 percent of their gross income from operations in the automotive-retail line of business (the automobile-sales operations). Similarly, undertakings C and D both derive more than 50 percent of their gross income from operations in the automotive-services line of business (the automobile-rental operations). Thus, there are predominant operations in each undertaking, the predominant operations of undertakings A and B are in the same line of business, and the predominant operations of undertakings C and D are in the same line of business. Accordingly, undertakings A and B are similar, undertakings C and D are similar, and undertakings A and B are not similar to undertakings C and D.

(iv) Paragraph (f)(1) of this section provides that this paragraph (f) applies only to trade or business undertakings and that a rental undertaking is not a trade or business undertaking. Accordingly, this paragraph (f) does not apply to undertaking D, and undertakings C and D, although similar, are not treated, under this paragraph (f), as part of the same activity.

Example (7). (i) Undertakings A, B, and C are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that involve real estate operations. Undertaking A derives all of its gross income from the development of real property, undertaking B derives all of its gross income from the management of real property and the performance of services as a leasing agent with respect to real property, and undertaking C derives all of its gross income from buying, selling, or arranging purchases and sales of real property. Undertaking D derives all of its gross income from the rental of residential apartments and is a rental undertaking (within the meaning of paragraph (d)(1)(iii) of this section).

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that real estate development and services (including the development and management of real property, dealing in real property, and the performance of services as a leasing agent with respect to real property) is a single line of business (the "real-estate" line of business).)

(iii) Undertakings A, B, and C all derive more than 50 percent of their gross income from operations in the realestate line of business. Thus, there are predominant operations in undertakings A, B, and C, and the predominant operations of the three undertakings are in the same line of business. Accordingly, undertakings A, B, and C are similar.

(iv) Undertaking D also derives more than 50 percent of its gross income from operations in the real-estate line of business. Thus, there are predominant operations in undertaking D, and the predominant operations of undertaking D are in the same line of business as those of undertakings A, B, and C. Paragraph (f)(1) of this section provides, however, that this paragraph (f) applies only to trade or business undertakings and that a rental undertaking is not a trade or business undertaking. Accordingly, this paragraph (f) does not apply to undertaking D, and undertaking D, although similar to undertakings A, B, and C, is not treated, under this paragraph (f), as part an activity that includes undertaking A, B, or C.

Example (8). (i) Undertakings A and B are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section), both of which involve the provision of moving services. Undertaking A derives its gross income principally from local moves, and undertaking B derives its gross income principally from long-distance moves.

(ii) Paragraph (f)(4)(i) of this section provides that two undertakings are similar for purposes of this paragraph (f) if there are predominant operations in each undertaking and the predominant operations of the two undertakings are in the same line of business. Under paragraph (f)(4)(iv) of this section, operations that are not in the lines of business established by the applicable revenue procedure are nonetheless included in a line of business. In addition, such operations are included in a single line of business or in multiple lines of business on a basis that reasonably reflects (a) similarities and differences in the property or services provided pursuant to such operations and in the markets to which such property or services are offered, and (b) the treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences. (Assume that the provision of moving services is not in any line of business established by the Commissioner and that within the lines of business established by the Commissioner services that differ only in the distance over which they are performed (*e.g.*, local and long-distance telephone services) are generally treated as part of the same line of business.)

(iii) Undertakings A and B provide the same types of services to similar customers, and the only significant difference in the services provided is the distance over which they are performed. Thus, treating local and long-distance moving services as a single line of business (the "moving-services" line of business) reasonably reflects the treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences.

(iv) Each undertaking derives more than 50 percent of its gross income from operations in the moving-services line of business. Thus, there are predominant operations in each undertaking, and the predominant operations of the two undertakings are in the same line of business. Accordingly, undertakings A and B are similar.

Example (9). (i) Undertakings A, B, C, D, and E are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) and are controlled by the same interests (within the meaning of paragraph (j) of this section). Undertakings A, B, and C derive all of their gross income from retail sales of dairy products, and undertakings D and E derive all of their gross income from the processing of dairy products. Undertakings D and E sell less than ten percent of their dairy products to undertakings A, B, and C, and sell the remainder to unrelated undertakings. Undertakings A, B, and C purchase less than ten percent of their inventory from undertakings D and E and purchase the remainder from unrelated undertakings.

(ii) Paragraph (f)(4)(i) of this section provides that, except as provided in paragraph (f)(4)(iii) of this section, undertakings are similar for purposes of this paragraph (f) if and only if there are predominant operations in each undertaking and the predominant operations of the undertakings are in the same line of business. (Assume that the applicable revenue procedure provides that (a) "food stores" and (b) "manufacturing—food and kindred products" are two separate lines of business.)

(iii) Undertakings A, B, and C all derive more than 50 percent of their gross income from operations in the food-store line of business (the dairy-sales operations). Thus, there are predominant operations in undertakings A, B, and C, and the predominant operations of the three undertakings are in the same line of business. Accordingly, undertakings A, B, and C are similar.

(iv) Undertakings D and E both derive more than 50 percent of their gross income from operations in the food-manufacturing line of business (the dairy-processing operations). Thus, there are predominant operations in undertakings D and E, and the predominant operations of the two undertakings are in the same line of business. Accordingly, undertakings D and E are similar. The predominant operations of undertakings D and E are not in the same line of business as those of undertakings A, B, and C. Accordingly, undertakings D and E are not similar to undertakings A, B, and C.

(v) Paragraph (f)(4)(iii) of this section provides rules under which certain undertakings whose operations are not in the same line of business nevertheless are similar to one another if one of the undertakings (the "supplier undertaking") provides property or services to the other undertaking (the "recipient undertaking"), and the undertakings are controlled by the same interests. These rules apply, however, only if the supplier undertaking predominantly involves the provision of property and services to the recipient undertaking (see paragraph (f)(4)(iii)(A) of this section), or the supplier undertaking is the predominant provider of property and services to the recipient undertaking (see paragraph (f)(4)(iii)(B) of this section). In this case, undertakings D and E are supplier undertakings, and undertakings A, B, and C are recipient undertakings. Undertakings D and E, however, sell less than ten percent of their dairy products to undertakings A, B, and C and thus do not predominantly involve the provision of property and services to recipient undertakings. Similarly, undertakings D and E are not the predominant providers of property and services to undertakings A, B, and C. Thus, the rules for vertically-integrated undertakings in paragraph (f)(4)(iii) of this section do not apply in this case.

Example (10). (i) The facts are the same as in example (9), except that undertaking D sells 75 percent of its dairy products to undertakings A, B, and C.

(ii) Paragraph (f)(4)(iii)(A) of this section applies if a supplier undertaking predominantly involves the provision of property to a recipient undertaking that is controlled by the same interests. Paragraph (f)(4)(iii)(A)(*2*) of this section provides that a supplier undertaking predominantly involves the provision of property to a recipient undertaking if the supplier undertaking provides more than 50 percent of its property to such recipient undertaking. In addition, paragraph (f)(4)(iii)(A)(*1*) of this section provides that if a supplier undertaking and two or more similar recipient undertakings are controlled by the same interests, the recipient undertakings are treated as a single undertaking for purposes of applying paragraph (f)(4)(iii)(A) of this section. Undertakings D and E both provide dairy products to undertakings A, B, and C. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertakings D and E are supplier undertakings and undertakings A, B, and C are recipient undertakings. Undertaking D predominantly involves the provision of property to undertakings A, B, and C. Moreover, undertakings A, B, and C are treated as a single undertaking under paragraph (f)(4)(iii)(A)(*1*) of this section because undertakings A, B, and C are similar to one another under paragraph (f)(4)(i) of this section, and undertakings A, B, C, and D are controlled by the same interests. Accordingly, paragraph (f)(4)(iii)(A) of this section applies to undertakings A, B, C, and D.

(iii) If paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii)(A) and (C)(*2*) of this section as an undertaking that is similar to the recipient undertakings and to undertakings to which the recipient undertakings are similar. Accordingly, undertaking D is similar, for purposes of this paragraph (f), to undertakings A, B, and C.

(iv) Undertaking E does not predominantly involve the provision of property to undertakings A, B, and C, or to any other related undertakings. Thus, paragraph (f)(4)(iii)(A) of this section does not apply to undertaking E, and undertaking E is not similar to undertakings A, B, and C. Moreover, undertakings D and E are not similar because, under paragraph (f)(4)(iii)(C)(*2*) of this section, undertaking D is not similar to any undertaking that is not similar to undertakings A, B, and C.

Example (11). (i) The facts are the same as in example (10), except that 75 percent of undertaking D's dairy products are sold to undertakings A and B, and none are sold to undertaking C.

(ii) In this case, undertaking D is a supplier undertaking only with respect to undertakings A and B. Accordingly, paragraph (f)(4)(iii)(A) applies only to undertakings A, B, and D. As in example (10), undertaking D is similar to undertakings A and B, and is not similar to undertaking E. In addition, if paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii)(C)(*2*) of this section as an undertaking that is similar to the recipient undertakings and undertakings to which the recipient undertakings are similar. Accordingly, even though undertaking D does not provide any property or services to undertaking C, undertaking D is similar to undertaking C because undertaking C is similar to undertakings A and B.

Example (12). (i) The facts are the same as in example (9), except that undertakings A and B purchase 80 percent of their inventory from undertaking D.

(ii) Paragraph (f)(4)(iii)(B) of this section applies, except as provided in paragraph (f)(4)(iii)(C) of this section, if a supplier undertaking is the predominant provider of property to a recipient undertaking that is controlled by the same interests. Undertakings D and E both provide dairy products to undertakings A, B, and C. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertakings D and E are supplier undertakings, and undertakings A, B, and C are recipient undertakings. In addition, undertaking D is the predominant provider of property and services to undertakings A and B, and undertakings A, B, and D are controlled by the same interests. Thus, except as provided in paragraph (f)(4)(iii)(C) of this section, paragraph (f)(4)(iii)(B) of this section applies to undertakings A, B, and D.

(iii) The coordination rules in paragraph (f)(4)(iii)(C)(*1*) of this section provide that paragraph (f)(4)(iii)(B) of this section does not apply in certain cases to which paragraph (f)(4)(iii)(A) of this section applies. These coordination rules would apply if undertaking D or E (or any other undertaking that is controlled by the interests that control undertakings A, B, and C) predominantly involved the provision of property and services to undertakings A, B, and C. The coordination rules in paragraph (f)(4)(iii)(C)(*1*) of this section would also apply if undertaking A, B, or D predominantly involved the provision of property or services to a recipient undertaking that is controlled by the same interests. Assume that these coordination rules do not apply in this case.

(iv) If paragraph (f)(4)(iii)(B) of this section applies to supplier and recipient undertakings, the recipient undertakings are treated under paragraph (f)(4)(iii)(B) and (C)(*3*) of this section as undertakings that are similar to the supplier undertaking and to undertakings to which the supplier undertaking is similar. Accordingly, undertakings A and B are similar, for purposes of this paragraph (f), to undertaking D and, because undertakings D and E are similar, to undertaking E.

(v) The principal providers of property and services to undertaking C are unrelated undertakings. Thus, paragraph (f)(4)(iii)(B) of this section does not apply to undertaking C, and undertaking C is not similar to undertakings D and E. Moreover, undertaking C is not similar to undertakings A and B because, under paragraph (f)(4)(iii)(C)(*3*) of this section, undertakings A and B are not similar to any undertaking that is not similar to undertaking D.

Example (13). (i) Undertakings A through Z are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) and are controlled by the same interests (within the meaning of paragraph (j) of this section). Undertaking A derives all of its gross income from the manufacture and sale of men's and women's clothing, undertaking B derives all of its gross income from sales of men's and women's clothing to retail stores, and undertakings C through Z derive all of their gross income from retail sales of men's and women's clothing. Undertaking A sells clothing exclusively to undertaking B. Undertaking B sells 75 percent of its clothing to undertakings C through Z, and sells the remainder to unrelated retail stores. Undertaking B purchases 80 percent of its inventory from undertaking A, and undertakings C through Z purchase 60 to 90 percent of their inventory from undertaking B.

(ii) Paragraph (f)(4)(iii)(A) of this section applies if a supplier undertaking predominantly involves the provision of property to a recipient undertaking that is controlled by the same interests. In addition, paragraph (f)(4)(iii)(A)(*1*) of this section provides that if a supplier undertaking and two or more similar recipient undertakings are controlled by the same interests, the recipient undertakings are treated as a single undertaking for this purpose. Undertaking B provides men's and women's clothing to undertakings C through Z. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertaking B is a supplier undertaking and undertakings C through Z are recipient undertakings. In addition, undertaking B predominantly involves the provision of property to undertakings C through Z, and undertakings C through Z are treated as a single undertaking for purposes of paragraph (f)(4)(iii)(A) of this section. Accordingly, paragraph (f)(4)(iii)(A) of this section applies to undertakings B and C through Z.

(iii) If paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)-

(4)(iii)(A) of this section as an undertaking that is similar to the recipient undertakings. Accordingly, undertaking B is similar, for purposes of this paragraph (f), to undertakings C through Z.

(iv) Undertaking A provides men's and women's clothing to undertaking B. Thus, for purposes of paragraph (f)(4)(iii) of this section, undertaking A is a supplier undertaking and undertaking B is a recipient undertaking. In addition, undertaking A predominantly involves the provision of property to undertaking B, and undertakings A and B are controlled by the same interests. Accordingly, paragraph (f)(4)(iii)(A) of this section applies to undertakings A and B, and undertaking A is similar to undertaking B.

(v) If paragraph (f)(4)(iii)(A) of this section applies to supplier and recipient undertakings, the supplier undertaking is treated under paragraph (f)(4)(iii)(C)(*2*) of this section as an undertaking that is similar to undertakings to which the recipient undertakings are similar. Accordingly, undertaking A is also similar, for purposes of this paragraph (f), to undertakings C through Z.

(vi) The coordination rule in paragraph (f)(4)(iii)(C)(*1*)(*i*) of this section provides that paragraph (f)(4)(iii)(B) of this section does not apply if, as described above, the supplier undertaking predominantly involves the provision of property to recipient undertakings and is treated under paragraph (f)(4)(iii)(A) of this section as an undertaking that is similar to such recipient undertakings. Accordingly, paragraph (f)(4)(iii)(B) of this section does not apply to undertakings B through Z, even though undertaking B is the predominant provider of property and services to undertakings C through Z, and undertakings B through Z are controlled by the same interests. For the same reason, paragraph (f)(4)(iii)(B) of this section does not apply to undertakings A and B. (Paragraph (f)(4)(iii)(B) of this section is also inapplicable to undertakings A and B because the coordination rule in paragraph (f)(4)(iii)(C)(*1*)(*ii*) of this section applies if the recipient undertaking (undertaking B) is itself a supplier undertaking that is treated under paragraph (f)(4)(iii)(A) of this section as an undertaking that is similar to its recipient undertakings (undertakings C through Z).)

(g) *Integrated businesses*—(1) *Applicability*—(i) *In general.* This paragraph (g) applies to a taxpayer's interests in trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section).

(ii) *Trade or business activity.* For purposes of this paragraph (g), the term "trade or business activity" means any activity (determined without regard to this paragraph (g)) that consists of interests in one or more trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section).

(2) *Treatment as a single activity.* A taxpayer's interests in two or more trade or business activities shall be treated as a single activity if and only if—

(i) The operations of such trade or business activities constitute a single integrated business; and

(ii) Such activities are controlled by the same interests (within the meaning of paragraph (j) of this section).

(3) *Facts and circumstances test.* In determining whether the operations of two or more trade or business activities constitute a single integrated business for purposes of this paragraph (g), all the facts and circumstances are taken into account, and the following factors are generally the most significant:

(i) Whether such operations are conducted at the same location;

(ii) The extent to which other persons conduct similar operations at one location;

(iii) Whether such operations are treated as a unit in the primary accounting records reflecting the results of such operations;

(iv) The extent to which other persons treat similar operations as a unit in the primary accounting records reflecting the results of such similar operations;

(v) Whether such operations are owned by the same person (within the meaning of paragraph (c)(2)(v) of this section);

(vi) The extent to which such operations involve products or services that are commonly provided together;

(vii) The extent to which such operations serve the same customers;

(viii) The extent to which the same personnel, facilities, or equipment are used to conduct such operations;

(ix) The extent to which such operations are conducted in coordination with or reliance upon each other;

(x) The extent to which the conduct of any such operations is incidental to the conduct of the remainder of such operations;

(xi) The extent to which such operations depend on each other for their economic success; and

(xii) Whether such operations are conducted under the same trade name.

(4) *Examples.* The following examples illustrate the application of this paragraph (g). The facts, analysis, and conclusion in each example relate to a single taxable year, and the trade or business activities described in each example are controlled by the same interests (within the meaning of paragraph (j) of this section).

Example (1). (i) The taxpayer owns a number of department stores and auto-supply stores. Some of the taxpayer's department stores include auto-supply departments. In other cases, the taxpayer operates a department store and an auto-supply store at the same location (within the meaning of paragraph (c)(2)(iii) of this section), or at different locations from which the same group of customers can be served. In cases in which a department store and an auto-supply store are operated at the same location, the department-store operations are the predominant operations (within the meaning of paragraph (f)(4)(ii) of this section), and the undertaking that includes the stores is treated as a department-store undertaking for purposes of paragraph (f) of this section. Under paragraph (f) of this section, the department-store undertakings are all treated as part of the same activity of the taxpayer (the "department-store activity"). Similarly, the auto-supply undertakings (*i.e.*, the auto-supply stores that are not operated at a department-store location) are all treated as part of the same activity (the "auto-supply activity"). (Assume that department-store undertakings and auto-supply undertakings are not similar and are not treated as part of the same activity under paragraph (f) of this section.)

(ii) The department stores and auto-supply stores use a common trade name and coordinate their marketing activities (*e.g.*, the stores advertise in the same catalog and the same newspaper supplements, honor the same credit cards (including credit cards issued by the department stores), and jointly conduct sales and other promotional activities). Although sales personnel generally work only in a particular store or in a particular department within a store, other employees (*e.g.*, cashiers, janitorial and maintenance workers, and clerical staff) may work in or perform services for various stores, including both department and auto-supply stores. In addition, the management of store operations is organized on a geographical basis, and managers above the level of the individual store generally supervise operations in both types of store. A central office provides payroll, financial, and other support services to all stores and establishes pricing and other business policies. Most inventory for both types of stores is acquired through a central purchasing department and inventory for all stores in an area is stored in a common warehouse.

(iii) Based on the foregoing facts and circumstances, the operations of the department-store activity and the auto-supply activity constitute an integrated business. Paragraph (g)(3) of this section provides that the factors relevant to this determination include the conduct of department-store and auto-supply operations at the same location, the location of department and auto-supply stores at sites where the same group of customers can be served, the treatment of all such operations as a unit in the taxpayer's financial statements, the taxpayer's ownership and the common management of all such operations, the use of the same personnel, facilities, and equipment to conduct and support the operations, the use of a common trade name, and the coordination (as evidenced by the coordinated marketing activities) of department-store and auto-supply operations.

(iv) Paragraph (g)(2) of this section provides that a taxpayer's interests in two or more trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section) are treated as a single activity of the taxpayer if the operations of such activities constitute an integrated business and the activities are controlled by the same interests. The department-store activity and the auto-supply activity consist of trade or business undertakings and, thus, are trade or business activities. In addition, the activities are controlled by the same interests (the taxpayer), and the operations of the activities constitute an integrated business. Accordingly, the department-store activity and the auto-supply activity are treated as a single activity of the taxpayer.

Example (2). (i) The taxpayer owns a number of stores that sell stereo equipment and a repair shop that services stereo equipment. Under paragraph (f) of this section, the stores are all treated as part of the same activity of the taxpayer (the "store activity"). The repair shop does not sell stereo equipment, does not predominantly involve the provision of services to the taxpayer's stores, and is treated as a separate activity (the "repair-shop activity"). (Assume that stereo-sales undertakings and stereo-repair undertakings are not similar and are not treated as part of the same activity under paragraph (f) of this section.)

(ii) The stores sell stereo equipment produced by manufacturers for which the stores are an authorized distributor. The repair shop's operations principally involve the servicing of stereo equipment produced by the same manufacturers. These operations include repairs on equipment under warranty for which reimbursement is received from the manufacturer and reconditioning of equipment taken as trade-ins by the taxpayer's stores. The majority of the operations, however, involve repairs that are performed for customers and are not covered by a warranty. The taxpayer's distribution agreements with manufacturers generally require the taxpayer to repair and service equipment produced by the manufacturer both during and after the warranty period. In some cases, the distribution agreements require that the taxpayer's repair facility meet the manufacturer's standards and provide for periodic inspections to ensure that these standards are met.

(iii) The stores and the repair shop use a common trade name. Sales personnel generally work only in a particular store and stereo technicians work only in the repair shop. The stores and the repair shop are, however, managed from a central office, which supervises both store and repair-shop operations, provides payroll, financial, and other support services to the stores and the repair shop, and establishes pricing and other business policies. In addition, inventory for the stores and supplies for the repair shop are acquired through a central purchasing department and are stored in a single warehouse.

(iv) Based on the foregoing facts and circumstances, the operations of the store activity and the repair-shop activity constitute an integrated business. Paragraph (g)(3) of this section provides that the factors relevant to this determination include the treatment of all such operations as a unit in the taxpayer's financial statements, the taxpayer's ownership and the common management of all such operations, the use of the same personnel and facilities to support the operations, the use of a common trade name, the extent to which the same customers patronize both the stores and the repair shop, the similarity of the products (*i.e.*, stereo equipment) involved in both store and repair-shop operations, and the extent to which the provision of repair services contributes to the taxpayer's ability to obtain the stereo equipment sold in store operations.

(v) Paragraph (g)(2) of this section provides that a taxpayer's interests in two or more trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section) are treated as a single activity of the taxpayer if the operations of such activities constitute an integrated business and the activities are controlled by the same interests. The store activity and the repair-shop activity consist of trade or business undertakings and thus are trade or business activities. In addition, the activities are controlled by the same interests (the taxpayer), and the operations of the activities constitute an integrated business. Accordingly, the store activity and the repair-shop activity are treated as a single activity of the taxpayer.

Example (3). (i) The taxpayer owns interests in three partnerships. One partnership owns a television station, the second owns a professional sports franchise, and the third owns a motion-picture production company. The operations of the partnerships are treated as three separate undertakings. Although other persons own interests in the partnerships, all three undertakings are controlled (within the meaning of paragraph (j) of this section) by the taxpayer. The operations of the partnerships are treated as three separate activities (the "television activity," the "sports activity," and the "motion-picture activity"). (Assume that the undertakings are not similar and are not treated as part of the same activity under paragraph (f) of this section.)

(ii) Each partnership prepares financial statements that reflect only the results of that partnership's operations, and each of the activities is conducted under its own trade name. The taxpayer participates extensively in the management of each partnership and makes the major business decisions for all three partnerships. Each partnership, however, employs separate management and other personnel who conduct its operations on a day-to-day basis. The taxpayer generally arranges the partnerships' financing and often obtains loans for two, or all three, partnerships from the same source. Although the assets of one partnership are not used as security for loans to another partnership, the taxpayer's interest in a partnership may secure loans to the other partnerships. The television station broadcasts the sports franchise's games, and the motion-picture production company occasionally prepares programming for the television station. In addition, support staff of one partnership may, during periods of peak activity or in the case of emergency, be made available to another partnership on a temporary basis. There are no other significant transactions between the partnerships. Moreover, all transactions between the partnerships involve essentially the same terms as would be provided in transactions between unrelated persons.

(iii) Based on the foregoing facts and circumstances, the television activity, the sports activity, and the motion-picture activity constitute three separate businesses. Paragraph (g)(3) of this section provides that the factors relevant to this determination include the treatment of the activities as separate units in the partnerships' financial statements, the use of a different trade name for each activity, the separate day-to-day management of the activities, and the limited extent to which the activities contribute to or depend on each other (as evidenced by the small number of significant transactions between the partnerships and the arm's length nature of those transactions). The taxpayer's participation in management and financing are taken into account in this determination, as are the transactions between the partnerships, but these factors do not of themselves support a determination that the activities constitute an integrated business.

(iv) Paragraph (g)(2) of this section provides that a taxpayer's interests in two or more trade or business activities (within the meaning of paragraph (g)(1)(ii) of this section) are treated as a single activity of the taxpayer only if the operations of such activities constitute an integrated business and the activities are controlled by the same interests. In this case, the taxpayer's activities do not constitute an integrated business, and the aggregation rule in paragraph (g)(2) of this section does not apply. Accordingly, the television activity, the sports activity, and the motion-picture activity are treated as three separate activities of the taxpayer.

(h) *Certain professional service undertakings treated as a single activity*—(1) *Applicability*—(i) *In general.* This paragraph (h) applies to a taxpayer's interests in professional service undertakings (within the meaning of paragraph (h)(1)(ii) of this section).

(ii) *Professional service undertaking.* For purposes of this paragraph (h), an undertaking is treated as a professional service undertaking for any taxable year in which the undertaking derives more than 50 percent of its gross income from the provision of services that are treated, for purposes of section 448(d)(2)(A) and the regulations thereunder, as services performed in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

(2) *Treatment as a single activity*—(i) *Undertakings controlled by the same interests.* A taxpayer's interests in two or more professional service undertakings that are controlled by the same interests (within the meaning of paragraph (j) of this section) shall be treated as part of the same activity of the taxpayer.

(ii) *Undertakings involving significant similar or significant related services.* A taxpayer's interests in two or more professional service undertakings that involve the provision of significant similar services or significant related services shall be treated as part of the same activity of the taxpayer.

(iii) *Coordination rule.* (A) Except as provided in paragraph (h)(2)(iii)(B) of this section, a taxpayer's interests in two or more undertakings (the "original undertakings") that are treated as part of the same activity of the taxpayer under the provisions of paragraph (h)(2)(i) or (ii) of this section shall be treated as interests in a single professional service undertaking (the "aggregated undertaking") for purposes of reapplying such provisions.

(B) If any original undertaking included in an aggregated undertaking and any other undertaking that is not included in such aggregated undertaking involve the provision of significant similar or related services, the aggregated undertaking and such other undertaking shall be treated as undertakings that involve the provision of significant similar or related services for purposes of reapplying the provisions of paragraph (h)(2)(ii) of this section.

(3) *Significant similar or significant related services.* For purposes of this paragraph (h)—

(i) Services (other than consulting services) in any field described in paragraph (h)(1)(ii) of this section are similar to all other services in the same field;

(ii) All the facts and circumstances are taken into account in determining whether consulting services are similar;

(iii) Two professional service undertakings involve the provision of significant similar services if and only if—

(A) Each such undertaking provides significant professional services; and

(B) Significant professional services provided by one such undertaking are similar to significant professional services provided by the other such undertaking;

(iv) Services are significant professional services if and only if such services are in a field described in paragraph (h)(1)(ii) of this section and more than 20 percent of the undertaking's gross income is attributable to services in such field (or, in the case of consulting services, to similar services in such field); and

(v) Two professional service undertakings involve the provision of significant related services if and only if more than 20 percent of the gross income of one such undertaking is derived from customers that are also customers of the other such undertaking.

(4) *Examples.* The following examples illustrate the application of this paragraph (h). In each example that does not state otherwise, the taxpayer is an individual, and the facts, analysis, and conclusions relate to a single taxable year.

Example (1). (i) The taxpayer is a partner in a law partnership that has offices in various cities. Some of the partnership's offices provide a full range of legal services. Other offices, however, specialize in a particular area or areas of the law (*e.g.*, litigation, tax law, corporate law, *etc.*). In either case, substantially all of the office's gross income is derived from the provision of legal services. Under paragraph (c)(1) of this section, each of the law partnership's offices is treated as a single undertaking that is separate from other undertakings (a "law-office undertaking").

(ii) Each law-office undertaking derives more than 50 percent of its gross income from the provision of services in the field of law. Thus, each such undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section).

(iii) Each law-office undertaking derives more than 20 percent of its gross income from services in the field of law. Thus, each such undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section) in the field of law. In addition, all services in the field of law are treated as similar services under paragraph (h)(3)(i) of this section. Thus, the law-office undertakings involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in the law-office undertakings are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section even if the undertakings are not controlled by the same interests (within the meaning of paragraph (j) of this section).

Example (2). (i) The taxpayer is a partner in medical partnerships A and B. Both partnerships derive all of their gross income from the provision of medical services, but partnership A specializes in internal medicine and partnership B operates a radiology laboratory. Under paragraph (c)(1) of this section, the medical-service business of each partnership is treated as a single undertaking that is separate from other undertakings (a "medical-service undertaking"). Partnerships A and B are not controlled by the same interests (within the meaning of paragraph (j) of this section).

(ii) Each partnership's medical-service undertaking derives more than 50 percent of its gross income from the provision of services in the field of health. Thus, each partnership's medical-service undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section).

(iii) Each partnership's medical-service undertaking derives more than 20 percent of its gross income from services in the field of health. Thus, each such undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section) in the field of health. In addition, all services in the field of health are treated as similar services under paragraph (h)(3)(i) of this section. Thus, the medicalservice undertakings of partnerships A and B involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in the medical-service undertakings of partnerships A and B are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section even though the undertakings are not controlled by the same interests.

Example (3). (i) The facts are the same as in example (2), except that the taxpayer withdraws from partnership A in 1989 and becomes a partner in partnership B in 1990. In addition, the taxpayer was a full-time participant in the operations of partnership A from 1970 through 1989, but does not participate in the operations of partnership B.

(ii) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. This rule is not limited to cases in which the taxpayer holds such interests simultaneously. Thus, as in example (2), the taxpayer's interests in the medical-service undertakings of partnerships A and B are treated as part of the same activity of the taxpayer.

(iii) The activity that includes the taxpayer's interests in the medical-service undertakings of partnerships A and B is a personal service activity (within the meaning of §1.469-5T(d)) because it involves the performance of personal services in the field of health. In addition, the taxpayer materially participated in the activity for three or more taxable years preceding 1990 (see §1.469-5T(j)(1)). Thus, even if the taxpayer does not work in the activity after 1989, the taxpayer is treated, under §1.469-5T(a)(6), as materially participating in the activity for 1990 and subsequent taxable years.

Example (4). (i) The taxpayer is a partner in an accounting partnership that has offices in various cities (partnership A) and in a management-consulting partnership that has a single office (partnership B). Each of partnership A's offices derives substantially all of its gross income from services in the field of accounting, and partnership B derives substantially all of its gross income from services in the field of consulting. Under paragraph (c)(1) of this section, partnership B's consulting business is treated as a single undertaking that is separate from other undertakings (the "consulting undertaking") and each of partnership A's offices is similarly treated (the "accounting undertakings"). The accounting undertakings are controlled by the same interests, but partnerships A and B are not controlled by the same interests (within the meaning of paragraph (j) of this section). Partnership B's consulting business derives 50 percent of its gross income from customers of partnership A's accounting undertakings, but does not derive more than 20 percent of its gross income from the customers of any single accounting undertaking.

(ii) Each accounting undertaking derives more than 50 percent of its gross income from the provision of services in the field of accounting, and the consulting undertaking derives more than 50 percent of its gross income from the provision of services in the field of consulting. Thus, each accounting undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section), and the consulting undertaking is also treated as a professional service undertaking.

(iii) Each accounting undertaking derives more than 20 percent of its gross income from services in the field of accounting. Thus, each such undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section) in the field of accounting. In addition, all services in the field of accounting are treated as similar services under paragraph (h)(3)(i) of this section. Thus, the accounting undertakings involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(i) and (ii) of this section provides that a taxpayer's interests in professional service undertakings that are controlled by the same interests or that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. The accounting undertakings are controlled by the same interests (see (i) above) and involve the provision of significant similar services (see (iii) above). Accordingly, the taxpayer's interests in the accounting undertakings are treated as part of the same activity under paragraph (h)(2)(i) and (ii) of this section.

(v) The consulting undertaking derives more than 20 percent of its gross income from services in the field of consulting. If, based on all the facts and circumstances, these services are determined to be similar consulting services under paragraph (h)(3)(ii) of this section, the consulting undertaking involves significant professional services (within the meaning of paragraph (h)(3)(iv) of this section). In this case, however, the consulting undertaking and the accounting undertakings do not involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section) because consulting services and accounting services are not treated as similar services under paragraph (h)(3)(i) of this section.

(vi) The consulting undertaking does not derive more than 20 percent of its gross income from the customers of any single accounting undertaking of partnership A. If, however, partnership A's accounting undertakings are aggregated, the consulting undertaking derives more than 20 percent of its gross income from customers of the aggregated undertakings. Paragraph (h)(3)(v) of this section provides that two professional service undertakings involve the provision of significant related services if more than 20 percent of the gross income of one undertaking is derived from customers of the other undertaking. For purposes of applying this rule, partnership A's accounting undertakings are treated as a single undertaking under paragraph (h)(2)(iii) of this section because the accounting undertakings are treated as part of the same activity under paragraph (h)(2)(i) and (ii) of this section. Thus, the consulting undertaking and the accounting undertakings involve the provision of significant related services.

(vii) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant related services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in the consulting undertaking and the accounting undertakings are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section.

Example (5). (i) The facts are the same as in example (4), except that partnership B's consulting business derives only 15 percent of its gross income from customers of partnership A's accounting undertakings.

(ii) As in example (4), the taxpayer's interests in the accounting undertakings are treated as part of the same activity under paragraph (h)(2)(i) and (ii) of this section and are treated under paragraph (h)(2)(iii) of this section as a single undertaking for purposes of reapplying those provisions. In this case, however, the consulting undertaking does not derive more than 20 percent of its gross income from the customers of partnership A's accounting undertakings. Thus, the consulting undertaking and the accounting undertakings do not involve the provision of significant related services. Accordingly, the accounting undertakings and the consulting undertaking are not treated as part of the same activity under paragraph (h)(2)(i) or (ii) of this section because they are not controlled by the same interests and do not involve the provision of significant similar or related services.

Example (6). (i) The taxpayer is a partner in partnerships A, B, and C. Partnership A derives substantially all of its gross income from the provision of engineering services, partnership B derives substantially all of its gross income from the provision of architectural services, and partnership C derives 40 percent of its gross income from the provision of engineering services and the remainder from the provision of architectural services. Under paragraph (c)(1) of this section, each partnership's service business is treated as a single undertaking that is separate from other undertakings. Partnerships A, B, and C are not controlled by the same interests (within the meaning of paragraph (j) of this section).

(ii) Each partnership's undertaking derives more than 50 percent of its gross income from the provision of services in the fields of architecture and engineering. Thus, each such undertaking is treated as a professional service undertaking (within the meaning of paragraph (h)(1)(ii) of this section).

(iii) Partnership A's undertaking ("undertaking A") derives more than 20 percent of its gross income from services in the field of engineering, partnership B's undertaking ("undertaking B") derives more than 20 percent of its gross income from services in the field of architecture, and partnership C's undertaking ("undertaking C") derives more than 20 percent of its gross income from services in the field of engineering and more than 20 percent of its gross income from services in the field of architecture. Thus, undertaking A involves significant services in the field of engineering, undertaking B involves significant services in the field of architecture, and undertaking C involves significant services in both fields. Under paragraph (h)(3)(i) of this section, all services within each field are treated as similar services, but engineering services and architectural services are not treated as similar services. Thus, undertakings A and C, and undertakings B and C, involve the provision of significant similar services (within the meaning of paragraph (h)(3)(iii) of this section).

(iv) Paragraph (h)(2)(ii) of this section provides that a taxpayer's interests in professional service undertakings that involve the provision of significant similar services are treated as part of the same activity of the taxpayer. Accordingly, the taxpayer's interests in undertakings A and C are treated as part of the same activity of the taxpayer.

(v) Under paragraph (h)(2)(iii)(A) of this section, undertakings A and C are also treated as a single undertaking for purposes of determining whether undertaking B involves the provision of significant similar services. Paragraph (h)(2)(iii)(B) of this section in effect provides that treating undertakings A and C as a single undertaking does not affect the conclusion that the architectural services provided by undertakings B and C are significant similar services. Thus, undertaking B and the single undertaking in which undertakings A and C are included under paragraph (h)(3)(iii) of this section involve the provision of significant similar services, and the taxpayer's interests in undertakings A, B, and C are treated as part of the same activity of the taxpayer under paragraph (h)(2)(ii) of this section.

(i) [Reserved.]

(j) *Control by the same interests and ownership percentage*—(1) *In general.* Except as otherwise provided in paragraph (j)(2) of this section, all the facts and circumstances are taken into account in determining, for purposes of this section, whether undertakings are controlled by the same interests. For this purpose, control includes any kind of control, direct or indirect, whether legally enforceable, and however exercisable or exercised. It is the reality of control that is determinative, and not its form or mode of exercise.

(2) *Presumption*—(i) *In general.* Undertakings are rebuttably presumed to be controlled by the same interests if such undertakings are part of the same common-ownership group.

(ii) *Common-ownership group.* Except as provided in paragraph (j)(2)(iii) of this section, two or more undertakings of a taxpayer are part of the same common-ownership group for purposes of this paragraph (j)(2) if and only if the sum of the common-ownership percentages of any five or fewer persons (within the meaning of section 7701(a)(1), but not including passthrough entities) with respect to such undertakings exceeds 50 percent. For this purpose, the common-ownership percentage of a person with respect to such undertakings is the person's smallest ownership percentage (determined in accordance with paragraph (j)(3) of this section) in any such undertaking.

(iii) *Special aggregation rule.* If, without regard to this paragraph (j)(2)(iii), an undertaking of a taxpayer is part of two or more common-ownership groups, any undertakings of the taxpayer that are part of any such common-ownership group shall be treated for purposes of this paragraph (j)(2) as part of a single common-ownership group in determining the activities of such taxpayer.

(3) *Ownership percentage*—(i) *In general.* For purposes of this section, a person's ownership percentage in an undertaking or in a passthrough entity shall include any interest in such undertaking or passthrough entity that the person holds directly and the person's share of any interest in such undertaking or passthrough entity that is held through one or more passthrough entities.

(ii) *Passthrough entities.* The following rules apply for purposes of applying paragraph (j)(3)(i) of this section:

(A) A partner's interest in a partnership and share of any interest in a passthrough entity or undertaking held through a partnership shall be determined on the basis of the greater of such partner's percentage interest in the capital (by value) of such partnership or such partner's largest distributive share of any item of income or gain (disregarding guaranteed payments under section 707(c)) of such partnership.

(B) A shareholder's interest in an S corporation and share of any interest in a passthrough entity or undertaking held through an S corporation shall be determined on the basis of such shareholder's stock ownership.

(C) A beneficiary's interest in a trust or estate and share of any interest in a passthrough entity or undertaking held through a trust or estate shall not be taken into account.

(iii) *Attribution rules*—(A) *In general.* Except as otherwise provided in paragraph (j)(3)(iii)(B) of this section, a person's ownership percentage in a passthrough entity or in an undertaking shall be determined by treating such person as the owner of any interest that a person related to such person owns (determined without regard to this paragraph (j)(3)(iii)) in such passthrough entity or in such undertaking.

(B) *Determination of common-ownership percentage*. The common-ownership percentage of five or fewer persons with respect to two or more undertakings shall be determined, in any case in which, after the application of paragraph (j)(3)(iii)(A) of this section, two or more such persons own the same interest in any such undertaking (the "related-party owners") by treating as the only owner of such interest (or portion thereof) the related-party owner whose ownership of such interest (or a portion thereof) would result in the highest common-ownership percentage.

(C) *Related person*. A person is related to another person for purposes of this paragraph (j)(3)(iii) if the relationship of such persons is described in section 267(b) or 707(b)(1).

(4) *Special rule for trade or business activities*. In determining whether two or more trade or business activities are controlled by the same interests for purposes of paragraph (g) of this section, each such activity shall be treated as a separate undertaking in applying this paragraph (j).

(5) *Examples*. The following examples illustrate the application of this paragraph (j):

Example (1). (i) Partnership X is the sole owner of an undertaking (undertaking X), and partnership Y is the sole owner of another undertaking (undertaking Y). Individuals A, B, C, D, and E are the only partners in partnerships X and Y, and the partnership agreements of both X and Y provide that no action may be taken or decision made on behalf of the partnership without the unanimous consent of the partners. Moreover, each partner actually participates in, and agrees to, all major decisions that affect the operations of either partnership. The ownership percentages (within the meaning of paragraph (j)(3) of this section) of A, B, C, D, and E in each partnership (and in the undertaking owned by the partnership) are as follows:

	Partnership/Undertaking	
Partner	*X*	*Y*
A	15%	5%
B	10%	60%
C	10%	20%
D	77%	12%
E	8%	20%
	120%	117%

(The sum of the ownership percentages exceeds 100 percent for both X and Y because, under paragraph (j)(3)(ii)(A) of this section, each partner's ownership percentage is determined on the basis of the greater of the partner's percentage interest in the capital of the partnership or the partner's largest distributive share of any item of income or gain of the partnership.)

(ii) Paragraph (j)(2)(ii) of this section provides that a person's common-ownership percentage with respect to any two or more undertakings is the person's smallest ownership percentage in any such undertaking. Thus, the common-ownership percentages of A, B, C, D, and E with respect to undertakings X and Y are as follows:

Partner	*Common-ownership percentage*
A	5%
B	10%
C	10%
D	12%
E	8%
	45%

(iii) Paragraph (j)(2)(i) of this section provides that undertakings are rebuttably presumed to be controlled by the same interests if the undertakings are part of the same common-ownership group. In general, undertakings are part of a common-ownership group only if the sum of the common-ownership percentages of any five or fewer persons with respect to such undertakings exceeds 50 percent. In this case, the sum of the partners' common-ownership percentages with respect to undertakings X and Y is only 45 percent. Thus, undertakings X and Y are not part of the same common-ownership group.

(iv) If the presumption in paragraph (j)(2)(i) of this section does not apply, all the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests (see paragraph (j)(1) of this section). In this case, all actions and decisions in both undertakings require the unanimous consent of the same persons and each of those persons actually participates in, and agrees to, all major decisions. Accordingly, undertakings X and Y are controlled by the same interests (*i.e.*, A, B, C, D, and E).

Example (2). (i) Partnerships W, X, Y, and Z are each the sole owner of an undertaking (undertakings W, X, Y, and Z). Individuals A, B, and C are partners in each of the four partnerships, and the remaining interests in each partnership are owned by a number of unrelated individuals, none of whom owns more than a one-percent interest in any of the partnerships. The ownership percentages (within the meaning of paragraph (j)(3) of this section) of A, B, and C in each partnership (and in the undertaking owned by the partnership) are as follows:

	Partner		
Partnership/ Undertaking	*A*	*B*	*C*
W	23%	21%	40%
X	19%	30%	22%
Y	25%	25%	20%
Z	8%	4%	2%

(ii) Paragraph (j)(2)(ii) of this section provides that a person's common-ownership percentage with respect to any two or more undertakings is the person's smallest ownership percentage in any such undertaking. Thus, the common-ownership percentages of A, B, and C in undertakings W, X, Y, and Z are as follows:

Partner	*Common ownership percentage*
A	8%
B	4%
C	2%
	14%

(iii) The sum of the common-ownership percentages of A, B, and C with respect to undertakings W, X, Y, and Z is 14 percent, and no other person owns more than a one-percent interest in any of the undertakings. Thus, the sum of the common-ownership percentages of any five or fewer persons with respect to all four undertakings cannot exceed 50 percent. Accordingly, undertakings W, X, Y, and Z are not part of the same common-ownership group (see paragraph (j)(2)(ii) of this section) and are not rebuttably presumed to be controlled by the same interests (see paragraph (j)(2)(i) of this section).

(iv) The common-ownership percentages of A, B, and C in undertakings W, X, and Y are as follows:

Partner	*Common ownership percentage*
A	19%
B	21%
C	20%
	60%

(v) The sum of the common-ownership percentages of A, B, and C, taking into account only undertakings W, X, and Y, is 60 percent. Because the sum of the common-ownership percentages exceeds 50 percent, undertakings W, X, and Y are part of the same common-ownership group (see paragraph (j)(2)(ii) of this section) and are rebuttably presumed to be controlled by the same interests (see paragraph (j)(2)(i) of this section).

Example (3). (i) Corporation X, an S corporation, is the sole owner of an undertaking (undertaking X), and corporation Y, another S corporation, is the sole owner of another undertaking (undertaking Y). Individuals A, B, and C are shareholders in corporations X and Y. Both A and B are related (within the meaning of paragraph (j)(3)(iii)(C) of this section) to C, but not to each other. A, B, and C are not related to any other person that owns an interest in either corporation X or corporation Y. The ownership percentages (determined without regard to the attribution rules of paragraph (j)(3)(iii) of this section) of A, B, and C in each corporation (and in the undertaking owned by the corporation) are as follows:

	Corporation/Undertaking	
Shareholder	*X*	*Y*
A	20%	—
B	—	20%
C	5%	5%

(ii) In general, a person's ownership percentage is determined by treating the person as the owner of interests that are actually owned by related persons (see paragraph (j)(3)(iii)(A) of this section). If A, B, and C are treated as owning interests that are actually owned by related persons, their ownership percentages are as follows:

	Corporation/Undertaking	
Shareholder	*X*	*Y*
A	25%	5%
B	5%	25%
C	25%	25%

(iii) Paragraph (j)(3)(iii)(B) of this section provides that, in determining the sum of the common-ownership percentages of any five or fewer persons with respect to any undertakings, each interest in such undertakings is counted only once. If two or more persons are treated as owners of the same interest under paragraph (j)(3)(iii)(A) of this section, the person whose ownership would result in the highest sum is treated as the only owner of the interest. In this case, C's common-ownership percentage with respect to undertakings X and Y, determined by treating C as the owner of the interests actually owned by A and B, is 25 percent. If, however, A and B are treated as the owners of the interests actually owned by C, each has a common-ownership percentage of only five percent. Thus, in determining the sum of common-ownership percentages with respect to undertakings X and Y, C is treated as the owner of the interests actually owned by A and B because this treatment results in the highest sum of common-ownership percentages with respect to such undertakings.

Example (4). (i) The ownership percentages of individuals A, B, and C in undertakings X, Y, and Z are as follows:

	Undertaking		
Individual	*X*	*Y*	*Z*
A	30%	30%	30%
B	30%	30%	—
C	—	30%	30%

No other person owns an interest in more than one of the undertakings.

(ii) Paragraph (j)(2)(ii) of this section provides that a person's common ownership percentage with respect to any two or more undertakings is the person's smallest ownership percentage in any such undertaking. Thus, A's common-ownership percentage with respect to undertakings X, Y, and Z is 30 percent, and the common-ownership percentages of B and C (and all other persons owning interests in such undertakings) with respect to such undertakings is zero. Accordingly, the sum of the common ownership percentages with respect to undertakings X, Y, and Z is only 30 percent, and undertakings X, Y, and Z are not treated as part of the same common-ownership group under paragraph (j)(2)(ii) of this section.

(iii) B's common-ownership percentage with respect to undertakings X and Y is 30 percent, and the sum of A's and B's common-ownership percentages with respect to such undertakings is 60 percent. Thus, undertakings X and Y are treated as part of the same common-ownership group under paragraph (j)(2)(ii) of this section. Similarly, C's common-ownership percentage with respect to undertakings Y and Z is 30 percent, and the sum of A's and C's common-ownership percentages with respect to such undertakings is 60 percent. Thus, undertakings Y and Z are also treated as part of the same common-ownership group under paragraph (j)(2)(ii) of this section.

(iv) Paragraph (j)(2)(iii) of this section requires the aggregation of common-ownership groups that include the same undertaking. In this case, undertaking Y is treated as part of the common-ownership group XY and as part of the common-ownership group YZ. Accordingly, undertakings X, Y, and Z are treated as part of a single common-ownership group and are rebuttably presumed to be controlled by the same interests (see paragraph (j)(2)(i) of this section) even though B does not own an interest in undertaking Z and C does not own an interest in undertaking X. The fact that B and C are not common owners with respect to undertakings X and Z is taken into account, however, in determining whether this presumption is rebutted.

(k) *Identification of rental real estate activities*—(1) *Applicability*—(i) *In general*. Except as otherwise provided in paragraph (k)(6) of this section, this paragraph (k) applies to a taxpayer's interests in rental real estate undertakings (within the meaning of paragraph (k)(1)(ii) of this section).

(ii) *Rental real estate undertaking*. For purposes of this paragraph (k), a rental real estate undertaking is a rental undertaking (within the meaning of paragraph (d) of this section) in which at least 85 percent of the unadjusted basis (within the meaning of §1.469-2T(f)(3)) of the property made available for use by customers is real property. For this purpose the term "real property" means any tangible property other than tangible personal property (within the meaning of §1.48-1 (c)).

(2) *Identification of activities*—(i) *Multiple undertakings treated as a single activity or multiple activities by taxpayer*. Except as otherwise provided in this paragraph (k), a taxpayer may treat two or more rental real estate undertakings (determined after the application of paragraph (k)(2)(ii) and (iii) of this section) as a single activity or may treat such undertakings as separate activities.

(ii) *Multiple undertakings treated as a single activity by passthrough entity*. A taxpayer must treat two or more rental real estate undertakings as a single rental real estate undertaking for a taxable year if any passthrough entity through which the taxpayer holds such undertakings treats such undertakings as a single activity on the applicable return of the passthrough entity for the taxable year of the taxpayer.

(iii) *Single undertaking treated as multiple undertakings*. Notwithstanding that a taxpayer's interest in leased property would, but for the application of this paragraph (k)(2)(iii), be treated as used in a single rental real estate undertaking, the taxpayer may, except as otherwise provided in paragraph (k)(3) of this section, treat a portion of the leased property (including a ratable portion of any common areas or facilities) as a rental real estate undertaking that is separate from the undertaking or undertakings in which the remaining portion of the property is treated as used. This paragraph (k)(2)(iii) shall apply for a taxable year if and only if—

(A) Such portion of the leased property can be separately conveyed under applicable State and local law (taking into account the limitations, if any, imposed by any special rules or procedures, such as condominium conversion laws, restricting the separate conveyance of parts of the same structure); and

(B) The taxpayer holds such leased property directly or through one or more passthrough entities, each of which treats such portion of the leased property as a separate activity on the applicable return of the passthrough entity for the taxable year of the taxpayer.

(3) *Treatment in succeeding taxable years*. All rental real estate undertakings or portions of such undertakings that are treated, under this paragraph (k), as part of the same activity for a taxable year ending after August 9, 1989, must be treated as part of the same activity in each succeeding taxable year.

(4) *Applicable return of passthrough entity*. For purposes of this paragraph (k), the applicable return of a passthrough entity for a taxable year of a taxpayer is the return reporting the passthrough entity's income, gain, loss, deductions, and credits taken into account by the taxpayer for such taxable year.

(5) *Evidence of treatment required*. For purposes of this paragraph (k), a person (including a passthrough entity) does not treat a rental real estate undertaking as multiple undertakings for a taxable year or, except as otherwise provided in paragraph (k)(2)(ii) or (3) of this section, treat multiple rental real estate undertakings as a single undertaking for a taxable year unless such treatment is reflected on a schedule attached to the person's return for the taxable year.

(6) *Coordination rule for rental of nondepreciable property*. This paragraph (k) shall not apply to a rental real estate undertaking if less than 30 percent of the unadjusted basis (within the meaning of §1.469-2T(f)(3)) of property used or held for use by customers in such undertaking during the taxable year is subject to the allowance for depreciation under section 167.

(7) *Coordination rule for rental of dwelling unit*. For any taxable year in which section 280A(c)(5) applies to a taxpayer's use of a dwelling unit—

(i) Paragraph (k)(2) and (3) of this section shall not apply to the taxpayer's interest in such dwelling unit; and

(ii) The taxpayer's interest in such dwelling unit shall be treated as a separate activity of the taxpayer.

(8) *Examples*. The following examples illustrate the application of this paragraph (k). In each example, the taxpayer is an individual whose taxable year is the calendar year.

Example (1). (i) In 1989, the taxpayer directly owns five condominium units (units A, B, C, D, and E) in three different buildings. Units A, B, and C are in one of the buildings and constitute a single rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section). Units D and E are in the other two buildings, and each of these units constitutes a separate rental real estate undertaking. Each of the units can be separately conveyed under applicable State and local law.

(ii) Paragraph (k)(2)(iii) of this section permits a taxpayer to treat a portion of the property included in a rental real estate undertaking as a separate rental real estate undertaking if the property can be separately conveyed under applicable State and local law and the taxpayer owns the property directly. Thus, the taxpayer can treat units A, B, and C as three separate undertakings. Alternatively, the taxpayer could treat two of those units (*e.g.*, units A and C) as an undertaking and the remaining unit as a separate undertaking, or could treat units A, B, and C as a single undertaking.

(iii) Paragraph (k)(2)(i) of this section permits a taxpayer to treat two or more rental real estate undertakings as a single activity, or to treat such undertakings as separate activities. Thus, the taxpayer, by combining undertakings, can treat all five units as a single activity. Alternatively, the taxpayer could treat each undertaking as a separate activity, or could combine some, but not all, undertakings. Thus, for example, the taxpayer could treat units A, B, C, and D as an activity and unit E as a separate activity.

(iv) For purposes of paragraph (k)(2)(i) of this section, a taxpayer's rental real estate undertakings are determined after the application of paragraph (k)(2)(iii) of this section. Thus, the taxpayer, by treating units as separate undertakings under paragraph (k)(2)(iii) of this section and combining them with other units under paragraph (k)(2)(i) of this section, can treat any combination of units as a single activity. For example, the taxpayer could treat units A and B as a separate rental real estate undertaking, and then treat units A, B, and D as a single activity. In that case, the taxpayer could treat units C and E either as a single activity or as two separate activities.

Example (2). (i) The facts are the same as in example (1). In addition, the taxpayer treats all five units as a single activity for 1989 and sells unit E in 1990. (See paragraph (k)(5) of this section for a rule providing that the units are treated as a single activity only if such treatment is reflected on a schedule attached to the taxpayer's return.)

(ii) Under paragraph (k)(3) of this section, rental real estate undertakings that are treated as part of the same activity for a taxable year must be treated as part of the same activity in each succeeding year. In this case, all five units were treated as part of the same activity for 1989 and must therefore be treated as part of the same activity for 1990. Accordingly, the taxpayer's sale of unit E in 1990 cannot be treated as a disposition of the taxpayer's entire interest in an activity for purposes of section 469(g) and the rules to be contained in §1.469-6T (relating to the treatment of losses upon certain dispositions of passive and former passive activities).

Example (3). (i) The facts are the same as in example (1), except that the taxpayer is a partner in a partnership that is the direct owner of the five condominium units. In its return for its taxable year ending on November 30, 1989, the partnership treats the five units as a single activity. (See paragraph (k)(5) of this section for a rule providing that the units are treated as a single activity only if such treatment is reflected on a schedule attached to the partnership's return.) The partnership sells unit E on November 1, 1990.

(ii) Paragraph (k)(2)(ii) of this section provides that a taxpayer who holds rental real estate undertakings through a passthrough entity must treat those undertakings as a single rental real estate undertaking if they are treated as a single activity on the applicable return of the passthrough entity. Under paragraph (k)(4) of this section, the applicable return of the partnership for the taxpayer's 1989 taxable year is the partnership's return for its taxable year ending on November 30, 1989. Accordingly, the taxpayer must treat the five condominium units as a single rental real estate undertaking (and thus as part of the same activity) for 1989 because they are treated as a single activity on the partnership's return for its taxable year ending in 1989.

(iii) Under paragraph (k)(3) of this section, the taxpayer must continue treating the condominium units as part of the same activity for taxable years after 1989. Accordingly, as in example (2), the five condominium units are treated as part of the same activity for 1990, and the sale of unit E in 1990 cannot be treated as a disposition of the taxpayer's interest in an activity for purposes of section 469 (g) and the rules to be contained in §1.469-6T.

Example (4). (i) The taxpayer owns a shopping center and a vacant lot that are separate rental real estate undertakings (within the meaning of paragraph (k)(1)(ii) of this section). The taxpayer rents space in the shopping center to various tenants and rents the vacant lot to a parking lot operator. Most of the unadjusted basis of the property used in the shopping-center undertaking (taking into account the land on which the shopping center is built) is subject to the allowance for depreciation, but no depreciable property is used in the parking-lot undertaking.

(ii) This paragraph (k) provides rules for identifying rental real estate activities (including the rule in paragraph (k)(2)(i) of this section that permits a taxpayer to treat two or more rental real estate undertakings as a single activity). Paragraph (k)(6) of this section provides, however, that these rules do not apply to a rental real estate undertaking if less than 30 percent of the unadjusted basis of the property used in the undertaking is subject to the allowance for depreciation. Thus, the taxpayer may not combine the parking-lot undertaking, which includes no depreciable property, with the shopping-center undertaking or any other rental real estate undertaking under paragraph (k)(2)(i) of this section. Accordingly, the parking lot undertaking is treated as a separate activity under paragraph (b)(1) of this section.

Example (5). (i) The facts are the same as in example (4), except that the shopping center and the vacant lot are at the same location (within the meaning of paragraph (c)(2)(iii) of this section) and are part of the same rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section). Taking into account the property used in the shopping center operations (including the land on which the shopping center is built) and the vacant lot, 50 percent of the unadjusted basis of the property used in the undertaking is subject to the allowance for depreciation.

(ii) In this case, the vacant lot is used in a rental real estate undertaking in which depreciable property is also used. Moreover, the exception in paragraph (k)(6) of this section does not apply to the undertaking consisting of the shopping center and the parking lot because at least 30 percent of unadjusted basis of the property used in the undertaking is subject to the allowance for depreciation. Accordingly, the taxpayer may combine the undertaking with other rental real estate undertakings and treat the combined undertakings as a single activity under paragraph (k)(2)(i) of this section.

(l) [Reserved.]

(m) *Consolidated groups*—(1) *In general.* The activities of a consolidated group (within the meaning of §1.469-1T(h)(2)(ii)) and of each member of such group shall be determined under this section as if the consolidated group were one taxpayer.

(2) *Examples.* The following examples illustrate the application of this paragraph (m). In each example, the facts, analysis, and conclusions relate to a single taxable year.

Example (1). (i) Corporations M, N, and O are the members of a consolidated group (within the meaning of §1.469-1T(h)(2)(ii)). Under §1.469-1T(h)(4)(i)(A) and (ii), the consolidated group and its members are treated as closely held corporations (within the meaning of §1.469-1T(g)(2)(ii)). Each member of the consolidated group owns a two-percent interest in partnership X and a two-percent interest in partnership Y, and owns interests in a number of trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) through the partnerships. Each of these undertakings is directly owned by partnership X or Y, and all the undertakings of partnerships X and Y are controlled by the same interests (within the meaning of paragraph (j) of this section) and are similar (within the meaning of paragraph (f)(4) of this section). The employees of the consolidated group and the shareholders of its common parent do not participate in the undertakings that the member corporations own through the partnerships.

(ii) Paragraph (f)(2)(i) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns interests in the undertakings through the same passthrough entity. In this case, the member corporations own interests in similar, commonly-controlled undertakings through both partnerships, and such interests are treated under this paragraph (m) as interests owned by one taxpayer (the consolidated group). Accordingly, the member corporations' interests in the undertakings owned through partnership X are treated as part of the same activity of the consolidated group, and their interests in the undertakings owned through partnership Y are treated similarly.

Example (2). (i) The facts are the same as in example (1), except that each member of the consolidated group owns a five-percent interest in partnership X and a five-percent interest in partnership Y.

(ii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the member corporations own, in the aggregate, a 15-percent interest in partnership X and a 15-percent interest in partnership Y, and such interests are treated under this paragraph (m) as interests owned by one taxpayer (the consolidated group). Thus, the consolidated group owns a substantial indirect interest in the similar, commonly-controlled undertakings owned by partnerships X and Y (see paragraph (f)(3)(i) of this section). Accordingly, the member corporations' interests in the undertakings owned through partnerships X and Y are treated as part of the same activity of the consolidated group.

(n) *Publicly traded partnerships.* The rules of this section shall apply to a taxpayer's interest in business and rental operations held through a publicly traded partnership (within the meaning of section 469(k)(2)) as if the taxpayer had no interest in any other business and rental operations. The following example illustrates the application of this paragraph (n):

Example. (i) The taxpayer, an individual, owns a 20-percent interest in partnership X and a 15-percent interest in partnership Y. Partnership X directly owns a hotel ("hotel 1") and a commercial office building ("building 1"). Partnership Y directly owns two hotels ("hotels 2 and 3") and two commercial office buildings ("buildings 2 and 3"). Each of the three hotels is a separate trade or business undertaking (within the meaning of paragraph (f)(1)(ii) of this section), and each of the three office buildings is a separate rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section). The three hotel undertakings are similar (within the meaning of paragraph (f)(4) of this section) and are controlled by the same interests (within the meaning of paragraph (j) of this section). Partnership X is not a publicly traded partnership (within the meaning of section 469(k)(2)). Partnership Y, however, is a publicly traded partnership and is not treated as a corporation under section 7704.

(ii) This paragraph (n) provides that the rules of this section apply to a taxpayer's interest in business and rental operations held through a publicly traded partnership as if the taxpayer had no interest in any other business and rental operations. Thus, undertakings owned through partnership Y may be treated as part of the same activity under the rules of this section, but an undertaking owned through partnership Y and an undertaking that is not owned through partnership Y may not be treated as part of the same activity.

(iii) Paragraph (f)(2)(i) of this section provides that a taxpayer's interests in two or more trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity if the taxpayer owns interests in each undertaking through the same passthrough entity. Partnership Y's hotel undertakings (*i.e.*, hotels 2 and 3) are similar and are controlled by the same interests. In addition, the taxpayer owns interests in both undertakings through the same partnership. Accordingly, the taxpayer's interests in partnership Y's hotel undertakings are treated as part of the same activity.

(iv) The hotel undertaking owned through partnership X (*i.e.*, hotel 1) and the hotel undertakings owned through partnership Y are similar and controlled by the same interests, and the taxpayer owns a substantial indirect interest in each of the undertakings (see paragraph (f)(3)(i) of this section). Thus, the three undertakings would ordinarily be treated as part of the same activity under paragraph (f)(2)(ii) of this section. Under this paragraph (n), however, undertakings that are owned through a publicly traded partnership cannot be treated as part of the same activity as any undertaking not owned through that partnership. Accordingly, the hotel undertaking that the taxpayer owns through partnership X and the hotel undertakings that the taxpayer owns through partnership Y are treated as two separate activities.

(v) Paragraph (k)(2)(i) of this section provides that, with certain exceptions, a taxpayer may treat two or more rental real estate undertakings as a single activity or as separate activities. Thus, the taxpayer's interests in the rental real estate undertakings owned through partnership Y (*i.e.*, buildings 2 and 3) may be treated as a single activity or as separate activities. Under this paragraph (n), however, undertakings that are owned through a publicly traded partnership cannot be treated as part of the same activity as any undertaking not owned through that partnership. Accordingly, the taxpayer's interest in the rental real estate undertaking owned through partnership X (building 1) cannot be treated as part of an activity that includes any rental real estate undertaking owned through partnership Y

(o) *Elective treatment of undertakings as separate activities*—(1) *Applicability*. This paragraph applies to a taxpayer's interest in any undertaking (other than a rental real estate undertaking (within the meaning of paragraph (k)(1)(ii) of this section)) that would otherwise be treated under this section as part of an activity that includes the taxpayer's interest in any other undertaking.

(2) *Undertakings treated as separate activities*. Except as otherwise provided in this paragraph (o), a person (including a passthrough entity) shall treat an undertaking to which this paragraph (o) applies as an activity separate from the remainder of the activity in which such undertaking would otherwise be included for a taxable year if and only if, for such taxable year or any preceding taxable year, such person made an election with respect to such undertaking under this paragraph (o).

(3) *Multiple undertakings treated as a single activity by passthrough entity*. A person (including a passthrough entity) must treat interests in two or more undertakings as part of the same activity for a taxable year if any passthrough entity through which the person holds such undertakings treats such undertakings as part of the same activity on the applicable return of the passthrough entity for the taxable year of such person.

(4) *Multiple undertakings treated as a single activity for a preceding taxable year*. If a person (including a passthrough entity) treats undertakings as part of the same activity on such person's return for a taxable year ending after August 9, 1989, such person may not treat such undertakings as part of different activities under this paragraph (o) for any subsequent taxable year.

(5) *Applicable return of passthrough entity*. For purposes of this paragraph (o), the applicable return of a passthrough entity for a taxable year of a taxpayer is the return reporting the passthrough entity's income, gain, loss, deductions, and credits taken into account by the taxpayer for such taxable year.

(6) *Participation*. The following rules apply to multiple activities (the "separate activities") that would be treated as a single activity (the "original activity") if the taxpayer's activities were determined without regard to this paragraph (o):

(i) The taxpayer shall be treated as materially participating (within the meaning of §1.469-5T) for the taxable year in the separate activities if and only if the taxpayer would, but for the application of this paragraph (o), be treated as materially participating for the taxable year in the original activity.

(ii) The taxpayer shall be treated as significantly participating (within the meaning of §1.469-5T(c)(2)) for the taxable year in the separate activities if and only if the taxpayer would, but for the application of this paragraph (o), be treated as significantly participating for the taxable year in the original activity.

(7) *Election*—(i) *In general*. A person makes an election with respect to an undertaking under this paragraph (o) by attaching the written statement described in paragraph (o)(7)(ii) of this section to such person's return for the taxable year for which the election is made (see paragraph (o)(2) of this section).

(ii) *Written statement*. The written statement required by paragraph (o)(7)(i) of this section must—

(A) State the name, address, and taxpayer identification number of the person making the election;

(B) Contain a declaration that an election is being made under §1.469-4T(o);

(C) Identify the undertaking with respect to which such election is being made; and

(D) Identify the remainder of the activity in which such undertaking would otherwise be included.

(8) *Examples*. The following examples illustrate the application of this paragraph (o):

Example (1). (i) During 1989, the taxpayer, an individual whose taxable year is the calendar year, acquires and is the direct owner of ten grocery stores. The operations of each grocery store are treated under paragraph (c)(1) of this section as a single undertaking that is separate from other undertakings (a "grocery-store undertaking"), and the taxpayer's interests in the grocery-store undertakings would be treated as part of the same activity of the taxpayer under paragraph (f)(2) of this section.

(ii) Paragraph (o)(2) of this section provides that, with certain exceptions, undertakings that would be treated as part of the same activity under other rules in this section may, at the election of the taxpayer, be treated as separate activities. Thus, the taxpayer may elect to treat each grocery-store undertaking as a separate activity for 1989. Alternatively, the taxpayer may combine grocery-store undertakings in any manner and treat each combination of undertakings (and each uncombined undertaking) as a separate activity for 1989. In either case, the election must be made by attaching the written statement described in paragraph (o)(7)(ii) of this section to the taxpayer's 1989 return.

Example (2). (i) The facts are the same as in example (1). In addition, the taxpayer, in 1989, elects to treat each grocery-store undertaking as a separate activity and participates for 15 hours in each of the grocery-store undertakings.

(ii) The taxpayer's interest in each grocery-store undertaking is treated, under paragraph (o)(2) of this section, as a separate activity of the taxpayer for 1989 (a "grocery-store activity"). In 1989, however, the taxpayer participates for more than 100 hours in the activity in which the undertakings would be included (but for the election to treat the grocery-store undertakings as separate activities) and would be treated under §1.469-5T(c)(2) as significantly participating in such activity. Accordingly, the taxpayer is treated under paragraph (o)-(6)(ii) of this section as significantly participating in each of the grocery-store activities for 1989.

Example (3). (i) The facts are the same as in example (1). In addition, the taxpayer, in 1989, elects to treat each grocery-store undertaking as a separate activity. The taxpayer does not participate in any of the grocery-store undertakings in 1989 or 1990, and sells one of the grocery stores in 1990.

(ii) As in example (2), the taxpayer's interest in each grocery-store undertaking is treated, under paragraph (o)(2) of this section, as a separate activity of the taxpayer for 1989. Because the taxpayer elected to treat the undertakings as separate activities for a preceding taxable year (1989), each grocery-store undertaking is also treated, under paragraph (o)(2) of this section, as a separate activity of the taxpayer for 1990. In addition, each of the taxpayer's grocery-store activities is a passive activity for 1989 and 1990 because the taxpayer does not participate in any of the grocery store undertakings for 1989 and 1990. Accordingly, the taxpayer's sale of the grocery store will generally be treated as a disposition of the taxpayer's entire interest in a passive activity for purposes of section 469(g) and the rules to be contained in §1.469-6T (relating to the treatment of losses upon certain dispositions of passive and former passive activities).

Example (4). (i) The facts are the same as in example (3), except that the taxpayer elects to treat the grocery-store undertakings as two separate activities. One of the activities includes three grocery-store undertakings, and the store sold in 1990 is part of this activity. The other activity includes the seven remaining grocery-store undertakings.

(ii) Paragraph (o)(4) of this section provides that a person who treats undertakings as part of the same activity for a taxable year ending after August 9, 1989, may not elect to treat those undertakings as separate activities for a subsequent taxable year. The grocery store sold in 1990 was treated for 1989 as part of an activity that includes two other grocery stores. Thus, those three stores must be treated as part of the same activity for 1990. Accordingly, the taxpayer's sale of the grocery store cannot be treated as a disposition of the taxpayer's entire interest in a passive activity for purposes of section 469(g) and the rules to be contained in §1.469-6T.

Example (5). (i) The facts are the same as in example (1), except that the taxpayer is a partner in a partnership that acquires and is the direct owner of the ten grocery stores. The taxable year of the partnership ends on November 30, and the partnership acquires the grocery stores in its taxable year ending on November 30, 1989. In its return for that taxable year, the partnership treats the grocery-store undertakings as a single activity.

(ii) Paragraph (o)(3) of this section provides that a person who holds undertakings through a passthrough entity may not elect to treat those undertakings as separate activities if they are treated as part of the same activity on the applicable return of the passthrough entity. Under paragraph (o)(5) of this section, the applicable return of the partnership for the taxpayer's 1989 taxable year is the partnership's return for its taxable year ending on November 30, 1989. Accordingly, the taxpayer must treat the grocery-store undertakings as a single activity for 1989 because those undertakings are treated as a single activity on the partnership's return for its taxable year ending in 1989.

(iii) Under paragraph (o)(4) of this section, the taxpayer must continue treating the grocery-store undertakings as part of the same activity for taxable years after 1989. This rule applies even if the partnership subsequently distributes its interest in the grocery stores to the taxpayer, and the taxpayer becomes the direct owner of the grocery-store undertakings.

(p) *Special rule for taxable years ending before August 10, 1989*—(1) *In general.* For purposes of applying section 469 and the regulations thereunder for a taxable year ending before August 10, 1989, a taxpayer's business and rental operations may be organized into activities under the rules of paragraphs (b) through (n) of this section or under any other reasonable method. For example, for such taxable years a taxpayer may treat each of the taxpayer's undertakings as a separate activity, or a taxpayer may treat undertakings that involve the provision of similar goods or services as a single activity.

(2) *Unreasonable methods.* A method of organizing business and rental operations into activities is not reasonable if such method—

(i) Treats rental operations (within the meaning of paragraph (d)(3) of this section) that are not ancillary to a trade or business activity (within the meaning of §1.469-1T(e)(2)) as part of a trade or business activity;

(ii) Treats operations that are not rental operations and are not ancillary to a rental activity (within the meaning of §1.469-1T(e)(3)) as part of a rental activity;

(iii) Includes in a passive activity of a taxpayer any oil or gas well that would be treated, under paragraph (e)(1) of this section, as a separate undertaking in determining the taxpayer's activities;

(iv) Includes in a passive activity of a taxpayer any interest in a dwelling unit that would be treated, under paragraph (k)-(7) of this section, as a separate activity of the taxpayer; or

(v) Is inconsistent with the taxpayer's method of organizing business and rental operations into activities for the taxpayer's first taxable year beginning after December 31, 1986.

(3) *Allocation of disallowed deductions in succeeding taxable year.* If any of the taxpayer's passive activity deductions or the taxpayer's credits from passive activities are disallowed under §1.469-1T for the last taxable year of the taxpayer ending before August 10, 1989, such disallowed deductions or credits shall be allocated among the taxpayer's activities for the first taxable year of the taxpayer ending after August 9, 1989, using any reasonable method. See §1.469-1T(f)(4).

§1.469-5T [Amended]

Par. 7. Section 1.469-5T is amended as follows:

1. Paragraph (f)(1) is amended by removing the parenthetical phrase "(directly or indirectly, other than through a C corporation)".

2. Paragraph (h) is amended by adding the following new paragraph (h)(3):

(h) * * *

(3) *Coordination with rules governing the treatment of passthrough entities.* If a taxpayer takes into account for a taxable year of such taxpayer any item of gross income or deduction from a partnership or S corporation that is characterized as an item of gross income or deduction from an activity in which the taxpayer materially participated under §1.469- 2T(e)(1), such taxpayer shall be treated as materially participating in such activity for such taxable year for purposes of applying paragraph (a)(5) and (6) of this section to any succeeding taxable year of such taxpayer.

* * * * *

3. Paragraph (j) is amended by redesignating paragraph (j) (including its heading) as paragraph (j)(2) and adding the following new heading and paragraph (j)(1):

* * * * *

(j) *Material participation for preceding taxable years*—(1) *In general.* For purposes of paragraph (a)(5) and (6) of this section, a taxpayer has materially participated in an activity for a preceding taxable year if such activity includes an undertaking that involves substantially the same business and rental operations as an undertaking that was included in an activity in which the taxpayer materially participated (determined without regard to paragraph (a)(5) of this section) for such preceding taxable year.

* * * * *

4. Paragraph (k), *Example (5)*, is amended by removing "1999" and adding in its place "2000" wherever the former occurs.

Par. 8. Section 1.469-11T is amended as follows:

1. Paragraph (c)(2)(i) is revised.

2. Paragraph (c)(3)(i)(A) is revised.

3. Paragraph (c)(3)(ii) is revised.

4. The examples in paragraph (c)(4) are revised.

5. In paragraph (c)(5)(i), the introductory text is revised.

6. The first four examples in paragraph (c)(5)(iii) are revised.

7. The revised provisions read as follows:

§1.469-11T Effective date and transition rules (temporary).

* * * * *

(c) * * *

(2) *Qualified interest*—(i) *In general*. For purposes of this paragraph (c), a taxpayer's interest in an undertaking (the "current-year undertaking") shall be treated as a qualified interest in the activity in which such undertaking is included for the taxable year if and only if the currentyear undertaking continues business and rental operations of an undertaking that was—

(A) Held by the taxpayer on October 22, 1986, and at all times thereafter; or

(B) Acquired by the taxpayer after October 22, 1986, directly or indirectly, pursuant to one or more written binding contracts to which the taxpayer was a party (see paragraph (c)(7) of this section) on October 22, 1986, and held by the taxpayer at all times after such acquisition.

* * * * *

(3) * * *

(i) * * *

(A) Any of the business and rental operations that are part of such activity continue business and rental operations that were being conducted by any person on October 22, 1986; or

* * * * *

(ii) *Character before 1987 irrelevant*. For purposes of this paragraph (c), an activity may be treated as a pre-enactment activity without regard to whether such activity continues business and rental operations that would have been part of a passive activity of the taxpayer for any taxable year beginning before January 1, 1987, had section 469 and the regulations been in effect for such year.

(4) * * *

Example (1). On October 22, 1986, the taxpayer owned an interest in property used as a personal residence. After October 22, 1986, the taxpayer ceased to use the property as a personal residence and began to use it in a rental activity (within the meaning of §1.469-1T(e)(3)). The rental activity is a pre-enactment activity (within the meaning of paragraph (c)(3) of this section) because the property used in the rental activity was in existence on August 16, 1986. The rental activity does not continue business and rental operations of any undertaking in which the taxpayer held an interest on October 22, 1986, because the taxpayer did not hold the property in an activity on that date. In addition, the taxpayer did not acquire an interest in an undertaking involving such operations pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986. Accordingly, the taxpayer's interest in the rental activity is not a qualified interest (within the meaning of paragraph (c)(2) of this section), and the taxpayer does not have a pre-enactment interest in the rental activity.

Example (2). The taxpayer owns an interest in a partnership, which owns property used in a rental activity (within the meaning of §1.469-1T(e)(3)). The taxpayer acquired the partnership interest pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986. The partnership acquired its interest in the rental property pursuant to written binding contracts to which the partnership was a party on October 22, 1986. Construction of the property used in the rental activity commenced prior to August 16, 1986. Under paragraph (c)(7)(ii) of this section, the taxpayer is treated as a party to the contracts to which the partnership was a party on October 22, 1986. Therefore, the taxpayer's interest in the rental activity is a qualified interest (within the meaning of paragraph (c)(2) of this section) because the taxpayer's interest in the rental property (*i.e.*, in undertakings involving business and rental operations that are continued in the rental activity) was acquired after October 22, 1986, pursuant to written binding contracts to which the taxpayer was a party on that date. Because the property used in the rental activity was under construction on August 16, 1986, the rental activity is a pre-enactment activity (within the meaning of paragraph (c)(3) of this section). Accordingly, the taxpayer's interest in the rental activity is a pre-enactment interest.

Example (3). The facts are the same as in example (2), except that the partnership acquired the property after October 22, 1986, pursuant to a contract entered into after October 22, 1986. The taxpayer's interest in the rental activity is not a pre-enactment interest because the taxpayer's interest in the rental property was not acquired pursuant to written binding contracts to which the taxpayer was a party on October 22, 1986.

Example (4). The taxpayer owned a pre-enactment interest in an activity that continues business and rental operations that were conducted by the taxpayer on October 22, 1986. After that date, the taxpayer died, and the decedent's interest in the activity passed to the decedent's estate. Because a decedent and the decedent's estate are not the same taxpayer, the estate must independently satisfy the requirements for a pre-enactment interest regardless of the fact that the decedent had a pre-enactment interest in the activity. Since the activity was being conducted by the decedent on October 22, 1986, the activity is a pre-enactment activity (within the meaning of paragraph (c)(3) of this section). Because, however, the activity does not continue the business and rental operations of an undertaking that the estate held on October 22, 1986, or acquired pursuant to a written binding contract, the estate does not have a qualified interest in the activity (within the meaning of paragraph (c)(2) of this section).

(5) *Effect of changes in a taxpayer's interest in a pre-enactment activity*—(i) *In general*. If the taxpayer's share for a taxable year of an item of income, gain, loss, deduction, or credit from an interest in a pre-enactment activity was increased or decreased at any time after October 22, 1986, and prior to the end of such taxable year (other than pursuant to a written binding contract to which the taxpayer was a party on October 22, 1986), the share of such item that is attributable to a pre-enactment interest in such activity shall be determined by taking into account— * * *

* * * * *

(iii) * * *

Example (1). A taxpayer owns interests in a pre-enactment activity through an S corporation. On October 22, 1986, the taxpayer owned a 10-percent interest in the S corporation. After October 22, 1986, the taxpayer acquires an additional 5-percent interest in the S corporation pursuant to a contract entered into after October 22, 1986. Under this paragraph (c)(5), only items from the 10-percent interest that the taxpayer owned on October 22, 1986, are attributable to the taxpayer's pre-enactment interest in the activity.

Example (2). On October 22, 1986, individuals A and B each owned a rental property. After October 22, 1986, A and B contribute their rental properties to a partnership in exchange for which each receives a 50-percent interest in all items of income, gain, loss, deduction, and credit of the partnership. Under paragraph (c)(5)(i) of this section, A's 50-percent share of each partnership item attributable to the rental property contributed by A is attributable to a pre-enactment interest. None of A's share of the partnership items attributable to the rental property contributed by B is attributable to a pre-enactment interest.

Example (3). The facts are the same as in example (2), except that under the partnership agreement the items of income, gain, loss, deduction, and credit attributable to the rental property A contributed to the partnership are allocated 80 percent to A and 20 percent to B. Under paragraph (c)(5)(i) of this section, A's 80-percent share of each partnership item attributable to the rental property contributed by A is attributable to a pre-enactment interest.

Example (4). The facts are the same as in example (3) except that on January 1, 1988, the partnership liquidates, distributing to A the rental property contributed by A to the partnership. Under paragraph (c)-(5)(i) of this section, only 80 percent of A's income, gain, loss, deductions, and credits from the property for 1988 and subsequent years is attributable to a pre-enactment interest.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 9. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 10. Section 602.101(c) is amended by inserting in the appropriate places in the table "§1.469-4T(k) ... 1545-1037" and "§1.469-4T(o) ... 1545-1037".

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue this Treasury decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved March 20, 1989.

Dennis E. Ross,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on May 11, 1989, 8:45 a.m., and published in the issue of the Federal Register for May 12, 1989, 54 F.R. 20527)

26 CFR 1.469-4T: Limitations on passive activity losses and credits—definition of activity.

Lines of business are set out for purposes of applying section 1.469-4T of the Temporary Income Tax Regulations. See Rev. Proc. 89-38, page 920.

Subpart D.—Inventories

Section 472.—Last-in, First-out Inventories

26 CFR 1.472-1: Last-in, first-out inventories.

LIFO; price indexes, department stores. The September 1988 Bureau of Labor Statistics price indexes are accepted for use by department stores employing the retail inventory and last-in, first-out inventory methods for valuing inventories for tax years ended on, or with reference to, September 30, 1988.

Rev. Rul. 89-10

The following price indexes for September 1988 were issued by the Bureau of Labor Statistics on October 25, 1988, for use by department stores, and are accepted by the Internal Revenue Service, under section 1.472-1(k) of the Income Tax Regulations and Rev. Proc. 86-46, 1986-2 C.B. 739, for appropriate application to inventories of department stores employing the retail inventory and last-in, first-out inventory methods for tax years ended on, or with reference to, September 30, 1988.

Indexes are prepared on a national basis for the store total, for 23 major groups of departments, and for three special combinations — soft goods, durable goods and miscellaneous goods. The store total index covers all departments, including some not listed separately, with the following exceptions: candy, foods, liquor, tobacco, as well as contract departments.

26 CFR 1.472-1: Last-in, first-out inventories.

LIFO; price indexes; department stores. The March 1989 Bureau of Labor Statistics price indexes are accepted for use by department stores employing the retail inventory and last-in, first-out inventory methods for valuing inventories for tax years ended on, or with reference to, March 31, 1989.

Rev. Rul. 89-83

The following price indexes for March 1989 were issued by the Bureau of Labor Statistics on April 20, 1989, for use by department stores, and are accepted by the Internal Revenue Service, under section 1.472-1(k) of the Income Tax Regulations and Rev. Proc. 86-46, 1986-2 C.B. 739, for appropriate application to inventories of department stores employing the retail inventory and last-in, first-out inventory methods for tax years ended on, or with reference to, March 31, 1989.

Indexes are prepared on a national basis for the store total, for 23 major groups of departments, and for three special combinations—soft goods, durable goods and miscellaneous goods. The store total index covers all departments, including some not listed separately, with the following exceptions: candy, foods, liquor, tobacco, as well as contract departments.

26 CFR 1.472-2: Requirements incident to adoption and use of LIFO inventory method.

Inventories; LIFO; financial conformity requirements; affiliated group with foreign parent. Rev. Rul. 78-246 continues to be a valid exception to the LIFO conformity requirement for certain foreign parent-subsidiary groups of corporations. The exception is also applicable to the combined financial statements of certain foreign controlled brother-sister groups of corporations, but does not apply to U.S. owned groups of corporations. Rev. Rul. 78-246 amplified.

Rev. Rul. 89-41

ISSUE

Must the last-in, first-out (LIFO) method of inventory valuation be used in the consolidated financial statements of certain foreign-owned groups of financially related corporations when one or more of the related corporations use the LIFO method of valuing inventories for federal income tax purposes?

FACTS

Situation 1: FP, a foreign corporation, owns all of the outstanding stock of *S1*, a domestic corporation, and of *FS1*, *FS2*, and *FS3*, foreign corporations. *S1* uses the LIFO method of inventory valuation for federal income tax purposes. *FP*, *FS1*, *FS2*, and *FS3* do not use the LIFO method of accounting for federal income tax purposes and are each engaged in a business outside the United States. The inventories of *S1*, *FS1*, *FS2*, and *FS3* are included in the consolidated financial statement of *FP*. *FP* owns, through *FS1*, *FS2*, and *FS3*, operating assets of substantial value that are used in the foreign operations of *FS1*, *FS2*, and *FS3*. These assets constitute 30% or more of the total operating assets of the consolidated group.

Situation 2: A, *B*, and *C*, nonresident alien individuals, together own all of the outstanding stock of *X*, a domestic corporation, and of *F1*, *F2*, and *F3*, foreign corporations. *X* uses the LIFO method of inventory valuation for federal income tax purposes. *F1*, *F2*, and *F3* do not use the LIFO method of accounting for federal tax purposes and are each engaged in a business outside the United States. *X*, *F1*, *F2*, and *F3* issue a combined financial statement. The inventories of *X*, *F1*, *F2*, and *F3* are included in this combined financial statement. *F1*, *F2*, and *F3* own operating assets of substantial value that are used in foreign operations. These assets constitute 30% or more of the total operating assets of the combined group.

Situation 3: P, a domestic corporation, owns all of the outstanding stock of *FS1*, a foreign corporation, and of *S1*, *S2*, and *S3*, domestic corporations. *FS1* uses the LIFO method of inventory valuation for federal income tax purposes. *P*, *S1*, *S2*, and *S3* do not use the LIFO method of accounting for federal income tax purposes. The inventories of *FS1*, *S1*, *S2*, and *S3* are included in the consolidated financial statement of *P*. *FS1* is engaged in a business outside the United States. *P* owns, through *S1*, operating assets of substantial value that are used in the foreign operations of *S1*. These assets constitute 30% or more of the total operating assets of the consolidated group.

ANALYSIS

Section 472(a) of the Internal Revenue Code of 1986 authorizes the use of the LIFO inventory method for federal income tax purposes. Section 472(c) of the Code requires that for the first year the method is used, the method must also be used in computing income for purposes of reports to shareholders, partners, other proprietors, or beneficiaries, and reports used for credit purposes. Thereafter, the Commissioner may terminate the taxpayer's use of the LIFO method if the taxpayer uses any method other than LIFO in computing income for these purposes. Section 472(e)(2).

Rev. Rul. 78-246, 1978-1 C.B. 146, holds that the LIFO method of inventory valuation need not be used in the consolidated financial statements of the foreign parent of a consolidated group that engages in substantial foreign operations, even though one or more of its subsidiaries use the LIFO method of valuing inventories for federal tax purposes. A group engages in substantial foreign operations if the parent owns, either directly or through members of the group, operating assets of substantial value (for this purpose, 30 percent or more of the group's total operating assets) that are used in foreign operations. Rev. Rul. 78-246 revokes Rev. Rul. 73-57, 1973-1 C.B. 218, which had reached a contrary conclusion.

Rev. Rul. 78-246 relies on the legislative history of the conformity requirements in sections 472(c) and (e)(2). The sections were enacted to ensure that the LIFO method will conform as nearly as possible to the best accounting practice in the trade or business, determined on the basis of the United States standards of accounting practice (*see* H. Rep. No. 2330, 75th Cong., 3d Sess. 34 (1938)). Because Congress was specifically concerned with domestic accounting practice, the conformity requirements of section 472 were not intended to determine what would be the best accounting practice in a foreign country. Accordingly, Rev. Rul. 78-246 concludes that it is inappropriate to impose the LIFO method of inventory valuation upon a foreign parent corporation with respect to the inventory of any subsidiary that uses the LIFO method of inventory valuation for federal income tax purposes when the group is engaged in substantial foreign operations.

In *Insilco Corp. v. Commissioner*, 73 T.C. 589 (1980), *aff'd mem.*, 659 F. 2d 1059 (2d Cir. 1981), the Tax Court held that the LIFO conformity rules were met by a domestic subsidiary using the LIFO method for federal income tax purposes where the subsidiary used the LIFO method to compute its income in its financial reports issued to its domestic parent company, even though the parent company converted the subsidiary's earnings to a non-LIFO basis in the parent's consolidated financial statements. In response to this decision, Congress enacted section 472(g) of the Code.

Section 472(g)(1) provides that all members of the same group of financially related corporations are treated as one taxpayer for purposes of the conformity requirements of sections 472(c) and (e)(2). Section 472(g)(2) defines a "group of financially related corporations" as any affiliated group as defined in section 1504, determined by substituting "50%" for "80%" each place it appears in section 1504(a) and without regard to section 1504(b), and any other group of corporations that consolidate or combine for purposes of financial statements. Section 472(g) of the Code was added to the Code by section 95 of the Tax Reform Act of 1984, 1984-3 C.B. (Vol. 1) 124.

Section 472(g) of the Code was enacted because Congress was concerned that taxpayers could "avoid the effect of the LIFO conformity rule under the *Insilco* decision through the creation of holding companies or subsidiaries". (H.R. 98-432, Part 2, 98th Cong. 2d Sess. 1380 (1984); S. Rep. 98-169, Vol. 1, 98th Cong. 2d Sess. 486 (1984)). Congress believed that the LIFO conformity rule should be applied to all financial reports of all corporations in which the taxpayer's inventory is included.

Thus, under section 472(g), it was intended that the conformity requirement generally apply to a parent corporation that issues financial statements to its shareholders on a consolidated basis with a subsidiary (or on a combined basis with an affiliated company) that uses the LIFO method of accounting for tax purposes, or a parent that uses the equity method of financial accounting to include the results of operations of a financially related corporation that uses the LIFO method of accounting for tax purposes. However, Congress made it clear that the "limited exceptions to the conformity requirement provided under present law (or the similar limited exceptions provided by the Treasury, if appropriate, in the future) should be allowed." The legislative history identifies Rev. Rul. 78-246 as one of those limited exceptions to the conformity requirement which were to continue to be allowed.

Therefore, the Internal Revenue Service will continue to adhere to the position set forth in Rev. Rul. 78-246. Furthermore, the Service has determined that it is appropriate to apply the rule of Rev. Rul. 78-246 to corporations that issue financial statements on a combined basis with affiliated corporations, for the reasons stated in Rev. Rul. 78-246. However, the position set forth in Rev. Rul. 78-246 applies only to certain foreign owned groups of affiliated corporations; it does not apply to United States owned groups of affiliated corporations. The rationale of Rev. Rul. 78-246 does not extend to the foreign subsidiary of a domestic parent. Such a broad application of that rationale is not consistent with section 472(c) and is excluded by the enactment of section 472(g)(2), which includes foreign corporations in the definition of a "group of financially related corporations," and the legislative history to section 472(g).

In *situation 1, FP, S1, FS1, FS2,* and *FS3* are a group of financially related corporations as defined in section 472(g)(2)(A). Under section 472(g)(1), they are treated as one taxpayer for purposes of the conformity requirement of subsections (c) and (e)(2) of section 472. However, the group is engaged in substantial foreign operations within the meaning of Rev. Rul. 78-246. Accordingly, although *S1* uses the LIFO method of inventory valuation for federal income tax purposes, that method need not be used for its inventories when they are included in the consolidated financial statements of the group. *S1* must otherwise comply, however, with the conformity requirements of sections 472(c) and (e)(2) of the Code in inventorying its goods to ascertain income, profit, or loss for the purposes of a report or statement (covering the taxable year for which the LIFO method is used) to shareholders, partners, other proprietors, or beneficiaries, or one used for credit purposes.

In *situation 2, X, F1, F2,* and *F3* are a group of financially related corporations as defined in section 472 (g)(2)(B). Under section 472(g)(1), the group is treated as one taxpayer for purposes of the conformity requirement of subsections (c) and (e)(2) of section 472. However, the group is engaged in substantial foreign operations as defined in Rev. Rul. 78-246. Therefore, although *X* uses the LIFO method of inventory valuation for federal income tax purposes, that method need not also be used for its inventories when they are included in the combined financial statements of the group. *X* must otherwise comply, however, with the conformity requirements of section 472(c) and (e)(2) of the Code in inventorying its goods to ascertain income, profit, or loss for the purposes of a report or statement (covering the taxable year for which the LIFO method is used) to shareholders, partners, other proprietors, or beneficiaries, or one used for credit purposes.

In *situation 3, P, FS1, S1, S2,* and *S3* are a group of financially related corporations as defined in section 472(g)(2)-(A). Under section 472(g)(1), they are treated as one taxpayer for purposes of the conformity requirements of subsections (c) and (e)(2) of section 472. Although the group is engaged in substantial foreign operations within the meaning of Rev. Rul. 78-246, that revenue ruling does not apply to United States owned groups of financially related corporations. Accordingly, because *FS1* uses the LIFO method of inventory valuation for federal income tax purposes, that method must be used for its inventories when they are included in the consolidated financial statements of the group.

HOLDINGS

Situation 1. The LIFO method of inventory valuation need not be used for the inventories of *S1* when they are included in the consolidated financial statement of *FP, S1, FS1, FS2,* and *FS3.*

Situation 2. The LIFO method of inventory valuation need not be used for the inventories of *X* when they are included in the combined financial statement of *X, F1, F2,* and *F3.*

Situation 3. The LIFO method of inventory valuation must be used for the inventories of *FS1* when they are included in the consolidated financial statement of P, *FS1, S1, S2,* and *S3.*

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 78-246 is amplified.

26 CFR 1.472-8: Dollar-value method of pricing LIFO inventories.

LIFO; inventory price index computation method; appropriate representative month. The Commissioner will not consent to a taxpayer's request to change its month for selecting price indexes under the IPI regulations unless the previously elected month is no longer an appropriate representative month. A month is an appropriate representative month if there is a nexus between the selected month, the taxpayer's method for determining current-year cost, and the taxpayer's historical experience of inventory purchases during the year.

Rev. Rul. 89-29

ISSUE

In the situations described below, will the Commissioner consent to a taxpayer's request to change its month for selecting price indexes in computing the LIFO value of its dollar-value pool under the inventory price index (IPI) computation method provided by section 1.472-8(e)(3) of the Income Tax Regulations?

FACTS

In each of the situations below, the taxpayer, a retailer, uses the accrual method of accounting, and employs a calendar tax year. Beginning with its tax year ending December 31, 1985, the taxpayer elected the dollar-value LIFO inventory method by filing Form 970, Application to Use LIFO Inventory Method. On the Form 970, the taxpayer: (1) elected the latest acquisitions method to determine the cost of the goods in the closing inventory over those in the opening inventory under section 1.472-8(e)-(2)(ii)(*a*) of the regulations; (2) elected the IPI computation method provided by section 1.472-8(e)(3); (3) elected to use a single pool for its entire inventory; and (4) made a "one-time binding election" under section 1.472-8(e)(3)(iii)(C) of the regulations regarding which month's Producer Prices and Price Indexes (PPI) to use in determining the current-year cost of the pool. In *Situations 1, 2,* and *3*, below, the taxpayer chose the PPI for December; in *Situation 4*, below, it chose the PPI for January.

In each of the four situations, the taxpayer's experience is that it purchases its inventory fairly uniformly throughout the year. The first purchases of inventory items normally occur in January and the last purchases normally occur in December. The taxpayer does not use the retail method of pricing inventories under section 1.471-8 and is not eligible to use the retail price indexes prepared by the United States Bureau of Labor Statistics for use by department stores.

Situation 1. The taxpayer filed a Form 3115, Application for Change in Accounting Method, requesting to change from the December PPI to the November PPI for computing the LIFO value of the pool, beginning with its tax year ending December 31, 1987.

Situation 2. The taxpayer filed a Form 3115 requesting (1) to change from the latest acquisitions method to the earliest acquisitions method, and (2) to change from the December PPI to the January PPI, effective for the tax year ending December 31, 1987.

Situation 3. Pursuant to the provisions of section 1.442-1(c) of the regulations, the taxpayer changed its annual accounting period from the calendar tax year to a fiscal tax year ending June 30. The short period required to effect the change of annual accounting period ends on June 30, 1987. The taxpayer filed a Form 3115 requesting to change from the December PPI to the June PPI, beginning with the short tax year ending June 30, 1987.

Situation 4. The taxpayer filed a Form 3115 requesting to change from the January PPI to the December PPI beginning with the tax year ending December 31, 1987.

LAW AND ANALYSIS

Section 1.472-8(e)(3)(iii)(C) of the regulations states, in part, that taxpayers that do not use the retail inventory method must either select indexes as of the month or months most appropriate to the taxpayer's method of determining the current-year cost of the inventory pool under section 1.472-8(e)(2)(ii) or make a one-time binding election of an appropriate representative month during the tax year. The election must be clearly set forth on Form 970.

Section 1.472-8(e)(2)(ii)(*b*) of the regulations provides that the total current-year cost of items making up a dollar-value LIFO pool may be determined by reference to the actual cost of the goods purchased or produced during the tax year in the order of acquisition (earliest acquisitions method). Section 1.472-8(e)(2)(ii)(*a*) provides that the total current-year cost may be determined by reference to the actual cost of the goods most recently purchased or produced (latest acquisitions method).

Section 446(e) of the Code and section 1.446-1(e)(2)(i) of the regulations provide that, except as otherwise provided, a taxpayer must secure the consent of the Commissioner before changing a method of accounting for federal income tax purposes. See Rev. Proc. 84-74, 1984-2 C.B. 736, for the procedures to be followed in requesting the Commissioner's consent to change a method of accounting.

Selection of an "appropriate representative month" under section 1.472-8(e)(3)(iii)(C) of the regulations is an alternative to using the indexes as of the month or months most appropriate to the taxpayer's method of determining the current-year cost of the inventory pool, and normally the appropriate representative month will be one of the months most appropriate to the taxpayer's method. Thus, an appropriate representative month must be a month that has a nexus, or relationship, to the taxpayer's method of determining current-year cost and its historical experience of inventory purchases during the year. The timing of the index (the month selected) must relate to the timing of the determination of current-year cost; otherwise, distortion could occur. For example, if a taxpayer uses the latest acquisitions method for determining current-year cost, an appropriate representative month is almost invariably a month toward the end of the year (assuming uniform purchases during the year). If a taxpayer uses the earliest acquisitions method for determining current-year cost, an appropriate representative month is almost invariably a month toward the beginning of the year (assuming uniform purchases during the year).

In *Situation 1*, the taxpayer's "one-time binding" election of the December PPI as "an appropriate representative month" was proper because there is a nexus between the month of December, the taxpayer's election to use the latest acquisitions method, and the taxpayer's historical experience of inventory purchases during the year. In other words, the election of the December PPI was an "appropriate representative month," within the meaning of section 1.472-8-(e)(3)(iii)(C) of the regulations, because the taxpayer had elected the latest acquisitions method, and it normally made its latest purchases in December.

Since the taxpayer had elected an appropriate representative month and that month continues to be an appropriate representative month, consent will not be granted to use the November PPI, regardless of whether November is also an appropriate representative month. The words "one-time binding election" in section 1.472-8(e)(3)(iii)(C) of the regulations mean that the taxpayer's election of an appropriate representative month may not be changed unless the elected month is not an appropriate representative method.

In *Situation 2*, if the Commissioner consents to the taxpayer's request to change from the latest acquisitions method to the earliest acquisitions method, December will no longer be an appropriate representative month because there will be no nexus between that month, the earliest acquisitions method, and the taxpayer's historical experience of inventory purchases during the year. If the taxpayer continued to use PPI indexes for December, distortion could result because the timing of the index (December) would not relate to the timing of the determination of current-year cost (beginning of the year). Therefore, the Commissioner will consent to the taxpayer's request to change to the January PPI.

In *Situation 3,* December is no longer an appropriate representative month because the taxpayer changed its annual accounting period from the calendar tax year to a fiscal tax year ending June 30. There is no nexus between the use of the December PPI, the latest acquisitions method and the taxpayer's historical experience of inventory purchases during the year. The taxpayer's latest purchases for the year now occur in June rather than December. Therefore, the Commissioner will consent to the taxpayer's request to change to the June PPI.

In *Situation 4,* the taxpayer is requesting a change from a month that is not an appropriate representative month to a month that is an appropriate representative month. Therefore, the Commissioner will consent to the taxpayer's request to change to the December PPI.

In *Situations 2, 3,* and *4,* not only will the Commissioner consent to the request to change the taxpayer's month, but a change would be required even if the taxpayer did not request a change, since the taxpayer in each situation would be using a month that is not an appropriate representative month.

HOLDING

The Commissioner will not consent to a taxpayer's request to change its month for selecting price indexes in computing the LIFO value of its dollar-value pool under the IPI regulations unless the previously elected month is no longer an appropriate representative month under section 1.472-8(e)(3)(iii)(C) of the regulations. A month is an appropriate representative month if there is a nexus between the selected month, the taxpayer's method for determining current-year cost, and the taxpayer's historical experience of inventory purchases during the year.

Part III. Adjustments

Section 481.—Adjustments Required by Changes In Method of Accounting

26 CFR 1.481-5: Adjustments taken into account with consent.

A procedure is provided for certain taxpayers to obtain expeditious consent from the Commissioner to change their method of accounting for package design costs to a capitalization method in accordance with Rev. Rul. 89-23. See Rev. Proc. 89-16, page 822.

26 CFR 1.481-5: Adjustments taken into account with consent.

Taxpayers that incur package design costs are allowed to deem the useful lives of certain package designs to be 60 months. See Rev. Proc. 89-17, page 827.

Section 483.—Interest on Certain Deferred Payments

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of January 1989. See Rev. Rul. 89-1, page 260.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of February 1989. See Rev. Rul. 89-15, page 262.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of March 1989. See Rev. Rul. 89-34, page 263.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of April 1989. See Rev. Rul. 89-39, page 264.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of May 1989. See Rev. Rul. 89-65, page 265.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of June 1989. See Rev. Rul. 89-77, page 266.

Subchapter F.—Exempt Organizations
Part I.—General Rule

Section 501.—Exemption from Tax on Corporations, Certain Trusts, etc.

26 CFR 1.501(c)(3)-1: Organizations organized and operated for religious, charitable, scientific, testing for public safety, literary, or educational purposes or for the preventions of cruelty to children or animals.

Whether churches such as those described in Rev. Rul. 78-232, 1978-1 C.B. 69, and Rev. Rul. 81-94, 1981-1 C.B. 330, are "tax shelters" for purposes of the substantial understatement penalty. See Rev. Rul. 89-74, page 311.

Part II.—Private Foundations

Section 509.—Private Foundation Defined

26 CFR 1.509(a)-3: Broadly, publicly supported organizations.

Guidelines for the circumstances where grant-making private foundations will not be considered to be responsible for substantial and material changes in the sources of financial support of recipient organizations for purposes of sections 1.509(a)-3(c)(1)(iii) and 1.509(a)-3(e)(3) of the regulations. See Rev. Proc. 89-23, page 844.

Subchapter G.—Corporations Used to Avoid Income Tax on Shareholders
Part II.—Personal Holding Companies

Section 542.—Definition of Personal Holding Company

26 CFR 1.542-3: Stock ownership requirement.

Personal holding company; rules for determining ownership. For purposes of classifying a corporation as a personal holding company under the stock ownership requirement in section 542(a)(2) of the Code, stock that is attributed from one person to another under the family and partnership rules of section 544(a)-(2), is not taken into account a second time either as stock of the person who owns it directly or as stock of a third person to whom it is also attributable. In the event that stock is owned directly by one person and is attributed to another, the first person may be counted among the five largest individual shareholders by virtue of attribution to that person of ownership of stock that is directly owned by others and that has not otherwise been taken into account for purposes of section 542(a)(2).

Rev. Rul. 89-20

ISSUES

For purposes of classifying a corporation as a personal holding company under the stock ownership requirement in section 542(a)(2) of the Internal Revenue Code—

(1) If ownership of stock in the corporation is attributed from one person to another under the family and partnership ownership rules of section 544(a)(2), may the stock be taken into account a second time either as stock of the person who owns it directly or as stock of a third person to whom it is also attributable?

(2) If not, and if the stock owned directly by one person is attributed to another, may the first person nevertheless be counted among the five largest shareholders by virtue of attribution to that person of ownership of stock that is directly owned by others and that is not otherwise taken into account for purposes of section 542(a)(2)?

FACTS

Situation 1

X is a publicly held corporation and has 1,000 shares of outstanding stock, all of which are common and are of equal value. *A* owns 200 shares of *X* stock; *A*'s child, *F*, owns 80 shares of *X* stock; *A*'s sibling, *B*, owns 50 shares of *X* stock; *B*'s spouse, *G*, owns 45 shares of *X* stock. *C*, *D*, and *E* are unrelated to *A*, *B*, *F*, or *G*, and each owns 40 shares of *X* stock. No other shareholder owns more than 40 shares of *X* stock, and all other shareholders are unrelated.

Situation 2

Y is a publicly held corporation and has 1,000 shares of outstanding stock, all of which are common and of equal value. *L* owns 50 shares of *Y* stock; *L*'s sibling, *K*, owns 110 shares of *Y* stock; *L*'s child, *M*, owns 45 shares of *Y* stock; *M*'s partner in *Q* partnership, *P*, owns 55 shares of *Y* stock; *M*'s spouse, *N*, owns 40 shares of *Y* stock. *R*, *S*, *T*, and *U* are unrelated to *K*, *L*, *M*, *N*, *Q*, and *P*, and *R*, *S*, *T*, and *U* each owns 70, 70, 70, and 60 shares, respectively, of *Y* stock. No other shareholder owns more than 40 shares of *Y* stock, and all other shareholders are unrelated.

LAW AND ANALYSIS

Section 541 of the Code imposes on the undistributed personal holding company income of every personal holding company a personal holding company tax equal to 28 percent (38.5 percent in the case of tax years beginning in 1987) of the undistributed personal holding company income.

Section 542(a) of the Code provides that a corporation will be classified as a personal holding company if (1) at least 60 percent of its adjusted ordinary gross income (as defined in section 543(b)(2)) for the tax year is personal holding company income, and (2) if at any time during the last half of the tax year more than 50 percent in value of its outstanding stock is owned, directly or indirectly, by or for not more than five individuals.

Section 544 of the Code provides rules for determining stock ownership. Section 544(a)(2) provides that for purposes of determining whether a corporation is a personal holding company, insofar as such determination is based on stock ownership under section 542(a)(2), an individual shall be considered as owning the stock owned, directly or indirectly, by or for the individual's family or by or for the individual's partner. For purposes of section 544(a)(2), the family of an individual includes only the individual's brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants.

Section 544(a)(5) of the Code and section 1.544-6(a)(3) of the Income Tax Regulations provide that stock constructively owned by an individual by reason of the application of the family and partnership rule provided in section 544(a)(2) shall not be considered as actually owned by such individual for the purpose of again applying such rule in order to make another individual the constructive owner of such stock.

Rev. Rul. 82-107, 1982-1 C.B. 103, demonstrates implicitly that stock may not be taken into account more than once. That ruling concerns an individual to whom stock is attributed from the individual's partners in two different partnerships. With the attribution taken into account, the individual is the largest shareholder of the corporation. One of the partners whose stock is attributed to that individual, however, owns directly more stock than is owned directly by any other shareholder. Despite that fact, the partner's stock is taken into account by virtue of its attribution to the individual, and the partner is not treated as one of the five largest individual shareholders.

The example in section 1.544-3(a) of the regulations illustrates the application of section 544(a)(2) of the Code, relating to constructive ownership by reason of family and partnership ownership. The example indicates that it is necessary first to identify the five individuals, for purposes of section 542(a)(2), that own the largest number of shares, directly and constructively.

For purposes of identifying the five largest individual shareholders, it is necessary to identify the individual shareholder who owns the largest number of shares, directly and constructively. In identifying the next largest individual shareholder, the largest individual shareholder's stock ownership, direct and constructive, is excluded from consideration. Similarly, to determine the next largest individual shareholder, the shareholders' stock that has been counted previously is excluded from consideration. After the five largest individual shareholders are identified in this way, the value of the largest five individuals' shares are added together to determine whether their total value exceeds 50 percent of the value of the corporation's outstanding stock for purposes of section 542(a)(2).

In the example in section 1.544-3(a) of the regulations, an individual, *DBW* (*D*'s brother's wife), is not identified as being one of the five largest individual shareholders. This omission is significant since that individual directly and constructively owns 170 shares, a number of shares that is not less than the number owned by some of the individuals that are identified as being among the five largest individual shareholders (*A*, *B*, and *EWB*). Because *DB* (*D*'s brother) owns directly and constructively more shares than *DBW*, *DBW*'s shares are allocated to *DB* for purposes of identifying the five largest individual shareholders and of determining whether five or fewer individual shareholders own more than 50 percent in value of the corporation's outstanding stock.

In *Situation 1*, under the constructive stock ownership provisions of section 544(a)(2) of the Code, *A* is considered to own 330 shares of *X* stock, 200 directly and 130 constructively from *A*'s child, *F*, and from *A*'s sibling, *B*. *F* is considered to own 280 shares, 80 directly and 200 constructively from *A*. *B* is considered to own 295 shares, 50 directly and 245 constructively from *A* and from *B*'s spouse, *G*. *G* is considered to own 95 shares, 45 directly and 50 constructively from *B*. No shares are attributed to *C*, *D* or *E*, who own directly 40 shares each.

With 330 shares, *A* is the largest individual shareholder of *X*. The shares owned directly by *F* and *B* are thus attributed to *A*. The shares owned by *A*, *F*, and *B* cannot be taken into account again, directly or indirectly, in determining the five largest individual shareholders.

G in the present situation differs from *DBW* in the example in section 1.544-3(a) of the regulations in that *DBW*'s shares were counted by her spouse, *DB*, to make him the major shareholder. In the present situation, *G* is not a person whose shares can be attributed to *A*. Thus, *G*'s shares have not been counted towards *A*'s total. *G*'s family consists of *B* and *G*. Although *B* is in *A*'s family and *G*'s family, as well as *B*'s own family, *B*'s shares have been counted by *A* and cannot be recounted for attribution to *G*. Thus, with the 45 shares owned directly, *G* is the second largest individual shareholder of *X* for purposes of section 542(a)(2) of the Code.

The next three largest individual shareholders of *X* are *C*, *D*, and *E*, each of whom owns 40 shares of *X*, or a total of 120 shares. Therefore, the five largest individual shareholders of *X* are *A*, *G*, *C*, *D*, and *E*. They own 495 shares, which do not represent more than 50 percent in value of *X*'s outstanding stock. Therefore, *X* does not meet the stock ownership requirement of section 542(a)(2) of the Code and is not a personal holding company.

In *Situation 2,* under the constructive ownership provisions of section 544(a)(2) of the Code, *L* is considered to own 205 shares of *Y* stock, 50 directly and 155 constructively from *L*'s sibling, *K*, and *L*'s child, *M*. *K* is considered to own 160 shares of *Y* stock, 110 directly and 50 constructively from *L*. *M* is considered to own 190 shares of *Y* stock, 45 directly and 145 shares constructively from *L, N,* and *P*. *N* is considered to own 85 shares of *Y* stock, 40 directly and 45 constructively from *M*; *P* is considered to own 100 shares of *Y* stock, 55 directly and 45 constructively from *M*. No shares have been attributed to *R, S, T,* or *U,* who directly own 70, 70, 70, and 60 shares, respectively, of *Y* stock.

With 205 shares, *L* is the largest individual shareholder of *Y*. The shares owned directly by *K* and *M* are thus attributed to *L*. The shares owned by *K, L,* and *M* cannot be taken into account again, directly or indirectly, in determining the five largest individual shareholders.

The fact however, that *M*'s shares have been attributed to *L* does not preclude *M* from being counted among the five largest individual shareholders for purposes of section 542(a)(2) of the Code, provided that section 544(a)(4) attributes to *M* a sufficient amount of *Y* stock.

M constructively owns 95 shares of *Y* from *N* and *P*. The 95 shares that *M* constructively owns are counted in determining whether *M* is among the five largest individual shareholders for purposes of section 542(a)(2) of the Code. As a result, *M* is the second largest individual shareholder of *Y*. The next three largest individual shareholders of *Y* are *R, S,* and *T*, each of whom owns 70 shares of *Y*, or a total of 210 shares. Therefore, the five largest individual shareholders of *Y* are *L, M, R, S,* and *T*. They own 510 shares, which represent more than 50 percent in value of *Y*'s outstanding stock. Therefore, *Y* meets the stock ownership requirement of section 542(a)(2) of the Code.

HOLDING

For purposes of classifying a corporation as a personal holding company under the stock ownership requirement in section 542(a)(2) of the Code, stock that is attributed from one person to another under the family and partnership rules of section 544(a)(2), is not taken into account a second time either as stock of the person who owns it directly or as stock of a third person to whom it is also attributable. In the event that stock is owned directly by one person and is attributed to another, the first person may be counted among the five largest individual shareholders by virtue of attribution to that person of ownership of stock that is directly owned by others and that has not otherwise been taken into account for purposes of section 542(a)(2).

Part IV.—Deduction for Dividends Paid

Section 561.—Definition of Deduction for Dividends Paid

26 CFR 1.561-2: When dividends are considered paid.

Whether the term "shareholder" refers to the legal owner of a regulated investment company's shares rather than the beneficial owner of the shares, for purposes of the payment of dividends. See Rev. Rul. 89-79, below.

Section 562.—Rules Applicable in Determining Dividends Eligible for Dividends Paid Deduction

26 CFR 1.562-2: Preferential dividends.
(Also Sections 561, 851, 852; 1.561-2, 1.851-1, 1.852-1, 1.852-3.)

Dividends paid deduction; preferential dividends; regulated investment companies. For purposes of applying the $10,000,000 initial investment requirement of section 562(c) of the Code, the term "shareholder" refers to the legal owner of a regulated investment company's shares rather than to the beneficial owner.

Rev. Rul. 89-79

ISSUE

For purposes of applying the $10,000,000 initial investment requirement of section 562(c) of the Internal Revenue Code, does the term "shareholder" refer to the legal owner or to the beneficial owner of a regulated investment company's shares?

FACTS

X is a domestic corporation registered with the Securities and Exchange Commission under the Investment Company Act of 1940, 15 U.S.C. sections 80a-1 to 80b-2, as an open-end management investment company. *X* qualifies as a regulated investment company within the meaning of section 851(a) of the Code.

Most persons that invest in *X* as fiduciaries maintain master shareholder accounts with *X*. Each of the master shareholder accounts on the books of the regulated investment company may represent shares in *X* held by the fiduciary on behalf of numerous trusts, estates, and other participants. Through these master accounts, the fiduciaries make purchases and participate in redemptions of shares of *X*, and receive payments of dividends, on behalf of the beneficial owners of shares of *X*. The initial investments in *X* by the fiduciaries sometimes equal or exceed $10,000,000 per account.

X determines the distributions to be paid with respect to each share on its books by allocating income to each account and then subtracting an allocable portion of its management fees and administrative expenses. *X* allocates income among accounts in a manner that is proportionate to the number of shares held. *X* allocates management and administrative expenses among accounts in the following manner.

Certain administrative expenses of *X* are uniform with respect to each shareholder account, regardless of the number of shares held in the account. Thus, in the case of such expenses, *X*'s cost-per-share decreases as the account size increases. In the case of accounts in which there was an initial investment of at least $10,000,000, *X* allocates a portion of such expenses on the basis of a uniform-cost-per-account. *X* treats a fiduciary as the shareholder in determining the initial investment in an account. *X* allocates the remaining portion of such administrative expenses among the other accounts on a uniform-cost-per-share basis. Administrative expenses that do not vary on a per-share basis and all management fees are allocated among all accounts on a uniform-cost-per-share basis.

As a result of this method of allocation, *X* pays a higher per-share dividend with respect to accounts meeting the $10,000,000 initial investment threshold.

LAW AND ANALYSIS

Section 851(a) of the Code defines a "regulated investment company" (RIC) as any domestic corporation that at all times during the tax year is registered under the Investment Company Act of 1940 (15 U.S.C. sections 80a-1 to 80b-2), as amended, as a management company, business development company, or unit investment trust.

Section 852(b) of the Code provides for the taxation of RICs. It provides that investment company taxable income shall be the taxable income of the RIC with certain adjustments, including a deduction for dividends paid during the tax year (as defined in section 561).

Section 561(a) of the Code provides that the deduction for dividends paid equals the sum of the dividends paid during the tax year.

Section 562(c) of the Code provides that a distribution shall not be considered as a dividend for purposes of computing the dividends paid deduction unless such distribution is pro rata, with no preference to any shares of stock as compared with other shares of the same class, and with no preference to one class of stock as compared with another class except to the extent that the former is entitled (without reference to waivers of their rights by shareholders) to such preference. Section 657(a) of the Tax Reform Act of 1986 (1986 Act), 1986-3 (Vol. 1) C.B. 216, amended section 562(c) to provide that, in the case of a distribution to a shareholder that made an initial investment of at least $10,000,000 in a RIC, the distribution shall not be treated as non pro rata or preferential solely by reason of an increase in the distribution attributable to reductions in administrative expenses of the company. The result of the amendment is that the passthrough of administrative cost savings in the form of increased dividends to eligible shareholders does not cause a RIC's dividends to be treated as preferential dividends that are not deductible under section 561(a).

Although the term shareholder, when used in the Code, generally refers to the beneficial owner of shares, interpretation of that term, in section 562(c), to refer to the legal owner of the shares is consistent with the purposes of that section. The amendment of section 562(c) was premised on the assumption that large accounts impose on RICs lower per-share administrative costs than small accounts. Congress concluded that the preferential dividend rules should not preclude a RIC from passing through these administrative cost savings to certain large accounts. Typically, these administrative cost savings relate to the size of the account maintained by the legal owner of the shares, rather than to the size of the interests in that account held by the ultimate beneficial owners. That is, the fact that a large fiduciary master shareholder account may represent the interests of multiple beneficial owners does not change the fact that a RIC's per-share administrative costs are lower for the master account than for smaller accounts. Interpreting the term "shareholder," as used in section 562(c), to refer to the beneficial owner rather than the legal owner of the RIC shares would frustrate the purposes of the section.

HOLDING

For purposes of applying the $10,000,000 initial investment requirement of section 562(c) of the Code, the term "shareholder" refers to the legal owner of a RIC's shares.

EFFECTIVE DATE

This revenue ruling applies to dividends distributed after October 22, 1986, the effective date of section 657(b) of the 1986 Act, 1986-3 (Vol. 1) C.B. 216.

Section 565.—Consent Dividends

26 CFR 1.565-1: General rule.

T.D. 8244

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Parts 1 and 602

Consent Dividends

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final Regulations.

SUMMARY: This document contains final Income Tax Regulations relating to the consent dividend provisions of section 565 of the Internal Revenue Code of 1986. A review of the legislative history of section 565 has prompted certain amendments to the regulations under section 565. These amendments will provide the public with additional guidance to comply with the provisions of section 565.

EFFECTIVE DATE: These regulations are effective for tax years ending after December 15, 1987.

SUPPLEMENTARY INFORMATION:

PAPERWORK REDUCTION ACT

The collection of information contained in this final regulation has been reviewed and approved by the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1545-0043. The estimated annual burden associated with the collection of information in this final rule is 45 minutes per respondent.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer TR:FP, Washington, DC 20224, and to the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503.

BACKGROUND

On December 15, 1987, the FEDERAL REGISTER published proposed amendments (52 FR 47554) [T.D. 8166, 1988-1 C.B. 254] to the Income Tax Regulations (26 CFR Part 1) under section 565 of the Internal Revenue Code of 1986. These amendments to the prior regulations under section 565 shall be applicable for tax years ending after December 15, 1987. Written comments to the notice were received. No public hearing was held. After consideration of all comments regarding the proposed amendments, those amendments are adopted by this Treasury Decision with revisions in response to those comments. The significant comments and revisions are discussed below.

EXPLANATION OF PROVISIONS

In response to comments, the language of section 1.565-1(a)(2) has been expanded to make it clear that a corporation, 50 percent or more of whose adjusted ordinary gross income is adjusted income from rents, continues to be able to utilize the consent dividend under section 565, as described in section 543(a)(2)(B)(iii), for purposes of avoiding personal holding company status. In addition, certain stylistic and organizational changes were made that were not intended to have substantive effect.

SPECIAL ANALYSES

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore a Regulatory Impact Analysis is not required. Although this Treasury Decision was preceded by a notice of proposed rulemaking that solicited public comments, it has been determined that the notice was not required by 5 U.S.C. §553 since the regulations proposed in that notice and adopted by this Treasury Decision will not have a significant impact on a substantial number of small entities. Therefore, a final Regulatory Flexibility Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

* * * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Parts 1 and 602 are amended as follows:

INCOME TAX REGULATIONS
(26 CFR Part 1)

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 CFR 7805. * * *

Par. 2. Sections 1.565-1T through 1.565-6T are removed.

Par. 3. New §§1.565-1 through 1.565-3, §1.565-5 and §1.565-6 are added at the appropriate place to read as follows:

§.565-1 General rule.

(a) *Consent dividends.* The dividends paid deduction, as defined in section 561, includes the consent dividends for the taxable year. A consent dividend is a hypothetical distribution (as distinguished from an actual distribution) made by:

(1) A corporation that has a reasonable basis to believe that it is subject to the accumulated earnings tax imposed in part I of subchapter G, chapter 1 of the Code, or

(2) A corporation described in part II (personal holding companies or a corporation with adjusted income from rents described in section 543(a)(2)(A) which utilizes the consent dividends described in section 543(a)(2)(B)(iii) to avoid personal holding company status) or part III (foreign personal holding companies) of subchapter G or in part I (regulated investment companies) or part II (real estate investment trusts) of subchapter M, chapter 1 of the Code.

A consent dividend may be made by a corporation described in this paragraph to any person who owns consent stock on the last day of the taxable year of such corporation and who agrees to treat the hypothetical distribution as an actual dividend, subject to the limitations in section 565, §1.565-2, and paragraph (c)(2) of this section, by filing a consent at the time and in the manner specified in paragraph (b) of this section.

(b) *Making and filing of consents.* (1) A consent shall be made on Form 972 in accordance with this section and the instructions on the form issued therewith. It may be made only by or on behalf of a person who was the actual owner on the last day of the corporation's taxable year of any class of consent stock, that is, the person who would have been required to include in gross income any dividends on such stock actually distributed on the last day of such year. Form 972 shall contain or be verified by a written declaration that it is made under the penalties of perjury. In the consent such person must agree to include in gross income for his taxable year in which or with which the taxable year of the corporation ends a specific amount as a taxable dividend.

(2) See paragraph (c) of this section and §1.565-2 for the rules as to when all or a portion of the amount so specified will be disregarded for tax purposes.

(3) A consent may be filed at any time not later than the due date of the corporation's income tax return for the taxable year for which the dividends paid deduction is claimed. With such return, and not later than the due date thereof, the corporation must file Forms 972 duly executed by each consenting shareholder, and a return on Form 973 showing by classes the stock outstanding on the first and last days of the taxable year, the dividend rights of such stock, distributions made during the taxable year to shareholders, and giving all the other information required by the form. Form 973 shall contain or be verified by a written declaration that is made under the penalties of perjury.

(c) *Taxability of amounts specified in consents.* (1) The filing of a consent is irrevocable, and except as otherwise provided in section 565(b), §1.565-2, and paragraph (c)(2) of this section, the full amount specified in a consent filed by a shareholder of a corporation described in paragraph (a) of this section shall be included in the gross income of the shareholder as a taxable dividend. Where the shareholder is taxable on a dividend only if received from sources within the United States, the amount specified in the consent of the shareholder shall be treated as a dividend from sources within the United States in the same manner as if the dividend had been paid in money to the shareholder on the last day of the corporation's taxable year. See paragraph (b) of this section relating to the making and filing of consents, and section 565(e) and §1.565-5, with respect to the payment requirement in the case of nonresident aliens and foreign corporations.

(2) To the extent that the Commissioner determines that the corporation making a consent dividend is not a corporation described in paragraph (a) of this section, the amount specified in the consent is not a consent dividend and the amount specified in the consent will not be included in the gross income of the shareholder. In addition, where a corporation is described in paragraph (a)(1) but not paragraph (a)(2) of this section, to the extent that the Commissioner determines that the amount specified in a consent is larger than the amount of earnings subject to the accumulated earnings tax imposed by part I of subchapter G, such excess is not a consent dividend under paragraph (a) of this section and will not be included in the gross income of the shareholder.

(3) Except as provided in section 565(b), §1.565-2 and paragraph (c)(2) of this section, once a shareholder's consent is filed, the full amount specified in such consent must be included in the shareholder's gross income as a taxable dividend, and the ground upon which a deduction for consent dividends is denied the corporation does not affect the taxability of a shareholder whose consent has been filed for the amount specified in the consent. For example, although described in part I, II, or III of subchapter G, or part I or II of subchapter M, chapter I of the Code, the corporation's taxable income (as adjusted under section 535(b), 545(b), 556(b), 852(b)(2), or 857(b)(2), as appropriate) may be less than the total of the consent dividends.

(4) A shareholder who is a nonresident alien or a foreign corporation is taxable on the full amount of the consent dividend that otherwise qualifies under this section even though that payment has not been made as required by section 565(e) and §1.565-5.

(5) Income of a foreign corporation is not subject to the tax on accumulated earnings under part I of subchapter G, chapter 1 of the Code except to the extent of U.S. source income, adjusted as permitted under section 535. See section 535(b) and (d) and §1.535-1(b). Therefore, foreign source earnings (other than those distributions subject to resourcing under section 535 (d)) of a foreign corporation that is not described in paragraph (a)(2) of this section cannot qualify for consent dividend treatment. Accordingly, a consent dividend made by a foreign corporation described in paragraph (a)(1) of this section shall not be effective with respect to all of the corporation's earnings, but shall relate solely to earnings which would have been, in the absence of the consent dividend, subject to the accumulated earnings tax.

§1.565-2 Limitations.

(a) *General rule.* Amounts specified in consents filed by shareholders or other beneficial owners of a corporation described in §1.565-1(a) are not treated as consent dividends to the extent that—

(1) They would constitute a preferential dividend or

(2) They would not constitute a dividend (as defined in section 316),

if distributed in money to shareholders on the last day of the taxable year of the corporation. If any portion of any amount specified in a consent filed by a shareholder of a corporation described in the preceding sentence is not treated as a consent dividend under section 565(b) and this section, it is disregarded for all tax purposes. For example, it is not taxable to the consenting shareholder, and paragraph (c) of §1.565-1 is not applicable to this portion of the amount specified in the consent.

(b) *Preferential Distribution.* (1) A preferential distribution is an actual distribution, or a consent distribution, or a combination of the two, which involves a preference to one or more shares of stock as compared with other shares of the same class or to one class of stock as compared with any other class of stock. See section 562(c) and §1.562-2.

(2) The application of section 565(b)-(1) and §1.565-2(b) may be illustrated by the following examples:

Example (1). The X Corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has 200 shares of stock outstanding, owned by A and B in equal amounts. On December 15, 1987, the corporation distributes $600 to B and $100 to A. As a part of the same distribution, A executes a consent to include $500 in his gross income as a taxable dividend although such amount is not distributed to him. The X Corporation, assuming the other requirements of section 565 have been complied with, is entitled to a consent dividends deduction of $500. Although the consent dividend is deemed to have been paid on December 31, 1987, the last day of the taxable year of the corporation, the total amount of all distributions constitutes a single nonpreferential distribution of $1200.

Example (2). The Y Corporation, a personal holding company, which makes its income tax returns on the calendar year basis, has one class of consent stock outstanding, owned in equal amounts by A, B, and C. If A and B each receive a distribution in cash of $5,000 and C consents to include $3,000 in gross income as a taxable dividend, the combined actual and consent distribution of $13,000 is preferential. See section 562(c) and §1.562-2(a). Similarly, if no one receives a distribution in cash, but A and B each consents to include $5,000 as a taxable dividend in gross income and C agrees to include only $3,000, the entire consent distribution is preferential.

Example (3). The Z Corporation, which makes its income tax returns on the calendar year basis and is subject, for the taxable year in question, to the accumulated earnings tax, has only two classes of stock outstanding, each class being consent stock and consisting of 500 shares. Class A, with a par value of $40 per share, is entitled to two-thirds of any distribution of earnings and profits. Class B, with a par value of $20 per share, is entitled to one-third of any distribution of earnings and profits. On December 15, 1987, there is distributed on the class B stock $2 per share, or $1,000, and shareholders of the class A stock consent to include in gross income amounts equal to $2 per share, or $1,000, The entire distribution of $2000 is preferential, inasmuch as the class B stock has received more than its pro rata share of the combined amounts of the actual distributions and the consent distributions.

(c) *Section 316 Limitation.* (1) An additional limitation under section 565(b) is that the amounts specified in consents which may be treated as consent dividends cannot exceed the amounts which would constitute a dividend (as defined in section 316) if the corporation had distributed the total specified amounts in money to shareholders on the last day of the taxable year of the corporation. If only a portion of such total would constitute a dividend, then only a corresponding portion of each specified amount is treated as a consent dividend.

(2) The application of section 565(b)-(2) and §1.565-2(c) may be illustrated by the following example:

Example. The X Corporation, a corporation described in §1.565-1(a)(1) or (2), which makes its income tax returns on the calendar year basis, has only one class of stock outstanding, owned in equal amounts by A and B. It makes no distributions during the taxable year 1987. Its earnings and profits for the calendar year 1987 amount to $8,000, there being at the beginning of such year no accumulated earnings or profits. A and B execute proper consents to include $5,000 each in their gross income as a dividend received by them on December 31, 1987. The sum of the amounts specified in the consents executed by A and B is $10,000, but if $10,000 had actually been distributed by the X corporation on December 31, 1987 only $8,000 would have constituted a dividend under section 316(a). The amount which could be considered as consent dividends in computing the dividends paid deduction for purposes of the accumulated earnings tax is limited to $8,000, or $4,000 of the $5,000 specified in each consent. The remaining $1,000 in each consent is disregarded for all tax purposes. (In the case of a personal holding company, see also the example in §1.565-3(b).)

§1.565-3 Effect of consent.

(a) *General Rule.* The amount of the consent dividend that is described in paragraph (a) of §1.565-1 shall be considered, for all purposes of the Code, as if it were distributed in money by the corporation to the shareholder on the last day of the taxable year of the corporation, received by the shareholder on such day, and immediately contributed by the shareholder as paid-in capital to the corporation on such day. Thus, the amount of the consent dividend will be treated by the shareholder as a dividend. The shareholder will be entitled to the dividends received deduction under section 243 or 245 with respect to such consent dividend. The basis of the shareholder's consent stock in a corporation will be increased by the amount thus treated in his hands as a dividend which he is considered as having contributed to the corporation as paid-in capital. The amount of the current dividend will also be treated as a dividend received from sources within the United States in the same manner as if the dividend had been paid in money to the shareholders. Among other effects of the consent dividend, the earnings and profits of the corporation will be decreased by the amount of the consent dividends. Moreover, if the shareholder is a corporation, its accumulated earnings and profits will be increased by the amount of the consent dividend with respect to which it makes a consent.

(b) *Example.* The application of section 565(c) may be illustrated by the following example:

Example. Corporation A, a personal holding company and a calendar year taxpayer, has one shareholder, individual B, whose consent to include $10,000 in his gross income for the calendar year 1987 has been timely filed. A has $8,000 of earnings and profits at the beginning of 1987. A has $10,000 of undistributed personal holding company income (determined without regard to distributions under section 316(b)(2)) for 1987. B must include $10,000 in his gross income as a taxable income and is treated as having immediately contributed $10,000 to A as paid-in capital. See section 316(b)(2).

§1.565-5 Nonresident aliens and foreign corporations.

(a) *Withholding.* In the event that a corporation makes a consent dividend, as described in §1.565-1(a), to a shareholder that is subject to a withholding tax under section 1441 or 1442 on a distribution of cash or other property, the corporation must remit an amount of tax equal to the withholding tax that would be imposed under section 1441 or 1442 if an actual cash distribution equal to the consent dividend had been paid to the shareholder on the last day of the corporation's taxable year. Such payment must be in one of the following forms:

(1) Cash,

(2) United States postal money order,

(3) Certified check drawn on a domestic bank, provided that the law of the place where the bank is located does not permit the certification to be rescinded prior to presentation,

(4) A cashier's check of a domestic bank, or

(5) A draft on a domestic bank or a foreign bank maintaining a United States agency or branch and payable in United States funds.

The amount of such payment shall be credited against the tax imposed on the shareholder.

§1.565-6 Definitions.

(a) *Consent stock.* (1) The term "consent stock" includes what is generally known as common stock. It also includes participating preferred stock, the participation rights of which are unlimited.

(2) The definition of consent stock may be illustrated by the following example:

Example. If in the case of the X Corporation, a personal holding company, there is only one class of stock outstanding, it would all be consent stock. If, on the other hand, there were two classes of stock, class A and class B, and class A was entitled to 6 percent before any distribution could be made on class B, but class B was entitled to everything distributed after class A had received its 6 percent, only class B stock would be consent stock. Similarly, if class A, after receiving its 6 percent, was to participate equally or in some fixed proportion with class B until it had received a second 6 percent, after which class B alone was entitled to any further distributions, only class B stock would be consent stock. The same result would follow if the order of preferences were class A 6 percent, then class B 6 percent, then class A a second 6 percent, either alone or in conjunction with class B, then class B the remainder. If, however, class A stock is entitled to ultimate participation without limit as to amount, then it, too, may be consent stock. For example, if class A is to receive 3 percent and then share equally or in some fixed proportion with class B in the remainder of the earnings or profits distributed, both class A stock and class B stock are consent stock.

(b) *Preferred dividends.* (1) The term "preferred dividends" includes all fixed amounts (whether determined by percentage of par value, a stated return expressed in a certain number of dollars per share, or otherwise) the distribution of which on any class of stock is a condition precedent to a further distribution of earnings or profits (not including a distribution in partial or complete liquidation). A distribution, though expressed in terms of a fixed amount, is not a preferred dividend, however, unless it is preferred over a subsequent distribution within the taxable year upon some class or classes of stock other than one on which it is payable.

(2) The definition of preferred dividends may be illustrated by the following example:

Example. If, in the case of the X Corporation, there are only two classes of stock outstanding, class A and class B, and class A is entitled to a distribution of 6 percent of par, after which the balance of the earnings and profits are distributable on class B exclusively, class A's 6 percent is a preferred dividend. If the order of preferences is class A $6 per share, class B $6 per share, then class A and class B in fixed proportions until class A receives $3 more per share, then class B the remainder, all of class A's $9 per share and $6 per share of the amount distributable on class B are preferred dividends. The amount which class B is entitled to receive in conjunction with the payment to class A of its last $3 per share is not a preferred dividend, because the payment of such amount is preferred over no subsequent distribution except one made on class B itself. Finally, if a distribution must be $6 on class A, $6 on class B, then on class A and class B share and share alike, the distribution on class A of $6 and the distribution on class B of $6 are both preferred dividends.

OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT (CFR PART 602)

Par. 4. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 5. Section 602.101(c) is amended by inserting in the appropriate place in the table:

"§1.565-1 ... 1545-0043."
"§1.565-2 ... 1545-0043."
"§1.565-3 ... 1545-0043."
"§1.565-5 ... 1545-0043."
"§1.565-6 ... 1545-0043."

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved January 13, 1989.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on March 13, 1989, 8:45 a.m., and published in the issue of the Federal Register for March 14, 1989, 54 F.R. 10537)

Subchapter H.—Banking Institutions
Part II.—Mutual Savings Banks, etc.

Section 593.—Reserves for Losses on Loans

26 CFR 1.593-1: Additions to reserve for bad debts.

In determining the net operating loss carryforward period under section 172(b)(1)(L) of the Code, (1) when must a taxpayer be an organization to which section 593 applies; and (2) which version of section 593 (former section 593 or section 593 as amended by the Tax Reform Act of 1986) applies. See Rev. Rul. 89-78, page 80.

26 CFR 1.593-11: Qualifying real property loan and nonqualifying loan defined.

A loan made for the purchase of stock in a cooperative housing corporation, and secured by such stock, is a qualifying real property loan within the meaning of section 593(d)(1). See Rev. Rul. 89-59, page 317.

Subchapter I.—Natural Resources
Part I.—Deductions

Section 612.—Basis for Cost Depletion

26 CFR 1.612-4: Charges to capital and to expense in case of oil and gas wells.

Guidance is provided regarding which costs incurred in the course of fabricating, transporting and installing an offshore oil and gas drilling and production platform and the related facilities and equipment are within the option to expense intangible drilling and development costs provided by section 263(c) of the Code. See Rev. Rul. 89-56, page 83.

Subchapter J.—Estates, Trusts, Beneficiaries, and Decedents
Subpart C.—Estates and Trusts Which May Accumulate Income or Which Distribute Corpus

Section 664.—Charitable Remainder Trusts

26 CFR 1.664-2: Charitable remainder annuity trust.

The Service ordinarily will not issue rulings as to whether an inter vivos charitable remainder trust that provides for annuity payments during one measuring life satisfies the requirements described in section 664(d)(1) of the Code. See Rev. Proc. 89-19, page 841.

26 CFR 1.664-2: Charitable remainder annuity trust.

Sample form of declaration of trust that meets the requirements for an inter vivos charitable remainder annuity trust providing for annuity payments during one life. See Rev. Proc. 89-21, page 842.

26 CFR 1.664-3: Charitable remainder unitrust.

The Service ordinarily will not issue rulings as to whether an inter vivos charitable remainder trust that provides for unitrust payments during one measuring life satisfies the requirements described in section 664(d)(2) of the Code. See Rev. Proc. 89-19, page 841.

26 CFR 1.664-3: Charitable remainder unitrust.

Sample form of declaration of trust that meets the requirements for an inter vivos charitable remainder unitrust providing for unitrust payments during one life. See Rev. Proc. 89-20, page 841.

Subchapter K.—Partners and Partnerships
Part I.—Determination of Tax Liability

Section 701.—Partners, Not Partnership, Subject To Tax

In accordance with sections 702(a) and (b) of the Code and section 1.702-1(a)(8)(ii) of the regulations, a controlled foreign corporation's distributive share of partnership income is taken into account separately by the controlled foreign corporation, and the character of such income is determined as if it were realized directly by the controlled foreign corporation from the source from which the partnership realized such income. See Rev. Rul. 89-72, page 257.

Section 702.—Income and Credits of Partner

26 CFR 1.702-1: Income and credits of partner.

T.D. 8247

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Part 1

Requirement for Certain Partnerships and S Corporations to Separately State Meal, Travel, and Entertainment Expenses

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations and removal of temporary regulations.

SUMMARY: This document provides final regulations relating to the requirement for certain partnerships and S corporations to separately state meal, travel, and entertainment expenses. These regulations are necessary because of changes made to prior law by the Tax Reform Act of 1986. These regulations provide the public with guidance needed to comply with the law.

EFFECTIVE DATE: The regulations are effective for taxable years beginning on or after January 1, 1987.

SUPPLEMENTARY INFORMATION:

On March 2, 1988, the FEDERAL REGISTER published (53 FR 6670) [LR-29-87, 1988-1 C.B. 927] proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 702 and 1366 of the Internal Revenue Code, as well as temporary regulations (T.D. 8182, 53 FR 6602) [1988-1 C.B. 258] containing the same rules. The amendments to the regulations were made necessary because of amendments to the Code by section 142 of the Tax Reform Act of 1986 (the Act). Three comments were received on the notice of proposed rulemaking. A public hearing was not requested or held. After consideration of the comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision. These regulations supersede the temporary regulations issued under §§1.702-1T and 1.1366-1T.

Section 142 of the Act made significant changes to the rules for deducting meal, travel, and entertainment expenses. These changes are effective for taxable years beginning on or after January 1, 1987. On March 2, 1987, the Internal Revenue Service published Notice 87-23 in the Internal Revenue Bulletin (1987-1 C.B. 467). The notice announced special effective date rules that required partnerships and S corporations that have taxable years beginning before January 1, 1987, and ending with or within partners' or shareholders' taxable years beginning on or after January 1, 1987, to separately state meal, travel, and entertainment expenses paid or incurred after December 31, 1986. With respect to skybox rentals, partnerships and S corporations that have taxable years beginning before January 1, 1989, and ending with or within partners' or shareholders' taxable years beginning on or after January 1, 1987, are required to separately state rents paid or incurred after December 31, 1986. On June 22, 1987, the Service published Notice 87-45 in the Internal Revenue Bulletin (1987-1 C.B. 502). Notice 87-45 provided additional instructions to Form 1065 and Form 1120S concerning certain expenses for meals, travel, and entertainment of 1986-87 fiscal year corporations. The temporary regulations and cross-referencing notice of proposed rulemaking implemented the special effective date rules announced in the notices.

Three comments were received on the notice of proposed rulemaking. All three commentators stated that the special effective date rules in the proposed regulations are inconsistent with the statutory effective date for section 142 of the Act. The commentators suggested that the limitations imposed by section 142 of the Act should not apply to expenses paid or incurred by a partnership or an S corporation until the first day of the partnership's or S corporation's taxable year beginning after December 31, 1986. This suggestion was not adopted by the final regulations because the limitations imposed by section 142 of the Act should be applied to expenses incurred after the statutory effective date of section 142 of the Act and deducted on the returns of partners and shareholders in taxable years beginning on or after January 1, 1987. This effective date rule is consistent with congressional intent in the Act of applying the reductions of tax rates and the restrictions on deductions as of the same date.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. Although this Treasury decision was preceded by a notice of proposed rulemaking that solicited public comments, the notice was not required by 5 U.S.C. 553 since the regulations proposed in that notice and adopted by this Treasury decision are interpretative. Therefore, a final Regulatory Flexibility Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

* * * * * *

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. Section 1.702-1T is removed.

Par. 3 Section 1.702-1 is amended by redesignating paragraph (e) as paragraph (f), and by adding a new paragraph (e) to read as set forth below.

§1.702-1 Income and credits of partner.
* * * * *

(e) *Special rules on requirement to separately state meal, travel, and entertainment expenses.* Each partner shall take into account separately his or her distributive share of meal, travel, and entertainment expenses paid or incurred after December 31, 1986, by partnerships that have taxable years beginning before January 1, 1987, and ending with or within partners' taxable years beginning on or after January 1, 1987. In addition, with respect to skybox rentals under section 274(1)(2), each partner shall take into account separately his or her distributive share of rents paid or incurred after December 31, 1986, by partnerships that have taxable years beginning before January 1, 1989, and ending with or within partners' taxable years beginning on or after January 1, 1987.

Par. 4. Section 1.1366-1T is removed.

Par. 5. Section 1.1366-1 is added and reserved, and new §1.1366-2 is added at the appropriate place to read as follows:

§1.1366-2 Special rules on requirement to separately state meal, travel, and entertainment expenses.

Each shareholder shall take into account separately his or her pro rata share of meal, travel, and entertainment expenses paid or incurred after December 31, 1986, by S corporations that have taxable years beginning before January 1, 1987, and ending with or within shareholders' taxable years beginning on or after January 1, 1987. In addition, with respect to skybox rentals under section 274(1)(2), each shareholder shall take into account separately his or her pro rata share of rents paid or incurred after December 31, 1986, by S corporations that have taxable years beginning before January 1, 1989, and ending with or within shareholders' taxable years beginning on or after January 1, 1987.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved March 16, 1989.

Dennis E. Ross,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on April 4, 1989, 8:45 a.m., and published in the issue of the Federal Register for April 5, 1989, 54 F.R. 13679)

---

26 CFR 1.702-1: Income and credits of partner.

If a partner's distributive share of the partnership's expenses under section 179 of the Code is not fully deductible by the partner because, when combined with the partner's section 179 expenses from other sources, the partner's section 179 expenses from all sources exceed the maximum amount allowable to the partner under section 179(b)(1), is the partner's basis in the partnership interest reduced by the partner's full distributive share of the partnership's section 179 expenses, including the partnership's section 179 expenses that the partner cannot deduct? See Rev. Rul. 89-7, this page.

---

26 CFR 1.702-1: Income and credits of partner.

In accordance with sections 702(a) and (b) of the Code and section 1.702-1(a)(8)(ii) of the regulations, a controlled foreign corporation's distributive share of partnership income is taken into account separately by the controlled foreign corporation, and the character of such income is determined as if it were realized directly by the controlled foreign corporation from the source from which the partnership realized such income. See Rev. Rul. 89-72, page 257.

Section 703.—Partnership Computations

If a partner's distributive share of the partnership's expenses under section 179 of the Code is not fully deductible by the partner because, when combined with the partner's section 179 expenses from other sources, the partner's section 179 expenses from all sources exceed the maximum amount allowable to the partner under section 179(b)(1), is the partner's basis in the partnership interest reduced by the partner's full distributive share of the partnership's section 179 expenses, including the partnership's section 179 expenses that the partner cannot deduct? See Rev. Rul. 89-7, this page.

In accordance with sections 702(a) and (b) of the Code and section 1.702-1(a)(8)(ii) of the regulations, a controlled foreign corporation's distributive share of partnership income is taken into account separately by the controlled foreign corporation, and the character of such income is determined as if it were realized directly by the controlled foreign corporation from the source from which the partnership realized such income. See Rev. Rul. 89-72, page 257.

Section 705.—Determination of Basis of Partner's Interest

26 CFR 1.705-1: Determination of basis of partner's interest.
(Also Sections 179, 702, 703, 1.179-1, 1.702-1.)

Partnerships; basis of partner's interest in a partnership. A partner's distributive share of section 179 expenses will be reflected in the adjusted basis of the partner's interest through the basis adjustments required by section 705(a) whether or not the partner is allowed a deduction for such expense.

Rev. Rul. 89-7

ISSUE

If a partner's distributive share of the partnership's expenses under section 179 of the Internal Revenue Code is not fully deductible by the partner because, when combined with the partner's section 179 expenses from other sources, the partner's section 179 expenses from all sources exceed the maximum amount allowable to the partner under section 179(b)(1), is the partner's basis in the partnership interest reduced by the partner's full distributive share of the partnership's section 179 expenses, including the partnership's section 179 expenses that the partner cannot deduct?

FACTS

In 1988, *AB*, a partnership, elected under section 179(a) of the Code to expense the entire cost of certain qualifying property that it purchased and placed in service during that year. A similar election was made by another partnership, *AC*. With respect to each of the partnerships, *A* had a three-fifths interest in each item of partnership income, gain, deduction, loss, and credit. The partnerships separately stated each partner's distributive share of section 179 expenses for that year. The sum of *A*'s distributive share of section 179 expenses from *AB* and *AC* exceeded $10,000. *AB* and *AC* reduced the basis of the specific property to which the section 179 election applied by the total amount of section 179 expenses allocated to the partners as required by section 1.179-1(f)(2) of the Income Tax Regulations. The partnerships are both calendar year partnerships. But for the limitation contained in section 179(b)(1), *A*, *AB*, and *AC* each meet all the other limitations and restrictions of section 179.

LAW AND ANALYSIS

Section 179(a) of the Code provides that a taxpayer may elect to treat the cost of any section 179 property as an expense that is not chargeable to capital account. Any cost so treated shall be allowed as a deduction for the taxable year in which the section 179 property is placed in service. Under section 1.179-1(a) of the regulations, taxpayers may elect to treat as an expense all or a portion of the cost of section 179 property.

Section 179(b)(1) of the Code provides that the aggregate cost of property that may be taken into account under section 179(a) shall not exceed $10,000.

Section 179(d)(1) of the Code provides that the term "section 179 property" means any recovery property that is section 38 property and that is acquired by purchase for use in the active conduct of a trade or business.

Section 179(d)(8) of the Code and section 1.179-2(c) of the regulations provide that, in the case of a partnership, the dollar limitation contained in section 179(b)(1) shall apply with respect to the partnership and with respect to each partner.

Section 1.179-1(f)(2) of the regulations provides that, generally, the basis of a partnership's section 179 property must be reduced to reflect the amount of the section 179 expense elected by the partnership. This reduction must be made even if the section 179(b) dollar limitation prevents a partner from deducting all or a portion of the amount allocated by the partnership.

Section 1.179-1(h) of the regulations provides that the election to expense the cost of section 179 property is made by the partnership.

Section 702(a)(7) of the Code provides that in determining a partner's income tax, each partner shall take into account separately the partner's distributive share of the partnership's items of income, gain, loss, deduction, and credit (in addition to those items specifically listed in sections 702(a)(1) through 702(a)(6)) to the extent provided by regulations prescribed by the Secretary. Section 1.702-1(a)(8)(ii) of the regulations provides that each partner must take into account separately the distributive share of any partnership item that if separately taken into account by any partner would result in an income tax liability for the partner different from that which would result if that partner did not take the item into account separately.

Section 703(a) of the Code provides that the taxable income of a partnership is computed in the same manner as in the case of an individual, except that the items described in section 702(a) must be separately stated and certain deductions specified in section 703(a)(2) are not allowed to the partnership. The deduction allowable under section 179 is not among the deductions disallowed under section 703(a)(2).

Section 705(a) of the Code provides, in part, that the adjusted basis of a partner's interest in a partnership shall be the basis of such interest determined under section 722 (relating to contributions to a partnership) or section 742 (relating to transfers of partnership interests) increased by the partner's distributive share for the taxable year and prior taxable years of taxable income of the partnership as determined under section 703(a) and decreased (but not below zero) by distributions by the partnership as provided in section 733 and by the sum of the partner's distributive share for the taxable year and prior taxable years of losses of the partnership and expenditures of the partnership not deductible in computing its taxable income and not properly chargeable to capital account.

The deduction allowable under section 179 of the Code must be separately stated under section 702(a)(7) because a partner's income tax liability may differ depending on whether or not this deduction is separately stated by the partnership. In compliance with section 179(d)(8) of the Code and section 1.179-2(c) of the regulations, *A* deducted only $10,000 of the total section 179 expenses separately stated and allocated to *A* by the partnerships.

Under section 703(a) of the Code, the deductible section 179 expenses of a partnership for a taxable year reduce the taxable income or increase the taxable loss of the partnership for the year. In addition, the section 179 expenses of a partnership that are not deductible in computing the partnership's taxable income or loss for a taxable year by reason of the application of the section 179(b) limitations to the partnership constitute expenditures of the partnership that are not properly chargeable to capital account. Accordingly, *A*'s distributive share of the section 179 expenses of the partnerships will be reflected in the adjusted basis of *A*'s interest in each partnership through the basis adjustments required by section 705(a), whether or not *A* is allowed a deduction for such expenses.

HOLDING

The adjusted basis of *A*'s interest in *AB* and *AC* must be reduced under section 705 by *A*'s distributive share of the section 179 expenses of the partnerships even though *A* may be prohibited from deducting all or a portion of such expenses under section 179(b)(1).

Section 709.—Treatment Of Organization And Syndication Fees

26 CFR 1.709-1: Treatment of organization and syndication costs.
(Also Section 165; 1.165-1.)

Partnerships; partnership syndication expenses. Section 709 of the Code precludes a deduction under section 165 for an abandonment loss despite the fact that expenses were incurred in a syndication effort that failed and was abandoned. Rev. Rul. 79-2 distinguished.

Rev. Rul. 89-11

ISSUE

Whether syndication expenses incurred in connection with the syndication of a partnership are deductible under section 165 of the Internal Revenue Code if the syndication effort to which the expenses relate fails and that effort is abandoned.

FACTS

In 1985, corporation *X* formed a limited partnership, *PRS*, and became its general partner. *A*, an individual, became a limited partner. Shortly after the formation of *PRS*, corporation *X* entered into an agreement with underwriter *Y* to undertake a best-efforts public offering of limited partner interests in *PRS*. In connection with this syndication effort, corporation *X* paid certain costs toward the syndication of partnership *PRS*. The syndication effort, however, was unsuccessful and was abandoned.

In 1986, corporation *X* entered into an agreement with underwriter *Z* to undertake a best-efforts public offering of limited partner interests in *PRS*. In connection with this second effort, corporation *X* incurred further syndication costs. This second syndication effort was successful and numerous investors were admitted as limited partners in *PRS*. The amounts expended in connection with the 1985 syndication effort had no value to *PRS* or corporation *X* in the 1986 syndication effort.

LAW AND ANALYSIS

Section 165(a) provides that there shall be allowed as a deduction any loss sustained during the taxable year and not compensated for by insurance or otherwise.

Section 1.165-1(b) of the Income Tax Regulations provides that to be allowable as a deduction under section 165(a), a loss must be evidenced by closed and completed transactions, fixed by identifiable events, and actually sustained during the taxable year.

Section 1.165-2(a) of the regulations provides that a loss incurred in a business or a transaction entered into for profit and arising from the sudden termination of the usefulness in such business or transaction of any nondepreciable property, in a case where such business or transaction is discontinued or if such property is permanently discarded from use therein, shall be allowed as a deduction under section 165 for the taxable year in which the loss is actually sustained.

Section 709(a) of the Code provides that, except as provided in section 709(b), no deduction shall be allowed under chapter 1 of subtitle A of the Code to a partnership or to any partner for any amount paid or incurred to organize a partnership or to promote the sale of an interest in such partnership. Section 709(b) allows a partnership to amortize its organizational expenses over a period of not less than 60 months. Syndication expenses are not subject to the election under section 709(b) of the Code and must be capitalized. Section 1.709-2(a) and (b) of the regulations. *See also* S. Rep. No. 938, 94th Cong., 2d Sess. 94 (1976), 1976-3 (Vol. 3) C.B. 132.

Section 1.709-1(b)(2) of the regulations provides that if there is a winding up and complete liquidation of a partnership before the end of the amortization period described in section 709(b) of the Code, the unamortized amount of organizational expenses is deductible by the partnership under section 165 as a loss in the partnership's final taxable year. This section of the regulations provides, however, that no partnership deduction is allowed with respect to capitalized syndication expenses.

Rev. Rul. 85-32, 1985-1 C.B. 186, holds that syndication costs incurred in connection with the sale of partner interests are chargeable by the partnership to capital account and can not be amortized. In addition, that ruling states that "[N]o deduction is permitted at the partnership or partner level with respect to the partnership's ... capitalized syndication expenses."

Syndication costs can be paid in a number of ways. For example, they can be paid directly by the partnership, indirectly by a general partner, or by investors paying a portion of costs, such as sales commissions, at the time those investors acquire their partner interests. Rev. Rul. 81-153, 1981-1 C.B. 387, stands for the principle that the cost of marketing partner interests are syndication costs regardless of who pays the costs. Rev. Rul. 81-153 considered two situations in which an investor paid sales commissions in connection with the investor's acquisition of a limited partner interest. The ruling holds that in both situations the sales commissions are considered to have been paid by the partnership. In effect, the amount of the sales commission is treated as a capital contribution by the investor to the partnership and a payment of a syndication expense by the partnership. In this case, the syndication costs paid by corporation *X* are viewed as amounts paid by *PRS*. The investor's basis in the limited partner interest includes the amount paid as sales commissions and not merely the net cash received by the partnership.

In Rev. Rul. 79-2, 1979-1 C.B. 98, expenses incurred by shareholders in preparation for public offering of their shares of stock in a corporation were required to be capitalized as an intangible asset of the shareholders, separate from their stock. The ruling holds that the shareholders are allowed loss deductions with respect to the capitalized expenses for the year the offering was abandoned. The facts here are distinguishable from those in Rev. Rul. 79-2, because a partnership is involved.

PRS was required to capitalize the syndication expenses incurred in connection with the 1985 syndication effort because section 1.709-2(b) of the regulations directs that partnership syndication costs must be capitalized. Rev. Rul. 85-32 holds that syndication costs are chargeable to capital account. The terms "capitalize" and "chargeable to capital account" indicate that the partnership is to record the syndication expenditures as an intangible asset on its balance sheet. Because here, as in Rev. Rul. 79-2, the usefulness to *PRS* of the intangible asset created upon capitalization of the syndication costs terminated upon the abandonment of the effort, a question is presented as to whether *PRS* is allowed a loss deduction under section 165 of the Code and section 1.165-2(a) of the regulations.

The "no deduction shall be allowed" language in section 709 of the Code precludes the deduction of syndication costs under any circumstances. Rev. Rul. 85-32 states that, with respect to the deductibility of syndication costs, the provisions of section 709 of the Code and the related regulations supersede any other section contained in chapter 1 of the Code. *See also Egolf v. Commissioner*, 87 T.C. 34, 46 (1986); Rev. Rul. 87-111, 1987-2 C.B. 160. Furthermore, section 1.709-1(b)(2) provides that section 709 precludes the allowance of a loss deduction to the partnership under section 165 for capitalized syndication expenses upon the winding up and liquidation of a partnership. Obviously, the intangible asset represented by capitalized syndication expenditures can have no value to a partnership upon its liquidation, but the regulations expressly deny a loss deduction to the partnership at that time. To allow a loss deduction with respect to capitalized syndication expenditures if those expenditures became worthless before the winding up of the partnership would, therefore, be inconsistent with the direction given in the regulations.

HOLDING

Section 709 of the Code precludes the allowance of a deduction for partnership syndication expenses regardless of whether the syndication effort is successful.

EFFECT ON OTHER RULINGS

Rev. Rul. 79-2 is distinguished.

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Parts 1 and 602

Treatment of Partnership Liabilities; Allocations Attributable to Nonrecourse Liabilities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final and temporary regulations.

SUMMARY: This document contains final and temporary regulations concerning the treatment of partnership liabilities and the allocation of deductions attributable to nonrecourse debt. The temporary regulations reflect changes to the applicable tax law made by section 79 of the Tax Reform Act of 1984. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in ***[PS-229-84, page 1057, this Bulletin].

DATES: Sections 1.752-.0T through 1.752-4T, section 1.704-1T, and the amendments to sections 1.704-1 and 602.101 are effective as of December 29, 1988. The temporary regulations under section 752 are generally applicable to any partnership liability incurred on or after January 30, 1989, although the temporary regulations apply as of March 1, 1984 to certain liabilities for which a partner bears the economic risk of loss. Section 1.704-1T is generally applicable for partnership taxable years beginning after December 29, 1988, unless the partnership elects to apply the provisions of that section to the first taxable year of such partnership ending after December 29, 1988. Additional guidance on the applicability of the temporary regulations under sections 752 and 704 is contained in §§1.752-4T and 1.704-1T(b)(4)(iv)(*m*).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

These regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collections of information contained in §§1.752-4T(c) and 1.704-1T(b)(4)(iv)(*m*)(*2*) have been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget (OMB) under control number [1545 - 1090]. The estimated annual burden per respondent varies from 3 minutes to 8 minutes, depending on individual circumstances, with an estimated average of 5 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

For further information concerning these collections of information, and where to submit comments on these collections of information, the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-referenced notice of proposed rulemaking published in *** [PS-229-84, page 1057, this Bulletin].

BACKGROUND

This document adds new temporary regulations §§1.752-0T, -1T, -2T, -3T, and -4T. The temporary regulations under section 752 reflect changes to the applicable tax law made by section 79 of the Tax Reform Act of 1984 (Pub. L. 98-369) [1984-3 (Vol. 1) C.B. 1, 105], which overruled the decision in *Raphan v. United States,* 3 Cl. Ct. 457 (1983), and directed the Treasury Department to prescribe regulations under section 752 relating to the treatment of guarantees, assumptions, indemnity agreements, and similar arrangements.

This document also adds new temporary regulation §1.704-1T and amends §1.704-1 to make conforming changes. The temporary regulation under section 704(b) reflects amendments to the rules governing the allocation of deductions attributable to nonrecourse debt that coordinate those rules with the temporary regulations under section 752, modify the treatment of minimum gain, and take account of comments that have been submitted to the Service.

EXPLANATION OF PROVISIONS OF TEMPORARY REGULATIONS UNDER SECTION 752

Overview

Under section 752, a partner's share of the liabilities of the partnership is reflected in the adjusted basis of the partner's interest in the partnership by treating any increase in the partner's share of those liabilities as a contribution of money to the partnership by the partner and any decrease in the partner's share of those liabilities as a distribution of money to the partner by the partnership. Section 752 also treats the assumption of a partnership liability by a partner as a contribution of cash by the partner, and the assumption of a partner's liability by the partnership as a distribution of cash to the partner. Under the regulations in effect under section 752 prior to the amendments made by this document (the "existing regulations"), the partners generally share recourse liabilities of the partnership in accordance with the ratios in which the partners share partnership losses, while the partners share nonrecourse liabilities of the partnership in accordance with the ratios in which they share partnership profits. The existing regulations define a nonrecourse liability as any liability with respect to which "none of the partners have any personal liability."

In *Raphan v. United States,* 3 Cl. Ct. 457 (1983), *rev'd,* 759 F. 2d 879 (Fed. Cir. 1985), the United States Claims Court held that a guarantee by a general partner of an otherwise nonrecourse debt of the partnership did not require the partner to be treated as personally liable for that debt. The Tax Reform Act of 1984 (the "1984 Act") specifically provided that the decision in *Raphan* is not to be followed in applying section 752 and the regulations thereunder. In addition, Congress directed Treasury to revise and update its regulations under section 752 to take account of current commercial practices and arrangements, such as assumptions, guarantees, and indemnities. See section 79(b) of the 1984 Act; see also H.R. Rep. No. 861, 98th Cong., 2d Sess. 869 (1984). The legislative history indicated that the revisions to the section 752 regulations should be based on the manner in which the partners, and persons related to the partners, share the economic risk of loss for a partnership liability (other than a bona fide nonrecourse liability). H.R. Rep. No. 861, 98th Cong., 2d Sess. 869 (1984).

In accordance with the legislative history of the 1984 Act, the temporary regulations under section 752 employ an economic risk of loss analysis (1) to determine whether a partnership liability is a recourse or nonrecourse liability, and (2) to determine the partners' shares of any recourse liability of the partnership. In recognition of the diversity of current lending practices and financing techniques, the temporary regulations have been designed to take account of the wide variety of commercial practices by which the partners may share the economic risk of loss for a partnership liability, including guarantees, assumptions and indemnities.

Sharing Recourse Liabilities—

Economic Risk of Loss

Under the temporary regulations, a partnership liability is a recourse liability to the extent that any partner bears the economic risk of loss for that liability, and a partner's share of any recourse liability of the partnership equals the portion, if any, of the economic risk of loss for such liability that is borne by such partner. Generally, a partner bears the economic risk of loss for a partnership liability to the extent that the partner (or a person related to the partner) would be obligated to make a payment to the creditor or a contribution to the partnership with respect to a partnership liability (and would not be entitled to be reimbursed for such payment or contribution by another partner, a person related to another partner, or the partnership) if (1) all of the partnership's assets (including money) were worthless, (2) all of the partnership's liabilities were due and payable in full, (3) the partnership disposed of all of its assets in a fully taxable transaction for no consideration (other than relief from certain liabilities), and (4) the partnership allocated its items of income, gain, loss, deduction, and credit for the year among the partners and liquidated the partners' interests in the partnership. The temporary regulations provide that a person is related to a partner if such person and the partner bear a relationship to each other that is specified in section 267(b) or 707(b)(1), with the following modifications: (1) "80 percent or more" is substituted for "more than 50 percent" each place it appears in those sections; (2) brothers and sisters are excluded from the members of a person's family; and (3) section 267(f)(1)(A) is disregarded.

Under the approach taken by the temporary regulations, a partner bears the economic risk of loss for a partnership liability to the extent that the partner (or a person related to the partner) would bear the economic burden of discharging the obligation represented by that liability if the partnership were unable to do so. For example, equal partners in a general partnership will share the economic risk of loss for any partnership recourse debt equally because they will share any economic burden corresponding to that debt equally. Similarly, in the case of a limited partnership, a limited partner generally will not bear the economic risk of loss for any partnership liability because a limited partner generally has no obligation to contribute additional capital to the partnership. However, if a partner (or a person related to the partner)—whether such partner is a limited partner or a general partner—could be required to make a payment to a creditor or a contribution to the partnership in order to discharge a partnership liability, the partner may be considered to bear the economic risk of loss for such liability.

Thus, the determination of whether a partner bears the economic risk of loss for a partnership liability takes into account the manner in which the partners have agreed to share economic losses relating to the liabilities of the partnership under all the arrangements among the partners, persons related to the partners, and the partnership. For example, even though a partnership creditor may be entitled to seek repayment only from the general partner of a limited partnership, the limited partners, and not the general partner, may bear the economic risk of loss for the liability to the extent that the limited partners are obligated under the partnership agreement or otherwise to discharge the partnership's obligation to the creditor. Also, if the partnership maintains capital accounts for its partners in accordance with §1.704-1(b)(2)(iv) and the partners are obligated to restore any deficit balances in their capital accounts (as set forth in §1.704-1(b)(2)(ii)(*3*)), the manner in which the partners will share the economic risk of loss for any partnership liability will be affected by their capital account balances.

In determining the amount of any obligation of a partner to make a payment to a creditor or a contribution to the partnership with respect to a partnership liability, the temporary regulations reduce the partner's obligation by the amount of any reimbursement that the partner would be entitled to receive from another partner, a person related to another partner, or the partnership. The Service is continuing to study whether a right to be reimbursed for a payment or contribution by an unrelated person (*e.g.*, pursuant to an indemnification agreement from a third party) should be taken into account in the same manner and solicits comment on this issue.

The temporary regulations also include the following special rules regarding the determination of whether a partner bears the economic risk of loss for a partnership liability:

(1) A partner who contributes (or otherwise provides) property to the partnership that is used solely as security for a partnership liability will bear the economic risk of loss for the partnership liability (to the extent of the value of such property).

(2) A partner who does not have a direct obligation to make a payment to a creditor or a contribution to the partnership with respect to a partnership liability may be considered to bear the economic risk of loss for the liability if the partner undertakes other obligations that are tantamount to guaranteeing the obligation.

(3) A partner who (directly or indirectly) guarantees the payment of interest on an otherwise nonrecourse liability will, in certain circumstances, be considered to bear the economic risk of loss for the liability.

In addition, the temporary regulations provide that if a partner (or a person related to the partner) makes a nonrecourse loan to the partnership, such partner shall be considered to bear the economic risk of loss for that liability unless (1) the partner's interest (including the interest of any person related to such partner) in each item of partnership income, gain, loss, deduction, or credit is 10 percent or less, and (2) the loan constitutes qualified nonrecourse financing within the meaning of section 465(b)(6).

The economic risk of loss analysis employed in the temporary regulations generally corresponds to, and further develops, the economic risk of loss analysis employed in the regulations under section 704(b). The coordination of these two sections reflects the fact that one of the principal purposes for including partnership liabilities in the bases of the partners' interests in the partnership is to support the deductions that will be claimed by the partners for the items attributable to those liabilities.

The allocation of partnership liabilities among the partners serves to equalize the partnership's basis in its assets ("inside basis") with the partners' bases in their partnership interests ("outside basis"). The provision of additional basis to a partner for the partner's partnership interest will permit the partner to receive distributions of the proceeds of partnership liabilities without recognizing gain under section 731, and to take deductions attributable to partnership liabilities without limitation under section 704(d) (which limits the losses that a partner may claim to the basis of the partner's interest in the partnership). By equalizing inside and outside basis, section 752 simulates the tax consequences that the partners would realize if they owned undivided interests in the partnership's assets, thereby treating the partnership as an aggregate of its partners. Of course, this goal can only be achieved if the partners that are allocated the deductions attributable to a partnership liability are allocated the basis for that liability.

Accordingly, the coordination of the economic risk of loss analysis employed in sections 704(b) and 752 generally requires that the basis for a partnership liability be allocated to the partner that will be allocated the deductions attributable of that liability. Since the economic risk of loss analysis employed under section 752 applies without regard to whether the partnership satisfies the substantial economic effect safe harbor set forth in §1.704-1(b)(2), the temporary regulations provide additional guidance on the determination of the partners' interests in the partnership under section 704(b). See §1.704-1(b)(3).

Taxpayers should draw no inferences from the economic risk of loss analysis employed by the temporary regulations under section 752 regarding the application of section 465.

Sharing Nonrecourse Liabilities

If no partner bears the economic risk of loss for a partnership liability, the liability is a nonrecourse liability of the partnership. The legislative history of the 1984 Act indicates that Congress did not expect the revisions to the regulations under section 752 to make major changes in the manner in which the partners share nonrecourse liabilities, although the regulations could attempt to provide more certainty than presently exists. H.R. Rep. No. 861, 98th Cong., 2d Sess. 869 (1984).

Under the temporary regulations, as in the existing regulations, the partners generally share nonrecourse liabilities in accordance with their interests in partnership profits. The temporary regulations do, however, require that the nonrecourse liabilities of a partnership be allocated among the partners first to reflect the partners' shares of (1) any partnership minimum gain (within the meaning of §1.704-1T(b)(4)(iv)(*f*)), and (2) any tax gain that would be allocated to the partners under section 704(c) (or in the same manner as under section 704(c) to reflect a revaluation of partnership property under §1.704-1(b)-(2)(iv)(*f*) or (*r*)) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of such liabilities and for no other consideration ("section 704(c) minimum gain"). To the extent that partnership nonrecourse liabilities exceed the portion of such liabilities allocated to the partners in the manner described in the preceding sentence, such excess nonrecourse liabilities are allocated among the partners in accordance with the general rule, that is, in proportion to the partners' interests in partnership profits. For this purpose, the partnership agreement may specify the partners' interests in partnership profits as long as the interests so specified are reasonably consistent with allocations (which have substantial economic effect) of some significant item of partnership income or gain among the partners. In any case in which all items of partnership income, gain, loss, and deduction are allocated equally between the partners, they will share the nonrecourse liabilities of the partnership equally (unless there is section 704(c) minimum gain) because they will share partnership profits and partnership minimum gain equally.

The allocation of nonrecourse liabilities among the partners in accordance with their shares of partnership minimum gain and section 704(c) minimum gain coordinates the treatment of nonrecourse liabilities under section 752 with the treatment of nonrecourse liabilities under the section 704(b) regulations. As in the case of recourse liabilities, this reflects the fact that one of the principal purposes for including partnership liabilities in the bases of the partners' interests in the partnership is to support the deductions that will be claimed by the partners for the items attributable to those liabilities. The modifications made by the temporary regulations to the rules governing the allocation of nonrecourse liabilities have also been designed (1) to reflect more accurately the manner in which the partners will share the partnership income that is used to discharge nonrecourse liabilities, and (2) to provide more certainty regarding the application of section 752 to nonrecourse debt.

AMENDMENTS TO RULES GOVERNING THE ALLOCATION OF DEDUCTIONS ATTRIBUTABLE TO NONRECOURSE DEBT UNDER SECTION 704(b)

This document amends and restates as new temporary regulation §1.704-1T the rules governing the allocation of deductions attributable to nonrecourse debt (the "nonrecourse debt regulations"), and makes certain conforming changes to the existing regulations under section 704(b). The temporary regulation adopts the same definition of nonrecourse liability for purposes of section 704(b) as is included in the temporary regulations under section 752. In so doing, the regulation determines whether a partner bears the economic risk of loss for an otherwise nonrecourse liability in accordance with the temporary regulations under section 752. Among other consequences, the temporary regulation thereby extends the special rules under section 704(b) applicable to nonrecourse loans for which a partner bears the economic risk of loss to nonrecourse loans for which a person related to a partner bears the economic risk of loss.

The temporary regulation also modifies the treatment of partnership minimum gain by requiring that items of income and gain be allocated to the partners at any time there is a net decrease in partnership minimum gain allocable to the disposition of partnership property subject to one or more nonrecourse liabilities of the partnership. In contrast to the rule in the existing regulations, the minimum gain chargeback set forth in the temporary regulation is mandatory — that is, the rule applies whether or not the partnership agreement includes a minimum gain chargeback provision or a deficit restoration obligation. The modifications to the minimum gain chargeback rules are considered necessary to take account of the fact that an allocation of minimum gain (like an allocation of nonrecourse deductions) cannot have economic effect because no partner can receive an economic benefit corresponding to such gain.

In addition, the Service has received comments recommending, among other things, that (1) the partners' shares of partnership minimum gain take into account distributions of proceeds of nonrecourse loans to the extent that such nonrecourse loans have caused an increase in partnership minimum gain, (2) the Service provide additional guidance on the application of the nonrecourse debt regulations to tiered partnerships, and (3) the Service provide additional guidance regarding the rules applicable to nonrecourse loans for which a partner bears the economic risk of loss. The 3amendments made by this document to the nonrecourse debt regulations adopt provisions responding to these comments.

Thus, under the temporary regulation, minimum gain attributable to proceeds of a nonrecourse borrowing that are distributed to the partners is allocated to the partners who received those distributions. With respect to tiered partnerships, the temporary regulation contains rules describing how increases and decreases in the partnership minimum gain of the lower-tier (or subsidiary) partnership will be taken into account in determining the increases and decreases in the partnership minimum gain of the upper-tier (or parent) partnership. These rules generally are designed to produce the same consequences for the upper-tier partnership as would have resulted if it had held a direct interest in the lower-tier partnership's assets and liabilities.

In the case of nonrecourse loans for which a partner bears the economic risk of loss ("partner nonrecourse debts"), the temporary regulation includes a series of rules clarifying the treatment of such loans. In general, any item of loss, deduction, or section 705(a)(2)(B) expenditure that is attributable to a partner nonrecourse debt (as determined under rules similar to those governing nonrecourse deductions) must be allocated to the partner who bears the economic risk of loss for that debt. Correspondingly, any decrease in the minimum gain attributable to a partner nonrecourse debt may require items of income and gain to be allocated to the lending partner in accordance with rules similar to the general nonrecourse liability minimum gain chargeback rules.

The Service is continuing to consider other comments submitted on the nonrecourse debt regulations and solicits comment on the appropriateness of the amendments to those regulations made by this document and the need for additional changes.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. §553 for interpretative regulations. Therefore, these rules do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6) and a Regulatory Flexibility Analysis is not required.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Parts I and 602 are amended as follows:

PART I—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Paragraph 1. The authority for Part 1 continues to read as follows:

Authority: 26 U.S.C. 7805. * * *

Par. 2. Section 1.752-1 is removed.

Par. 3. Sections 1.752-0T, 1.752-1T, 1.752-2T, 1.752-3T, and 1.752-4T are added in the appropriate place to read as follows:

§1.752-0T Table of contents (temporary).

This section lists the captions that appear in the temporary regulations under section 752.

§1.752-1T Treatment of partnership liabilities— General rules (temporary).

(a) *General principles.* Under section 752, a partner's share of the liabilities of the partnership is reflected in the adjusted basis of the partner's interest in the partnership by treating any increase in the partner's share of those liabilities as a contribution of money to the partnership by the partner and any decrease in the partner's share of those liabilities as a distribution of money to the partner by the partnership. Section 752 also treats the assumption of a partnership liability by a partner as a contribution of cash by the partner, and the assumption of a partner's liability by the partnership as a distribution of cash to the partner. This section provides general rules governing the application of section 752, including rules for determining a partner's share of the liabilities of the partnership. See paragraph (g) of this section for the definition of liability. The determination of a partner's share of a partnership liability under the rules of this section depends on whether that liability is a recourse or nonrecourse liability.

(1) *Recourse liabilities.* (i) Under this section, a partnership liability is a

recourse liability to the extent that any partner bears the economic risk of loss for that liability, and a partner's share of any recourse liability of the partnership equals the portion, if any, of the economic risk of loss for such liability that is borne by such partner. See paragraph (d)(1) and (2) of this section for rules relating to recourse liabilities of a partnership and paragraph (d)(3) of this section for the meaning of economic risk of loss.

(ii) Generally, a partner bears the economic risk of loss for a partnership liability to the extent that the partner (or person related to the partner) would be obligated to make a payment to the creditor or a contribution to the partnership with respect to a partnership liability (and would not be entitled to be reimbursed for such contribution or payment by another partner, a person related to another partner, or the partnership) if all of the partnership's liabilities were due and payable in full, all of the partnership's assets (including money) were worthless, the partnership disposed of all of its assets in a fully taxable transaction for no consideration (other than relief from certain liabilities), and the partnership allocated its items of income, gain, loss, deduction, and credit for the year among the partners and liquidated the partners' interests in the partnership. See paragraph (d)(3)(iii) of this section (relating to the meaning of the term "constructive liquidation") for the events that are deemed to occur for purposes of determining whether a partner bears the economic risk of loss for a partnership liability, paragraph (d)(3)-(iv), (v), (vi), and (vii) for special rules relating to the definition of economic risk of loss, and paragraph (h) of this section for the definition of related person.

(iii) Under this approach, a partner bears the economic risk of loss for a partnership liability to the extent that the partner (or a person related to the partner) would bear the economic burden of discharging the obligation represented by that liability if the partnership were unable to do so. For example, equal partners in a general partnership will share the economic risk of loss for any partnership recourse debt equally because they will share any economic burden corresponding to that debt equally. Similarly, in the case of a limited partnership, a limited partner generally will not bear the economic risk of loss for any partnership liability because a limited partner generally has no obligation to contribute additional capital to the partnership. However, if a partner (or a person related to the partner)—whether such partner is a limited partner or a general partner—could be required to make a contribution to the partnership or a payment to the creditor in order to discharge a partnership liability (or to reimburse another partner (or a person related to another partner) for any such contribution or payment), the partner may be considered to bear the economic risk of loss for such liability under paragraph (d)(3) of this section. Thus, the determination of whether a partner bears the economic risk of loss for a partnership liability takes into account the manner in which the partners have agreed to share economic losses relating to the liabilities of the partnership under all the arrangements among the partners, persons related to the partners, and the partnership. For example, even though a partnership creditor may be entitled to seek repayment only from the general partner of a limited partnership, the limited partners, and not the general partner, may bear the economic risk of loss for the liability to the extent that the limited partners are obligated under the partnership agreement or otherwise to discharge the partnership's obligation to the creditor. Also, if the partnership maintains capital accounts for its partners in accordance with §1.704-1(b)(2)(iv) and the partners are obligated to restore any deficit balances in their capital accounts (as set forth in §1.704-1(b)(2)(ii)(*3*)) , the manner in which the partners will share the economic risk of loss for any partnership liability will be affected by their capital account balances.

(iv) The economic risk of loss analysis employed in this section generally corresponds to, and further develops, the economic risk of loss analysis employed in the regulations under section 704(b). The coordination of these two sections reflects the fact that one of the principal purposes for including partnership liabilities in the bases of the partners' interests in the partnership is to support the deductions that will be claimed by the partners for the items attributable to those liabilities.

(2) *Nonrecourse liabilities.* (i) If no partner bears the economic risk of loss for a partnership liability, the liability is a nonrecourse liability of the partnership. See paragraph (e) of this section for rules relating to nonrecourse liabilities of a partnership. Under this section, the partners generally share nonrecourse liabilities in accordance with their interests in partnership profits. This section does, however, require that the nonrecourse liabilities of a partnership be allocated among the partners first to reflect the partners' shares of any partnership minimum gain (within the meaning of §1.704-1T(b)(4)(iv)(*f*)) and any tax gain that would be allocated to the partners under section 704(c) (or in the same manner as under section 704(c) to reflect a revaluation of partnership property under §1.704-1(b)(2)(iv)(*f*) or (*r*)) if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of such liabilities and for no other consideration ("section 704(c) minimum gain"). To the extent that partnership nonrecourse liabilities exceed the portion of such liabilities allocated to the partners in the manner described in the preceding sentence, such excess nonrecourse liabilities are allocated among the partners in accordance with the general rule, that is, in proportion to the partners' interests in partnership profits. For this purpose, the partnership agreement may specify the partners' interests in partnership profits as long as the interests so specified are reasonably consistent with allocations (which have substantial economic effect) of some significant item of partnership income or gain among the partners. In any case in which all items of partnership income, gain, loss, and deduction are allocated equally among the partners, they will share the nonrecourse liabilities of the partnership equally (unless there is section 704(c) minimum gain) because they will share partnership profits and partnership minimum gain equally.

(ii) The allocation of nonrecourse liabilities among the partners in accordance with their shares of partnership minimum gain and section 704(c) minimum gain coordinates the treatment of nonrecourse liabilities under this section with the treatment of nonrecourse liabilities under the section 704(b) regulations. As in the case of recourse liabilities, this reflects the fact that one of the principal purposes for including partnership liabilities in the bases of the partners' interests in the partnership is to support the deductions that will be claimed by the partners for the items attributable to those liabilities.

(iii) The following example illustrates the application of the rules of this section to nonrecourse liabilities:

Example. The AB partnership purchases depreciable property for a $1,000 nonrecourse purchase money note that is a nonrecourse liability under the rules of this section. Assume that this is the only nonrecourse liability of the partnership, and that no principal payments are due on the purchase money note for a year. The partnership agreement allocates all depreciation deductions for such property to A. In addition, the partnership agreement provides that, for purposes of allocating the nonrecourse liability between the partners under the rules of this section, the partners' interests in partnership profits shall equal 50 percent each, which is reasonably consistent with allocations (which have substantial economic effect) of some significant item of partnership income and gain. Immediately after purchasing the depreciable property, the partners share the nonrecourse liability equally because they are treated as though they have equal interests in partnership profits. Under paragraph (b) of this section, A and B are each treated as if they contributed $500 to the partnership to reflect each partner's increase in his or her share of partnership liabilities (from $0 to $500). The minimum gain with respect to an item of partnership property subject to a nonrecourse liability equals the amount of gain that would be recognized if the partnership disposed of the property in full satisfaction of the nonrecourse liability and for no other consideration. Therefore, if the partnership claims a depreciation deduction of $200 for the depreciable property in the year it acquires that property, partnership minimum gain for the year will increase by $200 (the excess of the $1,000 nonrecourse liability over the $800 adjusted tax basis of the property). See §1.704-1T(b)(4)(iv)(*c*). Assuming that the allocation of all of the $200 depreciation deduction to A is valid under section 704(b), A will have a $200 share of partnership minimum gain at the end of that year because the depreciation deduction is treated as a nonrecourse deduction. See §1.704-1T(b)(4)(iv)(*b*) and (*f*). Accordingly, at the end of that year, A will be allocated $200 of the nonrecourse liability to match A's share of partnership minimum gain and the remaining $800 of the nonrecourse liability will be allocated equally between A and B ($400 each). As a result, A's share of partnership liabilities increases by $100 (from $500 to $600) and B's share of partnership liabilities decreases by $100 (from $500 to $400). Consequently, A is treated under paragraph (b) of this section as if A contributed an additional $100 to the partnership, and B is treated under paragraph (c) of this section as if B received a distribution of $100 from the partnership.

(b) *Increase in partner's share of liabilities.* Any increase in a partner's share of the liabilities of the partnership, or any increase in a partner's individual liabilities by reason of the partner's assumption of liabilities of the partnership, shall be treated as a contribution of money by that partner to the partnership. See example (1) of paragraph (k) of this section.

(c) *Decrease in partner's share of liabilities.* Any decrease in a partner's share of the liabilities of the partnership, or any decrease in a partner's individual liabilities by reason of the assumption by the partnership of the individual liabilities of such partner, shall be treated as a distribution of money by the partnership to that partner. See example (1) of paragraph (k) of this section.

(d) *Partner's share of recourse liabilities*—(1) *In general.* A partner's share of the recourse liabilities of the partnership equals that portion of the recourse liabilities of the partnership for which such partner bears the economic risk of loss (within the meaning of paragraph (d)(3) of this section).

(2) *Recourse liability defined.* For purposes of this section, a partnership liability is a recourse liability of the partnership to the extent, but only to the extent, that one or more partners bear the economic risk of loss (within the meaning of paragraph (d)(3) of this section) for such liability.

(3) *Economic risk of loss*—(i) *In general.* Except as otherwise provided in this paragraph (d)(3), a partner bears the economic risk of loss for a liability of the partnership at any time to the extent, but only to the extent, that either—

(A) The partner would be obligated to make—

(*1*) A net payment to a creditor or other person with respect to such liability; or

(*2*) A net contribution to the partnership with respect to such liability;

if the partnership constructively liquidated (within the meaning of (paragraph (d)(3)(iii) of this section) at that time; or

(B) The partner (or a person related to such partner) is the creditor with respect to such liability (*i.e.*, the liability represents a debt owed to such partner or related person) and, but for this paragraph (d)(3)(i)(B), such liability would be a nonrecourse liability of the partnership (within the meaning of paragraph (e)(2) of this section).

See examples (3) through (18) of paragraph (k) of this section. See paragraph (d)(3)(ii) of this section for rules regarding the determination of a partner's obligation to make a net payment to a creditor or other person or a net contribution to the partnership with respect to a partnership liability. For purposes of subdivision (B) of this paragraph (d)(3)(i), if a liability of the partnership that is owed to a partner or a person related to a partner includes or reflects an obligation owed to another person to which property owned by the partnership is subject (generally known as a "wrapped indebtedness"), then such other person, and not such partner or related person, shall be treated as the person to whom the portion of the partnership liability corresponding to the wrapped indebtedness is owed. See example (19) of paragraph (k) of this section. If the aggregate amount of the economic risk of loss that all partners are determined to bear with respect to a partnership liability (or portion thereof) under the first sentence of this paragraph (d)(3)(i) exceeds the amount of such liability (or portion thereof), then the economic risk of loss borne by each partner with respect to such liability shall equal the amount determined by multiplying the amount of such liability (or portion thereof) by the fraction obtained by dividing the amount of the economic risk of loss that such partner is determined to bear with respect to that liability (or portion thereof) under the first sentence of this paragraph (d)(3)(i) by the sum of such amounts for all partners. See example (9)(iv) of paragraph (k) of this section.

(ii) *Obligation to make payment or contribution in connection with constructive liquidation*—(A) *Obligation to make net payment to creditor or other person with respect to partnership liability*—(1) *In general.* Except as otherwise provided in this paragraph (d)(3)-(ii), the net payment that a partner would be obligated to make to a creditor or other person with respect to a partnership liability if the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section) equals the excess (if any) of—

(*i*) The sum of the payments that such partner and any persons related to such partner would be obligated to make to a creditor or other person with respect to such liability at the time of such liquidation; over

(*ii*) The amount of any reimbursements (within the meaning of paragraph (d)(3)(ii)(C) of this section) that such partner and any persons related to such partner would be entitled to receive with respect to any such payments.

See examples (4), (9)(iii) , (11), (12)(ii) and (iii) , (14), (17), and (18)(ii) of paragraph (k) of this section.

(2) *Obligation to make payment*—(*i*) *In general.* For purposes of this paragraph (d)(3), a partner, a person related to a partner, or the partnership has an obligation to make a payment to a creditor or other person with respect to a partnership liability at any time to the extent, but only to the extent, that the partnership, such partner, or such related person is obligated (whether by agreement or operation of law) at such time to make—

(*A*) A payment to the creditor in full or partial satisfaction of such liability; or

(*B*) A payment to another partner, a person related to another partner, or the partnership with respect to any payment made by any such other person pursuant to an obligation of such other person to make a payment described in subdivision (*A*) or (*B*) of this paragraph (d)(3)(ii)(A)(*2*)(*i*).

Any obligation of a partner that constitutes an obligation to make a contribution to the partnership (within the meaning of paragraph (d)(3)(ii)(B)(*2*) of this section) shall not be treated as an obligation to make a payment to a creditor or other person with respect to a partnership liability. See paragraph (d)(3)(ii)(E) of this section for rules regarding the time in which an obligation to make a payment to a creditor or other person must be satisfied.

(*ii*) *Providing money or other property for use as security for partnership liability.* For purposes of this paragraph (d)(3), if—

(*A*) A partner contributes or otherwise provides money or other property (other than a promissory note of which such partner is the maker that is not readily tradeable on an established securities market) to the partnership; and

(*B*) Such money or other property is used in the partnership's activities solely to secure the payment of a partnership liability;

then the partnership's obligation to use such money or other property to discharge such liability shall be treated as an obligation of such partner to make a payment to a creditor or other person with respect to that liability. For purposes of the preceding sentence, money or other property contributed to the partnership that is described in subdivision (*A*) of this paragraph (d)(3)(ii)(A)(*2*)(*ii*) and that is used to secure the payment of a partnership liability is presumed to be used in the partnership's activities solely to secure the payment of a partnership liability if substantially all of the items of income, gain, loss, and deduction attributable to such money or other property are allocated to the contributing partner and the portion of such items allocated to the contributing partner is greater than such partner's share of any other significant item of partnership income, gain, loss, or deduction. In addition, if a partner contributes or otherwise provides money or other property to the partnership and the partnership uses such money or other property to acquire other property that is used solely in the partnership's activities to secure the payment of a partnership liability, such other property shall be treated as property contributed or otherwise provided to the partnership by such partner for purposes of this paragraph (d)(3)(ii)(A)(*2*)(*ii*). For example, if a partner with a 50 percent interest in partnership income, gain, loss, and deduction contributes money to the partnership, such money is used to purchase government securities that are pledged to secure the payment of a partnership liability, and such partner is allocated 99 percent of the income from such securities, then the partnership's obligation to use the securities to discharge a partnership liability is treated as an obligation of such partner to make a payment to a creditor or other person with respect to that liability. See example (12)(ii) of paragraph (k) of this section.

(B) *Obligation to make net contribution with respect to partnership liability*—(*1*) *In general.* Except as otherwise provided in this paragraph (d)(3)(ii), the net contribution that a partner would be obligated to make to the partnership with respect to a partnership liability if the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section) equals the amount determined by multiplying the net contribution that such partner would be obligated to make to the partnership at the time of such liquidation (within the meaning of paragraph (d)(3)(ii)(B)(*3*) of this section) by the fraction obtained by dividing—

(*i*) The outstanding partnership indebtedness (within the meaning of paragraph (d)(3)(ii)(B)(*4*) of this section) with respect to that liability at the time of such liquidation; by

(*ii*) The sum of the net contributions that all partners would be obligated to make to the partnership at the time of such liquidation.

See examples (6), (7), (8), (9)(ii) and (iii), (10)(ii), (12)(iv), (13)(ii) and (iii), and (15)(iv) of paragraph (k) of this section.

(*2*) *Obligation to contribute.* Except as otherwise provided in this paragraph (d)(3), a partner has an obligation to make a contribution to the partnership at any time to the extent, but only to the extent, of the sum of—

(*i*) The outstanding principal balance of any promissory note of which such partner is the maker that is owned by the partnership and was contributed to the partnership by such partner (other than a promissory note that is readily tradeable on an established securities market at the time of contribution);

(*ii*) The amount of any obligation of such partner that arises under the partnership agreeme or by operation of law to make subsequent contributions of money or other property to the partnership (other than pursuant to a promissory note of which such partner is the maker); and

(*iii*) The amount of any obligation of such partner or a person related to such partner to reimburse any partner for a contribution to the partnership that is described in this paragraph (d)(3)(ii)(B)(*2*).

For purposes of this paragraph (d)(3)(ii), if a partner contributes a promissory note to the partnership during a partnership taxable year beginning after December 29, 1988 and the maker of such note is a person related to such partner (within the meaning of paragraph (h) of this section, but without regard to subdivision (4) of that paragraph), then such promissory note shall be treated as a promissory note of which such partner is the maker. See paragraph (d)(3)(ii)(E) of this section for rules regarding the time in which an obligation to make a contribution to the partnership must be satisfied.

(*3*) *Net contribution defined.* For purposes of paragraph (d)(3)(ii)(B)(*1*) of this section, the net contribution that a partner would be obligated to make to the partnership at the time of a constructive liquidation of the partnership equals the aggregate amount of the contributions that such partner would be obligated to make to the partnership if the partnership constructively liquidated at that time, reduced by the aggregate amount of the reimbursements (within the meaning of paragraph (d)(3)(ii)(C) of this section) that such partner or a person related to such partner would be entitled to receive with respect to such contributions. See examples (3)(iii), (5), (6)(iii), (7), and (9)(iii) of paragraph (k) of this section.

(*4*) *Outstanding partnership indebtedness with respect to partnership liability*—(*i*) *In general.* For purposes of paragraph (d)(3)(ii)(B)(*1*) of this section, the outstanding partnership indebtedness with respect to a partnership liability equals the amount of such liability reduced by the sum of—

(*A*) The portion, if any, of such liability that constitutes a liability for which the creditor's right to repayment from the partnership is limited to one or more assets of the partnership (within the meaning of subdivision (*ii*) of this paragraph (d)(3)(ii)(B)(*4*)); and

(*B*) The excess of the sum of the amounts, if any, that are treated under paragraph (d)(3)(ii)(A)(*2*)(*ii*) of this section as obligations of the partners to make payments to a creditor or other person with respect to such liability, over any reimbursements that such partners would be entitled to receive (directly or indirectly) from the partnership with respect to payments made pursuant to those obligations.

The amount described in subdivision (*B*) of this paragraph (d)(3)(ii)(B)(*4*)(*i*) shall not include any amount attributable to any portion of a liability that is described in subdivision (*A*) of this paragraph (d)(3)(ii)(B)(*4*)(*i*). See examples (9)(iii), (12)(iv), and 13(iii) of paragraph (k) of this section.

(*ii*) *Liability for which creditor's right to repayment is limited.* A partnership liability is a liability with respect to which the creditor's right to repayment is limited to one or more assets of the partnership to the extent, but only to the extent, that the outstanding balance of such liabilty exceeds the aggregate amount that the partners would be obligated to contribute to the partnership to discharge that liability if—

(*A*) The partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section, except that subdivision (A) of that paragraph shall be applied as if all of the partnership's assets (including any money or other property that is described in paragraph (d)(3)(ii)(A)-(*2*)(*ii*) of this section) were worthless); and

(*B*) The partners did not discharge their obligations, if any, to make payments to a creditor or other person with respect to such liability (within the meaning of paragraph (d)(3)(ii)-(A)(*2*) of this section).

See example (3)(ii) of paragraph (k) of this section. For example, if an entity that is treated as a partnership for federal income tax purposes is organized and operated under a local law which provides that none of the members of that entity is liable for its debts and other obligations, then all the liabilities of that entity will generally constitute liabilities for which the creditor's right to repayment is limited to one or more assets of the partnership because the members of that entity are not required to make contributions to the entity to discharge its liabilities.

(*C*) *Reimbursement.* Except as otherwise provided in this paragraph (d)(3)-(ii), if a partner or a person related to a partner is obligated to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership, such partner or related person is entitled to be reimbursed for any payment or contribution made pursuant to such obligation to the extent, but only to the extent, that—

(*1*) Another partner, a person related to another partner, or the partnership would be obligated to make a payment to such partner or related person in the event that such partner or related person makes a payment or contribution pursuant to such obligation; and

(*2*) The reimbursing payment that such other person would be obligated to make is recognized under this paragraph (d)(3)(ii) as an obligation to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership (or in the case of an obligation of the partnership to reimburse a partner for a contribution to the partnership, such obligation would be recognized as an obligation to make a contribution to the partnership if the partnership were a partner).

See examples (4), (7), (11), and (15)(iv) of paragraph (k) of this section.

(D) *Obligations recognized for purposes of this paragraph (d)(3)—(1) In general.* For purposes of this paragraph (d)(3)(ii)—

(*i*) A partner, person related to a partner, or the partnership has an obligation to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership to the extent that any person has a legally enforceable right to require such partner, related person, or partnership to make such payment or contribution;

(*ii*) The determination of whether a partner, person related to a partner, or the partnership would have an obligation to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership if the partnership constructively liquidated shall be based on all the facts and circumstances at the time of such determination; and

(*iii*) Any obligation to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership that would arise if the partnership constructively liquidated (within the meaning of paragraph (d)(3)-(iii) of this section) shall be recognized only to the extent that the existence and amount of such obligation would be determinable with reasonable certainty and such obligation would not otherwise be subject to contingencies that would make it unlikely that the obligation would ever be discharged.

(*2*) *Deemed satisfaction.* Except to the extent that an obligation is not recognized under this paragraph (d)(3)(ii), the rules of this paragraph (d)(3)(ii) shall be applied by assuming that any partner, person related to a partner, or partnership that would be obligated to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership if the partnership constructively liquidated actually discharges such obligation at the time of the constructive liquidation. See examples (6)(iii), (10)(iii) , (11), and (15)(iii) of paragraph (k) of this section. Thus, for example, a partner is generally assumed to discharge an obligation to make a contribution to the partnership even if such partner's net worth is less than the amount of the obligation. To the extent that the obligation of a partner to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership is not recognized under this paragraph (d)(3)(ii), this paragraph (d)(3)(ii) shall be applied as if such obligation did not exist. See example (11)(ii) and (15)(iv) of paragraph (k) of this section.

(*3*) *Exception where plan to circumvent or avoid obligation exists.* An obligation of a partner to make a net payment to a creditor or other person or a net contribution to the partnership with respect to a partnership liability shall not be recognized for purposes of this section to the extent that the facts and circumstances indicate a plan to circumvent or avoid such obligation. See examples (7), (9)(iv) and (v), and (11) of paragraph (k) of this section.

(E) *Time of satisfaction—(1) In general.* Except as otherwise provided in paragraph (d)(3)(ii)(E)(*2*) of this section—

(*i*) An obligation to make a payment to a creditor or other person with respect to a partnership liability shall be recognized for purposes of applying this paragraph (d)(3)(ii) only to the extent that such obligation is required to be satisfied within a reasonable period of time after such partnership liability becomes due and payable; and (*ii*) An obligation to make a contribution to the partnership shall be recognized for purposes of this paragraph (d)(3)(ii) only to the extent that such obligation must be satisfied by the later of—

(*A*) The end of the partnership taxable year in which the partner's interest in the partnership is liquidated; or

(*B*) 90 days after the date of such liquidation.

(*2*) *Obligations that are not required to be satisfied within prescribed time period*—(*i*) *In general.* Any obligation of a partner, a person related to a partner, or the partnership to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership that does not meet the requirements of paragraph (d)(3)(ii)(E)-(*1*) of this section shall be recognized under this paragraph (d)(3)(ii) for purposes of determining the consequences of a constructive liquidation of the partnership (within the meaning of paragraph (d)(3)(iii) of this section) only to the extent of the value that such obligation would have if the partnership constructively liquidated at the time of such determination.

(*ii*) *Value of obligation.* For purposes of subdivision (*i*) of this paragraph (d)(3)(ii)(E)(*2*), the value of an obligation equals—

(*A*) The outstanding principal balance of such obligation if such obligation bears interest for the period commencing on the date that the partnership liability to which such obligation relates is due and payable (in the case of an obligation that does not meet the requirements of paragraph (d)(3)(ii)(E)(*1*)(*i*) of this section) or the date of the liquidation of the partner's interest in the partnership (in the case of an obligation that does not meet the requirements of paragraph (d)(3)(ii)(E)(*1*)(*ii*) of this section) and ending on the date that the obligation is satisfied, and the rate of interest that such obligation bears (appropriately adjusted for the period of compounding) is equal to or greater than the applicable Federal rate (within the meaning of section 1274(d)) at the time of valuation; or

(*B*) If subdivision (*A*) of this paragraph (d)(3)(ii)(E)(*2*)(*ii*) does not apply to such obligation, the imputed principal amount that such obligation would have under section 1274(b) if the partnership constructively liquidated at the time of valuation.

For purposes of the preceding sentence, the imputed principal amount of an obligation is determined by treating such obligation as a debt instrument to which section 1274 applies (without regard to section 1274(b)(3) and section 1274A) and by assuming for purposes of applying section 1274 that the sale or exchange of property in which such debt instrument was given as consideration occurred at the time of valuation. See examples (13)(ii) and (iii) and (15)(iii) of paragraph (k) of this section.

(*3*) *Liquidation of partner's interest*—(*i*) *In general.* For purposes of this paragraph (d)(3)(ii)(E), the liquidation of a partner's interest in the partnership occurs on the earlier of—

(*A*) The date on which the partnership is liquidated; or

(*B*) The date on which the partner's interest in the partnership is liquidated under §1.761-1(d).

(*ii*) *Delayed liquidations.* If— (*A*) A partner's interest in the partnership is not liquidated after the partnership's primary business activities have been discontinued; and

(*B*) The principal purpose for delaying the liquidation of such partner's interest in the partnership is to delay the time at which the partner will be required to satisfy an obligation to make a contribution to the partnership;

any obligation of such partner to make a contribution to the partnership shall be considered to fail the requirements of subdivision (*1*) of this paragraph (d)(3)-(ii)(E) and shall be recognized under this paragraph (d)(3)(ii) only to the extent of its value as determined in accordance with subdivision (*2*) of this paragraph (d)(3)(ii)(E).

(*iii*) *Partnership liquidation defined.* For purposes of this paragraph (d)(3)(ii)-(E), the liquidation of a partnership occurs on the earlier of (*A*) the date on which the partnership terminates under section 708(b)(1)(A) or (*B*) the date on which the partnership ceases to be a going concern even though the partnership may continue in existence for the purpose of winding up its affairs, paying its debts, and distributing any remaining assets to its partners.

(*4*) *Satisfaction of obligation with promissory note.* For purposes of this paragraph (d)(3)(ii)(E), an obligation is not satisfied by the transfer to the obligee of a promissory note (other than a note that is readily tradeable on an established securities market) of which the obligor (or a person related to the obligor) is the maker.

(*5*) *Obligations imposed by law.* Any obligation imposed on a partner or a person related to a partner by state or local law is deemed to satisfy the requirements of subdivision (*1*) of this paragraph (d)(3)(ii)(E). For example, if a partner would be obligated under state law to make a net contribution to the partnership with respect to a partnership liability if the partnership constructively liquidated, such partner is deemed to be obligated to satisfy such obligation within the time period set forth in subdivision (*1*) of this paragraph (d)(3)-(ii)(E).

(*F*) *Obligations limited to value of property*—(*1*) *In general.* If the obligation of a partner or a person related to a partner to make a payment to a creditor or other person with respect to a partnership liability or the obligation of a partner to make a contribution to the partnership is limited to the fair market value of any property, then the amount of such obligation is determined, for purposes of this paragraph (d)(3)(ii), on the basis of the fair market value of such property as of—

(*i*) The time that the amount of such obligation is determined for purposes of this paragraph (d)(3)(ii) if the fair market value of such property is readily ascertainable (*e.g.*, marketable securities) or such property is property of a type that by its terms increases or decreases in value (*e.g.*, a debt instrument on which principal payments are made during its term); or

(*ii*) If the property is not described in subdivision (*i*) of this paragraph (d)(3)(ii)(F)(*1*), the latest of the time that the liability is incurred, the time that the liability is assumed, or the time of the most recent valuation of such property that is made in connection with such liability.

For example, if a partner pledges marketable securities to a partnership creditor to guarantee the payment of a partnership liability and the partner does not assume any personal liability under the guarantee, then the amount that the partner is considered obligated to pay the creditor for purposes of determining the manner in which the partners share the economic risk of loss for the liability equals the fair market value of the marketable securities at the time of any such determination. Alternatively, if the partner had given the creditor a lien on real property, the amount of the obligation would equal the fair market value of such property as of the latest of the time the liability is incurred, the guarantee is made, or the most recent valuation of such property made in connection with the guarantee (*e.g.*, to assure the creditor that the property continues to represent adequate security for the partnership liability).

(*2*) *Partnership interests.* For purposes of this paragraph (d)(3)(ii), in the case of any obligation to make a payment to a creditor or other person with respect to a partnership liability or a contribution to the partnership, any interest in such partnership shall be deemed to have a fair market value of zero. For example, if a partner pledges such partner's interest in the partnership to a partnership creditor to guarantee the payment of a partnership liability and the partner does not assume any personal liability under the guarantee, the partner is not considered to have any obligation to make a payment to the creditor under the guarantee for purposes of this paragraph (d)(3)(ii) because the partnership interest is deemed to have a fair market value of zero.

(*3*) *Promissory notes.* For purposes of applying this paragraph (d)(3)(ii)(F) to a partner or a person related to a partner, the term "property" does not include a promissory note (other than a note that is readily tradeable on an established securities market) of which such partner or such related person is the maker.

(G) *Meaning of certain terms.* For purposes of this section, the term "creditor" means the person to whom any liability is owed, and the term "partnership agreement" has the meaning set forth in §1.761-1(c).

(iii) *Constructive liquidation*—(A) *In general.* For purposes of this section, if a partnership is deemed to constructively liquidate, the following events are deemed to occur—

(*1*) All of the assets of the partnership (other than property that is described in paragraph (d)(3)(ii)(A)-(*2*)(*ii*) of this section) become worthless;

(*2*) All of the liabilities of the partnership (including any wrapped indebtedness described in paragraph (d)(3)(i) of this section) become due and payable in full because of the partnership's failure to make the payments required with respect to such liabilities;

(*3*) The partnership (*i*) transfers in a fully taxable exchange any property described in paragraph (d)(3)(ii)(A)-(*2*)(*ii*) of this section to the owner of any liability to which such property is subject in full or partial satisfaction of such liability and (*ii*) disposes of all of its remaining assets in a fully taxable exchange (involving the transfer of any partnership asset subject to a liability to the owner of that liability) for no consideration (other than relief from any liability for which the creditor's right to repayment is limited to one or more assets of the partnership (within the meaning of paragraph (d)(3)(ii)(B)(*4*)(*ii*) of this section), after taking into account the reduction in any such liability that would result from any transfer described in subdivision (*i*) of this paragraph (d)(3)(iii)-(A)(*3*)); and

(*4*) The partnership allocates its items of income, gain, loss, deduction, and credit for the partnership taxable year ending on the date of the liquidation among the partners in accordance with the partnership agreement and liquidates the partners' interests in the partnership.

See examples (3)(iii), (5)(ii), (12)(ii), (13)(ii), (16)(ii), (17)(ii), and (18) (ii) of paragraph (k) of this section. For purposes of determining the amount of any liability that is deemed satisfied in connection with any constructive liquidation as a result of a transfer of property that is described in paragraph (d)(3)(iii)(A)(*3*)(*i*) of this section, such property shall be considered to have a value equal to the amount of the obligation to make a payment to a creditor or other person that arises under paragraph (d)(3)(ii)(A)(*2*)(*ii*) of this section with respect to such property, provided that such obligation shall be taken into account only to the extent that it is recognized for purposes of applying paragraph (d)(3)(ii) of this section to such constructive liquidation.

(B) *Partnership assets.* For purposes of this paragraph (d)(3)(iii), the assets of the partnership include all of the money and other property (including contractual rights such as insurance policies) owned by the partnership other than (*1*) the obligation of any partner or person related to any partner to make a contribution to the partnership (within the meaning of paragraph (d)(3)(ii)(B)(*2*) of this section), and (*2*) the obligation of any partner or person related to any partner to make a payment described in paragraph (d)(3)-(ii)(A)(*2*)(*i*) of this section to the partnership.

(iv) *Arrangements tantamount to a guarantee.* If one or more partners or persons related to such partners—

(A) Undertake one or more contractual obligations in order to acquire a loan;

(B) Such obligations eliminate substantially all of the risk to the creditor that the partnership will not satisfy its obligations under that loan (assuming that such partners or related persons satisfy their obligations); and

(C) One of the principal purposes of the arrangement is to permit partners other than such partners to include a portion of such liability in the basis of their partnership interests;

then such partners shall be considered to bear the economic risk of loss with respect to such liability in a manner that reflects their relative economic burdens with respect to that liability pursuant to such contractual obligations and no other partner shall be considered to bear the economic risk of loss with respect to such liability. See example (20) of paragraph (k) of this section.

(v) *Nonrecourse debt with respect to which a partner has assumed an obligation to pay interest*—(A) *In general.* For purposes of this section, if one or more partners (or persons related to such partners) would be obligated (whether pursuant to the partnership agreement, by operation of law, or otherwise) to pay more than 20 percent of the total interest that will accrue on any nonrecourse liability of the partnership during the term of such liability (or if the liability has an indefinite term,, the expected term of such liability) if the partnership fails to pay such interest, then each such partner's economic risk of loss for such liability shall be increased by an amount equal to the sum of the present values of the remaining interest payments that such partner (or any person related to such partner) would be obligated to make if the partnership fails to make those payments (taking into account any payment that such partner or related person may be required to make pursuant to that obligation only to the extent that such partner or related person would not be entitled to be reimbursed (within the meaning of paragraph (d)(3)(ii)(C) of this section) for such payment). See example (21) of paragraph (k) of this section. An obligation of a partner to pay any portion of the interest that will accrue on a nonrecourse liability of the partnership shall not be treated as an obligation to pay such interest for purposes of this paragraph (d)(3)(v) unless it is reasonable to expect, based on all the facts and circumstances, that the partner would be required to pay substantially all of the interest subject to that obligation if the partnership failed to pay such interest. For example, if a partner guarantees the payment of all of the interest due on an otherwise nonrecourse liability but the lender can only enforce that guarantee by first foreclosing on the property subject to such liability, it generally will not be reasonable to expect that the partner would be required to pay substantially all of the interest subject to that guarantee if the partnership failed to pay such interest unless substantially all of the interest due on such liability is payable at the end of the term of the liability (*e.g.*, a liability on which no payments of principal or interest are due until maturity). A partnership liability is a nonrecourse liability of the partnership for purposes of this paragraph (d)(3)(v) only to the extent that such liability would, but for this paragraph (d)(3)(v), be a nonrecourse liability (within the meaning of paragraph (e) of this section) of the partnership.

(B) *Present value.* For purposes of this paragraph (d)(3)(v), the present value of any interest payment with respect to a partnership liability is determined by assuming that such payment will be made when due and by using a discount rate equal to—

(*1*) The rate at which such interest payment accrues on the liability; or

(*2*) The applicable Federal rate, compounded semiannually, if the liability is (*A*) a debt instrument to which section 483 applies and there is total unstated interest on such debt instrument, or (*B*) a debt instrument to which section 1274 applies and the issue price of such debt instrument is equal to the imputed principal amount of such debt instrument.

(vi) *Tiered partnerships.* For purposes of this section, if a partnership (the "upper-tier partnership") owns (directly or indirectly through one or more partnerships) an interest in another partnership (the "subsidiary partnership"), the upper-tier partnership bears the economic risk of loss for any liability of the subsidiary partnership to the extent of the sum of—

(A) The economic risk of loss (within the meaning of this paragraph (d)(3), but without regard to this subdivision (vi) of that paragraph) that the upper-tier partnership bears with respect to such liability; and

(B) The amount of the economic risk of loss (within the meaning of this paragraph (d)(3)) that the upper-tier partnership's partners would bear for any portion of such liability with respect to which the upper-tier partnership does not otherwise bear the economic risk of loss if the subsidiary partnership's liabilities constituted liabilities of the upper-tier partnership.

(vii) *De minimis rule.* If a partner would, but for this paragraph (d)(3)(vii), bear the economic risk of loss under paragraph (d)(3)(i)(B) of this section for a partnership liability for a loan from such partner or a person related to such partner, then such partner shall not be considered to bear the economic risk of loss for that liability if—

(A) The partner's interest (including the interest of any person related to such partner) in each item of partnership income, gain, loss, deduction, or credit is 10 percent or less; and

(B) Such loan constitutes qualified nonrecourse financing within the meaning of section 465(b)(6).

(e) *Partner's share of nonrecourse liabilities*—(1) *In general.* A partner's share of the nonrecourse liabilities of a partnership shall equal the sum of—

(i) The partner's share of partnership minimum gain (within the meaning of paragraph (e)(3)(i) of this section);

(ii) The amount of any taxable gain that would be allocated to the partner under section 704(c), or in the same manner as under section 704(c) in connection with a revaluation of partnership property pursuant to §1.704-1(b)(2)(iv)(*f*) or (*r*) (see §1.704-1(b)-(2)(iv)(*f*)(*4*), 1.704-1(b)(4)(i)), if the partnership disposed of (in a taxable transaction) all partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of such liabilities and for no other consideration; and

(iii) The partner's proportionate share of the excess nonrecourse liabilities of the partnership (within the meaning of paragraph (e)(3)(ii) of this section).

See examples (13)(iv), (16)(ii), (17)(iii), (19)(ii), (22) and (23) of paragraph (k) of this section. For purposes of subdivision (ii) of this paragraph (e)(1), the amount of taxable gain that would be recognized by the partnership if it disposed of an item of partnership property subject to one or more nonrecourse liabilities of the partnership in full satisfaction of such liabilities shall be computed by taking into account only the portion of the adjusted tax basis of such property that is allocated to nonrecourse liabilities of the partnership under the principles of §1.704-1T(b)(4)(iv)(*c*)(*1*) and (*2*).

(2) *Nonrecourse liability defined.* For purposes of this section, a liability of a partnership is a nonrecourse liability of the partnership to the extent, but only to the extent, that no partner bears the economic risk of loss (within the meaning of paragraph (d)(3) of this section) for such liability.

(3) *Meaning of certain terms*—(i) *Partner's share of partnership minimum gain.* A partner's share of partnership minimum gain shall be determined in accordance with the rules of §1.704-1T-(b)(4)(iv)(*f*), except that at any time it is necessary to determine a partner's share of partnership liabilities, such partner's share of partnership minimum gain shall be computed as if the partnership taxable year had ended immediately prior to such determination. For purposes of section 752 and the regulations thereunder, any increase in a partner's share of partnership minimum gain shall be deemed to occur immediately before the event that caused such increase.

(ii) *Partner's proportionate share of excess nonrecourse liabilities*—(A) *In general.* A partner's proportionate share of the excess nonrecourse liabilities of the partnership equals the amount determined by multiplying the partner's percentage interest in partnership profits by the excess nonrecourse liabilities of the partnership.

(B) *Excess nonrecourse liabilities.* The excess nonrecourse liabilities of the partnership equal the excess of—

(*1*) The aggregate amount of the nonrecourse liabilities of the partnership; over

(*2*) The aggregate amount of the nonrecourse liabilities of the partnership that are allocable to the partners under paragraph (e)(1)(i) and (ii) of this section.

(C) *Interest in partnership profits.* For purposes of this paragraph (e), the partners' interests in partnership profits shall be determined by taking into account all facts and circumstances relating to the economic arrangement of the partners. However, if—

(*1*) The partnership agreement specifies the partners' interests in partnership profits for purposes of determining such partners' shares of the nonrecourse liabilities of the partnership; and

(*2*) The partners' interests in partnership profits (as specified in the partnership agreement) are reasonably consistent with allocations (which have substantial economic effect under §1.704-1(b)) of some significant item of partnership income or gain among such partners;

then the partners' interests in partnership profits shall, for purposes of this paragraph (e), be deemed to be as specified in the partnership agreement. See example (22)(iii) of paragraph (k) of this section.

(f) *Assumption of liability*—(1) *In general.* Except as otherwise provided in §1.752-2T, for purposes of section 752 and the regulations thereunder, a person is considered to assume a liability to the extent, but only to the extent, that as a result of the assumption—

(i) The assuming person is subjected to personal liability with respect to such liability; and

(ii) in the case of any assumption of a partnership liability by a partner, the person to whom such liability is owed is aware of the assumption and can directly enforce the partner's obligation with respect to such liability, and no other partner or person related to another partner would bear the economic risk of loss for such liability (within the meaning of paragraph (d)(3) of this section) immediately after the assumption if such liability were treated as a partnership liability.

(2) *Effect of assumption*—(i) *Assumption by partnership.* If a partnership assumes a liability of a partner, such liability shall thereafter be treated as a liability of the partnership, and not the partner, for purposes of section 752 and the regulations thereunder.

(ii) *Assumption by partner.* If a partner assumes a liability of the partnership, such liability shall thereafter be treated as a liability of the partner, and not the partnership, for purposes, of section 752 and the regulations thereunder.

(g) *Liability defined.* Except as otherwise provided in the regulations under section 752, an obligation is a liability of the obligor for purposes of section 752 and the regulations thereunder to the extent, but only to the extent, that incurring or holding such obligation gives rise to—

(1) The creation of, or an increase in, the basis of any property owned by the obligor (including cash attributable to borrowings);

(2) A deduction that is taken into account in computing the taxable income of the obligor; or

(3) An expenditure that is not deductible in computing the obligor's taxable income and is not properly chargeable to capital.

See examples (2) and (3)(ii) of paragraph (k) of this section.

(h) *Related person*—(1) *In general.* Except as otherwise provided in this paragraph (h), a person is related to a partner for purposes of this section if and only if such person and the partner bear a relationship to each other that is specified in section 267(b) (without modification by section 267(e)(1)) or section 707(b)(1), taking into account the modifications made by paragraph (h)(2) of this section.

(2) *Modifications to sections 267(b) and 707(b)(1).* For purposes of this section, sections 267(b) and 707(b)(1) shall be applied by—

(i) Substituting "80 percent or more" for "more than 50 percent" each place it appears in such sections;

(ii) Excluding brothers and sisters from the members of a person's family; and

(iii) Disregarding section 267(f)(1)(A).

(3) *Person related to more than one partner*—(i) *In general.* For purposes of this section, if a person is related to more than one partner—

(A) Any obligation of such person to make a payment to a creditor or other person with respect to a partnership liability (within the meaning of paragraph (d)(3)(ii)(A)(2) of this section), any obligation of such person to make a contribution to the partnership (within the meaning of paragraph (d)(3)(ii)(B)(2)(*iii*) of this section), and any reimbursement that such person is entitled to receive with respect to such payment or contribution (within the meaning of paragraph (d)(3)(ii)(C) of this section) shall be allocated to the related partner with the greatest percentage of related ownership with respect to such person; and

(B) Any partnership liability owed to such related person that, but for paragraph (d)(3)(i)(B) of this section, would be a nonrecourse liability of the partnership shall be treated as a liability that is owed to a person related to the partner with the greatest percentage of related ownership with respect to such related person.

If more than one partner holds the same percentage of related ownership with respect to such person and no partner holds a greater percentage, any such obligation, right to reimbursement, or liability shall be allocated equally among such partners unless the facts and circumstances establish that the partners would share any economic burden or benefit corresponding to any such obligation, right to reimbursement, or liability in a different manner.

(ii) *Percentage of related ownership.* The percentage of related ownership of a partner with respect to a related person equals the greater of—

(A) The percentage ownership of the related person by the partner; or

(B) The percentage ownership of the partner by the related person.

In determining the percentage of related ownership of a partner with respect to a related person, the constructive ownership or attribution rules applicable under sections 267(b) and 707(b)(1) (as modified by paragraph (h)(2) of this section) must be taken into account, and if a partner is related to a person under more than one of the relationships set forth under sections 267(b) and 707(b)(1) (as so modified), then the relationship establishing the highest percentage of related ownership must be used. For purposes of this section, natural persons shall be deemed to have a zero percentage of related ownership with respect to each other. For example, if a person that is related to more than one partner is obligated to make a payment to a creditor with respect to a partnership liability, and such person and such partners are related because they are members of the same family, then that obligation must, for purposes of determining the economic risk of loss borne by each partner with respect to such liability, be divided equally among such partners (unless the facts and circumstances establish that the partners would share any economic burden corresponding to such obligation in a different manner) under this paragraph (h)(3) because they have the same percentage of related ownership (zero).

(4) *Related partners.* Except as otherwise provided in this section, if related persons (within the meaning of this paragraph (h)) own (directly or indirectly) interests in the same partnership, then such persons shall not be treated as related persons for purposes of determining the economic risk of loss borne by each of them for the liabilities of such partnership.

(i) [Reserved.]

(j) *Special rules*—(1) *Tiered partnerships.* If a partnership (the "upper-tier partnership") is a partner in another partnership (the "subsidiary partnership"), the upper-tier partnership's share of the liabilities of the subsidiary partnership (other than any liability of the subsidiary partnership that is owed to the upper-tier partnership) shall be treated as liabilities of the upper-tier partnership for purposes of applying section 752 and the regulations thereunder to the partners of the upper-tier partnership.

(2) *Liabilities which are part recourse and part nonrecourse.* If one or more partners bears the economic risk of loss (within the meaning of paragraph (d)(3) of this section) for only a portion of a partnership liability, such liability shall be treated as a recourse liability of the partnership to the extent that the partners bear the economic risk of loss for such liability and as a nonrecourse liability of the partnership in an amount equal to the excess. See examples (13)(iv) and (19)-(ii) of paragraph (k) of this section.

(3) *Increase and decrease in share of liabilities resulting from same transaction.* For purposes of section 752 and the regulations thereunder, if as a result of a single transaction (for example, a contribution by a partner to the partnership of property subject to a liability or the termination of the partnership under section 708(b)) a partner incurs both an increase (or decrease) in the partner's share of the liabilities of the partnership and a decrease (or increase) in the partner's individual liabilities—

(i) Such increase and decrease must be offset against each other prior to the application of paragraph (b) or (c) of this section; and

(ii) Only the amount of the net increase or decrease, if any, in the sum of the partner's share of the liabilities of the partnership and the partner's individual liabilities resulting from such transaction shall be treated as a contribution of money by the partner to the partnership or a distribution of money by the partnership to the partner, respectively, under paragraph (b) or (c) of this section.

See §1.752-2T(b) (examples (1) and (2)).

(4) *Time of determination.* A partner's share of the liabilities of the partnership must be determined whenever such determination is necessary in order to determine the tax liability of the partner or any other person. See §1.705-1(a) for rules regarding when the adjusted basis of a partner's interest in the partnership must be determined.

(5) *Limitation.* For purposes of section 752 and the regulations thereunder, the amount of an indebtedness shall be taken into account only once, even though a partner (in addition to his liability for such indebtedness as a partner) may be separately liable therefore in a capacity other than as a partner.

(k) *Examples.* The following examples illustrate the application of the rules of this section. Except as otherwise provided, these examples assume that (1) the partnerships discussed therein are formed under state laws corresponding to the Uniform Partnership Act or the Revised Uniform Limited Partnership Act, whichever is appropriate, (2) partnership indebtedness constitutes debt for federal income tax purposes, and (3) any debt instrument given in consideration for the sale or exchange of property bears adequate stated interest (within the meaning of section 1274(c)).

Example (1). A and B are equal partners in a general partnership. The partnership borrows $1,000. A and B, as equal partners, share the partnership liability for that obligation equally under the rules of this section. The resulting $500 increase in each partner's share of the liabilities of the partnership is treated as a contribution of $500 by that partner to the partnership. See paragraph (b) of this section. Each time the partnership pays a portion of the outstanding balance of the $1,000 loan, each partner's share of the liabilities of the partnership is decreased by one-half of the payment, and the decrease in each partner's share of partnership liabilities is treated as a distribution of that amount by the partnership to that partner. See paragraph (c) of this section.

Example (2). (i) C and D are partners in a general partnership that uses the cash method of accounting. At the close of its taxable year, the partnership has accrued interest expense of $1,000 and accounts payable of $500 for services performed on behalf of the partnership.

(ii) Under its method of accounting, the partnership's accrued interest expense and accounts payable are not deductible until paid. Also, the partnership obligations represented by those items have not created or increased the basis of any partnership property or given rise to a nondeductible expenditure of the partnership that is not properly chargeable to capital account. As provided by paragraph (g) of this section, an obligation that constitutes a debt for federal income tax purposes is a liability of the obligor only to the extent that incurring or holding such obligation gives rise to (1) the creation of, or an increase in, the basis of any property owned by the obligor, (2) a deduction that is taken into account in computing the taxable income of the obligor, or (3) an expenditure that is not deductible in computing the obligor's taxable income and is not properly chargeable to capital. Therefore, the partnership obligations for accrued but unpaid interest expense and accounts payable are not partnership liabilities for purposes of section 752.

Example (3). (i) E and F form a general partnership with cash contributions of $20,000 each. The partnership agreement provide's that E and F will share all partnership profits and losses equally. The partnership purchases depreciable personal property for $40,000 in cash and a recourse purchase money note for $60,000.

(ii) The indebtedness represented by the purchase money note is a partnership liability because incurring that obligation creates an additional $60,000 of basis in the partnership's depreciable personal property. See paragraph (g) of this section. Under paragraph (d) of this section, the partnership liability for the purchase money note constitutes a recourse liability of the partnership to the extent, but only to the extent, that one or more partners bears the economic risk of loss for such liability, and each partner's share of the recourse liabilities of the partnership equals the portion of those liabilities for which such partner bears the economic risk of loss. To the extent that no partner bears the economic risk of loss for the liability represented by the purchase money note, that liability constitutes a nonrecourse liability of the partnership. See paragraph (e)(2) of this section. Under paragraph (d)(3)(i) of this section, a partner bears the economic risk of loss for a partnership liability to the extent that such partner would be obligated to make a net payment to a creditor or other person or a net contribution to the partnership with respect to such liability if the partnership constructively liquidated (within the meaning of paragraph (d)(3) (iii) of this section).

(iii) In a constructive liquidation of the partnership, all partnership assets are assumed to become worthless and all partnership liabilities are assumed to become due and payable in full. See paragraph (d)(3)(iii)(A)(*1*) and (2) of this section. Thus, if the partnership constructively liquidated, the purchase money note would be due and payable, but the partnership would lack the assets needed to discharge the note. As a result, E and F, as equal general partners, would each be obligated by operation of law to make a net contribution of $30,000 to the partnership with respect to the partnership liability for the purchase money note. See paragraph (d)(3)(ii)(B) of this section. Therefore, under paragraph (d)(3)(i) of this section, E and F each bear the economic risk of loss for $30,000 of that liability. Accordingly, the $60,000 partnership liability for the purchase money note is a recourse liability, and E and F share that liability equally.

Example (4). (i) The facts are the same as in example (3), except that F is a limited partner, who guarantees the purchase money note and has no obligation to make additional capital contributions to the partnership. Under the guarantee, if the partnership defaults on the purchase money note, F is obligated to pay the outstanding balance of the note. In addition, F is subrogated to the seller's rights against the partnership under the purchase money note for any payments made by F pursuant to the guarantee.

(ii) Under F's guarantee, if the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section), F would be obligated to make a $60,000 payment to the seller with respect to the partnership liability for the purchase money note. F would, however, be entitled to be reimbursed (within the meaning of paragraph (d)(3)(ii)(C) of this section) by the partnership for any payment made under the guarantee pursuant F's right to subrogation. As a result, F would not be obligated to make a net payment to a creditor or other person with respect to the liability for the purchase money note. See paragraph (d)(3)(ii)(A) of this section. E, as the sole general partner, however, would be obligated to make a net contribution of $60,000 to the partnership with respect to the partnership liability for the purchase money note in order to provide the partnership with the funds needed to pay the outstanding balance of the note that is owed to F, as subrogee. See paragraph (d)(3)(ii)(B) of the section. Thus, E bears the economic risk of loss for the entire $60,000 partnership liability. Accordingly, under paragraph (d) of this section, the liability is a recourse liability, and E's share of that liability is $60,000.

Example (5). (i) The facts are the same as in example (3), except that the partnership agreement provides that capital accounts will be determined and maintained for the partners in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances (as set forth in §1.704-1(b)-(2)(ii)(*b*)(*2*)), and any partner with a deficit balance in the partner's capital account following the liquidation of the partner's interest must restore that deficit to the partnership (as set forth in §1.704-1(b)(2)(ii)(*b*)(*3*)). At the time it incurs the liability for the purchase money note, the partnership has no income, gain, loss, deduction, or credit for the taxable year.

(ii) To determine the economic risk of loss that each partner bears with respect to the partnership liability for the purchase money note, the partnership must be deemed to constructively liquidate (within the meaning of paragraph (d)(3)(iii) of this section). This requires, among other things, that the partnership be treated as if it disposed of all its assets in a fully taxable exchange for no consideration, allocated partnership items of income, gain, loss, deduction, and credit to the partners for the partnership taxable year ending on the date of the liquidation, and liquidated the partner's interests in the partnership. See paragraph (d)(3)(iii)(A)(*3*) and (*4*) of this section. If the partnership constructively liquidated immediately after incurring the purchase money note, the partnership would recognize a taxable loss of $100,000 (which equals the adjusted tax basis of the property) on the disposition of its depreciable personal property for no consideration. Thus, the partnership would have a taxable loss of $100,000 for the hypothetical partnership taxable year ending on the date of the constructive liquidation. The partnership agreement would allocate this loss between E and F as follows:

	E	*F*
Capital account on formation	$20,000	$20,000
Less: loss	(50,000)	(50,000)
Capital account after constructive liquidation	($30,000)	($30,000)

Thus, in order to restore the deficit balances in their capital accounts, E and F would each be obligated to make a net contribution of $30,000 to the partnership with respect to the partnership liability for the purchase money note if the partnership constructively liquidated immediately after it incurred that liability. See paragraph (d)(3)(ii)(B) of this section. Therefore. as in example (3), E and F each bears $30,000 of the economic risk of loss for the partnership liability under paragraph (d)(3)(i) of this section.

Example (6). (i) The facts are the same as in example (5), except that the partnership agreement provides that 90 percent of partnership net taxable loss will be allocated to E and 10 percent to F.

(ii) As in example (5), if the partnership constructively liquidated immediately after incurring the purchase money note, the partnership would recognize a taxable loss of $100,000 on the disposition of its depreciable personal property for no consideration, and the partnership would have a net taxable loss of $100,000 for the hypothetical partnership taxable year ending on the date of the constructive liquidation. The partnership agreement would allocate 90 percent of this net taxable loss to E and 10 percent to F.

	E	*F*
Capital account on formation	$20,000	$20,000
Less: loss	(90,000)	(10,000)
Capital account after constructive liquidation	($70,000)	$10,000

Thus, E would be obligated to make a net contribution of $70,000 to the partnership at the time of the constructive liquidation (within the meaning of paragraph (d)(3)(ii)(B)(*3*) of this section) in order to restore the deficit balance in E's capital account. F, on the other hand, would not be obligated to make a contribution to the partnership, but would be entitled to receive a $10,000 distribution from the partnership.

(iii) Under paragraph (d)(3)(ii)(B)(*1*) of this section, $60,000 of the $70,000 net contribution that E would be obligated to make to the partnership constitutes an obligation to make a net contribution with respect to the partnership liability for the purchase money note (E's net contribution ($70,000) multiplied by the fraction obtained by dividing the outstanding partnership indebtedness with respect to that liability ($60,000) by the sum of the partners' net contributions ($70,000)). The other $10,000 of E's net contribution would fund the distribution to F. While the holder of the purchase money note could attempt to recover the balance due on the note from F as a general partner, E and F have agreed under the partnership agreement that, as between them, E will bear the risk of loss for that liability, and the rules of this section assume that E actually discharges E's obligation to make a net contribution to the partnership at the time of the constructive liquidation. See paragraph (d)(3)(ii)(D)(*2*) of this section. Under paragraph (d)(3)(i) of this section, E bears the economic risk loss for the full amount of the partnership liability for the purchase money note. Therefore, the partnership liability for the note is a recourse liability that is allocated entirely to E. See paragraph (d)(1) and (2) of this section.

Example (7). (i) The facts are the same as in example (6), except that F contributes a promissory note (of which F is the maker) with a principal balance of $60,000 to the partnership. The promissory note is not readily tradable on an established securities market. F's promissory note is payable in five years; however, F's obligation to discharge the note will be accelerated if, prior to that time, the partnership is liquidated.

(ii) F's promissory note constitutes an obligation to make a contribution to the partnership (within the meaning of paragraph (d)(3)(ii)(B)(*2*) of this section). If F contributed the $60,000 principal balance of the promissory note to the partnership immediately after the constructive liquidation, F's capital account would increase by $60,000, giving F a positive capital account balance of $70,000 and the right to the distribution of an additional $60,000 from the partnership.

F's capital account after constructive liquidation	$10,000
Plus: contribution pursuant to promissory note	60,000
Total	$70,000

Because F would be entitled to be reimbursed for a contribution made pursuant to the promissory note, F would not be obligated to make a net contribution to the partnership upon a constructive liquidation. See paragraph (d)(3)(ii)(B)(*3*) and (C) of this section. After F's payment of the $60,000 balance due on the promissory note, the partnership would have only $60,000 in cash to satisfy the $60,000 partnership liability and F's $70,000 positive capital account balance. E would, however, be obligated to make a net contribution of $70,000 to the partnership to restore the deficit balance in E's capital account. As in example (6), $60,000 of this net contribution constitutes a net contribution with respect to the partnership liability and $10,000 is attributable to the partnership's obligation to satisfy F's positive capital account balance. Therefore, as in example (6), E bears the economic risk of loss for the full amount of the partnership liability for the purchase money note unless F's contribution of the promissory note to the partnership constitutes part of a plan to circumvent or avoid E's deficit restoration obligation. See paragraph (d)(3)(ii)(D)-(*3*) of this section regarding the existence of a plan to circumvent or avoid an obligation.

Example (8). (i) G and H form a general partnership to invest in stocks, securities, and other income producing liquid assets. G, the managing partner, contributes $5,000 in cash to the partnership, and H, an investor, contributes $15,000 in cash to the partnership. Immediately after its formation, the partnership obtains a $10,000 recourse loan from a commercial bank and purchases $15,000 of corporate stock, $10,000 of government securities, and a $3,000 certificate of deposit. At the end of its first day of business, the partnership owns the following assets:

	Adjusted basis
Cash	$2,000
Corporate stock	15,000
Government securities	10,000
Certificate of deposit	3,000
Total	$30,000

The partnership agreement provides that the partners will share partnership taxable income and loss equally. The partnership agreement also provides that capital accounts will be determined and maintained for the partners in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partner's positive capital account balances (as set forth in §1.704-1(b)(2)(ii)-(*b*)(*2*)), and any partner with a deficit balance in the partner's capital account following the liquidation of the partner's interest must restore that deficit to the partnership (as set forth in §1.704-1(b)-(2)(ii)(*b*)(*3*)).

(ii) The indebtedness represented by the loan is a partnership liability. See paragraph (g) of this section. The partners will share that liability according to the economic risk of loss borne by each partner with respect to such liability. See paragraph (d)(3)-(i) of this section. The determination of the economic risk of loss that each partner bears with respect to the liability for the loan is, in turn, governed by the impact that a constructive liquidation of the partnership would have on the partners' obligations with respect to that liability. If a partnership is deemed to constructively liquidate, all partnership assets, including cash and other financial assets, are deemed to be worthless, and the partnership is treated as if it disposed of those assets in a fully taxable exchange for no consideration. On the deemed disposition of its cash, corporate stock, government securities, and certificate of deposit for no consideration at the end of its first day of business, the partnership would recognize a $30,000 taxable loss. This loss would be allocated equally between the partners.

	G	*H*
Capital account on formation	$5,000	$15,000
Less: loss	(15,000)	(15,000)
Capital accounts after constructive liquidation	($10,000)	$0

Consequently, if the partnership constructively liquidated at the end of its first day of business, G would be obligated to make a net contribution of $10,000 to the partnership to restore the deficit balance in G's capital account. See paragraph (d)(3)-(ii)(B)(*3*) of this section. Under paragraph (d)(3)-(ii)(B)(*1*) of this section, G's deficit restoration obligation would be treated as an obligation to make a net contribution of $10,000 to the partnership with respect to the partnership liability for the loan. Therefore, under paragraph (d)(3)(i) of this section, G bears the economic risk of loss for the full amount of the partnership liability for the loan. As a result, the liability is a recourse liability that is allocated entirely to G. See paragraph (d)(1) and (2) of this section.

Example (9). (i) I and J form a limited partnership. I, the general partner, contributes $10,000 to the partnership, and J, the limited partner, contributes $90,000 to the partnership. The partnership purchases depreciable personal property 1 for $110,000, paid by the delivery of $40,000 in cash and a recourse purchase money note in the principal amount of $70,000 ("note 1"). The partnership also purchases depreciable property 2 for $270,000, paid by the delivery of $60,000 in cash and a recourse purchase money note in the principal amount of $210,000 ("note 2"). J and the seller of property 2 enter into an indemnification agreement whereby J agrees to pay the seller the outstanding balance of note 2 if the partnership fails to make the payments required pursuant to that note. Under the indemnification agreement, if the partnership defaults, the seller may collect the balance due on note 2 directly from J without pursuing its legal remedies against the partnership. The seller may also attempt to collect the balance due on note 2 from the partnership before it proceeds against J under the indemnification agreement. The partnership agreement does not give J any right to seek repayment from the partnership or I for any amount that J pays to the seller pursuant to the indemnification agreement. Similarly, neither the partnership nor I are beneficiaries of the indemnification agreement. The partnership agreement provides that partnership taxable income and loss will be allocated 10 percent to I and 90 percent to J, except that all partnership taxable loss will be allocated to I after the partners' capital accounts are reduced to zero and partnership taxable income must first be allocated to eliminate any deficit balances in the partners' capital accounts. The partnership agreement also provides that capital accounts will be determined and maintained for the partners in accordance with §1.704-1(b)(2)(iv) and distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partner's positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)). The partners are not obligated to restore any deficit balances in their capital accounts following the liquidation of their interests in the partnership. The partnership has no income, gain, loss, deduction, or credit for the period prior to the acquisition of properties 1 and 2.

(ii) The partnership obligations represented by notes 1 and 2 constitute partnership liabilities ("liabilities 1 and 2," respectively). See paragraph (g) of this section. If the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section) immediately after incurring liabilities 1 and 2, the partnership would recognize a taxable loss of $380,000 from the disposition of properties 1 and 2 for no consideration. See paragraph (d)(3)(iii)(A)(*3*) of this section. Thus, for the hypothetical taxable year ending on the date of the constructive liquidation, the partnership would have a taxable loss of $380,000. This loss would be allocated between the partners as follows:

	I	*J*
Capital accounts on formation	$10,000	$90,000
Less: loss	(290,000)	(90,000)
Capital accounts after constructive liquidation	($280,000)	$0

After the constructive liquidation, I, as the sole general partner, would be obligated by operation of law to contribute $280,000 to the partnership to discharge the partnership's obligations under notes 1 and 2. J, on the other hand, would be obligated pursuant to the indemnification agreement to pay the outstanding balance of note 2 ($210,000) to the seller of property 2 because of the partnership's failure to make the payments due on that note. See paragraph (d)(3)(iii)(A)(*2*) of this section.

(iii) I's obligation to contribute $280,000 to the partnership constitutes an obligation to make a net contribution to the partnership. See paragraph (d)(3)(ii)(B)(*3*) of this section. Under paragraph (d)(3)(ii)(B)(*1*) of this section, the net contribution that I would be obligated to make to the partnership at the time of the constructive liquidation is allocated among the partnership liabilities to determine the net contribution that I would be obligated to make with respect to each liability. The amount of I's obligation to make a net contribution to the partnership that will be allocated to each partnership liability is determined by multiplying the amount of that obligation by the fraction obtained by dividing the outstanding partnership indebtedness with respect to that liability at the time of the constructive liquidation by the sum of the net contributions that all partners would be obligated to make to the partnership as a result of the liquidation. Under paragraph (d)(3)(ii)(B)(*4*) of this section, the outstanding partnership indebtedness with respect to liabilities 1 and 2 at the time of the constructive liquidation equals the outstanding balances of those liabilities—$70,000 and $210,000, respectively. The sum of the net contributions that the partners would be obligated to make to the partnership at the time of the constructive liquidation equals $280,000 because I is the only partner that would be obligated to make a net contribution to the partnership. Therefore, if the partnership constructively liquidated immediately after incurring liabilities 1 and 2, I would be obligated to make net contributions with respect to liabilities 1 and 2 of 70,000 ($280,000 multiplied by $70,000/$280,000) and $210,000 ($280,000 multiplied by $210,000/$280,000), respectively. In addition, assuming that J has no right under applicable state law to be reimbursed for any payment made pursuant to the indemnification agreement, J would be obligated to make a net payment of $210,000 to a creditor or other person with respect to liability 2. See paragraph (d)(3)(ii)(A) of this section.

(iv) Under paragraph (d)(3)(i)(A) of this section, the economic risk of loss borne by a partner with respect to any partnership liability generally equals the sum of (1) the net payment that such partner would be obligated to make to a creditor or other person and (2) the net contribution that such partner would be obligated to make to the partnership with respect to such liability if the partnership constructively liquidated. If the aggregate amount of the economic risk of loss that all partners would otherwise be determined to bear with respect to a partnership liability exceeds the amount of such liability, however, then the economic risk of loss borne by each partner with respect to such liability shall equal the amount determined by multiplying such liability by the fraction obtained by dividing the economic risk of loss that the partner would otherwise be considered to bear with respect to such liability by the sum of such amounts for all partners. See the next to the last sentence of paragraph (d)(3)(i) of this section. Under the general rule of paragraph (d)(3)(i)(A) of this section, I and J would each bear the economic risk of loss for the full amount of liability 2. I and J each bear the economic risk of loss for the full amount of liability 2 under the general rule because the arrangements between the partners fail to satisfactorily address the manner in which they will share the risk of loss attributable to that liability. In such a case, the facts must be closely scrutinized to determine whether the failure to resolve the manner in which the partners will share the risk of loss attributable to a partnership liability is part of a plan to circumvent or avoid the obligation of any partner to make a net payment to a creditor or other person or a net contribution to the partnership with respect to such liability. See paragraph (d)(3)(ii)(D)(*3*) of this section regarding the existence of a plan to circumvent or avoid an obligation. Assuming that there is not a plan to circumvent or avoid either partner's obligation with respect to liability 2, I and J each bear the economic risk of loss for $105,000 of liability 2 under the next to the last sentence of paragraph (d)(3)(i) of this section. Also, I bears the economic risk of loss for the full amount of liability 1 because I would be obligated to make a net contribution to the partnership of $70,000 with respect to liability 1 if the partnership constructively liquidated immediately after incurring that liability. Accordingly, liabilities 1 and 2 are recourse liabilities of the partnership, I and J share liability 2 equally, and I is allocated the entire amount of liability 1. See paragraph (d)(1) and (2) of this section.

Example (10). (i) K and L form a limited partnership. K, the general partner, and L, the limited partner, contribute $20,000 and $80,000, respectively, in cash to the partnership. The partnership purchases depreciable personal property for $250,000, using the $100,000 in cash contributed by the partners and a $150,000 recourse loan from a commercial bank. To provide additional security for the loan, the bank obtains an indemnification from L. Under the indemnification agreement, if the partnership defaults on the loan, L has agreed to pay the bank the portion, if any, of the outstanding balance of the loan that it is unable to recover from the partnership. L has no obligation, however, to make any payment pursuant to the indemnification agreement until the bank has exhausted its legal remedies against the partnership. The partnership agreement provides that capital accounts will be determined and maintained for the partners in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)), and K is obligated to restore to the partnership any deficit balance in K's capital account following the liquidation of K's interest (as set forth in §1.704-1(b)(2)(ii)(*b*)(*3*)). L has no obligation to contribute additional capital to the partnership. The partnership agreement also provides that partnership taxable income and loss will be allocated 20 percent to K and 80 percent to L, except that partnership taxable loss will be allocated solely to K after the partners' capital accounts are reduced to zero and partnership taxable income must be allocated first to eliminate any deficit balances in the partner's capital accounts.

(ii) The indebtedness represented by the loan obtained by the partnership to purchase the depreciable personal property is a partnership liability. See paragraph (g) of this section. If the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section), K, as the only partner that has any obligation to contribute additional capital to the partnership, would be obligated to make a contribution to the partnership of the funds needed to pay the outstanding balance of the loan, and K would not be entitled to seek reimbursement for this contribution from L (K is not a beneficiary of the indemnification agreement). Consequently, K would be obligated to make a net contribution of $150,000 with respect to the partnership liability for the loan if the partnership constructively liquidated. See paragraph (d)(3)(ii)(B) of this section. Therefore, under paragraph (c) of this section, K bears the economic risk of loss for the full amount of the partnership liability for the loan, and that liability is a recourse liability that is allocated entirely to K.

(iii) Under the indemnification agreement, L's obligation to make a payment to the bank arises only if the bank cannot recover its loan from the partnership. Consequently, if the partnership constructively liquidated, L would not be obligated to make a payment to the bank under the indemnification agreement unless K failed to discharge K's obligation to contribute additional capital to the partnership. Under paragraph (d)(3)(ii)(D)(*2*) of this section, however, the partners are generally treated as if they actually discharge their obligations to make contributions to the partnership or payments to a creditor or other person for purposes of applying paragraph (d)(3)(ii) of this section. Therefore, since K is assumed to satisfy K's obligation to contribute additional capital to the partnership, L is not considered to have an obligation to make a payment to the bank under the indemnification agreement.

Example (11). (i) The facts are the same as in example (10), except that K is a corporation that is a member of an affiliated group of corporations filing a consolidated return. K was formed by the parent of the consolidated group, P corporation, solely to acquire and hold its general partner interest. P corporation formed K to acquire an interest in the partnership both for investment purposes and for the tax losses it expected the partnership's property to generate. To limit its monetary exposure, however, P capitalized K only with the funds K needed to acquire its general partner interest.

(ii) These facts and circumstances, when considered together with L's indemnification agreement, indicate a plan to circumvent or avoid K's obligation to make a net contribution to the partnership. Therefore, under paragraph (d)(3)(ii)(D)(*3*) of this section, K's obligation to make a net contribution to the partnership is not recognized for purposes of applying the rules of paragraph (d)(3) this section, and the rules of this section must be applied as if that obligation did not exist. See paragraph (d)(3)(ii)(D)(*2*) of this section. Accordingly, if the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section), the bank would not be able to recover any part its loan from the partnership, and L would be obligated pursuant to the indemnification agreement to pay the bank the outstanding balance of the loan. Under paragraph (d)(3)(i) of this section, L bears the economic risk of loss for the full amount of the partnership liability for the loan. Therefore, the partnership liability for the loan is a recourse liability that is allocated entirely to L. See paragraph (d)(1) and (2) of this section.

Example (12). (i) M and N form a general partnership to purchase an office building, each contributing $15,000 to the partnership. The partnership purchases an office building for $100,000 with the cash contributed by the partners and a $70,000 recourse loan from a commercial bank. In connection with the purchase of the building, M contributes an additional $45,000 to the partnership. These funds are deposited in a special escrow account of the partnership that is to be used solely for purposes of making payments on the loan. The partnership pledges the escrow account to the bank as security for the loan. The partnership agreement provides that the partners will share partnership taxable income and loss equally, except that interest income from the escrow account is to be allocated 95 percent to M and 5 percent to N. The partnership agreement also provides that capital accounts will be determined and maintained for the partners in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)), and any partner with a deficit balance in the partner's capital account following the liquidation of the partner's interest must restore that deficit to the partnership (as set forth in §1.704-1(b)(2)(ii)(*b*)-(*3*)). The partnership has no income, gain, loss, deduction, or credit for the period prior to the acquisition of the building.

(ii) The indebtedness represented by the loan obtained by the partnership to purchase the office building is a partnership liability. See paragraph (g) of this section. If the partnership is deemed to constructively liquidate (within the meaning of paragraph (d)(3)(iii) of this section) immediately after purchasing the building, the partnership is treated as if the building became worthless, the loan became due and payable in full, and the partnership disposed of the building in a fully taxable exchange for no consideration. In addition, the partnership is deemed to transfer the funds held in escrow to the bank in partial satisfaction of the loan. The escrowed funds are not deemed to be worthless because those funds, which were contributed to the partnership by M, are used in the partnership's activities solely to secure the payment of the loan from the bank. See paragraph (d)(3)(iii)(A)(*1*) and (d)(3)(ii)(A)(*2*)(*ii*) of this section. Under paragraph (d)(3)(ii)(A)(*2*)(*ii*) of this section, the partnership's obligation to use the escrowed funds that M contributed to the partnership to discharge the loan is treated as an obligation of M to make a payment to a creditor or other person with respect to the partnership liability for the loan.

(iii) On the disposition of its office building for no consideration, the partnership would incur a taxable loss of $100,000, which would be allocated equally between the partners. Thus, if the partnership constructively liquidated immediately after purchasing the building, the partners' capital accounts would appear as follows:

	M	*N*
Capital accounts on formation	$60,000	$15,000
Less: loss	(50,000)	(50,000)
Capital accounts after constructive liquidation	$10,000	($35,000)

M's positive capital account balance would entitle M to a $10,000 distribution from the partnership. Because M would not have been entitled to any distribution from the partnership if M had not provided the escrowed funds to the partnership, M's right to this distribution constitutes a right to be reimbursed by the partnership for the escrowed funds that M is considered obligated to pay to the bank under paragraph (d)(3)(ii)(A)(*2*)(*ii*) of this section. Thus, under paragraph (d)(3)(ii)(A) of this section, M would be obligated to make a net payment of $35,000 ($45,000 less $10,000) to a creditor or other person with respect to the partnership liability for the loan if the partnership constructively liquidated.

(iv) N's $35,000 deficit capital account balance constitutes an obligation to make a net contribution to the partnership. Under paragraph (d)(3)(ii)(B)(*1*) of this section, this obligation will be allocated to the partnership liability for the loan only to the extent that it does not exceed the outstanding partnership indebtedness with respect to that liability. Under paragraph (d)(3)(ii)(B)(*4*) of this section, the outstanding partnership indebtedness with respect to that liability equals $35,000 (the amount of such liability ($70,000), reduced by the excess of (1) the amount M's obligation to make a payment to a creditor or other person with respect to such liability ($45,000) over (2) the reimbursement that M is entitled to receive from the partnership with respect to that liability ($10,000)). Therefore, if the partnership constructively liquidated, N would be obligated to make a net contribution of $35,000 to the partnership with respect to the partnership liability for the loan.

(v) Under paragraph (d)(3)(i) of this section, M and N each bear the economic risk of loss for $35,000 of the partnership liability for the loan. Accordingly, the liability is a recourse liability that M and N share equally.

Example (13). (i) O and P contribute $125,000 and $25,000 in cash, respectively, to form a calendar year general partnership on December 31, 1988. P also contributes a promissory note for $100,000 to the partnership. The promissory note is payable on the fifth anniversary of the partnership's formation and bears interest at a rate of 12 percent, compounded annually. On the date of its formation, the partnership purchases improved real property for its $150,000 of capital and a $850,000 nonrecourse loan from a commercial bank. The nonrecourse loan is secured by a mortgage on the real property and a pledge of P's promissory note. The partnership agreement provides that the partners will share partnership taxable income and loss equally. The partnership agreement also provides that capital accounts will be determined and maintained for the partners in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) are to be made in accordance with the partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)), and any partner with a deficit balance in the partner's capital account following the liquidation of the partner's interest must restore that deficit to the partnership (as set forth in §1.704-1(b)(2)(ii)(*b*)(*3*)), except that P is not obligated to restore the first $100,000 of any deficit balance in P's capital account prior to the maturity of P's promissory note. For 1988, the partnership has no income, gain, loss, deduction, or credit. Assume that the Federal mid-term rate for December 1988 is 10 percent, compounded semi-annually.

(ii) The indebtedness represented by the nonrecourse loan obtained by the partnership to purchase the improved real property is a partnership liability. See paragraph (g) of this section. To determine whether any partner bears the economic risk of loss for that liability at the end of 1988, the partnership must be treated as if it constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section) at that time. If the partnership is deemed to constructively liquidate at the end of 1988, the following events are deemed to occur: (1) the partnership's improved real property becomes worthless, (2) the nonrecourse loan becomes due and payable, (3) the partnership disposes of its improved real property in a fully taxable exchange (involving the transfer of that property to the bank), and (4) the partnership allocates its taxable income or loss to the partners for the partnership taxable year ending on the date of the constructive liquidation and liquidates the partners' interests. In the constructive liquidation, the partnership is treated as if it received consideration in the form of relief from liability upon the hypothetical disposition of its improved real property to the extent that the nonrecourse loan is a liability for which the creditor's right to repayment is limited to one or more assets of the partnership. See paragraph (d)(3)(iii)(A)(*3*) of this section. Under paragraph (d)(3)(ii)(B)(*4*)(*ii*) of this section, the nonrecourse loan constitutes a liability for which the creditor's right to repayment is limited to one or more assets of the partnership to the extent, but only to the extent, that the outstanding balance of the loan exceeds the aggregate amount of the contributions that the partners would be obligated to make to the partnership to discharge that loan if the partnership constructively liquidated. P's promissory note (as a result of the pledge of that note to the bank to secure the nonrecourse loan) constitutes the only obligation that the partners have to make a contribution to the partnership in order to discharge the nonrecourse loan. Under paragraph (d)(3)(ii)(E) of this section, P's obligation to make a contribution to the partnership pursuant to the promissory note is recognized only to the extent of the value of that note because the note is not required to be paid by the later of (1) the end of the partnership taxable year in which N's interest is liquidated or (2) within 90 days after the date of such liquidation. At the time of the constructive liquidation (*i.e.*, at end of 1988), however, P's promissory note is deemed to have a value equal to the outstanding balance of the note at that time ($100,000) because the promissory note bears interest at a rate that equals or exceeds the applicable Federal rate at that time (i.e., the Federal mid-term rate for December 1988). See paragraph (d)(3)(ii)(E)(*2*) of this section. Accordingly, $750,000 of the nonrecourse loan ($850,000 less $100,000) constitutes a liability for which the creditor's right to repayment is limited to one or more assets of the partnership, and the partnership is deemed to receive consideration of $750,000 in relief from such liability upon the hypothetical disposition of its improved real property. Because the adjusted basis of the partnership's real property equals $1,000,000 at the end of 1988, the partnership would recognize a taxable loss of $250,000 on this disposition ($1,000,000 less $750,000 of consideration). This loss would be allocated equally between the partners for the partnership taxable year ending on the date of the constructive liquidation.

	O	*P*
Capital accounts on formation	$125,000	$25,000
Less: loss	(125,000)	(125,000)
Capital accounts after constructive liquidation . . .	$0	($100,000)

(iii) P's obligation to restore the $100,000 deficit balance in P's capital account is governed by the terms of P's promissory note. As stated above, P's obligation to make a contribution to the partnership pursuant to the promissory note is recognized to the extent of the outstanding balance of that note at the time of the constructive liquidation because the note bears interest at a rate that equals or exceeds the applicable Federal rate at that time. Thus, P would be obligated to make a net contribution to the partnership of $100,000 as a result of the constructive liquidation. Under paragraph (d)(3)(ii)(B)-(*1*) of this section, the net contributions that the partners would be obligated to make to the partnership if the partnership constructively liquidated can be allocated to a partnership liability only to the extent of the outstanding partnership indebtedness with respect to that liability. The outstanding partnership indebtedness with respect to the liability for the nonrecourse loan equals $100,000 (the amount of such liability ($850,000) reduced by the portion of such liability for which the creditor's right to repayment from the partnership is limited to one or more assets of the partnership ($750,000)). See paragraph (d)(3)(ii)(B)(*4*) of this section. Thus, under paragraph (d)(3)(ii)(B)(*1*) of this section, the full amount of the $100,000 net contribution that P would be obligated to make to the partnership if it constructively liquidated at the end of 1988 will be allocated to the partnership liability for the nonrecourse loan.

(iv) At the end of 1988, P bears the economic risk of loss for $100,000 of the partnership liability for the nonrecourse loan, and no partner bears the economic risk of loss for the other $750,000 of that liability. See paragraph (d)(3)(i) of this section. Accordingly, the liability is treated as a recourse liability to the extent that P bears the economic risk of loss for such liability and as a nonrecourse liability to the extent of the excess. See paragraph (j)-(2) of this section. Under paragraph (d)(1) of this section, all $100,000 of the recourse liability is allocated to P. Under paragraph (e)(1)(iii) of this section, the nonrecourse liability is allocated between the partners in proportion to their equal interests in partnership profits. At the end of 1988, O and P are thus each allocated $375,000 of the nonrecourse liability of the partnership.

Example (14). (i) Q, the general partner, and R, the limited partner, form a limited partnership with cash contributions of $10,000 each. Q and R share partnership profits and losses equally. The partnership purchases residential rental property for its $20,000 of capital and an $80,000 nonrecourse loan from a commercial bank. The nonrecourse loan is secured by a mortgage on the rental property. Q also provides the bank with a guarantee that the loan will be repaid. If the partnership defaults on the loan, Q is liable to the bank for the difference between the value of the property and the outstanding balance of the loan. In connection with Q's guarantee, Q and R enter into an indemnification agreement whereby R agrees to reimburse Q for 50 percent of any payment that Q is required to make pursuant to the guarantee.

(ii) The indebtedness represented by nonrecourse loan obtained by the partnership to purchase the residential rental property is a partnership liability. See paragraph (g) of this section. Upon a constructive liquidation (within the meaning of paragraph (d)(3)(iii) of this section), the partnership is treated as if its residential rental property becomes worthless and the nonrecourse loan becomes due and payable because of the partnership's failure to make the required payments on the loan. If these events occurred, Q would be obligated to pay the outstanding balance of the nonrecourse loan to the bank under the guarantee. Under the indemnification agreement, however, Q would be entitled to be reimbursed by R for 50 percent of any payment made to the bank pursuant to the guarantee. Thus, Q and R would each be obligated to make a net payment to a creditor or other person of 50 percent of the liability for the nonrecourse loan if the partnership constructively liquidated. See paragraph (d)(3)(ii)(A) of this section. Under paragraph (d)-(3)(i) of this section, Q and R each bear the economic risk of loss for 50 percent of the partnership liability for the nonrecourse loan. Accordingly, the liability is a recourse liability that the partners share equally. See paragraph (d)(1) and (2) of this section.

Example (15). (i) S and T form a limited partnership at the beginning of 1989 solely to acquire and lease depreciable personal property. S, the general partner, and T, the limited partner, each contribute $10,000 in cash to the partnership. In 1989, the partnership purchases depreciable personal property for $20,000 in cash and a recourse purchase money note for $80,000. For 1989, the partnership has a taxable loss of $10,000, consisting of $17,000 gross rental income, $7,000 of interest expense, and a depreciation deduction of $20,000. The partnership agreement provides that the partners will share the taxable income and loss of the partnership equally. In addition, the partnership agreement provides that capital accounts will be determined and maintained for the partners in accordance with §1.7041(b)(2)(iv) and distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)). The partnership agreement also provides that any partner with a deficit balance in the partner's capital account following the liquidation of the partner's interest must restore that deficit to the partnership. While S is required to restore any deficit balance in S's capital account following the liquidation of S's interest within 90 days of such liquidation, T is not required to restore any deficit balance in T's capital account following the liquidation of T's interest for 2 years following the date of such liquidation (and any deficit balance in T's capital account at the time of any such liquidation will not bear interest during that two-year period). The partnership makes $10,000 of principal payments on the promissory note during 1989, and the outstanding balance of the promissory note at the end of 1989 is $70,000. Assume that the Federal short-term rate for December 1989 is 10 percent, compounded semiannually.

(ii) The indebtedness represented by the purchase money note is a partnership liability. See paragraph (g) of this section. Under paragraph (d)(3)(i) of this section, the partners bear the economic risk of loss for that liability at the end of 1989 to the extent that they would be obligated to make a net payment to a creditor or other person or a net contribution to the partnership with respect to such liability if the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section) at that time. If the partnership constructively liquidated at the end of 1989, the partnership would recognize a taxable loss of $80,000 on the disposition of its depreciable property for no consideration. This would result in a partnership net taxable loss of $90,000 for the partnership taxable year ending on the date of the constructive liquidation ($80,000 loss on the deemed disposition plus a $10,000 operating loss). This loss would be allocated to the partners as follows:

	S	*T*
Capital accounts on formation	$10,000	$10,000
Less: loss	(45,000)	(45,000)
Capital accounts after constructive liquidation . .	($35,000)	($35,000)

Accordingly, if the partnership constructively liquidated at the end of 1989, S and T would each be obligated to make a net contribution of $35,000 to the partnership to restore the deficit balances in their capital accounts following the liquidation of their partnership interests. Under paragraph (d)(3)-(ii)(E) of this section, however, T's obligation to make a contribution to the partnership pursuant to T's deficit restoration obligation is recognized only to the extent of the fair market value of that obligation at the time of the constructive liquidation because T is not required to satisfy that obligation by the later of (1) the end of the partnership taxable year in which T's interest is liquidated or (2) within 90 days after the date of such liquidation.

(iii) Because T's obligation to restore the deficit balance in T's capital account does not bear interest, the fair market value of the deficit restoration obligation that T would have if the partnership constructively liquidated is deemed to equal the imputed principal amount of that obligation under section 1274(b). See paragraph (d)(3)(ii)(E)(*2*)(*ii*)-(*B*) of this section. The imputed principal amount of T's deficit restoration obligation is computed by treating that obligation as a debt instrument to which section 1274 applies and by assuming that the sale or exchange in which such debt instrument was given as consideration occurred at the time of the constructive liquidation. Under section 1274(b), the imputed principal amount of a debt instrument equals the present values of all payments due under the debt instrument. The present value of a payment is determined as of the date of the sale or exchange by using a discount rate equal to the applicable Federal rate (within the meaning of section 1274(d)), compounded semiannually. The applicable Federal rate with respect to T's deficit restoration obligation is 10 percent, compounded semiannually (*i.e.*, the Federal short-term rate for December 1989). Using this discount rate, the present value of the $35,000 payment that T would be required to make two years after the constructive liquidation to restore the deficit balance in T's capital account equals $28,795. Thus, under paragraph (d)(3)(ii)(B)(*1*) of this section, T would be obligated to make a net contribution of $28,795 to the partnership with respect to the partnership liability for the purchase money note if the partnership constructively liquidated at the end of 1989. Under paragraph (d)(3)(ii)(D)(*2*) of this section, T is treated as if T actually discharges that obligation at the time of the constructive liquidation.

(iv) To the extent that T's deficit restoration obligation is not recognized, paragraph (d)(3)(ii) of this section is applied by assuming that T's obligation to make a contribution to the partnership did not exist. See paragraph (d)(3)(ii)(D)(*2*) of this section. In that case, S, as the sole general partner, would be obligated by operation of law to contribute an additional $6,205 of capital to the partnership to make up the shortfall. Accordingly, if the partnership constructively liquidated at the end of 1989, S would be obligated to make a net contribution of $41,205 ($35,000 plus $6,205) to the partnership with respect to the partnership liability for the purchase money note. See paragraph (d)(3)(ii)-(B) of this section.

(v) At the end of 1989, S and T bear the economic risk of loss for $41,205 and $28,795, respectively, of the partnership liability for the purchase money note. See paragraph (d)(3)(i) of this section. Therefore, that liability is a recourse liability that the partners share according to the economic risk of loss borne by each of them. See paragraph (d)(1) and (2) of this section.

Example (16). (i) U and V form a general partnership with cash contributions of $25,000 each. U and V share partnership profits and losses equally. The partnership purchases an apartment building for its $50,000 of capital and a $200,000 nonrecourse loan from a commercial bank. The nonrecourse loan is secured by a mortgage on the building. The loan documents provide that the partnership will be liable for the outstanding balance of the loan on a recourse basis to the extent of any decrease in the value of the apartment building resulting from the partnership's failure to properly maintain the property.

(ii) The indebtedness represented by the nonrecourse loan obtained by the partnership to purchase the apartment building is a partnership liability. See paragraph (g) of this section. If the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section), the apartment building would become worthless, the nonrecourse loan would become due and payable because of the partnership's failure to make the required payments on the loan, and the partnership would dispose of the apartment building in a fully taxable exchange involving the transfer of the building to the bank. Since under this example there are no facts that establish with reasonable certainty the existence of any liability on the part of the partnership (and its partners) for damages resulting from the partnership's failure to properly maintain the building, the obligations of the partnership with respect to the nonrecourse loan would be extinguished on the transfer of the apartment building to the bank, and the partners would not have any obligation to contribute additional funds to the partnership to discharge the liability for the nonrecourse loan. See paragraph (d)(3)(ii)(D)(*1*) of this section. In addition, neither U nor V would be obligated to make a payment to a creditor or other person with respect to that liability if the partnership constructively liquidated. Therefore, under paragraph (d)(3)(i) of this section, no partner bears the economic risk of loss for the partnership liability for the nonrecourse loan, and the liability constitutes a nonrecourse liability within the meaning of paragraph (e)(2) of this section. Under paragraph (e)(1) of this section, the partners share this nonrecourse liability equally because they share all partnership profits and losses equally.

Example (17). (i) W and X form a general partnership with cash contributions of $50,000 each. The partners share all partnership profits and losses equally. On January 1, 1990, the partnership purchases raw land for $100,000 on which it plans to construct an office building. The partnership obtains a nonrecourse construction loan commitment of $900,000 from a commercial bank to finance the construction of the office building. The construction loan is secured by a mortgage on the property and a completion guarantee from W. Under the completion guarantee, W agrees to provide the funds necessary to complete the construction of building to the extent construction costs exceed $900,000. At the end of 1990, the partnership has borrowed $500,000 under the construction loan commitment.

(ii) The indebtedness represented by the outstanding balance of the construction loan is a partnership liability. See paragraph (g) of this section. Under paragraph (d)(3)(i) of this section, no partner bears the economic risk of loss for that liability because no partner would be obligated to make a contribution to the partnership or a payment to a creditor or other person with respect to the partnership liability for the construction loan if the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section). See paragraph (d)(3)(ii)(A) and (B) of this section. Upon a constructive liquidation of the partnership, the construction loan is deemed to be due and payable in full because of the partnership's failure to make the required payments on the loan. See paragraph (d)(3)(iii)(A)(*2*) of this section. Under the completion guarantee, W would not be obligated to make any payments in satisfaction of the construction loan as a result of the partnership's default because W's liability under the completion guarantee is limited to bearing cost overruns.

(iii) Under paragraph (e)(2) of this section, the construction loan is a nonrecourse liability of the partnership because no partner bears the economic risk of loss for that loan. Under paragraph (e)(1) of this section, the partners share this nonrecourse liability equally because they share all partnership profits and losses equally.

Example (18). (i) Y and Z, a corporation, each contribute $100,000 to form a general partnership to acquire a hotel. The partners agree to share partnership profits and losses equally. The partnership purchases a hotel for its $200,000 of capital and a nonrecourse loan of $1,800,000 from VW, a commercial bank that is a wholly-owned subsidiary of Z. To secure its loan, VW takes a mortgage on the hotel and obtains a guarantee from Y. Under the guarantee, Y agrees to pay VW an amount equal to 50 percent of any loss that VW incurs on the loan. Y has no right to seek reimbursement from the partnership or Z for any amount that it pays to VW under the guarantee.

(ii) The indebtedness represented by the loan obtained by the partnership to purchase the hotel is a partnership liability. See paragraph (g) of this section. If the partnership constructively liquidated (within the meaning of paragraph (d)(3)(iii) of this section), VW would incur a loss equal to the outstanding balance of its loan to the partnership, and Y would be liable for 50 percent of that loss pursuant to the guarantee. Thus, Y bears the economic risk of loss for 50 percent of the partnership liability for the loan from VW. See paragraph (d)(3)-(i) of this section.

(iii) Z and VW are related persons (within the meaning of paragraph (h) of this section). Under paragraph (d)(3)(i)(B) of this section, a partner bears the economic risk of loss with respect to a partnership liability to the extent that the partner (or a person related to such partner) is the owner of the liability, and but for that paragraph, the liability would be treated as a nonrecourse liability under paragraph (e)(2) of this section. If this section were applied without regard to paragraph (d)(3)(i)(B) of this section, 50 percent of the partnership liability for the loan from VW would be a nonrecourse liability because no partner would bear the economic risk of loss for that portion of the liability. Accordingly, since Z and VW are related persons, Z bears the economic risk of loss for 50 percent of the liability for the loan from VW under paragraph (d)(3)-(i)(B) of this section. Because Z owns a one-half interest in the partnership, the de minimis rule set forth in paragraph (d)(3)(vii) of this section is inapplicable.

(iv) Under paragraph (d) of this section, the partnership liability for the loan from VW is a recourse liability, and the partners share that liability equally.

Example (19). (i) AB and CD form a general partnership with cash contributions of $30,000 each. AB and CD share all partnership profits and losses equally. The partnership purchases an apartment building from AB for its $60,000 in cash and a nonrecourse purchase money note for $240,000 that is secured by the building. The purchase money note given to AB by the partnership "wraps around" a $200,000 underlying nonrecourse note issued by AB to an unrelated person in connection with AB's acquisition of the building. The underlying nonrecourse note is also secured by the building.

(ii) The indebtedness represented by the purchase money note is a partnership liability. See paragraph (g) of this section. Under paragraph (d)(3)(i)(B) of this section, AB bears the economic risk of loss for only $40,000 of the liability for the purchase money note because AB is not considered to be the creditor with respect to that liability to the extent it reflects the debt on the underlying nonrecourse note. See the fourth sentence of paragraph (d)(3)(i) of this section. Therefore, under paragraph (d) of this section, $40,000 of the partnership liability for the purchase money note is a recourse liability that is allocated to AB. The remaining portion of the partnership liability is a nonrecourse liability because no partner bears the economic risk of loss for that liability. See paragraphs (e)(2) and (j)(2) of this section. Under, paragraph (e)(1) of this section, AB's and CD's shares of the nonrecourse liability are $100,000 each because they share all partnership profits and losses equally.

Example (20). (i) EF and GH, a widely held corporation, form a limited partnership to purchase and lease computer equipment. EF, the general partner, contributes $200,000 to the partnership, and GH, the limited partner, contributes $800,000 to the partnership. The partnership agreement provides that partnership profits and losses will be allocated 20 percent to EF and 80 percent to GH. GH invests in the partnership, in part, to obtain significant tax losses that EF has indicated would be available from an investment in the partnership. The partnership purchases computer equipment subject to a two-year lease for $10,000,000. To purchase the equipment, the partnership obtained a $9,000,000 nonrecourse loan, with a five-year term, from a commercial bank. Upon making the loan, the bank acquired a security interest in the computer equipment. Furthermore, in order to induce the bank to make a nonrecourse loan to the partnership, EF agreed to lease the computer equipment from the partnership under a master lease. The master lease is pledged to the bank as additional security. The rental payments due under the master lease will provide the partnership with sufficient cash flow to make the principal and interest payments due on the loan. EF's obligation to make the rental payments required under master lease is unconditional. EF must make those payments even if it is unable to sublease the equipment (after the existing two-year lease expires) or the equipment is damaged or destroyed. EF is also responsible for all costs associated with maintaining the equipment. Unless the loan that the partnership used to purchase the computer equipment is treated as a nonrecourse liability for purposes of section 752 and the regulations thereunder, GH will not be able to claim the tax losses that EF indicated would be available from an investment in the partnership.

(ii) The indebtedness represented by the nonrecourse loan the partnership obtained to purchase the computer equipment is a partnership liability. See paragraph (g) of this section. Under the general rule of paragraph (d)(3)(i) of this section, no partner bears the economic risk of loss for that liability. If no partner bears the economic risk of loss for the partnership liability, the liability will be treated as nonrecourse liability that EF and GH will share in accordance with their general profit sharing ratios. See paragraph (e) of this section. Paragraph (d)(3)(iv) of this section, however, provides that if one or more partners (or persons related to such partners) (1) undertake contractual obligations in order to acquire a loan, (2) those obligations eliminate substantially all the risk that the partnership will not satisfy its obligations under the loan (assuming that such partners (or related persons) satisfy their obligations), and (3) one of the principal purposes of the arrangement is to permit other partners to include a portion of such liability in the basis of their partnership interests, the partners that undertake such contractual obligations are considered to bear the economic risk of loss for that liability. Under the facts of this example, it must be concluded that one of the principal purposes for the master lease was to permit GH to include a portion of the nonrecourse loan in the basis of GH's partnership interest. Therefore, under paragraph (d)(3)(iv) of this section, EF bears the economic risk of loss for the partnership liability for the nonrecourse loan. Accordingly, for purposes of this section, the liability is a recourse liability that is allocated entirely to EF. See paragraph (d)(1) and (2) of this section.

Example (21). (i) KL and MN form a general partnership to purchase a shopping center. The partners each contribute $500,000 to the partnership and agree to share partnership profits and losses equally. On January 1, 1991, the partnership obtains a $4,000,000 nonrecourse loan, and purchases the shopping center for $5,000,000. The nonrecourse loan is secured by a mortgage on the shopping center. The interest on the nonrecourse loan accrues at a 15 percent annual rate and is payable on December 31 of each year. The principal amount of the nonrecourse loan is payable in a lump sum on December 31, 2005. MN guarantees the payment of all interest due on the nonrecourse loan. Under the guarantee, MN is unconditionally obligated to pay the nonrecourse lender any interest payment that the partnership fails to make in a timely manner. MN is not entitled to be reimbursed for any payments made to the lender pursuant to the guarantee.

(ii) The indebtedness represented by the nonrecourse loan obtained by the partnership to acquire the shopping center is a partnership liability. See paragraph (g) of this section. Under paragraph (d)(3)(i) of this section, no partner bears the economic risk of loss for that liability because the constructive liquidation of the partnership would not obligate any partner to make a payment to a creditor or other person or a net contribution to the partnership with respect to the liability for the nonrecourse loan. Under paragraph (d)(3)(v) of this section, however, MN's economic risk of loss for that liability must be increased by an amount equal to the sum of the present values of the remaining interest payments on the nonrecourse loan that MN would be obligated to make pursuant to the guarantee if the partnership does not make those payments. The present value of each interest payment due on the nonrecourse loan is computed by using a discount rate equal to the rate at which interest accrues on the loan (15 percent, compounded annually). At the time the partnership obtains the nonrecourse loan, the sum of the present values of all interest payments due on the loan equals $3,508,422, and MN therefore bears the economic risk of loss for $3,508,422 of the partnership liability for the $4,000,000 loan. Accordingly, at the time the partnership obtains the nonrecourse loan, $3,508,422 of the partnership liability for that loan constitutes a recourse liability that must be allocated entirely to MN. See paragraph (d)(1) and (2) of this section. Only $491,578 of the $4,000,000 loan constitutes a nonrecourse liability that will be allocated equally between the partners under paragraph (e) of this section.

Example (22). (i) OP and QR form a limited partnership to acquire and operate a commercial office building. OP, the general partner, contributes $20,000, and QR, the limited partner, contributes $180,000 to the partnership. The partnership obtains an $800,000 nonrecourse loan and purchases the building on leased land for $1,000,000. The nonrecourse loan is secured only by the building, and no principal payments are due for five years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)), and any partner with a deficit balance in the partner's capital account following the liquidation of the partner's interest must restore that deficit to the partnership (as set forth in §1.704-1(b)(2)(*ii*)(*b*)(*3*)). The partnership agreement also contains a minimum gain chargeback (in accordance with §1.704-1T(b)(4)(iv)(*e*)). The partnership agreement provides that, except as otherwise required by its minimum gain chargeback provision, (1) all partnership items will be allocated 10 percent to OP and 90 percent to QR until the partnership has recognized items of income and gain that exceed the items of loss and deduction it has recognized over its life, and (2) all further partnership items will be allocated equally between OP and QR. Finally, the partnership agreement specifies that OP and QR have equal interests in partnership profits for purposes of determining the partners' shares of the nonrecourse liabilities of the partnership (which is consistent with the equal division of all partnership income and gain that is required after the partnership has recognized items of income and gain that exceed the items of loss and deduction that it has recognized over its life). At the time the partnership agreement is entered into, there is a reasonable likelihood that over the partnership's life it will recognize amounts of income and gain (the allocation of which will have substantial economic effect) significantly in excess of the amounts of loss and deduction allowed to the partnership.

(ii) In each of the partnership's first 2 taxable years, it generates rental income of $95,000, operating expenses (including land lease payments) of $10,000, interest expense of $80,000, and a depreciation deduction of $90,000, resulting in a taxable loss of $85,000 in each of those years. The partnership agreement allocates 10 percent of these losses to OP and 90 percent to QR, and this allocation has substantial economic effect. If the partnership were to dispose of the building in full satisfaction of the nonrecourse loan at the end of year 1 or 2, the partnership would not realize any gain because the adjusted basis of the building exceeds the outstanding balance of the nonrecourse loan at the end of each of those years. Thus, at the end of years 1 and 2, there is no partnership minimum gain. See §1.704-1T(b)(4)(iv)(*c*). In its third taxable year, the partnership again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a depreciation deduction of $90,000, resulting in a taxable loss of $85,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse loan at the end of that year, it would realize $70,000 of gain ($800,000 amount realized less $730,000 adjusted tax basis). Because the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during the year) is $70,000, the amount of partnership nonrecourse deductions for the year is $70,000, consisting of depreciation deductions allowable with respect to the building of $70,000. See §1.704-1T(b)(4)(iv)(*b*) and (*c*). Pursuant to the partnership agreement, all partnership items comprising the taxable loss of $85,000, including the $70,000 of nonrecourse deductions, are allocated 10 percent to OP and 90 percent to QR. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	OP	*QR*
Capital account on formation	$20,000	$180,000
Less: loss in years 1 and 2	(17,000)	(153,000)
Less: loss in year 3 (without non-recourse deductions)	(1,500)	(13,500)
Less: nonrecourse deductions in year 3	(7,000)	(63,000)
Capital account at end of year 3	($5,500)	($49,500)

This allocation of the $70,000 of nonrecourse deductions 10 percent to OP and 90 percent to QR is deemed to be made in accordance with the partners' interest in the partnership under §1.704-1T(b)(4)(iv)(d). See §1.704-1T(b)(5) (example 20 (i)). At the end of the partnership's third taxable year, OP's and QR's shares of partnership minimum gain are $7,000 and $63,000, respectively. See §1.704-1T(b)(4)(iv)(*f*)

(iii) The indebtedness represented by the nonrecourse loan obtained by the partnership to purchase the office building is a partnership liability. See paragraph (g) of this section. Under paragraph (d)(3)(i) of this section, no partner bears the economic risk of loss for that liability. Therefore, under paragraph (e)(2) of this section, the liability is a nonrecourse liability that the partners will share in the manner prescribed under paragraph (e)(1) of this section. At the end of years 1 and 2, the nonrecourse liability is allocated equally between the partners under paragraph (e)(1)(iii) of this section. The partners share the nonrecourse liability equally because the partnership agreement specifies that, for purposes of determining the partners' shares of the nonrecourse liabilities of the partnership, each partner has a 50 percent interest in partnership profits, which is consistent with allocations (which have substantial economic effect) of some significant item of partnership income or gain. See paragraph (e)(3)(ii)(C) of this section. Thus, at the end of years 1 and 2, each partner's share of the nonrecourse liability is $400,000.

(iv) At the end of year 3, there is partnership minimum gain, and OP's and QR's shares of partnership minimum gain are $7,000 and $63,000, respectively. Under paragraph (e)(1)(i) of this section, the nonrecourse liability is allocated to the partners first according to their shares of partnership minimum gain, and any excess is allocated equally between the partners under paragraph (e)(1)(iii) of this section. See paragraph (e)(3)(ii) (A) and (B) of this section. Therefore, at the end of year 3, OP's and QR's shares of the nonrecourse liability are $372,000 ($7,000 share of partnership minimum gain plus $365,000 share of the excess) and $428,000 ($63,000 share of partnership minimum gain plus $365,000 share of the excess), respectively.

Example (23). (i) ST and UV form a general partnership to own and operate residential rental property. UV contributes $500,000 to the partnership that it uses to purchase residential rental property. ST contributes an apartment building with a $1,200,000 fair market value and $520,000 adjusted tax basis. The apartment building contributed by ST is subject to a $700,000 nonrecourse loan. ST and UV share all partnership profits and losses equally.

(ii) The indebtedness represented by the nonrecourse loan is a partnership liability. See §1.752-2T regarding the treatment of liabilities to which contributed or distributed property is subject. Under paragraph (e)(2) of this section, this liability is a nonrecourse liability because no partner bears the economic risk of loss for such liability. See paragraph (d)(3)(i) of this section. Under paragraph (e)(1)(ii) of this section, ST is allocated $180,000 of the partnership liability for the nonrecourse loan because ST would be allocated taxable gain of $180,000 under section 704(c) if the partnership disposed of (in a taxable transaction) the apartment building in full satisfaction of the nonrecourse liability. The remainder of the nonrecourse liability is allocated between the partners in proportion to their equal interests in partnership profits. See paragraph (e)(1)(iii) of this section. Accordingly, ST's and UV's shares of the nonrecourse liability are $440,000 ($180,000 share of section 704(c) minimum gain and $260,000 share of the excess of the nonrecourse liability over the section 704(c) minimum gain) and $260,000 (which equals UV's $260,000 share of the excess of the nonrecourse liability over the section 704 (c) minimum gain), respectively.

§1.752-2T Liabilities to which contributed or distributed property is subject (temporary).

(a) *In general.* For purposes of section 752 and the regulations thereunder, if property is contributed by a partner to the partnership or distributed by the partnership to a partner and such property is subject to a liability of the transferor (within the meaning of §1.752-1T(f)(2), (g), and (j)(1)), the transferee shall be considered to have assumed such liability to the extent of the amount of such liability that does not exceed the fair market value of the property at the time of the contribution or distribution. See section 752(c).

(b) *Examples.* The following examples illustrate the application of the rules of this section :

Example (1). A contributes property with an adjusted basis of $1,000 to a general partnership in exchange for a one-third interest in partnership. At the time of contribution, the property is subject to recourse debt of $150 and has a fair market value in excess of $150. The recourse debt to which the property is subject is a liability of A within the meaning of §1.752-1T(g). Under this section, the partnership is considered to have assumed the liability to which the property is subject upon A's contribution of the property to the partnership (without regard to whether the partnership assumes such liability within the meaning of §1.752-1T(f)). As a result of this assumption, A's individual liabilities decrease by $150. At the same time, however, A's share of the liabilities of the partnership increases by $150, assuming that, after the contribution, A bears the economic risk of loss (within the meaning of §1.752-1T(d)(3)) for the entire amount of such liability because A remains personally liable to the creditor. Only the net increase or decrease in the sum of A's share of the liabilities of the partnership and A's individual liabilities is taken into account in applying section 752. See §1.752-1T(j)(3) (relating to increase and decrease in share of liabilities resulting from same transaction). Accordingly, since there is no net change in the sum of A's share of the liabilities of the partnership and A's individual liabilities, A will not be considered to have made a contribution of money to the partnership or to have received a distribution of money from the partnership under §1.752-1T(b) or (c) Therefore, A's basis for A's partnership interest is $1,000 (A's basis for the contributed property of $1,000).

Example (2). B contributes property with an adjusted basis of $1,000 to partnership AB in exchange for a one-half interest in the partnership. At the time of contribution, the property is subject to nonrecourse debt of $2,500 and has a fair market value in excess of $2,500. The nonrecourse debt to which the property is subject is a liability of B within the meaning of §1.752-1T(g). In addition, to the extent that the liability is assumed by the partnership, the liability will be treated as a nonrecourse liability of the partnership under §1.752-1T(e)(2) because no partner will bear the economic risk of loss for such liability. Under this section, the partnership is considered to have assumed the liability to which the property is subject upon B's contribution of the property to the partnership. As a result of this assumption, B's individual liabilities decrease by $2,500. At the same time, however, B's share of the liabilities of the partnership increases by $2,000 (the $1,500 of gain that would be allocated to B under section 704 (c) if the partnership disposed of the property (in a taxable transaction) in full satisfaction of the nonrecourse debt encumbering such property, and B's $500 (one-half) share of the amount by which the nonrecourse liability exceeds that gain). See §1.752-1T(e)(1) (relating to a partner's share of nonrecourse liabilities). Only the net decrease of $500 in the sum of B's share of the liabilities of the partnership and B's individual liabilities is taken into account in applying section 752. See §1.752- 1T(j)(3) (relating to increase and decrease in share of liabilities resulting from same transaction). Therefore, under §1.752-1T(c), B will be treated as receiving a distribution of money in the amount of $500. Because the basis of B's partnership interest is $1,000 (the basis of the property contributed by him), the distribution to B of $500 does not result in the realization of any gain under section 731(a). B's basis for B's partnership interest is $500 (B's basis for the contributed property of $1,000 reduced by $500, the amount of the distribution under §1.752-1T(c)).

§1.752-3T Sale or exchange of partnership interest (temporary).

For purposes of determining the amount of any gain or loss realized on a sale, exchange, or other disposition of an interest in a partnership, liabilities shall be treated in the same manner as liabilities in connection with the sale, exchange, or other disposition of property not associated with partnerships. For example, if a partner whose share of partnership liabilities is $250 sells the partner's interest in the partnership for $750 cash and at the same time transfers to the purchaser the partner's $250 share of partnership liabilities, the amount realized by the selling partner on the sale is $1,000.

§1.752-4T Effective dates and transition rules (temporary).

(a) *In general.* Except as otherwise provided in this section, §§1.752-1T, -2T, and -3T shall apply to any liability incurred or assumed by a partnership on or after January 30, 1989, unless such liability is incurred or assumed by the partnership pursuant to a written binding contract in effect prior to December 29, 1988 and at all times thereafter.

(b) *Partner loans and guarantees.* If at any time on or after March 1, 1984, a partner bears the economic risk of loss (within the meaning of §1.752-1T(d)(3)) for a partnership liability that is nonrecourse for purposes of §1.1001-2 as a result of guaranteeing the payment of all or part of such liability or holding an interest in such liability as a creditor, the rules of §§1.752-1T, -2T, and -3T shall apply to such liability beginning on the later of—

(1) March 1, 1984; or

(2) The first date on which such partner bears the economic risk of loss with respect to the liability as a result of such guarantee or as a result of holding an interest in such liability as a creditor.

A guarantee made, or an interest in a liability as a creditor acquired, pursuant to a written binding contract in effect prior to March 1, 1984, and at all times thereafter, shall be disregarded for purposes of the preceding sentence. For purposes of this paragraph (b), the determination of whether a partner bears the economic risk of loss with respect to a partnership liability shall be made in accordance with the rules of §1.752-1T(d)(3).

(c) *Election*—(1) *In general.* Notwithstanding anything to the contrary in this section, a partnership may elect to apply the provisions of §§1.752-1T, -2T, and -3T to all of its liabilities as of the beginning of the first taxable year of such partnership ending after December 29, 1988.

(2) *Time and manner of election.* An election under this paragraph (c) is made by attaching a written statement to the partnership return for the first taxable year of such partnership ending after December 29, 1988. A written statement required pursuant to this paragraph (c)(2) must include the name, address, and taxpayer identification number of the partnership making such statement and contain a declaration that an election is being made under this paragraph (c).

(d) *Coordination with amendments to section 704(b) regulations.* If all or part of a partnership liability is treated as one or more partner nonrecourse debts under §1.704-1T(b)(4)(iv)(*h*) and, but for this paragraph (d), §§1.752-1T, -2T, and -3T would not apply to such liability, then the partnership may treat such liability as a liability to which §§1.752-1T, -2T, and -3T apply to the extent of the partners' shares (if any) of the minimum gain attributable to any such partner nonrecourse debts (within the meaning of §1.704-1T(b)(4)(iv)(*h*)(*5*)). If both §1.704-1(b)(4)(iv) and §§1.752-1T, -2T, and -3T apply to a taxable year of a partnership, any reference included in §§1.752-1T, -2T, and -3T to §1.704-1T(b)(4)(iv) shall be treated as a reference to the appropriate provision of §1.704-1(b)(4)(iv) for purposes of applying §§1.752-1T, -2T, and -3T to such partnership for such taxable year. See §§1.704-1(b)(4)(iv)(*h*) and 1.704-1T(b)-(4)(iv)(*m*) for rules regarding the effective dates of §§1.704-1(b)(4)(iv) and 1.704-1T (b)(4)(iv).

(e) *Cross reference.* For the rules applicable to liabilities of a partnership that are not subject to §§1.752-1T, -2T, and -3T, see 26 CFR 1.752-1.

Par. 4. A new §1.704-1T is added to read as follows:

§1.704-1T Partner's distributive share.

(a)[Reserved.]

(b) *Determination of partner's distributive share*—(0) Cross-references.

(iii) [Reserved.]

(iv) *Allocations attributable to nonrecourse liabilities*—*(a) In general*—*(1) Allocation of nonrecourse deductions.* An allocation of an item of loss, deduction, or section 705(a)(2)(B) expenditure attributable to nonrecourse liabilities of the partnership (''nonrecourse deduction'') cannot have economic effect because, in the event there is an economic burden that corresponds to such an allocation, the creditor alone bears that burden. Thus, nonrecourse deductions must be allocated in accordance with the partners' interests in the partnership. Paragraph (b)(4)(iv)(*d*) of this section, however, provides a test under which certain allocations of nonrecourse deductions will be deemed to be in accordance with the partners' interests in the partnership. If that test is not satisfied, the partners' distributive shares of nonrecourse deductions will be determined, under §1.704-1(b)(3), according to the partners' overall economic interests in the partnership. See also paragraph (b)(4)(iv)(*h*) of this section for special rules regarding the allocation of deductions attributable to nonrecourse debt with respect to which a partner bears the economic risk of loss.

(2) Allocation of minimum gain. To the extent that the amount of a nonrecourse liability encumbering an item of partnership property exceeds the adjusted tax basis of such property (or book value of such property if the property is properly reflected on the books of the partnership at a value that differs from its adjusted tax basis), a disposition of such property will generate gain in an amount that is at least equal to such excess (''partnership minimum gain''). See paragraph (b)(4)(iv)(*c*) of this section for rules regarding the computation of partnership minimum gain. An increase in partnership minimum gain may be attributable to items of partnership loss, deduction, or section 705(a)(2)(B) expenditure that decrease the adjusted tax basis (or book value) of property subject to a nonrecourse liability of the partnership or a nonrecourse borrowing by the partnership that exceeds the adjusted tax basis (or book value) of the partnership property encumbered by such liability. To the extent that an increase in partnership minimum gain is attributable to items of partnership loss, deduction, or section 705(a)(2)(B) expenditure, such items are treated as nonrecourse deductions under paragraph (b)(4)(iv)(*b*) of this section. Although an allocation of nonrecourse deductions cannot have economic effect, the amount of nonrecourse deductions allocated to any partner decreases such partner's capital account. Similarly, although the allocation to a partner of partnership minimum gain that is attributable to nonrecourse deductions claimed by the partnership increases the partner's capital account, the allocation cannot have economic effect because the minimum gain merely offsets nonrecourse deductions previously claimed by the partnership and does not necessarily bear any relationship to the value of partnership property. Thus, minimum gain that is attributable to nonrecourse deductions claimed by the partnership must be allocated to the partners that were allocated such nonrecourse deductions to prevent such gain from impairing the economic effect of other partnership allocations. In addition, if an increase in partnership minimum gain is attributable to a nonrecourse borrowing that is used to make a distribution to the partners, then such minimum gain represents the unrecognized gain of which the distributee-partners have effectively reaped the economic benefit through the use of nonrecourse debt. An allocation of such minimum gain can have economic effect only if the allocation is made to the partners that received the economic benefit of that gain. Accordingly, under paragraph (b)(4)(iv)-(*e*) of this section, minimum gain attributable to nonrecourse deductions claimed by the partnership or the proceeds of a nonrecourse liability distributed to the partners by the partnership must be allocated to the partners that were allocated such deductions or received such distributions.

(b) Determination of nonrecourse deductions. The amount of nonrecourse deductions for a partnership taxable year equals the excess, if any, of the net increase in the amount of partnership minimum gain during such year, over the aggregate amount of any distributions during such year of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain. See examples (20)(i) and (vi), (21), and (22) of paragraph (b)(5) of this section. The nonrecourse deductions for a partnership taxable year shall consist first of depreciation or cost recovery deductions with respect to items of partnership property subject to one or more nonrecourse liabilities of the partnership to the extent of the increase in minimum gain attributable to the nonrecourse liabilities to which each such item of property is subject (or if such depreciation or cost recovery deductions exceed the amount of nonrecourse deductions for the year,

then a proportionate share of each such deduction shall constitute a nonrecourse deduction), and the remainder of such nonrecourse deductions, if any, shall consist of a pro rata portion of other items of partnership loss, deduction, and section 705(a)(2)(B) expenditure for that year. See example (23) of paragraph (b)-(5) of this section. In addition, if the amount of nonrecourse deductions for a partnership taxable year exceeds the total amount of the items of partnership loss, deduction, and section 705(a)(2)(B) expenditure for such year, then an amount of the net increase in partnership minimum gain for such year equal to that excess shall, for purposes of this paragraph (b)(4)(iv), be treated as an increase in partnership minimum gain for the immediately succeeding partnership taxable year for purposes of determining whether there is a net increase or a net decrease in partnership minimum gain during such taxable year. For example, if a partnership encumbers partnership property with a nonrecourse liability that results in a net increase in partnership minimum gain for the taxable year, but the partnership does not distribute any proceeds of the liability during the year and the amount of such net increase in minimum gain exceeds the partnership's losses, deductions, and section 705(a)-(2)(*b*) expenditures for such year, then the partnership will have a net increase in partnership minimum gain for the taxable year that cannot be allocated either to distributions or to losses, deductions, or section 705(a)(2)(B) expenditures, thereby leaving the partnership with excess nonrecourse deductions for the year. See example (20)(vi) of paragraph (b)(5) of this section. For purposes of this paragraph (b)(4)(iv)(*b*), the items of partnership loss, deduction, and section 705(a)(2)(B) expenditure for a partnership taxable year are determined without regard to any item that is treated as a partner nonrecourse deduction under paragraph (b)(4)(iv)(*h*)(*3*) of this section.

(c) *Partnership minimum gain.* The amount of partnership minimum gain is determined by computing, with respect to each nonrecourse liability of the partnership, the amount of gain (of whatever character), if any, that would be realized by the partnership if it disposed of (in a taxable transaction) the partnership property subject to such liability in full satisfaction thereof (and for no other consideration), and by then aggregating the amounts so computed. See examples (20)(i) and (iv), (21), and (22) of paragraph (b)(5) of this section. For purposes of determining the amount of such gain, (*1*) the adjusted tax basis of partnership property subject to two or more liabilities of equal priority shall be allocated among such liabilities in proportion to the respective outstanding balances of such. liabilities, and (*2*) the adjusted tax basis of partnership property subject to two or more liabilities of unequal priority shall be allocated to the liabilities of an inferior priority (in accordance with subdivision (*1*) of this paragraph (b)(4)(iv)-(*c*)) only to the extent of the excess, if any, of the adjusted tax basis of such property over the aggregate outstanding balance of the liabilities of superior priority. Only the portion of the property's adjusted tax basis that is allocated to nonrecourse liabilities of the partnership shall be used in computing minimum gain. See example (20)(v) and (vii) of paragraph (b)(5) of this section. If partnership property subject to one or more nonrecourse liabilities of the partnership is, under §1.704-1(b)(2)(iv)(*d*), (*f*), or (*r*), properly reflected on the books of the partnership at a book value that differs from the adjusted tax basis of such property, then the determinations under this paragraph (b)(4)(iv) shall be made with reference to such book value. See example (22) of paragraph (b)(5) of this section. For purposes of this paragraph (b)(4)(iv), in determining the net increase or decrease in partnership minimum gain during any partnership taxable year in which the capital accounts of the partners are increased pursuant to §1.704-1(b)(2)(iv)(*f*) or (*r*) to reflect a revaluation of partnership property subject to one or more nonrecourse liabilities of the partnership, any decrease in partnership minimum gain attributable to each such revaluation shall be added back to the net decrease or increase otherwise determined. See example (22)(iii) of paragraph (b)(5) of this section.

(*d*) *Requirements to be satisfied.* Allocations of nonrecourse deductions are deemed to be made in accordance with the partners' interests in the partnership if and only if—

(*1*) Throughout the full term of the partnership, requirements (*1*) and (*2*) of §1.704-1(b)(2)(ii)(*b*) are satisfied;

(*2*) Beginning in the first taxable year in which there are nonrecourse deductions and thereafter throughout the full term of the partnership, the partnership agreement provides for allocations of nonrecourse deductions among the partners in a manner that is reasonably consistent with allocations, which have substantial economic effect, of some other significant partnership item attributable to the property securing nonrecourse liabilities of the partnership;

(*3*) Beginning in the first taxable year of the partnership in which the partnership has nonrecourse deductions or makes a distribution of proceeds of a nonrecourse liability that are allocable to an increase in minimum gain and thereafter throughout the full term of the partnership, the partnership agreement contains a provision that complies with the requirements of paragraph (b)(4)(iv)(*e*) of this section (''minimum gain chargeback''); and

(*4*) All other material allocations and capital account adjustments under the partnership agreement are recognized under §1.704-1 (b) (without regard to whether allocations of adjusted tax basis and amount realized under section 613A(c)(7)(D) are recognized under §1.704-1(b)(4)(v)).

(*e*) *Minimum gain chargeback*—(*1*) *In general.* If there is a net decrease in partnership minimum gain for a partnership taxable year, the partners must be allocated items of partnership income and gain in accordance with this paragraph (b)(4)(iv)(*e*) (''minimum gain chargeback'').

(*2*) *Allocations required pursuant to minimum gain chargeback.* If a minimum gain chargeback is required for a partnership taxable year, then each partner must be allocated items of income and gain for such year (and, if necessary, for subsequent years) in proportion to, and to the extent of, an amount equal to the greater of—

(i) The portion of such partner's share of the net decrease in partnership minimum gain during such year that is allocable to the disposition of partnership property subject to one or more nonrecourse liabilities of the partnership; or

(*ii*) The deficit balance in such partner's capital account at the end of such year (determined before any allocation of partnership income, gain, loss, deduction, or section 705(a)(2)(B) expenditure for such year and excluding from such deficit capital account balance any amount that such partner is obligated to restore under §1.704-1(b)(2)(ii)(*c*), as well as any addition thereto pursuant to the next to last sentences of paragraph (b)(4)(iv)(*f*) and (*h*)(*5*) of this section after taking into account thereunder any changes during such year in partnership minimum gain and in the minimum gain attributable to any partner nonrecourse debt), provided that if requirements (*1*) and (*2*) of §1.704-1(b)(2)(ii)(*b*) have not been satisfied throughout the full term of the partnership, the amount determined under this paragraph (b)(4)(iv)(*e*)(*2*)(*ii*) shall equal zero and the amount of any allocation in addition to that required under paragraph (b)(4)(iv)(*e*)(*2*)(*i*) of this section that must be made to such partner in connection with the net decrease in partnership minimum gain during such year shall be determined in accordance with the partner's interest in the partnership under §1.704-1(b)(3).

See examples (20)(i) and (22)(v) of paragraph (b)(5) of this section. For purposes of this paragraph(b)(4)(iv)(*e*)(*2*), the partners' capital accounts shall be reduced by the items described in §1.704-1(b)(2)(ii)(*d*)(*4*), (*5*), and (*6*). See paragraph (b)(4)(iv)(*f*) of this section for rules regarding the determination of a partner's share of a net decrease in partnership minimum gain. The portion of a partner's share of any net decrease in partnership minimum gain for a partnership taxable year that is allocable to the disposition of partnership property subject to one or more nonrecourse liabilities of the partnership equals the amount determined by multiplying the partner's share of the net decrease in partnership minimum gain for the year by a fraction, the numerator of which is the portion of the net decrease in partnership minimum gain for the year that is allocable to the disposition of partnership property subject to one or more nonrecourse liabilities of the partnership and the denominator of which is the net decrease in partnership minimum gain for the year. For purposes of the preceding sentence, a net decrease in partnership minimum gain for a partnership taxable year is allocable to the disposition of partnership property subject to one or more nonrecourse liabilities of the partnership to the extent of any decrease in partnership minimum gain during such year that resulted from the disposition of any such property. Any minimum gain chargeback required for a partnership taxable year shall consist first of gains recognized from the disposition of items of partnership property subject to one or more nonrecourse liabilities of the partnership to the extent of the decrease in minimum gain attributable to the disposition of such items of property (or if such gains exceed the amount of the minimum gain chargeback required for such taxable year, the minimum gain chargeback shall consist of a proportion share of each such gain), and the remainder of such minimum gain chargeback shall consist of a pro rata portion of the other items of partnership income and gain for that year. An allocation of items of income or gain required for a partnership taxable year pursuant to a minimum gain chargeback shall be deemed to be in accordance with the partners' interests in the partners and shall be made before any other allocation of partnership items is made under section 704 (b) for such year.

(3) *Coordination with §1.704-1(b)(2)(ii).* For purposes of §1.704-1(b)(2)(ii)(*d*)(*6*), offsetting increases to a partner's capital account taken into account under that paragraph do not include items of partnership income and gain that are expected to be allocated to that partner pursuant to this paragraph (b)(4)(iv)(*e*), provided that any subsequent distributions that are expected to be made to such partner of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain shall be deemed to be offset by increases to the partner's capital account for purposes of that section.

(f) *Partner's share of partnership minimum gain.* A partner's share of partnership minimum gain at the end of any partnership taxable year equals the excess (if any) of—

(*1*) The sum of the nonrecourse deductions allocated to such partner (and such partner's predecessors in interest) up to that time and the aggregate distributions to such partner (and such partner's predecessors in interest) up to that time of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain; over

(*2*) The sum of such partner's (and such partner's predecessors in interest) aggregate share of the net decreases in partnership minimum gain up to that time and such partner's (and such partner's predecessors in interest) aggregate share of the decreases up to that time in partnership minimum gain resulting from revaluations of partnership property subject to one or more nonrecourse liabilities of the partnership.

A partner's share of the net decrease in partnership minimum gain during a partnership taxable year equals an amount that bears the same relation to the net decrease in partnership minimum gain during such year as such partner's share of partnership minimum gain at the end of the immediately preceding taxable year of the partnership (or, if later, the time immediately following the last time that the capital accounts of the partners are increased pursuant to §1.704-1(b)(2)(iv)(*f*) or (*r*) to reflect a revaluation of partnership property subject to one or more nonrecourse liabilities of the partnership) bears to the amount of partnership minimum gain at the end of such preceding taxable year (or such later date). See examples (20)(i) and (iv) and (21) of paragraph (b)(5) of this section. A partner's share of any decrease in partnership minimum gain resulting from a revaluation of partnership property equals the amount of the increase in such partner's capital account attributable to such revaluation to the extent of the reduction in minimum gain caused by such revaluation. See example (22)(i) of paragraph (b)(5) of this section. For purposes of §1.704-1(b)(2)(ii)(*d*), the amount of a partner's share of partnership minimum gain shall be added to the limited dollar amount, if any, of the deficit balance in such partner's capital account that such partner is obligated to restore. See examples (20)(i) and (22)(i) of paragraph (b)(5) of this section.

(*g*) *Distribution of nonrecourse liability proceeds allocable to an increase in minimum gain*—(*1*) *In general.* If during a partnership taxable year a partnership makes a distribution to the partners that is allocable to the proceeds of any nonrecourse liability of the partnership such distribution is allocable to an increase in partnership minimum gain to the extent of the amount of the net increase, if any, in partnership minimum gain for such taxable year that is allocated to such nonrecourse liability under paragraph (b)(4)(iv)(*g*)(*2*) of this section.

(*2*) *Allocation of net increase in partnership minimum gain.* A net increase in partnership minimum gain for a taxable year is allocated to a nonrecourse liability of the partnership under this paragraph (b)(4)(iv)(*g*)(*2*) to the extent of the amount of any increase in partnership minimum gain for such year that arose as a result of incurring such nonrecourse liability (that is, the amount of any increase in partnership minimum gain for such year that arose as a result of encumbering partnership property with a nonrecourse liability that exceeds its adjusted tax basis or book value, as the case may be). See example (20)(vi) of paragraph (b)(5) of this section. If an amount of the net increase in partnership minimum gain for a partnership taxable recourse liability of the partnership pursuant to the first sentence of this paragraph (b)(4)(iv)(*g*)(*2*) and the sum of the amounts so allocated exceeds the total amount of such net increase, then the amount of such net increase that shall be allocated to each such liability equals the amount determined by multiplying the total amount of such net increase by the fraction obtained by dividing—

(*i*) The amount of such net increase that would be allocated to such liability under the first sentence of this paragraph (b)(4)(iv)(*g*)(2); by

(*ii*) The sum of the amounts of such net increase that would be allocated to all such liabilities under the first sentence of this paragraph (b)(4)(iv)(*g*)(*2*).

(*3*) *Carryover to immediately succeeding taxable year.* If the amount of the net increase in partnership minimum gain for a taxable year of the partnership that is allocated to a nonrecourse liability of the partnership under paragraph (d)(4)(iv)-(*g*)(*2*) of this section exceeds the aggregate amount of the distributions to the partners during such year that are allocable to the proceeds of such liability ("excess allocable amount") and all or part of the net increase in partnership minimum gain for such year is treated as an increase in partnership minimum gain during the immediately succeeding taxable year under paragraph (b)(4)(iv)(*b*) of this section, then an amount of such deemed increase in partnership minimum gain equal to such excess allocable amount (or, if less, the amount of such deemed increase) shall be treated as an increase in partnership minimum gain that arose as a result of incurring the nonrecourse liability to which such excess allocable amount is attributable for purposes of applying paragraph (b)-(4)(iv)(*g*)(*2*) of this section in such succeeding taxable year. See example (20)-(vi) of paragraph (b)(5) of this section. If for a partnership taxable year there is an excess allocable amount with respect to more than one nonrecourse liability of the partnership and the sum of such excess allocable amounts exceeds the amount of the net increase in partnership minimum gain for such year that is treated as an increase in partnership minimum gain during the immediately succeeding taxable year, then the amount of such deemed increase in partnership minimum gain which is treated as an increase in partnership minimum gain that arose as a result of incurring any such nonrecourse liability shall equal the amount determined by multiplying the amount of such deemed increase by the fraction obtained by dividing—

(*i*) The excess allocable amount for such year with respect to such nonrecourse liability; by

(*ii*) The sum of the excess allocable amounts for such year with respect to all nonrecourse liabilities.

(*4*) *Distribution allocable to proceeds of nonrecourse liability.* The determination of whether a distribution by the partnership to one or more partners is allocable to proceeds of a nonrecourse liability may be made under any reasonable method. For purposes of the preceding sentence, the rules prescribed under §1.163-8T for allocating debt proceeds among expenditures (applying those rules to the partnership as if it were an individual) constitutes a reasonable method for determining (*i*) whether the proceeds of a nonrecourse liability have been distributed to the partners and (*ii*) the partners to whom such proceeds have been distributed.

(*h*) *Nonrecourse debt of the partnership where a partner bears economic risk of loss*—(*1*) *In general.* The rationale for the special rule contained in this paragraph (b)(4)(iv) is that, in the event there is an economic burden that corresponds to the nonrecourse deductions, none of the partners will bear that burden. Accordingly, for purposes of this paragraph (b)(4)(iv)—

(*i*) A nonrecourse liability of the partnership is a liability of the partnership (or portion thereof) for which no partner bears the economic risk of loss (within the meaning of paragraph (b)(4)(iv)(*k*)(*1*) of this section); and

(*ii*) The rules of this paragraph (*h*) govern the allocation of items of partnership income, gain, loss, deduction, or section 705(a)(2)(B) expenditure that must be made (and are considered in accordance with the partners' interests in the partnership) in connection with any nonrecourse debt (within the meaning of paragraph (b)(4)(iv)(*k*)(*2*) of this section) of the partnership for which any partner bears the economic risk of loss ("partner nonrecourse debt").

(*2*) *Allocation of losses, deductions, and expenditures attributable to partner nonrecourse debt.* Any item of partnership loss, deduction, or section 705(a)(2)(B) expenditure that is attributable to a partner nonrecourse debt ("partner nonrecourse deduction") must be allocated to the partner that bears the economic risk of loss for such debt. If more than one partner bears the economic risk of loss for a partner nonrecourse debt, any partner nonrecourse deduction attributable to such debt must be allocated among such partners in accordance with the ratios in which the partners share the economic risk of loss for such partner nonrecourse debt.

(*3*) *Determination of partner nonrecourse deductions.* For any partnership taxable year, the amount of partner nonrecourse deductions with respect to a partner nonrecourse debt equals the excess, if any, of the amount of the net increase during such year in the amount of minimum gain attributable to such partner nonrecourse debt, over the aggregate amount of any distributions during such year to the partner that bears the economic risk of loss for such debt of proceeds of such debt that are allocable to an increase in the minimum gain attributable to such debt. See example (20)(viii) and (ix) of paragraph (b)(5) of this section. The determination of which items of partnership loss, deduction, and section 705(a)(2)(B) expenditure constitute the partner nonrecourse deductions with respect to a partner nonrecourse debt for a partnership taxable year must be made in a manner that is consistent with the principles of paragraph (b)(4)(iv)(*b*) of this section. If the amount of partner nonrecourse deductions with respect to a partner nonrecourse debt for a partnership taxable year exceeds the total amount of items of partnership loss, deduction, and section 705(a)(2)(B) expenditure for such year that are treated as partner nonrecourse deductions with respect to such debt, then an amount of the net increase during such year in the minimum gain attributable to such partner nonrecourse debt equal to that excess shall be treated as an increase during the immediately succeeding partnership taxable year in the minimum gain attributable to such debt for purposes of determining the net increase or decrease during such succeeding taxable year in the minimum gain attributable to such debt. The determination of which items of partnership loss, deduction, and section 705(a)(2)(B) expenditure constitute partner nonrecourse deductions for a partnership taxable year must be made before the determination of which items constitute nonrecourse deductions for the taxable year under paragraph (b)(4)(iv)(*b*) of this section.

(*4*) *Chargeback of items of income and gain.* If there is a net decrease during a partnership taxable year in the minimum gain attributable to a partner nonrecourse debt, then any partner with a share of the minimum gain attributable to such debt at the beginning of such year must be allocated items of partnership income and gain for such year (and, if necessary, for subsequent years) in proportion to, and to the extent of, an amount equal to the greater of—

(*i*) The portion of such partner's share of the net decrease in the minimum gain attributable to such partner nonrecourse debt that is allocable to the disposition of partnership property subject to such debt; or

(*ii*) The deficit balance in such partner's capital account at the end of such year (determined before any allocation of partnership income, gain, loss, deduction, or section 705(a)(2)(B) expenditure for such year and excluding from such deficit capital account balance any amount that such partner is obligated to restore under §1.704-1(b)(2)(ii)(*c*), as well as any addition thereto pursuant to the next to last sentences of paragraph (b)(4)(iv)(*f*) and (*h*)(*5*) of this section after taking into account thereunder any changes during such year in partnership minimum gain and in the minimum gain attributable to any partner nonrecourse debt), provided that if requirements (*1*) and (*2*) of §1.704-1(b)(2)(ii)(*b*) have not been satisfied throughout the full term of the partnership, the amount determined under this paragraph (b)(4)(iv)-(*h*)(*4*)(*ii*) shall equal zero and the amount of any allocation in addition to that required under paragraph (b)(4)-(iv)(*h*)(*4*)(*i*) of this section that must be made to such partner in connection with the net decrease during such year in the minimum gain attributable to such partner nonrecourse debt shall be determined in accordance with the partner's interest in the partnership under §1.704-1(b)(3).

See paragraph (b)(4)(iv)(*h*)(*5*) of this section for rules regarding the determination of a partner's share of a net decrease in the minimum gain attributable to a partner nonrecourse debt. For purposes of this paragraph (b)(4)(iv)(*h*)(*4*), the determination of whether the partners have deficit balances in their capital accounts shall be made by reducing the partners' capital accounts by the items described in §1.704-1(b)(2)(ii)(*d*)(*4*), (*5*), and (*6*). The portion of a partner's share of any net decrease during a partnership taxable year in the minimum gain attributable to a partner nonrecourse debt that is allocable to the disposition of partnership property subject to such debt equals the amount determined by multiplying the partner's share of the net decrease in the minimum gain attributable to such debt for the year by a fraction, the numerator of which is the portion of the net decrease in the minimum gain attributable to such debt for the year that is allocable to the disposition of partnership property subject to such debt and the denominator of which is the net decrease in the minimum gain attributable to such debt for the year. For purposes of the preceding sentence, a net decrease during a partnership taxable year in the minimum gain attributable to a partner nonrecourse debt is allocable to the disposition of partnership property subject to such debt to the extent of any decrease during such year in the minimum gain attributable to such debt that resulted from the disposition of any such property. The determination of which items of partnership income and gain must be allocated pursuant to this paragraph (b)(4)(iv)(*h*)(*4*) for any partnership taxable year shall be made in a manner that is consistent with the principles of paragraph (b)(4)(iv)(*e*)(*2*) of this section. For purposes of this paragraph (b)(4)(iv)-(*h*)(*4*), the items of partnership income and gain for a partnership taxable year do not include any item of income or gain that is allocated pursuant to a minimum gain chargeback for such year under paragraph (b)(4)(iv)(*e*) of this section. Any allocation of items of partnership income and gain required to be made pursuant to this paragraph (b)(4)-(iv)(*h*)(*4*) for a partnership taxable year must be made before any other allocation (other than a minimum gain chargeback pursuant to paragraph (b)(4)(iv)(*e*) of this section) of partnership items is made under section 704(b) for such year. For purposes of §1.704-1(b)(2)(ii)(*d*)(*6*), offsetting increases in a partner's capital account taken into account under that paragraph do not include items of partnership income and gain that are expected to be allocated to that partner under this paragraph (b)(4)(iv)(*h*)(*4*), provided that any subsequent distributions that are expected to be made to such partner of proceeds of any partner nonrecourse debt (with respect to which such partner will bear the economic risk of loss at the time of distribution) that are allocable to an increase in the minimum gain attributable to such debt shall be deemed to be offset by increases to the partner's capital account for purposes of that section.

(*5*) *Partner's share of minimum gain attributable to partner nonrecourse debt.* For purposes of this paragraph (b)(4)(iv)-(*h*), a partner's share of the minimum gain attributable to a partner nonrecourse debt at the end of any partnership taxable year equals the excess (if any) of—

(*i*) The sum of the partner nonrecourse deductions attributable to such debt that have been allocated to such partner (and such partner's predecessors in interest) up to that time and the aggregate amount of distributions made to such partner (and such partner's predecessors in interest) up to that time of proceeds of such debt that are allocable to an increase in the minimum gain attributable to such debt (but only if such partner (or such partner's predecessor in interest) bears the economic risk of loss for that debt at the time of any such distribution); over

(*ii*) The sum of such partner's (and such partner's predecessors in interest) aggregate share of the net decreases in the minimum gain attributable to such partner nonrecourse debt up to that time and such partner's (and such partner's predecessors in interest) aggregate share of the decreases up to that time in the minimum gain attributable to such partner nonrecourse debt resulting from revaluations of partnership property subject to such debt.

A partner's share of the net decrease in the minimum gain attributable to a partner nonrecourse debt for a partnership taxable year equals an amount that bears the same relation to the net decrease in the minimum gain attributable to such debt for such year as such partner's share of the minimum gain attributable to such debt at the end of the immediately preceding taxable year of the partnership (or, if later, the time immediately following the last time that the capital accounts of the partners are increased pursuant to §1.704-1(b)(2)(iv)(*f*) or (*r*) to reflect a revaluation of partnership property subject to such partner nonrecourse debt) bears to the amount of minimum gain attributable to such debt at the end of such preceding taxable year (or such later date). A partner's share of a decrease in the minimum gain attributable to a partner nonrecourse debt resulting from a revaluation of partnership property subject to such debt equals the amount of the increase in such partner's capital account that is attributable to such revaluation to the extent of the reduction in the minimum gain attributable to such debt caused by such revaluation. See paragraph (b)(4)(iv)(*f*) of this section for similar rules relating to partnership minimum gain. For purposes of §1.704-1 (b)-(2)(ii)(*d*), the amount of a partner's share of the minimum gain attributable to any partner nonrecourse debt shall be added to the limited dollar amount, if any, of the deficit balance in such partner's capital account that such partner is obligated to restore, and a partner shall not otherwise be considered to have an obligation to restore a deficit balance in such partner's capital account as a result of bearing the economic risk of loss for any partner nonrecourse debt. See example (20)(viii) of paragraph (b)(5) of this section.

(*6*) *Net increase (or decrease) in minimum gain attributable to partner nonrecourse debt.* For purposes of this paragraph (b)(4)(iv)(*h*), the net increase (or decrease) in the minimum gain for a partnership taxable year that is attributable to a partner nonrecourse debt equals the sum of—

(*i*) Any increase (or decrease) in the net increase in partnership minimum gain during such year that would result if such partner nonrecourse debt were treated as a nonrecourse liability of the partnership; and

(*ii*) Any decrease (or increase) in the net decrease in partnership minimum gain during such year that would result if such partner nonrecourse debt were treated as a nonrecourse liability of the partnership.

In addition, for purposes of this paragraph (b)(4)(iv)(*h*), the amount of a decrease in the minimum gain attributable to a partner nonrecourse debt resulting from a revaluation of partnership property subject to such debt equals the excess of the aggregate amount of gain that would be realized by the partnership immediately prior to such revaluation, over the aggregate amount of gain that would be realized by the partnership immediately after such revaluation if the partnership had, at each such time, disposed of (in a taxable transaction) the partnership property subject to such debt in full satisfaction thereof (and for no other consideration). Only the portion of the adjusted tax basis or book value, as the case may be, of the partnership property subject to such debt that is allocable to such debt under the principles of paragraph (b)(4)(iv)(*c*)(*1*) and (*2*) of this section shall be used in computing such gain.

(*7*) *Distribution of proceeds of partner nonrecourse debt allocable to an increase in the minimum gain attributable to such debt.* If a partnership makes a distribution to the partners during a partnership taxable year that is allocable to the proceeds of a partner nonrecourse debt, the amount of such distribution that is allocable to an increase in the minimum gain attributable to such debt equals the amount of the net increase during such year in the minimum gain attributable to such debt that arose as a result of incurring such debt or distributing proceeds of such debt. The rules of this paragraph (b)(4)(iv)(*h*)(*7*) shall be applied in a manner that is consistent with the principles of paragraph (b)(4)(iv)(*g*) of this section.

(*8*) *Debt with respect to which more than one partner bears the economic risk of loss.* If more than one partner bears the economic risk of a loss for different portions of a nonrecourse debt of the partnership, then each such portion shall be treated as a separate partner nonrecourse debt for purposes of this paragraph (b)(4)(iv).

(*i*) [Reserved.]

(*j*) *Tiered partnerships.* If a partnership (the "upper-tier partnership") is a partner in another partnership (the "subsidiary partnership"), then for purposes of applying this paragraph (b)(4)(iv) to the upper-tier partnership for any taxable year of the upper-tier partnership-

(*1*) The sum of—

(*i*) Any nonrecourse deductions of the subsidiary partnership allocated to the upper-tier partnership for such taxable year; and

(*ii*) Any distributions made during such taxable year to the upper-tier partnership by the subsidiary partnership of proceeds of a nonrecourse liability that are allocable to an increase in the partnership minimum gain of the subsidiary partnership;

shall be treated as an increase in the minimum gain of the upper-tier partnership that shall be taken into account in computing the net increase or decrease, as the case may be, in the partnership minimum gain of the upper-tier partnership for such taxable year;

(*2*) The upper-tier partnership's share for such taxable year of any net decrease in the partnership minimum gain of the subsidiary partnership shall be treated as a decrease in the minimum gain of the upper-tier partnership that shall be taken into account in computing the net increase or decrease, as the case may be, in the partnership minimum gain of the upper-tier partnership for such taxable year;

(*3*) The portion of the upper-tier partnership's share for such taxable year of any net decrease in the partnership minimum gain of the subsidiary partnership that is allocable to the disposition of property of the subsidiary partnership subject to one or more nonrecourse liabilities of the subsidiary partnership shall, for purposes of paragraph (b)(4)(iv)(*e*) of this section, be treated as a decrease during such year in the partnership minimum gain of the upper-tier partnership that resulted from the disposition of property of the upper-tier partnership that is subject to one or more nonrecourse liabilities of the upper-tier partnership;

(*4*) Any distributions made during such taxable year to the upper-tier partnership by the subsidiary partnership of proceeds of a nonrecourse liability that are allocable to an increase in the partnership minimum gain of the subsidiary partnership shall be treated as proceeds of a nonrecourse liability of the upper-tier partnership, and the increase in the minimum gain of the upper-tier partnership under paragraph (b)(4)(iv)(*j*)(*1*) of this section that is attributable to the receipt of such distributions shall, for purposes of paragraph (b)(4)(iv)(*g*) of this section, be treated as an increase in the minimum gain of the upper-tier partnership that arose as a result of encumbering property of the upper-tier partnership with such nonrecourse liability of the upper-tier partnership;

(*5*) Any nonrecourse deductions allocated to the upper-tier partnership by the subsidiary partnership for such taxable year shall, for purposes of paragraph (b)(4)(iv)(*b*) of this section, be treated as depreciation or cost recovery deductions with respect to an item of property of the upper-tier partnership subject to a nonrecourse liability of such partnership with respect to which the minimum gain increased during such year by the amount of such nonrecourse deductions; and

(*6*) Any liability of the subsidiary partnership (within the meaning of the regulations under section 752) that is treated as a liability of the upper-tier partnership under §1.752-1T(j)(1) shall be treated as a liability of the upper-tier partnership for purposes of applying paragraph (b)(4)(iv)(*h*) of this section, and rules incorporating the principles of subdivisions (*1*) through (*5*) of this paragraph (b)(4)(iv)(*j*) shall, to the extent appropriate, be applied to determine the allocations that the upper-tier partnership must make under paragraph (b)(4)(iv)(*h*) of this section with respect to any such liability that constitutes a nonrecourse debt for which one or more partners of the upper-tier partnership bear the economic risk of loss.

(*k*) *Meaning of certain terms.* For purposes of this paragraph (b)(4)(iv), the following terms have the meanings set forth below:

(*1*) *Economic risk of loss.* The determination of whether a partner bears the economic risk of loss with respect to any partnership liability shall be made in accordance with §1.752-IT(d)(3) (without regard to whether that section applies to such liability).

(*2*) *Nonrecourse debt.* The term "nonrecourse debt" means any partnership liability that is considered nonrecourse for purposes of §1.1001-2 (without regard to whether such liability is a recourse liability under paragraph §1.752-IT(d)(2)) and any partnership liability for which the creditor's right to repayment is limited to one or more assets of the partnership (within the meaning of §1.752-1T(d)(3)(ii)(B)(*4*)(*ii*)).

(*3*) *Nonrecourse liability.* The term "nonrecourse liability" means any partnership liability (or portion thereof) for which no partner bears the economic risk of loss.

(*4*) *Partner nonrecourse debt.* The term "partner nonrecourse debt" means any nonrecourse debt of the partnership for which any partner bears the economic risk of loss.

(*l*) [Reserved.]

(*m*) *Effective dates*—(*1*) *In general.* Except as otherwise provided in this paragraph (b)(4)(iv)(*m*), this paragraph (b)(4)(iv) shall apply for partnership taxable years beginning after December 29, 1988. For the rules applicable to taxable years beginning on or before December 29, 1988 see §1.704-1(b)(4)(iv). If a partnership agreement entered into on or before December 29, 1988 complied with the provisions of §1.704-1(b)(4)(iv)(*d*) on or before that date, the provisions of §1.704-1(b)(4)(iv)(*a*) through (*f*) shall continue to apply to such partnership for any taxable year beginning after that date (unless the partnership makes an election under paragraph (b)(4)(iv)(*m*)(*2*) of this section) and ending before any subsequent material modification to the partnership agreement.

(*2*) *Election.* A partnership may elect to apply the provisions of this paragraph (b)(4)(iv) to the first taxable year of such partnership ending after December 29, 1988. An election under this paragraph (b)(4)(iv)(*m*) is made by attaching a written statement to the partnership return for the first taxable year of such partnership ending after December 29, 1988. A written statement required pursuant to this paragraph (b)(4)(iv)(*m*)(*2*) must include the name, address, and taxpayer identification number of the partnership making such statement and contain a declaration that an election is being made under this paragraph (b)(4)(iv)(*m*).

(5) *Examples.* The operation of the rules of this paragraph is illustrated by the following examples:

Examples (1) through (19). [Reserved.]

Example (20). (i) RM and HB form a limited partnership to acquire and operate a commercial office building. RM, the limited partner, contributes $180,000, and HB, the general partner, contributes $20,000 to the partnership, which obtains an $800,000 nonrecourse loan and purchases the building (on leased land) for $1,000,000. The nonrecourse loan is secured only by the building, and no principal payments are due for 5 years. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)), HB will be required to restore any deficit balance in HB's capital account following the liquidation of HB's interest (as set forth in §1.704-1(b)(2)(ii)(*b*)(*3*)), and RM will not be required to restore any deficit balance in RM's capital account following the liquidation of RM's interest. The partnership agreement contains a qualified income offset (as defined in §1.704-1(b)(2)(ii)(*d*)), and, as of the end of each partnership taxable year discussed herein, the items described in §1.704-1(b)(2)(ii)(*d*)(*4*), (*5*), and (*6*) are not reasonably expected to cause or increase a deficit balance in RM's capital account. In addition, the agreement contains a minimum gain chargeback (in accordance with paragraph (b)(4)(iv)(*e*) of this section). The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, (a) all partnership items will be allocated 90 percent to RM and 10 percent to HB until the first time when the partnership has recognized items of income and gain that exceed the items of loss and deduction it has recognized over its life, and (b) all further partnership items will be allocated equally between RM and HB. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made 90 percent to RM and 10 percent to HB until a total of $200,000 has been distributed, and thereafter all such distributions will be made equally to RM and HB. In each of the partnership's first 2 taxable years, it generates rental income of $95,000, operating expenses (including land lease payments) of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000 in each of those years. The allocations of these losses 90 percent to RM and 10 percent to HB have substantial economic effect.

	RM	*HB*
Capital account on formation	$180,000	$20,000
Less: net loss in years 1 and 2	(153,000)	(17,000)
Capital account at end of year 2	$27,000	$3,000

In the partnership's third taxable year, it again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize $70,000 of gain ($800,000 amount realized less $730,000 adjusted tax basis). Since the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during the year) is $70,000 and the partnership did not distribute any proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain, the amount of partnership nonrecourse deductions for that year is $70,000, consisting of cost recovery deductions allowable with respect to the building of $70,000. Pursuant to the partnership agreement all partnership items comprising the net taxable loss of $85,000, including the $70,000 nonrecourse deduction, are allocated 90 percent to RM and 10 percent to HB. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	RM	*HB*
Capital account at end of year 2	$27,000	$3,000
Less: net loss in year 3 (without non-recourse deduction)	(13,500)	(1,500)
Less: nonrecourse deduction in year 3	(63,000)	(7,000)
Capital account at end of year 3	($49,500)	($5,500)

This allocation of the $70,000 nonrecourse deduction, 90 percent to RM and 10 percent to HB, satisfies requirement (2) of paragraph (b)(4)(iv)(*d*) of this section because the allocation is consistent with allocations, which have substantial economic effect, of other significant partnership items attributable to the building. Since the remaining requirements of paragraph (b)(4)(iv)(*d*) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, RM's and HB's shares of partnership minimum gain are $63,000 and $7,000, respectively. Therefore, pursuant to the next to last sentence in paragraph (b)(4)(iv)(*f*) of this section, RM is treated as obligated to restore a deficit balance in RM's capital account of $63,000, so that in the succeeding year RM could be allocated up to an additional $13,500 of partnership deductions, losses, and section 705(a)(2)(B) expenditures that are not nonrecourse deductions, and that allocation would be considered to have economic effect under the alternate economic effect test contained in §1.704-1(b)(2)(ii)(*d*) even though such an allocation would increase a deficit capital account balance. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the beginning of the partnership's fourth taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from $70,000 to zero. RM's and HB's shares of that net decrease would be $63,000 and $7,000, respectively. Upon such a disposition, the minimum gain chargeback would require (before any other allocation is made under section 704(b) with respect to partnership items for the partnership's fourth taxable year) that RM and HB be allocated $63,000 and $7,000, respectively, of the gain from that disposition.

(ii) Assume the same facts as originally stated in (i) except that the partnership agreement provides that all nonrecourse deductions of the partnership will be allocated equally between RM and HB. Furthermore, at the time the partnership agreement is entered into, there is a reasonable likelihood that over the partnership's life it will recognize amounts of income and gain significantly in excess of amounts of loss and deduction (other than nonrecourse deductions). The allocation of such excess equally between the partner's pursuant to the partnership agreement will have substantial economic effect. The allocation of all items, other than the nonrecourse deductions, 90 percent to RM and 10 percent to HB, has substantial economic effect.

	RM	*HB*
Capital account on formation	$180,000	$20,000
Less: net loss in years 1 and 2	(153,000)	(17,000)
Capital account at end of year 2	27,000	3,000
Less: net loss in year 3 (without nonrecourse deduction)	(13,500)	(1,500)
Less: nonrecourse deduction in year 3	(35,000)	(35,000)
Capital account at end of year 3	($21,500)	($33,000)

The allocation of the $70,000 nonrecourse deduction equally between RM and HB satisfies requirement (2) of paragraph (b)(4)(iv)(*d*) of this section because the allocation is consistent with allocations, which will have substantial economic effect, of other significant partnership items attributable to the building. Since the remaining requirements of paragraph (b)(4)(iv)(*d*) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. The allocation of the nonrecourse deductions 75 percent to RM and 25 percent to HB (or in any other ratio between 90 percent to RM/10 percent to HB and 50 percent to RM/50 percent to HB) also would satisfy requirement (2) of paragraph (b)(4)(iv)(*d*) of this section.

(iii) Assume the same facts as originally stated in (i) except that the partnership agreement provides that RM will be allocated 99 percent, and HB 1 percent, of all nonrecourse deductions of the partnership. This allocation of the $70,000 nonrecourse deduction does not satisfy requirement (2) of paragraph (b)(4)(iv)(*d*) because it is not reasonably consistent with allocations, which have substantial economic effect, of any other significant partnership item attributable to the building. Therefore, the allocation of nonrecourse deductions will be disregarded, and the nonrecourse deductions of the partnership will be reallocated according to the partners' overall economic interests in the partnership, determined with reference to the factors set forth in §1.704-1(b)(3)(ii).

(iv) Assume the same facts as originally stated in (i) except that, at the beginning of the partnership's fourth taxable year, RM contributes $144,000 and HB contributes $16,000 of additional capital to the partnership, which the partnership uses to reduce the amount of its nonrecourse liability from $800,000 to $640,000. In addition, in the partnership's fourth taxable year, it again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain ($640,000 amount realized less $640,000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of the year is zero, which represents a net decrease in partnership minimum gain of $70,000 during the year. RM's and HB's shares of this net decrease are $63,000 and $7,000 respectively, so that at the end of the partnership's fourth taxable year, RM's and HB's shares of partnership minimum gain are zero. Therefore, pursuant to the next to last sentence in paragraph (b)(4)(iv)(*f*) of this section, RM is no longer treated as being obligated to rest.ore any deficit balance in RM's capital account. Assuming the sum of the reductions to RM's capital account described in §1.704-1(b)(2)(ii)(*d*)(*4*), (*5*), and (*6*) does not exceed $94,500, the minimum gain chargeback does not require that either RM or HB be allocated items of income and gain in the partnership's fourth taxable year even though there is a net decrease in partnership minimum gain during that year. This is true because (1) none of the net decrease in partnership minimum' gain for the partnership's fourth taxable year is allocable to the disposition of partnership property subject to nonrecourse liabilities of the partnership, (2) RM's capital account balance at the end of that year (before any allocation is made under section 704(b) to RM for such year) is $94,500 (RM's capital account balance at the end of the partnership's third taxable year increased by RM's $144,000 capital contribution), and (3) HB has a full deficit makeup obligation.

	RM	*HB*
Capital account at end of year 3	($49,500)	($5,500)
Plus: contribution	144,00	16,000
Less: net loss in year 4	(76,500)	(8,500)
Capital account at end of year 4	$18,000	$2,000

(v) Assume the same facts as originally stated in (i) except that the partnership incurred only a $700,000 nonrecourse loan and, in addition, incurred a $100,000 recourse loan, subordinate in priority to the nonrecourse loan, to which the partnership's building is also subject. Under paragraph (b)(4)(iv)(*c*) of this section, $700,000 of the adjusted basis of the building at the end of the partnership's third taxable year is allocated to the nonrecourse liability (with the remaining $30,000 allocated to the recourse liability) so that if the partnership disposed of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain ($700,000 amount realized less $700,000 adjusted tax basis). Therefore, there is no minimum gain at the end of the partnership's third taxable year (and no increase in partnership minimum gain in such year). If, however, the $700,000 nonrecourse loan were subordinate in priority to the $100,000 recourse loan, under paragraph (b)(4)(iv)(*c*) of this section, only $630,000 of the adjusted basis of the building would be allocated to the $700,000 nonrecourse loan (the excess of the $730,000 adjusted tax basis of the building at the end of the partnership's third taxable year over the balance of the superior $100,000 recourse liability). In that case, the balance of the $700,000 nonrecourse liability would exceed the adjusted tax basis of the building so allocated by $70,000 so that there would be $70,000 of minimum gain (and a $70,000 increase in partnership minimum gain) in the partnership's third taxable year.

(vi) Assume the same facts as originally stated in (i) except that the partnership obtains a nonrecourse loan of $200,000 at the end of its fourth taxable year, which is secured by a second mortgage on the building, and distributes this cash to its partners at the beginning of its fifth taxable year. In addition, in its fourth and fifth taxable years, the partnership again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a cost recovery deduction of $90,000, resulting in a net taxable loss of $85,000. Also assume that the partnership has distributed its $5,000 of operating cash flow for each year ($95,000 of rental income less $10,000 of operating expense and $80,000 of interest expense) to RM and HB at the end of each such year. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liabilities at the end of its fourth taxable year, the partnership would realize $360,000 of gain ($1,000,000 amount realized less $640,000 adjusted tax basis). Thus, the net increase in partnership minimum gain during the partnership's fourth taxable year is $290,000 ($360,000 of minimum gain at the end of the fourth year less $70,000 of minimum gain at the end of the third year). Because the partnership did not distribute any of the proceeds of the loan it obtained in its fourth year during that year, the amount of partnership nonrecourse deductions for that year is $290,000. Under paragraph (b)(4)(iv)(*b*) of this section, if the partnership had distributed the proceeds of that loan to its partners at the end of its fourth year, the partnership's nonrecourse deductions for that year would have been reduced by the amount of that distribution because the proceeds of that loan are allocable to an increase in partnership minimum gain under paragraph (b)(4)(iv)(*g*) of this section. Since the nonrecourse deductions for the partnership's fourth taxable year exceed its actual deductions for that year, all $180,000 of the partnership's deductions for that year are treated as nonrecourse deductions, and the $110,000 excess nonrecourse deductions will be treated as an increase in minimum gain in the partnership's fifth taxable year under paragraph (b)(4)(iv)(*b*) of this section.

	RM	*HB*
Capital account at end of year 3 (including cash flow distributions)	($63,000)	($7,000)
Plus: rental income in year 4	85,500	9,500
Less: nonrecourse deduction in year 4	(162,000)	(18,000)
Less: cash flow distributions in year 4	(4,500)	(500)
Capital account at end of year 4	($144,000)	($16,000)

At the end of the partnership's fourth taxable year, RM's and HB's shares of partnership minimum gain are $225,000 and $25,000, respectively, and is deemed to be obligated to restore a deficit balance of $225,000 in RM's capital account at the end of that year. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liabilities at the end of its fifth taxable year, the partnership would realize $450,000 of gain ($1,000,000 amount realized less $550,000 adjusted tax basis). Therefore, the net increase in partnership minimum gain during the partnership's fifth taxable year is $200,000 ($110,000 deemed increase plus the $90,000 by which minimum gain at the end of the fifth year exceeds minimum gain at the end of the fourth year ($450,000 less $360,000)). At the beginning of its fifth year, the partnership distributed the $200,000 of loan proceeds. Under paragraph (b)(4)(iv)(g)(*3*) of this section, the first $110,000 of this distribution (an amount equal to the deemed increase in partnership minimum gain for the year) is considered allocable to an increase in partnership minimum gain for such year. As a result, the amount of nonrecourse deductions for the partnership's fifth taxable year is $90,000 ($200,000 net increase in minimum gain less $110,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain), and such nonrecourse deductions consist solely of the $90,000 cost recovery deduction allowable with respect to the building. As a result of the distributions during the partnership's fifth taxable year, the total distributions to the partners over the partnership's life will equal $225,000. Therefore, the last $25,000 distributed to the partners during the fifth year will be divided equally between them under the partnership agreement. Thus, out of the $200,000 distribution of loan proceeds at the beginning of the partnership's fifth taxable year, the first $180,000 is distributed 90 percent to RM and 10 percent to HB, and the last $20,000 is divided equally between them.

	RM	HB
Capital account at end of year 4	($144,000)	($16,000)
Plus: net income in year 5 (without nonrecourse deduction)	4,500	500
Less: nonrecourse deduction in year 5	(81,000)	(9,000)
Less: distribution of loan proceeds	(172,000)	(28,000)
Less: cash flow distribution in year 5	(2,500)	(2,500)
Capital account at end of year 5	($395,000)	($55,000)

At the end of the partnership's fifth taxable year, RM's share of partnership minimum gain is $405,000 ($225,000 share of minimum gain at the end of the fourth year plus $81,000 of nonrecourse deductions for the fifth year and a $99,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain) and HB's share of partnership minimum gain is $45,000 ($25,000 share of minimum gain at the end of the fourth year plus $9,000 of nonrecourse deductions for the fifth year and an $11,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain). Accordingly, RM is considered obligated to restore a deficit balance of $405,000 in RM's capital account at the end of that year.

(vii) Assume the same facts as originally stated in (i) except that RM and HB personally guarantee the "first" $100,000 of the $800,000 nonrecourse loan (*i.e.*, only if the building is worth less than $100,000 will they be called upon to make up any deficiency). Under paragraph (b)(4)(iv)(*c*) of this section, only $630,000 of the adjusted tax basis of the building is allocated to the $700,000 nonrecourse portion of the loan because the collateral will be applied first to satisfy the $100,000 guaranteed portion, in effect making it superior in priority to the remainder of the loan. On the other hand, if RM and HB were to guarantee the "last" $100,000 (i.e., if the building is worth less than $800,000, they will be called upon to make up the deficiency up to $100,000), $700,000 of the adjusted tax basis of the building would be allocated to the $700,000 nonrecourse portion of the loan because the guaranteed portion in effect would be inferior in priority to it.

(viii) Assume the same facts as originally stated in (i) except that the $800,000 loan is made by RM, the limited partner. Under paragraph (b)(4)(iv)(*h*) of this section, the $800,000 obligation does not constitute a nonrecourse liability of the partnership for purposes of this paragraph (b)(4)(iv) because RM, a partner, bears the economic risk of loss for that loan within the meaning of §1.752-1T(c)(3). The $800,000 loan does, however, constitute a partner nonrecourse debt since that obligation is a nonrecourse debt (within the meaning of paragraph (b)(4)(iv)(*k*)(*2*) of this section) for which a partner bears the economic risk of loss. In the partnership's third taxable year, partnership minimum gain would have increased by $70,000 if such debt were a nonrecourse liability of the partnership. Thus, under paragraph (b)(4)(iv)-(*h*)(*6*) of this section, there is a net increase of $70,000 in the minimum gain attributable to the $800,000 partner nonrecourse debt for the partnership's third taxable year, and $70,000 of the $90,000 cost recovery deduction from the building for the partnership's third taxable year constitutes a partner nonrecourse deduction with respect to such debt. See paragraph (b)(4)(iv)(*h*)(*3*) of this section. Under paragraph (b)(4)(iv)(*h*)(*2*) of this section, this partner nonrecourse deduction must be allocated to RM, the partner that bears the economic risk of loss for that liability, and RM will, as a result of this allocation, be considered obligated to restore a deficit balance in RM's capital account of $70,000. See paragraph (b)(4)(iv)(*h*)(*5*) of this section.

(ix) Assume the same facts as in (viii) except that the $800,000 loan from RM to the partnership is a purchase money loan that "wraps around" a $700,000 underlying nonrecourse note (also secured by the building) issued by RM to an unrelated person in connection with RM's acquisition of the building. Under these circumstances, RM bears the economic risk of loss with respect to only $100,000 of the liability within the meaning of §1.752-1T(c)(3). See §1.752-1T(j) (example (18)). Therefore, for purposes of paragraph (b)(4)(iv) of this section, the $800,000 liability will be treated as a $700,000 nonrecourse liability of the partnership and a $100,000 partner nonrecourse debt (inferior in priority to the $700,000 liability) of the partnership for which RM bears the economic risk of loss. Under paragraph (b)(4)(iv)(*h*) of this section, $70,000 of the $90,000 cost recovery deduction realized in the partnership's third taxable year constitutes a partner nonrecourse deduction that must be allocated to RM.

Example (21). (i) RD and PK form a general partnership to acquire and operate residential real properties. Each partner contributes $150,000 to the partnership. The partnership obtains a $1,500,000 nonrecourse loan and purchases 3 apartment buildings (on leased land) for $720,000 ("Property A"), $540,000 ("Property B"), and $540,000 ("Property C") , respectively. The nonrecourse loan is secured only by the 3 buildings, and no principal payments are due for 5 years. In each of the partnership's first 3 taxable years, it generates rental income of $225,000, operating expenses (including land lease payments) of $50,000, interest expense of $175,000, and cost recovery deductions on the 3 properties of $150,000 ($60,000 on Property A, $45,000 on Property B, and $45,000 on Property C), resulting in a net taxable loss of $150,000 in each of those years. If the partnership were to dispose of the 3 apartment buildings in full satisfaction of its nonrecourse liability at the end of its third taxable year. it would realize $150,000 of gain ($1,500,000 amount realized less $1,350,000 adjusted tax basis). Since the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during that year) is $150,000 and the partnership did not distribute any proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain, the amount of partnership nonrecourse deductions for that year is $150,000, consisting of cost recovery deductions allowable with respect to the 3 apartment buildings of $150,000. The result would be the same if the partnership obtained 3 separate nonrecourse loans that were "cross-collateralized" (*i.e.*, if each separate loan were secured by all 3 of the apartment buildings).

(ii) Assume the same facts as originally stated in (i) and that at the beginning of the partnership's fourth taxable year, the partnership (with the permission of the nonrecourse lender) disposes of Property A for $835,000 and uses a portion of the proceeds to repay $600,000 of the nonrecourse liability, reducing the balance to $900,000. As a result of the disposition, the partnership recognizes gain of $295,000 ($835,000 amount realized less $540,000 adjusted tax basis). Also during the partnership's fourth taxable year it generates rental income of $135,000, operating expenses of $30,000, interest expense of $105,000, and cost recovery deductions of $90,000 ($45,000 on each remaining building). if the partnership were to dispose of the remaining two buildings in full satisfaction of its nonrecourse liability at the end of the partnership's fourth taxable year, it would realize gain of $180,000 ($900,000 amount realized less $720,000 aggregate adjusted tax basis), which represents the amount of partnership minimtim gain at the end of such year. Since the amount of partnership minimum gain increased from $150,000 to $180,000 during the partnership's fourth taxable year, the amount of partnership nonrecourse deductions for such year is $30,000, consisting of cost recovery deductions allowable with respect to the two remaining apartment buildings. No minimum gain chargeback is required for the taxable year, even though the partnership disposed of one of the properties subject to the nonrecourse liability during the year, because there is no net decrease in partnership minimum gain for the year.

Example (22). (i) OC and DR form a limited partnership to acquire and lease machinery that is 5-year recovery property. The partnership elects under section 48(q)(4) to reduce the amount of investment tax credit in lieu of adjusting the tax basis of such machinery. OC, the limited partner, and DR, the general partner, contribute $100,000 each to the partnership, which obtains an $800,000 nonrecourse loan and purchases the machinery for $1,000,000. The nonrecourse loan is secured only by the machinery. The principal amount of the loan is to be repaid $50,000 per year during each of the partnership's first 5 taxable years, with the remaining $550,000 of unpaid principal due on the first day of the partnership's sixth taxable year. The partnership agreement provides that the partners' capital accounts will be determined and maintained in accordance with §1.704-1(b)(2)(iv), distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in §1.704-1(b)(2)(ii)(*b*)(*2*)), DR will be required to restore any deficit balance in DR's capital account following the liquidation of DR's interest (as set forth in §1.704-1(b)(2)(ii)(*b*)(*3*)), and OC will not be required to restore any deficit balance in his capital account following the liquidation of his interest. The partnership agreement contains a qualified income offset (as defined in §1.704-1(b)(2)(ii)(*d*)), and, as of the end of each partnership taxable year discussed herein, the items described in §1.704-1(b)(2)(ii)(*d*)(*4*), (*5*), and (*6*) are not reasonably expected to cause or increase a deficit balance in OC's capital account. In addition, the agreement contains a minimum gain chargeback (in accordance with paragraph (b)(4)(iv)(*e*) of this section). The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, all partnership items will be allocated equally between OC and DR. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made equally between OC and DR. In the partnership's first taxable year it generates rental income of $130,000 interest expense of $80,000, and a cost recovery deduction of $150,000, resulting in a net taxable loss of $100,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $750,000. Allocations of these losses ually between OC and DR have substantial economic effect.

	OC	DR
Capital account on formation	$100,000	$100,000
Less: net loss in year 1	(50,000)	(50,000)
Capital account at end of year 1	$ 50,000	$ 50,000

In the partnership's second taxable year, it generates rental income of $130,000, interest expense of $75,000, and a cost recovery deduction of $220,000 resulting in a net taxable loss of $165,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $700,000, and distributes $2,500 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of that year, it would realize $70,000 of gain ($700,000 amount realized less $630,000 adjust tax basis). Therefore, the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during the year) is $70,000, and the amount of partnership nonrecourse deductions for the year is $70,000 since the partnership did not distribute any proceeds of a nonrecourse liability to the partners during that year. The partnership nonrecourse deductions for its second taxable year consist of $70,000 of the cost recovery deductions allowable with respect to the machinery. Pursuant to the partnership agreement, all partnership items comprising the net taxable loss of $165,000, including the $70,000 nonrecourse deduction, are allocated equally between OC and DR. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	OC	DR
Capital account at end of year 1	$50,000	50,000
Less: net loss in year 2 (without nonrecourse deduction)	(47,500)	(47,500)
Less: nonrecourse deduction in year 2	(35,000)	(35,000)
Less: distribution	(2,500)	(2,500)
Capital account at end of year 1	($35,000)	($35,000)

This allocation of the $70,000 nonrecourse deduction equally between OC and DR satisfies requirement (2) of paragraph (b)(4)(iv)(*d*) of this section because the allocation is consistent with allocations, which have substantial economic effect, of other significant partnership items attributable to the machinery. Since the remaining requirements of paragraph (b)(4)(iv)(*d*) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's second taxable year, OC's and DR's shares of partnership minimum gain are $35,000 each. Therefore, pursuant to the next to the last sentence in paragraph (b)(4)(iv)(*f*) of this section, OC is treated as obligated to restore a deficit balance in his capital account of $35,000. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the beginning of the partnership's third taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from $70,000 to zero. OC's and DR's shares of that net decrease would be $35,000 each. Upon such a disposition, the minimum gain chargeback would require that OC and DR each be allocated $35,000 of that gain (before any other allocation is made under section 704(b) with respect to partnership items for the partnership's third taxable year).

(ii) Assume the same facts as originally stated in (i) and that DT is admitted to the partnership at the beginning of the partnership's third taxable year. At the time of DT's admission, the fair market value of the machinery is $900,000. DT contributes $100,000 to the partnership (the partnership invests $95,000 of this in undeveloped land and holds the other $5,000 in cash) in exchange for an interest in the partnership. In connection with DT's admission to the partnership, the partnership's machinery is revalued on the partnership's books to reflect its fair market value of $900,000. Pursuant to §1.704-1(b)(2)(iv)(*f*), the capital accounts of OC and DR are adjusted upwards to $100,000 each to reflect the revaluation of the partnership's machinery. This adjustment reflects the manner in which the partnership gain of $270,000 ($900,000 fair market value minus $630,000 adjusted tax basis) would be shared if the machinery were sold for its fair market value immediately prior to DT's admission to the partnership.

	OC	DR
Capital account before DT's admission	($35,000)	($35,000)
Deemed sale adjustment	135,000	135,000
Capital account adjusted for DT's admission	$100,000	$100,000

The partnership agreement is modified to provide that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, partnership income, gain, loss, and deduction, as computed for book purposes, will be allocated equally among the partners, and such allocations will be reflected in the partners' capital accounts. The partnership agreement also is modified to provide that depreciation and gain or loss, as computed for tax purposes, with respect to the machinery will be shared among the partners in a manner that takes account of the variation between such property's $630,000 adjusted tax basis and its $900,000 book value, in accordance with §1.704-1(b)(2)(iv)(*f*) and the special rule contained in §1.704-1(b)(4)(i). Finally, the partnership agreement is modified to provide that DT will not be required to restore any deficit balance in DT's capital account following the liquidation of DT's interest. Since the requirements of §1.704-1(b)(2)(iv)(*g*) are satisfied, the capital accounts of the partners (as adjusted) continue to be maintained in accordance with §1.704-1(b)(2)(iv). If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability immediately following the revaluation of the machinery, it would realize no book gain ($700,000 amount realized less $900,000 book value). Thus, as a result of the revaluation of the machinery upward by $270,000, the partnership minimum gain is reduced from $70,000 immediately prior to such revaluation to zero. Under paragraph (b)(4)(iv)(*f*) of this section, OC's and DR's shares of that decrease are $35,000 each.

(iii) Assume the same facts as in (ii) and that also during the partnership's third taxable year the partnership generates rental income of $130,000, interest expense of $70,000, a cost recovery deduction of $210,000, and a book depreciation deduction (attributable to the machinery) of $300,000. As a result the partnership has a net taxable loss of $150,000 and net book loss of $240,000. In addition, the partnership repays $50,000 of the nonrecourse liability (after the date of DT's admission), reducing the liability to $650,000, and distributes $5,000 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the year, $50,000 of book gain would result ($650,000 amount realized less $600,000 book value). Therefore, the amount of partnership minimum gain at the end of the year is $50,000, which represents a net decrease in partnership minimum gain of $20,000 during the year. (This is so even though there would be an increase in partnership minimum gain in the partnership's third taxable year if minimum gain were computed with reference to the adjusted tax basis of the machinery.) Nevertheless, pursuant to the next to the last sentence of paragraph (b)(4)(iv)(*c*) of this section, the amount of nonrecourse deductions of the partnership for its third taxable year is $50,000 (the net increase in partnership minimum gain during the year determined by adding back the $70,000 decrease in partnership minimum gain attributable to the revaluation of the machinery to the $20,000 net decrease in partnership minimum gain during the year). The $50,000 of partnership nonrecourse deductions for the year consist of book depreciation deductions allowable with respect to the machinery of $50,000. Pursuant to the partnership agreement all partnership items comprising the net book loss of $240,000 including the $50,000 nonrecourse deduction, are allocated equally among the partners. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in §1.704-1(b)(4)(i), the partnership agreement provides that the $210,000 cost recovery deduction for the partnership's third taxable year is, in accordance with section 704(c) principles, shared $55,000 to OC, $55,000 to DR, and $100,000 to DT.

	OC		DR		DT	
	Tax	*Book*	*Tax*	*Book*	*Tax*	*Book*
Capital account at end of year 2	($35,000)	$100,000	($35,000)	$100,000	$100,000	$100,000
Less: nonrecourse deduction	(9,166)	(16,666)	(9,166)	(16,666)	(16,666)	(16,666)
Plus: items other than nonrecourse deduction in year 3	(25,834)	(63,334)	(25,834)	(63,334)	(63,334)	(63,334)
Less: distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 3	($75,000)	$15,000	($75,000)	$15,000	$15,000	$15,000

The allocation of the $50,000 nonrecourse deduction equally among OC, DR, and DT satisfies requirement (2) of paragraph (b)(4)(iv)(*d*) of this section because the allocation is consistent with allocations, which have substantial economic effect, of other significant partnership items attributable to the machinery. Since the remaining requirements of paragraph (b)(4)(iv)(*d*) of this section are satisfied, such allocation is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, OC's, DR's, and DT's shares of partnership minimum gain are $16,666 each.

(iv) Assume the same facts as in (iii) and that during the partnership's fourth taxable year the partnership generates rental income of $130,000, interest expense of $65,000, a cost recovery deduction of $210,000, and a book depreciation deduction (attributable to the machinery) of $300,000. As a result, the partnership has a net taxable loss of $145,000 and a net book loss of $235,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $600,000, and distributes $5,000 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the year, $300,000 of book gain would result ($600,000 amount realized less $300,000 book value). Therefore, the amount of partnership minimum gain as of the end of the year is $300,000, which represents a net increase in partnership minimum gain during the year of $250,000. Thus, since the partnership did not distribute any proceeds of a nonrecourse liabilty that are allocable or to an increase in partnership minimum gain, the amount of partnership nonrecourse deductions for that year equals $250,000, consisting of book depreciation deductions of $250,000. Pursuant to the partnership agreement, all partnership items comprising the net book loss of $235,000, including the $250,000 nonrecourse deductions, are allocated equally among the partners. That allocation of all items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in §1.704-1(b)(4)(i), the partnership agreement provides that the $210,000 cost recovery deduction for the partnership's fourth taxable year is, in accordance with section 704(c) principles, shared $55,000 to OC, $55,000 to DR, and $100,000 to DT.

	OC		*DR*		*DT*	
	Tax	*Book*	*Tax*	*Book*	*Tax*	*Book*
Capital account at end of year 3 ...	($75,000)	$15,000	($75,000)	$15,000	$15,000	$15,000
Less: nonrecourse deduction.......	(45,833)	(83,333)	(83,333)	(83,333)	(83,333)	(83,333)
Plus: items other than nonrecourse deduction in year 4	(12,499)	5,000	12,499	5,000	5,000	5,000
Less: distribution................	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 4 ...	($113,334)	($68,333)	($113,333)	($68,333)	($68,333)	($68,333)

The allocation of the $250,000 nonrecourse deduction equally among OC, DR, and DT satisfies requirement (2) of paragraph (b)(4)(iv)(*d*) of this section. Since the remaining requirements of paragraph (b)(4)(iv)(*d*) of this section are satisfied, such allocation is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, OC's, DR'S, and DT's shares of partnership minimum gain are $100,000 each.

(v) Assume the same facts as (iv) and that at the beginning of the partnership's fifth taxable year it sells the machinery for $650,000 (using $600,000 of the proceeds to repay the nonrecourse liability), resulting in a taxable gain of $440,000 (650,000 amount realized less $210,000 adjusted tax basis) and a book gain of $350,000 (650,000 amount realized less $300,000 book basis). The partnership has no other items of income, gain, loss, or deduction for such year. As a result of the sale, partnership minimum gain is reduced from $300,000 to zero, reducing OC's, DR's, and DT's shares of partnership minimum gain to zero from $100,000 each. The minimum gain chargeback requires that OC, DR, and DT each be allocated $100,000 of that gain (an amount equal to each partner's share of the net decrease in partnership minimum gain resulting from the sale) before any allocation is made to them under section 704(b) with respect to partnership items for the partnership' s fifth taxable year. Thus, the allocation of the first $300,000 of book gain $100,000 to each of the partners is deemed to be made in accordance with the partners' interests in the partnership under paragraph (b)(4)(iv)(*e*) of this section. The allocation of the remaining $50,000 of book gain equally among the partners has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in §1.704-1(b)(4)(i), the partnership agreement provides that the $440,000 taxable gain is, in accordance with section 704(c) principles, shared $161,667 to OC, $161,667 to DR, and $116,666 to DT.

Plus: minimum gain chargeback....	138,573	100,000	138,573	100,000	100,000	100,000
Plus: additional gain	23,094	16,666	23,094	16,666	16,666	16,666
Capital account before liquidation ..	$48,333	$48,333	$48,333	$48,333	$48,333	$48,333

Example (23). (i) A partnership owns 4 properties, each of which is subject to a nonrecourse liability of the partnership. During a taxable year of the partnership, the following events take place. First, the partnership generates a cost recovery deduction (for both book and tax purposes) with respect to Property W of $10,000 and repays $5,000 of the nonrecourse liability secured only by that property, resulting in an increase in minimum gain with respect to that liability of $5,000. Second, the partnership generates a cost recovery deduction (for both book and tax purposes) with respect to Property X of $10,000 and repays none of the nonrecourse liability secured by that property, resulting in an increase in minimum gain with respect to that liability of $10,000. Third, the partnership generates a cost recovery deduction (for both book and tax purposes) of $2,000 on Property Y and repays $11,000 of the nonrecourse liability secured only by that property, resulting in a decrease in minimum gain with respect to that liability of $9,000 (although at the end of that year, there remains minimum gain with respect to that liability). Finally, the partnership borrows $5,000 on a nonrecourse basis, giving as the only security for that liability Property Z, which is a parcel of undeveloped land with an adjusted tax basis (and book value) of $2,000, resulting in a net increase in minimum gain with respect to that liability of $3,000. The net increase in partnership minimum gain during that year is $9,000, so that the amount of nonrecourse deductions of the partnership for that taxable year is $9,000. Those nonrecourse deductions consist of $3,000 of cost recovery deductions with respect to Property W and $6,000 of cost recovery deductions with respect to Property X. The amount of nonrecourse deductions consisting of cost recovery deductions is determined as follows. With respect to the nonrecourse liability secured by Property Z, with respect to which there is no cost recovery deduction, the amount of cost recovery deductions that constitutes nonrecourse deductions is zero. Similarly, with respect to the nonrecourse liability secured by Property Y, for which there is no increase in minimum gain, the amount of cost recovery deductions that constitutes nonrecourse deductions is zero. With respect to each of the nonrecourse liabilities secured by Properties W and X, which are (i) secured by property with respect to which there are cost recovery deductions and (ii) for which there is an increase in minimum gain, the amount of cost recovery deductions that constitutes nonrecourse deductions equals the product obtained by multiplying the net increase in partnership minimum gain ($9,000) times a fraction, the numerator of which is the total cost recovery deductions with respect to the partnership property securing that particular liability to the extent of the increase in minimum gain with respect to that liability and the denominator of which is the sum of the numerators for each such liability. Thus, for the liability secured by Property W, the amount is $9,000 times $5,000/$15,000. For the liability secured by Property X, the amount is $9,000 times $10,000/$15,000. (If one depreciable property secured 2 partnership nonrecourse liabilities, the amount of cost recovery or book depreciation with respect to that property would be allocated among such liabilities in accordance with the method by which adjusted basis is allocated under §1.704-1(b)(2)(iv)(*c*)).

(ii) Assume the facts as in (i) except that the loan secured by Property Z is $15,000 (rather than $5,000), resulting in a net increase in minimum gain with respect to that liability of $13,000. Thus, the net increase in partnership minimum gain is $19,000, and the amount of nonrecourse deductions of the partnership for that taxable year is $19,000. Those nonrecourse deductions consist of $5,000 of cost recovery deductions with respect to Property W, $10,000 of cost recovery deductions with respect to Property X, and a pro rata portion of the partnership's other items of deduction, loss, and section 705(a)(2)(B) expenditure for that year. The method for computing the amounts of cost recovery deductions that constitute nonrecourse deductions is the same as in (i) for the liabilities secured Properties Y and Z. With respect to each of the nonrecourse liabilities secured by Properties W and X, the amount of cost recovery deductions that constitutes nonrecourse deductions equals the total cost recovery deductions with respect to the partnership property securing that particular liability to the extent of the increase in minimum gain with respect to that liability.

Par. 5. Section 1.704-1 is amended as follows:

1. Paragraph (b)(0) is amended by removing the words "Nonrecourse liabilities of the partnership where a person related to a partner has economic risk of loss.... 1.704-1(b)(4)(iv)(*h*)" from the table and adding, in their place, the words "Effective date and cross reference.... 1.704-1(b)(4)(iv)(*h*)."

2. Paragraph (b)(2)(ii)(*c*) is amended by adding the following new sentence to the end thereof: "For purposes of this paragraph (b)(2), if a partner contributes a promissory note to the partnership during a partnership taxable year beginning after December 29, 1988, and the maker of such note is a person related to such partner (within the meaning of §1.752-1T(h), but without regard to subdivision (4) of that section), then such promissory note shall be treated as a promissory note of which such partner is the maker.

3. Paragraph (b)(2)(ii)(*h*) is amended by adding the following new sentence to the end thereof: "For purposes of the preceding sentence, sections 267 (b) and 707(b)(1) shall be applied for partnership taxable years beginning after December 29, 1988 by (*1*) substituting "80 percent or more" for "more than 50 percent" each place it appears in such sections, (2) excluding brothers and sisters from the members of a person's family, and (*3*) disregarding section 267(f)(1)(A)."

4. Paragraph (b)(2)(ii)(*d*)(*6*) is amended by removing from the last parenthetical the words "under paragraph (b)(4)(iv)(*e*) of this section."

5. Paragraph (b)(4)(iv)(*h*) is revised to read as follows:

(*h*) *Effective date and cross reference.* The rules of this paragraph (b)(4)(iv) generally are effective only for partnership taxable years beginning on or before December 29, 1988. See §1.704-1T(b)(4)(iv)(*m*) for transition rules. For the rules generally applicable to allocations attributable to nonrecourse liabilities for partnership taxable years beginning after December 29, 1988, see §1.704-1T(b)(4)(iv). See paragraph (b)(1)(ii) of this section for additional rules regarding the effective date of this section.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 6. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 7. Section 602.101(c) is amended by inserting the following in the appropriate places in the table:

1. "1.752-4T...[1545 1090]."

2. "1.704-1T(b)(4)(iv)(*m*)(*2*)...[1545 1090]."

* * * * * *

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice ond public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved December 2, 1988.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on December 29, 1988, 8:45 a.m., and published in the issue of the Federal Register for December 30, 1988, 53 F.R. 53140)

Subchapter L.—Insurance Companies
Part I.—Life Insurance Companies
Subpart A.—Tax Imposed

Section 801.—Tax Imposed

Whether the Service will rule as to whether the liquidation of a life insurance subsidiary pursuant to either section 334(b)(2) (pre-TEFRA) or section 338 (added by TEFRA) is a termination under section 815(d)(2) (as in effect before the Tax Reform Act of 1984) causing a distribution from the subsidiary's policyholders surplus account. See Rev. Proc. 89-36, page 919.

Subpart C.—Life Insurance Deductions

Section 805.—General Deductions

Whether the Service will rule as to whether a portion of the purchase price of the stock of the life insurance company is properly allocable to insurance in force. See Rev. Proc. 89-36, page 919.

Subpart D.—Accounting, Allocation, and Foreign Provisions

Section 811.—Accounting Provisions

Whether the Service will rule as to whether the difference between the face value of bonds held by a life insurance subsidiary liquidating under section 334(b)(2) (pre-TEFRA) or section 338 (added by TEFRA) and the amount allocable to such bonds pursuant to the liquidation is market discount and need not be accrued. See Rev. Proc. 89-36, page 919.

Section 815.—Distribution to Shareholders From Pre-1984 Policyholders Surplus Account

26 CFR 1.815-2: Distributions to shareholders.

Whether the Service will rule as to whether the liquidation of a life insurance subsidiary pursuant to section 334(b)(2) (pre-TEFRA) or section 338 (added by TEFRA) is a termination requiring the application of section 801(c) or section 802(b)(3) as in effect before the enactment of the Tax Reform Act of 1984. See Rev. Proc. 89-36, page 919.

Subpart E.—Definitions and Special Rules

Section 816.—Life Insurance Company Defined

Whether the Service will rule as to whether the life insurance reserves acquired in the liquidation of a life insurance subsidiary qualify as unsecured liabilities assumed by the acquiring corporation for purposes of section 334(b)(2) (pre-TEFRA) and section 338(added by TEFRA). See Rev. Proc. 89-36, page 919.

26 CFR 1.801-4: Life insurance reserves.

Insurance; life insurance reserves. Certain reserves set aside for a level premium, guaranteed renewable, group long-term care policy that provides indemnity benefits for an impaired individual qualify as life insurance reserves under section 816(b) of the Code.

Rev. Rul. 89-43

ISSUE

If a policy provides coverage for long-term care in the event an individual becomes chronically impaired, do certain reserves set aside for the policy qualify as life insurance reserves under section 816(b) of the Internal Revenue Code?

FACTS

IC, a life insurance company as defined in section 816(a) of the Code, issues level premium, guaranteed renewable, group long-term care policies (Policies). The Policies provide indemnity benefits for the cost of some or all of the necessary diagnostic, preventive, therapeutic, rehabilitative, and maintenance or personal care services required by an individual in the event the individual becomes chronically impaired. The Policies do not contain any nonforfeiture provisions.

The Policies are guaranteed renewable by class, and no individual may be singled out for cancellation or a rate increase. Rate increases may be made only for all insureds belonging to a class, based upon actual and anticipated experience of the class. These adjustments may not reflect increases in morbidity risks due merely to the advancing age of insured members of the class.

Each individual covered by the Policies is issued a certificate evidencing such coverage. Although *IC* may not cancel the Policies, it may end enrollment of new members at any time. If a policyholder terminates the Policies or if the plan sponsor terminates its sponsorship of the Policies in a situation where the plan sponsor is not the policyholder, *IC* guarantees each certificate holder the right to continue the coverage provided under the Policies without the individual providing evidence of insurability.

If a certificate holder leaves the group covered by the Policies or otherwise terminates his or her relationship with the plan sponsor, *IC* guarantees that individual the right to continue the coverage provided under the Policies without providing evidence of insurability. The premiums for the continued coverage will remain level and are based on the insured individual's age at the time that individual became covered under the original Policies. These premiums may only be changed on a class basis for all covered persons in the same class as determined by *IC*. No premium change may be made on an individual basis. The continued coverage provides benefits as similar to those under the original Policies as allowed by state law. All time limits on certain defenses and pre-existing-condition periods run from the date of the insured individual's coverage under the original Policies.

IC maintains an active lives reserve, in addition to the unearned premium reserve, to cover its obligation to renew the Policies at level premiums notwithstanding the increasing age of the insureds. Other reserves that *IC* maintains with regard to the Policies include a waiver of premium reserve, a group conversion guaranteed insurability reserve, and a disability disabled lives reserve covering the liability for losses that were incurred on or before the valuation date and that have not accrued as of the valuation date. These reserves are set aside to mature or liquidate future unaccrued claims arising out of the Policies. As morbidity experience tables for these types of Policies have not been developed, *IC* computes reserves other than the unearned premium reserve using either a recognized morbidity table reasonably adjusted to reflect the Policies' risks that are not otherwise taken into account or a morbidity table based on *IC*'s experience (provided *IC* has adequate experience upon which to construct a reasonable table). In addition, these reserves are based on assumed interest rates and a recognized mortality table. All of the above reserves are required by law.

LAW AND ANALYSIS

Section 816(b) of the Code defines the term ''life insurance reserves'' as amounts that are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest and that are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from life insurance, annuity, and noncancellable accident and health insurance contracts (including life insurance or annuity contracts combined with noncancellable accident and health insurance) involving at the time with respect to which the reserve is computed, life, accident or health contingencies. Section 816(e) provides that guaranteed renewable life, accident, and health insurance shall be treated in the same manner as noncancellable life, accident, and health insurance policies.

Section 1.801-4(a) of the regulations under the predecessor of section 816 of the Code defines the term ''life insurance reserves'' to mean those amounts—(1) which are computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest; (2) which are set aside to mature or liquidate, either by payment or reinsurance, future unaccrued claims arising from life insurance, annuity, and noncancellable health and accident insurance contracts (including life insurance or annuity contracts combined with noncancellable health and accident insurance) involving, at the time with respect to which the reserve is computed, life, health, or accident contingencies; and (3) which are required by law. Because the language of section 816 is similar to that in former section 801 of the Code, the definition in section 1.801-4 provides guidance for the interpretation of the current provision. *See* H.R. Rep. No. 432, Part 2, 98th Cong., 2d Sess. 1401 (1984); Senate Comm. on Finance, 98th Cong., 2d Sess., *Deficit Reduction Act of 1984: Explanation of the Provision Approved by the Committee on March 21, 1984,* at 524 (Comm. Print 1984).

To qualify under section 816(b) of the Code, life insurance reserves must be computed or estimated ''on the basis of recognized mortality or morbidity tables.'' Although neither the Code nor the regulations define the term ''recognized mortality or morbidity tables,'' the legislative history of the term provides useful guidance. The Revenue Act of 1942 substituted the term ''recognized mortality or morbidity tables'' for the term ''recognized experience tables'' in prior law. The Senate Finance Committee Report accompanying the Act indicates that the change was designed to expand rather than to restrict the types of mortality or morbidity tables that would qualify. *See* S. Rep. No. 1631, 77th Cong., 2d Sess. 142 (1942), 1942-2 C.B. 510, 610. There was no intent to exclude a table that is based on a company's experience *Cf.* section 807(d)(5)-(C) (special rule, for contracts where standard tables are not available, requiring that the amount of life insurance reserves for purposes other than section 816 be determined using the mortality and morbidity tables specified in the regulations). *See also* section 1.807-1T of the temporary Income Tax Regulations (allowing adjustments to mortality and morbidity tables to reflect risks not otherwise taken into account). Accordingly, the term ''recognized mortality or morbidity tables'' in section 816(b) includes a table based on an insurance company's experience (provided the company has adequate experience upon which to construct a reasonable table) or a recognized table reasonably adjusted to reflect policy risks not otherwise taken into account. Tax reserves, however, must be computed as provided in section 807.

Rev. Rul. 70-460, 1970-2 C.B. 135, provides that the additional required reserve under guaranteed renewable health and accident contracts qualifies as a life insurance reserve within the meaning of the predecessor of section 816(b) of the Code if the reserve is computed or estimated on the basis of recognized mortality or morbidity tables and an assumed rate of interest, and is set aside to mature or liquidate unaccrued claims under such contracts.

In Rev. Rul. 70-190, 1970-1 C.B. 150, *clarified in* Rev. Rul. 80-115, 1980-1 C.B. 138, an insurance company issued noncancellable policies providing life insurance benefits payable at the death of the insured combined with disability income and waiver of premium benefits. Prior to an insured becoming disabled, the company set aside a disability active lives reserve for its obligation to pay the disability income and waiver of premium benefits. When an insured became disabled and entitled to the disability income and waiver of premium benefits, the company established a disability disabled lives reserve in an amount actuarially computed to provide these benefits during the period of disability. The ruling concludes that the disability disabled lives reserve qualifies as a life insurance reserve under the predecessor of section 816(b) of the Code. *Cf.* section 807(e)(3)(special rules for determining the amount of life insurance reserves attributable to certain supplemental benefits, including guaranteed insurability benefits, accidental death and disability benefits, convertibility benefits, disability waiver benefits, and any other de minimis benefit prescribed by the regulations).

An additional reserve for excess mortality under group conversion contracts was present in Rev. Rul. 77-451, 1977-2 C.B. 224. The ruling concludes that the additional reserve did not qualify as a life insurance reserve because the company had used gross premiums in computing the reserve. The reserve, therefore, was not computed or estimated on the basis of recognized mortality or morbidity tables and assumed rates of interest as required by the predecessor of section 816(b) of the Code. *Cf.* section 807(e)(3).

IC's active lives, waiver premium, group conversion and disability disabled lives reserves under the Policies are established to liquidate "future unaccrued claims arising from life insurance, annuity, and noncancellable accident and health insurance contracts (including life insurance or annuity contracts combined with noncancellable accident and health insurance) involving, at the time with respect to which the reserve is computed, life, accident, or health contingencies." Section 816(b)(1)(B) of the Code. These reserves are computed or estimated on the basis of assumed rates of interest and recognized mortality or morbidity tables. The reserves also are required by law. These reserves, therefore, qualify as life insurance reserves under section 816(b) of the Code.

HOLDING

The active lives, waiver of premiums, group conversion, and disability disabled lives reserves set aside for the Policies qualify as life insurance reserves under section 816(b) of the Code.

APPLICATION

The above holding applies to policies issued either to an individual or to a group.

A characterization of policies or of the insurance company's reserves for purposes of subchapter L does not characterize for federal income tax purposes the benefits received by the insureds. For example, if policies provide annuity benefits, those benefits are taxable under section 72 of the Code notwithstanding any other benefits provided under the policies. Additionally, a characterization of policies or of the underlying reserves does not determine whether the insureds or their employers are allowed any exclusion or deduction for amounts paid to purchase the policies.

Section 817.—Treatment of Variable Contracts

26 CFR 1.817-5: Diversification requirements for variable annuity, endowment, and life insurance contracts.

T.D. 8242

TITLE 26-INTERNAL REVENUE.—CHAPTER 1— INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY, SUBCHAPTER A—INCOME TAX; PART I—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Diversification Requirements for Variable Annuity, Endowment, and Life Insurance Contracts

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the diversification requirements for variable annuity, endowment, and life insurance contracts. Changes to the applicable law were made by the Tax Reform Act of 1984. The regulations affect issuers and policyholders of variable contracts and provide them with guidance concerning the tax treatment of those contracts.

DATES: The regulations apply to variable annuity, endowment, and life insurance contracts for taxable years beginning after December 31, 1983, except as follows: See 1.817-5(i)(2).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document amends the Income Tax Regulations (26 CFR Part 1) to provide rules under section 817(h) of the Internal Revenue Code of 1986, relating to diversification requirements for variable annuity, endowment, and life insurance contracts. Section 817(h) was added to the Code by section 211(a) of the Tax Reform Act of 1984 (Pub. L. 98-369, 98 Stat. 750) [1984-3 C.B. (Vol. 1) 1]. On September 15, 1986, the Federal Register published amendments (T.D. 8101; 51 FR 32633) [1986-2 C.B. 97] to the Income Tax Regulations (26 CFR Part 1) to provide temporary regulations under section 817(h). The same issue of the Federal Register also published proposed amendments (51 FR 32664) [LR-295-84, 1986-2 C.B. 801] to the Income Tax Regulations and the Table of OMB Control Numbers based on those temporary regulations. This document supersedes the temporary regulations under section 817(h) and adopts final regulations based on the notice of proposed rulemaking published on September 15, 1986.

Before adopting the final regulations, the Internal Revenue Service solicited comments and held a public hearing on the proposed amendments. Fourteen written comments responding to the notice of proposed rulemaking were received. In addition, seven persons provided oral comments at the hearing held on July 1, 1987. After consideration of all comments received, the proposed amendments are adopted as revised by this Treasury decision.

PUBLIC COMMENTS

Several commentators argued that if a segregated asset account fails the diversification requirement, any contract invested in such account should fail to qualify as an annuity, endowment, or life insurance contract only for the period during which the account was not adequately diversified. The Internal Revenue Service believes that, in general, failing the diversification requirements should result in disqualification of contracts for all periods. Section 817(h) provides that a variable contract shall not be treated as an annuity, endowment, or life insurance contract for purposes of subchapter L, section 72, and section 7702(a) for any period (and any subsequent period) for which the investments made by a segregated asset account underlying the contract are not adequately diversified. The statutory language indicates that contracts should remain disqualified for periods subsequent to the period for which the investments are not adequately diversified. With respect to prior periods, section 7702 required that, for a life insurance or endowment contract, any income on the contract for all prior taxable years be treated as income received or accrued by the policyholder if the contract ceases to meet the definition of a life insurance contract. An annuity contract is treated in the same manner under these regulations.

Various commentators suggested that if a failure to diversify is inadvertent and the failure is promptly corrected, contracts based on such an account should continue to qualify as life insurance, endowment, or annuity contracts during all periods. The Internal Revenue Service agrees that variable contracts based upon a segregated asset account that inadvertently becomes nondiversified should be treated as remaining qualified, provided that the issuer or holder of the contract agrees to pay such amounts as may be required by the Commissioner. The amounts required by the Commissioner to be paid will be based on the amount of tax the policyholders would have been required to pay if they were treated as receiving the income on the contract during the period of nondiversification. Although based on the amount of tax described in the preceding sentence, it is anticipated that, in determining the amount of the payment, the absence of a policyholder basis adjustment and other relevant factors will be taken into account.

Several commentators disagreed with the treatment in the proposed regulations of all government securities as securities of a single issuer. This rule has been revised to conform to section 817(h)(6), as added by section 6080 of the Technical and Miscellaneous Revenue Act of 1988.

The proposed regulations provide that the members of an affiliated group, within the meaning of section 1504(a), ordinarily are treated as a single issuer. The final regulations delete this provision.

Various comments relating to the start-up period rules under paragraph (c)(2) of the proposed regulations were received. The proposed regulations provide that the start-up period rules apply only if no more than 30 percent of the amount allocated to a segregated asset account as of any date is attributable to premium and investment income received more than one year prior to such date. A commentator suggested that amounts transferred from a previously diversified account and amounts transferred as a result of a tax-free exchange of an unaffiliated company's contract do not constitute an abuse of the start-up period rules, even if such amounts were received more than one year prior to the test date. In addition, the commentator noted that it is burdensome for companies to trace premium and investment income as of any date. Accordingly, the final regulations provide that if more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than one year before such date, the start-up period rules do not apply. Any amount transferred to the account from a diversified account or any amount transferred as a result of an exchange pursuant to section 1035 with an unaffiliated company is not treated as an amount attributable to contracts entered into more than one year before such date.

Several commentators requested clarification of the rules relating to the aggregation of multiple accounts or funds. The final regulations restate these rules and provide additional clarifying examples.

The final regulations extend the look-through rules applicable to underlying investment companies or trusts all of the interests in which (with certain exceptions) are held by segregated asset accounts to underlying partnerships all of the interests in which are held by such persons. The final regulations clarify that this look-through rule is available to a segregated asset account (notwithstanding ownership of interests in the underlying entity by the public) if all the assets of the segregated asset account are attributable to (i) premium payments made by policyholders prior to September 26, 1981, (ii) premium payments made in connection with a qualified pension or retirement plan, or (iii) any combination of such premium payments. Additionally the final regulations clarify that the return on an interest in an underlying entity held by the general account of a life insurance company must be computed in the same manner as the return for the related variable contracts prior to deducting expenses related to the variable contracts.

The final regulations include an additional look-through rule for trusts, substantially all of the assets of which are Treasury securities. Under this rule, Treasury securities are still treated as such, even though they are held through a custodial arrangement that is treated as a grantor trust.

Several commentators requested that the regulations clarify whether purchased put and call options on Treasury securities, interest rate futures contracts on Treasury securities, and options on such contracts are classified as Treasury securities under the regulations. The final regulations clarify that such options and futures contracts are not Treasury securities because their direct obligor is not the U.S. Treasury.

The proposed regulations require that in order to qualify as a real property account, an account must have 40 percent of its assets invested in real property or interests in real property on the first anniversary of the date premium income is first received. A commentator requested that this period be increased to 18 months, because of the extensive time needed to identify and buy real property for investment. Accordingly, the final regulations provide that, if on or before the first anniversary of the account, the issuer has stated an intention to invest the assets of the account primarily in real property or interests in real property, the account will be permitted 18 months to invest at least 40 percent of its assets in such items.

SPECIAL ANALYSES

The Commissioner of Internal Revenue has determined that this rule is not a major rule as defined in Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 did not apply. Accordingly, the final regulations do not co stitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

* * * * * *

Adoption of amendments to the regulations

For the reasons set out in the preamble, Chapter I Subchapter A, Part I of Title 26 of the Code of Federal Regulations is amended as follows:

INCOME TAX REGULATIONS
(26 CFR Part 1)

Paragraph 1. The authority for Part 1 is amended by adding the following citation and by removing "Section 1.817-5T also issued under 26 U.S.C. 817(h)":

Authority: 26 U.S.C. 7805. * * * Section 1.817-5 also issued under 26 U.S.C. 817(h).

Par. 2. 26 CFR Part 1 is amended by removing §1.817-5T.

Par. 3. The following new §1.817-5 is added to read as follows:

§1.817-5 Diversification requirements for variable annuity, endowment, and life insurance contracts.

(a) *Consequences of nondiversification*—(1) *In general.* Except as provided in paragraph (a)(2) of this section, for purposes of subchapter L, section 72, and section 7702(a), a variable contract (as defined in section 817(d)), other than a pension plan contract (as defined in section 818(a)), which is based on one or more segregated asset accounts shall not be treated as an annuity, endowment, or life insurance contract for any calendar quarter period for which the investments of any such account are not adequately diversified. For this purpose, a variable contract shall be treated as based on a segregated asset account for a calendar quarter period if amounts received under the contract (or earnings thereon) are allocated to the segregated asset account at any time during the period. In addition, a variable contract that is not treated as an annuity, endowment, or life insurance contract for any period by reason of this paragraph (a)(1) shall not be treated as an annuity, endowment, or life insurance contract for any subsequent period even if the investments are adequately diversified for such subsequent period. If a variable contract which is a life insurance or endowment contract under other applicable (e.g., State or foreign) law is not treated as a life insurance or endowment contract under section 7702(a), the income on the contract for any taxable year of the policyholder is treated as ordinary income received or accrued by the policyholder during such year in accordance with section 7702(g) and (h). Likewise, if a variable contract is not treated as an annuity contract under section 72, the income on the contract for any taxable year of the policyholder shall be treated as ordinary income received or accrued by the policyholder during such year in the same manner as a life insurance or endowment contract under section 7702(g) and (h).

(2) *Inadvertent failure to diversify.* The investments of a segregated asset account shall be treated as satisfying the requirements of paragraph (b) of this section for one or more periods, provided the following conditions are satisfied—

(i) The issuer or holder must show the Commissioner that the failure of the investments to satisfy the requirements of paragraph (b) of this section for such period or periods was inadvertent,

(ii) The investments of the account must satisfy the requirements of paragraph (b) of this section within a reasonable time after the discover of such failure, and

(iii) The issuer or holder of the variable contract must agree to make such adjustments or pay such amounts as may be required by the Commissioner with respect to the period or periods during which the investments of the account did not satisfy the requirements of paragraph (b) of this section. The amount required by the Commissioner to be paid shall be an amount based upon the tax that would have been owed by the policyholders if they were treated as receiving the income on the contract (as defined in section 7702(g)(1)(B), without regard to section 7702(g)(1)(C)) for such period or periods.

(b) *Diversification of investments*—(1) *In general.* (i) Except as otherwise provided in this paragraph and paragraph (c) of this section, the investments of a segregated asset account shall be considered adequately diversified for purposes of this section and section 817(h) only if—

(A) No more than 55% of the value of the total assets of the account is represented by any one investment;

(B) No more than 70% of the value of the total assets of the account is represented by any two investments;

(C) No more than 80% of the value of the total assets of the account is represented by any three investments; and

(D) No more than 90% of the value of the total assets of the account is represented by any four investments.

(ii) For purposes of this section—

(A) All securities of the same issuer, all interests in the same real property project, and all interests in the same commodity are each treated as a single investment; and

(B) In the case of government securities, each government agency or instrumentality shall be treated as a separate issuer.

(iii) See paragraph (f) of this section for circumstances in which a segregated asset account is treated as the owner of assets held indirectly through certain pass-through entities and corporations taxed under subchapter M, chapter 1 of the Code.

(2) *Safe harbor.* A segregated asset account will be considered adequately diversified for purposes of this section and section 817(h) if—

(i) The account meets the requirements of section 851(b)(4) and the regulations thereunder; and

(ii) No more than 55% of the value of the total assets of the account is attributable to cash, cash items (including receivables), government securities, and securities of other regulated investment companies.

(3) *Alternative diversification requirements for variable life insurance contracts.* (i) A segregated asset account with respect to variable life insurance contracts will be considered adequately diversified for purposes of this section and section 817(h) if the requirements of paragraph (b)(1) or (b)(2) of this section are satisfied or if the assets of such account, other than Treasury securities, satisfy the percentage limitations prescribed in paragraph (b)(1) of this section increased by the product of (A) .5 and (B) the percentage of the value of the total assets of the account that is represented by Treasury securities. In determining whether the assets of an account, other than Treasury securities, satisfy the increased percentage limitations, such limitations are applied as if the Treasury securities were not included in the account (*i.e.*, the increased percentage limitations are not applied to Treasury securities and the value of the total assets of the account is reduced by the value of the Treasury securities).

(ii) The provisions of this paragraph (b)(3) may be illustrated by the following examples:

Example (1). On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,000. The assets of the account are represented by Treasury securities having a total value of $90,000 and securities of Corporation A having a total value of

$10,000. The 55% limit described in paragraph (b)(1)(i) of this section would be increased by 45% (0.5 × 90%) to 100%, and would then be applied to the assets of the account other than Treasury securities. Because no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporation A, the investments of the account will be considered adequately diversified.

Example (2). On the last day of a quarter of a calendar year, a segregated asset account with respect to variable life insurance contracts holds assets having a total value of $100,000. The assets of the account are represented by Treasury securities having a total value of $60,000, securities of Corporation A having a total value of $30,000, and securities of Corporation B having a total value of $10,000. The 55% and 70% limits described in paragraph (b)(1)(i) of this section would be increased by 30% (0.5 × 60%) to 85% and 100%, respectively, and would then be applied to the assets of the account other than Treasury securities. Securities of Corporation A represent 75%, and securities of Corporation B represent 25%, of the value of the assets of the account other than Treasury securities. Because no more than 85% of the value of the assets other than Treasury securities is represented by securities of Corporation A or B and no more than 100% of the value of the assets other than Treasury securities is represented by securities of Corporations A and B, the investments of the account will be considered adequately diversified.

(c) *Periods for which an account is adequately diversified*—(1) *In general.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the last day of a quarter of a calendar year (*i.e.*, March 31, June 30, September 30, and December 31) or within 30 days after such last day shall be considered adequately diversified for such quarter.

(2) *Start-up period.* (i) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is not a real property account on its first anniversary shall be considered adequately diversified until such first anniversary.

(ii) Except as provided in paragraph (c)(2)(iv) of this section, a segregated asset account that is a real property account on its first anniversary shall be considered adequately diversified until the earlier of its fifth anniversary or the anniversary on which the account ceases to be a real property account.

(iii) For purposes of paragraph (c)(2)(i) and (ii) of this section, the anniversary of a segregated asset account is the anniversary of the date on which any amount received under a life insurance or annuity contract, other than a pension plan contract (as defined in section 818 (a)), is first allocated to the account.

(iv) If more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than one year before such date, paragraph (c)(2)(i) of this section shall not apply to the segregated asset account for any period after such date. Similarly, if more than 30 percent of the amount allocated to a segregated asset account as of the last day of a calendar quarter is attributable to contracts entered into more than 5 years before such date, paragraph (c)(2)(ii) of this section shall not apply to the segregated asset account for any period after such date. For purposes of this paragraph (c)(2), amounts transferred to the account from a diversified account (determined without regard to this paragraph (c)(2)) or as a result of an exchange pursuant to section 1035 in which the issuer of the contract received in the exchange is not related in a manner specified in section 267(b) to the issuer of the contract transferred in the exchange are not treated as—

(A) Amounts attributable to contracts entered into more than one year before such date, in the case of accounts subject to paragraph (c)(2)(i) of this section, or

(B) Amounts attributable to contracts entered into more than five years before such date, in the case of accounts subject to paragraph (c)(2)(ii) of this section.

(3) *Liquidation period.* A segregated asset account that satisfies the requirements of paragraph (b) of this section on the date a plan of liquidation is adopted shall be considered adequately diversified for—

(i) The one-year period beginning on the date the plan of liquidation is adopted if the account is not a real property account on such date; or

(ii) The two-year period beginning on the date the plan of liquidation is adopted if the account is a real property account on such date.

(d) *Market fluctuations.* A segregated asset account that satisfies the requirements of paragraph (b) of this section at the end of any calendar quarter (or within 30 days after the end of such calendar quarter) shall not be considered nondiversified in a subsequent quarter because of a discrepancy between the value of its assets and the diversification requirements unless such discrepancy exists immediately after the acquisition of any asset and such discrepancy is wholly or partly the result of such acquisition.

(e) *Segregated asset account.* For purposes of section 817(h) and this section, a segregated asset account shall consist of all assets the investment return and market value of each of which must be allocated in an identical manner to any variable contract invested in any of such assets. See paragraph (9) for examples illustrating the application of this paragraph (e).

(f) *Look-through rule for assets held through certain investment companies, partnerships, or trusts*—(1) *In general.* If this paragraph (f) applies, a beneficial interest in a regulated investment company, a real estate investment trust, a partnership, or a trust that is treated under sections 671 through 679 as owned by the grantor or another person ("investment company, partnership, or trust") shall not be treated as a single investment of a segregated asset account. Instead, a pro rata portion of each asset of the investment company, partnership, or trust shall be treated, for purposes of this section, as an asset of the segregated asset account. For purposes of this section, the ratable interest of a partner in a partnership's assets shall be determined in accordance with the partner's capital interest in the partnership.

(2) *Applicability*—(i) *Certain investment companies, partnerships, and trusts.* This paragraph (f) shall apply to an investment company, partnership, or trust if—

(A) All the beneficial interests in the investment company, partnership, or trust (other than those described in paragraph (f)(3) of this section) are held by one or more segregated asset accounts of one or more insurance companies; and

(B) Public access to such investment company, partnership, or trust is available exclusively (except as otherwise permitted in paragraph (f)(3) of this section) through the purchase of a variable contract. Solely for this purpose, the status of a contract as a variable contract will be determined without regard to section 817(h) and this section.

(ii) *Nonregistered partnerships.* This paragraph (f) shall also apply to a partnership interest if the partnership interest is not registered under a Federal or State law regulating the offering or sale of securities.

(iii) *Trusts holding Treasury securities.* This paragraph (f) shall also apply to a trust that is treated under section 671 through 679 as owned by the grantor or another person if substantially all of the assets of the trust are represented by Treasury securities.

(3) *Interests not held by segregated asset accounts.* Satisfaction of the requirements of paragraph (f)(2)(i) of this section shall not be prevented by reason of beneficial interests in the investment company, partnership, or trust that are—

(i) Held by the general account of a life insurance company or a corporation related in a manner specified in section 267(b) to a life insurance company, but only if the return on such interests is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), there is no intent to sell such interests to the public, and a segregated asset account of such life insurance company also holds or will hold a beneficial interest in the investment company, partnership, or trust;

(ii) Held by the manager, or a corporation related in a manner specified in section 267(b) to the manager, of the investment company, partnership, or trust, but only if the holding of the interests is in connection with the creation or management of the investment company, partnership, or trust, the return on such interest is computed in the same manner as the return on an interest held by a segregated asset account is computed (determined without regard to expenses attributable to variable contracts), and there is no intent to sell such interests to the public;

(iii) Held by the trustee of a qualified pension or retirement plan; or

(iv) Held by the public, or treated as owned by policyholders pursuant to Rev. Rul. 81-225, 1981-2 C.B. 12, but only if (A) the investment company, partnership, or trust was closed to the public in accordance with Rev. Rul. 82-55, 1982-1 C.B. 12, or (B) all the assets of the segregated asset account are attributable to premium payments made by policyholders prior to September 26, 1981, to premium payments made in connection with a qualified pension or retirement plan, or to any combination of such premium payments.

(g) *Examples.* The provisions of paragraphs (e) and (f) of this section may be illustrated by the following examples.

Example (1). (i) The assets underlying variable contracts issued by a life insurance company consist of two groups of assets: (a) a diversified portfolio of debt securities and (b) interests in P, a partnership that is publicly registered. All of the beneficial interests in P are held by one or more segregated asset accounts of one or more insurance companies and public access to P is available exclusively through the purchase of a variable contract. The variable contracts provide that policyholders may specify which portion of each premium is to be invested in the debt securities and which portion is to be invested in P interests. The portfolio of debt securities and the assets of P, considered separately, each satisfy the diversification requirements of paragraph (b) of this section.

(ii) As a result of the ability of policyholders to allocate premiums among the two groups of assets, the investment return and market value of the interests in P and the debt securities may be allocated to different variable contracts in a non-identical manner. Accordingly, under paragraph (e) of this section, the interests in P are treated as part of a single segregated asset account ("Account 1") and the debt securities are treated as part of a different segregated asset account ("Account 2").

(iii) Since P is described in paragraph (f)(2)(i) of this section, interests in P will not be treated as a single investment of Account 1. Rather, Account 1 is treated as owning a pro rata portion of the assets of P.

(iv) Since Account 1 and Account 2 each satisfy the requirements of paragraph (b) of this section, variable contracts that are based on either or both accounts are treated as annuity, endowment, or life insurance contracts.

Example (2). The facts are the same as in example (1) except that some of the beneficial interests in P are held by persons not described in paragraph (f)(3) of this section. Since P is not described in paragraph (f)(2) of this section, interests in P will be treated as a single investment of Account 1. As a result, Account 1 does not satisfy the requirements of paragraph (b) of this section. Variable contracts based in whole or in part on Account 1 are not treated as annuity, endowment, or life insurance contracts. Variable contracts that are not based on Account 1 at any time during the period in which such account fails to satisfy the requirements of paragraph (b) of this section (*i.e.*, contracts based entirely on Account 2), are treated as annuity, endowment, or life insurance contracts. See paragraph (a)(1).

Example (3). The facts are the same as in example (2) except that P is not publicly registered. Since P is described in paragraph (e)(2)(ii) of this section, the result is the same as in example (1).

Example (4). The facts are the same as in example (2) except that the variable contracts do not permit policyholders to allocate premiums between or among the debt securities and interests in P Thus, the investment return and market value of the interests in P and the debt securities must be allocated to the same variable contracts and in an identical manner. Under paragraph (e) of this section, the interests in P and the debt securities are treated as part of a single segregated asset account. If the interests in P and the debt securities, considered together, satisfy the requirements of paragraph (b) of this section, contracts based on this segregated asset account will be treated as annuity, endowment, or life insurance contracts.

(h) *Definitions.* The terms defined below shall, for purposes of this section, have the meanings set forth in such definitions:

(1) *Government security*—(i) *General rule.* The term "government security" shall mean any security issued or guaranteed or insured by the United States or an instrumentality of the United States; or any certificate of deposit for any of the foregoing. Any security or certificate or deposit insured or guaranteed only in part by the United States or an instrumentality thereof is treated as issued by the United States or its instrumentality only to the extent so insured or guaranteed, and as issued by the direct obligor to the extent not so insured or guaranteed. For purposes of this paragraph (h)(1), an instrumentality of the United States shall mean any person that is treated for purposes of 15 U.S.C. 80a-2-(16), as amended, as a person controlled or supervised by and acting as an instrumentality of the Government of the United States pursuant to authority granted by the Congress of the United States.

(ii) *Example.* A segregated asset account purchases a certificate of deposit in the amount of $150,000 from bank A. Deposits in bank A are insured by the Federal Deposit Insurance Corporation, an instrumentality of the United States, to the extent of $100,000 per depositor. The certificate of deposit is treated as a government security to the extent of the $100,000 insured amount and is treated as a security issued by bank A to the extent of the $50,000 excess of the value of the certificate of deposit over the insured amount.

(2) *Treasury security*—(i) *General rule.* For purposes of paragraph (b)(3) of this section and section 817(h)(3), the term "Treasury security" shall mean a security the direct obligor of which is the United States Treasury.

(ii) *Example.* A segregated asset account purchases put and call options on U.S. Treasury securities issued by the Options Clearing Corporation. The options are not Treasury securities for purposes of paragraph (b)(3) and section 817(h)(3) because the direct obligor of the options is not the United States Treasury.

(3) *Real property.* The term "real property" shall mean any property that is treated as real property under 1.856-3(d) except that it shall not include interests in real property.

(4) *Real property account.* A segregated asset account is a real property account on an anniversary of the account (within the meaning of paragraph (c)(2)-(iii) of this section) or on the date a plan of liquidation is adopted if not less than the applicable percentage of the total assets of the account is represented by real property or interests in real property on such anniversary or date. For this purpose, the applicable percentage is 40% for the period ending on the first anniversary of the date on which premium income is first received, 50% for the year ending on the second anniversary, 60% for the year ending on the third anniversary, 70% for the year ending on the fourth anniversary, and 80% thereafter. A segregated asset account will also be treated as a real property account on its first anniversary if on or before such first anniversary the issuer has stated in the contract or prospectus or in a submission to a regulatory agency, an intention that the assets of the account will be primarily invested in real property or interests in real property, provided that at least 40% of the total assets of the account are so invested within six months after such first anniversary.

(5) *Commodity.* The term "commodity" shall mean any type of personal property other than a security.

(6) *Security*. The term "security" shall include a cash item and any partnership interest registered under a Federal or State law regulating the offering or sale of securities. The term shall not include any other partnership interest, any interest in real property, or any interest in a commodity.

(7) *Interest in real property*. The term "interest in real property" shall include the ownership and co-ownership of land or improvements thereon and leaseholds of land or improvements thereon. Such term shall not, however, include mineral, oil, or gas royalty interests, such as a retained economic interest in coal or iron ore with respect to which the special provisions of section 631(c) apply. The term "interest in real property" also shall include options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(8) *Interest in a commodity*. The term "interest in a commodity" shall include the ownership and co-ownership of any type of personal property other than a security, and any leaseholds thereof. Such term shall include mineral, oil, and gas royalty interests, including any fractional undivided interest therein. Such term also shall include any put, call, straddle, option, or privilege on any type of personal property other than a security.

(9) *Value*. The term "value" shall mean, with respect to investments for which market quotations are readily available, the market value of such investments; and with respect to other investments, fair value as determined in good faith by the managers of the segregated asset account.

(10) *Terms used in section 851*. To the extent not inconsistent with this paragraph (h) all terms used in this section shall have the same meaning as when used in section 851.

(i) *Effective date*—(1) *In general*. This section is effective for taxable years beginning after December 31, 1983.

(2) *Exceptions*. (i) If, at all times after December 31, 1983, an insurance company would be considered the owner of the assets of a segregated asset account under the principles of Rev. Rul. 81-225, 1981-2 C.B. 12, this section will not apply to such account until December 15, 1986.

(ii) This section will not apply to any variable contract to which Rev. Rul. 77-85, 1977-1 C.B. 12, or Rev. Rul. 81-225, 1981-2 C.B. 12, did not apply by reason of the limited retroactive effect of such rulings.

(iii) In determining whether a segregated asset account is adequately diversified for any calendar quarter ending before July 1, 1988, debt instruments that are issued, guaranteed, or insured by the United States or an instrumentality of the United States shall not be treated as government securities if such debt instruments are secured by a mortgage on real property (other than real property owned by the United States or an instrumentality of the United States) or represent an interest in a pool of debt instruments secured by such mortgages.

(iv) This section shall not apply until January 1, 1989, with respect to a variable contract (as defined in section 817(d)) that (1) provides for the payment of an immediate annuity (as defined in section 72(u)(4)); (2) was outstanding on September 12, 1986; and (3) the segregated asset account on which it was based was, on September 12, 1986, wholly invested in deposits insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved January 26, 1989.

Dennis E. Ross,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on March 1, 1989, 8:45 a.m., and published in the issue of the Federal Register for March 2, 1989, 54 F.R. 8728)

Section 818.—Other Definitions And Special Rules

Whether the Service will rule as to whether the purchase of stock of a life insurance subsidiary and its subsequent liquidation under section 334(b)(2) (pre-TEFRA) or section 338 (added by TEFRA) is, in fact, a purchase of the subsidiary's insurance contracts. See Rev. Proc. 89-36, page 919.

Part II.—Other Insurance Companies

Section 831.—Tax On Insurance Companies Other Than Life Insurance Companies

26 CFR 1.831-3: Tax on insurance companies (other than life or mutual), mutual marine insurance companies, mutual fire insurance companies issuing perpetual policies, and mutual fire or flood insurance companies operating on the basis of premium deposits; taxable years beginning after December 31, 1962.

Rev. Rul. 88-72, which holds that a parent corporation and its subsidiaries cannot deduct under section 162 of the Code amounts paid to the parent's wholly owned insurance subsidiary as "insurance premiums" notwithstanding the insurance subsidiary's acceptance of insurance risks from unrelated parties, is clarified. See Rev. Rul. 89-61, page 75.

Part III.—Provisions of General Application

Section 846.—Discounted Unpaid Losses Defined

Insurance companies; loss reserves; discounting unpaid losses. The loss payment patterns and discount factors for calendar year 1989 for each property and casualty business to be used in discounting the deduction for loss reserves for purposes of section 846 of the Code.

Rev. Rul. 89-66

[Rev. Rul. 89-66 was modified and superseded by Rev. Rul. 89-66A, below, this Bulletin.]

Insurance companies; loss reserves; discounting unpaid losses. The loss payment patterns and discount factors for calendar year 1989 for each property and casualty business to be used in discounting the deduction for loss reserves for purposes of section 846 of the Code. Rev. Rul. 89-66 modified and superseded.

Rev. Rul. 89-66A

This revenue ruling modifies and supersedes Rev. Rul. 89-66, 1989-21 I.R.B. 13, which contained erroneous column headings.

For purposes of section 846 of the Internal Revenue Code, the following are the loss payment patterns and discount factors for calendar year 1989 for each property and casualty line of business to be used in discounting the deduction for loss reserves. Section 846 requires all property and casualty loss reserves (unpaid losses and unpaid loss adjustment expenses) for each line of business (as shown on the annual statement approved by the National Association of Insurance Commissioners (NAIC)) to be discounted for federal income tax purposes. The discount factors were determined by using an interest rate for 1989 of 8.16 percent, the interest rate determined under section 846(c).

COMPOSITE SCHEDULE P

Years before current year	Year loss incurred	Loss & loss expense payments to date (000s)	Total losses and loss expense incurred (000s)	Cumulative fraction of loss paid (percent)	Fraction of loss paid during year (percent)	Fraction of loss unpaid, year-end (percent)	Discounted fraction unpaid, year-end (percent)	Reserve discount factor (percent)

Subchapter M.—Regulated Investment Companies and Real Estate Investment Trusts
Part I.—Regulated Investment Companies

Section 851.—Definition of Regulated Investment Company

26 CFR 1.851-1: Definition of regulated investment company.

Whether, for purposes of section 562(c) of the Code, the term "shareholder" refers to the legal owner of the shares of a regulated investment company rather than the beneficial owner of the shares. See Rev. Rul. 89-79, page 172.

Section 852.—Taxation of Regulated Investment Companies and Their Shareholders

26 CFR 1.852-1: Taxation of regulated investment companies.

Nonproportionate designation of dividends paid by regulated investment company with multiple classes of stock. If a regulated investment company has two or more classes of stock and it designates the dividends that it pays on one class as consisting of more than that class' proportionate share of a particular type of income, the designations are not effective for federal tax purposes to the extent that they exceed the class' proportionate share of that type of income. Rev. Ruls. 70-597 and 74-177 modified.

Rev. Rul. 89-81

ISSUE

If a regulated investment company (RIC) has two or more classes of stock and it designates the dividends that it pays on one class as consisting of more than that class' proportionate share of a particular type of income, are the designations of the excess over the class' proportionate share effective for federal tax purposes?

FACTS

Fund is a closed-end diversified management investment company registered under the Investment Company Act of 1940, as amended (15 U.S.C. sections 80a-1 to 80b-2). Fund qualifies as a regulated investment company under section 851 of the Internal Revenue Code.

Fund has issued two classes of stock, one common class and one preferred class.

Holders of the preferred shares are entitled to receive cumulative dividends at a fixed rate. In addition, under the terms of the preferred shares, Fund is required to designate, for purposes of section 854(b)(1) of the Code, the dividends paid on the preferred shares as dividends qualifying for the dividends received deduction under section 243 to the extent that those dividends do not exceed the aggregate dividends received by Fund determined in accordance with section 854.

Holders of the common shares are entitled to receive all income not required to satisfy the claims of the preferred shares. Dividends paid on the common shares are designated by Fund as dividends qualifying for the dividends received deduction only to the extent that the aggregate dividends received by Fund exceed the dividends paid on the preferred shares.

For 1989, without regard to the dividends paid deduction, Fund had investment company taxable income of $100x and net capital gain of $100x. Fund received $50x of aggregate dividends in 1989.

In 1989, Fund paid a total of $30x of dividends to the holders of its preferred stock and a total of $170x of dividends to the holders of its common stock. Fund designated all $30x of dividends paid to the holders of its preferred stock as dividends qualifying for the dividends received deduction. Of dividends paid to the holders of its common stock, Fund designated $20x as dividends qualifying for the dividends received deduction and $100x as capital gain dividends.

LAW

Under section 851(a) of the Code, the term "regulated investment company" includes a domestic corporation that is a management company registered under the Investment Company Act of 1940, as amended.

Under section 851(b) of the Code, the corporation must elect to be treated as a RIC, must derive at least 90 percent of its gross income from dividends, interest, and other specified sources, and must satisfy certain other requirements.

If a corporation meets these requirements, it is treated in certain respects as a conduit entity for tax purposes. Dividends paid by the RIC are generally taxable as ordinary income to the shareholders, and the RIC is allowed a deduction for such dividends in computing its investment company taxable income under sections 852(b)(2)(D) and 561. Dividends designated by the RIC as capital gain dividends are treated as long-term capital gains in the hands of the shareholders, and, in computing its net capital gain, the RIC is allowed a dividends paid deduction for these amounts so that the RIC is taxed only on the excess. Section 852(b)(3) of the Code. Similarly, depending on the types of gross income received by the RIC, appropriate portions of any dividends paid may be designated by the RIC—and consequently taxed to the shareholders—as exempt-interest dividends (section 852(b)(5)) or as dividends qualifying for the dividends received deduction (section 854). *See also* section 853, which permits the RIC to elect to be treated as a conduit for purposes of the foreign tax credit.

ANALYSIS

A corporation registered under the Investment Company Act of 1940 as a closed-end management investment company may have more than one class of stock. The question presented is whether a designation to one class of shareholders of more than that class' proportionate share of a particular type of income is effective for federal tax purposes. The tax treatment of RICs that make such designations has been addressed by the Service in two published revenue rulings.

In Rev. Rul. 70-597, 1970-2 C.B. 146, an investment company issued income shares and capital shares. Holders of the income shares received all net income from the initial investment portfolio of the company, and holders of the capital shares received the benefit of all capital gains. The ruling held that the company could elect to be treated as a RIC and that the dividends paid to the two classes of shareholders qualified for the dividends paid deduction under section 852 of the Code. In addition, the ruling held that undistributed net capital gain designated in respect of the capital shares was treated in accordance with the provisions of section 852(b)(3)(D).

In Rev. Rul. 74-177, 1974-1 C.B. 166, an otherwise qualifying RIC issued common and preferred shares. Holders of the preferred shares enjoyed a preference as to assets and received fixed quarterly cumulative dividends payable out of net investment income. Holders of the common shares generally were entitled to receive distributions of any remaining net investment income. Holders of the common shares also generally received annual distributions of all net short-term capital gain. Long-term capital gains accrued to the benefit of the holders of the common shares. The ruling held that the issuance of the two classes of stock with the rights described above did not prevent the corporation from qualifying as a RIC and that the RIC was entitled to include the amounts paid and designated in accordance with those rights in computing the relevant dividends paid deduction.

The Internal Revenue Service has reconsidered these rulings and has determined that, to the extent that they approve non-proportionate designations of particular types of income, they do not represent proper interpretations of law. The designation of the dividends paid to the holders of one class of stock as consisting of more than that class' proportionate share of a particular type of income is inconsistent with the purposes underlying sections 851 through 855.

RICs are provided special tax treatment to enable small investors to pool their resources and obtain diversification of investment and experienced management without paying the penalty of a second layer of tax. Thus, the RIC vehicle affords small investors the benefits already available to large investors through direct investment in assets.

Although there is no express rule that designations of all RIC distributions must be proportionate, Congress appears to have assumed that designations of distributions are proportionate. One example of this is found in the legislative history of section 854, the section which provides that the dividends designated as qualifying for the shareholders' dividends received deduction may not exceed the aggregate dividends received by the RIC. The Conference Report for this section indicates that Congress intended that each share of stock "have the same designation ... made with respect to it" and that "the RIC cannot designate the same quarterly dividend as being from dividend income for some shareholders and from tax-exempt interest for others." H.R. Conf. Rep. No. 861, 98th Cong., 2d Sess. 815 (1984), 1984-3 (Vol. 2) C.B. 69.

Of similar import is the history of section 852(b)(5), the provision that allows certain RICs to pay exempt-interest dividends to the extent of their tax-exempt interest income. In introducing the amendment that became section 852(b)(5), its sponsor noted that it was "wholly consistent with the concept of a mutual fund, under which the shareholders of the fund are considered, for tax purposes, as the actual owners of the fund's holdings, and the direct recipients of their share of the fund's earnings." 122 Cong. Rec. 26, 111 (1976) (statement of Senator Percy).

A proportionate rule is expressly stated in section 853, which allows an election that enables a RIC's shareholders to qualify for foreign tax credits. Pursuant to this election, each shareholder of the RIC is treated as having paid a proportionate share of the taxes paid by the RIC to a foreign country and as having received a proportionate share of the gross income derived by the RIC from sources within a foreign country. The legislative history of this provision speaks both of the RIC being a conduit and of RIC shareholders being placed in the same position as persons directly owning stock in foreign corporations. H.R. Rep. No. 1337, 83d Cong., 2d Sess. 241 (1954). Although the proportionate rule is explicitly stated with respect to foreign tax credits, there is no indication that proportionate designations were other than the normal rule applicable to RICs.

The only legislative history that is arguably inconsistent concerns section 852(b)(5)(C), which provides that 50 percent of the interest received by a RIC on loans to employee stock ownership plans (ESOPs) may be passed through to shareholders as tax-exempt interest. Citing Rev. Rul. 74-177, the Conference Committee Report states that the conferees "understand that it may be appropriate for a mutual fund to have two classes of stock, one of which would pay exempt-interest dividends and the other of which would pay taxable dividends." 2 H.R. Conf. Rep. No. 841, 99th Cong., 2d Sess. II-559 (1986), 1986-3 (Vol. 4) C.B. 559. In isolation, this statement appears to be in conflict with the legislative history of earlier provisions. In context, however, it is only a comment that the Service, in its published rulings, had permitted non-proportionate designations of distributions.

With the exception of this single reference to Rev. Rul. 74-177, there is no evidence in the legislative history that RICs were intended to be other than straight pass-through entities or that designations of distributions to shareholders could be made on other than a proportionate basis.

In the present situation, in 1989 Fund designated to the holders of its preferred stock more than their proportionate share of the dividends qualifying for the dividends received deduction. Fund's preferred stockholders received 15% of the total dividends paid by Fund in 1989. Thus, their proportionate share of the dividends qualifying for the dividends received deduction is $7.5x, 15% of the $50x aggregate dividends received by Fund. Similarly, Fund designated to the holders of its common stock more than their proportionate share of the capital gain dividends. Fund's common shareholders received 85% of the total dividends paid by Fund in 1989. Thus, their proportionate share of the capital gain dividends is $85x, 85% of the $100x net capital gain received by Fund. The designation by Fund of more than these amounts is not effective for federal tax purposes. As a result, Fund's preferred stockholders may treat only $7.5x of the dividends they received as dividends qualifying for the dividends received deduction, and Fund's common stockholders may treat only $85x of the dividends they received as capital gain dividends. In addition, Fund may include only $85x of the dividends it designated as capital gain dividends in computing its dividends paid deduction for purposes of section 852(b)(3)(A).

Analogous principles apply to make ineffective non-proportionate designations of other types of income.

HOLDING

If a regulated investment company has two or more classes of stock and it designates the dividends that it pays on one class as consisting of more than that class' proportionate share of a particular type of income, the designations are not effective for federal tax purposes to the extent that they exceed the class' proportionate share of that type of income.

EFFECT ON OTHER RULINGS

To the extent that they hold that non-proportionate designations are effective for federal tax purposes, Rev. Rul. 70-597, 1970-2 C.B. 146, and Rev. Rul. 74-177, 1974-1 C.B. 166, are modified.

PROSPECTIVE APPLICATION

Under the authority contained in section 7805(b) of the Code, if a RIC makes a non-proportionate designation pursuant to a rule described in a registration statement that was filed with the Securities and Exchange Commission before June 13, 1989, this revenue ruling will not be applied to render the designation ineffective for federal tax purposes.

Whether, for purposes of the dividends paid deduction under section 562 of the Code, the term "shareholder" refers to the legal owner of the shares of a regulated investment company rather than the beneficial owner of the shares. See Rev. Rul. 89-79, page 172.

Subchapter N.—Tax Based on Income from Sources Within or Without the United States
Part I.—Determination of Sources of Income

Section 861.—Income from Sources Within the United States

26 CFR 1.861-8T: Computation of taxable income from sources within the United States and from other sources and activities (Temporary)

T.D. 8236

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Part 1

Allocation and Apportionment of Deduction for State Income Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary Regulations.

SUMMARY: This document provides temporary Income Tax Regulations relating to the allocation and apportionment of deductions for state income taxes in computing taxable income from sources inside and outside the United States. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations * * * [page 1019, this Bulletin].

EFFECTIVE DATES: The rules of §1.861-8T(e)(6)(i) and the language preceding the examples in §1.861-8T)(g) are effective for taxable years beginning after December 31, 1976. The remaining regulations are effective for taxable years beginning on or after January 1, 1988.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains temporary Income Tax Regulations (26 CFR Part 1) under sections 861(b), 862(b), and 863(a) of the Internal Revenue Code of 1986. The temporary regulations are issued under the authority contained in section 7805 (26 U.S.C. 7805) of the Internal Revenue Code of 1986.

Sections 861(b) and 862(b) of the Code provide that, in determining taxable income attributable to items of United States source income enumerated in section 861(a) and foreign source income enumerated in section 862(a), deductions must be properly allocated and apportioned to such income. In addition, section 863(a) provides that deductions must be properly allocated and apportioned to items of income not described in section 861(a) or 862(a) in order to compute taxable income under section 863. The allocation and apportionment of deductions is fundamental to the computation of taxable income of foreign corporations under section 882 and the foreign tax credit limitation under section 904(a) of the Code. Questions have recently arisen about the allocation and apportionment of the deduction for state taxes in situations not explicitly addressed by the current regulations. The temporary regulations promulgated herein provide guidance with respect to these questions.

NEED FOR TEMPORARY REGULATIONS

Because of the significant number of taxpayers needing immediate guidance for purposes of filing income tax returns, the Internal Revenue Service has found it to be impractical to issue these temporary regulations after the notice and public comment procedure under section 553(b) of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

DISCUSSION

§1.861-8

This document revises §1.861-8 by reserving paragraph (e) of §1.861-8, the language of §1.861-8(g) that precedes the examples, and Examples (25) and (26) of paragraph (g) of §1.861-8.

§1.861-8T(e)(6)

Paragraph (e)(6)(i) of §1.861-8T as promulgated herein restates the previously promulgated general principle that state, local, and foreign income, war profits and excess profits taxes are definitely related and allocable to the gross income with respect to which such taxes are imposed. Paragraph (e)(6)(i) also clarifies that the deduction for a state franchise tax that is computed based on income is to be allocated in the same manner as an income tax. Paragraph (e)(6)(ii) also cites five examples illustrating the application of the general principle for allocation of that deduction, and provides that taxpayers may use another method of allocation or apportionment if shown to the satisfaction of the district director that such method produces a more accurate result. This allocation and apportionment is necessary because states may tax income that is foreign source under the Internal Revenue Code provided the income is attributable to activities performed in the state. *Mobil Oil Corp. v. Commissioner of Taxes*, 445 U.S. 425 (1980). Paragraph (e)(6)(iii) of §1.861-8T provides that the regulations in paragraph (e)(6)(i) are effective for all taxable years beginning after December 31, 1976, and that the regulations in paragraph (e)(6)(ii) and *Examples* (25) through (29) of §1.861-8T(g) are effective for taxable years beginning on or after January 1, 1988. This paragraph also provides taxpayers with the option to apply the regulations to deductions for state tax incurred in taxable years beginning before January 1, 1988.

§1.861-8T(g)

Paragraph (g) of §1.861-8T as promulgated herein first restates the previously promulgated language that precedes the examples in §1.861-8(g), and supplements that language to clarify that the examples do not establish as substantive rules the particular methods of allocation set forth therein. Because the application of the general rule is inherently factual in nature and an allocation must be reasonable under all the facts and circumstances, this paragraph provides that the methods of allocation illustrated in the examples may not be used if the result is not a reasonable allocation, under all of the facts and circumstances, of the deduction to the gross income to which it relates.

Paragraph (g) of §1.861-8T then provides five examples, Examples (25) through (29), that illustrate the general rule for allocation and apportionment of the deduction for state income tax.

EXAMPLES (25) AND (26)

Examples (25) and (26) of §1.861-8T (g) are modifications of previously promulgated examples. The modification to each example provides that for purposes of allocating the deduction for state taxes neither U.S. nor foreign source income is reduced by the amount of the state income tax deduction being allocated. Example (25) provides that the deduction for state income taxes is allocable to a class of income that includes foreign source income when the laws of the states imposing tax on the taxpayer do not specifically exempt foreign source income, and the total amount of income taxed by the states, as determined under state law, exceeds the amount of U.S. source income for Federal income tax purposes. Example (26) describes the allocation and apportionment of state income tax when one (but not all) of the states imposing an income tax on the taxpayer explicitly exempts foreign source income. If, under the facts of Examples (25) and (26), the total amount of state taxable incomes is less than or equal to the amount of U.S. source income for Federal income tax purposes, none of the state income tax is allocable to a class of income that includes foreign source income.

EXAMPLE (27)

Example (27) of §1.861-8T(g) indicates that when a taxpayer conducts income producing operations in a state that does not impose an income tax, an adjustment is necessary before the allocation and apportionment methods contained in Examples (25) and (26) may be applied. Examples (25) and (26) determine whether foreign source income is taxed by states by comparing total state taxable incomes with U.S. source taxable income for Federal income tax purposes. Without an adjustment, this comparison may be inaccurate when the taxpayer has significant activities in a state that does not impose a tax computed on income attributable to activities in that state.

Example (27) provides that the allocation and apportionment of state income taxes is to be made by first making a reasonable estimate of the taxable income attributable to activities in states that do not impose a tax computed on state taxable income and subtracting this estimated amount from U.S. source taxable income for Federal income tax purposes. The taxpayer must then apply the allocation and apportionment methods described in Example (26) by comparing total state taxable incomes in states that imposed an income tax with the reduced amount of U.S. source taxable income for Federal income tax purposes. Example (27) of the temporary regulations provides a method that will be deemed to produce a reasonable estimate of the taxable income attributable to activities in a state that does not define state taxable income.

EXAMPLE (28)

Example (28) of §1.861-8T(g) provides for the allocation and apportionment of the deduction for a state income tax imposed by a state that defines a corporation's business income to include dividends from noncontrolled companies ("portfolio dividends") and that determines the corporation's state taxable income by apportioning the corporation's business income based upon a ratio of its factors in the state to those outside the state. Under state law, the factors used to compute the ratio used to apportion income to the state do not include factors attributable to corporations paying portfolio dividends. In such a situation, a portion of the state tax is definitely related to the portfolio dividends and must be allocated to the classes of gross income consisting of foreign source and U.S. source portfolio dividends, respectively. Any remaining tax is to be allocated and apportioned separately under the principles illustrated in the other examples of §1.861-8T(g).

EXAMPLE (29)

Example (29) of §1.861-8T(g) illustrates the allocation and apportionment of the deduction for state income taxes when a state imposes an income tax on a worldwide unitary basis. Under this example, an appropriate portion of unitary tax is first allocated to the taxpayer's portfolio dividends in the manner described in Example (28). An appropriate portion of unitary tax is then allocated to state taxable income attributable to the inclusion, under state tax rules, of controlled foreign corporations (CFCs) and "80/20" companies as defined in section 861(c)(1) in the unitary group. The state tax imposed on such income is apportioned on the basis of the income earned by the CFCs and the 80/20 companies. The state tax remaining after reduction for tax attributable to portfolio dividends and tax attributable to the inclusion of other related companies in the unitary group is added to the state tax imposed by the other states and apportioned under the principles illustrated in Examples (25) through (27).

SPECIAL ANALYSES

It has been determined that this temporary rule is not a major legislative regulation subject to Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. §553 for temporary regulations. Accordingly, these temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

* * * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Part 1 is amended as follows:

INCOME TAX REGULATIONS
(26 CFR Part I)

Paragraph 1. The authority for part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. Section 1.861-8(e)(6) and the introductory text of paragraph (g) and *Examples* (25) and (26) are revised to read as follows:

§1.861-8. Computation of taxable income from sources within the United States and from other sources and activities.

* * * * * *

(e) *Allocation and apportionment of certain deductions.*

* * * * * *

(6) *Income taxes.* (Reserved) For guidance see §1.861-8T (e)(6).

* * * * * *

(g) *General examples.* (Reserved) For guidance see §1.861-8T(g).

* * * * * *

Example (25)—Income Taxes. (Reserved) For guidance see §1.861-8T(g) *Examples* (25) through (29).

Example (26)—Income Tax. (Reserved) For guidance see §1.861-8T(g) *Examples* (25) through (29).

Par. 3. Section 1.861-8T is amended by adding paragraph (e)(6), the introductory text of paragraph (g), and *Examples* (25) - (29), to read as follows:

§1.861-8T Computation of taxable income from sources within the United States and from other sources and activities (Temporary).

* * * * * *

(6) *Income taxes—(i) In general.* The deduction for state, local, and foreign income, war profits and excess profits taxes allowed by section 164 shall be considered definitely related and allocable to the gross income with respect to which such taxes are imposed. For example, if a domestic corporation is subject to state income tax and such state income tax is imposed in part on an amount of foreign source income, that

part of the taxpayer's state income tax attributable to foreign source income is definitely related and allocable to foreign source income. A state franchise tax that is computed on the basis of income attributable to business activities conducted within the state must be allocated and apportioned in the same manner as an income tax.

(ii) *Methods of allocation and apportionment. Examples* (25) through (29) of paragraph (g) of this section illustrate the application of this paragraph (e)(6). Taxpayers may utilize methods of allocation or apportionment other than those illustrated in these examples if it is established to the satisfaction of the District Director upon examination that a different method yields a more accurate allocation and apportionment of state taxes, based on the factual relationship of the state tax to the income on which the tax is imposed.

(iii) *Effective dates.* The rules of §1.861-8T(e)(6)(i) are effective for taxable years beginning after December 31, 1976. The rules of §1.861-8T(e)(6)(ii) and *Examples* (25) through (29) of §1.861-8T(g) are effective for taxable years beginning on or after January 1, 1988. At the option of the taxpayer, however, the rules of §1.861-8T (e)(6)(ii) and *Examples* (25) through (29) of §1.861-8T(g) may be applied with respect to deductions for state taxes incurred in taxable years beginning before January 1, 1988.

* * * * * *

(g) *General examples.* The following examples illustrate the principles of this section. In each example, unless otherwise specified, the operative section which is applied and gives rise to the statutory grouping of gross income is the overall limitation to the foreign tax credit under section 904(a). In addition, in each example, where a method of allocation or apportionment is illustrated as an acceptable method, it is assumed that such method is used by the taxpayer on a consistent basis from year to year (except in the case of the optional method for apportioning interest under paragraph (e)(2)(vi) of this section or the optional method for apportioning research and development expense under paragraph (e)(3)(iii) of this section). Further, it is assumed that each party named in each example operates on a calendar year accounting basis and, where the party is a U.S. taxpayer, files returns on a calendar year basis. The examples contained in this section illustrate the general rule that a deduction must be allocated to the class of gross income with respect to which the deduction is factually related. The application of this general rule is inherently factual in nature. These illustrations of this inherently factual rule are presented as examples because the particular methods of allocation utilized merely illustrate in particular factual situations the regulatory rule requiring an allocation that is reasonable under all the facts and circumstances. These examples do not establish as substantive rules the particular methods of allocation therein set forth. Thus, these particular methods of allocation may not be used if the result is not a reasonable allocation, under all of the facts and circumstances of the particular case, of the deduction to the class of gross income to which it relates.

* * * * * *

Example (25)—Income Taxes—(i) *Facts.* X, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states A, B, and C. X also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In 1988, X has taxable income from these activities, as determined under the Code (without taking into account the deduction for state taxes), of $1,000,000, of which $200,000 is foreign source general limitation income subject to a separate limitation under section 904(d)(1)(I) ("general limitation income") and $800,000 is domestic source income. States A, B, and C each determine X's income subject to tax within their state by making adjustments to X's taxable income as determined under the Code, and then apportioning the adjusted taxable income on the basis of the relative amounts of payroll, property, and sales with respect to each state as compared to worldwide payroll, property, and sales of the taxpayer. The adjustments made by states A, B, and C all involve adding and subtracting enumerated items from taxable income as determined under the Code. However, in making these adjustments to taxable income, none of the states specifically exempts foreign source income as determined under the Code. On this basis, it is determined that X has taxable income of $550,000, $200,000, and $200,000 in states A, B, and C, respectively. The corporate tax rates in states A, B, and C are 10 percent, 5 percent, and 2 percent, respectively, and X has total state income tax liabilities of $69,000 ($55,000 + $10,000 + $4,000), which it deducts as an expense for Federal income tax purposes.

(ii) *Allocation.* X's deduction of $69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Presumptively, states A, B, and C only tax income from domestic sources. However, since the statutes of states A, B, and C do not specifically exempt foreign source income (as determined under the Code) from taxation and since, in the aggregate, states A, B, and C tax $950,000 of X's income while only $800,000 is domestic source income under the Code, it is presumed that state income taxes are imposed on $150,000 of foreign source income. The deduction for state income taxes is therefore related and allocable to both X's foreign source and domestic source income.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The state income tax deduction of $69,000 must be apportioned between these two groupings. Corporation X calculates the apportionment on the basis of relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, state income taxes are imposed on $800,000 of domestic source income and $150,000 of foreign source general limitation income.

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $69,000 × ($150,000/$950,000)	$10,895
State income tax deduction apportioned to income from sources within the United States (residual grouping): $69,000 × ($800,000/$950,000)	$58,105
Total apportioned state income tax deduction	$69,000

Example (26)—Income Taxes—(i) *Facts.* Assume the same facts as in *Example* (25) except that state A's statute exempts from taxation all foreign source income, as determined under the Code, so that foreign source income is not included in adjusted taxable income subject to apportionment in state A (and factors relating to X's country Y branch are not taken into account in computing the state A apportionment fraction).

(ii) *Allocation.* X's deduction of $69,000 for state income taxes is definitely related and thus allocable to the gross income with respect to which the taxes are imposed. Since state A exempts all foreign source income by statute, state A is presumed to impose tax on $550,000 of X's $800,000 of domestic source income. X's state A tax of $55,000 is allocable, therefore, solely to domestic source income. Since the statutes of states B and C do not specifically exclude all foreign source income as determined under the Code, and since states B and C impose tax on $400,000 ($200,000 + $200,000) of X's income of which only $250,000 ($800,000 − $550,000) is presumed to be domestic source, the deduction for the $14,000 of income taxes imposed by states B and C is related and allocable to both X's foreign source and domestic source income.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, X's income is comprised of one statutory grouping, foreign source general limitation gross income, and one residual grouping, gross income from sources within the United States. The deduction of $14,000 for income taxes of states B and C must be apportioned between these two groupings. Corporation X calculates the apportionment on the basis of relative amounts of foreign source general limitation income and U.S. source income subject to state taxation.

States B and C income tax deduction apportioned to foreign source general limitation income (statutory grouping): $14,000 × ($150,000/$400,000)	$ 5,250
States B and C income tax deduction apportioned to income from sources within the United States (residual grouping): $14,000 × ($250,000/$400,000)	$ 8,750
Total apportioned state income tax deduction	$14,000

Of X's total income taxes of $69,000, the amount allocated and apportioned to foreign source general limitation income equals $5,250. The total amount of state income taxes allocated and apportioned to U.S. source income equals $63,750 ($55,000 + $8,750).

Example (27)—Income Tax—(i) *Facts.* Assume the same facts as in *Example* (25) except that state A, in which X has significant income producing activities, does not impose a corporate income tax or other state tax imposed on income derived from business activities conducted in state A. X therefore has a total state income tax liability in 1988 of $14,000 ($10,000 paid to state B plus $4,000 paid to state C), all of which is subject to allocation and apportionment under paragraph (b) of this section.

(ii) *Allocation.* (A) X's deduction of $14,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. An adjustment is necessary, however, before the aggregate state taxable incomes can be compared with U.S. source income on the Federal income tax return in the manner described in *Examples* (25) and (26). Unlike the facts in *Examples* (25) and (26), state A imposes no income tax and does not define taxable income attributable to activities in state A. The total amount of X's income subject to state taxation is, therefore, $400,000 ($200,000 in state B and $200,000 in state C). This total presumptively does not include any income attributable to activities performed in state A and therefore can not properly be compared to total U.S. source income reported by X for Federal income tax purposes, which does include income attributable to state A activities. Under these facts, the application of the method used in *Examples* (25) and (26), which compares total state taxable incomes with total U.S. source income for Federal income tax purposes, would presume that states B and C are taxing U.S. source income attributable to state A before taxing any foreign source income, a result which may or may not be warranted depending on the particular facts.

(B) Before applying the method used in *Examples* (25) and (26) to the facts of this example, it is necessary to estimate the amount of income that state A could reasonably attribute to X's activities in state A. The rules of the Uniform Division of Income for Tax Purposes Act ("UDITPA") attribute income to a state on the basis of the average of three ratios that are based upon the taxpayer's facts — property within the state over total property, payroll within the state over total payroll, and sales with n the state over total sales — and may be used, with adjustments, for this purpose. In order to estimate U.S. source income derived from state A activities, the taxpayer's UDITPA factors must be adjusted to eliminate taxable income and any factors attributable to a foreign branch. In this example all taxable income as well as UDITPA apportionment factors (property, payroll, and sales) attributable to X's country Y branch must be eliminated.

(C) Since it is presumed that state A would not attempt to tax the income derived by X's country Y branch, a reasonable estimate of the income that would be taxed by state A if state A had an income tax equals Federally defined taxable income (before deduction for state income taxes) less income derived by X's country Y branch, multiplied by the average of the taxpayer's state A property, payroll, and sales ratios, determined using the principles of UDITPA (adjusted to eliminate the country Y branch factors). The amount so determined is presumed to be imposed exclusively on U.S. source income and the allocation and apportionment method described in *Example* (26) must be applied. If, for example, state A taxable income is determined to equal $550,000, then $550,000 of U.S. source income for Federal income tax purposes is presumed to constitute state A taxable income. The remaining $250,000 of U.S. source income for Federal income tax purposes is presumed to be subject to tax in states B and C. Since states B and C impose tax on $400,000, of which $150,000 is presumed to be foreign source income and $250,000 is presumed to be domestic source income, the deduction for the $14,000 of income taxes of states B and C is related and allocable to both X's foreign source and domestic source income and is subject to apportionment

(iii) *Apportionment.* The deduction of $14,000 for income taxes of states B and C is apportioned in the same manner as in *Example* (26). As a result, $5,250 of the $14,000 of state B and state C income taxes is apportioned to foreign source general limitation income ($14,000 × $150,000/$400,000), and $8,750 ($14,000 × $250,000/$400,000) of the $14,000 of state B and state C income taxes is apportioned to U.S. source income.

Example (28)—Income Tax—(i) *Facts.* (A) Assume the same facts as in *Example* (25) (X has $1,000,000 of taxable income for Federal income tax purposes, $800,000 of which is U.S. source income and $200,000 of which is foreign source general limitation income), except that $100,000 of X's $200,000 of foreign source general limitation income consists of dividends from controlled foreign corporations ("CFCs") in which X owns stock representing 10 to 50 percent of the vote and value in such corporations. The income derived by the CFCs paying the dividends consists entirely of foreign source general limitation income.

(B) State A taxable income is computed by first making adjustments to X's Federal taxable income. These adjustments result in X having a total of $1,100,000 of apportionable taxable income for state A tax purposes. None of the $100,000 of adjustments made by state A relate to the dividends paid by the CFCs. As in *Example* (25), the amount of apportionable taxable income attributable to business activities conducted in state A is determined by multiplying apportionable taxable income by a fraction (the "state apportionment fraction") that compares the relative amounts of X's payroll, property, and sales within state A with X's worldwide payroll, property and sales. An analysis of state A law indicates that state A includes "portfolio dividends" in its definition of the taxable income of X which is apportionable to X's state A activities. However, the factors of the corporations paying those dividends are not included in the state A apportionment fraction for purposes of apportioning income to the state. Portfolio dividends are defined under state A law as any dividends paid from less than 50 percent owned subsidiaries. The dividends received by X from the 10 to 50 percent owned controlled foreign corporations, therefore, are considered to be portfolio dividends for state A tax purposes. The comparison of X's state A factors with X's worldwide factors results in a state apportionment fraction of 50 percent. Applying this fraction to apportionable taxable income of $1,100,000, as determined under state law, results in attributing 50 percent of apportionable taxable income to state A, and produces total state A taxable income of $550,000. State A imposes an income tax at a rate of 10 percent on the amount of income that is attributed to state A, which results in $55,000 of tax imposed by state A.

(ii) *Allocation.* (A) States A, B, and C impose income taxes of $69,000 which must be allocated to the classes of income upon which the taxes are imposed. A portion of X's Federal income tax deduction of $55,000 for state A income tax is definitely related and thus allocable to the class of gross income consisting of foreign source portfolio dividends. A definite relationship exists between a deduction for state income tax and portfolio dividend income when a state includes portfolio dividends in state taxable income apportionable to the state on the basis of an apportionment fraction that excludes the factors of the corporations paying the dividends. By applying a state apportionment fraction that excludes factors of the corporations paying portfolio dividends to apportionable taxable income that includes the $100,000 of foreign source portfolio dividends, $50,000 (50 percent of the $100,000) of the portfolio dividends is attributed to X's activities in state A and subjected to state A income tax. Applying the state A income tax rate of 10 percent to the $50,000 of foreign source portfolio dividends subjected to state A income tax, $5,000 of X's $55,000 total state A income tax liability is definitely related and allocable to a class of income consisting of the foreign source portfolio dividends. (If a state imposes a graduated tax rate, the average effective state tax rate for the taxpayer for the taxable year may be utilized to determine the amount of tax attributable to the portfolio dividends.) Since under the look-through rules of section 904 (d)(3) the foreign source portfolio dividends are included within the general limitation described in section 904 (d)(1)(I), the $5,000 of state A tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned. [If the total amount of state A tax imposed on foreign source portfolio dividends were to exceed the actual amount of X's state A income tax liability (for example, due to net operating losses), the actual amount of state A tax would be entirely allocated to the foreign source portfolio dividends.] After allocation of a portion of the state A tax to portfolio dividends, $50,000 ($55,000 − $5,000) of state A tax remains to be allocated.

(B) A total of $64,000 (the aggregate of the $50,000 remaining state A tax, and the $10,000 and $4,000 of taxes imposed by states B and C, respectively) is to be allocated as provided in *Example* (25), by comparing U.S. source taxable income, as determined under the Code, with the aggregate of the state taxable incomes determined by states A, B, and C, after reducing state apportionable taxable incomes by the amount of any portfolio dividends to which tax has been specifically allocated. X's state A taxable income, after reduction by the $50,000 of portfolio dividends taxed by the state, equals $500,000. X also has taxable income of $200,000 and $200,000 in states B and C, respectively. In the aggregate, therefore, states A, B, and C tax $900,000 of X's income, after excluding state taxable income attributable to portfolio dividends. Since X has only $800,000 of U.S. source taxable income for Federal income tax purposes, it is presumed that state income taxes are imposed on $100,000 of foreign source income. The remaining deduction of $64,000 for state income taxes is therefore related and allocable to both X's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* For purposes of computing the foreign tax credit limitation, there is one statutory grouping, foreign source general limitation income, and one residual grouping, gross income from sources within the United States. The remaining state income tax deduction of $64,000 must be apportioned between these two groupings on the basis of relative amounts of foreign source general limitation taxable income and U.S. source taxable income subject to state taxation. In this case, the $64,000 of state income taxes is considered to be imposed on $800,000 of domestic source income and $100,000 of foreign source general limitation income and is apportioned as follows:

State income tax deduction apportioned to foreign source general limitation income (statutory grouping):

$64,000 × ($100,000/$900,000).... $ 7,111

State income tax deduction apportioned to income from sources within the United States (residual grouping):

$64,000 × ($800,000/$900,000) ... $56,889

Total apportioned state income tax deduction........................ $64,000

Of the total state income taxes of $69,000, the amount allocated and apportioned to foreign source general limitation income equals $12,111 ($5,000 + $7,111). The total amount of state income taxes allocated and apportioned to U.S. source income equals $56,889.

Example (29)—Income Taxes—(i) *Facts.* (A) P, a domestic corporation, is a manufacturer and distributor of electronic equipment with operations in states F, G, and H. P also has a branch in country Y which manufactures and distributes the same type of electronic equipment. In addition, P has three wholly owned subsidiaries, US1, US2, and FS, the latter a controlled foreign corporation ("CFC") as defined in section 957 (a) of the Code. P also holds interests ranging from 10 to 50 percent ownership in various controlled foreign corporations.

(B) In 1988, P derives $1,000,000 of Federal taxable income (without taking into account the deduction for state income taxes), which consists of $250,000 of foreign source general limitation income and $750,000 of U.S. (domestic) source income. The foreign source general limitation income consists of a $25,000 subpart F inclusion with respect to FS, $150,000 of dividends from other CFCs in which P owns stock representing 10 to 50 percent of the vote and value, and $75,000 of manufacturing and sales income derived by P's U.S. operations and country Y branch. The $750,000 of U.S. source income consists of manufacturing and sales income derived by P's U.S. operations.

(C) For Federal income tax purposes, US1 derives $75,000 of taxable income, before deduction for state income taxes, which consists entirely of U.S. source income. US2, a so-called "80/20" corporation described in section 861(c)(1), derives $250,000 of Federal taxable income before deduction for state or foreign income taxes, all of which is derived from foreign operations and consists entirely of foreign source general limitation income. FS is not engaged in a U.S. trade or business and derives $550,000 of foreign source general limitation income before deduction for foreign income taxes.

(D) State F imposes a corporate income tax of 10 percent on P's state F taxable income, which is determined on the basis of a worldwide unitary apportionment. State F determines P's taxable income for state F tax purposes by first making adjustments to the taxable income, as determined for Federal income tax purposes, of the members of the unitary group to determine the unitary business income of the group. State F then attributes a portion of that unitary business income to activities of P that are conducted in state F by multiplying the unitary business income (adjusted Federal taxable income) of the unitary group by a fraction (the "state apportionment fraction") that compares the relative amount of the unitary group's payroll, property, and sales (the "factors") in state F with the payroll, property, and sales of the unitary group. P is the only member of its unitary group that has state F factors and that is thereby subject to state F income tax and filing requirements. State F defines the unitary group to include any corporation more than 50 percent of which is directly or indirectly owned by a state F taxpayer and is engaged in the same unitary business. P's unitary group, therefore, includes P, US1, US2, and FS, but does not include the 10 to 50 percent owned CFCs. The unitary business income of the unitary group excludes intercompany dividends between members of the unitary group and subpart F inclusions with respect to a member of the unitary group. Dividends paid from nonmembers of the unitary group (the 10 to 50 percent owned CFCs) are referred to as portfolio dividends for state F tax purposes and are included in unitary income. None of the factors (in state F or worldwide) of the corporations paying portfolio dividends are included in the state F apportionment fraction for purposes of apportioning unitary business income to P's state F activities.

(E) After adjustments to Federal taxable income, the unitary business income of P's unitary group equals $2,000,000, consisting of $1,050,000 of P's income ($100,000 of foreign source manufacturing and sales income, $150,000 of foreign source portfolio dividends, and $800,000 of U.S. source manufacturing and sales income, but excluding the $25,000 subpart F inclusion attributable to FS since FS is a member of the unitary group), $100,000 of US1's income (from sales made in the United States), $275,000 of US2's income (from an active business outside the United States), and $575,000 of FS's income. The differences between Federal taxable income and state F apportionable taxable income for P, US1, US2, and FS represent adjustments to Federal taxable income pursuant to the tax laws of state F.

(F) The Federal and state taxable income for each member of the unitary group is summarized in the following table. (The items of income listed in the "Federal" column of the table refer to taxable income before deduction for state income tax.)

		Federal	State F
P			
	U.S. source income	$ 750,000	$ 800,000
	Foreign source general limitation income:		
	Portfolio dividends	150,000	150,000
	Subpart F income	25,000	0
	Manufacturing and sales income	75,000	100,000
	Total taxable income	$1,000,000	$1,050,000
US1			
	U.S. source income	$ 75,000	100,000
US2			
	Foreign source general limitation income	$ 250,000	275,000
FS			
	Foreign source general limitation income	$ 550,000	575,000
	Unitary business income		$2,000,000

(G) P's state F taxable income equals $500,000, which is determined by multiplying the group's unitary business income ($2,000,000) by the group's state F apportionment fraction, which equals 25 percent in these facts. P's state F taxable income is multiplied by the state F tax rate of 10 percent, resulting in a state F tax liability of $50,000. State G and state H, unlike state F, do not tax portfolio dividends. Although state G and state H apportion taxable income to those states on the basis of an apportionment fraction that compares state factors to total factors, state G and state H, unlike state F, do not tax on a unitary basis and only consider P's taxable income and factors in computing P's taxable income. P's taxable income under state G law equals $300,000, which is subject to a 5 percent tax rate resulting in a state G tax liability of $15,000. P's taxable income under state H law is $300,000, which is subject to a tax rate of 2 percent resulting in a state H tax liability of $6,000. P has a total Federal income tax deduction for state income taxes of $71,000 ($50,000 + 15,000 + 6,000).

(ii) *Allocation.* (A) P's deduction of $71,000 for state income taxes is definitely related and allocable to the gross income with respect to which the taxes are imposed. Adjustments may be necessary, however, before aggregate state taxable incomes can be compared with U.S. source income on the Federal income tax return in the manner described in *Examples* (25) and (26). In allocating P's deduction for state income taxes, it is necessary first to determine the portion, if any, of the deduction that is definitely related and allocable to a particular class of gross income. A definite relationship exists between a deduction for state income tax and dividend income when a state includes portfolio dividends in state taxable income apportionable to the state on the basis of an apportionment fraction (whether or not calculated on a unitary basis) that excludes the factors of the corporations paying portfolio dividends.

(B) In this case, $150,000 of foreign source portfolio dividends are subject to a state F apportionment fraction of 25 percent, which results in a total of $37,500 of state F taxable income attributable to such dividends. As illustrated in *Example* (28), $3,750 ($150,000 × 25 percent state F apportionment percentage × 10 percent state F tax rate) of P's state F income tax is definitely related and allocable to a class of gross income consisting entirely of the foreign source portfolio dividends. Since under the look-through rules of section 904(d)(3) the foreign source portfolio dividends are included within the general limitation described in section 904(d)(1)(I), the $3,750 of state F tax on foreign source portfolio dividends is allocated entirely to foreign source general limitation income and, therefore, is not apportioned.

(C) After reducing state F taxable income of the unitary group by the taxable income attributable to portfolio dividends, state F taxes P on $462,500 ($500,000 − $37,500), the income of a unitary group that includes P and other affiliated companies. Accordingly, in order to allocate and apportion the remaining $46,250 of state F tax ($50,000 of state F tax minus the $3,750 of state F tax allocated to foreign source portfolio dividends), it is necessary first to determine if state F is taxing only P's separate company income or is imposing its tax partly on income of other members of the unitary group. If state F is taxing income of other members of the unitary group, a portion of the state F tax must be allocated and apportioned on the basis of the income of the other members of the group subject to state F taxation. In order to determine if state F is taxing only P's separate company income, it is necessary to compute P's separate company taxable income using only P's income (excluding portfolio dividends) and state F apportionment factors. If P's separate company taxable income equals or exceeds the $462,500 of remaining state F taxable income, it is presumed that state F is only taxing P's separate company income and the entire amount of the remaining state F tax should be allocated and apportioned in the manner described in *Example* (25).

(D) If P's separate company taxable income is less than the $462,500 of remaining state F taxable income (after reduction for the $37,500 of state F taxable income attributable to portfolio dividends), it is presumed that state F is taxing the income of other affiliates included in the unitary group. In such a case, it is necessary to determine if the state is imposing tax in part on the foreign source income of foreign affiliates and 80/20 companies included in the unitary group or is limiting its taxation to U.S. source income of domestic members of the unitary group.

(E) Assume for purposes of this example that P's separate company taxable income equals $396,000, computed by multiplying P's state F taxable income of $900,000 (P's state F taxable income (before state F apportionment) of $1,050,000 less the $150,000 of foreign source portfolio dividends) by P's separate company state F apportionment fraction of 44 percent. Because P's separate company taxable income of $396,000 is less than the $462,500 of remaining state F taxable income, state F is presumed to be taxing the income of P's affiliates that are included in the unitary group. To determine if state F tax is being imposed on members of the unitary group (other than P) that produce foreign source income, it is necessary to compute a hypothetical state F taxable income for all companies in the unitary group with significant U.S. operations. (For this purpose, the hypothetical group of companies with significant domestic operations is referred to as the "water's edge group.") State F is presumed to be taxing income of foreign corporations and 80/20 companies to the extent that the remaining state F taxable income ($462,500) exceeds the hypothetical state F taxable income for the water's edge group.

(F) The members of the water's edge group are P and US1. The unitary business income of this water's edge group equals $1,000,000, the sum of $900,000 (P's state F taxable income (before state F apportionment) of $1,050,000 less the $150,000 of foreign source portfolio dividends) and $100,000 (US1's separate company state F taxable income). For purposes of this example, the state F apportionment fraction determined on a unitary basis for this water's edge group is assumed to equal 40 percent, the average of P and US1's state F payroll, property, and sales factor ratios (the water's edge group's state F factors over its worldwide factors). Applying this apportionment fraction to the $1,000,000 of unitary business income of the water's edge group yields state F water's edge taxable income of $400,000. The excess of the remaining $462,500 of state F taxable income over the $400,000 of state F water's edge taxable income equals $62,500, and is attributable to the inclusion of US2 and FS in the unitary group. The state F tax attributable to US2 and FS equals $6,250 and is allocated entirely to a class of gross income consisting of foreign source general limitation income, because the income of FS and US2 consists entirely of such income. The $6,250 of state F tax attributable to US2 and FS is subtracted from the remaining $46,250 of net state F tax, and P has $40,000 of state F tax remaining to be allocated and apportioned.

(G) To the extent that the remaining state F taxable income ($400,000) exceeds P's separate company state F taxable income ($396,000), it is presumed that state F is taxing U.S. source income of members of the water's edge group other than P In these facts, the $4,000 excess over P's separate company state F taxable income is attributable to the inclusion of US1 in the unitary group. The $400 of state F tax attributable to the inclusion of US1 in the unitary group (10 percent of $4,000) is allocated entirely to U.S. source income. P's remaining $39,600 of state F tax ($40,000 of state F tax attributable to the water's edge group minus $400 of state F tax attributable to US1 and allocated to U.S. source income) is the state F tax attributable to P's separate company state F taxable income and is to be allocated and apportioned together with P's state G tax of $15,000 and state H tax of $6,000 as illustrated in *Example* (25).

(H) In allocating the $60,600 of state tax liabilities ($39,600 state F tax attributable to P's separate company state F income + $15,000 state G tax + $6,000 state H tax) under *Example* (25), P's state taxable income in state G and state H ($300,000 + $300,000) must be added to P's separate company state F taxable income ($396,000). The resulting $996,000 of combined state taxable incomes is compared with $750,000 of U.S. source income on P's Federal income tax return. It is presumed that the $60,600 of state income taxes are imposed in part on $246,000 of foreign source income, which is the excess of P's combined state taxable incomes over P's Federal U.S. source taxable income. Accordingly, P's remaining deduction of $60,600 ($39,600 + $15,000 + $6,000) for state income taxes is related and allocable to both P's foreign source and domestic source income and is subject to apportionment.

(iii) *Apportionment.* The $60,600 of state taxes (the remaining $39,600 of state F tax + $15,000 of state G tax + $6,000 of state H tax) must be apportioned between foreign source general limitation income and U.S. source income for Federal income tax purposes. This apportionment is based upon the relative amounts of foreign source general limitation taxable income and U.S. source taxable income comprising the $996,000 of income subject to tax by the states after reducing the total amount of income subject to tax by the portfolio dividends and income attributable to the inclusion of other members of the unitary group. The deduction for the $60,600 of state income taxes is apportioned as follows:

State income tax deduction apportioned to foreign source general limitation income (statutory grouping): $60,600 × ($246,000/$996,000)	$14,967
State income tax deduction apportioned to income from sources within the United States (residual grouping): $60,600 × ($750,000/$996,000) ..	$45,633
Total apportioned state income tax deduction	$60,600

Of the total state income taxes of $71,000, the amount allocated and apportioned to foreign source general limitation income is $24,967 — the sum of $14,967 of state F, state G, and state H taxes apportioned to foreign source general limitation income, $3,750 of state F tax allocated to foreign source portfolio dividend income, and the $6,250 of state F tax allocated to foreign source general limitation income as the result of state F's worldwide unitary method of taxation (*i.e.*, the inclusion of US2 and FS in the unitary group). The total amount of state income taxes allocated and apportioned to U.S. source income equals $46,033 — the sum of the $400 of state F tax attributable to the inclusion of US1 in the state F unitary group and $45,633 of combined state F, G, and H tax apportioned under the method provided in *Example* (25).

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved: October 7, 1988.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on December 7, 1988, 3:39 p.m., and published in the issue of the Federal Register for December 12, 1988, 53 F.R. 49873)

Section 863.—Items Not Specified in Section 861 or 862

Income source; scholarship or grant. The source of a payment made to a nonresident alien as a scholarship or grant is determined by the residence of the payor. Rev. Ruls. 66-291 and 66-292 revoked.

Rev. Rul. 89-67

ISSUE

What is the source of an amount paid as a fellowship or a scholarship?

LAW AND ANALYSIS

Section 863(a) of the Internal Revenue Code of 1986 provides authority for the Commissioner to allocate or apportion items of gross income not specified in sections 861 and 862 to sources within and without the United States. No statutory rule is provided under section 861 or 862 for income received to support or subsidize a recipient's research or study activities.

Rev. Rul. 66-292, 1966-2 C.B. 280, held that the source of an amount received as a scholarship or fellowship is determined by where the research or study activities take place. A companion ruling, Rev. Rul. 66-291, 1966-2 C.B. 279, held that the source of an award for a puzzle contest is determined by where the activities required to solve the puzzle are performed. The rules contained in these revenue rulings are analogous to the rule contained in sections 861(a)(3) and 862(a)(3) of the Code that sources compensation from personal services where the services are performed. There is no indication in either cited revenue ruling, however, that the recipients performed any services for the payor, and Rev. Rul. 66-292 explicitly states to the contrary. (*See also* Rev. Rul. 80-98, 1980-1 C.B. 368, and Rev. Rul. 61-65, 1961-1 C.B. 17, where receipt of fellowship awards similar to the awards under consideration in Rev. Rul. 66-292 are treated as not involving compensation for personal services). The amount received to support or subsidize research and study and the amount received in respect of puzzle solving activities described in the two revenue rulings is not compensation for personal services because no services are performed. It is more appropriate to source these payments at the residence of the payor, where the principal economic nexus with the payments exists, than at the place where the study and research and puzzle solving activities are performed, where the economic nexus is less significant. Thus, for example, scholarship or fellowship payments for research or study, and amounts paid for puzzle-solving activities, made by the United States or a political subdivision thereof, a noncorporate U.S. resident, or a domestic corporation will be from U.S. sources. Similar payments by a foreign government or a foreign corporation will be foreign source payments. Payments made by an entity designated as a public international organization under the International Organizations Immunities Act (*See* section 7701(a)(18)) will be foreign source payments

The fact that payments are made by an intermediary agency acting on behalf of the payor does not alter this result, provided that a genuine agency relationship exists. (*Compare* Rev. Rul. 54-483, 1954-2 C.B. 168, where amounts paid by the United States Government, acting as an agent of a contractor rendering services abroad for the Government, to U.S. citizen employees of the contractor directly pursuant to contract are not amounts paid by the United States).

HOLDING

The source of a payment made as a scholarship, fellowship, or an award for puzzle solving contest activities is the residence of the payor.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 66-291 and Rev. Rul. 66-292 are revoked.

EFFECTIVE DATE

The effective date of this revenue ruling is May 15, 1989. Taxpayers may apply the ruling retroactively to amounts received on or after January 1, 1986.

Part II.—Nonresident Aliens and Foreign Corporations
Subpart A.—Nonresident Alien Individuals

Section 872.—Gross Income

(Also Section 883; 1.883-1.)

International operation of ships and aircraft; income exempt from tax. Listed are those countries that provide equivalent exemptions for income derived from the international operation of ships or aircraft.

Rev. Rul. 89-42

The purpose of this revenue ruling is to assist foreign persons who derive income from the international operation of ships or aircraft in determining whether such income is exempt from United States taxation under section 872(b) or 883(a) of the Internal Revenue Code of 1986.

Gross income derived by an individual resident of a foreign country from the international operation of ships or aircraft is not included in the gross income of the nonresident alien individual and is exempt from United States tax under section 872(b)(1) and (2) of the Code, if such foreign country grants an equivalent exemption to individual residents of the United States. Section 872(b)(5) extends the exemption to income derived from the rental (on a full or bareboat basis) of ships or aircraft. Section 872(b)(6) permits the reciprocal exemption rules to be applied separately with respect to different types of income from the international operation of ships and aircraft.

Similarly, section 883(a)(1) and (2) of the Code provides that gross income derived by a corporation organized in a foreign country from the international operation of ships or aircraft is exempt from United States taxation if such foreign country grants an equivalent exemption to corporations organized in the United States. Section 883(a)(4) extends the exemption to income derived by a foreign corporation from the rental (on a full or bareboat basis) of ships or aircraft and provides that the reciprocal exemption rules may be applied separately with respect to different types of income from the international operation of ships and aircraft.

A foreign country may grant an exemption from tax by exempting persons from that tax through an income tax convention or exchange of diplomatic notes, by not imposing a tax, or by a decree or specific statutory exemption if a tax is generally imposed.

The following Table provides a list of countries which are known to grant an equivalent exemption for various types of international shipping or aircraft income. This Table is intended only as a summary. The full text of the relevant document should be consulted. It may be necessary to consult the technical explanation of an income tax convention, a protocol, or a diplomatic note accompanying a convention to determine the items of income exempted. An income tax convention between the United States and the foreign country may provide benefits under articles covering business profits, shipping and aircraft, rentals and royalties, capital gains or other income. However, to determine whether a convention provides an equivalent exemption for purposes of section 883(c), only the exemptions in articles providing for a full exemption (rather than, for example, articles that base exemption on the absence of a permanent establishment), are to be considered. This is because a full exemption is not granted under the business profits article and under many royalties, rentals, and capital gains articles. The look-through requirements of section 883(c) of the Code do not apply to a foreign corporation deriving income from the international operation of a ship or aircraft, if such income is exempt from U.S. tax under an income tax convention. However, the following income tax conventions contain a look-through provision: Australia, Article 16; Barbados, Article 22; Cyprus, Article 26; France, Article 7; Italy, Article 2(a) of the Protocol with respect to gains from the alienation of ships and aircraft; Jamaica, Article 17; Malta, Article 8(5); and New Zealand, Article 16. These provisions may differ from the requirements of section 883(c).

Part I of the Table summarizes exemptions available under income tax conventions with the United States. Part I also summarizes the requirements for the exemption, such as whether the exemption is based solely on residence or has an additional requirement of documentation or registration.

Part II of the Table summarizes exemptions available in countries that have exchanged diplomatic notes with the United States covering shipping and aircraft income.

Finally, the Service may determine, upon examination of the law of a foreign jurisdiction, that a country offers an equivalent exemption by statute or decree, or by not imposing a tax on such income. This determination will be made on a country by country basis. Part III provides a list of the countries for which such a determination has been made and summarizes the types of income that qualify for the exemption.

A taxpayer may request a ruling that a particular country qualifies as an equivalent exemption jurisdiction. For instructions see Rev. Proc. 87-4, 1987-1 C.B. 529, as modified and amplified by Rev. Proc. 88-8, 1988-1 C.B. 628. Any request for a ruling should include a certified English translation of any applicable foreign statute, decree, etc., supplemented by an official statement from the foreign government. The statement should indicate whether income from the international operation of ships and aircraft includes rental (on a full or bareboat basis) of ships or aircraft, rental of containers and related equipment, and gains from the sale or exchange of a vessel or aircraft used in international transportation, and whether such income is exempt only when incidental to the operation of a ship or aircraft.

This Table will be updated periodically.

Countries Granting Equivalent Exemptions For Income From The Operation of Ships and Aircraft in International Traffic

[1]A reciprocal exemption based on treaty relief is limited to the circumstances in which the treaty itself would be available.

[2]An X indicates full exemption unless otherwise footnoted, whether or not there is a permanent establishment.

[3]Operating income is not defined.

[4]Lessor must either regularly lease ships or aircraft on a full basis or operate them in international traffic.

[5]If incidental to operating income. In the case of the Netherlands, see Rev. Rul. 76-568, 1976-2 C.B. 492. In the case of Germany, see Rev. Rul. 74-92, 1974-1 C.B. 373. Certain countries that have exchanged diplomatic notes with the United States, or countries whose domestic law permits the shipping and aircraft exemptions, may permit full exemption of income derived from the rental of containers and gain from the sale or exchange of a vessel or aircraft used in international traffic. However, sections 872(b) and 883 permit a reciprocal exemption only for income that is incidental to the international operation of a vessel or aircraft.

[6]Except to the extent depreciation has been allowed in the other country.

[7]In the case of aircraft only, the registration may be in the country of residence or in any country with a treaty providing for such exemption between such country and the country of residence.

[8]Documentation or Registration required for ships or aircraft of United States enterprises only.

[9]See also the diplomatic notes accompanying this treaty.

[10]With regard to residents of Japan, the ships or aircraft need not be registered in Japan if the ships are leased by such a resident.

[11]This treaty terminated January 1, 1988.

[12]This exemption applies to aircraft only.

[13]See Rev. Rul. 87-18, 1987-1 C.B. 178.

[14]This exemption covers shipping only.

[15]Brazilian and Portugese law exempts only companies.

[16]Notes signed prior to the Technical and Miscellaneous Revenue Act of 1988 (Technical Corrections) will be interpreted in accordance with Technical Corrections.

[17]The Spanish statute exempts only corporations.

Subpart B.—Foreign Corporations

Section 883.—Exclusions From Gross Income

26 CFR 1.883-1: Exclusions from gross income of foreign corporations.

Whether income derived from the international operation of ships or aircraft is exempt from United States taxation under section 883. See Rev. Rul. 89-42, page 234.

Part III.—Income From Sources Without the United States
Subpart A.—Foreign Tax Credit

Section 901.—Taxes of Foreign Countries and of Possessions of United States

(Also Sections 902, 960, 1248.)

Denial of foreign tax credit; South Africa. The denial of foreign tax credit shall apply to taxes paid or accrued with respect to income earned in and taxes paid to South Africa derived in taxable years of the person deriving the income beginning after December 31, 1987.

Rev. Rul. 89-44

ISSUE

What is the effective date of section 901(j)(2)(C) of the Internal Revenue Code of 1986, relating to income earned in and taxes paid to South Africa?

FACTS

P, a calendar year domestic corporations receives dividends attributable to South African sources from *FX*, its wholly owned subsidiary, on April 1, 1988, and on April 1, 1989, subject to South African withholding taxes. *FX* has a June 30 taxable year. In its taxable years ending June 30, 1988, 1989, and 1990, *FX* pays taxes to South Africa on its income from South African sources. In its taxable years ending June 30, 1988, and June 30, 1989, *FX* has no income that would be characterized as subpart F income under section 952 of the Code but for the application of section 952(a)(5). On June 1, 1990, *P* sells all of the stock of *FX*.

LAW AND ANALYSIS

In General

Section 901(a) of the Code allows a credit against U.S. taxes for foreign taxes paid or accrued by a taxpayer and for taxes deemed to be paid by a corporation under sections 902 and 960. Section 901(j) disallows a credit under section 901(a) for taxes paid or accrued to certain countries. Section 952(a)(5) further requires that income derived from those countries be treated as Subpart F income and taxed currently.

Section 10231 of the Omnibus Budget Reconciliation Act of 1987 (the Act), Pub. L. No. 100-203, 101 Stat. 1330 (1987), applies section 901(j) of the Code to South Africa by adding section 901(j)(2)(C). Section 10231(c) of the Act provides that section 901(j)(2)(C) applies to taxable years beginning after December 31, 1987. Section 10231 of the Act further requires that, under section 952(a)(5), income derived in South Africa in taxable years beginning after December 31, 1987, is to be treated as subpart F income and taxed currently.

The legislative history of section 10231 of the Act states that the provision will apply to "income attributable to the period from January 1, 1988," until the date on which the Secretary of the Treasury certifies that certain actions have been taken to undermine apartheid in South Africa. H.R. Conf. Rep. No. 495, 100th Cong., 1st Sess., 976-977 (1987). Section 901(j)(1)(A) of the Code provides that a credit will be disallowed for taxes paid or accrued "with respect to income attributable to a period to which [section 901(j)] applies to such country."

As the foregoing language indicates, both the statutory provisions and the legislative history focus on when the income subject to tax by South Africa is derived, not on when the foreign tax credit may be claimed. Accordingly, for purposes of section 901 of the Code, section 901(j)(2)(C) shall apply to taxes paid or accrued with respect to income derived in the taxable years of the person deriving the income beginning after December 31, 1987. Thus, if *P* directly derives income from South Africa after January 1, 1988, the beginning of its 1988 taxable year, no foreign taxes paid to South Africa (including withholding taxes) attributable to such income will be creditable under section 901.

Withholding taxes

South African withholding taxes imposed on the actual dividends received by *P* on April 1, 1988, and April 1, 1989, will not be creditable. Such taxes are imposed upon the income of the recipient derived from South Africa in taxable years beginning after December 31, 1987, and, therefore, are taxes with respect to income attributable to the period to which section 901(j)(2)(C) of the Code applies.

Application to Sections 902 and 960

Under sections 902 and 960 of the Code, foreign taxes paid or accrued by a foreign corporation are deemed to be paid by a corporate shareholder only when the shareholder receives a dividend distribution (or an inclusion in gross income under section 951(a)) from the earnings and profits of the foreign corporation. Under pre-1987 law, the foreign taxes were creditable only when a distribution was made from the earnings and profits of the year in which the foreign taxes were paid or accrued. Under post-1986 law, the foreign taxes deemed to be paid bear the same proportion to the post- 1986 foreign taxes paid as the dividend distribution bears to all post-1986 undistributed earnings, defined in section 902(c)(1) as the earnings and profits of the foreign corporation. Accordingly, in post-1986 years, foreign taxes will be pooled, and become creditable on a proportionate basis when earnings are distributed.

The taxes deemed to be paid by *P* under section 902 of the Code attributable to the April 1, 1988, dividend payment to *P* were paid by *FX* to South Africa with respect to income earned in a taxable year of *FX* that did not begin after December 31, 1986. Accordingly, such taxes are not subject to section 901(j) and may be claimed as a credit under section 901. Such taxes and the earnings and profits with respect to which they are paid are subject to the post-1986 pooling requirements.

In the case of the subpart F inclusion of *P* with respect to the income of *FX* earned in its taxable year ending June 30, 1989, the taxes paid by *FX* were paid with respect to income earned after December 31, 1987, and in a taxable year of *FX* beginning after that date. Accordingly, such taxes are subject to section 901(j) of the Code, and are not allowed as a credit under section 901.

Application of Section 952(a)(5) to the Income of FX

The first taxable year of *FX* subject to section 901(j) of the Code and, therefore, subject to section 952(a)(5), is its taxable year ending June 30, 1989, its first taxable year beginning after December 31, 1987. Accordingly, *FX* has no subpart F income in its taxable year ending June 30, 1988. All of the income of *FX* derived from South African sources in its taxable year ending June 30, 1989, however, is subpart F income.

Application to Section 1248

Section 1248 of the Code requires that, under certain circumstances, the gain derived by a U.S. person from the sale of stock of a controlled foreign corporation be included in the gross income of that U.S. person as a dividend to the extent of earnings and profits as calculated under section 1248(c) and (d). If a dividend is deemed to be paid under section 1248, a foreign tax credit is ordinarily available to the U.S. person under sections 901 and 902 at the time of the deemed dividend distribution.

The limitation of section 901(j)(2)(C) of the Code applies to foreign tax credits allowed with respect to amounts included in gross income as dividends under section 1248 as though an actual dividend had been paid. Thus, to the extent that South African taxes were paid with respect to amounts treated as a dividend under section 1248 and attributable to earnings and profits derived from South Africa in taxable years beginning after December 31, 1987, no foreign tax credit will be allowed with respect to such taxes. A foreign tax credit, however, will be allowed to the extent that South African taxes were paid with respect to amounts treated as a dividend under section 1248 and attributable to earnings and profits derived from South Africa in taxable years beginning before January 1, 1988.

Deduction under Section 164

Section 901(j) of the Code has no effect upon the allowance of deductions under section 164 for taxes paid or accrued to South Africa. The legislative history of section 901(j) states that "foreign taxes that are not creditable under this provision are deductible." H.R. Conf. Rep. No. 1012, 99th Cong., 2d Sess., 374 (1986). Accordingly, the withholding taxes paid with respect to the dividends received by *P* on April 1, 1988, and on April 1, 1989, may be deducted to the extent allowed under section 164.

HOLDING

For purposes of sections 901, 902, 960, and 1248 of the Code, the limitation of section 901(j)(2)(C) applies to taxes paid or accrued to South Africa with respect to income attributable to taxable years beginning after December 31, 1987.

Section 902.—Deemed Paid Credit Where Domestic Corporation Owns 10 Percent or More of Voting Stock of Foreign Corporation

Whether the limitation of section 901(j)(2)(C) of the Code applies prospectively to earnings derived in South Africa in taxable years beginning after December 31, 1987. See Rev. Rul. 89-44, page 237.

Section 907.—Special Rules in Case of Foreign Oil and Gas Income

26 CFR 1.907(a)-0A: Introduction (for taxable years beginning before January 1, 1983).

T.D. 8240

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Part 1

Limitation of Foreign Tax Credit for Foreign Oil and Gas Taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary Income Tax Regulations relating to the amendments made to the Internal Revenue Code by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). The amendments require that foreign oil and gas extraction income and losses from all foreign countries be aggregated before computing the limit on creditability of foreign taxes. The amendments also repeal the separate application of the foreign tax credit limitation to taxes on foreign oil related income. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in * * * [INTL-152-86, page 1022, this Bulletin].

DATES: The amendments are effective for taxable years beginning after December 31, 1982, except as follows. The special rule provided at §1.907(c)-2T(d)-(7) with respect to allocation of earnings and profits or deficits that arise in taxable years beginning after December 31, 1986, is effective after that date. The special rules provided for determination of FORI and FOGEI tax with respect to dividends received and amounts includible in gross income under section 951(a) in taxable years beginning after December 31, 1986, at §1.907(c)-3T(b)(1) and (c), respectively, are effective after December 31, 1986.

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains temporary Income Tax Regulations (26 CFR Part 1) under section 907 of the Internal Revenue Code. These amendments conform the regulations to changes made to section 907 by section 211 (96 Stat. 448) of TEFRA.

NEED FOR TEMPORARY REGULATIONS

The proper application of changes made to section 907 by TEFRA is dependent upon the Internal Revenue Service's detailed specifications of the manner in which those changes will be administered. These regulations are necessary to provide taxpayers with immediate guidance with regard to their taxable years that remain open under the statute of limitations. Therefore, good cause is found to dispense with the notice and public procedure requirements of 5 U.S.C. §553 (b) and the delayed effective date requirement of 5 U.S.C. §553(d).

EXPLANATION OF PROVISIONS

The amount allowed as a foreign tax credit under section 901 for foreign taxes paid with respect to foreign oil and gas extraction income (FOGEI) is limited by section 907(a). The amount of the foreign tax credit cannot exceed the amount of FOGEI multiplied by, in the case of a corporation, the highest corporate tax rate or, in the case of an individual, the individual's average tax rate.

Changes Made by TEFRA

Since enactment of section 907 by the Tax Reduction Act of 1975, in computing the FOGEI limitation of section 907(a), pre-TEFRA section 907(c)(4) provided that net operating losses relating to extraction of minerals from oil or gas wells arising in one foreign country did not offset FOGEI arising in other foreign countries. This per-country loss rule was repealed by TEFRA; thus, for taxable years beginning after December 31, 1982, FOGEI and foreign oil extraction losses from all foreign countries are aggregated before computing the limitation of section 907(a). Section 907(c)(4), amended by TEFRA, provides for the recapture of overall foreign oil extraction losses for years preceding the limitation year, but beginning after December 31, 1982, against limitation year FOGEI before application of section 907 (a). Foreign taxes in excess of the section 907(a) limitation, under section 907(f), as amended by TEFRA, may be carried back for two years and forward for five years. Under old section 907(f), the carryback-carryover tax amount could not exceed 2% of FOGEI for the limitation year. This 2% limitation was eliminated by TEFRA.

Prior to TEFRA, after section 907(a) limited creditable FOGEI taxes to a certain percentage of FOGEI, the creditability of those taxes, together with taxes on foreign oil related income (FORI), were subject to the further limitation of pre-TEFRA section 907(b). That section provided that the section 904 limitation on foreign tax credits would be applied separately with respect to FORI, which prior to TEFRA included FOGEI. This separate application of the section 904 limitation to FORI was repealed by section 211 of TEFRA for taxable years beginning after December 31, 1982.

New section 907(b) was added by TEFRA in order to neutralize the consequence of the shifting by some foreign countries of the tax burden from taxes on FOGEI, creditability of which would be limited by section 907(a), to taxes on FORI. New section 907(b) limits creditable FORI taxes, which do not include FOGEI taxes, to the amount that would have been imposed by the foreign country on income that is neither FORI nor FOGEI if, under foreign law, FORI taxes in excess of this limitation were treated as a deductible expense. For United States tax purposes, FORI taxes in excess of the section 907(b) limitation are deductible as business expenses.

New section 907(e), as added by TEFRA, provides transitional rules applicable to unused taxes carried from a year beginning before January 1, 1983, to a year beginning after December 31, 1982, (the effective date of the TEFRA changes) and to unused taxes carried back from a year beginning after December 31, 1982, to a year beginning before January 1, 1983.

Section 212 of TEFRA added certain foreign base company oil related income as an additional item to the category of foreign base company income under the subpart F provisions of sections 951 through 964. See section 954(a)(5) and (g)(1). These regulations define this FORI for purposes of section 954(a)(5) and (g)(1).

Section 907 Regulations

The regulations under section 907 consist of two sets: the set of regulations proposed by this notice dealing with taxable years beginning after December 31, 1982, and the set published as T.D. 7961 (49 FR 26208) [1984-2 C.B. 130] dealing with taxable years beginning before January 1, 1983 (1984 Treasury Decision). This latter set of regulations was supplemented by T.D. 8160 (52 FR 33930) [1987-2 C.B. 191] published in the FEDERAL REGISTER on September 9, 1987 (1987 Treasury Decision) which contained definitions of interest on working capital, exchange gain or loss, directly related services and lease or license of related property. Many of the provisions of the regulations contained in these temporary regulations are substantially similar to provisions of the regulations contained in the 1984 and 1987 Treasury Decisions because they deal with provisions in section 907 that were not affected by TEFRA. Thus, §§1.907(c)-1T, 1.907(c)-2T, and 1.907(c)-3T are very similar to §§1.907(c)-1A, 1.907(c)-2A and 1.907(c)-3A, respectively, and §1.907(d)-1T is virtually identical to §1.907(d)-1A. The treatment by the temporary regulations of two matters, the carryover of foreign oil extraction losses and the new limitation on FORI taxes in section 907(b), are explained below in more detail.

Carryover of Foreign Oil Extraction Losses

New section 907(c)(4) requires that a foreign oil extraction loss incurred in one year be carried over and offset against FOGEI of a later year. This rule operates only for purposes of determining FOGEI under section 907(a) and thus operates independently of the rule of section 904(f) dealing with overall foreign losses. Taxes imposed on FOGEI retain their character as FOGEI taxes even though FOGEI is reduced by a loss carryover. Therefore, they may be carried back and forward to other taxable years under section 907(f).

Limitation on FORI Taxes

Section 907(b), as amended, places a limitation on the amount of creditable FORI tax if the FORI tax is excessive. In §1.907(b)-1T(a), the temporary regulations provide that non-dual capacity taxpayers and dual capacity taxpayers that use the facts and circumstances method of §1.901-2A(c)(2) to determine their creditable taxes and specific economic benefits must apply the safe harbor formula of §1.901-2A(e)(1) to the FORI tax payments made to the foreign country to determine the amount of FORI tax that is creditable under section 907(b). Section 907(b) does not apply, however, if the safe harbor formula has already been applied to the tax paid by a dual capacity taxpayer under section 901. These temporary regulations provide examples showing the interaction of sections 901 and 907(b).

Treatment of Income from Sale of Stock

In light of the Supreme Court decision in *Arkansas Best v. Commissioner*, 108 S. Ct. 971 (1988), the temporary regulations provide that for both pre-TEFRA and post-TEFRA years, stock of any corporation will not be treated as an asset used by a person in section 907(c) activities. Therefore, income (or loss) from the sale of stock will never be FOGEI or FORI.

SPECIAL ANALYSES

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. §553 for temporary regulations. Therefore, these rules do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6) and a Regulatory Flexibility Analysis is not required.

* * * * * *

Adoption of amendments to the regulations

Accordingly, 26 CFR Part 1 is amended as follows:

INCOME TAX REGULATIONS (26 CFR Part 1)

Paragraph 1. The authority for Part 1 is amended by adding a new citation to read as follows:

Authority: 26 U.S.C. 7805. * * * Section 1.907(b)-1T is also issued under 26 U.S.C. 907(b). * * *

Par. 2. Section 1.907-0 is redesignated as §1.907(a)-0A and the heading is revised to read "§1.907(a)-0A Introduction (for taxable years beginning before January 1, 1983).".

Par. 3. Sections 1.907(a)-1, 1.907(b)-1, 1.907(b)-2, 1.907(c)-1, 1.907(c)-2, 1.907(c)-3, 1.907(d)-1, 1.907(e)-1 and 1.907(f)-1 are redesignated by adding an "A" at the end of each regulation section number and by deleting the period at the end of each section heading and adding "(for taxable years beginning before January 1, 1983).".

Par. 4. The following center heading is inserted immediately preceding the caption to §1.907(a)-0A:

REGULATIONS APPLICABLE TO TAXABLE YEARS BEGINNING BEFORE JANUARY 1, 1983

Par. 5. Paragraphs(a) through (j) of §1.907(a)-0A are redesignated as paragraphs (b) through (k), respectively, and a new paragraph (a) is added.

§1.907(a)-0A Introduction (for taxable years beginning before January 1, 1983).

(a) *Effective dates*. [Reserved] For guidance, see §1.907(a)-OAT.

* * * * * *

Par. 6. A new §1.907(a)-OAT is added immediately after §1.907(a)-OA to read as follows:

§1.907(a)-0AT Introduction (for taxable years beginning before January 1, 1983) (Temporary regulations).

(a) *Effective dates*. The provisions of §§1.907(a)-0A through 1.907(f)-1A apply to taxable years beginning before January 1, 1983, and all references in these regulations to section 907 are to section 907 as it existed prior to the amendments made by section 211 of the Tax Equity and Fiscal Responsibility Act of 1982 (96 Stat. 448). For provisions that apply to taxable years beginning after December 31, 1982, see §§1.907(a)-0T through 1.907(f)-1T.

(b) through (k) [Reserved]

Par. 7. Section 1.907(c)-1A is amended as follows:

1. By removing the last sentence of paragraph (d) (1), and
2. By revising paragraph (d) (3).

§1.907(c)-1A Definitions relating to FORI and FOGEI (for taxable years beginning before January 1, 1983).

* * * * * *

(d) *Assets used in a trade or business*.

* * * * * *

(3) *Stock*. [Reserved] For guidance, see §1.907(c)-1AT(d)(3).

* * * * * *

Par. 8. A new §1.907(c)-1AT is added immediately after §1.907(c)-1A to read as follows:

§1.907 (c)-1AT Definitions relating to FORI and FOGEI (for taxable years beginning before January 1, 1983) (Temporary regulations).

(a) through (c) [Reserved]

(d)*Assets used in a trade or business*.

(1) and (2) [Reserved]

(3) *Stock*. Stock of any corporation (whether foreign or domestic) will not be treated as an asset used by a person in section 907(c) activities. This provision applies to taxable years beginning after December 31, 1974, and beginning before January 1, 1983.

(d) (4) through (h) [Reserved]

Par. 9. There is added immediately preceding the new center heading above §1.907(a)-0A the following new §1.907-0, a new center heading and new §§1.907(a)-0T through 1.907(f)-1T:

§1.907-0 Outline of regulation provisions for section 907.

This section lists the paragraphs contained in pp 1.907(a)-0T through 1.907(f)-1A.

REGULATIONS APPLICABLE TO TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1982

§1.907(a)-OT Introduction (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) Effective dates.
(b) Key terms.
(c) FOGEI tax limitation.
(d) Reduction of creditable FORI taxes.
(e) FOGEI and FORI.
(f) Posted prices.
(g) Transitional rules.
(h) Section 907(f) carrybacks and carryovers.
(i) Statutes covered.

§1.907(a)-1T Reduction in taxes paid on FOGEI (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) Amount of reduction.
(b) Foreign taxes paid or accrued.
 (1) Foreign taxes.
 (2) Foreign taxes paid or accrued.
(c) Limitation level.
 (1) In general.
 (2) Limitation percentage for corporations.
 (3) Limitation percentage for individuals.
 (4) Losses.
 (5) Priority.
(d) Illustrations.
(e) Effect on other provisions.
 (1) Deduction denied.

(2) Reduction inapplicable.
(3) Section 78 dividend.
(f) Section 904 limitation.

§1.907(b)-1T Reduction of creditable FORI taxes (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) In general.
(b) Amount of income, war profits, or excess profits tax.
(1) Dual capacity taxpayer.
(2) Non-dual capacity taxpayer.
(c) Amount that is not income, war profits, or excess profits tax.
(d) Examples.

§1.907(c)-1T Definitions relating to FOGEI and FORI (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) Scope.
(b) FOGEI.
(1) General rule.
(2) Amount.
(3) Other circumstances.
(4) Income directly related to extraction.
(5) Income not included.
(6) Fair market value.
(7) Economic interest.
(c) Carryover of foreign oil extraction losses.
(1) In general.
(2) Reduction.
(3) Foreign oil extraction loss defined.
(4) Affiliated groups.
(5) FOGEI taxes.
(6) Examples.
(d) FORI.
(1) In general.
(2) Transportation.
(3) Distribution or sale.
(4) Processing.
(5) Primary product from oil.
(6) Primary product from gas.
(7) Directly related income.
(e) Assets used in a trade or business.
(1) In general.
(2) Section 907(c) activities.
(3) Stock.
(4) Losses on sale of stock.
(5) Character of gain or loss.
(6) Allocation of amount realized.
(7) Interest.
(f) Terms and items common to FORI and FOGEI.
(1) Minerals.
(2) Taxable income.
(3) Interest on working capital.
(4) Exchange gain or loss.
(5) Allocation.
(6) Facts and circumstances.
(g) Directly related income.
(1) In general.
(2) Directly related services.
(3) Leases and licenses.
(4) Related person.
(5) Gross income.
(h) Coordination with other provisions.
(1) Certain adjustments.
(2) Section 901 (f).

§1.907(c)-2T Section 907(c)(3) items (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) Scope.
(b) Dividend.
(1) Section 1248.
(2) Section 78 dividend.
(c) Taxes deemed paid.
(1) Voting stock test.
(2) Dividends and interest.
(3) Amounts included under section 951(a).
(d) Amount attributable to certain items.
(1) Certain dividends.
(2) Interest received from certain foreign corporations.
(3) Dividends from domestic corporation.
(4) Amounts with respect to which taxes are deemed paid under section 960 (a).
(5) Section 78 dividend.
(6) Special rule.
(7) Deficits.
(8) Illustrations.
(e) Dividends, interest, and other amounts from sources within a possession.
(f) Income from partnerships, trusts, etc.

§1.907(c)-3T FOGEI and FORI taxes (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) Tax characterization, allocation and apportionment.
(1) Scope.
(2) Three classes of income.
(3) More than one class in a foreign tax base.
(4) Allocation of tax within a base.
(5) Modified gross income.
(6) Allocation of tax credits.
(7) Withholding taxes.
(b) Dividends.
(1) In general.
(2) Section 78 dividend.
(c) Includible amounts under section 951(a).
(d) Partnerships.
(e) Illustrations.

§1.907(d)-1T Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) In general.
(1) Scope.
(2) Initial computation requirement.
(3) Burden of proof.
(4) Related parties.
(b) Adjustments.
(c) Definitions.
(1) Foreign government.
(2) Minerals.
(3) Posted price.
(4) Other pricing arrangement.
(5) Fair market value.

§1.907(e)-1T Transitional rules (for amounts carried between a taxable year beginning before January 1, 1983, and a taxable year beginning after December 31, 1982) (Temporary regulations).

(a) General rule.
(b) Rules for carryover of FORI and pre-TEFRA non-FORI taxes.
(c) Examples.

§1.907(f)-1T Carryback and carryover of credits disallowed by section 907(a) (for amounts carried between taxable years that each begin after December 31, 1982) (Temporary regulations).

(a) In general.
(b) Unused FOGEI.
(1) In general.
(2) Year of origin.
(c) Tax deemed paid or accrued.
(d) Excess extraction limitation.
(e) Excess general section 904 limitation.
(f) Section 907(f) priority.
(g) Cross-reference.
(h) Example.

REGULATIONS APPLICABLE TO TAXABLE YEARS BEGINNING BEFORE JANUARY 1, 1983

§1.907(d)-1A Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning before January 1, 1983).

(a) In general.

(1) Scope.

(2) Initial computation requirement.

(3) Burden of proof.

(4) Related parties.

(b) Adjustments.

(c) Definitions.

(1) Foreign government.

(2) Minerals.

(3) Posted price.

(4) Other pricing arrangement.

(5) Fair market value.

§1.907(e)-1A Transitional rules for section 904 carrybacks and carryovers (for taxable years beginning before January 1, 1983).

(a) Carryovers from taxable years ending before January 1, 1975.

(1) In general.

(2) Sections 901(e) and 907(a).

(3) General rule for division of unused foreign tax.

(4) Computation.

(5) Illustrations.

(b) Transitional rules for carryovers from per-country limitation years ending before January 1, 1976.

(1) In general.

(2) Pro rata reduction of carryovers.

(3) Illustrations.

(c) Transitional rules for carryback from taxable years ending after December 31, 1974.

(1) In general.

(2) Applicable principles.

§1.907(f)-1A Carryback and carryover of credits disallowed by section 907(a) (for taxable years beginning before January 1, 1983).

(a) In general.

(b) Unused foreign extraction tax.

(1) In general.

(2) Limit.

(3) Year of origin.

(c) Tax deemed paid or accrued.

(d) Excess extraction limitation.

(e) Excess oil related limitation.

(f)Limitation percentage in certain excess limitation years.

(g) Section 907(f) priority.

(h) Per-country limitation.

(i) Cross-reference.

(j) Illustration.

REGULATIONS APPLICABLE TO TAXABLE YEARS BEGINNING AFTER DECEMBER 31,1982

§1.907(a)-0T Introduction (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *Effective dates.* The provisions of §§1.907(a)-0T through §1.907(f)-1T apply to taxable years beginning after December 31, 1982. For provisions that apply to taxable years beginning before January 1, 1983, see pp 1.907(a)-0A through 1.907(f)-1A, 1.907(a)-0AT and 1.907(c)-1AT.

(b) *Key terms.* For purposes of the regulations under section 907 —

(1) "FOGEI" means foreign oil and gas extraction income.

(2) "FORI" means foreign oil related income.

(3) "FOGEI taxes" mean foreign oil and gas extraction taxes as defined in section 907(c)(5).

(4) "FORI taxes" mean foreign taxes on foreign oil related income. See §1.907(c)-3T.

(c) *FOGEI tax limitation.* Section 907(a) limits the foreign tax credit for taxes paid or accrued on FOGEI. See §1.907(a)-1T.

(d) *Reduction of creditable FORI taxes.* Section 907(b) recharacterizes FORI taxes as non-creditable deductible expenses to the extent that the foreign law imposing the FORI taxes is structured, or in fact operates, so that the amount of tax imposed with respect to FORI will be materially greater, over a reasonable period of time, than the amount generally imposed on income that is neither FOGEI nor FORI. See §1.907(b)-1T.

(e) *FOGEI and FORI.* FOGEI includes the taxable income from the extraction of minerals from oil or gas wells by a taxpayer (or another person) and from the sale or exchange of assets used in the extraction business. FORI is a broader category of income than FOGEI. FORI includes taxable income from the activities of processing oil and gas into their primary products, transporting or distributing oil and gas and their primary products, and from the disposition of assets used in these activities. For this purpose, a disposition includes only a sale or exchange. FOGEI and FORI may also include taxable income from the performance of related services or from the lease of related property and certain dividends, interest, or amounts described in section 951(a). See §§1.907(c)-1T through 1.907(c)-3T.

(f) *Posted prices.* Certain sales prices are disregarded when computing FOGEI for purposes of chapter 1 of the Code. See §1.907(d)-1T.

(g) *Transitional rules.* Section 907(e) provides rules for the carryover of unused FOGEI taxes from taxable years beginning before January 1, 1983, and carryback of FOGEI taxes arising in taxable years beginning after December 31, 1982. See §1.907(e)-1T.

(h) *Section 907(f) carrybacks and carryovers.* FOGEI taxes disallowed under section 907(a) may be carried back or forward to other taxable years. These FOGEI taxes may be absorbed in another taxable year to the extent of the lesser of the separate excess extraction limitation or the excess limitation in the general limitation category (section 904(d)(1)(I)) for the carryback or carryover year. See §1.907(f)-1T.

(i) *Statutes covered.* The regulations under section 907 are issued as a result of the enactment of section 601 by the Tax Reduction Act of 1975, of section 1035 by the Tax Reform Act of 1976, of section 301(b)(14) of the Revenue Act of 1978, and of section 211 of the Tax Equity and Fiscal Responsibility Act of 1982.

§1.907(a)-1T Reduction in taxes paid on FOGEI (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *Amount of reduction.* FOGEI taxes are reduced by the amount by which they exceed a limitation level (as defined in paragraph (c) of this section).

(b) *Foreign taxes paid or accrued.* For purposes of the regulations under section 907 —

(1) *Foreign taxes.* The term "foreign taxes" means income, war profits, or excess profits taxes of foreign countries or possessions of the United States otherwise creditable under section 901 (including those creditable by reason of section 903).

(2) *Foreign taxes paid or accrued.* The terms "foreign taxes paid or accrued," "FOGEI taxes paid or accrued," and "FORI taxes paid or accrued" include foreign taxes deemed paid under sections 902 and 960. Unless otherwise expressly provided, these terms do not include foreign taxes deemed paid by reason of sections 904(c) and 907(f).

(c) *Limitation level*—(1) *In general.* The limitation level is FOGEI for the taxable year multiplied by the limitation percentage for that year.

(2) *Limitation percentage for corporations.* A corporation's limitation percent-

age is the highest rate of tax specified in section 11(b) for the particular year.

(3) *Limitation percentage for individuals*. Section 907(a)(2)(b) provides that the limitation percentage for individual taxpayers is the effective rate of tax for those taxpayers. The effective rate of tax is computed by dividing the entire tax, before the credit under section 901(a) is taken, by the taxpayer's entire taxable income.

(4) *Losses*. (i) For purposes of determining whether income is FOGEI, a taxpayer's FOGEI will be recharacterized as foreign source non-FOGEI to the extent that FOGEI losses for preceding taxable years beginning after December 31, 1982, exceed the amount of FOGEI already recharacterized. See §1.907-(c)-1T(c). However, taxes that were paid or accrued on the recharacterized FOGEI will remain FOGEI taxes.

(ii) Taxes paid or accrued by a person to a foreign country may be FOGEI taxes even though that person has under U.S. law a net operating loss from sources within that country.

(iii) For purposes of determining whether income is FOGEI, a taxpayer's income will be treated as income from sources outside the United States even though all or a portion of that income may be resourced as income from sources with the United States under section 904(f)(1) and (4).

(5) *Priority*. (i) Section 907(a) applies before section 908, relating to reduction of credit for participation in or cooperation with an international boycott.

(ii) Section 901(f) (relating to certain payments with respect to oil and gas not considered as taxes) applies before section 907.

(d) *Illustrations*. Paragraphs (a) through (c) of this section are illustrated by the following examples.

Example (1). M, a U.S. corporation, uses the accrual method of accounting and the calendar year as its taxable year. For 1984, M has $20,000 of FOGEI, derived from operations in foreign countries X and Y, and has accrued $11,500 of foreign taxes with respect to FOGEI. The highest tax rate specified in section 11(b) for M's 1984 taxable year is 46 percent. Pursuant to section 907(a), M's FOGEI taxes limitation level for 1984 is $9,200 (46% × $20,000). The foreign taxes in excess of this limitation level ($2,300) may be carried back or forward. See section 907(f) and §1.907(f)-1T and section 907(e) and §1.907(e)-1T.

Example (2). The facts are the same as in *Example* (1) except that M is a partnership owned equally by U.S. citizens A and B who each file as unmarried individuals and do not itemize deductions. Pursuant to section 905(a), A and B have elected to credit foreign taxes in the year accrued. The total foreign taxes accrued by A and B with respect to their distributive shares of M's FOGEI is $11,500 ($5,750 accrued by A and $5,750 accrued by B). A and B have no other FOGEI. A's only taxable income for 1984 is his 50% distributive share ($10,000) of M's FOGEI and A has a preliminary U.S. tax liability of $1,079. B has $112,130 of taxable income for 1984 (including his 50% distributive share ($10,000) of M's FOGEI) and has a preliminary U.S. tax liability of $44,000. Pursuant to section 907(a), A's FOGEI taxes limitation level for 1984 is $1,079 (($1,079/$10,000) × $10,000)) and B's FOGEI taxes limitation level for 1984 is $3,924 (($44,000/$112,130) × $10,000)).

(e) *Effect on other provisions*—(1) *Deduction denied*. If a credit is claimed under section 901, no deduction under section 164(a)(3) is allowed for the amount of the FOGEI taxes that exceed a taxpayer's limitation level for the taxable year. See section 275(a)(4)(A). Thus, FOGEI taxes disallowed under section 907(a) are not added to the cost or inventory amount of oil or gas.

(2) *Reduction inapplicable*. The reduction under section 907(a) does not apply to a taxpayer that deducts foreign taxes and does not claim the benefits of section 901 for a taxable year.

(3) *Section 78 dividend*. The reduction under section 907(a) has no effect on the amount of foreign taxes that are treated as dividends under section 78.

(f) *Section 904 limitation*. FOGEI taxes as reduced under section 907(a) are creditable only to the extent permitted by the general limitation of section 904(d)-(1)(I).

§1.907(b)-1T Reduction of creditable FORI taxes (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *In general*. If the foreign law imposing a FORI tax (as defined in §1.907(c)-3T) is either structured in a manner, or operates in a manner, so that the amount of tax imposed on FORI is generally materially greater than the tax imposed by the foreign law on income that is neither FORI nor FOGEI ("described manner"), section 907(b) provides a special rule which limits the amount of FORI taxes paid or accrued by a person to a foreign country which will be considered income, war profits, or excess profits taxes. Section 907(b) will apply to a person regardless of whether that person is a dual capacity taxpayer as defined in §1.901-2(a)(2)(ii)(A). (In general, a dual capacity taxpayer is a person who pays an amount to a foreign country part of which is attributable to an income tax and the remainder of which is a payment for a specific economic benefit derived from that country.) Foreign law imposing a tax on FORI will be considered either to be structured in or to operate in the described manner if any of the tax imposed on FORI is considered not to be an income, war profits or excess profits tax under paragraph (b) of this section.

(b) *Amount of income, war profits, or excess profits tax*—(1) *Dual capacity taxpayer*. If for a taxable year a dual capacity taxpayer has applied the safe harbor formula of §1.901-2A(e) to determine the portion of a FORI tax paid or accrued during the year that is a payment of tax rather than a payment for a specific economic benefit, section 907(b) shall not apply. However, if the dual capacity taxpayer has used the facts and circumstances method of §1.901-2A(c)-(2) to establish the portion of the FORI tax that is a payment of tax rather than a payment for a specific economic benefit, the safe harbor formula of §1.901-2A(e) will be applied to the portion of the payment determined to be a tax under the facts and circumstances method to determine whether section 907(b) will further reduce that amount.

(2) *Non-dual capacity taxpayer*. With regard to non-dual capacity taxpayers, the portion of the FORI tax that is considered an income, war profits, or excess profits tax is determined by applying the safe harbor formula of §1.901-2A(e) with respect to the person's foreign oil related income (as determined under foreign law pursuant to the provisions of paragraph(e) (2) of that section).

(c) *Amount that is not income, war profits, or excess profits tax*. The difference between the amount of FORI tax and the amount determined pursuant to paragraph (b) of this section is considered a tax that is not an income, war profits, or excess profits tax. This amount will be treated as a business expense deduction.

(d) *Examples*. The provisions of this section may be illustrated by the following examples:

Example (1)—(i) *Facts*. X, a U.S. corporation that uses the accrual method of accounting and the calendar year as its taxable year, extracts oil in foreign country FC, transports it via pipeline to a refinery located in FC, and sells it to Y, an unrelated corporation that operates the refinery. X is a dual capacity taxpayer as defined in §1.9012(a)(2)-(ii)(A). The only income X has that is taxed by FC is its income from the sale of oil to Y. FC imposes a generally applicable tax at the rate of 45% on the net income derived by foreign corporations from a trade or business carried on in FC. That tax is an income tax within the meaning of section 901. Taxable FOGEI and taxable FORI are determined under foreign law which, for purposes of this example, is assumed to be the same as United States law. X is subject to this generally applicable tax except that it is subject to a 60%, rather than a 45%, rate. For 1985, assume the following additional facts:

X's total gross income from sales to Y	1,000
Gross income attributable to extraction (FOGEI)	700
Gross income attributable to transportation (FORI)	300
Deductions incurred deriving FOGEI	525
Deductions incurred deriving FORI	225
Taxable FOGEI under FC law	175
Taxable FORI under FC law	75
Accrued tax to FC (under FC law) (.60 × (1000 − 750))	150

(ii) *Computation of section 901 tax without regard to section 907(b).* Because X is a dual capacity taxpayer, it is subject to the rules of §1.901-2A. X has chosen to establish the amount of its payment to FC that is tax by using the facts and circumstances method of §1.901-2A(c)(2). Under this method, X claims that 110 of the 150 it paid to FC is tax. The remainder (40) is considered an amount paid in exchange for a specific economic benefit X is receiving from FC.

(iii) *Determination of FORI tax accrued in 1985.* For purposes of this example it is assumed that the 40 determined in subdivision (ii) to be paid in exchange for a specific economic benefit relates only to X's FOGEI activities. Therefore, of the total payment to FC of 150, the part that is FORI tax for United States purposes is determined by the following equation:

FORI tax for United States purposes = (Total tax) × (Taxable FORI under FC law/total taxable income under FC law)

Accordingly, for 1985, FORI tax for U.S. purposes is 45, computed as follows:

$45 = (150) \times (75/250)$.

(iv) *Application of section 907(b).* Pursuant to paragraph(b) of this section, the portion of FORI tax for U.S. purposes for 1985 (45) that will be considered an income tax for purposes of section 901 after application of section 907(b) is determined by applying the safe harbor formula of §1.901-2A(e), as follows:

$$(A - B - C) \times D/(1 - D)$$

A = Gross income attributable to FORI = 300
B = Deductions incurred deriving FORI = 225
C = FORI tax for U.S. purposes = 45
D = Generally applicable tax rate = 45%

$$24.55 = (300 - 225 - 45) \times .45/(1-.45)$$

The remainder (20.45) is not an income tax and is deductible, for U.S. tax purposes, as a business expense.

Example (2)—(i) *Facts.* Y, a U.S. corporation that uses the accrual method of accounting and the calendar year as its taxable year, operates the refinery mentioned in *Example* (1). Y is not receiving a specific economic benefit from FC. Since §1.901-2(a)(2)(ii)(E), relating to the indirect receipt of a specific economic benefit, does not apply to Y, Y is not a dual capacity taxpayer with respect to FC. The only income Y has that is taxed by FC is its income from the sale of refined oil. All of this income is FORI as defined in section 907(c)(2)(A). Y is subject to the generally applicable tax mentioned in *Example* (1) except that Y is subject to a 50%, rather than a 45%, rate. For 1985, Y has accrued tax to FC of 25 based on the following additional facts:

Y's gross receipts — sales of refined oil	1,200
Cost of purchases of oil	1,000
Expenses from refining operations	150
Taxable income	50
Accrued tax	25

(ii) *Computation of section 901 tax without regard to section 907(b).* Because Y is not a dual capacity taxpayer, it is not subject to the rules of §1.901-2A. Thus, none of the tax accrued to FC (25) is paid in exchange for a specific economic benefit. Therefore, the entire 25 is creditable under section 901 if section 907(b) does not apply.

(iii) *Determination of FORI tax accrued in 1985.* All of the tax accrued to FC was accrued with respect to processing income described in section 907(c)(2)(A), and, thus, all of it is FORI tax.

(iv) *Application of section 907(b).* Pursuant to paragraph(b) of this section, the portion of FORI tax accrued by Y for 1985 that will be considered an income tax for purposes of section 901 after application of section 907(b) is determined by applying the safe harbor formula in §1.901-2A(e), as follows:

$$(A - B - C) \times D/(1 - D)$$

A = Gross income attributable to FORI = 1,200
B = Deductions incurred deriving FORI = 1,150
C = FORI tax for U.S. purposes = 25
D = Generally applicable tax rate = 45%

$$20.45 = (1,200 - 1,150 - 25) \times .45/(1 - 45)$$

Accordingly, 20.45 is an income tax and the remainder (4.55) is not an income tax and is deductible, for U.S. tax purposes, as a business expense.

§1.907(c)-1T Definitions relating to FOGEI and FORI (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *Scope.* This section explains the meaning to be given certain terms and items in section 907(c)(1), (2), and (4). See also §1.907(a)-OT(b) for further definitions.

(b) *FOGEI*—(1) *General rule.* Under section 907(c)(1), FOGEI means taxable income (or loss) derived from sources outside the United States and its possessions from the extraction (by the taxpayer or any other person) of minerals from oil or gas wells located outside the United States and its possessions or from the sale or exchange of assets used by the taxpayer in extraction of those minerals. Extraction of minerals from oil or gas wells will result in gross income from extraction in every case in which that person has an economic interest in the minerals in place. For other circumstances in which gross income from extraction may arise, see paragraph (b)(3) of this section. For determination of the amount of gross income from extraction, see paragraph (b)(2) of this section. For definition of the phrase "assets used by the taxpayer in the trade or business" and for rules relating to that type of FOGEI, see paragraph (e)(1) of this section. The term "minerals" is defined in paragraph (f)(1) of this section. For determination of taxable income, see paragraph (f)(2) of this section. FOGEI includes, in addition, items listed in section 907(c)(3) (relating to dividends, interest, partnership distributions, etc.) and explained in §1.907-(c)-2T. For the reduction of what would otherwise be FOGEI by losses incurred in a prior year, see section 907(c)(4) and paragraph (c) of this section.

(2) *Amount.* The gross income from extraction is determined by reference to the fair market value of the minerals in the immediate vicinity of the well. Fair market value is determined under paragraph (b)(6) of this section.

(3) *Other circumstances.* Gross income from extraction or the sale or exchange of assets described in section 907(c)(1)(B) includes income from any arrangement, or a combination of arrangements or transactions, to the extent the income is in substance attributable to the extraction of minerals or such a sale or exchange. For instance, a person may have gross income from such a sale or exchange if the person purchased minerals from a foreign government at a discount and the discount reflects an arm's-length amount in consideration for the government's nationalization of assets that person owned and used in the extraction of minerals.

(4) *Income directly related to extraction.* Gross income from extraction includes directly related income under paragraph (g) of this section.

(5) *Income not included.* FOGEI as otherwise determined under this paragraph (b), nevertheless, does not include income to the extent attributable to marketing, distributing, processing or transporting minerals or primary products. Income from the purchase and sale of minerals is not ordinarily FOGEI. If the foreign taxes paid or accrued in connection with income from a purchase and sale are not creditable by reason of section 901(f), that income is not FOGEI. A taxpayer to whom section 901(f) applies is not a producer.

(6) *Fair market value.* For purposes of this paragraph (b), the fair market value of oil or gas in the immediate vicinity of the well depends on all of the facts and circumstances as they exist relative to a party in any particular case. The facts and circumstances that may be taken into account include, but are not limited to , the following—

(i) The facts and circumstances pertaining to an independent market value (if any) in the immediate vicinity of the well,

(ii) The facts and circumstances pertaining to the relationships between the taxpayer and the foreign government. If an independent fair market value in the immediate vicinity of the well cannot be determined but fair market value at the port, or a similar point, in the foreign country can be determined (port price), an analysis of the arrangements between the taxpayer and the foreign government that retains a share of production could be evidence of the appropriate, arm's-length difference between the port price and the field price, and

(iii) The other facts and circumstances pertaining to any difference in the producing country between the field and port prices.

(7) *Economic interest.* For purposes of this paragraph (b), the term "economic interest" means an economic interest as defined in §1.611-1(b)(1), whether or not a deduction for depletion is allowable under section 611.

(c) *Carryover of foreign oil extraction losses*—(1) *In general.* Pursuant to section 907(c)(4), the determination of FOGEI for a particular taxable year takes into account a foreign oil extraction loss incurred in prior taxable years beginning after December 31, 1982. There is no time limitation on this carryover of foreign oil extraction losses. Section 907(c)(4) does not provide for any carryback of these losses. Section 907(c)(4) operates solely for purposes of determining FOGEI and thus operates independently of section 904(f).

(2) *Reduction.* That portion of the income of the taxpayer for the taxable year which but for this paragraph (c) would be treated as FOGEI is reduced (but not below zero) by the excess of—

(i) The aggregate amount of foreign oil extraction losses for preceding taxable years beginning after December 31, 1982, over

(ii) The aggregate amount of reductions under this paragraph (c) for preceding taxable years beginning after December 31, 1982.

(3) *Foreign oil extraction loss defined*—(i) *In general.* For purposes of this paragraph (c), the term "foreign oil extraction loss" means the amount by which the gross income for the taxable year that is taken into account in determining FOGEI for that year is exceeded by the sum of the deductions properly allocated and apportioned to that gross income (as determined under paragraph (f)(2) of this section). A person can have a foreign oil extraction loss for a taxable year even if the person has not chosen the benefits of section 901 for that year.

(ii) *Items not taken into account.* For purposes of subdivision (i) of this paragraph, the following items are not taken into account—

(A) The net operating loss deduction allowable for the taxable year under section 172(a),

(B) Any foreign expropriation loss (as defined in section 172(h)) for the taxable year, and

(C) Any loss for the taxable year which arises from fire, storm, shipwreck, or other casualty, or from theft.

A loss mentioned in subdivision (ii)(B) or (C) of this paragraph is taken into account, however, to the extent compensation (for instance by insurance) for the loss is included in gross income.

(4) *Affiliated groups.* The foreign oil extraction loss of an affiliated group of corporations (within the meaning of section 1504(a)) that files a consolidated return is determined on a group basis. If the group does not have a foreign oil extraction loss, the foreign oil extraction loss of a member of that group will not reduce on a separate basis that member's FOGEI for a later taxable year.

(5) *FOGEI taxes.* If FOGEI is reduced pursuant to this paragraph(c) (and thereby recharacterized as non-FOGEI income), any foreign taxes imposed on the FOGEI that is recharacterized as other income retain their character as FOGEI taxes. See section 907(c)(5).

(6) *Examples.* The provisions of this paragraph (c) may be illustrated by the following examples.

Example (1)—(i) *Facts.* X, a U.S. corporation using the accrual method of accounting and the calendar year as its taxable year, is engaged in extraction activities in three foreign countries. X has only the following combined foreign tax items for the three countries (prior to the application of this paragraph (c)) for 1983, 1984, and 1985:

	1983	1984	1985
FOGEI	$(700)	$100	$450
FOGEI taxes	10	60	200
Net operating loss deduction	(200)	0	0
Foreign oil extraction loss allowable after adjustment for paragraph (c)(3)(ii) amounts	(500)	0	0

(ii) *1983.* Because X's FOGEI for 1983 is a loss of $(700), X's section 907(a) limitation for 1983 is $0 (.46 × $0). Thus, none of the FOGEI taxes paid or accrued in 1983 ($10) can be credited in 1983. They can, however, be carried back pursuant to the provisions of section 907(e)(2) and §1.907-(e)-1T and carried forward pursuant to the provisions of section 907(f) and §1.907(f)-1T.

(iii) *1984.* X's FOGEI for 1984, prior to the application of this paragraph (c), is $100. X has a foreign oil extraction loss for 1983 of $(500). This loss must be applied against X's preliminary FOGEI of $100 for 1984. Thus, X's FOGEI for 1984 is $0 and X has $(400) ($500 – $100) of foreign oil extraction loss from 1983 to be carried to 1985. Because X's FOGEI for 1984 is $0, its section 907(a) limitation is $0 (.46 × $0). Therefore, none of the FOGEI taxes paid or accrued in 1984 ($60) can be credited in 1984. They can, however, be carried back to 1982 pursuant to the provisions of section 907(e)(2) and §1.907(e)-1T and carried forward pursuant to the provisions of section 907(f) and §1.907(f)-1T.

(iv) *1985.* X's FOGEI for 1985, prior to the application of this paragraph (c), is $450. X's remaining foreign oil extraction loss carryover from 1983 is $(400) and this must be applied against X's preliminary FOGEI of $450 for 1985. Thus, X's FOGEI for 1984 is $50 ($450 – $400). X's section 907(a) limitation is $23 (.46 × $50). Therefore, $23 of the FOGEI taxes paid or accrued in 1985 can be credited in 1985, subject to the general limitation of section 904(d)(1)(E). The excess of FOGEI taxes, $177 ($200 – $23), can be carried forward pursuant to the provisions of section 907(f) and §1.907(f)-1T.

Example (2)—(i) *Facts.* The facts are the same as in *Example* (1) except that X's paragraph (c)(3)(ii) items for 1983 allocable to FOGEI are $(800) instead of $(200). FOGEI remains a loss of $(700). Thus, X does not have a foreign oil extraction loss for 1983 because it has $100 of FOGEI when its paragraph (c)(3)(ii) items are not taken into account ($(700) + $800).

(ii) *1983.* The results are the same as in *Example* (1).

(iii) *1984.* Although X had a FOGEI loss of $(700) in 1983, there is not a loss that can be carried forward after adjustment for paragraph (c)(3)(ii) items. Thus, X's FOGEI for 1984 is not reduced by the 1983 loss. X's section 907(a) limitation for 1984 is $46 (.46 × $100). Therefore, $46 of the FOGEI taxes paid or accrued in 1984 can be credited in 1984, subject to the general limitation of section 904(d)(1)(E). The excess of $14 ($60 – $46) can be carried back to 1982 pursuant to the provisions of section 907(e)(2) and §1.907-(e)-1T and carried forward pursuant to the provisions of section 907(f) and §1.907(f)-1T.

(iv) *1985.* Since there is no foreign oil extraction loss for either 1983 or 1984 to be applied in 1985, X's FOGEI for 1985 is $450. Thus, its section 907(a) limitation for 1985 is $207 (.46 × $450) and all of its FOGEI taxes paid or accrued in 1985 ($200) can be credited in 1985, subject to the general limitation of section 904(d)(1)(E). FOGEI taxes in the amount of $10 from 1983 and $14 from 1984 may be carried forward to 1985 if they have not been used in carryback years. However, because the excess section 907(a) limitation for 1985 is only $7, that is the maximum potential FOGEI taxes that may be used in 1985.

Example (3)—(i) *Facts.* Y, a U.S. corporation using the accrual method of accounting and the calendar year as its taxable year, is engaged in extraction activities in three foreign countries. Y's only foreign taxable income is income subject to the general limitation of section 904(d)(1)(e) and Y has no paragraph (c)(3)(ii) items. Y has the following foreign tax items for 1983 and 1984:

	1983	1984
FOGEI	$ (400)	$ 300
Other foreign taxable income	250	200
U.S. taxable income	1,000	1,100
Worldwide taxable income	850	1,600
FOGEI taxes	10	180
Foreign oil extraction loss	(400)	0

(ii) *1983*—(A) *Section 907(a) limitation.* Because Y's FOGEI for 1983 is a loss of $(400), Y's section 907(a) limitation for 1983 is $0. Thus, none of the FOGEI taxes paid or accrued in 1983 ($10) can be credited in 1983. They can, however, be carried back pursuant to the provisions of section 907(e)(2) and §1.907(e)-1T and carried forward pursuant to the provisions of section 907(f) and §1.907(f)-1T.

(B) *Section 904 (d) fraction.* Y has a foreign loss of $(150) ($(400) + $250) for 1983. Thus, its fraction for purposes of determining its general limitation of section 904(d)(1)(e) is $0/$850.

(iii) *1984*—(A) *Section 907(a) limitation.* Y's foreign oil extraction loss for 1983 is $(400). Applying this loss to its preliminary FOGEI for 1984 ($300) eliminates all of Y's FOGEI for 1984. Because Y's FOGEI for 1984 is $0, its section 907(a) limitation is also $0. Thus, none of the FOGEI taxes paid or accrued in 1984 ($180) can be credited in 1984. They can, however, be carried back to 1982 pursuant to the provisions of section 907(e)(2) and §1.907(e)-1T and carried forward pursuant to the provisions of section 907(f) and §1.907(f)-1T. Y has a remaining foreign oil extraction loss of $(100) from 1983 to be carried to 1985.

(B) *Section 904(d) fraction.* Y's preliminary foreign taxable income for purposes of determining its general limitation of section 904(d)(1)(e) is $500 ($300 + $200). However, Y has an overall foreign loss from 1983 of $(150) ($(400) + $250) and thus, pursuant to section 904(f), Y must recharacterize $150 (lesser of $150 or 50% of $500) of its 1984 foreign taxable income as U.S. taxable income. Thus, Y's fraction for purposes of determining its general limitation of section 904(d)(1)(e) for 1984 is $350/$1,600.

(d) *FORI*—(1) *In general.* Section 907(c)(2) define FORI to include taxable income from the processing of oil and gas into their primary products, from the transportation or distribution and sale of oil and gas and their primary products, from the disposition of assets used in these activities and from the performance of any other related service. FORI may also include, under section 907(c)-(3), certain dividends, interest, or amounts described in section 951(a). This paragraph (d) defines certain terms and items applicable to FORI.

(2) *Transportation.* Gross income from transportation of minerals or primary products ("gross transportation income") is gross income arising from carrying minerals or primary products between two places (including time or voyage charter hires) by any means of transportation, such as a vessel, pipeline, truck, railroad, or aircraft. Except for directly related income under paragraphs (d)(7) and (g) of this section, gross transportation income does not include gross income received by a lessor from a bareboat charter hire of a means of transportation, certain other rental income, or income from the performance of certain services.

(3) *Distribution or sale.* The term "distribution or sale" means the sale or exchange of minerals or primary products to processors, users who purchase, store, or use in bulk quantities, other persons for further distribution, retailers, or consumers. Gross income from distribution or sale includes interest income attributable to the distribution of minerals or primary products on credit.

(4) *Processing.* The term "processing" means the destructive distillation, or a process similar in effect to destructive distillation, of crude oil and the processing of natural gas into their primary products including processes used to remove pollutants from crude oil or natural gas.

(5) *Primary product from oil.* The term "primary product" (in the case of oil) means all products derived from the processing of crude oil, including volatile products, light oils (such as motor fuel and kerosene), distillates (such as naphtha), lubricating oils, greases and waxes, and residues (such as fuel oil).

(6) *Primary product from gas.* The term "primary product" (in the case of gas) means all gas and associated hydrocarbon components from gas wells or oil wells, whether recovered at the lease or upon further processing, including natural gas, condensates, liquefied petroleum gases (such as ethane, propane, and butane), and liquid products (such as natural gasoline).

(7) *Directly related income.* FORI also includes directly related income under paragraph (g) of this section.

(e) *Assets used in a trade or business*—(1) *In general.* The term "assets used by the taxpayer in the trade or business" in section 907(c)(1)(b) and (2)(d) means property primarily used in one or more of the trades or businesses that are section 907(c) activities. For purposes of this paragraph (e), assets used in a trade or business are assets described in section 1231(b) (applied without regard to any holding period or the character of the asset as being subject to the allowance for depreciation under section 167).

(2) *Section 907(c) activities.* Section 907(c) activities are those described in section 907(c)(1)(a) (for FOGEI) or (c)-(2)(a) through (c) (for FORI). If an asset is used primarily in one or more section 907(c) activities, then the entire gain (or loss) will be considered attributable to those activities. For example, if a person uses a service station primarily to distribute primary products from oil, then all of the gain (or loss) on the sale of the station is FORI even though the person uses the station to distribute products that are not primary products (such as tires or batteries). If an asset is not primarily used in one or more section 907(c) activities, then the entire gain or loss will not be FOGEI or FORI.

(3) *Stock.* Stock of any corporation (whether foreign or domestic) will not be treated as an asset used by a person in section 907(c) activities.

(4) *Losses on sale of stock.* If, under §1.861-8(e)(7), a loss on the sale, exchange, or disposition of stock is considered a deduction which is definitely related and allocable to FOGEI or FORI, then notwithstanding §1.861-8(e)(7) and paragraph (f)(2) of this section, this loss shall be allocated and apportioned to the same class of income that would have been produced if there were capital gain from the sale, exchange or disposition.

(5) *Character of gain or loss.* Except in the case of stock, gain or loss from the sale, exchange or disposition of assets used in the trade or business may be FORI or FOGEI to the extent taken into account in computing taxable income for the taxable year, whether or not the gain or loss is ordinary income or ordinary loss.

(6) *Allocation of amount realized.* The amount realized from the sale, exchange or disposition of several assets in one transaction is allocated among them in proportion to their respective fair market values. This allocation is made under the principles set forth in §1.1245-1(a)(5) (relating to allocation between section 1245 property and non-section 1245 property).

(7) *Interest.* Gross income from the sale, exchange or disposition of an asset used in a section 907(c) activity includes interest income from such a sale, exchange or disposition.

(f) *Terms and items common to FORI and FOGEI*—(1) *Minerals.* The term "minerals" means hydrocarbon minerals extracted from oil and gas wells, including crude oil or natural gas (as defined in section 613A(e)). The term includes incidental impurities from these wells, such as sulphur, nitrogen, or helium. The term does not include hydrocarbon minerals derived from shale oil or tar sands.

(2) *Taxable income.* Deductions to be taken into account in computing taxable income or net operating loss attributable to FOGEI or FORI are determined under the principles of §1.861-8. For an exception with regard to losses, see paragraph (e)(4) of this section.

(3) *Interest on working capital.* FORI and FOGEI may include interest on bank deposits or on any other temporary investment which is not in excess of funds reasonably necessary to meet the working capital requirements and the specifically anticipated business needs of the person that is engaged in the conduct of the activities described in section 907(c)(1) or (2).

(4) *Exchange gain or loss.* Exchange gain (and loss) may be FORI and FOGEI.

(5) *Allocation.* Interest income and exchange gain (or loss) described, respectively, in paragraph (f)(3) and (4) of this section are allocated among FORI, FOGEI, and any other class of income relevant for purposes of the foreign tax credit limitations under any reasonable method which is consistently applied from year-to-year.

(6) *Facts and circumstances.* Income not described elsewhere in this section may be FOGEI or FORI if, under the facts and circumstances in the particular case, the income is in substance directly attributable to the activities described in section 907(c)(1) or (2). For example, assume that a producer in the North Sea suffers a casualty caused by an explosion, fire, and resulting destruction of a drilling platform. Insurance proceeds received for the platform's destruction in excess of the producer's basis is extraction income if the excess constitutes income from sources outside the United States. In addition, income from an insurance policy for business interruption may be extraction income to the extent the payments under the policy are geared directly to the loss of income from production and are treated as income from sources outside the United States. Also, if an oil company's oil concession or assets used in extraction activities described in section 907(c)(1)(A) and located outside the United States are nationalized or expropriated by a foreign government, or instrumentality thereof, income derived from that nationalization or expropriation (including interest on the income paid pursuant to the nationalization or expropriation) is FOGEI. Likewise, if a company's assets used in the activities described in section 907(c)(2)(A) through (C) and located outside the United States are nationalized or expropriated by a foreign government, or instrumentality thereof, income (including interest on the income paid pursuant to the nationalization or expropriation) derived from the nationalization or expropriation will be FORI. Nationalization or expropriation is deemed to be a sale or exchange for purposes of section 907(c)(1)(B) and a disposition for purposes of section 907(c)(2)(D). In further example, assume that an oil company has an exclusive right to buy all the oil in country X from Y, an instrumentality of the foreign sovereign which owns all of the oil in X. The oil company does not have an economic interest in any oil in country X. Y has a temporary cash-flow problem and demands that the oil company make advance deposits for the purchase of oil not yet delivered. In return, Y grants the oil company a discount on the price of the oil when delivered. Income represented by the discount on the later disposition of the oil is FORI described in section 907(c)(2)(C). The result would be the same if Y credited the oil company with interest on the advance deposits, which had to be used to purchase oil (the interest income would be FORI).

(g) *Directly related income*— (1) *In general.* Section 907(c)(2)(E) and this paragraph (g) include in FORI, and this paragraph (g) includes in FOGEI, income from the performance of directly related services (as defined in paragraph (g)(2) of this section). This paragraph (g) also includes in FORI and FOGEI income from the lease or license of related property (as defined in paragraph (g)(3) of this section). Section 907(c)(2)(E) with regard to FORI and this paragraph (g) with regard to both FORI and FOGEI do not apply to a person if—

(i) Neither that person nor a related person (as defined in paragraph (g)(4) of this section) has FOGEI described in paragraph (b) of this section (other than paragraph (b)(4) thereof relating to directly related income) or FORI described in paragraph (d) of this section (other than paragraph (d)(7) thereof relating to directly related income), or

(ii) Less than 50 percent of that person's gross income from sources outside the United States which is related exclusively to the performance of services and from the lease or license of property described in paragraph (g)(2) and (3) of this section, respectively, is attributable to services performed for (or on behalf of), leases to, or licenses with, related persons, but

(iii) Subdivision (ii) of this paragraph (g)(1) will not apply to a person if 50 percent or more of that person's total gross income from sources outside the United States is FOGEI and FORI (as both are described in subdivision (i) of this paragraph (g)(1)).

A person described in subdivision (i) or (ii) of this paragraph will, however, have directly related services income which is FOGEI if the income is so classified by reason of the income based on output test set forth in paragraph (g)(2)(i)(B) of this section.

(2) *Directly related services*—(i) *FOGEI.* (A) Income from directly related services will be FOGEI, as that term is defined in paragraph (b)(1) and (3) of this section, if those services are directly related to the active conduct of extraction (including exploration) of minerals from oil and gas wells. Paragraph (b)(1) of this section provides that, in order to have extraction income, a person must have an economic interest in the minerals in place. However, paragraph (b)(3) of this section recognizes that income arising from "other circumstances" is extraction income if that income is in substance attributable to the extraction of minerals.

(B) An example of "other circumstances" under paragraph (b)(3) of this section is the "income based on output test." This income based on output test provides that, if the amount of compensation paid or credited to a person for services is dependent on the amount of minerals discovered or extracted, the income of the person from the performance of the services will be directly related services income which is FOGEI. This test will apply whether or not the person performing the services has, or had, an economic interest in the minerals discovered or extracted.

(ii) *FORI.* With regard to the determination of directly related services income which is FORI, directly related services are those services directly related to the active conduct of the operations described in section 907(c)(2)(A) through (C). Those services include, for example, services performed in relation to the distribution of minerals or primary products or in connection with the operation of a refinery, or the types of services described in §1.954-6(d) (other than paragraph (d)(4) thereof) which relate to foreign base company shipping income.

(iii) *Recipient of the services.* Directly related services described in paragraph (g)(2)(i) and (ii) of this section may be performed for any person without regard to whether that person is a related person.

(iv) *Excluded services*—(A) *FOGEI.* Directly related services which produce FOGEI do not include insurance, accounting or managerial services.

(B) *FORI.* Directly related services income which produce FORI do not, generally, include insurance, accounting or managerial services. These services will, however, produce FORI if they are performed by the person performing the operations described in section 907(c)(2)(A) through (C). For these purposes, insurance income which is FORI means taxable income as defined in section 832(a).

(3) *Leases and licenses.* A lease or license of related property is the lease or license of assets used (or held for use) by the lessor, licensor, or another person (including the lessee or a sublessee) in the active conduct of the activities described in section 907(c)(1)(A) or (c)-(2)(A) through (C). The leases or licenses described in this paragraph (g)-(3) include, for example, a lease of a means of transportation under a bareboat charter hire, of drilling equipment used in extraction operations, or the license of a patent, know-how, or similar intangible property used in extracting, transporting, distributing or processing minerals or primary products. This paragraph (g)(3) applies without regard to whether the parties are related persons.

(4) *Related person.* A person will be treated as a related person for purposes of this paragraph (g) if (i) that person would be so treated within the meaning of section 954(d)(3) (as applied by substituting the word "corporation" for the word "controlled foreign corporation") or (ii) that person is a partnership or partner described in section 707(b)(1).

(5) *Gross income.* A foreign corporation shall be treated as a domestic corporation for the purpose of applying the gross-income rules in paragraph (g)(1)(ii) and (iii) of this section.

(h) *Coordination with other provisions*—(1) *Certain adjustments.* The character of income as FOGEI or FORI is determined before making any adjustment under section 482 or section 907(d). For example, assume that X and Y are related parties, Y's only income is from the sale of oil that Y purchased from X, and FOGEI from X is diverted to Y through an arrangement described in paragraph (b)(3) of this section. Accordingly, Y has FOGEI. If under section 482 the Commissioner reallocates the FOGEI from Y to X, then Y's remaining income represents only a profit from distributing the oil, and thus is FORI. If the foreign taxes paid by Y on this income are otherwise creditable under section 901, the foreign taxes that are not refunded to Y retain their characterization as FOGEI taxes.

(2) *Section 901(f).* Section 901(f) (relating to certain payments with respect to oil and gas not considered as taxes) applies before section 907. Taxes disallowed by section 901(f) are added to the cost or inventory amount of oil or gas.

§1.907(c)-2T Section 907(c)(3) items (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *Scope.* This section provides rules relating to certain items listed in section 907(c)(3). The rules of this section are expressed in terms of FORI but apply for determining FOGEI by substituting "FOGEI" for "FORI" whenever appropriate. FOGEI does not include interest described in section 907(c)(3)(A) or dividends described in section 907(c)(3)(B).

(b) *Dividend*—(1) *Section 1248 dividend.* A section 1248 dividend is a dividend described in section 907(c)(3)(A). Except as otherwise provided in this paragraph (b)(1) or in §1.907(c)-1T(e)-(3), gain (or loss) from the disposition of stock in any corporation is not FOGEI or FORI.

(2) *Section 78 dividend.* A section 78 dividend is FORI to the extent it arises from a dividend described in section 907(c)(3)(A), or an amount described in section 907(c)(3)(C).

(c) *Taxes deemed paid*—(1) *Voting stock test.* Items described in section 907(c)(3)(A) or (C) are FORI only if a deemed-paid-tax test is met under the criteria of section 902 or 960. The purpose of this test is to require minimum direct or indirect ownership by a domestic corporation in the voting stock of a foreign corporation as a prerequisite for the item to qualify as FORI in the hands of the domestic corporation. The test is whether a domestic corporation would be deemed to pay any taxes of a foreign corporation when a dividend or an amount described in section 907(c)(3)(A) or (C), respectively, is included in the domestic corporation's gross income. In the case of interest described in section 907(c)(3)(A), the test is whether any taxes would be deemed paid if there were a hypothetical dividend.

(2) *Dividends and interest.* For purposes of section 907(c)(3)(A), a domestic corporation is deemed under section 902 to pay taxes in respect of dividends and interest received from a foreign corporation if the following condition is met: the domestic corporation would be deemed under section 902 to pay taxes in respect of dividends received from the foreign corporation whether or not the foreign corporation—

(i) Actually pays or is deemed to pay taxes, or

(ii) In the case of interest, actually pays dividends.

This paragraph (c)(2) also applies to dividends received by a foreign corporation from a second-tier or third-tier foreign corporation (as defined in §1.902-1(a)-(3)(i) and (4), respectively). In the case of interest received by a foreign corporation from another foreign corporation, this paragraph (c)(2) applies if the taxes of both foreign corporations would be deemed paid under section 902(a) or (b) for purposes of applying section 902(a) to the same taxpayer which is a domestic corporation. In the case of interest received by any corporation (whether foreign or domestic), all members of an affiliated group filing a consolidated return will be treated as the same taxpayer under section 907(c)(3)(A) if the foreign taxes of the payor and (if the recipient is a foreign corporation) the foreign taxes of the recipient would be deemed paid under section 902 by at least one member. The term "member" is defined in §1.1502-1(b). Thus, for example, assume that P owns all of the stock of D1 and D2 and P, D1, and D2 are members of an affiliated group filing a consolidated return. Assume further that D1 owns all of the stock of F1 and D2 owns all of the stock of F2, where F1 and F2 are foreign corporations. Interest paid by F1 to P, D2, or F2 may be FORI.

(3) *Amounts included under section 951(a).* For purposes of section 907(c)-(3)(C), a domestic corporation is deemed under section 960 to pay taxes in respect of a foreign corporation, whether or not the foreign corporation actually pays taxes on the amounts included in gross income under section 951 (a).

(d) *Amount attributable to certain items*—(1) *Certain dividends*—(i) *General rule.* The portion of a dividend described in section 907(c)(3)(a) that is FORI equals—

Amount of dividend × a/b

a = FORI accumulated profits in excess of FORI taxes paid or accrued, and

b = Total accumulated profits in excess of total foreign taxes paid or accrued.

This paragraph (d)(1)(i) applies even though the FORI accumulated profits arose in a taxable year of a foreign corporation beginning before January 1, 1983. Determination of the FORI amount of dividends under this paragraph (d)(1)(i) must be made separately for FORI accumulated profits and total accumulated profits that arose in taxable years beginning before January 1, 1987, and for FORI accumulated profits and total accumulated profits that arose in taxable years beginning after December

31, 1986. Dividends are deemed to be paid first out of FORI and total accumulated profits that arose in taxable years beginning after December 31, 1986. With regard to FORI accumulated profits and total accumulated profits that arose in taxable years beginning after December 31, 1986, the portion of a dividend that is FORI equals—

Amount of dividend × a/b

a = Post-1986 undistributed FORI earnings determined under the principles of section 902(c)(1), and

b = Post-1986 undistributed earnings determined under the principles of section 902(c)(1).

(ii) *Cross-references*. See §1.902-1(g) for the determination of a foreign corporation's earnings and profits and of those out of which a dividend is paid. See §1.1248-2 or 1.1248-3 for the determination of the earnings and profits attributable to the sale or exchange of stock in certain foreign corporations.

(2) *Interest received from certain foreign corporations*. Interest described in section 907(c)(3)(A) is FORI to the extent the corresponding interest expense of the paying corporation is properly allocable and apportionable to the gross income of the paying corporation that would be FORI were that corporation a domestic corporation. This allocation and apportionment is made in a manner consistent with the rules of section 954(b)(5) and §1.861-8(e)(2).

(3) *Dividends from domestic corporation*. A dividend from a corporation described in section 907(c)(3)(B) that is FORI is determined under the principles of paragraph (d)(1)(i) of this section with respect to its current earnings and profits under section 316(a)(2) or its accumulated earnings and profits under section 316(a)(1), as the case may be.

(4) *Amounts with respect to which taxes are deemed paid under section 960(a)*—(i) *Portion attributable to FORI*. The portion of an amount described in section 907(c)(3)(C) that is FORI equals:

$$\text{Amount described in section 907(c)(3)(C)} \times \frac{\text{FORI earnings and profits}}{\text{Total earnings and profits}}$$

For taxable years ending after January 23, 1989, the facts and circumstances will be used to determine what part of the amount of the section 907(c)(3)(C) amount is directly attributable to FOGEI, FORI and other income.

(ii) *Earnings and profits*. Total earnings and profits are those of the foreign corporation for a taxable year under section 964 and the regulations under that section.

(5) *Section 78 dividend*. The portion of a section 78 dividend that will be considered FORI will equal the amount of taxes deemed paid under either section 902(a) or section 960(a)(1) with respect to the dividend to the extent the taxes deemed paid are FORI taxes under §1.907(c)-3T(b) or (c). See §1.907(c)-3T(a)(1).

(6) *Special rule*. (i) No item in the formula described in paragraph (d)(1)(i) of this section includes amounts excluded from the gross income of a United States shareholder under section 959(a)(1).

(ii) With respect to a foreign corporation, earnings and profits in the formula described in paragraph (d)(4)(i) of this section do not include amounts excluded under section 959(b) from its gross income.

(7) *Deficits*. In a taxable year, a deficit in earnings and profits in a separate category under section 904(d) (including a deficit in another separate category that is allocated under sections 902 and 960 pursuant to Notice 88-71, 1988-2 C.B. 374, to the first separate category) that is not attributable to FOGEI or FORI is to be allocated ratably between, and reduce, FOGEI earnings and profits and FORI earnings and profits within the first separate category. However, any deficit in earnings and profits within a separate category for the taxable year attributable either to FOGEI or FORI is to be allocated first to FORI or FOGEI (as the case may be) earnings and profits within a separate category before the deficit is allocated in that taxable year to earnings and profits that are not attributable to FORI and FOGEI, within the same separate category. Any deficit in FORI or FOGEI earnings and profits remaining after allocation within the first separate category will be allocated on a pro rata basis to other separate categories and will be allocated within those separate categories, first, to earnings and profits attributable to FORI or FOGEI depending on to which type of earnings and profits the deficit is attributable, second, to earnings and profits attributable to FORI or FOGEI, and, third, to other earnings and profits. For taxable years beginning before January 1, 1987, any deficit in FORI or FOGEI earnings and profits remaining after allocation within the first separate category will be allocated against earnings and profits attributable to United States source income and then to other separate categories pursuant to the preceding sentence. FORI earnings and profits are the earnings and profits attributable to FORI as defined in section 907(c)(2) and (3). FOGEI earnings and profits are the earnings and profits attributable to FOGEI as defined in section 907(c)(1)(3).

(8) *Illustrations*. The application of this paragraph (d) is illustrated by the following examples.

Example (1). X, a domestic corporation, owns all of the stock of Y, a foreign corporation organized in country S. Y owns all of the stock of Z, a foreign corporation also organized in country S. Each corporation uses the calendar year as its taxable year. In 1983, Z has $150 of FOGEI earnings and profits and $250 of earnings and profits other than FOGEI or FORI. Assume that Z paid no taxes to S and X must include $100 in its gross income under section 951(a) with respect to Z. Under paragraph (d)(4)(i) of this section, $37.50 of the amount described in section 951(a) is FOGEI ($100 × $150/$400). The remaining $62.50 of the section 951(a) amount represents other income.

Example (2). Assume the same facts as in *Example* (1) except that the taxable year in question is 1988. In addition, under the facts and circumstances, it is determined that of the $100 section 951(a) amount included in X's gross income, $30 is directly attributable to Z's FOGEI activity, $60 is directly attributable to Z's FORI activity and $10 is directly attributable to Z's other activity. Accordingly, under paragraph (d)(4)(i), $30 will be FOGEI and $60 will be FORI to X.

Example (3). (i) Assume the same facts as in *Example* (1). Assume further that, in 1983, Z distributes its entire earnings and profits ($400) to Y, which consists of a dividend of $300 and a section 959(a)(1) distribution of $100. Y has no other earnings and profits during 1983. Assume that the dividend and distribution are not foreign personal holding company income under section 954(c). Y pays no taxes to S. In 1983, Y distributes its entire earnings and profits to X.

(ii) Under paragraphs (c)(2) and (d)(1)(i) of this section, Y has FOGEI of $112.50, *i.e.*, the amount of the dividend received by Y ($300) multiplied by the fraction described in paragraph (d)(1)(i). The numerator of the fraction is Z's FOGEI accumulated profits in excess of the FOGEI taxes paid ($112.50) and the denominator is Z's total accumulated profits in excess of total foreign taxes paid ($400) minus the amount excluded from Y's gross income under section 959(a)(1) ($100). The rule of paragraph (d)(6)(ii) of this section does not apply since X does not include any amount in its gross income under section 951(a) with respect to Y. If Y paid taxes to S, this paragraph (d) would apply to characterize those taxes as FOGEI taxes or other taxes. See §1.907(c)-3T(a)(8) and *Example* 2 (iii) under §1.907(c)-3T(e).

(iii) The distribution from Y to X is a dividend to the extent of $300, *i.e.*, the amount of the distribution ($400) minus the amount excluded from X's gross income under section 959(a)(1) ($100). Under paragraph (d)(1)(i) and (6)(i) of this section, $112.50 of the dividend is FOGEI, *i.e.*, the amount of the dividend ($300) multiplied by a fraction. The numerator of the fraction is $112.50, *i.e.*, the FOGEI accumulated profits of Y in excess of FOGEI taxes paid ($150) minus the FOGEI accumulated profits of Y in excess of FOGEI taxes paid excluded from X's gross income under section 959(a)(1) ($37.50). The denominator of the fraction is $300, *i.e.*, the total accumulated profits of Y in excess of taxes paid ($400) minus the amount excluded from X's gross income under section 959(a)(1) ($100).

Example (4). Assume the same facts as in *Example* (1) with the following modifications: In 1983, Z's only earnings and profits are FORI earnings and profits which are included in X's gross income under section 951(a). Z distributes its entire earnings and profits to Y. In 1983, Y has total earnings and profits of $100 without regard to the dividend from Z, $60 of which are FORI earnings and profits. Y also has $40 which is included in X's gross income under section 951(a). Under paragraph (d)(6)(ii) of this section, the dividend from Z is disregarded for purposes of applying paragraph (d)(4)(i) of this section to the $40 included in X's gross income under section 951(a) with respect to Y. Accordingly, $24 of the amount described in section 951(a) is FORI ($40 × $60/$100). Had these circumstances existed in 1988, and if the $40 included in X's gross income under section 951(a) was directly attributable to FORI activity, all of that income would be FORI to X.

(e) *Dividends, interest, and other amounts from sources within a possession.* FORI includes the items listed in section 907(c)(3)(A) and (C) to the extent attributable to FORI of a corporation that is created or organized in or under the laws of a possession of the United States.

(f) *Income from partnerships, trusts, etc.* FORI and FOGEI include a person's distributive share (determined under the principles of section 704) of the income of any partnership and amounts included in income under subchapter J of chapter 1 of the Code (relating to the taxation of trusts, estates, and beneficiaries) to the extent the income and amounts are attributable to FORI and FOGEI.

§1.907(c)-3T FOGEI and FORI taxes (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *Tax characterization, allocation and apportionment*—(1) *Scope.* Paragraph (a)(2) through (6) of this section provides rules for the characterization, allocation, and apportionment of the income taxes (other than withholding taxes) paid or accrued to a foreign country among FOGEI, FORI, and other income relevant for purposes of sections 907 and 904. Some of the rules in this section are expressed in terms of FOGEI taxes but they apply to FORI taxes by substituting "FORI taxes" for "FOGEI taxes" whenever appropriate. For the treatment of withholding taxes, see paragraph (a)(8) of this section. FOGEI taxes are determined without any reduction under section 907(a). In addition, determination of FOGEI taxes will not be affected by recharacterization of FOGEI by section 907(c)(4). See §1.907(c)-1T(c)(5). Foreign taxes will not be characterized as creditable FORI taxes if section 907(b) and §1.907(b)-1T apply.

(2) *Three classes of income.* There are three classes of income: FOGEI, FORI, and other income.

(3) *More than one class in a foreign tax base.* If more than one class of income is taxed under one tax base under the law of a foreign country, the amount of pre-credit foreign tax for each base must be determined. This amount is the foreign taxes paid or accrued to that country for the base as increased by the tax credits (if any) which reduced those taxes and were allowed in the country for that tax. More than one class of income is taxed under the same base, if, under a foreign country's law, deductions from one class of income may reduce the income of any other class and the classes are subject to foreign tax at the same rates.

(4) *Allocation of tax within a base.* If more than one class of income is taxed under the same base under a foreign country's law, the pre-credit foreign tax for the base is apportioned to each class of income in proportion to the income of each class. Tax credits are then allocated (under paragraph (a)(6) of this section) to the apportioned pre-credit tax. Income of a class is the excess of modified gross income for a class over the deductions allowed under foreign law for, and which are attributable to, that class.

(5) *Modified gross income.* Modified gross income is not necessarily the same as gross income as defined for purposes of chapter 1 of the Internal Revenue Code. Modified gross income is determined with reference to the foreign tax base for gross income (or its equivalent). However, the characterization of the base as a particular class of income is governed by general principles of U.S. tax law. Thus, for example—

(i) Gross income from extraction is the fair market value of oil or gas in the immediate vicinity of the well (as determined under §1.907(c)-1T(b)(6) (without any deductions)).

(ii) Whether cost of goods sold (or any other deduction) is a deduction from modified gross income and the amount of such a deduction is determined under foreign law.

(iii) Modified gross income includes items that are part of the foreign tax base even though they are not gross income under U.S. law so long as the foreign taxes paid on the base constitute creditable taxes under section 901 (including taxes described in section 903). For example, if a foreign country imposes a tax (creditable under section 901) on a tax base that includes in small part a percentage of the value of a company's oil reserves in place, modified gross income from extraction includes such a percentage of value solely for purposes of making the tax allocation in paragraph (a)(4) of this section.

(iv) Modified gross income from extraction is increased for purposes of this paragraph (a)(5) by the entire excess of the posted price over fair market value if the foreign country uses a posted price system or other pricing arrangement described in section 907(d) in imposing its income tax.

(v) Modified gross income from FORI is that income attributable to the activities in section 907(c)(2)(A) through (C) and (E).

(vi) Modified gross income for any class may not include gross income that is not subject to taxation by the foreign country.

(6) *Allocation of tax credits.* The foreign taxes paid or accrued on a particular class of income equals the pre-credit tax on the class reduced (but not below zero) by the credits allowed under foreign law against the foreign tax on the particular class. Any tax credit attributable to a class that is not allocated to that class is allocated to the other class in the base or, if there are three classes in the base, is apportioned ratably among the taxes paid or accrued on the other two classes (as reduced in accordance with the preceding sentence).

(7) *Withholding taxes.* Paragraph (a)(2) through (6) of this section does not apply to withholding taxes imposed by a foreign country. FOGEI taxes may include withholding taxes imposed with respect to a distribution from a corporation. The portion of the total withholding taxes on a distribution that constitutes FOGEI taxes is determined by the portion of the distribution that is FOGEI. In addition, FOGEI taxes may include taxes imposed on a distribution described in section 959(a)(1) or on amounts described in section 959(b). The portion of the total withholding taxes imposed on a distribution described in section 959(a)(1) or on amounts described in section 959(b) is determined by reference to the portion of the amount included in gross income under section 951(a) that was FOGEI.

(b) *Dividends*—(1) *In general.* FOGEI taxes deemed paid with respect to a dividend equal the total taxes deemed paid with respect to the dividend multiplied by the fraction:

FOGEI taxes paid or accrued by the payor/
Total foreign taxes paid or accrued by the payor.

With regard to dividends received in taxable years beginning after December 31, 1986, FOGEI taxes deemed paid with respect to a dividend equal the total taxes deemed paid with respect to the portion of the dividend within a separate category multiplied by the fraction:

$$\frac{\text{Post-1986 FOGEI taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category}}{\text{Post-1986 foreign income taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category.}}$$

This paragraph (b) applies to a dividend described in section 907(c)(3)(A) (including a section 1248 dividend) with reference to the particular taxable year or years of those accumulated profits out of which a dividend is paid. Determination of FOGEI taxes under this paragraph (b) must be made separately (i) for FOGEI taxes paid on FOGEI accumulated profits and total taxes paid on accumulated profits that arose in taxable years beginning before January 1, 1987, and (ii) for FOGEI taxes paid on FOGEI accumulated profits and total taxes paid on accumulated profits that arose in taxable years beginning after December 31, 1986. For purposes of these determinations, dividends are deemed to be paid first out of FOGEI and total accumulated profits that arose in taxable years beginning after December 31, 1986. See §1.907(c)-2T(d)(1)(i). See section 960(a)(3) and §1.960-2 relating to distributions that are treated as dividends for purposes of section 902.

(2) *Section 78 dividend.* There are no FOGEI taxes with respect to section 78 dividends.

(c) *Includible amounts under section 951(a).* FOGEI taxes deemed paid with respect to an amount includible in gross income under section 951(a) equal the total taxes deemed paid with respect to that amount multiplied by the fraction:

$$\frac{\text{FOGEI taxes paid or accrued by the foreign corporation}}{\text{Total foreign taxes paid or accrued by the foreign corporation.}}$$

With regard to an amount includible in gross income under section 951(a) in taxable years beginning after December 31, 1986, FOGEI taxes deemed paid with respect to that amount equal the total taxes deemed paid with respect to that amount within a separate category multiplied by the fraction:

$$\frac{\text{Post-1986 FOGEI taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category}}{\text{Post-1986 foreign income taxes as determined under the principles of section 902(c)(2) that are allocable to that separate category.}}$$

Taxes in this fraction include only those foreign taxes that may be deemed paid under section 960(a) by reason of such inclusion. See §§1.960-1(c)(3) and 1.960-2(c).

(d) *Partnerships.* A partner's distributive share of the partnership's FOGEI taxes is determined under the principles of section 704.

(e) *Illustrations.* The application of this section may be illustrated by the following examples.

Example (1). X, a domestic corporation, owns all of the stock of Y, a foreign corporation organized in country S. Y owns all of the stock of Z, a foreign corporation organized in country T. Each corporation used the calendar year as its taxable year. In 1983, X includes in its gross income an amount described in section 951(a) with respect to Z. Assume that the taxes deemed paid under section 902(a) by X by reason of such an inclusion is $70. Assume further that Z paid total taxes of $120, $80 of which is FOGEI tax. Under paragraph (c) of this section, the FOGEI tax deemed paid is $46.67 (*i.e.*, $70 × $80/$120). This $46.67 is also FOGEI under §1.907(c)-2T(d)(5) because it must be included in X's gross income under section 78.

Example (2). (i) Assume the same facts as in *Example* (1). Assume further that in 1983, Z distributes its entire earnings and profits to Y. Y has no earnings and profits during 1983 other than this dividend. Y paid a tax of $50 to S. Assume that Y is deemed under section 902(b)(1) to pay $50 of the tax paid by Z which was not deemed paid by X under section 960(a)(1) in 1983. In 1983, Y distributes its entire earnings and profits to X. Assume that X is deemed under section 902(a) to pay $100 of the taxes actually paid, and deemed paid, by Y.

(ii) Paragraph (b)(1) of this section applies to characterize the $50 tax of Z that Y is deemed to pay under section 902(b)(1). Y is deemed to pay $33.33 of FOGEI tax, *i.e.*, the amount of the tax deemed paid by Y ($50) multiplied by a fraction. The numerator of the fraction is the amount of Z's FOGEI tax ($80) and the denominator is the total taxes paid by Z ($120).

(iii) Under paragraph (a)(8) of this section, a portion of the $50 tax actually paid by Y on the earnings and profits received from Z is FOGEI tax. The amount of tax actually paid by Y that is FOGEI tax depends on the amount of the distribution from Z that is FOGEI (see §1.907(c)-2T(d)(1)(i) and *Example* (2)(ii) under §1.907(c)-2T(d)(8)). This result does not depend upon whether a portion of the distribution from Z is described in section 959(b) and it follows even though a portion of Y's earnings and profits will be excluded from X's gross income under section 959(a)(1) when distributed by Y. Assume that $12.50 of the $50 tax actually paid by Y is FOGEI tax.

(iv) Under paragraph (b)(1) of this section, X is deemed to pay $45.83 of FOGEI tax by reason of the distribution from Y. This amount is determined by multiplying the total taxes deemed paid by X by reason of such distribution ($100) by a fraction. The numerator of the fraction is the FOGEI tax paid, and deemed paid, by Y ($45.83, *i.e.*, $33.33 under subdivision (ii) of this example plus $12.50 under subdivision (iii) of this example). The denominator of the fraction is the total taxes paid, and deemed paid, by Y ($100). This $45.83 is FOGEI under §1.907(c)-2T(d)(5) because it is included in X's gross income as a section 78 dividend.

Example (3). (i) X, a domestic corporation, has a concession with foreign country Y that gives it the exclusive right to extract and export the crude oil and natural gas owned by Y. The concession agreement and location of the oil and gas wells mandate that X construct a system of pipelines to transport the minerals that are extracted to a port where they are loaded onto tankers for export. X owns the transportation facilities. Y has an income tax system under which income from mineral operations is subject to a 50 percent tax rate. The taxation by Y of the mineral operations is a separate tax base under paragraph (a)(3) of this section. Under this system, Y imposes the tax at the port prior to export and it establishes a posted price of $12 per barrel. Y also collects royalties of $1.44 per barrel (*i.e.*, 12 percent of this posted price) which is deductible in computing the petroleum tax. Y also allows X deductible lifting costs of $.20 per barrel and deductible transporting costs of $.80 per barrel. Y does not allow any credits against the mineral tax. Assume that X does not have any income in Y other than the mineral income. (In 1983, X extracts, transports, and exports 10,000,000 barrels of crude oil, but for convenience, all computations are in terms of one barrel). X pays foreign taxes of $4.78 per barrel, computed as follows:

Sales		$12.00
Royalties	$1.44	
Lifting	.20	
Transporting	.80	
	2.44	(2.44)
Income base		9.56
Tax rate (percent)		.50
Tax		4.78

Assume that these taxes are creditable taxes under section 901, that the fair market value of the oil at the port is $10 per barrel, and that under §1.907(c)-1T(b)(6) fair market value in the immediate vicinity of the oil wells is $9 per barrel. Thus, at the port, the excess of posted price ($12) over fair market value ($10) is $2.

(ii) The $4.78 foreign tax paid to Y is allocated to FOGEI and FORI in accordance with the rules in paragraph (a)(2) through (5) of this section.

(iii) Under paragraph (a)(3) of this section, FOGEI and FORI are subject to foreign taxation under one tax base. This foreign tax is allocated between FOGEI tax and FORI tax in accordance with paragraph (a)(4) and (5) of this section.

(iv) The modified gross income for FOGEI is $11, *i.e.*, fair market value in the immediate vicinity of the well ($9) plus the excess at the port of posted price over fair market value ($2). The modified gross income for FORI is $1, *i.e.*, value added to the oil beyond the wellhead which is part of Y's tax base ($10-$9).

(v) The royalty deductions are all directly attributable to FOGEI.

(vi) Under paragraph (a)(4) of this section, the income of each class is determined as follows:

	FOGEI	FORI
Modified gross income..	$11.00	$ 1.00
Deductions:		
Royalties	1.44	0
Lifting	.20	0
Transporting	0	.80
Total	1.64	.80
Net Income	9.36	.20

(vii) Under paragraph (a)(4) of this section, the total tax paid to Y is allocated to FOGEI and FORI in proportion to the income in each class. The calculation is as follows:

FOGEI tax = $4.78 × $9.36/$9.56 = $4.68
FORI tax = $4.78 × $0.20/$9.56 = $0.10

Thus, for the 10,000,000 barrels, the FOGEI tax is $46,800,000 and the FORI tax is $1,000,000.

(viii) The allocation under paragraph (a)(4) of this section, rather than the direct application of stated foreign tax rates to foreign-law taxable income in each class of income (which would produce the same results in the facts of this example), is necessary when a foreign country taxes more than one class of income under a progressive rate structure. See *Example* (4) in this paragraph (e).

Example (4). Assume the same facts as in *Example* (3) except that Y's tax is imposed at 40 percent for the first $20,000,000 of income and at 60 percent for all other income. The foreign taxes are allocated under paragraph (a)(4) of this section between FOGEI and FORI in the same manner as in subdivisions (vi) and (vii) of *Example* (3), as follows:

(1) Taxable income		$95,600,000.
(2) Tax:		
(a) 40% of $20,000,000	$8,000,000	
(b) 60% of $75,600,000	45,360,000	
(c) Total tax		53,360,000
(3) FOGEI tax (line 2(c) × $9.36/$9.56)		52,243,680
(4) FORI tax (line 2(c) × $0.20/$9.56)		1,116,320

Example (5). Assume the same facts as in *Example* (3). Assume further that X refines the crude oil into primary products prior to export and Y imposes its tax on the basis of crude oil equivalences of $12 per barrel, rather than the value of the primary products, to establish port prices. Assume that this arrangement is a pricing arrangement described in section 907(d). Thus, Y does not tax the refinery income. The results are the same as in *Example* (3) even if $12 per barrel is equal to, more than, or less than, the value of the primary products at the port. See paragraph (a)(5)(vi) of this section.

§1.907(d)-1T Disregard of posted prices for purposes of chapter 1 of the Code (for taxable years beginning after December 31, 1982) (Temporary regulations).

(a) *In general*—(1) *Scope.* Section 907(d) applies if a person has FOGEI from the—

(i) Acquisition (other than from a foreign government) or

(ii) Disposition of minerals at a posted price that differs from the fair market value at the time of the transaction. Also, if a seller (other than a foreign government) derives FOGEI upon a disposition described in the preceding sentence, section 907(d) applies to the acquisition by the purchaser whether or not the purchaser has FOGEI. Thus, section 907(d) may apply in determining a person's FORI.

(2) *Initial computation requirement.* If section 907(d) applies to any person, income on the transaction as initially reflected on the person's return shall be computed as if the transaction were effected at fair market value. This requirement applies the first time a person has taxable income derived from either the transaction or an item (such as a dividend described in section 907(c)(3)(A)) determined with reference to that income.

(3) *Burden of proof.* The taxpayer must be able to demonstrate the transaction as it actually occurred and the basis for reporting the transaction under the principles of paragraph (a)(2) of this section.

(4) *Related parties.* Section 907(d) (as a rule of characterization) applies whether or not the parties to the transaction are related. Thus, the excess of the posted price over the fair market value may never be taken into account in determining a person's FOGEI under section 907(a) but may be taken into account in determining a person's FORI.

(b) *Adjustments.* If a taxpayer does not comply with the initial requirement of paragraph (a)(2) of this section, adjustments under section 907(d) may be made only by the Commissioner in the same manner that section 482 is administered. Correlative and similar adjustments consistent with the substantive and procedural principles of section 482 and §1.482-1(d) apply. However, section 907(d) is not a limitation on section 482. If a taxpayer disposing of minerals at a posted price does comply with the initial computation requirement of this section, adjustments and correlative and similar adjustments consistent with the substantive and procedural aspects of section 482 and §1.482-1(d) shall apply, whether made on the return by the taxpayer or on a later audit. This paragraph (b) does not apply to an actual sale or exchange of minerals made between persons with respect to whom adjustments under section 482 would never apply (but see paragraph (a)(4) of this section).

(c) *Definitions.* For purposes of this section—

(1) *Foreign government.* The term "foreign government" means only the integral parts or controlled entities of a foreign sovereign and political subdivisions of a foreign country.

(2) *Minerals.* The term "minerals" has the same meaning as in §1.907(c)-1T(f)(1).

(3) *Posted price.* The term "posted price" means the price set by, or at the direction of, a foreign government (i) to calculate income for purposes of its tax or (ii) at which minerals must be sold.

(4) *Other pricing arrangement.* The term "other pricing arrangement" in section 907(d) means a pricing arrangement having the effect of a posted price.

(5) *Fair market value.* The term "fair market value", whether or not at the port prior to export, is determined in the same way that the wellhead price is determined under §1.907(c)-1T(b)(6).

§1.907 (e)-1T Transitional rules (for amounts carried between a taxable year beginning before January 1, 1983, and a taxable year beginning after December 31, 1982) (Temporary regulations).

(a) *General Rule.* Section 907(e)(1) provides rules for carryovers of FOGEI and FORI taxes from taxable years beginning before January 1, 1983 (the general effective date of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA)), to taxable years beginning after December 31, 1982. Section 907(e)(2) provides for carrybacks of those taxes from taxable years beginning after December 31, 1982, to taxable years beginning before January 1, 1983. Both the carryover and carryback amounts shall not exceed the lesser of the amount deemed paid or accrued which would have been deemed paid or accrued under the carryback and carryover rules of section 907(f) and §1.907(f)-1T (covering carryback and carryover of taxes that both begin after December 31, 1982) or the amount which would have been deemed paid or accrued if —

(1) Pre-TEFRA section 907(b) (which provided for a separate section 904 limitation for FORI taxes),

(2) Pre-TEFRA section 907(f) (which limited the carryback and carryover of FOGEI taxes to 2% of FOGEI for the year of origin), and

(3) Pre-TEFRA section 904(f)(4) (which dealt with the determination of foreign oil related loss if section 907 applied)

had remained in effect for taxable years beginning after December 31, 1982.

(b) *Rules for carryover of FORI and pre-TEFRA non-FORI taxes*—(1) Under this section, in general —

(i) The amount of unused pre-TEFRA FORI taxes that may be carried forward to any carryover year may not exceed the excess section 907(b) limitation, as in effect prior to the general effective date of TEFRA, for that carryover year;

(ii) The amount of unused pre-TEFRA, non-FORI taxes that may be carried forward to any carryover year may not exceed the excess section 904(d) general limitation, as in effect before the general effective date of TEFRA for that carryover year; and

(iii) The total of the amounts carried forward under subdivisions (i) and (ii) of this paragraph (b)(1) to any carryover year may not exceed the excess section 904(d) general limitation, as in effect after the general effective date of TEFRA, for that carryover year.

(2) The amount of unused pre-TEFRA FORI taxes that may be carried forward to any succeeding carryover year is the total of those taxes, less the amount of those taxes deemed accrued in the carryover year after reduction in accordance with paragraph (b)(1)(i) of this section (if applicable).

(3) The amount of unused pre-TEFRA, non-FORI taxes that may be carried forward to any succeeding carryover year is the total of those taxes, less the amount of those taxes deemed accrued in the carryover year after reduction in accordance with paragraph (b)(1)(ii) of this section (if applicable).

(c) *Examples*. The provisions of section 907(e)(1) may be illustrated by the following examples. For purposes of these examples, assume the following:

(1) The corporation's preliminary U.S. tax liability is computed at an effective rate of 46%;

(2) A term modified by "old" refers to the meaning the term had prior to the general effective date of TEFRA;

(3) The only foreign source income which the corporation had prior to 1983 is old FORI (which included FOGEI and other FORI) and old section 904(d)(1)(C) income (*i.e.*, income other than interest, DISC dividends and FORI); and

(4) The only foreign source income the corporation had during 1983 and 1984 was section 904(d)(1)(C) income (*i.e.*, income other than interest and DISC dividends) as applicable during those years.

Example (1)—(i) *Facts*. X, a calendar year U.S. corporation organized on January 1, 1982, uses the accrual method of accounting. For 1982, X had the following relevant tax items:

	1982
FOGEI	$500
FOGEI taxes	265
Section 907(a) limitation (46% × $500)	230
Unused FOGEI tax	35
Old section 907(f)(1) limitation (2% × $500)	10
Unused old section 907(b) limitation FORI taxes (not including unused FOGEI taxes)	63
Unused old section 904(d)(1)-(C) taxes	20

X's tax items for 1983 and 1984 under the Code provisions applicable to those years were as follows:

Table I

		1983	1984
(a)	FOGEI	$1,000	$1,200
(b)	FORI	400	350
(c)	Other foreign taxable income	122	250
(d)	Total taxable income (domestic and foreign)	2,000	2,500
(e)	FOGEI taxes	750	500
(f)	FORI taxes	140	62
(g)	Other foreign taxes	50	31
(h)	Section 907(a) limitation (46% × (a))	460	552
(i)	Total creditable foreign taxes (after section 907(a) limitation excluding carryovers)	650 ((f) + (g) + (h))	593 ((e) + (f) + (g))
(j)	Preliminary U.S. tax (46% × (d))	920	1,150
(k)	Section 904(d) overall limitation ((j) SAX $\frac{(a)+(b)+(c)}{(d)}$)	700	828
(1)	Excess FOGEI taxes (or excess limitation) ((e) − (h)	290	(52)
(m)	Excess section 904(d) taxes (or excess limitation) ((i) − (k))	(50)	(235)

X's foreign tax items for 1983 and 1984, had old sections 907(b) and (f) and 904(f)(4) applied, would have been as follows:

Table II

		1983	1984
(a)	FOGEI	$1,000	$1,200
(b)	Old FORI (less FOGEI)	400	350
(c)	Other foreign taxable income	122	250
(d)	Total taxable income (domestic and foreign)	2,000	2,500
(e)	FOGEI taxes	750	500
(f)	Old FORI taxes (less (e))	140	62
(g)	Other foreign taxes	50	31
(h)	Section 907(a) limitation (46% × (a))	460	552
(i)	Old FORI taxes (after section 907(a) limitation excluding carryovers)	600 ((f) + (h))	562 ((e) + (f))
(j)	Old section 904(d)(1)(C) taxes ((g))	50	31
(k)	Preliminary U.S. tax (46% × (d))	920	1,150
(l)	Old FORI section 907(b) limitation ((k) × $\frac{(a) + (b)}{(d)}$)	644	713
(m)	Old section 904(d)(1)(C) limitation ((k) × $\frac{(c)}{(d)}$)	56	115
(n)	Excess FOGEI taxes (or excess limitation) ((e) − (h))	290	(52)
(o)	Excess old FORI taxes (or excess limitation) ((i) − (1))	(44)	(151)
(p)	Excess old section 904(d)(1)(C) taxes (or excess limitation) ((j) − (m))	(6)	(84)

(ii) *Carryover from 1982 to 1983*—(A) *Unused FOGEI taxes*. X has $35 of unused FOGEI taxes available for carryover from 1982. Pursuant to section 907(f)(3)(A), X must determine its section 907(f) FOGEI tax carryover (taking into account the section 907(e) transition rules) from 1982 to 1983 before it determines its section 904(c) general foreign tax carryover. In determining the carryover from 1982 to 1983, section 907(e)(l) requires that the old section 907(f)(l) limitation be applied. Under old section 907(f)(1), FOGEI taxes in excess of the section 907(a) limitation could only be carried over to succeeding years in an amount equal to 2% of the FOGEI ($10 in this example) in the year of origin. See §1.907(f)-1A(b)(2). The $10 is not deemed accrued, however, in 1983 because FOGEI taxes paid or accrued in 1983 ($750) exceed the section 907(a) limitation ($460) for 1983 (Table I, 1983, line (l)).

(B) *Unused FORI taxes*. X has $63 of unused old section 907(b) limitation FORI taxes available for carryover from 1982. Pursuant to section 907(e)(1), the amount of unused FORI taxes that may be carried over from 1982 to 1983 may not exceed the excess old section 907(b) limitation for 1983. Since the excess 1983 old section 907(b) limitation is $44 (Table II, 1983, line (o)), only that amount of the $63 of total unused 1982 FORI taxes (not including unused FOGEI taxes) may becarried over and deemed accrued in 1983. Therefore, X has unused 1982 old section 907(b) limitation FORI taxes (not including unused FOGEI taxes) in the amount of $19 ($63 less $44) available for carryover to 1984.

(C) *Unused other foreign taxes*. X has $20 of unused old section 904(d)(1)(C) taxes available for carryover from 1982. However, only $6 may be deemed accrued in 1983 since for 1983 the excess old section 904(d)(1)(C) limitation was only $6 (Table II, 1983, line (p)). Therefore, X has unused 1982 old section 904(d)(1)(C) taxes in the amount of $14 ($20 less $6) available for carryover to 1984.

(iii) *Carryover from 1982 to 1984*—(A) *Unused FOGEI taxes*. The unused FOGEI tax carryover from 1982 of $10 will be deemed accrued in 1984 since the limitations of both old and new section 907(f)(2) do not limit the deemed accrual. The $10 amount is not as great as the lesser of the excess extraction limitation under new section 907(f)(2)(A), $52 (Table I, 1984, line (l)) and the excess overall limitation under new section 907(f)(2)(B), $235 (Table I, 1984, line (m)). Likewise, the $10 amount is not as great as the lesser of the excess extraction limitation under old section 907(f)(2)(A), $52 (Table II, 1984, line (n)) and the excess oil related limitation under old section 907(f)(2)(B), $151 (Table II, 1984, line (o)).

(B) *Unused FORI taxes*. The $29 of 1982 unused old section 907(b) limitation FORI taxes (including $10 of unused FOGEI taxes) are deemed accrued in 1984 since they do not exceed the excess old section 907(b) limitation for 1984, $151 (Table II, 1984, line (o)).

(C) *Unused other foreign taxes*. X's $14 of unused 1982 old section 904(d)(1)(C) taxes are deemed accrued in 1984 since they do not exceed the old section 904(d)(1)(C) limitation, $84 (Table II, 1984, line (p)).

Example (2)—(i) *Facts*. Assume the same facts as in *Example* (1) except that X's other foreign taxable income for 1983, line (c) in both tables in *Example* (1), is $46. It is assumed that total taxable income remains the same as in *Example* (1).

(ii) *Carryover from 1982 to 1983*—(A) *Unused FOGEI taxes*. Same result as in *Example* (1). None of the $10 of unused FOGEI taxes carried over from 1982 may be deemed accrued in 1983.

(B) *Unused FORI and other foreign taxes*. The old excess section 907(b) limitation for 1983 remains at $44 (Table II, 1983, line (o)). There is, however, no old excess section 904(d)(1)(C) limitation for 1983 (Table II, 1983, line (p)). The tentative carryovers are therefore $44 of FORI taxes and $0 of section 904(d)(1)(C) taxes. In addition, the excess section 904(d) overall limitation (Table I, 1983, line (m)) is now only $15. Accordingly, under paragraph (b)(1)-(D) of this section, the maximum amount of FORI taxes and old section 904(d)(1)(C) taxes that may be carried forward to 1983 is $15.

Therefore, $15 of the $63 of total unused 1982 FORI taxes (not including unused FOGEI taxes) may be carried over from 1982 and deemed accrued in 1983. X has unused 1982 old section 907(b) limitation FORI taxes (not including unused FOGEI taxes) in the amount of $48 available for carryover to 1984. X need not reduce the unused 1982 FORI taxes by the amount ($44) which would have been deemed accrued had the old excess section 907(b) limitation applied.

Example (3)—(i) *Facts*. Y, a U.S. corporation organized on January 1, 1982, uses the accrual method of accounting and the calendar year as its taxable year. For 1982, Y had the following tax items:

Table I

(a)	FOGEI	$ 900
(b)	Old FORI (less FOGEI)	250
(c)	Other foreign taxable income	200
(d)	World wide taxable income	2,050
(e)	FOGEI taxes	300
(f)	Old FORI taxes (less (e))	130
(g)	Other foreign taxes	170
(h)	Section 907(a) limitation (46% × (a))	414
(i)	Old FORI taxes (after section 907(a) limitation) (lesser of (e) or (h) plus (f))	430
(j)	Old section 904(d)(1)(C) taxes ((g))	170
(k)	Preliminary U.S. tax (46% × (d))	943
(l)	Old FORI section 907(b) limitation $\left((k) \times \frac{(a) + (b)}{(d)}\right.$	529
(m)	Old section 904(d)(1)(C) limitation $\left((k) \times \frac{(c)}{(d)}\right)$	
(n)	Excess FOGEI taxes (or excess limitation) ((e) − (h))	(114)
(o)	Excess old FORI taxes (or excess limitation) ((i) − (1))	(99)
(p)	Excess old section 904(d)(1)(C) taxes (or excess limitation) ((j) − (m))	78

Y's tax items for 1983 and 1984 under the Code provisions applies to those years were as follows:

Table II

		1983	*1984*
(a)	FOGEI	$1,000	$1,200
(b)	FORI	300	450
(c)	Other foreign taxable income (loss)	200	150
(d)	Total taxable income (domestic and foreign)	2,200	2,500
(e)	FOGEI taxes	400	750
(f)	FORI taxes	180	290
(g)	Other foreign taxes	60	90
(h)	Section 907(a) limitation (46% × (a))	460	552
(i)	Total creditable foreign taxes (after section 907(a) limitation excluding carryovers)	640 ((e) + (f) + (g))	932 ((f) + (g) + (h))
(j)	Preliminary U.S. tax (46% × (d))	1,012	1,150
(k)	Section 904(d) overall limitation $\left((j) \times \frac{(a) + (b) + (c)}{(d)}\right)$	690	828
(l)	Excess FOGEI taxes (or excess limitation) ((e) − (h))	(60)	198
(m)	Excess section 904 taxes (or excess limitation) ((i) − (k))	(50)	104

Y's foreign tax items for 1983 and 1984, had old sections 907(b) and (f) and 904(f)(4) applied, would have been as follows:

Table III

		1983	1984
(a)	FOGEI	$1,000	$1,200
(b)	Old FORI (less FOGEI)	300	450
(c)	Other foreign taxable income	200	150
(d)	Total taxable income (domestic and foreign)	2,200	2,500
(e)	FOGEI taxes	400	750
(f)	Old FORI taxes (less (e))	180	290
(g)	Other foreign taxes	60	90
(h)	Section 907(a) limitation (46% × (a))	460	552
(i)	Old FORI taxes (after section 907(a) limitation excluding carryovers)	580 ((f)+(e))	842 ((f)+(h))
(j)	Old section 904(d)(1)(C) taxes ((g))	60	90
(k)	Preliminary U.S. tax (46% × (d))	1,012	1,150
(l)	Old FORI section 907(b) limitation $((k) \times \frac{(a)+(b)}{(d)})$	598	759
(m)	Old section 904(d)(1)(C) limitation $((k) \times \frac{(c)}{(d)})$	92	69
(n)	Excess FOGEI taxes (or excess limitation) ((e)−(h))	(60)	198
(o)	Excess old FORI taxes (or excess limitation) ((i)−(l))	(18)	83
(p)	Excess old section 904(d)(1)(C) taxes (or excess limitation) ((j)−(m))	(32)	21

(ii) *Carryover from 1982 to 1983*—(A) *Unused FOGEI taxes.* For 1982, Y has no unused FOGEI taxes (Table I, 1982, line (n)) since FOGEI taxes paid, $300 (Table I, 1982, line (e)) is less than the section 907(a) limitation, $414 (Table I, 1982, line (h)).

(B) *Unused FORI taxes.* For 1982, Y has no unused old FORI taxes (Table I, 1982, line (o)) since the old FORI section 907(b) limitation, $529 (Table I, 1982, line (l)) exceeds old FORI taxes for 1982, $430 (Table I, 1982, line (i)).

(C) *Unused other foreign taxes.* For 1982, Y has $78 of unused old section 904(d)(1)(C) taxes (Table I, 1982, line (p)). The unused old section 904(d)(1)(C) taxes from 1982 are deemed accrued in 1983 only to the extent of the excess old section 904(d)(1)(C) limitation for 1983, $32 (Table III, 1983, line (p)). Thus, $32 of the unused old section 904(d)(1)(C) taxes for 1982 are deemed accrued in 1983 and $46 are available for carryover to 1984.

(iii) *Carryback of unused FOGEI taxes from 1984 to 1982.* Y has $198 of unused FOGEI taxes for 1984 (Table II, 1984, line (l)). These taxes are deemed accrued in 1982 only to the extent they would have been deemed accrued in 1982 had old section 907(f) remained in effect for 1984. Under old section 907(f), Y's carryback of unused FOGEI taxes would have been limited to $24, 2% of its FOGEI for 1984. All of the $24 is deemed accrued in 1982 because Y's excess section 907(a) limitation for 1982 is $114 (Table I, line (n)) and its excess old FORI section 907(b) limitation for 1982 is $99 (Table I, line (o)).

(iv) *Carryback of unused section 904(d)(1)(C) taxes from 1984 to 1982.* Y has $104 of unused section 904(d)(1)(C) taxes for 1984 (Table II, 1984, line (m)). Those taxes may be carried from 1984 to 1982 but only to the extent of the amount of unused old FORI taxes and unused old section 904(d)(1)(C) taxes from 1984 that would have been deemed accrued in 1982 had old sections 907(b) and (f) and 904(f)(4) remained in effect for 1984. The amount of unused old FORI taxes from 1984, $83 (Table III, 1984, line (o)), that would have been deemed accrued in 1982 is $75, the excess old FORI section 907(b) limitation for 1982, $99 (Table I, line (o)) less $24 of carryback of unused FOGEI taxes from subdivision (iii) above. Unused FOGEI taxes carried back to an excess limitation year are applied before unused other old FORI taxes. See §1.907(b)-2A(d)(1)(ii). Although Y has $21 of unused old section 904(d)(1)(C) taxes for 1984 (Table III, 1984, line (p)) none are deemed accrued in 1982 because there is no excess old section 904(d)(1)(C) limitation for 1982 (Table I, line (p)). Thus, only $75 of the $104 of unused section 904(d)(1)(C) taxes from 1984 are deemed accrued in 1982.

§1.907(f)-1T Carryback and carryover of credits disallowed by section 907(a) (for amounts carried between taxable years that each begin after December 31, 1982) (Temporary regulations).

(a) *In general.* If a taxpayer chooses the benefits of section 901, any unused FOGEI tax paid or accrued in a taxable year beginning after December 31, 1982, may be carried to the taxable years specified in section 907(f) under the carryback and carryover principles of this section and §1.904-2(b). See section 907(e) and §1.907(e)-1T for transitional rules that apply to unused FOGEI taxes carried back or forward between a taxable year beginning before January 1, 1983, and a taxable year beginning after December 31, 1982.

(b) *Unused FOGEI tax*—(1) *In general.* The "unused FOGEI tax" for purposes of this section is the excess of the FOGEI taxes for a taxable year (year of origin) over that year's limitation level (as defined in §1.907(a)-1T(b)).

(2) *Year of origin.* The term "year of origin" in the regulations under section 904 corresponds to the term "unused credit year" under section 907(f).

(c) *Tax deemed paid or accrued.* The unused FOGEI tax from a year of origin that may be deemed paid or accrued under section 907(f) in any preceding or succeeding taxable year ("excess limitation year") may not exceed the lesser of—

(1) The excess extraction limitation for the excess limitation year, or

(2) The excess general section 904 limitation for the excess limitation year.

(d) *Excess extraction limitation.* Under section 907(f)(2)(A), the "excess extraction limitation" for an excess limitation year is the amount by which that year's section 907(a) extraction limitation exceeds the sum of —

(1) The FOGEI taxes paid or accrued, and

(2) The FOGEI taxes deemed paid or accrued in that year by reason of a section 907(f) carryback or carryover from preceding years of origin.

(e) *Excess general section 904 limitation.* Under section 907(f)(2)(B), the "excess general section 904 limitation" for an excess limitation year is the amount by which that year's section 904 general limitation exceeds the sum of—

(1) The general limitation taxes paid or accrued (or deemed to have been paid under section 902 or 960) to all foreign countries and possessions of the United States during the taxable year,

(2) The general limitation taxes deemed paid or accrued in such taxable year under section 904(c) and which are attributable to taxable years preceding the unused credit year, plus

(3) The FOGEI taxes deemed paid or accrued in that year by reason of a section 907(f) carryover (or carryback) from preceding years of origin.

(f) *Section 907(f) priority*. If a taxable year is a year of origin under both section 907(f) and section 904(c), section 907(f) applies first. See section 907(f)-(3)(A).

(g) *Cross-reference*. In computing the carryback and carryover of disallowed credits under section 907(f), the principles of §1.904-2(d), (e), and (f) apply.

(h) *Example*. The following example illustrates the application of section 907(f).

Example. X, a U.S. corporation organized on January 1, 1983, uses the accrual method of accounting and the calendar year as its taxable year. X's only income is income which is not subject to a separate tax limitation under section 904 (d). X's preliminary U.S. tax liability indicates an effective rate of 46% for taxable years 1983-1985. X has the following foreign tax items for 1983-1985:

Example

			1983	*1984*	*1985*
1.		FOGEI	$15,000	$20,000	$10,000
2.		FOGEI taxes	7,500	9,200	4,200
3.		Other foreign taxable income	8,000	5,000	10,000
4.		Other foreign taxes	3,200	2,000	3,000
5.	(a)	Section 907(a) limitation (.46 × Line 1)	6,900	9,200	4,600
	(b)	General section 904 limitation (.46 × (line 1 plus line 3))	10,580	11,500	9,200
6.	(a)	Unused FOGEI taxes (excess of line 2 over line 5(a))	600	0	0
	(b)	Unused general limitation taxes (excess of line 4 plus lesser of line 2 or line 5(a) over line 5(b))	0	0	0
7.	(a)	FOGEI taxes from years preceding 1983 deemed accrued under section 907(f)	0	0	0
	(b)	Section 904 general limitation taxes from years preceding 1983 deemed accrued under section 904(c)	0	0	0
8.	(a)	Excess section 907(a) limitation (excess of line 5(a) over sum of line 2 and line 7(a))	0	0	400
	(b)	Excess section 904 general limitation (excess of line 5(b) over sum of line 4, lesser of line 2 and line 5(a), and line 7(b))	480	300	2,000
9.		Limit on FOGEI taxes that will be deemed accrued under section 907(f) (lesser of line 8(a) and line 8(b)	0	0	400

X has unused 1983 FOGEI taxes of $600. Since the excess section 907(a) limitation for 1984 is zero, the unused FOGEI taxes are carried to 1985. Of the $600 carryover, $400 is deemed accrued in 1985 and the balance of $200 is carried to following years (but not to a year after 1988). After the carryover from 1983 to 1985, the excess section 904 general limitation for 1985 (line 8(b)) is reduced by $400 to $1,600 to reflect the amount of 1983 FOGEI taxes deemed accrued in 1985 under section 907(f).

Par. 10. A new center heading is added to precede §1.911-1 to read as follows:

EARNED INCOME OF CITIZENS OR RESIDENTS OF UNITED STATES

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved September 15, 1988.

O. Donaldson Chapoton,
Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on January 19, 1989, 8:45 a.m., and published in the issue of the Federal Register for January 23, 1989, 54 FR. 3004)

Subpart F.—Controled Foreign Corporations

Section 954.—Foreign Base Company Income

26 CFR 1.954-3: Foreign base company sales income.
(Also Sections 701, 702, 703; 1.702-1.)

Controlled foreign corporations; foreign base company sales income. The character of an item of income included in a controlled foreign corporation's distributive share from a partnership includes such attributes of the income as would make it subpart F income if realized directly by the controlled foreign corporation.

Rev. Rul. 89-72

ISSUE

Is a portion of a controlled foreign corporation's distributive share of partnership income treated as foreign base company sales income in the circumstances described below?

FACTS

P, a domestic corporation, is engaged in the business of manufacturing machines in the United States. *PRS*, an entity classified as a partnership for United States federal tax purposes, is organized under the laws of Country *X*. *S*, a wholly owned Country *Y* subsidiary of *P* that is a control led foreign corporation (a CFC) as defined in section 957 of the Internal Revenue Code, owns a 25 percent interest in *PRS*. The remaining 75 percent interest in *PRS* is owned by an unrelated Country *X* corporation.

PRS purchased machines from *P* for sale and use in Country *X*. The income earned from the sale of machines in Country *X* is not subject to an effective rate of income tax imposed by a foreign country that is greater than 90 percent of the maximum rate of tax specified in section 11 of the Code.

In 1988, *S*'s distributive share of *PRS*'s income included income from the sale in Country *X* of machines purchased from *P*.

LAW AND ANALYSIS

Section 951(a) of the Code generally requires the United States shareholders of a CFC to include in income their pro rata shares of the CFC's subpart F income for each taxable year. *P* must therefore include *S*'s subpart F income in its income for 1988.

Under section 954(a) of the Code, subpart F income includes foreign base company sales income, including income derived from the purchase of property from a related person where the property is both manufactured and sold for use outside of the CFC's country of organization. *P* and *S* are related persons under section 954(d).

Under section 701 of the Code, a partnership as such is not subject to income tax. Persons carrying on business as partners are liable for income tax only in their separate or individual capacities. The partners of the partnership generally take into account their distributive shares of the partnership's income, gain, loss, deduction and credit as determined under section 704.

Under section 703 of the Code, a partnership must separately state certain items specified in section 702(a). These items are taken into account separately by the partners of the partnership, and under section 702(b) the character of each such item is determined as if it were realized directly by the partner from the source from which realized by the partnership. Among the items to be separately stated by the partnership and separately taken into account by the partners are items set forth in regulations prescribed by the Secretary under section 702(a)(7). Section 1.702-1(a)(8)(ii) of the Income Tax Regulations provides that, in addition to other items specified in section 702(a) and the regulations thereunder, each partner must also take into account separately his distributive share of any partnership item which if separately taken into account by any partner would result in an income tax liability for that partner different from that which would result if that partner did not take the item into account separately. See Rev. Rul. 85-60, 1985-1 C.B. 187. See, also, the district court opinion in *MCA, Inc. v. United States*, 502 F. Supp. 838, 841 (C.D. Cal. 1980), rev'd, 685 F.2d 1099 (9th Cir. 1982), where a dictum suggests that a CFC partner's distributive share of partnership income would be deemed to derive directly from the persons with whom a partnership transacted business.

S's gross income for 1988 includes its distributive share of partnership income from the sale of machines manufactured in the United States that *PRS* purchased from *P* and sold outside *S*'s country of organization. In accordance with sections 702(a) and (b) of the Code and section 1.702-1(a)(8)(ii) of the regulations, such income is taken into account separately by *S*, and the character of such income is determined as if it were realized directly by *S* from the source from which *PRS* realized such income. For purposes of section 954(a) of the Code, the character of an item of income included in a CFC partner's distributive share includes such attributes of the income as would make it subpart F income if realized directly by the CFC partner, including whether the person from whom the goods are purchased is a related person with respect to the CFC partner and whether the sale of the goods occurs outside the CFC partner's country of organization. Income from *PRS*'s sales of U.S.-manufactured machines purchased from *P* and sold outside Country *Y*, if realized directly by *S*, would constitute foreign base company sales income. Therefore, *S*'s distributive share of such income is foreign base company sales income in *S*'s hands.

HOLDING

S's distributive share of *PRS*'s income earned from the sale of machines purchased from *P* is treated as foreign base company sales income in these circumstances.

Section 956.—Investment of Earnings in U.S. Property

26 CFR 1.956-2: Definition of United States property.

Controlled foreign corporations; short term debt obligations. Under certain circumstances, the purchase of debt obligations by a CFC will constitute an investment of earnings in U.S. property under section 956(a) of the Code.

Rev. Rul. 89-73

ISSUE

Whether the purchase of debt obligations by the issuing domestic corporation's controlled foreign corporation, which mature and are repaid shortly before the end of the controlled foreign corporation's taxable year, followed by the purchase of new debt obligations issued by the domestic corporation shortly after the beginning of the controlled foreign corporation's succeeding taxable year, will constitute an investment of earnings in U.S. property under section 956(a) of the Internal Revenue Code of 1986.

FACTS

Example (1)

Corporation *X*, a domestic corporation, issues to the public debt obligations during 1987 and 1988. *CFC*, a subsidiary of *X* and a controlled foreign corporation as defined in section 957 of the Code, is not engaged in U.S. business activity and does not earn income effectively connected with a U.S. trade or business. Both *X* and *CFC* report income on a calendar year basis. *CFC* has accumulated earnings and profits of \$1000x as of December 31, 1987 and has never invested its accumulated profits in United States property as defined in section 956(b) prior to the 1987 taxable year.

On February 5, 1987, *CFC* purchased \$200x of debt obligations issued by *X* that matured and were repaid on November 15, 1987. *CFC* purchased \$225x of debt obligations issued by *X* on January 15, 1988 and sold the obligations to an unrelated third person on November 10, 1988.

Example (2)

The facts are the same as in Example (1) except for *CFC*'s purchases of obligations issued by *X*. On February 1, 1987, *CFC* purchased \$200x of debt obligations issued by *X*. The obligations matured and were repaid on June 30, 1987. On January 15, 1988, *CFC* purchased \$225x of obligations issued by *X* and sold the obligations to an unrelated third person on November 15, 1988.

LAW AND ANALYSIS

Section 951(a)(1)(B) of the Code provides that every person who is a United States shareholder under section 951(b) owning stock in a controlled foreign corporation on the last day of the foreign corporation's taxable year shall include in gross income a pro rata share of the corporation's increase in earnings invested in United States property for such year as determined under section 956(a)(2). The term "United States property" generally includes obligations issued by a United States shareholder of the controlled foreign corporation.

The House Report of the Revenue Act of 1962, which adopted section 956, stated that an objective of that section was "to prevent the repatriation of income to the United States in a manner which does not subject it to U.S. taxation. This objective also accounts for some of the features of this provision, which deny tax deferral where funds are brought back and invested in the United States in a manner which does not otherwise subject them to U.S. taxation." H.R. Rep. No. 1447, 87th Cong., 2d Sess., (1962), at 58, 1962-3 C.B. 405, 462.

The application of section 956 is concerned with the substance of a transaction, not its form. In *Gregory v. Helvering*, 293 U.S. 465 (1935), the Court stated that "the question for determination is whether what was done, apart from the tax motive, was the thing which the statute intended." More recently, in *Houchins v. Commissioner*, 79 T.C. 570, 589 (1982), the Court in discussing economic substance stated that "labels, semantic technicalities, and formal written documents do not necessarily control the tax consequences of a given transaction. Rather we are concerned with economic realities and not the form employed by the parties."

Courts have previously applied a form versus substance analysis to distinguish loans from dividends. *See, e.g., Meyer v. Commissioner*, 45 B.T.A. 228, 238-40 (1941); *Tollefson v. Commissioner*, 52 T.C. 671 (1969), *aff'd*, 431 F.2d 511 (2d Cir. 1970), *cert. denied*, 401 U.S. 908 (1971). However, the application of section 956 is not limited to the standard enunciated in these cases for treating an advance to a shareholder as a dividend, because section 956 is intended to prevent the tax-free repatriation of earnings even in circumstances that would not otherwise constitute a dividend distribution. The facts and circumstances of each case must be reviewed to determine if, in substance, there has been a repatriation of the earnings of the controlled foreign corporation. If a controlled foreign corporation lends earnings to its U.S. shareholder interrupted only by brief periods of repayment which include the last day of the controlled foreign corporation's taxable year, there exists, in substance, a repatriation of the earnings to the U.S. shareholder within the objectives of section 956. Because the substance of such a transaction must control the tax consequences, the lending of the controlled foreign corporation's earnings to the U.S. shareholder is a repatriation of earnings of a type which constitutes an investment in U.S. property under section 956. Such a repatriation will be treated as outstanding at the close of a controlled foreign corporation's taxable year for purposes of computing the amount of earnings invested in U.S. property under section 956(a)(1)-(A). This repatriation results in an investment in U.S. property under section 956 even though the two loans may be treated as separate obligations for other purposes of the Code, such as section 1001. In the case of a brief period of disinvestment in the obligations of a U.S. shareholder, the amount of the investment in U.S. property as of the last day of the CFC's taxable year is equal to the lesser of the amount of the investment in U.S. property in the CFC's first taxable year or the amount of the reinvestment in the next succeeding taxable year. Other factors in addition to the period of disinvestment may be indicative of a repatriation of earnings of the controlled foreign corporation that should be taken into account for section 956 purposes.

HOLDING

In Example (1), the brief period of time between the termination of *CFC*'s investment in U.S. property on November 15, 1987 and the reinvestment in obligations of *X* on January 15, 1988 will be disregarded in determining whether there is an investment in U.S. property as of the close of *CFC*'s 1987 taxable year. The investment by *CFC* in obligations issued by *X* and the reinvestment by *CFC* in *X* obligations will, therefore, be considered together as a $200x investment in U.S. property in 1987 under section 956.

In Example (2), the period of time between *CFC*'s termination of the investment in U.S. property on June 30, 1987 and its reinvestment in U.S. property on January 15, 1988 is not brief compared to the overall period the debt obligations are outstanding. The debt obligations are not, therefore, considered to represent an investment in U.S. property by *CFC* in 1987.

These holdings do not provide a taxpayer the right to compel the Internal Revenue Service to disregard the form of its transactions for Federal income tax purposes. *See Commissioner v. Alfalfa Dehydrating & Milling* 417 U.S. 134 (1974).

Section 960.—Special Rules for Foreign Tax Credit

Whether the limitation of section 901(j)(2)(C) of the Code applies prospectively to earnings derived in South Africa in taxable years beginning after December 31, 1987. See Rev. Rul. 89-44, page 237.

Subchapter O.—Gain or Loss on Disposition of Property
Part III.—Common Nontaxable Exchanges

Section 1033.—Involuntary Conversions

26 CFR 1.1033(a)-1: Involuntary conversions: nonrecognition of gain.

Involuntary conversions; destruction by chemical contamination; subsequent condemnation. Property rendered unsafe for its intended use as a result of chemical contamination is destroyed for purposes of section 1033(a) of the Code. In addition, the subsequent sale of contaminated property to a governmental authority after the passage of an ordinance authorizing eminent domain proceedings constitutes a sale under threat of condemnation for purposes of section 1033(a) and (g) to the extent that the taxpayer can establish that the proceeds represent compensation for taking of the property by the government.

Rev. Rul. 89-2

ISSUES

(1) If chemical contamination renders property unsafe for its intended use, is the property destroyed for purposes of section 1033(a) of the Internal Revenue Code?

(2) Does the sale of the contaminated property to a governmental authority to protect the public health constitute a sale under the threat of condemnation for purposes of section 1033(a) and section 1033(g) of the Code?

FACTS

The taxpayer owned improved real estate that it used in its trade or business in city *X*. Through no fault of the taxpayer, dangerous chemicals were released in the city where the taxpayer's property was located. After sampling the soil in the area, a governmental agency found widespread chemical contamination in concentration levels greatly exceeding the level that is deemed safe for habitation. Responsible health authorities determined that prolonged contact with the chemically contaminated soil represents a serious health risk. The health hazard caused by the chemical contamination is expected to continue indefinitely.

Consequently, the governmental agency announced that the residents and businesses of the city should be relocated to protect the public health. Pursuant to an agreement among the federal, state, and city governments, all residents and businesses were asked to sell their contaminated property. The amount of compensation offered was based on the appraised value of the property undiminished by the contamination. City *X* also passed an ordinance authorizing eminent domain proceedings, if necessary, to acquire the affected properties. After passage of the ordinance, the taxpayer accepted an offer from city *X* to purchase its property. The taxpayer realized a gain from this sale.

LAW AND ANALYSIS

Section 1033(a) of the Code provides for the nonrecognition of gain realized upon the involuntary conversion of property into money as a result of its destruction in whole or in part, or condemnation or threat or imminence thereof. Under section 1033(a)(2), if the taxpayer purchases other property similar or related in service or use to the converted property within a period generally ending 2 years after the first tax year in which gain is realized, then at the election of the taxpayer the gain is recognized only to the extent that the amount realized exceeds the cost of the replacement property.

Section 1033

Involuntary conversion, within the meaning of section 1033(a) of the Code, means that the taxpayer's property, "through some outside force or agency beyond his control, is no longer useful or available to him for his purposes." *C.G. Willis, Inc. v. Commissioner,* 41 T.C. 468, 476 (1964), *aff'd per curiam,* 342 F.2d 996 (3d Cir. 1965). Not all involuntary conversions fall within the scope of section 1033; to qualify, a conversion must result from one of the specified causes. *The Davis Co. v. Commissioner,* 6 B.T.A. 281 (1927), *acq.,* VI-2 C.B. 2 (1927).

Physical damage that renders property unfit for its intended use is a "destruction" for purposes of section 1033(a) of the Code. Rev. Rul. 66-334, 1966-2 C.B. 302, concerns the gradual salt water contamination of an underground fresh water supply that was used for irrigation. The ruling holds that the contamination, which was caused by a fault in the earthen pit containing the salt water, is a destruction of property.

In the present case, chemically contaminated soil in city *X* poses an irremediable hazard to human health. The taxpayer's property is essentially uninhabitable for the foreseeable future, and, consequently, is unfit for the taxpayer's intended use. Thus, the taxpayer's property is destroyed for purposes of section 1033(a) of the Code.

For purposes of section 1033(a) of the Code, it does not matter whether the conversion stems from destruction, or the threat of condemnation, or both. To the extent that the conversion is attributable to the threat of condemnation, however, the taxpayer is eligible for the generally more liberal replacement requirements of section 1033(g).

Section 1033(g)(1) of the Code provides that if real property held for productive use in trade or business or for investment is, as the result of condemnation or threat or imminence thereof, compulsorily or involuntarily converted, property of a like kind to be held either for productive use in trade or business or for investment shall be treated as property similar or related in service or use to the converted property for purposes of section 1033(a). Section 1033(g)(4) provides that in such a case the replacement period is determined by substituting "3 years" for "2 years." Section 1.1033(g)-1(a) of the Income Tax Regulations provides explicitly that section 1033(g) does not apply to conversions attributable solely to destruction.

As used in section 1033(a) and section 1033(g) of the Code, the term "condemnation" refers to the process by which private property is taken for public use, without the consent of the property owner but upon the award and payment of just compensation. Rev. Rul. 57-314, 1957-2 C.B. 523. Public use includes a use intended to conserve the safety and health of the public, even though individual members of the public are unable to use the property taken. Normally, the measure of just compensation is the fair market value of the property taken by the government. *See* Uniform Eminent Domain Code §1002 (1974).

Although a taking to protect the health of the public may qualify as a condemnation under section 1033 of the Code, the taxpayer must distinguish proceeds that are attributable to condemnation (that is, to the government's action in taking the property) from proceeds that compensate the taxpayer for destruction. In Rev. Rul. 74-206, 1974-1 C.B. 198, the taxpayer's property, which had been damaged by a flood, was condemned under a state eminent domain statute that disregarded flood damage in determining fair market value for purposes of establishing the amount of the condemnation award. Reasoning that the statute was designed to provide both fair compensation for the property and a reimbursement for loss resulting from the flood damage, Rev. Rul. 74-206 concludes that the taxpayer's property was involuntarily converted in part as a result of condemnation and in part as a result of destruction.

Here, city *X* purchased the taxpayer's property after passing an ordinance authorizing eminent domain proceedings. The passage of the ordinance satisfies the requirement that there be a threat of condemnation. Rev. Rul. 71-567, 1971-2 C.B. 309. The amount paid by city *X*, however, was based on an appraised value that did not take into account the diminution in value caused by the chemical contamination. As in Rev. Rul. 74-206, the portion of the proceeds that compensates the taxpayer for the destruction of its property must be distinguished from the portion allocable to the condemnation. The proceeds are attributable to the condemnation only to the extent of the fair market value of the property, if any, after taking into account the contamination. The taxpayer may treat the portion of the gain attributable to compensation for the governmental taking under section 1033(a) or 1033(g) of the Code.

HOLDINGS

(1) Property that is rendered unsafe for its intended use as a result of chemical contamination is destroyed for purposes of section 1033(a) of the Code.

(2) In addition, for purposes of section 1033(a), which generally applies to all types of property, and for purposes of section 1033(g), which applies to real property held either for productive use in trade or business or for investment, if that property is sold to a governmental authority after the passage of an ordinance authorizing eminent domain proceedings to protect the public health, then the sale constitutes a sale under the threat of condemnation to the extent that the taxpayer can establish that the proceeds represent compensation for the taking of the property by the government, rather than compensation for the destruction caused by the contamination.

Subchapter P.—Capital Gains and Losses
Part IV.—Special Rules for Determining Capital Gains and Losses

Section 1248.—Gain from Certain Sales or Exchanges of Stock in Certain Foreign Corporations

Whether the limitation of section 901(j)(2)(C) of the Code applies prospectively to earnings derived in South Africa in taxable years beginning after December 31, 1987. See Rev. Rul. 89-44, page 237.

Part V.—Special Rules for Bonds and Other Debt Instruments
Subpart A.—Original Issue Discount

Section 1274.—Determination of Issue Price in the Case of Certain Debt Instruments Issued for Property

(Also Sections 42, 280G, 382, 467, 468, 483, 1288, 7872.)

Federal rates; adjusted federal rates; adjusted federal long-term rate, and the long-term exempt rate. For purposes of sections 1274, 1288, 382, and other sections of the Code, tables set forth the rates for January 1989.

Rev. Rul. 89-1

This revenue ruling provides various prescribed rates for federal income tax purposes for January 1989 (the current month). Table 1 contains the short-term, mid-term, and long-term applicable federal rates (AFR) for the current month for purposes of section 1274(d) of the Internal Revenue Code. Table 2 contains the short-term, mid-term and long-term adjusted applicable federal rates (adjusted AFR) for the current month for purposes of section 1288(b). Table 3 sets forth the adjusted federal long-term rate and the long-term tax-exempt rate described in section 382(f). Finally, Table 4 contains the appropriate percentages for determining the low-income housing credit described in section 42(b)(2) for buildings placed in service during the current month.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of February 1989. See Rev. Rul. 89-15, page 262.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of March 1989. See Rev. Rul. 89-34, page 263.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of April 1989. See Rev. Rul. 89-39, page 264.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of May 1989. See Rev. Rul. 89-65, page 265.

The adjusted applicable federal short-term, mid-term, and long-term rates are set forth for the month of June 1989. See Rev. Rul. 89-77, page 266.

Subchapter S.—Tax Treatment of S Corporations and Their Shareholders
Part I.—In General

Section 1361.—S Corporation Defined

S corporation; permissible shareholder. A trust, the terms of which provide that a portion of its corpus may be used to fund a new trust for an "after-born" grandchild of the grantor, is not a "qualified subchapter S trust" under section 1361(d)(3) of the Code.

Rev. Rul. 89-45

ISSUE

Is a trust, which provides that a portion of its corpus may be used to fund a new trust for an "after-born" grandchild of the grantor, a "qualified subchapter S trust" within the meaning of section 1361(d)(3) of the Internal Revenue Code?

FACTS

A is a shareholder of *M*, a corporation that made in 1987 a valid election to be an S corporation. In 1988, *A* created a trust for *A*'s grandchild, *W*, and funded the trust with stock of *M*. *W* is the sole beneficiary of the trust, and, except for the "after-born" provision described below, the trust is a trust described in section 1361(d)(3) of the Code.

The trust agreement contains an "after-born" provision, which states that a new trust will be established with a newborn grandchild as its sole beneficiary each time a grandchild of *A* is born after the execution of the original trust. The new trust will be funded by transferring shares of *M* to the new trust from the existing trust or trusts so that all of the trusts for *A*'s grandchildren will have the same number of shares. No portion of the trust is treated (under the rules set forth in sections 671-677 of the Code) as owned by *A*.

LAW AND ANALYSIS

Section 1361(a)(1) of the Code provides that the term "S corporation" means with respect to any taxable year, a small business corporation for which an election under section 1362(a) is in effect for such year.

Section 1361(b)(1)(B) of the Code provides that a "small business corporation" may not have as a shareholder a person (other than an estate and other than a trust described in section 1361(c)(2)) who is not an individual.

Section 1361(c)(2)(A) of the Code provides that for purposes of section 1361(b)(1)(B) certain trusts may be shareholders of a small business corporation.

Section 1361(d)(1) of the Code provides that in the case of a qualified subchapter S trust for which an election is made by a trust beneficiary under section 1361(d)(2), such trust will be treated as a trust described in section 1361(c)(2)(A)(i), and for purposes of section 678(a), the beneficiary of the trust will be treated as the owner of that portion of the trust that consists of stock in a small business corporation for which an election has been made.

Section 1361(d)(3)(A)(ii) of the Code provides that the term "qualified subchapter S trust" means a trust the terms of which require that, during the life of the current income beneficiary, any corpus distributed may be distributed only to such beneficiary.

In this case, the requirements of section 1361(d)(3)(A)(ii) of the Code are not met because the terms of the trust do not require that during the life of the current income beneficiary, *W*, corpus of the trust may be distributed only to *W*. As a result of the "after-born" provision, corpus of the trust may be distributed to another person during the life of *W*.

HOLDING

A trust which provides that during the life of the current income beneficiary a portion of its corpus may be used to fund a new trust for the benefit of a person other than the current income beneficiary, in this case, an "after-born" grandchild of the grantor, is not a "qualified subchapter S trust" within the meaning of section 1361(d)(3) of the Code. Therefore, for any year in which the trust is a shareholder, *M* will not meet the definition of an S corporation under section 1361(a)(1).

Trusts; qualified subchapter S trusts. A trust is not a qualified subchapter S trust (QSST) if the terms of the trust instrument provide that in the event the trust does not hold shares of an S corporation, the trust may terminate during the life of the current income beneficiary and distribute its corpus to persons other than that beneficiary.

Rev. Rul. 89-55

ISSUE

Is a trust the terms of which provide that in the event the trust does not hold shares of an S corporation, the trust may terminate during the life of the current income beneficiary and distribute its corpus to persons other than the current income beneficiary a qualified subchapter S trust (QSST) under section 1361(d)(3) of the Internal Revenue Code?

FACTS

X is a small business corporation that made a valid election for 1986 to be an S corporation. In 1987, *A* transferred shares of *X* to a trust, *T*, for the benefit of *A*'s children, *C* and *D*. *C* and *D* are successive income beneficiaries of *T*. The terms of the trust instrument satisfy the requirements of sections 1361(d)(3)(A)(i) and (iii) and of 1361(d)(3)(B) of the Code for QSSTs.

The trust instrument provides that corpus is to be distributed only upon the termination of *T*, and generally, that *T* may not terminate while either *C* or *D* is alive. However, if *T* no longer holds any shares of *X*, then *T* may terminate and distribute its assets to *C* and *D* equally or to their issue per stirpes.

LAW AND ANALYSIS

Section 1361(a)(1) of the Code defines the term "S corporation" as a small business corporation for which an election under section 1362(a) is in effect for the taxable year. Section 1361(b)(1)(B) permits only individuals, estates, and certain trusts to be shareholders of a small business corporation. A QSST, defined in section 1361(d)(3), is one type of trust permitted to be a shareholder under section 1361(b)(1)(B).

Section 1361(d)(3)(A)(iv) of the Code provides that a trust is a QSST only if the trust instrument provides that, upon the termination of the trust during the life of the current income beneficiary, the trust must distribute all of its assets to that beneficiary. In this case the question presented is whether the *T* trust instrument complies with this requirement because it provides the income beneficiary with the exclusive asset distribution rights only if *T* holds shares of *X*.

The detailed requirements of section 1361(d)(3) of the Code restrict the permissible class of trusts that may be shareholders of an S corporation under that section to those that are subject to the income and corpus distribution rights of one individual at a time throughout the existence of the trust. This is accomplished by ensuring that during the life of the current income beneficiary, all of the assets of the trust, if distributed, can only be distributed to that individual.

In this case, if *T* no longer holds shares of *X*, then *T* could terminate during *C*'s lifetime, and the assets of *T* could be distributed to more than one individual (*C* and *D* or their issue). Thus, the terms of the *T* trust instrument do not ensure that *C* will be the only distributee of *T*'s assets during *C*'s lifetime.

HOLDING

A trust the terms of which provide that in the event the trust does not hold shares of an S corporation, the trust may terminate during the life of the current income beneficiary and distribute its corpus to persons other than the current income beneficiary is not a (QSST) under section 1361(d) of the Code.

Section 1363.—Effect of Election on Corporation

Under section 1363 of the Code, an electing small business corporation is not subject to the taxes imposed in Chapter 1 of the Code and, therefore, such corporation is not subject to the environmental tax imposed by section 59A which is a Chapter 1 tax. See Rev. Rul. 89-82, page 23.

Chapter 3.—Withholding of Tax on Nonresident Aliens and Foreign Corporations
Subchapter A.—Nonresident Aliens and Foreign Corporations

Section 1441.— Withholding of Tax on Nonresident Aliens

26 CFR 1.1441-3: Exceptions and rules of special application.

Nonresidents; foreign partners distributive share of fixed and determinable

annual or periodical income. Domestic partnerships are required to withhold tax on a foreign partner's distributive share of fixed or determinable annual or periodical income which has not actually been distributed no later than the fifteenth day of the third month following the close of the partnerships taxable year.

Rev. Rul. 89-17

ISSUE

What is the proper time for a domestic partnership to withhold tax on a foreign partner's distributive share of fixed or determinable annual or periodical income that is not effectively connected with a trade or business within the United States and has not been actually distributed?

FACTS

P, a domestic partnership, earns fixed or determinable annual or periodical income during the taxable year that is not effectively connected with a trade or business within the United States. *P* has one or more nonresident alien partners. During the taxable year, *P* does not make any distribution to its partners. The accounting information necessary to compute the nonresident alien partner's distributive share of *P*'s income is not available until after the end of *P*'s taxable year. *P*'s foreign partners are not entitled to the benefits of an income tax treaty.

LAW AND ANALYSIS

Section 1441(a) of the Internal Revenue Code of 1986 provides for the withholding of a 30 percent tax upon items of fixed or determinable annual or periodical income of a nonresident alien individual. Section 1441(b) of the Code defines the types of income subject to withholding, providing that in the case of a nonresident alien individual who is a member of a domestic partnership, the income subject to withholding includes fixed or determinable income included in the nonresident alien's distributive share of partnership income. Section 1.1441-3(f) of the Income Tax Regulations further states: "Domestic partnerships are required to withhold the tax at source ... [on items of fixed or determinable annual or periodical income] that are included in the distributive share (including amounts that are not actually distributed) of a member of such partnership who is a nonresident alien...." Thus, items of fixed or determinable annual or periodical income included in a nonresident alien partner's distributive share, whether actually distributed or not, are subject to withholding unless an exception is provided by regulations.

Neither the Code nor the Regulations specifically state when a partnership must withhold and pay over with respect to amounts of fixed or determinable annual or periodical income that are deemed distributed on the last day of the partnership's taxable year. Under section 706(a), a partner is deemed to receive during his taxable year the partnership distributive share, as defined in section 702, for the partnership taxable year ending with or within the partner's year. Thus a distribution for section 1441 purposes is deemed to occur on the last day of the partnership's taxable year. Withholding should occur as soon as reasonably possible following the deemed receipt of the distribution. Accordingly, withholding on the distributive shares of a nonresident alien's partnership income subject to section 1441, not previously distributed to the partner, shall be made and paid over by the date on which Schedule K or K-1 is sent to that partner. In any event, withholding shall be made and paid over no later than March 15 following the close of the partnership's tax year if its accounting period is the calendar year, or in the case of a fiscal year partnership, by the fifteenth day of the third month following the close of the fiscal year.

HOLDING

A domestic partnership is required to withhold tax on a foreign partner's distributive share of fixed or determinable annual or periodical income that is subject to section 1441, but which has not actually been distributed, by the date on which partnership forms are sent to individual partners, but in any event no later than the fifteenth day of the third month after the taxable year of the partnership closes.

This ruling is not intended to address issues arising under section 1446 of the Code (regarding withholding on effectively connected income), nor does it address the application of any other section not specified.

---

26 CFR 1.1441-3: Exceptions and rules of special application.

Nonresidents; withholding on partner's distributive share. A domestic partnership is required to withhold tax on undistributed amounts of a foreign partner's distributive share of fixed or determinable annual or periodical income.

Rev. Rul. 89-33

ISSUE

May a domestic partnership choose not to withhold tax on undistributed amounts of a foreign partner's distributive share of fixed or determinable annual or periodical income that is not effectively connected with a trade or business within the United States?

FACTS

A, a nonresident alien, is a member of *P*, a domestic partnership. *P* earns fixed or determinable annual or periodical income during the taxable year that is not effectively connected with a trade or business within the United States. At the end of the taxable year, *P* computes the distributive shares of individual partners on the basis of the partnership income. *P* does not make a distribution to its partners. *A* is not entitled to the benefits of an income tax treaty.

LAW AND ANALYSIS

Section 1441(a) of the Internal Revenue Code of 1986 provides that any person having the control, receipt, custody, disposal or payment of an item of fixed or determinable annual or periodical income of any nonresident alien individual must (except as otherwise provided in regulations) withhold a tax equal to 30 percent of the gross amount of the income. Section 1441(b) of the Code defines the types of income subject to withholding. In addition, that section provides that in the case of a nonresident alien individual who is a member of a domestic partnership, the items of income subject to withholding includes fixed or determinable income included in the nonresident alien's distributive share of partnership income. Thus, items of fixed or determinable annual or periodical income included in a nonresident alien partner's distributive share are subject to withholding unless an exception is provided by regulations.

Section 1.1441-3(f) of the Income Tax Regulations provides rules that apply to domestic partnerships and domestic fiduciaries of trusts. That section contains this sentence: "If a partnership or a fiduciary withholds under this section on a distributive partnership share or distributable net income of a trust or estate before the income is actually distributed to a partner or beneficiary, then withholding is not required when such income is subsequently distributed." This statement is intended merely to illustrate how section 1441 of the Code operates in the described circumstances and to prevent the imposition of additional withholding at the time of distribution to the partner. The statement does not make withholding on a nonresident alien individual's distributive share of the partnership's fixed or determinable annual or periodical income optional. Mandatory withholding is explicitly required by the first sentence of section 1.1441-3(f): "Domestic partnerships are *required* to withhold the tax at source ... [on items of fixed or determinable annual or periodical income] that are included in the distributive share *(including amounts that are not actually distributed)* of a member of such partnership who is a nonresident alien ... (emphasis added)."

HOLDING

A domestic partnership is required to withhold tax on undistributed amounts of a foreign partner's distributive share of fixed or determinable annual or periodical income.

This ruling is not intended to address issues arising under section 1446 of the Code (regarding withholding on effectively connected income).

Chapter 6.—Consolidated Returns
Subchapter A.—Returns and Payment of Tax

Section 1502.—Regulations

26 CFR 1.1502-14: Stock, bonds, and other obligations of members.

T.D. 8245

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Part 1

Consolidated Return Regulations—Distributions After the Sale of Stock of a Subsidiary

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary and final regulations.

SUMMARY: This document contains temporary and final regulations that provide rules under section 1502 relating to a dividend or other distribution subject to section 301 that is declared with respect to stock of a subsidiary member of an affiliated group filing consolidated federal income tax returns if the stock of that subsidiary member is disposed of before the distribution is made, but after the selling member becomes entitled to the distribution. The effect of these regulations is to ensure that appropriate adjustments to the basis of stock in a subsidiary are made before the sale of the stock of the subsidiary. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in * * * [CO-5-89, page 924, this Bulletin].

EFFECTIVE DATE: These regulations are effective for distributions subject to section 301 that are declared in taxable years for which the due date (without extensions) of the federal income tax return is after March 14, 1989.

SUPPLEMENTAL INFORMATION:

This document amends temporary regulation §1.1502-32T and adds cross-references to §§1.1502-14(a) and 1.1502-32(b) and (c). The temporary and final regulations added by this document will remain in effect until superseded by later temporary or final regulations relating to these matters.

Background

A principal purpose of the investment adjustment rules under §1.1502-32 is to ensure that the income and losses of members are taken into account only once in computing taxable income of a group. Accordingly, §1.1502-32(b)(1)(i) provides for a positive adjustment to increase a member's basis in the stock of a subsidiary member to reflect that subsidiary's allocable part of the undistributed earnings and profits arising during a consolidated return year as determined under §1.1502-33. In general, §1.1502-32(b)(2)(iii) provides for a negative adjustment to decrease a member's basis in the stock of a subsidiary member to reflect distributions of these earnings and profits.

For similar reasons, to avoid the double counting of income in computing the taxable income of a group, §1.1502-14(a)(1) provides that a dividend, described in section 301(c)(1), distributed by one member to another member during a consolidated return year is eliminated. Likewise, §1.1502-14(a)(2) provides that no gain shall be recognized to the distributee on a nondividend distribution, described in section 301(c)(2) or (3), with respect to stock from one member to another member during a consolidated return year. Section 1.1502-14(a)(2) requires the distributee to take account of a nondividend distribution by reducing its basis in the stock of the distributing corporation or increasing its excess loss account for such stock.

One purpose of the negative adjustment under §1.1502-32(b)(2)(iii) is to ensure that taxable gain is not reduced or taxable loss increased on a member's sale of the stock of its subsidiary solely on account of the reduction in the stock's value because of a declared dividend. For example, assume that in 1987, corporation P forms subsidiary S with $1,000 capital. For 1987, P and S file a consolidated return and S has undistributed earnings and profits of $50. As of the end of the 1987 consolidated return year, P's basis in the stock of S is increased by $50 to $1,050 due to the investment adjustment rules of §1.1502-32. In 1988, S has zero earnings and profits and declares and pays a dividend to P of $50. Under §1.1502-14(a)(1), the dividend is eliminated. Under §1.1502-32(b)(2)(iii)(a), P reduces its basis in the stock of S by $50. The negative adjustment to the basis of the S stock equals the reduction in value of S as a result of the $50 dividend distribution. Without the negative adjustment P could sell the stock of S for $1,000 (S's fair market value) and recognize a $50 loss. This loss would be unwarranted because no economic loss was realized by P on its investment in the S stock.

Assume, however, that in 1988 P sells the stock of S after the shareholder record date, but before S pays the dividend. The distribution would then occur in a separate return year of S. The fair market value of S is reduced by $50 before the sale of the stock of S as a result of S's obligation to pay the dividend. Some commentators contend that the basis adjustment rules do not apply, and P would recognize a $50 loss on the sale of S. While under this view the dividend distribution would not be eliminated under §1.1502-14(a)(1), P would claim a dividends received deduction on the amount distributed under section 243(a). Again, if P were to recognize a loss on the sale of the S stock, the result would be unwarranted because no economic loss is realized by P on its investment in the S stock.

This regulation is not intended to affect the principles of existing case law under which certain pre-sale dividends are recharacterized as part of the purchase price of the distributing subsidiary. *See, e.g., Waterman Steamship Corpo-*

ration v. Comm'r, 430 F.2d 1185 (5th Cir. 1970), *rev'g* 50 T.C. 650 (1968), *cert. denied* 401 U.S. 939 (1971).

Explanation of Provisions

The temporary regulations provide that, if a member of an affiliated group during a consolidated return year declares a distribution described in section 301 on a share of its stock owned by another member, and the share is disposed of before the distribution, but after the disposing member becomes entitled to the distribution, then for all federal tax purposes the distribution is deemed to be made immediately before the disposition of that share. To the extent the distribution is a dividend, it is eliminated under §1.1502-14(a)(1), and the distributee makes any negative basis adjustment applicable under §1.1502-32(b)(2)(iii) in the stock of the distributor immediately before the disposition. To the extent the distribution is not a dividend, §1.1502-14(a)(2) applies so that no gain or loss is recognized by the distributee, and the distributee reduces its basis (or increases its excess loss account) in the distributor by the amount of the nondividend distribution.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. These rules, if issued, will not have a significant economic impact on a substantial number of small entities. These rules apply only to affiliated groups of corporations that have elected to file consolidated returns, which tend to be larger businesses. These rules would not significantly alter the reporting or record keeping duties of small entities. Therefore, an initial Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. Chapter 6) is not required.

* * * * * *

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1— INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1986

Paragraph 1. The authority citation for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805; * * * §1.1502-32T also issued under 26 U.S.C. 1502.

Par. 2. Section 1.1502-14 is amended by adding new paragraph (a)(5) to read as follows:

§1.1502-14 Stock, bonds, and other obligations of members.

(a) * * *

(5) *Distributions after the disposition of stock of a member.* For rules relating to certain distributions subject to section 301, declared before but paid after the disposition of stock of a member, see §1.1502-32T(b).

* * * * *

Par. 3. Section 1.1502-32 is amended by adding new paragraphs (b)(3) and (c)-(4) to read as follows:

§1.1502-32 Investment adjustment.

* * * * *

(b) * * *

(3) *Distributions after the disposition of stock of a member.* For rules relating to adjustments for certain distributions subject to section 301, declared before but paid after the disposition of stock of a member, see §1.1502-32T(b).

(c) * * *

(4) *Distributions after the disposition of stock of a member.* For rules relating to adjustments for certain distributions subject to section 301, declared before but paid after the disposition of stock of a member, see §1.1502-32T(b).

* * * * *

Par. 4. Section 1.1502-32T is amended by redesignating paragraph (b) as paragraph (a)(6) and redesignating the subparagraphs (b)(1) and (b)(2) as paragraphs (a)(6)(i) and (a)(6)(ii), respectively; by changing in the newly redesignated paragraph (a)(6)(ii) the reference to "this paragraph (b)(2)" to "this paragraph (a)(6)(ii)"; and by adding a new paragraph (b) to read as follows:

§1.1502-32T Investment adjustments (temporary).

* * * * *

(b) *Distributions after the disposition of stock of a member*—(1) *General rule.* If a member disposes of a share of stock of another member after a distribution subject to section 301 has been declared on that share and after the date the disposing member becomes entitled to the distribution, but before the distribution has been made, the distribution is deemed to be made for all federal tax purposes immediately before the disposition. For example, the year of realization of the distribution by the shareholder under section 301 and by the distributing member under section 311 is the year of the disposition of the share. The taxable status of the distribution and its effect on earnings and profits of the distributing member is determined with respect to the earnings and profits of the distributing member accrued to the date of the disposition.

(2) *Example.* Paragraph (b)(1) of this section may be illustrated by the following example:

Example. (i) Corporation P forms subsidiary S in 1987 with a capital contribution of $5,000 in exchange for all of S's stock. P and S file consolidated returns. For calendar year 1987, S has undistributed earnings and profits of $100. Under §1.1502-32(b)(1)(i), P increases its basis in its S stock by $100 to $5,100. For 1988, S has $80 of earnings and profits. On December 1, 1988, S declares a cash distribution of $200 to be paid on January 10, 1989, to shareholders of record on December 20, 1988. On December 31, 1988, P sells all of its S stock to Z, an unrelated corporation, for $4,980 (S's fair market value, reduced as a result of S's obligation to pay $200). On January 10, 1989, S pays P the declared distribution of $200. For 1989, S has $90 of earnings and profits.

(ii) On December 31, 1988, when P sells its S stock, P is entitled to the $200 distribution on the S stock which was declared but not paid. Therefore, the distribution is deemed made on December 31, 1988, immediately before the sale. As of December 31, 1988, S has $180 of current and accumulated earnings and profits; therefore, $180 of the distribution is a dividend under section 301(c)(1) and is eliminated under §1.1502-14(a)(1). Under §1.1502-14(a)(2), P recognizes no gain or loss on the remaining $20 of the distribution.

(iii) P's basis of $5,100 in the S stock is reduced by $120 to $4,980 (by $100 under §1.1502-32(b)-(2)(iii)(*a*) and by $20 under §1.1502-14(a)(2)). Since S's 1988 current earnings and profits of $80 are distributed, neither those earnings and profits nor the deemed distribution thereof gives rise to a basis adjustment under §1.1502-32. Accordingly, P recognizes no gain or loss on the sale of the S stock. Immediately after the sale, S has zero earnings and profits. Because the distribution is deemed made on December 31, 1988, S's 1989 earnings and profits are not affected by the distribution. Thus, S has $90 of undistributed earnings and profits for 1989.

(3) *Effective date.* This paragraph (b) applies to distributions described in section 301 that are declared in taxable years for which the due date (without extensions) of the federal income tax return is after March 14, 1989.

* * * * *

The provisions contained in this Treasury decision are needed to provide appropriate adjustments to the basis of stock of a subsidiary member to reflect the subsidiary's fair market value when the subsidiary's stock is sold and a distribution under section 301, declared but unpaid, has reduced the value of the subsidiary. These basis adjustments prevent the unwarranted reduction in taxable gain or increase in taxable loss which would otherwise result. The amendments are needed immediately to respond to recent transactions in which taxpayers have attempted to create these unwarranted reductions in gain or increases in losses. It is therefore found impracticable and contrary to the public interest to issue this Treasury decision with notice and public procedure under section 553(b) of Title 5 of the United States Code or subject to the effective date limitations of section 553(d) of Title 5, United States Code.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

Approved March 8, 1989.

Dennis E. Ross,
Acting Assistant Secretary of the Treasury.

(Filed by the Office of the Federal Register on March 14, 1989, 8:45 a.m., and published in the issue of the Federal Register for March 16, 1989, 5 F.R. 10980)

---

26 CFR 1.1502-34: Special aggregate stock ownership rules.
(Also Sections 332, 351, 7805; 1.332-2, 1.351-1, 301.7805-1.)

Consolidated returns; affiliated group; aggregate stock ownership rules. The aggregate stock ownership rules of section 1.1502-34 of the regulations apply regardless of actual stock ownership by a member of an affiliated group. Rev. Rul. 74-598 modified.

Rev. Rul. 89-46

ISSUE

If a member of an affiliated group that files a consolidated income tax return owns stock of another corporation, do the aggregate stock ownership rules of section 1.1502-34 of the Income Tax Regulations attribute that stock to other members that do not actually own any stock in the corporation?

FACTS

P is the common parent of an affiliated group of corporations that files a consolidated federal income tax return. *P* has two wholly owned subsidiaries, *X* and *Y*, that are members of the *P* group. On June 1, 1988, *X* transferred certain property to *Y* in exchange for a security of *Y*. The face amount and fair market value of the security equaled the fair market value of the property transferred, but the basis of the property in the hands of *X* did not equal its fair market value.

LAW AND ANALYSIS

Section 1.1502-34 of the regulations provides that, for purposes of sections 1.1502-1 through 1.1502-80, in determining the stock ownership of a member of the group in another corporation (the "issuing corporation") for purposes of determining the application of section 332(b)(1) or 351(a) (among other sections) in a consolidated return year, there shall be included stock owned by all other members of the group in the issuing corporation. Paragraphs (2) and (3) of section 332(b) are not among the sections whose application is determined according to this special attribution rule.

Section 332(a) of the Internal Revenue Code provides that no gain or loss shall be recognized on the receipt by a corporation of property distributed in complete liquidation of another corporation. Section 332(b)(1) provides that section 332(a) applies only if the corporate distributee satisfies an 80-percent ownership requirement with respect to the liquidating corporation. Further, under section 332(b)(2) and (3), section 332(a) applies only if the liquidating distribution is in complete cancellation or redemption of all the liquidating corporation's stock.

Section 351(a) of the Code provides that no gain or loss shall be recognized if property is transferred to a corporation by one or more persons solely in exchange for stock or securities in the corporation and immediately after the exchange the person or persons are in control (as defined in section 368(c)) of the corporation.

Section 368(c) of the Code generally provides that the term "control" means the ownership of stock possessing at least 80 percent of the total combined voting power of all classes of stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of the corporation.

Rev. Rul. 74-598, 1974-2 C.B. 287, *amplified by* Rev. Rul. 75-383, 1975-2 C.B. 127, concerns an affiliated group filing a consolidated income tax return in which a wholly owned foreign subsidiary *(S-1)* of one member of the group *(P)* was to transfer all of its assets to another member of the group *(S-2)* that did not own any stock of the foreign corporation. The ruling holds that section 1.1502-34 of the regulations applies to attribute stock owned by members of an affiliated group to other members of the group only if the other members actually own some of the stock. The ruling concludes that because *S-2* did not actually own any stock of *S-1*, section 1.1502-34 does not attribute stock ownership to *S-2*, and thus section 332 of the Code does not prevent recognition of gain on the transfer. This holding is incorrect. Such an interpretation is not required by the plain language of section 1.1502-34 and would not further the purpose of that section.

Rev. Rul. 74-598 is correct, however, in its ultimate conclusion that section 332 of the Code does not apply to *S-2*'s receipt of property from *S-1* as described in that ruling. Although section 1.1502-34 of the regulations applies to satisfy the 80-percent ownership requirement of section 332(b)(1), it does not apply to satisfy the requirement of section 332(b)(2) or (3) that the distribution be in complete cancellation or redemption of the liquidating corporation's stock. Since *S-2* actually owned no stock in *S-1*, none of the property received by *S-2* from *S-1* was received in such a distribution. However, the transaction described in Rev. Rul. 74-598 still may qualify as a reorganization under section 368(a)(1)(D). *See* Rev. Rul. 75-383.

In the present situation, *X*, a member of the *P* group, transferred property to *Y*, the "issuing corporation," solely in exchange for a security of *Y*. Thus, the requirements of section 351(a) of the Code, other than the control requirement, are satisfied by the exchange. Under section 1.1502-34 of the regulations, even though *X* has no actual stock ownership in *Y*, *X* is considered, for purposes of section 351(a), the owner of the *Y* shares owned by *P*. Because *P* owns 100 percent of the stock of *Y*, *X* is in control of *Y* immediately after the exchange. Therefore, section 351(a) applies to the exchange, and *X* recognizes no gain or loss on the exchange. *See* Rev. Rul. 73-473, 1973-2 C.B. 115. *Cf.* Rev. Rul. 73-472, 1973-2 C.B. 114. If *X* were not a member of an affiliated group filing a consolidated income tax return, section 351(a) would not prevent recognition of gain or loss on the transfer of property from *X* to *Y* because *X* did not own at least 80 percent of the *Y* stock and thus would not be in control of *Y* immediately after the transaction.

HOLDING

If a member of an affiliated group that files a consolidated income tax return owns stock of another corporation, the aggregate stock ownership rules of section 1.1502-34 of the regulations attribute that stock to other members of the group, regardless of whether the other members actually own any stock in the corporation.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 74-598 is modified to hold that the attribution rules of section 1.1502-34 of the regulations apply for the purpose of determining whether a member satisfies the 80-percent ownership requirement of section 332(b)(1) of the Code, regardless of whether the member actually owns stock in the "issuing corporation." Section 1.1502-34 does not apply, however, for purposes of determining whether the other requirements of section 332 are met.

PROSPECTIVE APPLICATION

Any taxpayer that (1) desires to treat a transaction in accordance with the position in Rev. Rul. 74-598 that section 1.1502-34 of the regulations does not apply absent actual ownership of stock in a corporation and (2) entered into such transaction prior to April 3, 1989, the date of publication of this revenue ruling in the Internal Revenue Bulletin, or pursuant to a binding contract that was in effect on such date and at all times thereafter until the consummation of such transaction, may request retroactive relief from the holding of this ruling pursuant to section 7805(b) of the Code.

---

26 CFR 1.1502-75: Filing of consolidated returns. (Also Section 381; 1.381(c)(1)-1.)

Consolidated returns; carryback of consolidated net operating losses following the consolidation of two unrelated common parent corporations. Pursuant to the reverse acquisition rules of section 1.1502-75(d)(3) of the regulations, the portion of a consolidated net operating loss attributable to a newly formed common parent, following the consolidation of two unrelated common parents under section 368(a)(1)(A) of the Code, may be carried back to prior years of the affiliated group which is treated as continuing in existence. No portion of the consolidated net operating loss attributable to the newly formed common parent may be carried back to the prior years of the affiliated group which is treated as terminating.

Rev. Rul. 89-80

ISSUE

After a consolidation described in section 368(a)(1)(A) of the Internal Revenue Code, to what extent may the transferor corporations carry back consolidated net operating losses that are attributable to the newly formed common parent corporation?

FACTS

X and *Y* were the common parent corporations of separate affiliated groups, each of which filed consolidated federal income tax returns. Pursuant to a plan of consolidation, *X* and *Y* consolidated into *P*, a newly formed corporation, in a transaction qualifying as a reorganization within the meaning of section 368(a)(1)(A) of the Code. The shareholders of *X* and *Y* each exchanged their stock for stock of *P*. Upon consummation of the consolidation, *X* and *Y* ceased to exist. The subsidiary members of the former *X* and *Y* groups became subsidiary members of the *P* affiliated group. After the consolidation, the former *X* shareholders, as a result of having owned stock in *X*, owned more than 50 percent of the fair market value of the outstanding stock of *P*.

P filed a consolidated federal income tax return on a calendar year basis with the members of the *P* affiliated group. The *P* affiliated group incurred a net operating loss for the first tax year after the consolidation.

LAW AND ANALYSIS

Section 381(a)(2) of the Code provides, in part, that, in a transfer of assets to which section 361 applies and which is in connection with a reorganization described in section 368(a)(1)(A), the acquiring corporation succeeds to and takes into account the items of the transferor corporation described in section 381(c). Section 361 provides for the nonrecognition of gain or loss in a statutory merger or consolidation described in section 368(a)(1)(A).

Section 381(b)(1) of the Code provides that the tax year of the distributor or transferor corporation ends on the date of distribution or transfer. Section 381(b)(3) provides that the corporation (acquiring corporation) acquiring property in a distribution or transfer described in section 381(a) is not entitled to carry back a net operating loss or a net capital loss, for a tax year ending after the date of distribution or transfer, to a tax year of the corporation (transferor corporation) distributing property.

Section 1.1502-75(d)(1) of the Income Tax Regulations provides that as a general rule an affiliated group of corporations is considered as remaining in existence if the common parent corporation remains as the common parent and at least one subsidiary remains affiliated with it.

Section 1.1502-75(d)(3)(i) of the regulations describes a class of transactions (reverse acquisitions) and provides for them an exception to the general rule of section 1.1502-75(d)(1). Specifically, this exception provides that if a corporation (the first corporation) or any member of the group of which the first corporation is the common parent, acquires:

(a) stock of another corporation (the second corporation), and as a result the second corporation becomes (or would become but for the application of section 1.1502-75(d)(3)(i)) a member of a group of which the first corporation is the common parent, or

(b) substantially all of the assets of the second corporation, in exchange (in whole or in part) for the stock of the first corporation, and the stockholders (immediately before the acquisition) of the second corporation, as a result of owning stock in the second corporation, own (immediately after the acquisition) more than 50 percent of the fair market value of the outstanding stock of the first corporation, then any group of which the first corporation was the common parent immediately before the acquisition ceases to exist as of the date of acquisition, and any group of which the second corporation was the common parent immediately before the acquisition is treated as remaining in existence with the first corporation becoming the common parent of the group.

Section 1.1502-75(d)(3)(v)(*b*)(1) of the regulation provides, in general, that if, in an acquisition described in section 1.1502-75(d)(3)(i), the first corporation files a consolidated federal income tax return for the first tax year ending after the date of acquisition, and if the acquisition is described in section 381(a)(2) of the Code, then, for purposes of section 381, all tax years ending on or before the date of acquisition, of the first corporation and of each corporation that immediately before the acquisition is a member of the group of which the first corporation is the common parent, are treated as tax years of the "transferor corporation" that is referred to in section 381(a). The second corporation does not close its tax year merely because of the acquisition. Tax years ending on or before the date of acquisition, of the second corporation and of each corporation that immediately before the acquisition is a member of any group of which the second corporation is the common parent, are treated as tax years of the "acquiring corporation" that is referred to in section 381(a). *See* section 1.1502-75(d)(3)(v)-(*b*)(2).

Section 1.1502-79(a)(1)(i) of the regulations provides, in general, that if a consolidated net operating loss can be carried under the principles of section 172(b) of the Code and section 1.1502-21(b) of the regulations to a separate return year of a corporation that was a member in the year in which such loss arose, then the portion of such consolidated net operating loss attributable to such corporation is apportioned to such corporation and is a net operating loss carryover or carryback to such separate return year; accordingly, such portion is not included in the consolidated net operating loss carryovers or carrybacks to the equivalent consolidated return year.

Section 1.1502-1(e) of the regulations provides that the term "separate return year" means a tax year of a corporation for which it files a separate return or for which it joins in the filing of a consolidated return by another group.

In the present situation, the consolidation of *X* and *Y* into *P* and the issuance of more than 50 percent of the stock of *P* to the shareholders of *X* constitutes a "reverse acquisition" as described in section 1.1502-75(d)(3)(i) of the regulations. For purposes of section 1.1502-75(d)(3)(i), *P* qualifies as the "first corporation" since *P* acquired substantially all of the assets of the transferor corporations in exchange for *P* stock. The fact that *P* did not exist before the transaction does not change this result. *X* qualifies as the "second corporation" because *X* shareholders (immediately before the consolidation), as a result of owning stock in *X*, own (immediately after the consolidation) more than 50 percent of the fair market value of the outstanding stock of *P*. Accordingly, the *X* group remains in existence (with *P* becoming its common parent). Section 1.1502-75(d)(3)(i). As a result, the *X* group does not close its tax year. Section 1.1502-75(d)(3)(v). Because the *X* group remains in existence, tax years of the *X* group ending on or before the consolidation are not "separate return years" unless they would have been such in the absence of the consolidation.

Section 1.1502-75(d)(3)(v)(*b*)(2) of the regulations reverses the application of section 381(b)(3) of the Code such that tax years of *X* (the second corporation) ending on or before the consolidation, and of each corporation that immediately before the consolidation is a member of any group of which *X* is the common parent, are treated as tax years of the acquiring corporation. Therefore, *X* is not treated as a transferor corporation, and, under section 172(b) of the Code and section 1.1502-21(b) of the regulations, consolidated net operating losses of the *P* group that are attributable to *P* may be carried back to tax years of *X* and the former *X* group ending on or before the date of the consolidation. Furthermore, consolidated net operating losses of the *P* group that are attributable to the subsidiary members of the former *X* group (which continues as the *P* group) may be carried back to prior tax years of the former *X* group ending on or before the consolidation to the extent permitted under section 172(b) and section 1.1502-21(b).

Y is treated as a transferor corporation for purposes of section 381(b) of the Code because its shareholders did not acquire more than 50 percent of the fair market value of the stock of *P*; therefore, the *Y* group ceases to exist and its tax year ends on the date of the consolidation. Thus, tax years of *Y* and the former *Y* group ending on or before the effective date of the consolidation are treated as separate return years. Consolidated net operating losses of the *P* group that are attributable to *P* may not be carried back to prior tax years of *Y* and the former *Y* group.

Section 381(b)(3).

Consolidated net operating losses of the *P* group that are attributable to the subsidiary members of the former *Y* group, to the extent permitted by section 172(b) of the Code and section 1.1502-21(b) of the regulations, may be carried back to the separate return years of the subsidiary members of the former *Y* group ending on or before the consolidation. Section 1.1502-79(a)(1).

HOLDING

The portion of consolidated net operating losses attributable to *P*, the newly formed entity, may be carried back to the prior tax years of *X* and the *X* group. None of the consolidated net operating losses attributable to *P* may be carried back to prior tax years of *Y* and the former *Y* group.

Chapter 11.—Estate Tax
Subchapter A.—Estates of Citizens or Residents
Part III.—Gross Estate

Section 2032A.—Valuation of Certain Farm, etc., Real Property

Will the sale of qualified property valued under section 2032A of the Code to a person, not a qualified heir, to allay impending foreclosure on the remaining encumbered qualified property, constitute a disposition within the meaning of section 2032A, triggering the imposition of the recapture tax under section 2032A(c)? See Rev. Rul. 89-4, page 298.

---

26 CFR 20.2032A-4: Method of valuing farm real property.

Valuation; special use; method of valuation. An executor electing to value farm property under section 2032A(e)(8) of the Code must apply all of the factors stated in section 2032A(e)(8) that are relevant in that particular valuation.

Rev. Rul. 89-30

ISSUE

In specially valuing farm property under section 2032A of the Internal Revenue Code, may an executor select one of the five valuation factors provided in section 2032A(e)(8) as the exclusive basis for the farm valuation?

FACTS

D died in 1987 owning a farm. On the federal estate tax return filed for D's estate, the executor elected to value the farm as qualified real property under section 2032A of the Code. In addition, the executor elected under section 2032A(e)-(7)(C) to value the farm, for farming purposes, using the method provided in section 2032A(e)(8), rather than using the method provided in section 2032A-(e)(7)(A). The executor stated a farm use value that was based exclusively on the assessed land value factor, one of the five valuation factors provided in section 2032A(e)(8).

Upon the Service's examination of the federal estate tax return, the executor contended that section 2032A(e)(8) provides an election with respect to the prescribed valuation factors to be used in valuing farm property. Further, having selected the assessed land value as the sole valuation factor for D's farm, the executor contended that none of the other section 2032A(e)(8) factors was applicable.

LAW AND ANALYSIS

Section 2032A of the Code provides that, if certain conditions are satisfied, real property includible in a decedent's gross estate that was used for farming purposes may be valued on the basis of its current use value rather than its fair market value.

Section 2032A(e)(7)(A) of the Code provides that, with certain exceptions, the value of a farm for farming purposes shall be determined by dividing i) the excess of the average annual gross cash rental for comparable land used for farming purposes and located in the locality of such farm over the average annual state and local real estate taxes for such comparable land, by ii) the average annual effective interest rate for all new Federal Land Bank loans.

Section 2032A(e)(7)(C) of the Code provides that the formula in section 2032A(e)(7)(A) shall not be used where the executor elects to have the value of the farm for farming purposes determined under section 2032A(e)(8).

Section 2032A(e)(8) of the Code provides that, in any case to which section 2032A(e)(7)(A) does not apply, the following factors shall apply in determining the value of any qualified real property:

(A) The capitalization of income that the property can be expected to yield for farming purposes over a reasonable period of time under prudent management using traditional cropping patterns for the area, taking into account soil capacity, terrain configuration, and similar factors,
(B) The capitalization of the fair rental value of the land for farmland purposes,
(C) Assessed land values in a state that provides a differential or use value assessment law for farmland,
(D) Comparable sales of other farmland in the same geographical area far enough removed from a metropolitan or resort area so that nonagricultural use is not a significant factor in the sales price, and
(E) Any other factor that fairly values the farm value of the property.

In addition to the initial election to value farm property, based on its use for farming purposes, as qualified real property under section 2032A(a) of the Code, section 2032A provides another election under which the executor may choose to value the farm property in accordance with either the method provided for in section 2032A(e)(7)(A) or the method provided in section 2032A(e)(8). Rev. Rul. 83-115, 1983-2 C.B. 155. The section 2032A(e)(7)(A) method of valuation is based, in part, on information on rental of comparable property and the application of a formula. Rev. Rul. 83-115 at 156.

The section 2032A(e)(8) method is based on the application of five valuation factors. That section expressly states that such "factors" shall apply and uses the conjunction "and" to interconnect such factors. This statutory language is further explained by the accompanying legislative history which provides that all the relevant factors prescribed in section 2032A(e)(8) are taken into account when the multiple factor method of valuation in section 2032A(e)(8) is elected. *See* S. Rep. No. 938 (Part 2), 94th Cong., 2d Sess. 15 (1976), 1976-3 (Vol. 3) C.B. 643, 657; H.R. Rep. No. 1380, 94th Cong. 2d Sess. 24, 1976-3 (Vol. 3) C.B. 758. However, in each case, only those factors that are relevant are applied in the respective valuation and, depending upon the circumstances, certain factors may carry more weight than others. See Rev. Rul. 59-60 (Sec. 5), 1959-1 C.B. 237. Consequently, section 2032A(e)(8) does not allow an executor to elect one valuation factor to the exclusion of the other valuation factors provided.

In this case, because the executor elected to value D's farm using the method provided for in section 2032A(e)(8), the farm was to be valued based upon the multiple factors therein. Therefore, notwithstanding the executor's selection of the assessed land value as the exclusive basis for the farm value stated on the federal estate tax return, the other valuation factors provided for in section 2032A(e)(8) are applicable to determine the value of the farm used for farming purposes.

HOLDING

In specially valuing farm property under section 2032A of the Code, an executor may not select one of the five valuation factors provided in section 2032A(e)(8) as the exclusive basis for the farm valuation.

---

26 CFR 20.2032A-4: Method of valuing farm real property.

Special use value; farms: interest rates. The 1989 interest rates to be used in computing the special use value of farm real property for which an election is made under section 2032A of the Code are listed for estates of decedents.

Rev. Rul. 89-58

This revenue ruling contains a list of the average annual effective interest rates on new Farm Credit Bank loans. Prior to 1988, the Farm Credit Banks were known as Federal Land Banks. As a result of the Agriculture Credit Act of 1987, Pub. L. No. 100-233, each Federal Land Bank merged into a newly created Farm Credit Bank.

Under section 2032A(e)(7)(A)(ii) of the Internal Revenue Code, rates on new Farm Credit Bank loans are used in computing the special use value of real property used as a farm for which an election is made under section 2032A. This revenue ruling also contains a list of the states within each Farm Credit Bank District. The rates in this revenue ruling may be used by estates that value farmland under section 2032A as of a date in 1989.

Average annual effective interest rates, calculated in accordance with section 2032A(e)(7)(A) of the Code and section 20.2032A-4(e) of the Estate Tax Regulations, to be used under section 2032A(e)(7)(A)(ii), are set forth in the accompanying Table of Interest Rates. The states within each Farm Credit Bank District are set forth in the accompanying Table of Farm Credit Bank Districts.

Rev. Rul. 81-170, 1981-1 C.B. 454, contains an illustrative computation of an average annual effective interest rate. The rates applicable for valuation in 1988 are in Rev. Rul. 88-59, 1988-2 C.B. 332. For rate information for years prior to 1988, see the citations in Rev. Rul. 88-59.

26 CFR 20.2032A-8: Election and agreement to have certain property valued under section 2032A for estate tax purposes.

Valuation; special use; disposition by qualified heir. A qualified heir's disposition of specially valued property to a transferee who is not a member of the qualified heir's family results in the imposition of the additional estate tax under section 2032A(c)(1) of the Code even though the transferee is a member of the decedent's family.

Rev. Rul. 89-22

ISSUE

If a qualified heir, as defined in section 2032A(e)(1) of the Internal Revenue Code, disposes of specially valued property to a transferee who is a member of the decedent's family, but who is not a member of the qualified heir's family, does the exception to the additional estate tax imposed by section 2032A(c)(1), on the early disposition of specially valued property, apply?

FACTS

The decedent, who died in 1984, devised farmland to A, a child of the decedent's older sibling. The property was qualified real property for purposes of section 2032A(b) of the Code. On the federal estate tax return filed for the decedent's estate, the executor elected under section 2032A to value the farmland at its qualified use value. The election, in all material respects, complied with the provisions of section 2032A and section 20.2032A-8 of the Estate Tax Regulations. In the agreement attached to the return, A consented to personal liability for any additional estate tax imposed in the event of an early disposition of the farmland. In 1987, A sold the farmland to B, a child of another sibling of the decedent.

LAW AND ANALYSIS

Section 2032A(a) of the Code provides that, if the executor elects the application of section 2032A and files the agreement referred to in section 2032A(d)(2), the value of qualified real property shall be its qualified use value rather than its fair market value.

Section 2032A(c)(1) of the Code provides, for estates of decedents dying after December 31, 1981, that if, within 10 years after the decedent's death and before the death of the qualified heir, the qualified heir disposes of any interest in qualified real property, other than by a disposition to a "member of his family," there is imposed an additional estate tax.

Section 2032A(e)(1) of the Code provides, for estates of decedents dying after December 31, 1981, that the term "qualified heir" means, with respect to any property, a member of the decedent's family who acquired such property (or to whom such property passed) from the decedent. If a qualified heir disposes of any interest in qualified real property to any "member of his family," such member shall thereafter be treated as the qualified heir with respect to such interest.

Section 2032A(e)(2) of the Code provides that the term "member of the family" means, with respect to any individual, only (A) an ancestor of such individual, (B) the spouse of such individual, (C) a lineal descendant of such individual, of such individual's spouse, or of a parent of such individual, or (D) the spouse of any lineal descendant described in (C).

Under section 2032A(c)(1) of the Code, a qualified heir's transfer of specially valued farm property during the ten year period after the decedent's death generally results in the imposition of an additional estate tax. Section 2032A(c)(1)(A) provides an exception from the additional tax for a transfer by a qualified heir to a "member of his family."

In this case, B is a member of the decedent's family under section 2032A(e)(2)(C), as a lineal descendant of the decedent's parent. However, the phrase "member of his family" in section 2032A(c)(1)(A) refers to the qualified heir's family, not the decedent's family. Thus, property can only be disposed of during the recapture period without imposition of a recapture tax if the transfer is to a member of the qualified heir's family. *See* S. Rep. No. 176 (Conf. Rep.), 97th Cong., 1st Sess. 253 (1981). Notwithstanding B's relationship to A (as a cousin), B is not a member of A's family under the definition provided in section 2032A(e)(2). Therefore, the sale of the farmland by A to B is subject to the additional estate tax imposed by section 2032A(c)(1).

HOLDING

If a qualified heir disposes of specially valued property to a transferee who is a member of the decedent's family, but who is not a member of the qualified heir's family, the exception to the additional estate tax imposed by section 2032A(c)(1), on the early disposition of specially valued property, does not apply.

Section 2055.—Transfers for Public, Charitable and Religious Uses

26 CFR 20.2055-2 Transfers not exclusively for charitable purposes.

Charitable deduction; interest passing directly to charity; settlement agreement. An estate is entitled to a charitable deduction under section 2055(a) of the Code for a remainder interest in a split interest trust passing directly to a named charity pursuant to a settlement of a will contest, where the split interest trust did not meet the requirements of section 2055(e)(2). Rev. Rul. 77-491 revoked and Rev. Rul. 78-152 modified.

Rev. Rul. 89-31

ISSUE

If, in settlement of a bona fide will contest, a decedent's estate makes an immediate payment to a qualifying charity in satisfaction of the charity's claim to a split interest remainder that would not be deductible under section 2055(e)(2)(A) of the Code, is the estate entitled to a charitable deduction under section 2055?

FACTS

The decedent died testate in 1987. Under the will, which was executed in 1986, the decedent bequeathed the residue of the estate to a trust under which the trust income was payable to *A* for life with the remainder payable to *B* charity, an organization described in sections 170(c) and 2055(a) of the Code. *A* was the decedent's child.

The bequest to *B* did not comply with the requirements of section 2055(e)(2)(A) of the Code. That section allows a deduction for a bequest of a remainder interest to a charity only if the remainder interest is in a trust that is a charitable remainder annuity trust or a charitable remainder unitrust (described in section 664) or a pooled income Fund (described in section 642(c)(5)).

A in good faith contested the validity of the will. As the result of a bona fide settlement of *A*'s challenge, the estate made an immediate payment of 100x dollars to *A* and distributed the balance of the residuary estate to *B*.

LAW AND ANALYSIS

Section 2055(a) of the Code allows a deduction from the gross estate for the amount of all bequests, legacies, devises, or transfers to specified beneficiaries, including certain charitable institutions.

Prior to the Tax Reform Act of 1969, a deduction generally was allowable for a charitable remainder if the value of the remainder interest was ascertainable and the possibility that the charitable transfer would not become effective was so remote as to be negligible. *See* section 20.2055-2(a) and (b) of the Estate Tax Regulations. Congress perceived that there was often no correlation between the allowable estate tax deduction and the amount ultimately received by the charity because the trustee might favor the income beneficiary over the charitable remainderman by methods such as the exercise of a power of invasion or by manipulating the trust's investments to maximize the income interest. Congress concluded that to correct these abusive situations the annual payment to the income beneficiary must be stated in terms of either a fixed dollar amount or as a fixed percentage of the value of the trust property each year. Section 2055(e)(2)(A) of the Code was enacted by the 1969 Act to achieve this result. *See* H.R. Rep. No. 413 (Part I), 91st Cong., 1st Sess. (1969), 1969-3 C.B. 200, 237, and *Estate of Gillespie v. Commissioner,* 75 T.C. 374, 376-78 (1980). As amended, section 2055(e)(2)(A) provides, in part, that where a remainder interest in property passes or has passed from the decedent for a charitable purpose, and an interest in the same property passes or has passed from the decedent for a noncharitable use, no deduction is allowed under section 2055(a) unless the charitable remainder interest is in a trust that is a charitable remainder annuity trust or a charitable remainder unitrust (described in section 664) or a pooled income fund (described in section 642(c)(5)).

Section 2055(e)(3) was added to the Code in 1974 and amended several times thereafter to establish relief procedures that allow governing instruments to be amended or reformed to comply with the requirements of section 2055(e)(2).

Rev. Rul. 77-491, 1977-2 C.B. 332, deals with a situation in which the decedent had executed two wills. Under each will a charity was to receive a remainder interest that would not have been deductible because the interest did not comply with the requirements of section 2055(e)(2)(A). As the result of the settlement of a will contest, the later will was probated, and the charitable remainderman received an accelerated outright payment in lieu of the remainder interest. The ruling concludes that a charitable deduction was not allowable under section 2055(a) of the

Code because the accelerated payment to the charity pursuant to the settlement was in effect a post mortem modification of the will that did not satisfy the requirement of section 2055(e)(3) of the Code that the charitable interest created be placed in a charitable remainder annuity trust, a charitable remainder unitrust, or a pooled income fund.

Rev. Rul. 78-152, 1978-1 C.B. 296, discusses an additional reason for denying the deduction at issue in Rev. Rul. 77-491. Under *Lyeth v. Hoey,* 305 U.S. 188 (1938), a settlement payment is traceable to the rights that are the source of the compromise, and hence the interest passing to charity pursuant to a compromise of a will contest is deductible to no greater extent than the interest that would have passed had the contest proceeded to judgment and the charity prevailed in its maintenance or defense of the action. Therefore, a charitable deduction was not allowable with respect to the payment to the charity in Rev. Rul. 77-491 since it was in settlement of rights under one or the other of the two wills, and neither will provided for a charitable interest that was deductible under section 2055(e)(2)(a) of the Code.

The Service has reconsidered the position taken in Rev. Rul. 77-491 and the portion of Rev. Rul. 78-152 in support thereof and has concluded that it will no longer adhere to that position in view of adverse decisions in *Flanagan v. U.S.*, 810 F.2d 930 (10th Cir. 1987); *Estate of Strock v. U.S.*, 655 F. Supp. 1334 (W.D Pa. 1987); *Northern Trust Co. v. U.S.*, 78-1 USTC para. 13,229, 41 AFTR2d 78-1523 (N.D. Ill. 1977). In each of these cases a charity received an outright accelerated payment in lieu of a nondeductible remainder interest as the result of the settlement of a bona fide will contest. In each case it was held that a deduction was allowable under section 2055(a) of the Code, and that section 2055(e)(2)(A) of the Code did not apply because the settlement did not create split interests. In other words, section 2055(e)(2)(A) did not operate to disallow the deductions because the interests passing to the charitable and non-charitable beneficiaries were not interests in the same property. Once it has been determined that section 2055(e)(2) of the Code does not apply to a given case, it follows that section 2055(e)(3) of the Code is also inapplicable because the only purpose of the latter section is to allow remedial action to be taken when a deduction would otherwise be disallowed by reason of the former section.

In situations involving settlements of bona fide will contests the Service will no longer challenge the deductibility of immediate payments to charities solely on the ground that they were made in lieu of a split interest that would not constitute an allowable deduction under section 2055(e)(2) of the Code. However, settlements of will contests will continue to be scrutinized in order to assure that the settlement in question is not an attempt to circumvent section 2055(e)(2) by instituting and settling a collusive contest.

HOLDING

If, in settlement of a bona fide will contest, a decedent's estate makes an immediate payment to a qualifying charity in satisfaction of the charity's claim to a split interest remainder that would not be deductible under section 2055(e)(2)(A) of the Code, the estate is entitled to a charitable deduction under section 2055.

EFFECT ON OTHER REVENUE RULINGS

Rev. Rul. 77-491 is revoked.

Rev. Rul. 78-152 is modified.

Chapter 12.—Gift Tax
Subchapter A.—Determination of Tax Liability

Section 2501.—Imposition of Tax

26 CFR 25.2501-1: Imposition of tax.

If a recapitalization that qualifies under section 368(a)(1)(E) increases the value of the stock held by a trust and reduces the value of the stock held by the controlling shareholder, who is the original grantor of the trust, has a gift been made to the trust beneficiaries for federal gift tax purposes, and has an addition to corpus been made for purposes of the generation-skipping transfer tax? See Rev. Rul. 89-3, this page.

Subchapter C.—Deductions

Section 2522.—Charitable and Similar Gifts

26 CFR 25.2522(c)-3: Transfers not exclusively for charitable, etc. purposes in the case of gifts made after July 31, 1969.

The Service ordinarily will not issue rulings as to whether a transfer to an inter vivos charitable remainder trust described in section 664 of the Code that provides for annuity or unitrust payments for one measuring life qualifies for a charitable deduction under section 2522(c)(2)(A) of the Code. See Rev. Proc. 89-19, page 841.

26 CFR 25.2522(c)-3: Transfers not exclusively for charitable, etc. purposes in the case of gifts made after July 31, 1969.

Contributions to a qualifying inter vivos charitable remainder unitrust providing for unitrust payments during one life are deductible for gift tax purposes, assuming that all other applicable requirements for a charitable contribution are met. See Rev. Proc. 89-20, page 841.

26 CFR 25.2522(c)-3: Transfers not exclusively for charitable, etc. purposes in the case of gifts made after July 31, 1969.

Contributions to a qualifying inter vivos charitable remainder annuity trust providing for annuity payments during one life are deductible for gift tax purposes, assuming that all other applicable requirements for a charitable contribution are met. See Rev. Proc. 89-21, page 842.

Chapter 13.—Tax on Certain Generation-Skipping Transfers
Subchapter A.—Tax Imposed

Section 2601.—Tax Imposed

26 CFR 26.2601-1: Effective dates.

If a recapitalization that qualifies under section 368(a)(1)(E) increases the value of the stock held by a trust and reduces the value of the stock held by the controlling shareholder, who is the original grantor of the trust, has a gift been made to the trust beneficiaries for federal gift tax purposes, and has an addition to corpus been made for purposes of the generation-skipping transfer tax? See Rev. Rul. 89-3, this page.

Subchapter B.—Generation-Skipping Transfers

Section 2612.—Taxable Termination; Taxable Distribution; Direct Skip

(Also Sections 354, 368, 2501, 2601; 1.354-1, 1.368-2, 25.2501-1, 26.2601-1.)

Termination; transfer; recapitalization. A donor has made a transfer subject to gift tax and an addition to trust corpus for generation-skipping transfer tax purposes, where, pursuant to a plan of recapitalization, the donor exchanges voting common stock for stock with voting rights that terminate at the donor's death, and the balance of the outstanding stock is held by a generation-skipping trust.

Rev. Rul. 89-3

ISSUE

If a recapitalization that qualifies under section 368(a)(1)(E) of the Internal Revenue Code increases the value of the stock held by a trust and reduces the value of the stock held by a controlling shareholder, who is the original grantor of the trust, has a gift been made to the trust beneficiaries for federal gift tax purposes and has an addition to the corpus of the trust been made for purposes of the federal generation-skipping transfer tax?

FACTS

G created an irrevocable generation-skipping trust in 1982 and funded the trust by transferring to it 100 voting common shares of X Corporation stock. G retained the balance of X Corporation stock, which consisted of 800 voting common shares. At the time of the 1982 funding, the 100 shares transferred to the trust had a value of 500x dollars. The trust instrument provides that income is payable to G's child, C, for life and that only upon C's death is the trust corpus distributable to G's grandchild, D.

In November, 1987, pursuant to a plan of recapitalization, X Corporation issued 800 shares of a new class of B voting common stock to G in exchange for G's 800 shares of regular voting common stock. The Class B common stock had all of the same rights as the stock previously held by G except that, upon the death of G, the voting rights of the Class B common stock would be extinguished. The 100 shares of common stock held by the trust were exchanged for 100 shares of new Class A regular voting common stock. None of the rights of the stock held by the trust was altered. Immediately prior to the recapitalization, the 100 common shares held by the trust had a value of 900x dollars. The recapitalization of X Corporation diminished the value of the stock held by G and increased the value of the stock held by the trust by 100x dollars. Thus, after the recapitalization the stock held by the trust had a value of 1000x dollars. The recapitalization of X Corporation is described in section 368(a)(1)(E) of the Code, and the exchange of common stock for common stock resulted in no recognition of gain or loss to G or to the trust under section 354(a).

LAW AND ANALYSIS

Section 2501(a)(1) of the Code imposes a tax for each calendar year on the transfer of property by gift. Section 2511 applies the gift tax to transfers that are in trust or otherwise, whether the gift is direct or indirect, and whether the property is real or personal, tangible or intangible. All transactions whereby property or property rights or interests are gratuitously passed or conferred upon another, regardless of the means or device employed, constitute gifts subject to tax. Section 25.2511-1(c) of the Gift Tax Regulations. However, the gift tax generally is not applicable to transfers for full and adequate consideration in money or money's worth or to transactions at arm's length in the ordinary course of business.

Rev. Rul. 86-39, 1986-1 C.B. 300, described the tax consequences of an acquiescence by a beneficiary of a trust in the recapitalization of a closely-held corporation. The trust owned stock of the corporation and the beneficiary possessed a general power of appointment over the assets of the trust. Because the recapitalization shifted value from stock held by the trust to stock held by another shareholder, the ruling held that the shift resulted in a transfer for federal gift tax purposes.

Section 2601 of the Code imposes a tax on generation-skipping transfers. Section 2611(a) defines a "generation-skipping transfer" to mean a taxable termination, a taxable distribution, or a direct skip.

Section 2612(a) of the Code defines a "taxable termination" to mean the termination (by death, lapse of time, release of a power, or otherwise) of an interest in property held in a trust unless (a) immediately after such termination, someone other than a skip person has an interest in such property, or (b) at no time after such termination may a distribution (including a distribution on termination) be made from such trust to a skip person. A "skip person" is defined by section 2613 to include a person assigned to a generation that is two or more generations below the generation assignment of the transferor, as well as a trust if all interests in such trust are held by skip persons.

Section 2612(b) of the Code provides that a taxable distribution is defined as any distribution from a trust to a skip person except for a taxable termination or a direct skip.

Section 2612(c) of the Code provides that a direct skip is defined as a transfer of an interest in property to a skip person that is subject to either the gift or estate tax.

Under the definition in section 2652(c)(1) of the Code, an individual has an interest in property held in trust if the individual has a right (other than a future right) to receive income or corpus from the trust or is a permissible current recipient of income or corpus from the trust.

Section 1433(b)(2)(A) of the Tax Reform Act of 1986 provides that the amendments made to the generation-skipping transfer tax by the Act do not apply to any transfers from a trust that was irrevocable on September 25, 1985, but only to the extent that such transfers are not made out of corpus added to the trust after September 25, 1985. If an addition to the corpus of an irrevocable trust is made after September 25, 1985, a proportionate amount of any future distribution from, or termination of, interests in property held in the trust is subject to the generation-skipping transfer tax when the distribution or termination occurs.

Under the effective date rules for the generation-skipping transfer tax, generation-skipping transfers from G's trust, which was irrevocable in 1982, are exempt from the tax on generation-skipping transfers to the extent such transfers are not attributable to additions to the trust corpus after September 25, 1985. In general, ordinary appreciation in the value of the corpus of a trust and undistributed income added thereto will not be considered to be an addition to the corpus of a trust.

In this case the recapitalization of X Corporation caused an increase of 100x dollars in the value of the stock held by the trust for the benefit of C and D. Thus, G made an aggregate gift in the amount of 100x dollars to C and D. *See* Rev. Rul. 86-39, cited above, at 301.

Additionally, because G made a gift to the beneficiaries of a generation-skipping trust, the increase in value of 100x dollars constitutes an addition to the corpus of an irrevocable trust for purposes of applying the tax on generation-skipping transfers. The increase in value is treated as a transfer in trust (and is not an increase caused by ordinary appreciation). This transfer generates no generation-skipping transfer tax liability when made because C, who is not a skip person, has an interest in the trust, and D, who is a skip person, does not have an interest in property in the trust within the meaning of section 2652(c)(1) of the Code.

Accordingly, when the trust terminates upon the death of C, that portion of the trust corpus distributable to D, a skip person, that is allocable to the addition to the corpus of the trust will be subject to the tax on generation-skipping transfers. See section 26.2601-1(b)(1)(iv) of the Temporary Generation-skipping Transfer Tax Regulations for the rules describing the taxation of additions to irrevocable trusts.

HOLDING

The recapitalization of X Corporation results, for federal gift tax purposes, in a taxable gift by G to the beneficiaries of the trust and constitutes an addition to the corpus of an irrevocable trust for purposes of the generation-skipping transfer tax because the recapitalization reduces the value of the stock held by G and increases the value of the stock held by the trust. This ruling does not address any issues regarding the application of section 2036(c) of the Code to property transfers occuring after December 17, 1987. No inference is intended by this ruling as to the application of section 2036(c) to recapitalizations occuring after December 17, 1987.

Subtitle C.—Employment Taxes
Chapter 21.—Federal Insurance Contribution Act
Subchapter A.—Tax on Employees

Section 3101.—Rate of Tax

26 CFR 31.3101-2: Rate and computation of employee tax.

Whether back wages paid to an employee by the employee's employer pursuant to the settlement of a discrimination suit are subject to the taxes imposed by section 3101 of the Code for the year in which the award was received or for the years to which the back wages related? See Rev. Rul. 89-35, below.

Section 3102.—Deduction of Tax from Wages

26 CFR 31.3102-1: Collection of, and liability for, employee tax; in general.
(Also Sections 3101, 3111, 3121; 31.3101-2, 31.3111-2, 31.3121(a)-2.)

Payment of social security taxes for back wages. The Service will not follow *Bowman v. United States*, 824 F. 2d 528 (6th Cir. 1987), which held that back wages paid to the taxpayer were subject to social security taxes for the years to which the back wages related and not for the year in which the back wages were received.

Rev. Rul. 89-35

In *Bowman v. United States*, 824 F.2d 528 (6th Cir. 1987), the court considered whether back wages paid to the taxpayer by his employer pursuant to the settlement of a discrimination suit were subject to the taxes imposed by section 3101 of the Internal Revenue Code (Federal Insurance Contributions Act (FICA) or social security taxes) for the year in which the award was received or for the years to which the back wages related. The court held that the back wages paid to the taxpayer were subject to social security taxes for the years to which the back wages related and not for the year in which the award was received.

Section 3101 of the Code imposes social security taxes on an individual on wages received with respect to employment. Section 3101(a) and (b) provides that the rate of tax depends on the calendar year in which the wages are received by the individual. Section 3111 imposes social security taxes on an employer on wages paid with respect to employment. Section 3111(a) and (b) provides that the rate of tax depends on the calendar year in which the wages are paid by the employer.

Section 3102 of the Code requires the employer to deduct the tax imposed by section 3101 from the employee's wages as and when paid.

Section 31.3101-2(c) of the Employment Tax Regulations provides that the employee tax is computed by applying to the wages received by the employee the rate in effect at the time such wages are received. See the example set forth in section 31.3101-2(c) of the regulations. See also Rev. Rul. 55-203, 1955-1 C.B. 114, which holds that liability for social security taxes is computed on an "as paid" basis when the taxpayer receives unpaid minimum wages or unpaid overtime compensation pursuant to the Fair Labor Standards Act; and Rev. Rul. 78-336, 1978-2 C.B. 255, which holds that a back pay award ordered by a court is wages in the year paid, not in the year or years earned, and is subject to a federal income tax withholding at the rates in effect at the time the award is paid.

Based upon the Code provisions, regulations and revenue rulings discussed above, the Service will not follow the decision in *Bowman*. The employee portion of the taxes under section 3101 of the Code should be computed by applying the tax rate in effect at the time the back wages are received by the employee. The employer portion of the tax under section 3111 should be computed by applying the tax rate in effect at the time the back wages are paid.

Subchapter B.—Tax on Employers

Section 3111.—Rate of Tax

26 CFR 31.3111-2: Rates and computation of employer tax.

Whether back wages paid to an employee by the employee's employer pursuant to the settlement of a discrimination suit are subject to the taxes imposed by section 3111 of the Code for the year in which the award was received or for the years to which the back wages related? See Rev. Rul. 89-35, this page.

Subchapter C.—General Provisions

Section 3121.—Definitions

26 CFR 3121(a)-2: Wages; when paid and received.

Whether back wages paid to an employee by the employee's employer pursuant to the settlement of a discrimination suit are subject to the taxes imposed by sections 3101 and 3111 of the Code for the year in which the award was received or for the years to which the back wages related? See Rev. Rul. 89-35, this page.

Chapter 24.—Collection of Income Tax at Source on Wages
Subchapter A.—Witholding from Wages

Section 3406.—Backup Withholding

26 CFR 35a.3406-1: Imposition of backup withholding due to notification of an incorrect taxpayer identification number

T.D. 8248

DEPARTMENT OF THE TREASURY
Internal Revenue Service
26 CFR Part 35a

Imposition of Backup Withholding Due To Notification of an Incorrect Taxpayer Identification Number and the Due Diligence Exception to the Imposition of a Penalty for a Missing or an Incorrect Taxpayer Identification Number

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations that would clarify the rules concerning the requirement for payors to backup withhold due to notification of an incorrect taxpayer identification number and the actions that payors must take to exercise due diligence with respect to a missing or an incorrect taxpayer identification number. These regulations also amend those rules in order to conform them to the changes announced in Notice 88-77, 1988-2 C.B. 392, and Notice 88-89, 1988-2 C.B. 413.

Further, the regulations provide new due diligence standards for payors of certain accounts with post-1987 awaiting-TIN certifications, for payors of certain life-insurance beneficiaries, and for payors of certain payees who are exempt from the payment of the tax on self-employment income under Code section

1401 or the Federal Insurance Contributions Act tax on employers or employees under Code sections 3111 or 3101, respectively. These regulations affect payors, brokers, and payees of certain reportable payments and provide them with the guidance necessary to comply with the law.

The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in * * * [IA-104-88, page 1020, this Bulletin].

EFFECTIVE DATE: These regulations are effective for reportable payments made after December 31, 1983, and to information returns filed after December 31, 1984. However, the requirements of §35a.3406-1 are effective on and after January 1, 1989. Thus, a payor is only required to notify payees and backup withhold on payee accounts as required by these regulations if the payor receives a notice of an incorrect taxpayer identification number from the Internal Revenue Service on or after January 1, 1989.

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary regulations relating to the requirement that a payor or broker backup withhold 20 percent from any reportable payment under section 3406(a)(1)(B) of the Internal Revenue Code of 1986. This provision was added to the Code by section 104 of the Interest and Dividend Tax Compliance Act of 1983 (Pub. L. 98-67, 97 Stat. 369, 371 [1983-2 C.B. 352]). This document also contains temporary regulations relating to due diligence requirements under section 6676(b) of the Code as amended by section 105 of the Act (Pub. L. 98-67, 97 Stat. 369, 380).

On October 4, 1983, the Federal Register published Temporary Employment Tax Regulations under the Interest and Dividend Tax Compliance Act of 1983 (26 CFR Part 35a) under sections 3406 and 6676(b) of the Internal Revenue Code of 1954 (26 CFR Part 35a.9999-1; T.D. 7916, 48 FR 45362 [1983-2 CB. 272], as amended on November 25, 1983, by T.D. 7922, 48 FR 53111 [1983-2 C.B. 282], and on November 23, 1987, by T.D. 8163, 52 FR 44861 [1987-2 C.B. 226]). Additional temporary regulations were published in the Federal Register on November 25, 1983 (26 CFR Part 35a.9999-2; T.D. 7922, 48 FR 53106, as amended on December 20, 1983, by T.D. 7929, 48 FR 56342 [1984-1 C.B. 285], on March 13, 1984, by T.D. 7922, 49 FR 9417, and on November 23, 1987, by T.D. 8163, 52 FR 44861), on December 20, 1983 (26 CFR Part 35a.9999-3; T.D. 7929, 48 FR 56330, as amended on January 3, 1984, by T.D. 7933, 49 FR 63 [1984-1 C.B. 300], on August 22, 1984, by T.D. 7966, 49 FR 33236 [1984-3 C.B. 324], and on November 23, 1987, by T.D. 8163, 52 FR 44861), on February 28, 1984 (26 CFR Part 35a.9999-3A; T.D. 7946, 49 FR 7227 [1984-1 C.B. 302]), on August 22, 1984 (26 CFR Part 35a.9999-4T, T.D. 7966, 49 FR 33237 [1984-2 C.B. 324], as amended on August 29, 1984, by T.D. 7972, 49 FR 34340 [1984-2 C.B. 327]; and 26 CFR Part 35a.9999-5; T.D. 7967, 49 FR 33240 [1984-2 C.B. 329], as amended on September 19, 1984, by T.D. 7973, 49 FR 36645 [1984-2 C.B. 170], on August 20, 1985, by T.D. 8046, 50 FR 33526 [1985-2 C.B. 61], on April 3, 1986, by T.D. 8046, 51 FR 11447, on December 19, 1986, by T.D. 8110, 51 FR 45453 [1987-1 C.B. 81], and on May 19, 1988, by T.D. 8202, 53 FR 17927 [1988-1 C.B. 78]), on April 23, 1987 (26 CFR Part 35a.3406-2; T.D. 8137, 51 FR 13430 [1987-1 C.B. 302]), and on November 23, 1987 (26 CFR Part 35a.3406-1; T.D. 8163, 52 FR 44861). Those regulations were published primarily to provide guidance under the Interest and Dividend Tax Compliance Act of 1983.

This document contains temporary regulations that would clarify the rules in §35a.3406-1 and §§35a.9999-1 and 35a.9999-3 concerning the requirement to backup withhold due to an incorrect taxpayer identification number under section 3406(a)(1)(B) and the actions that payors must take to exercise due diligence under section 6676(b) as published in the Federal Register on November 23, 1987 (§§35a.9999-1 and -3; T.D. 8163, 52 FR 44861). Also, this document would amend those rules in order to conform them to the changes announced in Notice 88-77, 1988-2 C.B. 392, and Notice 88-89, 1988-2 C.B. 413. Further, this document revises Q/A-10 in §35a.9999-1 (concerning substitute Forms W-9) which was published in the Federal Register on October 4, 1983 (26 CFR Part 35a.9999-1; T.D. 7916, 48 FR 45362) and adds new questions and answers to §35a.9999-3 on actions that payors may take to exercise due diligence. The temporary regulations in this document will remain in effect until superseded by final regulations on this subject. See the Proposed Rules section of * * * [IA-104-88, page 1020, this Bulletin] under which persons may provide written comments to the Internal Revenue Service on the regulations contained in this document.

These temporary regulations are necessary to provide immediate guidance to payors, brokers, and payees when there is notification of an incorrect taxpayer identification number. The Internal Revenue Service intends to publish a notice of proposed rulemaking in the Federal Register in the near future that will provide comprehensive rules regarding backup withholding. Generally, the pertinent provisions of all the temporary regulations with respect to backup withholding will be incorporated in the notice of proposed rulemaking. The notice of proposed rulemaking will provide the public an opportunity to comment on all the regulations sections issued under 3406 and 6676(b). However, the notice and any hearing that might be scheduled will not cover any of the rules set forth in INTL-52-86. See 53 FR 5991 and 54 FR 11236 [1988-1 C.B. 892].

Explanation of Provisions

On November 23, 1987, the Service published Treasury Decision 8163, temporary regulations under sections 3406(a)(1)(B), requiring payors to backup withhold on accounts of payees when notified by the Service that such payees provided an incorrect taxpayer identification number. That Treasury decision also contains temporary regulations under section 6676(b) on the actions that payors must take to exercise due diligence and thereby avoid the $50 penalty for filing an information return of reportable interest or dividends with a missing or an incorrect taxpayer identification number. Payors expressed concern with some of these rules and in particular with their administrability. As a result of this concern the Service issued two notices in 1988 to clarify those areas where confusion existed and to ease the administrability of the rules. See Notice 88-77, 1988-2 C.B. 392, and Notice 88-89, 1988-2 C.B. 413. This document conforms the rules in the Treasury decision to those set forth in the notices. In addition this document contains other clarifying rules to the Treasury decision plus several new substantive rules for the actions that payors must take to exercise due diligence. These new clarifying and substantive rules are as follows.

Backup Withholding Due To Notification Of An Incorrect Taxpayer Identification Number

In response to comments this document makes several minor changes to the notice set forth in the Treasury decision described in §35a.3406-1(c) that payors must send to their payees informing them that their accounts contain an incorrect taxpayer identification number and the actions that payees must take to prevent backup withholding from commencing or to stop it once it has begun.

For example, upon being notified that a payee provided an incorrect taxpayer identification number which is currently used on an account, a payor is required to send a Form W-9 (or an acceptable substitute form) so that the payee can furnish a taxpayer identification number or name (or both) to the payor (or refurnish the existing taxpayer identification number or name (or both) currently on the payee's account) to prevent backup withholding from starting or stop it once it has begun. Many payors informed the Service that in order to change a taxpayer identification number or name (or both) on an account it may be necessary for the payee to execute other documents of the payor in addition to the Form W-9. In response to this comment, this document revises the notice that payors must send to their payees so that it informs the payee of other documents that the payee must send to the payor in order to change a taxpayer identification number or name (or both) on an account. This change is reflected in §35a.3406-1(c)(1), (c)(3)(iv) and (vii), and the paragraph in the notice (which is an Appendix to §35a.3406-1) entitled "Remember".

Several payors informed the Service that they had already purchased or designed a substitute notice in reliance on the Treasury decision. Thus, although the requirements of the notice are being changed by this document, the notice in the Treasury decision as described in §35a.3406-1(c)(3) and set forth in the Appendix to the Treasury decision (or an acceptable substitute thereof) will be considered an acceptable substitute notice under this document.

The Treasury decision requires a payor to send the notice described in §35a.3406-1(c)(*i.e.*, the notice concerning potential backup withholding on the payee's account and requesting a certified taxpayer identification number) to the payee within 5 business days after receiving such notice from the Service or a broker. The date a payor receives the notice is crucial because (1) payors are required to begin backup withholding, when required, after the close of the 30th business day after the date the payor receives the notice, and (2) to exercise due diligence after being notified of an incorrect taxpayer identification number, a payor is required to send the notice as prescribed in §35a.3406-1(c), *i.e.*, within 5 business days after the notice is received. In order for the Service to determine whether backup withholding was applied, when required, and whether a payor exercised due diligence, the Service will date-stamp the notices. That date will be considered the effective date of the notice, *i.e.*, the date that the payor receives the notice.

To avoid a large number of disputes arising between the Service and payors wherein payors contend that due to mail delays or change of addresses, they received the notice later than the notice's effective date, the Service will send the notices to payors approximately 2 or 3 weeks before their effective date. This 2-to-3-week period should be ample time to cover any mail delays.

Thus, the Service anticipates that there will be only a few instances in which a payor will receive a notice after its effective date. In such instances, the effective date of the notice is the actual date of receipt. This change is reflected in §35a.3406-1(c)(1).

Under a literal reading of the Treasury decision a payor is required to send a notice to a payee with respect to each account of the payee for which the Service or a broker notified the payor that such account contained an incorrect taxpayer identification number. Conceivably, a payee could have several accounts with a payor with incorrect taxpayer identification numbers which would require the payor to send multiple notices to a payee during a calendar year. To avoid this result, this document provides that a payor may send one notice to the payee provided that the one notice contains all the information required by the regulations. This change is reflected in §35a.3406-1(c)(2)(ii) and (f).

The Treasury decision also provides that if a payor is notified twice within 3 calendar years that a payee provided an incorrect taxpayer identification number and that incorrect taxpayer identification number is used on the account at the time the payor receives the second notice, the payor is required to impose backup withholding on the account. The payor may not stop backup withholding until the payor has been notified by the Internal Revenue Service pursuant to §35a.3406-1(h) that the payee has provided a correct taxpayer identification number to the Service.

This document amends §35a.3406-1(h) to provide that the Service will notify payors by providing the payee with a Form W-9 on which the payee has certified, under penalties of perjury, that his taxpayer identification number is correct and on which the Service places a stamp verifying that the taxpayer identification number is correct (as associated with the listed surname or business name on the form). A payee may take the Form W-9 to his payors or brokers, and the payors and brokers may obtain a copy of this Form W-9 or require the payee to execute a substitute Form W-9 in order to prevent backup withholding from starting under §35a.3406- 1(f)(3) or to stop it once it has begun. This revised procedure for notifying payors or brokers that a payee has provided a correct taxpayer identification number is reflected in this document in §35a.3406-1(h) and (j) *Example (6)* and *Example (7)*.

A question arose as to whether a notice from the Service or a broker as described in §35a.3406-1(b)(1) or (2) that did not match the information on the payee's account when the notice is received (*i.e.*, same name on each but different taxpayer identification numbers) counts as a "first" notice for determining whether a payor has received two notices of an incorrect taxpayer identification number within 3 calendar years. This document clarifies that only a notice from the Service (or a broker) that contains the same payee information as that on the payee's account is considered a "first" notice. This provision is reflected in this document in §35a.3406-1(f)(1).

This document revises A-20 and A-27 of §35a.9999-3 which concerns the application of backup withholding on payments that are reportable under section 6045. Generally, under A-20 and A-27 backup withholding applies on the sale date as defined under §1.6045-1(d)(4) of the Income Tax Regulations. Section 1.6045-1(d)(4) provides that a broker may report a sale as occurring on the date the sale is entered on the books of the broker or the date the customer becomes entitled to the gross proceeds.

A problem arises with the existing A-20 and A-27 because, effective for information returns filed with respect to sales of property occurring after December 31, 1987, §1.6045-1(d)(4) will be amended to provide that a broker shall report a "sale" as occurring on the date the "sale" is entered on the books of the broker (and not the date the customer becomes entitled to the gross proceeds). See Announcement 88-6, 1988-3 I.R.B. 52. Therefore, A-20 and A-27 are revised to require backup withholding on the "sale" date in accordance with the new rule that will be issued under section 6045.

The revised A-27 retains the provision under which a broker that is also the obligor on a debt security may elect to apply backup withholding on the payment date. However, this provision is modified under this document for "sales" of property after December 31, 1987, to allow the broker-obligor to apply backup withholding on the payment date if the payment date is later than the "sale" date.

Due Diligence

This document amends Q/A-10 of §35a.9999-1 to provide that the forms that members of certain religious groups provide to the Service to become exempt from employment taxes will be deemed an acceptable substitute certified Form W-9. These forms contain the payee's name, address, and taxpayer identification number, as provided by the Service. This provision is added because, due to religious beliefs, these groups will not obtain a taxpayer identification number from the Social Security Administration.

This document also revises the administrative-relief rule under A-56 of §35a.9999-1. Under the rule a payor who wanted to qualify for administrative relief from the penalty under section 6676(b) for filing an information return for the 1988 or a subsequent calendar year with a missing or an incorrect taxpayer identification number for a pre-1984 account for which the payor failed to undertake the mailings as described in A-5 and A-6 and in the related questions and answers on due diligence must have sent a separate mailing by June 30, 1988, to *all* payees of pre-1984 accounts and instruments who have not provided a certified taxpayer identification number to the payor and undertake nonseparate annual mailings on such accounts in subsequent calendar years. The Service announced a revision to this rule in Notice 88-77, 1988-2 C.B. 392, to provide that a payor will not be ineligible for administrative relief (for those accounts for which the required mailing was made) due to an inadvertent failure to make a mailing with respect to a few accounts that could not be located using reasonable care.

This document further revises this rule. Also, a payor will not be ineligible for administrative relief in a calendar year (on those accounts for which the required mailing was made) due to the failure to make a mailing in such year on a *de minimis* number of accounts. A *de minimis* number of accounts is the lesser of 5,000 accounts or one percent (or less) of the total number of accounts for which a mailing should have been made under A-56 in such year.

Further, in its administrative discretion the Service will not enforce the penalty for a calendar year with respect to a *de minimis* number of accounts and those accounts that could not be located using reasonable care if the payor has undertaken a mailing as described in Q/A-5 in such year. Answer 56 is being revised in response to concerns of payors that they might be subject to annual penalties under section 6676(b) because of a failure to mail to such accounts in any one year.

Thus, under the revised rules of A-56 a payor who did not make a mailing to a *de minimis* number of accounts (or those accounts that could not be located using reasonable care) would be subject to a $50 penalty for each account where no mailing was made. To avoid penalties in future years, that payor must make a separate mailing to such accounts in the following year and nonseparate mailings in all following years until a payee furnishes a certified taxpayer identification number. A payor must make a mailing at least annually with respect to *all de minimis* accounts (and *all* accounts that could not be located using reasonable care at the time of the required mailing under A-56 of section 35a.9999-1) in order to obtain administrative relief in any calendar year.

To obtain administrative relief from the penalty the Treasury decision provides that the payor must make an affirmative showing to the satisfaction of the district director or the director of the Internal Revenue Service Center that the person otherwise liable for the penalty under section 6676(b) fulfilled the requirements of Q/A-56. Many payors inquired exactly how payors are supposed to make the "affirmative showing" and by what date. Therefore, this document further amends A-56 to provide that the payor must make a written statement, under penalties of perjury, affirmatively showing to the satisfaction of the district director or director of the Internal Revenue Service Center that the payor fulfilled the requirement of A-56.

This document also amends A-38 of §35a.9999-3 which concerns the refunding of amounts that have been withheld erroneously due to an error by the payor. Several cases have come to the attention of the Service in which certain payees are subjected to backup withholding under section 3406(a)(1)(C) due to notified payee underreporting. Although these payees receive reportable interest or dividend income, that income is usually not subject to income tax due to the low income level of the payees. Therefore, withholding on their interest and dividend income under section 3406(a)(1)(C) usually occurs in error, in part, because these payees have failed to respond to the notices that the Service sends them about potential backup withholding.

Although the Service responds quickly to stop withholding in cases like these, presently there is no refund mechanism for the amounts withheld under A-39. Only amounts that are withheld erroneously can be refunded to a payee. Withholding is erroneous only if the withholding is the result of an error of the payor. Therefore, this document amends A-39 to provide that a payor will be considered to have withheld erroneously if the Service directs the payor to refund an amount withheld pursuant to section 3406(a)(1)(C).

Answer 51 of §35a.9999-3 provides that a payor of a post-1983 account or instrument who permits a payee to open an account without obtaining the payee's taxpayer identification number under penalties of perjury and files an information return with the Service with a missing or an incorrect taxpayer identification number will be liable for the $50 penalty under section 6676(b). Several payors commented that the penalty should not be imposed with respect to a calendar year if the payor has received the Form W-9 even though it was received after the account was opened.

In response to this suggestion, this document amends A-51 to provide that in its administrative discretion the Service will not enforce the penalty with respect to a calendar year if the certified taxpayer identification is obtained after the account is opened and before December 31 of such year, provided that the payor exercises due diligence in processing such number, *i.e.*, the payor uses the same care in processing the taxpayer identification number provided by the payee that a reasonably prudent payor would use in the course of the payor's business in handling account information such as account numbers and balances. A payor is still liable for the amount that should have been withheld under section 3406(a)(1)(A) due to the payee's failure to provide a certified taxpayer identification number.

This document also revises Q/A-54 of §35a.9999-3 to clarify the rules applicable to a grantor trust with ten or fewer grantors under sections 3406 and 6676(b). Under the revised rules, a grantor trust with ten or fewer grantors is not a payor for purposes of backup withholding. Thus, such a grantor trust is not required to impose backup withholding when it receives a reportable payment. Rather, the trustee of a grantor trust having ten or fewer grantors may not certify, under penalties of perjury, that the trust is not subject to backup withholding due to notified payee underreporting (when required) or that the taxpayer identification number provided by the trustee is correct unless each grantor has furnished the trustee with each such certifica tion, and the trustee uses the taxpayer identification number on any Form 1041 that is filed by the trustee. Only grantor trusts that have more than ten grantors are con sidered payors for purposes of backup withholding.

This document also clarifies in A-54 the legal obligations under section 6676(b) of grantor trusts with ten or fewer grantors.

This document also adds a new Q/A-70A to §35a.9999-3. Question and Answer 70A contains an exception to the general rules of due diligence for payors of reportable interest to life-insurance beneficiaries. The Service received several comments asserting that it is impractical to obtain a taxpayer identification number from a beneficiary prior to the time payment is required to be made to such beneficiary. This result obtains because an insured or annuitant has the unrestricted right to change the beneficiary up to the moment of death. Moreover, in many cases a taxpayer identification number cannot be obtained in advance because the beneficiaries may be designated by class, *e.g.*, issue, heirs, surviving children, rather than by name. When the identity of the beneficiary is known at the time payment is required, the payor does request the taxpayer identification number from the payee. However, in some cases, it is not provided. In such cases the payor proceeds to make a lump-sum payment to the beneficiary as required under State law and has no further contact with the beneficiary. As a result, the payor has little or no opportunity to obtain the number and files an information return with a missing taxpayer identification number for which the payor is subject to the $50 penalty. As a result of the problems experienced in this area, this document adds an exception to the due diligence rules for payors of reportable interest to life-insurance beneficiaries.

Answer 89 of §35a.9999-3 provides, in part, that in order to exercise due diligence after two notifications of an incorrect taxpayer identification number within 3 calendar years, a payor must code all subsequent information returns that are filed with the words "2nd Notice". Answer 89 further provides that the manner in which the words "2nd Notice" should be set forth on the information return will be provided in a revenue procedure issued by the Internal Revenue Service.

This provision is added to the regulations so that a payor will not be renotified a third or subsequent time that the affected payee provided the same incorrect taxpayer identification number. Because payors will not be renotified under such circumstances, payors will not have to search their records with respect to the payee.

The Service expects that setting forth the 2nd-notice indication on the information return will ease some of the administrative burdens on payors. However, the Service has not received many comments from payors on the provision. The Service is interested in receiving comments on whether or not this provision is beneficial. If the provision would not result in a net benefit to payors, the Service will consider its removal.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. A general notice of proposed rulemaking is not required by 5 U.S.C. §553 for temporary regulations. Therefore, these rules do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6) and a Regulatory Flexibility Analysis is not required.

* * * * * * *

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 35a is amended as follows:

PART 35a—TEMPORARY EMPLOYMENT TAX REGULATIONS UNDER THE INTEREST AND DIVIDEND TAX COMPLIANCE ACT OF 1983

Paragraph 1. The authority for Part 35a continues to read in part:

Authority: 26 U.S.C. 7805; * * * §35a.3406-1 also issued under 26 U.S.C. 3406(a), (b), (e), (g), (h), and (i); 26 U.S.C. 6109; and 26 U.S.C. 6676.

Par. 2. Section 35a.3406-1 is amended as follows:

1. Paragraph (a)(1) is amended by removing the words "December 31, 1987" in the first sentence and by adding in their place the words "December 31, 1988".

2. Paragraph (a)(2)(ii)(A) is amended by removing the words "sections 6041(a) and" and by adding in their place the words "either sections 6041(a) or".

3. Paragraph (a)(3)(ii) is amended by removing the word "and" in the heading and in the text and by adding in its place the word "or".

4. Paragraph (d)(2)(ii) amended by removing the words "such certification" and by adding in their place the word "it".

5. Paragraph (e) is amended by adding the words "unless Q/A-48 of §35a.9999-3 applies with respect to the accounts of a payee "immediately after the words "Internal Revenue Service pursuant to paragraph (b)(1) or (2) of this section".

6. Paragraph (j) is amended by removing the words "following examples:" in the first sentence and adding in their place the words "following examples in which it is assumed that a notice from the Internal Revenue Service is effective as of January 1, 1988, and that the payor backup withholds under paragraph (d)(1)(i) or (ii), or under paragraph (f)(3)(i) or (ii) of this section:".

7. Paragraph (j) *Example (1)* is amended by removing the word "certification" in the sixth sentence and adding in its place the words "certified Form W-9 or an acceptable substitute form (hereinafter "certification")".

8. Paragraph (j) *Example (2)* is amended by removing the words "certified taxpayer identification number" in the second sentence and adding in their place the word "certification".

9. The first paragraph of the Appendix to §35a.3406-1 is amended by adding the words "the notice published in the Federal Register on November 23, 1987 (52 FR 44871) or to" immediately after the words "similar in content to", and by adding the words " *You Must Provide Us With A Form W-9 (Even If We Already Have One On File For You).*" immediately after the words "*Important Tax Information Please Read Carefully*".

10. The fifth paragraph of the Appendix to §35a.3406-1 entitled "*What to do*" is amended by removing the words "page 3" in the first sentence immediately after the words "(listed on" and adding in their place the words "page (insert correct page number)", by adding the words "if you have never been assigned a SSN," in the third sentence immediately after the word "Also,".

11. The fourth line from the end of the Appendix to §35a.3406-1 captioned "Date" is amended by adding immediately below such line the words "(The portion below must be completed by the payor)".

12. Paragraphs (b)(5)(i), (c), (d)(1) and (2)(i), (f), (h), (j) *Example (6)* and *Example (7)*, and the paragraph in the Appendix to §35a.3406-1 entitled "Remember" are revised to read as follows:

§35a.3406-1 Imposition of backup withholding due to notification of an incorrect taxpayer identification number.

* * * * *

(b) *Notice regarding an incorrect taxpayer identification number.* * * *

(5) *Reasonable care exception*—(i) *Payors.* Payors are not required to withhold on reportable payments made to an account of a payee that could not be located with reasonable care. A payor who satisfies the following two-part facts-and-circumstances test will be considered to have exercised reasonable care for purposes of this paragraph (b)(5).

(A) Part one of the test is satisfied if the payor identifies and uses the appropriate computer or other record system on which to locate accounts of the payee subject to backup withholding under section 3406(a)(1)(B). A payor with a centralized and fully integrated computer system containing all product lines of the payor that pay reportable payments will have identified and used the appropriate system if the payor searches on such system for all accounts of the payee described in paragraph (a)(1) of this section that are subject to backup withholding. A payor whose product lines paying reportable payments are on separate computer or records systems will have identified and used the appropriate system if the payor searches for accounts of the payee on the computer or record system that contains the product line with respect to which the payor received a notification of an incorrect taxpayer identification number pursuant to paragraph (b)(1) or (2) of this section.

(B) Part two of the test is satisfied if the payor uses or inputs the appropriate data or criteria into the system that is correctly identified under paragraph (b)(5)(i)(A) of this section. In general, a payor who uses or inputs the name, taxpayer identification number, and the account number provided on the notice from the Internal Revenue Service or a broker as described in paragraph (b)(1) or (2) of this section will satisfy part two of the test. In some cases the system of a payor cannot utilize the data enumerated in the preceding sentence for locating all accounts of the payee subject to backup withholding under section 3406(a)(1)(B). In such cases the payor must use or input the appropriate data or criteria, as determined by the capability of the payor's computer or record system.

* * * * *

(c) *Notice from payors of backup withholding due to an incorrect taxpayer identification number*—(1) *In general.* If the name and taxpayer identification number listed on the notice from the Internal Revenue Service or a broker as described in paragraph (b)(1) or (2) of this section matches the name and taxpayer identification number used on the payee's account at the time the payor receives the notification of an incorrect taxpayer identification number—

(i) The payor who receives a notice from the Internal Revenue Service is required under section 3406(h)(8) to send a copy of the notice required by paragraph (b)(1) of this section or a substitute notice as described in paragraph (c)(3) of this section to the payee of the account in accordance with paragraph (c)(2) of this section (an example of the notice from the Internal Revenue Service required by section 3406(h)(8) and paragraph (b)(1) of this section is set forth in the Appendix to these temporary regulations), and

(ii) The payor who receives notification of an incorrect taxpayer identification number from a broker as described in paragraph (b)(2) of this section must send a substitute notice as described in paragraph (c)(3) of this section to the payee in accordance with paragraph (c)(2) of this section.

However, a payor is not required to send a notice as described in this paragraph (nor backup withhold under paragraph (d) of this section) with respect to any account of a payee where, due to an error of the payor, the taxpayer identification number on such account is not the number that was provided to the payor on the applicable Form W-9 (or acceptable substitute form) because, for example, the payor transposed the identification number when incorporating it into its business records. If a payor sends a substitute notice, such notice must include all the information set forth in paragraph (c)(3) of this section or must be an acceptable substitute of the notice set forth in the Federal Register on November 23, 1987 (52 FR 44871). The notice set forth in the Federal Register on November 23, 1987 (52 FR 44871) is considered an acceptable substitute notice under paragraph (c)(3) of this section. In addition to the copy of the notice required by paragraph (b)(1) of this section or the substitute notice described in paragraph (c)(3) of this section, the payor must include a Form W-9 or an acceptable substitute form (as described in A-10 of §35a.9999-1) with the notice for the payee to use to provide his name and taxpayer identification number and to certify that the taxpayer identification number is correct, or to provide his name and the taxpayer identification number that was originally furnished and to certify that such taxpayer identification number is correct. The payor is required to include a reply envelope (self-addressed) with the notice to the payee which may be, but is not required to be, postage prepaid. The envelope containing the notice and the Form W-9 (or an acceptable substitute form) must state on the outside in a bold and conspicuous manner: "Important Tax Document Enclosed". The mailing may not include any material other than the notice, the Form W-9 (or an acceptable substitute form), any documents of the payor that are necessary to change the name or taxpayer identification number (or both) on the account of the payee, and the reply envelope of the payor. The notice required by paragraph (c) of this section, and not the notice required by A-39 of

§35a.9999-1 and in the Appendix to §35a.9999-2, shall apply to those payors notified by a broker that a payee is subject to backup withholding under section 3406(a)(1)(B). For purposes of this section, the date set forth on the notice from the Internal Revenue Service (or a broker) shall be considered the date of receipt by and of notification to the payor. However, in the case of a dispute, if the payor demonstrates to the satisfaction of the Internal Revenue Service that the date of actual receipt of the notice is later than the date on the notice, the actual date shall be considered the date of receipt by and of notification to the payor.

(2) *Procedures*—(i) *In general.* The payor must send the notice described in paragraph (c) of this section to the payee within 5 business days after the date that the Internal Revenue Service or a broker notifies the payor pursuant to paragraph (b)(1) or (2) of this section. The payor must mail the notice to the payee's last known address by first-class mail. If it is the customary practice of the payor not to mail any correspondence to a payee, the payor may furnish the notice by personal delivery, by intra-office mail, or by any other means reasonably expected to furnish the notice to the payee promptly. A payor is not required to send the notice to the payee if there is currently a "do not mail" or a "stop mail hold" instruction with respect to the payee's account subject to backup withholding under section 3406(a)(1)(B). However, the payor must handle the notice in the same manner that the payor handles other correspondence of the payee.

(ii) *Two or more notices for a payee in the same calendar year.* A payor who receives, under the same payor employer identification number (or social security number), two or more notices described in paragraph (b)(1) or (2) of this section in a calendar year with respect to a payee may satisfy the requirements of this paragraph (c) with respect to such notices by sending one notice to the payee that satisfies the requirements of paragraph (c)(3) of this section.

(3) *Requirements of substitute notice to the payee.* If the payor does not send a copy of the notice received from the Internal Revenue Service pursuant to paragraph (b)(1) of this section or if the payor is notified by a broker as described in paragraph (b)(2) of this section that the payee provided an incorrect taxpayer identification number, the payor may send a substitute notice as provided for in this paragraph (c)(3). A notice to the payee will satisfy the requirements of section 3406(h)(8) and paragraph (c)(1) of this section if the notice is identical to the one set forth in the Federal Register on November 23, 1987 (52 FR 44871) (or is an acceptable substitute thereof) or if the notice—

(i) Informs the payee that the payor has been notified that the taxpayer identification number furnished by the payee is an incorrect taxpayer identification number (as defined in paragraph (a)(6) of this section);

(ii) Advises the payee of the name and taxpayer identification number combination that the Internal Revenue Service has determined to be incorrect;

(iii) Informs the payee that the payee must either—

(A) Correct the surname (or business name) or taxpayer identification number (or both) and certify, under penalties of perjury, that the newly provided taxpayer identification number is correct, or

(B) State—

(*1*) Under penalties of perjury that the taxpayer identification number originally furnished to the payor is correct and provide that number and the corresponding listed surname (or business name),

(*2*) That the Social Security Administration (or the local office of the Internal Revenue Service in the case of an incorrect employer identification number) has been contacted by the payee to resolve the problem giving rise to the notification of an incorrect taxpayer identification number, or

(C) In the case of a notification of an incorrect taxpayer identification number of an individual payee due to a name change by the payee when the payee has not communicated the change of name to the Social Security Administration—

(*1*) Contact the Social Security Administration and reassign the taxpayer identification number to the surname that is used on the account with the payor, certify under penalties of perjury, that the existing taxpayer identification number shown on the account is correct (and provide the corresponding surname used with that number), and provide a statement that the Social Security Administration has been contacted to reassign the taxpayer identification number to the surname shown on the account, or

(*2*) Use both surnames on the account with the payor (the surname currently shown on the account and the surname shown on the payee's Social Security Administration card if the payee is unable to contact the Social Security Administration at this time), provide the surnames, and certify under penalties of perjury that the furnished taxpayer identification number is correct, and

(*3*) Follow either paragraph (c)(3)(iii)(C)(*1*) or (*2*) of this section consistently with respect to all accounts with the payor;

(iv) Advises the payee of other necessary documentation (*i.e.*, account creation documents) that the payee must provide to the payor in order to change the name or taxpayer identification number (or both) on the account and how to provide such information and the information described in paragraph (c)(3)(iii) of this section to the payor;

(v) Advises the payee to contact the Social Security Administration to obtain a social security card if the payee was never assigned a social security number or to obtain a replacement social security card if the payee lost his card and does not remember his social security number;

(vi) Advises the payee that as a result of providing an incorrect taxpayer identification number, the payor is required under section 3406(a)(1)(B) of the Internal Revenue Code to begin backup withholding 20 percent of—

(A) Reportable payments made to the payee no later than after the close of the day 30 business days after the date that the payor is notified of the incorrect taxpayer identification number if the payor has not received the required Form W-9 (or an acceptable substitute form) as described in paragraph (e) of this section, and either—

(B) Any withdrawals of reportable payments by the payee (or a joint payee in the case of a joint account) that occur after the close of 7 business days after the date that the payor received notice of the incorrect taxpayer identification number and before the day that is 31 business days after the day that the payor received notice of the incorrect taxpayer identification number, if the payee has not provided the payor with the required certified Form W-9 (or an acceptable substitute form) prior to any such withdrawals, or

(C) All reportable payments made to the payee (or a joint payee in the case of a joint account) after the close of 7 business days after the date that the payor received notice of the incorrect taxpayer identification number and prior to the beginning of the period described in paragraph (c)(3)(vi)(A) of this section, if the payor has not received the required certified Form W-9 (or an acceptable substitute form) at the time of the reportable payments;

(vii) Gives the payee the date that the payor received the notice that the payee provided an incorrect taxpayer identification number;

(viii) States that the payee must complete and return the enclosed Form W-9 (or an acceptable substitute form), and, if necessary, other documents of the payor as described in paragraph (c)(3)(iv) of this section, and the statement that the payee contacted the Social Security Administration (or the Internal Revenue Service) before the time described in paragraph (c)(3)(vi) of this section in order to prevent backup withholding under section 3406(a)(1)(B) from starting, or after the time described in paragraph (c)(3)(vi) of this section to stop backup withholding once it has begun and to avoid the imposition of the penalty for failure to provide a correct taxpayer identification number; and

(ix) Advises the payee that the payor may, at its option, refund the amount withheld under section 3406(a)(1)(B) and paragraph (d)(1)(iii) of this section in accordance with the procedures described in Q/A-39 of §35a.9999-3 if the payor receives a certified Form W-9 (or an acceptable substitute form) before the beginning of the period described in paragraph (c)(3)(iv)(A)(and paragraph (d)(1)(i)) of this section.

(4) *Payor must use newly provided certified number.* If the payor receives a certified Form W-9 (or an acceptable substitute form) from the payee in the manner required in paragraph (e) of this section before the end of a calendar year, the payor shall use the name and certified taxpayer identification number on the Form W-9 (or acceptable substitute form) on information returns that the payor is required to file for reportable payments made with respect to the payee for that year and subsequent calendar years. A payor who uses the name and certified taxpayer identification number on an information return as described in this paragraph will satisfy the requirement to provide this information to the Internal Revenue Service as prescribed in section 3406(h)(9).

(d) *Period during which backup withholding is required due to notification of an incorrect taxpayer identification number*—(1) *In general.* Except as provided in paragraph (d)(2) of this section, upon receiving a notice described in paragraph (b)(1) or (2) of this section, the payor must impose backup withholding on all reportable payments made to the payee that are subject to backup withholding during the following periods:

(i) After the close of the 30th business day after the date the payor receives the notice described in paragraph (b)(1) or (2) of this section and on or before the close of the 30th calendar day after the day the payor receives from the payee the certified Form W-9 (or acceptable substitute form) as described in paragraph (e) of this section, and either—

(ii) At the time of any withdrawal by the payee (or a joint payee in the case of a joint account) that occurs after the close of 7 business days after the date the payor receives the notice described in paragraph (b)(1) or (2) of this section to the extent of reportable payments made after receiving the notice described in paragraph (b)(1) or (2) of this section and before the earlier of—

(A) The date the payor imposes backup withholding under paragraph (d)(1)(i) of this section,

(B) The date the payor receives the certified Form W-9 (or an acceptable substitute form) described in paragraph (e) of this section, or

(C) The date of the withdrawal, or

(iii) 7 business days after the date that the payor receives a notice described in paragraph (b)(1) or (2) of this section on all reportable payments made after the close of such 7 business days and prior to the beginning of the period described in paragraph (d)(1)(i) of this section.

For purposes of paragraph (d)(1)(ii), all cash withdrawals of an amount up to the amount of reportable payments made during the period beginning after the day that the payor receives the notice described in paragraph (b)(1) or (2) of this section to the end of the period described in paragraph (d)(1)(ii)(A), (B), or (C) of this section are treated as reportable payments. At the option of the payor, the term "cash" for purposes of this section may be limited to currency or a check issued to close out the account of a payee. Further, under this limitation, the term does not include a cash disbursement from an automatic teller machine nor an electronic transfer. The payor is required to backup withhold 20 percent of all reportable payments subject to backup withholding under section 3406(a)(1)(B) that are made with respect to any account of the payee where that incorrect taxpayer identification number is used (or will be used) by a payor on an information return. However, the payor is not required to backup withhold on any account that could not be located using reasonable care. See paragraph (b)(5) of this section for the definition of reasonable care. At the option of the payor, the payor may refund the amount withheld during the period described in paragraph (d)(1)(iii) if the payor receives a certified Form W-9 (or an acceptable substitute form) from the payee during such period provided that the account of the payee subject to backup withholding under this section is not also subject to backup withholding under section 3406(a)(1)(C) or (D) during such period. For purposes of the preceding sentence, the amounts withheld are deemed to be erroneously withheld as described in Q/A-39 of §35a.9999-3. If a certified Form W-9 (or an acceptable substitute form) is not received by the payor prior to the period described in paragraph (d)(1)(i), *i.e.*, within the 30-business-day period, the amounts withheld shall not be refunded unless the amounts are erroneously withheld without regard to paragraph (d)(1) of this section.

(2) *Grace periods*—(i) *Starting backup withholding.* Pursuant to section 3406(e)(5)(A), the payor may elect, on a payee-by-payee basis or in general, to begin backup withholding at any time during the 30-business-day period described in paragraph (d)(1)(i) of this section. However, a payor electing to impose backup withholding under paragraph (d)(1)(ii) of this section must withhold on a withdrawal from the account of the payee as described in paragraph (d)(1)(ii) of this section.

* * * * *

(f) *Notification of two incorrect taxpayer identification numbers within a 3-year period*—(1) *In general.* If, with respect to a payee, a payor receives a notification as described in paragraph (b)(1) or (2) of this section twice within 3 calendar years, and if an existing account of the payee reflects the incorrect taxpayer identification number when the payor receives the second notice described in paragraph (b)(1) or (2) of this section, then the payor shall—

(i) Disregard any future certified Forms W-9 or acceptable substitute forms (described in paragraph (e) of this section) furnished by the payee with respect to existing accounts with the payor unless the Form W-9 (or acceptable substitute form) is furnished pursuant to paragraph (h) of this section,

(ii) Send the notice described in paragraph (f)(2) of this section to the payee (and not the notice required under paragraph (c) of this section) within 5 business days after the date that the payor receives the notice described in this paragraph (f), and
